**SOUTHERN FIRST BANCSHARES, INC. AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

NOTE 1. Nature of Business and Basis of Presentation

Business activity

Edgar Filing: SOUTHERN FIRST BANCSHARES INC - Form 10-Q

Southern First Bancshares, Inc. (the Company) is a South Carolina corporation that owns all of the capital stock of Southern First Bank, N.A. (the Bank) and all of the stock of Greenville First Statutory Trust I and II (collectively the Trusts). On July 2, 2007, the Company and Bank changed their names to Southern First Bancshares, Inc. and Southern First Bank, N.A., respectively. The Bank is a national bank organized under the laws of the United States located in Greenville County, South Carolina. The Bank is primarily engaged in the business of accepting demand deposits and savings deposits insured by the Federal Deposit Insurance Corporation (the FDIC), and providing commercial, consumer and mortgage loans to the general public. The Trusts are special purpose subsidiaries organized for the sole purpose of issuing trust preferred securities.

Basis of Presentation

The accompanying financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q. Accordingly, they do not include all the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three and six-month periods ended June 30, 2009 are not necessarily indicative of the results that may be expected for the year ending December 31, 2009. For further information, refer to the consolidated financial statements and footnotes thereto included in the company's Form 10-K for the year ended December 31, 2008 (Registration Number 000-27719) as filed with the Securities and Exchange Commission. The consolidated financial statements include the accounts of Southern First Bancshares, Inc., and its wholly owned subsidiary Southern First Bank, N.A. In accordance with Financial Accounting Standards Board (FASB) Interpretation No. 46, the financial statements related to the special purpose subsidiaries, Greenville First Statutory Trust I and Trust II, have not been consolidated.

Cash and Cash Equivalents

For purposes of the Consolidated Statements of Cash Flows, cash and federal funds sold are included in cash and cash equivalents. These assets have contractual maturities of less than three months.

Reclassifications

Certain amounts, previously reported, have been reclassified to state all periods on a comparable basis that had no effect on shareholders' equity or net income.

Subsequent Events

In accordance with SFAS 165, Subsequent Events, issued in May 2009 and effective for periods ending after June 15, 2009, management performed an evaluation to determine whether or not there have been any subsequent events since the balance sheet date. The evaluation was performed through August 12, 2009, the date on which the Company's 10-Q was issued as filed with the Securities and Exchange Commission.

NOTE 2. Note Payable

The Company had a \$5.0 million term note with Silverton Bridge Bank, N.A. (Silverton) at June 30, 2009. The note matures on April 30, 2014 and bears interest at the prime rate plus 0.5% with a floor rate of 4.0%. The Company has pledged all of the stock of the Bank as collateral for this note. The loan agreement contains various financial covenants related to net income and asset quality. As of June 30, 2009, the Company was in compliance with all the requirements.

6

NOTE 3. Preferred Stock Issuance

On February 27, 2009, as part of the Treasury Department's Capital Purchase Program (CPP), the Company entered into a Letter Agreement and a Securities Purchase Agreement (collectively, the CPP Purchase Agreement) with the Treasury Department, pursuant to which the Company sold 17,299 shares of its Fixed Rate Cumulative Perpetual Preferred Stock, Series T (the Series T Preferred Stock) and a warrant (the CPP Warrant) to purchase 330,554 shares of the Company s common stock for an aggregate purchase price of \$17.3 million in cash. The Series T Preferred Stock will qualify as Tier 1 capital and will be entitled to cumulative dividends at a rate of 5% per annum for the first five years, and 9% per annum thereafter. The Company must consult with the OCC before it may redeem the Series T Preferred Stock but, contrary to the original restrictions in the Emergency Economic Stabilization Act of 2008 (the "EESA"), will not necessarily be required to raise additional equity capital in order to redeem this stock. The CPP Warrant has a 10-year term and is immediately exercisable upon its issuance, with an exercise price, subject to anti-dilution adjustments equal to \$7.85 per share of the common stock. The fair value allocation of the \$17.3 million between the shares of Series T Preferred Stock and the CPP Warrant resulted in \$15.9 million allocated to the shares of Series T Preferred Stock and \$1.4 million allocated to the CPP Warrant.

NOTE 4. Earnings per Common Share

The following schedule reconciles the numerators and denominators of the basic and diluted earnings per share computations for the three and six month periods ended June 30, 2009 and 2008 (dollars in thousands). Dilutive common shares arise from the potentially dilutive effect of the company s stock options and warrants that are outstanding. The assumed conversion of stock options and warrants can create a difference between basic and dilutive net income per common share.

At June 30, 2009 and 2008, 188,113 and 59,750 options, respectively, were anti-dilutive in the calculation of earnings per share as their exercise price exceeded the fair market value.

	Diluted	\$ 0.12	\$ 0.50

(1) Preferred stock dividend required to be accreted over estimated life of warrant issued in conjunction with preferred stock.

7

NOTE 5. Stock Based Compensation

The Company has a stock-based employee compensation plan. On January 1, 2006, the Company adopted the fair value recognition provisions of SFAS No. 123(R), Accounting for Stock-Based Compensation, to account for compensation costs under its stock option plan.

Edgar Filing: SOUTHERN FIRST BANCSHARES INC - Form 10-Q

In adopting SFAS No. 123(R), the Company elected to use the modified prospective method to account for the transition from the intrinsic value method to the fair value recognition method. Under the modified prospective method, compensation cost is recognized from the adoption date forward for all new stock options granted and for any outstanding unvested awards as if the fair value method had been applied to those awards as of the date of grant.

The fair value of the option grant is estimated on the date of grant using the Black-Scholes option-pricing model. The following assumptions were used for grants: expected volatility of 26.76% for 2009 and 2008, risk-free interest rate of 3.72% for 2009 and 2008, expected lives of the options were 10 years, and the assumed dividend rate was zero.

NOTE 6. Fair Value Measurement

SFAS No. 107, Disclosures about Fair Value of Financial Instruments requires disclosure of fair value information, whether or not recognized in the consolidated balance sheets, when it is practical to estimate the fair value. SFAS No. 107 defines a financial instrument as cash, evidence of an ownership interest in an entity or contractual obligations which require the exchange of cash or other financial instruments. Certain items are specifically excluded from the disclosure requirements, including the Company's common stock, premises and equipment and other assets and liabilities.

Fair value approximates carrying value for the following financial instruments due to the short-term nature of the instrument: cash and due from banks, federal funds sold, federal funds purchased, securities sold under agreement to repurchase and official checks.

