

RGC RESOURCES INC
Form 10-Q
August 04, 2016

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549
Form 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934
For Quarterly Period Ended June 30, 2016
Commission File Number 000-26591

RGC Resources, Inc.(Exact name of Registrant as Specified in its Charter)

VIRGINIA	54-1909697
(State or Other Jurisdiction of Incorporation or Organization)	(I.R.S. Employer Identification No.)

519 Kimball Ave., N.E., Roanoke, VA 24016
(Address of Principal Executive Offices) (Zip Code)
(540) 777-4427
(Registrant's Telephone Number, Including Area Code)
None

(Former Name, Former Address and Former Fiscal Year, if Changed Since Last Report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15 (d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of "large accelerated filer," "accelerated-filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer ☐	Accelerated filer ☒
--	---

Non-accelerated filer ☐ (Do not check if a smaller reporting company)	Smaller reporting company ☐
--	--

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act) Yes ☐ No ☒

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Class	Outstanding at July 31, 2016
Common Stock, \$5 Par Value	4,778,687

RGC RESOURCES, INC. AND SUBSIDIARIES

CONDENSED NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
UNAUDITED

1. Basis of Presentation

RGC Resources, Inc. is an energy services company primarily engaged in the sale and distribution of natural gas. The consolidated financial statements include the accounts of RGC Resources, Inc. ("Resources" or the "Company") and its wholly owned subsidiaries: Roanoke Gas Company; Diversified Energy Company; RGC Ventures of Virginia, Inc.; and RGC Midstream, LLC.

In the opinion of management, the accompanying unaudited condensed consolidated financial statements contain all adjustments (consisting of only normal recurring accruals) necessary to present fairly Resources financial position as of June 30, 2016 and the results of its operations, cash flows and comprehensive income for the three months and nine months ended June 30, 2016 and 2015. The results of operations for the three months and nine months ended June 30, 2016 are not indicative of the results to be expected for the fiscal year ending September 30, 2016 as quarterly earnings are affected by the highly seasonal nature of the business and weather conditions generally result in greater earnings during the winter months.

The unaudited condensed consolidated interim financial statements and condensed notes are presented as permitted under the rules and regulations of the Securities and Exchange Commission. Pursuant to those rules, certain information and note disclosures normally included in the annual financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted, although the Company believes that the disclosures made are adequate to make the information not misleading. Therefore, the condensed consolidated financial statements and condensed notes should be read in conjunction with the financial statements and notes contained in the Company's Form 10-K for the year ended September 30, 2015. The September 30, 2015 balance sheet was included in the Company's audited financial statements included in Form 10-K.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

The Company's significant accounting policies are described in Note 1 to the consolidated financial statements in Form 10-K for the year ended September 30, 2015. Newly adopted and newly issued accounting standards are discussed below.

Recently Issued Accounting Standards

In May 2014, the FASB issued guidance under FASB ASC No. 606 - Revenue from Contracts with Customers that affects any entity that enters into contracts with customers for the transfer of goods or services or transfer of non-financial assets. This guidance supersedes the revenue recognition requirements in Topic 605, Revenue Recognition, and most industry-specific guidance. The core principle of the new guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. To achieve that core principle, an entity should apply the following steps: (1) identify the contract with the customer, (2) identify the performance obligations in the contract, (3) determine the transaction price, (4) allocate the transaction price to the performance obligations in the contract, and (5) recognize revenue when, or as, the entity satisfies the performance obligation. The new guidance was effective for the Company for the annual reporting period ending September 30, 2018 and interim periods within that annual period. Early application was not permitted. In August 2015, the FASB issued Accounting Standards Update (ASU) 2015-14 that deferred the effective date of this guidance by one year. Therefore, the new guidance is effective for the Company for the annual reporting period ending September 30, 2019 and interim periods within that year. The FASB has issued subsequent guidance under ASC No. 606 to provide further clarification of certain aspects of the original ASU. All additional guidance is being considered as part of the Company's evaluation of the revenue recognition standard. Although Management has not completed its evaluation of

all the issued guidance under ASC No. 606, the Company does not currently expect the guidance to have a material effect on its financial position, results of operations or cash flows.

In April 2015, the FASB issued ASU 2015-03, Interest-Imputation of Interest: Simplifying the Presentation of Debt Issuance Costs. This ASU requires that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability. The Company previously recognized debt issuance costs in assets and amortized those costs over the term of the debt. This guidance is effective for the Company for the annual reporting period ending September 30, 2017 and interim periods within that annual period. Early application is permitted. The Company adopted the ASU in the consolidated financial statements in Form 10-K for the year ended September 30, 2015. The adoption of this ASU did not have an effect on the Company's results of operations or cash flows; however, the unamortized balance

of debt issuance costs were reclassified from assets to an offset against long-term debt. Certain deferred costs related to the early retirement of debt in 2014 are classified as regulatory assets and are not offset against debt. The changes required under this guidance are presented in the Consolidated Balance Sheets presented in the Company's financial statements.

In November 2015, the FASB issued ASU 2015-17, Income Taxes: Balance sheet Classification of Deferred Taxes. The ASU requires that all deferred tax assets and liabilities be presented as noncurrent and eliminates existing presentation requirements. This ASU is effective for the Company for the annual reporting period ended September 30, 2018 and interim periods within that annual period. Early application is permitted. The Company adopted this ASU for the quarter ended December 31, 2015. The Company applied the retrospective approach in adopting this ASU and reclassified \$2,293,536 previously reflected as a current deferred income tax asset against the balance of the non-current deferred tax liability in the September 30, 2015 consolidated balance sheet. There was no other impact to the Company's financial position, results of operations or cash flows.

In January 2016, the FASB issued ASU 2016-01, Financial Instruments - Overall: Recognition and Measurement of Financial Assets and Financial Liabilities. The ASU enhances the reporting model for financial instruments to provide users of the financial statements with more useful information through several provisions, including the following: (1) requires equity investments, excluding investments accounted for under the equity method, be measured at fair value with changes in fair value recognized in net income, (2) simplifies the impairment assessment of equity investments without readily determinable fair values, (3) eliminates the requirement to disclose the method(s) and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured at amortized cost on the balance sheet, (4) requires entities to use the exit price notion when measuring the fair value of financial instruments for disclosure purposes, and (5) requires separate presentation of financial assets and financial liabilities by measurement category and form of financial asset on the balance sheet or the accompanying notes to the financial statements. The new guidance is effective for the Company for the annual reporting period ending September 30, 2019 and interim periods within that annual period. Management has not completed its evaluation of the new guidance. However, the Company does not currently expect the new guidance to have a material effect on its financial position, results of operations or cash flows.

