CALCULATION OF REGISTRATION FEE

Title of Each Class of Securities to be Registered	Proposed Maximum Offering Price(1)(2)	Amount of Registration Fee(3)
Common Stock, \$0.01 par value per share	\$200,000,000	\$27,280

(1) Includes the offering price of the shares of common stock that may be sold if the option to purchase additional shares granted by us to the underwriters is exercised in full.

(2) Estimated solely for purposes of calculating the registration fee pursuant to Rule 457(o) of the Securities Act of 1933, as amended.

(3) Calculated by multiplying 0.00013640 by the proposed maximum offering price.

The registrant hereby amends this Registration Statement on such date or dates as may be necessary to delay its effective date until the registrant shall file a further amendment which specifically states that this Registration Statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933 or until this Registration Statement shall become effective on such date as the Commission, acting pursuant to said Section 8(a), may determine.

* Boise Cascade, L.L.C., the registrant whose name appears on the cover of this registration statement, is a Delaware limited liability company. Prior to the effectiveness of this registration statement, Boise Cascade, L.L.C. will be converted into a Delaware corporation and renamed Boise Cascade Company. Shares of the common stock of Boise Cascade Company are being offered by the prospectus. Except as disclosed in the prospectus, the consolidated financial statements and selected historical consolidated financial data and other financial information included in this registration statement are those of Boise Cascade, L.L.C. and its subsidiaries and do not give effect to the corporate conversion.

Preliminary Prospectus dated November 15, 2012

PROSPECTUS

Shares

Common Stock

This is the initial public offering of shares of common stock of Boise Cascade Company.

We are selling _____ shares of our common stock.

We expect the public offering price to be between \$ _____ and \$ _____ per share. Currently, no public market exists for the shares. After pricing of the offering, we expect that the shares will trade on the New York Stock Exchange under the symbol "BCC."

Investing in our common stock involves risks that are described in the "Risk Factors" section beginning on page 15 of this prospectus.

	Per Share	Total
Public offering price	\$ _____	\$ _____
Underwriting discounts	\$ _____	\$ _____
Proceeds, before expenses, to us	\$ _____	\$ _____

The underwriters may also exercise their option to purchase up to _____ additional shares from us at the initial public offering price, less the underwriting discount, for a period of 30 days after the date of this prospectus.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The shares will be ready for delivery on or about _____, 2013.

Joint Book-Running Managers

BofA Merrill Lynch

PROSPECTUS SUMMARY

The following is a summary of material information discussed in this prospectus. This summary may not contain all the details concerning our business, our common stock or other information that may be important to you. You should carefully review this entire prospectus, including the "Risk Factors" section and our consolidated financial statements and the notes thereto included elsewhere in this prospectus, before making an investment decision.

As used in this prospectus, unless the context otherwise indicates, the references to "Boise Cascade," "we," "our," or "us" refer to Boise Cascade, L.L.C., together with its subsidiaries, prior to our conversion to a Delaware corporation and Boise Cascade Company and its consolidated subsidiaries on or after such conversion. Unless otherwise indicated or the context otherwise requires, financial and operating data in this prospectus reflects the consolidated business and operations of Boise Cascade, L.L.C. and its wholly-owned subsidiaries prior to the conversion of Boise Cascade, L.L.C. into a corporation and Boise Cascade Company and its wholly-owned subsidiaries on and after such conversion. For a definition of EBITDA, see Note 6 to "Summary Historical Consolidated Financial Data." In addition, for a definition of segment income (loss) and a reconciliation of segment income (loss) to EBITDA for the twelve months ended September 30, 2012 ("LTM" or the "LTM period"), see "Business Wood Products" and "Building Materials Distribution," as applicable.

Our Company

We are a large, vertically-integrated wood products manufacturer and building materials distributor with widespread operations throughout the United States and Canada. We are the second largest manufacturer of laminated veneer lumber ("LVL"), I-joists (together "engineered wood products" or "EWP") and plywood in North America. We are also one of the largest stocking wholesale distributors of building products in the United States. Our broad line of products is used primarily in new residential construction, residential repair and remodeling projects, light commercial construction and industrial applications. We believe our large, vertically-integrated operations provide us with significant advantages over less integrated competitors and position us to optimally serve our customers. We have a broad base of more than 4,500 customers, which includes a diverse mix of leading wholesalers, home improvement centers, retail lumberyards and industrial converters. In the LTM period, no single customer represented more than 11% of sales and our top ten customers represented less than 31% of sales. For the LTM period, we generated sales of \$2,631.9 million, income before interest and taxes of \$45.7 million and EBITDA of \$80.1 million.

We supply our customers through 49 strategically located facilities (consisting of 18 manufacturing facilities and 31 distribution facilities). In addition to the vertical integration between our manufacturing and distribution operations, our EWP manufacturing facilities are closely integrated with our nearby plywood operations, which allows us to optimize both production processes. Throughout the housing downturn, we have continued to make strategic capital investments to increase our manufacturing capacity and expand our building materials distribution network. We believe that our scale, closely integrated businesses and significant capital investments throughout the downturn provide us with substantial operating leverage to benefit from a recovery in the U.S. housing market.

Table of Contents

We operate our company through two primary segments: our Wood Products segment and our Building Materials Distribution segment. The charts below summarize the breakdown of our business for the LTM period.

LTM SALES BY SEGMENT(1)(2)

LTM EBITDA BY SEGMENT(1)(3)

-
- (1) Financial data for the LTM period presented in this prospectus is derived by adding financial data for the year ended December 31, 2011 to financial data for the nine months ended September 30, 2012 and subtracting financial data for the nine months ended September 30, 2011.
- (2) Segment percentages are calculated before intersegment eliminations.
- (3) Segment percentages exclude Corporate and Other segment expenses.

Wood Products (\$69.2 million, or 73%, of LTM EBITDA). Our Wood Products segment is the second largest manufacturer of EWP and plywood in North America, with a highly integrated national network of 17 manufacturing facilities. Our wood products are used primarily in new residential construction, residential repair and remodeling projects and light commercial construction. We are focused on profitably gaining EWP market share and maintaining a strong market presence in plywood and pine lumber by providing superior customer service and distribution support. We manufacture LVL, I-joists and laminated beams, which are high-grade, value-added structural products used in applications where additional strength and consistent quality are required. LVL is also used in the manufacture of engineered I-joists, which are assembled by combining a vertical web of oriented strand board ("OSB") with top and bottom LVL or solid wood flanges. We also produce plywood, studs, particleboard and ponderosa pine lumber, a premium lumber grade sold primarily to manufacturers of specialty wood windows, moldings and doors. We enjoy the benefit of long-term wood supply agreements put in place in 2005 following the sale of our timberlands, under which we purchase timber at market-based prices. Approximately 40% of our log consumption is typically supplied through these agreements, giving us access to timberlands near our manufacturing operations.

Our EWP manufacturing facilities are closely integrated with our nearby plywood operations to optimize our veneer utilization by enabling us to dedicate higher quality veneers to higher margin applications and lower quality veneers to plywood products, giving us an advantage over our less integrated competitors. For the LTM period, EWP, plywood and lumber accounted for 35%, 44% and 9%, respectively, of our Wood Products sales. Most of our wood products are sold to leading wholesalers (including our Building Materials Distribution segment), home improvement centers, retail lumberyards and industrial converters. In the LTM period, approximately 37% of our Wood Products sales, including approximately 71% of our EWP sales, were to our Building Materials Distribution segment. For the LTM period, our Wood Products segment generated sales, income before interest and taxes and EBITDA of \$893.0 million, \$43.7 million and \$69.2 million, respectively.

Table of Contents

Building Materials Distribution (\$26.2 million, or 27%, of LTM EBITDA). We are one of the largest national stocking wholesale distributors of building materials in the United States. Our nationwide network of 31 strategically-located distribution facilities sells a broad line of building materials, including EWP, OSB, plywood, lumber and general line items such as framing accessories, composite decking, roofing, siding and insulation. We also operate a truss manufacturing plant located in Maine. Our products are used in the construction of new residential housing, including single-family, multi-family and manufactured homes, repair and remodeling projects and the construction of light industrial and commercial buildings. Except for EWP, we purchase most of these building materials from more than 1,000 third-party suppliers ranging from large manufacturers, such as James Hardie Building Products, Trex Company, Louisiana-Pacific and Georgia-Pacific, to small regional producers.

We market our products primarily to retail lumberyards and home improvement centers that then sell the products to end customers, who are typically professional builders, independent contractors and homeowners engaged in residential construction projects. We also market our products to industrial converters, which use our products to assemble windows, doors, agricultural bins and other value-added products used in industrial and repair and remodel applications. We believe that we are attractive to customers in our Building Materials Distribution segment because we provide a high level of customer service and a broad line of products from a large number of quality manufacturers. The majority of our competitors in this segment are specialized, local or regional distributors focused primarily on a narrow range of products. We also compete against other national wholesalers. Unlike many of our competitors who focus primarily on a narrow range of products, we are a one-stop resource for our customers' building materials needs, which allows for more cost-efficient ordering, delivery and receiving. Furthermore, we believe that our national presence and long-standing relationships with many of our key suppliers allow us to obtain favorable price and term arrangements and offer excellent customer service on top brands in the building materials industry. We have expertise in special-order sourcing and merchandising support, which is a key service for our home improvement center customers that choose not to stock certain items in inventory. Our highly efficient logistics system allows us to deliver superior customer service and assist our customers in optimizing their working capital, which we believe has led to increased market share during the housing downturn. For the LTM period, our Building Materials Distribution segment generated sales, income before interest and taxes and EBITDA of \$2,066.6 million, \$17.4 million and \$26.2 million, respectively.

Table of Contents

The following diagram illustrates our value chain:

BOISE CASCADE VALUE CHAIN

Our Industry

The building products manufacturing and distribution industry in North America is highly competitive, with a number of producers manufacturing and selling a broad range of products. Demand for our products is principally influenced by new residential construction, light commercial construction and repair and remodeling activity in the United States. Drivers of new residential construction, light commercial construction and repair and remodeling activity include new household formation, the age of the housing stock, availability of credit and other macroeconomic factors, such as GDP growth, population growth, migration, interest rates, employment and consumer sentiment. Purchasing decisions made by the customers who buy our wood products are generally based on price, quality and, particularly with respect to EWP, customer service and product support.

From 2005 to 2011, total housing starts in the United States declined by more than 70%. The significant drop in new residential construction has created challenging conditions for building products manufacturers and distributors, with substantial reductions in manufacturing and distribution capacity occurring since late 2008 as companies adjusted to lower industry demand. According to the U.S. Census Bureau, total housing starts in the United States were 0.59 million in 2010 and 0.61 million in 2011, modest increases over the 2009 level of 0.55 million (the lowest year on record) but significantly less than the 50-year average rate of 1.5 million. Prior to 2008, the housing market had not experienced a year with total housing starts below 1.0 million since the U.S. Census Bureau began its annual recordkeeping in 1959.

In the U.S., single- and multi-family housing starts were 0.87 million in September 2012 on a seasonally adjusted annual rate basis, an increase of 35% from September 2011. In November 2012, the Blue Chip Economic Indicators median consensus forecast of single- and multi-family housing starts in

Table of Contents

the U.S. was approximately 0.77 million units for 2012 and approximately 0.92 million units for 2013, which represent annual increases of 26% and 19%, respectively. We believe that over the long-term, there is considerable growth potential in the U.S. housing sector. In November 2012, IHS Global Insight estimates that total U.S. single- and multi-family housing starts will average 1.48 million units per year from 2012 through 2021, levels that are in line with the 50-year historical average.

During the housing downturn, demand for EWP declined less than demand for many products dependent on new residential construction. According to APA The Engineered Wood Association, LVL production volumes in North America increased 27% from 32.7 million cubic feet in 2009 to 41.6 million cubic feet in 2011 and I-joist production volumes in North America increased 20% from 380.1 million linear feet in 2009 to 456.9 million linear feet in 2011. Longer-term demand trends are expected to improve further. Resource Information Systems, Inc. ("RISI") forecasts that I-joist demand in North America will increase 15% and LVL billet demand in North America will increase 21% in 2012, followed by further demand increases in 2013 through 2015. RISI expects the I-joist and LVL billet demand to reach 1,013 million linear feet and 98.5 million cubic feet, respectively, by 2017.

Our products are not only used in new residential construction, but also in residential repair and remodeling projects, light commercial construction and industrial applications. We believe this diversification by product end use provides us some protection from declines in the new residential construction market. Residential repair and remodeling spending increased significantly over the past 15 years. According to the Home Improvement Research Institute ("HIRI"), the U.S. repair and remodel market increased 81.5% from \$165 billion in 1996 to a peak of \$300 billion in 2006 and declined approximately 10.2% to \$269 billion in 2011. In addition, the overall age of the U.S. housing stock, increased focus on making homes more energy efficient, rising home prices and availability of consumer capital at low interest rates are expected to drive long-term growth in repair and remodeling expenditures. HIRI estimates that total U.S. sales of home maintenance, repair and improvement products will grow at a compounded annual rate of 5.1% from 2011 through 2016.

Our Competitive Strengths

We believe the following key competitive strengths have contributed to our success and will enable us to execute our growth strategy:

Leadership Positions in Wood Products Manufacturing and Building Materials Distribution on a National Scale

We are one of the leading manufacturers in the North American wood products industry. We are the second largest producer of EWP and plywood in North America and we are the largest producer of plywood in the Western United States. From 2005 to 2011, our sales of LVL and I-joist per North American housing start increased by 65% and 30%, respectively. We have positioned ourselves to take advantage of improving demand in our core markets by expanding our EWP and plywood capacity through capital investments in low-cost, internal veneer manufacturing. Our Wood Products segment operates a highly-integrated national network of 17 manufacturing facilities that are well-maintained and cost-efficient as a result of continued capital improvements. We believe we are better able to serve our customers because our Wood Products business is vertically-integrated with our Building Materials Distribution business.

We are one of the largest national stocking wholesale distributors of building materials in the United States and we believe we offer one of the broadest product lines in the industry. From 2005 to 2011, we nearly doubled our sales per U.S. housing start in our Building Materials Distribution segment. We have a national platform of 31 strategically-located distribution facilities, which supply products to all major markets in the United States and provide us with significant scale and capacity relative to most of our competitors. We also have one truss manufacturing plant in Maine. Our broad geographic presence reduces our exposure to market factors in any single region. We have developed

Table of Contents

and maintain long-standing relationships with our customer segments, including retail lumberyards, home improvement centers and industrial converters. We believe that our strong and diverse customer relationships and support from leading industry manufacturers will enable us to capture additional market share as demand for building products improves.

Strongly Situated to Serve our Customers with Vertically-Integrated Manufacturing and Distribution Operations

We believe that we are the only large-scale manufacturer of plywood and EWP in North America that is vertically-integrated from log procurement through distribution. The integration of our manufacturing and distribution operations allows us to make procurement, manufacturing, veneer merchandising and marketing decisions that reduce our manufacturing and supply chain costs and allow us to more effectively control quality and working capital. Furthermore, our vertically-integrated operations combined with our national distribution network significantly enhance our ability to assure product supply for our end customers. We believe our vertical integration was an important factor in our ability to increase market share during the recent housing downturn.

Low-Cost Manufacturing and Distribution Footprint Supported by Significant Capital Investments

We believe that we have a highly competitive asset base across both of our operating segments, in part because we continued to strategically invest through the housing downturn. We operate the two largest EWP facilities in North America. Our large-scale EWP production facilities are integrated with our nearby plywood operations to optimize our veneer utilization, which we believe helps position us as a competitive manufacturer in the growing EWP business. In the past three years, we completed a number of initiatives in our Wood Products segment that strengthened our asset base and enhanced our operating performance. In our plywood and veneer operations, we reduced costs by reducing headcount and closing three facilities in Western Oregon. At the same time, we installed two new large-scale, state-of-the-art dryers at our Medford, Oregon plywood facility. In our EWP operations, we executed significant operational improvements to take advantage of additional low-cost, internal veneer production at our plywood facilities.

We believe that our plywood facilities in Kettle Falls, Washington and Elgin, Oregon are among the lowest cost Douglas fir plywood producers in North America. In the active timberland markets in which we operate, our manufacturing facilities are clustered to enable us to efficiently utilize fiber resources and to shift production depending on demand. We believe we are the only manufacturer in the inland Pacific Northwest with the integrated primary and secondary facilities necessary to process all softwood species.

We have continued to execute our strategic growth initiatives in our Building Materials Distribution segment, opportunistically acquiring facilities, starting a new facility in South Florida and significantly expanding six of our existing facilities. Since 2005, we have increased our covered warehouse space by over 65% and have more than doubled our outdoor storage acreage.

Well-Positioned for Growth as the Housing Market Recovers

Our vertically-integrated operations are well-positioned to serve our customers and take advantage of the recovery that we believe is underway in the U.S. housing market. From 2005 to 2011, we invested \$270 million (excluding acquisitions) to upgrade and maintain our facilities. We expect to make further capital investments in cost and operational improvements, primarily related to internal veneer production, which will further leverage our competitive position and allow us to capture growth opportunities. Additionally we have substantial unused capacity in our EWP operations. For the LTM period, we operated our EWP facilities at approximately 50% of LVL press capacity.

We believe that our Building Materials Distribution facilities enable us to support a considerable ramp-up in housing starts with no significant requirement for new capacity and will allow

Table of Contents

us to double our sales without increasing our existing footprint. Our excess capacity will provide us with substantial operating leverage as demand recovers.

Additionally, our strong balance sheet, significant liquidity and our access to the capital markets as a public company will provide us ample flexibility to take advantage of future market opportunities. As of September 30, 2012, we had total liquidity of \$483.8 million, consisting of \$224.4 million of cash and cash equivalents and \$259.4 million of availability under our revolving credit facility.

Experienced Management Team and Principal Equityholder

Madison Dearborn Partners, LLC ("Madison Dearborn") has a long and successful track record of investing in manufacturing and distribution businesses. Our senior management team has a track record of financial and operational excellence in the forest products industry in both favorable and challenging market conditions. Our senior management team has an average of approximately 30 years of experience in forest products manufacturing and building materials distribution. We will establish a new management equity incentive plan so that we can align management's compensation with our financial performance. See "Executive Compensation 2013 Equity Incentive Plan."

Our Business Strategy

We intend to capitalize on our strong market position in wood products manufacturing and building materials distribution to increase revenues and profits and maximize cash flow as the U.S. housing market recovers. We seek to achieve this objective by executing on the following strategies:

Grow our Wood Products Segment Operations with a Focus on Expanding our Market Position in EWP

From 2005 to 2011, despite experiencing a significant downturn in the U.S. housing sector, we increased our LVL and I-joist sales-per-housing start in North America by 65% and 30%, respectively. We will further expand our market position in EWP by continuing to focus on our large-scale manufacturing position, comprehensive customer service, design support capabilities and efficient distribution network. We have positioned ourselves to take advantage of expected increases in the demand for EWP per housing start by expanding our capacity through capital investments in low-cost, internal veneer manufacturing. We have also developed strategic relationships with third-party veneer suppliers to support additional EWP production as needed. Additionally, we intend to grow our Wood Products business through strategic acquisitions that are a compelling fit with our existing operations.

Grow Market Share in our Building Materials Distribution Segment

We intend to grow our Building Materials Distribution business in existing markets by adding products and services to better serve our customers. For example, we have added cedar board inventory and door shops in additional locations. We also plan to opportunistically expand our Building Materials Distribution business into adjacent geographies that we currently serve using off-site storage arrangements or longer truck routes. Sales in our Building Materials Distribution segment are strongly correlated with new residential construction in the United States. Measured on a sales-per-housing-start basis, our Building Materials Distribution business has grown significantly from 2005 to 2011, with penetration increasing from \$1,476 to \$2,923, or approximately 98%, per U.S. housing start. In the future, we will continue to grow our Building Materials Distribution business by opportunistically acquiring facilities, adding new products, opening new locations, relocating and expanding capacity at existing facilities and capturing local market share through our superior supply chain capabilities and customer service.

Table of Contents

Further Differentiate our Products and Services to Capture Market Share

We seek to continue to differentiate ourselves from our competitors by providing a broad line of high-quality products and superior customer service. Throughout the housing downturn, we believe we have grown market share by strengthening relationships with our customers by stocking sufficient inventory and retaining our primary sales team. Our Building Materials Distribution segment's highly efficient logistics system allows us to deliver superior customer service and assist our customers in optimizing their working capital. Our national distribution and manufacturing integration system differentiates us from most of our competitors and is critical to servicing leading wholesalers, home improvement centers, retail lumberyards and industrial converters. Additionally, this system allows us to procure product more efficiently and to develop and maintain stronger relationships with our vendors. Because of these relationships and our national presence, many of our vendors have offered us favorable pricing and provide us with enhanced product introductions and ongoing marketing support.

Continue to Improve our Competitiveness through Operational Excellence

We use a disciplined cost management approach to maximize our competitiveness without sacrificing our ability to react to future growth opportunities. Additionally, we have made capital investments and process improvements in certain facilities, which have enabled us to close or divest five manufacturing facilities during the housing downturn without any adverse impact on our production capacity. These capital investments and process improvements have decreased our production costs and allowed us to produce lower-cost, higher-quality veneers. Beginning in 2009, we adopted a data-driven process improvement program to further strengthen our manufacturing operations. Because of the significant gains we continue to see from this program, we believe there are opportunities to apply similar techniques and methods to different functional areas (including sales and marketing) to realize efficiencies in those areas.

Recent Developments

On October 15, 2012, we redeemed \$75.0 million of our senior subordinated notes. On October 22, 2012, we issued \$250.0 million of 6³/₈% senior notes due 2020 and used a portion of the proceeds from such offering to fund the redemption of the remaining \$144.6 million of our senior subordinated notes.

Principal Equityholder

Our direct parent company, Boise Cascade Holdings, L.L.C. ("BC Holdings"), is controlled by Forest Products Holdings, L.L.C. ("FPH"), an entity controlled by an investment fund managed by Madison Dearborn. Madison Dearborn, based in Chicago, is an experienced private equity investment firm that has raised over \$18 billion of capital. Since its formation in 1992, Madison Dearborn's investment funds have invested in approximately 125 companies across a broad spectrum of industries, including basic industries; business and government services; consumer; financial services; healthcare; and telecom, media and technology services. Madison Dearborn's objective is to invest in companies with strong competitive characteristics that it believes have the potential for significant long-term equity appreciation. To achieve this objective, Madison Dearborn seeks to partner with outstanding management teams that have a solid understanding of their businesses as well as track records of building stockholder value.

Conversion into a Delaware Corporation

Prior to the consummation of this offering, we will convert from a Delaware limited liability company into a Delaware corporation by filing a certificate of conversion in Delaware.

Table of Contents

Corporate Information

We were formed under the name Boise Cascade, L.L.C., a Delaware limited liability company, in October 2004 in connection with our acquisition of OfficeMax's forest products and paper assets. Prior to the consummation of the offering, we will effect our conversion into a Delaware corporation and become Boise Cascade Company. Our principal executive offices are located at 1111 West Jefferson Street, Suite 300, Boise, Idaho 83702. Our telephone number at that location is (208) 384-6161. Our website address is www.bc.com. The reference to our website is a textual reference only. We do not incorporate the information on our website into this prospectus and you should not consider any information on, or that can be accessed through, our website as part of this prospectus.

Our key registered trademarks include BOISE CASCADE® and the TREE-IN-A-CIRCLE® logo. This prospectus also refers to the products or services of other companies by the trademarks and trade names used and owned by those companies.

Risk Factors

Investing in our common stock involves substantial risk. You should carefully consider all of the information in this prospectus prior to investing in our common stock, including the information described under "Risk Factors" elsewhere in this prospectus. Among these important risks are the following:

the commodity nature of our products and their price movements, which are driven largely by capacity utilization rates and industry cycles that affect supply and demand;

general economic conditions, including but not limited to housing starts, repair and remodel activity and light commercial construction, inventory levels of new and existing homes for sale, foreclosure rates, interest rates, unemployment rates, relative currency values, mortgage availability and pricing, as well as other consumer financing mechanisms, that ultimately affect demand for our products;

availability and affordability of raw materials, including wood fiber, glues and resins and energy; and

the impact of actuarial assumptions and regulatory activity on pension costs and pension funding requirements.

Table of Contents

The Offering

Common stock offered	shares
Common stock to be outstanding immediately after this offering	shares
Option to purchase additional shares	We have agreed to allow the underwriters to purchase up to an additional shares from us, at the public offering price, less the underwriting discount, within 30 days of the date of this prospectus.
Use of proceeds	We estimate that the net proceeds from this offering will be approximately \$ million, or approximately \$ million if the underwriters exercise their option to purchase additional shares in full, assuming an initial public offering price of \$ per share, which is the midpoint of the price range set forth on the cover of this prospectus, after deducting underwriting discounts and commissions and estimated offering expenses payable by us. We expect to use substantially all of the net proceeds from this offering for general corporate purposes. We have not allocated the net proceeds from this offering for any specific purpose at this time. See "Use of Proceeds."
Dividend policy	Boise Cascade does not plan to pay dividends on its common stock. The declaration and payment of all future dividends, if any, will be at the discretion of our board of directors and will depend upon our financial condition, earnings, contractual conditions, restrictions imposed by our revolving credit facility and the indenture governing our senior notes or applicable laws and other factors that our board of directors may deem relevant. See "Dividend Policy."
Proposed New York Stock Exchange symbol	We intend to apply to list our common stock on the New York Stock Exchange ("NYSE") under the symbol "BCC."
Unless otherwise indicated, all information in this prospectus relating to the number of shares of common stock to be outstanding immediately after this offering:	

gives effect to the completion of the conversion of Boise Cascade, L.L.C. into Boise Cascade Company prior to the completion of this offering as described in " Conversion into a Delaware Corporation;"

assumes the effectiveness of our Delaware amended and restated certificate of incorporation, which we will adopt in connection with the conversion discussed in the immediately prior bullet point;

assumes (i) no exercise by the underwriters of their option to purchase up to additional shares from us; and (ii) an initial public offering price of \$ per share, the midpoint of the initial public offering price range indicated on the cover of this prospectus; and

excludes an aggregate of shares of our common stock reserved for issuance under the new management equity incentive plan we intend to adopt in connection with this offering (the "2013 Equity Incentive Plan").

Table of Contents**SUMMARY HISTORICAL CONSOLIDATED FINANCIAL DATA**

The following tables set forth our summary consolidated historical and pro forma financial data. You should read the information set forth below in conjunction with "Use of Proceeds," "Capitalization," "Management's Discussion and Analysis of Financial Condition and Results of Operations" and our consolidated historical financial statements and notes thereto included elsewhere in this prospectus. The statement of income (loss) data for each of the years ended December 31, 2009, 2010 and 2011 and the balance sheet data as of December 31, 2010 and 2011 set forth below are derived from our audited consolidated financial statements included elsewhere in this prospectus. The statements of income (loss) data for each of the nine-month periods ended September 30, 2011 and 2012 and the balance sheet data as of September 30, 2012 set forth below are derived from our unaudited quarterly consolidated financial statements included elsewhere in this prospectus and contain all adjustments, consisting of normal recurring adjustments, that management considers necessary for a fair presentation of our financial position and results of operations for the periods presented. Operating results for the nine-month periods are not necessarily indicative of results for a full financial year, or any other periods. See "Index to Consolidated Financial Statements."

Table of Contents

	September 30, 2012		
	Actual	As Adjusted(7)	As Further Adjusted(8)
	(in thousands)		
Balance Sheet Data:			
Cash and cash equivalents	\$ 224,418	\$ 45,656	\$
Total current assets	729,143	550,381	
Property and equipment, net	263,671	263,671	
Total assets	1,031,470	856,641	
Total debt	219,560	275,000	
Total capital	326,210	98,613	

- (1) In 2009, costs and expenses include \$8.9 million of expenses related to a facility closure, of which \$3.7 million was included in EBITDA and \$5.2 million was accelerated depreciation recorded in depreciation and amortization. In 2010, costs and expenses include \$4.6 million of income associated with receiving proceeds from a litigation settlement related to vendor product pricing. In 2011, costs and expenses include \$3.8 million of expense related to the closure of a laminated beam plant and noncash asset write-downs, of which \$2.9 million was included in the first nine months of 2011.
- (2) Represents the change in fair value of contingent value rights issued in connection with the sale of our Paper and Packaging & Newsprint assets in 2008.
- (3) Represents gain on the repurchase of \$11.9 million and \$8.6 million of our senior subordinated notes in 2009 and 2010, respectively.
- (4) Both pro forma net income (loss) per share and pro forma weighted shares outstanding give effect to our conversion from a limited liability company to a corporation and to the issuance of shares in this offering. The pro forma results of our being treated as a corporation had no impact on net income (loss) for the pro forma nine months ended September 30, 2012 and the pro forma year ended December 31, 2011, primarily as a result of placing a full valuation allowance on the tax benefits associated with the 2011 net operating losses. The pretax income for the nine months ended September 30, 2012 would not have resulted in an adjustment to our income tax provision due to the utilization of the net operating losses carried forward from 2011. In addition, due to its non-recurring nature, the pro forma presentation does not reflect the recognition of a net deferred tax liability of approximately \$4.0 million, net of deferred tax assets and related valuation allowances, related to our tax status conversion from a limited liability company to a corporation prior to the consummation of this offering. Following the offering, our effective tax rate is expected to be higher than in historical periods based on U.S. federal and state income tax rates applicable to a corporation and because we will not be able to utilize the net operating losses incurred while we were a limited liability company. See "Management's Discussion and Analysis of Financial Condition and Results of Operations Taxation." Earnings per common share is not applicable to historical periods, as there were no shares of common stock outstanding during these periods.
- (5) For 2009, includes \$0.9 million of cash paid for the purchase of a truss assembly operation and EWP sales office in Saco and Biddeford, Maine, respectively, and \$3.7 million of cash paid for the purchase of a sawmill in Pilot Rock, Oregon. For 2011, includes \$5.8 million of cash paid for the acquisition of a laminated beam and decking manufacturing plant in Homedale, Idaho. For the first nine months of 2012, includes \$2.4 million of cash paid for the February 2012 acquisition of a sawmill in Arden, Washington.
- (6) EBITDA is defined as income (loss) before interest (interest expense and interest income), income taxes and depreciation and amortization. EBITDA is the primary measure used by our

Table of Contents

chief operating decision maker to evaluate segment operating performance and to decide how to allocate resources to segments. We believe EBITDA is useful to investors because it provides a means to evaluate the operating performance of our segments and our company on an ongoing basis using criteria that are used by our internal decision makers and because it is frequently used by investors and other interested parties when comparing companies in our industry that have different financing and capital structures and/or tax rates. We believe EBITDA is a meaningful measure because it presents a transparent view of our recurring operating performance and allows management to readily view operating trends, perform analytical comparisons and identify strategies to improve operating performance. EBITDA, however, is not a measure of our liquidity or financial performance under generally accepted accounting principles ("GAAP") and should not be considered as an alternative to net income (loss), income (loss) from operations, or any other performance measure derived in accordance with GAAP or as an alternative to cash flow from operating activities as a measure of our liquidity. The use of EBITDA instead of net income (loss) or segment income (loss) has limitations as an analytical tool, including the inability to determine profitability; the exclusion of interest expense, interest income and associated significant cash requirements; and the exclusion of depreciation and amortization, which represent unavoidable operating costs. Management compensates for the limitations of EBITDA by relying on our GAAP results. Our measure of EBITDA is not necessarily comparable to other similarly titled captions of other companies due to potential inconsistencies in the methods of calculation.

Adjusted EBITDA is defined as EBITDA before unusual items, including the change in fair value of contingent value rights issued in connection with the sale of our Paper and Packaging & Newsprint assets, a gain on the repurchase of long-term debt and a litigation gain.

The following is a reconciliation of net income (loss) to EBITDA and Adjusted EBITDA:

	Year Ended December 31			Nine Months Ended September 30	
	2009	2010	2011	2011	2012
	(in millions)				
Net income (loss)	\$ (98.5)	\$ (33.3)	\$ (46.4)	\$ (32.6)	\$ 40.2
Interest expense	22.5	21.0	19.0	14.2	14.5
Interest income	(0.9)	(0.8)	(0.4)	(0.3)	(0.3)
Income tax provision	0.7	0.3	0.2	0.1	0.2
Depreciation and amortization	40.9	34.9	37.0	27.5	24.9
EBITDA	\$ (35.3)	\$ 22.1	\$ 9.5	\$ 8.9	\$ 79.6
Change in fair value of contingent value rights(a)	(0.2)				
Gain on repurchase of long-term debt(b)	(6.0)	(0.0)			
Litigation gain(c)		(4.6)			
Adjusted EBITDA	\$ (41.6)	\$ 17.5	\$ 9.5	\$ 8.9	\$ 79.6

(a) See Note (2) above.

(b) See Note (3) above.

(c) See Note (1) above.

Table of Contents

- (7) The balance sheet data, as adjusted, gives effect to (i) our redemption of \$75.0 million of our senior subordinated notes on October 15, 2012; (ii) our issuance of \$250.0 million of senior notes on October 22, 2012 and our redemption of our remaining \$144.6 million of senior subordinated notes with a portion of the related proceeds; and (iii) our payment of a \$225.0 million cash distribution to BC Holdings prior to the consummation of this offering and a \$25.0 million repayment on our revolving credit facility, which we anticipate will be required to comply with the related covenant in the indenture governing our senior notes in connection with making the distribution. In addition, the balance sheet data, as adjusted, gives effect to the write-off of deferred financing costs of \$1.5 million and payment of \$3.7 million of interest related to the redemption of our senior subordinated notes, as well as the deferral of \$5.5 million in financing costs on the offering of our senior notes.
- (8) The balance sheet data, as further adjusted, gives further effect to our conversion from a limited liability company to a corporation and our issuance and sale of shares of common stock in this offering at an assumed initial public offering price of \$ per share, which is the midpoint of the price range listed on the cover page of this prospectus, after deducting underwriting discounts and commissions and estimated offering expenses payable by us.

Table of Contents

RISK FACTORS

Investing in our common stock involves a high degree of risk. You should carefully consider the risk factors set forth below as well as the other information contained in this prospectus before investing in our common stock. Any of the following risks could materially and adversely affect our business, financial condition and results of operations. In such case, you may lose all or part of your original investment.

Risks Relating to Our Business

Many of the products we manufacture or purchase and resell are commodities whose price is determined by the market's supply and demand for such products, and the markets in which we operate are cyclical and competitive. The depressed state of the housing, construction and home improvement markets could continue to adversely affect demand and pricing for our products.

Many of the building products we produce or distribute, including OSB, plywood, lumber and particleboard, are commodities that are widely available from other manufacturers or distributors with prices and volumes determined frequently in an auction market based on participants' perceptions of short-term supply and demand factors. At times, the price for any one or more of the products we produce may fall below our cash production costs, requiring us to either incur short-term losses on product sales or cease production at one or more of our manufacturing facilities. Therefore, our profitability with respect to these commodity products depends, in significant part, on managing our cost structure, particularly raw materials and labor, which represent the largest components of our operating costs. Commodity wood product prices could be volatile in response to operating rates and inventory levels in various distribution channels. Commodity price volatility affects our distribution business, with falling price environments generally causing reduced revenues and margins, resulting in substantial declines in profitability and possible net losses.

Historically, demand for the products we manufacture, as well as the products we purchase and distribute, has been closely correlated with new residential construction in the United States and, to a lesser extent, light commercial construction and residential repair and remodeling activity. New residential construction activity remained substantially below average historical levels during the first nine months of 2012 and so did demand for the products we manufacture and distribute. There is significant uncertainty regarding the timing and extent of any recovery in such construction activity and resulting product demand levels. Demand for new residential construction is influenced by seasonal weather factors, mortgage availability and rates, unemployment levels, household formation rates, domestic population growth, immigration rates, residential vacancy and foreclosure rates, demand for second homes, existing home prices, consumer confidence and other general economic factors.

Wood products industry supply is influenced primarily by price-induced changes in the operating rates of existing facilities but is also influenced over time by the introduction of new product technologies, capacity additions and closures, restart of idled capacity and log availability. The balance of wood products supply and demand in the United States is also heavily influenced by imported products, principally from Canada.

We have very limited control of the foregoing and as a result, our profitability and cash flow may fluctuate materially in response to changes in the supply and demand balance for our primary products.

Our industry is highly competitive. If we are unable to compete effectively, our sales, operating results and growth strategies could be negatively affected.

The building products distribution industry that our Building Materials Distribution segment competes in is highly fragmented and competitive and the barriers to entry for local competitors are relatively low. Competitive factors in our industry include pricing and availability of product, service

Table of Contents

and delivery capabilities, ability to assist customers with problem solving, customer relationships, geographic coverage and breadth of product offerings. Also, financial stability is important to suppliers and customers in choosing distributors and allows for more favorable terms on which to obtain products from suppliers and sell products to customers. If our financial condition deteriorates in the future, our support from suppliers may be negatively impacted.

The markets for the products we manufacture in our Wood Products segment are also highly competitive. Our competitors range from very large, fully integrated forest and building products firms to smaller firms that may manufacture only one or a few types of products. We also compete less directly with firms that manufacture substitutes for wood building products. Certain mills operated by our competitors may be lower-cost manufacturers than the mills operated by us.

Some of our competitors are larger companies and, therefore, have access to greater financial and other resources than we do. These resources may afford those competitors greater purchasing power, increased financial flexibility and more capital resources for expansion and improvement, which may enable those competitors to compete more effectively than we can.

Our manufacturing businesses may have difficulty obtaining logs and fiber at favorable prices or at all.

Wood fiber is our principal raw material, which accounted for approximately 38% of the aggregate amount of materials, labor and other operating expenses, including from related parties, for our Wood Products segment in 2011. Wood fiber is a commodity and prices have been cyclical historically in response to changes in domestic and foreign demand and supply. Foreign demand for log exports, particularly from China, increased log costs in the western U.S. in 2010 and 2011 and negatively affected wood products manufacturers in the region. Sustained periods of high log costs may impair the cost competitiveness of our manufacturing facilities. Availability of residual wood fiber for our particleboard operation has been negatively affected by significant mill closures and curtailments that have occurred among solid-wood product manufacturers. Future development of wood cellulose biofuel or other new sources of wood fiber demand could interfere with our ability to source wood fiber or significantly raise our costs.

Future domestic or foreign legislation and litigation concerning the use of timberlands, timber harvest methodologies, forest road construction and maintenance, the protection of endangered species, forest-based carbon sequestration, the promotion of forest health and the response to and prevention of catastrophic wildfires can also affect log and fiber supply from government and private lands. Availability of harvested logs and fiber may be further limited by fire, insect infestation, disease, ice storms, windstorms, hurricanes, flooding and other natural and man-made causes, thereby reducing supply and increasing prices.

Significant changes in discount rates, actual investment return on pension assets and other factors could affect our earnings, equity and pension contributions in future periods.

Our earnings may be negatively affected by the amount of income or expense we record for our pension plans. GAAP requires that we calculate income or expense for the plans using actuarial valuations. These valuations reflect assumptions relating to financial market and other economic conditions. Changes in key economic indicators can change the assumptions. The most significant year-end assumptions used to estimate pension expense are the discount rate and the expected long-term rate of return on plan assets. In addition, we are required to make an annual measurement of plan assets and liabilities, which may result in a significant change to equity through a reduction or increase to "Accumulated other comprehensive income (loss)." A decline in the market value of the pension assets will increase our funding requirements. Our pension plan liabilities are sensitive to changes in interest rates. As interest rates decrease, the liabilities increase, potentially increasing benefit costs and funding requirements. Changes in demographics, including increased numbers of

Table of Contents

retirements or changes in life expectancy assumptions, may also increase the funding requirements of the obligations related to the pension plans. At December 31, 2011, the net underfunded status of our defined benefit pension plans was \$187.9 million. If the status of our defined benefit plans continues to be underfunded, we anticipate significant future funding obligations, reducing the cash available for our business. For more discussion regarding how our financial statements can be affected by pension plan estimates, see "Management's Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting Estimates Pensions."

A material disruption at one of our manufacturing facilities could prevent us from meeting customer demand, reduce our sales and/or negatively affect our financial results.

Any of our manufacturing facilities, or any of our machines within an otherwise operational facility, could cease operations unexpectedly due to a number of events, including but not limited to:

equipment failure, particularly a press at one of our major EWP production facilities;

fires, floods, earthquakes, hurricanes or other catastrophes;

unscheduled maintenance outages;

utility and transportation infrastructure disruptions;

labor difficulties;

other operational problems; or

ecoterrorism or threats of ecoterrorism.

Any downtime or facility damage could prevent us from meeting customer demand for our products and/or require us to make unplanned capital expenditures. If our machines or facilities were to incur significant downtime, our ability to satisfy customer requirements would be impaired, resulting in lower sales and net income.

In addition, a number of our suppliers are subject to the manufacturing facility disruption risks noted above. Our suppliers' inability to produce the necessary raw materials for our manufacturing processes or supply the finished goods that we distribute through our Building Materials Distribution segment may adversely impact our results of operations, cash flows and financial position.

Adverse conditions may increase the credit risk from our customers.

Our Building Materials Distribution and Wood Products segments extend credit to numerous customers who are heavily exposed to the effects of downturns in the housing market. Unfavorable housing market conditions could result in financial failures of one or more of our significant customers, which could impair our ability to fully collect receivables from such customers and negatively affect our operating results, cash flow and liquidity.

A significant portion of our sales are concentrated with a relatively small number of customers.

For the LTM period, our top ten customers represented approximately 31% of sales, with one customer accounting for approximately 11% of sales during such period. Although we believe that our relationships with our customers are strong, the loss of one or more of these customers could have a material adverse effect on our operating results, cash flow and liquidity.

Our ability to service our indebtedness or to fund our other liquidity needs is subject to various risks.

Edgar Filing: BOISE CASCADE, L.L.C. - Form S-1

Our ability to make scheduled payments on our indebtedness and fund other liquidity needs depends on and is subject to our financial and operating performance, which in turn is affected by general and regional economic, financial, competitive, business and other factors, including the

Table of Contents

availability of financing in the banking and capital markets as well as the other risks described herein. In particular, demand for our products correlates to a significant degree to the level of residential construction activity in North America, which historically has been characterized by significant cyclicalities. Over the last several years, housing starts remained below historical levels. This reduced level of building was caused, in part, by an increase in the inventory of homes for sale, a more restrictive mortgage market and a slowed economy. There can be no assurance as to when or if the housing market will rebound to historical levels. We have experienced significant losses from operations and used significant cash for operating activities in recent periods.

We cannot assure you that our business will generate sufficient cash flows from operations or that future borrowings will be available to us in an amount sufficient to enable us to service our debt or to fund our other liquidity needs. If we are unable to service our debt obligations or to fund our other liquidity needs, we could be forced to curtail our operations, reorganize our capital structure, or liquidate some or all of our assets.

We are subject to environmental regulation and environmental compliance expenditures, as well as other potential environmental liabilities.

Our businesses are subject to a wide range of general and industry-specific environmental laws and regulations, particularly with respect to air emissions, wastewater discharges, solid and hazardous waste management and site remediation. Enactment of new environmental laws or regulations, including those aimed at addressing greenhouse gas emissions, or changes in existing laws or regulations might require significant expenditures or restrict operations.

The Environmental Protection Agency (the "EPA") has recently promulgated a series of four regulations commonly referred to collectively as Boiler MACT, which are intended to regulate the emission of hazardous air pollutants from industrial boilers. At the time it announced the final promulgation of the regulations, the EPA also announced that it planned to reconsider portions of the regulations and has recently taken steps to initiate such reconsideration. In December 2011, the EPA published its re-proposed rules and we are currently evaluating the potential impact of the re-proposed rules on our business. If the Boiler MACT rules are finalized as re-proposed, we believe the new rules would be less costly for us to implement than the current rules. The EPA has yet to finalize the new Boiler MACT rules. Once final, considerable uncertainty will still exist, as there will likely be legal challenges to the final rules from industry and/or environmental organizations. Notwithstanding that uncertainty, we are proceeding with efforts to analyze the applicability and requirements of the regulations, as recently re-proposed and the likely capital and operating costs required to comply. At this time, we cannot accurately forecast the capital or operating cost changes that may result from compliance with the regulations.

As an owner and operator of real estate, we may be liable under environmental laws for the cleanup of past and present spills and releases of hazardous or toxic substances on or from our properties and operations. We could be found liable under these laws whether or not we knew of, or were responsible for, the presence of such substances. In some cases, this liability may exceed the value of the property itself.

We may be unable to generate funds or other sources of liquidity and capital to fund unforeseen environmental liabilities or expenditures. For additional information on how environmental regulation and compliance affects our business, see "Management's Discussion and Analysis of Financial Condition and Results of Operations Environmental."

Labor disruptions or increased labor costs could adversely affect our business.

As of September 30, 2012, we had approximately 4,470 employees. Approximately 30% of these employees work pursuant to collective bargaining agreements. As of September 30, 2012, we had ten

Table of Contents

collective bargaining agreements. One agreement, covering 359 employees at our facility in Florien, Louisiana and 262 employees at our facility in Oakdale, Louisiana, is set to expire on July 15, 2013. If these agreements are not renewed or extended upon their expiration, we could experience a material labor disruption or significantly increased labor costs, which could prevent us from meeting customer demand or reduce our sales and profitability.

Should the markets for our products deteriorate or should we decide to invest capital differently or should other cash flow assumptions change, it is possible that we will be required to record noncash impairment charges in the future that could have a material impact on our results of operations.

We review the carrying value of long-lived assets for impairment when events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable. Should the markets for our products deteriorate or should we decide to invest capital differently or should other cash flow assumptions change, it is possible that we will be required to record noncash impairment charges in the future that could have a material impact on our results of operations.

The terms of our revolving credit facility and the indenture governing our senior notes restrict, and covenants contained in agreements governing indebtedness in the future may restrict, our ability to operate our business and to pursue our business strategies.

Our revolving credit facility and the indenture governing our senior notes contain, and any future indebtedness of ours may contain, a number of restrictive covenants that impose customary operating and financial restrictions on us. Our revolving credit facility and the indenture governing our senior notes limit our ability and the ability of our restricted subsidiaries, among other things, to:

incur additional debt;

declare or pay dividends, redeem stock or make other distributions to stockholders;

make investments;

create liens or use assets as security in other transactions;

merger or consolidate, or sell, transfer, lease or dispose of substantially all of our assets;

enter into transactions with affiliates;

sell or transfer certain assets; and

make prepayments on our senior notes and subordinated indebtedness.

In addition, our revolving credit facility provides that if an event of default occurs or excess availability under our revolving credit facility drops below a threshold amount equal to the greater of 12.5% of the aggregate commitments under our revolving credit facility and \$31.25 million (and until such time as excess availability for two consecutive fiscal months exceeds that threshold amount and no event of default has occurred and is continuing), we will be required to maintain a monthly minimum fixed coverage charge ratio of 1.0:1.0, determined on a trailing twelve-months' basis.

Our failure to comply with any of these covenants could result in an event of default which, if not cured or waived, could result in the acceleration of all of our indebtedness.

We may be unable to attract and retain key management and other key employees.

Edgar Filing: BOISE CASCADE, L.L.C. - Form S-1

Our employees, particularly our key management, are vital to our success and difficult to replace. We may be unable to retain them or to attract other highly qualified employees, particularly if we do not offer employment terms competitive with the rest of the market. Failure to attract and retain highly qualified employees, or failure to develop and implement a viable succession plan, could result in inadequate depth of institutional knowledge or skill sets, adversely affecting our business.

Table of Contents

As a result of the sale of our Paper and Packaging & Newsprint assets, we now rely on Boise Inc. for many of our administrative services.

In conjunction with the sale of our Paper and Packaging & Newsprint assets in 2008, we entered into an Outsourcing Services Agreement under which Boise Inc. provides a number of corporate staff services to us at cost. These services include information technology, accounting and human resource transactional services. Most of the Boise Inc. staff that provides these services are providing the same services they provided when they were our employees. Nevertheless, we cannot be assured that these employees will remain with Boise Inc. or that there will not be a disruption in the continuity or level of service provided. If Boise Inc. is unwilling or unable to provide services at the same quality levels as those services have been provided in the past, our business and compliance activities and results of operations could be substantially and negatively affected.

Risks Relating to Ownership of Our Common Stock

There is no existing market for our common stock, and we do not know if one will develop to provide you with adequate liquidity to sell our common stock at prices equal to or greater than the price you paid in this offering.

Prior to this offering, there has not been a public market for our common stock. We cannot predict the extent to which investor interest in our company will lead to the development of an active trading market on the NYSE or otherwise or how liquid that market might become. If an active trading market does not develop, you may have difficulty selling any of our common stock that you buy. The initial public offering price for the common stock will be determined by negotiations between us and the representatives of the underwriters and may not be indicative of prices that will prevail in the open market following this offering. Consequently, you may not be able to sell our common stock at prices equal to or greater than the price you paid in this offering, or at all.

The price of our common stock may fluctuate significantly, and you could lose all or part of your investment.

Volatility in the market price of our common stock may prevent you from being able to sell your shares at or above the price you paid for them. The market price for our common stock could fluctuate significantly for various reasons, including:

our operating and financial performance and prospects;

our quarterly or annual earnings or those of other companies in our industry;

the public's reaction to our press releases, our other public announcements and our filings with the SEC;

changes in, or failure to meet, earnings estimates or recommendations by research analysts who track our common stock or the stock of other companies in our industry;

the failure of research analysts to cover our common stock;

general economic, industry and market conditions;

strategic actions by us, our customers or our competitors, such as acquisitions or restructurings;

new laws or regulations or new interpretations of existing laws or regulations applicable to our business;

changes in accounting standards, policies, guidance, interpretations or principles;

material litigation or government investigations;

Table of Contents

changes in general conditions in the U.S. and global economies or financial markets, including those resulting from war, incidents of terrorism or responses to such events;

changes in key personnel;

sales of common stock by us, our principal stockholder or members of our management team;

termination of lock-up agreements with our management team and principal stockholder;

the granting or exercise of employee stock options;

volume of trading in our common stock; and

the impact of the facts described elsewhere in "Risk Factors."

In addition, in recent years, the stock market has regularly experienced significant price and volume fluctuations. This volatility has had a significant impact on the market price of securities issued by many companies, including companies in our industry. The changes frequently appear to occur without regard to the operating performance of the affected companies. Hence, the price of our common stock could fluctuate based upon factors that have little or nothing to do with us and these fluctuations could materially reduce our share price.

The requirements of being a public company will increase certain of our costs and require significant management focus.

As a public company, our legal, accounting and other expenses associated with compliance-related and other activities will increase. For example, in connection with this offering, we will create new board committees and appoint one or more independent directors to comply with the corporate governance requirements of the NYSE. Costs to obtain director and officer liability insurance will contribute to our increased costs. As a result of the associated liability, it may be more difficult for us to attract and retain qualified persons to serve on our board of directors or as executive officers. Advocacy efforts by stockholders and third parties may also prompt even more changes in governance and reporting requirements, which could further increase our compliance costs.

We are exempt from certain corporate governance requirements since we are a "controlled company" within the meaning of the NYSE rules and, as a result, you will not have the protections afforded by these corporate governance requirements.

Following the consummation of this offering, BC Holdings will hold a majority of our common stock. Madison Dearborn, through one of its investment funds, is BC Holdings' principal equityholder. As a result of the completion of this offering, we will be considered a "controlled company" for the purposes of the NYSE listing requirements. Under these rules, a company of which more than 50% of the voting power is held by a group is a "controlled company" and may elect not to comply with certain NYSE corporate governance requirements, including the requirements that our board of directors, our Compensation Committee and our Corporate Governance and Nominating Committee meet the standard of independence established by those corporate governance requirements. The NYSE independence standards are intended to ensure that directors who meet the independence standard are free of any conflicting interest that could influence their actions as directors. Accordingly, you may not have the same protections afforded to stockholders of companies that are subject to all of the NYSE's corporate governance requirements.

Table of Contents

Our majority stockholder will have the ability to control significant corporate activities after the completion of this offering and our majority stockholder's interests may not coincide with yours.

After the consummation of this offering, BC Holdings will beneficially own approximately % of our common stock, assuming the underwriters do not exercise their option to purchase additional shares. If the underwriters exercise in full their option to purchase additional shares, BC Holdings will beneficially own approximately % of our common stock. As a result of its ownership, BC Holdings (and Madison Dearborn as its indirect controlling equityholder), so long as it holds a majority of our outstanding shares, will have the ability to control the outcome of matters submitted to a vote of stockholders and, through our board of directors, the ability to control decision-making with respect to our business direction and policies.

Matters over which Madison Dearborn will, directly or indirectly, exercise control following this offering include:

election of directors;

mergers and other business combination transactions, including proposed transactions that would result in our stockholders receiving a premium price for their shares;

other acquisitions or dispositions of businesses or assets;

incurrence of indebtedness and the issuance of equity securities;

repurchase of stock and payment of dividends; and

the issuance of shares to management under the 2013 Equity Incentive Plan.

Even if BC Holdings' ownership of our shares falls below a majority, it may continue to be able to strongly influence or effectively control our decisions. In addition, BC Holdings will have a contractual right to designate a number of directors proportionate to its stock ownership. See "Certain Relationships and Related Party Transactions Nomination of our Directors."

Conflicts of interest may arise because some of our directors are principals of our largest stockholder.

Messrs. Mencoff, Norton and Soueleles, who are officers or employees of Madison Dearborn, serve on our board of directors. Madison Dearborn is the ultimate principal equityholder of BC Holdings, our majority stockholder (after giving effect to this offering). Madison Dearborn and entities controlled by it may hold equity interests in entities that directly or indirectly compete with us, and companies in which it currently invests may begin competing with us. As a result of these relationships, when conflicts between the interests of Madison Dearborn, on the one hand, and of other stockholders, on the other hand, arise, these directors may not be disinterested. Although our directors and officers have a duty of loyalty to us under Delaware law and our amended and restated certificate of incorporation that will be adopted in connection with this offering, transactions that we enter into in which a director or officer has a conflict of interest are generally permissible so long as (1) the material facts relating to the director's or officer's relationship or interest as to the transaction are disclosed to our board of directors and a majority of our disinterested directors approves the transaction, (2) the material facts relating to the director's or officer's relationship or interest as to the transaction are disclosed to our stockholders and a majority of our disinterested stockholders approve the transaction or (3) the transaction is otherwise fair to us. Our amended and restated certificate of incorporation will also provide that Madison Dearborn and its representatives will not be required to offer any transaction opportunity of which they become aware to us and could take any such opportunity for themselves or offer it to other companies in which they have an investment, unless such opportunity is offered to them solely in their capacities as our directors.

Table of Contents

If you purchase shares of common stock sold in this offering, you will incur immediate and substantial dilution.

If you purchase shares of common stock in this offering, you will incur immediate and substantial dilution in the amount of \$ _____ per share, because the assumed initial public offering price of \$ _____, which is the midpoint of the price range listed on the cover page of this prospectus, is substantially higher than the pro forma net tangible book value per share of our outstanding common stock. This dilution is due in large part to the significant losses we incurred after BC Holdings' equityholders obtained their BC Holdings equity interests. In addition, you may also experience additional dilution upon future equity issuances or the exercise of stock options to purchase common stock granted to our employees, directors and consultants under our stock option and equity incentive plans. For additional information, see "Dilution."

We do not currently intend to pay dividends on our common stock following the offering.

We do not anticipate paying any cash dividends on our common stock for the foreseeable future, other than the dividend that will be made to BC Holdings prior to the consummation of this offering. Instead, we intend to retain future earnings to fund our growth. In addition, our existing indebtedness restricts, and we anticipate our future indebtedness may restrict, our ability to pay dividends. Therefore, you may not receive a return on your investment in our common stock by receiving a payment of dividends. See "Dividend Policy."

The issuer of common stock in this offering does not conduct any substantive operations and, as a result, its ability to pay dividends will be dependent upon the financial results and cash flows of its operating subsidiaries and the distribution or other payment of cash to it in the form of dividends or otherwise. The direct and indirect subsidiaries of the issuer are separate and distinct legal entities and have no obligation to make any funds available to the issuer.

Future sales of our common stock, or the perception in the public markets that these sales may occur, may depress our stock price.

Sales of substantial amounts of our common stock in the public market after this offering, or the perception that these sales could occur, could adversely affect the price of our common stock and could impair our ability to raise capital through the sale of additional shares. Upon completion of this offering, there will be _____ shares of our common stock outstanding. Of these, the _____ shares being sold in this offering (or _____ shares if the underwriters exercise their option to purchase additional shares in full) will be freely tradable immediately after this offering (except for any shares purchased by affiliates, if any) and approximately _____ shares may be sold upon expiration of lock-up agreements 180 days after the date of this prospectus (subject in some cases to volume limitations). All of our common stock, other than the shares sold in this offering, is owned by BC Holdings. Sales by BC Holdings of a substantial number of shares after this offering could significantly reduce the market price of our common stock. BC Holdings has the right to require us to register the shares of our common stock held by it pursuant to the terms of a registration rights agreement to be entered into in connection with the consummation of this offering.

We also intend to register all common stock that we may issue under the 2013 Equity Incentive Plan, as described in "Executive Compensation 2013 Equity Incentive Plan." Effective upon the completion of this offering, an aggregate of _____ shares of our common stock will be reserved for future issuance under the 2013 Equity Incentive Plan. Once we register these shares, which we plan to do shortly after the completion of this offering, they can be freely sold in the public market upon issuance, subject to the lock-up agreements referred to above. If a large number of these shares are sold in the public market, the sales could reduce the trading price of our common stock.

Table of Contents

We have broad discretion in the use of the net proceeds from our initial public offering and may not use them effectively.

We cannot specify with any certainty the particular uses of the net proceeds that we will receive from our initial public offering. We will have broad discretion in the application of the net proceeds, including working capital, possible acquisitions, and other general corporate purposes, and we may spend or invest these proceeds in a way with which our stockholders disagree. The failure by our management to apply these funds effectively could adversely affect our business and financial condition. Pending their use, we may invest the net proceeds from our initial public offering in a manner that does not produce income or that loses value. These investments may not yield a favorable return to our investors.

Our future operating results may fluctuate significantly and our current operating results may not be a good indication of our future performance. Fluctuations in our quarterly financial results could affect our stock price in the future.

Our revenues and operating results have historically varied from period-to-period and we expect that they will continue to do so as a result of a number of factors, many of which are outside of our control. If our quarterly financial results or our predictions of future financial results fail to meet the expectations of securities analysts and investors, our stock price could be negatively affected. Any volatility in our quarterly financial results may make it more difficult for us to raise capital in the future or pursue acquisitions that involve issuances of our stock. Our operating results for prior periods may not be effective predictors of future performance.