Securities are valued using quoted fair market prices. Fair value for the Company's off-balance sheet financial instruments is based on the discounted present value of the estimated future cash flows.

Fair value for variable rate loans and borrowings that reprice frequently and for loans that mature in less than one year is based on the carrying value. Fair value for fixed rate mortgage loans, personal loans and all other loans (primarily commercial) maturing after one year is based on the discounted present value of the estimated future cash flows. Discount rates used in these computations approximate the rates currently offered for similar loans of comparable terms and credit quality.

The cash surrender value of bank owned life insurance policies held by the Bank approximates fair values of the policies.

Fair value for demand deposit accounts and interest-bearing accounts with no fixed maturity date is equal to the carrying value. Certificate of deposit accounts and FHLB advances with a maturity within one year are valued at their carrying value. The fair value of certificate of deposit accounts and FHLB advances with a maturity after one year are estimated by discounting cash flows from expected maturities using current interest rates on similar instruments.

The Company has used management's best estimate of fair value based on the above assumptions. Thus, the fair values presented may not be the amounts that could be realized in an immediate sale or settlement of the instrument. In addition, any income taxes or other expenses, which would be incurred in an actual sale or settlement, are not taken into consideration in the fair value presented.

The estimated fair values of the Company's financial instruments at June 30, 2009 and December 31, 2008 are as follows:

	June 30, 2009	Fair	December 31, 2008	Fair
	Carrying	Value	Carrying	Value
	Amount		Amount	
Financial Assets:				
Cash and cash equivalents	\$ 39,259	\$ 39,259	\$ 13,160	\$ 13,160
Investment securities available for sale	82,953	82,953	64,432	64,432

Other investments	9,145	9,145	8,461	8,461
Loans, net	561,684	574,369	559,602	564,573
Bank owned life insurance	13,615	13,615	13,369	13,369
Financial Liabilities:				
Deposits	496,147	461,916	469,537	447,427
Short-term repurchase agreements	13,821	13,808	-	-
Federal Home Loan Bank advances and related debt	149,675	166,893	149,675	158,216
Note payable	5,000	5,140	15,000	15,000
Junior subordinated debentures	13,403	13,403	13,403	13,403

Effective January 1, 2008, the Company adopted SFAS No. 157, Fair Value Measurements, which provides a framework for measuring and disclosing fair value under generally accepted accounting principles. SFAS No. 157 requires disclosures about the fair value of assets and liabilities recognized in the balance sheet in periods subsequent to initial recognition, whether the measurements are made on a recurring or on a nonrecurring basis.

SFAS No. 157 defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. SFAS No. 157 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1

Quoted prices in active markets for identical assets or liabilities. Level 1 assets and liabilities include certain debt and equity securities and derivative contracts that are traded in an active exchange market.

Level 2

Observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Level 2 assets and liabilities include fixed income securities and mortgage-backed securities that are held in the Company's available-for-sale portfolio, certain derivative contracts and impaired loans.

Level 3

Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation. These methodologies may result in a significant portion of the fair value being derived from unobservable data.

9

Assets measured at fair value on a recurring basis as of June 30, 2009 are as follows:

	Quoted market price in active markets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
Collateralized Mortgage Obligations	\$ -	\$ -	\$ 7,029
Other securities available for sale	53	75,871	-
Other investments	-	-	9,145
Total	\$ 53	\$ 75,871	\$ 16,174

The Company has no liabilities carried at fair value or measured at fair value on a recurring or nonrecurring basis.

The Company is predominantly an asset based lender with real estate serving as collateral on approximately 79.1% of loans. Loans which are deemed to be impaired and real estate acquired in settlement of loans are valued on a nonrecurring basis at the lower of cost or market value of the underlying real estate collateral. Such market values are generally obtained using independent appraisals, which the Company considers to be level 2 inputs. The aggregate carrying amount, net of specific reserves, of impaired loans at June 30, 2009 was \$7.3 million. In addition, real estate acquired in settlement of loans is valued at \$4.5 million at June 30, 2009.

The table below presents a reconciliation for the period of January 1, 2009 to June 30, 2009, for all Level 3 assets that are measured at fair value on a recurring basis.

	Collateralized mortgage obligations	Other investments

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion reviews our results of operations and assesses our financial condition. You should read the following discussion and analysis in conjunction with the accompanying consolidated financial statements. The commentary should be read in conjunction with the discussion of forward-looking statements, the financial statements and the related notes and the other statistical information included in this report.

DISCUSSION OF FORWARD-LOOKING STATEMENTS

This report contains statements which constitute forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. These statements are based on many assumptions and estimates and are not guarantees of future performance. Our actual results may differ materially from those anticipated in any forward-looking statements, as they will depend on many factors about which we are unsure, including many factors which are beyond our control. The words may, would, could, will, expect, anticipate, believe, intend, plan, and estimate, as well as similar expressions, are meant to identify such forward-looking statements. Potential risks and uncertainties that could cause our actual results to differ from those anticipated in any forward-looking statements include, but are not limited to, those described in our Form 10-K for the year ended December 31, 2008 under Item 1A- Risk Factors and the following:

significant increases in competitive pressure in the banking and financial services industries;

changes in the interest rate environment which could reduce anticipated or actual margins;

changes in political conditions or the legislative or regulatory environment;

general economic conditions, either nationally or regionally and especially in our primary service area, becoming less favorable than expected resulting in, among other things, a deterioration in credit quality;

changes occurring in business conditions and inflation;

changes in technology;

changes in deposit flows;

changes in monetary and tax policies;

the adequacy of level of our allowance for loan loss;

the rate of delinquencies and amounts of charge-offs;

the rates of loan growth and the lack of seasoning of our loan portfolio;

increased funding costs due to market illiquidity, increased competition for funding, and/or regulatory requirements;

our ability to retain our existing customers, including our deposit relationships;

adverse changes in asset quality and resulting credit risk-related losses and expenses;

the amount of our real estate-based loans, and the weakness in the commercial real estate market;

loss of consumer confidence and economic disruptions resulting from terrorist activities;

changes in the securities markets; and

other risks and uncertainties detailed from time to time in our filings with the Securities and Exchange Commission.

We have based our forward looking statements on our current expectations about future events. Although we believe that the expectations reflected in our forward-looking statements are reasonable, we cannot guarantee you that these expectations will be achieved. We undertake no obligation to publicly update or otherwise revise any forward-looking statements, whether as a result of new information, future events, or otherwise.