In February 2016, the FASB issued ASU 2016-02, Leases. The ASU leaves the accounting for leases mostly unchanged for lessors, with the exception of targeted improvements for consistency; however, the new guidance requires lessees to recognize assets and liabilities for leases with terms of more than 12-months. The ASU also revises the definition of a lease as a contract, or part of a contract, that conveys the right to control the use of identified property, plant or equipment for a period of time in exchange for consideration. Consistent with current GAAP, the presentation and cash flows arising from a lease by a lessee will primarily depend on its classification as a finance or operating lease. In contrast, the new ASU requires both types of leases to be recognized on the balance sheet. In addition, the new guidance includes quantitative and qualitative disclosure requirements to aid financial statement users in better understanding the amount, timing and uncertainty of cash flows arising from leases. The new guidance is effective for the Company for the annual reporting period ending September 30, 2020 and interim periods within that annual period. Early adoption is permitted. Management has not completed its evaluation of the new guidance. However, the Company does not currently expect the new guidance to have a material effect on its financial position, results of operations or cash flows.

In March 2016, the FASB issued ASU 2016-09, Compensation - Stock Compensation: Improvements to Employee Share-Based Payment Accounting. The guidance simplifies several aspects of the accounting for share-based payment award transactions, including income tax consequences, classification of awards as either equity or liabilities and classification on the statement of cash flows. The new guidance is effective for the Company for the annual reporting period ending September 30, 2018 and interim periods within that annual period. Early adoption is permitted. Management has not completed its evaluation of the new guidance. However, the Company does not currently expect

the new guidance to have a material effect on its financial position, results of operations or cash flows.

Other accounting standards that have been issued by the FASB or other standard-setting bodies are not currently applicable to the Company or are not expected to have a material impact on the Company's financial position, results of operations or cash flows.

2. Rates and Regulatory Matters

The State Corporation Commission of Virginia ("SCC") exercises regulatory authority over the natural gas operations of Roanoke Gas. Such regulation encompasses terms, conditions, and rates to be charged to customers for natural gas service; safety standards; extension of service; and accounting and depreciation.

RGC RESOURCES, INC. AND SUBSIDIARIES

On June 30, 2016, the Company filed with the SCC an application for a modification to the SAVE (Steps to Advance Virginia's Energy) Plan and Rider. The original SAVE Plan has been modified each year to incorporate certain changes and to include new projects that qualify for rate recovery under the Plan. The SAVE Plan is designed to provide a mechanism for utilities to recover the related depreciation and expenses and a return on rate base of the capital investment related to the replacement of aging natural gas infrastructure without the filing of a formal application for an increase in non-gas rates. Under the current application, the Company submitted its report for refunding the excess SAVE revenues collected under the 2015 SAVE Plan and proposed new SAVE rates to be implemented for the ongoing investment in SAVE Plan projects. The Company anticipates the SCC to complete its review of the application over the next few months.

3. Other Investments

In October 2015, the Company, through its wholly-owned subsidiary, RGC Midstream, LLC ("Midstream"), acquired a 1% equity interest in the Mountain Valley Pipeline, LLC (the "LLC").

The LLC was established to construct and operate a natural gas pipeline originating in northern West Virginia and extending through south central Virginia. The proposed pipeline will have the capacity to transport approximately 2 million decatherms of natural gas per day. If approved by the Federal Energy Regulatory Commission, the pipeline is expected to be in service by late 2018.

The total project cost is estimated to be approximately \$3.5 billion. The Company's 1% equity interest in the LLC will require a total estimated investment of approximately \$35 million, by periodic capital contributions throughout the design and construction phases of the project. Midstream held an approximate \$3.4 million equity method investment in the LLC at June 30, 2016. On a quarterly basis, the LLC issues a capital call notice which specifies the capital contributions to be paid over the subsequent three months. As of June 30, 2016, the Company had \$1,059,890 remaining to be paid under the most recent notice. The capital contribution payable has been reflected on the Company's balance sheet as of June 30, 2016, with a corresponding increase to Investment in Unconsolidated Affiliate. Initial funding for Midstream's investment in the LLC is provided through two unsecured promissory notes, each with a 5-year term.

The Company is participating in the earnings of the LLC in proportion to its level of investment. The Company is utilizing the equity method to account for the transactions and activity of the investment.

The financial statement locations of the investment in the LLC are as follows:

Balance Sheet Location of Other Investments:	June 30, 2016	September 30, 2015
Other Assets:		
Investment in unconsolidated affiliate	\$3,428,411	\$ —
Current Liabilities:		
Capital contributions payable	\$1,059,890	\$ —
	Three Months Ended	Nine Months Ended
Income Statement Location of Other Investments:	June 30, 2016	June 30, 2015
Equity in earnings of unconsolidated affiliate	\$40,562	\$ —

4. Short-Term Debt

The Company entered into a new unsecured line-of-credit agreement dated March 31, 2016. The new agreement maintains the same variable interest rate based on 30-day LIBOR plus 100 basis points and availability fee of 15 basis points as the expiring agreement. The agreement also includes multi-tiered borrowing limits to accommodate seasonal borrowing demands and minimize borrowing costs. The Company's total available borrowing limits during the term of the line-of-credit agreement range from \$10,000,000 to \$24,000,000. The line-of-credit agreement will expire March 31, 2017, unless extended. The Company anticipates being able to extend or replace the credit line upon expiration. As of June 30, 2016, the Company had \$8,127,832 outstanding under its line-of-credit agreement.

5. Long-Term Debt

On December 29, 2015, Midstream, a wholly-owned subsidiary of Resources, entered into a Credit Agreement (the “Agreement”) and related Promissory Notes (the “Notes”) with Union Bank & Trust and Branch Banking & Trust (collectively, the “Banks”), under which Midstream may borrow up to a total of \$25 million, over a period of 5 years, with an interest rate of 30-day LIBOR plus 160 basis points. Midstream issued the Notes to provide financing for capital contributions in respect of its 1% interest in the LLC. Coinciding with Midstream's entry into the Agreement and Notes, RGC Resources entered into a Guaranty in favor of the Banks by which it guarantees Midstream's payment and performance on the Notes.

The Agreement sets forth certain representations, warranties and covenants to which Midstream is subject, including financial covenants that limit Consolidated Long Term Indebtedness to not more than 65% of Consolidated Total Capitalization and Priority Indebtedness to not more than 15% of Consolidated Total Assets.

Interest on the Notes is due monthly with the outstanding balance on the Notes due in full on December 29, 2020. The Notes are unsecured. In accordance with the terms of the Agreement, at such point in time as Midstream has borrowed \$17.5 million under the Notes, Midstream is required to provide the next \$5 million towards its capital contributions to the LLC. Once Midstream has completed its \$5 million in contributions, it may resume borrowing under the Notes up to the \$25 million limit.

