UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2014

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 001-16577

(Exact name of registrant as specified in its charter).

Michigan (State or other jurisdiction of Incorporation or organization)	38-3150651 (I.R.S. Employer Identification No.)
---	---

5151 Corporate Drive, Troy, Michigan (Address of principal executive offices) (248) 312-2000 (Registrant's telephone number, including area code)	48098-2639 (Zip code)
--	--------------------------

Not applicable
(Former name, former address and formal fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Edgar Filing: FLAGSTAR BANCORP INC - Form 10-Q

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No .

As of May 8, 2014, 56,222,107 shares of the registrant's common stock, \$0.01 par value, were issued and outstanding.

Flagstar Bancorp, Inc.

Notes to the Consolidated Financial Statements (Unaudited)

Note 1 – Nature of Business

Flagstar Bancorp, Inc. ("Flagstar" or the "Company"), the holding company for Flagstar Bank, FSB (the "Bank") is a Michigan-based savings and loan holding company founded in 1993. The Company's business is primarily conducted through its principal subsidiary, the Bank, a federally chartered stock savings bank founded in 1987. At March 31, 2014, the Company's total assets were \$9.6 billion. The Company has the largest bank headquartered in Michigan and one of the top ten largest savings banks in the United States.

In preparing these consolidated financial statements, subsequent events were evaluated through the time the financial statements were issued. The consolidated financial statements are considered issued when they are widely distributed to all stockholders and other financial statement users, or filed with the U.S. Securities and Exchange Commission ("SEC"). All material subsequent events have been either recognized in the Consolidated Financial Statements or disclosed in the Notes to the Consolidated Financial Statements.

In January 2014, the Company reorganized the manner in which its operations are managed based on core operating functions. The segments are based on an internally-aligned segment leadership structure, which is also how the results are monitored and performance assessed. The Company's business model emphasizes the delivery of a complete set of mortgage and banking products and services, including originating, acquiring, selling and servicing one-to-four family residential first mortgage loans, which we believe is distinguished by timely processing and customer service.

The Company's operations are conducted through four operating segments: Mortgage Originations, Mortgage Servicing, Community Banking and Other, which includes the remaining reported activities. The Mortgage Originations segment, in which the Company originates or purchases residential first mortgage loans throughout the country and sells them into securitization pools, primarily to Federal National Mortgage Association ("Fannie Mae"), Federal Home Loan Mortgage Corporation ("Freddie Mac") and Government National Mortgage Association ("Ginnie Mae") (collectively, the "Agencies") or as whole loans. The Mortgage Servicing segment services mortgage loans on a fee basis for others and residential mortgages held-for-investment by the Community Banking segment and mortgage servicing rights held by the Other segment. The Company has retained certain loan originations in the held-for-investment portfolio, which are held by the Community Banking segment. Mortgage loans are originated through 33 home loan centers located in 18 states, a direct to consumer call center, the Internet, wholesale brokers and correspondents.

The Company also offers a range of products and services to consumers and businesses through the Community Banking segment. As of March 31, 2014, the Company operated 106 banking centers in Michigan. The Company offers consumer products including deposit accounts, commercial loans and personal loans, including auto and boat loans. The Company offers treasury management services. Commercial products offered include deposit and sweep accounts, telephone banking, term loans and lines of credit, lease financing, government banking products and treasury management services including remote deposit and merchant services.

The Bank is subject to regulation, examination and supervision by the Office of the Comptroller of the Currency ("OCC") of the U.S. Department of the Treasury ("U.S. Treasury"). The Bank is also subject to regulation, examination and supervision by the Federal Deposit Insurance Corporation ("FDIC") and the Consumer Financial Protection Bureau (the "CFPB"). The Bank's deposits are insured by the FDIC through the Deposit Insurance Fund. The Company is subject to regulation, examination and supervision by the Board of Governors of the Federal Reserve ("Federal Reserve"). The Bank is also a member of the Federal Home Loan Bank ("FHLB") of Indianapolis.

Note 2 – Basis of Presentation, Accounting Policies and Recent Developments

The accompanying unaudited consolidated financial statements have been prepared pursuant to the rules and regulations of the SEC for interim financial information. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America ("U.S. GAAP") for complete financial statements. These interim financial statements include all adjustments, consisting of normal recurring accruals that management believes are necessary for a fair presentation of the results of operations, financial position and cash flows. The results of operations for the three months ended March 31, 2014, are not necessarily indicative of the results that may be expected for any other interim period or for the full year ending December 31, 2014. In addition, certain prior period amounts have been reclassified to conform to the current period presentation. These consolidated financial statements should be read in conjunction with the consolidated financial statements and footnotes thereto included in the Company's Annual Report on Form

Table of Contents

10-K for the year ended December 31, 2013, which are available on the Company's Investor Relations web page, at www.flagstar.com, and on the SEC website, at www.sec.gov.

Variable Interest Entities

The accompanying unaudited consolidated financial statements include variable interest entities ("VIEs") in which the Company has determined to have a controlling financial interest. The Company consolidates a VIE if it has: (i) a variable interest in the entity; (ii) the power to direct activities of the VIE that most significantly impact the entity's economic performance; and (iii) the obligation to absorb losses of the entity or the right to receive benefits from the entity that could potentially be significant to the VIE (i.e., the Company is considered to be the primary beneficiary).

A VIE is an entity that lacks equity investors or whose equity investors do not have a controlling financial interest in the entity through their equity investments. The entity that has a controlling financial interest in a VIE is referred to as the primary beneficiary and consolidates the VIE. On a quarterly basis, the Company will reassess whether it has a controlling financial interest in and is the primary beneficiary of a VIE. The quarterly reassessment process considers whether the Company has acquired or divested the power to direct the activities of the VIE through changes in governing documents or other circumstances.

The reassessment also considers whether the Company has acquired or disposed of a financial interest that could be significant to the VIE, or whether an interest in the VIE has become significant or is no longer significant. The consolidation status of the VIEs with which the Company is involved may change as a result of such reassessments. Changes in consolidation status are applied prospectively, with assets and liabilities of a newly consolidated VIE initially recorded at fair value. A gain or loss may be recognized upon deconsolidation of a VIE depending on the carrying amounts of deconsolidated assets and liabilities compared to the fair value of retained interests and ongoing contractual arrangements. The Company primarily uses VIEs for its securitization activities, in which the Company transfers whole loans or debt securities into a trust or other vehicle such that the assets are legally isolated from the creditors of the Company. Assets held in a trust can only be used to settle obligations of the trust. The creditors of these trusts typically have no recourse to the Company except in accordance with the Company's obligations under standard representations and warranties. When the Company is the servicer of whole loans held in a securitization trust, including home equity loans, the Company has the power to direct the most significant activities of the trust. The Company does not have the power to direct the most significant activities of a residential mortgage agency trust unless the Company holds substantially all of the issued securities and has the unilateral right to liquidate the trust. The Company consolidates a whole-loan securitization trust if it has the power to direct the most significant activities and also holds securities issued by the trust or has other contractual arrangements, other than standard representations and warranties, which could potentially be significant to the trust.

At June 30, 2013, the Company became the primary beneficiary of the FSTAR 2005-1 and FSTAR 2006-2 HELOC securitization trusts because the Company obtained the power to direct the activities that most significantly impact the economic performance of the trusts (power to select or remove the servicer) and the obligation to absorb expected losses and receive residual returns (support of the guarantor and holder of residual interests in trusts), which is reflected in the Consolidated Financial Statements as a VIE. See Note 8 for information on VIEs.

Recently Issued Accounting Pronouncements

From time to time, new accounting pronouncements are issued by the Financial Accounting Standards Board ("FASB") or other standard setting bodies that are adopted by the Company as of the specified effective date. Unless otherwise discussed, the impact of recently issued standards that are not yet effective will not have a material impact on the Consolidated Financial Statements or the Notes thereto or results of operations upon adoption.

In January 2014, the FASB issued ASU No. 2014-04, "Receivables-Troubled Debt Restructurings by Creditors (Topic 310-40): Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure." The guidance amends the guidance in the FASB Accounting Standards Codification Topic 310-40, "Receivables - Troubled Debt Restructurings by Creditors," in efforts to reduce diversity in practice through clarifying when an in substance repossession or foreclosure occurs. Essentially, the guidance addresses when a creditor should be considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan so that the loan should be derecognized and the real estate property recognized in the financial statements. This guidance is effective prospectively, for annual and interim periods, beginning after December 15, 2014. The adoption of the guidance is not expected to have a material impact on the consolidated financial statements or the Notes thereto.

Table of Contents

Recent Developments

Organizational Restructuring

On January 16, 2014, the Company completed an organizational restructuring to reduce expenses consistent with its previously communicated strategy of optimizing its cost structure across all business lines. As part of this restructuring initiative, the Company has reduced full-time equivalents by approximately 350 during the first quarter 2014. Including the restructuring completed in the third quarter 2013, the Company has reduced staffing levels across the organization by approximately 600 full-time equivalents from its September 30, 2013 level.

Sale of Mortgage Servicing Rights

On December 18, 2013, the Company entered into a definitive agreement to sell \$40.7 billion unpaid principal balance (net of write downs) of its MSR portfolio to Matrix Financial Services Corporation ("Matrix"), a wholly owned subsidiary of Two Harbors Investment Corp. Covered under the agreement are certain mortgage loans serviced for both Fannie Mae and Ginnie Mae, originated primarily after 2010. Simultaneously, the Company entered into an agreement with Matrix to subservice the residential mortgage loans sold to Matrix. As a result, the Company will receive subservicing income and retain a portion of the ancillary fees to be paid as the subservicer of the loans.

Note 3 – Fair Value Measurements

The Company utilizes fair value measurements to record certain assets and liabilities at fair value and to determine fair value disclosures. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability through an orderly transaction between market participants at the measurement date. The determination of fair values of financial instruments often requires the use of estimates. In cases where quoted market values in an active market are not available, the Company uses present value techniques and other valuation methods to estimate the fair values of its financial instruments. These valuation models rely on market-based parameters when available, such as interest rate yield curves, credit spreads or unobservable inputs. Unobservable inputs may be based on management's judgment, assumptions and estimates related to credit quality, the Company's future earnings, interest rates and other relevant inputs. These valuation methods require considerable judgment and the resulting estimates of fair value can be significantly affected by the assumptions made and methods used.

Valuation Hierarchy

U.S. GAAP establishes a three-level valuation hierarchy for disclosure of fair value measurements that is based on the transparency of the inputs used in the valuation process. The three levels of the hierarchy, highest ranking to lowest, are as follows.

Level 1 - Quoted prices (unadjusted) for identical assets or liabilities in active markets in which the Company can participate as of the measurement date;

Level 2 - Quoted prices for similar instruments in active markets, and other inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument; and

Level 3 - Unobservable inputs that reflect the Company's own assumptions about the expectations that market participants would use in pricing an asset or liability.

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input within the valuation hierarchy that is significant to the overall fair value measurement. Transfers between levels of the fair

value hierarchy are recognized at the end of the reporting period.

Table of Contents

The following is a description of the valuation methodologies used for instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy.

Assets

Investment securities available-for-sale. These securities are comprised of U.S. government sponsored agencies and municipal obligations. The Company measures fair value using prices obtained from pricing services. A review is performed on the security prices received from the pricing services, which includes discussion and analysis of the inputs used by the pricing services to value our securities. Where possible, fair values are generated using market inputs including quoted prices (the closing price in an exchange markets), bid prices (the price at which a buyer stands ready to purchase) and other market information. For fixed income securities that are not actively traded, the pricing services use alternative methods to determine fair value for the securities, including; quotes for similar fixed-income securities, matrix pricing, discounted cash flow using benchmark curves or other factors to determine fair value. U.S. government sponsored agencies are classified within Level 1 of the valuation hierarchy and all other debt securities are classified as Level 2 of the valuation hierarchy.

Loans held-for-sale. The Company generally estimates the fair value of loans held-for-sale based on quoted market prices for securities backed by similar types of loans. Where quoted market prices were available, such market prices were utilized as estimates for fair values. Otherwise, the fair value of loans was computed by discounting cash flows using observable inputs inclusive of interest rates, prepayment speeds and loss assumptions for similar collateral. These measurements are classified as Level 2.

Loans held-for-investment. Loans held-for-investment are generally recorded at amortized cost. The Company does not record these loans at fair value on a recurring basis. However, from time to time, a loan becomes impaired when it is probable that payment of interest and principal will not be made in accordance with the contractual terms of the loan agreement. Once a loan is identified as impaired, the fair value of the impaired loan is estimated using one of several methods, including collateral value, market value of similar debt, or discounted cash flows. The fair value of the underlying collateral is determined, where possible, using market prices derived from appraisals or broker price opinions which are considered to be Level 3. Fair value may also be measured using the present value of expected cash flows discounted at the loan's effective interest rate. The Company records the impaired loans as a non-recurring Level 3 valuation.

Loans held-for-investment on a recurring basis are loans that were previously recorded as loans held-for-sale but subsequently transferred to the held-for-investment category. As the Company selected the fair value option for the held-for-sale loans, they continue to be reported at fair value and measured consistent with the Level 2 methodology for loans held-for-sale.

The HELOC loans associated with the FSTAR 2005-1 and FSTAR 2006-2 securitization trusts have been recorded in the Consolidated Financial Statement as loans held-for-investment. These loans are recorded at fair value using the present value of expected cash flows discounted at market rates typical of assets with similar risk profiles. The Company records these loans as a recurring Level 3 valuation.

Also, included in loans held-for-investment are the second mortgage loans associated with the previous FSTAR 2006-1 mortgage securitization trust. The loans are carried at fair value and valued using a discounted estimated net future cash flow model and therefore classified within the Level 3 valuation hierarchy as the model utilizes significant inputs which are unobservable. See Note 8 - Private-Label Securitization and Variable Interest Entities for additional information.

Reposessed assets. Loans on which the underlying collateral has been reposessed are adjusted to fair value less costs to sell upon transfer to reposessed assets. Subsequently, reposessed assets are carried at the lower of carrying value or fair value, less anticipated marketing and selling costs. Fair value is generally based upon third-party appraisals or internal fair value estimates based on reposessed asset experience and considered a Level 3 classification.

MSRs. The current market for MSRs is not sufficiently liquid to provide participants with quoted market prices. Therefore, the Company uses an option-adjusted spread valuation approach to determine the fair value of MSRs. This approach consists of projecting servicing cash flows under multiple interest rate scenarios and discounting these cash flows using risk-adjusted discount rates. The key assumptions used in the valuation of MSRs include mortgage prepayment speeds and discount rates. Management obtains third-party valuations of the MSR portfolio on a quarterly basis from independent valuation experts to assess the reasonableness of the fair value calculated by its internal valuation model. In certain circumstances, based on the probability of the completion of a sale of MSRs pursuant to a bona-fide purchase offer, the Company considers the bid price of that offer and identifiable transaction costs in comparison to the calculated fair value and may adjust the estimate of fair value to reflect the terms of the pending transaction. Due to the nature of the valuation inputs, MSRs are classified within Level 3 of

Table of Contents

the valuation hierarchy. See Note 9 - Mortgage Servicing Rights, for the key assumptions used in the residential MSR valuation process.