These risks are exacerbated by the recent developments in national and international financial markets, and we are unable to predict what effect these uncertain market conditions will have on our Company. During 2008 and continuing through the second quarter of 2009, the capital and credit markets experienced unprecedented levels of volatility and disruption. There can be no assurance that these unprecedented recent developments will not materially and adversely affect our business, financial condition and results of operations.

We undertake no obligation to publicly update or otherwise revise any forward-looking statements, whether as a result of new information, future events, or otherwise.

Overview

Edgar Filing: SOUTHERN FIRST BANCSHARES INC - Form 10-Q

We were incorporated in March 1999 to organize and serve as the holding company for Greenville First Bank, N.A. On July 2, 2007, we changed the name of our company and bank to Southern First Bancshares, Inc. and Southern First Bank, N.A., respectively. Since we opened our bank in January 2000, we have experienced consistent growth in total assets, loans, deposits, and shareholders' equity.

Like most community banks, we derive the majority of our income from interest received on our loans and investments. Our primary source of funds for making these loans and investments is our deposits, on which we pay interest. Consequently, one of the key measures of our success is our amount of net interest income, or the difference between the income on our interest-earning assets, such as loans and investments, and the expense on our interest-bearing liabilities, such as deposits and borrowings. Another key measure is the spread between the yield we earn on these interest-earning assets and the rate we pay on our interest-bearing liabilities, which is called our net interest spread.

There are risks inherent in all loans, so we maintain an allowance for loan losses to absorb probable losses on existing loans that may become uncollectible. We maintain this allowance by charging a provision for loan losses against our operating earnings for each period. We have included a detailed discussion of this process, as well as several tables describing our allowance for loan losses.

In addition to earning interest on our loans and investments, we earn income through fees and other charges to our customers. We have also included a discussion of the various components of this noninterest income, as well as of our noninterest expense.

Economic conditions, competition, and the monetary and fiscal policies of the Federal government significantly affect most financial institutions, including Southern First. Lending and deposit activities and fee income generation are influenced by levels of business spending and investment, consumer income, consumer spending and savings, capital market activities, and competition among financial institutions, as well as customer preferences, interest rate conditions and prevailing market rates on competing products in our market areas.

11

Our business model continues to be client-focused, utilizing relationship teams to provide our clients with a specific banker contact and support team responsible for all of their banking needs. The purpose of this structure is to provide a consistent and superior level of professional service, and we believe it provides us with a distinct competitive advantage. We consider exceptional client service to be a critical part of our culture, which we refer to as ClientFIRST.

The following discussion and analysis also identifies significant factors that have affected our financial position and operating results during the periods included in the accompanying financial statements. We encourage you to read this discussion and analysis in conjunction with our financial statements and the other statistical information included in our filings with the Securities and Exchange Commission.

Critical Accounting Policies

We have adopted various accounting policies that govern the application of accounting principles generally accepted in the United States and with general practices within the banking industry in the preparation of our financial statements. Our significant accounting policies are described in the footnotes to our audited consolidated financial statements as of December 31, 2008, as filed in our Annual Report on Form 10-K.

Certain accounting policies involve significant judgments and assumptions by us that have a material impact on the carrying value of certain assets and liabilities. We consider these accounting policies to be critical accounting policies. The judgment and assumptions we use are based on historical experience and other factors, which we believe to be reasonable under the circumstances. Because of the nature of the judgment and assumptions we make, actual results could differ from these judgments and estimates that could have a material impact on the carrying values of our assets and liabilities and our results of operations.

We believe the allowance for loan losses is the critical accounting policy that requires the most significant judgment and estimates used in preparation of our consolidated financial statements. Some of the more critical judgments supporting the amount of our allowance for loan losses include judgments about the credit worthiness of borrowers, the estimated value of the underlying collateral, assumptions about cash flow, determination of loss factors for estimating credit losses, and the impact of current events, conditions, and other factors impacting the level of probable inherent losses. Under different conditions, the actual amount of credit losses incurred by us may be different from management's estimates provided in our consolidated financial statements. Refer to the portion of this discussion that addresses our allowance for loan losses for a more complete discussion of our processes and methodology for determining our allowance for loan losses.

Effect of Economic Trends

The first six months of 2009 continue to reflect the tumultuous economic conditions which have negatively impacted liquidity and credit quality. Concerns regarding increased credit losses from the weakening economy have negatively affected capital and earnings of most financial institutions. Financial institutions have experienced significant declines in the value of collateral for real estate loans, heightened credit losses, which have resulted in record levels of non-performing assets, charge-offs and foreclosures. In addition, certain financial institutions failed or merged with other institutions during 2008 and during the first six months of 2009, and two of the government sponsored housing enterprises were placed into conservatorship with the U.S. government.

Liquidity in the debt markets remains low in spite of efforts by the U.S. Department of the Treasury (Treasury) and the Federal Reserve Bank (Federal Reserve) to inject capital into financial institutions. The federal funds rate set by the Federal Reserve has remained at 0.25% since December 2008, following a decline from 4.25% to 0.25% during 2008 through a series of seven rate reductions.

Treasury, the FDIC and other governmental agencies continue to enact rules and regulations to implement the EESA, the Troubled Asset Relief Program (TARP), the Financial Stability Plan, the American Recovery and Reinvestment Act (ARRA) and related economic recovery programs, many of which contain limitations on the ability of financial institutions to take certain actions or to engage in certain activities if the financial institution is a participant in the TARP Capital Purchase Program or related programs. Future regulations, or enforcement of the terms of programs already in place, may require financial institutions to raise additional capital and result in the conversion of preferred equity issued under TARP or other programs to common equity. There can be no assurance as to the actual impact of the EESA, the FDIC programs or any other governmental program on the financial markets.

The weak economic conditions are expected to continue through 2009. Financial institutions likely will continue to experience heightened credit losses and higher levels of non-performing assets, charge-offs and foreclosures. In light of these conditions, financial institutions also face heightened levels of scrutiny from federal and state regulators. These factors negatively influenced, and likely will continue to negatively influence, earning asset yields at a time when the market for deposits is intensely competitive. As a result, financial institutions experienced, and are expected to continue to experience, pressure on credit costs, loan yields, deposit and other borrowing costs, liquidity, and capital.