Long-term debt consists of the following:

	June 30, 2016		September 30, 2015	
	Principal	Unamortized Debt Issuance Costs	Principal	Unamortized Debt Issuance Costs
Unsecured senior notes payable, at 4.26% due on September 18, 2034	\$30,500,000	\$ 176,187	\$30,500,000	\$ 183,427
Unsecured term notes payable, at 30-day LIBOR plus 1.60%, due December 29, 2020	2,596,200	91,457	—	—
Total	\$33,096,200	\$ 267,644	\$30,500,000	\$ 183,427

6. Other Comprehensive Income

A summary of other comprehensive income and loss is provided below:

	Before-Tax Amount	Tax (Expense) or Benefit	Net-of-Tax Amount
Three Months Ended June 30, 2016			
Defined benefit plans:			
Amortization of actuarial losses	\$ 55,268	\$(20,979)	\$ 34,289

7. Commitments and Contingencies

Roanoke Gas currently holds the only franchises and/or certificates of public convenience and necessity to distribute natural gas in its service area. The Company renewed the expiring franchises in December 2015 under similar terms and conditions. The new franchise agreements expire December 31, 2035. The Company's current certificates of public convenience and necessity are exclusive and are intended for perpetual duration.

Due to the nature of the natural gas distribution business, the Company has entered into agreements with both suppliers and pipelines for natural gas commodity purchases, storage capacity and pipeline delivery capacity. The Company obtains most of its regulated natural gas supply through an asset manager. The Company utilizes an asset manager to assist in optimizing the use of its transportation, storage rights, and gas supply in order to provide a secure and reliable source of natural gas to its customers. The Company also has storage and pipeline capacity contracts to store and deliver natural gas to the Company's distribution system. Roanoke Gas is served directly by two primary pipelines. These two pipelines deliver all of the natural gas supplied to the Company's customers. Depending on weather conditions and the level of customer demand, failure of one or both of these transmission pipelines could have a major adverse impact on the Company.

8. Earnings Per Share

Basic earnings per common share for the three months and nine months ended June 30, 2016 and 2015 were calculated by dividing net income by the weighted average common shares outstanding during the period. Diluted earnings per common share were calculated by dividing net income by the weighted average common shares outstanding during the period plus potential dilutive common shares. A reconciliation of basic and diluted earnings per share is presented below:

RGC RESOURCES, INC. AND SUBSIDIARIES

	Three Months Ended June 30,		Nine Months Ended June 30,	
	2016	2015	2016	2015
Net Income	\$627,068	\$354,940	\$5,661,305	\$5,058,660
Weighted average common shares	4,773,766	4,729,428	4,760,609	4,725,144
Effect of dilutive securities:				
Options to purchase common stock	8,042	3,192	5,301	3,814
Diluted average common shares	4,781,808	4,732,620	4,765,910	4,728,958
Earnings Per Share of Common Stock:				
Basic	\$0.13	\$0.08	\$1.19	\$1.07
Diluted	\$0.13	\$0.07	\$1.19	\$1.07

9. Employee Benefit Plans

The Company has both a defined benefit pension plan (the “pension plan”) and a postretirement benefit plan (the “postretirement plan”). The pension plan covers substantially all of the Company’s employees and provides retirement income based on years of service and employee compensation. The postretirement plan provides certain health care and supplemental life insurance benefits to retired employees who meet specific age and service requirements. Net pension plan and postretirement plan expense recorded by the Company is detailed as follows:

	Three Months Ended June 30,		Nine Months Ended June 30,	
	2016	2015	2016	2015
Components of net periodic pension cost:				
Service cost	\$173,594	\$163,696	\$520,782	\$491,088
Interest cost	283,194	256,477	849,582	769,431
Expected return on plan assets	(373,060)	(360,212)	(1,119,180)	(1,080,636)
Recognized loss	125,420	64,345	376,260	193,035
Net periodic pension cost	\$209,148	\$124,306	\$627,444	\$372,918

	Three Months Ended June 30,		Nine Months Ended June 30,	
	2016	2015	2016	2015
Components of postretirement benefit cost:				
Service cost	\$37,005	\$41,895	\$111,015	\$125,685
Interest cost	156,145	150,024	468,435	450,072
Expected return on plan assets	(126,965)	(129,164)	(380,895)	(387,492)
Recognized loss	62,543	49,265	187,629	147,795
Net postretirement benefit cost	\$128,728	\$112,020	\$386,184	\$336,060

The Company contributed \$250,000 to its pension plan and \$375,000 to its postretirement medical plan during the nine-month period ended June 30, 2016. The Company currently expects to contribute a minimum of an additional \$250,000 to its pension plan and an additional \$125,000 to its postretirement medical plan prior to the end of its fiscal year.

10. Fair Value Measurements

FASB ASC No. 820, Fair Value Measurements and Disclosures, established a fair value hierarchy that prioritizes each input to the valuation method used to measure fair value of financial and nonfinancial assets and liabilities that are measured and reported on a fair value basis into one of the following three broad levels:

Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date.

RGC RESOURCES, INC. AND SUBSIDIARIES

Level 2 – Inputs other than quoted prices in Level 1 that are either for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability, or inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 – Unobservable inputs for the asset or liability where there is little, if any, market activity for the asset or liability at the measurement date.

The fair value hierarchy gives the highest priority to unadjusted quoted prices in active markets (Level 1) and the lowest priority to unobservable inputs (Level 3).

The following table summarizes the Company's financial assets and liabilities that are measured at fair value on a recurring basis as required by existing guidance and the fair value measurements by level within the fair value hierarchy as of June 30, 2016 and September 30, 2015:

Fair Value Measurements - June 30, 2016				
Fair Value	Quoted Prices in Active Markets (Level 1)		Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Liabilities:				
Natural gas purchases	\$1,547,136	\$—	\$1,547,136	\$—
Total	\$1,547,136	\$—	\$1,547,136	\$—

Fair Value Measurements - September 30, 2015				
Fair Value	Quoted Prices in Active Markets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	
Liabilities:				
Natural gas purchases	\$712,710	\$—	\$712,710	\$ —
Total	\$712,710	\$—	\$712,710	\$ —

Under the asset management contract, a timing difference can exist between the payment for natural gas purchases and the actual receipt of such purchases. Payments are made based on a predetermined monthly volume with the price based on weighted average first of the month index prices corresponding to the month of the scheduled payment. At June 30, 2016 and September 30, 2015, the Company had recorded in accounts payable the estimated fair value of the liability valued at the corresponding first of month index prices for which the liability is expected to be settled. The Company's nonfinancial assets and liabilities that are measured at fair value on a nonrecurring basis consist of its asset retirement obligations. The asset retirement obligations are measured at fair value at initial recognition based on expected future cash flows required to settle the obligation.

The carrying value of cash and cash equivalents, accounts receivable, accounts payable (with the exception of the timing difference under the asset management contract), customer credit balances and customer deposits is a reasonable estimate of fair value due to the short-term nature of these financial instruments. The following table

summarizes the fair value of the Company's financial assets and liabilities that are not adjusted to fair value in the financial statements as of June 30, 2016 and September 30, 2015:

RGC RESOURCES, INC. AND SUBSIDIARIES

		Fair Value Measurements - June 30, 2016	
Carrying Value		Quoted Prices in Other Markets (Level 1)	Significant Observable Inputs (Level 2)
			Significant Unobservable Inputs (Level 3)
Liabilities:			
Long-term debt	\$33,096,200	\$—	\$34,871,572
Total	\$33,096,200	\$—	\$34,871,572

Fair Value Measurements - September 30, 2015			
Carrying Value	Quoted Prices in Other Markets (Level 1)	Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Liabilities:			
Long-term debt	\$30,500,000	\$—	\$28,570,585
Total	\$30,500,000	\$—	\$28,570,585

The fair value of long-term debt is estimated by discounting the future cash flows of the debt based on current market rates and corresponding interest rate spread.