Factors associated with our industry, the operation of our business and the markets for our products may cause our quarterly financial results to fluctuate, including:

the commodity nature of our products and their price movements, which are driven largely by capacity utilization rates and industry cycles that affect supply and demand;

general economic conditions, including but not limited to housing starts, repair and remodel activity and light commercial construction, inventory levels of new and existing homes for sale, foreclosure rates, interest rates, unemployment rates, relative currency values, mortgage availability and pricing, as well as other consumer financing mechanisms, that ultimately affect demand for our products;

the highly competitive nature of our industry;

availability and affordability of raw materials, including wood fiber, glues and resins and energy;

the impact of actuarial assumptions and regulatory activity on pension costs and pension funding requirements;

actions of suppliers, customers and competitors, including merger and acquisition activities, plant closures and financial failures;

the financial condition and creditworthiness of our customers;

concentration of our sales among a relatively small group of customers;

our substantial indebtedness, including the possibility that we may not generate sufficient cash flows from operations, or that future borrowings may not be available in amounts sufficient to fulfill our debt obligations and fund other liquidity needs;

cost of compliance with government regulations, in particular environmental regulations;

labor disruptions, shortages of skilled and technical labor or increased labor costs;

Table of Contents

impairment of our long-lived assets;

attraction and retention of key management and other key employees;

our reliance on Boise Inc. for many of our administrative services;

major equipment failure; and

severe weather phenomena such as drought, hurricanes, tornadoes and fire.

Any one of the factors above or the cumulative effect of some of the factors referred to above may result in significant fluctuations in our quarterly financial and other operating results, including fluctuations in our key metrics. The variability and unpredictability could result in our failing to meet our internal operating plan or the expectations of securities analysts or investors for any period. If we fail to meet or exceed such expectations for these or any other reasons, the market price of our shares could fall substantially and we could face costly lawsuits, including securities class action suits.

Certain provisions of our amended and restated certificate of incorporation and our amended and restated bylaws may make it difficult for stockholders to change the composition of our board of directors and may discourage hostile takeover attempts that some of our stockholders may consider to be beneficial.

In anticipation of this offering, Boise Cascade, L.L.C. will be converted from a limited liability company into a corporation and will adopt an amended and restated certificate of incorporation and amended and restated bylaws. Certain provisions of such amended and restated certificate of incorporation and amended and restated bylaws may have the effect of delaying or preventing changes in control if our board of directors determines that such changes in control are not in the best interests of us and our stockholders. The provisions in such amended and restated certificate of incorporation and amended and restated bylaws will include, among other things, the following:

a classified board of directors with three-year staggered terms;

the ability of our board of directors to issue shares of preferred stock and to determine the price and other terms, including preferences and voting rights, of those shares without stockholder approval;

stockholder action can only be taken at a special or regular meeting and not by written consent following the time that BC Holdings ceases to beneficially own 50% or more of our common stock;

advance notice procedures for nominating candidates to our board of directors or presenting matters at stockholder meetings;

removal of directors only for cause;

allowing only our board of directors to fill vacancies on our board of directors; and

super-majority voting requirements to amend our amended and restated bylaws and certain provisions of our amended and restated certificate of incorporation.

Edgar Filing: BOISE CASCADE, L.L.C. - Form S-1

We will elect in our amended and restated certificate of incorporation not to be subject to Section 203 of the DGCL, an anti-takeover law. In general, Section 203 prohibits a publicly held Delaware corporation from engaging in a business combination, such as a merger, with a person or group owning 15% or more of the corporation's voting stock for a period of three years following the date the person became an interested stockholder, unless (with certain exceptions) the business combination or the transaction in which the person became an interested stockholder is approved in a prescribed manner. Accordingly, we will not be subject to any anti-takeover effects of Section 203. However, our amended and restated certificate of incorporation will contain provisions that have the same effect as Section 203, except that they will provide that both Madison Dearborn and any persons

Table of Contents

to whom a Madison Dearborn investment fund sells its common stock will be deemed to have been approved by our board of directors and thereby not subject to the restrictions set forth in our amended and restated certificate of incorporation that have the same effect as Section 203.

While these provisions have the effect of encouraging persons seeking to acquire control of our company to negotiate with our board of directors, they could enable the board of directors to hinder or frustrate a transaction that some, or a majority, of the stockholders might believe to be in their best interests and, in that case, may prevent or discourage attempts to remove and replace incumbent directors.

These provisions may frustrate or prevent any attempts by our stockholders to replace or remove our current management by making it more difficult for stockholders to replace members of our board of directors, which is responsible for appointing the members of our management. For more information, see "Description of Capital Stock."

Any issuance of preferred stock could make it difficult for another company to acquire us or could otherwise adversely affect holders of our common stock, which could depress the price of our common stock.

Upon completion of this offering, our board of directors will have the authority to issue preferred stock and to determine the preferences, limitations and relative rights of shares of preferred stock and to fix the number of shares constituting any series and the designation of such series, without any further vote or action by our stockholders. Our preferred stock could be issued with voting, liquidation, dividend and other rights superior to the rights of our common stock. The potential issuance of preferred stock may delay or prevent a change in control of us, discouraging bids for our common stock at a premium over the market price, and adversely affect the market price and the voting and other rights of the holders of our common stock.

Failure to establish and maintain effective internal controls in accordance with Section 404 of the Sarbanes-Oxley Act could have a material adverse effect on our business and stock price.

We are not currently required to comply with the rules of the SEC implementing Section 404 of the Sarbanes-Oxley Act and therefore are not required to make a formal assessment of the effectiveness of our internal control over financial reporting for that purpose. Upon becoming a public company, we will be required to comply with the SEC's rules implementing Section 302 and 404 of the Sarbanes-Oxley Act, which will require management to certify financial and other information in our quarterly and annual reports and provide an annual management report on the effectiveness of controls over financial reporting. Though we will be required to disclose changes made in our internal controls and procedures on a quarterly basis, we will not be required to make our first annual assessment of our internal control over financial reporting pursuant to Section 404 until the year following our first annual report required to be filed with the SEC. To comply with the requirements of being a public company, we may need to undertake various actions, such as implementing new internal controls and procedures and hiring accounting or internal audit staff. Testing and maintaining internal control could divert our management's attention from other matters that are important to the operation of our business.

Our independent registered public accounting firm is not required to formally attest to the effectiveness of our internal controls over financial reporting until the year following our first annual report required to be filed with the SEC. At such time, our independent registered public accounting firm may issue a report that is adverse, in the event it is not satisfied with the level at which our controls are documented, designed or operating. If we are unable to conclude that we have effective internal control over financial reporting, our independent registered public accounting firm is unable to provide us with an unqualified report as required by Section 404 or we are required to restate our financial statements, we may fail to meet our public reporting obligations and investors could lose

Table of Contents

confidence in our reported financial information, which could have a negative effect on the trading price of our stock.

Our business and stock price may suffer as a result of our lack of public company operating experience. In addition, if securities or industry analysts do not publish research or publish inaccurate or unfavorable research about our business, our stock price and trading volume could decline.

We are a privately-held company. Our lack of recent public company operating experience may make it difficult to forecast and evaluate our future prospects. If we are unable to execute our business strategy, either as a result of our inability to effectively manage our business in a public company environment or for any other reason, our business, prospects, financial condition and results of operations may be harmed. In addition, as a new public company we do not currently have and may never obtain research coverage by securities and industry analysts. If no securities or industry analysts commence coverage of our company, the trading price for our stock would be negatively impacted. If we obtain securities or industry analyst coverage and if one or more of the analysts who covers us downgrades our stock or publishes inaccurate or unfavorable research about our business, our stock price would likely decline. If one or more of these analysts ceases coverage of us or fails to publish reports on us regularly, demand for our stock could decrease, which could cause our stock price and trading volume to decline.

Table of Contents

CAUTIONARY STATEMENT CONCERNING FORWARD-LOOKING STATEMENTS

Certain statements made in this prospectus contain forward-looking statements. Forward-looking statements are subject to risks and uncertainties that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by these forward-looking statements. Forward-looking statements include information concerning our future financial performance, business strategy, plans, goals and objectives.

Statements preceded or followed by, or that otherwise include, the words "believes," "expects," "anticipates," "intends," "project," "estimates," "plans," "forecast," "is likely to" and similar expressions or future or conditional verbs such as "will," "may," "would," "should" and "could" are generally forward-looking in nature and not historical facts. Such statements are based upon the current beliefs and expectations of our management and are subject to significant risks and uncertainties. Actual results may differ materially from those set forth in the forward-looking statements.

The following factors, among others, could cause our actual results, performance or achievements to differ from those set forth in the forward-looking statements:

the commodity nature of our products and their price movements, which are driven largely by capacity utilization rates and industry cycles that affect supply and demand;

general economic conditions, including but not limited to housing starts, repair and remodel activity and light commercial construction, inventory levels of new and existing homes for sale, foreclosure rates, interest rates, unemployment rates, relative currency values, mortgage availability and pricing, as well as other consumer financing mechanisms, that ultimately affect demand for our products;

the highly competitive nature of our industry;

availability and affordability of raw materials, including wood fiber, glues and resins and energy;

the impact of actuarial assumptions and regulatory activity on pension costs and pension funding requirements;

actions of suppliers, customers and competitors, including merger and acquisition activities, plant closures and financial failures;

the financial condition and creditworthiness of our customers;

concentration of our sales among a relatively small group or customers;

our substantial indebtedness, including the possibility that we may not generate sufficient cash flows from operations, or that future borrowings may not be available in amounts sufficient to fulfill our debt obligations and fund other liquidity needs;

cost of compliance with government regulations, in particular environmental regulations;

labor disruptions, shortages of skilled and technical labor or increased labor costs;

impairment of our long-lived assets;

attraction and retention of key management and other key employees;

our reliance on Boise Inc. for many of our administrative services;

major equipment failure;

severe weather phenomena such as drought, hurricanes, tornadoes and fire;

increased costs as a public company; and

fluctuations in the market for our equity.

Table of Contents

Certain of these and other factors are discussed in more detail in "Risk Factors" in this prospectus. These factors should not be construed as exhaustive and should be read in conjunction with the other cautionary statements that are included in this prospectus. While we believe that our forecasts and assumptions are reasonable, we caution that actual results may differ materially. If one or more of these or other risks or uncertainties materialize, or if our underlying assumptions prove to be incorrect, actual results may vary materially from what we projected. Consequently, actual events and results may vary significantly from those included in or contemplated or implied by our forward-looking statements. The forward-looking statements included in this prospectus are made only as of the date of this prospectus and we undertake no obligation to publicly update or review any forward-looking statement made by us or on our behalf, whether as a result of new information, future developments, subsequent events or circumstances or otherwise.

INDUSTRY AND MARKET DATA

We obtained the industry, market and competitive position data used throughout this prospectus from our own internal estimates and research as well as from industry publications and research, surveys and studies conducted by third parties, including APA The Engineered Wood Association, IHS Global Insight, Blue Chip Economic Indicators, RISI, HIRI, Random Lengths and the U.S. Census Bureau. Industry publications, studies and surveys generally state that they have been obtained from sources believed to be reliable, although they do not guarantee the accuracy or completeness of such information. While we believe each of these studies and publications is reliable, we have not independently verified market and industry data from third-party sources. While we believe our internal company research is reliable and the market definitions are appropriate, neither such research nor these definitions have been verified by any independent source.

Table of Contents

USE OF PROCEEDS

We estimate that the net proceeds from our issuance and sale of _____ shares of common stock in this offering will be approximately \$ _____ million, assuming an initial public offering price of \$ _____ per share, which is the midpoint of the price range listed on the cover page of this prospectus, and after deducting underwriting discounts and commissions and estimated offering expenses payable by us.

A \$1.00 increase (decrease) in the assumed initial public offering price of \$ _____ per share would increase (decrease) our net proceeds from this offering by approximately \$ _____ million, assuming that the number of shares offered by us, as set forth on the cover page of this prospectus, remains the same and after deducting the underwriting discounts and commissions and estimated offering expenses payable by us.

If the underwriters exercise their option to purchase additional shares in full, we estimate that the net proceeds from this offering will be approximately \$ _____ million, assuming an initial public offering price of \$ _____ per share, which is the midpoint of the price range listed on the cover page of this prospectus, and after deducting underwriting discounts and commissions and estimated offering expenses payable by us.

We expect to use substantially all of the net proceeds from this offering for general corporate purposes, but we have not allocated the proceeds for any specific purpose at this time. As a result, our management will retain broad discretion over the allocation of the net proceeds from this offering.

Pending use of the proceeds from this offering, we intend to invest the proceeds in a variety of capital preservation investments, including short-term, investment-grade and interest-bearing instruments.

Table of Contents

DIVIDEND POLICY

Following the consummation of this offering, we do not plan to pay a regular dividend on our common stock. The declaration and payment of all future dividends, if any, will be at the discretion of our board of directors and will depend upon our financial condition, earnings, financial condition, contractual conditions, restrictions imposed by our revolving credit facility and the indenture governing our senior notes or applicable laws and other factors that our board of directors may deem relevant.

Because we are a limited liability company, we have historically made tax distributions to our member to enable its indirect equityholders to pay taxes associated with our income. We intend to make a \$225.0 million cash distribution to BC Holdings prior to the consummation of this offering, which will require a waiver from lenders under our revolving credit facility.

See "Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources Debt Structure Revolving Credit Facility" and " Debt Refinancing" for a description of the restrictions in our revolving credit facility and the indenture governing our senior notes, respectively, on our ability to issue dividends.

Table of Contents**CAPITALIZATION**

The following table presents our cash and cash equivalents and our consolidated capitalization as of September 30, 2012 on:

an actual basis;

an adjusted basis to give effect to (i) our redemption of \$75.0 million of our senior subordinated notes on October 15, 2012; (ii) our issuance of \$250.0 million of senior notes on October 22, 2012 and our redemption of our remaining \$144.6 million of senior subordinated notes with a portion of the related proceeds; and (iii) our payment of a \$225.0 million cash distribution to BC Holdings prior to the consummation of this offering and a \$25.0 million repayment on our revolving credit facility, which we anticipate will be required to comply with the related covenant in the indenture governing our senior notes in connection with making the distribution; and

a further adjusted basis to give effect to our conversion from a limited liability company to a corporation and our receipt of the estimated cash proceeds from the issuance and sale of _____ shares of common stock in this offering at an assumed initial public offering price of \$ _____ per share (the midpoint of the range set forth on the cover of this prospectus), after deducting underwriting discounts and estimated offering expenses, and the application of the net proceeds as described under "Use of Proceeds."

This table should be read in conjunction with "Use of Proceeds," "Management's Discussion and Analysis of Financial Condition and Results of Operations," as well as the consolidated historical financial statements and notes thereto included elsewhere in this prospectus. Amounts in the table below have been calculated based on unrounded numbers. Accordingly, certain amounts may not add to the totals due to the effect of rounding.

	As of September 30, 2012		
	Actual	As Adjusted	As Further Adjusted
	(in thousands, except share numbers)		
Cash and cash equivalents(1)	\$ 224,418	\$ 45,656	\$
Long-term debt (including current portion):			
Senior secured revolving credit facility(2)	\$	\$ 25,000	\$ 25,000
7 ¹ / ₈ % senior subordinated notes(1)	219,560		
6 ³ / ₈ % senior notes(3)		250,000	250,000
Total debt	219,560	275,000	275,000
Redeemable equity(4)	8,515	8,515	
Capital/stockholders' equity:			
Equity units	441,123	213,526	
Preferred stock, \$0.01 par value per share; 50,000,000 shares authorized, as further adjusted, no shares issued and outstanding, as further adjusted			
Common stock, \$0.01 par value per share; 200,000,000 shares authorized, as further adjusted, shares issued and outstanding, as further adjusted			
Additional paid-in capital			
Accumulated other comprehensive loss	(114,913)	(114,913)	
Accumulated deficit			
Total capital/stockholders' equity	326,210	98,613	
Total capitalization	\$ 554,285	\$ 382,128	\$

Table of Contents

- (1) On October 15, 2012, we redeemed \$75.0 million of our senior subordinated notes, including accrued and unpaid interest of \$2.7 million. We used the net proceeds from the offering of \$250.0 million of our senior notes on October 22, 2012 to fund the redemption of the remaining \$144.6 million of our senior subordinated notes, including \$1.0 million of interest through the redemption date of November 21, 2012.
- (2) At September 30, 2012, we did not have any outstanding borrowings under our revolving credit facility, other than outstanding letters of credit of approximately \$10.0 million, which reduced our borrowing capacity under our revolving credit facility by an equivalent amount. In connection with the October 15, 2012 redemption of \$75.0 million of our senior subordinated notes, we borrowed an aggregate of \$50.0 million under our revolving credit facility. In addition, we anticipate that we will make a \$25.0 million repayment on our revolving credit facility prior to declaring the \$225.0 million distribution to BC Holdings, which we anticipate will be required to comply with the related covenant in the indenture governing our senior notes in connection with making the distribution.
- (3) On October 22, 2012, we issued \$250.0 million of our senior notes and received net proceeds after payment of expenses of \$244.5 million.
- (4) Represents equity units of FPH held by certain members of our senior management team, which units are redeemable at the option of the holder in the event of death or disability or the sale of a division resulting in the termination of his or her employment. We have historically classified these units outside of our permanent equity because these units are subject to mandatory redemption (and may be subject to repayment by us) upon an event that is outside our control (i.e., death or disability). Following the offering, we will reclassify these equity units as permanent equity because we will have no obligation to satisfy this redemption obligation on FPH's behalf.

A \$1.00 increase (decrease) in the assumed initial public offering price of \$ per share, the midpoint of the price range set forth on the cover of this prospectus, would increase (decrease) the as further adjusted amount for each of cash and cash equivalents, additional paid-in capital, total stockholders' equity and total capitalization by approximately \$ million, assuming that the number of shares offered by us, as set forth on the cover of this prospectus, remains the same and after deducting the estimated underwriting discounts and commissions and estimated offering expenses payable by us.

The number of shares of common stock to be outstanding after this offering is based on shares outstanding as of September 30, 2012, after giving effect to the conversion of Boise Cascade, L.L.C. into a Delaware corporation.

Table of Contents**DILUTION**

Our pro forma net tangible book value as of September 30, 2012 was approximately \$ million, or approximately \$ per share. Pro forma net tangible book value per share represents the amount of our total tangible assets less the amount of our total liabilities, divided by the number of shares of common stock outstanding, prior to the sale of shares of common stock offered in this offering, but assuming the completion of the conversion of Boise Cascade, L.L.C. into Boise Cascade Company. Dilution in pro forma net tangible book value per share represents the difference between the amount per share paid by investors in this offering and the net tangible book value per share of our common stock outstanding immediately after this offering.

After giving effect to the completion of the conversion discussed in the immediately prior paragraph, the sale of shares of common stock in this offering, based upon an assumed initial public offering price of \$ per share, the midpoint of the range set forth on the cover of this prospectus, after deducting underwriting discounts and commissions and estimated expenses payable by us in connection with this offering, our pro forma as adjusted net tangible book value as of September 30, 2012 would have been approximately \$ million, or \$ per share of common stock. This represents an immediate decrease in pro forma net tangible book value of \$ per share to existing stockholders and immediate dilution of \$ per share to new investors purchasing shares of common stock in this offering at the initial public offering price.

The following table illustrates this per share dilution:

Assumed initial public offering price per share	\$
Pro forma net tangible book value per share as of September 30, 2012 (after giving effect to the conversion of Boise Cascade, L.L.C. into a Delaware corporation)	\$
Increase in pro forma net tangible book value per share attributable to new investors	

Pro forma, as adjusted net tangible book value per share as of September 30, 2012 (after giving effect to the conversion of Boise Cascade, L.L.C. into a Delaware corporation and this offering)

Dilution per share to new investors	\$
-------------------------------------	----

The following table summarizes, as of September 30, 2012, on a pro forma as adjusted basis giving effect to the conversion of Boise Cascade, L.L.C. into a Delaware corporation and the sale of shares of common stock in this offering, the number of shares of our common stock purchased from us, the aggregate cash consideration paid to us and the average price per share paid to us by existing stockholders and to be paid by new investors purchasing shares of our common stock from us in this offering. The table assumes an initial public offering price of \$ per share, the midpoint of the range set forth on the cover of this prospectus, before deducting estimated

Table of Contents

underwriting discounts and commissions and offering expenses payable by us in connection with this offering.

	Shares Purchased		Total Consideration		Average Price Per Shares
	Number	Percent	Amount	Percent	
Existing stockholder(1)		%	\$		\$
New investors					
Total		100%		100%	

(1)

The "Total Consideration" amount does not include \$280.4 million invested by BC Holdings' equityholders in BC Holdings, which BC Holdings subsequently invested in us in 2006. BC Holdings also invested \$83.2 million in 2009 and \$86.1 million in 2010 which has also been excluded above.

A \$1.00 increase (decrease) in the assumed initial public offering price of \$ per share, the midpoint of the price range set forth on the cover of this prospectus, would increase (decrease) the total consideration paid by investors participating in this offering by \$ million, or increase (decrease) the percent of total consideration paid by investors participating in this offering by %, assuming that the number of shares offered by us, as set forth on the cover of this prospectus, remains the same and after deducting the estimated underwriting discounts and commissions and estimated offering expenses payable by us.

Except as otherwise indicated, the discussion and tables above assume no exercise of the underwriters' option to purchase additional shares. If the underwriters' option to purchase additional shares is exercised in full, our existing stockholders would own approximately % and our new investors would own approximately % of the total number of shares of our common stock outstanding after this offering.

To the extent that any options or other equity incentive grants are issued in the future (including pursuant to the 2013 Equity Incentive Plan) with an exercise price or purchase price below the initial public offering price, new investors will experience further dilution.

Table of Contents**SELECTED HISTORICAL CONSOLIDATED FINANCIAL DATA**

The following tables set forth our selected consolidated historical and pro forma financial data. You should read the information set forth below in conjunction with "Use of Proceeds," "Capitalization," "Management's Discussion and Analysis of Financial Condition and Results of Operations" and our consolidated historical financial statements and notes thereto included elsewhere in this prospectus. The statement of income (loss) data for each of the years ended December 31, 2009, 2010 and 2011 and the balance sheet data as of December 31, 2010 and 2011 set forth below are derived from our audited consolidated financial statements included elsewhere in this prospectus. The statements of income (loss) data for each of the nine-month periods ended September 30, 2011 and 2012 and the balance sheet data as of September 30, 2012 set forth below are derived from our unaudited quarterly consolidated financial statements included elsewhere in this prospectus and contain all adjustments, consisting of normal recurring adjustments, that management considers necessary for a fair presentation of our financial position and results of operations for the periods presented. Operating results for the nine-month periods are not necessarily indicative of results for a full financial year, or any other periods. See "Index to Consolidated Financial Statements." The statement of income (loss) data for each of the years ended December 31, 2007 and 2008 and the balance sheet data as of December 31, 2007, 2008 and 2009 are derived from our audited consolidated financial statements not included in this prospectus.

- (1) On February 22, 2008, we sold our Paper and Packaging & Newsprint assets and most of our Corporate and Other assets to Boise Inc. Fiscal years 2007 and 2008 include the operating results of our sold Paper and Packaging & Newsprint assets through February 21, 2008.
- (2) In 2007, costs and expenses include \$4.4 million of income for changes in our retiree healthcare programs. In 2008, costs and expenses include \$11.3 million of expenses related to closing our veneer operations in St. Helens, Oregon and our plywood manufacturing facility in White City, Oregon, a \$5.7 million net gain on the sale of our indirect wholly owned subsidiary in Brazil and a \$2.9 million gain on the sale of our Paper and Packaging & Newsprint assets. In 2009, costs and expenses include \$8.9 million of expenses related to a facility closure, of which \$3.7 million was included in EBITDA and \$5.2 million was accelerated depreciation recorded in depreciation and amortization. In 2010, costs and expenses include \$4.6 million of income associated with receiving proceeds from a litigation settlement related to vendor product pricing. In 2011, costs and expenses include \$3.8 million of expense related to the closure of a laminated beam plant and noncash asset write-downs, of which \$2.9 million was included in the first nine months of 2011.
- (3) Represents the change in fair value of contingent value rights issued in connection with the sale of our Paper and Packaging & Newsprint assets in 2008.
- (4) 2007 includes approximately \$8.4 million of income related to the change in fair value of interest rate swaps in connection with the repayment of some of our variable-rate debt, partially offset by \$4.6 million of expense related to changes in the fair value of our interest rate swaps that we accounted for as economic hedges. 2008 includes \$6.3 million of expense related to changes in the fair value of our interest rate swaps that we accounted for as economic hedges.
- (5) Represents gain on the repurchase of \$11.9 million and \$8.6 million of our senior subordinated notes in 2009 and 2010, respectively.
- (6)

Edgar Filing: BOISE CASCADE, L.L.C. - Form S-1

Both pro forma net income (loss) per share and pro forma weighted shares outstanding give effect to our conversion from a limited liability company to a corporation and to the issuance of shares in this offering. The pro forma results of our being treated as a corporation had no impact on net income (loss) for the pro forma nine months ended September 30, 2012 and the pro forma year ended December 31, 2011, primarily as a result of placing a full valuation allowance on the tax benefits associated with the 2011 net operating losses. The pretax income for the nine months ended September 30, 2012 would not have resulted in an adjustment to our income tax provision due to the utilization of the net operating losses carried forward from 2011. In addition, due to its non-recurring nature, the pro forma presentation does not reflect the recognition of a net deferred tax liability of approximately \$4.0 million, net of deferred tax assets and related valuation allowances, related to our tax status conversion from a limited liability company to a corporation prior to the consummation of this offering. Following the offering, our effective tax rate is expected to be higher than in historical periods based on U.S. federal and state income tax rates applicable to a corporation and because we will not be able to utilize the net operating losses incurred while we were a limited liability company. See "Management's Discussion and Analysis of

Edgar Filing: BOISE CASCADE, L.L.C. - Form S-1

Table of Contents

Financial Condition and Results of Operations Taxation." Earnings per common share is not applicable to historical periods, as there were no shares of common stock outstanding during these periods.

(7)

For 2009, includes \$0.9 million of cash paid for the purchase of a truss assembly operation and EWP sales office in Saco and Biddeford, Maine, respectively and \$3.7 million of cash paid for the purchase of a sawmill in Pilot Rock, Oregon. For 2011, includes \$5.8 million of cash paid for the acquisition of a laminated beam and decking manufacturing plant in Homedale, Idaho. For the first nine months of 2012, includes \$2.4 million of cash paid for the February 2012 acquisition of a sawmill in Arden, Washington.

(8)

EBITDA is defined as income (loss) before interest (interest expense and interest income), income taxes and depreciation, amortization and depletion. EBITDA is the primary measure used by our chief operating decision maker to evaluate segment operating performance and to decide how to allocate resources to segments. We believe EBITDA is useful to investors because it provides a means to evaluate the operating performance of our segments and our company on an ongoing basis using criteria that are used by our internal decision makers and because it is frequently used by investors and other interested parties when comparing companies in our industry that have different financing and capital structures and/or tax rates. We believe EBITDA is a meaningful measure because it presents a transparent view of our recurring operating performance and allows management to readily view operating trends, perform analytical comparisons and identify strategies to improve operating performance. EBITDA, however, is not a measure of our liquidity or financial performance under GAAP and should not be considered as an alternative to net income (loss), income (loss) from operations, or any other performance measure derived in accordance with GAAP or as an alternative to cash flow from operating activities as a measure of our liquidity. The use of EBITDA instead of net income (loss) or segment income (loss) has limitations as an analytical tool, including the inability to determine profitability; the exclusion of interest expense, interest income and associated significant cash requirements; and the exclusion of depreciation and amortization, which represent unavoidable operating costs. Management compensates for the limitations of EBITDA by relying on our GAAP results. Our measure of EBITDA is not necessarily comparable to other similarly titled captions of other companies due to potential inconsistencies in the methods of calculation.

Adjusted EBITDA is defined as EBITDA before the change in fair value of contingent value rights issued in connection with the sale of our Paper and Packaging & Newsprint assets, as well as certain other unusual items, including gain on the repurchase of long-term debt and a litigation gain. For years 2007 and 2008, Adjusted EBITDA also excludes the operating results related to the Paper and Packaging & Newsprint assets sold in February 2008.

The following is a reconciliation of net income (loss) to EBITDA and Adjusted EBITDA:

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

You should read this discussion and analysis in conjunction with our historical consolidated financial statements and the notes thereto included elsewhere in this prospectus. This discussion and analysis covers periods prior to this offering and related transactions (including the conversion of Boise Cascade, L.L.C. into a Delaware corporation). As a result, the discussion and analysis of historical periods does not reflect the impact that this offering, such conversion and other related transactions will have on us. Our historical results may not be indicative of our future performance. This discussion and analysis contains forward-looking statements and involves numerous risks and uncertainties, including, but not limited to, those discussed in "Risk Factors." Our actual results may differ materially from those contained in any forward-looking statements.

Overview

Company Background

We are a large, vertically-integrated wood products manufacturer and building materials distributor with 49 facilities (consisting of 18 manufacturing facilities and 31 distribution facilities) located throughout the United States and Canada. We have three reportable segments: (i) Wood Products, which manufactures and sells EWP, plywood, particleboard, studs and ponderosa pine lumber; (ii) Building Materials Distribution, which is a wholesale distributor of building materials; and (iii) Corporate and Other, which includes corporate support staff services, related assets and liabilities and foreign exchange gains and losses. Our broad line of products is used primarily in new residential construction, residential repair and remodeling projects, light commercial construction and industrial applications. We have a broad base of more than 4,500 customers, which includes a diverse mix of leading wholesalers, home improvement centers, retail lumberyards and industrial converters. Our Wood Products and Building Materials Distribution segments are vertically-integrated from wood procurement through distribution. Approximately 37% of the sales of our Wood Products segment were to our Building Materials Distribution segment in the LTM period. No single customer represented more than 11% of sales and our top ten customers represented less than 31% of sales in the LTM period.

Factors That Affect Our Operating Results

Our results of operations and financial performance are influenced by a variety of factors, including: (i) the commodity nature of the products we manufacture and distribute; (ii) general economic and industry conditions affecting demand; and (iii) availability and affordability of raw materials, including wood fiber, glues, resins and energy. These factors have historically produced cyclicalities in our results of operations, and we expect this cyclicalities to continue in future periods.

Commodity Nature of Our Products

Many of the building products we manufacture or distribute, including OSB, plywood, lumber and particleboard, are commodities that are widely available from other manufacturers or distributors with prices and volumes determined frequently based on participants' perceptions of short-term supply and demand factors. At times, the price for any one or more of the products we produce may fall below our cash production costs, requiring us to either incur short-term losses on product sales or cease production at one or more of our manufacturing facilities. As a result, our profitability with respect to these commodity products depends, in significant part, on managing our cost structure, particularly raw materials and labor, which represent the largest components of our operating costs, as well as the purchase cost for commodities we distribute. Commodity wood product prices could be volatile in response to operating rates and inventory levels in various distribution channels.

Commodity

Table of Contents

price volatility also affects our distribution business, with falling price environments generally causing reduced revenues and margins, resulting in substantial declines in profitability and possible net losses.

In our Wood Products segment, our plan is to continue to respond to difficult market conditions by actively managing our production facilities to balance supply with demand. In addition, we plan to further expand our market position in EWP. We believe that EWP will continue to gain market share from dimensional lumber products and that margins for EWP over time will be higher and more stable than those for most dimensional lumber products. We are focused on leveraging our manufacturing position, comprehensive customer service offering, design support capabilities and efficient distribution network to continue to gain market share among home builders, building products retailers and other distributors.

General Economic and Industry Conditions Affecting Demand

The level of housing starts is especially important to our results of operations. From 2005 to 2011, total housing starts in the United States declined by more than 70% and remained substantially below average historical levels during the first nine months of 2012. The significant drop in new residential construction created challenging conditions for building products manufacturers and distributors, with substantial reductions in manufacturing and distribution capacity occurring since late 2008 as companies adjusted to lower industry demand.

In contrast, housing starts increased substantially in 2012 and, as a result, demand for the products we manufacture and distribute has also increased. U.S. single- and multi-family housing starts were 0.87 million in September 2012 on a seasonally adjusted annual rate basis, an increase of 35% from September 2011. Many economists expect housing starts to continue to increase. In November 2012, the Blue Chip Economic Indicators median consensus forecast of single and multi-family housing starts in the U.S. was approximately 0.77 million units for 2012 and approximately 0.92 million units for 2013, which represent annual increases of 26% and 19%, respectively. We believe that over the long-term, there is considerable growth potential in the U.S. housing sector. In November 2012, IHS Global Insight estimates that total U.S. single- and multi-family housing starts will average 1.48 million units per year from 2012 through 2021, levels that are in line with the 50-year historical average.

Unemployment rates in the U.S. improved to 7.8% as of September 30, 2012, from 9.0% as of September 30, 2011. We believe continued employment growth, prospective homebuyers' access to financing, and improved consumer confidence will be necessary to increase household formation rates. Improved household formation rates in turn will help reduce excess housing inventory and stimulate new construction.

Demand for new residential construction is also influenced by several other economic conditions, including mortgage availability and rates, household formation rates, domestic population growth, immigration rates, residential vacancy and foreclosure rates, demand for second homes, existing home prices and consumer confidence.

We believe that our product line diversification provides us some protection from declines in new residential construction. Our products are used not only in new residential construction, but also in residential repair and remodeling projects. Residential repair and remodeling spending increased significantly over the past ten years. The overall age of the U.S. housing stock, increased focus on making homes more energy efficient, rising home prices and availability of consumer loans at low interest rates are expected to drive long-term growth in repair and remodeling expenditures.

Availability and Affordability of Raw Materials

Our principal raw material is timber, which accounted for approximately 38% of the aggregate amount of materials, labor and other operating expenses, including from related parties, for our Wood

Table of Contents

Products segment in 2011. We satisfy our timber requirements through a combination of purchases under supply agreements, open market purchases and purchases pursuant to contracts awarded under public timber auctions. In February 2005, our affiliate sold its timberland operations to Forest Capital Partners, LLC ("Forest Capital"), an unaffiliated third party. In connection with this sale, we entered into a series of fiber supply agreements with Forest Capital. These fiber supply agreements required Forest Capital to sell a specified amount of timber to us at prices generally related to market prices. In 2012, Forest Capital sold the timberlands to a group of purchasers whose investments in the timberlands are managed by Hancock Natural Resource Group, Inc. ("Hancock") and to a group of purchasers whose investments in the timberlands are managed by The Molpus Woodlands Group LLC ("Molpus"). The purchasers of the timberlands (other than Molpus) assumed Forest Capital's obligations under the 2005 wood supply agreements, and the Molpus entities entered into a new master harvest rights agreement on substantially the same terms. In 2011, approximately 43% of our timber was supplied pursuant to these agreements.

We also bid in auctions conducted by federal, state and local authorities for the purchase of timber, generally at fixed prices, under contracts with a term of generally one to three years. In 2011, approximately 22% of our timber was supplied under government contracts. The remainder of our log supply in 2011 was supplied through private purchases directly from timber owners or through dealers.

The cost of timber is strongly correlated with product prices for building materials, with an increase in product prices driving increases in timber costs. Because wood fiber is a commodity, prices have been cyclical historically in response to changes in domestic and foreign demand and supply. Demand for dimension lumber has a strong influence on pricing, as the dimension lumber industry is the largest consumer of timber.

Foreign demand for log exports, particularly from China, increased log costs in the Western U.S. in 2010 and 2011 and negatively affected wood products manufacturers in the region. Sustained periods of high log costs may impair the cost competitiveness of our manufacturing facilities. Availability of residual wood fiber for our particleboard operation has been negatively affected by significant mill closures and curtailments that have occurred among solid-wood product producers.

Our aggregate cost of obtaining timber is also impacted by fuel costs and the distance between our fiber source and our facilities, as we are often required to transport the timber we purchase from the source to our facilities.

We also use various resins and glues in our manufacturing processes, the costs of which are influenced by changes in the prices of raw material input costs, primarily fossil fuel products. We purchase many of our raw materials through long-term contracts that contain price adjustment mechanisms that take into account changes in market prices. Therefore, although our long-term contracts provide us with supplies of raw materials and energy that are more stable than open-market purchases, in many cases they will not alleviate fluctuations in market prices.

Edgar Filing: BOISE CASCADE, L.L.C. - Form S-1

(a)

Actual U.S. housing starts as reported by the U.S. Census Bureau.

Nine Months Ended September 30, 2012 Compared With Nine Months Ended September 30, 2011

Sales

For the nine months ended September 30, 2012, total sales increased \$383.9 million, or 23%, to \$2,084.5 million from \$1,700.6 million for the same period in the prior year. The increase in sales was driven primarily by increases in sales volumes and prices for many of the products we manufacture and distribute. Single-family housing starts, which are a primary driver of our sales and typically result in higher building product utilization per start than multi-family units, experienced an increase of 24% for the first nine months of the year, compared with the same period in 2011.

Table of Contents

Wood Products. For the nine months ended September 30, 2012, sales, including sales to our Building Materials Distribution segment, increased \$180.5 million, or 34%, to \$712.7 million from \$532.2 million in the same period in the prior year. The increase in sales was due primarily to higher plywood volumes and prices, as well as increased EWP and lumber sales volumes, offset slightly by declines in EWP prices. Plywood sales volumes increased 24% primarily as a result of increased operating rates and market share gains. LVL and I-joist sales volumes both increased 31% due to higher levels of residential construction activity, additional sales to existing customers and sales from new EWP customers. Lumber sales volumes increased 21% while higher residual fiber sales volumes also contributed to the increase in sales. Plywood prices increased 27%, while LVL and I-joist sales prices declined 6% and 5%, respectively.

Building Materials Distribution. For the nine months ended September 30, 2012, sales increased \$287.3 million, or 21%, to \$1,637.2 million from \$1,349.9 million in the same period in the prior year. The increase in sales was driven primarily by improvements in sales volumes and prices of 13% and 8%, respectively. By product line, sales of EWP (substantially all of which is sourced through our Wood Products segment), commodity and general line products increased 40%, 27% and 10%, respectively.

Costs and Expenses

For the nine months ended September 30, 2012, materials, labor and other operating expenses, including from a related party, increased \$288.9 million, or 19%, to \$1,795.9 million, compared with \$1,507.0 million in the same period in the prior year. The increase primarily reflects higher purchased materials costs as a result of higher sales volumes in our Building Materials Distribution segment. In addition, higher manufacturing costs, including wood costs, labor, glues and resins and energy, were driven by higher sales volumes of plywood and EWP in our Wood Products segment, as well as higher per-unit log costs. However, manufacturing costs in our Wood Products segment decreased as a percentage of sales due to higher average sales prices, productivity improvements and the leveraging of our fixed manufacturing costs due to higher sales volumes.

For the nine months ended September 30, 2012, depreciation and amortization expenses decreased \$2.6 million, or 9%, to \$24.9 million, compared with \$27.5 million in the same period in the prior year. The decrease was due primarily to certain property and equipment becoming fully depreciated during 2011.

For the nine months ended September 30, 2012, selling and distribution expenses increased \$23.6 million, or 15%, to \$176.9 million, compared with \$153.3 million during the same period in 2011. The increase was due primarily to increased compensation and benefit costs, including performance-based incentive costs, as well as higher transportation costs in our Building Materials Distribution segment. These increases were driven by improved operating results and increased sales volumes.

For the nine months ended September 30, 2012, general and administrative expenses increased \$3.4 million, or 12%, to \$31.9 million, compared with \$28.5 million for the same period in 2011. The increase was due primarily to higher performance-based incentive costs as a result of improved operating results.

Outsourcing Services Agreement. Included in costs and expenses for each of the nine-month periods ended September 30, 2012 and 2011 are \$11.0 million of expenses related to the Outsourcing Services Agreement we have with Boise Inc. For more information related to the Outsourcing Services Agreement, see Note 3, "Outsourcing Services Agreement," to our audited consolidated financial statements, included elsewhere in this prospectus.

For the nine months ended September 30, 2012, other (income) expense, net, was insignificant. Other (income) expense, net, for the nine months ended September 30, 2011, was \$2.3 million of

Table of Contents

expense, including \$1.3 million related to the closure of a manufacturing plant in our Wood Products segment and \$1.2 million in noncash asset write-downs.

Income (Loss) From Operations

Income from operations increased \$72.5 million to \$54.5 million for the nine months ended September 30, 2012, compared with a \$18.0 million loss for the nine months ended September 30, 2011. Our improved financial results were driven primarily by higher sales volumes and prices for many of the products we manufacture and distribute. In addition, during the nine months ended September 30, 2011, we recorded \$2.9 million of charges related to the closure of a manufacturing plant in our Wood Products segment and noncash asset write-downs. These charges are discussed in more detail below.

Wood Products. For the nine months ended September 30, 2012, segment income improved \$58.8 million to \$48.8 million of income from a \$10.0 million loss for the nine months ended September 30, 2011. The increase in segment income was driven primarily by higher plywood sales prices as well as lower per-unit manufacturing costs resulting from higher sales volumes of EWP and plywood and productivity improvements. These improvements were offset partially by higher log costs, an increase in selling and distribution costs, and declines in EWP prices. In addition, during the nine months ended September 30, 2011, we recorded charges of \$2.2 million related to the closure of a manufacturing plant in our Wood Products segment and noncash asset write-downs.

Building Materials Distribution. For the nine months ended September 30, 2012, segment income increased \$15.4 million to \$18.2 million from \$2.8 million for the nine months ended September 30, 2011. The improvement in segment income was driven primarily by a 13% improvement in sales volumes and a 10-basis-point improvement in gross margins. While total selling and distribution expenses increased 13%, these costs decreased as a percentage of segment sales by 70 basis points, as selling and distribution expenses did not increase at the same rate as sales. In addition, during the nine months ended September 30, 2011, we recorded a noncash asset write-down of \$0.8 million.

Other

Foreign Exchange Gain (Loss). For the nine months ended September 30, 2012, foreign exchange gain was \$0.1 million compared with a loss of \$0.6 million for the same period in the prior year. The gain was driven primarily by the strengthening of the Canadian dollar compared with the U.S. dollar.

Interest Expense. Interest expense increased \$0.3 million to \$14.5 million, or 2%, for the nine months ended September 30, 2012, compared with \$14.2 million for the nine months ended September 30, 2011. The increase in interest expense was attributable to higher deferred financing amortization costs related to our revolving credit facility entered into in July 2011.

2011 Compared With 2010

Sales

For the year ended December 31, 2011, total sales increased \$7.5 million, or 0.3%, to \$2,248.1 million from \$2,240.6 million during the year ended December 31, 2010, driven primarily by increases in sales volumes for many of the products we manufacture, offset partially by a decrease in plywood prices. U.S. housing starts increased 4% in 2011, compared with the prior year. However, single-family housing starts, which are a primary driver of our sales and typically result in higher building product utilization per start than multi-family units, declined 9% for the year, compared with 2010. Commodity product prices in 2011 were much less volatile than commodity product prices in 2010. Average composite lumber and panel prices in 2011 were 4% and 10% lower, respectively, than in 2010 as reflected by Random Lengths composite lumber and panel pricing.

Table of Contents

Wood Products. For the year ended December 31, 2011, sales, including sales to our Building Materials Distribution segment, increased \$25.1 million, or 4%, to \$712.5 million from \$687.4 million in 2010. The increase in sales was due primarily to higher EWP and plywood sales volumes, as well as higher byproduct sales, offset partially by lower plywood prices. In 2011, LVL and I-joist sales volumes increased 8% and 5%, respectively, due to the capture of further sales opportunities with customers in the U.S. and Canada and further EWP market penetration. Compared with 2010, I-joist prices increased 2%, while LVL prices were flat. Plywood volumes increased 2% in 2011, while plywood prices decreased 6% compared to the prior year.

Building Materials Distribution. For the year ended December 31, 2011, sales increased \$1.4 million, or 0.1%, to \$1,779.4 million from \$1,778.0 million for the year ended December 31, 2010. Compared with 2010, the overall volume of product sold and product sales prices were flat. By product line, sales of EWP and general line products increased 10% and 3%, respectively, offset by a 5% decline in commodity sales due to lower pricing.

Costs and Expenses

Materials, labor and other operating expenses, including from related parties, increased \$11.7 million, or 1%, to \$1,992.7 million for the year ended December 31, 2011, compared with \$1,981.0 million during the prior year. The increase primarily reflects higher manufacturing costs, including wood costs, labor, glues and resins and energy, as a result of higher sales volumes of EWP and plywood in our Wood Products segment. In addition, materials, labor and other operating expenses, including from related parties, increased as a percentage of sales by 20 basis points. Within wood costs, delivered log costs were 5% higher in 2011 as compared with 2010, driven by higher log costs in the Pacific Northwest, offset partially by lower costs for OSB in our I-joist production.

Depreciation and amortization expenses increased \$2.1 million, or 6%, to \$37.0 million for the year ended December 31, 2011, compared with \$34.9 million during the prior year. The increase was due primarily to purchases of property and equipment and accelerated depreciation of \$0.4 million on a closed manufacturing plant in our Wood Products segment.

Selling and distribution expenses increased \$2.5 million, or 1%, to \$205.0 million for the year ended December 31, 2011, compared with \$202.5 million for the prior year. The increase was due primarily to higher employee-related expenses in our Wood Products segment to support our growing EWP sales in Canada. In addition, in our Building Materials Distribution segment, higher transportation costs were offset partially by lower other variable expenses.

General and administrative expenses, including from related party, decreased \$2.8 million, or 7%, to \$37.2 million for the year ended December 31, 2011, compared with \$40.0 million for the prior year. The decrease was due primarily to lower incentive compensation costs.

Outsourcing Services Agreement. Included in the 2011 and 2010 costs and expenses set forth above are \$14.7 million and \$14.4 million, respectively, of expenses related to the Outsourcing Services Agreement we have with Boise Inc., under which Boise Inc. provides a number of corporate staff services to us at cost. For more information related to the Outsourcing Services Agreement, see Note 3, "Outsourcing Services Agreement," to our audited consolidated financial statements included elsewhere in this prospectus.

Other (income) expense, net, for the year ended December 31, 2011, was \$3.2 million of expense, including \$1.3 million related to the closure of a laminated beam manufacturing plant in Emmett, Idaho and \$2.0 million in noncash asset write-downs. In 2010, other (income) expense included \$4.6 million of income associated with receiving proceeds from a litigation settlement related to vendor product pricing.

Table of Contents

Income (Loss) From Operations

Loss from operations increased \$13.8 million to a \$27.0 million loss for the year ended December 31, 2011, compared with a \$13.2 million loss for the year ended December 31, 2010, due primarily to a 20-basis-point decline in gross margins, as further described below and \$3.8 million of charges related to the closure of a laminated beam manufacturing plant in Emmett, Idaho and noncash asset write-downs. Also, 2010 benefited from \$4.6 million of income from a litigation settlement related to vendor product pricing. These changes are discussed in more detail below.

Wood Products. Segment loss increased \$7.0 million, or 86%, to \$15.1 million for the year ended December 31, 2011, from \$8.1 million for the year ended December 31, 2010. The increase in segment loss was driven primarily by a 6% decrease in plywood prices, offset partially by higher prices and sales volumes in our EWP business, as well as higher byproduct sales. In addition, depreciation and amortization expense and selling and distribution costs increased in 2011 compared with the prior year. During 2011, we also recorded charges of \$2.6 million related to the closure of a laminated beam manufacturing plant in Emmett, Idaho and noncash asset write-downs. During 2010, the segment benefited from \$0.5 million of income from a litigation settlement related to vendor product pricing. Excluding the \$2.6 million of closure costs and noncash asset write-downs from the 2011 results and the \$0.5 million litigation settlement from the 2010 results, segment loss increased \$3.9 million.

Building Materials Distribution. Segment income decreased \$9.6 million, or 83%, to \$2.0 million for the year ended December 31, 2011, from \$11.6 million for the year ended December 31, 2010. The decrease in income was driven by a 20-basis-point decline in gross margins resulting from competitive pressures and more stable commodity pricing, allowing for less margin opportunity, a \$0.9 million increase in depreciation and amortization expense and higher transportation costs. In addition, during 2011, we recorded \$1.2 million of noncash asset write-downs. During 2010, the segment benefited from \$4.1 million of income from a litigation settlement related to vendor product pricing. Excluding the \$1.2 million of noncash asset write-downs from the 2011 results and the \$4.1 million litigation settlement from the 2010 results, segment income declined \$4.3 million.

Other

Foreign Exchange Gain (Loss). For the year ended December 31, 2011, foreign exchange loss was \$0.5 million, compared with a gain of \$0.4 million for the prior year. The 2011 loss was driven primarily by the strengthening of the U.S. dollar, compared with the Canadian dollar.

Interest Expense. Interest expense decreased \$2.0 million, or 10%, to \$19.0 million for the year ended December 31, 2011, compared with \$21.0 million for the prior year. We paid down outstanding borrowings on our credit facility in April 2010 and repurchased \$8.6 million of our senior subordinated notes in December 2010, which subsequently lowered our interest expense. In addition, interest expense was higher in 2010 due to the write-off of a portion of deferred financing costs associated with the April 2010 paydown and commitment reduction of our prior revolving credit facility.

2010 Compared With 2009

Sales

Total sales increased \$267.3 million, or 14%, to \$2,240.6 million in 2010 from \$1,973.3 million in 2009. The increase was due primarily to higher prices for many of the commodity products we manufacture and distribute. The Random Lengths' composite lumber and panel prices were approximately 27% and 25% higher, respectively, on average, during 2010 compared with 2009. Government interventions, like the tax credit for first-time home buyers, supported the new residential construction market in the first half of 2010, but once the tax credit expired, demand weakened. Lumber and panel prices rose sharply from the start of the year through April 2010 and began to

Table of Contents

retreat in early May. The Random Lengths composite lumber and panel prices dropped from \$367 and \$474, respectively, at their peak in April 2010 to \$247 and \$328, respectively, by late June. We believe the dramatic drop was the result of stagnating demand and increased industry production in response to a run-up in prices in the first four months of the year, which resulted from constrained dealer inventory levels, curtailments and disrupted imports. Prices were less volatile in the last half of the year.

Building Materials Distribution. Sales increased \$168.2 million, or 10%, to \$1,778.0 million in 2010 from \$1,609.8 million in 2009. The increase was driven primarily by an 11% increase in product sales prices. Compared with 2009, the volume of product sold was flat.

Wood Products. Sales increased \$136.6 million, or 25%, to \$687.4 million in 2010 from \$550.8 million in 2009. The increase in sales was attributable to higher sales volumes and prices for all of our major product lines. The increase in sales volumes was due primarily to the capture of further sales opportunities with existing customers of plywood and EWP and the modest 6% increase in housing starts. Compared with 2009, plywood sales prices and volumes increased 16% and 10%, respectively, and lumber sales prices and volumes increased 21% and 2%, respectively. In 2010, LVL and I-joist sales volumes increased 16% and 21%, respectively, due to the capture of further sales opportunities with existing customers, the modest increase in housing starts and further EWP market penetration, as more builders transitioned to the use of EWP. Compared with 2009, LVL and I-joist prices increased 4% and 5%, respectively, due to two price increases implemented in 2010.

Costs and Expenses

Materials, labor and other operating expenses, including from related parties, increased \$194.0 million, or 11%, to \$1,981.0 million in 2010, compared with \$1,787.0 million in 2009. The increase was driven primarily by higher purchased materials costs of \$164.5 million in our Building Materials Distribution segment. Gross margins decreased 50 basis points in our Building Materials Distribution segment, due primarily to volatility in the commodity product markets during the year. Conversely, in 2009, commodity product prices trended higher, which positively affected gross margins. In our Wood Products segment, wood costs increased \$27.6 million. Compared with 2009, chemical and energy costs increased \$8.2 million. The increase in materials, labor and other operating expenses, including from related parties, was also attributable to an increase in sales volumes in all of our major product lines in our Wood Products segment. While total materials, labor and other operating expenses, including from related parties, increased in 2010, total costs decreased as a percent of sales, as these costs did not increase at the same pace as sales.

Depreciation and amortization expenses decreased \$6.0 million, or 15%, to \$34.9 million in 2010, compared with \$40.9 million in 2009. In 2009, we recognized \$5.2 million of incremental expense as a result of accelerating depreciation on the assets at our La Grande, Oregon, lumber manufacturing facility following our decision to close the operations.

Table of Contents

Selling and distribution expenses increased \$12.0 million, or 6%, to \$202.5 million in 2010, compared with \$190.4 million in 2009. The increase was due to increased occupancy-related expenses at the building materials distribution facilities we added or expanded in 2010, increased transportation costs and increased compensation and benefit costs. While total selling and distribution expenses increased in 2010, costs decreased as a percent of sales, because these costs did not increase at the same pace as sales.

General and administrative expenses, including from related party, increased \$2.4 million, or 7%, to \$40.0 million in 2010, compared with \$37.6 million in 2009. The increase was principally the result of higher compensation and benefit costs.

Outsourcing Services Agreement. Included in the 2010 and 2009 costs and expenses set forth above, are \$14.4 million and \$14.9 million of expenses related to the Outsourcing Services Agreement we have with Boise Inc. For more information related to the Outsourcing Services Agreement, see Note 3, "Outsourcing Services Agreement," to our audited consolidated financial statements, included elsewhere in this prospectus.

In 2010, other (income) expense included \$4.6 million of income associated with receiving proceeds from a litigation settlement related to vendor product pricing. In 2009, other (income) expense included \$3.2 million of expense related to facility closures and a net \$0.7 million noncash curtailment gain related to amending our defined benefit pension plan for salaried employees and nonqualified salaried pension plans so that no future benefits would accrue in the plans after December 31, 2009.

Income (Loss) From Operations

Our loss from operations decreased \$70.3 million, or 84%, from \$83.5 million in 2009 to \$13.2 million in 2010. The improved financial results were driven primarily by higher product prices. Also contributing to the improved results in 2010 were favorable per-unit conversion costs in our Wood Products segment.

Wood Products. Segment loss decreased \$69.2 million, or 90%, from \$77.3 million in 2009 to \$8.1 million in 2010. The improved financial results in 2010 were driven primarily by favorable product prices, primarily plywood prices, which increased 16%. Compared with 2009, favorable per-unit conversion costs also contributed to improved financial results. In 2010, we recorded \$0.5 million of income from a litigation settlement related to vendor product pricing. The Wood Products segment loss for 2009 included \$8.9 million of expenses related to closing our lumber manufacturing facility in La Grande, Oregon. Excluding the \$0.5 million litigation settlement from the 2010 results and the \$8.9 million of expenses related to closing our lumber manufacturing facility in La Grande in 2009, segment loss decreased \$59.8 million.

Building Materials Distribution. Segment income increased \$3.6 million, or 46%, from \$8.0 million in 2009 to \$11.6 million in 2010. Excluding the \$4.1 million of income recorded from a litigation settlement related to vendor product pricing, segment income decreased \$0.5 million. The decrease in income was driven by increased occupancy-related expenses at the building materials distribution facilities we added or expanded in 2010 and higher compensation and benefit costs, offset by higher gross margin dollars from increased sales.

Other

Gain on repurchase of long-term debt. During 2010 and 2009, we repurchased \$8.6 million and \$11.9 million of senior subordinated notes, respectively. In 2009, we recorded a \$6.0 million gain related to the repurchase.

Table of Contents

Interest expense. In 2010, interest expense was \$21.0 million, compared with \$22.5 million in 2009. The decrease was driven primarily by a lower amount of borrowings outstanding during 2010. For more information, see "Liquidity and Capital Resources Financing Activities."

Taxation

We are currently a limited liability company, and the majority of our businesses and assets are held and operated by limited liability companies, which are not subject to entity-level federal or state income taxation. Our income tax provision generally consists of income taxes payable to states that do not allow for the income tax liability to be passed through to our equityholders, as well as income taxes payable by our separate subsidiaries that are taxed as corporations. Following our conversion to a corporation in connection with this offering, our effective tax rate is expected to be higher than in historical periods based on U.S. federal and state income tax rates applicable to a corporation and because we will not be able to utilize the net operating losses incurred while we were a limited liability company.

Liquidity and Capital Resources

At September 30, 2012, we had \$224.4 million of cash and \$219.6 million of long-term debt, including current portion. At September 30, 2012, we had \$483.8 million of available liquidity (cash and cash equivalents and unused borrowing capacity under our senior secured asset-based revolving credit facility). We generated \$42.0 million of cash during the nine months ended September 30, 2012, as cash provided by operations was offset partially by capital spending acquisitions and distributions to members, as discussed below.

On September 7, 2012, we entered into a first amendment to our revolving credit facility, which increased the aggregate lending commitments under our revolving credit facility from \$250.0 million to \$300.0 million. On October 12, 2012, we borrowed \$50.0 million under our revolving credit facility to partially fund the redemption of \$75.0 million of our senior subordinated notes. In addition, on October 22, 2012, we issued \$250.0 million aggregate amount of our senior notes to fund the redemption of our remaining senior subordinated notes and for general corporate purposes, as discussed further below. As a result of these measures, our long-term debt as of November 15, 2012 was \$300.0 million.

We ended 2011 with \$182.5 million of cash and \$219.6 million of long-term debt. At December 31, 2011, we had \$324.3 million of available liquidity (unrestricted cash and cash equivalents and unused borrowing capacity under our revolving credit facility). We used \$82.1 million of cash during the year ended December 31, 2011, principally to fund working capital increases, capital spending, pension contributions and acquisitions, as discussed below. On July 13, 2011, we replaced our \$170.0 million credit facility with our revolving credit facility, a new \$250.0 million credit facility that, when compared with the previous facility, has both lower interest rates and an extended maturity. See "Financing Activities" below for more information on our revolving credit facility.

At September 30, 2012 and December 31, 2011, our cash was invested in high-quality, short-term investments, which we record in "Cash and cash equivalents."

We expect to make a \$225.0 million cash distribution to BC Holdings prior to this offering. We anticipate that we will repay \$25.0 million of borrowings under our revolving credit facility prior to making the distribution in order to comply with the 3.5:1.0 pro forma leverage ratio contained in the indenture governing our senior notes. We anticipate that our cash reserves will be substantially replenished by the proceeds of this offering.

We believe that our cash flows from operations, combined with our current cash levels, the proceeds from this offering and available borrowing capacity, will be adequate to fund debt service

Table of Contents

requirements and provide cash, as required, to support our ongoing operations, capital expenditures, lease obligations, working capital and pension contributions for at least the next 12 months.

Sources and Uses of Cash

We generate cash from sales of our products and from short-term and long-term borrowings. Our primary uses of cash are for expenses related to the manufacture and distribution of building products, including inventory purchased for resale, fiber, labor, energy and glues and resins. In addition to paying for ongoing operating costs, we use cash to invest in our business, repay debt and meet our contractual obligations and commercial commitments. Below is a discussion of our sources and uses of cash for operating activities, investing activities and financing activities.

	Year Ended December 31			Nine Months Ended September 30	
	2009	2010	2011	2011	2012
	(in thousands)				
Cash provided by (used for) operations	\$ (35,223)	\$ 10,287	\$ (42,981)	\$ (31,116)	\$ 64,872

Operating Activities*Nine Months Ended September 30, 2012 Compared With Nine Months Ended September 30, 2011*

For the nine months ended September 30, 2012, our operating activities generated \$64.9 million of cash, compared with \$31.1 million of cash used for operations in the same period in 2011. The \$64.9 million of cash provided by operations was due primarily to \$75.8 million of income (before noncash income and expenses), offset partially by a \$7.5 million increase in working capital and pension contributions of \$8.2 million. The \$31.1 million of cash used for operations during the nine months ended September 30, 2011, was driven primarily by increases in working capital of \$27.7 million and pension contributions of \$10.3 million, offset partially by \$7.0 million of income (before noncash income and expenses).