Recent Legislative and Regulatory Initiatives to Address Financial and Economic Crises

Markets in the United States and elsewhere have experienced extreme volatility and disruption for more than 12 months. These circumstances have exerted significant downward pressure on prices of equity securities and virtually all other asset classes, and have resulted in substantially increased market volatility, severely constrained credit and capital markets, particularly for financial institutions, and an overall loss of investor confidence. Loan portfolio performances have deteriorated at many institutions resulting from, among other factors, a weak economy and a decline in the value of the collateral supporting their loans. Dramatic slowdowns in the housing industry, due in part to falling home prices and increasing foreclosures and unemployment, have created strains on financial institutions. Many borrowers are now unable to repay their loans, and the collateral securing these loans has, in some cases, declined below the loan balance. In response to the challenges facing the financial services sector, several regulatory and governmental actions have recently been announced including:

The EESA, approved by Congress and signed by President Bush on October 3, 2008, which, among other provisions, allowed the Treasury Department to purchase troubled assets from banks, authorized the Securities and Exchange Commission to suspend the application of marked-to-market accounting, and raised the basic limit of FDIC deposit insurance from \$100,000 to \$250,000 through December 31, 2013;

On October 7, 2008, the FDIC approved a plan to increase the rates banks pay for deposit insurance;

On October 14, 2008, the U.S. Treasury announced the creation of the CPP which encourages and allows financial institutions to build capital through the sale of senior preferred shares to the Treasury Department on terms that are non-negotiable;

On October 14, 2008, the FDIC announced the creation of the Temporary Liquidity Guarantee Program (TLGP), which seeks to strengthen confidence and encourage liquidity in the banking system. The TLGP has two primary components that are available on a voluntary basis to financial institutions:

The Transaction Account Guarantee Program (TAGP), which provides unlimited deposit insurance coverage for noninterest-bearing transaction accounts (typically business checking accounts) and certain funds swept into noninterest-bearing savings accounts. Institutions participating in the TLGP pay a 10 basis points fee (annualized) on the balance of each covered account in excess of \$250,000, while the extra deposit insurance is in place;

Edgar Filing: SOUTHERN FIRST BANCSHARES INC - Form 10-Q

The Debt Guarantee Program (DGP), under which the FDIC guarantees certain senior unsecured debt of FDIC-insured institutions and their holding companies. The unsecured debt must be issued on or after October 14, 2008 and not later than June 30, 2009, and the guarantee is effective through the earlier of the maturity date or June 30, 2012. The DGP coverage limit is generally 125% of the eligible entity's eligible debt outstanding on September 30, 2008 and scheduled to mature on or before June 30, 2009 or, for certain insured institutions, 2% of their liabilities as of September 30, 2008. Depending on the term of the debt maturity, the nonrefundable DGP fee ranges from 50 to 100 basis points (annualized) for covered debt outstanding until the earlier of maturity or June 30, 2012. The TAGP and DGP are in effect for all eligible entities, unless the entity opted out on or before December 5, 2008.

On February 17, 2009, the American Recovery and Reinvestment Act (ARRA) was signed into law in an effort to, among other things, create jobs and stimulate growth in the United States economy. The ARRA specifies appropriations of approximately \$787 billion for a wide range of Federal programs and will increase or extend certain benefits payable under the Medicaid, unemployment compensation, and nutrition assistance programs. The Recovery Act also reduces individual and corporate income tax collections and makes a variety of other changes to tax laws. The ARRA also imposes certain limitations on compensation paid by participants in the U.S. Treasury's Troubled Asset Relief Program.

On March 23, 2009, the U.S. Treasury, in conjunction with the FDIC and the Federal Reserve, announced the Public-Private Partnership Investment Program for Legacy Assets which consists of two separate plans, addressing two distinct asset groups:

13

The Legacy Loan Program, which the primary purpose will be to facilitate the sale of troubled mortgage loans by eligible institutions, which include FDIC-insured federal or state banks and savings associations. Eligible assets may not be strictly limited to loans; however, what constitutes an eligible asset will be determined by participating banks, their primary regulators, the FDIC and the U.S. Treasury. Additionally, the Loan Program's requirements and structure will be subject to notice and comment rulemaking, which may take some time to complete.

The Securities Program, which will be administered by the U.S. Treasury, involves the creation of public-private investment funds to target investments in eligible residential mortgage-backed securities and commercial mortgage-backed securities issued before 2009 that originally were rated AAA or the equivalent by two or more nationally recognized statistical rating organizations, without regard to rating enhancements (collectively, Legacy Securities). Legacy Securities must be directly secured by actual mortgage loans, leases or other assets, and may be purchased only from financial institutions that meet TARP eligibility requirements.

In response to the above regulatory initiatives, we entered into the CPP Purchase Agreement with the Treasury Department on February 27, 2009, pursuant to which we sold 17,299 shares of our Series T Preferred Stock and the CPP Warrant to purchase 330,554 shares of our common stock for an aggregate purchase price of \$17.3 million in cash. The Series T Preferred Stock will qualify as Tier 1 capital and will be entitled to cumulative dividends at a rate of 5% per annum for the first five years, and 9% per annum thereafter. We must consult with the OCC before we may redeem the Series T Preferred Stock but, contrary to the original restrictions in the EESA, will not necessarily be required to raise additional equity capital in order to redeem this stock. The CPP Warrant has a 10-year term and is immediately exercisable upon its issuance, with an exercise price, subject to anti-dilution adjustments equal to \$7.85 per share of the common stock. The fair value allocation of the \$17.3 million between the shares of Series T Preferred Stock and the CPP Warrant resulted in \$15.9 million allocated to the shares of Series T Preferred Stock and \$1.4 million allocated to the CPP Warrant.

We will participate in the TAGP and have opted out of the DGP.

RESULTS OF OPERATIONS

Income Statement Review

Summary

Three months ended June 30, 2009 and 2008

Our net income was \$355,000 and \$862,000 for the three months ended June 30, 2009 and 2008, respectively, a decrease of \$507,000, or 58.8%. The decrease in net income resulted primarily from increases of \$778,000 in noninterest expenses and \$275,000 in provision for loan losses, partially offset by increases of \$140,000 in net interest income and \$144,000 in noninterest income and a \$262,000 decrease in income tax expense. Our efficiency ratio, excluding real estate owned activity, was 72.9% for the three months ended June 30, 2009 compared to 61.9% for the same period in 2008. The higher efficiency ratio relates primarily to the additional FDIC insurance costs during the second quarter of 2009 as well as administrative costs associated with our two new retail offices.