FASB ASC 825, Financial Instruments, requires disclosures regarding concentrations of credit risk from financial instruments. Cash equivalents are investments in high-grade, short-term securities (original maturity less than three months), placed with financially sound institutions. Accounts receivable are from a diverse group of customers including individuals and small and large companies in various industries. As of June 30, 2016 and September 30, 2015, no single customer accounted for more than 5% of the total accounts receivable balance. The Company maintains certain credit standards with its customers and requires a customer deposit if such evaluation warrants.

11. Stock Options

On December 3, 2015, the Board of Directors granted 16,000 options to certain officers of the Company. In accordance with the Key Employee Stock Option Plan, the grant price of \$21.22 was the closing price of the Company's stock on the grant date. The options become exercisable six months from the grant date and expire after ten years from the date of issuance.

Fair value at the grant date was \$4.04 per option as calculated using the Black-Scholes option pricing model. Compensation expense is recognized over the vesting period. Total compensation expense recognized through June 30, 2016 was \$64,640.

12. Subsequent Events

The Company has evaluated subsequent events through the date the financial statements were issued. There were no items not otherwise disclosed which would have materially impacted the Company's condensed consolidated financial statements.

RGC RESOURCES, INC. AND SUBSIDIARIES

ITEM 2 – MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward-Looking Statements

This report contains forward-looking statements that relate to future transactions, events or expectations. In addition, RGC Resources, Inc. (“Resources” or the “Company”) may publish forward-looking statements relating to such matters as anticipated financial performance, business prospects, technological developments, new products, research and development activities and similar matters. These statements are based on management’s current expectations and information available at the time of such statements and are believed to be reasonable and are made in good faith. The Private Securities Litigation Reform Act of 1995 provides a safe harbor for forward-looking statements. In order to comply with the terms of the safe harbor, the Company notes that a variety of factors could cause the Company’s actual results and experience to differ materially from the anticipated results or other expectations expressed in the Company’s forward-looking statements. The risks and uncertainties that may affect the operations, performance, development and results of the Company’s business include, but are not limited to those set forth in the following discussion and within Item 1A “Risk Factors” in the Company’s 2015 Annual Report on Form 10-K. All of these factors are difficult to predict and many are beyond the Company’s control. Accordingly, while the Company believes its forward-looking statements to be reasonable, there can be no assurance that they will approximate actual experience or that the expectations derived from them will be realized. When used in the Company’s documents or news releases, the words, “anticipate,” “believe,” “intend,” “plan,” “estimate,” “expect,” “objective,” “projection,” “forecast,” “budget,” “assume” or similar words or future or conditional verbs such as “will,” “would,” “should,” “can,” “could” or “may” are intended to identify forward-looking statements.

Forward-looking statements reflect the Company’s current expectations only as of the date they are made. The Company assumes no duty to update these statements should expectations change or actual results differ from current expectations except as required by applicable laws and regulations.

The three-month and nine-month earnings presented herein should not be considered as reflective of the Company’s consolidated financial results for the fiscal year ending September 30, 2016. The total revenues and margins realized during the first nine months reflect higher billings due to the weather sensitive nature of the gas business.

Overview

Resources is an energy services company primarily engaged in the regulated sale and distribution of natural gas to approximately 60,000 residential, commercial and industrial customers in Roanoke, Virginia and the surrounding localities through its Roanoke Gas Company (“Roanoke Gas”) subsidiary. Natural gas service is provided at rates and for terms and conditions set by the Virginia State Corporation Commission (“SCC”).

Resources also provides certain unregulated services through Roanoke Gas and its other subsidiaries. Such unregulated operations represent less than 2% of total revenues and margin of Resources on an annual basis.

The Company’s utility operations are regulated by the SCC, which oversees the terms, conditions, and rates to be charged to customers for natural gas service, safety standards, extension of service, accounting and depreciation. The Company is also subject to federal regulation from the Department of Transportation in regard to the construction, operation, maintenance, safety and integrity of its transmission and distribution pipelines. The Federal Energy Regulatory Commission (“FERC”) regulates the prices for the transportation and delivery of natural gas to the Company’s distribution system and underground storage services. The Company is also subject to other regulations which are not necessarily industry specific.

Over 98% of the Company’s annual revenues are derived from the sale and delivery of natural gas to Roanoke Gas customers. The SCC authorizes the rates and fees the Company charges its customers for these services. These rates are designed to provide the Company with the opportunity to recover its gas and non-gas expenses and to earn a reasonable rate of return for shareholders based on normal weather. Normal weather refers to the average number of heating degree days (an industry measure by which the average daily temperature falls below 65 degrees Fahrenheit) over the previous 30-year period.

As the Company's business is seasonal in nature, volatility in winter weather and the commodity price of natural gas can impact the effectiveness of the Company's rates in recovering its costs and providing a reasonable return for its shareholders. In order to mitigate the effect of variations in weather and the cost of natural gas, the Company has certain approved rate mechanisms in place that help provide stability in earnings, adjust for volatility in the price of natural gas and provide a return on increased infrastructure investment. These mechanisms include a purchased gas adjustment factor ("PGA"), weather normalization adjustment factor ("WNA"), inventory carrying cost revenue and a Steps to Advance Virginia Energy ("SAVE") adjustment rider.

RGC RESOURCES, INC. AND SUBSIDIARIES

The Company's approved billing rates include a component designed to allow for the recovery of the cost of natural gas used by its customers. The cost of natural gas is considered a pass-through cost and is independent of the non-gas rates of the Company. This rate component, referred to as the PGA, allows the Company to pass along to its customers increases and decreases in natural gas costs incurred by its regulated operations. On a quarterly basis, the Company files a PGA rate adjustment request with the SCC to adjust the gas cost component of its rates up or down depending on projected price and activity. Once administrative approval is received, the Company adjusts the gas cost component of its rates to reflect the approved amount. As actual costs will differ from the projections used in establishing the PGA rate, the Company will either over-recover or under-recover its actual gas costs during the period. The difference between actual costs incurred and costs recovered through the application of the PGA is recorded as a regulatory asset or liability. At the end of the annual deferral period, the balance is amortized over an ensuing 12-month period as amounts are reflected in customer billings.

