The date of this prospectus supplement is November 21, 2002.

### RECENT DEVELOPMENTS

On November 21, 2002, we issued 356,926 shares of our common stock at a price of \$1.76 per share to 5 vendors to settle approximately \$628,190 in payables. The shares were issued without registration under the Securities Act of 1933, as amended, and the shares issued may not be offered or sold in the United States absent registration under the Securities Act or an applicable exemption from registration requirements. In connection with the settlements, we granted registration rights to the parties that will require us to file a registration statement within 60 days with the SEC in order to permit the parties to resell their shares of common stock to the public.

### DILUTION

The net tangible book value of our common stock on September 30, 2002 was \$2,081,409, or approximately \$1.31 per share. Net tangible book value per share represents the amount of our total tangible assets, less our total liabilities, divided by the total number of shares of our common stock outstanding. Dilution in net tangible book value per share to new investors represents the difference between the amount per share paid by purchasers of shares of our common stock in this offering and the net tangible book value per share of our common stock immediately afterwards. Without taking into account any other changes in net tangible book value after September 30, 2002, other than to give effect to the issuance of 356,926 shares of our common stock at \$1.76 per share pursuant to settlement agreements as discussed above and the sale of 1,000,000 shares of common stock offered by us at a price of \$2.00 per share and after deducting the estimated finders fees and estimated offering expenses payable by us, our net tangible book value would have been \$ 4,609,599 or approximately \$1.55 per share. This represents an immediate accretion in net tangible book value of approximately \$0.24 per share to existing stockholders and an immediate dilution in net tangible book value of \$0.45 per share to new investors.