Six months ended June 30, 2009 and 2008

Our net income was \$843,000 and \$1.6 million for the six months ended June 30, 2009 and 2008, respectively, a decrease of \$765,000, or 47.6%. The decrease in net income resulted primarily from increases of \$1.2 million in noninterest expenses and \$425,000 in the provision for loan losses, partially offset by increases of \$208,000 in net interest income and \$247,000 in noninterest income and a decrease of \$426,000 in income tax expense. Our efficiency ratio, excluding real estate owned activity, was 71.7% for the six months ended June 30, 2009 from 62.3% for the same period in 2008. The higher efficiency ratio relates primarily to the additional FDIC insurance costs during 2009 as well as administrative costs associated with our two new retail offices.

Edgar Filing: SOUTHERN FIRST BANCSHARES INC - Form 10-Q

Our level of net interest income is determined by the level of earning assets and the management of our net interest margin. For the three months ended June 30, 2009 and 2008, our net interest income was \$4.9 million and \$4.8 million, respectively. Our average earning assets increased \$13.0 million during the three months ended June 30, 2009 compared to the average for the three months ended June 30, 2008, while our interest bearing liabilities increased only \$4.0 million. The lesser increase in average interest bearing liabilities is due to the utilization of \$17.3 million received for the issuance of preferred stock under the Treasury's Capital Purchase Program.

Our net interest income was \$9.4 million and \$9.2 million for the six month periods ended June 30, 2009 and 2008, respectively. During the six months ended June 30, 2009, our average earning assets increased \$25.9 million and our average interest bearing liabilities increased \$24.6 million compared to the six months ended June 30, 2008. The increase in average earning assets is primarily related to a \$28.9 million increase in our average loans, while the increase in average interest-bearing liabilities is related to an increase in our time deposits, specifically, wholesale certificates of deposit.

We have included a number of tables to assist in our description of various measures of our financial performance. For example, the Average Balances, Income and Expenses, Yields and Rates table shows the average balance of each category of our assets and liabilities as well as the yield we earned or the rate we paid with respect to each category during the three and six month periods ended June 30, 2009 and 2008. A review of this table shows that our loans typically provide higher interest yields than do other types of interest-earning assets, which is why we direct a substantial percentage of our earning assets into our loan portfolio. Similarly, the Rate/Volume Analysis table demonstrates the effect of changing interest rates and changing volume of assets and liabilities on our financial condition during the periods shown. We also track the sensitivity of our various categories of assets and liabilities to changes in interest rates, and we have included tables to illustrate our interest rate sensitivity with respect to interest-earning accounts and interest-bearing accounts. Finally, we have included various tables that provide detail about our investment securities, our loans, our deposits, and other borrowings.

The following tables set forth information related to our average balance sheets, average yields on assets, and average costs of liabilities (dollars in thousands). We derived these yields by dividing income or expense by the average balance of the corresponding assets or liabilities. We derived average balances from the daily balances throughout the periods indicated. During the three month and six month periods ended June 30, 2009 and 2008, we had only \$100,000 in interest-bearing deposits at another bank and had no securities purchased with agreements to resell. All investments owned have an original maturity of over one year. Nonaccrual loans are included in the following tables. Loan yields have been reduced to reflect the negative impact on our earnings of loans on nonaccrual status. The net of capitalized loan costs and fees are amortized into interest income on loans.

Total interest-bearing liabilities	620,101	4,162	2.69%	616,056	5,525	3.61%
Noninterest-bearing liabilities	40,368			37,606		
Shareholders' equity	58,848			39,760		
Total liabilities and shareholders' equity	\$ 719,317			\$ 693,422		
Net interest spread			2.66%			2.60%
Net interest income (tax equivalent) / margin	\$ 4,941		2.91%	\$ 4,801		2.88%
Less: tax-equivalent adjustment (2)		22			22	
Net interest income	\$ 4,919			\$ 4,779		

(1) Annualized for the three month period.

(2) The tax-equivalent adjustment to net interest income adjusts the yield for assets earning tax-exempt income to a comparable yield on a taxable basis.

Our net interest margin is calculated as net interest income, on an annualized basis, divided by average interest-earning assets. Our net interest margin, on a tax-equivalent basis, for the three months ended June 30, 2009 was 2.91% compared to 2.88% for the three months ended June 30, 2008. During the second quarter of 2009, interest-earning assets averaged \$681.9 million compared to \$669.0 million in the second quarter of 2008.

Our net interest spread was 2.66% for the three months ended June 30, 2009 compared to 2.60% for the three months ended June 30, 2008. The net interest spread is the difference between the yield we earn on our interest-earning assets and the rate we pay on our interest-bearing liabilities.

The 6 basis point increase in the net interest spread is primarily due to the fact that more of our rate-sensitive liabilities repriced downward than our rate-sensitive assets during the twelve months ended June 30, 2009. Given the 500 basis point decrease in short-term rates over the past two years, the rates on our new and maturing loans and deposits are much lower than they were in the past. However, in response to the significant decrease in rates, we began instituting interest rate floors on our new and maturing loans during the second half of 2008 and have recently changed our focus to increasing the amount of variable rate loans in our portfolio. Our variable rate loans as a percentage of total loans increased from 40% at June 30, 2008 to 48% at June 30, 2009. We believe that interest rates are at or near their lowest levels and that this change in focus will position us to benefit from future increases in the short-term rates.

Despite a 175 basis point decline in short-term rates in the past 12 months, our loan yield decreased only 90 basis points for the three months ended June 30, 2009 compared to the three months ended June 30, 2008. Offsetting the decrease in our loan yield was a 131 basis point decrease in the cost of our interest-bearing deposits for the second quarter of 2009 compared to the same period in 2008, primarily related to the cost of our time deposits which have renewed at rates much lower than their original rates.

In addition, the cost of our borrowings, specifically our junior subordinated debt, has declined in the second quarter of 2009 compared to the same period in 2008 due to the variable rates of the debt. As of June 30, 2009, all of our FHLB advances were at fixed rates, while all of our

Edgar Filing: SOUTHERN FIRST BANCSHARES INC - Form 10-Q

other borrowings, including notes payable and junior subordinated debt, had variable rates.

The \$12.9 million increase in noninterest-earning assets during the three months ended June 30, 2009 compared to the same period in 2008 is due primarily to a \$4.4 million increase in property and equipment related to the construction of our new regional headquarters facility in Columbia, SC as well as increases of \$4.5 million in bank-owned life insurance and \$1.7 million in other real estate owned. In addition, the \$19.1 million increase in shareholders' equity during the 2009 period is primarily related to the \$17.3 million received for the issuance of preferred stock under the Treasury's Capital Purchase Program.