The WNA reduces the volatility in earnings due to the variability in temperatures during the heating season. The WNA is based on a weather measurement band around the most recent 30-year temperature average. The WNA provides the Company with a level of earnings protection when weather is warmer than normal and provides its customers with price protection when the weather is colder than normal. Under the WNA, the Company recovers from its customers the lost margin (excluding gas costs) for the impact of weather that is warmer than normal or refunds the excess margin earned for weather that is colder than normal. For the three months ended June 30, 2016 and 2015, the Company accrued approximately \$42,000 and \$195,000, respectively, in additional revenue and margin for weather that was warmer than normal. For the nine months ended June 30, 2016, the Company accrued approximately \$1,223,000 in additional revenue and margin for weather that had 12.3% fewer heating degree days than normal. In comparison, for the nine months ended June 30, 2015, the Company reduced revenues and margins by approximately \$649,000 to reflect weather that had 6.9% more heating degree days than normal.

The Company also has an approved rate structure in place that mitigates the impact of financing costs associated with its natural gas inventory. Under this rate structure, Roanoke Gas recognizes revenue for the financing costs, or "carrying costs," of its investment in natural gas inventory. The carrying cost revenue factor applied to the cost of inventory is based on the Company's weighted-average cost of capital including interest rates on short-term and long-term debt and the Company's authorized return on equity. During times of rising gas costs and rising inventory levels, the Company recognizes revenues to offset higher financing costs associated with higher inventory balances. Conversely, during times of decreasing gas costs and lower inventory balances, the Company recognizes less inventory carrying cost ("ICC") revenue as financing costs are lower. In addition, ICC revenues are impacted by the changes in the weighting of the components that are used to determine the weighted-average cost of capital. The average unit price of gas in storage during the first nine months of the current fiscal year was \$1.16 per decatherm, or 26% lower than the same period last year, as natural gas commodity prices continued their downward trend during the first half of calendar 2016. Although natural gas commodity prices have rebounded in July, ICC revenues are projected to remain at levels below last year.

The Company's non-gas rates provide for the recovery of non-gas related expenses and a reasonable return to shareholders. These rates are determined based on the filing of a formal rate application with the SCC utilizing historical information including investment in natural gas facilities. Generally, investments related to extending service to new customers are recovered through the non-gas rates currently in place. The investment in replacing and upgrading existing infrastructure is not recoverable until a formal rate application is made to include the additional investment and new non-gas rates are approved. The SAVE Plan and Rider provides the Company with the ability to recover costs related to investments in qualified infrastructure projects on a prospective basis rather than on a historical basis. The SAVE Plan provides a mechanism to recover the related depreciation and expenses and provide a return on rate base of the additional capital investments related to improving the Company's infrastructure until such time that a formal rate application is filed to incorporate this investment in the Company's non-gas rates. As the Company did not file for an increase in the non-gas rates during the prior year and the level of capital investment continues to grow, SAVE Plan revenues have increased significantly. The Company recognized approximately

\$664,000 and \$1,701,000 in SAVE Plan revenues for the three-month and nine-month periods ended June 30, 2016, compared to \$342,000 and \$890,000 for the comparable periods last year. These SAVE Plan revenues will be included as part of the new non-gas base rates the next time the Company files for a non-gas rate increase.

Results of Operations

Three Months Ended June 30, 2016:

Net income increased by \$272,128 for the three months ended June 30, 2016, compared to the same period last year. Increases in SAVE Plan revenues and higher capitalized overheads continued to be the primary contributors to the improvement in net income.

The tables below reflect operating revenues, volume activity and heating degree-days.

RGC RESOURCES, INC. AND SUBSIDIARIES

	Three Months Ended June 30,				
	2016	2015	Increase	Percentage	
Operating Revenues					
Gas Utilities	\$11,017,281	\$10,524,512	\$492,769	5	%
Other	277,916	249,897	28,019	11	%
Total Operating Revenues	\$11,295,197	\$10,774,409	\$520,788	5	%
Delivered Volumes					
Regulated Natural Gas (DTH)					
Residential and Commercial	865,471	789,169	76,302	10	%
Transportation and Interruptible	658,869	623,394	35,475	6	%
Total Delivered Volumes	1,524,340	1,412,563	111,777	8	%
Heating Degree Days (Unofficial)	332	278	54	19	%

Total operating revenues for the three months ended June 30, 2016, compared to the same period last year, increased due to a higher volume of natural gas deliveries related to customer growth and an increase in heating degree days more than offsetting lower natural gas commodity prices. Total natural gas deliveries increased by 8% due to stronger commercial and industrial usage and the 19% increase in the number of heating degree days compared to the same period last year. Residential and commercial volumes increased by 10% due to customer growth including the addition of a large volume commercial customer and weather that was colder than the prior year. Lower margin transportation and industrial volumes increased over the same quarter last year following a decline in the first quarter.

	Three Months Ended June 30,				
	2016	2015	Increase (Decrease)	Percentage	
Gross Margin					
Gas Utilities	\$6,183,677	\$5,826,133	\$357,544	6	%
Other	128,663	135,695	(7,032)	(5)	%
Total Gross Margin	\$6,312,340	\$5,961,828	\$350,512	6	%

Regulated natural gas margins from utility operations increased from the same period last year primarily as a result of higher SAVE Plan revenues and customer growth. SAVE revenues increased by \$322,620 due to the increasing investment in SAVE related projects. Volumetric margin, net of the WNA adjustment, increased by \$42,828 primarily due to customer growth including the addition of a large volume commercial customer. Other margins declined from last year's levels due to reduced activity under the Company's non-gas related contracts.

The components of and the change in gas utility margin are summarized below:

	Three Months Ended June 30,				
	2016	2015	Increase (Decrease)		
Customer Base Charge	\$3,104,082	\$3,067,398	\$36,684		
Carrying Cost	100,179	119,481	(19,302)		
SAVE Plan	664,488	341,868	322,620		
Volumetric	2,250,298	2,054,984	195,314		
WNA	42,118	194,604	(152,486)		
Other Gas Revenues	22,512	47,798	(25,286)		
Total	\$6,183,677	\$5,826,133	\$357,544		

Operation and maintenance expenses declined by \$263,098, or 8%, primarily due to increased overhead capitalization, lower contractor and professional expense and reduced bad debt accruals, partially offset by higher employee benefit

costs. Capitalized overheads increased by more than \$271,000 due to a 38% increase in direct capital expenditures during the quarter related to the ongoing pipeline renewal program and other SAVE related projects. Professional expenses declined by nearly

RGC RESOURCES, INC. AND SUBSIDIARIES

\$23,000 as the prior year had higher legal costs attributable to negotiations of a new union contract. Contractor services declined by \$31,000 as the prior year included costs related to facility inspections. Bad debt expense decreased by \$35,000 due to reduced billings and improved collections on prior bad debt write-offs. Total benefit costs increased by approximately \$135,000 due to increased pension and postretirement medical costs related to the amortization of higher actuarial losses attributable to the adoption of new mortality tables. The remaining differences were related to various minor fluctuations in other expenses.

General taxes increased by \$15,264, or 4% due to higher property taxes associated with increases in utility property.

Depreciation expense increased by \$101,215, or 8%, on a corresponding increase in utility plant investment.