The increases in working capital in both periods were attributable primarily to higher receivables and inventories, offset partially by an increase in accounts payable and accrued liabilities. The increases in receivables in both periods primarily reflect increased sales of approximately 33% and 33%, comparing sales for the months of September 2012 and 2011 with sales for the months of December 2011 and 2010, respectively. The increase in inventories during the nine months ended September 30, 2012, represents normal seasonal inventory build, product line expansions and an improvement in demand for our products from higher residential construction activity and market share gains. The increase in accounts payable and accrued liabilities provided \$82.3 million of cash during the nine months ended September 30, 2012, compared with \$27.6 million in the same period a year ago. During the nine months ended September 30, 2012, increases in inventory levels and accrued incentive compensation led to the increase in accounts payable and accrued liabilities.

2011 Compared With 2010

In 2011, our operating activities used \$43.0 million of cash, compared with \$10.3 million of cash provided by operating activities in 2010. Compared with 2010, the \$53.3 million increase in cash used for operations in 2011 relates primarily to the following:

A \$9.6 million decrease in income in our Building Materials Distribution segment and a \$7.0 million increase in losses in our Wood Products segment. The decline in results for 2011 was the result of a 20-basis-point decline in gross margins and higher transportation costs in

Table of Contents

our Building Materials Distribution segment. During 2010, we recorded \$4.6 million of income for cash received from a litigation settlement related to vendor product pricing, of which \$4.1 million was recorded in the Building Materials Distribution segment and \$0.5 million in the Wood Products segment. Also, in our Wood Products segment, the increased loss was driven by a decrease in plywood selling prices and an increase in selling and distribution costs, offset partially by higher prices and sales volumes in our EWP business, as well as higher byproduct sales.

A \$34.8 million increase in working capital during 2011, compared with a \$2.6 million increase in working capital during 2010. Working capital is subject to cyclical operating needs, the timing of the collection of receivables, the payment of payables and expenses and to a lesser extent, seasonal fluctuations in our operations. The increases in working capital in both periods were attributable primarily to higher receivables and inventories, offset partially by an increase in accounts payable and accrued liabilities. The increases in receivables in both periods primarily reflect increased sales of approximately 11% and 14%, comparing sales for the months of December 2011 and 2010 with sales for the months of December 2010 and 2009, respectively. The increase in inventories in 2011 primarily represents an increase in log and plywood inventory in our Wood Products segment. Accounts payable and accrued liabilities increased in 2011, as higher accounts payable, driven by higher inventories, were mostly offset by lower compensation and benefit-related accrued liabilities. We accrued less incentive compensation during the year ended December 31, 2011, compared with 2010 and the majority of the employee incentive compensation that was accrued in 2010 was paid out in first quarter 2011.

An increase in cash contributions to our pension plans. During 2011, we used \$13.6 million of cash to make pension contributions, compared with \$3.9 million during 2010.

2010 Compared With 2009

In 2010, our operating activities provided \$10.3 million of cash, compared with \$35.2 million of cash used by operating activities in 2009. Compared with 2009, the \$45.5 million increase in cash provided by operations in 2010 relates primarily to the following:

A \$69.2 million decrease in losses in our Wood Products segment and a \$3.6 million increase in income in our Building Materials Distribution segment. The improved results for 2010 were the result of higher product prices, favorable per-unit conversion costs in our Wood Products segment and \$4.6 million of income recorded from a litigation settlement.

Fewer cash contributions to our pension plans. During 2010, we used \$3.9 million of cash to make pension contributions, compared with \$28.4 million during 2009.

The increase in cash provided by the items discussed above was offset partially by \$2.6 million of cash used by an increase in working capital during 2010, compared with \$40.7 million of cash generated by the reduction of working capital during 2009. The slight increase in working capital during 2010 was primarily attributable to an increase in inventory and higher receivables, offset partially by higher accounts payable and accrued liabilities. Inventory and accounts payable increased in our Building Materials Distribution segment due to new and expanded locations, product line expansions and increased purchases made in December 2010 to benefit from pricing discounts and extended payment terms offered by vendors. The higher receivables primarily reflect increased sales of approximately 14%, comparing sales for the month of December 2010 with sales for the month of December 2009.

Table of Contents**Investment Activities***Nine Months Ended September 30, 2012 as Compared to Nine Months Ended September 30, 2011*

During the nine months ended September 30, 2012 and 2011, we used approximately \$17.7 million and \$25.3 million, respectively, of cash for purchases of property and equipment, including business improvement and quality/efficiency projects, replacement and expansion projects and ongoing environmental compliance. We expect capital expenditures in 2012 to total approximately \$30 million, excluding acquisitions. This level of capital expenditures could increase or decrease as a result of a number of factors, including our financial results, future economic conditions and timing of equipment purchases. During the nine months ended September 30, 2012, we also used \$2.4 million for the acquisition of a sawmill in Arden, Washington, which we believe will improve fiber integration and enhance the product mix capabilities in our Inland Region lumber operations. During the nine months ended September 30, 2011, we spent \$5.8 million for the acquisition of a laminated beam and decking manufacturing plant in Homedale, Idaho, offset partially by proceeds of \$3.1 million from the sale of assets.

2011

During the year ended December 31, 2011, we used approximately \$33.5 million of cash for purchases of property and equipment, which included expansions of certain facilities (particularly Dallas, Texas) in our Building Materials Distribution segment. In addition, we spent \$5.8 million for the acquisition of a laminated beam and decking manufacturing plant in Homedale, Idaho and received proceeds of \$3.1 million from the sale of assets, including the sale of certain land and timber holdings.

Details of 2011 capital investment by segment are included in the table below:

	Year Ended December 31, 2011				
	Acquisition/ Expansion	Quality/ Efficiency(a)	Replacement, Environmental, and Other(b)	Total	
	(in millions)				
Wood Products	\$ 5.9	\$ 6.2	\$ 17.2	\$ 29.3	
Building Materials Distribution	3.9	0.1	6.0	10.0	
Corporate and Other					
Total	\$ 9.8	\$ 6.3	\$ 23.2	\$ 39.3	

(a) Quality and efficiency projects include quality improvements, modernization, energy and cost-saving projects.

(b) During 2011, we spent approximately \$2.4 million on environmental compliance. We expect to spend a similar amount in 2012 for this purpose.

2010

During 2010, we used approximately \$35.8 million of cash for purchases of property and equipment, which included expenditures for a new veneer dryer (dryer eight) at our facility in Medford, Oregon, as well as costs related to other replacement projects and ongoing environmental compliance. We expect the Medford veneer dryer to reduce our costs through higher productivity and reduced seasonal purchases of dry veneer. During 2010, we received \$1.3 million of net proceeds from the sale of property and equipment.

Table of Contents

Details of 2010 capital investment by segment are included in the table below:

	Year Ended December 31, 2010				
	Acquisition/ Expansion	Quality/ Efficiency(a)	Replacement, Environmental, and Other (b)	Total	
	(in millions)				
Wood Products	\$ 0.4	\$ 12.3	\$ 10.2	\$ 22.9	
Building Materials Distribution	0.9		12.0	12.9	
Corporate and Other					
Total	\$ 1.3	\$ 12.3	\$ 22.2	\$ 35.8	

(a) Quality and efficiency projects include quality improvements, modernization, energy and cost-saving projects.

(b) During 2010, we spent approximately \$1.7 million on environmental compliance.

2009

During 2009, we used approximately \$16.8 million of cash for purchases of property and equipment, which included expenditures for a new dryer (dryer seven) at our facility in Medford, Oregon, as well as costs related to other replacement projects and ongoing environmental compliance. In addition, we spent \$4.6 million for the acquisition of businesses and facilities. We purchased a sawmill in Pilot Rock, Oregon and a truss assembly operation and EWP sales office in Saco and Biddeford, Maine, respectively.

Financing Activities

During the nine months ended September 30, 2012 and 2011, we used \$0.3 million and \$2.5 million, respectively, of cash for financing costs related to our revolving credit facility, as discussed below. In addition, during the nine months ended September 30, 2012, we made \$2.8 million of distributions to BC Holdings.

During 2011, we used \$2.5 million of cash for financing costs related to our revolving credit facility as discussed below.

During 2010, we received \$86.1 million from BC Holdings from its sale of 18.3 million Boise Inc. shares. We repurchased \$8.6 million of senior subordinated notes for \$8.5 million, plus accrued interest. On April 1, 2010, we borrowed \$45.0 million under our revolving credit facility, bringing the total amount outstanding to \$120.0 million. On April 30, 2010, we repaid the \$120.0 million and we permanently reduced the lending commitments by a like amount, bringing the total commitments under our revolving credit facility to \$170.0 million. This debt reduction, in combination with capital spending, fulfilled our obligations under the indenture governing our senior subordinated notes with respect to net available cash received in connection with the sale of Boise Inc. shares.

During 2009, we received \$83.2 million from BC Holdings from its sale of 18.8 million Boise Inc. shares. We repurchased \$11.9 million of senior subordinated notes for \$5.6 million, plus accrued interest. In addition, we repaid and subsequently reborrowed, \$60.0 million of outstanding borrowings under our revolving credit facility. In connection with the \$60.0 million payment on our revolving credit facility, we amended our revolving credit facility to permanently reduce the lending commitments by \$60.0 million, bringing the total commitments from \$350.0 million to \$290.0 million. This debt reduction, in combination with capital spending, fulfilled our obligations under the indenture governing our senior subordinated notes with respect to net available cash received in connection with

Table of Contents

the June 2008 sale of the note receivable from Boise Inc. and the July 2008 sale of our Brazilian subsidiary. During 2009, we also made \$10.7 million of distributions to BC Holdings to enable it to make tax distributions to its equityholders, most of which related to the taxable gain on the sale of our Paper and Packaging & Newsprint assets in 2008.

Debt Structure

Long-term debt consisted of the following:

	December 31, 2010	December 31, 2011	September 30, 2012
	(in thousands)		
Asset-based revolving credit facility	\$	\$	\$
7 ¹ / ₈ % senior subordinated notes	219,560	219,560	219,560
Long-term debt	219,560	219,560	219,560
Current portion of long-term debt			(25,000)
Long-term debt, less current portion	\$ 219,560	\$ 219,560	\$ 194,560

As discussed below under "Debt Refinancing," we refinanced our 7¹/₈% senior subordinated notes subsequent to September 30, 2012.

Revolving Credit Facility

On July 13, 2011, we and our principal operating subsidiaries, Boise Cascade Wood Products, L.L.C., and Boise Cascade Building Materials Distribution, L.L.C., as borrowers, and Boise Cascade Wood Products Holdings Corp., as guarantor, entered into a \$250 million senior secured asset-based revolving credit facility with Wells Fargo Capital Finance, L.L.C., as agent and the banks named therein as lenders. Borrowings under our revolving credit facility are constrained by a borrowing base formula dependent upon levels of eligible receivables and inventory and are reduced by outstanding borrowings and letters of credit. On September 7, 2012, we entered into a first amendment to the related credit agreement, which increased the aggregate lending commitments under our revolving credit facility to \$300 million. Other key terms of the credit agreement were unchanged by this first amendment. See "Description of Certain Indebtedness."

Our revolving credit facility generally permits dividends only if certain conditions are met, including having minimum availability requirements (as described in "Description of Certain Indebtedness") and having a fixed charge coverage ratio of 1:1 on a pro forma basis.

At September 30, 2012, and December 31, 2011, we had no borrowings outstanding under our revolving credit facility and approximately \$10.0 million and \$11.3 million, respectively, of letters of credit outstanding. We did not borrow under our revolving credit facility during the nine months ended September 30, 2012. On October 12, 2012, we borrowed \$50.0 million under our revolving credit facility to partially fund the redemption of \$75.0 million of our senior subordinated notes, as discussed further below. These letters of credit and borrowings reduce our borrowing capacity under our revolving credit facility by an equivalent amount. The actual amount of credit that is available from time to time under our revolving credit facility fluctuates and is limited to a borrowing base amount that is determined according to, among other things, a percentage of the value of eligible receivables plus a percentage of the value of eligible inventory, as reduced by certain reserve amounts.

Senior Subordinated Notes

In October 2004, we issued \$400.0 million of 7¹/₈% senior subordinated notes due in 2014. On October 22, 2012, the trustee under the senior subordinated notes indenture, at our request, irrevocably called for redemption on November 21, 2012 all of our outstanding senior subordinated notes. We

Table of Contents

deposited with the trustee a portion of the proceeds from our issuance of \$250.0 million of senior notes on October 22, 2012, in an amount sufficient to pay and discharge the entire indebtedness on the senior subordinated notes, including interest. As of October 22, 2012, our obligations and those of the guarantors under our senior subordinated notes were discharged and satisfied, and the senior subordinated notes indenture generally ceased to be of further effect.

Debt Refinancing

On October 22, 2012, we, and our wholly owned subsidiary, Boise Cascade Finance Corporation ("Boise Finance" and together with us, the "Co-issuers"), issued \$250.0 million of 6³/₈% senior notes due in 2020 through a private placement that is exempt from the registration requirements of the Securities Act. Interest on our senior notes is payable semiannually in arrears on May 1 and November 1, commencing on May 1, 2013. As a result of this refinancing, we extended the maturity of our debt and lowered our interest rate. Our senior notes are guaranteed by each of Boise Cascade's existing and future direct or indirect domestic subsidiaries that is a guarantor or co-borrower under our revolving credit facility, other than Boise Finance. In connection with the consummation of this offering, BC Holdings will cease to guarantee the Co-issuers' obligations under our senior notes and the related indenture. See "Description of Certain Indebtedness."

Following the sale of our senior notes, as noted above, we used \$145.6 million of the net proceeds of the sale to repay the senior subordinated notes at par plus interest through the redemption date. The remaining proceeds are available for general corporate purposes.

The indenture governing our senior notes restricts the issuance of dividends other than a \$100 million basket and except to the extent we have a consolidated leverage ratio no greater than 3.5:1.0. In addition, subject to compliance with a 2.0:1.0 consolidated charge coverage ratio, we will be entitled to make dividends in an amount generally equal to 50% of our net income from the date of the indenture governing our senior notes plus any contribution to equity or proceeds from sales of equity; provided that such amount will be reduced to the extent of certain other restricted payments, including pursuant to the 3.5:1.0 leverage ratio.

Cash Paid for Interest

For the years ended December 31, 2009, 2010 and 2011 and the nine month periods ended September 30, 2011 and 2012, cash payments for interest, net of interest capitalized, were \$20.0 million, \$18.6 million, \$16.7 million, \$8.6 million and \$8.7 million, respectively.

Contractual Obligations

In the table below, we set forth our enforceable and legally binding obligations as of December 31, 2011, on a pro forma basis to give effect to \$50.0 million of borrowings under our revolving credit facility in connection with the repayment of our senior subordinated notes, the issuance on October 22, 2012 of \$250.0 million of senior notes and our anticipated repayment of \$25.0 million of borrowings under our revolving credit facility. Some of the amounts included in the table are based on management's estimates and assumptions about these obligations, including their duration, the possibility of renewal, anticipated actions by third parties and other factors. Because these estimates and assumptions are necessarily subjective, our actual payments may vary from those reflected in the table. Purchase orders made in the ordinary course of business are excluded from the table below. Any

Table of Contents

amounts for which we are liable under purchase orders are reflected on the consolidated balance sheets as accounts payable and accrued liabilities.

	2012	2013-2014	Payments Due by Period		Total
			2015-2016	Thereafter	
			(in millions)		
Long-term debt(a)	\$	\$	\$ 25.0	\$ 250.0	\$ 275.0
Interest(b)	18.3	36.3	34.9	63.8	153.3
Operating leases(c)	12.1	22.7	18.7	41.4	94.9
Purchase obligations:					
Raw materials and finished goods inventory(d)	74.6	151.4	3.4	0.2	229.6
Utilities(e)	8.0				8.0
Other	1.6	0.9			2.5
Other long-term liabilities reflected on our Balance Sheet:					
Compensation and benefits(f)	21.4	56.7	60.6	65.5	204.2
Other(g)(h)	2.1	2.6	1.7	5.6	12.0
Total	\$ 138.1	\$ 270.6	\$ 144.3	\$ 426.5	\$ 979.5

-
- (a) Includes (i) the \$250.0 million of our senior notes issued on October 22, 2012 and (ii) \$25.0 million outstanding under our revolving credit facility, which has a maturity of July 13, 2016.
- (b) Interest expense for 2012 and all subsequent periods gives effect to the refinancing of our senior subordinated notes and the issuance of our senior notes from the date these transactions occurred.
- (c) We enter into operating leases in the normal course of business. We lease a portion of our distribution centers as well as other property and equipment under operating leases. Some lease agreements provide us with the option to renew the lease or purchase the leased property. Our operating lease obligations would change if we exercised these renewal options and/or if we entered into additional operating lease agreements. For more information, see Note 6, "Leases," to our audited consolidated financial statements included elsewhere in this prospectus.
- (d) Amounts represent contracts to purchase approximately \$230 million of wood fiber, approximately \$34 million of which is purchased pursuant to fixed price contracts and approximately \$196 million of which is purchased pursuant to variable contracts based on first quarter of 2012 pricing. Under most of these log and fiber supply agreements, we have the right to cancel or reduce our commitments in the event of a mill curtailment or shutdown. Future purchase prices under most of these agreements will be set quarterly or semiannually based on regional market prices. Our log and fiber obligations are subject to change based on, among other things, the effect of governmental laws and regulations, our manufacturing operations not operating in the normal course of business, log and fiber availability and the status of environmental appeals. Except for deposits required pursuant to wood supply contracts, these obligations are not recorded in our consolidated financial statements until contract payment terms take effect.
- (e) We enter into utility contracts for the purchase of electricity and natural gas. We also purchase these services under utility tariffs. These payment obligations were valued either at market prices as of December 31, 2011 or at a fixed price, in each case, in accordance with the terms

Table of Contents

of the related utility contract or tariff. Because we consume the energy in the manufacture of our products, these obligations represent the face value of the contracts, not resale value.

- (f) Amounts consist primarily of our pension obligation and, to a lesser extent, the current portion of employee-related compensation liabilities of \$3.9 million. Actuarially determined liabilities related to pension benefits are recorded based on estimates and assumptions. Key factors used in developing estimates of these liabilities include assumptions related to discount rates, expected rate of compensation increases, retirement and mortality rates and other factors. Changes in estimates and assumptions related to the measurement of funded status could have a material impact on the amount reported. In the table above, we allocated our pension obligations by year based on the future required minimum pension contributions, as determined by our actuaries. Due to recently passed pension funding relief legislation, payments for compensation and benefits for 2013-2014 are expected to be approximately \$33.0 million compared to the \$56.7 million presented in the table above.
- (g) Includes current liabilities of \$2.1 million.
- (h) We have excluded \$2.7 million and \$1.1 million of deferred lease costs and deferred gains, respectively, from the other long-term liabilities in the above table. These amounts have been excluded because deferred lease costs relate to operating leases which are already reflected in the operating lease category above and deferred gains do not represent a contractual obligation that will be settled in cash.

In addition to the contractual obligations quantified in the table above, we have other obligations for goods and services and raw materials entered into in the normal course of business.

Off-Balance-Sheet Activities

At September 30, 2012 and December 31, 2011 and 2010, we had no material off-balance-sheet arrangements with unconsolidated entities.

Guarantees

Note 9, "Debt," Note 15, "Commitments, Legal Proceedings and Contingencies and Guarantees" and Note 16, "Consolidating Guarantor and Nonguarantor Financial Information," to our audited consolidated financial statements included elsewhere in this prospectus describe the nature of our guarantees, including the approximate terms of the guarantees, how the guarantees arose, the events or circumstances that would require us to perform under the guarantees and the maximum potential undiscounted amounts of future payments we could be required to make. There have been no material changes to the guarantees disclosed in our audited financial statements as of December 31, 2011, other than the repayment of our senior subordinated notes previously guaranteed by our domestic subsidiaries and the issuance of our senior notes, which are similarly guaranteed by BC Holdings and by our domestic subsidiaries; provided that BC Holdings will cease to guarantee our senior notes upon the consummation of this offering.

Seasonal and Inflationary Influences

We are exposed to fluctuations in quarterly sales volumes and expenses due to seasonal factors. These seasonal factors are common in the building products industry. Seasonal changes in levels of building activity affect our building products businesses, which are dependent on housing starts, repair and remodel activities and light commercial construction activities. We typically report lower sales in the first and fourth quarters due to the impact of poor weather on the construction market and we generally have higher sales in the second and third quarters, reflecting an increase in construction due to more favorable weather conditions. We typically have higher working capital in the second and third quarters due to the summer building season. Seasonally cold weather increases costs, especially energy consumption, at most of our manufacturing facilities.

Our major costs of production are wood fiber, labor, glue and resins and energy. Wood fiber costs, glue and resin costs and diesel fuel prices have been volatile in recent years.

Disclosures of Financial Market Risks

Edgar Filing: BOISE CASCADE, L.L.C. - Form S-1

In the normal course of business, we are exposed to financial risks such as changes in interest rates, foreign currency exchange rates and commodity price risk. During 2009, 2010 and 2011 and the nine months ended September 30, 2012, we did not use derivative instruments.

Table of Contents**Interest Rate Risk**

When we have loan amounts outstanding on our revolving credit facility, we are exposed to interest rate risk arising from fluctuations in interest rates. During 2009, 2010 and 2011 and the nine months ended September 30, 2012, we did not use any interest rate swap contracts to manage this risk.

Foreign Currency Risk

We have sales in countries outside the United States. As a result, we are exposed to movements in foreign currency exchange rates, primarily in Canada, but we do not believe our exposure to currency fluctuations is significant. During 2009, 2010 and 2011 and the nine months ended September 30, 2012, we did not use any foreign currency hedges to manage this risk.

Commodity Price Risk

Many of the products we manufacture or purchase and resell and some of our key production inputs are commodities whose price is determined by the market's supply and demand for such products. Price fluctuations in our selling prices and key costs have a significant effect on our financial performance. The markets for most of these commodities are cyclical and are affected by factors such as global economic conditions, including the strength of the U.S. housing market, changes in or disruptions to industry production capacity, changes in inventory levels and other factors beyond our control. During 2009, 2010 and 2011 and the nine months ended September 30, 2012, we did not manage commodity price risk with derivative instruments.

Financial Instruments

The table below provides information as of December 31, 2011, about our financial instruments that are sensitive to changes in interest rates. The table presents principal cash flows and related weighted average interest rates by expected maturity dates. For obligations with variable interest rate sensitivity, the table sets forth payout amounts based on December 31, 2011 rates and does not attempt to project future rates. Other instruments subject to market risk, such as obligations for pension plans and other postretirement benefits, are not reflected in the table.

					December 31, 2011	
	2012-2014	2015	2016	Thereafter	Total	Fair Value(b)
Long-term debt						
Fixed-rate debt payments(a):						(in millions)
Senior subordinated notes	\$ 219.6	\$	\$	\$	\$ 219.6	\$ 218.1
Average interest rates	7.1%				7.1%	
Variable-rate debt payments(a)	\$	\$	\$	\$	\$	\$
Average interest rates						

(a) These obligations are further explained in "Financing Activities" under "Liquidity and Capital Resources" in this Management's Discussion and Analysis of Financial Condition and Results of Operations. The table assumes our long-term debt is held to maturity.

(b) We estimated the fair value based on quoted market prices as of December 31, 2011, for our debt.

Critical Accounting Estimates

The preparation of financial statements in accordance with GAAP requires management to make estimates and assumptions about future events. These estimates and the underlying assumptions affect the amounts of assets and liabilities reported, disclosures about contingent assets and liabilities

Table of Contents

and reported amounts of revenues and expenses. Actual results could differ from these estimates. We believe that the accounting estimates discussed below represent the accounting estimates requiring the exercise of judgment where a different set of judgments could result in the greatest changes to reported results. We reviewed the development, selection and disclosure of our critical accounting estimates with the audit committee of our board of directors. Our current critical accounting estimates are as follows:

Pensions

We calculate pension expense and liabilities using actuarial assumptions, including discount rates, expected return on plan assets, expected rate of compensation increases, retirement and mortality rates, expected contributions and other factors. We based the assumptions used to calculate pension expense on the following factors:

Discount Rate Assumption. The discount rate reflects the current rate at which the pension obligations could be settled based on the measurement dates of the plans December 31. In all years presented, the discount rates were determined by matching the expected plan benefit payments against a spot rate yield curve constructed to replicate the yields of Aa-rated corporate bonds.

Asset Return Assumption. We base our expected long-term rate of return on plan assets on a weighted average of our expected returns for the major asset classes (equities, fixed-income securities, hedge funds and real estate) in which we invest. The weights we assign each asset class are based on our investment strategy. Expected returns for the asset classes are based on long-term historical returns, inflation expectations, forecasted gross domestic product, earnings growth and other economic factors. We developed our return assumption based on a review of the fund manager's estimates of future market expectations by broad asset class, actuarial projections and expected long-term rates of return from external investment managers. The weighted average expected return on plan assets used in our calculation of 2012 net periodic benefit cost is 6.75%.

Rate of Compensation Increases. Generally, this assumption reflects our long-term actual experience, the near-term outlook and assumed inflation. However, in connection with amending the salaried and nonqualified plans on March 18, 2009 to freeze pension benefits effective December 31, 2009 (see Note 11, "Retirement and Benefit Plans," to our audited consolidated financial statements included elsewhere in this prospectus), we changed the assumption for the rate of compensation increase to zero. In addition to the salaried benefits being frozen, there are currently no scheduled increases in pension benefit rates applicable to past service in the active plan covering our hourly employees.

Retirement and Mortality Rates. These rates are developed to reflect actual and projected plan experience.

Expected Contributions. Plan obligations and expenses are based on existing retirement plan provisions. No assumption is made for future changes to benefit provisions beyond those to which we are presently committed. For example, we may commit to changes in future labor contracts. In 2011, we made \$13.6 million in contributions to our pension plans. We expected to contribute approximately \$20.0 million to our pension plans in 2012.

We recognize the funded status of our pension plans on our Consolidated Balance Sheet and recognize the actuarial and experience gains and losses and the prior service costs and credits as a component of other comprehensive loss, net of tax, in our Consolidated Statement of Capital. Actual results that differ from assumptions are accumulated and amortized over future periods and, therefore, generally affect recognized expense in future periods. While we believe that the assumptions used to measure our pension obligations are reasonable, differences in actual experience or changes in assumptions may materially affect our pension obligations and future expense.

Table of Contents

We believe that the accounting estimate related to pensions is a critical accounting estimate for all of our segments because it is highly susceptible to change from period to period. The future effects of pension plans on our financial position and results of operations will depend on economic conditions, employee demographics, mortality rates, retirement rates, investment performance, the pension regulatory environment, benefit plan design and funding decisions, among other factors. The following table presents selected assumptions used and expected to be used in the measurement of pension expense in the following periods:

	Year Ended December 31		Year Ending
	2010	2011	December 31, 2012
	(in millions, except percentages)		
Pension expense	\$ 7.40	\$ 11.40	\$ 12.90
Discount rate	5.90%	5.35%	4.20%
Expected rate of return on plan assets	7.25%	7.00%	6.75%
Rate of compensation increases(a)			

(a)

The compensation increase is zero due to the fact that the salaried and nonqualified benefits were frozen December 31, 2009. In addition to the salaried benefits being frozen, there are currently no scheduled increases in pension benefit rates applicable to past service in the active plan covering our hourly employees.

A change of 0.25% in either direction to the discount rate or the expected rate of return on plan assets would have had the following effect on 2012 and 2011 pension expense. These sensitivities are specific to 2012 and 2011. The sensitivities may not be additive, so the impact of changing multiple factors simultaneously cannot be calculated by combining the individual sensitivities shown.

	Base	Increase (Decrease)	
	Expense	0.25%	0.25%
		Increase	Decrease
	(in millions)		
2012 Expense			
Discount rate	\$ 12.9	\$ (1.4)	\$ 1.4
Expected rate of return on plan assets	12.9	(0.7)	0.7
2011 Expense			
Discount rate	\$ 11.4	\$ (0.8)	\$ 1.2
Expected rate of return on plan assets	11.4	(0.6)	0.6
Long-Lived Asset Impairment			

We review long-lived assets for impairment when events or changes in circumstances indicate that the carrying amount of assets may not be recoverable. An impairment of a long-lived asset exists when the carrying value is not recoverable through future undiscounted cash flows from operations and when the carrying value of an asset or asset group exceeds its fair value.

Long-lived asset impairment is a critical accounting estimate, as it is susceptible to change from period to period. We estimate the fair value of an asset or asset group based on quoted market prices (the amount for which the asset(s) could be bought or sold in a current transaction with a third party) when available. When quoted market prices are not available, we use a discounted cash flow model to estimate fair value. To measure future cash flows, we are required to make assumptions about future production volumes, future product pricing and future expenses to be incurred. Estimates of future cash flows may change based on overall economic conditions, the availability of wood fiber, environmental requirements, capital spending and other strategic management decisions.

Table of Contents

Should the markets for our products deteriorate further or should we decide to invest capital differently and should other cash flow assumptions change, it is possible that we will be required to record noncash impairment charges in the future that could have a material impact on our results of operations. Due to the numerous variables associated with our judgments and assumptions relating to the valuation of assets and the effects of changes on these valuations, both the precision and reliability of our estimates are subject to uncertainty. As additional information becomes known, we may change our estimates.

Allowance for Doubtful Accounts

We make ongoing estimates relating to the collectibility of our accounts receivable and maintain a reserve for estimated losses resulting from the inability of our customers to meet their financial obligations to us. At September 30, 2012 and December 31, 2011, we had \$2.9 million and \$2.1 million recorded as allowances for doubtful accounts. Estimating our allowance for doubtful accounts is a critical accounting estimate, as it involves complex judgments about our customers' ability to pay. In determining the amount of the reserve, we consider our historical level of credit losses, customer concentrations, current economic trends and changes in customer creditworthiness. Our sales are principally to customers in the building products industry located in the United States and Canada. A significant portion of our sales are concentrated with a relatively small number of customers. In 2011, our top ten customers represented approximately 27% of sales. In order to manage credit risk, we consider customer concentrations and current economic trends and monitor the creditworthiness of significant customers based on ongoing credit evaluations. At September 30, 2012 and December 31, 2011, the receivables from a single customer accounted for approximately 15% and 14%, respectively, of total receivables. No other customer accounted for 10% or more of total receivables as of September 30, 2012 or December 31, 2011.

The low level of new residential construction in the U.S. and disruptions in the capital markets have affected the ability of our customers and our customers' customers to fund their operations, which makes it difficult for us to estimate future credit losses. Although we have not experienced material credit losses in recent years, our actual future losses from uncollectible accounts may differ materially from our current estimates. As additional information becomes known, we may change our estimates. In the event we determine that a change in the reserve is appropriate, we will record a charge to "Selling and distribution expenses" in our Consolidated Statements of Income (Loss) in the period we make such a determination.

Goodwill and Intangible Asset Impairment

Goodwill represents the excess of the cost of an acquired business over the fair value of the identifiable tangible and intangible assets acquired and liabilities assumed in a business combination. At December 31, 2011, we had \$12.2 million of goodwill recorded on our Consolidated Balance Sheet, of which \$5.6 million was recorded in our Building Materials Distribution segment and \$6.6 million was recorded in our Wood Products segment. At December 31, 2011, the net carrying amount of intangible assets with indefinite lives, which represent our trade names and trademarks, was \$8.9 million.

We maintain two reporting units for purposes of our goodwill impairment testing, Building Materials Distribution and Wood Products, which are the same as our operating segments discussed in Note 14, "Segment Information," to our audited consolidated financial statements included elsewhere in this prospectus. We test goodwill in each of our reporting units and indefinite-lived intangible assets for impairment annually in the fourth quarter or sooner if events or changes in circumstances indicate that the carrying value of the asset may exceed fair value. In conducting our goodwill impairment analysis, we utilize the discounted cash flow approach that estimates the projected future cash flows to be generated by our reporting units, discounted to present value using a discount rate reflecting weighted average cost of capital for a potential market participant. For our intangible asset impairment

Table of Contents

testing, we use a discounted cash flow approach, based on a relief from royalty method. This method assumes that through ownership of trademarks and trade names, we avoid royalty expense associated with licensing, resulting in cost savings. An estimated royalty rate, determined as a percentage of sales, is used to estimate the value of the intangible assets. Differences in assumptions used in projecting future cash flows and cost of funds could have a significant impact on the determination of the fair value of our reporting units and intangible assets. The following assumptions are key to our estimates of fair value:

Business projections. Projections are based on five-year forecasts that are developed internally by management for use in managing the business and reviewed by the board of directors. These projections include significant assumptions such as estimates of future revenues, profits, working capital requirements, operating plans and capital expenditures. Our forecasts are driven by consensus estimates of key economic indicators that affect our operating results, most notably new residential and light commercial construction and repair and remodel activity. These economic indicators are then used to estimate future production volumes, selling prices and key input costs for our manufactured products. Our forecasts also take into consideration recent sales data for existing products, planned timing of capital projects and anticipated conversion and distribution expenses. Our pricing assumptions are estimated based upon an assessment of industry supply and demand dynamics for our major products.

Growth rates. A growth rate is used to calculate the terminal value in the discounted cash flow model. The growth rate is the expected rate at which earnings or revenue is projected to grow beyond the five-year forecast period.

Discount rates. Future cash flows are discounted at a rate that is consistent with a weighted average cost of capital for a potential market participant. The weighted average cost of capital is an estimate of the overall after-tax rate of return required by equity and debt holders of a business enterprise. The discount rates selected are based on existing conditions within our industry and reflect adjustments for potential risk premiums in those markets as well as weighting of the market cost of equity versus debt.

Based on the results of the first step of the goodwill impairment test, we determined that the fair value of each of our reporting units substantially exceeded their carrying amounts and, therefore, no goodwill impairment existed. As a result, the second step of the goodwill impairment test was not required to be completed. In addition, based on the impairment tests of our intangible assets with indefinite lives, we determined that the fair value of our intangible assets exceeds their carrying value.

New and Recently Adopted Accounting Standards

For information related to new and recently adopted accounting standards, see "New and Recently Adopted Accounting Standards" in Note 2, "Summary of Significant Accounting Policies," to our unaudited quarterly consolidated financial statements included elsewhere in this prospectus.

Table of Contents

BUSINESS

Our Company

We are a large, vertically-integrated wood products manufacturer and building materials distributor with widespread operations throughout the United States and Canada. We are the second largest manufacturer of LVL, I-joists and plywood in North America. We are also one of the largest stocking wholesale distributors of building products in the United States. Our broad line of products is used primarily in new residential construction, residential repair and remodeling projects, light commercial construction and industrial applications. We believe our large, vertically-integrated operations provide us with significant advantages over less integrated competitors and position us to optimally serve our customers. We have a broad base of more than 4,500 customers, which includes a diverse mix of leading wholesalers, home improvement centers, retail lumberyards and industrial converters. In the LTM period, no single customer represented more than 11% of sales and our top ten customers represented less than 31% of sales. For the LTM period, we generated sales of \$2,631.9 million, income before interest and taxes of \$45.7 million and EBITDA of \$80.1 million.

We supply our customers through 49 strategically located facilities (consisting of 18 manufacturing facilities and 31 distribution facilities). The following map indicates our headquarters, EWP and other manufacturing facilities and building materials distribution facilities:

Table of Contents

In addition to the vertical integration between our manufacturing and distribution operations, our EWP manufacturing facilities are closely integrated with our nearby plywood operations, which allows us to optimize both production processes. Throughout the housing downturn, we have continued to make strategic capital investments to increase our manufacturing capacity and expand our building materials distribution network. We believe that our scale, closely integrated businesses and significant capital investments throughout the downturn provide us with substantial operating leverage to benefit from a recovery in the U.S. housing market.

We operate our company through two primary segments: our Wood Products segment and our Building Materials Distribution segment. The charts below summarize the breakdown of our business for the LTM period.

LTM SALES BY SEGMENT(1)(2)

LTM EBITDA BY SEGMENT(1)(3)

-
- (1) Financial data for the LTM period presented in this prospectus is derived by adding financial data for the year ended December 31, 2011 to financial data for the nine months ended September 30, 2012 and subtracting financial data for the nine months ended September 30, 2011.
 - (2) Segment percentages are calculated before intersegment eliminations.
 - (3) Segment percentages exclude Corporate and Other segment expenses.

Wood Products (\$69.2 million, or 73%, of LTM EBITDA). Our Wood Products segment is the second largest manufacturer of EWP and plywood in North America, with a highly integrated national network of 17 manufacturing facilities. Our wood products are used primarily in new residential construction, residential repair and remodeling projects and light commercial construction. We are focused on profitably gaining EWP market share and maintaining a strong market presence in plywood and pine lumber by providing superior customer service and distribution support. We manufacture LVL, I-joists and laminated beams, which are high-grade, value-added structural products used in applications where additional strength and consistent quality are required. LVL is also used in the manufacture of engineered I-joists, which are assembled by combining a vertical web of OSB with top and bottom LVL or solid wood flanges. We also produce plywood, studs, particleboard and ponderosa pine lumber, a premium lumber grade sold primarily to manufacturers of specialty wood windows, moldings and doors. We enjoy the benefit of long-term wood supply agreements put in place in 2005 following the sale of our timberlands, under which we purchase timber at market-based prices. Approximately 40% of our log consumption is typically supplied through these agreements, giving us access to timberlands near our manufacturing operations.

Our EWP manufacturing facilities are closely integrated with our nearby plywood operations to optimize veneer utilization, by enabling us to dedicate higher quality veneers to higher margin applications and lower quality veneers to plywood products, giving us an advantage over our less integrated competitors. For the LTM period, EWP, plywood and lumber accounted for 35%, 44% and

Table of Contents

9%, respectively, of our Wood Products sales. Most of our wood products are sold to leading wholesalers (including our Building Materials Distribution segment), home improvement centers, retail lumberyards and industrial converters. In the LTM period, approximately 37% of our Wood Products sales, including approximately 71% of our EWP sales, were to our Building Materials Distribution segment. For the LTM period, our Wood Products segment generated sales, income before interest and taxes and EBITDA of \$893.0 million, \$43.7 million and \$69.2 million, respectively.

Building Materials Distribution (\$26.2 million, or 27%, of LTM EBITDA). We are one of the largest national stocking wholesale distributors of building materials in the United States. Our nationwide network of 31 strategically-located distribution facilities sells a broad line of building materials, including EWP, OSB, plywood, lumber and general line items such as framing accessories, composite decking, roofing, siding and insulation. We also operate a truss manufacturing plant located in Maine. Our products are used in the construction of new residential housing, including single-family, multi-family and manufactured homes, repair and remodeling projects and the construction of light industrial and commercial buildings. Except for EWP, we purchase most of these building materials from more than 1,000 third-party suppliers ranging from large manufacturers, such as James Hardie Building Products, Trex Company, Louisiana-Pacific and Georgia-Pacific, to small regional producers.

We market our products primarily to retail lumberyards and home improvement centers that then sell the products to end customers, who are typically professional builders, independent contractors and homeowners engaged in residential construction projects. We also market our products to industrial converters, which use our products to assemble windows, doors, agricultural bins and other value-added products used in industrial and repair and remodel applications. We believe that we are attractive to customers in our Building Materials Distribution segment because we provide a high level of customer service and a broad line of products from a large number of quality manufacturers. The majority of our competitors in this segment are specialized, local or regional distributors focused primarily on a narrow range of products. We also compete against other national wholesalers. Unlike many of our competitors who focus primarily on a narrow range of products, we are a one-stop resource for our customers' building materials needs, which allows for more cost-efficient ordering, delivery and receiving. Furthermore, we believe that our national presence and long-standing relationships with many of our key suppliers allow us to obtain favorable price and term arrangements and offer excellent customer service on top brands in the building materials industry. We have expertise in special-order sourcing and merchandising support, which is a key service for our home improvement center customers that choose not to stock certain items in inventory. Our highly efficient logistics system allows us to deliver superior customer service and assist our customers in optimizing their working capital, which we believe has led to increased market share during the housing downturn. For the LTM period, our Building Materials Distribution segment generated sales, income before interest and taxes and EBITDA of \$2,066.6 million, \$17.4 million and \$26.2 million, respectively.

Table of Contents

The following diagram illustrates our value chain:

BOISE CASCADE VALUE CHAIN

Our Industry

The building products manufacturing and distribution industry in North America is highly competitive, with a number of producers manufacturing and selling a broad range of products. Demand for our products is principally influenced by new residential construction, light commercial construction and repair and remodeling activity in the United States. Drivers of new residential construction, light commercial construction and repair and remodeling activity include new household formation, the age of the housing stock, availability of credit and other macroeconomic factors, such as GDP growth, population growth, migration, interest rates, employment and consumer sentiment. Purchasing decisions made by the customers who buy our wood products are generally based on price, quality and, particularly with respect to EWP, customer service and product support.

From 2005 to 2011, total housing starts in the United States declined by more than 70%. The significant drop in new residential construction has created challenging conditions for building products manufacturers and distributors, with substantial reductions in manufacturing and distribution capacity occurring since late 2008 as companies adjusted to lower industry demand. According to the U.S. Census Bureau, total housing starts in the United States were 0.59 million in 2010 and 0.61 million in 2011, modest increases over the 2009 level of 0.55 million (the lowest year on record) but significantly less than the 50-year average rate of 1.5 million. Prior to 2008, the housing market had not experienced a year with total housing starts below 1.0 million since the U.S. Census Bureau began its annual recordkeeping in 1959.

In the U.S., single- and multi-family housing starts were 0.87 million in September 2012 on a seasonally adjusted annual rate basis, an increase of 35% from September 2011. In November 2012, the

Table of Contents

Blue Chip Economic Indicators median consensus forecast of single- and multi-family housing starts in the U.S. was approximately 0.77 million units for 2012 and approximately 0.92 million units for 2013, which represent annual increases of 26% and 19%, respectively. We believe that over the long-term, there is considerable growth potential in the U.S. housing sector. In November 2012, IHS Global Insight estimates that total U.S. single- and multi-family housing starts will average 1.48 million units per year from 2012 through 2021, levels that are in line with the 50-year historical average.

The following table sets forth historical and projected annual U.S. single- and multi-family housing starts for the periods indicated:

-
- (a) 2012-2021 average annual U.S. single- and multi-family housing starts estimate per IHS Global Insight as of November 2012.
 - (b) 2002-2011 average annual U.S. single- and multi-family housing starts per U.S. Census Bureau.
 - (c) Projected 2012 and 2013 U.S. single- and multi-family housing starts represent median consensus forecast per Blue Chip Economic Indicators as of November 2012.

During the housing downturn, demand for EWP declined less than demand from many products dependent on new residential construction. According to APA The Engineered Wood Association, LVL production volumes in North America increased 27% from 32.7 million cubic feet in 2009 to 41.6 million cubic feet in 2011 and I-joist production volumes in North America increased 20% from 380.1 million linear feet in 2009 to 456.9 million linear feet in 2011. Longer term demand trends are expected to improve further. Resource Information Systems, Inc. ("RISI") forecasts that I-joist demand in North America will increase 15% and LVL billet demand in North America will increase 21% in 2012, followed by further demand increases in 2013 through 2015. RISI expects the I-joist and LVL billet demand to reach 1,013 million linear feet and 98.5 million cubic feet, respectively, by 2017.

Our products are not only used in new residential construction, but also in residential repair and remodeling projects, light commercial construction and industrial applications. We believe this diversification by product end use provides us some protection from declines in the new residential construction market. Residential repair and remodeling spending increased significantly over the past 15 years. According to the HIRI, the U.S. repair and remodel market increased 81.5% from \$165 billion in 1996 to a peak of \$300 billion in 2006 and declined approximately 10.2% to \$269 billion in 2011. In addition, the overall age of the U.S. housing stock, increased focus on making homes more energy efficient, rising home prices and availability of consumer capital at low interest rates are expected to drive long-term growth in repair and remodeling expenditures. HIRI estimates that total U.S. sales of home maintenance, repair and improvement products will grow at a compounded annual rate of 5.1% from 2011 through 2016.

Table of Contents

Our Competitive Strengths

We believe the following key competitive strengths have contributed to our success and will enable us to execute our growth strategy:

Leadership Positions in Wood Products Manufacturing and Building Materials Distribution on a National Scale

We are one of the leading manufacturers in the North American wood products industry. We are the second largest producer of EWP and plywood in North America and we are the largest producer of plywood in the Western United States. From 2005 to 2011, our sales of LVL and I-joist per North American housing start increased by 65% and 30%, respectively. We have positioned ourselves to take advantage of improving demand in our core markets by expanding our EWP and plywood capacity through capital investments in low-cost, internal veneer manufacturing. Our Wood Products segment operates a highly-integrated national network of 17 manufacturing facilities that are well-maintained and cost-efficient as a result of continued capital improvements. We believe we are better able to serve our customers because our Wood Products business is vertically-integrated with our Building Materials Distribution business.

We are one of the largest national stocking wholesale distributors of building materials in the United States and we believe we offer one of the broadest product lines in the industry. From 2005 to 2011, we nearly doubled our sales per U.S. housing start in our Building Materials Distribution segment. We have a national platform of 31 strategically-located distribution facilities, which supply products to all major markets in the United States and provide us with significant scale and capacity relative to most of our competitors. We also have one truss manufacturing plant in Maine. Our broad geographic presence reduces our exposure to market factors in any single region. We have developed and maintain long-standing relationships with our customer segments, including retail lumberyards, home improvement centers and industrial converters. We believe that our strong and diverse customer relationships and support from leading industry manufacturers will enable us to capture additional market share as demand for building products improves.

Strongly Situated to Serve our Customers with Vertically-Integrated Manufacturing and Distribution Operations

We believe that we are the only large-scale manufacturer of plywood and EWP in North America that is vertically-integrated from log procurement through distribution. The integration of our manufacturing and distribution operations allows us to make procurement, manufacturing, veneer merchandising and marketing decisions that reduce our manufacturing and supply chain costs and allow us to more effectively control quality and working capital. Furthermore, our vertically-integrated operations combined with our national distribution network significantly enhance our ability to assure product supply for our end customers. We believe our vertical integration was an important factor in our ability to increase market share during the recent housing downturn.

Low-Cost Manufacturing and Distribution Footprint Supported by Significant Capital Investments

We believe that we have a highly competitive asset base across both of our operating segments, in part because we continued to strategically invest through the housing downturn. We operate the two largest EWP facilities in North America. Our large-scale EWP production facilities are integrated with our nearby plywood operations to optimize our veneer utilization, which we believe helps position us as a competitive manufacturer in the growing EWP business. In the past three years, we completed a number of initiatives in our Wood Products segment that strengthened our asset base and enhanced our operating performance. In our plywood and veneer operations, we reduced costs by reducing headcount and closing three facilities in Western Oregon. At the same time, we installed two new large-

Table of Contents

scale, state-of-the-art dryers at our Medford, Oregon, plywood facility. In our EWP operations, we executed significant operational improvements to take advantage of additional low-cost, internal veneer production at our plywood facilities.

We believe that our plywood facilities in Kettle Falls, Washington and Elgin, Oregon, are among the lowest cost Douglas fir plywood producers in North America. In the active timberland markets in which we operate, our manufacturing facilities are clustered to enable us to efficiently utilize fiber resources and to shift production depending on demand. We believe we are the only manufacturer in the inland Pacific Northwest with the integrated primary and secondary facilities necessary to process all softwood species.

We have continued to execute our strategic growth initiatives in our Building Materials Distribution Segment, opportunistically acquiring facilities, starting a new facility in South Florida and significantly expanding six of our existing facilities. Since 2005, we have increased our covered warehouse space by over 65% and have more than doubled our outdoor storage acreage.

Well-Positioned for Growth as the Housing Market Recovers

Our vertically-integrated operations are well-positioned to serve our customers and take advantage of the recovery that we believe is underway in the U.S. housing market. From 2005 to 2011 we invested \$270 million (excluding acquisitions) to upgrade and maintain our facilities. We expect to make further capital investments in cost and operational improvements, primarily related to internal veneer production, which will further leverage our competitive position and allow us to capture growth opportunities. Additionally we have substantial unused capacity in our EWP operations. For the LTM period, we operated our EWP facilities at approximately 50% of LVL press capacity.

We believe that our Building Materials Distribution facilities enable us to support a considerable ramp-up in housing starts with no significant requirement for new capacity and will allow us to double our sales without increasing our existing footprint. Our excess capacity will provide us with substantial operating leverage as demand recovers.

Additionally, our strong balance sheet, significant liquidity and our access to the capital markets as a public company will provide us ample flexibility to take advantage of future market opportunities. As of September 30, 2012, we had total liquidity of \$483.8 million, consisting of \$224.4 million of cash and cash equivalents and \$259.4 million of availability under our revolving credit facility.

Experienced Management Team and Principal Equityholder

Madison Dearborn, BC Holdings' ultimate principal equityholder, has a long and successful track record of investing in manufacturing and distribution businesses. Our senior management team has a track record of financial and operational excellence in the forest products industry in both favorable and challenging market conditions. Our senior management team has an average of approximately 30 years of experience in forest products manufacturing and building materials distribution. We will establish the 2013 Equity Incentive Plan so that we can align management's compensation with our financial performance. See "Executive Compensation 2013 Equity Incentive Plan."

Table of Contents

Our Business Strategy

We intend to capitalize on our strong market position in wood products manufacturing and building materials distribution to increase revenues and profits and maximize cash flow as the U.S. housing market recovers. We seek to achieve this objective by executing on the following strategies:

Grow our Wood Products Segment Operations with a Focus on Expanding our Market Position in EWP

From 2005 to 2011, despite experiencing a significant downturn in the U.S. housing sector, we increased our LVL and I-joist sales-per-housing start in North America by 65% and 30%, respectively. We will further expand our market position in EWP by continuing to focus on our large-scale manufacturing position, comprehensive customer service, design support capabilities and efficient distribution network. We have positioned ourselves to take advantage of expected increases in the demand for EWP per housing start by expanding our capacity through capital investments in low-cost, internal veneer manufacturing. We have also developed strategic relationships with third-party veneer suppliers to support additional EWP production as needed. Additionally, we intend to grow our Wood Products business through strategic acquisitions that are a compelling fit with our existing operations.

Grow Market Share in our Building Materials Distribution Segment

We intend to grow our Building Materials Distribution business in existing markets by adding products and services to better serve our customers. For example, we have added cedar board inventory and door shops in additional locations. We also plan to opportunistically expand our Building Materials Distribution business into nearby geographies that we currently serve using off-site storage arrangements or longer truck routes. Sales in our Building Materials Distribution segment are strongly correlated with new residential construction in the United States. Measured on a sales-per-housing-start basis, our Building Materials Distribution business has grown significantly from 2005 to 2011, with penetration increasing from \$1,476 to \$2,923, or approximately 98%, per U.S. housing start. In the future, we will continue to grow our Building Materials Distribution business by opportunistically acquiring facilities, adding new products, opening new locations, relocating and expanding capacity at existing facilities and capturing local market share through our superior supply chain capabilities and customer service.

Further Differentiate our Products and Services to Capture Market Share

We seek to continue to differentiate ourselves from our competitors by providing a broad line of high-quality products and superior customer service. Throughout the housing downturn, we believe we have grown market share by strengthening relationships with our customers by stocking sufficient inventory and retaining our primary sales team. Our Building Materials Distribution segment's highly efficient logistics system allows us to deliver superior customer service and assist our customers in optimizing their working capital. Our national distribution and manufacturing integration system differentiates us from most of our competitors and is critical to servicing leading wholesalers, home improvement centers, retail lumberyards and industrial converters. Additionally, this system allows us to procure product more efficiently and to develop and maintain stronger relationships with our vendors. Because of these relationships and our national presence, many of our vendors have offered us favorable pricing and provide us with enhanced product introductions and ongoing marketing support.

Continue to Improve our Competitiveness through Operational Excellence

We use a disciplined cost management approach to maximize our competitiveness without sacrificing our ability to react to future growth opportunities. Additionally, we have made capital investments and process improvements in certain facilities, which have enabled us to close or divest five

Table of Contents

manufacturing facilities during the housing downturn without any adverse impact on our production capacity. These capital investments and process improvements have decreased our production costs and allowed us to produce lower-cost, higher-quality veneers. Beginning in 2009, we adopted a data-driven process improvement program to further strengthen our manufacturing operations. Because of the significant gains we continue to see from this program, we believe there are opportunities to apply similar techniques and methods to different functional areas (including sales and marketing) to realize efficiencies in those areas.

Wood Products

Products

We manufacture LVL, I-joists and laminated beams, which are high-grade, value-added structural products used in applications where extra strength and consistent quality is required, such as headers and beams. LVL is also used in the manufacture of engineered I-joists, which are assembled by combining a vertical web of OSB with top and bottom LVL or solid wood flanges. We also produce plywood, studs, particleboard and ponderosa pine lumber, a premium lumber grade sold primarily to manufacturers of specialty wood windows, moldings and doors.

For the LTM period, EWP (LVL and I-joists), plywood and lumber accounted for 35%, 44% and 9%, respectively, of our Wood Products sales. Most of our wood products are sold to leading wholesalers (including our Building Materials Distribution segment), home improvement centers, retail lumberyards and industrial converters. In the LTM period, approximately 37% of our Wood Products sales, including approximately 71% of our EWP sales, were to our Building Materials Distribution segment.

Edgar Filing: BOISE CASCADE, L.L.C. - Form S-1

Table of Contents

The following table sets forth the annual capacity and production of our principal wood products for the periods indicated:

	Year Ended December 31				
	2007	2008	2009	2010	2011
	(in millions)				
Capacity(a)					
Laminated veneer lumber (LVL) (cubic feet)(b)	27.5	27.5	27.5	27.5	27.5
Plywood (sq. ft.) (³ / ₈ " basis)(c)	1,600	1,600	1,430	1,475	1,500
Lumber (board feet)(d)	250	230	180	180	200
Production					
Laminated veneer lumber (LVL) (cubic feet)(b)	17.2	11.2	7.9	10.0	10.7
I-joists (equivalent lineal feet)(b)	194	109	81	105	112
Plywood (sq. ft.) (³ / ₈ " basis)(c)	1,467	1,351	1,066	1,183	1,240
Lumber (board feet)(d)	237	189	141	149	152

- (a) Annual capacity is production assuming normal operating shift configurations. Accordingly, production can exceed capacity under some operating conditions.
- (b) A portion of LVL production is used to manufacture I-joists at two EWP plants. Capacity is based on LVL production only.
- (c) Approximately 20%, 13%, 10%, 11% and 12% respectively, of the plywood we produced in 2007, 2008, 2009, 2010 and 2011 was utilized internally to produce EWP.

In response to the housing downturn, in March 2009, we closed our plywood manufacturing facility in White City, Oregon and curtailed our Oakdale, Louisiana plywood operation. The Oakdale, Louisiana mill resumed plywood operations in June 2010.

- (d) In June 2009, we closed our lumber facility in La Grande, Oregon. This facility was reopened on a limited operating basis in April 2011. Also in June 2009, we purchased a lumber manufacturing facility in Pilot Rock, Oregon. In February 2012, we purchased a lumber facility in Arden, Washington.

The following table sets forth segment sales; segment income (loss); depreciation and amortization; and earnings before interest, taxes, depreciation and amortization (EBITDA) for the periods indicated:

	Year Ended December 31					Nine Month Ended September 30	Twelve Months Ended September 30,
	2007	2008(a)	2009(b)	2010(c)	2011(d)	2011(e)	2012
	(in millions)						
Segment sales(f)	\$ 1,010.2	\$ 795.9	\$ 550.8	\$ 687.4	\$ 712.5	\$ 532.2	\$ 712.7
						\$ 712.7	\$ 893.0
Segment income (loss)(g)	23.6	(55.1)	(77.3)	(8.1)	(15.1)	(10.0)	48.8
Segment depreciation and amortization	30.0	27.7	33.0	27.1	28.4	21.1	18.2
Segment EBITDA(h)	\$ 53.7	\$ (27.4)	\$ (44.3)	\$ 19.0	\$ 13.3	\$ 11.1	\$ 67.0

- (a)

Edgar Filing: BOISE CASCADE, L.L.C. - Form S-1

In 2008, segment loss included \$11.3 million of expenses related to closing our veneer operations in St. Helens, Oregon and our plywood manufacturing facility in White City,

Table of Contents

Oregon, partially offset by a \$5.7 million net gain related to the sale of our wholly owned subsidiary in Brazil that manufactured veneer.

- (b) In 2009, segment loss included \$8.9 million of expense related to the June 2009 closure of our lumber manufacturing facility in La Grande, Oregon, of which \$3.7 million reduced EBITDA and \$5.2 million was accelerated depreciation recorded in "Depreciation and amortization."
- (c) In 2010, segment income and EBITDA included \$0.5 million of income for cash received from a litigation settlement related to vendor product pricing.
- (d) In 2011, segment loss included \$2.6 million of expense related to the permanent closure of a laminated beam plant in Emmett, Idaho and noncash asset write-downs, of which \$2.2 million reduced EBITDA and \$0.4 million was accelerated depreciation recorded in "Depreciation and amortization."
- (e) In the nine months ended September 30, 2011, segment loss included \$2.2 million of expense related to the permanent closure of a laminated beam plant in Emmett, Idaho and noncash asset write-downs, of which \$1.8 million was included in EBITDA and \$0.4 million was accelerated depreciation recorded in "Depreciation and amortization."
- (f) Segment sales are calculated before intersegment eliminations.
- (g) Segment income (loss) excludes Corporate and Other segment expenses.
- (h) Segment EBITDA is calculated as segment income (loss) before depreciation and amortization, excluding Corporate and Other segment costs. EBITDA is the primary measure used by our chief operating decision maker to evaluate segment operating performance and to decide how to allocate resources to segments. See "Selected Historical Consolidated Financial Data" for a description of our reasons for using EBITDA, for a discussion of the limitations of such a measure and for a reconciliation of our consolidated EBITDA to net income (loss). Segment EBITDA excludes Corporate and Other segment expenses.

Facilities

Our Wood Products segment currently operates four EWP facilities and seven plywood and veneer plants, five of which manufacture inputs used in our EWP facilities. Our EWP facilities have a high degree of raw material and manufacturing integration with our plywood and veneer facilities. We also operate five sawmills, including the Arden, Washington facility purchased in February 2012 and one particleboard plant. During 2011, we closed our laminated beam manufacturing plant in Emmett, Idaho and purchased a laminated beam and decking manufacturing plant in Homedale, Idaho, that provides us a broader product mix and a larger, more efficient operation.