Derivative financial instruments. Certain classes of derivative contracts are listed on an exchange and are actively traded, and they are therefore classified within Level 1 of the valuation hierarchy. These include U.S. Treasury futures and U.S. Treasury options. The Company's forward loan sale commitments and interest rate swaps are valued based on quoted prices for similar assets in an active market with inputs that are observable and are classified within Level 2 of the valuation hierarchy. Rate lock commitments are valued using internal models with significant unobservable market parameters and therefore are classified within Level 3 of the valuation hierarchy. The Company assessed the significance of the impact of the credit valuation adjustments on the overall valuation of its derivative positions and determined that the credit valuation adjustments were not significant to the overall valuation of its derivatives. The derivatives are reported in either other assets or other liabilities on the Consolidated Statements of Financial Condition.

Liabilities

Warrants. Warrant liabilities are valued using a binomial lattice model and are classified within Level 2 of the valuation hierarchy. Significant observable inputs include expected volatility, a risk free rate and an expected life. Warrant liabilities are reported in "other liabilities" on the Consolidated Statements of Financial Condition.

Long-term debt. The Company records the long-term debt associated with the FSTAR 2005-1 and FSTAR 2006-2 HELOC securitization trusts at fair value. The fair value of the debt is estimated using quantitative models which incorporate observable and, in some instances, unobservable inputs including security prices, interest rate yield curves, option volatility, currency, commodity or equity rates and correlations between these inputs. The Company also considers the impact of its own credit spreads in determining the discount rate used to value these liabilities. The credit spread is determined by reference to observable spreads in the secondary bond markets, which are considered to be Level 3. The Company records this debt as a recurring Level 3 valuation.

Litigation settlement. On February 24, 2012, the Company announced that the Bank had entered into an agreement (the "DOJ Agreement") with the U.S. Department of Justice ("DOJ") relating to certain underwriting practices associated with loans insured by the Federal Housing Administration ("FHA") of the Department of Housing and Urban Development ("HUD"). The Bank and the DOJ entered into the DOJ Agreement pursuant to which the Bank agreed to comply with all applicable HUD and FHA rules related to the continued participation in the direct endorsement lender program, make an initial payment of \$15.0 million within 30 business days of the effective date of the DOJ Agreement, make payments of approximately \$118.0 million contingent upon the occurrence of certain future events (the "Additional Payments"), and complete a monitoring period by an independent third party chosen by the Bank and approved by HUD. The Company made the initial payment of \$15.0 million on April 3, 2012.

The Company elected the fair value option to account for the liability representing the obligation to make Additional Payments under the DOJ Agreement. As of March 31, 2014, the Bank has accrued \$94.0 million, which represents the fair value of the Additional Payments. The signed DOJ Agreement establishes a legally enforceable contract with a stipulated payment plan that meets the definition of a financial liability.

At March 31, 2014 and December 31, 2013, the cash flows were discounted using a 9.5 percent and 9.9 percent, respectively, discount rate that is inclusive of the risk free rate based on the expected duration of the liability and an adjustment for non-performance risk that represents the Company's credit risk. The model assumes that the Company will have met substantially all of the stipulations required for the commencement of payments to the DOJ.

The liability is classified within Level 3 of the valuation hierarchy given the projections of earnings and growth rate assumptions are unobservable inputs. The litigation settlement is included in other liabilities on the Consolidated Financial Statements and changes in the fair value of the litigation settlement will be recorded each quarter in other noninterest expense on the Consolidated Statements of Operations. See Note 19 - Legal Proceedings, Contingencies and Commitments, for further information on the DOJ litigation settlement.

Table of Contents

Assets and liabilities measured at fair value on a recurring basis

The following tables present the financial instruments carried at fair value as of March 31, 2014 and December 31, 2013, by caption on the Consolidated Statement of Financial Condition and by level in the valuation hierarchy (as described above).

	Level 1	Level 2	Level 3	Total Fair Value

A determination to classify a financial instrument within Level 3 of the valuation hierarchy is based upon the significance of the unobservable inputs to the overall fair value measurement. However, Level 3 financial instruments typically include, in addition to the unobservable or Level 3 inputs, observable inputs (that is, inputs that are actively quoted and can be validated to external sources). Also, the Company manages the risk associated with the observable components of Level 3 financial instruments using securities and derivative positions that are classified within Level 1 or Level 2 of the valuation hierarchy; these Level 1 and Level 2 risk management instruments are not included in the Level 3 rollforward table below, and therefore the gains and losses in the tables do not reflect the effect of the Company's risk management activities related to such Level 3 instruments. If the market for an instrument becomes more liquid or active and pricing models become available which allow for readily observable inputs, the Company will transfer the instruments from Level 3 to Level 2 valuation hierarchy.

The Company had no transfers of assets or liabilities recorded at fair value between the fair value Levels for the three months ended March 31, 2014 and 2013.

Table of Contents

Fair value measurements using significant unobservable inputs

The tables below include a roll forward of the Consolidated Statement of Financial Condition amounts for the three months ended March 31, 2014 and 2013 (including the change in fair value) for financial instruments classified by the Company within Level 3 of the valuation hierarchy.

(1)

Realized gains (losses), including unrealized losses deemed other-than-temporary and related to credit issues, are reported in noninterest income.

- U.S. government agency investment securities available-for-sale are valued predominantly using quoted
(2) broker/dealer prices with adjustments to reflect any assumptions a willing market participant would include in its valuation. Non-agency CMOs investment securities available-for-sale are valued using internal valuation models and pricing information from third parties.
- (3) Reflects the changes in the unrealized gains (losses) related to financial instruments held at the end of the period.

Table of Contents

The following tables present the quantitative information about recurring Level 3 fair value financial instruments and the fair value measurements as of March 31, 2014 and December 31, 2013.

	Fair Value	Valuation Technique	Unobservable Input	Range (Weighted Average)
March 31, 2014	(Dollars in thousands)			
Assets				
Second mortgage loans	\$61,540	Discounted cash flows	Discount rate Prepay rate - 12 month historical average CDR rate - 12 month historical average	7.1% - 10.7% (8.9%) 8.8% - 13.1% (11.0%) 2.2% - 3.3% (2.7%)
FSTAR 2005-1 HELOC loans	\$75,998	Discounted cash flows	Discount rate Prepay rate - 3 month historical average Cumulative loss rate Loss severity	5.6% - 8.4% (7.0%) 6.4% - 9.6% (8.0%) 11.7% - 17.5% (14.6%) 80.0% - 120.0% (100.0%)
FSTAR 2006-2 HELOC loans	\$74,597	Discounted cash flows	Discount rate Prepay rate - 3 month historical average Cumulative loss rate Loss severity	7.2% - 10.8% (9.0%) 8.0% - 12.0% (10.0%) 40.0% - 60.1% (50.1%) 80.0% - 120.0% (100.0%)
Mortgage servicing rights	\$320,231	Discounted cash flows	Option adjusted spread Constant prepayment rate Weighted average cost to service per loan	7.6% - 11.3% (9.4%) 7.5% - 10.9% (9.3%) 59.0% - 88.5% (73.8%)
Rate lock commitments	\$21,276	Consensus pricing	Origination pull-through rate	65.7% - 98.5% (82.1%)
Liabilities				
FSTAR 2005-1 Long-term debt	\$(53,354)	Discounted cash flows	Discount rate Prepay rate - 3 month historical average Cumulative loss rate Loss severity	5.6% - 8.4% (7.0%) 6.4% - 9.6% (8.0%) 11.7% - 17.5% (14.6%) 80.0% - 120.0% (100.0%)
FSTAR 2006-2 Long-term debt	\$(48,356)	Discounted cash flows	Discount rate Prepay rate - 3 month historical average Cumulative loss rate Loss severity	7.2% - 10.8% (9.0%) 8.0% - 12.0% (10.0%) 40.0% - 60.1% (50.1%) 80.0% - 120.0% (100.0%)
Litigation settlement	\$(94,000)	Discounted cash flows	Asset growth rate MSR growth rate Return on assets (ROA) improvement Peer group ROA	4.4% - 6.6% (5.5%) 0.9% - 1.4% (1.2%) 0.02% - 0.04% (0.03%) 0.5% - 0.8% (0.7%)

Table of Contents

	Fair Value	Valuation Technique	Unobservable Input	Range (Weighted Average)
December 31, 2013	(Dollars in thousands)			
Assets				
Second mortgage loans	\$64,685	Discounted cash flows	Discount rate Prepay rate - 12 month historical average CDR rate - 12 month historical average	7.1% - 10.7% (8.9%) 10.5% - 15.7% (13.1%) 2.2% - 3.2% (2.7%)
FSTAR 2005-1 HELOC loans	\$78,009	Discounted cash flows	Discount rate Prepay rate - 3 month historical average Cumulative loss rate Loss severity	5.6% - 8.4% (7.0%) 12.8% - 19.2% (16.0%) 11.6% - 17.4% (14.5%) 80.0% - 120.0% (100.0%)
FSTAR 2006-2 HELOC loans	\$77,003	Discounted cash flows	Discount rate Prepay rate - 3 month historical average Cumulative loss rate Loss severity	7.2% - 10.8% (9.0%) 9.6% - 14.4% (12.0%) 39.9% - 59.8% (49.9%) 80.0% - 120.0% (100.0%)
Mortgage servicing rights	\$284,678	Discounted cash flows	Origination adjusted spread Constant prepayment rate Weighted average cost to service per loan	5.9% - 8.9% (7.7%) 9.7% - 14.0% (11.9%) 59.1% - 88.6% (73.8%)
Rate lock commitments	\$10,329	Consensus pricing	Origination pull-through rate	65.9% - 98.8% (82.3%)
Liabilities				
FSTAR 2005-1 Long-term debt	\$(55,172)	Discounted cash flows	Discount rate Prepay rate - 3 month historical average Cumulative loss rate Loss severity	5.6% - 8.4% (7.0%) 12.8% - 19.2% (16.0%) 11.6% - 17.4% (14.5%) 80.0% - 120.0% (100.0%)

Litigation settlement	\$(93,000)	Discounted cash flows	Asset growth rate MSR growth rate Return on assets (ROA) improvement Peer group ROA	4.4% - 6.6% (5.5%) 0.9% - 1.4% (1.2%) 0.02% - 0.04% (0.03%) 0.5% - 0.8% (0.7%)

The significant unobservable inputs used in the fair value measurement of the second mortgage loans associated with the FSTAR 2006-1 mortgage securitization trust are discount rates, prepayment rates and default rates. Significant increases (decreases) in the discount rate in isolation would result in a significantly lower (higher) fair value

measurement. Increases in both prepay rates and default rates in isolation result in a higher fair value; however, generally a change in the assumption used for the probability of default is accompanied by a directionally opposite change in the assumption used for prepayment rates, which would offset a portion of the fair value change.

The significant unobservable inputs used in the fair value measurement of the HELOC loans and long-term debt associated with the FSTAR 2005-1 and FSTAR 2006-2 securitization trusts are discount rates, prepayment rates, loss rates and loss severity. Significant increases (decreases) in the discount rate in isolation would result in a significantly lower (higher) fair value measurement. Increases (decreases) in prepay rates in isolation would result in a higher (lower) fair value measurement while increases (decreases) in loss rates in isolation would result in a lower (higher) fair value. Significant increases (decreases) in the loss severity rate in isolation would result in a significantly lower (higher) fair value measurement.

The significant unobservable inputs used in the fair value measurement of the MSR are option adjusted spreads, prepayment rates, and cost to service. Significant increases (decreases) in all the assumptions in isolation would result in a significantly lower (higher) fair value measurement.

The significant unobservable input used in the fair value measurement of the rate lock commitments is the pull through rate. The pull through rate is a statistical analysis of the Company's actual rate lock fallout history to determine the sensitivity of the residential mortgage loan pipeline compared to interest rate changes and other deterministic values. New market prices are applied based on updated loan characteristics and new fall out ratios (i.e., the inverse of the pull through rate) are applied accordingly. Significant increases (decreases) in the pull through rate in isolation would result in a significantly higher (lower) fair value measurement. Generally, a change in the assumption utilized for the probability of default is accompanied by a directionally similar change in the assumption utilized for the loss severity and a directionally opposite change in assumption utilized for prepayment rates.

The significant unobservable inputs used in the fair value measurement of the DOJ litigation settlement are future balance sheet and growth rate assumptions for overall asset growth, MSR growth, peer group return on assets and return on

Table of Contents

assets improvement. The current assumptions are based on management's approved, strategic performance targets beyond the current strategic modeling horizon (2014). The Bank's target asset growth rate post 2014 is based off of growth in the balance sheet. Significant increases (decreases) in the bank's growth rate in isolation would result in a significantly lower (higher) fair value measurement. Significant increases (decreases) in the bank's MSR growth rate in isolation would result in a marginally lower (higher) fair value measurement. Significant increases (decreases) in the peer group's return on assets improvement in isolation would result in a marginally higher (lower) fair value measurement. Significant increases (decreases) in the bank's return on assets improvement in isolation would result in a marginally higher (lower) fair value measurement.

The Company also has assets that under certain conditions are subject to measurement at fair value on a non-recurring basis. These assets are measured at the lower of cost or fair value and had a fair value below cost at the end of the period as summarized below.

Assets Measured at Fair Value on a Non-recurring Basis

	Level 3 (Dollars in thousands)
March 31, 2014	
Impaired loans held-for-investment (1)	
Residential first mortgage loans	\$50,585
Commercial real estate loans	1,500
Reposessed assets (2)	31,076
Totals	\$83,161
December 31, 2013	
Impaired loans held-for-investment (1)	
Residential first mortgage loans	\$68,252
Commercial real estate loans	1,500
Reposessed assets (2)	36,636
Totals	\$106,388

The Company recorded \$9.9 million and \$37.5 million in fair value losses on impaired loans (included in provision (1) for loan losses on the Consolidated Statements of Operations) during the three months ended March 31, 2014 and 2013, respectively.

The Company recorded \$0.5 million and \$0.8 million in losses related to write-downs of reposessed assets based (2) on the estimated fair value of the specific assets, and recognized net gains of \$0.8 million and \$4.4 million on sales of reposessed assets (both write-downs and net gains/losses are included in asset resolution expense on the Consolidated Statements of Operations) during the three months ended March 31, 2014 and 2013, respectively.

The following tables present the quantitative information about non-recurring Level 3 fair value financial instruments and the fair value measurements as of March 31, 2014 and December 31, 2013.