Other expenses increased by \$18,008 primarily due to higher pipeline assessments.

Interest expense increased by \$37,454, or 10%, due to increased utilization of the Company's line-of-credit and the financing of the Company's investment in the Mountain Valley Pipeline. Total average debt outstanding during the quarter increased by 25%.

Income tax expense increased by \$210,103, which corresponds primarily to the increase in pre-tax income for the quarter. The effective tax rate was 41% and 38% for the three months ended June 30, 2016 and 2015, respectively. The increase in the effective tax rate corresponds to an increase in non-deductible expenses and the expiration of unexercised stock options.

Nine Months Ended June 30, 2016:

Net income increased by \$602,645 for the nine months ended June 30, 2016, compared to the same period last year. Increase in SAVE Plan revenues, customer growth and higher capitalized overheads were the primary reasons for higher net income.

The tables below reflect operating revenues, volume activity and heating degree-days.

	Nine Months Ended June 30,			
	2016	2015	Decrease	Percentage
Operating Revenues				
Gas Utilities	\$48,372,615	\$57,591,940	\$(9,219,325)	(16)%
Other	710,411	864,263	(153,852)	(18)%
Total Operating Revenues	\$49,083,026	\$58,456,203	\$(9,373,177)	(16)%
Delivered Volumes				
Regulated Natural Gas (DTH)				
Residential and Commercial	5,567,255	6,457,718	(890,463)	(14)%
Transportation and Interruptible	2,158,032	2,231,363	(73,331)	(3)%
Total Delivered Volumes	7,725,287	8,689,081	(963,794)	(11)%
Heating Degree Days (Unofficial)	3,484	4,232	(748)	(18)%

Total operating revenues for the nine months ended June 30, 2016, compared to the same period last year, decreased due to a combination of reduced natural gas deliveries and lower natural gas costs. Total natural gas deliveries declined by 11% due to a 18% decline in the number of heating degree days compared to the same period last year and lower industrial consumption during the first quarter. Transportation and industrial volumes declined due to reduced production activities in the first quarter at two of our largest customers and the closing of another customer's operations during the second quarter of the prior fiscal year. The lost customer accounted for approximately 55,000 decatherms of the decline in the volume of transportation gas delivered for the period. Residential and commercial volumes declined by 14% primarily due to warmer weather.

RGC RESOURCES, INC. AND SUBSIDIARIES

	Nine Months Ended June 30,		Increase (Decrease)	Percentage	
	2016	2015			
Gross Margin					
Gas Utilities	\$25,334,719	\$24,362,306	\$972,413	4	%
Other	365,006	435,435	(70,429)	(16)	%
Total Gross Margin	\$25,699,725	\$24,797,741	\$901,984	4	%

Regulated natural gas margins from utility operations increased from the same period last year primarily as a result of higher SAVE Plan revenues and customer growth more than offsetting lower industrial volumes and a reduction in ICC revenues. SAVE revenues increased by \$810,946 due to the increasing investment in SAVE related projects. Volumetric margin, net of the WNA adjustment, and customer base charge increased primarily due to customer growth.

Other margins decreased by \$70,429 from the same period last year due to a reduction in activity under the Company's non-gas contracts.

The components of and the change in gas utility margin are summarized below:

	Nine Months Ended June 30,		Increase (Decrease)
	2016	2015	
Customer Base Charge	\$9,288,474	\$9,199,197	\$89,277
Carrying Cost	464,883	599,272	(134,389)
SAVE Plan	1,701,316	890,370	810,946
Volumetric	12,571,627	14,212,074	(1,640,447)
WNA	1,223,461	(648,748)	1,872,209
Other Gas Revenues	84,958	110,141	(25,183)
Total	\$25,334,719	\$24,362,306	\$972,413

Operation and maintenance expenses decreased by \$503,648, or 5%, due to many of the same reasons for the decline during the quarter: higher overhead capitalization and lower bad debt expense more than offsetting increased employee benefit costs. Capitalized overheads increased by more than \$637,000 due to a 26% increase in capital expenditures and the timing of liquified natural gas production during the year. Bad debt expense decreased by nearly \$106,000 due to reduced billings related to warmer weather, lower commodity price of natural gas and collection activities on prior bad debts. Total benefit costs increased by \$315,000 due to increased pension and postretirement medical costs related to the amortization of higher actuarial losses attributable to the adoption of new mortality tables. General taxes increased by \$48,310, or 4%, primarily due to higher property taxes associated with increases in utility property.

Depreciation expense increased by \$311,646, or 8%, on an 9% increase in utility plant investment.

Other expenses increased by \$37,504 primarily due to higher pipeline assessments.

Interest expense increased by \$79,521, or 7%, due to an 11% increase in total average debt outstanding during the period related to the financing of the Company's operations and the investment in the Mountain Valley Pipeline.

Income tax expense increased by \$421,951, which corresponds to the higher pre-tax income for the period. The effective tax rate was 38% for the nine months ended June 30, 2016 and 2015, respectively.

Critical Accounting Policies and Estimates

The consolidated financial statements of Resources are prepared in accordance with accounting principles generally accepted in the United States of America. The amounts of assets, liabilities, revenues and expenses reported in the Company's financial statements are affected by accounting policies, estimates and assumptions that are necessary to comply with generally accepted accounting principles. Estimates used in the financial statements are derived from

prior experience, statistical analysis and management judgments. Actual results may differ significantly from these estimates and assumptions.

RGC RESOURCES, INC. AND SUBSIDIARIES

The Company considers an estimate to be critical if it is material to the financial statements and it requires assumptions to be made that were uncertain at the time the estimate was made and changes in the estimate are reasonably likely to occur from period to period. There have been no changes to the critical accounting policies as reflected in the Company's Annual Report on Form 10-K for the year ended September 30, 2015.

Asset Management

Roanoke Gas uses a third party asset manager to manage its pipeline transportation and storage rights and gas supply inventories and deliveries. In return for being able to utilize the excess capacities of the transportation and storage rights, the third party pays Roanoke Gas a monthly utilization fee, which is used to reduce the cost of gas for customers. The current agreement expires in March 2018.

Equity Investment in Mountain Valley Pipeline

On October 1, 2015, the Company through its newly formed wholly-owned subsidiary, RGC Midstream, LLC ("Midstream"), entered into an agreement to become a 1% member in Mountain Valley Pipeline, LLC (the "LLC"). The purpose of the LLC is to construct and operate the Mountain Valley Pipeline ("MVP"), a natural gas pipeline connecting an existing gathering and transmission system in northern West Virginia to another interstate pipeline in south central Virginia. This project falls under the jurisdiction of FERC and is subject to its approval prior to beginning construction. In October 2015, the LLC filed the application with FERC to construct the pipeline. In June 2016, FERC issued its schedule for completion of the environmental impact statement (EIS) regarding the MVP project. The current schedule sets March 10, 2017 as the date of the availability of the final EIS based on the issuance of the draft EIS in September 2016. FERC will have 90 days following the availability of the final EIS to issue their decision to approve the project. Assuming a favorable response by FERC, pipeline construction is anticipated to begin in mid-2017 with a targeted in service date by the end of calendar 2018. Management believes the investment in the LLC will be beneficial for the Company, its shareholders and southwest Virginia. In addition to the potential returns from the investment in the LLC, the Company will benefit from access to an additional source of natural gas to its distribution system, and the proposed pipeline path would provide the Company with a more economically feasible opportunity to provide natural gas service to previously unserved areas in southwest Virginia.