Raw Materials and Input Costs

Wood fiber. The primary raw material in our Wood Products segment is wood fiber. For the year ended December 31, 2011, wood fiber accounted for 38% of materials, labor and other operating expenses, including from related parties, in our Wood Products segment. Our plywood and veneer facilities use Douglas fir, white woods and pine logs as raw materials. We use ponderosa pine, spruce and white fir logs to manufacture various grades of lumber. Our EWP facilities in Louisiana and Oregon use veneers and parallel-laminated veneer panels produced by our facilities and purchased from third parties, together with OSB purchased from third parties, to manufacture LVL and I-joists. Our manufacturing facilities are located in close proximity to active wood markets. We have long-term market-based contracts for a significant portion of our fiber needs.

We satisfy our timber requirements through a combination of purchases under supply agreements, open market purchases and purchases pursuant to contracts awarded under public timber

Table of Contents

auctions. In February 2005, our affiliate sold its timberland operations to Forest Capital Partners, LLC ("Forest Capital"), an unaffiliated third party. In connection with this sale, we entered into a series of fiber supply agreements with Forest Capital. These fiber supply agreements required Forest Capital to sell a specified amount of timber to us at prices generally related to market prices. In 2012, Forest Capital sold the timberlands to a group of purchasers, whose investments in the timberlands are managed by Hancock Natural Resource Group, Inc. ("Hancock") and to a group of purchasers whose investments in the timberlands are managed by The Molpus Woodlands Group LLC ("Molpus"). The purchasers of the timberlands (other than Molpus) assumed Forest Capital's obligations under the 2005 wood supply agreements and the Molpus entities entered into a new master harvest rights agreement on substantially the same terms. In 2011, approximately 43% of our timber was supplied pursuant to these agreements.

We also bid in auctions conducted by federal, state and local authorities for the purchase of timber, generally at fixed prices, under contracts with a term of generally one to three years. In 2011, approximately 22% of our timber was supplied under government contracts. The remainder of our log supply in 2011 was supplied through private purchases directly from timber owners or through dealers.

Under most of our log and fiber supply agreements, we have the right to cancel or reduce our commitments in the event of a mill curtailment or shutdown. Future purchase prices under most of these agreements will be set quarterly or semiannually based on regional market prices. Our log and fiber obligations are subject to change based on, among other things, the effect of governmental laws and regulations, our manufacturing operations not operating in the normal course of business, log and fiber availability and the status of environmental appeals. For a discussion of contractual commitments relating to fiber supply agreements, see "Management's Discussion and Analysis of Financial Condition and Results of Operations Contractual Obligations."

The cost of timber is strongly correlated with product prices for building materials, with the increase in product prices driving increases in timber costs. Because wood fiber is a commodity, prices have been cyclical historically in response to changes in domestic and foreign demand and supply. Demand for dimension lumber has a strong influence on pricing, as the dimension lumber industry is the largest consumer of timber.

Foreign demand for log exports, particularly from China, increased log costs in the western U.S. in 2010 and 2011 and negatively affected wood products manufacturers in the region. Sustained periods of high log costs may impair the cost competitiveness of our manufacturing facilities. Availability of residual wood fiber for our particleboard operation has been negatively affected by significant mill closures and curtailments that have occurred among solid-wood product producers.

Our aggregate cost of obtaining timber is also impacted by fuel costs and the distance of the fiber source from our facilities, as we are often required to transport the timber we purchase from the source to our facilities.

Other raw materials and energy costs. We use a significant quantity of various resins and glues in our manufacturing processes. Resin and glue product costs are influenced by changes in the prices of raw material input costs, primarily fossil fuel products. We purchase resins and glues, other raw materials and energy used to manufacture our products in both the open market and through supply contracts. The contracts are generally with regional suppliers who agree to supply all of our needs for a certain raw material or energy at one of our facilities. These contracts have terms of various lengths and typically contain price adjustment mechanisms that take into account changes in market prices. Therefore, although our long-term contracts provide us with supplies of raw materials and energy that are more stable than open-market purchases, in many cases, they may not alleviate fluctuations in market prices.

Table of Contents

Sales, Marketing and Distribution

Our EWP sales force is managed centrally through a main office that oversees regional sales teams. Sales of plywood, lumber and particleboard are managed centrally by product. Our sales force spends a significant amount of time working with end customers who purchase our EWP. Our sales force provides a variety of technical support services, including integrated design, engineering, product specification software, distributor inventory management software and job-pack preparation systems. The majority of our wood products are sold to distributors, including our Building Materials Distribution segment and other distributors.

The following table lists sales volumes for our principal wood products for the periods indicated:

	Year Ended December 31				
	2007	2008	2009	2010	2011
	(in millions)				
Laminated veneer lumber (LVL) (cubic feet)	10.6	7.6	5.6	6.6	7.1
I-joists (equivalent lineal feet)	188	117	87	106	110
Plywood (sq. ft.) (³ / ₈ " basis)	1,223	1,228	992	1,088	1,106
Lumber (board feet)	231	191	146	149	153

Building Materials Distribution

Products

We sell a broad line of building materials, including EWP, OSB, plywood, lumber and general line items such as framing accessories, composite decking, roofing, siding and insulation. Our products are used in the construction of new residential housing, including single-family, multi-family and manufactured homes, the repair and remodeling of existing housing and the construction of light industrial and commercial buildings.

The following table sets forth segment sales; segment income (loss); depreciation and amortization; and EBITDA for the periods indicated:

	Year Ended December 31					Nine Months Ended September 30		Twelve Months Ended September 30, 2012
	2007	2008	2009	2010(a)	2011(a)	2011(b)	2012	
	(in millions)							
Segment sales(c)	\$ 2,564.0	\$ 2,109.4	\$ 1,609.8	\$ 1,778.0	\$ 1,779.4	\$ 1,349.9	\$ 1,637.2	\$ 2,066.6
Segment income (loss)(d)	51.8	19.5	8.0	11.6	2.0	2.8	18.2	17.4
Segment depreciation and amortization	7.4	7.7	7.6	7.5	8.4	6.2	6.6	8.8
Segment EBITDA(e)	\$ 59.2	\$ 27.2	\$ 15.5	\$ 19.1	\$ 10.4	\$ 9.0	\$ 24.8	\$ 26.2

(a) In 2011, segment income and EBITDA included \$1.2 million of noncash asset write-downs. In 2010, segment income and EBITDA included \$4.1 million of income for cash received from a litigation settlement related to vendor product pricing.

(b) In the nine months ended September 30, 2011, segment income and EBITDA included \$0.8 million of noncash asset write-downs.

(c) Segment sales are calculated before intersegment eliminations.

(d)

Segment income (loss) excludes Corporate and Other segment expenses.

Table of Contents

- (e) Segment EBITDA is calculated as segment income (loss) before depreciation and amortization. EBITDA is the primary measure used by our chief operating decision maker to evaluate segment operating performance and to decide how to allocate resources to segments. See "Selected Historical Consolidated Financial Data" for a description of our reasons for using EBITDA, for a discussion of the limitations of such a measure and for a reconciliation of our consolidated EBITDA to net income (loss). Segment EBITDA excludes Corporate and Other segment expenses.

Facilities

Our Building Materials Distribution segment operates a nationwide network of 31 strategically-located building materials distribution facilities throughout the United States. We also operate a single truss manufacturing plant. Our broad geographic presence reduces our exposure to market factors in any single region. During 2011, we completed facility expansions of our operations in Delanco, New Jersey and Detroit, Michigan. In early 2012, we also completed facility expansions in Dallas, Texas and Greenland, New Hampshire.

Sales, Marketing and Distribution

We purchase our building materials from our own manufacturing operations as well as a vendor base of more than 1,000 third-party suppliers ranging from large manufacturers, such as James Hardie Building Products, Trex Company, Louisiana-Pacific and Georgia-Pacific, to small regional producers. We market our building materials primarily to retail lumberyards and home improvement centers that then sell the products to end customers, who are typically professional builders, independent contractors and homeowners engaged in residential construction projects. We also market our products to industrial converters. We believe that our national presence and long-standing relationships with many of our key suppliers allow us to obtain favorable price and term arrangements and offer excellent customer service on top brands in the building materials industry. We also have expertise in special-order sourcing and merchandising support, which is a key service for our home improvement center customers that choose not to stock certain items in inventory.

Each of our distribution centers implements its own distribution and logistics model using centralized information systems. We use internal and external trucking resources to deliver materials on a regularly scheduled basis. Our highly efficient logistics system allows us to deliver superior customer service and assist our customers in optimizing their working capital, which we believe has led to increased market share during the housing downturn.

We have a large decentralized sales force to support our suppliers and customers. Our sales force and product managers have local product knowledge and decision-making authority, which we believe enables them to optimize stocking, pricing and product assortment decisions. Our sales force has access to centralized IT systems, an extensive vendor base and corporate-level working capital support, which we believe complements our localized sales model. Our sales force is compensated, in part, based on branch-level performance.

We regularly evaluate opportunities to introduce new products. Broadening our product offering helps us serve as a one-stop resource for building materials, which we believe improves our customers' purchasing and operating efficiencies. The introduction of new products is primarily driven by customer demand or product extensions originating from our vendors. We believe our long-standing customer relationships allow us to respond to customer feedback and introduce new products more rapidly. Broadening our product offering also helps us drive additional products through our distribution system, thereby increasing our scale and efficiency.

Corporate and Other

Our Corporate and Other segment includes corporate support staff services, related assets and liabilities and foreign exchange gains and losses. These support services include, but are not limited to,

Table of Contents

finance, accounting, legal, information technology and human resource functions. Since the sale of our Paper and Packaging & Newsprint assets in 2008, we have purchased many of these services from Boise Inc. under an Outsourcing Services Agreement, under which Boise Inc. provides a number of corporate staff services to us at cost. See Note 3, "Outsourcing Services Agreement" to our audited consolidated financial statements included elsewhere in this prospectus for more information. Prior to the sale of our Paper and Packaging & Newsprint assets, this segment also included certain rail and truck transportation businesses and related assets.

Customers

We maintain relationships with a broad customer base across multiple market segments and various end markets. Sales to one customer, Home Depot, accounted for 11% of sales for the LTM period. Sales to Home Depot were recorded in our Building Materials Distribution and Wood Products segments. No other single third-party customer accounted for 10% or more of total sales for the LTM period.

Wood Products. Our Building Materials Distribution segment is our Wood Products segment's largest customer, representing approximately 37% of our Wood Products segment's overall sales, including approximately 71% of its EWP sales, for the LTM period. Our third-party customers in this segment include wholesalers, home improvement centers and industrial converters in both domestic and export markets.

Building Materials Distribution. A majority of our sales in this segment were to retail lumberyards and home improvement centers that then sell products to end customers, who are typically professional builders, independent contractors and homeowners engaged in residential construction projects. We also market our products to industrial converters. We believe our broad product line provides our customers with an efficient, one-stop resource for their building materials needs.

Competition

The competitive environment in the U.S. continues to be challenging as new residential and light commercial construction activity and repair and remodel spending remain substantially below average historical levels. Industry capacity in a number of product markets, including those in which we compete, far exceeds the current level of demand. Our products and services compete with similar products manufactured and distributed by others. Many factors influence our competitive position in the markets in which we operate. Those factors include price, service, quality, product selection and convenience of location.

Some of our competitors are larger than we are and have greater financial resources. These resources may afford those competitors greater purchasing power, increased financial flexibility and more capital resources for expansion and improvement.

Wood Products. The wood products manufacturing markets in which we operate are large and highly competitive. There are several major producers of most of our products, including EWP and plywood, as well as numerous local and regional manufacturers. We have leading market positions in the manufacture of EWP, plywood and ponderosa pine lumber. We hold much smaller market positions in our other manufactured products. In the wood products manufacturing markets, we compete primarily on the basis of price, quality and, particularly with respect to EWP, levels of customer service. Most of our competitors are located in the United States and Canada, although we also compete with manufacturers in other countries. Our competition includes not only manufacturers and distributors of similar building products but also manufacturers and distributors of products made from alternative materials, such as steel and plastic. Some of our competitors enjoy strong reputations for product quality and customer service and these competitors may have strong relationships with certain

Table of Contents

distributors, making it more difficult for our products to gain additional market share. Some of our competitors in this segment are also vertically-integrated and/or have access to internal sources of wood fiber, which may allow them to subsidize their base manufacturing business in periods of rising fiber prices.

Building Materials Distribution. The building materials distribution markets in which we operate are highly fragmented and we compete in each of our geographic and product markets with national, regional and local distributors. We also compete with wholesale brokers and buying cooperatives. We compete on the basis of delivered cost, product selection and availability, quality of service and compatibility with customers' needs. We also distribute products for some manufacturers that also engage in direct sales. In recent years, there has been consolidation among retail lumberyards and home improvement centers. As the customer base consolidates, this dynamic could impact our ability to maintain margins. Proximity to customers is an important factor in minimizing shipping costs and facilitating quick order turnaround and on-time delivery. We believe our ability to obtain quality materials, from both internal and external sources, the scale and efficiency of our national footprint and our focus on customer service are our primary competitive advantages in this segment. Also, financial stability is important to suppliers and customers in choosing distributors and allows for more favorable terms on which we are able to obtain our products from our suppliers and sell our products to our customers.

Environmental

We are subject to a wide range of general and industry-specific environmental laws and regulations. In particular, we are affected by laws and regulations covering air emissions, wastewater discharges, solid and hazardous waste management and site remediation. Compliance with these laws and regulations is a significant factor in the operation of our businesses. We believe that we have created a corporate culture of strong compliance by taking a conservative approach to environmental issues in order to assure that we are operating well within the bounds of regulatory requirements. However, we cannot assure that we will be in full compliance with environmental requirements at all times and we cannot assure that we will not incur fines and penalties in the future. In 2011, we paid an insignificant amount of environmental fines and penalties across all of our segments.

We incur capital and operating expenditures to comply with federal, state and local environmental laws and regulations. Failure to comply with these laws and regulations could result in civil or criminal fines or penalties or in enforcement actions. Our failure to comply could also result in governmental or judicial orders that stop or interrupt our operations or require us to take corrective measures, install additional pollution control equipment, or take other remedial actions. During 2011, we spent approximately \$2.4 million on capital expenditures to comply with environmental requirements. We expect to spend a similar amount in 2012 for this purpose.

As an owner and operator of real estate, we may be liable under environmental laws for the cleanup of past and present spills and releases of hazardous or toxic substances on or from our properties and operations. We can be found liable under these laws whether or not we knew of, or were responsible for, the presence of such substances. In some cases, this liability may exceed the value of the property itself.

In connection with the completion of our acquisition of the forest products and paper assets of OfficeMax (the "Forest Products Acquisition"), OfficeMax generally indemnifies us for hazardous substance releases and other environmental violations that occurred prior to the Forest Products Acquisition. However, OfficeMax may not have sufficient funds to fully satisfy its indemnification obligations when required and in some cases, we may not be contractually entitled to indemnification by OfficeMax. See "Certain Relationships and Related Party Transactions Office Max and the Forest Products Acquisition."

Table of Contents

In connection with the sale of our Paper and Packaging & Newsprint assets in 2008, Boise Inc. and its affiliates assumed any and all environmental liabilities arising from our ownership or operation of the assets and businesses sold to them and we believe we are entitled to indemnification by them from third-party claims in the event they fail to fully discharge any such liabilities on the basis of common law rules of indemnification. However, Boise Inc. may not have sufficient funds to discharge its obligations when required or to indemnify us from third-party claims arising out of any such failure.

Climate Change Matters

Various legislative and regulatory proposals to restrict emissions of greenhouse gasses ("GHG"), such as CO₂, are under consideration in Congress, state legislative bodies and the U.S. Environmental Protection Agency ("EPA"). In particular, the EPA has promulgated its Tailoring Rule which directs states having authority to implement the Clean Air Act (which includes all states in which we have significant manufacturing operations) to treat GHG as regulated pollutants under their state implementation plans. The EPA's final rule and its November 2010 implementation guidance do not set specific standards to be utilized in air discharge permits and permits to construct significant new facilities. Generation of this detail has been left to the states. The key states in which our facilities are located (Louisiana, Oregon and Washington) are currently working through the process of incorporating GHG regulations into their state implementation plans. Most of our manufacturing facilities operate boilers or other process equipment that emits GHG. Such regulatory initiatives may require us to modify operating procedures or production levels, incur capital expenditures, change fuel sources, or take other actions that may adversely affect our financial results. However, given the high degree of uncertainty about the ultimate parameters of any such regulatory initiative, it is premature to make any prediction concerning such impacts.

A significant portion of our GHG emissions are from biomass-fired boilers and in July 2011, the EPA issued a final rule that defers, for three years, the applicability of federal New Source Review ("NSR") regulations to biogenic CO₂ emissions. During the three-year deferral period, the EPA will evaluate whether or not to permanently exempt biogenic CO₂ from NSR regulations. States are not required by this regulation to defer biogenic CO₂ emissions from their NSR programs, but so far, states in which we operate have not indicated they will not follow the EPA's deferral. This action leaves considerable uncertainty as to the future regulatory treatment of biomass-generated GHG and the treatment of such GHG in the states in which we operate.

In addition, various government entities have adopted or are considering energy sourcing regulations which subsidize, or mandate consumption of specified percentages of, electrical power generated from nontraditional generating sources, including biomass fuels. These programs may increase our purchased electrical energy costs, create significant new competition for our fiber sources and provide opportunities for alternative uses of our residual fiber, such as sawdust, chips and shavings.

From time to time, legislative bodies and environmental regulatory agencies may promulgate new regulatory programs imposing significant incremental operating costs or capital costs on us. The EPA has recently promulgated a series of four regulations commonly referred to collectively as Boiler MACT, which are intended to regulate the emission of hazardous air pollutants from industrial boilers. At the time it announced the final promulgation of the regulations, the EPA also announced that it planned to reconsider portions of the regulations and has recently taken steps to initiate such reconsideration. In December 2011, the EPA published their re-proposed rules and we are currently evaluating the potential impact of the re-proposed rules on our business. If the Boiler MACT rules are finalized as re-proposed, we believe the new rules would be less costly for us to implement than the current rules. The EPA intends to finalize the new Boiler MACT rules in the second half of 2012. Once final, considerable uncertainty will still exist, as there will likely be legal challenges to the final rules from industry and/or environmental organizations. Notwithstanding that uncertainty, we are proceeding with efforts to analyze the applicability and requirements of the regulations, as recently re-proposed

Table of Contents

and the likely capital and operating costs required to comply. At this time, we cannot accurately forecast the capital or operating cost changes that may result from compliance with the regulations.

Capital Investment

Information concerning our capital expenditures is presented in "Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources Investment Activities" located elsewhere in this prospectus.

Seasonal and Inflationary Influences

We are exposed to fluctuations in quarterly sales volumes and expenses due to seasonal factors. These seasonal factors are common in the building products industry. For further information, see "Management's Discussion and Analysis of Financial Condition and Results of Operations Seasonal and Inflationary Influences."

Properties

Our properties are well-maintained and are suitable for the operations for which they are used. The following is a list of our facilities by segment as of November 1, 2012. We lease office space for our corporate headquarters in Boise, Idaho.

Wood Products

We own all of our Wood Products manufacturing facilities. The following table summarizes our Wood Products facilities as of November 1, 2012:

Facility Type	Number of Facilities	Locations
LVL/I-joist/Laminated beam plants	4	Louisiana, Oregon, Idaho and Canada
Plywood and veneer plants	7	Louisiana(2), Oregon(4) and Washington
Sawmills	5	Oregon(3) and Washington(2)
Particleboard plant	1	Oregon

Table of Contents*Building Materials Distribution*

The following table summarizes our 32 Building Materials Distribution facilities as of November 1, 2012:

Location	Owned or Leased	Approximate Warehouse Square Footage
Phoenix, Arizona	Owned	33,000
Lathrop, California	Leased	164,000
Riverside, California	Leased	162,000
Denver, Colorado	Owned/Leased	203,000
Grand Junction, Colorado	Owned/Leased	97,000
Milton, Florida	Leased	87,000
Orlando, Florida	Owned	144,000
Pompano Beach, Florida	Leased	68,000
Atlanta, Georgia	Leased	155,000
Boise, Idaho	Owned/Leased	108,000
Idaho Falls, Idaho	Owned/Leased	69,000

Spokane, Washington	Owned/Leased	58,000
Vancouver, Washington	Leased	86,000
Woodinville, Washington	Owned/Leased	110,000
Yakima, Washington	Owned/Leased	44,000

(a) Truss manufacturing plant.

Employees

As of September 30, 2012, we had approximately 4,470 employees. Approximately 30% of these employees work pursuant to collective bargaining agreements. As of September 30, 2012, we had ten collective bargaining agreements. On August 22, 2012, we reached agreement on a four year contract covering four Wood Products manufacturing facilities and one Building Materials Distribution location in the Pacific Northwest. The new agreement covering 623 current employees expires on May 31, 2016. We do not have any other union negotiations scheduled for 2012. One agreement, covering 359 employees at our facility in Florien, Louisiana and 262 employees at our facility in Oakdale, Louisiana, is set to expire on July 15, 2013. If we are not able to extend or renew such agreement upon its

Table of Contents

expiration, we could experience a material labor disruption or significantly increased labor costs, which could prevent us from meeting customer demand or reduce our sales and profitability.

Trademarks

We maintain many trademarks for our manufactured wood products, particularly EWP. Our key registered trademarks include BOISE CASCADE® and the TREE-IN-A-CIRCLE® logo, which we believe to be of significant importance to our business.

Legal Matters

We are a party to routine legal proceedings that arise in the ordinary course of our business. We are not currently a party to any legal proceedings or environmental claims that we believe would, individually or in the aggregate, have a material adverse effect on our financial position, results of operations, or cash flows.

Table of Contents**MANAGEMENT****Executive Officers, Key Management and Directors**

Since our formation in October 2004, our business has been managed under the direction of the board of managers of BC Holdings. Prior to the consummation of this offering, the following persons will be appointed to serve in the same capacity with us. Below is a list of names, ages and a brief account of the business experience of our executive officers and key members of management and of the persons to be appointed to serve as our directors prior to the consummation of this offering, each as of November 15, 2012.

Name	Age	Position
Executive Officers:		
Thomas E. Carlile	61	Chief Executive Officer and Director
Wayne M. Rancourt	49	Senior Vice President, Chief Financial Officer and Treasurer
Stanley R. Bell	66	President, Building Materials Distribution
Thomas A. Lovlien	57	President, Wood Products Manufacturing
John T. Sahlberg	59	Senior Vice President, Human Resources and General Counsel
Kelly E. Hibbs	46	Vice President and Controller
Key Management:		
Thomas K. Corrick	57	Senior Vice President, Wood Products Manufacturing
Nick Stokes	55	Senior Vice President, Building Materials Distribution
Dennis R. Huston	60	Vice President of Sales and Marketing, Engineered Wood Products
Daniel G. Hutchinson	60	Vice President of Operations, Wood Products Manufacturing
Directors:		
Duane C. McDougall	60	Director and Chairman of the Board
John W. Madigan	75	Director
Christopher J. McGowan	41	Director
Samuel M. Mencoff	56	Director
Matthew W. Norton	34	Director
Thomas S. Souleles	44	Director

Thomas E. Carlile, Chief Executive Officer and Director

Mr. Carlile became our chief executive officer and a director in August 2009. Mr. Carlile previously served as our executive vice president and chief financial officer from February 2008 to August 2009, following the divestiture of our paper and packaging businesses. From October 2004 to January 2008, he served as senior vice president and chief financial officer. Mr. Carlile received a bachelor's degree in accounting from Boise State University and completed the Stanford Executive Program. Mr. Carlile is a member of the board of directors of FPH. Mr. Carlile's position as our chief executive officer allows him to advise the board of directors on management's perspective over a full range of issues affecting the Company.

Wayne M. Rancourt, Senior Vice President, Chief Financial Officer and Treasurer

Mr. Rancourt became our senior vice president and chief financial officer in August 2009. Mr. Rancourt previously served as our vice president, treasurer and investor relations from February 2008 to August 2009, following the divestiture of our paper and packaging businesses. From October 2004 to January 2008, he served as vice president and treasurer. Mr. Rancourt received a B.S. degree in accounting from Central Washington University.

Table of Contents

Stanley R. Bell, President, Building Materials Distribution

Mr. Bell became our president, Building Materials Distribution, in February 2008, following the divestiture of our paper and packaging businesses. From October 2004 to January 2008, he served as senior vice president, Building Materials Distribution. Mr. Bell received a B.A. in economics from the University of Utah and an M.B.A. from the University of Utah.

Thomas A. Lovlien, President, Wood Products Manufacturing

Mr. Lovlien became our president, Wood Products Manufacturing, in February 2008, following the divestiture of our paper and packaging businesses. From October 2004 to January 2008, he served as senior vice president, Wood Products. Mr. Lovlien received a bachelor's degree in accounting and a master's degree in wood technology from Oregon State University.

John T. Sahlberg, Senior Vice President, Human Resources and General Counsel

Mr. Sahlberg became our senior vice president, Human Resources and General Counsel, effective August 2012. Prior to his election as senior vice president, Human Resources and General Counsel, Mr. Sahlberg served as vice president, Human Resources and General Counsel since January 2011. Prior to that, he served as vice president, Human Resources from February 2008 to January 2011. Prior to that, he served as director of Human Resources from February 2006 to February 2008. From October 2004 through January 2006, he was the director of labor relations. Mr. Sahlberg received a bachelor's degree in economics from Harvard College and a J.D. from Georgetown University. He is a member of the Idaho State Bar.

Kelly E. Hibbs, Vice President and Controller

Mr. Hibbs became our vice president and controller in February 2011. Mr. Hibbs previously served as our director of strategic planning and internal audit from February 2008 to February 2011. From October 2004 to February 2008, he served as manager of financial forecasts and projects. Mr. Hibbs received a B.A. in accounting from Boise State University. He is a certified public accountant.

Thomas K. Corrick, Senior Vice President, Wood Products Manufacturing

Mr. Corrick became our senior vice president, Wood Products Manufacturing, effective July 2012. Prior to his election as senior vice president, Wood Products Manufacturing, Mr. Corrick served as senior vice president, Engineered Wood Products since February 2011. Prior to that, Mr. Corrick served as vice president, Engineered Wood Products, from January 2005 to February 2011. From October 2004 to January 2005, he served as the general manager of Engineered Wood Products. Mr. Corrick received both his bachelor's and master's degrees in business administration from Texas Christian University.

Nick Stokes, Senior Vice President, Building Materials Distribution

Mr. Stokes became our senior vice president, Building Materials Distribution, in February 2011. Mr. Stokes previously served as vice president, Building Materials Distribution, from October 2004 to February 2011. Mr. Stokes received a B.S. in management and a B.S. in marketing from the University of Utah.

Dennis R. Huston, Vice President of Sales and Marketing, Engineered Wood Products

Mr. Huston became our vice president of sales and marketing, Engineered Wood Products, in August 2012. Mr. Huston previously served as sales manager of our Engineered Wood Products from

Table of Contents

1994 until August 2012. Mr. Huston received a bachelor's degree in political science from the University of Dubuque.

Daniel G. Hutchinson, Vice President of Operations, Wood Products Manufacturing

Mr. Hutchinson became our vice president of operations for Wood Products Manufacturing in August 2012. He previously served as general manager of operations for our Engineered Wood Products business from 2008 to August 2012. From 2007 to 2008, he served as our Engineered Wood Products national accounts manager. Mr. Hutchinson received an M.B.A. from Washington State University and bachelor's degrees in accounting and finance from the University of Idaho.

Duane C. McDougall, Chairman of the Board and Director

Mr. McDougall has served as our board chairman since December 2008 and has been a director of the company since 2005. Mr. McDougall also served as our chief executive officer from December 2008 to August 2009. Prior to joining our company, Mr. McDougall was president and chief executive officer of Willamette Industries, an international paper and forest products company, until its sale in 2002. During his 23-year career with Willamette, Mr. McDougall held numerous operating and finance positions before becoming president and chief executive officer of Willamette. Mr. McDougall received a B.S. in accounting from Oregon State University. Mr. McDougall is also a member of the boards of directors of Cascade Corporation, FPH, The Greenbrier Companies and StanCorp Financial Group, Inc. Mr. McDougall was a member of the boards of directors of InFocus Corporation and West Coast Bancorp; he no longer serves on these boards. Mr. McDougall's experience as the CEO of a major forest products company provides our board of directors with valuable insight on operational and industry issues.

John W. Madigan, Director

Mr. Madigan has served as one of our directors since January 2005. In December 2003, Mr. Madigan retired from Tribune Company, where he had served as chairman and chief executive officer since 1996. Tribune Company operates businesses in publishing, interactive media and broadcasting. Mr. Madigan currently serves as an advisor to Madison Dearborn. Mr. Madigan's experience in directing the operations of a major corporation provides our board of directors with perspective on operating issues. Mr. Madigan holds bachelor's and master's degrees in business administration from the University of Michigan. Mr. Madigan is a member of the board of directors of Gilead Sciences, Inc. Mr. Madigan was a member of the boards of directors of Morgan Stanley and AT&T Wireless; he no longer serves on these boards.

Christopher J. McGowan, Director

Mr. McGowan has served as one of our directors since October 2004. In September 2011, he became a general partner of CJM Ventures, L.L.C. and OPTO Holdings, L.P. and in July 2012 became a controlling member of Content Support Company, LLC. In the spring of 2012, Mr. McGowan served as a faculty advisor to The University of Chicago Booth School of Business and currently serves as Entrepreneur in Residence and Senior Advisor there. From 1999 until 2011, he was employed by Madison Dearborn and served as a managing director concentrating on investments in the basic industries sector. Prior to joining Madison Dearborn, Mr. McGowan was with AEA Investors, Inc. and Morgan Stanley & Co. Incorporated. Mr. McGowan received a B.A. from Columbia University and an M.B.A. from the Harvard Graduate School of Business Administration. Mr. McGowan currently serves on the boards of directors of OPTO International, Inc., FPH and Smurfit Kappa Group Ltd. (formerly known as Jefferson Smurfit Group). Mr. McGowan also serves on the board of directors of the University of Chicago Laboratory Schools. He is also a member of Hyde Park Angels and serves on their Portfolio Advisory Board as well as Chairman of the Limited Partner Advisory Committee for

Table of Contents

Hyde Park Venture Partners. Mr. McGowan was a member of the boards of directors of BWAY Holding Company in 2010-2011, the Illinois Venture Capital Association in 2009-2011 and First Wind Partners in 2009; he no longer serves on these boards. Mr. McGowan provides strong finance skills to our board of directors.

Samuel M. Mencoff, Director

Samuel M. Mencoff has served as one of our directors since October 2004. Mr. Mencoff has been employed by Madison Dearborn since 1992 and currently serves as co-CEO. Prior to co-founding Madison Dearborn, Mr. Mencoff was employed by First Chicago Venture Capital for 11 years. Mr. Mencoff has approximately 30 years of experience in private equity investing with a particular focus on investments in the basic industries sector. Mr. Mencoff received an A.B. from Brown University and an M.B.A. from the Harvard Graduate School of Business Administration. Mr. Mencoff is a former member of the board of directors of Great Lakes Dredge & Dock Corporation and he has served on the boards of directors of numerous other public and private companies. He is currently a member of the boards of directors of FPH, Packaging Corporation of America and Smurfit Kappa Group, Ltd. (formerly known as Jefferson Smurfit Group). Mr. Mencoff is also a member of the board of directors of World Business Chicago, a not-for-profit economic development organization based in Chicago, Illinois. Mr. Mencoff provides strong finance skills to our board of directors and valuable experience gained from previous board service.

Matthew W. Norton, Director

Mr. Norton has served as one of our directors since December 2008. Mr. Norton has been employed by Madison Dearborn since 2008 and currently serves as a director. From August 2006 to May 2008, Mr. Norton attended The Wharton School of the University of Pennsylvania. From 2004 to August 2006, he was employed by Madison Dearborn as an associate. From 2001 to 2004, he was employed by Merrill Lynch. Mr. Norton received a B.S. and an M.B.A. from The Wharton School of the University of Pennsylvania. Mr. Norton was also a member of the board of directors of Boise Inc. until January 2010 and he is a current member of the boards of directors of FPH, CoVant Technologies II, LLC and Fieldglass, Inc. Mr. Norton provides strong finance skills to our board of directors.

Thomas S. Souleles, Director

Mr. Souleles has served as one of our directors since October 2004. Mr. Souleles has been employed by Madison Dearborn since 1995 and currently serves as a managing director concentrating on investments in the basic industries sector. Prior to joining Madison Dearborn, Mr. Souleles was with Wasserstein Perella & Co., Inc. Mr. Souleles received an A.B. from Princeton University, a J.D. from Harvard Law School and an M.B.A. from the Harvard Graduate School of Business Administration. Mr. Souleles is also a member of the boards of directors of FPH, Packaging Corporation of America, Schrader International, Inc. and Children's Hospital of Chicago Medical Center and of the board of trustees of the National Multiple Sclerosis Society, Greater Illinois Chapter. Mr. Souleles was a member of the boards of directors of Boise Inc., Magellan GP, LLC, Magellan Midstream Holdings GP, LLC, Great Lakes Dredge & Dock Corporation, US Power Generating Company and BWAY Holding Company; he no longer serves on these boards. Mr. Souleles provides strong finance skills to our board of directors.

We intend to add at least one additional director to our board of directors following this offering.

Controlled Company

For purposes of the NYSE rules, we expect to be a "controlled company." Controlled companies under those rules are companies of which more than 50% of the voting power for the

Table of Contents

election of directors is held by an individual, a group or another company. We expect that BC Holdings, which is controlled by FPH, and ultimately, by a fund managed by Madison Dearborn, will continue to control more than 50% of the combined voting power of our common stock upon completion of this offering and will continue to have the right to designate a majority of the members of our board of directors for nomination for election and the voting power to elect such directors following this offering. Accordingly, we expect to be eligible to, and we intend to, take advantage of certain exemptions from corporate governance requirements provided in the NYSE rules. Specifically, as a controlled company, we would not be required to have (i) a majority of independent directors, (ii) a Nominating/Corporate Governance Committee composed entirely of independent directors, (iii) a Compensation Committee composed entirely of independent directors or (iv) an annual performance evaluation of the Nominating/Corporate Governance and Compensation Committees. Therefore, following this offering if we are able to rely on the "controlled company" exemption, we will not have a majority of independent directors, our Nominating and Corporate Governance and Compensation Committees will not consist entirely of independent directors and such committees will not be subject to annual performance evaluations; accordingly, you will not have the same protections afforded to stockholders of companies that are subject to all of the applicable NYSE rules.

The controlled company exemption does not modify the independence requirements for the audit committee, and we intend to comply with the requirements of the Sarbanes-Oxley Act and the NYSE rules, which require that our audit committee be composed of at least three members, one of whom will be independent upon the listing of our common stock on the NYSE, a majority of whom will be independent within 90 days of the date of this prospectus, and each of whom will be independent within one year of the date of this prospectus.

Board Composition

Our board of directors will initially consist of seven directors. The authorized number of directors may be changed by resolution of our board of directors. Vacancies on our board of directors can be filled by resolution of our board of directors. Upon the completion of this offering, our board of directors will be divided into three classes, each serving staggered, three-year terms:

Our Class I directors will be _____ and _____, and their terms will expire at the first annual meeting of stockholders following the date of this prospectus;

Our Class II directors will be _____ and _____, and their terms will expire at the second annual meeting of stockholders following the date of this prospectus; and

Our Class III directors will be _____, _____ and _____, and their terms will expire at the third annual meeting of stockholders following the date of this prospectus.

As a result, only one class of directors will be elected at each annual meeting of stockholders, with the other classes continuing for the remainder of their respective terms.

In connection with this offering, we will enter into a Director Nomination Agreement with BC Holdings that provides BC Holdings the right to designate nominees for election to our board of directors for so long as BC Holdings owns 10% or more of the total number of shares of common stock outstanding. The number of nominees that BC Holdings is entitled to designate under this agreement will bear the same proportion to the total number of members of our board of directors as the number of shares of common stock beneficially owned by BC Holdings bears to the total number of shares of common stock outstanding, rounded up to the nearest whole number. In addition, BC Holdings shall be entitled to designate the replacement for any of its board designees whose board service terminates prior to the end of the director's term regardless of BC Holdings' beneficial ownership at such time. BC Holdings shall also have the right to have its designees participate on committees of our board of directors proportionate to its stock ownership, subject to compliance with

Table of Contents

applicable law and stock exchange rules. This agreement will terminate at such time as BC Holdings owns less than 10% of our outstanding common stock.

Committees of the Board of Directors

We expect that, immediately following this offering, the standing committees of our board of directors will consist of an Audit Committee, a Compensation Committee and a Corporate Governance and Nominating Committee. Each of the committees will report to the board of directors as they deem appropriate and as the board may request. The expected composition, duties and responsibilities of these committees are set forth below.

Audit Committee

The Audit Committee will be responsible for, among other matters: (1) appointing, retaining and evaluating our independent registered public accounting firm and approving all services to be performed by them; (2) overseeing our independent registered public accounting firm's qualifications, independence and performance; (3) overseeing the financial reporting process and discussing with management and our independent registered public accounting firm the interim and annual financial statements that we file with the SEC; (4) reviewing and monitoring our accounting principles, accounting policies, financial and accounting controls and compliance with legal and regulatory requirements; (5) establishing procedures for the confidential anonymous submission of concerns regarding questionable accounting, internal controls or auditing matters; and (6) reviewing and approving related person transactions.

Immediately following this offering, our Audit Committee will consist of Messrs. Madigan, McGowan and Soules. We believe that Messrs. Madigan and McGowan qualify as independent directors according to the rules and regulations of the SEC with respect to audit committee membership. We expect to add an additional independent directors to our audit committee within one year of the effective date of the registration statement in order to comply with applicable rules and regulations of our stock exchange. We also believe that Mr. McGowan qualifies as our "audit committee financial expert," as such term is defined in Item 401(h) of Regulation S-K. Our board of directors will adopt a written charter for the Audit Committee in connection with this offering, which will be available on our corporate website at www.bc.com upon the completion of this offering. The information on our website is not part of this prospectus.

Compensation Committee

The Compensation Committee will be responsible for, among other matters: (1) reviewing key employee compensation goals, policies, plans and programs; (2) reviewing and approving the compensation of our directors, chief executive officer and other executive officers; (3) reviewing and approving employment agreements and other similar arrangements between us and our executive officers; and (4) administering our stock plans and other incentive compensation plans.

Immediately following this offering, our Compensation Committee will consist of Messrs. , and . Our board of directors will adopt a written charter for the Compensation Committee in connection with this offering, which will be available on our corporate website at www.bc.com upon the completion of this offering. The information on our website is not part of this prospectus.

Corporate Governance and Nominating Committee

Our Corporate Governance and Nominating Committee will be responsible for, among other matters: (1) identifying individuals qualified to become members of our board of directors, consistent with criteria approved by our board of directors; (2) overseeing the organization of our board of directors to discharge the board's duties and responsibilities properly and efficiently; (3) identifying best

Table of Contents

practices and recommending corporate governance principles; and (4) developing and recommending to our board of directors a set of corporate governance guidelines and principles applicable to us.

Immediately following this offering, our Corporate Governance and Nominating Committee will consist of Messrs. _____ and _____. Our board of directors will adopt a written charter for the Corporate Governance and Nominating Committee in connection with this offering, which will be available on our corporate website at www.bc.com upon the completion of this offering. The information on our website is not part of this prospectus.

Compensation Committee Interlocks and Insider Participation

During 2011, no officer or employee served as a member of BC Holdings' Compensation Committee, except for Mr. McDougall, who is employed by the company to act as the chairman of its board of directors. See "Executive Compensation Director Compensation" for a description of Mr. McDougall's employment agreement. None of our executive officers serve as a member of the board of directors or compensation committee of any entity that has one or more executive officers serving on BC Holdings' board of managers or Compensation Committee. Although Mr. Carlile serves as an executive officer and director of FPH, FPH does not compensate its executive officers for serving in such capacity.

Other Committees

Our board of directors may establish other committees as it deems necessary or appropriate from time to time.

Risk Oversight

Our board of directors will oversee the risk management activities designed and implemented by our management. The board of directors will execute its oversight responsibility for risk management both directly and through its committees. The full board of directors will also consider specific risk topics, including risks associated with our strategic plan, business operations and capital structure. In addition, the board of directors will receive detailed regular reports from members of our senior management and other personnel that include assessments and potential mitigation of the risks and exposures involved with their respective areas of responsibility.

Our board of directors will delegate to the audit committee oversight of our risk management process. Our other board committees will also consider and address risk as they perform their respective committee responsibilities. All committees will report to the full board of directors as appropriate, including when a matter rises to the level of a material or enterprise level risk.

Family Relationships

There are no family relationships among any of our executive officers or any of the persons to be nominated as our directors prior to the consummation of this offering.

Code of Ethics

We have adopted a Code of Ethics that applies to all of our employees, including our chief executive officer, chief financial officer and principal accounting officer. Our Code of Ethics is available on our website at www.bc.com by clicking on *About Boise Cascade* and then *Code of Ethics*. If we amend or grant a waiver of one or more of the provisions of our Code of Ethics, we intend to satisfy the requirements under Item 5.05 of Item 8-K regarding the disclosure of amendments to or waivers from provisions of our Code of Ethics that apply to our principal executive officer, financial and accounting officers by posting the required information on our website at the above address. Our website is not part of this prospectus.

Table of Contents

EXECUTIVE COMPENSATION

Compensation Discussion and Analysis

Named Executive Officers

Our Named Executive Officers for 2011 and the positions they held with the company as of December 31, 2011 are:

Thomas E. Carlile Chief Executive Officer
Wayne M. Rancourt Senior Vice President, Chief Financial Officer and Treasurer
Stanley R. Bell President, Building Materials Distribution
Thomas A. Lovlien President, Wood Products Manufacturing
John T. Sahlberg Vice President of Human Resources, General Counsel and Secretary

Throughout this section, the term "Named Executive Officer" is intended to refer to the individuals identified above. The term "Officer" is intended to refer to those persons holding the title of Vice President, Senior Vice President, President, or Chief Executive Officer, all of whom are identified in the section titled "Management."

Summary of Key Events and Drivers

During 2011, the compensation committee engaged Frederic W. Cook & Co. ("Frederic Cook") to undertake a general review of the base and incentive compensation of our Officers. No changes were made in 2011 to Named Executive Officer compensation as a result of the Frederick Cook review and due to the continuing depressed conditions in our product markets. The major compensation events affecting our Named Executive Officers during 2011 were as follows:

1. In February 2011, the compensation committee confirmed the long-term incentive plan ("LTIP") awards for 2010 calculated under the terms of the plan and directed payment of the initial installment of the 2010 awards. In addition, in February 2011, Award Notices for the 2011 iteration of the plan were approved by the committee. In February 2012, the compensation committee confirmed the LTIP awards for 2011 calculated under the terms of the plan, directed payment of the initial installment of the 2011 awards and approved the 2012 Award Notices under the plan.
2. In February 2011, the compensation committee approved award payments to our Named Executive Officers and other participants for amounts earned under our annual, short-term Incentive and Performance Plan ("STIP") for the 2010 plan year. The committee also approved issuance by the company of Award Notices under the plan, which established the criteria for 2011 awards for our Named Executive Officers and other participants in the plan. In February 2012, the committee approved award payments to our Named Executive Officers and other participants for amounts earned under the STIP for the 2011 plan year and approved issuance of Award Notices under the plan, which establish the criteria for 2012 awards to our Named Executive Officers and other participants in the plan.
3. On September 30, 2011, the compensation committee authorized the entry into a three-year retention agreement for Mr. Carlile.

Executive Compensation Program Objective

Our compensation committee's overall objective for our Named Executive Officers' compensation is to establish a package that will:

Provide aggregate compensation that reflects the market compensation for executives with similar responsibilities with due adjustment to reflect the experience, performance and other distinguishing characteristics of specific individuals;

Table of Contents

Align compensation with the company's performance on both a short-term and long-term basis;

Link each Named Executive Officer's compensation to his performance and the areas for which he is responsible;

Attract, motivate, reward and retain the broad-based management talent critical to achieving the company's business goals; and

Align the interests of our Named Executive Officers with those of our equity owners through their ownership of equity interests of the company.

What the Compensation Program Is Designed to Reward

The compensation program as a whole is designed to provide a base level of compensation that will attract and retain the broad-based management talent the compensation committee believes is essential to achieving the company's strategic objectives and to reward, with short-term and long-term compensation, performance by its Named Executive Officers that maintains and creates value for our equity investors. Although we anticipate that the specific details of our executive compensation and benefits may be altered from time to time to reflect economic conditions, changes in the market for executive talent, the company's business strategies and regulatory changes, the overall objective of our compensation and benefits package will remain substantially the same over time.

Use of Market Data to Determine Amount and Allocation of Compensation

The compensation committee believes that an important criterion for the determination of the aggregate value of the company's compensation program and the allocation of such value among the various elements of its compensation plans is market data on the amounts, allocations and structures utilized by similarly situated companies for positions of comparable responsibility.

Management and the compensation committee have historically utilized compensation and benefits surveys to ascertain market levels of aggregate compensation and the allocation of that compensation among specific compensation elements for its Named Executive Officers. Aggregate compensation and each of the major elements (base salary, STIP compensation and LTIP compensation) for the company's Named Executive Officers had been targeted at the 50th percentile of the surveyed companies. However, the specific aggregate compensation (and the allocation thereof among the elements of such total compensation) paid to any of our Named Executive Officers may be below or above the 50th percentile target levels, depending on subjective judgments made by the compensation committee based on factors such as the specific Officer's tenure with the company and in his position, responsibilities that vary from the benchmark position and historical performance in the job. In 2011, the aggregate compensation paid to each of Messrs. Bell and Lovlien was above the 50th percentile target levels in light of their respective years of experience in the positions in which they serve. The aggregate compensation paid to Messrs. Carlile, Sahlberg and Rancourt were at or beneath such 50th percentile target levels in light of their respective experience levels in the positions in which they serve, each of which was less than that of Messrs. Bell and Lovlien.

In 2011, the committee retained the services of Frederic Cook, a compensation consultant, to prepare a comprehensive analysis of the company's compensation packages for its Named Executive Officers and to compare the specific elements of compensation and the aggregate value with a group of peer companies selected by the consultant. The peer companies consisted of Ainsworth Lumber Co.; Associated Materials Incorporated; Beacon Roofing Supply, Inc.; BlueLinx, Inc.; Builders FirstSource, Inc.; Canfor Corporation; Eagle Materials, Inc.; International Forest Products Corporation; Louisiana-Pacific Corporation; Norbord Ltd.; Nortek, Inc.; Ply Gem Holdings, Inc.; Simpson Manufacturing Company, Inc.; Universal Forest Products, Inc.; and West Fraser Timber Co. Ltd. The compensation

Table of Contents

committee used the results of this study, along with the continuing depressed conditions in our product markets, to guide it in determining not to make any changes in Named Executive Officer compensation in 2011.

Executive Compensation Program Elements

The five elements of the company's executive compensation program are:

Base salary;

STIP;

Discretionary bonus awards;

LTIP; and

Other compensation and benefit plans.

Base Salary

The company provides a base salary to Officers to attract and retain talented and experienced individuals to provide management and leadership services to the company.

The committee customarily reviews base salaries for Named Executive Officers annually and at the time of promotions or other changes in responsibilities. Because of the continuing extreme adverse conditions in the company's product markets, the compensation committee has not approved a general wage increase for the Named Executive Officers in the years covered in this filing, but has approved the following changes to reflect promotions: a promotional increase was granted to Mr. Rancourt when he became Senior Vice President, Chief Financial Officer and Treasurer in 2009 and one was granted to Mr. Carlile when he became Chief Executive Officer in 2009. The compensation committee arrived at the base salaries granted Mr. Carlile and Mr. Rancourt on the basis of a comparative analysis of the base salaries accorded their predecessors, along with their relative levels of experience and the current structure of the company, rather than a comprehensive review of new market data.

STIP

The STIP is designed to recognize and reward the contributions that Named Executive Officers and other participants have made to the company's annual performance. The plan does this by linking a portion of the annual cash compensation of each participant to performance measures that are expected to positively affect the company's annual financial performance. We offer this plan to encourage and reward conduct that will lead to better performance of our businesses as measured by the criteria used for determining award amounts. Each individual's participation in the plan, along with the criteria for calculation of the payout to such participant, is established annually by action of our compensation committee and communicated to the participants in a STIP Award Notification (Award Notice). A determination of the amount payable under the plan on account of the year is made by the compensation committee and the resulting payments (Awards) are made to participants.

Table of Contents*2011 STIP Compensation*

For 2011, each of our Named Executive Officers participated in the STIP. The plan provided for Awards to be calculated as a percentage of base salary, based on the extent to which the financial goals and performance objectives were met during the year and on the exercise of the compensation committee's discretion. The 2011 annual incentive Award targets for our Named Executive Officers were as follows:

Officer	Target as a Percentage of Base Salary
Thomas E. Carlile	100%
Wayne M. Rancourt	55%
Stanley R. Bell	55%
Thomas A. Lovlien	55%
John T. Sahlberg	45%

The actual Awards may be less than or greater than the target incentive amounts depending on the achievement of predetermined financial goals and performance objectives and the exercise of the compensation committee's discretion. Awards for each Officer ranges from a threshold of 25% of the target Award through a maximum of 225% of the target Award, depending on financial goals achieved for 2011. The dollar amount of the threshold, target and maximum Award payable to each of our Named Executive Officers is set out in the table found under "Grants of Plan-Based Awards" in this "Executive Compensation" section.

The annual financial goals required for each of our Named Executive Officers under our 2011 STIP were as follows:

Officer	Financial Criteria	Requirement For Threshold Payment \$ or %	Requirement For Target Payment \$ or %	Requirement For Maximum Payment \$ or %
(in millions, except PRONWC)				
Thomas E. Carlile	100% Corporate EBITDA	\$ 5	\$ 40	\$ 125
Wayne M. Rancourt	100% Corporate EBITDA	5	40	125
Stanley R. Bell	25% Corporate EBITDA	5	40	125
	37.5% BMD Division EBITDA	10	25	70
	37.5% BMD Division PRONWC	1.0%	8.8%	23.5%
Thomas A. Lovlien	25% Corporate EBITDA	5	40	125
	75% Wood Products Division EBITDA	10	35	80
John T. Sahlberg	100% Corporate EBITDA	5	40	125

EBITDA means earnings before interest (interest expense and interest income), income taxes and depreciation and amortization at the corporate or division level as indicated in the table above and adjusted in each case for special items. PRONWC means pretax return on net working capital. It is calculated by dividing Building Materials Distribution segment net operating income by the segment's average net working capital reported as of each month-end during a 13-month period running from December 2010 through December 2011, adjusted in each case for special items. The compensation committee believes that EBITDA adjusted for special items represents a financial measure that closely approximates the value delivered by management to the company's equity owners and is a key measure of performance frequently used by the company's debt holders. The compensation committee included

Edgar Filing: BOISE CASCADE, L.L.C. - Form S-1

Table of Contents

PRONWC as a portion of Mr. Bell's performance criteria because it reflects his division's control of its working capital, which is a critical financial measure in our distribution business. In 2011, the Corporate EBITDA, Building Materials Distribution EBITDA and Wood Products EBITDA were \$12.9 million, \$11.6 million and \$15.5 million, respectively, resulting in aggregate payments to each of our Named Executive Officers equal to 42% of target under the STIP for 2011.

At its meeting in February 2012, our compensation committee confirmed the payment to each of our Named Executive Officers of an Award that was calculated in accordance with the plan's metrics. The amounts approved by the committee for payment to each of the Named Executive Officers pursuant to the 2011 plan are reported in the column titled Non-Equity Incentive Plan Compensation in the Summary Compensation Table.

2012 STIP Compensation

At the compensation committee's meeting in February 2012, the committee approved the details of the company's 2012 STIP. No changes were made to the plan document or the methods for calculating the financial criteria to be used in determining each Named Executive Officer's Award under the plan. The annual financial goals required for each of our Named Executive Officers under our 2012 STIP are as follows:

Officer	Financial Criteria	Requirement For Threshold Payment \$ or %	Requirement For Target Payment \$ or %	Requirement For Maximum Payment \$ or %
		(in millions, except PRONWC)		
Thomas E. Carlile	100% Corporate EBITDA	\$ 5	\$ 50	\$ 135
Wayne M. Rancourt	100% Corporate EBITDA	5	50	135
Stanley R. Bell	25% Corporate EBITDA	5	50	135
	37.5% BMD Division EBITDA	10	30	70
	37.5% BMD Division PRONWC	1.0%	11.3%	24.0%
Thomas A. Lovlien	25% Corporate EBITDA	5	50	135
	75% Wood Products Division EBITDA	10	40	90
	100% Corporate EBITDA	5	50	135
John T. Sahlberg	100% Corporate EBITDA	5	50	135

As in past years, the committee reserves broad discretion to adjust the formula payout of the STIP based on its perception of the performance of the company relevant to market conditions prevailing during the plan period, along with other factors it deems relevant, including the company's performance compared with competitors and its ability to bear the cost of the payout. The compensation committee did not exercise any discretion with respect to confirming payments under the STIP for 2011 and approved payments in accordance with the related formula payout for such year.

2011 Bonus Payments

From time to time, the company may elect to grant a discretionary bonus to one or more of the Officers or other employees to recognize and reward exemplary performance providing value to the company that is not recognized by the structure of the company's STIP. These bonus payments are not governed by any formal plan and no Officer has any contractual entitlement or expectation of any such payment. The amount and timing of the grant of any such bonus to Named Executive Officers are determined by the compensation committee at its sole discretion. No ad hoc bonuses were paid to any of our Named Executive Officers as compensation for 2011.

Table of Contents

Long-Term Incentive Compensation (Management Equity Plan and LTIP)

We have two long-term incentive plans that are included in the compensation information for our Named Executive Officers: the Management Equity Plan ("MEP") and the 2010 and 2011 LTIPs. The MEP ended on December 31, 2010, as discussed below and so no Named Executive Officer received any compensation from the plan in 2011.

MEP

Our principal equity owner is a private equity fund managed by Madison Dearborn. Madison Dearborn believes that the senior management of its portfolio companies should hold a personally significant interest in the equity of the portfolio company and maintain that ownership throughout the period of Madison Dearborn's ownership of the portfolio company. The purpose of this requirement is to maintain a close alignment between the interests of Madison Dearborn, as the principal equity owner of the portfolio company and the interests of the company's senior management. The terms of these arrangements are structured uniquely to fit the conditions of each portfolio company, but the overriding philosophy is to encourage investment by key managers in the enterprise so their interests are aligned with those of Madison Dearborn.

Madison Dearborn implemented its management investment philosophy in our case through the creation of the MEP. The compensation committee believes the MEP aligns the interests of the Named Executive Officers and other management investors (the Management Investors) with those of BC Holdings' equity investors. Under the terms of the MEP, each Named Executive Officer has made a personally significant investment in the company. With limited exceptions described below, he or she may be required to maintain that investment or interest for the same term as Madison Dearborn maintains its investment in the company. All references to "Series A equity units", "Series B equity units" or Series C equity units" in this "Executive Compensation" section refer to equity units of BC Holdings, our direct parent company.

Shortly after the completion of our acquisition of the forest products and paper assets of OfficeMax, FPH offered an opportunity to purchase its Series B equity units to each of 171 of the Management Investors. The Series B equity units were priced at \$1.00 per unit, which was the same price paid by Madison Dearborn for its investment in FPH made to fund the acquisition. If a Management Investor elected to purchase Series B equity units (which all of our Named Executive Officers and substantially all of the other offerees elected to do), he or she was also awarded a grant of the FPH Series C equity units. The Series B equity units are the voting common equity units of FPH. The Series C equity units are nonvoting equity units of FPH, which share in the appreciation in the value of FPH only after the holders of the Series B equity units have recovered a specified participation threshold. The participation threshold for Series C equity units issued in 2004 was \$1.00 per outstanding Series B unit.

In 2006 and 2009, an additional award of Series C equity units was made to a limited group of individuals, including two of our directors. The participation threshold of our 2006 and 2009 Series C equity units to the outstanding Series B equity units are \$2.00 and \$1.30, respectively.

As a result of employment terminations due principally to business unit divestitures and retirements, our Series B and Series C management equity units are held by 52 of our key managers (as of January 1, 2012). The number of shares of our common stock in which our Named Executive Officers may be deemed to have a pecuniary interest (based on the number of FPH Series B and Series C equity units currently held by such Named Executive Officers) are disclosed in "Security Ownership by Certain Beneficial Owners and Management" of this prospectus.

The 2004 and 2006 purchases and awards (and the subsequent ownership of the FPH Series B and Series C equity units so purchased or awarded) are governed by a series of Management Equity

Table of Contents

Agreements between FPH, Madison Dearborn and each of the Management Investors, which collectively constitute our MEP.

The MEP contains many of the features typical of an investor rights agreement for a closely held company. The material terms of the MEP are:

The Management Investor is not permitted to sell or otherwise transfer his or her equity units governed by the agreement except in connection with estate planning activities (in which case, the equity units remain subject to the plan) and in connection with implementation of the liquidity features described below.

The Management Investor is required to sell his or her units in connection with a sale of FPH approved by Madison Dearborn and may require that Madison Dearborn cause a purchaser of all or any portion of the FPH equity units held by Madison Dearborn to include in its purchase of Madison Dearborn's equity units the equity units of each of the Management Investors (or the applicable proportion thereof in the case of a purchase of less than all of the FPH equity units) at the same price and on the same terms as are provided to Madison Dearborn (with due allowance for the relevant participation thresholds applicable to Series C equity units).

FPH may, but is not required to, purchase from the Management Investor his or her equity units upon termination of the Management Investor's employment with the company (or service on the board of directors) at a fair market value for all vested equity units and original costs for unvested Series B equity units. No repurchase price is payable as to unvested Series C equity units. The company's current policy is that it does not repurchase the units of a Management Investor who leaves the company except where such repurchase is required of it by the terms of the MEP. A Management Investor may require the company to exercise its option to repurchase his or her equity units upon termination of employment with the company (or service on its board of directors) only if such termination arises from either (i) the death or permanent disability of the Management Investor or (ii) the sale of a division of the company applicable to the Management Investor.

Series B equity units vested over a three to five-year period, which ended on December 31, 2009. With regard to Series C equity units held by Named Executive Officers, 81.45% of those units were subject to a time-vesting requirement, which was fully satisfied on December 31, 2010. The remaining Series C equity units were subject to a performance-vesting formula, satisfaction of which was to be calculated as of December 31, 2010. None of the Series C performance units met their performance-vesting requirements and accordingly, they were all forfeited at year-end 2010. The number of Series B and Series C equity units held by each of our Named Executive Officers is disclosed in "Security Ownership of Certain Beneficial Owners and Management." All such units are now fully vested. In contrast to many public company equity compensation plans, vesting does not, under our plan, necessarily create a liquidity opportunity for the Management Investor. Its only effect is on the valuation formulas that may be used when and if a liquidity event occurs.

LTIP

In October 2009, our compensation committee adopted our LTIP. The terms of the LTIP contemplate the annual grant to participants by the company of an opportunity to earn a cash Award conditioned upon achievement of specified financial goals established by the compensation committee. The plan provides that the identity of participants and the terms under which each year's Award are to be calculated and paid shall be set by the compensation committee and communicated to participants in an Award Notice with the resulting payments to be calculated by the compensation committee once the company's performance against the relevant financial criteria is determined.