	Fair Value	Valuation Technique	Unobservable Input	Range (Weighted Average)
March 31, 2014	(Dollars in thousands)			
Impaired loans held-for-investment				
Residential first mortgage loans	\$50,585	Fair value of collateral	Loss severity discount	0% - 100% (46.2%)
Commercial real estate loans	\$1,500	Fair value of collateral	Loss severity discount	0% - 100% (39.6%)
Reposessed assets	\$31,076	Fair value of collateral	Loss severity discount	0% - 100% (44.9%)
	Fair Value	Valuation Technique	Unobservable Input	Range (Weighted Average)
December 31, 2013	(Dollars in thousands)			

Edgar Filing: FLAGSTAR BANCORP INC - Form 10-Q

Impaired loans held-for-investment

Residential first mortgage loans	\$68,252	Fair value of collateral	Loss severity discount	0% - 100% (44.9%)
Commercial real estate loans	\$1,500	Fair value of collateral	Loss severity discount	0% - 100% (39.6%)
Reposessed assets	\$36,636	Fair value of collateral	Loss severity discount	0% - 100% (45.3%)

Table of Contents

The Company has certain impaired residential first mortgage and commercial real estate loans that are measured at fair value on a nonrecurring basis. Such amounts are generally based on the fair value of the underlying collateral supporting the loan. Appraisals or other third party price opinions are generally obtained to support the fair value of the collateral and incorporate measures such as recent sales prices for comparable properties. In cases where the carrying value exceeds the fair value of the collateral less cost to sell, an impairment charge is recognized.

Reposessed assets are measured and reported at fair value through a charge-off to the allowance for loan losses based upon the fair value of the reposessed asset. The fair value of reposessed assets, upon initial recognition, are estimated using Level 3 inputs based on customized discounting criteria. The significant unobservable inputs used in the Level 3 fair value measurements of the Company's impaired loans and reposessed assets included in the table above primarily relate to internal valuations or analysis.

Fair Value of Financial Instruments

The accounting guidance for financial instruments requires disclosures of the estimated fair value of certain financial instruments and the methods and significant assumptions used to estimate their fair values. Certain financial instruments and all non-financial instruments are excluded from the scope of this guidance. Accordingly, the fair value disclosures required by this guidance are only indicative of the value of individual financial instruments as of the dates indicated and should not be considered an indication of the fair value of the Company.

Table of Contents

The following table presents the carrying amount and estimated fair value of certain financial instruments that are carried either at fair value or cost.

The methods and assumptions used by the Company in estimating fair value of financial instruments that were not previously disclosed, are as follows:

Cash and cash equivalents. Due to their short-term nature, the carrying amount of cash and cash equivalents approximates fair value.

Loans repurchased with government guarantees. The fair value of loans is estimated by using internally developed discounted cash flow models using market interest rate inputs as well as management's best estimate of spreads for similar collateral.

Loans held-for-investment. The fair value of loans is estimated by using internally developed discounted cash flow models using market interest rate inputs as well as management's best estimate of spreads for similar collateral.

Federal Home Loan Bank stock. No secondary market exists for Federal Home Loan Bank stock. The stock is bought and sold at par by the Federal Home Loan Bank. Management believes that the recorded value is the fair value.

Table of Contents

Deposit accounts. The fair value of demand deposits and savings accounts approximates the carrying amount. The fair value of fixed-maturity certificates of deposit is estimated using the rates currently offered for certificates of deposit with similar remaining maturities.

Federal Home Loan Bank advances. Rates currently available to the Company for debt with similar terms and remaining maturities are used to estimate the fair value of the existing debt.

Long-term debt. The fair value of the long-term debt is estimated based on a discounted cash flow model that incorporates the Company's current borrowing rates for similar types of borrowing arrangements.

Fair Value Option

The Company elected to measure at fair value certain financial assets and financial liabilities. The Company elected fair value option for the following items to mitigate a divergence between accounting losses and economic exposure.

The Company elected the fair value option for held-for-sale loans, originated post 2009, and the litigation settlement liability to better reflect the management of these financial instruments on a fair value basis. Loan held-for-investment include loans that were originated as loans held-for-sale and later transferred to loans held-for-investment at fair value. Interest income on loans held-for-sale is accrued on the principal outstanding primarily using the "simple-interest" method. Interest expense on the litigation settlement will be included in the overall change in fair value of the liability each quarter. Direct loan origination cost and fees on loans held-for-sale are recognized in income at origination.

As of June 30, 2013, the Company dissolved the FSTAR 2006-1 mortgage securitization trust and transferred the second mortgage loans, underlying the collapsed FSTAR 2006-1 mortgage securitization which were carried at fair value in available-for-sale investment securities. The change in fair value relating to the loans is recorded in other noninterest income.

As of June 30, 2013, the Company elected the fair value option for the assets and liabilities of reconsolidated VIEs related to the HELOC securitization trusts. This option is generally elected for newly consolidated VIEs for which predominantly all of the Company's interests, prior to consolidation, are carried at fair value with changes in fair value recorded to earnings. The change in fair value relating to the assets and liabilities of these transactions is recorded in other noninterest income. Accordingly, such an election allows the Company to continue fair value accounting through earnings for those interests and eliminate income statement mismatch otherwise caused by differences in the measurement basis of the consolidated VIEs assets and liabilities.

The Company elected the fair value option to account for the liability representing the obligation to make Additional Payments under the DOJ Agreement. The signed DOJ Agreement establishes a legally enforceable contract with a stipulated payment plan that meets the definition of a financial liability. The Company made the fair value election as of December 31, 2011, the date the Company first recognized the financial instrument in its financial statements.

The following table reflects the change in fair value included in earnings (and the account recorded in) for the assets and liabilities for which the fair value option has been elected.

Other performing loans						
Loans held-for-sale	\$1,321,719	\$1,372,978	\$51,259	\$1,109,517	\$1,140,507	\$30,990
Loans held-for-investment	252,840	230,106	(22,734)	257,665	234,308	(23,357)
Total other performing loans	\$1,574,559	\$1,603,084	\$28,525	\$1,367,182	\$1,374,815	\$7,633
Total loans						
Loans held-for-sale	\$1,321,719	\$1,372,978	\$51,259	\$1,109,517	\$1,140,507	\$30,990
Loans held-for-investment	262,609	233,854	(28,755)	268,429	238,322	(30,107)
Total loans	\$1,584,328	\$1,606,832	\$22,504	\$1,377,946	\$1,378,829	\$883
Liabilities						
Long-term debt	\$(111,077)	\$(101,710)	\$(9,367)	\$(116,504)	\$(105,813)	\$(10,691)
Litigation settlement	N/A (1)	(94,000)	N/A (1)	N/A (1)	(93,000)	N/A (1)

Remaining principal outstanding is not applicable to the litigation settlement because it does not obligate the (1) Company to return a stated amount of principal at maturity, but instead return an amount based upon performance on the underlying terms in the Agreement.

Note 4 – Investment Securities

As of March 31, 2014 and December 31, 2013, investment securities were comprised of the following.

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
(Dollars in thousands)				
March 31, 2014				
Available-for-sale securities				
U.S. government sponsored agencies	\$1,198,397	\$2,790	\$(6,121)	\$1,195,066
Municipal obligations	12,364	—	—	12,364
Total available-for-sale securities	\$1,210,761	\$2,790	\$(6,121)	\$1,207,430
December 31, 2013				
Available-for-sale securities				
U.S. government sponsored agencies	\$1,037,289	\$1,546	\$(10,587)	\$1,028,248
Municipal obligations	17,300	—	—	17,300
Total available-for-sale securities	\$1,054,589	\$1,546	\$(10,587)	\$1,045,548

Available-for-sale securities

Securities available-for-sale are carried at fair value, with unrealized gains and losses reported as a component of other comprehensive loss to the extent they are temporary in nature. Credit related declines in the securities are classified as other-than-temporary impairments ("OTTI") and are reported as a separate component of noninterest income within the Consolidated Statement of Operations. OTTI is considered to have occurred if (1) if the Company intends to sell the security; (2) if it is more

Table of Contents

likely than not the Company will be required to sell the security before recovery of its amortized cost basis; or (3) the present value of expected cash flows is not sufficient to recover all contractually required principal and interest payments.

The Company purchased \$206.9 million and zero U.S. government sponsored agencies during the three months ended March 31, 2014 and 2013, respectively. There were no municipal obligations purchased during the three months ended March 31, 2014 and 2013, respectively.

The Company has pledged available-for-sale securities, primarily U.S. government sponsored agencies, to collateralize lines of credit and/or borrowings with Fannie Mae. At March 31, 2014, the Company pledged \$4.1 million of available-for-sale securities, compared to \$7.8 million at December 31, 2013.

The following table summarizes by duration the unrealized loss positions on investment securities available-for-sale.

Type of Security	Unrealized Loss Position with Duration 12 Months and Over			Unrealized Loss Position with Duration Under 12 Months		
	Fair Value	Number of Securities	Unrealized Loss	Fair Value	Number of Securities	Unrealized Loss
March 31, 2014	(Dollars in thousands)					
U.S. government sponsored agencies	\$—	—	\$—	\$828,973	66	\$(6,121)
December 31, 2013						
U.S. government sponsored agencies	\$—	—	\$—	\$825,308	63	\$(10,587)

The credit losses in the portfolio reflect the economic conditions present in the United States over the course of the last several years and the forecasted effect of changes in such conditions, including changes in the forecast level of home prices. The continued decline in the delinquency rates of the mortgages in the underlying securitization suggest a stabilization of expected future defaults and reflect the recent improvements in the housing market.

At March 31, 2014, the Company had no OTTI due to credit losses. At March 31, 2013, the cumulative amount of OTTI due to credit losses totaled \$2.8 million on one mortgage securitization.

Gains (losses) on sales for available-for-sale securities are reported in net gain on securities available-for-sale in the Consolidated Statements of Operations. During the three months ended March 31, 2014, there were \$18.7 million sales of U.S. government sponsored agencies, resulting in a gain of \$0.2 million, compared to no sales of U.S. government sponsored agencies during the three months ended March 31, 2013.

Note 5 – Loans Held-for-Sale

At March 31, 2014 and December 31, 2013, loans held-for-sale totaled \$1.7 billion and \$1.5 billion, which includes residential first mortgage loans. The increase in the balance of loans held-for-sale was primarily due to loan originations exceeding loan sales during the three months ended March 31, 2014.

At March 31, 2014 and December 31, 2013, \$1.4 billion and \$1.1 billion of loans held-for-sale were recorded at fair value, respectively, under the fair value option. Such loans will be reported at fair value with any adjustments in fair value recorded through the income statement. The Company estimates the fair value of mortgage loans based on quoted market prices for securities backed by similar types of loans for which quoted market prices were available. The fair values of loans were estimated by discounting estimated cash flows using management's best estimate of market interest rates for similar collateral.

At March 31, 2014 and December 31, 2013, \$300.9 million and \$340.0 million of loans held-for-sale were recorded at lower of cost or fair value based on a decision to sell the loans. Certain loans were transferred into the held-for-sale portfolio from the held-for-investment portfolio. After the transfer, any amount by which cost exceeded fair value was recorded as a valuation allowance.

Table of Contents

The following table sets forth the activity related to residential first mortgage loans held-for-sale.

	Three Months Ended March 31,	
	2014	2013
	(Dollars in thousands)	
Balance at beginning of period	\$1,480,418	\$3,939,720
Net loan originations	4,741,872	12,682,793
Net loans sold, servicing retained	(4,554,735)	(13,129,712)
Net loans sold, servicing released	(23,045)	(111,777)
Other loan sales	(303,495)	(859,025)
Loan amortization and prepayments	56,335	216,885
Loans transferred from (to) other loan portfolios	276,413	(61,645)
Balance at end of period	\$1,673,763	\$2,677,239

The Company has pledged certain loans held-for-sale to collateralize lines of credit and/or borrowings with the Federal Home Loan Bank of Indianapolis. At March 31, 2014 and December 31, 2013, the Company pledged \$1.4 billion and \$1.2 billion, respectively, of loans held-for-sale.

Note 6 – Loans Repurchased with Government Guarantees

Pursuant to Ginnie Mae servicing guidelines, the Company has the unilateral option to repurchase certain delinquent loans (loans past due 90 days or more) securitized in Ginnie Mae pools, if the loans meet defined delinquent loan criteria. As a result of this unilateral option, once the delinquency criteria have been met, and regardless of whether the repurchase option has been exercised, the Company must treat the loans as having been repurchased and recognize the loans as loans held-for-sale on the Consolidated Statement of Financial Condition and also recognize a corresponding liability for a similar amount recorded in other liabilities on the Consolidated Statement of Financial Condition. If the loans are actually repurchased, the Company transfers the loans to loans repurchased with government guarantees and eliminates the corresponding liability. At March 31, 2014, the amount of such loans actually repurchased totaled \$1.3 billion and were classified as loans repurchased with government guarantees, and those loans which the Company had not yet repurchased but had the unilateral right to repurchase totaled \$15.8 million and were classified as loans held-for-sale. At December 31, 2013, the amount of such loans actually repurchased totaled \$1.3 billion and were classified as loans repurchased with government guarantees, and those loans which the Company had not yet repurchased but had the unilateral right to repurchase totaled \$20.8 million and were classified as loans held-for-sale.

Substantially all of these loans continue to be insured or guaranteed by the FHA, and the Company's management believes that the reimbursement process is proceeding appropriately. These repurchased loans earn interest at a statutory rate, which varies and is based upon the 10-year U.S. Treasury note rate at the time the underlying loan becomes delinquent.

The Company has pledged certain loans repurchased with government guarantees to collateralize lines of credit and/or borrowings with the Federal Home Loan Bank of Indianapolis. At March 31, 2014 and December 31, 2013, the Company pledged \$812.1 million and \$787.1 million, respectively, of loans repurchased with government guarantees.

During the three months ended March 31, 2013, the Company participated in a HUD-coordinated market auction, which resulted in the conveyance in an accelerated fashion of \$131.9 million unpaid principal balance (net of write downs) of loans to HUD.

Table of Contents

Note 7 – Loans Held-for-Investment

Loans held-for-investment are summarized as follows.

	March 31, 2014	December 31, 2013
	(Dollars in thousands)	
Consumer loans		
Residential first mortgage	\$2,348,691	\$2,508,968
Second mortgage	164,627	169,525
Warehouse lending	408,874	423,517
HELOC	273,454	289,880
Other	34,875	37,468
Total consumer loans	3,230,521	3,429,358
Commercial loans		
Commercial real estate	512,994	408,870
Commercial and industrial	266,176	207,187
Commercial lease financing	10,180	10,341
Total commercial loans	789,350	626,398
Total loans held-for-investment	4,019,871	4,055,756
Less allowance for loan losses	(307,000) (207,000)
Loans held-for-investment, net	\$3,712,871	\$3,848,756

At March 31, 2014 and December 31, 2013, the loans held-for-investment include \$233.9 million and \$238.3 million of loans accounted for under the fair value option. During the three months ended March 31, 2014, the Company recorded a \$21.1 million adjustment to the originally recorded fair value of performing repurchased residential first mortgage loans.

