**WEIS MARKETS, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
(unaudited)

(1) Significant Accounting Policies

**Basis of Presentation:** The accompanying unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information and with the instructions for Form 10-Q and Article 10 of Regulation S-X. In the opinion of management, all adjustments (consisting of normal recurring deferrals and accruals) considered necessary for a fair presentation have been included. The operating results for the periods presented are not necessarily indicative of the results to be expected for the full year. The Company has evaluated subsequent events for disclosure through the date of issuance of the accompanying unaudited consolidated interim financial statements and there were no material subsequent events which require additional disclosure. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's latest Annual Report on Form 10-K.

(2) Current Relevant Accounting Standards

In June 2011, the Financial Accounting Standards Board (FASB) issued new authoritative guidance on the presentation of comprehensive income. The new guidance requires an entity to present the components of net income and other comprehensive income either in one continuous statement, referred to as the statement of comprehensive income, or in two separate, but consecutive statements. The new guidance eliminates the current option to report other comprehensive income and its components in the statement of changes in shareholders' equity. While the new guidance changes the presentation of comprehensive income, there are no changes to the components that are recognized in net income or other comprehensive income under current accounting guidance. This new guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. Adoption of the new guidance will not have an impact on the Company's consolidated financial statements, as the guidance impacts presentation only.

In May 2011, FASB issued new authoritative guidance to achieve a consistent definition of fair value and ensure that the fair value measurement and disclosure requirements are similar between U.S. GAAP and International Financial Reporting Standards. This new guidance amends current fair value measurement and disclosure guidance to include increased transparency around valuation inputs and investment categorization. This new guidance is effective for fiscal years and interim periods beginning after December 15, 2011. The Company does not expect the adoption of the new guidance to have an impact on the consolidated financial statements.

In January 2010, FASB issued additional authoritative guidance on fair value measurements. The guidance requires previous fair value hierarchy disclosures to be further disaggregated by class of assets and liabilities. In addition, significant transfers between Levels 1 and 2 of the fair value hierarchy are required to be disclosed. The guidance was effective for interim and annual reporting periods beginning after December 15, 2009. Adoption of the new guidance did not have an impact on the Company's consolidated financial position, as this guidance relates only to additional disclosures. In addition, the guidance requires that in the reconciliation for fair value measurements using significant unobservable inputs, or Level 3, a reporting entity separately disclose information about purchases, sales, issuances and settlements on a gross basis rather than as one net number. The guidance was effective for fiscal years, and interim periods within those years, beginning after December 15, 2010. Adoption of the new guidance did not have an impact on the Company's consolidated financial position, as the Company has no Level 3 inputs.

In December 2010, FASB issued additional authoritative guidance on goodwill impairment. The guidance modifies step 1 of the goodwill impairment test for entities with a zero or negative carrying value to require entities to assess, considering qualitative factors, whether it is more likely than not that a goodwill impairment exists. If an entity concludes that it is more likely than not that goodwill impairment exists, the entity must perform step 2 of the goodwill impairment test. The guidance allows an entity to use either the equity or the enterprise valuation premise to determine the carrying amount of a reporting unit. The guidance was effective for impairment tests performed during fiscal years, and interim periods within those years, beginning after December 15, 2010. Adoption of the new guidance did not have an impact on the Company's consolidated financial statements.

Table of Contents

**WEIS MARKETS, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
(unaudited)

**(2) Current Relevant Accounting Standards (continued)**

In December 2010, FASB issued additional authoritative guidance on business combinations. The guidance provides clarification regarding pro forma revenue and earnings disclosure requirements for business combinations. The guidance specifies that if a public entity presents comparative financial statements, the entity should disclose only revenue and earnings of the combined entity as though the business combination(s) that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period. The guidance also expands the supplemental pro forma disclosures to include a description of the nature and amount of material, nonrecurring pro forma adjustments directly attributable to the business combination included in the reported pro forma revenue and earnings. The guidance was effective prospectively for business combinations for which the acquisition date was on or after the beginning of the first annual reporting period beginning on or after December 15, 2010. Adoption of the new guidance did not have an impact on the Company's consolidated financial statements.