Table of Contents

In February 2011, the compensation committee approved Award Notices under the LTIP for a group of the company's senior managers, including each of its Named Executive Officers. The Award Notices enabled each such Officer an opportunity to earn a cash Award determined on the basis of a target percentage of the Officer's base salary (as specified in the Award Notice) and the company's 2011 achievement against corporate EBITDA goals, set forth in the Award Notice. Awards for each Officer ranges from a threshold of 50% of the target Award through a maximum of 200% of the target Award, depending on corporate EBITDA achieved for 2011. Although the amount of the Award was determined on the basis of the company's 2011 financial performance, the resulting Award will be paid in three equal installments, which will be payable no later than March 15, 2012, 2013 and 2014. To earn each installment of the Award, a participant must remain an employee of the company through December 31 of the year preceding the due date of the payment, provided that participants who are retirement eligible and who in fact retire prior to such vesting dates will nonetheless be treated as fully vested in all three installments. If in any plan year the company and its service providers are subject to the provisions of Internal Revenue Code Section 457A, participants who meet the plan's definition of "retirement eligible" will receive an accelerated distribution (the Section 457A Accelerated Payment) equal to 40% of the deferred installments of the Award for such plan year. The purpose of this accelerated payment of a portion of the deferred installments is to enable such participants to pay taxes on the imputed income for the deferred installments, which Internal Revenue Code Section 457A imposes on the deferred installments. Plan participants are retirement-eligible if they are: 1) age 62 or older and have ten years of service or 2) are age 65 or older.

In considering the LTIP and the 2011 Award Notices, the compensation committee recognized that management's ownership of Series B and Series C equity units under the Management Equity Plan will continue to provide an incentive that aligns management's interests with those of the company's equity owners. However, it also recognized that with the expiration of the vesting provisions of that structure, an additional long-term incentive component was required to maintain competitive compensation levels, provide a retention incentive and provide adequate alignment of management's and equityholders' interests.

The target Awards for 2011, expressed as a percentage of base salary, for each of our Named Executive Officers, are disclosed in the table below:

Officer	Target Award as a Percentage of Base Salary
Thomas E. Carlile	100%
Wayne R. Rancourt	50%
Stanley R. Bell	50%
Thomas A. Lovlien	50%
John T. Sahlberg	40%
	98

Table of Contents

The annual financial goals required for each of our Named Executive Officers under our 2011 LTIP were as follows:

Officer	Financial Criteria	Requirement For Threshold Payment \$	Requirement For Target Payment \$	Requirement For Maximum Payment \$
		(in millions)		
Thomas E. Carlile	100% Corporate EBITDA	\$ 10	\$ 50	\$ 130
Wayne M. Rancourt	100% Corporate EBITDA	10	50	130
Stanley R. Bell	100% Corporate EBITDA	10	50	130
Thomas A. Lovlien	100% Corporate EBITDA	10	50	130
John T. Sahlberg	100% Corporate EBITDA	10	50	130

EBITDA means earnings before interest (interest expense and interest income), income taxes and depreciation and amortization as indicated in the table above and adjusted in each case for special items. The compensation committee believes that EBITDA adjusted for special items represents a financial measure that closely approximates the value delivered by management to the company's equity owners and is a key measure of performance frequently used by the company's debt holders. Corporate EBITDA was \$12.9 million in 2011, resulting in aggregate payments to each of our Named Executive Officers equal to 54% of target under the LTIP for such year.

In February 2012, Awards, calculated in accordance with the metrics of the LTIP and the 2011 Award Notices and the company's 2011 financial performance, were confirmed by the compensation committee and payments of initial installments of such 2011 Awards were authorized. In addition, payments of Section 457A Accelerated Payments to two Named Executive Officers who were retirement-eligible were authorized. The amount of such payment authorized for each Named Executive Officer is disclosed in the column titled "Non-Equity Incentive Plan Compensation" in the "Summary Compensation Table" and the explanatory footnote to such column.

2012 LTIP

At the compensation committee's meeting in February 2012, the committee approved the details of the company's 2012 LTIP Award Notices. No changes were made to the plan document or the methods for calculating the financial criteria to be used in determining each Named Executive Officer's Award under the plan. The annual financial goals required for each of our Named Executive Officers under our 2012 LTIP are as follows:

Officer	Financial Criteria	Requirement For Threshold Payment \$	Requirement For Target Payment \$	Requirement For Maximum Payment \$
		(in millions)		
Thomas E. Carlile	100% Corporate EBITDA	\$ 10	\$ 60	\$ 150
Wayne M. Rancourt	100% Corporate EBITDA	10	60	150
Stanley R. Bell	100% Corporate EBITDA	10	60	150
Thomas A. Lovlien	100% Corporate EBITDA	10	60	150
John T. Sahlberg	100% Corporate EBITDA			

Table of Contents

As in past years, the compensation committee reserves broad discretion to adjust the formula payout of the LTIP based on its perception of the performance of the company relevant to market conditions prevailing during the plan period, along with other factors it deems relevant, including the company's performance compared with competitors and its ability to bear the cost of the payout.

Other Compensation and Benefit Plans

The company's Named Executive Officers receive additional compensation in the form of payments, allocations, or accruals under various other compensation and benefit plans. These plans and benefits, which are described below, are provided to ensure that we are providing an aggregate compensation and benefits package that is competitive in the marketplace, thereby ensuring that we can attract and retain the management talent needed to achieve the company's strategic objectives.

Defined Benefit Pension Benefits

We maintain a frozen defined benefit pension plan, referred to as the Salaried Pension Plan ("SPP"), as well as frozen supplemental pension plans for certain salaried employees, including each of the Named Executive Officers.

Our SPP entitles each vested employee to receive an annual pension benefit at normal retirement age equal to 1.25% of the average of the highest five consecutive years of compensation out of the last ten years of employment through December 31, 2009, multiplied by the participant's years of service through December 31, 2003, plus 1% of the average of such benchmark compensation level multiplied by the participant's years of service from December 31, 2003, through December 31, 2009. Under the SPP, "compensation" is defined as the employee's taxable base salary plus any taxable amounts earned under our annual variable incentive compensation programs. Benefits are computed on a straight-line annuity basis and are not offset by Social Security or other retirement-type benefits. An employee is 100% vested in his or her pension benefit after five years of unbroken service. Our compensation committee froze the company's salaried pension plans effective December 31, 2009. Accordingly, no further benefits have been earned under this plan since that date.

If prior to the freezing of the SPP, an employee earned income in excess of the limits provided under the Internal Revenue Code for qualified plans, or if income was deferred under the company's deferred compensation plan and not taxed (and therefore not counted for purposes of the benefit amount calculation under the qualified SPP), the excess benefits will be paid from the company's general assets under our unfunded, nonqualified Supplemental Pension Plan (SUPP). Because the benefit definition in the SUPP is derivative of that contained in the SPP described above, the benefit freeze adopted for the qualified plan at year-end 2009 effected a similar freeze in further benefit accruals as of such date under the SUPP.

Under our unfunded, nonqualified Supplemental Early Retirement Plan ("SERP"), an Officer is eligible for benefits under the plan if he or she: (i) was an Officer of OfficeMax immediately prior to Madison Dearborn's acquisition of the forest products and paper assets from OfficeMax (the Forest Products Acquisition); (ii) is 55 years old or older (or 58 years old or older for Officers elected on or after June 1, 2004 and before October 29, 2004); (iii) has ten or more years of service; (iv) has served as an Officer for at least five full years; and (v) retires before the age of 65. Eligible Officers retiring prior to age 65 receive an early retirement benefit from the SERP which, in combination with their benefit under the SPP and the SUPP, equals the benefit calculated under the SPP and the SUPP without reduction due to the Officer's early retirement. Because the benefit definition in the SERP is derivative of that contained in the SPP described above, the benefit freeze adopted for the qualified plan at year-end 2009 effected a similar freeze in further benefit accruals as of such date under the SERP. Benefits payable under the SERP are offset in part by benefits payable under a similar plan maintained by OfficeMax. Messrs. Carlile and Lovlien are currently eligible for early retirement under

Table of Contents

the SERP. Mr. Rancourt will become eligible for benefits under the SERP when he reaches age 58. Mr. Bell's age permits him to retire with unreduced benefits under our SPP and the SUPP and accordingly, he does not participate in the SERP.

Changes in the aggregate defined benefit pension present values for each of our Named Executive Officers are disclosed in footnote 4 to the "Summary Compensation Table," and the present value of accumulated benefits at December 31, 2011, under each such plan is disclosed with respect to each Named Executive Officer in the table found under the heading "Pension Benefits" in the "Compensation Discussion and Analysis" section.

401(k) Plan

The company maintains a 401(k) defined contribution savings plan for all of its U.S. salaried employees, including its Named Executive Officers. Under the plan, eligible employees electing to participate may contribute up to 50% of their pretax income, subject to Internal Revenue Service (IRS) rules limiting an individual's total contributions and the application of IRS tests designed to ensure that the plan does not discriminate in favor of highly compensated employees.

Since March 1, 2010, the company has provided a contribution to each salaried employee's 401(k) account for each pay period in an amount equal to 4% of the employee's eligible wages (base salary and short-term incentive compensation) for such period. In addition, in years in which the company's EBITDA exceeds specified targets, the company has elected to contribute an additional amount to each employee's 401(k) account as a discretionary contribution, which, for 2012, will be up to 1% of the employee's eligible wages (for an aggregate of up to 5% for 2012), depending on the affected employee's number of service years. Amounts in excess of IRS annual limitations on company contributions to qualified defined contribution retirement plans are paid to participants as taxable cash compensation. All of our Named Executive Officers participate in the plan.

Amounts deferred under this plan by Named Executive Officers are included in the salary disclosure in the "Summary Compensation Table," and amounts contributed to the account of a Named Executive Officer under the plan are included in the "All Other Compensation" disclosure in the "Summary Compensation Table."

Nonqualified Deferred Compensation

Our Deferred Compensation Plan is an unfunded nonqualified defined contribution plan that was closed to further participation on December 31, 2009, as discussed below. Under the plan, participating employees irrevocably elected each year to defer receipt of a portion of their base salary and incentive compensation. A participant's account is credited with imputed interest at a rate equal to 130% of Moody's Composite Average of Yields on Corporate Bonds. Participants may receive payment of their deferred compensation plan balance in a lump sum or in monthly installments over a specified period of years following the termination of their employment with the company. Each of our Named Executive Officers is a participant in our Deferred Compensation Plan.

During 2009, management determined that the Deferred Compensation Plan was affected by the company's status as a disqualified entity under Internal Revenue Code Section 457A. As a result, the committee voted to modify the Deferred Compensation Plan to provide that for so long as the company remains a disqualified entity under Section 457A, no further compensation deferrals will be made under the plan. The company has determined that it remains a disqualified entity for 2011 and has no expectation that such status will change in 2012. As a result, no further compensation was credited by the company to participant accounts during 2011, except for earnings on account balances as they existed on January 1, 2011.

Table of Contents

Amounts deferred under this plan by, or contributed to the account under the plan in years prior to the suspension of deferrals and contributions because of Internal Revenue Code Section 457A, any of our Named Executive Officers are disclosed in the "Summary Compensation Table."

Agreements With and Potential Payments to, Named Executive Officers

The company does not have employment agreements with any of its Named Executive Officers other than the limited agreements described below.

Severance Agreements With Messrs. Carlile, Rancourt, Bell, Lovlien and Sahlberg

Boise Cascade entered into severance agreements with each of its Named Executive Officers in February 2008, including Messrs. Carlile, Rancourt, Bell, Lovlien and Sahlberg to maintain operating continuity in the event of a change of control. The severance agreements are effective for three years, provided that on the second anniversary and each anniversary thereafter, the term of each severance agreement is automatically extended for an additional year unless the company gives 60 days' prior notice stating otherwise. Notice was not given prior to the anniversary date in February 2012. Accordingly, the term of such agreements has now been extended to February 22, 2014. Mr. Sahlberg entered into a new severance agreement in August 2012 in connection with his appointment as our senior vice president, Human Resources and General Counsel in the same month.

The severance agreements provide that in the event of a "qualifying termination" (meaning any termination with the exception of (i) a termination by the company for cause or disability, (ii) a termination by the employee other than for good reason (as described in the severance agreement), or (iii) termination as a result of the employee's death), an employee will be entitled to receive (a) his or her full base salary through the date of termination, a short-term incentive plan payment for the year of termination based on the plan's actual payout for the year and prorated to reflect the portion of the year expired and all other compensation to which he or she is then entitled; (b) a lump-sum severance payment equal to one or two times the sum of such employee's annual base salary plus target annual incentive bonus for the year in which the termination occurs; and (c) a lump-sum amount equal to the value of such employee's unused and accrued time off, less any advanced time off, in accordance with the applicable time off policy as in effect on the termination date. Additionally, the severance agreements provide, in the event of a qualifying termination, for full maintenance of healthcare and insurance benefits for a period of 12 or 18 months following the termination date (subject to payment of required contributions), payment of the premium under the company's Supplemental Life Plan for 12 or 24 months following the termination date and if applicable, receipt of the monthly benefit that such employee would have been entitled to receive under the SERP as if such employee had satisfied the age and service requirements under the SERP as of his or her termination date. The higher levels of severance benefits are generally reserved for those officers at the level of senior vice president and higher (Messrs. Carlile, Rancourt, Bell, Lovlien and Sahlberg).

The severance agreements provide that in the event of a termination that is not a qualifying termination, such employee will be entitled to receive his or her full base salary through the date of termination, plus all other compensation to which he is then entitled. In the event of a failure to perform duties as a result of incapacity due to physical or mental illness or injury, such employee will be entitled to continue to receive his full base salary until such time as his employment is terminated due to disability. No severance payments or continuation of healthcare benefits beyond the date of termination are provided for under such circumstances.

In consideration of the severance payments as described above, each severance agreement contains, with respect to each employee party thereto, confidentiality and nonsolicitation provisions, as well as a provision for general release of all claims against the company and its affiliates, as a condition of payment of benefits under the severance agreement.

Table of Contents

Retention Agreements With Messrs. Bell, Lovlien and Carlile

In August 2009, Boise Cascade entered into Retention Award Agreements with Messrs. Bell and Lovlien to help maintain experienced management during the economic downturn. Each of these agreements provides that the officer may, by maintaining his employment with Boise Cascade, through a specified vesting date, earn a cash award equal to his base salary at the time of vesting of the award. The vesting date specified in the agreements is October 31, 2011 for Mr. Bell and December 31, 2012 for Mr. Lovlien. Each agreement provides that if the individual's employment terminates prior to the vesting date due to death or permanent disability, a prorated award will vest on and be payable within 90 days after such termination and that if employment is terminated due to a sale, merger, reorganization or restructuring of all or part of Boise Cascade or a reduction in force or the sale or closure of the division which such officer heads, or for reasons other than a disciplinary reason, the full amount of the award will vest upon such termination and be payable within 90 days thereafter. Mr. Bell's agreement expired on October 31, 2011 and he was paid under the terms of that agreement, as shown in the "Bonus" column in the "Summary Compensation Table" of this section.

In September 2011, Boise Cascade entered into a three-year Retention Award Agreement with Mr. Carlile to create an additional economic incentive for Mr. Carlile to remain our Chief Executive Officer and to help provide for an orderly leadership transition at a later date. The terms of Mr. Carlile's agreement were the same as the October 2009 retention agreements detailed above, with the exceptions that Mr. Carlile's agreement runs through September 30, 2014 and the agreement provides he receive an additional payment equal to his average STIP payouts over the three years prior to the vesting date of the agreement.

Salaried Employee Life Insurance Plan and Supplemental Life Plan

The company maintains two plans under which company-paid life insurance is made available to its Officers. Under its Salaried Employee Life Insurance Plan, the company provides, at its expense during each salaried employee's period of employment, life insurance in an amount equal to the employee's base salary. Messrs. Rancourt and Sahlberg participate in this plan.

Messrs. Carlile, Bell and Lovlien participate in our Officers' Supplemental Life Plan, under which a company-paid life insurance benefit during employment is provided in an amount equal to two times the Officer's base salary. The plan also provides a postretirement life insurance benefit for such Officers equal to one times their final base salary (less any amount payable under the company's paid group term life insurance program).

Amounts paid by the company for the coverage provided to each of our Named Executive Officers is reported in the column titled "All Other Compensation" in the "Summary Compensation Table."

2013 Equity Incentive Plan

In connection with this offering, we expect to adopt the 2013 Equity Incentive Plan. The 2013 Equity Incentive Plan is expected to provide for grants of stock options, stock appreciation rights, restricted stock, other stock-based awards and other cash-based compensation. Directors, officers and other employees of us and our subsidiaries, as well as others performing consulting or advisory services for us, will be eligible for grants under the 2013 Equity Incentive Plan. The purpose of the 2013 Equity Incentive Plan will be to provide incentives that will attract, retain and motivate high-performing officers, directors, employees and consultants by providing them a proprietary interest in our long-term success or compensation based on their performance in fulfilling their responsibilities to our company. This summary may not include all of the provisions of the 2013 Equity Incentive Plan. For further information about the 2013 Equity Incentive Plan, we refer you to the complete copy of the 2013 Equity Incentive Plan, which we will file as an exhibit to the registration statement.

Table of Contents

Administration. The 2013 Equity Incentive Plan will be administered by a committee designated by our board of directors. Among the committee's powers will be to (i) determine the form, amount and other terms and conditions of awards; (ii) clarify, construe or resolve any ambiguity in any provision of the 2013 Equity Incentive Plan or any award agreement; (iii) amend the terms of outstanding awards; and (iv) adopt such rules, forms, instruments and guidelines for administering the 2013 Equity Incentive Plan as it deems necessary or proper. The committee will have full authority to administer and interpret the 2013 Equity Incentive Plan, to grant discretionary awards under the 2013 Equity Incentive Plan, to determine the persons to whom awards will be granted, to determine the types of awards to be granted, to determine the terms and conditions of each award, to determine the number of shares of common stock to be covered by each award, to make all other determinations in connection with the 2013 Equity Incentive Plan and the awards thereunder as the committee deems necessary or desirable and to delegate authority under the 2013 Equity Incentive Plan to our executive officers.

Available Shares. The aggregate number of shares of common stock which may be issued or used for reference purposes under the 2013 Equity Incentive Plan or with respect to which awards may be granted may not exceed _____ shares. The number of shares available for issuance under the 2013 Equity Incentive Plan may be subject to adjustment in the event of a reorganization, stock split, merger or similar change in the corporate structure or the number of outstanding shares of our common stock. In the event of any of these occurrences, we may make any adjustments we consider appropriate to, among other things, the number and kind of shares, options or other property available for issuance under the plan or covered by grants previously made under the plan. The shares available for issuance under the plan may be, in whole or in part, either authorized and unissued shares of our common stock or shares of common stock held in or acquired for our treasury. In general, if awards under the 2013 Equity Incentive Plan are for any reason cancelled, or expire or terminate unexercised, the shares covered by such awards may again be available for the grant of awards under the 2013 Equity Incentive Plan.

Eligibility for Participation. Members of our board of directors, as well as employees of, and consultants to, us or any of our subsidiaries and affiliates will be eligible to receive awards under the 2013 Equity Incentive Plan.

Award Agreement. Awards granted under the 2013 Equity Incentive Plan will be evidenced by award agreements, which need not be identical, that provide additional terms, conditions, restrictions or limitations covering the grant of the award, including, without limitation, additional terms providing for the acceleration of exercisability or vesting of awards in the event of a change of control or conditions regarding the participant's employment, as determined by the committee.

Stock Options. The committee may grant nonqualified stock options to any individuals eligible to participate in the 2013 Equity Incentive Plan and incentive stock options to purchase shares of our common stock only to eligible employees. The committee will determine the number of shares of our common stock subject to each option, the term of each option, which may not exceed ten years, or five years in the case of an incentive stock option granted to a 10% or greater stockholder, the exercise price, the vesting schedule, if any, and the other material terms of each option. No incentive stock option or nonqualified stock option may have an exercise price less than the fair market value of a share of our common stock at the time of grant or, in the case of an incentive stock option granted to a 10% or greater stockholder, 110% of such share's fair market value. Options will be exercisable at such time or times and subject to such terms and conditions as determined by the committee at grant and the exercisability of such options may be accelerated by the committee.

Stock Appreciation Rights. The committee may grant stock appreciation rights, or "SARs," either with a stock option, which may be exercised only at such times and to the extent the related option is exercisable, or "Tandem SAR," or independent of a stock option, or "Non-Tandem SAR." A

Table of Contents

SAR is a right to receive a payment in shares of our common stock or cash, as determined by the committee, equal in value to the excess of the fair market value of one share of our common stock on the date of exercise over the exercise price per share established in connection with the grant of the SAR. The term of each SAR may not exceed ten years. The exercise price per share covered by an SAR will be the exercise price per share of the related option in the case of a Tandem SAR and will be the fair market value of our common stock on the date of grant in the case of a Non-Tandem SAR. The committee may also grant limited SARs, either as Tandem SARs or Non-Tandem SARs, which may become exercisable only upon the occurrence of a change in control, as defined in the 2013 Incentive Plan, or such other event as the committee may designate at the time of grant or thereafter.

Restricted Stock. The committee may award shares of restricted stock. Except as otherwise provided by the committee upon the award of restricted stock, the recipient generally will have the rights of a stockholder with respect to the shares, including the right to receive dividends, the right to vote the shares of restricted stock and, conditioned upon full vesting of shares of restricted stock, the right to tender such shares, subject to the conditions and restrictions generally applicable to restricted stock or specifically set forth in the recipient's restricted stock agreement. The committee may determine at the time of award that the payment of dividends, if any, will be deferred until the expiration of the applicable restriction period. Recipients of restricted stock will be required to enter into a restricted stock agreement with us that states the restrictions to which the shares are subject, which may include satisfaction of pre-established performance goals, and the criteria or date or dates on which such restrictions will lapse. If the grant of restricted stock or the lapse of the relevant restrictions is based on the attainment of performance goals, the committee will establish for each recipient the applicable performance goals, formulae or standards and the applicable vesting percentages with reference to the attainment of such goals or satisfaction of such formulae or standards while the outcome of the performance goals are substantially uncertain. Such performance goals may incorporate provisions for disregarding, or adjusting for, changes in accounting methods, corporate transactions, including, without limitation, dispositions and acquisitions, and other similar events or circumstances. Section 162(m) of the Internal Revenue Code requires that performance awards be based upon objective performance measures. The performance goals for performance-based restricted stock will be based on one or more of the objective criteria discussed in general below.

Other Stock-Based Awards. The committee may, subject to limitations under applicable law, make a grant of such other stock-based awards, including, without limitation, performance units, dividend equivalent units, stock equivalent units, restricted stock and deferred stock units under the 2013 Equity Incentive Plan that are payable in cash or denominated or payable in or valued by shares of our common stock or factors that influence the value of such shares. The committee may determine the terms and conditions of any such other awards, which may include the achievement of certain minimum performance goals for purposes of compliance with Section 162(m) of the Code and a minimum vesting period. The performance goals for performance-based other stock-based awards will be based on one or more of the objective criteria discussed in general below.

Other Cash-Based Awards. The committee may grant awards payable in cash. Cash-based awards shall be in such form, and dependent on such conditions, as the committee shall determine, including, without limitation, being subject to the satisfaction of vesting conditions or awarded purely as a bonus and not subject to restrictions or conditions. If a cash-based award is subject to vesting conditions, the committee may accelerate the vesting of such award in its discretion.

Performance Awards. The committee may grant a performance award to a participant payable upon the attainment of specific performance goals. The committee may grant performance awards that are intended to qualify as performance-based compensation under Section 162(m) of the Code as well as performance awards that are not intended to qualify as performance-based compensation under Section 162(m) of the Code. If the performance award is payable in cash, it may be paid upon the

Table of Contents

attainment of the relevant performance goals either in cash or in shares of restricted stock, based on the then current fair market value of such shares, as determined by the committee. Based on service, performance or other factors or criteria, the committee may, at or after grant, accelerate the vesting of all or any part of any performance award.

Performance Goals. The committee may grant awards of restricted stock, performance awards, and other stock-based awards that are intended to qualify as performance-based compensation for purposes of Section 162(m) of the Code. These awards may be granted, vest and be paid based on attainment of specified performance goals established by the committee. These performance goals may be based on the attainment of a certain target level of, or a specified increase or decrease in, one or more of the following measures selected by the committee: (1) earnings per share; (2) operating income; (3) gross income; (4) net income, before or after taxes; (5) cash flow; (6) gross profit; (7) gross profit return on investment; (8) gross margin return on investment; (9) gross margin; (10) operating margin; (11) working capital; (12) earnings before interest and taxes; (13) earnings before interest, tax, depreciation and amortization; (14) return on equity; (15) return on assets; (16) return on capital; (17) return on invested capital; (18) net revenues; (19) gross revenues; (20) revenue growth, as to either gross or net revenues; (21) annual recurring net or gross revenues; (22) recurring net or gross revenues; (23) license revenues; (24) sales or market share; (25) total shareholder return; (26) economic value added; (27) specified objectives with regard to limiting the level of increase in all or a portion of our bank debt or other long-term or short-term public or private debt or other similar financial obligations, which may be calculated net of cash balances and other offsets and adjustments as may be established by the committee; (28) the fair market value of the a share of common stock; (29) the growth in the value of an investment in the common stock assuming the reinvestment of dividends; (30) reduction in operating expenses or (31) other objective criteria determined by the committee in accordance with the 2013 Equity Incentive Plan.

To the extent permitted by law, the committee may also exclude the impact of an event or occurrence which the committee determines should be appropriately excluded, such as (1) restructurings, discontinued operations, extraordinary items and other unusual or non-recurring charges; (2) an event either not directly related to our operations or not within the reasonable control of management; or (3) a change in accounting standards required by generally accepted accounting principles. Performance goals may also be based on an individual participant's performance goals, as determined by the committee. In addition, all performance goals may be based upon the attainment of specified levels of our performance, or the performance of a subsidiary, division or other operational unit, under one or more of the measures described above relative to the performance of other corporations. The committee may designate additional business criteria on which the performance goals may be based or adjust, modify or amend those criteria.

Change in Control. In connection with a change in control, as will be defined in the 2013 Equity Incentive Plan, the committee may accelerate vesting of outstanding awards under the 2013 Equity Incentive Plan. In addition, such awards may be, in the discretion of the committee, (1) assumed and continued or substituted in accordance with applicable law; (2) purchased by us for an amount equal to the excess of the price of a share of our common stock paid in a change in control over the exercise price of the awards; or (3) cancelled if the price of a share of our common stock paid in a change in control is less than the exercise price of the award. The committee may also provide for accelerated vesting or lapse of restrictions of an award at any time.

Stockholder Rights. Except as otherwise provided in the applicable award agreement, and with respect to an award of restricted stock, a participant will have no rights as a stockholder with respect to shares of our common stock covered by any award until the participant becomes the record holder of such shares.

Table of Contents

Amendment and Termination. Notwithstanding any other provision of the 2013 Equity Incentive Plan, our board of directors may at any time amend any or all of the provisions of the 2013 Equity Incentive Plan, or suspend or terminate it entirely, retroactively or otherwise; provided, however, that, unless otherwise required by law or specifically provided in the 2013 Equity Incentive Plan, the rights of a participant with respect to awards granted prior to such amendment, suspension or termination may not be adversely affected without the consent of such participant.

Transferability. Awards granted under the 2013 Equity Incentive Plan generally will be nontransferable, other than by will or the laws of descent and distribution, except that the committee may provide for the transferability of nonqualified stock options at the time of grant or thereafter to certain family members.

Recoupment of Awards. The 2013 Equity Incentive Plan will provide that awards granted under the 2013 Equity Incentive Plan are subject to any recoupment policy we may have regarding the clawback of "incentive-based compensation" under the Exchange Act or under any applicable rules and regulations promulgated by the SEC.

Effective Date. We expect that the 2013 Equity Incentive Plan will be adopted in connection with the completion of this offering.

Summary Compensation Table

The following table presents compensation information for Messrs. Carlile, Rancourt, Bell, Lovlien and Sahlberg for 2011, 2010 and 2009, to the extent each of them served as one of our Named Executive Officers during each of such years:

Name and Principal Position	Year	Salary \$(1)	Bonus (\$)	Non-Equity Incentive Plan Compensation \$(3)	Change in Pension Value and Nonqualified Deferred Compensation Earnings \$(4)	All Other Compensation \$(5)	Total (\$)
Thomas E. Carlile Chief Executive Officer	2011	\$ 700,000	\$	\$ 577,500	\$ 325,949	\$ 88,676	\$ 1,692,125
	2010	700,000		1,060,500	134,104	49,218	1,943,822
	2009	550,000			210,543	28,901	789,444
Wayne M. Rancourt Senior Vice President, Chief Financial Officer and Treasurer	2011	350,000		151,725	201,587	24,734	728,046
	2010	350,000		287,700	97,789	13,464	748,953
	2009	303,125			136,135	8,415	447,675
Stanley R. Bell President, Building Materials Distribution	2011	420,000	420,000(2)	194,828	173,524	37,199	1,245,551
	2010	420,000		326,954	53,570	29,462	829,986
	2009	420,000		163,505	136,941	45,041	765,487
Thomas A. Lovlien President, Wood Products Manufacturing	2011	420,000		182,070	260,721	46,156	908,947
	2010	420,000		428,400	185,453	30,928	1,064,781
	2009	420,000			239,331	28,847	688,178
John T. Sahlberg Vice President, Human Resource and General Counsel	2011	300,000		105,300	142,520	35,786	583,606

(1) Includes amounts deferred under our savings plan and, in 2009, our Deferred Compensation Plan. See "401(k) Plan" and "Nonqualified Deferred Compensation" under "Other Compensation and Benefit Plans" in the "Compensation Discussion and Analysis" for a description of these plans.

(2) Represents the payout of Mr. Bell's Retention Agreement.

(3) Represents total of (i) payments of Awards under our STIP for each year reported on and (ii) payments of Awards under our 2010 and 2011 LTIPs. The specific financial goals and performance objectives at corporate and business unit

Edgar Filing: BOISE CASCADE, L.L.C. - Form S-1

Table of Contents

levels of the STIP and the LTIP are described under "STIP" and "Long-Term Incentive Compensation (Management Equity Plan and LTIP)" in the "Compensation Discussion and Analysis." The amounts reported in this column include amounts deferred under our savings plan and, in 2009, Deferred Compensation Plan. See "401(k) Plan" and "Nonqualified Deferred Compensation" under "Other Compensation and Benefit Plans" in the "Compensation Discussion and Analysis" for a description of these plans.

The Awards paid or to be paid to each of the Named Executive Officers for 2011 under the two plans covered by this column were as follows:

Name	STIP	LTIP(a)
Thomas E. Carlile	\$ 294,000	\$ 283,500
Wayne M. Rancourt	80,850	70,875
Stanley R. Bell	81,428	113,400
Thomas A. Lovlien	97,020	85,050
John T. Sahlberg	56,700	48,600

(a)

Under the terms of the 2011 LTIP, participants were paid only one-third of the 2011 Award in 2012, with the balance of the Award to be paid in equal installments by March 15 of 2013 and 2014, if they meet a vesting requirement that requires them to remain employed through the end of 2012 and 2013. Amounts awarded for 2010 and 2011 to Mr. Bell were not subject to the delayed vesting requirement because he met the requirements for retirement-eligible status under the plan. Consequently, Mr. Bell's total LTIP award for 2011 is reflected in the column. See the description of the plan under "Long-Term Incentive Compensation (Management Equity Plan and LTIP)" of the "Compensation Discussion and Analysis."

(4)

Amounts disclosed in this column include the following:

Name	Year	Change in Pension Value(a)	Nonqualified Deferred Compensation Earnings(b)
Thomas E. Carlile	2011	\$ 318,365	\$ 7,584
	2010	126,683	7,421
	2009	199,065	11,478
Wayne M. Rancourt	2011	197,498	4,089
	2010	93,788	4,001
	2009	129,962	6,173
Stanley R. Bell	2011	156,995	16,529
	2010	37,396	16,174
	2009	112,840	24,101
Thomas A. Lovlien	2011	251,962	8,759
	2010	176,882	8,571
	2009	226,186	13,145
John T. Sahlberg	2011	136,744	5,776

(a)

Pension benefits for officers are frozen and no additional benefits are being earned. The changes reported in this column reflect the changes in actuarial assumptions that increase the present value of their benefits under all pension plans established by the company using interest rate and mortality rate assumptions consistent with those used in the company's financial statements, including amounts which were distributed to such Officers during 2009 pursuant to amendments made to the SUPP and the SERP, which provided for distribution in December 2009 of amounts earned by participants in the SUPP and the SERP during 2009 to the extent such amounts were taxable pursuant to Internal Revenue Code Section 457A.

(b)

The amounts reported in this column reflect the above-market portion of the interest earned on deferred compensation during the years in which they were Named Executive Officers. A portion of such above-market interest earned in 2009 was distributed to such Officers pursuant to amendments made to the Deferred Compensation Plan, which provided for distribution in December 2009 of amounts earned by

Edgar Filing: BOISE CASCADE, L.L.C. - Form S-1

Table of Contents

participants in the plan during 2009 to the extent such amounts were taxable pursuant to Internal Revenue Code Section 457A:

Name	Above-Market Earnings Refunded in 2009
Thomas E. Carlile	\$ 1,028
Wayne M. Rancourt	572
Stanley R. Bell	1,327
Thomas A. Lovlien	1,076

For more information concerning the pension plans and deferred compensation plans in which our Named Executive Officers participate, see "Defined Benefit Pension Benefits" and "Nonqualified Deferred Compensation" under "Other Compensation and Benefits Plans" in "Compensation Discussion and Analysis."

(5)

Amounts disclosed in this column include the following:

Name	Year	Company Contributions to Savings Plans(a)	Company-Paid Portion of Executive Officer Life Insurance(b)	Reportable Perquisites(c)	Tax Reimbursements, Gross-Ups and Other(d)
Thomas E. Carlile	2011	\$ 62,774	\$ 21,240	\$	\$ 4,662
Wayne M. Rancourt	2011	23,260	836		638
Stanley R. Bell	2011	25,500	10,564		1,135
Thomas A. Lovlien	2011	31,238	13,962		956
John T. Sahlberg	2011	18,997	1,529	20,652	51

(a)

See "401(k) Plan" under "Other Compensation and Benefit Plans" in "Compensation Discussion and Analysis" for a description of this plan. Amounts included in the contributions reported in this column that exceeded IRS annual limitations on company contributions to qualified defined contribution retirement plans were paid to the Named Executive Officer as taxable cash compensation.

(b)

See "Salaried Employee Life Insurance Plan and Supplemental Life Plan" under "Other Compensation and Benefit Plans" in "Compensation Discussion and Analysis" for a description of the company-paid life insurance plans under which these costs were incurred.

(c)

The company's costs for various perquisites provided to our Named Executive Officers are not reflected if they were less than \$10,000 in total. Mr. Sahlberg was given an Excellence Award, as well as a club membership.

(d)

The company provides a tax gross-up on the actual amount of the \$5,000 annual allowance for tax advice and planning.

Grants of Plan-Based Awards

Equity Awards

None of our Named Executive Officers received a grant of equity interests during 2011.

Table of Contents*Non-Equity Awards*

2011 LTIP(2)	2/23/2011	3/31/2011	60,000	120,000	240,000

(1)

Reflects the potential threshold, target and maximum incentive Awards for the Named Executive Officers possible for 2011 under our STIP. For further information on the terms of these incentive Awards, refer to "STIP" and "Long-Term Incentive Compensation (Management Equity Plan and LTIP)" in "Compensation Discussion and Analysis." The Named Executive Officers' actual incentive Awards earned in 2011 are disclosed in footnote 3 to the "Non-equity Incentive Plan Compensation" column of the "Summary Compensation Table." All Awards earned under this plan were paid in February 2012.

(2)

Reflects the potential threshold, target and maximum incentive Awards for the Named Executive Officers possible for 2011 under our 2011 LTIP. For further information on the terms of these incentive Awards, refer to "Long-Term Incentive Compensation (Management Equity Plan and LTIP)" in "Compensation Discussion and Analysis." The Named Executive Officers' actual incentive Awards earned in 2011 under this Plan are disclosed in footnote 3 to the "Non-Equity Incentive Plan Compensation" column of the "Summary Compensation Table." One-third of each Award earned under this plan for 2011 was paid in February 2012. The right to each of the two remaining one-third installments of such Awards will vest at year-end 2012 and year-end 2013 if the participant receiving the Award remains employed by the company through such date. Such deferred installments will be payable on or before March 15, 2013 and March 15, 2014, respectively. In addition, Mr. Bell was retirement-eligible under the terms of the plan and, accordingly, was fully vested in his Award at year-end 2011. The plan provided for an accelerated payment to him of 40% of the deferred installments of the Award, which was paid to him concurrently with the first installment of his Award. One-half of this additional current payment will be offset against each of the deferred installments when they become due. See the description of this plan in "LTIP" in "Long-Term Incentive Compensation (Management Equity Plan and LTIP)" in "Compensation Discussion and Analysis."

Table of Contents**Outstanding Equity Awards at Fiscal Year-End**

All outstanding equity awards held by our Named Executive Officers were fully vested as of year-end and no further grants of equity awards were made during 2011. For further information concerning the operation of our Management Equity Plan, see "MEP" in "Long-Term Incentive Compensation (Management Equity Plan and LTIP)" in "Compensation Discussion and Analysis."

Options Exercised and Stock Vested

No MEP shares vested in 2011.

Pension Benefits

Pension benefits for officers are frozen and no additional benefits are being earned. The following table reflects the present value of accumulated benefits payable to Messrs. Carlile, Rancourt, Bell, Lovlien and Sahlberg, including the number of years of service credited to each of them under our defined benefit pension plans. No amounts were distributed to any of them during 2011 under the SPP, the SUPP and the SERP. Mr. Sahlberg and Mr. Bell do not participate in the SERP. For more information concerning our pension plans, see "Defined Benefit Pension Benefits" under "Other Compensation and Benefit Plans" in "Compensation Discussion and Analysis."

Name	Plan Name	Number of Years Credited Service (#)(1)	Present Value of Accumulated Benefit \$(2)
Thomas E. Carlile	Salaried Pension Plan	37	\$ 1,527,098
	SUPP	37	1,280,093
	SERP	37	530,860
Wayne M. Rancourt	Salaried Pension Plan	25	442,467
	SUPP	25	145,509
	SERP	25	263,289
Stanley R. Bell	Salaried Pension Plan	39	1,975,505
	SUPP	39	1,388,393
Thomas A. Lovlien	Salaried Pension Plan	31	853,301
	SUPP	31	639,463
	SERP	31	726,300
John T. Sahlberg	Salaried Pension Plan	27	825,541
	SUPP	27	158,044

(1) Number of years credited service for Messrs. Carlile, Rancourt, Bell, Lovlien and Sahlberg include amounts attributable to employment with OfficeMax prior to the Forest Products acquisition.

(2) These values were calculated on the same basis and using the same assumptions used in the company's financial statements except that the assumed retirement age for Messrs. Carlile, Rancourt and Lovlien were the later of their current age or the earliest age at which they could qualify for retirement under the SERP. See Note 11, "Retirement and Benefit Plans," to our audited consolidated financial statements included elsewhere in this prospectus.

Table of Contents**Nonqualified Deferred Compensation**

Due to the application of Internal Revenue Code Section 457A to the company during 2011, no deferrals were made under the plan and no company contributions were made to the plan during the year. Earnings on preexisting plan balances continued to accrue during 2011 in accordance with the terms of the plan. No withdrawals or distributions were made from the plan by any of our Named Executive Officers during 2011. Aggregate earnings and year-end plan balances for each of our Named Executive Officers are disclosed in the table below:

Name	Aggregate Earnings in Last FY \$(1)	Aggregate Balance at FYE (\$)
Thomas E. Carlile	\$ 23,656	\$ 374,915
Wayne M. Rancourt	12,753	202,111
Stanley R. Bell	51,554	817,055
Thomas A. Lovlien	27,321	432,997
John T. Sahlberg	18,051	264,803

(1) The above-market portion of these amounts is included in the 2011 "Change in Pension Value and Nonqualified Deferred Compensation Earnings" column of the "Summary Compensation Table."

For more information concerning our nonqualified deferred compensation plan, see "Nonqualified Deferred Compensation" under "Other Compensation and Benefit Plans" in "Compensation Discussion and Analysis."

Potential Payments Upon Termination or Change in Control

The following tables reflect an estimate of the compensation the company would have been required to pay to each of its Named Executive Officers under the compensation plans, contracts, agreements and arrangements between each such individual and the company for:

Voluntary termination with good reason;

A change in control without adoption of a replacement plan;

Involuntary termination without cause;

For cause termination or voluntary termination without good reason;

Termination as a result of sale of a division;

Death; or

Disability

The amounts shown assume that such termination or change in control was effective as of December 31, 2011. The actual amounts the company would have been required to pay on other dates may only be determined at the time of separation from the company or the change in

Edgar Filing: BOISE CASCADE, L.L.C. - Form S-1

control and will accordingly vary from those disclosed here, which are based on a hypothetical December 31, 2011, termination. Our paid vacation is earned on a current basis ratably throughout each payroll year. Earned and unused amounts at year-end are forfeited to the extent they exceed a maximum permitted carry-over of 80 hours. The amounts disclosed here do not include amounts earned by the Named Executive Officer through that time as base salary, any bonuses approved by the compensation committee prior to that date and payments earned prior to that date as 2011 Awards earned pursuant

Table of Contents

to our STIP or current installments of 2011 Awards under our 2011 LTIP because neither their amount nor the timing of their payment is affected by the fact or the nature of the termination of employment. In addition, the disclosure does not include amounts payable pursuant to the 401(k), deferred compensation, or pension plans, which are disclosed elsewhere in this "Executive Compensation" section. Disclosure of amounts earned during 2011 as base salary, bonuses and Awards under the 2011 STIP may be found in the "Summary Compensation Table." Pension benefits and deferred compensation arrangements are described under the headings "Pension Benefits" and "Nonqualified Deferred Compensation" of this "Executive Compensation" section, respectively. The amounts disclosed do include future installments of Awards earned under the 2011 LTIP, to the extent vesting of such future installments is accelerated by the circumstances of the termination.

The availability of severance payments and continued healthcare and insurance benefits beyond termination of employment is contractually conditioned for each of our Named Executive Officers on their provision to the company of a release of claims arising from their employment and the termination thereof and their performance of contractual confidentiality, nonsolicitation and nondisparagement obligations contained in their employment or severance agreements with the company as well as payment of applicable contributions for healthcare and insurance benefits. The payments described in the tables and textual materials that follow are provided for, with respect to Messrs. Lovlien and Carlile, by the terms of their Severance Agreements and their Retention Award Agreements with the company; with respect to Messrs. Bell, Rancourt and Sahlberg, by their Severance Agreements with the company; and for all such Named Executive Officers, by the terms of the Management Equity Plan and the LTIP. For a description of these contractual arrangements, see "Long-Term Incentive Compensation (Management Equity Plan and LTIP) and "Agreements With and Potential Payments to, Named Executive Officers" in "Compensation Discussion and Analysis."

Table of Contents**Thomas E. Carlile**

Director Compensation*Overview*

Since shortly after the company's inception, the company has included one or more directors on its board who are not employees of the company; its major investor, Madison Dearborn; or its significant minority investor, OfficeMax, in an effort to ensure that the deliberations of its board reflect a broader range of perspective and experience than are available solely from the chief executive officer of the company and OfficeMax and Madison Dearborn employees. During 2011, we had one such director Mr. Madigan. The compensation levels are believed by the compensation committee to be comparable to those paid by other companies of similar size for independent directors with comparable responsibilities.

Boise Cascade entered into an Employment Agreement with Mr. McDougall on November 20, 2008, pursuant to which he served as our chairman and chief executive officer. Mr. McDougall's Employment Agreement was amended in February 2009 and further amended upon his resignation from the position of chief executive officer in August 2009. Pursuant to the terms of the Employment Agreement, as amended (the Agreement), Mr. McDougall receives an annual base salary of \$180,000 per year as compensation for serving as a director and chairman of our board of directors. Under the terms of the Agreement, Mr. McDougall participates in dental and vision insurance plans that are the same as those available to other salaried employees and he received a company contribution to his 401(k) account on the same terms as other employees. He does not participate in any of the company's incentive compensation plans. The Employment Agreement also provides that the Employment Agreement may be terminated by either party on 30 days' notice.

Edgar Filing: BOISE CASCADE, L.L.C. - Form S-1

Table of Contents

Mr. Madigan does not have an employment contract. He receives compensation for acting as a member of our board of directors in the amount of an annual fee of \$50,000 per year and additional fees for each meeting of the board and each committee meeting attended of \$1,500 per meeting.

The compensation earned during 2011 by Messrs. McDougall and Madigan is set forth in the following table:

Name	Fees Earned or Paid in		Change in Pension Value and Nonqualified Deferred Compensation	All Other Compensation	
	Cash(1)	Stock Awards(2)	Earnings(3)	(4)	Total
Duane C. McDougall	\$ 180,000			\$ 13,158	\$ 193,158
John W. Madigan	74,000		5,956		79,956

(1) In addition to serving as a director, Mr. McDougall serves as the chairman of our board of directors.

(2) No stock awards were made to any of our directors during 2011. Our directors are participants in our Directors Equity Plan, which is substantially similar to our Management Equity Plan (see "MEP" under "Long-Term Incentive Compensation (Management Equity Plan and 2011 LTIP)" in "Compensation Discussion and Analysis" for a description of our Management Equity Plan). Mr. Madigan and Mr. McDougall each received an award of our Series C equity units under the Directors Equity Plan in 2006. In addition, Mr. McDougall received a grant of our Series C equity units pursuant to our Management Equity Plan in 2009, when he served as our chief executive officer. The Series C equity units issued in 2006 have a threshold value of \$2.00 per unit and the Series C equity units issued in 2009 have a threshold equity value of \$1.30 per unit. A portion of Mr. McDougall's 2009 grant of Series C equity units was forfeited at the time of his August 2009 resignation from his position of chief executive officer and the balance of his 2009 Series C equity units became fully vested at such time. A portion of Mr. McDougall's 2006 Series C equity units was subject to a performance-vesting requirement, which was not satisfied on the December 31, 2010, determination date provided for in the Directors Equity Plan and were accordingly forfeited on such date.

(3) We do not provide any of our directors with pension benefits. The amount reported in this column reflects the above-market portion of the interest Mr. Madigan earned during 2011 under our Directors Deferred Compensation Plan.

(4) Company 401(k) contribution, company-provided life insurance and financial counseling allowance.

Directors Deferred Compensation Plan

We maintain a nonqualified Directors Deferred Compensation Plan, which allows each director who receives compensation for board service to defer all or a portion of such compensation in a calendar year. Amounts deferred are credited with imputed interest at a rate equal to 130% of Moody's Composite Average of Yields on Corporate Bonds. Participants may receive payment in cash in a lump sum or in annual installments following their service on the board. No director deferred any 2011 fees under this plan.

Director and Officer Indemnification and Limitation of Liability

Our amended and restated certificate of incorporation and amended and restated bylaws will provide that we will indemnify our directors and officers to the fullest extent permitted by the DGCL.

Table of Contents

In addition, our certificate of incorporation will provide that our directors will not be liable for monetary damages for breach of fiduciary duty, except for liability (i) for any breach of the director's duty of loyalty to us or our stockholders or (ii) for acts or omissions not in good faith or acts or omissions that involve intentional misconduct or a knowing violation of law.

In addition, prior to the completion of this offering, we will enter into indemnification agreements with each of our executive officers and directors. The indemnification agreements will provide the executive officers and directors with contractual rights to indemnification, expense advancement and reimbursement, to the fullest extent permitted under the DGCL.

There is no pending litigation or proceeding naming any of our directors or officers to which indemnification is being sought and we are not aware of any pending or threatened litigation that may result in claims for indemnification by any director or officer.

Table of Contents**SECURITY OWNERSHIP BY CERTAIN BENEFICIAL OWNERS AND MANAGEMENT**

The following table sets forth information regarding the beneficial ownership of our common stock as of November 1, 2012 and after giving effect to the conversion of Boise Cascade, L.L.C. into a Delaware corporation and the anticipated beneficial ownership percentages immediately following this offering, by:

each person or group who is known by us to own beneficially more than 5% of our outstanding shares of our common stock;

each of our named executive officers;

each of our directors as of the completion of this offering; and

all of our executive officers and directors as a group.

Each stockholder's percentage ownership before the offering is based on _____ shares of our common stock outstanding as of November 1, 2012, as adjusted to give effect to the conversion discussed above. Each stockholder's percentage ownership after the offering is based on _____ shares of our common stock outstanding immediately after the completion of this offering. We have granted the underwriters an option to purchase up to _____ additional shares of our common stock and the table below assumes no exercise of that option.

Beneficial ownership for the purposes of the following table is determined in accordance with the rules and regulations of the SEC. These rules generally provide that a person is the beneficial owner of securities if such person has or shares the power to vote or direct the voting thereof, or to dispose or direct the disposition thereof or has the right to acquire such powers within 60 days. Common stock subject to options that are currently exercisable or exercisable within 60 days of November 1, 2012 are deemed to be outstanding and beneficially owned by the person holding the options. These shares, however, are not deemed outstanding for the purposes of computing the percentage ownership of any other person. Percentage of beneficial ownership is based on _____ shares of common stock to be outstanding after the completion of this offering, assuming no exercise of the option to purchase additional shares. Except as disclosed in the footnotes to this table and subject to applicable community property laws, we believe that each stockholder identified in the table possesses sole voting and investment power over all shares of common stock shown as beneficially owned by the stockholder. We have not included in the following table the number of shares of common stock that certain of our executive officers and directors may be deemed to indirectly own as a result of being investors of FPH because none of such officers or directors exercise indirect voting or investment power with respect to the Boise Cascade common stock held by BC Holdings.

- (1) FPH holds a majority of the voting common units of BC Holdings and has the right to appoint a majority of the members of the board of directors of BC Holdings. As such, FPH may be deemed to share voting and dispositive power with respect to the shares of Boise Cascade common stock held of record by BC Holdings. Madison Dearborn Capital Partners IV, L.P. ("MDCP IV") is the controlling equityholder of FPH. Madison Dearborn Partners IV, L.P. ("MDP IV") is the general partner of MDCP IV. Paul J. Finnegan and Samuel M. Menco are the sole members of a limited partner committee of MDP IV that has the power to vote or dispose of the equity units held by MDCP IV. The address for FPH, MDCP IV, MDP IV and Messrs. Menco, Norton and Soules is c/o Madison Dearborn Partners, LLC, 70 W. Madison Street, Suite 4600, Chicago, Illinois 60602. Each of MDCP IV, MDP IV and Messrs. Finnegan and Menco may be deemed to share voting and dispositive power with respect to the shares of Boise Cascade common stock held of record by BC Holdings. Each of Messrs. McGowan, Madigan, Menco, Norton and Soules has indirect pecuniary interests in the shares of Boise Cascade common stock held of record by BC Holdings through their investments in MDP IV and/or MDCP IV. Each expressly disclaims beneficial ownership of the shares of Boise Cascade common stock held of record by BC Holdings except to the extent of his pecuniary interest therein. The address for BC Holdings is c/o Boise Cascade Company, 1111 West Jefferson Street, Suite 300, Boise, Idaho 83702.
- (2) Messrs. Carlile, McDougall, Rancourt, Bell, Lovlien and Sahlberg are investors in FPH. None of the foregoing persons has direct or indirect voting or dispositive power with respect to the shares of Boise Cascade common stock held of record by BC Holdings.
- (3) Mr. Madigan is an investor in FPH but does not have direct or indirect voting or dispositive power with respect to the shares of Boise Cascade common stock held of record by BC Holdings.

Table of Contents

CERTAIN RELATIONSHIPS AND RELATED PARTY TRANSACTIONS

Policy and Procedures Governing Related Party Transactions

Our policy regarding transactions with related persons requires that a "related person" (as defined in paragraph (a) of Item 404 of Regulation S-K) must promptly disclose to our general counsel any "related person transaction" (defined as any transaction that is reportable by us under Item 404(a) of Regulation S-K in which we are or will be a participant and the amount involved exceeds \$120,000 and in which any related person has or will have a direct or indirect material interest) in which such related person has or will have a direct or indirect material interest and all material facts with respect thereto. The general counsel will promptly communicate such information to our audit committee or another independent body of our board of directors. No related person transaction will be entered into without the approval or ratification of our audit committee or another independent body of our board of directors. It is our policy that directors interested in a related person transaction will recuse themselves from any such vote. Our policy does not specify the standards to be applied by our audit committee or another independent body of our board of directors in determining whether or not to approve or ratify a related person transaction and we accordingly anticipate that these determinations will be made in accordance with Delaware law.

OfficeMax and the Forest Products Acquisition

In 2004, FPH acquired the forest products and paper assets of OfficeMax. A portion of the consideration paid to OfficeMax was 109 million shares of BC Holdings' Series B equity units, which represented at September 30, 2012, 20.4% of BC Holdings' equity securities, with the remainder held by FPH. In connection with the Forest Products Acquisition, FPH and/or its subsidiaries (including us) entered into a number of agreements, including an asset purchase agreement, a securityholders agreement and a registration rights agreement with OfficeMax and/or its subsidiaries. Under the asset purchase agreement, OfficeMax indemnifies Boise Cascade for specified pre-closing liabilities, including environmental, asbestos, tax, benefits and other legacy liabilities.

Registration Rights Agreement

Prior to the consummation of this offering, we intend to enter into a registration rights agreement with BC Holdings, that will grant to BC Holdings certain demand and piggyback registration rights to BC Holdings with respect to shares of our common stock.

Nomination of our Directors

In connection with this offering, we will enter into a director nomination agreement with BC Holdings that provides BC Holdings the right to designate nominees for election to our board of directors for so long as BC Holdings owns 10% or more of the total number of shares of common stock outstanding. The number of nominees that BC Holdings is entitled to designate under this agreement will bear the same proportion to the total number of members of our board of directors as the number of shares of common stock beneficially owned by BC Holdings bears to the total number of shares of common stock outstanding, rounded up to the nearest whole number. In addition, BC Holdings shall be entitled to designate the replacement for any of its board designees whose board service terminates prior to the end of the director's term regardless of BC Holdings' beneficial ownership at such time. BC Holdings shall also have the right to have its designees participate on committees of our board of directors proportionate to its stock ownership, subject to compliance with applicable law and stock exchange rules. This agreement will terminate at such time as BC Holdings owns less than 10% of our outstanding common stock.

Table of Contents

Additional Transactions

During 2009, 2010 and 2011 we purchased \$0.4 million, \$0.3 million and \$0.3 million, respectively, of office supplies from OfficeMax.

Other

For a description of other relationships the company has with its directors and executive officers, refer to the "Management "and "Executive Compensation" sections of this prospectus.

Table of Contents

DESCRIPTION OF CERTAIN INDEBTEDNESS

Revolving Credit Facility

On July 13, 2011, Boise Cascade, and its principal operating subsidiaries, Boise Cascade Wood Products, L.L.C., and Boise Cascade Building Materials Distribution, L.L.C., as borrowers, and Boise Cascade Wood Products Holdings Corp., as guarantor, entered into our senior secured revolving credit facility. As of September 30, 2012, aggregate lending commitments under our revolving credit facility totaled \$300.0 million. Our revolving credit facility has a maturity date of July 13, 2016.

As of September 30, 2012, we did not have any outstanding borrowings under our revolving credit facility other than outstanding letters of credit of approximately \$10.0 million, which reduced our borrowing capacity under our revolving credit facility by an equivalent amount. We funded the October 15, 2012 redemption of \$75.0 million of our senior subordinated notes, plus \$2.7 million of accrued and unpaid interest, using cash on hand and \$50.0 million of borrowings under our revolving credit facility.

Our revolving credit facility is secured by a first-priority security interest in substantially all of our assets constituting inventory, receivables, cash and other assets related to the foregoing. Such security interest does not include other property, plants and equipment. Borrowings under our revolving credit facility are constrained by a borrowing base formula dependent upon levels of eligible inventory and receivables and are reduced by outstanding borrowings and letters of credit ("Availability").

Interest rates under our revolving credit facility are based, at the company's election, on either the London Interbank Offered Rate ("LIBOR") or a base rate, as defined in the agreement, plus a spread over the index elected that ranges from 1.75% to 2.25% for loans based on LIBOR and from 0.75% to 1.25% for loans based on the base rate. The spread is determined on the basis of a pricing grid that results in a higher spread as average quarterly Availability declines. Letters of credit are subject to a 0.15% fronting fee payable to the issuing bank and a fee payable to the lenders equal to the LIBOR margin rate. In addition, the company is required to pay an unused commitment fee of 0.50% per annum of the average unused portion of the lending commitments. If we have utilized more than 40% of the commitments, the unused commitment fee percentage reduces to 0.375%.

Our revolving credit facility contains customary nonfinancial covenants, including restrictions on new indebtedness, issuance of liens, investments, distributions to equityholders, asset sales and affiliate transactions. Our revolving credit facility also contains a requirement that we meet a 1:1 fixed-charge coverage ratio ("FCCR") if Availability falls below the greater of \$31.25 million or 12.5% of the aggregate lending commitments. Availability exceeded the minimum threshold amounts required for testing of the FCCR at all times since entering into our revolving credit facility, and Availability at September 30, 2012, was \$259.4 million. At September 30, 2012, our aggregate liquidity from unrestricted cash and cash equivalents and unused borrowing capacity (net of the Availability threshold amount for testing of the FCCR, as applicable) under our revolving credit facility totaled \$483.3 million.

Our revolving credit facility generally permits dividends only if certain conditions are met, including complying with the minimum Availability requirements and having a fixed charged coverage ratio of 1:1 on a pro forma basis. Prior to the consummation of this offering, we intend to make a \$225.0 million cash distribution to BC Holdings, which will require a waiver from the lenders under our revolving credit facility. The waiver will also address changes to the financial ratios and other technical and consistency changes to our revolving credit facility in connection with the foregoing distribution, as further described in "Dividend Policy."

Table of Contents

Senior Notes

On October 22, 2012, the Co-issuers issued \$250.0 million of senior notes, through a private placement that is exempt from the registration requirements of the Securities Act. Interest on the senior notes is payable semiannually in arrears on May 1 and November 1, commencing on May 1, 2013. Net proceeds from such offering of senior notes were used to redeem \$144.6 million of the Co-issuers' 7¹/₈% senior subordinated notes due in 2014, including \$1.0 million of interest through the related redemption date of November 21, 2012. The remaining net proceeds are available for general corporate purposes.

As a result of this refinancing, we extended the maturity of a portion of our long-term debt and lowered the related interest rate. The senior notes are guaranteed by each of Boise Cascade's existing and future direct or indirect domestic subsidiaries that is a guarantor or co-borrower under our revolving credit facility, other than Boise Finance. The senior notes are also guaranteed by BC Holdings, until such time, if ever, that Boise Cascade's common stock is listed on any national securities exchange. In connection with the consummation of this offering, BC Holdings will cease to guarantee the Co-issuers' obligations under the senior notes and the related indenture.