During the three months ended March 31, 2014, the Company transferred \$4.6 million in loans held-for-sale to loans held-for-investment. During the three months ended March 31, 2013, the Company transferred \$62.8 million in loans held-for-sale to loans held-for-investment. The loans transferred were carried at fair value, and will continue to be reported at fair value while classified as held-for-investment.

During the three months ended March 31, 2014, we sold nonperforming and TDR residential first mortgage loans with a carrying value in the amount of \$25.6 million.

During the three months ended March 31, 2014, residential first mortgage jumbo loans with a carrying value in the amount of \$254.1 million were transferred to loans available-for-sale and subsequently sold during the second quarter 2014.

The Company has pledged certain loans held-for-investment to collateralize lines of credit and/or borrowings with the Federal Reserve Bank of Chicago and the Federal Home Loan Bank of Indianapolis. At March 31, 2014 and December 31, 2013, the Company pledged \$2.4 billion and \$2.5 billion, respectively, of loans held-for-investment.

The Company's commercial leasing activities consist primarily of equipment leases. Generally, lessees are responsible for all maintenance, taxes, and insurance on leased properties. The following table lists the components of the net investment in financing leases.

March 31, 2014	December 31, 2013
(Dollars in thousands)	

Edgar Filing: FLAGSTAR BANCORP INC - Form 10-Q

Total minimum lease payment to be received	\$10,374	\$10,613	
Estimated residual values of lease properties	530	503	
Unearned income	(704) (755)
Net deferred fees and other	(20) (20)
Net investment in commercial financing leases	\$10,180	\$10,341

(1) Excludes loans carried under the fair value option.

The allowance for loan losses for consumer loans, other than those that have been identified for individual evaluation for impairment, is determined on a loan pool basis utilizing forecasted losses that represent management's best estimate of inherent loss. Loans are pooled by loan types with similar risk characteristics. The Company utilizes a historical loss model for each pool. Management evaluates the results of the allowance for loan losses model and makes qualitative adjustments to the results of the model when it is determined that model results do not reflect all losses inherent in the loan portfolios due to changes in recent economic trends and conditions, or other relevant factors.

During the three months ended March 31, 2014, the Company recorded a provision for loan losses of \$112.3 million. The increase in the provision for loan losses as compared to the three months ended March 31, 2013, was primarily driven by two changes in estimates: the evaluation of current data related to the loss emergence period and the evaluation of the risk associated with payment resets relating to the interest-only loans.

The loss emergence period is an assumption within our model and represents the average amount of time between when the loss event first occurs and when the specific loan is charged-off. The time period starts when the borrower first begins to experience financial difficulty (generally, the initial occurrence of a 30 day delinquency) and continues until the actual loss becomes visible to the Company (generally, upon charge-off). The Company analyzed its recent data including early stage delinquency, the increase in charge-offs during the three months ended March 31, 2014, continued emergence of non-

Table of Contents

performing loans and its assessment of the time from first delinquency to charge-off. As a result, the Company qualitatively determined that the estimate of the average loss emergence period has lengthened. This change resulted in an increase to the allowance for loan losses that reflects the updated estimate of probable losses inherent in the portfolio.

In addition, during the three months ended March 31, 2014, certain loans in our interest-only residential first mortgage and HELOC loan portfolios began to reset. At the point of reset, the borrower's monthly payment increases upon inclusion of repayments of principal and may increase as a result of changes in interest rates. The payment reset increases could give rise to a "payment shock" i.e. a sudden and significant increase in the borrower's monthly payment. For instance, as of March 31, 2014 the Company estimated an average payment shock for borrowers with resets in 2014 of approximately 70 percent (i.e. their total monthly payments increase by 70 percent). The extent of the payment shock may increase the likelihood that a borrower could default.

The allowance for loan losses considers the probable loss inherent in the loan portfolio both before and after the payment reset date. Prior to December 31, 2013, the Company had experienced an insignificant volume of resets. The first significant volume of resets occurred during the three months ended March 31, 2014 and in the first half of April 2014. Data the Company reviewed from those periods, as well as data the Company reviewed for the 15 months ended March 31, 2014, indicated that delinquency was greater than estimated at December 31, 2013. Additionally, loans that have recently reset or are expected to reset in the near future are refinancing at levels below what was previously estimated, which the Company believes may indicate an increase in future delinquency and charge-off. Based on its review of these initial indicators, the Company increased the allowance for loan losses based on its qualitative analysis of the recent data. The portion of the allowance for loan losses related to certain interest-only included in residential first mortgage and HELOC loan portfolios increased primarily due to the estimates of the average loss emergence period and reset risk to approximately \$112.8 million at March 31, 2014 from \$52.3 million at December 31, 2013.

Table of Contents

The following table sets forth the loans held-for-investment aging analysis as of March 31, 2014 and December 31, 2013, of past due and current loans.

Total loans (1)	\$41,013	\$20,732	\$145,685	\$207,430	\$3,848,326	\$4,055,756

(1) Includes \$3.7 million and \$4.0 million of loans 90 days or greater past due accounted for under the fair value option at March 31, 2014 and December 31, 2013, respectively.

Loans on which interest accruals have been discontinued totaled approximately \$117.6 million and \$146.5 million at March 31, 2014 and December 31, 2013, respectively, and \$369.7 million at March 31, 2013. Interest income is recognized on impaired loans using a cost recovery method unless amounts contractually due are not in doubt. Interest that would have been accrued on impaired loans totaled approximately \$1.8 million and \$4.4 million during the three months ended March 31, 2014 and 2013, respectively. At March 31, 2014 and December 31, 2013, the Company had no loans 90 days past due and still accruing.

Troubled Debt Restructuring

The Company may modify certain loans in both consumer and commercial loan portfolios to retain customers or to maximize collection of the outstanding loan balance. The Company has maintained several programs designed to assist borrowers by extending payment dates or reducing the borrower's contractual payments. All loan modifications

are made on a case-by-case basis. The Company's standards relating to loan modifications consider, among other factors, minimum verified income requirements, cash flow analysis, and collateral valuations. All loan modifications, including those classified as TDRs, are reviewed and approved. Loan modification programs for borrowers have resulted in a significant increase in restructured

32

Table of Contents

loans. TDRs result in those instances in which a borrower demonstrates financial difficulty and for which a concession has been granted, which includes reductions of interest rate, extensions of amortization period, principal and/or interest forgiveness and other actions intended to minimize the economic loss and to avoid foreclosure or repossession of collateral. These loans are classified as TDRs and are included in non-accrual loans if the loan was nonperforming prior to the restructuring. These loans will continue on non-accrual status until the borrower has established a willingness and ability to make the restructured payments for at least six months, after which they will begin to accrue interest.

The following table provides a summary of TDRs outstanding by type and performing status.

	TDRs		Total
	Performing	Nonperforming	
March 31, 2014	(Dollars in thousands)		
Consumer loans (1)			
Residential first mortgage	\$ 322,037	\$ 22,470	\$ 344,507
Second mortgage	32,197	1,484	33,681
HELOC	20,043	2,408	22,451
Total consumer loans	374,277	26,362	400,639
Commercial loans (2)			
Commercial real estate	446	—	446
Total TDRs (3)	\$ 374,723	\$ 26,362	\$ 401,085
December 31, 2013			
Consumer loans (1)			
Residential first mortgage	\$ 332,285	\$ 42,633	\$ 374,918
Second mortgage	30,352	1,631	31,983
Other consumer	19,892	2,445	22,337
Total consumer loans	382,529	46,709	429,238
Commercial loans (2)			
Commercial real estate	456	—	456
Total TDRs (3)	\$ 382,985	\$ 46,709	\$ 429,694

(1) The allowance for loan losses on consumer TDR loans totaled \$84.7 million and \$82.3 million at March 31, 2014 and December 31, 2013, respectively.

(2) The allowance for loan losses on commercial TDR loans was zero at both March 31, 2014 and December 31, 2013, respectively.

(3) Includes \$31.5 million and \$8.9 million of TDR loans accounted for under the fair value option at March 31, 2014 and December 31, 2013, respectively.

TDRs returned to performing, or accrual, status totaled \$2.2 million and \$17.2 million during the three months ended March 31, 2014 and 2013, respectively, and are excluded from nonperforming loans. TDRs that have demonstrated a period of at least six months of consecutive performance under the modified terms, are returned to performing (i.e., accrual) status and are excluded from nonperforming loans. Although these TDRs have returned to performing status, they will still continue to be classified as impaired until they are repaid in full, or foreclosed and sold, and included as such in the tables within "repossessed assets." Although many of the TDRs continue to be performing, the full collection of principal and interest on some TDRs may not occur. The resulting potential incremental losses are measured through impairment analysis on all TDRs and have been factored into our allowance for loan losses. At March 31, 2014 and December 31, 2013, remaining commitments to lend additional funds to debtors whose terms have been modified in a commercial or consumer TDR were immaterial.

Some loan modifications classified as TDRs may not ultimately result in the full collection of principal and interest, as modified, but may give rise to potential incremental losses. Such losses are factored into the Company's allowance for

loan losses estimate. Management evaluates loans for impairment both collectively and individually depending on the risk characteristics underlying the loan and the availability of data. The Company measures impairment using the discounted cash flow method for performing TDRs and measure impairment based on collateral values for re-defaulted TDRs.

Table of Contents

The following table presents the three months ended March 31, 2014 and 2013 number of accounts, pre-modification unpaid principal balance (net of write downs), and post-modification unpaid principal balance (net of write downs) that were new modified TDRs during the three months ended March 31, 2014 and 2013. In addition, the table presents the number of accounts and unpaid principal balance (net of write downs) of loans that have subsequently defaulted during the three months ended March 31, 2014 and 2013 that had been modified in a TDR during the 12 months preceding each period. All TDR classes within consumer and commercial loan portfolios are considered subsequently defaulted when greater than 90 days past due.

	Number of Accounts	Pre-Modification Unpaid Principal Balance (Dollars in thousands)	Post-Modification Unpaid Principal Balance (1)	Increase (Decrease) in Allowance at Modification
Three Months Ended March 31, 2014

The Company utilizes an internal risk rating system which is applied to all commercial and commercial real estate credits. Management conducts periodic examinations which serve as an independent verification of the accuracy of the ratings assigned. Loan grades are based on different factors within the borrowing relationship: entity sales, debt service coverage, debt/total net worth, liquidity, balance sheet and income statement trends, management experience, business stability, financing structure of the deal and financial reporting requirements. The underlying collateral is also rated based on the specific type of collateral and corresponding LTV. The combination of the borrower and collateral risk ratings result in the final rating for the borrowing relationship. Descriptions of the Company's internal risk ratings as they relate to credit quality follow the ratings used by the U.S. bank regulatory agencies as listed below.

Pass. Pass assets are not impaired nor do they have any known deficiencies that could impact the quality of the asset.

Watch. Watch assets are defined as pass rated assets that exhibit elevated risk characteristics or other factors that deserve management's close attention and increased monitoring. However, the asset does not exhibit a potential or well defined weakness that would warrant a downgrade to criticized or adverse classification.

Special mention. Assets identified as special mention possess credit deficiencies or potential weaknesses deserving management's close attention. Special mention assets have a potential weakness or pose an unwarranted financial risk that, if not corrected, could weaken the assets and increase risk in the future. Special mention assets are criticized, but do not expose an institution to sufficient risk to warrant adverse classification.

Substandard. Assets identified as substandard are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Assets so classified must have a well-defined weakness or weaknesses. They are characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected. For HELOC loans and other consumer loans, the Company evaluates credit quality based on the aging and status of payment activity and includes all nonperforming loans.

Doubtful. Assets identified as doubtful have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of current existing facts, conditions and values, highly questionable and improbable. The possibility of a loss on a doubtful asset is high. However, due to important and reasonably specific pending factors, which may work to strengthen (or weaken) the asset, its classification as an estimated loss is deferred until its more exact status can be determined.

Loss. An asset classified loss is considered uncollectible and of such little value that the continuance as bankable asset is not warranted. This classification does not mean that an asset has absolutely no recovery or salvage value, but,

rather that it is not practical or desirable to defer writing off this basically worthless asset even though partial recovery may be affected in the future.

Note 8 – Private-Label Securitization and Variable Interest Entities

The Company previously participated in four private-label securitizations of financial assets involving two HELOC loan transactions and two second mortgage loan transactions. Three of the four private-label securitizations have been reconsolidated or dissolved as a result of settlement agreements. The Company has not engaged in any private-label

securitization activity except for these four securitizations completed from 2005 to 2007.

Table of Contents

In December 2005, the Company completed the \$600.0 million FSTAR 2005-1 HELOC securitization trust. As a result of this securitization, the Company recorded assets of \$26.1 million in residual interests. The offered securities in the FSTAR 2005-1 HELOC securitization trust were insured by Assured. Due to the Assured Settlement Agreement, the Company reconsolidated the FSTAR 2005-1 HELOC securitization trust's assets and liabilities. The Company became the primary beneficiary of the FSTAR 2005-1 HELOC securitization trust, which is reflected in the Consolidated Financial Statements as a VIE. The Company elected the fair value option for the assets and liabilities associated with the FSTAR 2005-1 HELOC securitization trust. At March 31, 2014, the Company has a fair value of HELOC loans of \$76.0 million and long-term debt of \$53.4 million recorded as a VIE associated with the FSTAR 2005-1 HELOC securitization trust.

In December 2006, the Company completed the \$302.2 million FSTAR 2006-2 HELOC securitization trust. As a result of this securitization, the Company recorded assets of \$11.2 million in residual interests. The offered securities in the 2006-2 HELOC securitization trust were insured by Assured. Due to the Assured Settlement Agreement, the Company reconsolidated the FSTAR 2006-2 HELOC securitization trust's assets and liabilities. The Company became the primary beneficiary of the FSTAR 2006-2 HELOC securitization trust, which is reflected in the Consolidated Financial Statements as a VIE. The Company elected the fair value option for the assets and liabilities associated with the FSTAR 2006-2 HELOC securitization trust. At March 31, 2014, the Company has a fair value of HELOC loan of \$74.6 million and long-term debt of \$48.4 million recorded as a VIE associated with the FSTAR 2006-2 HELOC securitization trust.

In April 2006, the Company completed the \$400.0 million FSTAR 2006-1 mortgage securitization trust involving fixed second mortgage loans that the Company held at the time in its investment securities portfolio. The offered securities in the FSTAR 2006-1 mortgage securitization trust were insured by MBIA. Due to the MBIA Settlement Agreement, the FSTAR 2006-1 mortgage securitization trust was collapsed and the Company transferred the loans associated with the FSTAR 2006-1 mortgage securitization trust. The Company elected the fair value option for the assets associated with the FSTAR 2006-1 mortgage securitization trust. At March 31, 2014, the Company recorded a fair value of \$61.5 million of second mortgage loans associated with the FSTAR 2006-1 mortgage securitization trust.