**(3) Comprehensive Income**

The components of comprehensive income, net of related tax, for the periods ended June 25, 2011 and June 26, 2010 are as follows:

<i>(dollars in thousands)</i>	<u>13 Weeks Ended</u>		<u>26 Weeks Ended</u>	
	<u>June 25, 2011</u>	<u>June 26, 2010</u>	<u>June 25, 2011</u>	<u>June 26, 2010</u>
Net income	\$ 20,701	\$ 20,509	\$ 39,301	\$ 37,891
Other comprehensive income by component, net of tax:				
Unrealized holding gains (losses) arising during period (Net of deferred taxes of \$355 and \$202 respectively for the 13 Weeks Ended and \$482 and \$341 respectively for the 26 Weeks Ended)	559	(286)	738	(481)
Reclassification adjustment for gains included in net income (Net of taxes of \$165 and \$0 respectively for the 13 Weeks Ended and \$423 and \$93 respectively for the 26 Weeks Ended)	(232)	---	(596)	(130)
Comprehensive income, net of tax	\$ <u>21,028</u>	\$ <u>20,223</u>	\$ <u>39,443</u>	\$ <u>37,280</u>

**(4) Reclassification**

The Company reclassified certain immaterial amounts in the Consolidated Statements of Income.

**(5) Contingencies**

The Company is a defendant in a lawsuit, filed in 2007, in the United States District Court, District of Maryland, alleging violation of the "Fair and Accurate Credit Transactions Act". The Company has agreed to a settlement with a cap of \$2,000,000 and the settlement was approved by the Court on July 25, 2011. In connection with the settlement and consultation with its legal counsel, the Company has accrued \$750,000 in operating, general and administrative expenses in the accompanying first quarter 2011 consolidated financial statements, as its best estimate of its known

expenditures in connection with the settlement.

Table of Contents

**WEIS MARKETS, INC.**  
**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS**  
**OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

The following discussion and analysis of Weis Markets, Inc.'s (the "Company") financial condition and results of operations should be read in conjunction with the unaudited financial statements and related notes included in Item 1 of this Quarterly Report on Form 10-Q, the Company's audited consolidated financial statements and the related notes included in the Company's Annual Report on Form 10-K for the year ended December 25, 2010, filed with the U.S. Securities and Exchange Commission, as well as the cautionary statement captioned "Forward-Looking Statements" immediately following this analysis.

**Overview**

Weis Markets, Inc. was founded in 1912 by Harry and Sigmund Weis, in Sunbury, Pennsylvania. The Company currently ranks among the top 50 food and drug retailers in the United States in revenues generated. As of June 25, 2011, the Company operated 162 retail food stores in Pennsylvania and four surrounding states: Maryland, New Jersey, New York and West Virginia.

Company revenues are generated in its retail food stores from the sale of a wide variety of consumer products including groceries, dairy products, frozen foods, meats, seafood, fresh produce, floral, pharmacy services, deli products, prepared foods, bakery products, beer and wine, fuel, and general merchandise items, such as health and beauty care and household products. The Company supports its retail operations through a centrally located distribution facility, its own transportation fleet, three manufacturing facilities and its administrative offices. The Company's operations are reported as a single reportable segment.

**OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**  
(continued)

**Results of Operations (continued)**

*Net Sales*

The Company's revenues are earned and cash is generated as merchandise is sold to customers at the point of sale. Discounts, except those provided by a vendor, are recognized as a reduction in sales as products are sold or over the life of a promotional program if redeemable in the future.

In the second quarter of 2010, management changed the method used to calculate comparable store sales. Refer to prior Form 10-K and Form 10-Q documents filed for the definition of the previous method used.

When calculating the percentage change in comparable store sales, the Company defines a new store to be comparable when it has been in operation for five full quarters. Relocated stores and stores with expanded square footage are included in comparable store sales since these units are located in existing markets and are open during construction. Planned store dispositions are excluded from the calculation. The Company only includes retail food stores in the calculation.

Comparable store sales increased 5.1% in the second quarter of 2011 compared to the same quarter in 2010, while total sales increased 3.5%. The Company's year-to-date comparable store sales increased 2.8% compared to the first half of 2010, while total sales increased 1.4% over the first twenty-six weeks of 2010. The Company's sales were impacted by the divestiture of 18 underperforming SuperPetz stores and two supermarkets.

Slow economic growth and high unemployment continue to impact the Company's markets. Many customers remain cautious in their spending and continue to focus on value and long term savings. To meet these needs, the Company continued to make significant investments in its "Get Grillin' Weis" and "Price Freeze" promotional programs. On April 3, 2011, the Company entered into another round of its "Get Grillin' Weis" promotional program. The "Get Grillin' Weis" promotional program is a seasonal cross-merchandising program linking meat items to specific general merchandise items such as gas grills and patio furniture, as well as complementary grocery and perishable items. This program lowered prices of approximately 1,000 staple items for a fourteen-week period. The Company also launched a seventh round of "Price Freeze" on July 10, 2011. This program froze prices of approximately 1,600 staple items for a 90-day period.