In connection with the issuance of the senior notes, the Co-issuers entered into a related registration rights agreement. Such registration rights agreement requires us to register under the Securities Act the senior notes having substantially identical terms to those of the senior notes and to complete an exchange of the privately placed senior notes for the publicly registered notes on or prior to October 21, 2013 or, in certain circumstances, to file and keep effective a shelf registration statement for resale of the senior notes. If we fail to satisfy these obligations, we will pay additional interest up to 0.25% per annum to holders of the senior notes for the first 90-day period immediately following such date, and by an additional 0.25% per annum with respect to each subsequent 90-day period, up to a maximum rate of 1.0% per annum.

The senior notes are senior unsecured obligations and rank equally with all of the Co-issuers' and guarantors' existing and future senior indebtedness, senior to all of their existing and future subordinated indebtedness, effectively subordinated to all of their present and future senior secured indebtedness (including all borrowings with respect to our revolving credit facility to the extent of the value of the assets securing such indebtedness), and structurally subordinated to the indebtedness of any subsidiaries that do not guarantee the senior notes.

The terms of the indenture governing the senior notes, among other things, limit the ability of the Co-issuers and certain Boise Cascade subsidiaries to: incur additional debt; declare or pay dividends; redeem stock or make other distributions to stockholders; make investments; create liens on assets; consolidate, merge, or transfer substantially all of their assets; enter into transactions with affiliates and sell or transfer certain assets.

The indenture governing the senior notes provides for customary events of default, which include (subject in certain cases to customary grace and cure periods and notification requirements), among others: nonpayment of principal or interest; breach of other agreements in the indenture governing the senior notes; defaults in failure to pay certain other indebtedness; the rendering of judgments to pay certain amounts of money against the Co-issuers, the guarantors, or certain Boise Cascade subsidiaries; the failure of certain guarantees to be enforceable and certain events of bankruptcy or insolvency.

Table of Contents

DESCRIPTION OF CAPITAL STOCK

The following is a summary of our capital stock and provisions of our amended and restated certificate of incorporation and our amended and restated bylaws, as each will be in effect prior to the closing of this offering, and certain provisions of Delaware law. This summary does not purport to be complete and is qualified in its entirety by the provisions of our amended and restated certificate of incorporation and amended and restated bylaws, copies of which have been or will be filed with the SEC as exhibits to the registration statement of which this prospectus is a part. References in this section to the "Company," "we," "us" and "our" refer to Boise Cascade Company and not to any of its subsidiaries.

Authorized Capitalization

Our amended and restated certificate of incorporation will provide that our authorized capital stock will consist of 200,000,000 shares of common stock, par value \$0.01 per share and 50,000,000 shares of undesignated preferred stock, par value \$0.01 per share. As of September 30, 2012, after giving effect to the conversion of Boise Cascade, L.L.C. into a Delaware corporation and the issuance and sale of shares of common stock in this offering, we will have _____ shares of common stock outstanding and no shares of preferred stock outstanding. As of September 30, 2012, BC Holdings was the only holder of record of our equity interests.

Common Stock

Voting Rights

Each share of common stock entitles the holder to one vote with respect to each matter presented to our stockholders on which the holders of common stock are entitled to vote. Our common stock votes as a single class on all matters relating to the election and removal of directors on our board of directors and as provided by law. Holders of our common stock will not have cumulative voting rights. Except in respect of matters relating to the election and removal of directors on our board of directors and as otherwise provided in our amended and restated certificate of incorporation or required by law, all matters to be voted on by our stockholders must be approved by a majority of the shares present in person or by proxy at the meeting and entitled to vote on the subject matter. In the case of election of directors, all matters to be voted on by our stockholders must be approved by a plurality of the votes entitled to be cast by all shares of common stock.

Dividend Rights

The holders of our outstanding shares of common stock are entitled to receive dividends, if any, as may be declared from time to time by our board of directors out of legally available funds. See "Dividend Policy." Because we are a holding company, our ability to pay dividends on our common stock is limited by restrictions on the ability of our subsidiaries to pay dividends or make distributions to us, including restrictions under the terms of the agreements governing our indebtedness.

Liquidation Rights

In the event of any voluntary or involuntary liquidation, dissolution or winding up of our affairs, holders of our common stock would be entitled to share ratably in our assets that are legally available for distribution to stockholders after payment of our debts and other liabilities. If we have any preferred stock outstanding at such time, holders of the preferred stock may be entitled to distribution and/or liquidation preferences. In either such case, we must pay the applicable distribution to the holders of our preferred stock before we may pay distributions to the holders of our common stock.

Table of Contents

Other Rights

Our stockholders will have no preemptive, conversion or other rights to subscribe for additional shares. All outstanding shares are and all shares registered by this prospectus will be, when sold, validly issued, fully paid and nonassessable. The rights, preferences and privileges of the holders of our common stock are subject to and may be adversely affected by, the rights of the holders of shares of any series of our preferred stock that we may designate and issue in the future.

Listing

We intend to apply to have our common stock approved for listing on the NYSE under the symbol "BCC."

Transfer Agent and Registrar

The transfer agent and registrar for our common stock will be

Preferred Stock

Our amended and restated certificate of incorporation will authorize our Board of Directors to provide for the issuance of shares of preferred stock in one or more series and to fix the preferences, powers and relative, participating, optional or other special rights and qualifications, limitations or restrictions thereof, including the dividend rate, conversion rights, voting rights, redemption rights and liquidation preference and to fix the number of shares to be included in any such series without any further vote or action by our stockholders. Any preferred stock so issued may rank senior to our common stock with respect to the payment of dividends or amounts upon liquidation, dissolution or winding up, or both. The issuance of preferred stock may have the effect of delaying, deferring or preventing a change in control of our company without further action by the stockholders and may adversely affect the voting and other rights of the holders of common stock. The issuance of preferred stock with voting and conversion rights may adversely affect the voting power of the holders of common stock, including the loss of voting control to others. At present, we have no plans to issue any preferred stock.

Board Composition

Following the completion of this offering, the issuer will be deemed to be a "controlled company" under the rules of the stock exchange on which the ordinary shares are listed because more than 50% of its outstanding voting power will be held by BC Holdings. See "Security Ownership by Certain Beneficial Owners and Management." The issuer intends to rely upon the "controlled company" exception to the board of directors and committee independence requirements under such stock exchange. Pursuant to this exception, the issuer will be exempt from the rules that would otherwise require that its board of directors consist of a majority of independent directors and that its compensation committee and governance and nominating committee be composed entirely of independent directors. The "controlled company" exception does not modify the independence requirements for the audit committee, and the issuer intends to comply with the requirements of the Sarbanes-Oxley Act and the stock exchange rules, which require that its audit committee consist exclusively of independent directors within one year of our initial public offering.

Prior to the completion of this offering, those directors identified in "Management Executive Officers, Key Management and Directors" who are currently serving as directors of BC Holdings will be appointed to the issuer's board of directors.

Upon the completion of this offering, our board of directors will be divided into three classes, as nearly equal in number as possible, with each director serving a three-year term and one class being

Table of Contents

elects at each year's annual meeting of stockholders. Messrs. _____ and _____ will be in the class of directors whose term expires at the 2012 annual meeting of our stockholders. Messrs. _____ and _____ will be in the class of directors whose term expires at the 2013 annual meeting of our stockholders. Messrs. _____, _____ and _____ will be in the class of directors whose term expires at the 2014 annual meeting of our stockholders. At each annual meeting of our stockholders, successors to the class of directors whose term expires at such meeting will be elected to serve for three-year terms or until their respective successors are elected and qualified.

Corporate Opportunity

Messrs. Menco, Norton and Souleles, who are officers or employees of Madison Dearborn, serve on our board of directors. Madison Dearborn is the ultimate principal equityholder of BC Holdings, our majority stockholder (after giving effect to this offering). Madison Dearborn and entities controlled by them may hold equity interests in entities that directly or indirectly compete with us, and companies in which they currently invest may begin competing with us. As a result of these relationships, when conflicts between the interests of Madison Dearborn, on the one hand, and of other stockholders, on the other hand, arise, these directors may not be disinterested. Although our directors and officers have a duty of loyalty to us under Delaware law and our amended and restated certificate of incorporation that will be adopted in connection with this offering, transactions that we enter into in which a director or officer has a conflict of interest are generally permissible so long as (1) the material facts relating to the director's or officer's relationship or interest as to the transaction are disclosed to our board of directors and a majority of our disinterested directors approves the transaction, (2) the material facts relating to the director's or officer's relationship or interest as to the transaction are disclosed to our stockholders and a majority of our disinterested stockholders approve the transaction or (3) the transaction is otherwise fair to us. Our amended and restated certificate of incorporation will also provide that Madison Dearborn and its representatives will not be required to offer any transaction opportunity of which they become aware to us and could take any such opportunity for themselves or offer it to other companies in which they have an investment, unless such opportunity is offered to them solely in their capacities as our directors.

Anti-takeover Effects of Delaware Law and Our Certificate of Incorporation and Bylaws

Our amended and restated certificate of incorporation and bylaws will also contain provisions that may delay, defer or discourage another party from acquiring control of us. We expect that these provisions, which are summarized below, will discourage coercive takeover practices or inadequate takeover bids. These provisions are also designed to encourage persons seeking to acquire control of us to first negotiate with our board of directors, which we believe may result in an improvement of the terms of any such acquisition in favor of our stockholders. However, they also give our board of directors the power to discourage acquisitions that some stockholders may favor.

Undesignated Preferred Stock

The ability to authorize undesignated preferred stock will make it possible for our board of directors to issue preferred stock with super voting, special approval, dividend or other rights or preferences on a discriminatory basis that could impede the success of any attempt to acquire us. These and other provisions may have the effect of deferring, delaying or discouraging hostile takeovers, or changes in control or management of our company.

Classified Board of Directors

Our amended and restated certificate of incorporation will provide that our board of directors will be divided into three classes, with each class serving three-year staggered terms. In addition, under

Table of Contents

the DGCL, directors serving on a classified board of directors may only be removed from the board of directors with cause and by an affirmative vote of the majority of our common stock. These provisions may have the effect of deferring, delaying or discouraging hostile takeovers, or changes in control or management of our company.

Special Meetings of Stockholders

Our amended and restated certificate of incorporation will provide that special meetings of the stockholders may be called only upon a resolution approved by a majority of our board of directors then in office.

Requirements for Nominations and Proposals at Stockholder Meetings

Our amended and restated bylaws will prohibit the conduct of any business at a special meeting other than as specified in the notice for such meeting. Our amended and restated bylaws will also provide that nominations of persons for election to our board of directors may be made at a special meeting of stockholders at which directors are to be elected pursuant to the notice of meeting (1) by or at the direction of our board of directors or (2) provided that our board of directors has determined that directors shall be elected at such meeting, by any stockholder who (i) is a stockholder of record both at the time the notice is delivered and on the record date for the determination of stockholders entitled to vote at the special meeting, (ii) is entitled to vote at the meeting and upon such election and (iii) complies with the notice procedures set forth in our amended and restated bylaws. These provisions may have the effect of deferring, delaying or discouraging hostile takeovers, or changes in control or management of our company.

Stockholder Action by Written Consent

Pursuant to Section 228 of the DGCL, any action required to be taken at any annual or special meeting of the stockholders may be taken without a meeting, without prior notice and without a vote if a consent or consents in writing, setting forth the action so taken, is signed by the holders of outstanding stock having not less than the minimum number of votes that would be necessary to authorize or take such action at a meeting at which all shares of our stock entitled to vote thereon were present and voted, unless our company's amended and restated certificate of incorporation provides otherwise. Our amended and restated certificate of incorporation will provide that any action required or permitted to be taken by our stockholders may be, until such time as Madison Dearborn ceases to beneficially own 50% or more of our common stock, effected by consent in writing by such stockholders.

Business Combinations with Interested Stockholders

We will elect in our amended and restated certificate of incorporation not to be subject to Section 203 of the DGCL, an anti-takeover law. In general, Section 203 prohibits a publicly held Delaware corporation from engaging in a business combination, such as a merger, with a person or group owning 15% or more of the corporation's voting stock for a period of three years following the date the person became an interested stockholder, unless (with certain exceptions) the business combination or the transaction in which the person became an interested stockholder is approved in a prescribed manner. Accordingly, we will not be subject to any anti-takeover effects of Section 203. However, our amended and restated certificate of incorporation will contain provisions that have the same effect as Section 203, except that they will provide that both Madison Dearborn and any persons to whom Madison Dearborn sells their common stock will be deemed to have been approved by our board of directors and thereby not subject to the restrictions set forth in our amended and restated certificate of incorporation that have the same effect as Section 203.

Table of Contents

Requirements for Amendments to our Amended and Restated Certificate of Incorporation and Amended and Restated Bylaws

Our certificate of incorporation will provide that our amended and restated bylaws may be adopted, amended, altered or repealed by (i) the vote of a majority of directors then in office or (ii) the vote of 66²/₃% of holders of all of our outstanding capital stock entitled to vote generally in the election of directors.

Our amended and restated certificate of incorporation will provide that Articles _____ may only be amended, altered, changed or repealed by the affirmative vote of the holders of at least 66²/₃% of the voting power of all of our outstanding shares of capital stock entitled to vote generally in the election of directors. Our amended and restated certificate of incorporation will also provide that Article _____, which deals with corporate opportunity, may only be amended, altered or repealed by a vote of 80% of the voting power of all of our shares of common stock then outstanding.

Table of Contents

SHARES ELIGIBLE FOR FUTURE SALE

Prior to this offering, there has been no public market for our common stock. Future sales of substantial amounts of our common stock in the public market, or the perception that such sales may occur, could adversely affect the prevailing market price of our common stock. No prediction can be made as to the effect, if any, future sales of shares, or the availability of shares for future sales, will have on the market price of our common stock prevailing from time to time. The sale of substantial amounts of our common stock in the public market, or the perception that such sales could occur, could harm the prevailing market price of our common stock.

Rule 144

In general, under Rule 144 of the Securities Act as currently in effect, once we have been subject to public company reporting requirements for at least 90 days, a person who is not deemed to have been one of our affiliates for purposes of the Securities Act at any time during 90 days preceding a sale and who has beneficially owned the shares proposed to be sold for at least six months, including the holding period of any prior owner other than our affiliates, is entitled to sell such shares without complying with the manner of sale, volume limitation or notice provisions of Rule 144, subject to compliance with the public information requirements of Rule 144. If such a person has beneficially owned the shares proposed to be sold for at least one year, including the holding period of any prior owner other than our affiliates, then such person is entitled to sell such shares without complying with any of the requirements of Rule 144.

In general, under Rule 144, as currently in effect, our affiliates or persons selling shares on behalf of our affiliates are entitled to sell within any three-month period beginning 90 days after the date of this prospectus, a number of shares that does not exceed the greater of:

1% of the number of shares of common stock then outstanding; or

the average weekly trading volume of the common stock during the four calendar weeks preceding the filing of a notice on Form 144 with respect to such sale.

Rule 144 also provides that a person who is not deemed to have been an affiliate of ours at any time during the three months preceding a sale and who has for at least six months beneficially owned shares of our common stock that are restricted securities, will be entitled to freely sell such shares of our common stock subject only to the availability of current public information regarding us. A person who is not deemed to have been an affiliate of ours at any time during the three months preceding a sale and who has beneficially owned for at least one year shares of our common stock that are restricted securities, will be entitled to freely sell such shares of our common stock under Rule 144 without regard to the current public information requirements of Rule 144.

Rule 701

Rule 701 generally allows a stockholder who purchased shares of our common stock pursuant to a written compensatory plan or contract and who is not deemed to have been an affiliate of our company during the immediately preceding 90 days to sell these shares in reliance upon Rule 144, but without being required to comply with the public information, holding period, volume limitation or notice provisions of Rule 144. Rule 701 also permits affiliates of our company to sell their Rule 701 shares under Rule 144 without complying with the holding period requirements of Rule 144.

Stock Plans

We intend to file registration statements on Form S-8 under the Securities Act covering all of the shares of our common stock reserved for issuance under the 2013 Equity Incentive Plan we intend to adopt in connection with this offering. We expect to file this registration statement as soon as

Table of Contents

practicable after this offering and adoption of the 2013 Equity Incentive Plan. Accordingly, shares registered under the registration statement on Form S-8 will be available for sale in the open market following its effective date, subject to the Rule 144 limitations applicable to affiliates.

Lock-Up Agreements

In connection with this offering, we, our executive officers, directors and certain of our stockholders (whose common stock represents substantially all of our pre-offering shares) will enter into 180-day lock-up agreements with the underwriters of this offering under which neither we nor they may, for a period of 180 days after the date of this prospectus, directly or indirectly sell, dispose of or hedge any shares of common stock or any securities convertible into or exchangeable or exercisable for shares of common stock without the prior written consent of Merrill Lynch, Pierce, Fenner & Smith Incorporated and Goldman, Sachs & Co. on behalf of the underwriters.

Table of Contents

CERTAIN U.S. FEDERAL INCOME TAX CONSIDERATIONS TO NON-U.S. HOLDERS

The following is a summary of certain U.S. federal income tax consequences of the purchase, ownership and disposition of our common stock to a non-U.S. holder that purchases shares of our common stock in this offering. This summary applies only to a non-U.S. holder that holds our common stock as a capital asset, within the meaning of Section 1221 of the U.S. Internal Revenue Code of 1986, as amended (the "Code"). For purposes of this summary, a "non-U.S. holder" means any beneficial owner of our common stock other than:

an individual citizen or resident of the United States, as defined for U.S. federal income tax purposes;

a corporation or other entity treated as a corporation for U.S. federal income tax purposes created or organized in the United States or under the laws of the United States or any political subdivision thereof;

an estate whose income is subject to U.S. federal income tax regardless of its source; or

a trust if it (1) is subject to the primary supervision of a court within the United States and one or more United States persons have the authority to control all substantial decisions of the trust or (2) has a valid election in place to be treated as a U.S. person for U.S. federal income tax purposes.

In the case of a holder that is classified as a partnership for U.S. federal income tax purposes, the tax treatment of a partner in such partnership generally will depend upon the status of the partner and the activities of the partner and the partnership. If you are a partner in a partnership considering an investment in our common stock, then you should consult your own tax advisor.

This summary is based upon the provisions of the Code, the Treasury regulations promulgated thereunder and administrative and judicial interpretations thereof, all as of the date hereof. Those authorities may be changed, perhaps retroactively, so as to result in U.S. federal income tax consequences different from those summarized below. We cannot assure you that a change in law, possibly with retroactive application, will not alter significantly the tax considerations that we describe in this summary. We have not sought and do not plan to seek any ruling from the U.S. Internal Revenue Service, which we refer to as the IRS, with respect to statements made and the conclusions reached in the following summary, and there can be no assurance that the IRS or a court will agree with our statements and conclusions.

This summary does not address all aspects of U.S. federal income taxes that may be relevant to non-U.S. holders in light of their personal circumstances, and does not deal with federal taxes other than the U.S. federal income tax (such as U.S. federal estate and gift tax laws or the Medicare tax on certain investment income) or with non-U.S., state or local tax considerations. Special rules, not discussed here, may apply to certain non-U.S. holders, including:

former citizens or residents of the U.S.;

brokers, dealers or traders in securities, commodities or currencies;

persons who hold our common stock as a position in a "straddle," "conversion transaction" or other risk reduction transaction;

controlled foreign corporations, passive foreign investment companies, or corporations that accumulate earnings to avoid U.S. federal income tax;

tax-exempt organizations;

banks, insurance companies, or other financial institutions; and

investors in pass-through entities that are subject to special treatment under the Code.

Table of Contents

Such non-U.S. holders should consult their own tax advisors to determine the U.S. federal, state, local and other tax consequences that may be relevant to them.

If you are considering the purchase of our common stock, you should consult your own tax advisor concerning the particular U.S. federal income tax consequences to you of the purchase, ownership and disposition of our common stock, as well as the consequences to you arising under U.S. tax laws other than the federal income tax law or under the laws of any other taxing jurisdiction.

Dividends

As discussed under the section entitled "Dividend Policy" above, we do not currently anticipate paying dividends. In the event that we do make a distribution of cash or property (other than certain stock distributions) with respect to our common stock (or certain redemptions that are treated as distributions with respect to common stock), any such distributions will be treated as a dividend for U.S. federal income tax purposes to the extent paid from our current or accumulated earnings and profits (as determined under U.S. federal income tax principles). Dividends paid to you generally will be subject to withholding of U.S. federal income tax at a 30% rate or such lower rate as may be specified by an applicable income tax treaty. However, dividends that are effectively connected with the conduct of a trade or business by you within the U.S. are not subject to the withholding tax, but instead are subject to U.S. federal income tax on a net income basis at applicable graduated individual or corporate rates, unless an applicable income tax treaty provides otherwise. Certain certification and disclosure requirements, including delivery of a properly executed IRS Form W-8ECI, must be satisfied for effectively connected income to be exempt from withholding. Any such effectively connected dividends received by a foreign corporation may be subject to an additional "branch profits tax" at a 30% rate or such lower rate as may be specified by an applicable income tax treaty.

If the amount of a distribution paid on our common stock exceeds our current and accumulated earnings and profits, such excess will be allocated ratably among each share of common stock with respect to which the distribution is paid and treated first as a tax-free return of capital to the extent of your adjusted tax basis in each such share, and thereafter as capital gain from a sale or other taxable disposition of such share of common stock that is taxed to you as described below under the heading "Gain on Disposition of Common Stock." Your adjusted tax basis in a share is generally the purchase price of such share, reduced by the amount of any such tax-free returns of capital.

If you wish to claim the benefit of an applicable treaty rate to avoid or reduce withholding of U.S. federal income tax for dividends, then you must (a) provide the withholding agent with a properly completed IRS Form W-8BEN (or other applicable form) and certify under penalties of perjury that you are not a U.S. person and are eligible for treaty benefits, or (b) if our common stock is held through certain foreign intermediaries, satisfy the relevant certification requirements of applicable U.S. Treasury regulations. Special certification and other requirements apply to certain non-U.S. holders that act as intermediaries (including partnerships).

If you are eligible for a reduced rate of U.S. federal income tax pursuant to an income tax treaty, then you may obtain a refund or credit of any excess amounts withheld by filing timely an appropriate claim with the IRS.

Gain on Disposition of Common Stock

You generally will not be subject to U.S. federal income tax with respect to gain realized on the sale or other taxable disposition of our common stock, unless:

the gain is effectively connected with a trade or business you conduct in the U.S., and, where a tax treaty applies, is attributable to a U.S. permanent establishment;

Table of Contents

if you are an individual, you are present in the U.S. for 183 days or more in the taxable year of the sale or other taxable disposition and certain other conditions are met; or

we are or have been during a specified testing period a "U.S. real property holding corporation" for U.S. federal income tax purposes, and certain other conditions are met.

We believe that we are not, and we do not anticipate becoming, a "U.S. real property holding corporation" for U.S. federal income tax purposes. Even if we are or become a U.S. real property holding corporation, a non-U.S. holder generally will not be subject to U.S. federal income tax on any gain in respect of our common stock as long as our common stock is traded on an established securities market and such non-U.S. holder actually or constructively owned no more than 5% of our common stock during the specified testing period. If we are or become a U.S. real property holding corporation and you actually or constructively owned more than 5% of our common stock at any time during the specified testing period, you will be subject to tax on the net gain derived from the sale under regular graduated U.S. federal income tax rates. If you are a person described in the first bullet point above, you will be subject to tax on the net gain derived from the sale under regular graduated U.S. federal income tax rates. In addition, a non-U.S. holder corporation may be subject to the branch profits tax equal to 30% of its effectively connected earnings and profits or at such lower rate as may be specified by an applicable income tax treaty. If you are an individual described in the second bullet point above, you will be subject to a flat 30% tax on the gain derived from the sale, which may be offset by U.S. source capital losses.

Information Reporting and Backup Withholding

We must report annually to the IRS and to you the amount of dividends paid to you and the amount of tax, if any, withheld with respect to such dividends. The IRS may make this information available to the tax authorities in the country in which you are resident.

In addition, you may be subject to information reporting requirements and backup withholding (currently at a rate of 28% and scheduled to increase to 31% in 2013) with respect to dividends paid on, and the proceeds of disposition of, shares of our common stock, unless, generally, you certify under penalties of perjury (usually on IRS Form W-8BEN) that you are not a U.S. person or you otherwise establish an exemption. Additional rules relating to information reporting requirements and backup withholding with respect to payments of the proceeds from the disposition of shares of our common stock are as follows:

If the proceeds are paid to or through the U.S. office of a broker, the proceeds generally will be subject to backup withholding and information reporting, unless you certify under penalties of perjury (usually on IRS Form W-8BEN) that you are not a U.S. person or you otherwise establish an exemption.

If the proceeds are paid to or through a non-U.S. office of a broker that is not a U.S. person and is not a foreign person with certain specified U.S. connections (a "U.S.-related person"), information reporting and backup withholding generally will not apply.

If the proceeds are paid to or through a non-U.S. office of a broker that is a U.S. person or a U.S.-related person, the proceeds generally will be subject to information reporting (but not to backup withholding), unless you certify under penalties of perjury (usually on IRS Form W-8BEN) that you are not a U.S. person or you otherwise establish an exemption.

Any amounts withheld under the backup withholding rules may be allowed as a refund or a credit against your U.S. federal income tax liability, provided the required information is timely furnished by you to the IRS.

Table of Contents

Legislation Affecting Taxation of Common Stock Held By or Through Foreign Entities

In addition to the withholding discussed above, legislation enacted in 2010 generally will impose a withholding tax of 30 percent on dividend income from our common stock and the gross proceeds of a disposition of our common stock paid to a "foreign financial institution" (as defined in the legislation), unless such institution enters into an agreement with the U.S. government to collect and provide to the U.S. tax authorities substantial information regarding U.S. account holders of such institution (which would include certain equity and debt holders of such institution, as well as certain account holders that are foreign entities with U.S. owners). Absent any applicable exception, this legislation also generally will impose a withholding tax of 30 percent on dividend income from our common stock and the gross proceeds of a disposition of our common stock paid to a foreign entity that is not a foreign financial institution unless such entity provides the withholding agent with a certification identifying the substantial U.S. owners of the entity, which generally includes any U.S. person who directly or indirectly own more than 10 percent of the entity. Under certain circumstances, a non-U.S. holder of our common stock might be eligible for refunds or credits of such taxes, and a non-U.S. holder might be required to file a U.S. federal income tax return to claim such refunds or credits. Recently issued administrative guidance delayed the implementation of withholding (i) on dividend income until January 1, 2014 and (ii) on gross proceeds from the disposition of stock until January 1, 2017. Investors are encouraged to consult with their own tax advisors regarding the implications of this legislation on their investment in our common stock.

THE SUMMARY OF CERTAIN U.S. FEDERAL INCOME TAX CONSEQUENCES ABOVE IS INCLUDED FOR GENERAL INFORMATION PURPOSES ONLY. POTENTIAL PURCHASERS OF OUR COMMON STOCK ARE URGED TO CONSULT THEIR OWN TAX ADVISORS TO DETERMINE THE U.S. FEDERAL, STATE, LOCAL AND NON-U.S. TAX CONSIDERATIONS OF PURCHASING, OWNING AND DISPOSING OF OUR COMMON STOCK.

Table of Contents**UNDERWRITING**

Merrill Lynch, Pierce, Fenner & Smith Incorporated and Goldman, Sachs & Co. are acting as representative of each of the underwriters named below. Subject to the terms and conditions set forth in an underwriting agreement among us and the underwriters, we have agreed to sell to the underwriters, and each of the underwriters has agreed, severally and not jointly, to purchase from us, the number of shares of common stock set forth opposite its name below.

Underwriter	Number of Shares
Merrill Lynch, Pierce, Fenner & Smith Incorporated	
Goldman, Sachs & Co.	
Deutsche Bank Securities Inc.	
J.P. Morgan Securities LLC	
Wells Fargo Securities, LLC	

Total

Subject to the terms and conditions set forth in the underwriting agreement, the underwriters have agreed, severally and not jointly, to purchase all of the shares sold under the underwriting agreement if any of these shares are purchased. If an underwriter defaults, the underwriting agreement provides that the purchase commitments of the nondefaulting underwriters may be increased or the underwriting agreement may be terminated.

We have agreed to indemnify the several underwriters against certain liabilities, including liabilities under the Securities Act, or to contribute to payments the underwriters may be required to make in respect of those liabilities.

The underwriters are offering the shares, subject to prior sale, when, as and if issued to and accepted by them, subject to approval of legal matters by their counsel, including the validity of the shares, and other conditions contained in the underwriting agreement, such as the receipt by the underwriters of officer's certificates and legal opinions. The underwriters reserve the right to withdraw, cancel or modify offers to the public and to reject orders in whole or in part.

Commissions and Discounts

The representatives have advised us that the underwriters propose initially to offer the shares to the public at the public offering price set forth on the cover of this prospectus and to dealers at that price less a concession not in excess of \$ per share. After the initial offering, the public offering price, concession or any other term of the offering may be changed.

The following table shows the public offering price, underwriting discount and proceeds before expenses to us. The information assumes either no exercise or full exercise by the underwriters of their option to purchase additional shares.

	Per Share	Without Option	With Option
Public offering price	\$	\$	\$
Underwriting discount	\$	\$	\$
Proceeds, before expenses, to us	\$	\$	\$

The expenses of the offering, not including the underwriting discount, are estimated at \$ and are payable by us.

Table of Contents

Option to Purchase Additional Shares

We have granted an option to the underwriters to purchase up to _____ additional shares at the public offering price, less the underwriting discount. The underwriters may exercise this option for 30 days from the date of this prospectus. If the underwriters exercise this option, each will be obligated, subject to conditions contained in the underwriting agreement, to purchase a number of additional shares proportionate to that underwriter's initial amount reflected in the above table

No Sales of Similar Securities

We, our executive officers and directors and our existing securityholders have agreed not to sell or transfer any common stock or securities convertible into, exchangeable for, exercisable for, or repayable with common stock, for 180 days after the date of this prospectus without first obtaining the written consent of Merrill Lynch, Pierce, Fenner & Smith Incorporated and Goldman, Sachs & Co. Specifically, we and these other persons have agreed, with certain limited exceptions, not to directly or indirectly:

offer, pledge, sell or contract to sell any common stock;

sell any option or contract to purchase any common stock;

purchase any option or contract to sell any common stock;

grant any option, right or warrant for the sale of any common stock;

otherwise dispose of or transfer any common stock; or

enter into any swap or other agreement or transaction that transfers, in whole or in part, directly or indirectly, the economic consequence of ownership of any common stock whether any such swap or transaction is to be settled by delivery of shares or other securities, in cash or otherwise.

This lock-up provision applies to common stock and to securities convertible into or exchangeable or exercisable for or repayable with common stock. It also applies to common stock owned now or acquired later by the person executing the agreement or for which the person executing the agreement later acquires the power of disposition. In the event that either (x) during the last 17 days of the lock-up period referred to above, we issue an earnings release or material news or a material event relating to us occurs or (y) prior to the expiration of the lock-up period, we announce that we will release earnings results or become aware that material news or a material event will occur during the 16-day period beginning on the last day of the lock-up period, the restrictions described above shall continue to apply until the expiration of the 18-day period beginning on the issuance of the earnings release or the occurrence of the material news or material event, unless Merrill Lynch, Pierce, Fenner & Smith Incorporated waives, in writing, such extension.

NYSE Listing

We expect the shares to be approved for listing on the NYSE under the symbol "BCC." In order to meet the requirements for listing on that exchange, the underwriters have undertaken to sell a minimum number of shares to a minimum number of beneficial owners as required by that exchange.

Prior to this offering, there has been no public market for our common stock. The initial public offering price will be determined through negotiations between us and the representatives. In addition to prevailing market conditions, the factors to be considered in determining the initial public offering price are:

the valuation multiples of publicly traded companies that the representative believes to be comparable to us;

Table of Contents

our financial information

the history of, and the prospects for, our company and the industry in which we compete;

an assessment of our management, its past and present operations, and the prospects for, and timing of, our future revenues;

the present state of our development; and

the above factors in relation to market values and various valuation measures of other companies engaged in activities similar to ours.

An active trading market for the shares may not develop. It is also possible that after the offering the shares will not trade in the public market at or above the initial public offering price.

The underwriters do not expect to sell more than 5% of the shares in the aggregate to accounts over which they exercise discretionary authority.

Price Stabilization, Short Positions and Penalty Bids

Until the distribution of the shares is completed, SEC rules may limit underwriters and selling group members from bidding for and purchasing our common stock. However, the representatives may engage in transactions that stabilize the price of the common stock, such as bids or purchases to peg, fix or maintain that price.

In connection with the offering, the underwriters may purchase and sell our common stock in the open market. These transactions may include short sales, purchases on the open market to cover positions created by short sales and stabilizing transactions. Short sales involve the sale by the underwriters of a greater number of shares than they are required to purchase in the offering. "Covered" short sales are sales made in an amount not greater than the underwriters' option to purchase additional shares described above. The underwriters may close out any covered short position by either exercising their option to purchase additional shares or purchasing shares in the open market. In determining the source of shares to close out the covered short position, the underwriters will consider, among other things, the price of shares available for purchase in the open market as compared to the price at which they may purchase shares through the option to purchase additional shares. "Naked" short sales are sales in excess of the option to purchase additional shares. The underwriters must close out any naked short position by purchasing shares in the open market. A naked short position is more likely to be created if the underwriters are concerned that there may be downward pressure on the price of our common stock in the open market after pricing that could adversely affect investors who purchase in the offering. Stabilizing transactions consist of various bids for or purchases of shares of common stock made by the underwriters in the open market prior to the completion of the offering.

The underwriters may also impose a penalty bid. This occurs when a particular underwriter repays to the underwriters a portion of the underwriting discount received by it because the representatives have repurchased shares sold by or for the account of such underwriter in stabilizing or short covering transactions.

Similar to other purchase transactions, the underwriters' purchases to cover the syndicate short sales may have the effect of raising or maintaining the market price of our common stock or preventing or retarding a decline in the market price of our common stock. As a result, the price of our common stock may be higher than the price that might otherwise exist in the open market. The underwriters may conduct these transactions on the NYSE, in the over-the-counter market or otherwise.

Neither we nor any of the underwriters make any representation or prediction as to the direction or magnitude of any effect that the transactions described above may have on the price of our

Table of Contents

common stock. In addition, neither we nor any of the underwriters make any representation that the representatives will engage in these transactions or that these transactions, once commenced, will not be discontinued without notice.

Electronic Offer, Sale and Distribution of Shares

In connection with the offering, certain of the underwriters or securities dealers may distribute prospectuses by electronic means, such as email.

Other Relationships

The underwriters and their respective affiliates are full service financial institutions engaged in various activities, which may include securities trading, commercial and investment banking, financial advisory, investment management, investment research, principal investment, hedging, financing and brokerage activities. Some of the underwriters and their affiliates have engaged in, and may in the future engage in, investment banking and other commercial dealings in the ordinary course of business with us or our affiliates. Each of Merrill Lynch, Pierce, Fenner & Smith Incorporated, Goldman, Sachs & Co. and Wells Fargo Securities, LLC was an initial purchaser of our senior notes and may continue to hold a portion of such notes. In addition, an affiliate of Wells Fargo Securities, LLC serves as an agent under our revolving credit facility and an affiliate of Merrill Lynch, Pierce, Fenner & Smith Incorporated serves as the syndication agent and lender under our revolving credit facility. An affiliate of J.P. Morgan Securities LLC is a lender under our revolving credit facility.

In addition, in the ordinary course of their business activities, the underwriters and their affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers. Such investments and securities activities may involve securities and/or instruments of ours or our affiliates. The underwriters and their affiliates may also make investment recommendations and/or publish or express independent research views in respect of such securities or financial instruments and may hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.

Relationship with Solebury Capital LLC

We have engaged Solebury Capital LLC, or Solebury, a FINRA member, to provide certain financial consulting services (which do not include underwriting services) in connection with this offering. We agreed to pay Solebury, only upon successful completion of this offering, a fee of \$375,000, plus an incentive fee of up to \$50,000 payable at the sole discretion of Boise Cascade. Pursuant to the terms of the engagement, we have agreed to indemnify Solebury, subject to certain conditions. Solebury's services include advice with respect to deal structuring, fee and economics recommendations, and preparation of presentation materials. Solebury is not acting as an underwriter and has no contact with any public or institutional investor pursuant to this engagement. In addition, Solebury will not underwrite or purchase any of our common stock in this offering or otherwise participate in any such undertaking.

Notice to Prospective Investors in the European Economic Area

In relation to each Member State of the European Economic Area which has implemented the Prospectus Directive (each, a "Relevant Member State"), with effect from and including the date on which the Prospectus Directive is implemented in that Relevant Member State (the "Relevant Implementation Date"), no offer of shares may be made to the public in that Relevant Member State other than:

- A.
- to any legal entity which is a qualified investor as defined in the Prospectus Directive;

Table of Contents

- B. to fewer than 100 or, if the Relevant Member State has implemented the relevant provision of the 2010 PD Amending Directive, 150, natural or legal persons (other than qualified investors as defined in the Prospectus Directive), as permitted under the Prospectus Directive, subject to obtaining the prior consent of the representatives; or
- C. in any other circumstances falling within Article 3(2) of the Prospectus Directive, provided that no such offer of shares shall require the Company or the representatives to publish a prospectus pursuant to Article 3 of the Prospectus Directive or supplement a prospectus pursuant to Article 16 of the Prospectus Directive.

Each person in a Relevant Member State who initially acquires any shares or to whom any offer is made will be deemed to have represented, acknowledged and agreed that (A) it is a "qualified investor" within the meaning of the law in that Relevant Member State implementing Article 2(1)(e) of the Prospectus Directive, and (B) in the case of any shares acquired by it as a financial intermediary, as that term is used in Article 3(2) of the Prospectus Directive, the shares acquired by it in the offering have not been acquired on behalf of, nor have they been acquired with a view to their offer or resale to, persons in any Relevant Member State other than "qualified investors" as defined in the Prospectus Directive, or in circumstances in which the prior consent of the representatives has been given to the offer or resale. In the case of any shares being offered to a financial intermediary as that term is used in Article 3(2) of the Prospectus Directive, each such financial intermediary will be deemed to have represented, acknowledged and agreed that the shares acquired by it in the offer have not been acquired on a non-discretionary basis on behalf of, nor have they been acquired with a view to their offer or resale to, persons in circumstances which may give rise to an offer of any shares to the public other than their offer or resale in a Relevant Member State to qualified investors as so defined or in circumstances in which the prior consent of the representatives has been obtained to each such proposed offer or resale.

The Company, the representatives and their affiliates will rely upon the truth and accuracy of the foregoing representation, acknowledgement and agreement.

This prospectus has been prepared on the basis that any offer of shares in any Relevant Member State will be made pursuant to an exemption under the Prospectus Directive from the requirement to publish a prospectus for offers of shares. Accordingly any person making or intending to make an offer in that Relevant Member State of shares which are the subject of the offering contemplated in this prospectus may only do so in circumstances in which no obligation arises for the Company or any of the underwriters to publish a prospectus pursuant to Article 3 of the Prospectus Directive in relation to such offer. Neither the Company nor the underwriters have authorized, nor do they authorize, the making of any offer of shares in circumstances in which an obligation arises for the Company or the underwriters to publish a prospectus for such offer.

For the purpose of the above provisions, the expression "an offer to the public" in relation to any shares in any Relevant Member State means the communication in any form and by any means of sufficient information on the terms of the offer and the shares to be offered so as to enable an investor to decide to purchase or subscribe the shares, as the same may be varied in the Relevant Member State by any measure implementing the Prospectus Directive in the Relevant Member State and the expression "Prospectus Directive" means Directive 2003/71/EC (including the 2010 PD Amending Directive, to the extent implemented in the Relevant Member States) and includes any relevant implementing measure in the Relevant Member State and the expression "2010 PD Amending Directive" means Directive 2010/73/EU.

Table of Contents

Notice to Prospective Investors in the United Kingdom

In addition, in the United Kingdom, this document is being distributed only to, and is directed only at, and any offer subsequently made may only be directed at persons who are "qualified investors" (as defined in the Prospectus Directive) (i) who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005, as amended (the "Order") and/or (ii) who are high net worth companies (or persons to whom it may otherwise be lawfully communicated) falling within Article 49(2)(a) to (d) of the Order (all such persons together being referred to as "relevant persons"). This document must not be acted on or relied on in the United Kingdom by persons who are not relevant persons. In the United Kingdom, any investment or investment activity to which this document relates is only available to, and will be engaged in with, relevant persons.

Notice to Prospective Investors in Hong Kong

The shares may not be offered or sold by means of any document other than (i) in circumstances which do not constitute an offer to the public within the meaning of the Companies Ordinance (Cap. 32, Laws of Hong Kong), or (ii) to "professional investors" within the meaning of the Securities and Futures Ordinance (Cap. 571, Laws of Hong Kong) and any rules made thereunder, or (iii) in other circumstances which do not result in the document being a "prospectus" within the meaning of the Companies Ordinance (Cap. 32, Laws of Hong Kong), and no advertisement, invitation or document relating to the shares may be issued or may be in the possession of any person for the purpose of issue (in each case whether in Hong Kong or elsewhere), which is directed at, or the contents of which are likely to be accessed or read by, the public in Hong Kong (except if permitted to do so under the laws of Hong Kong) other than with respect to shares which are or are intended to be disposed of only to persons outside Hong Kong or only to "professional investors" within the meaning of the Securities and Futures Ordinance (Cap. 571, Laws of Hong Kong) and any rules made thereunder.

Notice to Prospective Investors in Singapore

This prospectus has not been registered as a prospectus with the Monetary Authority of Singapore. Accordingly, this prospectus and any other document or material in connection with the offer or sale, or invitation for subscription or purchase, of the shares may not be circulated or distributed, nor may the shares be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore other than (i) to an institutional investor under Section 274 of the Securities and Futures Act, Chapter 289 of Singapore (the "SFA"), (ii) to a relevant person, or any person pursuant to Section 275(1A), and in accordance with the conditions, specified in Section 275 of the SFA or (iii) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA.

Where the shares are subscribed or purchased under Section 275 by a relevant person which is: (a) a corporation (which is not an accredited investor) the sole business of which is to hold investments and the entire share capital of which is owned by one or more individuals, each of whom is an accredited investor; or (b) a trust (where the trustee is not an accredited investor) whose sole purpose is to hold investments and each beneficiary is an accredited investor, shares, debentures and units of shares and debentures of that corporation or the beneficiaries' rights and interests in that trust shall not be transferable for six months after that corporation or that trust has acquired the shares under Section 275 except: (1) to an institutional investor under Section 274 of the SFA or to a relevant person, or any person pursuant to Section 275(1A), and in accordance with the conditions, specified in Section 275 of the SFA; (2) where no consideration is given for the transfer; or (3) by operation of law.

Table of Contents

Notice to Prospective Investors in Japan

The securities have not been and will not be registered under the Financial Instruments and Exchange Law of Japan (the Financial Instruments and Exchange Law) and each underwriter has agreed that it will not offer or sell any securities, directly or indirectly, in Japan or to, or for the benefit of, any resident of Japan (which term as used herein means any person resident in Japan, including any corporation or other entity organized under the laws of Japan), or to others for re-offering or resale, directly or indirectly, in Japan or to a resident of Japan, except pursuant to an exemption from the registration requirements of, and otherwise in compliance with, the Financial Instruments and Exchange Law and any other applicable laws, regulations and ministerial guidelines of Japan.

Notice to Prospective Investors in Switzerland

We have not and will not register with the Swiss Financial Market Supervisory Authority ("FINMA") as a foreign collective investment scheme pursuant to Article 119 of the Federal Act on Collective Investment Scheme of 23 June 2006, as amended ("CISA"), and accordingly the securities being offered pursuant to this prospectus have not and will not be approved, and may not be licenseable, with FINMA. Therefore, the securities have not been authorized for distribution by FINMA as a foreign collective investment scheme pursuant to Article 119 CISA and the securities offered hereby may not be offered to the public (as this term is defined in Article 3 CISA) in or from Switzerland. The securities may solely be offered to "qualified investors," as this term is defined in Article 10 CISA, and in the circumstances set out in Article 3 of the Ordinance on Collective Investment Scheme of 22 November 2006, as amended ("CISO"), such that there is no public offer. Investors, however, do not benefit from protection under CISA or CISO or supervision by FINMA. This prospectus and any other materials relating to the securities are strictly personal and confidential to each offeree and do not constitute an offer to any other person. This prospectus may only be used by those qualified investors to whom it has been handed out in connection with the offer described herein and may neither directly or indirectly be distributed or made available to any person or entity other than its recipients. It may not be used in connection with any other offer and shall in particular not be copied and/or distributed to the public in Switzerland or from Switzerland. This prospectus does not constitute an issue prospectus as that term is understood pursuant to Article 652a and/or 1156 of the Swiss Federal Code of Obligations. We have not applied for a listing of the securities on the SIX Swiss Exchange or any other regulated securities market in Switzerland, and consequently, the information presented in this prospectus does not necessarily comply with the information standards set out in the listing rules of the SIX Swiss Exchange and corresponding prospectus schemes annexed to the listing rules of the SIX Swiss Exchange.

Notice to Prospective Investors in the Dubai International Financial Centre

This document relates to an Exempt Offer in accordance with the Offered Securities Rules of the Dubai Financial Services Authority ("DFSA"). This document is intended for distribution only to persons of a type specified in the Offered Securities Rules of the DFSA. It must not be delivered to, or relied on by, any other person. The DFSA has no responsibility for reviewing or verifying any documents in connection with Exempt Offers. The DFSA has not approved this document nor taken steps to verify the information set forth in it and has no responsibility for it. The shares to which this document relates may be illiquid and/or subject to restrictions on their resale. Prospective purchasers of the shares offered should conduct their own due diligence on the shares. If you do not understand the contents of this document you should consult an authorized financial advisor.

Table of Contents

LEGAL MATTERS

The validity of the common stock offered hereby will be passed upon for us by Kirkland & Ellis LLP (a partnership that includes professional corporations), Chicago, Illinois. The underwriters have been represented by Winston & Strawn LLP, Chicago, Illinois. Kirkland & Ellis LLP has from time to time represented and may continue to represent, Madison Dearborn and some of its affiliates in connection with various legal matters. Certain partners of Kirkland & Ellis LLP are members of a limited partnership that is an investor in one or more investment funds affiliated with Madison Dearborn.

EXPERTS

The consolidated financial statements of Boise Cascade, L.L.C. and its subsidiaries as of December 31, 2010 and 2011, and for each of the years in the three-year period ended December 31, 2011, have been included herein in reliance upon the report of KPMG LLP, independent registered public accounting firm, appearing elsewhere herein, and upon the authority of said firm as experts in accounting and auditing.

WHERE YOU CAN FIND MORE INFORMATION

We have filed a Registration Statement on Form S-1 with the SEC with respect to our common stock being distributed as contemplated by this prospectus. This prospectus is a part of and does not contain all of the information set forth in, the Registration Statement and the exhibits and schedules to the Registration Statement. For further information with respect to the Company and our common stock, please refer to the Registration Statement, including its exhibits and schedules. Statements made in this prospectus relating to any contract or other document are not necessarily complete and you should refer to the exhibits attached to the Registration Statement for copies of the actual contract or document. You may read and copy all materials that we file with the SEC, including the Registration Statement and its exhibits and schedules, at the SEC's public reference room, located at 100 F Street, N.E., Washington, D.C. 20549, as well as on the Internet website maintained by the SEC at www.sec.gov. Please call the SEC at 1-800-SEC-0330 for more information on the public reference room. Information contained on any website referenced in this prospectus does not and will not constitute a part of this prospectus or the Registration Statement on Form S-1 of which this prospectus is a part.

In addition, we will file periodic reports and other information with the SEC.

You may request a copy of any of our filings with the SEC at no cost, by writing or telephoning us at the following address:

Boise Cascade, L.L.C.
1111 West Jefferson Street
Suite 300
Boise, Idaho 83702-5389

You should rely only on the information contained in this prospectus or to which we have referred you. We have not authorized any person to provide you with different information or to make any representation not contained in this prospectus.

Boise Cascade, L.L.C.

Condensed Notes to Unaudited Quarterly Consolidated Financial Statements

1. Nature of Operations and Consolidation

Nature of Operations

We are a privately held building products company headquartered in Boise, Idaho. As used in these consolidated financial statements, the terms "Boise Cascade," "we," and "our" refer to Boise Cascade, L.L.C., and its consolidated subsidiaries. Boise Cascade is 100% owned by Boise Cascade Holdings, L.L.C. (BC Holdings). We are a leading U.S. wholesale distributor of building products and one of the largest producers of engineered wood products (EWP) and plywood in North America.

We operate our business using three reportable segments: (1) Building Materials Distribution, which is a wholesale distributor of building materials, (2) Wood Products, which manufactures and sells EWP, plywood, particleboard, dimension lumber, and ponderosa pine lumber, and (3) Corporate and Other, which includes corporate support staff services, related assets and liabilities, and foreign exchange gains and losses. For more information, see Note 8, "Segment Information."

Consolidation

The accompanying quarterly consolidated financial statements have not been audited by an independent registered public accounting firm but, in the opinion of management, include all adjustments necessary to present fairly the financial position, results of operations, and cash flows for the interim periods presented. Except as disclosed within these condensed notes to unaudited quarterly consolidated financial statements, the adjustments made were of a normal, recurring nature. Certain information and footnote disclosures normally included in our annual consolidated financial statements have been condensed or omitted. The quarterly consolidated financial statements include the accounts of Boise Cascade and its subsidiaries after elimination of intercompany balances and transactions. Quarterly results are not necessarily indicative of results that may be expected for the full year. These condensed notes to unaudited quarterly consolidated financial statements should be read in conjunction with the audited consolidated financial statements and note disclosures as of December 31, 2011 and 2010 and for the years ended December 31, 2011, 2010, and 2009 (2011 Audited Financial Statements), which are included in the company's registration statement on Form S-1.

2. Summary of Significant Accounting Policies

Accounting Policies

The complete summary of significant accounting policies is included in Note 2, "Summary of Significant Accounting Policies," of the Notes to Consolidated Financial Statements in our 2011 Audited Financial Statements.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions about future events. These estimates and the underlying assumptions affect the amounts of assets and liabilities reported, disclosures about contingent assets and liabilities, and reported amounts of revenues and expenses. Such estimates include the valuation of accounts receivable, inventories, goodwill, intangible assets, and other long-lived assets; legal contingencies; guarantee obligations; indemnifications; assumptions used in retirement benefits; and vendor and customer rebates, among others. These estimates and assumptions are based on management's best estimates and judgment.

Table of Contents

Boise Cascade, L.L.C.

Condensed Notes to Unaudited Quarterly Consolidated Financial Statements (Continued)

2. Summary of Significant Accounting Policies (Continued)

Management evaluates its estimates and assumptions on an ongoing basis using historical experience and other factors, including the current economic environment, which management believes to be reasonable under the circumstances. We adjust such estimates and assumptions when facts and circumstances dictate. As future events and their effects cannot be determined with precision, actual results could differ significantly from these estimates. Changes in these estimates resulting from continuing changes in the economic environment will be reflected in the consolidated financial statements in future periods.

Vendor and Customer Rebates and Allowances

We receive rebates and allowances from our vendors under a number of different programs, including vendor marketing programs. At September 30, 2012 and December 31, 2011, we had \$2.7 million and \$2.8 million, respectively, of vendor rebates and allowances recorded in "Receivables, Other" on the Consolidated Balance Sheets. Rebates and allowances received from our vendors are recognized as a reduction of "Materials, labor, and other operating expenses" when the product is sold, unless the rebates and allowances are linked to a specific incremental cost to sell a vendor's product. Amounts received from vendors that are linked to specific selling and distribution expenses are recognized as a reduction of "Selling and distribution expenses" in the period the expense is incurred.

We also provide rebates to our customers and our customers' customers based on the volume of their purchases. We provide the rebates to increase the sell-through of our products. The rebates are recorded as a decrease in "Sales, Trade." At September 30, 2012, and December 31, 2011, we had \$19.3 million and \$15.6 million, respectively, of rebates payable to our customers recorded in "Accrued liabilities, Other" on our Consolidated Balance Sheets.

Leases

We lease a portion of our distribution centers as well as other property and equipment under operating leases. For purposes of determining straight-line rent expense, the lease term is calculated from the date we first take possession of the facility, including any periods of free rent and any renewal option periods we are reasonably assured of exercising. Rental expense for operating leases was \$3.5 million for both the three months ended September 30, 2012 and 2011, and \$10.7 million and \$10.8 million for the nine months ended September 30, 2012 and 2011, respectively. Sublease rental income was not material in any of the periods presented.

Income Taxes

We are a limited liability company, and the majority of our businesses and assets are held and operated by limited liability companies, which are not subject to entity-level federal or state income taxation. Our income tax provision generally consists of income taxes payable to states that do not allow for the income tax liability to be passed through to our equityholders, as well as income taxes payable by our separate subsidiaries that are taxed as corporations.

Table of Contents**Boise Cascade, L.L.C.****Condensed Notes to Unaudited Quarterly Consolidated Financial Statements (Continued)****2. Summary of Significant Accounting Policies (Continued)***Inventories*

Inventories included the following:

	September 30, 2012	December 31, 2011
	(thousands)	
Finished goods and work in process	\$ 260,336	\$ 223,605
Logs	36,841	41,243
Other raw materials and supplies	21,400	19,130
	\$ 318,577	\$ 283,978

Property and Equipment

Property and equipment consisted of the following asset classes:

	September 30, 2012	December 31, 2011
	(thousands)	
Land	\$ 35,662	\$ 35,469
Buildings and improvements	121,678	117,155
Machinery and equipment	337,482	328,282
Construction in progress	10,749	5,812
	505,571	486,718
Less accumulated depreciation	(241,900)	(220,262)
	\$ 263,671	\$ 266,456

Fair Value

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value hierarchy under U.S. generally accepted accounting principles (GAAP) gives the highest priority to quoted market prices (Level 1) and the lowest priority to unobservable inputs (Level 3). In general, and where applicable, we use quoted prices in active markets for identical assets or liabilities to determine fair value (Level 1). If quoted prices in active markets for identical assets or liabilities are not available to determine fair value, we use quoted prices for similar assets and liabilities or inputs that are observable either directly or indirectly (Level 2). If quoted prices for identical or similar assets are not available or are unobservable, we may use internally developed valuation models, whose inputs include bid prices, and third-party valuations utilizing underlying asset assumptions (Level 3).

Financial Instruments

Our financial instruments are cash and cash equivalents, accounts receivable, accounts payable, and long-term debt. Our cash is recorded at cost, which approximates fair value, and our cash equivalents are money market funds measured at fair value. As of September 30, 2012, and December 31, 2011, we held \$167.3 million and \$164.6 million, respectively, in money market funds

Table of Contents

Boise Cascade, L.L.C.

Condensed Notes to Unaudited Quarterly Consolidated Financial Statements (Continued)

2. Summary of Significant Accounting Policies (Continued)

that are measured at fair value on a recurring basis using Level 1 inputs. The recorded values of accounts receivable and accounts payable approximate fair values based on their short-term nature. Our outstanding debt is fixed-rate. At September 30, 2012, the book value of our fixed-rate debt was \$219.6 million, and the fair value was estimated to be \$220.2 million. The difference between the book value and the fair value is derived from the difference between the period-end market interest rate and the stated rate of our fixed-rate, long-term debt. We estimated the fair value based on quoted market prices for our debt (Level 1 inputs).

Concentration of Credit Risk

We are exposed to credit risk related to customer accounts receivable. In order to manage credit risk, we consider customer concentrations and current economic trends and monitor the creditworthiness of customers based on ongoing credit evaluations. At September 30, 2012, and December 31, 2011, the receivables from a single customer accounted for approximately 15% and 14% of total receivables, respectively. No other customer accounted for 10% or more of total receivables.

Distributions to Member

We periodically make cash distributions to our equityholder. For the nine months ended September 30, 2012, we made \$2.8 million of cash distributions to BC Holdings, of which \$1.2 million and \$1.6 million was paid to Forest Products Holdings, L.L.C. (FPH) and OfficeMax, respectively. During the nine months ended September 30, 2011, we did not make any cash distributions. Both our senior credit facility and the indenture governing our senior subordinated notes permitted these distributions.

New and Recently Adopted Accounting Standards

In July 2012, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2012-02, *Intangibles - Goodwill and Other (Topic 350): Testing Indefinite-Lived Intangible Assets for Impairment*, which gives entities the option first to assess qualitative factors to determine whether the existence of events and circumstances indicates that it is more likely than not that the indefinite-lived intangible asset is impaired. If, after assessing the totality of events and circumstances, an entity concludes that it is not more likely than not that the indefinite-lived intangible asset is impaired, then the entity is not required to take further action. However, if an entity concludes otherwise, then it is required to determine the fair value of the indefinite-lived intangible asset and perform the quantitative impairment test by comparing the fair value with the carrying amount. The amended guidance is effective for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012, with early adoption permitted. We do not believe the adoption of this guidance will have a material impact on our consolidated financial statements.

In September 2011, the FASB issued ASU 2011-08, *Intangibles - Goodwill and Other (Topic 350): Testing Goodwill for Impairment*, which gives entities testing goodwill for impairment the option of performing a qualitative assessment before calculating the fair value of a reporting unit in step 1 of the goodwill impairment test. If entities determine, on the basis of qualitative factors, that the fair value of a reporting unit is more likely than not less than the carrying amount, the two-step impairment test would be required. Otherwise, further testing would not be needed. We adopted the

Table of Contents**Boise Cascade, L.L.C.****Condensed Notes to Unaudited Quarterly Consolidated Financial Statements (Continued)****2. Summary of Significant Accounting Policies (Continued)**

provisions of this guidance January 1, 2012, and it had no effect on our financial position and results of operations.

In June 2011, the FASB issued ASU 2011-05, *Comprehensive Income (Topic 220): Presentation of Comprehensive Income*, which amends current comprehensive income guidance. This accounting update eliminates the option to present the components of other comprehensive income as part of the statement of equity, among other amendments. Instead, the company must report comprehensive income in either a single continuous statement of comprehensive income which contains two sections, net income and other comprehensive income, or in two separate but consecutive statements. On December 23, 2011, the FASB issued ASU 2011-12, *Comprehensive Income (Topic 220): Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05*, which defers the ASU 2011-05 requirement to present reclassification adjustments out of accumulated other comprehensive income by component in both the statement in which net income is presented and the statement in which other comprehensive income is presented (for both interim and annual financial statements). This requirement is being further deliberated by the FASB. We adopted this guidance retrospectively as of January 1, 2012, by adding the Consolidated Statements of Comprehensive Income (Loss) to our consolidated financial statements. In addition, accumulated other comprehensive loss was reclassified from equity units to a separate line in the Consolidated Balance Sheets.

There were no other accounting standards recently issued that had or are expected to have a material impact on our consolidated financial statements and associated disclosures.