In March 2007, the Company completed the \$620.9 million FSTAR 2007-1 mortgage securitization trust transaction involving closed-ended, fixed and adjustable rate second mortgage loans and recorded \$22.6 million in residual interests and servicing assets. The financial assets were derecognized by the Company upon transfer to the FSTAR 2007-1 mortgage securitization trust, which then issued and sold mortgage-backed securities to third party investors. The Company relinquished control over the loans at the time the financial assets were transferred to the FSTAR 2007-1 mortgage securitization trust and the Company recognized a gain on the sale of the transferred assets. In June 2007, the Company completed a secondary closing for \$98.2 million and recorded an additional \$4.2 million in residual interests. The offered securities in the FSTAR 2007-1 mortgage securitization trust were insured by MBIA. In accordance with the MBIA Settlement Agreement, MBIA will be required to satisfy all of its obligation under the FSTAR 2007-1 insurance policy and related FSTAR 2007-1 obligations without further recourse to the Company.

Consolidated VIEs

Consolidated VIEs at March 31, 2014 consisted of the HELOC securitization trusts formed in 2005 and 2006. The Company has determined the trusts are VIEs and has concluded that the Company is the primary beneficiary of these trusts because it has the power to direct the activities of the entity that most significantly affect the entity's economic performance and has either the obligation to absorb losses of the entity that could potentially be significant to the VIE or the right to receive benefits from the entity that could potentially be significant to the VIE. The change in the consolidated VIE was a result of the Assured Settlement Agreement as of June 30, 2013. Under the terms of the Assured Settlement Agreement, Assured terminated its pending lawsuit against the Company and will not pursue any related claims at any time in the future. In exchange, the Company paid Assured \$105.0 million and assumed

responsibility for future claims associated with the two HELOC securitization trusts, including the right to receive from Assured all future reimbursements for claims paid to which Assured would have been entitled. Upon effecting the settlement, the Company reversed the transferor's interest, as this interest would represent an equity interest in the trust which would be reversed upon consolidation of the trusts.

The beneficial owners of the trusts can look only to the assets of the HELOC securitization trusts for satisfaction of the debt issued by the HELOC securitization trusts and have no recourse against the assets of the Company.

Table of Contents

The following table provides a summary of the classifications of consolidated VIE assets and liabilities included in the Consolidated Financial Statements.

	2005-1	2006-2	Total
March 31, 2014	(Dollars in thousands)		
HELOC Securitizations			
Assets			
Cash and cash items	\$1,761	\$—	\$1,761
Loans held-for-investment	75,998	74,597	150,595
Liabilities			
Long-term debt	\$53,354	\$48,356	\$101,710
Other liabilities	136	—	136
December 31, 2013	(Dollars in thousands)		
HELOC Securitizations			
Assets			
Cash and cash items	\$1,129	\$—	\$1,129
Loans held-for-investment	78,009	77,003	155,012
Liabilities			
Long-term debt	\$55,172	\$50,641	\$105,813
Other liabilities	136	—	136

The economic performance of the VIEs is most significantly impacted by the performance of the underlying loans. The principal risks to which the entities were exposed include credit risk and interest rate risk. Credit risk was managed through credit enhancement in the form of reserve accounts, over collateralization, excess interest on the loans, the subordination of certain classes of asset-backed securities to other classes, and in the case of the home equity transaction, an insurance policy with a third party guaranteeing payment of accrued and unpaid interest and principal on the securities. Interest rate risk was managed by interest rate swaps between the VIEs and third parties.

Unconsolidated VIEs

The following table provides a summary of the unconsolidated VIE (the FSTAR 2007-1 mortgage securitization trust) with which the Company has a significant continuing involvement, but is not the primary beneficiary. The following table sets forth certain characteristics of each of the fixed rate second mortgage underlying the FSTAR 2007-1 mortgage securitization trust at its inception and the current characteristics as of and for the three months ended March 31, 2014.

	2007-1 at Inception	2007-1 Current Levels	
FSTAR 2007-1 mortgage securitization trust	(Dollars in thousands)		
Number of loans	12,416	4,084	
Aggregate principal balance	\$622,100	\$162,915	
Average principal balance	\$50	\$40	
Weighted average fully indexed interest rate	8.22	% 7.09	%
Weighted average original term	194 months	195 months	
Weighted average remaining term	185 months	103 months	
Weighted average original credit score	726	712	

Table of Contents

Note 9 – Mortgage Servicing Rights

The Company recognizes MSR assets, at fair value, related to residential first mortgage loans sold when it retains the obligation to service these loans. MSRs are subject to changes in value from, among other things, changes in interest rates, prepayments of the underlying loans and changes in credit quality of the underlying portfolio. The Company subsequently measures its servicing assets for residential first MSRs, at fair value, as elected, each reporting date with any changes in fair value recorded in earnings in the period in which the changes occur. As such, the Company currently hedges certain risks of fair value changes of MSRs using derivative instruments that are intended to change in value inversely to part or all of the changes in the components underlying the fair value of MSRs.

The Company invests in MSRs to support mortgage strategies and to deploy capital at acceptable returns. The Company also deploys derivatives and other fair value assets as economic hedges to offset changes in fair value of the MSRs resulting from the actual or anticipated changes in prepayments stemming from changing interest rate environments. The Company's portfolio of MSRs is highly sensitive to movements in interest rates, and hedging activities related to the portfolio. The primary risk associated with MSRs is they will lose a substantial portion of value as a result of higher than anticipated prepayments due to loan refinancing prompted, in part, by declining interest rates. Conversely, these assets generally increase in value in a rising interest rate environment to the extent that prepayments are slower than anticipated. There is also a risk of valuation decline due to higher than expected increases in default rates, but the Company does not believe such risk can be sufficiently quantified to effectively hedge. See Note 10 of the Notes to the Consolidated Financial Statements, herein, for additional information regarding the instruments utilized to hedge the risks of MSRs.

The following table presents the unpaid principal balance of residential loans serviced for other and the number of accounts associated with those loans.

	March 31, 2014		December 31, 2013	
	Amount	Number of accounts	Amount	Number of accounts
Residential mortgage servicing				
Serviced for others	\$28,998,897	146,339	\$25,743,396	131,413
Subserviced for others (1)	39,554,373	195,448	40,431,867	198,256
Total residential loans serviced for others (1)	\$68,553,270	341,787	\$66,175,263	329,669

(1) Does not include temporary short-term subservicing performed as a result of some sales of servicing.

Changes in the carrying value of residential first mortgage MSRs, accounted for at fair value, were as follows.

	Three Months Ended March 31,	
	2014	2013
	(Dollars in thousands)	
Balance at beginning of period	\$284,678	\$710,791
Additions from loans sold with servicing retained	51,043	126,494
Reductions from bulk sales (1)	(5,898)	(94,437)
Changes in fair value due to (2)		
Decrease in MSR value (3)	(4,909)	(37,481)
All other changes in valuation inputs or assumptions (4)	(4,683)	21,840
Fair value of MSRs at end of period	\$320,231	\$727,207
Unpaid principal balance of residential mortgage loans serviced for others (period end)	\$28,998,897	\$73,993,296
Unpaid principal balance of residential mortgage loans subserviced for others (period end)	\$39,554,373	\$—

(1) Includes flow sales related to underlying serviced loans totaling \$470.2 million for the three months ended March 31, 2014, compared to bulk sales of \$10.7 billion for the three months ended March 31, 2013, respectively.

(2) Changes in fair value are included within loan administration income on the Consolidated Statements of Operations.

(3) Represents decrease in MSR value associated with loans that were paid-off during the period.

(4) Represents estimated MSR value change resulting primarily from market-driven changes in interest rates.

The fair value of residential MSRs is estimated using a valuation model that calculates the present value of estimated future net servicing cash flows, taking into consideration expected mortgage loan prepayment rates, discount rates, servicing costs, and other economic factors, which are determined based on current market conditions. The Company periodically obtains

Table of Contents

third-party valuations of its residential MSRs to assess the reasonableness of the fair value calculated by the valuation model. In certain circumstances, based on the probability of the completion of a sale of MSRs pursuant to a bona-fide purchase offer, the Company considers the bid price of that offer and identifiable transaction costs in comparison to the calculated fair value and may adjust the estimate of fair value to reflect the terms of the pending transaction.

The key economic assumptions used in determining the fair value of those MSRs capitalized during the three months ended March 31, 2014 and 2013 periods were as follows.

	Three Months Ended March 31,		
	2014	2013	
Weighted-average life (in years)	7.8	5.4	
Weighted-average constant prepayment rate	12.2	% 15.5	%
Weighted-average discount rate	11.8	% 7.9	%
The key economic assumptions reflected in the overall fair value of the entire portfolio of MSRs were as follows.			
	March 31,	December 31,	
	2014	2013	
Weighted-average life (in years)	8.4	7.3	
Weighted-average constant prepayment rate	9.3	% 11.9	%
Weighted-average discount rate	12.3	% 10.2	%

Contractual servicing fees. Contractual servicing and subservicing fees, including late fees and ancillary income, for each type of loan serviced are presented below. Contractual servicing and subservicing fees are included within loan administration income on the Consolidated Statements of Operations. Subservicing fee income is recorded for fees earned, net of third party subservicing costs, for loans subserviced.

	Three Months Ended March 31,	
	2014	2013
	(Dollars in thousands)	
Residential first mortgage loans serviced for others	\$18,447	\$54,078
Residential first mortgage loans subserviced for others	5,810	—
Other consumer loans serviced for others	45	198
Total	\$24,302	\$54,276

Note 10 – Derivative Financial Instruments

The Company recognizes all derivative instruments on the Consolidated Statements of Financial Condition at fair value. Derivative instruments are contracts between two or more parties that have a notional amount and an underlying variable, require a small or no net investment, and allow for the net settlement of positions. A derivative's notional amount serves as the basis for the payment provision of the contract, and takes the form of units, such as shares or dollars. A derivative's underlying variable is a specified interest rate, security price, commodity price, foreign exchange rate, index, or other variable. The interaction between the notional amount and the underlying variable determines the number of units to be exchanged between the parties and influences the fair value of the derivative contract. Generally, these instruments help the Company manage exposure to interest rate risk, mitigate the credit risk inherent in the loan portfolio, hedge against changes in foreign currency exchange rates, and meet client financing and hedging needs. The following derivative financial instruments were identified and recorded at fair value as of March 31, 2014 and December 31, 2013:

- Fannie Mae, Freddie Mac, Ginnie Mae and other forward loan sale contracts;
- Rate lock commitments;
- Interest rate swaps;
- Foreign exchanges swaps; and
- U.S. Treasury and euro dollar futures and options.

Derivative assets and liabilities are recorded at fair value on the balance sheet, after taking into account the effects of legally enforceable bilateral collateral and master netting agreements. Gross positive fair values are netted with gross negative fair values by counterparty pursuant to a valid master netting agreement. In addition, payables and receivables in respect of

41

Table of Contents

collateral received from or paid to a given counterparty are considered in this netting. These agreements allow the Company to settle all derivative contracts held with a single counterparty on a net basis in a single currency, and to offset net derivative positions with related collateral, where applicable.

Counterparty credit risk. The Bank is exposed to credit loss in the event of nonperformance by the counterparties to its various derivative financial instruments. The Company manages this risk by selecting only well-established, financially strong counterparties, spreading the credit risk among such counterparties, and by placing contractual limits on the amount of unsecured credit risk from any single counterparty.

Collateral agreements require the counterparty to post, on a daily basis, collateral (typically cash or investment securities) equal to the Company's net derivative receivable. For highly-rated counterparties, the agreements may include minimum dollar posting thresholds, but allow for the Company to call for immediate, full collateral coverage when credit-rating thresholds are triggered by counterparties. The Company's collateral agreements contain provisions that require collateralization of the Company's net liability derivative positions. Required collateral coverage is based on certain net liability thresholds. Under circumstances which constitute default under the agreements, the counterparties to the derivatives could request immediate full collateral coverage for derivatives in net liability positions. The Company's collateral agreements in which the collateral is restricted include provisions requiring unilateral funding of coverage for derivatives in net liability positions, as well as minimum collateral positions.

Derivatives Not Designated in Hedge Relationships

The Company originates loans and extends credit, both of which expose the Company to interest rate risk. The Company actively manages the overall loan portfolio and the associated interest rate risk in a manner consistent with asset quality objectives. This objective is accomplished primarily through the use of an investment-grade diversified dealer-traded basket of swaps. These transactions may generate fee income, and diversify and reduce overall portfolio interest rate risk volatility. Although the Company utilizes swaps for risk management purposes, they are not treated as or do not qualify as hedging instruments.

The Company hedges the risk of overall changes in fair value of loans held-for-sale and rate lock commitments generally by selling forward contracts on securities of Agencies. The forward contracts used to economically hedge the loan commitments are accounted for as non-designated hedges and naturally offset rate lock commitment mark-to-market gains and losses recognized as a component of gain on loan sale. The Company recognized pre-tax losses of \$5.6 million for the three months ended March 31, 2014, compared to pre-tax loss of \$39.7 million for the three months ended March 31, 2013, on hedging activity relating to loan commitments and loans held-for-sale. Additionally, the Company hedges the risk of overall changes in fair value of MSR's through the use of various derivatives including purchases of forward contracts on securities of Fannie Mae and Freddie Mac, the purchase/sale of U.S. Treasury futures contracts and the purchase/sale of euro dollar future contracts. These derivatives are accounted for as non-designated hedges against changes in the fair value of MSR's and recognized as a component of loan administration. The Company recognized a gain of \$4.9 million for the three months ended March 31, 2014, compared to a loss of \$18.3 million for the three months ended March 31, 2013, on MSR fair value hedging activities.

The Company uses a combination of derivatives (U.S. Treasury futures, euro dollar futures, swap futures, and "to be announced" forwards) and certain trading securities to hedge the MSR's. For accounting purposes, these hedges represent economic hedges of the MSR asset with both the hedges and the MSR asset carried at fair value on the balance sheet. Certain derivative strategies that the Company uses to manage its investment in MSR's may not fully offset changes in the fair value of such asset due to changes in interest rates and market liquidity.

The Company writes and purchases interest rate swaps to accommodate the needs of customers requesting such services. Customer-initiated trading derivatives are used primarily to provide derivative products to customers

enabling them to manage interest rate risk exposure. Customer-initiated trading derivatives are tailored to meet the needs of the counterparties involved and, therefore, contain a greater degree of credit risk and liquidity risk than exchange-traded contracts, which have standardized terms and readily available price information. The Company mitigates most of the inherent market risk of customer-initiated interest rate swap contracts by entering into offsetting derivative contracts with other counterparties. The offsetting derivative contracts have nearly identical notional values, terms and indices. These limits are established annually and reviewed quarterly. The Company's interest rate swap agreements are structured such that variable payments are primarily based on LIBOR (one-month, three-month or six-month) or prime. Fee income on customer-initiated trading derivatives are earned from entering into various transactions at the request of the customer, primarily interest rate swap contracts. Changes in fair value are recognized in "other noninterest income" on the Consolidated Statements of Income. There were no significant

Table of Contents

net gains (losses) recognized in income on customer-initiated derivative instruments for the three months ended March 31, 2014 and 2013, respectively.