In addition to the "Price Freeze" and "Get Grillin' Weis" programs, the Company offered its "Gas Rewards" program in most markets. The "Gas Rewards" program allows Weis Preferred Shoppers club card members to earn gas discounts resulting from their in-store purchases. Customers can redeem these gas discounts at Sheetz convenience stores, located in most of the Company's markets, at Manley's Mighty Mart Valero locations, in the Binghamton, NY market or at any of the seventeen Weis Gas-n-Go locations.

The Company continued to employ a disciplined marketing and advertising strategy, along with targeted promotional activity in key markets, to help maintain its market share and increase its profits. During the second quarter of 2011, the Company generated a 4.5% increase in average sales per customer transaction while the number of identical

customer store visits increased by 0.7%. The Company's year-to-date average sales per customer transaction increased 3.4% while the number of identical customer store visits declined by 0.5%.

Pharmacy sales in the second quarter of 2011 increased 2.4% compared to the second quarter of 2010 and 2.7% year-to-date. As the Company previously reported, the pharmacy-based immunization program was expanded to most stores and currently has 224 pharmacists who are certified by their respective Board of Pharmacy to administer vaccines. The Company also leveraged increased customer counts to drive trial usage and loyalty through existing marketing channels. Category expansion and better private brand penetration in key health care over-the-counter categories were successful in mitigating mass and chain drug store intrusion.

Table of Contents

**WEIS MARKETS, INC.**  
**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS**  
**OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**  
(continued)

**Results of Operations (continued)**

Meat sales in the second quarter of 2011 increased 5.5% compared to the second quarter of 2010 and 3.4% year-to-date, due to product inflation. As reported previously, produce sales continue to provide positive results. Second quarter produce sales increased 2.7% and were up 2.5% year-to-date compared to the same periods in 2010. Dairy sales increased 7.3% in the second quarter of 2011 and 5.1% year-to-date, compared to the same periods in 2010, as a result of continued product inflation throughout the dairy category and increased item movement resulting from grand openings of remodeled and relocated stores. Management anticipates dairy sales to continue to increase at least through the third quarter of 2011.

The Company is committed to maintaining retail prices, but recognizes that inflationary pressures could cause the Company to raise prices in order to maintain margin rates.

Management remains confident in its ability to generate sales growth in a highly competitive environment, but also understands some competitors have greater financial resources and could use these resources to take measures which could adversely affect the Company's competitive position.

*Cost of Sales and Gross Profit*

Cost of sales consists of direct product (net of discounts and allowances), warehouse and transportation costs, as well as manufacturing facility operations.

According to the latest U.S. Bureau of Labor Statistics' report, the annual Seasonally Adjusted Food-at-Home Consumer Price Index increased 2.5% compared to a decrease of 1.4% for the same period last year. The annual Seasonally Adjusted Producer Price Index for Finished Consumer Foods increased at a rate of 4.6% for the second quarter of 2011 compared to an increase of 0.7% as of the second quarter of 2010. Despite fluctuating retail and wholesale prices, the Company has been able to maintain a gross profit rate of 27.0% for the quarter and year-to-date, respectively.

The Company's profitability is impacted by the cost of oil. Fluctuating fuel prices affect the delivered cost of product and the cost of other petroleum-based supplies such as plastic bags. Cost of sales was impacted by a 30.9% increase for the second quarter and a 27.0% increase year-to-date in the cost of diesel fuel used by the Company to deliver goods from its distribution center to its stores as compared to the same periods in 2010. According to the U.S. Department of Energy, the average U.S. diesel fuel price increased \$0.92 per gallon to \$4.01 per gallon as of June 25, 2011, compared to \$3.09 per gallon as of June 26, 2010. Based upon the U.S. Department of Energy's current estimate, the Company is expecting slight increases in diesel fuel prices throughout the remainder of 2011 and 2012.

Although the Company experienced product cost inflation and deflation in various commodities for both quarters presented, management does not feel it can accurately measure the full impact of inflation and deflation on retail pricing due to changes in the types of merchandise sold between periods, shifts in customer buying patterns and the fluctuation of competitive factors.