Net interest income / margin		\$ 9,380			\$ 9,172	

(1) Annualized for the six month period.

(2) The tax-equivalent adjustment to net interest income adjusts the yield for assets earning tax-exempt income to a comparable yield on a taxable basis.

Edgar Filing: SOUTHERN FIRST BANCSHARES INC - Form 10-Q

Our net interest margin, on a tax-equivalent basis, for the six months ended June 30, 2009 was 2.82% compared to 2.85% for the six months ended June 30, 2008. During the first six months of 2009, interest-earning assets averaged \$675.1 million compared to \$649.2 million during the same period of 2008. Our net interest spread, was 2.60% for the six months ended June 30, 2009 compared to 2.54% for the six months ended June 30, 2008.

The 6 basis point increase in the net interest spread is primarily due to the fact that more of our rate-sensitive liabilities repriced downward than our rate-sensitive assets during the twelve months ended June 30, 2009. Given the 500 basis point decrease in short-term rates over the past two years, the rates on our new and maturing loans and deposits are much lower than they were in the past. However, in response to the significant decrease in rates, we have begun instituting interest rate floors on our new and maturing loans and have recently changed our focus to increasing the amount of variable rate loans in our portfolio. We believe that interest rates are at or near their lowest levels and that this change in focus will position us to benefit from future increases in the short-term rates.

Despite a 175 basis point decline in short-term rates in the past 12 months, our loan yield decreased only 101 basis points for the six months ended June 30, 2009 compared to the same period in 2008. Offsetting the decrease in our loan yield was a 138 basis point decrease in the cost of our interest-bearing deposits for the first six months of 2009 compared to the six months ended June 30, 2008, primarily related to the cost of our time deposits which have renewed at rates much lower than their original rates.

In addition, the cost of our borrowings, specifically our junior subordinated debt, has declined during the six month period ended June 30, 2009 compared to the same period in June 30, 2008 due to the variable rates of the debt. As of June 30, 2009, all of our FHLB advances were at fixed rates, while all of our other borrowings, including notes payable and junior subordinated debt, had variable rates.

17

The \$13.9 million increase in noninterest-earning assets during the six months ended June 30, 2009 compared to the same period in 2008 is due primarily to a \$4.3 million increase in property and equipment related to the construction of our new regional headquarters facility in Columbia, SC as well as increases of \$4.5 million in bank-owned life insurance and \$2.0 million in other real estate owned. In addition, the \$13.0 million increase in shareholders' equity during the 2009 period is primarily related to the \$17.3 million received for the issuance of preferred stock under the Treasury's Capital Purchase Program.

Rate/Volume Analysis

Net interest income can be analyzed in terms of the impact of changing interest rates and changing volume. The following tables set forth the effect which the varying levels of interest-earning assets and interest-bearing liabilities and the applicable rates have had on changes in net interest income for the periods presented (dollars in thousands).

Three Months Ended June 30, 2009 vs. 2008 Increase (Decrease) Due to				June 30, 2008 vs. 2007 Increase (Decrease) Due to

Net interest income, the largest component of our income, was \$4.9 million and \$4.8 million for the three months ended June 30, 2009 and 2008, respectively. The slight increase in the second quarter of 2009 related primarily to the net effect of higher levels of both average interest-earning assets and interest-bearing liabilities. Average interest-earning assets were \$13.0 million higher during the three months ended June 30, 2009 compared to the same period in 2008. During the same period, average interest-bearing liabilities increased \$4.0 million. The higher average balances resulted in \$225,000 of additional net interest income for the three months ended June 30, 2009, while lower rates on the average balances reduced net interest income by \$98,000.

In addition, net interest income was \$9.4 million and \$9.2 million for the six months ended June 30, 2009 and 2008, respectively. The small increase in the 2009 period related primarily to the net effect of higher levels of both average interest-earning assets and interest-bearing liabilities. Average interest-earning assets were \$25.9 million higher during the six months ended June 30, 2009 compared to the same period in 2008. During the same period, average interest-bearing liabilities increased \$24.6 million. The higher average balances resulted in \$385,000 of additional net interest income for the three months ended June 30, 2009, while lower rates on the average balances reduced net interest income by \$224,000.

Three months ended June 30, 2009 and 2008

Interest income for the three months ended June 30, 2009 was \$9.1 million, consisting of \$7.9 million on loans, \$1.2 million on investments, and \$3,000 on federal funds sold. Interest income for the three months ended June 30, 2008 was \$10.3 million, consisting of \$8.9 million on loans, \$1.3 million on investments, and \$97,000 on federal funds sold. Interest on loans for the three months ended June 30, 2009 and 2008 represented 87.1% and 86.4%, respectively, of total interest income, while income from investments and federal funds sold represented only 12.9% and 13.6%, respectively, of total interest income. The high percentage of interest income from loans relates to our strategy to maintain a significant portion of our assets in higher earning loans compared to lower yielding investments. Average loans represented 83.2% and 82.3% of average interest-earning assets for the three months ended June 30, 2009 and 2008, respectively. Included in interest income on loans for the three months ended June 30, 2009 and 2008 was \$149,000 and \$239,000, respectively, related to the net amortization of loan fees and capitalized loan origination costs.

Interest expense for the three months ended June 30, 2009 was \$4.2 million, consisting of \$2.5 million related to deposits and \$1.7 million related to other borrowings. Interest expense for the three months ended June 30, 2008 was \$5.5 million, consisting of \$3.9 million related to deposits and \$1.6 million related to other borrowings. Interest expense on deposits for the three months ended June 30, 2009 and 2008 represented 58.8% and 70.0%, respectively, of total interest expense, while interest expense on other borrowings represented 41.2% and 30.0%, respectively, of total interest expense for the same three month periods. During the three months ended June 30, 2009, average interest-bearing deposits increased by \$3.5 million over the same period in 2008, while our notes payable and other borrowings increased \$532,000 during the three months ended June 30, 2009 over the same period in 2008. The note payable and other borrowings provide us with the opportunity to obtain low cost funding with various maturities similar to the maturities on our loans and investments.