The total project cost is anticipated to be approximately \$3.5 billion. As a 1% member in the LLC, Midstream's contribution is expected to be approximately \$35 million. The agreement provides for a schedule of cash draws to fund the project. The initial payments are for the acquisition of land and materials related to the construction of the pipeline and other pre-construction costs. Once approved and construction begins, more significant cash draws will be required. Initial funding for the investment in the LLC is provided through the Midstream credit facility composed of a Credit Agreement (the "Credit Agreement") and related Promissory Notes (the "Notes"), under which Midstream may borrow up to a total of \$25 million, over a period of 5 years, with an interest rate of 30-day LIBOR plus 160 basis points. In accordance with the terms of the Credit Agreement, at such point in time as Midstream has borrowed \$17.5 million under the Notes, Midstream is required to provide the next \$5 million in equity towards its capital contributions to the LLC. Once Midstream has completed its \$5 million in contributions, it may resume borrowing under the Notes up to the \$25 million limit.

A majority of the earnings from the investment in MVP relates to the allowance for funds used during construction ("AFUDC") income generated by the deployment of capital in the design, engineering, materials procurement, project management and ultimately construction of the pipeline. AFUDC is an accounting method whereby the costs of debt and equity funds used to finance facility infrastructure are credited to income and charged to the cost of the project. The level of investment in MVP will continue to grow at a steady pace until such time FERC issues their decision on the project. If approved by FERC and construction on the pipeline begins in earnest, both the investment and the AFUDC will increase at a much greater rate until the pipeline is placed in service.

Regulatory

The Company currently holds the only franchises and/or certificates of public convenience and necessity to distribute natural gas in its service area. Certificates of public convenience and necessity are issued by the SCC to provide

service in the counties in the Company's service territory. These certificates are intended for perpetual duration subject to compliance and regulatory standards. Franchises are granted by the local cities and towns served by the Company. The Company renewed the expiring franchise agreements with the City of Roanoke, the City of Salem and the Town of Vinton under terms and conditions similar to the expiring agreements. The new franchise agreements have a twenty year term and will expire December 31, 2035.

Since 2013, the Company has had in place the SAVE Plan Rider which allows the Company to recover the related depreciation and expenses and return on rate base attributable to the capital investment associated with the replacement of aging natural gas infrastructure. By virtue of the revenue generated by the SAVE Plan Rider, the Company has not filed for an increase in non-

RGC RESOURCES, INC. AND SUBSIDIARIES

gas rates to recover increasing costs and the investment in natural gas infrastructure since 2013. On June 30, 2016, the Company filed with the SCC an application for a modification to the SAVE Plan and Rider. The original SAVE Plan has been modified each year to incorporate certain changes and to include new projects that qualify for rate recovery under the Plan. Under the current application, the Company submitted its report for refunding the excess SAVE revenues collected under the 2015 SAVE Plan and proposed new SAVE rates to provide an estimated \$1.2 million in additional revenue above the current SAVE Plan rates. The proposed rates were developed based on the projected SAVE Plan investment projects. The Company anticipates the SCC will complete its review of the application over the next few months and will implement the approved rates beginning in January 2017.

Capital Resources and Liquidity

Due to the capital intensive nature of the utility business, as well as the related weather sensitivity, the Company's primary capital needs are the funding of its continuing construction program, investment in Mountain Valley Pipeline, the seasonal funding of its natural gas inventories and accounts receivable and the payment of dividends. To meet these needs, the Company relies on its operating cash flows, line-of-credit agreement, long-term debt, and capital raised through the Company's stock plans.

Cash and cash equivalents decreased by \$80,401 for the nine-month period ended June 30, 2016, compared to a \$416,456 increase for the same period last year. The following table summarizes the sources and uses of cash:

	Nine Months Ended	
	June 30,	
	2016	2015
Cash Flow Summary Nine Months Ended:		
Provided by operating activities	\$15,535,449	\$20,187,816
Used in investing activities	(14,830,542)	(9,961,670)
Used in financing activities	(785,308)	(9,809,690)
Increase (Decrease) in cash and cash equivalents	\$(80,401)	\$416,456

The seasonal nature of the natural gas business causes operating cash flows to fluctuate significantly during the year as well as from year to year. Factors including weather, energy prices, natural gas storage levels and customer collections contribute to working capital levels and the related cash flows. Generally, operating cash flows are positive during the second and third quarters as a combination of earnings, declining storage gas levels and collections on customer accounts all contribute to higher cash levels. During the first and fourth quarters, operating cash flows generally decrease due to increases in natural gas storage levels, rising customer receivable balances and construction activity.

Cash flow provided by operations was generally driven by net income, depreciation and reductions in natural gas storage inventory during the first nine months of the year. Cash flow provided by operations decreased from the same period last year by \$4,652,367, primarily due to a smaller increase in over-collection of gas costs, smaller reduction in storage gas balances and larger increase in accounts receivable balances. The Company increased over-collections on gas costs for the current 9-month period by more than \$767,000 compared to an increase in over-collection for the corresponding period last year of \$4,510,000. During the same period last year, the Company had a significant over-collection of gas costs during the second fiscal quarter due to rapidly declining natural gas commodity prices. The Company initially derived the gas cost component of its billing rates based on prices in December 2014 prior to the decline in commodity prices. The result was a significant over-collection of gas costs during the period as the billing rate component was much higher than the actual gas costs. The Company began refunding the prior year net over-collection in January 2016. Although natural gas prices continued their downward trend during fiscal 2016, the reductions were not unexpected and the Company was able to adjust its PGA factor accordingly, thereby limiting the increase in over-collections. In addition, the combination of lower natural gas commodity prices and warmer weather during the heating season resulted in smaller decreases in storage gas balances. The average price of gas in storage was more than \$0.70 per decatherm less at June 30, 2016, compared to June 30, 2015. As a result, net withdrawals of gas during the current nine-month period was nearly \$3,900,000 compared to the same period last year of \$6,100,000,

resulting in a \$2,200,000 reduction in cash provided by operations. Accounts receivable balances increased by \$1,100,000 during the first nine months of fiscal 2016 compared to an increase of \$100,000 for the same period last year, contributing nearly \$1,000,000 to the reduction in cash provided by operations. The increase in accounts receivable balance derived from the billing of the net WNA receivable for the WNA period ended March 31, 2016. The WNA receivable was included in the accounts receivable balance and is being billed over a three month period beginning in May 2016.