The Company had the following derivative financial instruments.

	Notional Amount	Fair Value	Expiration Dates
	(Dollars in thousands)		
March 31, 2014			
Assets (1)			
U.S. Treasury and euro dollar futures	\$3,874,900	\$2,495	2015

Table of Contents

The Company pledged a total of \$20.3 million and \$6.8 million of investment securities and cash collateral to counterparties at March 31, 2014 and December 31, 2013, respectively, for derivative activities. The Company pledged \$20.3 million and \$6.8 million in cash collateral to counterparties at March 31, 2014 and December 31, 2013, respectively, and less than \$0.1 million and zero in investment securities at March 31, 2014 and December 31, 2013, respectively. The cash pledged was restricted and is included in other assets on the Consolidated Statements of Financial Condition. The total collateral pledged is included in assets on the Consolidated Statements of Financial Condition.

Note 11 – Federal Home Loan Bank Advances

The portfolio of Federal Home Loan Bank advances includes floating rate short-term daily adjustable advances and long-term fixed rate advances. The following is a breakdown of the advances outstanding.

	March 31, 2014		December 31, 2013		
	Amount	Rate	Amount	Rate	
	(Dollars in thousands)				
Short-term floating rate daily adjustable advances	\$—	—	% \$216,000	0.50	%
Fixed rate putable advances	1,125,000	0.22	% 772,000	0.30	%
Total	\$1,125,000	0.22	% \$988,000	0.34	%
			Three Months Ended March 31,		
			2014	2013	
			(Dollars in thousands)		
Maximum outstanding at any month end			\$1,125,000	\$2,900,000	
Average outstanding balance			885,870	3,105,556	
Average remaining borrowing capacity			1,802,000	1,148,000	
Weighted-average interest rate			0.24	% 3.16	%

At March 31, 2014, the Company had the authority and approval from the Federal Home Loan Bank to utilize a line of credit of up to \$7.0 billion and the Company may access that line to the extent that collateral is provided. At March 31, 2014, the Company had \$1.1 billion of advances outstanding and an additional \$1.7 billion of collateralized borrowing capacity available at the Federal Home Loan Bank. The advances are collateralized by non-delinquent single-family residential first mortgage loans, loans repurchased with government guarantees, certain other loans and investment securities.

Table of Contents

Note 12 – Long-Term Debt

The Company sponsored nine trust subsidiaries, including the consolidated VIEs, which issued trust preferred securities to third party investors and loaned the proceeds to the Company in the form of junior subordinated notes included in long-term debt. The following table presents the outstanding balance on each junior subordinated note and related interest rates of the long-term debt as of the dates indicated.

	March 31, 2014		December 31, 2013		
	(Dollars in thousands)				
Junior Subordinated Notes					
Floating 3 Month LIBOR (1)					
Plus 3.25%, matures 2032	\$25,774	3.49	% \$25,774	3.50	%
Plus 3.25%, matures 2033	25,774	3.49	% 25,774	3.49	%

Subtotal	\$247,435		\$247,435		
Notes associated with consolidated VIEs					
HELOC securitizations					
Plus 0.23% (2), matures 2018	53,354		55,172		
Plus 0.16% (3), matures 2019	48,356		50,641		
Total long-term debt	\$349,145		\$353,248		

(1) The securities are currently callable by the Company.

(2) The Notes will accrue interest at a rate equal to the least of (i) one-month LIBOR plus 0.23 percent (ii) the net weighted average coupon, and (iii) 0.16 percent.

The interest rate for the notes may adjust monthly and will be subject to (i) a cap based on the weighted average of (3) the loan rates on the mortgage loans, minus the rates at which certain fees and expenses of the issuing entity are calculated and minus any required spread and adjusted for actual days and (ii) a fixed cap of 0.16 percent.

Interest on all junior subordinated notes related to trust preferred securities is payable quarterly. At March 31, 2014 and December 31, 2013 the three-month LIBOR interest rate was 0.23 percent and 0.25 percent, respectively. At March 31, 2014, the one-month LIBOR interest rate was 0.15 percent, compared to 0.17 percent at December 31, 2013.

Trust Preferred Securities

The trust preferred securities outstanding mature 30 years from issuance and are callable by the Company. Interest on all junior subordinated notes related to trust preferred securities is payable quarterly. Under the terms of the related indentures, the Company may defer interest payments for up to 20 consecutive quarters without default or penalty. In January 2012, the Company exercised its contractual rights to defer its interest payments with respect to trust preferred securities. The payments are periodically evaluated and will be reinstated when appropriate, subject to the provisions of the Company's Supervisory Agreement and Consent Order.

Notes Associated with Consolidated VIEs

As previously discussed in Note 8 - Private-Label Securitization and Variable Interest Entities, the Company determined it was the primary beneficiary of VIEs associated with HELOC securitizations and such VIEs are therefore consolidated in the Consolidated Financial Statements. As of June 30, 2013, the Company re consolidated the assets and liabilities associated with the HELOC securitization trusts, the proceeds of which were used by the trust to repay outstanding debt.

Table of Contents

The final legal maturities of the long-term debt associated with the VIEs are June 2018 and June 2019, respectively, however these debt agreements have contractual provisions that allow for the debt to be paid off based on the cash flows of the collateral. As of March 31, 2014, the Company's cash flow analysis indicated that the notes are estimated to be paid off by July 2015 for FSTAR 2005-1 (0.23 percent) and June 2016 for FSTAR 2006-2 (0.16 percent). The estimated maturity dates may change going forward as the inputs used (prepayments, defaults, etc.) for the cash flow analysis will likely change. The debt pays interest based on a spread over the 30-day LIBOR interest rate.

Note 13 - Representation and Warranty Reserve

The following table shows the activity in the representation and warranty reserve.

	Three Months Ended March 31,	
	2014	2013
	(Dollars in thousands)	
Balance, beginning of period,	\$54,000	\$193,000
Provision		
Charged to gain on sale for current loan sales	1,229	5,818
Charged to representation and warranty reserve - change in estimate	(1,672)) 17,395
Total	(443)) 23,213
Charge-offs, net	(5,557)) (31,213)
Balance, end of period	\$48,000	\$185,000

The liability for representation and warranty reserve reflects management's best estimate of probable losses with respect to the Bank's representation and warranty on the mortgage loans it originates and sells into the secondary market. At the time a loan is sold, an estimate of the fair value of such loss associated with the mortgage loans is recorded in representation and warranty reserve in the Consolidated Statements of Financial Condition and charged against the net gain on loan sales in the Consolidated Statement of Operations at the time of the sale. The Company recognizes changes afterwards in the liability when additional relevant information becomes available. Changes in the estimate are recorded in representation and warranty reserve - change in estimate on the Consolidated Statement of Operations. Charge-offs are recorded in representation and warranty reserve on the Consolidated Statements of Financial Condition.

The Company routinely obtains information from the Agencies regarding the historical trends of demand requests, and occasionally obtains information on anticipated future loan reviews and potential repurchase demand projections. The Company believes this information provides helpful but limited insight in anticipating Agency behavior, thus helping to better estimate future repurchase requests and validate representation and warranty assumptions. Estimating the balance of the representation and warranty reserve involves using assumptions regarding future repurchase request volumes, probable loss severity on these requests and claims appeal success rates. To assess the sensitivity of the representation and warranty reserve model to adverse changes, management periodically runs a sensitivity analysis using its reserve model by assuming hypothetical increases in the level of repurchase volume.

Reserve levels are a function of expected losses based on actual pending and expected claims and repurchase requests, historical experience and loan volume. To the extent actual outcomes differ from management estimates, additional provisions could be required that could adversely affect operations or financial position in future periods.

Note 14 – Stockholders' Equity

Preferred Stock

Edgar Filing: FLAGSTAR BANCORP INC - Form 10-Q

Preferred stock with a par value of \$0.01 and a liquidation value of \$1,000 and additional paid in capital attributable to preferred stock at March 31, 2014 is summarized as follows.

	Rate	Earliest Redemption Date	Shares Outstanding	Preferred Shares	Additional Paid in Capital
	(Dollars in thousands)				
Series C Preferred Stock	9.0	% January 31, 2012	266,657	\$3	\$266,654

Table of Contents

Accumulated Other Comprehensive Loss

The following table sets forth the components in accumulated other comprehensive income (loss) for each type of available-for-sale security.

	Pre-tax Amount	Income Tax (Expense) Benefit	After-Tax Amount
	(Dollars in thousands)		
Accumulated other comprehensive loss			
March 31, 2014			
Net unrealized (loss) gain on securities available-for-sale,			
U.S. government sponsored agencies	\$ (3,397) \$ 2,200	\$ (1,197)
Total net unrealized (loss) gain on securities available-for-sale	\$ (3,397) \$ 2,200	\$ (1,197)
December 31, 2013			
Net unrealized (loss) gain on securities available-for-sale,			
U.S. government sponsored agencies	\$ (9,042) \$ 4,211	\$ (4,831)
Total net unrealized (loss) gain on securities available-for-sale	\$ (9,042) \$ 4,211	\$ (4,831)

Note 15 – (Loss) Earnings Per Share

Basic (loss) earnings per share, excluding dilution, is computed by dividing (loss) earnings available to common stockholders by the weighted average number of shares of Common Stock outstanding during the period. Diluted earnings per share reflects the potential dilution that could occur if securities or other contracts to issue Common Stock were exercised and converted into Common Stock or resulted in the issuance of Common Stock that could then share in the earnings of the Company.

The following table sets forth the computation of basic and diluted (loss) earnings per share of Common Stock.

	Three Months Ended March 31,	
	2014	2013
	(Dollars in thousands, except per share data)	
Net (loss) income	\$ (78,423) \$ 23,607
Less: preferred stock dividend/accretion	(483) (1,438)
Net (loss) income from continuing operations	(78,906) 22,169
Deferred cumulative preferred stock dividends	(5,692) (3,525)
Net (loss) income applicable to Common Stock	\$ (84,598) \$ 18,644
Weighted average shares		
Weighted average common shares outstanding	56,194	55,974
Effect of dilutive securities		
Warrants	—	252
Stock-based awards	—	189
Weighted average diluted common shares	56,194	56,415
(Loss) Earnings per common share		
Net (loss) income applicable to Common Stock	\$ (1.51) \$ 0.33
Effect of dilutive securities		
Warrants	—	—
Stock-based awards	—	—
Diluted (loss) earnings per share	\$ (1.51) \$ 0.33

Due to the loss attributable to common stockholders for the three months ended March 31, 2014, the diluted loss per share calculation excludes all Common Stock equivalents, including 1,334,045 shares pertaining to warrants 295,179 shares pertaining to stock based awards. The inclusion of these securities would be anti-dilutive.

Table of Contents

Note 16 - Stock Based Compensation

Stock-Based Compensation

During the three months ended March 31, 2014, the Company recorded stock-based compensation expense of \$1.0 million compared to \$1.5 million for the three months ended March 31, 2013.

Incentive Compensation Plans

The Incentive Compensation Plans are administered by the compensation committee of the Company's board of directors. Each year, the compensation committee decides which employees of the Company will be eligible to participate in the plans. The Company had an expense of \$6.3 million for the three months ended March 31, 2014, compared to expenses of \$9.1 million for the three months ended March 31, 2013.

Note 17 – Income Taxes

The provision for income taxes in interim periods requires the Company to make a best estimate of the effective tax rate expected to be applicable for the full year. This estimated effective tax rate is then applied to interim consolidated pre-tax operating income to determine the interim provision for income taxes.

During the three months ended March 31, 2014, the benefit for income taxes was \$40.0 million, or an effective tax benefit rate of 33.8 percent, compared to a benefit and effective tax rate of zero for the three months ended March 31, 2013. The effective rate for the three months ended March 31, 2014 is below the combined federal and state statutory tax rate of 35.2 percent primarily due to certain nondeductible expenses. The effective rate during the three months ended March 31, 2013 is below the combined statutory rate principally due the change in valuation allowance for net deferred taxes.

As of each reporting date, the Company considers both positive and negative evidence that could impact the view with regard to realization of deferred tax assets. The Company continues to believe it is more likely than not that the benefit for certain state deferred tax assets will not be realized. In recognition of this risk, the Company continues to provide a partial valuation allowance on the deferred tax assets relating to state deferred tax assets.

The Company believes that it is unlikely that the unrecognized tax benefits will change by a material amount during the next 12 months. As permitted under applicable accounting guidance for income taxes, the Company recognizes interest and penalties related to unrecognized tax benefits in income tax expense.

Note 18 — Regulatory Matters

Regulatory Capital

The Bank is subject to various regulatory capital requirements administered by the U.S. bank regulatory agencies. Failure to meet minimum capital requirements can initiate certain mandatory, and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Consolidated Financial Statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Bank must meet specific capital guidelines that involve quantitative measures of the Bank's assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. The Bank's capital amounts and classification are also subject to qualitative judgments by regulators about components, risk weightings, and other factors.

Quantitative measures that have been established by regulation to ensure capital adequacy require the Bank to maintain minimum capital amounts and ratios (set forth in the table below). The Bank's primary regulatory agency, the OCC, requires that the Bank maintain minimum ratios of tangible capital (as defined in the regulations) of 1.5 percent, Tier 1 capital to adjusted tangible assets and Tier 1 capital to risk-weighted assets of 4.0 percent, and total risk-based capital to risk-weighted assets of 8.0 percent. The Bank is also subject to prompt corrective action capital requirement regulations set forth by the FDIC. The FDIC requires the Bank to maintain minimum ratios of Tier 1 capital to adjusted tangible assets of 4.0 percent, Tier 1 capital to risk-weighted assets of 4.0 percent, and total risk-based capital to risk-weighted assets of 8.0 percent.

To be categorized as "well capitalized," the Bank must maintain minimum total risk-based, Tier 1 risk-based, and Tier 1 leverage ratios as set forth in the table below, as of the date of filing of its quarterly report with the OCC. The Bank is considered "well capitalized" at both March 31, 2014 and December 31, 2013. There are no conditions or events since that notification that management believes have changed the Bank's category.

Table of Contents

The following table shows the regulatory capital ratios as of the dates indicated. These ratios are applicable to the Bank only.

	Actual		For Capital Adequacy Purposes		Well Capitalized Under Prompt Corrective Action Provisions		
	Amount	Ratio	Amount	Ratio	Amount	Ratio	
	(Dollars in thousands)						
March 31, 2014

N/A - Not applicable.

