FINANCIAL PERFORMANCE

In the second quarter of 2003, total revenues grew by 33.8% to \$508.4m (Q2 2002: \$380.1m). Product sales rose 33.2% to \$467.4m (Q2 2002: \$350.8m). As the US dollar continued to be relatively weak in the second quarter, there was a positive currency impact of \$41.5m on product sales. In local currencies, product sales grew by 20.4%.

Royalty and license income grew 40.4% to \$41.0m (Q2 2002: \$29.2m) due to Serono's strong intellectual property rights, and now represents 8.1% of revenues. This increase included higher royalties and a one-time license payment.

Edgar Filing: SERONO S A - Form 6-K

Gross margin was 84.8% as a result of the growth of recombinant product sales.

Selling, general and administrative expenses were \$158.1m or 31.1% of total revenues (Q2 2002: \$125.6m or 33.0% of total revenues), reflecting the improvement in the company's operating leverage.

Research and development activities made good progress and expenses were \$108.5m or 21.3% of total revenues (Q2 2002: \$85.7m or 22.6% of total revenues).

In the second quarter, other operating expenses reached \$50.9m (Q2 2002: \$15.1m) influenced by the Novantone(R) licensing agreement, signed in late 2002, and overall higher amortization of intangibles.

Operating income grew by 14.9% to \$120.0m reflecting continuing cost-control management. Net financial income was \$7.0m in the second quarter (Q2 2002: \$9.5m) as a result of the continuing low interest rate environment.

Reported net income grew 13.2% to \$107.7m (Q2 2002: \$95.2m), or 7.8% in local currencies.

Reported basic earnings per share (EPS) grew 15.0% to \$6.81 per bearer share (Q2 2002: \$5.92) and \$0.17 per American Depositary Share (ADS) (Q2 2002: \$0.15). The average number of equivalent bearer shares outstanding for the three months ended June 30, 2003 was 15,824,571.

NEUROLOGY

In the second quarter of 2003, total neurology sales were \$205.5m. Rebif(R) worldwide sales were up 62.3% (42.2% in local currencies) to \$199.0m (Q2 2002: \$122.6m). Rebif(R) continued its market leadership outside the United States with sales up by 42.0% to \$156.8m (Q2 2002: \$110.4m).

In the USA, Rebif(R) sales were \$42.2m in the second quarter (Q2 2002: \$12.2m) with demand continuing to strengthen and prescriptions growing at 17.8% from the first quarter of 2003. Rebif(R) is the fastest growing MS disease modifying drug and is rapidly gaining market share in the USA. Rebif(R) IMS market share was 10.5% in total prescriptions and 15.2% in new prescriptions at the end of June.

In May, Serono and Pfizer announced(1) that the final 63-week findings from the Rebif(R) (interferon beta-1a) vs. Avonex(R) (interferon beta-1a) EVIDENCE head-to-head study show that Rebif(R) continues to be significantly more effective in reducing frequency of relapses and MRI activity as compared to Avonex(R). In June, Serono and Pfizer announced(1) that MS patients converting from Avonex(R) to Rebif(R) showed significant reduction in frequency of relapses and MRI lesion activity. These data were presented at the annual meetings of the Consortium of MS Centers and the European Neurological Society respectively.

REPRODUCTIVE HEALTH

In the second quarter, worldwide reproductive health product sales increased by 9.7% to \$183.4m (Q2 2002: \$167.1m). Sales of Gonal-F(R) grew by 13.0% (2.9% in local currencies) to \$139.5m (Q2 2002: \$123.5m) reflecting the popularity of the multidose formulation and Serono's leadership position in this therapeutic area.

Serono's core reproductive health portfolio consisting of three recombinant hormones (Gonal-F(R), Ovidrel(R), Luveris(R)) and two supporting products (Cetrotide(R), Crinone(R)) grew by 18.3% to \$155.7m. In keeping with the plan of

Edgar Filing: SERONO S A - Form 6-K

phasing out urinary products, urine-derived gonadotropins sales were \$25.3m in the second quarter (Q2 2002: \$32.6m).

In June, positive results were announced at the European Society for Human Reproduction and Embryology congress from a proof of concept clinical trial of emfilermin (r-hLIF) for improving embryo implantation. These promising results give significant hope to couples facing recurrent embryo implantation problems following in vitro fertilization as they provide evidence of the potential impact of emfilermin on their chance to become pregnant.

GROWTH AND METABOLISM

Sales of Serono's recombinant growth hormone products rose by 15.5% to \$62.2m in the second quarter (Q2 2002: \$53.9m). Saizen(R) sales increased by 32.9% (18.2% in local currencies) to \$39.2m (Q2 2002: \$29.5m). The favorable reception of the needle-free device, cool.click(TM), across Europe and its market acceptance in the USA continue to make it a popular choice with prescribers and patients. Serostim(R) sales continue to be relatively stable at \$23.0m (Q2 2002: \$24.3m).

REGIONAL SALES

In Europe, sales increased by 36.9% to \$203.4m (Q2 2002: \$148.6m). Sales in North America were \$172.5m growing at 43.6% (Q2 2002: \$120.1m). In the rest of the world, sales grew by 11.4% to \$91.5m (Q2 2002: \$82.1m).

Basic earnings per share are calculated in accordance with IAS 33 (Earnings per Share) by dividing the net income of the group, US\$167.9 million (2002 US\$164.7 million), by an appropriate number of shares. This is 11,431,665 bearer shares (2002 11,671,577) and 11,013,040 registered shares (2002 11,013,040). The total weighted average equivalent number of bearer shares is 15,836,881 (2002 16,076,793) for the six months ended June 30, 2003. As each American depository share represents ownership interest in one fortieth of a bearer share, basic and diluted earnings per American depository share is calculated as one fortieth of the earnings per bearer share.

For diluted earnings per share, the total number of bearer shares is adjusted to assume conversion of all share options granted to employees and directors. The number of bearer shares used to calculate diluted earnings per share is 11,445,711 (2002 11,691,862).