Six months ended June 30, 2009 and 2008

Interest income for the six months ended June 30, 2009 was \$18.0 million, consisting of \$15.7 million on loans, \$2.3 million on investments, and \$8,000 on federal funds sold. Interest income for the six months ended June 30, 2008 was \$20.7 million, consisting of \$17.9 million on loans, \$2.6 million on investments, and \$181,000 on federal funds sold. Interest income on loans for the six months ended June 30, 2009 and 2008 represented 87.4% and 86.8%, respectively, of total interest income, while income from investments and federal funds sold represented only 12.6% and 13.2%, respectively, of total interest income. The high percentage of interest income from loans relates to our strategy to maintain a significant portion of our assets in higher earning loans compared to lower yielding investments. Average loans represented 84.0% and 82.9% of average interest-earning assets for the six months ended June 30, 2009 and 2008, respectively. Included in interest income on loans for the six months ended June 30, 2009 and 2008 was \$317,000 and \$435,000, respectively, related to the net amortization of loan fees and capitalized loan origination costs.

Interest expense for the six months ended June 30, 2009 was \$8.6 million, consisting of \$5.2 million related to deposits and \$3.4 million related to borrowings. Interest expense for the six months ended June 30, 2008 was \$11.5 million, consisting of \$8.0 million related to deposits and \$3.5 million related to borrowings. Interest expense on deposits for the six months ended June 30, 2009 and 2008 represented 60.9% and 69.4%, respectively, of total interest expense, while interest expense on other borrowings represented 39.1% and 30.6%, respectively, of total interest expense for the same six month periods. During the six months ended June 30, 2009, average interest-bearing deposits increased by \$19.5 million over the same period in 2008, while our notes payable and other borrowings increased \$5.2 million during the six months ended June 30, 2009 over the same period in 2008. The note payable and other borrowings provide us with the opportunity to obtain low cost funding with various maturities similar to the maturities on our loans and investments.

Provision for Loan Losses

We have established an allowance for loan losses through a provision for loan losses charged as an expense on our statement of income. We review our loan portfolio periodically to evaluate our outstanding loans and to measure both the performance of the portfolio and the adequacy of the allowance for loan losses. Please see the discussion below under *Balance Sheet Review - Provision and Allowance for Loan Losses* for a description of the factors we consider in determining the amount of the provision we expense each period to maintain this allowance.

19

Three and six months ended June 30, 2009 and 2008

For the three months ended June 30, 2009 and 2008, we incurred a noncash expense related to the provision for loan losses of \$975,000 and \$700,000, respectively, bringing the allowance for loan losses to \$7.7 million and \$6.5 million, respectively. The allowance represented 1.36% of gross loans at June 30, 2009 and 1.18% of gross loans at June 30, 2008. During the three months ended June 30, 2009, we charged-off \$668,000 of loans and recorded \$3,000 of recoveries on loans previously charged-off. During the three months ended June 30, 2008, we charged-off \$470,000 of loans and recorded \$10,000 of recoveries on loans previously charged-off. The \$665,000 and \$460,000 net charge-offs during the second quarters of 2009 and 2008, respectively, represented 0.47% and 0.34% of the average outstanding loan portfolio for the three months ended June 30, 2009 and 2008, respectively.

For the six months ended June 30, 2009, we incurred a noncash expense related to the provision for loan losses of \$1.7 million, bringing the allowance for loan losses to \$7.7 million, or 1.36% of gross loans, as of June 30, 2009. The \$1.7 million provision for the six months ended June 30, 2009 related primarily to the level of charge-offs that occurred during this period. In contrast, for the six months ended June 30, 2008, we added \$1.3 million to the provision for loan losses, resulting in an allowance of \$6.5 million at June 30, 2008. We charged-off \$598,000 of loans and recorded \$10,000 of recoveries on loans previously charged-off during the six months ended June 30, 2008. The \$991,000 and \$588,000 net charge-offs during the first six months of 2009 and 2008, respectively, represented 0.35% and 0.22% of the average outstanding loan portfolio for the six months ended June 30, 2009 and 2008, respectively.

At June 30, 2009, the allowance for loan losses represented less than one time the amount of non-performing loans, compared to 2.1 times at June 30, 2008. The coverage level of the allowance at June 30, 2009 decreased from the coverage level at June 30, 2008 due to an increase in non-performing loans. A significant portion, or 78.0%, of nonperforming loans at June 30, 2009 are secured by real estate. We have evaluated the underlying collateral on these loans and believe that the collateral on these loans is sufficient to minimize future losses. As a result of this level of coverage on non-performing loans, we believe the provision of \$1.7 million for the six months ended June 30, 2009 to be adequate.

Noninterest Income

The following table sets forth information related to our noninterest income (dollars in thousands).

Edgar Filing: SOUTHERN FIRST BANCSHARES INC - Form 10-Q

	Three months ended		Six months ended	
	June 30,		June 30,	
	2009	2008	2009	2008
Loan fee income	\$ 121	\$ 43	\$ 159	\$ 88
Service fees on deposit accounts	177	142	352	291
Income from bank owned life insurance	123	102	246	198
Real estate owned activity	3	7	(4)	(51)
Other income	95	81	180	160
Total noninterest income	\$ 519	\$ 375	\$ 933	\$ 686

Three months ended June 30, 2009 and 2008

Noninterest income for the three month period ended June 30, 2009 was \$519,000, an increase of 38.4% over noninterest income of \$375,000 for the same period of 2008. The \$144,000 increase during the 2009 period is related primarily to increases of \$78,000 in loan fee income, \$35,000 in service fees on deposit accounts, and \$21,000 in income from bank owned life insurance.

Loan fee income was \$121,000 and \$43,000 for the three months ended June 30, 2009 and 2008, respectively, consisting primarily of late charge fees, fees from issuance of lines and letters of credit, and mortgage origination fees we receive on residential loans funded and closed by a third party. The \$78,000 increase for the three months ended June 30, 2009 compared to the same period in 2008 related primarily to an \$86,000 increase in mortgage origination fees, partially offset by a decrease of \$10,000 in fees related to lines and letters of credit. Mortgage origination fees were \$86,000 for the three months ended June 30, 2009 compared to \$0 for the same period in 2008. Income related to fees received from the issuance of lines and letters of credit was \$9,000 and \$19,000 for the second quarters of 2009 and 2008, respectively, while late charge fees were \$23,000 and \$24,000 for the three month periods ended June 30, 2009 and 2008, respectively.