3. Other (Income) Expense

Other (income) expense includes miscellaneous income and expense items. The components of "Other (income) expense, net" in the Consolidated Statements of Income (Loss) are as follows:

	Three Months Ended September 30		Nine Months Ended September 30	
	2012	2011	2012	2011
	(thousands)			
Facility curtailment(a)	\$	\$ (136)	\$	\$ 1,275
Other, net(b)	121	(162)	406	1,066
	\$ 121	\$ (298)	\$ 406	\$ 2,341

- (a) In first quarter of 2011, we committed to indefinitely curtail a manufacturing plant in our Wood Products segment. The manufacturing plant was permanently closed on June 30, 2011.
- (b) In first quarter of 2011, we recorded noncash asset write-downs of \$1.2 million.

Table of Contents**Boise Cascade, L.L.C.****Condensed Notes to Unaudited Quarterly Consolidated Financial Statements (Continued)****4. Debt**

Long-term debt consisted of the following:

	September 30, 2012	December 31, 2011
	(thousands)	
Asset-based revolving credit facility	\$	\$
7.125% senior subordinated notes	219,560	219,560
Long-term debt	219,560	219,560
Current portion of long-term debt	(25,000)	
Long-term debt, less current portion	\$ 194,560	\$ 219,560

Asset-Based Revolving Credit Facility

On July 13, 2011, Boise Cascade and its principal operating subsidiaries, Boise Cascade Wood Products, L.L.C., and Boise Cascade Building Materials Distribution, L.L.C., as borrowers, and Boise Cascade Wood Products Holdings Corp., as guarantor, entered into a \$250 million senior secured asset-based revolving credit facility (Revolving Credit Facility) with Wells Fargo Capital Finance, L.L.C. (Wells Fargo), as agent and the banks named therein as lenders. Borrowings under the Revolving Credit Facility are constrained by a borrowing base formula dependent upon levels of eligible receivables and inventory reduced by outstanding borrowings and letters of credit (Availability). On September 7, 2012, we entered into a First Amendment to Credit Agreement, which increased the aggregate lending commitments under the Revolving Credit Facility to \$300 million. Other key terms of the Credit Agreement were unchanged by the Amendment.

The Revolving Credit Facility has a maturity date of July 13, 2016. The Revolving Credit Facility is secured by a first-priority security interest in substantially all of our assets, except for property and equipment. The proceeds of borrowings under the agreement are available for working capital and other general corporate purposes.

Interest rates under the Revolving Credit Facility are based, at the company's election, on either the London Interbank Offered Rate (LIBOR) or a base rate, as defined in the agreement, plus a spread over the index elected that ranges from 1.75% to 2.25% for loans based on LIBOR and from 0.75% to 1.25% for loans based on the base rate. The spread is determined on the basis of a pricing grid that results in a higher spread as average quarterly Availability declines. Letters of credit are subject to a fronting fee payable to the issuing bank and a fee payable to the lenders equal to the LIBOR margin rate. In addition, we are required to pay an unused commitment fee at a rate ranging from 0.375% to 0.50% per annum (based on facility utilization) of the average unused portion of the lending commitments.

The Revolving Credit Facility contains customary nonfinancial covenants, including a negative pledge covenant and restrictions on new indebtedness, investments, distributions to equityholders, asset sales, and affiliate transactions, the scope of which are dependent on the Availability existing from time to time. The Revolving Credit Facility also contains a requirement that we meet a 1:1 fixed-charge coverage ratio (FCCR) if Availability falls below the greater of \$31.25 million or 12.5% of the aggregate lending commitments. Availability exceeded the minimum threshold amounts required for testing of the FCCR at all times since entering into the Revolving Credit Facility, and Availability at

Table of Contents

Boise Cascade, L.L.C.

Condensed Notes to Unaudited Quarterly Consolidated Financial Statements (Continued)

4. Debt (Continued)

September 30, 2012, was \$259.4 million. At September 30, 2012, our aggregate liquidity from cash and cash equivalents and unused borrowing capacity (net of the Availability threshold amount for testing of the FCCR, as applicable) under the Revolving Credit Facility totaled \$483.8 million.

At September 30, 2012, and December 31, 2011, we had no borrowings outstanding under the Revolving Credit Facility and approximately \$10.0 million and \$11.3 million, respectively, of letters of credit outstanding. These letters of credit reduced our borrowing capacity under the Revolving Credit Facility by an equivalent amount. We did not borrow under the Revolving Credit Facility during the nine months ended September 30, 2012. On October 12, 2012, we borrowed \$50.0 million under the Revolving Credit Facility to partially fund the redemption of \$75.0 million of our senior subordinated notes, as discussed further below.

Senior Subordinated Notes

In October 2004, Boise Cascade issued \$400 million of 7.125% senior subordinated notes due in 2014. In July 2005, we completed an exchange offer whereby all of our senior subordinated notes were exchanged for registered securities with identical terms (other than terms relating to registration rights) to the notes issued in October 2004. We may redeem all or part of the notes at any time at redemption prices set forth in the indenture governing the notes (Indenture). Redemption prices reduced to par value in October 2012. Subsequent to the exchange offer, a portion of the notes were repurchased, resulting in \$219.6 million of notes outstanding at both September 30, 2012, and December 31, 2011. On October 15, 2012, we redeemed \$75.0 million of the notes at par value with \$25.0 million of cash on hand and \$50.0 million borrowed under our Revolving Credit Facility. On October 22, 2012, the trustee under the senior subordinated notes indenture, at our request, irrevocably called for redemption on November 21, 2012, all of our outstanding senior subordinated notes. Simultaneously, we irrevocably deposited \$144.6 million of the proceeds from our senior notes offering, with our senior subordinated notes trustee, in an amount sufficient to pay and discharge the entire indebtedness on the senior subordinated notes for principal, plus \$1.0 million of interest, to November 21, 2012. The senior subordinated notes trustee acknowledged that as of October 22, 2012, our obligations and those of the guarantors were discharged and satisfied, and neither we nor the guarantors generally had any further obligations to the senior subordinated notes trustee or the holders of our senior subordinated notes. The senior subordinated notes trustee further acknowledged the automatic release of the guarantees of the guarantors under our senior subordinated notes indenture. Upon such satisfaction and discharge, our senior subordinated notes indenture generally ceased to be of further effect.

Debt Refinancing

On October 22, 2012, Boise Cascade and its wholly owned subsidiary, Boise Cascade Finance Corporation (together, the Co-issuers), issued a \$250 million aggregate principal amount of 6.375% senior notes due November 1, 2020 (Senior Notes) through a private placement that is exempt from the registration requirements of the Securities Act of 1933 (Securities Act), as amended. The Senior Notes pay interest semiannually in arrears on May 1 and November 1, commencing on May 1, 2013. As a result of this refinancing, we extended the maturity of our debt and lowered our interest rate. The Senior Notes are guaranteed by each of Boise Cascade's existing and future direct or indirect domestic subsidiaries that is a guarantor or co-borrower under our Revolving Credit Facility, other than Boise

Table of Contents

Boise Cascade, L.L.C.

Condensed Notes to Unaudited Quarterly Consolidated Financial Statements (Continued)

4. Debt (Continued)

Cascade Finance Corporation. The Senior Notes are also guaranteed by BC Holdings, until such time, if ever, that Boise Cascade's common stock is listed on any national securities exchange.

Following the sale of the Senior Notes, we used a portion of the net proceeds of the sale to repay the senior subordinated notes at par plus interest through the redemption date. The remaining proceeds will be available for general corporate purposes.

In connection with the issuance of the Senior Notes, the Co-issuers entered into a registration rights agreement, dated as of October 22, 2012 (Senior Notes Registration Rights Agreement). The Senior Notes Registration Rights Agreement requires us to register under the Securities Act the Senior Notes having substantially identical terms to those of the Senior Notes (Exchange Notes) and to complete an exchange of the privately placed Senior Notes for the publicly registered Exchange Notes on or prior to October 21, 2013 or, in certain circumstances, to file and keep effective a shelf registration statement for resale of the Senior Notes. If we fail to satisfy these obligations, we will pay additional interest up to 0.25% per annum to holders of the Senior Notes for the first 90-day period immediately following such date, and by an additional 0.25% per annum with respect to each subsequent 90-day period, up to a maximum rate of 1.0% per annum.

The Senior Notes are senior unsecured obligations and rank equally with all of the Co-issuers' and guarantors' existing and future senior indebtedness, senior to all of their existing and future subordinated indebtedness, effectively subordinated to all of their present and future senior secured indebtedness (including all borrowings with respect to our Revolving Credit Facility to the extent of the value of the assets securing such indebtedness), and structurally subordinated to the indebtedness of any subsidiaries that do not guarantee the Senior Notes.

The terms of the indenture governing the Senior Notes, among other things, limit the ability of the Co-issuers and certain Boise Cascade subsidiaries to: incur additional debt; declare or pay dividends; redeem stock or make other distributions to stockholders; make investments; create liens on assets; consolidate, merge, or transfer substantially all of their assets; enter into transactions with affiliates; and sell or transfer certain assets.

The indenture governing the Senior Notes provides for customary events of default, which include (subject in certain cases to customary grace and cure periods and notification requirements), among others: nonpayment of principal or interest; breach of other agreements in the indenture governing the Senior Notes; defaults in failure to pay certain other indebtedness; the rendering of judgments to pay certain amounts of money against the Co-issuers, the guarantors, or certain Boise Cascade subsidiaries; the failure of certain guarantees to be enforceable; and certain events of bankruptcy or insolvency.

Cash Paid for Interest

For the nine months ended September 30, 2012 and 2011, cash payments for interest, net of interest capitalized, were \$8.7 million and \$8.6 million, respectively. Capitalized interest was not material for both periods.

Table of Contents**Boise Cascade, L.L.C.****Condensed Notes to Unaudited Quarterly Consolidated Financial Statements (Continued)****5. Retirement and Benefit Plans**

The following table presents the pension benefit costs:

	Three Months Ended September 30		Nine Months Ended September 30	
	2012	2011	2012	2011
	(thousands)			
Service cost	\$ 1,206	\$ 1,253	\$ 3,557	\$ 4,051
Interest cost	4,783	5,049	14,450	15,394
Expected return on plan assets	(4,850)	(4,488)	(14,541)	(13,457)
Amortization of actuarial loss	1,824	643	5,808	2,067
Amortization of prior service costs	41	44	124	133
Curtailment loss and other				745
Net periodic benefit cost	\$ 3,004	\$ 2,501	\$ 9,398	\$ 8,933

On July 13, 2012, we contributed company-owned real property to the pension plans from two locations in our Building Materials Distribution segment. The pension plans obtained independent appraisals of the properties, and based on these appraisals, the plans recorded the contribution at fair value of \$9.7 million during the nine months ended September 30, 2012.

We are leasing back the contributed properties for an initial term of ten years with two five-year extension options and continue to use the properties in our distribution operations. Rent payments are made quarterly, with first-year annual rents of \$0.8 million and 2% annual escalation rates thereafter. Each lease provides us a right of first refusal on any subsequent sale by the pension plans, as well as repurchase options at the end of the initial term and extension periods. The plans engaged an independent fiduciary who negotiated the lease terms and also manages the properties on behalf of the plans.

We determined that the contribution of the properties does not meet the accounting definition of a plan asset within the scope of Accounting Standards Codification 715, *Compensation Retirement Benefits*. Accordingly, the contributed properties are not considered a contribution for accounting purposes and, as a result, are not included in plan assets and have no impact on the net pension liability recorded on our Consolidated Balance Sheets. We continue to depreciate the carrying value of the properties in our financial statements, and no gain or loss was recognized at the contribution date for accounting purposes. Lease payments are recorded as pension contributions.

In the first nine months of 2012, we made \$8.2 million in cash contributions to the pension plans. The total cash and real property contributions are expected to satisfy U.S. Department of Labor minimum pension contribution requirements for 2012 in light of recently passed pension funding relief legislation.

6. Outsourcing Services Agreement

Under an Outsourcing Services Agreement, Boise Inc. provides a number of corporate staff services to us at cost. These services include information technology, accounting, and human resource transactional services. The agreement, as extended, expires on February 22, 2014. The agreement automatically renews for successive one-year terms unless either party provides notice of termination to the other party at least 12 months in advance of the expiration date. The Outsourcing Services

Table of Contents**Boise Cascade, L.L.C.****Condensed Notes to Unaudited Quarterly Consolidated Financial Statements (Continued)****6. Outsourcing Services Agreement (Continued)**

Agreement gives us (but not Boise Inc.) the right to terminate all or any portion of the services provided to us on 30 days' notice. Total expenses incurred under the Outsourcing Services Agreement were \$3.7 million and \$3.8 million for the three months ended September 30, 2012 and 2011, respectively, and \$11.0 million for both the nine months ended September 30, 2012 and 2011. The majority of these expenses are recorded in "General and administrative expenses" in our Consolidated Statements of Income (Loss).

7. Transactions With Related Party

Transactions with Louisiana Timber Procurement Company, L.L.C. (LTP) represent the only significant related-party activity recorded in our consolidated financial statements. LTP is an unconsolidated variable-interest entity that is 50% owned by Boise Cascade, and 50% owned by Boise Inc. LTP procures sawtimber, pulpwood, residual chips, and other residual wood fiber to meet the wood and fiber requirements of Boise Inc. and Boise Cascade, in Louisiana. See the Consolidated Statements of Income (Loss) for related party sales to LTP and related party fiber purchases from LTP. We are not the primary beneficiary of LTP, as we do not have power to direct the activities that most significantly affect the economic performance of LTP. Accordingly, we do not consolidate LTP's results in our financial statements.

8. Segment Information

We operate our business using three reportable segments: Building Materials Distribution, Wood Products, and Corporate and Other. There are no differences in our basis of measurement of segment profit or loss from those disclosed in Note 14, "Segment Information," of the Notes to Consolidated Financial Statements in our 2011 Audited Financial Statements.

An analysis of our operations by segment is as follows:

	Sales				Income (Loss) Before Income Taxes	Depreciation and Amortization	EBITDA (b)
	Trade	Related Party	Inter- segment	Total (millions)			
Three Months Ended September 30, 2012							
Building Materials Distribution	\$ 605.2	\$	\$	\$ 605.2	\$ 10.3	\$ 2.3	\$ 12.6

(a)

In March 2011, we committed to indefinitely curtail a manufacturing plant in our Wood Products segment, and we recorded the related expense of \$1.3 million in "Other (income) expense, net" and \$0.4 million of accelerated depreciation in "Depreciation and Amortization" in our Consolidated Statement of Income (Loss) for the nine months ended September 30, 2011. The manufacturing plant was permanently closed on June 30, 2011. Also, during the nine months ended September 30, 2011, we recorded \$1.2 million of noncash asset write-downs in "Other (income) expense, net," of which \$0.8 million was recorded in our Building Materials Distribution segment and \$0.4 million was recorded in our Wood Products segment.

(b)

EBITDA represents income (loss) before interest (interest expense and interest income), income taxes, and depreciation and amortization. EBITDA is the primary measure used by our chief operating decision maker to evaluate segment operating performance and to decide how to allocate resources to segments. We believe EBITDA is useful to investors because it provides a means to evaluate the operating performance of our segments and our company on an ongoing basis using criteria that are used by our internal decision makers and because it is frequently used by investors and other interested parties when comparing companies in our industry that have different financing and capital structures and/or tax rates. We believe EBITDA is a meaningful measure because it presents a transparent view of our recurring operating performance and allows management to readily view operating trends, perform analytical comparisons, and identify strategies to improve operating performance. EBITDA, however, is not a measure of our liquidity or financial performance under generally accepted accounting principles (GAAP) and should not be considered as an alternative to net income (loss), income (loss) from operations, or any other performance measure derived in accordance with GAAP or as an alternative to cash flow from operating activities as a measure of our liquidity. The use of EBITDA instead of net income (loss) or segment income (loss) has limitations as an analytical tool, including the inability to determine profitability; the exclusion of interest expense, interest income, and associated significant cash requirements; and the exclusion of depreciation and amortization, which represent unavoidable operating costs. Management compensates for the limitations of EBITDA by relying on our GAAP results. Our measure of EBITDA is not necessarily comparable to other similarly titled captions of other companies due to potential inconsistencies in the methods of calculation.

Table of Contents**Boise Cascade, L.L.C.****Condensed Notes to Unaudited Quarterly Consolidated Financial Statements (Continued)****8. Segment Information (Continued)**

The following is a reconciliation of net income (loss) to EBITDA for the consolidated company:

	Three Months Ended September 30		Nine Months Ended September 30	
	2012	2011	2012	2011
	(millions)			
Net income (loss)	\$ 23.5	\$ (3.7)	\$ 40.2	\$ (32.6)
Interest expense	4.8	5.0	14.5	14.2
Interest income	(0.1)	(0.1)	(0.3)	(0.3)
Income tax provision	0.1		0.2	0.1
Depreciation and amortization	8.5	9.4	24.9	27.5
EBITDA	\$ 36.8	\$ 10.6	\$ 79.6	\$ 8.9

9. Commitments, Legal Proceedings and Contingencies, and Guarantees*Commitments*

We have commitments for leases and long-term debt that are discussed further under "Leases" in Note 2, "Summary of Significant Accounting Policies," and Note 4, "Debt." We are a party to a number of long-term log and fiber supply agreements that are discussed in Note 15, "Commitments, Legal Proceedings and Contingencies, and Guarantees," of the Notes to Consolidated Financial Statements in our 2011 Audited Financial Statements. In addition, we have purchase obligations for goods and services, capital expenditures, and raw materials entered into in the normal course of business. At September 30, 2012, there have been no material changes to the commitments disclosed in the 2011 Audited Financial Statements. See Note 4, "Debt," for a discussion of debt transactions subsequent to September 30, 2012.

In July 2012, there was a change in the ownership of timberlands that serve as a significant source of fiber to our Wood Products segment pursuant to a number of long-term fiber supply agreements. The affected supply agreements remain in place, with our rights and the new owners' obligations under those agreements unchanged. As such, we do not anticipate the ownership transition to negatively impact our operations.

Legal Proceedings and Contingencies

We are a party to routine legal proceedings that arise in the ordinary course of our business. We are not currently a party to any legal proceedings or environmental claims that we believe would, individually or in the aggregate, have a material adverse effect on our financial position, results of operations, or cash flows.

Guarantees

We provide guarantees, indemnifications, and assurances to others. Note 15, "Commitments, Legal Proceedings and Contingencies, and Guarantees," of the Notes to Consolidated Financial Statements in our 2011 Audited Financial Statements describes the nature of our guarantees, including the approximate terms of the guarantees, how the guarantees arose, the events or circumstances that would require us to perform under the guarantees, and the maximum potential undiscounted amounts of future payments we could be required to make. As of September 30, 2012, there have been no material changes to the guarantees disclosed in the 2011 Audited Financial Statements.

10. Consolidating Guarantor and Nonguarantor Financial Information

The following consolidating financial information presents the Statements of Comprehensive Income (Loss), Balance Sheets, and Cash Flows related to Boise Cascade. The senior subordinated notes are guaranteed on a senior subordinated basis jointly and severally by BC Holdings and each of its existing and future subsidiaries (other than: (i) Boise Cascade and Boise Cascade Finance Corporation and (ii) our foreign subsidiaries). BC Holdings is a holding company with no material assets other than the equity interests of its direct subsidiaries. In addition, the interim financial statements of BC Holdings are available to the public through BC Holdings' Quarterly Report on Form 10-Q for the period ended September 30, 2012 filed with the Securities and Exchange Commission in accordance with the Securities Exchange Act of 1934. Other than the consolidated financial statements and footnotes for Boise Cascade and the consolidating financial information, financial statements and other disclosures concerning the guarantors have not been presented because management believes that such information is not material to investors.

Furthermore, the cancellation provisions in the Indenture related to the guarantor subsidiaries are customary, and they do not include an arrangement that permits a guarantor subsidiary to opt out of the obligation prior to or during the term of the debt. Each guarantor subsidiary is automatically released from its obligations as a guarantor upon the sale of the subsidiary or substantially all of its assets to a third party, the designation of the subsidiary as an unrestricted subsidiary for purposes of the covenants included in the Indenture, the release of the indebtedness under the Indenture, or if the issuers exercise their legal defeasance option or the discharge of their obligations in accordance with the Indenture.

See Note 4, "Debt," for a discussion of debt transactions subsequent to September 30, 2012.

Boise Cascade, L.L.C.

Condensed Notes to Unaudited Quarterly Consolidated Financial Statements (Continued)

11. Pro Forma Information (unaudited)

Since our inception in October 2004, we have operated as a limited liability company. The unaudited pro forma financial information assumes we operated as a corporation during the nine months ended September 30, 2012, and reflects the following adjustments to give pro forma effect for the anticipated initial public offering of common stock (the Offering) and to the distribution described below.

Statement of Income (Loss)

The pro forma results of our being treated as a corporation had no impact on net income for the pro forma nine months ended September 30, 2012, primarily as a result of placing a full valuation on the tax benefits associated with 2011 net operating losses and other net deferred tax assets (mostly attributable to our three-year historical cumulative losses and below historical average, although slightly improved, housing starts). The pretax income for the nine months ended September 30, 2012 would not have resulted in an adjustment to our income tax provision due to the utilization of the net operating losses carried forward from 2011. In addition, due to its non-recurring nature, the pro forma information does not reflect the recognition of a net deferred tax liability of approximately \$4.0 million, net of deferred tax assets and related valuation allowances, related to our tax status conversion from a limited liability company to a corporation prior to the consummation of this offering. Therefore, we have not presented any adjustments to the pro forma tax provision. Following the Offering, our effective tax rate is expected to be higher than in historical periods based on U.S. Federal and state income tax rates applicable to a corporation.

Pro forma weighted average common shares outstanding has been computed to give effect to the planned pro forma distribution to BC Holdings of \$225.0 million prior to January 1, 2013 and the actual distribution to BC Holdings of \$2.8 million during the nine months ended September 30, 2012. The shares deemed to be outstanding gives effect to the number of shares, assuming an initial public offering price of \$, whose proceeds would be necessary to pay the distributions to the extent that the distribution exceeds net income of \$26.4 million during the twelve months ended September 30, 2012.

Balance Sheet

Prior to the Offering, we plan to make a distribution to BC Holdings. The September 30, 2012 pro forma consolidated balance sheet reflects the expected distribution to BC Holdings of \$225.0 million with a corresponding decrease to cash and cash equivalents.

The September 30, 2012 pro forma consolidated balance sheet also gives effect to (i) our redemption of \$75.0 million of our senior subordinated notes with cash on hand and \$50.0 million borrowed under our Revolving Credit Facility on October 15, 2012; (ii) our issuance of \$250.0 million of 6.375% Senior Notes due 2020 on October 22, 2012 (the "Senior Notes Offering"); (iii) our issuance of a redemption notice on October 22, 2012 to redeem \$144.6 million of our senior subordinated notes on November 21, 2012 with a portion of the proceeds from the Senior Notes Offering; and (iv) a \$25.0 million repayment on our Revolving Credit Facility that we intend to make in advance of our \$225.0 million cash distribution to BC Holdings. In addition, the September 30, 2012 unaudited pro forma balance sheet gives effect to the write-off of deferred financing costs of \$1.5 million and payment of \$3.7 million of interest related to the redemption of the senior subordinated notes, as well as the

Table of Contents

Condensed Notes to Unaudited Quarterly Consolidated Financial Statements (Continued)

11. Pro Forma Information (unaudited) (Continued)

deferral of \$5.5 million in financing costs on the Senior Notes Offering. See Note 4, "Debt," for further discussion of these debt transactions.

Our pro forma consolidated balance sheet as of September 30, 2012 assumes our tax status conversion from a limited liability company to a corporation was effective on September 30, 2012 and, therefore, reflects the recognition of a net deferred tax liability of \$4.0 million, net of deferred tax assets and related valuation allowances.

Pro forma stockholders' equity is derived from our historical capital as of September 30, 2012 and has been computed to give effect to the pro forma recapitalization adjustments. As discussed above, we will be converted from a Delaware limited liability company into a Delaware corporation. Prior to the consummation of the conversion, each of the 1,000 common units of Boise Cascade will automatically be converted into _____ shares of Boise Cascade Company Common Stock.

The pro forma consolidated balance sheet also gives effect to our issuance and sale of _____ shares of common stock in the Offering at an assumed initial public offering price of \$ _____ per share, which is the midpoint of the price range listed on the cover of this prospectus, after deducting underwriting discounts and commissions and estimated offering expenses payable by us.

BC Holdings is controlled by Forest Products Holdings, L.L.C. ("FPH"). Equity units of FPH held by certain members of our management team are redeemable at the option of the holder in the event of death or disability or the sale of a division resulting in the termination of his or her employment. We have historically classified these units outside of our permanent equity because these units are subject to mandatory redemption (and may be subject to repayment by us) upon an event that is outside our control (i.e., death or disability). Our pro form consolidated balance sheet as of September 30, 2012 assumes we will reclassify these equity units as permanent equity because we will have no obligation to satisfy this redemption obligation on FPH's behalf following the Offering.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders
Boise Cascade, L.L.C.:

We have audited the accompanying consolidated balance sheets of Boise Cascade, L.L.C. and subsidiaries as of December 31, 2011 and 2010, and the related consolidated statements of income (loss), comprehensive income (loss), capital, and cash flows for each of the years in the three-year period ended December 31, 2011. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Boise Cascade, L.L.C. and subsidiaries as of December 31, 2011 and 2010, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2011, in conformity with U.S. generally accepted accounting principles.

Table of Contents

Boise Cascade, L.L.C.

Notes to Consolidated Financial Statements

1. Nature of Operations and Basis of Presentation

Nature of Operations

We are a privately held building products company headquartered in Boise, Idaho. Our operations began on October 29, 2004 (inception), when we acquired the forest products and paper assets of OfficeMax (the Forest Products Acquisition). As used in these consolidated financial statements, the terms "Boise Cascade," "we," and "our" refer to Boise Cascade, L.L.C., and its consolidated subsidiaries. Boise Cascade is 100% owned by Boise Cascade Holdings, L.L.C. (BC Holdings). We are a leading U.S. wholesale distributor of building products and one of the largest producers of engineered wood products (EWP) and plywood in North America.

We operate our business using three reportable segments: (1) Building Materials Distribution, which is a wholesale distributor of building materials, (2) Wood Products, which manufactures and sells EWP, plywood, particleboard, dimension lumber, and high-quality ponderosa pine lumber, and (3) Corporate and Other, which includes corporate support staff services, related assets and liabilities, and foreign exchange gains and losses. For more information, see Note 14, "Segment Information."

The following sets forth our corporate structure and equity ownership at December 31, 2011 (based on voting power):

Table of Contents

Boise Cascade, L.L.C.

Notes to Consolidated Financial Statements (Continued)

1. Nature of Operations and Basis of Presentation (Continued)

Basis of Presentation and Comparability of Data

In connection with the sale of our Paper and Packaging & Newsprint assets in 2008, we received both cash and securities. Immediately following the sale, we distributed the securities received in the transaction to BC Holdings. As a result of receiving stock in Boise Inc., BC Holdings had a significant indirect financial interest in the results of the sold businesses. The equity interest BC Holdings owned in Boise Inc. and the related-party transactions we had with Boise Inc. after the sale represented a significant continuing involvement. In 2010 and 2009, BC Holdings sold 18.3 million and 18.8 million Boise Inc. shares and transferred the net proceeds of \$86.1 million and \$83.2 million to us. The 18.3 million shares sold in 2010 represented BC Holdings' remaining investment in Boise Inc. Because of the disposition, Boise Inc. is no longer a related party. The related-party activity with Boise Inc. included in the Consolidated Financial Statements includes only those sales and costs and expenses transacted prior to March 2010, when Boise Inc. was a related party. As a result, beginning in March 2010, transactions with Louisiana Timber Procurement Company, L.L.C. (LTP) (discussed in Note 4, "Transactions With Related Parties") represent the only remaining significant related-party activity recorded in our consolidated financial statements.

2. Summary of Significant Accounting Policies

Principles of Consolidation

The consolidated financial statements include the accounts of Boise Cascade and its subsidiaries. Intercompany balances and transactions have been eliminated.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions about future events. These estimates and the underlying assumptions affect the amounts of assets and liabilities reported, disclosures about contingent assets and liabilities, and reported amounts of revenues and expenses. Such estimates include the valuation of accounts receivable, inventories, goodwill, intangible assets, and other long-lived assets; legal contingencies; guarantee obligations; indemnifications; assumptions used in retirement benefits; and vendor and customer rebates, among others. These estimates and assumptions are based on management's best estimates and judgment. Management evaluates its estimates and assumptions on an ongoing basis using historical experience and other factors, including the current economic environment, which management believes to be reasonable under the circumstances. We adjust such estimates and assumptions when facts and circumstances dictate. As future events and their effects cannot be determined with precision, actual results could differ significantly from these estimates. Changes in these estimates resulting from continuing changes in the economic environment will be reflected in the consolidated financial statements in future periods.

Revenue Recognition

We recognize revenue when the following criteria are met: persuasive evidence of an agreement exists, delivery has occurred or services have been rendered, our price to the buyer is fixed or determinable, and collectibility is reasonably assured. Delivery is not considered to have occurred until the customer takes title and assumes the risks and rewards of ownership. The timing of revenue

Table of Contents

Boise Cascade, L.L.C.

Notes to Consolidated Financial Statements (Continued)

2. Summary of Significant Accounting Policies (Continued)

recognition is dependent on shipping terms. Revenue is recorded at the time of shipment for terms designated free on board (fob) shipping point. For sales transactions designated fob destination, revenue is recorded when the product is delivered to the customer's delivery site. Fees for shipping and handling charged to customers for sales transactions are included in "Sales." For our Wood Products segment, costs related to shipping and handling are included in "Materials, labor, and other operating expenses." For our Building Materials Distribution segment, costs related to shipping and handling of \$79.9 million, \$77.9 million, and \$73.8 million are included in "Selling and distribution expenses" for the years ended December 31, 2011, 2010, and 2009, respectively.

Cash and Cash Equivalents

Cash equivalents consist of short-term investments that have a maturity of three months or less at the date of purchase. At December 31, 2011 and 2010, the majority of our cash and cash equivalents were invested in money market funds that are broadly diversified and invest in high-quality, short-duration securities, including commercial paper, certificates of deposit, U.S. government agency securities, and similar instruments. We have significant amounts of cash and cash equivalents that are in excess of federally insured limits. Though we have not experienced any losses on our cash and cash equivalents to date and we do not anticipate incurring any losses, we cannot be assured that we will not experience losses on our short-term investments.

Trade Accounts Receivables and Allowance for Doubtful Accounts

Trade accounts receivable are stated at the amount we expect to collect. Trade accounts receivable do not bear interest. We make ongoing estimates relating to the collectibility of our accounts receivable and maintain a reserve for estimated losses resulting from the inability of our customers to meet their financial obligations to us. At December 31, 2011 and 2010, we had \$2.1 million and \$2.5 million, respectively, recorded as allowances for doubtful accounts. In determining the amount of the reserve, we consider our historical level of credit losses, customer concentrations, current economic trends, and changes in customer creditworthiness. Our sales are principally to customers in the building products industry located in the United States and Canada. A significant portion of our sales are concentrated with a relatively small number of customers. In 2011, our top ten customers represented approximately 27% of sales. In order to manage credit risk, we consider customer concentrations and current economic trends and monitor the creditworthiness of significant customers based on ongoing credit evaluations. At both December 31, 2011 and 2010, the receivables from a single customer accounted for approximately 14% of total receivables. No other customer accounted for 10% or more of total receivables. Adjustments to the valuation allowance are charged to income. Trade accounts receivable balances that remain outstanding after we have used reasonable collection efforts are written off through a charge to the valuation allowance and a credit to accounts receivable.

The significant decline in new residential construction in the U.S. and disruptions in the capital markets have affected the ability of our customers and our customers' customers to fund their operations, which makes it difficult for us to estimate future credit losses. Our actual future losses from uncollectible accounts may differ materially from our current estimates. As additional information becomes known, we may change our estimates. In the event we determine that a change in the reserve is appropriate, we will record a charge to "Selling and distribution expenses" in our Consolidated Statements of Income (Loss) in the period we make such a determination.

Notes to Consolidated Financial Statements (Continued)

2. Summary of Significant Accounting Policies (Continued)

Fair Value

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value hierarchy under U.S. generally accepted accounting principles (GAAP) gives the highest priority to quoted market prices (Level 1) and the lowest priority to unobservable inputs (Level 3). In general, and where applicable, we use quoted prices in active markets for identical assets or liabilities to determine fair value (Level 1). If quoted prices in active markets for identical assets or liabilities are not available to determine fair value, we use quoted prices for similar assets and liabilities or inputs that are observable either directly or indirectly (Level 2). If quoted prices for identical or similar assets are not available or are unobservable, we may use internally developed valuation models, whose inputs include bid prices and third-party valuations utilizing underlying asset assumptions (Level 3).

As of December 31, 2011 and 2010, we held \$164.6 million and \$247.4 million, respectively, in money market funds that are measured at fair value on a recurring basis using Level 1 inputs. See Note 11, "Retirement and Benefit Plans", for the fair value measurements of our defined benefit plans' assets.

Financial Instruments

Our financial instruments are cash, accounts receivable, accounts payable, and long-term debt. Our cash is recorded at cost, which approximates fair value. The recorded values of accounts receivable and accounts payable approximate fair values based on their short-term nature. Our debt is predominately fixed-rate. At December 31, 2011, the book value of our fixed-rate debt was \$219.6 million, and the fair value was estimated to be \$218.1 million. The difference between the book value and the fair value is derived from the difference between the period-end market interest rate and the stated rate of our fixed-rate, long-term debt. We estimated the fair value based on quoted market prices for our debt.

We are exposed to financial risks such as changes in interest rates, foreign currency exchange rates, and commodity price risk. We employ a variety of practices to manage these risks, including operating and financing activities and, where deemed appropriate, the use of derivative instruments. At December 31, 2011 and 2010, we had no derivative instruments.

Vendor and Customer Rebates and Allowances

We receive rebates and allowances from our vendors under a number of different programs, including vendor marketing programs. At December 31, 2011 and 2010, we had \$2.8 million and \$3.1 million, respectively, of vendor rebates and allowances recorded in "Receivables, Other" on the Consolidated Balance Sheets. Rebates and allowances received from our vendors are recognized as a reduction of "Materials, labor, and other operating expenses" when the product is sold, unless the rebates and allowances are linked to a specific incremental cost to sell a vendor's product. Amounts received from vendors that are linked to specific selling and distribution expenses are recognized as a reduction of "Selling and distribution expenses" in the period the expense is incurred.

We also provide rebates to our customers and our customers' customers based on the volume of their purchases. We provide the rebates to increase the sell-through of our products. The rebates are recorded as a decrease in "Sales, Trade." At December 31, 2011 and 2010, we had \$15.6 million and

Table of Contents**Boise Cascade, L.L.C.****Notes to Consolidated Financial Statements (Continued)****2. Summary of Significant Accounting Policies (Continued)**

\$13.3 million, respectively, of rebates payable to our customers recorded in "Accrued liabilities, Other" on our Consolidated Balance Sheets.

Inventory Valuation

Inventories are valued at the lower of cost or market. Cost is based on the first-in, first-out (FIFO) method of inventory valuation or average cost, which approximates the FIFO method. Manufactured inventories include costs for materials, labor, and factory overhead. Log inventories include costs to harvest and deliver the timber.

Inventories include the following:

	December 31, 2011	December 31, 2010
	(thousands)	
Finished goods and work in process	\$ 223,605	\$ 210,547
Logs	41,243	33,816
Other raw materials and supplies	19,130	16,839
	\$ 283,978	\$ 261,202

Property and Equipment

Property and equipment are recorded at cost. Cost includes expenditures for major improvements and replacements and the amount of interest cost associated with significant capital additions. For the years ended December 31, 2011, 2010, and 2009, we did not capitalize any interest. We expense all repair and maintenance costs as incurred. When property and equipment are retired, sold, or otherwise disposed of, the asset's carrying amount and related accumulated depreciation are removed from the accounts and any gain or loss is included in income (loss). We use the straight-line method of depreciation.

Property and equipment consisted of the following asset classes with the following general range of estimated useful lives:

	December 31, 2011	December 31, 2010	General Range of Estimated Useful Lives in Years
	(thousands)		
Land	\$ 35,469	\$ 36,795	N/A
Buildings and improvements	117,155	112,952	10-40
Machinery and equipment	328,282	296,866	3-20
Construction in progress	5,812	17,523	N/A
	486,718	464,136	
Less accumulated depreciation	(220,262)	(190,567)	N/A
	\$ 266,456	\$ 273,569	

Table of Contents

Boise Cascade, L.L.C.

Notes to Consolidated Financial Statements (Continued)

2. Summary of Significant Accounting Policies (Continued)

Timber Deposits

We are a party to a number of long-term log and fiber supply agreements. At December 31, 2011, our total obligation for log and fiber purchases under contracts with third parties was approximately \$230 million based on fixed contract pricing or first quarter 2012 pricing for variable contracts. Under most of these log and fiber supply agreements, we have the right to cancel or reduce our commitments in the event of a mill curtailment or shutdown. Future purchase prices under most of these agreements will be set quarterly or semiannually based on regional market prices. Our log and fiber obligations are subject to change based on, among other things, the effect of governmental laws and regulations, our manufacturing operations not operating in the normal course of business, log and fiber availability, and the status of environmental appeals. Except for deposits required pursuant to wood supply contracts, these obligations are not recorded in our consolidated financial statements until contract payment terms take effect.

Long-Lived Asset Impairment

We review long-lived assets for impairment when events or changes in circumstances indicate that the carrying amount of assets may not be recoverable. An impairment of long-lived assets exists when the carrying value is not recoverable through future undiscounted cash flows from operations and when the carrying value of an asset or asset group exceeds its fair value.

Goodwill

We maintain two reporting units for purposes of our goodwill impairment testing, Building Materials Distribution and Wood Products, which are the same as our operating segments discussed in Note 14, "Segment Information." We test the goodwill in each of our reporting units for impairment annually and when events or changes in circumstances indicate that the carrying value of the asset may exceed fair value. We completed our annual assessment in fourth quarter 2011 and determined that there was no impairment. See Note 8, "Goodwill and Intangible Assets," for additional information.

Asset Retirement Obligations

We accrue for asset retirement obligations in the period in which they are incurred if sufficient information is available to reasonably estimate the fair value of the obligation. When we record the liability, we capitalize the cost by increasing the carrying amount of the related long-lived asset. Over time, the liability is accreted to its settlement value, and the capitalized cost is depreciated over the useful life of the related asset. Upon settlement of the liability, we will recognize a gain or loss for any difference between the settlement amount and the liability recorded.

At December 31, 2011 and 2010, we had \$0.2 million and \$0.4 million, respectively, of asset retirement obligations recorded in "Other, Other long-term liabilities" on our Consolidated Balance Sheets. At December 31, 2011, these liabilities related primarily to landfill closure costs. The liabilities are based on the best estimate of current costs and are updated periodically to reflect current technology, laws and regulations, inflation, and other economic factors. We do not have any assets legally restricted for purposes of settling asset retirement obligations.

We have additional asset retirement obligations with indeterminate settlement dates. The fair value of these asset retirement obligations cannot be estimated due to the lack of sufficient information

Table of Contents

Boise Cascade, L.L.C.

Notes to Consolidated Financial Statements (Continued)

2. Summary of Significant Accounting Policies (Continued)

to estimate the settlement dates of the obligations. These asset retirement obligations include, for example, (i) removal and disposal of potentially hazardous materials on equipment and/or an operating facility if the equipment and/or facility were to undergo major maintenance, renovation, or demolition; (ii) wastewater treatment ponds that may be required to be drained and/or cleaned if the related operating facility is closed; and (iii) storage sites or owned facilities for which removal and/or disposal of chemicals and other related materials are required if the operating facility is closed. We will recognize a liability in the period in which sufficient information becomes available to reasonably estimate the fair value of these obligations.

Pension and Other Postretirement Benefits

We record pension and postretirement net periodic benefit costs and liabilities in accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 715, Compensation Retirement Benefits. Several estimates and assumptions are required to record these costs and liabilities, including discount rates, expected return on plan assets, expected rate of compensation increases, retirement and mortality rates, expected contributions, and other factors. We review and update these assumptions annually unless a plan curtailment or other event occurs requiring that we update the estimates on an interim basis. See Note 11, "Retirement and Benefit Plans," for additional information related to our pension and other postretirement benefit plans. While we believe that the assumptions used to measure our pension and other postretirement obligations are reasonable, differences in actual experience or changes in assumptions may materially affect our pension and other postretirement obligations and future expense.

Deferred Software Costs

We defer internal-use software costs that benefit future years. These costs are amortized using the straight-line method over the expected life of the software, typically three to five years. "Other assets" in the Consolidated Balance Sheets includes \$4.6 million and \$3.5 million of deferred software costs at December 31, 2011 and 2010, respectively. For the years ended December 31, 2011, 2010, and 2009, amortization of deferred software costs was \$1.0 million, \$0.8 million, and \$0.6 million, respectively.

Taxes Collected

We present taxes collected from customers and remitted to governmental authorities on a net basis in our Consolidated Statements of Income (Loss).

Labor Concentration and Unions

As of December 31, 2011, we had approximately 4,280 employees. Approximately 32% of these employees work pursuant to collective bargaining agreements. As of December 31, 2011, we had ten collective bargaining agreements, of which five were up for renewal in 2012 and one agreement, covering 99 employees at our AllJoist facility in Canada, expired on December 31, 2011. We are continuing to work under the expired contract, pending negotiations. Negotiations related to this expired contract are ongoing. We do not expect material increases in our costs or work interruptions during the course of the negotiations. Nevertheless, if our expectations are not accurate, we could experience a material labor disruption or significantly increased labor costs at the AllJoist facility, which

Table of Contents

Boise Cascade, L.L.C.

Notes to Consolidated Financial Statements (Continued)

2. Summary of Significant Accounting Policies (Continued)

could prevent us from meeting customer demand or reduce our sales and profitability. On August 2, 2012, we reached agreement on a four-year contract covering four Wood Products manufacturing facilities and one Building Materials Distribution location in the Pacific Northwest. The new agreements covering 623 current employees expire on May 31, 2016. We do not have any other labor negotiations scheduled for 2012.

Self-insurance

We are self-insured for certain losses related to workers' compensation and medical claims as well as general and auto liability. The expected ultimate cost for claims incurred are recognized as liabilities in the Consolidated Balance Sheets and are estimated based principally on an analysis of historical claims data and estimates of claims incurred but not reported. Losses are accrued and charged to operations when it is probable that a loss has been incurred and the amount can be reasonably estimated. We maintain third-party stop-loss insurance policies to cover these liability costs in excess of predetermined retained amounts, with the exception of medical claims, which are fully retained by us. Costs related to the administration of the plans and related claims are expensed as incurred. At December 31, 2011 and 2010, self-insurance related liabilities of \$5.9 million and \$5.6 million were classified within "Accrued liabilities, Compensation and benefits," \$1.7 million and \$1.5 million were classified within "Accrued liabilities, Other," and \$9.7 million and \$9.9 million were classified within "Other long-term liabilities" on our Consolidated Balance Sheets, respectively.

New and Recently Adopted Accounting Standards

In July 2012, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2012-02, *Intangibles—Goodwill and Other (Topic 350): Testing Indefinite-Lived Intangible Assets for Impairment*, which gives entities the option first to assess qualitative factors to determine whether the existence of events and circumstances indicates that it is more likely than not that the indefinite-lived intangible asset is impaired. If, after assessing the totality of events and circumstances, an entity concludes that it is not more likely than not that the indefinite-lived intangible asset is impaired, then the entity is not required to take further action. However, if an entity concludes otherwise, then it is required to determine the fair value of the indefinite-lived intangible asset and perform the quantitative impairment test by comparing the fair value with the carrying amount. The amended guidance is effective for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012, with early adoption permitted. We do not believe the adoption of this guidance will have a material impact on our consolidated financial statements.

In September 2011, the FASB issued Accounting Standards Update (ASU) 2011-09, *Compensation—Retirement Benefits—Multiemployer Plans (Subtopic 715-80): Disclosures about an Employer's Participation in a Multiemployer Plan*, which increases the quantitative and qualitative disclosures an employer is required to provide about its participation in significant multiemployer plans that offer pension or other postretirement benefits. The objective is to enhance transparency about significant multiemployer plans in which an employer participates, the level of the employer's participation in those plans, the financial health of the plans, and the nature of the employer's commitments to the plans. ASU 2011-09 was effective for us as of December 31, 2011, but the adoption of this guidance did not have a material impact on our consolidated financial statements and associated disclosures.

Table of Contents

Boise Cascade, L.L.C.

Notes to Consolidated Financial Statements (Continued)

2. Summary of Significant Accounting Policies (Continued)

In September 2011, the FASB issued ASU 2011-08, *Intangibles – Goodwill and Other (Topic 350): Testing Goodwill for Impairment*, which gives entities testing goodwill for impairment the option of performing a qualitative assessment before calculating the fair value of a reporting unit in step 1 of the goodwill impairment test. If entities determine, on the basis of qualitative factors, that the fair value of a reporting unit is more likely than not less than the carrying amount, the two-step impairment test would be required. Otherwise, further testing would not be needed. We adopted the provisions of this guidance January 1, 2012, and it had no effect on our financial position and results of operations.

In June 2011, the FASB issued ASU 2011-05, *Comprehensive Income (Topic 220): Presentation of Comprehensive Income*, which amends current comprehensive income guidance. This accounting update eliminates the option to present the components of other comprehensive income as part of the statement of equity, among other amendments. Instead, the company must report comprehensive income in either a single continuous statement of comprehensive income which contains two sections, net income and other comprehensive income, or in two separate but consecutive statements. On December 23, 2011, the FASB issued ASU 2011-12, *Comprehensive Income (Topic 220): Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05*, which defers the ASU 2011-05 requirement to present reclassification adjustments out of accumulated other comprehensive income by component in both the statement in which net income is presented and the statement in which other comprehensive income is presented (for both interim and annual financial statements). This requirement is being further deliberated by the FASB. We adopted this guidance retrospectively as of January 1, 2012, by adding the Consolidated Statements of Comprehensive Income (Loss) to our consolidated financial statements. In addition, accumulated other comprehensive loss was reclassified from equity units to a separate line in the Consolidated Balance Sheets.

In May 2011, the FASB issued ASU 2011-04, *Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and International Financial Reporting Standards (IFRS)*. This ASU was issued to provide largely identical guidance about fair value measurement and disclosure requirements for entities that disclose the fair value of an asset, a liability, or an instrument classified in shareholders' equity in their consolidated financial statements as that provided in the International Accounting Standards Board's new IFRS 13, Fair Value Measurement. This ASU does not extend the use of fair value but, rather, provides guidance about how fair value should be applied where it already is required or permitted under GAAP. This guidance is to be applied prospectively for interim and annual periods beginning after December 15, 2011. Early adoption is not permitted. In the period of adoption, a reporting entity will be required to disclose a change, if any, in valuation technique and related inputs that results from applying the ASU to quantify the total effect, if practicable. The adoption of this guidance did not have a material impact on our financial statement disclosures.

There were no other accounting standards recently issued that had or are expected to have a material impact on our consolidated financial statements and associated disclosures.

Reclassifications

Certain amounts in prior years' consolidated financial statements have been reclassified to conform with the current year's presentation, none of which were considered material.

Table of Contents

Boise Cascade, L.L.C.

Notes to Consolidated Financial Statements (Continued)

3. Outsourcing Services Agreement

Under an Outsourcing Services Agreement, Boise Inc. provides a number of corporate staff services to us at cost. These services include information technology, accounting, and human resource transactional services. The agreement, as extended, expires on February 22, 2014. The agreement automatically renews for successive one-year terms unless either party provides notice of termination to the other party at least 12 months in advance of the expiration date. The Outsourcing Services Agreement gives us (but not Boise Inc.) the right to terminate all or any portion of the services provided to us on 30 days' notice. Total expenses incurred under the Outsourcing Services Agreement, including both related party and nonrelated party, were \$14.7 million, \$14.4 million, and \$14.9 million for the years ended December 31, 2011, 2010, and 2009, respectively. The majority of these expenses are recorded in "General and administrative expenses" in our Consolidated Statements of Income (Loss) or "General and administrative expenses from related party" for the period Boise Inc. was a related party. See Note 4, "Transactions With Related Parties," for more information.

4. Transactions With Related Parties

In early March 2010, BC Holdings sold its remaining investment in Boise Inc. and because of the disposition, Boise Inc. is no longer a related party. The 2010 related-party activity with Boise Inc. in the consolidated financial statements includes only those sales and costs and expenses transacted prior to March 2010, when Boise Inc. was a related party. Beginning in March 2010, transactions with Louisiana Timber Procurement Company, L.L.C. (LTP) represent the only significant related-party activity recorded in our consolidated financial statements. LTP is an unconsolidated variable-interest entity that is 50% owned by us, and 50% owned by Boise Inc. LTP procures sawtimber, pulpwood, residual chips, and other residual wood fiber to meet the wood and fiber requirements of Boise Inc. and Boise Cascade. We are not the primary beneficiary of LTP, as we do not have power to direct the activities that most significantly affect the economic performance of LTP. Accordingly, we do not consolidate LTP's results in our financial statements.

Sales

Related-party sales to LTP from our Wood Products segment in our Consolidated Statements of Income (Loss) were \$18.8 million, \$20.4 million, and \$16.4 million during the years ended December 31, 2011, 2010, and 2009 respectively. We also recorded \$4.9 million and \$21.5 million of related-party sales to Boise Inc. (for the period they were a related party) during the years ended December 31, 2010 and 2009, respectively. These pulpwood and chip sales were made at prices designed to approximate market.

Costs and Expenses

Related-party fiber purchases from LTP were \$40.1 million, \$33.0 million, and \$25.5 million during the years ended December 31, 2011, 2010, and 2009, respectively. During the years ended December 31, 2010 and 2009, we also recorded \$0.3 million and \$2.3 million, respectively, of related-party expenses for transportation services from Boise Inc. (for the period they were a related party). We purchased the fiber and transportation services at prices designed to approximate market. These costs are recorded in "Materials, labor, and other operating expenses from related parties" in our Consolidated Statements of Income (Loss).

Table of Contents**Boise Cascade, L.L.C.****Notes to Consolidated Financial Statements (Continued)****4. Transactions With Related Parties (Continued)**

During the years ended December 31, 2010 and 2009, we recorded the following expenses from the Outsourcing Services Agreement as related-party expenses in our Consolidated Statements of Income (Loss). As mentioned above, after we sold our remaining investment in Boise Inc. in March 2010, expenses incurred under the Outsourcing Services Agreement were no longer related-party and are not included in the table below.

	Year Ended December 31	
	2010	2009
	(thousands)	
Materials, labor, and other operating expenses from related parties	\$ 332	\$ 2,099
Selling and distribution expenses	456	2,670
General and administrative expenses from related party	1,576	10,169
	\$ 2,364	\$ 14,938

Tax Distributions

We make cash distributions to permit the members of BC Holdings and affiliates to pay income taxes. For information on our tax distributions see Note 7, "Income Taxes."

5. Other (Income) Expense

Other (income) expense includes miscellaneous income and expense items. The components of "Other (income) expense, net" in the Consolidated Statements of Income (Loss) are as follows:

	Year Ended December 31		
	2011	2010	2009
	(thousands)		
Facility closure and curtailments(a)	\$ 1,292	\$	\$ 3,184
Litigation settlement(b)		(4,613)	
Changes in pension plans (See Note 11)			(747)
Other, net(c)	1,903	(11)	(1,595)
	\$ 3,195	\$ (4,624)	\$ 842

(a)

In 2011, we permanently closed a laminated beam manufacturing plant in Emmett, Idaho.

In 2009, we closed the lumber manufacturing facility in La Grande, Oregon, and recorded \$3.1 million of expense in "Other (income) expense, net," \$5.2 million of accelerated depreciation in "Depreciation and amortization," and \$0.6 million of expenses in "Materials, labor, and other operating expenses" in our Consolidated Statement of Income (Loss).

(b)

In 2010, we recorded \$4.6 million of income for cash received from a litigation settlement related to vendor product pricing.

(c)

In 2011, we recorded noncash asset write-downs of \$2.0 million.

Table of Contents**Boise Cascade, L.L.C.****Notes to Consolidated Financial Statements (Continued)****6. Leases**

We lease a portion of our distribution centers as well as other property and equipment under operating leases. Substantially all lease agreements have fixed payment terms based on the passage of time. Some lease agreements provide us with the option to purchase the leased property. Additionally, some agreements contain renewal options ranging from two to five years, with fixed payment terms similar to those in the original lease agreements.

For purposes of determining straight-line rent expense, the lease term is calculated from the date we first take possession of the facility, including any periods of free rent and any renewal option periods we are reasonably assured of exercising. Rental expense for operating leases was \$14.5 million, \$14.2 million, and \$13.1 million for the years ended December 31, 2011, 2010, and 2009. Sublease rental income was not material in any of the periods presented.

As of December 31, 2011, our minimum lease payment requirements for noncancelable operating leases with remaining terms of more than one year are as follows (in thousands):

2012	\$ 12,086
2013	11,703
2014	10,980
2015	10,294
2016	8,441
Thereafter	41,444
Total	\$ 94,948

These future minimum lease payment requirements have not been reduced by sublease rentals due in the future under noncancelable subleases. Minimum sublease income expected to be received in the future is not material.

7. Income Taxes*Tax Distributions*

We are a limited liability company, and the majority of our businesses and assets are held and operated by limited liability companies, which are not subject to entity-level federal or state income taxation. The income taxes with respect to these operations are payable by BC Holdings' equityholders in accordance with their respective ownership percentages. We make cash distributions to BC Holdings to permit the members of BC Holdings and affiliates to pay these taxes. In 2011 and 2010, we did not make any cash tax distributions. For the year ended December 31, 2009, we made \$10.7 million of cash distributions to BC Holdings, of which \$8.1 million was paid to Forest Products Holdings, L.L.C. (FPH). During 2009, FPH in turn paid \$5.2 million to Madison Dearborn Partners (MDP), BC Holdings' equity sponsor, and \$2.9 million to management investors. During 2009, BC Holdings also paid \$2.6 million to OfficeMax to fund their tax obligations related to their investments in BC Holdings. Both our senior credit facilities and the indenture governing our senior subordinated notes permit these distributions.

Table of Contents

Boise Cascade, L.L.C.

Notes to Consolidated Financial Statements (Continued)

7. Income Taxes (Continued)

Income Tax (Provision) Benefit

Our income tax provision generally consists of income taxes payable to states that do not allow for the income tax liability to be passed through to our equityholders, as well as income taxes payable by our separate subsidiaries that are taxed as corporations. For the years ended December 31, 2011, 2010, and 2009, income tax expense was \$0.2 million, \$0.3 million, and \$0.7 million, respectively.

At December 31, 2011 and 2010, our tax basis was \$167.5 million and \$84.9 million, respectively, higher than the reported amount of net assets recorded on our Consolidated Balance Sheets. In 2011 and 2010, the difference related primarily to changes in pension obligations.

Boise Cascade Wood Products Holdings Corp., a wholly owned, fully consolidated operating entity, has an investment in foreign subsidiaries. At December 31, 2011 and 2010, the foreign subsidiaries had \$13.6 million and \$17.9 million, respectively, of deferred tax assets. The deferred tax assets resulted primarily from net operating losses and were fully offset by a valuation allowance. In addition, at both December 31, 2011 and 2010, Boise Cascade Wood Products Holdings Corp. had \$16.0 million of deferred tax assets related to the capital loss carryforward from the sale of our subsidiaries in Brazil and the United Kingdom. The capital loss carryforward was fully offset by a valuation allowance, because it is more likely than not that we will not be able to utilize the capital loss carryforward before it expires in 2013.

In 2011, 2010, and 2009, we paid \$0.3 million, \$0.2 million, and \$0.4 million, respectively, of income taxes, net of other refunds received.

Income Tax Uncertainties

BC Holdings, or one of its subsidiaries, files federal income tax returns in the U.S. and Canada and various state and foreign income tax returns in the major state jurisdictions of Alabama, California, Idaho, Oregon, Texas, and Washington. We are subject to tax examinations from 2008 to present.

We recognize tax liabilities and adjust these liabilities when our judgment changes as a result of the evaluation of new information not previously available or as new uncertainties occur. In third quarter 2007, the Canadian Revenue Agency began an audit of Boise AllJoist for tax years 2005 and 2006, which is now closed. At December 31, 2009, we increased the amount of our unrecognized tax benefit by \$5.8 million as a result of uncertainty surrounding this audit. We charged the \$5.8 million of unrecognized tax benefits to income tax expense, with an offsetting adjustment to the valuation allowances on deferred tax assets related to Boise AllJoist's net operating losses. As a result, the net impact on the 2009 Consolidated Statement of Income (Loss) was zero. The audit was closed in 2010 with no additional changes, and because of sufficient net operating loss carryforwards from prior years, no cash payments were required. After closing the audit, we have no unrecognized tax benefits recorded on our Consolidated Balance Sheet, and we do not expect a significant change to the amount of unrecognized tax benefits over the next 12 months.

Table of Contents**Boise Cascade, L.L.C.****Notes to Consolidated Financial Statements (Continued)****7. Income Taxes (Continued)**

A reconciliation of the unrecognized tax benefits is as follows:

	Year Ended December 31	
	2010	2009
	(thousands)	
Unrecognized tax benefits, beginning of year	\$ 5,792	\$
Gross increases related to prior-period tax positions		5,792
Settlements	(5,792)	
Unrecognized tax benefits, end of year	\$	\$ 5,792

For the years ended December 31, 2011, 2010, and 2009, we recognized an insignificant amount of interest and penalties related to taxes.

8. Goodwill and Intangible Assets

Goodwill represents the excess of the purchase price and related costs over the value assigned to the net tangible and intangible assets of businesses acquired.

We test goodwill and intangible assets with indefinite lives for impairment when events or changes in circumstances indicate that the carrying value of the asset may exceed fair value. Additionally, we test for impairment annually in the fourth quarter of each year using a discounted cash flow approach. We also evaluate the remaining useful lives of our finite-lived purchased intangible assets to determine whether any adjustments to the useful lives are necessary. We maintain two reporting units for purposes of our goodwill and intangible asset impairment testing, Building Materials Distribution and Wood Products, which are the same as our operating segments discussed in Note 14, "Segment Information." We completed our annual assessment in fourth quarter 2011 and determined there was no impairment. In conducting our impairment analysis, we utilize the discounted cash flow approach that estimates the projected future cash flows, discounted to present value using a discount rate reflecting market participant assumptions with respect to capital structure and access to capital markets.

The carrying amount of our goodwill by segment is as follows:

	Building Materials Distribution	Wood Products	Corporate and Other	Total
	(thousands)			
Balance at December 31, 2011 and 2010	\$ 5,593	\$ 6,577	\$	\$ 12,170

At December 31, 2011 and 2010, intangible assets represent the values assigned to trade names and trademarks and a noncompete agreement. The trade names and trademarks have indefinite lives and are not amortized. The noncompete agreement was amortized over two years.