RGC RESOURCES, INC. AND SUBSIDIARIES

	Nine Months Ended June 30,		
Cash Flow Provided by Operations:	2016	2015	Increase (Decrease)
Net income	\$5,661,305	\$5,058,660	\$602,645
Depreciation	4,245,223	3,927,080	318,143
Increase in over-collections	767,194	4,509,850	(3,742,656)
Decrease in gas in storage	3,856,242	6,067,461	(2,211,219)
Increase in accounts receivable	(1,077,678)	(103,541)	(974,137)
Other	2,083,163	728,306	1,354,857
Net Cash Provided by Operations	\$15,535,449	\$20,187,816	\$(4,652,367)

Investing activities are generally composed of expenditures under the Company's construction program, which primarily involves replacing aging bare steel and cast iron pipe with new plastic or coated steel pipe, improvements to the LNG plant and distribution system facilities, expanding its natural gas system to meet the demands of customer growth and capital investment in the Mountain Valley Pipeline. Expenditures for infrastructure and equipment have continued at the higher levels experienced over the last few years as the Company continues its ongoing pipeline replacement program. Cash flows used for additions to utility property increased by \$2,569,115 for the nine months ended June 30, 2016, compared to the same period last year as a result of the continuation of the pipeline replacement program as well as initial work related to the replacement of two custody transfer stations connected to the East Tennessee transmission line. The Company completed the replacement of its cast iron pipe and currently expects to finish replacing the remaining bare steel pipe within its natural gas distribution system in calendar 2016. Efforts will then shift to replacing pre-1973 first generation plastic pipe with current polyethylene pipe, which is expected to be completed in the next three to four years. The Company also plans to begin implementation of an automated meter reading system in fiscal 2017. As a result, capital expenditures are expected to remain at elevated levels over the near term. Operating cash flows and corporate borrowings are expected to provide the majority of the funding for these projects.

Investing cash flows also reflects the Company's continued funding of its participation in the Mountain Valley Pipeline, with a total cash investment of \$2,272,576 through June 30, 2016. The Company expects to invest an estimated \$35 million over a three-year period to complete the project. Initial funding for the investment in the LLC is provided through the Midstream credit facility, as discussed above and in Note 5 of the Condensed Consolidated Financial Statements.

Financing activities generally consist of long-term and short-term borrowings and repayments, issuance of stock and the payment of dividends. As discussed above, the Company uses its line-of-credit arrangement to fund seasonal working capital needs as well as provide temporary financing for capital projects. Cash flows used in financing activities decreased by \$9,024,382 compared to the same period last year primarily due to the current year borrowing related to Midstream's investment in the LLC and an increased level of borrowing under the Company's line-of-credit. The Company borrowed \$2,596,200 under Midstream's credit facility related to its financing in the Mountain Valley Pipeline and associated costs. The Company will continue to draw against the Midstream credit facility as the financing needs of the project continue. Furthermore, due to the cash demands related to the Company's ongoing capital expenditures, the Company has increased its borrowing under the line-of-credit compared to the same period last year. As of June 30, 2016, the Company had \$8,127,832 outstanding under its line-of-credit compared to \$1,718,504 for the same period last year. The Company will continue to use the line-of-credit for bridge financing and will evaluate the need and timing to convert some of this debt to more permanent financing.

Effective March 31, 2016, the Company entered into a new line-of-credit agreement. The new agreement maintained the same terms and rates as provided for under the expired agreement. The interest rate is based on 30-day LIBOR plus 100 basis points and includes an availability fee of 15 basis points applied to the difference between the face amount of the note and the average outstanding balance during the period. The Company maintained multi-tiered borrowing limits to accommodate seasonal borrowing demand and minimize overall borrowing costs with available

limits ranging from \$10,000,000 to \$24,000,000 during the term of the agreement. The line-of-credit will expire on March 31, 2017. The Company anticipates being able to extend or replace its current line-of-credit agreement upon expiration; however, there is no guarantee that the line-of-credit will be extended or replaced on terms comparable to those currently in place.

At June 30, 2016, the Company's consolidated long-term capitalization was 63% equity and 37% debt. The Company's total consolidated capitalization, including the line-of-credit, was 58% equity and 42% debt.

RGC RESOURCES, INC. AND SUBSIDIARIES

ITEM 3 – QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company is exposed to market risks associated with interest rates and commodity prices. Interest rate risk is related to the Company's outstanding short-term debt and the Midstream credit facility. Commodity price risk is experienced by the Company's regulated natural gas operations. The Company's risk management policy, as authorized by the Company's Board of Directors, allows management to enter into derivatives for the purpose of managing commodity and financial market risks of its business operations.

Interest Rate Risk

The Company is exposed to market risk related to changes in interest rates associated with its borrowing activities. At June 30, 2016, the Company had \$8,127,832 outstanding under its variable rate line-of-credit with an average balance outstanding during the nine-month period of \$10,382,462. The Company also had \$2,596,200 outstanding under a 5-year variable rate term loan. A hypothetical 100 basis point increase in market interest rates applicable to the Company's variable-rate debt outstanding during the period would have resulted in an increase in interest expense for the current period of approximately \$89,000. The Company's other long-term debt is at fixed rates.

Commodity Price Risk

The Company manages the price risk associated with purchases of natural gas by using a combination of liquefied natural gas (LNG) storage, underground storage gas, fixed price contracts, spot market purchases and derivative commodity instruments including futures, price caps, swaps and collars.

At June 30, 2016, the Company had no outstanding derivative instruments to hedge the price of natural gas. The Company had 1,552,126 decatherms of gas in storage, including LNG, at an average price of \$2.77 per decatherm, compared to 1,527,039 decatherms at an average price of \$3.49 per decatherm last year. The SCC currently allows for full recovery of prudent costs associated with natural gas purchases, as any additional costs or benefits associated with the settlement of derivative contracts and other price hedging techniques are passed through to customers when realized through the PGA mechanism.

RGC RESOURCES, INC. AND SUBSIDIARIES

ITEM 4 – CONTROLS AND PROCEDURES

The Company maintains disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”)) that are designed to be effective in providing reasonable assurance that information required to be disclosed in reports under the Exchange Act are recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission, and that such information is accumulated and communicated to management to allow for timely decisions regarding required disclosure.

As of June 30, 2016, the Company completed an evaluation, under the supervision and with the participation of management, including the chief executive officer and the chief financial officer, of the effectiveness of the design and operation of the Company’s disclosure controls and procedures. Based upon that evaluation, the chief executive officer and chief financial officer concluded that the Company’s disclosure controls and procedures were effective at the reasonable assurance level as of June 30, 2016.

Management routinely reviews the Company’s internal control over financial reporting and makes changes, as necessary, to enhance the effectiveness of the internal controls over financial reporting. There were no changes in the internal controls over financial reporting during the fiscal quarter ended June 30, 2016, that have materially affected, or are reasonably likely to materially affect, the Company’s internal control over financial reporting.