Consent Order

Effective October 23, 2012, the Bank's board of directors executed a Stipulation and Consent (the "Stipulation"), accepting the issuance of a Consent Order (the "Consent Order") by the OCC. The Consent Order replaces the supervisory agreement entered into between the Bank and the Office of Thrift Supervision (the "OTS") on January 27, 2010, which the OCC terminated simultaneous with issuance of the Consent Order. The Company is still subject to the Supervisory Agreement with the Federal Reserve (discussed below).

Under the Consent Order, the Bank is required to adopt or review and revise various plans, policies and procedures related to, among other things, regulatory capital, enterprise risk management and liquidity. Specifically, under the terms of the Consent Order, the Bank's board of directors has agreed to, among other things, which include but not limited to the following:

Review, revise, and forward to the OCC a written capital plan for the Bank covering at least a three-year period and establishing projections for the Bank's overall risk profile, earnings performance, growth expectations, balance sheet mix, off-balance sheet activities, liability and funding structure, capital and liquidity adequacy, as well as a contingency capital funding process and plan that identifies alternative capital sources should the primary sources not be available;

Adopt and forward to the OCC a comprehensive written liquidity risk management policy that systematically requires the Bank to reduce liquidity risk; and

Develop, adopt, and forward to the OCC a written enterprise risk management program that is designed to ensure that the Bank effectively identifies, monitors, and controls its enterprise-wide risks, including by developing risk limits for each line of business.

Each of the plans, policies and procedures referenced above in the Consent Order, as well as any subsequent amendments or changes thereto, must be submitted to the OCC for a determination that the OCC has no supervisory objection to them. Upon receiving a determination of no supervisory objection from the OCC, the Bank must implement and adhere to the respective plan, policy or procedure. The foregoing summary of the Consent Order does not purport to be a complete description of all of the terms of the Consent Order, and is qualified in its entirety by reference to the copy of the Consent Order filed with the SEC as an exhibit to the Company's Current Report on Form 8-K filed on October 24, 2012.

The Bank intends to address the banking issues identified by the OCC in the manner required for compliance by the OCC. There can be no assurance that the OCC will not provide substantive comments on the capital plan or other submissions that the Bank makes pursuant to the Consent Order that will have a material impact on the Company. The Company believes that the actions taken, or to be taken, to address the banking issues set forth in the Consent Order should, over time, improve its enterprise risk management practices and risk profile. For further information regarding the risks related to the Consent Order, please also refer to the section captioned "FORWARD-LOOKING STATEMENTS" below and the risk factors previously disclosed in Item 1A to Part I of the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2013.

Table of Contents

Supervisory Agreement

The Company is subject to the Supervisory Agreement, which will remain in effect until terminated, modified, or suspended in writing by the Federal Reserve. The failure to comply with the Supervisory Agreement could result in the initiation of further enforcement action by the Federal Reserve, including the imposition of further operating restrictions, and could result in additional enforcement actions against the Company. The Company has taken actions which it believes are appropriate to comply with, and intends to maintain compliance with, all of the requirements of the Supervisory Agreement.

Pursuant to the Supervisory Agreement, the Company submitted a capital plan to the OTS, predecessor in interest to the Federal Reserve. In addition, the Company agreed to request prior non-objection of the Federal Reserve to pay dividends or other capital distributions; purchase, repurchase or redeem certain securities; and incur, issue, renew, roll over or increase any debt and enter into certain affiliate transactions. The Company also agreed to comply with restrictions on the payment of severance and indemnification payments, director and management changes and employment contracts and compensation arrangements. A complete description of all of the terms of the Supervisory Agreement and is qualified in its entirety by reference to the copy of the Supervisory Agreement filed with the SEC as an exhibit to the Company's Current Report on Form 8-K filed on January 28, 2010. For further information regarding the risks related to the Supervisory Agreement, please also refer to the section captioned "FORWARD-LOOKING STATEMENTS" below and the risk factors previously disclosed in Item 1A to Part I of the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2013.

Regulatory Developments

In July 2013, U.S. banking regulators approved final Basel III Regulatory Capital rules ("Basel III"). The Basel III rules will be effective January 1, 2014 for advanced approaches banking organizations that are not savings and loan holding companies and January 1, 2015 for all other covered banking organizations. Various aspects of Basel III will be subject to multi-year transition periods ending December 31, 2018. Basel III generally continues to be subject to interpretation by the U.S. banking regulators. Basel III will materially change our Leverage, Tier 1 and Total capital calculations. In addition, the final rule implements a new regulatory component, Common Equity Tier 1 capital. It introduces new minimum capital ratios and buffer requirements, proposes a supplementary leverage ratio, changes the composition of regulatory capital, expands and modifies the calculation of risk-weighted assets for credit and market risk (the Advanced Approach), revises the adequately capitalized minimum requirements under the Prompt Corrective Action framework and introduces a Standardized Approach for the calculation of risk-weighted assets, which will replace the current rules (Basel I - 2013 Rules) effective January 1, 2015. Under Basel III, we will calculate regulatory capital ratios and risk-weighted assets under the Standardized Approach. This approach will be used to assess capital adequacy under the Prompt Corrective Action framework. The Prompt Corrective Action framework establishes categories of capitalization, including "well capitalized," based on regulatory ratio requirements. In October 2013, the OCC and Federal Reserve published a final rule that replaces their existing risk-based and leverage capital rules. The final rule is consistent with the interim final rule.

Note 19 – Legal Proceedings, Contingencies and Commitments

Legal Proceedings

The Company and certain subsidiaries are subject to various pending or threatened legal proceedings arising out of the normal course of business or operations. Although there can be no assurance as to the ultimate outcome of these proceedings, the Company, together with its subsidiaries, believes it has meritorious defenses to the claims presently asserted against the Company, including the matters described below. With respect to such legal proceedings, the

Company intends to continue to defend itself vigorously, litigating or settling cases according to management's judgment as to the best interests of the Company and its stockholders.

On at least a quarterly basis, the Company assesses the liabilities and loss contingencies in connection with pending or threatened legal proceedings utilizing the latest information available. The Company establishes reserves for legal claims and regulatory matters when the Company believes it is probable that a loss may be incurred and the amount of such loss can be reasonably estimated. Once established, accrued reserves are adjusted from time to time, as appropriate, in light of additional information.

Resolutions of legal claims are inherently dependent on the specific facts and circumstances of each specific case; therefore the actual costs of resolving these claims may be substantially higher or lower than the amounts reserved. Based on current knowledge, and after consultation with legal counsel, management believes that current reserves are adequate and the amount of any incremental liability that may arise is not expected to have a material adverse effect on the Consolidated

Table of Contents

Financial Statements. Certain legal claims considered by the Company in its analysis of the sufficiency of its related reserves include the following.

DOJ Litigation Settlement

In February 2012, the Company announced that the Bank had entered into the DOJ Agreement for \$133.0 million relating to certain underwriting practices associated with loans insured by FHA. Pursuant to the DOJ Agreement, the Bank agreed to:

- Comply with all applicable HUD and FHA rules related to the continued participation in the direct endorsement lender program;
- Make an initial payment of \$15.0 million within 30 business days of the effective date of the DOJ Agreement (which was paid on April 3, 2012);
- Make the Additional Payments of approximately \$118.0 million, the payment of which is contingent only upon the occurrence of certain future events; and
- Complete a monitoring period by an independent third party chosen by the Bank and approved by HUD.

Subject to the Bank's full compliance with the terms of the DOJ Agreement, the government agreed to:

- Immediately release the Bank and all of the current and former officers, directors, employees, affiliates and assigns from any civil or administrative claim it has or may have under various federal laws, the common law or equitable theories of fraud or mistake of fact in connection with the mortgage loans the Bank endorsed for FHA insurance during the period January 1, 2002 to the date of the DOJ Agreement (the "Covered Period");
- Not refuse to pay any insurance claim or seek indemnification or other relief in connection with the mortgage loans the Bank endorsed for FHA insurance during the Covered Period but for which no claims have yet been paid on the basis of the conduct alleged in the complaint or referenced in the DOJ Agreement; and
- Not seek indemnification or other relief in connection with the mortgage loans the Bank endorsed for FHA insurance during the Covered Period and for which HUD has paid insurance claims on the basis of the conduct alleged in the complaint or referenced in the DOJ Agreement.

The Company elected the fair value option to account for the liability representing the obligation to make Additional Payments under the DOJ Agreement. As of March 31, 2014, the Bank has accrued \$94.0 million, which represents the fair value of the Additional Payments. See Note 3 - Fair Value Measurements, for further information on the fair value of the DOJ litigation settlement. Other than as set forth above, the DOJ Agreement does not have any effect on FHA insured loans in the Company's portfolio, including loans classified as loans repurchased with government guarantees as discussed in Note 6 - Loans Repurchased with Government Guarantees. The Company believes that such loans retain FHA insurance, and the Company continues to process such loans for insurance claims in the normal course and to receive payments thereon from the FHA. Based on the experience subsequent to the Bank's agreement with the DOJ, the Company believes that such claims are not subject to denial or dispute other than in the normal course of processing insurance claims.

Mortgage-Related Litigation, Regulatory and Other Matters

Regulatory Matters

From time to time, governmental agencies conduct investigations or examinations of various mortgage related practices of the Bank. Ongoing investigations relate to whether the Bank has properly complied with laws or regulations relating to mortgage origination or mortgage servicing practices and to whether its practices with regard to servicing residential first mortgage loans are adequate. The Bank is cooperating with such agencies and providing

information as requested. In addition, the Bank has routinely been named in civil actions throughout the country by borrowers and former borrowers relating to the origination, purchase, sale and servicing of mortgage loans.

Other Matters

In May 2012, the Bank and its subsidiary, Flagstar Reinsurance Company, were named as defendants in a putative class action lawsuit filed in the U.S. District Court for the Eastern District of Pennsylvania, alleging a violation of Section 2607 of the Real Estate Settlement Procedures Act ("RESPA"). Section 2607(a) of RESPA generally prohibits anyone from "accept[ing] any fee, kickback or thing of value pursuant to any agreement or understanding, oral or otherwise, that business related incident to or part of a real estate settlement service involving a federally related mortgage loan shall be referred to any person." Section 2607(b) of RESPA also prohibits anyone from "accept[ing] any portion, split, or percentage of any charge

Table of Contents

made or received for the rendering of a real estate settlement service in connection with a federally related mortgage loan other than for services actually performed." The lawsuit specifically alleges that the Bank and Flagstar Reinsurance Company violated Section 2607 of RESPA through a captive reinsurance arrangement involving (i) allegedly illegal payments to Flagstar Reinsurance Company for the referral of private mortgage insurance business from the Bank to private mortgage insurers to Flagstar Reinsurance Company and (ii) Flagstar Reinsurance Company's purported receipt of an unlawful split of private mortgage insurance premiums. On January 13, 2014, the Bank and Flagstar Reinsurance filed a motion to dismiss the First Amended Complaint based upon the statute of limitations and equitable tolling.

On August 15, 2013, shareholder Kenneth Taylor filed a derivative action in the Circuit Court of Oakland County, Michigan against several current and former members of the Company's Board of Directors and executive officers, including Joseph Campanelli, Michael Tierney, Paul Borja, Todd McGowan, Daniel Landers, Matthew Kerin, Walter Carter, Gregory Eng, Jay Hansen, David Matlin, James Ovenden, Mark Patterson, Michael Shonka, and David Treadwell. The lawsuit requests unspecified monetary damages and purports to seek to remedy defendants' alleged breaches of fiduciary duties and unjust enrichment from 2011 to present, focusing on the events leading up to the Company's February 24, 2012 settlement with the U.S. Department of Justice, as well as the settlement itself. On October 23, 2013, Joel Rosenfeld filed a second derivative action in the same court alleging similar claims against the same defendants based on the February 24, 2012 settlement, as well as Flagstar's prior litigation with Assured Guaranty. The Court consolidated the matters and appointed Rosenfeld as lead plaintiff and Rosenfeld's counsel and lead plaintiffs' counsel. The plaintiffs then filed a consolidated complaint. The parties have been facilitating the matter and the litigation has been stayed while they do so. A parallel action was filed by Kenneth Taylor on January 24, 2014 in the Federal Court for the Eastern District of Michigan. A motion to dismiss hearing is scheduled for May 22, 2014.

Litigation Accruals and Other Possible Contingent Liabilities

When establishing an accrual for contingent liabilities, the Company determines a range of potential losses for each matter that is probable to result in a loss and where the amount of the loss can be reasonably estimated. The Company then records the amount it considers to be the best estimate within the range. As of March 31, 2014, the Company's total accrual for contingent liabilities was \$97.7 million, which includes the accruals for the DOJ Agreement and pending cases. There may be further losses that could arise, the occurrence of which is not probable (but is reasonably possible), or the amount of which is not reasonably estimable; in either case, such losses are not included in the accrual for contingent liabilities. It is possible that the ultimate resolution of those matters, or one or more other unexpected future developments, could result in a loss or losses that, individually or in the aggregate, may be material to the Company's results of operations, or cash flows, for the relevant period(s).

Contingencies and Commitments

A summary of the contractual amount of significant commitments is as follows.

	March 31, 2014	December 31, 2013
	(Dollars in thousands)	
Commitments to extend credit		
Mortgage loans (interest-rate lock commitments)	\$2,090,253	\$1,857,775
HELOC trust commitments	74,165	67,060
Other consumer commitments	7,488	7,430
Standby and commercial letters of credit	6,398	7,982
Other commercial commitments	360,422	296,713

Commitments to extend credit are agreements to lend. Since many of these commitments expire without being drawn upon, the total commitment amounts do not necessarily represent future cash flow requirements.

The Company enters into forward contracts for the future delivery or purchase of agency and loan sale contracts. These contracts are considered to be derivative instruments under U.S. GAAP. Changes to the fair value of these forward loan sales as a result of changes in interest rates are recorded on the Consolidated Statements of Financial Condition as an other asset. Further discussion on derivative instruments is included in Note 10 - Derivative Financial Instruments.

The Company has unfunded commitments under its contractual arrangement with the HELOC securitization trusts to fund future advances on the underlying HELOC.

Table of Contents

Standby and commercial letters of credit are conditional commitments issued to guarantee the performance of a customer to a third party. Standby letters of credit generally are contingent upon the failure of the customer to perform according to the terms of the underlying contract with the third party, while commercial letters of credit are issued specifically to facilitate commerce and typically result in the commitment being drawn on when the underlying transaction is consummated between the customer and the third party.

For information regarding the representation and warranty reserve, see Note 13 - Representation and Warranty Reserve.