Table of Contents**Boise Cascade, L.L.C.****Notes to Consolidated Financial Statements (Continued)****8. Goodwill and Intangible Assets (Continued)**

Intangible assets consisted of the following:

	December 31, 2011		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
	(thousands)		
Trade names and trademarks	\$ 8,900	\$	\$ 8,900

	\$ 8,925	\$ (25)	\$ 8,900

	December 31, 2010		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
	(thousands)		
Trade names and trademarks	\$ 8,900	\$	\$ 8,900
Noncompete agreement	25	(19)	6
	\$ 8,925	\$ (19)	\$ 8,906

9. Debt

At December 31, 2011 and 2010, our long-term debt consisted of the following:

	December 31, 2011	December 31, 2010
	(thousands)	
Asset-based revolving credit facilities	\$	\$
7.125% senior subordinated notes	219,560	219,560
Long-term debt	219,560	219,560
Current portion of long-term debt	(25,000)	
Long-term debt, less current portion	\$ 194,560	\$ 219,560

Asset-Based Revolving Credit Facilities

On July 13, 2011, Boise Cascade and our principal operating subsidiaries, Boise Cascade Wood Products, L.L.C., and Boise Cascade Building Materials Distribution, L.L.C., as borrowers, and Boise Cascade Wood Products Holdings Corp., as guarantor, entered into a new \$250 million senior secured asset-based revolving credit facility (New Revolving Credit Facility) with Wells Fargo Capital Finance, L.L.C. (Wells Fargo), as agent, and the banks named therein as lenders. The New Revolving Credit Facility replaced our previous senior secured asset-based revolving credit facility with Bank of America (Prior Revolving Credit Facility) discussed below. Borrowings under the New Revolving Credit Facility are constrained by a borrowing base formula dependent upon levels of eligible receivables and inventory reduced by outstanding borrowings and letters of credit (Availability). On September 7, 2012, we entered into a First Amendment to Credit Agreement, which increased the aggregate lending commitments under the New Revolving Credit Facility to \$300 million. Other key terms of the Credit Agreement were unchanged by the Amendment.

Table of Contents

Boise Cascade, L.L.C.

Notes to Consolidated Financial Statements (Continued)

9. Debt (Continued)

The New Revolving Credit Facility has a maturity date of July 13, 2016. The New Revolving Credit Facility is secured by a first-priority security interest in substantially all of our assets, except for property and equipment. The proceeds of borrowings under the agreement are available for working capital and other general corporate purposes.

Interest rates under the New Revolving Credit Facility are based, at the company's election, on either the London Interbank Offered Rate (LIBOR) or a base rate, as defined in the agreement, plus a spread over the index elected that ranges from 1.75% to 2.25% for loans based on LIBOR and from 0.75% to 1.25% for loans based on the base rate. The spread is determined on the basis of a pricing grid that results in a higher spread as average quarterly Availability declines. Letters of credit are subject to a 0.15% fronting fee payable to the issuing bank and a fee payable to the lenders equal to the LIBOR margin rate. In addition, we are required to pay an unused commitment fee at a rate ranging from 0.375% to 0.50% per annum (based on facility utilization) of the average unused portion of the lending commitments.

The New Revolving Credit Facility contains customary nonfinancial covenants, including a negative pledge covenant and restrictions on new indebtedness, investments, distributions to equityholders, asset sales, and affiliate transactions, the scope of which are dependent on the Availability existing from time to time. The New Revolving Credit Facility also contains a requirement that we meet a 1:1 fixed-charge coverage ratio (FCCR) if Availability falls below the greater of \$31.25 million or 12.5% of the aggregate lending commitments. Availability exceeded the minimum threshold amounts required for testing of the FCCR at all times since entering into the New Revolving Credit Facility, and Availability at December 31, 2011, was \$173.1 million. At December 31, 2011, our aggregate liquidity from unrestricted cash and cash equivalents and unused borrowing capacity (net of the Availability threshold amount for testing of the FCCR, as applicable) under the New Revolving Credit Facility totaled \$324.3 million.

The Prior Revolving Credit Facility provided up to \$170 million in borrowing capacity. On April 1, 2010, we borrowed \$45.0 million under the Prior Revolving Credit Facility, bringing the total amount outstanding to \$120.0 million. On April 30, 2010, we repaid the \$120.0 million.

Interest rates under the Prior Revolving Credit Facility were based on either the prime rate plus 1.00% to 1.50% or LIBOR plus 2.50% to 3.00%, subject to quarterly adjustment based on the average availability under the Prior Revolving Credit Facility during the prior quarter. Letters of credit were subject to a 0.15% fronting fee payable to the issuing bank and a fee payable to the lenders. The Prior Revolving Credit Facility also contained borrowing base limitations and customary financial and nonfinancial covenants and imposed unused commitment fees on the amount of the total facility that was not drawn down on a quarterly basis.

At December 31, 2011 and 2010, we had no borrowings outstanding under the credit facilities and approximately \$11.3 million and \$13.8 million, respectively, of letters of credit outstanding. These letters of credit reduced our borrowing capacity under the credit facilities by an equivalent amount. The minimum and maximum borrowings under the credit facilities were both zero during the year ended December 31, 2011. On October 12, 2012, we borrowed \$50.0 million under the New Revolving Credit Facility to partially fund the redemption of \$75.0 million of our senior subordinated notes, as discussed further below.

Table of Contents

Boise Cascade, L.L.C.

Notes to Consolidated Financial Statements (Continued)

9. Debt (Continued)

Senior Subordinated Notes

In October 2004, we issued \$400.0 million of 7.125% senior subordinated notes due in 2014. In July 2005, we completed an exchange offer whereby all of our senior subordinated notes were exchanged for registered securities with identical terms (other than terms relating to registration rights) to the notes issued in October 2004. We could redeem all or part of the notes at any time at redemption prices set forth in the indenture governing the notes (Indenture). Redemption prices reduced to par value in October 2012. With the proceeds from the sale of our Paper and Packaging & Newsprint assets, we repurchased \$160.0 million of the notes at par in April 2008. In 2010, we repurchased \$8.6 million of senior subordinated notes and recorded an insignificant gain. In 2009, we repurchased \$11.9 million of senior subordinated notes and recorded a \$6.0 million gain in "Gain on repurchase of long-term debt" in our Consolidated Statement of Income (Loss). On October 15, 2012, we redeemed \$75.0 million of the notes at par value with \$25.0 million of cash on hand and \$50.0 million borrowed under our New Revolving Credit Facility. On October 22, 2012, the trustee under the senior subordinated notes indenture, at our request, irrevocably called for redemption on November 21, 2012, all of our outstanding senior subordinated notes. Simultaneously, we irrevocably deposited \$144.6 million of the proceeds from our senior notes offering described below, with our senior subordinated notes trustee, in an amount sufficient to pay and discharge the entire indebtedness on the senior subordinated notes for principal, plus \$1.0 million of accrued and unpaid interest, to November 21, 2012. The senior subordinated notes trustee acknowledged that as of October 22, 2012, our obligations and those of the guarantors were discharged and satisfied, and neither we nor the guarantors generally had any further obligations to the senior subordinated notes trustee or the holders of our senior subordinated notes. The senior subordinated notes trustee further acknowledged the automatic release of the guarantees of the guarantors under our senior subordinated notes indenture. Upon such satisfaction and discharge, our senior subordinated notes indenture generally ceased to be of further effect.

Debt Refinancing

On October 22, 2012, Boise Cascade and its wholly owned subsidiary, Boise Cascade Finance Corporation (together, the Co-issuers), issued a \$250 million aggregate principal amount of 6.375% senior notes due November 1, 2020 (Senior Notes) through a private placement that is exempt from the registration requirements of the Securities Act of 1933 (Securities Act), as amended. The Senior Notes pay interest semiannually in arrears on May 1 and November 1, commencing on May 1, 2013. As a result of this refinancing, we extended the maturity of our debt and lowered our interest rate. The Senior Notes are guaranteed by each of Boise Cascade's existing and future direct or indirect domestic subsidiaries that is a guarantor or co-borrower under our New Revolving Credit Facility, other than Boise Cascade Finance Corporation. The Senior Notes are also guaranteed by BC Holdings, until such time, if ever, that Boise Cascade's common stock is listed on any national securities exchange.

Following the sale of the Senior Notes, we used a portion of the net proceeds of the sale to repay the senior subordinated notes at par plus accrued and unpaid interest through the redemption date. The remaining proceeds will be available for general corporate purposes.

In connection with the issuance of the Senior Notes, the Co-issuers entered into a registration rights agreement, dated as of October 22, 2012 (Senior Notes Registration Rights Agreement). The Senior Notes Registration Rights Agreement requires us to register under the Securities Act the Senior Notes having substantially identical terms to those of the Senior Notes (Exchange Notes) and to

Table of Contents

Boise Cascade, L.L.C.

Notes to Consolidated Financial Statements (Continued)

9. Debt (Continued)

complete an exchange of the privately placed Senior Notes for the publicly registered Exchange Notes on or prior to October 21, 2013 or, in certain circumstances, to file and keep effective a shelf registration statement for resale of the Senior Notes. If we fail to satisfy these obligations, we will pay additional interest up to 0.25% per annum to holders of the Senior Notes for the first 90-day period immediately following such date, and by an additional 0.25% per annum with respect to each subsequent 90-day period, up to a maximum rate of 1.0% per annum.

The Senior Notes are senior unsecured obligations and rank equally with all of the Co-issuers' and guarantors' existing and future senior indebtedness, senior to all of their existing and future subordinated indebtedness, effectively subordinated to all of their present and future senior secured indebtedness (including all borrowings with respect to our New Revolving Credit Facility to the extent of the value of the assets securing such indebtedness), and structurally subordinated to the indebtedness of any subsidiaries that do not guarantee the Senior Notes.

The terms of the indenture governing the Senior Notes, among other things, limit the ability of the Co-issuers and certain Boise Cascade subsidiaries to: incur additional debt; declare or pay dividends; redeem stock or make other distributions to stockholders; make investments; create liens on assets; consolidate, merge, or transfer substantially all of their assets; enter into transactions with affiliates; and sell or transfer certain assets.

The indenture governing the Senior Notes provides for customary events of default, which include (subject in certain cases to customary grace and cure periods and notification requirements), among others: nonpayment of principal or interest; breach of other agreements in the indenture governing the Senior Notes; defaults in failure to pay certain other indebtedness; the rendering of judgments to pay certain amounts of money against the Co-issuers, the guarantors, or certain Boise Cascade subsidiaries; the failure of certain guarantees to be enforceable; and certain events of bankruptcy or insolvency.

Cash Paid for Interest

For the years ended December 31, 2011, 2010, and 2009, cash payments for interest, net of interest capitalized, were \$16.7 million, \$18.6 million, and \$20.0 million, respectively.

10. Financial Instrument Risk

In the normal course of business, we are exposed to financial risks such as changes in interest rates, foreign currency exchange rates, and commodity price risk. In 2011, 2010, and 2009, we did not use derivative instruments.

Interest Rate Risk

When we have loan amounts outstanding on our New Revolving Credit Facility, we are exposed to interest rate risk arising from fluctuations in interest rates. In 2011, 2010, and 2009, we did not use any interest rate swap contracts to manage this risk.

Foreign Currency Risk

We have sales in countries outside the United States. As a result, we are exposed to movements in foreign currency exchange rates, primarily in Canada, but we do not believe our

Table of Contents

Boise Cascade, L.L.C.

Notes to Consolidated Financial Statements (Continued)

10. Financial Instrument Risk (Continued)

exposure to currency fluctuations is significant. In 2011, 2010, and 2009, we did not use any foreign currency hedges to manage this risk.

Commodity Price Risk

Many of the products we manufacture or purchase and resell and some of our key production inputs are commodities whose price is determined by the market's supply and demand for such products. Price fluctuations in our selling prices and key costs have a significant effect on our financial performance. The markets for most of these commodities are cyclical and are affected by factors such as global economic conditions, including the strength of the U.S. housing market, changes in or disruptions to industry production capacity, changes in inventory levels, and other factors beyond our control. In 2011, 2010, and 2009, we did not manage commodity price risk with derivative instruments.

11. Retirement and Benefit Plans

Our retirement plans consist of noncontributory defined benefit pension plans, including supplemental nonqualified pension plans for certain salaried employees, contributory defined contribution savings plans, a deferred compensation plan, and postretirement benefit plans.

Defined Benefit Plans

Some of our employees are covered by noncontributory defined benefit pension plans. On November 9, 2011, we amended our defined benefit pension plan for hourly employees of Plan B (Plan B) to freeze Plan B so that no future benefits accrue after December 31, 2011. The benefit for hourly employees is generally based on a fixed amount per year of service (years of service for Plan B participants to be determined as of December 31, 2011). In connection with this amendment, we recognized a \$0.1 million noncash curtailment loss during the year ended December 31, 2011.

On March 18, 2009, we amended our defined benefit plan for salaried employees (Salaried Plan) to freeze the Salaried Plan so that no future benefits accrue after December 31, 2009. The amendment also froze benefits in our nonqualified salaried pension plans. When frozen, the pension benefit for salaried employees was based primarily on the employees' years of service and highest five-year average compensation (years of service and compensation for active employees to be determined as of December 31, 2009). In connection with this amendment, we recognized a net \$0.7 million noncash curtailment gain related to our nonqualified salaried pension plans. We recorded the gain in "Other (income) expense, net" in our Consolidated Statement of Income (Loss) for the year ended December 31, 2009. The curtailment gain associated with the amendment to the Salaried Plan was applied to unrecognized losses in the plan, resulting in no immediate gain recognition related to the Salaried Plan freeze.

As a result of the plan amendments noted above, only certain hourly employees continue to accrue benefits after December 31, 2011. Also, in connection with the Plan B amendment, Plan B was merged into the Salaried Plan to simplify administration of the plans, effective January 1, 2012.

Defined Contribution Plans

We sponsor contributory defined contribution savings plans for most of our salaried and hourly employees, and we generally provide company contributions to the savings plans. For the period of

Table of Contents

Boise Cascade, L.L.C.

Notes to Consolidated Financial Statements (Continued)

11. Retirement and Benefit Plans (Continued)

January 1, 2009, through March 31, 2009, we matched 70% of the first 6% of eligible compensation that a salaried participant contributed to the plan. Due to poor business conditions, we suspended the company match for salaried employees for the period of April 1, 2009, through February 28, 2010. However, certain salaried employees not participating in our defined benefit plans also received a discretionary match equal to 30% of the first 6% of eligible compensation that the salaried participant contributed to the plan for the twelve months ended December 31, 2009. Since March 1, 2010, we have contributed 4% of each salaried participant's eligible compensation to the plan as a nondiscretionary company contribution. In addition, for the years that certain performance targets are met, we will contribute an additional amount that will range from zero to 4% of the employee's eligible compensation, depending on the employee's years of service. The company contributions for hourly employees vary by location. Company contributions to our defined contribution savings plans for the years ended December 31, 2011, 2010, and 2009, were \$7.7 million, \$6.7 million, and \$3.5 million, respectively.

Deferred Compensation Plan

We sponsor a deferred compensation plan. In 2008, Congress passed tax legislation that required participants in our deferred compensation plan to recognize income (and therefore be taxed) on their deferrals of income earned in 2009 and beyond and earnings thereon. We amended the plan to require distribution before year-end 2009 of all deferrals to, and earnings of, the plan that were taxable under the new legislation. As a result, we distributed \$1.1 million of deferrals and related earnings to participants in 2009. Deferrals, company match, and interest on contributions made to the plan on or before December 31, 2008, were not affected by the changes. As long as contributions to the plan are taxable under the new legislation, there will be no future contributions to the deferred compensation plan, but participant account balances remaining after the distributions will continue to accrue earnings in accordance with the terms of the plan.

The deferred compensation plan is unfunded; therefore, benefits are paid from our general assets. For the years ended December 31, 2011, 2010, and 2009, we recognized \$0.7 million, \$0.8 million, and \$0.9 million, respectively, of interest expense related to the plan. At December 31, 2011 and 2010, we had \$11.4 million and \$11.5 million, respectively, of liabilities related to the plan, of which \$1.0 million and \$0.7 million, respectively, were recorded in "Accrued liabilities, Compensation and benefits" and \$10.4 million and \$10.8 million, respectively, were recorded in "Other, Compensation and benefits" on our Consolidated Balance Sheets.

Postretirement Benefit Plans

Certain executives participate in our Supplemental Life Plan, which provides them with an insured death benefit during their employment with us. The plan provides the officer with a target death benefit equal to two times his or her base salary while employed and a target postretirement death benefit equal to one times his or her final base salary, in each case less any amount payable under our group term life insurance policy. At December 31, 2011 and 2010, our benefit obligation related to the Supplemental Life Plan was \$0.1 million and \$0.2 million, respectively.

We participate in a multiemployer health and welfare plan that covers medical, dental, and life insurance benefits for certain active employees as well as benefits for retired employees. As of December 31, 2011, approximately 610 of our employees participated in this plan. Per the terms of the

Table of Contents**Boise Cascade, L.L.C.****Notes to Consolidated Financial Statements (Continued)****11. Retirement and Benefit Plans (Continued)**

representative collective bargaining agreements, we are required to contribute \$5.50 per hour per active employee. The administrator of the plan determines the allocation of benefits between active and retired employees.

Defined Benefit Obligations and Funded Status

The following table, which includes only company-sponsored defined benefit plans, reconciles the beginning and ending balances of our projected benefit obligation and fair value of plan assets. We recognize the underfunded status of our defined pension plans on our Consolidated Balance Sheets. We recognize changes in funded status in the year changes occur through other comprehensive income (loss).

	December 31	
	2011	2010
	(thousands)	
Change in benefit obligation		
Benefit obligation at beginning of year	\$ 391,485	\$ 352,335
Service cost	5,112	4,931
Interest cost	20,484	20,258
Actuarial loss(a)	67,121	25,743
Special termination benefits	503	
Closure and curtailments	224	
Benefits paid	(14,825)	(11,782)
Benefit obligation at end of year	470,104	391,485
Change in plan assets		
Fair value of plan assets at beginning of year	281,972	249,712
Actual return on plan assets	1,427	40,169
Employer contributions	13,621	3,873
Benefits paid	(14,825)	(11,782)
Fair value of plan assets at end of year	282,195	281,972
Underfunded status	\$ (187,909)	\$ (109,513)
Amounts recognized on our Consolidated Balance Sheets		
Current liabilities	\$ (759)	\$ (858)
Noncurrent liabilities	(187,150)	(108,655)
Net liability	\$ (187,909)	\$ (109,513)
Amounts recognized in accumulated other comprehensive loss		
Net actuarial loss	\$ 120,125	\$ 39,223
Prior service cost	720	972
Net amount recognized	\$ 120,845	\$ 40,195

(a)

The actuarial losses were primarily due to decreases in discount rate assumptions.

F-60

Table of Contents**Boise Cascade, L.L.C.****Notes to Consolidated Financial Statements (Continued)****11. Retirement and Benefit Plans (Continued)**

The accumulated benefit obligation for all defined benefit pension plans was \$470.1 million and \$391.5 million at December 31, 2011 and 2010, respectively. All of our defined benefit pension plans have accumulated benefit obligations that exceed the fair value of plan assets.

Net Periodic Benefit Cost and Other Comprehensive (Income) Loss

The components of net periodic benefit cost and other amounts recognized in other comprehensive (income) loss are as follows:

	Year Ended December 31		
	2011	2010	2009
	(thousands)		
Service cost	\$ 5,112	\$ 4,931	\$ 9,688
Interest cost	20,484	20,258	19,923
Expected return on plan assets	(17,910)	(18,474)	(18,553)
Amortization of actuarial (gain) loss	2,703	556	(388)
Amortization of prior service costs and other	175	178	181
Plan settlement/curtailment expense	804		1,464
Net periodic benefit cost	11,368	7,449	12,315
Changes in plan assets and benefit obligations recognized in other comprehensive (income) loss			
Net (gain) loss	83,528	4,048	(44,226)
Prior service cost			70
Amortization of actuarial gain (loss)	(2,703)	(556)	388
Amortization of prior service cost and other	(175)	(178)	(181)
Total recognized in other comprehensive (income) loss	80,650	3,314	(43,949)
Total recognized in net periodic cost (benefit) and other comprehensive (income) loss	\$ 92,018	\$ 10,763	\$ (31,634)

In 2012, we estimate net periodic pension expense will be approximately \$13 million. We estimate the 2012 net periodic pension expense will include \$8.1 million of net loss and \$0.2 million of prior service cost that will be amortized from accumulated other comprehensive loss.

Assumptions

The assumptions used in accounting for our plans are estimates of factors that will determine, among other things, the amount and timing of future contributions. The following table presents the assumptions used in the measurement of our benefit obligations:

	December 31	
	2011	2010
Weighted average assumptions		
Discount rate	4.20%	5.35%
Rate of compensation increases(b)		

F-61

Table of Contents**Boise Cascade, L.L.C.****Notes to Consolidated Financial Statements (Continued)****11. Retirement and Benefit Plans (Continued)**

The following table presents the assumptions used in the measurement of net periodic benefit cost:

	December 31		
	2011	2010	2009
Weighted average assumptions			
Discount rate(a)	5.35%	5.90%	6.90%
Expected long-term rate of return on plan assets	7.00%	7.25%	7.25%
Rate of compensation increases(b)			

- (a) We used a 6.1% discount rate to calculate 2009 pension expense. On March 18, 2009, the salaried and nonqualified benefit plans were amended so that no future benefits would accrue after December 31, 2009. In connection with the amendment, we remeasured pension expense for the amended plans for the period of March 18, 2009, through December 31, 2009, using a 6.9% discount rate. We continued to recognize expense for the plans that were not amended using the 6.1% discount rate.
- (b) In connection with amending the salaried and nonqualified plans on March 18, 2009, to freeze pension benefits effective December 31, 2009, we changed the assumption for the rate of compensation increase to zero. In addition to the salaried benefits being frozen, there are currently no scheduled increases in pension benefit rates applicable to past service in the active plan covering our hourly employees.

Discount Rate Assumption. The discount rate reflects the current rate at which the pension obligations could be settled based on the measurement date of the plans December 31. In all years presented, the discount rates were determined by matching the expected plan benefit payments against a spot rate yield curve constructed to replicate the yields of Aa-graded corporate bonds.

Asset Return Assumption. We base our expected long-term rate of return on plan assets on a weighted average of our expected returns for the major asset classes (equities, fixed-income securities, hedge funds, and real estate) in which we invest. The weights we assign each asset class are based on our investment strategy. Expected returns for the asset classes are based on long-term historical returns, inflation expectations, forecasted gross domestic product, earnings growth, and other economic factors. We developed our return assumption based on a review of the fund manager's estimates of future market expectations by broad asset class, actuarial projections, and expected long-term rates of return from external investment managers. The weighted average expected return on plan assets we will use in our calculation of 2012 net periodic benefit cost is 6.75%.

Rate of Compensation Increases. Generally, this assumption reflects our long-term actual experience, the near-term outlook, and assumed inflation. For more information, see footnote (b) to the table above.

Investment Policies and Strategies

At December 31, 2011, 61% of our pension plan assets were invested in equity securities, 29% in fixed-income securities, 5% in hedge funds, and 5% in real estate. The general investment objective for all of our plan assets is to optimize growth of the pension plan trust assets, while minimizing the

Table of Contents

Boise Cascade, L.L.C.

Notes to Consolidated Financial Statements (Continued)

11. Retirement and Benefit Plans (Continued)

risk of significant losses in order to enable the plans to satisfy their benefit payment obligations over time. The objectives take into account the long-term nature of the benefit obligations, the liquidity needs of the plans, and the expected risk/return trade-offs of the asset classes in which the plans may choose to invest. The Retirement Funds Investment Committee is responsible for establishing and overseeing the implementation of our investment policy. Russell Investments (Russell) oversees the active management of our pension investments through its manager of managers program in order to achieve broad diversification in a cost-effective manner. At December 31, 2011, our investment policy governing our relationship with Russell allocated 34% to large-capitalization U.S. equity securities, 6% to small- and mid-capitalization U.S. equity securities, 20% to international equity securities, 30% to fixed-income securities, 5% to hedge funds, and 5% to real estate. Our arrangement with Russell allows monthly rebalancing to the policy targets noted above.

Investment securities, in general, are exposed to various risks, such as interest rate, credit, and overall market volatility risk, all of which are subject to change. In addition, our overall investment strategy and related allocations between equity and fixed-income securities may change from time to time based on market conditions, external economic factors, and the funded status of our plans. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the values of investment securities will occur in the near term, and such changes could materially affect the reported amounts.

Fair Value Measurements of Plan Assets

The defined benefit plans hold an interest in the Boise Cascade, L.L.C., Master Trust (Master Trust). The assets in the Master Trust are invested in common and collective trusts that hold several mutual funds invested in U.S. equities, international equities, and fixed-income securities, as well as hedge funds and real estate.

(a)

Equity and fixed-income securities represent mutual funds managed by Russell Trust Company. The funds are valued at the net asset value (NAV) provided by Russell Trust Company, the administrator of the funds. The NAV is a practical expedient for fair value and is based on the value of the assets owned by the fund, less liabilities at year-end. While the underlying assets are actively traded on an

exchange, the funds are not. We have the ability to redeem these equity and fixed-income securities with a one-day notice.

Notes to Consolidated Financial Statements (Continued)

11. Retirement and Benefit Plans (Continued)

- (b) Invested in the Russell Equity I Fund. The fund seeks returns that exceed the Russell 1000 Index by investing in large capitalization stocks of the U.S. stock market.
- (c) Invested in the Russell Equity II Fund. The fund seeks returns that exceed the Russell 2500 Index by investing in the small- and mid-capitalization stocks of the U.S. stock market.
- (d) Invested in the Russell International Fund with Active Currency at December 31, 2011 and 2010, which benchmarks against the Morgan Stanley Capital International Europe, Australasia, and Far East (MSCI EAFE) Index and seeks high, long-term returns comparable to the broad international stock market by investing in non-U.S. companies from the developed countries around the world. The funds participate primarily in the stock markets of Europe and the Pacific Rim. The strategy involves selection of stocks within various countries and industries worldwide. In addition, the Russell International Fund with Active Currency places additional emphasis on opportunistically adding value through active investment in foreign currencies.
- (e) At December 31, 2011 and 2010, approximately 100% and 50%, respectively, of the fixed-income securities were in the Russell Multi-Manager Bond Fund. The fund seeks to outperform the Barclays Capital U.S. Aggregate Bond Index over a full market cycle. The fund is designed to provide current income and, as a secondary objective, capital appreciation through a variety of diversified strategies, including sector rotation, modest interest rate timing, security selection, and tactical use of high-yield and emerging market bonds.
- (f) At December 31, 2010, approximately 50% of the fixed-income securities were in the Russell Long Duration Fixed Income Fund. The fund seeks to achieve above-average performance (relative to the Barclays Capital U.S. Long Government/Credit Bond Index) by combining manager styles and strategies with different payoffs over various phases of an investment cycle. The fund is designed to provide maximum total return through diversified strategies, including sector rotation, modest interest rate timing, security selection, and tactical use of high-yield and emerging market bonds.
- (g) The fund seeks to produce high risk-adjusted returns while targeting a low long-term average correlation to traditional markets. The fund invests internationally in a broad range of instruments, including, but not limited to, equities, currencies, convertible securities, futures, forwards, options, swaps and other derivative products. The fair value of the hedge fund is estimated using the NAV of the investments as a practical expedient for fair value. We have the ability to redeem these investments at NAV within the near term, and they are thus classified within Level 2.
- (h) Real estate investments include those in limited partnerships that invest in various domestic commercial and residential real estate projects. The fair values of real estate assets are typically determined by using income and/or cost approaches or a comparable sales approach, taking into consideration discount and capitalization rates, financial conditions, local market conditions, and the status of the capital markets, and they are thus classified within Level 3. We have the ability to redeem the real estate investments with a 110-calendar-day written notice prior to a quarterly trade date.

Table of Contents**Boise Cascade, L.L.C.****Notes to Consolidated Financial Statements (Continued)****11. Retirement and Benefit Plans (Continued)**

The following table sets forth a summary of changes in the fair value of the pension plan's Level 3 assets for the period ended December 31, 2011:

	Real Estate (thousands)
Balance, beginning of year	\$
Purchases	13,000
Unrealized gain	
Balance, end of year	\$ 13,000

Cash Flows

Our practice is to fund the pension plans in amounts sufficient to meet the minimum requirements of U.S. federal laws and regulations. Additional discretionary funding may be provided as deemed appropriate. For the years ended December 31, 2011, 2010, and 2009, we made cash contributions to our pension plans totaling \$13.6 million, \$3.9 million, and \$28.4 million, respectively.

On July 13, 2012, we contributed company-owned real property to the pension plans from two locations in our Building Materials Distribution segment. The pension plans obtained independent appraisals of the properties, and based on these appraisals, the plans recorded the contribution at fair value of \$9.7 million on July 13, 2012.

We are leasing back the contributed properties for an initial term of ten years with two five-year extension options and continue to use the properties in our distribution operations. Rent payments are made quarterly, with first-year annual rents of \$0.8 million and 2% annual escalation rates thereafter. Each lease provides us a right of first refusal on any subsequent sale by the pension plans, as well as repurchase options at the end of the initial term and extension periods. The plans engaged an independent fiduciary who negotiated the lease terms and also manages the properties on behalf of the plans.

We determined that the contribution of the properties does not meet the accounting definition of a plan asset within the scope of Accounting Standards Codification 715, *Compensation Retirement Benefits*. Accordingly, the contributed properties will not be considered a contribution for accounting purposes and, as a result, will not be included in plan assets and will have no impact on the net pension liability recorded on our Consolidated Balance Sheets. We will continue to depreciate the carrying value of the properties in our financial statements, and no gain or loss will be recognized at the contribution date for accounting purposes. Lease payments will be recorded as pension contributions.

In the first nine months of 2012, we made \$8.2 million in cash contributions to the pension plans. The total cash and real property contributions are expected to satisfy U.S. Department of Labor minimum pension contribution requirements for 2012 in light of recently passed pension funding relief legislation.

Table of Contents**Boise Cascade, L.L.C.****Notes to Consolidated Financial Statements (Continued)****11. Retirement and Benefit Plans (Continued)**

The following benefit payments are expected to be paid to plan participants. Qualified pension benefit payments are paid from plan assets, while nonqualified pension benefit payments are paid by the company.

	Pension Benefits
	(thousands)
2012	\$ 16,554
2013	17,798
2014	19,586
2015	21,391
2016	22,879
Years 2017-2021	134,404

12. Long-Term Incentive Compensation Plans*Long-Term Incentive Cash Plan*

In 2011 and 2010, key managers participated in a long-term incentive plan (LTIP) that pays awards in cash. The LTIP provides an annual award notice to participants granting them the opportunity to earn a cash award that is based on a target percentage of the participant's base salary and the company's achievement against corporate goals, both of which are set annually. Under the LTIP, the award, if any, is paid in three equal installments due no later than March 15 of the three years following the year the award was granted with continued employment as a precondition for receipt of each award installment. We recognize compensation expense based on the probability of the performance goals being met over the vesting period. We recognized \$2.4 million and \$3.0 million of LTIP expense in 2011 and 2010, respectively.

Management Equity Agreement

Certain key managers and unaffiliated directors (each a management investor) have purchased or been awarded, pursuant to the terms of separate Management Equity Agreements or Director Equity Agreements (collectively the Equity Plan), equity units in FPH at prices (with respect to Series B Units) that approximated fair value on the date of purchase. Those who purchased the FPH Series B equity units received grants of FPH Series C equity units (profit interests) that represent the right to participate in profits. In addition, FPH has issued Series C equity units to key managers and nonaffiliated directors for no consideration.

Compensation Expense

We did not recognize compensation expense on the date of grant for the Series B equity units, because the fair value of the units issued by FPH was equal to or less than the amount each employee was required to pay. The Series C equity units are accounted for as restricted stock. We recognized compensation expense for the Series C equity units based on the fair value on the date of the grant and/or the award modification date. Compensation expense was recognized ratably over the vesting period for the Series C equity units that vest over time and ratably over the award period for the units that vest based on internal rates of return. During the years ended December 31, 2010 and 2009, we recognized \$1.6 million and \$2.7 million, respectively, of compensation expense, which was primarily

Table of Contents

Boise Cascade, L.L.C.

Notes to Consolidated Financial Statements (Continued)

12. Long-Term Incentive Compensation Plans (Continued)

recorded in "General and administrative expenses." No related compensation expense was recorded in 2011, as all equity units were fully vested or forfeited as of December 31, 2010.

Redemption Provisions

The FPH Series B and Series C equity units held by management investors are redeemable at FPH's option upon termination of the management investor's employment (or membership on the company's board of directors) and at the option of the holder in the event of death or disability or the sale of a division resulting in the termination of his or her employment. The 7.125% senior subordinated notes and our New Revolving Credit Facility, as well as our Senior Notes issued on October 22, 2012, contain a restricted payments covenant with a specific exception for equity unit redemptions up to \$5 million in any year, subject to a two-year carryforward and carryback provision that provides an aggregate limit in any one year of \$15 million. Additional exceptions to the covenant may also be utilized to permit equity unit redemptions. See Note 9, "Debt," for a discussion of debt transactions subsequent to December 31, 2011.

Except in the event of death or disability, BC Holdings believes that the redemption of these units is within its control due to the interlocking boards of FPH and BC Holdings and because FPH was organized solely for the purpose of establishing BC Holdings to complete the Forest Products Acquisition. Repurchases under the Equity Plan have been funded by mirror-image redemptions of Series B and Series C equity units held by FPH in its subsidiaries. The redemption of the FPH Series B and Series C equity units and the expected parallel redemptions of our Series B and Series C equity units are a contingent event outside the employee's control. However, because FPH units are subject to mandatory redemption in an event that is outside BC Holdings' control (death or disability), these units are required to be classified outside of permanent equity on the Consolidated Balance Sheets at fair value as of the grant date and/or award modification date. Accordingly, at December 31, 2011 and 2010, BC Holdings recorded and allocated to us \$8.7 million and \$9.3 million, respectively, which we recorded in "Redeemable equity units" on our Consolidated Balance Sheets.

In the event that a management investor's employment with us is terminated or his service as a director terminates, as the case may be, FPH holds an option, pursuant to the Equity Plan, to reacquire its equity units held by departing management investors at prices provided for in such agreements. FPH did not redeem or repurchase any equity units in 2011 and 2010. During 2009, FPH voluntarily redeemed an insignificant amount of the Series B and Series C equity units of departing management investors.

Table of Contents**Boise Cascade, L.L.C.****Notes to Consolidated Financial Statements (Continued)****12. Long-Term Incentive Compensation Plans (Continued)***Activity of Redeemable Equity Units*

The following summarizes the activity of the redeemable equity units, based on the fair value of the equity units as of the grant date or the date the awards were modified.

	Series B Equity Units		Series C Equity Units		Total Redeemable Equity
	Units	Amount	Units	Amount	
	(thousands)				
Balance at December 31, 2009	2,765	\$ 2,765	16,270	\$ 5,202	\$ 7,967
Management equity units expense				1,625	1,625
Allocation of redeemable equity units to Capital(a)	(29)	(29)	(27)	(16)	(45)
Forfeitures			(1,818)	(248)	(248)
Balance at December 31, 2010	2,736	2,736	14,425	6,563	9,299
Allocation of redeemable equity units to Capital(a)	(214)	(214)	(710)	(336)	(550)
Balance at December 31, 2011	2,522	\$ 2,522	13,715	\$ 6,227	\$ 8,749

(a)

In 2011 and 2010, we reclassified certain redeemable equity units into "Capital" on our Consolidated Balance Sheets. The reclassifications resulted from employee retirements or terminations causing the equity units to no longer be subject to mandatory redemption in an event that is outside of BC Holdings' control.

Table of Contents**Boise Cascade, L.L.C.****Notes to Consolidated Financial Statements (Continued)****12. Long-Term Incentive Compensation Plans (Continued)**

The following summarizes the activity of the outstanding service- and market-condition equity units awarded under the Equity Plan as of December 31, 2011, 2010, and 2009, and changes during the years ended December 31, 2011 and 2010:

Outstanding Units	Service Condition Series B Redeemable Equity Units		Series C Redeemable Equity Units		Market Condition Series C Redeemable Equity Units	
	Units	Weighted Average Grant-Date Fair Value	Units	Weighted Average Grant-Date Fair Value	Units	Weighted Average Grant-Date Fair Value
	(thousands)		(thousands)		(thousands)	
Outstanding at December 31, 2009(a)	2,765	\$ 1.00	14,452	\$ 0.46	1,818	\$ 0.14
Forfeited(b)					(1,818)	0.14
Allocation of redeemable equity units to Capital	(29)	1.00	(27)	0.57		
Outstanding at December 31, 2010(a)	2,736	1.00	14,425	0.46		
Allocation of redeemable equity units to Capital	(214)	1.00	(710)	0.47		
Outstanding at December 31, 2011(a)	2,522	\$ 1.00	13,715	\$ 0.45		\$

(a) Outstanding units at December 31, 2009 include both vested and nonvested units, as units outstanding are reduced only through repurchase of units or forfeiture of units by employees. All Series B and Series C service-condition equity units were vested at December 31, 2011 and 2010.

(b) On December 31, 2010, the remaining 1.8 million unvested market-condition Series C equity units were forfeited, as the Equity Plan's internal rate-of-return formula was not achieved during the vesting period.

As of December 31, 2010, all Series B and Series C service-condition equity units were vested, and all compensation expense related to the equity units had been recognized.

13. Capital

Boise Cascade has authorized and issued 1,000 voting common units to BC Holdings. The equity units entitle holders to one vote on matters to be voted on by the members of Boise Cascade. Distributions are allocated to holders of the units pro rata based on the number of common units held by each holder.

Table of Contents**Boise Cascade, L.L.C.****Notes to Consolidated Financial Statements (Continued)****13. Capital (Continued)***Accumulated Other Comprehensive Income (Loss)*

14. Segment Information

We operate our business using three reportable segments: Building Materials Distribution, Wood Products, and Corporate and Other. These segments represent distinct businesses that are managed separately because of differing products and services. Each of these businesses requires distinct operating and marketing strategies. Management reviews the performance of the company based on these segments.

Our Building Materials Distribution segment is a leading national stocking wholesale distributor of building materials. We distribute a broad line of building materials, including engineered wood products (EWP), oriented strand board (OSB), plywood, lumber, and general line items such as framing accessories, composite decking, roofing, siding, and insulation. We purchase most of these building materials from third-party suppliers and market them primarily to pro dealers, retail lumberyards, and home improvement centers that then sell the products to the final end-users, who are typically professional builders, independent contractors, and homeowners engaged in residential construction projects.

Our Wood Products segment manufactures and sells EWP, consisting of laminated veneer lumber (LVL), a high-strength engineered lumber often used in beams; I-joists, a structural support typically used in floors and roofs; and laminated beams. We also produce plywood, particleboard, dimension lumber, and high-quality ponderosa pine lumber, a premium lumber grade sold primarily to manufacturers of specialty wood windows, moldings, and doors. Our wood products are used primarily in residential, light commercial construction, and repair and remodeling markets. Most of these products are sold to wholesalers (including our Building Materials Distribution segment), home improvement centers, and industrial converters. During 2011, approximately 34% of Wood Products overall sales, including approximately 64% of Wood Products EWP sales, was sold to our Building Materials Distribution segment.

Table of Contents**Boise Cascade, L.L.C.****Notes to Consolidated Financial Statements (Continued)****14. Segment Information (Continued)**

Our Corporate and Other segment includes corporate support staff services, related assets and liabilities, and foreign exchange gains and losses. These support services include, but are not limited to, finance, accounting, legal, information technology, and human resource functions. We have purchased many of these services from Boise Inc. under an Outsourcing Services Agreement, under which Boise Inc. provides a number of corporate staff services to us at cost. See Note 3, "Outsourcing Services Agreement," for more information.

The segments' profits and losses are measured on operating profits before changes in fair value of contingent value rights, gain on repurchase of long-term debt, interest expense, and interest income. Specified expenses are allocated to the segments. For many of these allocated expenses, the related assets and liabilities remain in the Corporate and Other segment.

The segments follow the accounting principles described in Note 2, "Summary of Significant Accounting Policies."

For the years ended December 31, 2011 and 2010, sales to one customer accounted for \$210.4 million and \$231.4 million, respectively, or approximately 10% of sales for both periods. Sales to this customer were recorded in our Building Materials Distribution and our Wood Products segments. No other single customer accounted for 10% or more of total sales.

Export sales to foreign unaffiliated customers were \$57.3 million, \$42.3 million, and \$25.8 million for the years ended December 31, 2011, 2010, and 2009, respectively.

At December 31, 2011, 2010, and 2009, and for the years then ended, long-lived assets located in foreign countries and net sales originating in foreign countries were not material.

Segment sales to external customers, including related parties, by product line are as follows:

	Year Ended December 31		
	2011	2010	2009

- (a) In 2011, we permanently closed a laminated beam plant in Emmett, Idaho, and we recorded the related expense of \$1.3 million in "Other (income) expense, net" and \$0.4 million of accelerated depreciation in "Depreciation and Amortization" in our Consolidated Statement of Income (Loss) for the year ended December 31, 2011. Also, during the year ended December 31, 2011, we recorded \$2.0 million of noncash asset write-downs in "Other (income) expense, net," of which \$1.2 million was recorded in our Building Materials Distribution segment and \$0.9 million was recorded in our Wood Products segment.
- (b) Capital spending for Wood Products includes \$5.8 million for the acquisition of a laminated beam and decking manufacturing plant in Homedale, Idaho.
- (c) Included \$4.6 million of income for cash received from a litigation settlement related to vendor product pricing. We recorded \$4.1 million in our Building Materials Distribution segment and \$0.5 million in our Wood Products segment.
- (d) Included \$8.9 million of expense in income (loss) before taxes related to the June 2009 closure of our lumber manufacturing facility in La Grande, Oregon, of which \$3.7 million was included in EBITDA and \$5.2 million was accelerated depreciation recorded in "Depreciation and amortization."
- (e) Gain on the repurchase of \$11.9 million of senior subordinated notes.
- (f) Capital spending for Building Materials Distribution includes \$0.9 million of cash paid for the purchase of a truss assembly operation and EWP sales office in Saco and Biddeford, Maine, respectively. Capital spending for Wood Products includes \$3.7 million of cash paid for the purchase of a sawmill in Pilot Rock, Oregon.
- (g)

Edgar Filing: BOISE CASCADE, L.L.C. - Form S-1

EBITDA represents income (loss) before interest (interest expense and interest income), income taxes, and depreciation and amortization. EBITDA is the primary measure used by our chief operating decision maker to evaluate segment operating performance and to decide how to allocate resources to segments. We believe EBITDA is useful to investors because it provides a means to evaluate the operating performance of our segments and our company on an ongoing basis using criteria that are used by our internal decision makers and because it is frequently used by investors and other interested parties when comparing companies in our industry that have different financing and capital structures and/or tax rates. We believe EBITDA is a meaningful measure because it presents a transparent view of our recurring operating performance and allows management to readily view operating trends, perform analytical comparisons, and identify strategies to improve operating performance. EBITDA, however, is not a measure of our liquidity or financial performance under generally accepted accounting principles (GAAP) and should not be considered as an alternative to net income (loss), income (loss) from operations, or any other performance measure derived in accordance with GAAP or as an alternative to cash flow from operating activities as a measure of our liquidity. The use of EBITDA instead of net income (loss) or segment income (loss) has limitations as an analytical

F-74

Table of Contents**Boise Cascade, L.L.C.****Notes to Consolidated Financial Statements (Continued)****14. Segment Information (Continued)**

tool, including the inability to determine profitability; the exclusion of interest expense, interest income, and associated significant cash requirements; and the exclusion of depreciation and amortization, which represent unavoidable operating costs. Management compensates for the limitations of EBITDA by relying on our GAAP results. Our measure of EBITDA is not necessarily comparable to other similarly titled captions of other companies due to potential inconsistencies in the methods of calculation.

The following is a reconciliation of net income (loss) to EBITDA for the consolidated company:

	Year Ended December 31		
	2011	2010	2009
	(thousands)		
Net loss	\$ (46.4)	\$ (33.3)	\$ (98.5)
Interest expense	19.0	21.0	22.5
Interest income	(0.4)	(0.8)	(0.9)
Income tax provision	0.2	0.3	0.7
Depreciation and amortization	37.0	34.9	40.9
EBITDA	\$ 9.5	\$ 22.1	\$ (35.3)

15. Commitments, Legal Proceedings and Contingencies, and Guarantees*Commitments*

We have commitments for leases and long-term debt that are discussed further in Note 6, "Leases," and Note 9, "Debt." In addition, we have purchase obligations for goods and services, capital expenditures, and raw materials entered into in the normal course of business.

We are a party to a number of long-term log and fiber supply agreements. At December 31, 2011, our total obligation for log and fiber purchases under contracts with third parties was approximately \$230 million based on fixed contract pricing or first quarter 2012 pricing for variable contracts. Under most of these log and fiber supply agreements, we have the right to cancel or reduce our commitments in the event of a mill curtailment or shutdown. Future purchase prices under most of these agreements will be set quarterly or semiannually based on regional market prices. Our log and fiber obligations are subject to change based on, among other things, the effect of governmental laws and regulations, our manufacturing operations not operating in the normal course of business, log and fiber availability, and the status of environmental appeals. Except for deposits required pursuant to wood supply contracts, these obligations are not recorded in our consolidated financial statements until contract payment terms take effect.

We enter into utility contracts for the purchase of electricity and natural gas. We also purchase these services under utility tariffs. The contractual and tariff arrangements include multiple-year commitments and minimum annual purchase requirements. At December 31, 2011, we had approximately \$8.0 million of utility purchase commitments. These payment obligations were valued at prices in effect on December 31, 2011, or contract language, if applicable. Because we consume the energy in the manufacture of our products, these obligations represent the face value of the contracts, not resale value.

Legal Proceedings and Contingencies

We are a party to routine legal proceedings that arise in the ordinary course of our business. We are not currently a party to any legal proceedings or environmental claims that we believe would,

15. Commitments, Legal Proceedings and Contingencies, and Guarantees (Continued)

individually or in the aggregate, have a material adverse effect on our financial position, results of operations, or cash flows.

Guarantees

We provide guarantees, indemnifications, and assurances to others.

Boise Cascade and its subsidiaries (Boise Cascade Building Materials Distribution, L.L.C., and Boise Cascade Wood Products, L.L.C.) act as co-borrowers under the New Revolving Credit Facility, described in Note 9, Debt. Their obligations are guaranteed by each of our remaining domestic subsidiaries.

Boise Cascade and its wholly owned subsidiary, Boise Cascade Finance Corporation, have jointly issued \$400.0 million of 7.125% senior subordinated notes due in 2014. At December 31, 2011, \$219.6 million of the notes were outstanding. The senior subordinated notes are guaranteed on a senior subordinated basis jointly and severally by BC Holdings and each of its existing and future domestic subsidiaries (other than: (i) the co-issuers, Boise Cascade and Boise Cascade Finance Corporation, and (ii) our foreign subsidiaries). See Note 9, "Debt," for more information, as well as a discussion of debt transactions subsequent to December 31, 2011.

Boise Cascade issued guarantees to a limited number of trade creditors of one or more of its principal operating subsidiaries, Boise Cascade Building Materials Distribution, L.L.C., and Boise Cascade Wood Products, L.L.C., for trade credit obligations arising in the ordinary course of the business of such operating subsidiaries. These included guarantees of the obligations of Boise Cascade Wood Products, L.L.C., with respect to present and future timber sale agreements and several facility and rolling stock leases entered into by such subsidiaries and by Boise Cascade Building Materials Distribution, L.L.C. Our exposure under these agreements is limited to future timber purchases and the minimum lease payment requirements under the agreements. We also enter into guarantees of various raw material or energy supply agreements arising in the ordinary course of business.

All surety bonds and most letters of credit supporting obligations of subsidiaries sold or liabilities assumed by Boise Inc. in connection with the sale of our Paper and Packaging & Newsprint assets in 2008 have been replaced by new surety bonds or letters of credit issued without our credit support. The principal exception is letters of credit supporting workers' compensation obligations assumed by Boise Inc., which as a matter of state law must remain in our name even though the underlying liabilities and exposures have been assumed by Boise Inc. We are entitled to an indemnification from the purchaser for liabilities with respect to such letters of credit arising from workers' compensation claims assumed by Boise Inc. and for our costs of maintaining Boise Inc.'s share of any such letter of credit.

We enter into a wide range of indemnification arrangements in the ordinary course of business. These include tort indemnifications, tax indemnifications, financing transactions, indemnifications against third-party claims arising out of arrangements to provide services to us, and indemnifications in merger and acquisition agreements. At December 31, 2011, we are unable to estimate the maximum potential liability under these indemnifications. At December 31, 2011, we were not aware of any material liabilities arising from these indemnifications.

Notes to Consolidated Financial Statements (Continued)

16. Consolidating Guarantor and Nonguarantor Financial Information

The following consolidating financial information presents the Statements of Comprehensive Income (Loss), Balance Sheets, and Cash Flows related to Boise Cascade. The senior subordinated notes are guaranteed on a senior subordinated basis jointly and severally by BC Holdings and each of its existing and future subsidiaries (other than: (i) the co-issuers, Boise Cascade and Boise Cascade Finance Corporation and (ii) our foreign subsidiaries). BC Holdings is a holding company with no material assets other than the equity interests of its direct subsidiaries. In addition, the financial statements of BC Holdings are available to the public through BC Holdings' 2011 Annual Report on Form 10-K filed with the Securities and Exchange Commission in accordance with the Securities Exchange Act of 1934. Other than the consolidated financial statements and footnotes for Boise Cascade and the consolidating financial information, financial statements and other disclosures concerning the guarantors have not been presented because management believes that such information is not material to investors.

Furthermore, the cancellation provisions of the guarantor subsidiaries are customary and they do not include an arrangement that permits a guarantor subsidiary to opt out of the obligation prior to or during the term of the debt. Each guarantor subsidiary is automatically released from its obligations as a guarantor upon the sale of the subsidiary or substantially all of its assets to a third party, the designation of the subsidiary as an unrestricted subsidiary for purposes of the covenants included in the indenture, the release of the indebtedness under the indenture, or if the issuers exercise their legal defeasance option or the discharge of their obligations in accordance with the indenture.

See Note 9, "Debt," for a discussion of debt transactions subsequent to December 31, 2011.

Notes to Consolidated Financial Statements (Continued)

17. Pro Forma Information (unaudited)

Since our inception in October 2004, we have operated as a limited liability company. The unaudited pro forma financial information assumes we operated as a corporation during the year ended December 31, 2011, and reflects the following adjustments to give pro forma effect to the distribution described below.

The pro forma net loss applied in computing the pro forma net loss per share for the year ended December 31, 2011 is derived from our historical net loss. The pro forma results of our being treated as a corporation had no impact on net loss for the pro forma year ended December 31, 2011, primarily as a result of placing a full valuation on the tax benefits associated with 2011 net operating losses and other net deferred tax assets (mostly attributable to our three-year historical cumulative losses and below historical average, although slightly improved, housing starts). In addition, due to its non-recurring nature, the pro forma information does not reflect the recognition of a net deferred tax liability of approximately \$4.0 million, net of deferred tax assets and related valuation allowances, related to our tax status conversion from a limited liability company to a corporation prior to the consummation of this offering. Therefore, we have not presented any adjustments to the pro forma tax provision. Following the Offering, our effective tax rate is expected to be higher than in historical periods based on U.S. Federal and state income tax rates applicable to a corporation.

Pro forma weighted average common shares outstanding has been computed to give effect to the planned pro forma distribution to BC Holdings of \$225.0 million prior to January 1, 2013 and the actual distribution to BC Holdings of \$2.8 million during the nine months ended September 30, 2012. The shares deemed to be outstanding gives effect to the number of shares, assuming an initial public offering price of \$, whose proceeds would be necessary to pay the distributions to the extent that the distribution exceeds net income of \$26.4 million during the twelve months ended September 30, 2012.

Through and including _____, 2013 (the 25th day after the date of this prospectus), all dealers that effect transactions in these securities may be required to deliver a prospectus.

Item 14. Indemnification of Directors and Officers

Section 102(b)(7) of the DGCL allows a corporation to provide in its certificate of incorporation that a director of the corporation will not be personally liable to the corporation or its stockholders for monetary damages for breach of fiduciary duty as a director, except where the director breached the duty of loyalty, failed to act in good faith, engaged in intentional misconduct or knowingly violated a law, authorized the payment of a dividend or approved a stock repurchase in violation of Delaware corporate law or obtained an improper personal benefit. Our certificate of incorporation will provide for this limitation of liability.

Section 145 of the DGCL ("Section 145"), provides that a Delaware corporation may indemnify any person who was, is or is threatened to be made, party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative (other than an action by or in the right of such corporation), by reason of the fact that such person is or was an officer, director, employee or agent of such corporation or is or was serving at the request of such corporation as a director, officer, employee or agent of another corporation or enterprise. The indemnity may include expenses (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred by such person in connection with such action, suit or proceeding, provided such person acted in good faith and in a manner he reasonably believed to be in or not opposed to the corporation's best interests and, with respect to any criminal action or proceeding, had no reasonable cause to believe that his or her conduct was illegal. A Delaware corporation may indemnify any persons who are, were or are threatened to be made a party to any threatened, pending or completed action or suit by or in the right of the corporation by reason of the fact that such person is or was a director, officer, employee or agent of another corporation or enterprise. The indemnity may include expenses (including attorneys' fees) actually and reasonably incurred by such person in connection with the defense or settlement of such action or suit, provided such person acted in good faith and in a manner he reasonably believed to be in or not opposed to the corporation's best interests, provided that no indemnification is permitted without judicial approval if the officer, director, employee or agent is adjudged to be liable to the corporation. Where an officer or director is successful on the merits or otherwise in the defense of any action referred to above, the

Table of Contents

corporation must indemnify him against the expenses which such officer or director has actually and reasonably incurred.

Section 145 further authorizes a corporation to purchase and maintain insurance on behalf of any person who is or was a director, officer, employee or agent of the corporation or is or was serving at the request of the corporation as a director, officer, employee or agent of another corporation or enterprise, against any liability asserted against him and incurred by him in any such capacity, or arising out of his or her status as such, whether or not the corporation would otherwise have the power to indemnify him under Section 145.

Our amended and restated certificate of incorporation will provide that we must indemnify our directors and officers to the fullest extent authorized by the DGCL and must also pay expenses incurred in defending any such proceeding in advance of its final disposition upon delivery of an undertaking, by or on behalf of an indemnified person, to repay all amounts so advanced if it should be determined ultimately that such person is not entitled to be indemnified under this section or otherwise.

The indemnification rights set forth above shall not be exclusive of any other right which an indemnified person may have or hereafter acquire under any statute, provision of our amended and restated certificate of incorporation, our amended and restated bylaws, agreement, vote of stockholders or disinterested directors or otherwise.

We expect to maintain standard policies of insurance that provide coverage (1) to our directors and officers against loss rising from claims made by reason of breach of duty or other wrongful act and (2) to us with respect to indemnification payments that we may make to such directors and officers.

Item 15. Recent Sales of Unregistered Securities

On October 22, 2012, Boise Cascade completed the sale to Merrill Lynch, Pierce, Fenner & Smith Incorporated, Goldman, Sachs & Co., Barclays Capital Inc. and Wells Fargo Securities, LLC (the "Initial Purchasers") of \$250.0 million in aggregate principal amount of 6³/₈% senior notes due 2020 (the "Senior Notes") of Boise Cascade and Boise Cascade Finance Corporation (collectively, the "Co-issuers"). The Initial Purchasers resold the Senior Notes to qualified institutional buyers pursuant to Rule 144A under the Securities Act of 1933, as amended, and to persons outside of the United States pursuant to Regulation S under the Securities Act of 1933, as amended. The Senior Notes were sold at par. The Co-issuers received approximately \$245.0 million of net proceeds from the sale of the Senior Notes, a portion of which was used to fund the redemption of all of the Co-issuers' then outstanding 7¹/₈% senior subordinated notes due 2014, including all interest thereon through November 21, 2012 (the related redemption date), and to pay the fees and expenses incurred in connection therewith. The remaining proceeds have been made available for general corporate purposes.

Item 16. Exhibits and Financial Statement Schedules

- (a) The list of exhibits is set forth under "Exhibit Index" at the end of this registration statement and is incorporated herein by reference.
- (b) See the Index to Consolidated Financial Statements included on page F-1 for a list of the financial statements included in this registration statement. All schedules not identified above have been omitted because they are not required, are inapplicable, or the information is included in the consolidated financial statements or notes contained in this registration statement.

Table of Contents

Certain of the agreements included as exhibits to this prospectus contain representations and warranties by each of the parties to the applicable agreement. These representations and warranties have been made solely for the benefit of the other parties to the applicable agreement and:

should not in all instances be treated as categorical statements of fact, but rather as a way of allocating the risk to one of the parties if those statements prove to be inaccurate;

have been qualified by disclosures that were made to the other party in connection with the negotiation of the applicable agreement, which disclosures are not necessarily reflected in the agreement;

may apply standards of materiality in a way that is different from what may be viewed as material to you or other investors; and

were made only as of the date of the applicable agreement or such other date or dates as may be specified in the agreement and are subject to more recent developments.

The registrant acknowledges that, notwithstanding the inclusion of the foregoing cautionary statements, it is responsible for considering whether additional specific disclosures of material information regarding material contractual provisions are required to make the statements in this registration statement not misleading.

Item 17. Undertakings

The undersigned registrant hereby undertakes to provide to the underwriters at the closing specified in the underwriting agreement certificates in such denominations and registered in such names as required by the underwriters to permit prompt delivery to each purchaser.

Insofar as indemnification for liabilities arising under the Securities Act may be permitted to directors, officers and controlling persons of the registrant pursuant to the foregoing provisions, or otherwise, the registrant has been advised that in the opinion of the Securities and Exchange Commission, such indemnification is against public policy as expressed in the Securities Act, and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the registrant of expenses incurred or paid by a director, officer or controlling person of the registrant in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, the registrant will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question of whether such indemnification is against public policy as expressed in the Securities Act and will be governed by the final adjudication of such issue.

The undersigned registrant hereby undertakes that:

(i) for purposes of determining any liability under the Securities Act, the information omitted from the form of prospectus filed as part of this registration statement in reliance upon Rule 430A and contained in a form of prospectus filed by the registrant pursuant to Rule 424(b)(1) or (4) or 497(h) under the Securities Act shall be deemed to be part of this registration statement as of the time it was declared effective; and

(ii) for the purpose of determining any liability under the Securities Act, each post-effective amendment that contains a form of prospectus shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.

Table of Contents**SIGNATURES**

Pursuant to the requirements of the Securities Act of 1933, the registrant has duly caused this Registration Statement on Form S-1 to be signed on its behalf by the undersigned, thereunto duly authorized, in the City of Boise, State of Idaho, on November 15, 2012.

BOISE CASCADE, L.L.C.