*Operating, General and Administrative Expenses*

Business operating costs including expenses generated from administration and purchasing functions, are recorded in "Operating, general and administrative expenses." Business operating costs include items such as wages, benefits, utilities, repairs and maintenance, advertising costs and credits, rent, insurance, equipment depreciation, leasehold amortization and costs for outside provided services.

**OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**  
(continued)

**Results of Operations (continued)**

Employee-related costs such as wages, employer paid taxes, health care benefits and retirement plans, comprise over 60% of the total operating, general and administrative expenses. Employee-related costs increased 1.1% in the second quarter and 0.1% in the first half of 2011 compared to the same periods last year. As a percent of sales, employee-related costs decreased 0.3% in the second quarter and 0.2% year-to-date compared to the same periods in 2010. The Company's self-insured health care benefits increased 4.8% in the second quarter and decreased 5.4% year-to-date, compared to the same periods in 2010. Management expects health care benefit costs to increase approximately 10% in 2011 and continues to evaluate various programs to reduce this expense. The Company remains concerned about the potential impact that The Patient Protection and Affordable Care Act will have on its future operating expense. As a percent of sales, direct store labor decreased 0.2% in the second quarter and 0.1% in the first half of 2011 compared to the same periods of 2010.

Depreciation expense was \$28.1 million, or 2.1% of total sales, for the first half of 2011 compared to \$27.0 million, or 2.0% of total sales, for the first half of 2010. The increase in depreciation expense, in total dollars, was the result of additional capital expenditures as the Company implements its capital expansion program. See the Liquidity and Capital Resources section for further information regarding the capital expansion program.

The Company's interchange fees for accepting credit and debit cards increased 11.8% in the second quarter of 2011 and 11.2% year-to-date, compared to the same periods in 2010. The Durbin Amendment to the Dodd-Frank Wall Street Reform and Consumer Protection Act authorizes the Federal Reserve to set rules to implement caps on debit card interchange fees. The Federal Reserve recently released its final rules, which indicate there will be a reduction in fees. However, the Company is not yet able to determine what the full impact will be on the Company's "Operating, general and administrative expenses".

Retail store profitability is sensitive to volatility in utility costs due to the amount of electricity and gas required to operate the Company's stores and facilities. The Company is responding to this volatility in operating costs by employing technologies, procurement strategies and associate energy awareness programs to manage and reduce consumption. Through these initiatives, with the added benefit of a declining market in electricity costs, the Company's electric utility expense decreased by 5.5% in the second quarter of 2011 and 8.9% year-to-date, compared to the same periods in 2010.

The Company may not be able to recover rising expenses through increased prices charged to its customers. Any delay in the Company's response to unforeseen cost increases or competitive pressures that prevent its ability to raise prices may cause earnings to suffer. Management does not foresee a change in these trends in the near future.

*Investment Income*

The Company's investment portfolio consists of short-term money market funds and marketable securities consisting of municipal bonds and equity securities. The Company classifies all of its marketable securities as available-for-sale. The Company experienced a \$722,000 increase in investment income from gains recognized on the sale of equity

securities in the first half of 2011, compared to the same period a year ago. The Company's investment income during the first half of 2011 also benefited as a result of investing more heavily in municipal bonds at the end of 2010. Management expects to continue to receive higher returns from marketable securities throughout 2011.

*Provision for Income Taxes*

The effective income tax rate was 36.6% in the first half of 2011 compared to 36.9% in the first half of 2010. The effective income tax rate differs from the federal statutory rate of 35% primarily due to the effect of state taxes, net of permanent differences relating to tax-free income.

**OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**  
(continued)

**Results of Operations (continued)**

Income is earned by selling merchandise at price levels that produce revenues in excess of cost of merchandise sold and operating and administrative expenses. Although the Company may experience short term fluctuations in its earnings due to unforeseen short-term operating cost increases, it historically has been able to increase revenues and maintain stable earnings from year to year.

**Liquidity and Capital Resources**

During the first twenty-six weeks of 2011, the Company generated \$62.8 million in cash flows from operating activities compared to \$76.6 million for the same period in 2010. Since the beginning of the fiscal year, working capital increased 5.3% compared to an increase of 14.4% in the same period of 2010.