Note 20 – Segment Information

The Company's operations are conducted through four operating segments: Mortgage Originations, Mortgage Servicing, Community Banking and Other, which includes the remaining reported activities. Operating segments are defined as components of an enterprise that engage in business activity from which revenues are earned and expenses incurred for which discrete financial information is available that is evaluated regularly by executive management in deciding how to allocate resources and in assessing performance. The operating segments have been determined based on the products and services offered and reflect the manner in which financial information is currently evaluated by management. Each segment operates under the same banking charter, but is reported on a segmented basis for this report. Each of the operating segments is complementary to each other and because of the interrelationships of the segments, the information presented is not indicative of how the segments would perform if they operated as independent entities. Certain prior period amounts have been reclassified to conform to current year presentation.

In January 2014, the Company reorganized the way its operations are managed based on core functions. The segments are based on an internally-aligned segment leadership structure, which is also how the results are monitored and performance assessed. The Company expects that the combination of the business model and the services that the operating segments provide will result in a competitive advantage that supports revenue and earnings. The Company's business model emphasizes the delivery of a complete set of mortgage and banking products and services, including originating, acquiring, selling and servicing one-to-four family residential first mortgage loans, which we believe is distinguished by timely processing and customer service.

Revenues are comprised of net interest income (before the provision for loan losses) and noninterest income. Noninterest expenses are fully allocated to each operating segment. Allocation methodologies maybe subject to periodic adjustment as the internal management accounting system is revised and the business or product lines within the segments change. Also, because the development and application of these methodologies is a dynamic process, the financial results presented may be periodically revised.

The Mortgage Originations segment originates, acquires and sells one-to-four family residential first mortgage loans. The origination and acquisition of mortgage loans comprises the majority of the lending activity. Mortgage loans are originated through home loan centers, national call centers, the Internet and unaffiliated banks and mortgage banking and brokerage companies, where the net interest income and the gains from sales associated with these loans are recognized in the Mortgage Originations segment.

The Mortgage Servicing segment services and subservices mortgage loans, on a fee basis, for others. Also, the Mortgage Servicing segment services, on a fee basis, residential mortgages held-for-investment by the Community Banking segment and mortgage servicing rights held by the Other segment. The Mortgage Servicing segment may also collect ancillary fees, such as late fees and earn income through the use of non-interest bearing escrows.

The Community Banking segment originates loans, provides deposits and fee based services to consumer, business and mortgage lending customers through its Branch Banking, Business and Commercial Banking, Government Banking, Warehouse Lending and Held-for-Investment Portfolio groups. Products offered through these teams include checking accounts, savings accounts, money market accounts, certificates of deposit, investment and insurance services, consumer loans, commercial loans and warehouse lines of credit. Other financial services available to consumer and commercial customers include lines of credit, revolving credit, customized treasury management solutions, equipment leasing, inventory and accounts receivable lending and capital markets services such as interest rate risk protection products.

The Other segment includes the Treasury functions, funding revenue associated with stockholders' equity, the impact of interest rate risk management, the impact of balance sheet funding activities, changes or credits of an unusual or infrequent nature that are not reflective of the normal operations of the operating segments and miscellaneous other expenses of a

Table of Contents

corporate nature. Treasury functions include administering the investment securities portfolios, balance sheet funding, interest rate risk management and MSR asset valuation, hedging and sales into the secondary market. In addition, the Other segment includes revenue and expenses related to treasury and corporate assets and liabilities and equity not directly assigned or allocated to the Mortgage Originations, Mortgage Servicing or Community Banking operating segments.

The following table presents financial information by business segment for the periods indicated.

	Three Months Ended March 31, 2014

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Where we say "we," "us," or "our," we usually mean Flagstar Bancorp, Inc. However, in some cases, a reference to "we," "us," or "our" will include our wholly-owned subsidiary Flagstar Bank, FSB, which we refer to as the "Bank."

FORWARD – LOOKING STATEMENTS

This report contains "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995, as amended. Forward-looking statements, by their nature, involve estimates, projections, goals, forecasts, assumptions, risks and uncertainties that could cause actual results or outcomes to differ materially from those expressed in a forward-looking statement. Examples of forward-looking statements include statements regarding our expectations, beliefs, plans, goals, objectives and future financial or other performance. Words such as "expects," "anticipates," "intends," "plans," "believes," "seeks," "estimates" and variations of such words and similar expressions are intended to identify such forward-looking statements. Any forward-looking statement speaks only as of the date on which it is made. Except to fulfill our obligations under the U.S. securities laws, we undertake no obligation to update any such statement to reflect events or circumstances after the date on which it is made.

There are a number of important factors that could cause future results to differ materially from historical performance and these forward-looking statements. Factors that might cause such a difference include:

General business and economic conditions, including unemployment rates, movements in interest rates, the slope (1) of the yield curve, any increase in mortgage fraud and other related activity and the further decline of asset values in certain geographic markets, that affect us or our counterparties;

Volatile interest rates, and our ability to effectively hedge against them, which could affect, among other things, (2)(i) the mortgage business, (ii) our ability to originate loans and sell assets at a profit, (iii) prepayment speeds, (iv) our cost of funds and (v) investments in mortgage servicing rights;

(3) The adequacy of our allowance for loan losses and our representation and warranty reserves;

(4) Changes in accounting standards generally applicable to us and our application of such standards, including in the calculation of the fair value of our assets and liabilities;

(5) Our ability to borrow funds, maintain or increase deposits or raise capital on commercially reasonable terms or at all and our ability to achieve or maintain desired capital ratios;

(6) Changes in material factors affecting our loan portfolio, particularly our residential mortgage loans, and the market areas where our business is geographically concentrated or further loan portfolio or geographic concentration;

Changes in, or expansion of, the regulation of financial services companies and government-sponsored housing enterprises, including new legislation, regulations, rulemaking and interpretive guidance, enforcement actions, the (7) imposition of fines and other penalties by our regulators, the impact of existing laws and regulations, new or changed roles or guidelines of government-sponsored entities, changes in regulatory capital ratios, and increases in deposit insurance premiums and special assessments of the Federal Deposit Insurance Corporation;

Our ability to comply with the terms and conditions of the Supervisory Agreement with the Board of Governors of the Federal Reserve and the Bank's ability to comply with the Consent Order with the Office of Comptroller of the (8) Currency, and our ability to address matters raised by our regulators, including Matters Requiring Attention and Matters Requiring Immediate Attention, if any;

- (9) The Bank's ability to make capital distributions and our ability to pay dividends on our capital stock or interest on our trust preferred securities;
- (10) Our ability to attract and retain senior management and other qualified personnel to execute our business strategy, including our entry into new lines of business, our introduction of new products and services and

57

Table of Contents

management of risks relating thereto, and our competing in the mortgage loan originations and mortgage servicing and commercial and retail banking lines of business;

(11) Our ability to satisfy our mortgage servicing and subservicing obligations and manage repurchases and indemnity demands by mortgage loan purchasers, guarantors and insurers;

(12) The outcome and cost of defending current and future legal or regulatory litigation, proceedings or investigations;

(13) Our ability to create and maintain an effective risk management framework and effectively manage risk, including, among other things, market, interest rate, credit and liquidity risk, including risks relating to the cyclical and seasonality of our mortgage banking business, litigation and regulatory risk, operational risk, counterparty risk and reputational risk;

(14) The control by, and influence of, our majority stockholder;

(15) A failure of, interruption in or cybersecurity attack on our network or computer systems, which could impact our ability to properly collect, process and maintain personal data and system integrity with respect to funds settlement;

(16) Our ability to meet our forecasted earnings such that we are able to realize the benefits of reversing our deferred tax allowance, or the need to increase the valuation allowance in future periods;

(17) Our compliance with the terms and conditions of the agreement with the U.S. Department of Justice and the impact of compliance with that agreement and our ability to accurately estimate the financial impact of that agreement, including the fair value and timing of the future payments; and

(18) The downgrade of the long-term credit rating of the United States by one or more ratings agencies could materially affect global and domestic financial markets and economic conditions.

All of the above factors are difficult to predict, contain uncertainties that may materially affect actual results, and may be beyond our control. New factors emerge from time to time, and it is not possible for our management to predict all such factors or to assess the effect of each such factor on our business.

Please also refer to Item 1A to Part I of our Annual Report on Form 10-K for the year ended December 31, 2013 and Item 1A to Part II of this Quarterly Report on Form 10-Q, which are incorporated by reference herein, for further information on these and other factors affecting us.

Although we believe that these forward-looking statements are based on reasonable estimates and assumptions, they are not guarantees of future performance and are subject to known and unknown risks, uncertainties, contingencies and other factors. Accordingly, we cannot give you any assurance that our expectations will in fact occur or that actual results will not differ materially from those expressed or implied by such forward-looking statements. In light of the significant uncertainties inherent in the forward-looking statements included herein, the inclusion of such information should not be regarded as a representation by us or any other person that the results or conditions described in such statements or our objectives and plans will be achieved.

General

We are a Michigan-based savings and loan holding company founded in 1993. Our business is primarily conducted through our principal subsidiary, the Bank, a federally chartered stock savings bank founded in 1987. At March 31, 2014, our total assets were \$9.6 billion, making us the largest bank headquartered in Michigan and one of the top ten largest savings banks in the United States. Our common stock is listed on the New York Stock Exchange ("NYSE") under the symbol "FBC." We are considered a controlled company for NYSE purposes, because MP Thrift Investments, L.P. ("MP Thrift") held approximately 63.3 percent of our common stock as of March 31, 2014.

As a savings and loan holding company, we are subject to regulation, examination and supervision by the Board of Governors of the Federal Reserve (the "Federal Reserve"). The Bank is subject to regulation, examination and supervision by the Office of the Comptroller of the Currency ("OCC") of the U.S. Department of the Treasury ("U.S. Treasury"). The Bank is also subject to regulation, examination and supervision by the Federal Deposit Insurance Corporation ("FDIC") and the Bank's deposits are insured by the FDIC through the Deposit Insurance Fund. The Bank is also subject to the rule-making, supervision and examination authority of the Consumer Financial Protection Bureau (the "CFPB"), which is responsible for enforcing the principal federal consumer protection laws. The Bank is a member of the Federal Home Loan Bank ("FHLB") of Indianapolis.

In January 2014, we reorganized the manner in which our operations are managed based on core operating functions. The segments are based on an internally-aligned segment leadership structure, which is also how the results are monitored and performance assessed. We expect that the combination of our business model and the services that our operating segments provide will result in a competitive advantage that supports revenue and earnings. Our business model emphasizes the delivery of a complete set of mortgage and banking products and services, including originating, acquiring, selling and servicing one-to-four family residential first mortgage loans, which we believe is distinguished by timely processing and customer service.

Our Mortgage Originations segment originates or purchases residential first mortgage loans throughout the country and sells them into securitization pools, primarily to Federal National Mortgage Association ("Fannie Mae"), Federal Home Loan Mortgage Corporation ("Freddie Mac") and Government National Mortgage Association ("Ginnie Mae") (collectively, the "Agencies") or as whole loans. Approximately 94.8 percent of our total loan originations during the three months ended March 31, 2014 represented mortgage loans that were collateralized by residential first mortgages on single-family residences and were eligible for sale to the Agencies. Our revenue primarily consists of net gain on loan sales, loan fees and charges and interest income from residential first mortgage loans held-for-sale. At March 31, 2014, we originated residential first mortgage loans through our wholesale relationships with approximately 1,100 mortgage brokers and approximately 1,000 correspondents, which were located in all 50 states. At March 31, 2014, we also operated 33 home loan centers located in 18 states, which primarily originate one-to-four family residential first mortgage loans as part of our Mortgage Originations segment. The combination of our home lending, broker and correspondent channels gives us broad access to customers across diverse geographies to originate, fulfill, sell and service our residential first mortgage loan products. We also originate mortgage loans through referrals from our banking centers, consumer direct call center and our website, www.flagstar.com.

Our Mortgage Servicing segment activities primarily consist of collecting cash for principal, interest and escrow payments from borrowers, assisting homeowners through loss mitigation activities, and accounting for and remitting principal and interest payments to mortgage-backed securities investors and escrow payments to third parties. These activities are performed on a fee basis for third party mortgage servicing rights holders, residential mortgages held for investment by the Community Banking segment and mortgage servicing rights held by the Other segment.

Our Community Banking segment revenues include net interest income and fee-based income from community banking services. At March 31, 2014, we operated 106 banking centers in Michigan (of which eight were located in retail stores). Of the 106 banking centers, 69 facilities are owned and 37 facilities are leased. During the first quarter

2014, we relocated one and closed five banking centers to better align the branch structure with the Company's focus on key market areas and to improve banking center efficiencies. Through our banking centers, we gather deposits and offer a line of consumer and commercial financial products and services to individuals and businesses. We provide deposit and cash management services to governmental units on a relationship basis. We leverage our banking centers to cross-sell loans, deposit products and insurance and investment services to existing customers and to increase our customer base by attracting new customers. At March 31, 2014, we had a total of \$6.3 billion in deposits, including \$5.0 billion in retail deposits, \$0.6 billion in company controlled deposits and \$0.7 billion in government deposits.

At March 31, 2014, we had 2,798 full-time equivalent salaried employees of which 315 were account executives and loan officers.

Table of Contents

Summary of Operations

Our net loss applicable to common stock for the three months ended March 31, 2014 was \$78.9 million (\$1.51 loss per share), compared to income of \$22.2 million (\$0.33 per diluted share) for the three months ended March 31, 2013. The change during the three months ended March 31, 2014, compared to the three months ended March 31, 2013, was due to the following factors:

Provision for loan losses increased by \$91.9 million for the three months ended March 31, 2014, to \$112.3 million, primarily driven by two changes in estimates: the evaluation of current data related to the loss emergence period and the evaluation of the enhanced risk associated with payment resets relating to the interest-only loans;

- Loan fees and charges decreased by \$21.0 million for the three months ended March 31, 2014, to \$12.3 million, primarily due to lower mortgage volume;

Net gain on loan sales decreased \$92.2 million for the three months ended March 31, 2014, to \$45.3 million, primarily due to lower mortgage volume, consistent with an overall industry production decrease impacted by the current interest rate environment;

Representation and warranty reserve - change in estimate increased \$19.1 million to \$1.7 million for the three months ended March 31, 2014, primarily due to lower loss rates following the previously announced settlement agreements with Fannie Mae and Freddie Mac;

Other noninterest income decreased by \$23.7 million for the three months ended March 31, 2014, to a loss of \$14.7 million, primarily due to an adjustment to the originally recorded fair value of performing repurchased loans;

Compensation and benefit expense decreased \$11.6 million to \$65.6 million for the three months ended March 31, 2014, primarily due to a reduction in headcount;

Commissions decreased by \$10.2 million for the three months ended March 31, 2014, to \$7.2 million, primarily due to a reduction in loan production volume;

Loan processing expense decreased by \$9.4 million for the three months ended March 31, 2014, to \$7.7 million, primarily due to lower mortgage originations; and

Legal and professional expense decreased \$14.9 million to \$13.9 million for the three months ended March 31, 2014, primarily due to lower consulting and legal fees.