Net cash used in investing activities was \$85.5 million compared to \$18.7 million in the first half of 2011 and 2010, respectively. These funds were used primarily to purchase marketable securities and property and equipment in the quarters presented. The Company purchased \$50.0 million of marketable securities in the first half of 2011. Property and equipment purchases during the first half of 2011 totaled \$47.4 million compared to \$22.7 million in the first half of 2010. As a percentage of sales, capital expenditures were 3.5% and 1.7% in the first half of 2011 and 2010, respectively.

The Company's capital expansion program includes the construction of new superstores, the expansion and remodeling of existing units, the acquisition of sites for future expansion, new technology purchases and the continued upgrade of the Company's processing and distribution facilities. Management estimates that its current development plans will require an investment of approximately \$100.0 million in 2011. The investment reduction for 2011 is a result of project completion dates shifting from 2011 to 2012. Company management remains committed to the capital expansion program and fully expects to invest the previously reported amount of \$110.0 million.

Net cash used in financing activities was \$15.6 million in the first half of 2011 and 2010, which solely consisted of dividend payments to shareholders. At June 25, 2011, the Company had outstanding letters of credit of \$13.6 million. The letters of credit are maintained primarily to support performance, payment, deposit or surety obligations of the Company. The Company does not anticipate drawing on any of them.

Total cash dividend payments on common stock, on a per share basis, amounted to \$.58 for the first half of 2011 and 2010. At its regular meeting held in July, the Board of Directors unanimously approved a quarterly dividend of \$.29 per share, payable on August 1, 2011 to shareholders of record as of July 18, 2011. The Board of Directors' 2004 resolution authorizing the repurchase of up to one million shares of the Company's common stock has a remaining balance of 752,468 shares.

The Company has no other commitment of capital resources as of June 25, 2011, other than the lease commitments on its store facilities under operating leases that expire at various dates through 2028. The Company anticipates funding its working capital requirements and its \$100.0 million capital expansion program through cash and investment reserves and future internally generated cash flows from operations. However, management is receptive to maintaining a credit facility to fund potential acquisitions.

**Critical Accounting Estimates**

The Company has chosen accounting policies that it believes are appropriate to accurately and fairly report its operating results and financial position, and the Company applies those accounting policies in a consistent manner. The Significant Accounting Policies are summarized in Note 1 to the Consolidated Financial Statements included in the 2010 Annual Report on Form 10-K. There have been no changes to the Critical Accounting Policies since the Company filed its Annual Report on Form 10-K for the year ended December 25, 2010.

**Forward-Looking Statements**

In addition to historical information, this 10-Q Report may contain forward-looking statements, which are included pursuant to the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995. Any forward-looking statements contained herein are subject to certain risks and uncertainties that could cause actual results to differ materially from those projected. For example, risks and uncertainties can arise with changes in: general economic conditions, including their impact on capital expenditures; business conditions in the retail industry; the regulatory environment; rapidly changing technology and competitive factors, including increased competition with regional and national retailers; and price pressures. Readers are cautioned not to place undue reliance on forward-looking statements, which reflect management's analysis only as of the date hereof. The Company undertakes no obligation to publicly revise or update these forward-looking statements to reflect events or circumstances that arise after the date hereof. Readers should carefully review the risk factors described in other documents the Company files periodically with the Securities and Exchange Commission.

**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

Quantitative Disclosure - There have been no material changes in the Company's market risk during the six months ended June 25, 2011. Quantitative information is set forth in Item 7a on the Company's Annual Report on Form 10-K under the caption "Quantitative and Qualitative Disclosures About Market Risk," which was filed for the fiscal year ended December 25, 2010 and is incorporated herein by reference.

Qualitative Disclosure - This information is set forth in the Company's Annual Report on Form 10-K under the caption "Liquidity and Capital Resources," within "Management's Discussion and Analysis of Financial Condition and Results of Operations," which was filed for the fiscal year ended December 25, 2010 and is incorporated herein by reference.

**ITEM 4. CONTROLS AND PROCEDURES**

The Chief Executive Officer and the Chief Financial Officer, together with the Company's Disclosure Committee, evaluated the Company's disclosure controls and procedures as of the fiscal quarter ended June 25, 2011. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective as of the end of the period covered by this report to ensure that information

required to be disclosed by the Company in the reports filed or submitted by it under the Securities Exchange Act of 1934, as amended, was recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and include controls and procedures designed to ensure that information required to be disclosed by the Company in such reports was accumulated and communicated to the Company's management, including the Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

In connection with the evaluation described above, there was no change in the Company's internal control over financial reporting during the fiscal quarter ended June 25, 2011, that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.