20

Service fees on deposit accounts consist primarily of service charges on our checking, money market, and savings accounts and the fee income received from client non-sufficient funds (NSF) transactions. Deposit fees were \$177,000 and \$142,000 for the three months ended June 30, 2009 and 2008, respectively. The \$35,000 increase is primarily related to a \$22,000 increase in NSF fees, an \$11,000 increase in deposit related fees such as service charges, and a \$2,000 increase in overdraft and returned item fees. Service charge fees were \$58,000 and \$47,000 for the three months ended June 30, 2009 and 2008, respectively, while other fees such as overdraft and returned item fees were \$11,000 and \$9,000 for the same periods in 2009 and 2008, respectively. NSF fee income was \$108,000 and \$86,000 for the second quarters of 2009 and 2008, respectively, representing 61.0% of total service fees on deposits in the 2009 period compared to 60.6% of total service fees on deposits in the 2008 period.

We purchased an additional \$4.0 million of bank owned life insurance during the second half of 2008. Income derived from life insurance was \$123,000 and \$102,000 for the three months ended June 30, 2009 and 2008, respectively.

Edgar Filing: SOUTHERN FIRST BANCSHARES INC - Form 10-Q

Real estate owned activity includes income and expenses from property held for sale and other real estate we own, including real estate acquired in settlement of loans. For the three months ended June 30, 2009 and 2008, income received on the properties exceeded our expenses related to owning the real estate by \$3,000 and \$7,000, respectively.

Other income consists primarily of fees received on debit card transactions, sale of customer checks, and wire transfers. Other income was \$95,000 and \$81,000 for the three months ended June 30, 2009 and 2008, respectively. The \$14,000 increase relates primarily to a \$10,000 increase in debit card transaction fees and a \$4,000 increase in other client service related fees. Debit card transaction fees were \$69,000 and \$59,000 for the three months ended June 30, 2009 and 2008, respectively, and represented 72.6% and 72.8% of total other income for the second quarters of 2009 and 2008, respectively. The corresponding transaction costs associated with debit card transactions are included in noninterest data processing and related costs. The debit card transaction costs were \$26,000 and \$24,000 for the three months ended June 30, 2009 and 2008, respectively. The net impact of the fees received and the related cost of the debit card transactions on earnings for the three months ended June 30, 2009 and 2008 was \$43,000 and \$35,000, respectively. Wire transfer and other deposit related fees were \$26,000 and \$22,000 for the second quarters ended June 30, 2009 and 2008, respectively.

Six months ended June 30, 2009 and 2008

Noninterest income in the six month period ended June 30, 2009 was \$933,000, an increase of 36.0% over noninterest income of \$686,000 in the same period of 2008. The \$247,000 increase in noninterest income is related to increases of \$71,000 in loan fee income, \$61,000 in service fees on deposit accounts, \$48,000 in income from bank owned life insurance, \$47,000 in real estate owned activity, and \$20,000 in other income.

Loan fee income was \$159,000 and \$88,000 for the six months ended June 30, 2009 and 2008, respectively, consisting primarily of late charge fees, fees from issuance of lines and letters of credit, and mortgage origination fees we receive on residential loans funded and closed by a third party. The \$71,000 increase for the six months ended June 30, 2009 compared to the same period in 2008 related primarily to an increase of \$83,000 in mortgage origination fees, partially offset by decreases of \$6,000 in late charge fees and \$6,000 in fees from issuance of lines and letters of credit. Mortgage origination fees were \$89,000 and \$6,000 for the six months ended June 30, 2009 and 2008, respectively. Late charge fees were \$47,000 and \$53,000 for the six months ended June 30, 2009 and 2008, respectively, while income related to issuance of lines and letters of credit was \$23,000 and \$29,000 for the same periods in 2009 and 2008, respectively.

Service fees on deposit accounts consist primarily of service charges on our checking, money market, and savings accounts and the fee income received from client non-sufficient funds (NSF) transactions. Deposit fees were \$352,000 and \$291,000 for the six months ended June 30, 2009 and 2008, respectively. The \$61,000 increase is primarily related to increases of \$31,000 in deposit related fees such as service charges, \$16,000 in overdraft and returned item fees, and \$14,000 in NSF fees. Service charge fees were \$115,000 and \$84,000 for the six months ended June 30, 2009 and 2008, respectively, while other fees such as overdraft and returned item fees were \$26,000 and \$10,000, respectively. NSF income increased \$14,000 to \$211,000 for the six months ended June 30, 2009 from \$197,000 for the same period in 2008, representing 59.9% of total service fees on deposits in the 2009 period compared to 67.7% of total service fees on deposits in the 2008 period.

We purchased an additional \$4.0 million of bank owned life insurance during the second half of 2008. Income derived from life insurance was \$246,000 and \$198,000 for the six months ended June 30, 2009 and 2008, respectively.

Real estate owned activity includes income and expenses from property held for sale and other real estate we own, including real estate acquired in settlement of loans. For the six months ended June 30, 2009 and 2008, our expenses related to owning the real estate exceeded income received on the properties by \$4,000 and \$51,000, respectively.

Other income consists primarily of fees received on debit card transactions, sale of customer checks, and wire transfers. Other income was \$180,000 and \$160,000 for the six months ended June 30, 2009 and 2008, respectively. The \$20,000 increase relates primarily to an \$18,000 increase in debit card transaction fees and a \$2,000 increase in other client service related fees. Debit card transaction fees were \$127,000 and \$109,000 for the six months ended June 30, 2009 and 2008, respectively and represented 70.6% and 68.1% of total other income for the first six months of 2009 and 2008, respectively. The corresponding transaction costs associated with debit card transactions are included in noninterest data processing and related costs. The debit card transaction costs were \$48,000 and \$44,000 for the six months ended June 30, 2009 and 2008, respectively. The net impact of the fees received and the related cost of the debit card transactions on earnings for the six months ended June 30, 2009 and 2008 was \$79,000 and \$65,000, respectively.

Noninterest expenses

The following table sets forth information related to our noninterest expenses (dollars in thousands).

	Three months ended		Six months ended	
	June 30,		June 30,	
	2009	2008	2009	2008
Compensation and benefits	\$ 1,963	1,806	\$ 3,888	\$ 3,524
Professional fees	155	127	291	241
Marketing	174	161	318	296
Insurance	639	143	792	272
Occupancy	440	349	857	697
Data processing and related costs	345	344	719	665
Telephone	59	42	110	76
Other	189	214	418	401
Total noninterest expenses	\$ 3,964	3,186	\$ 7,393	\$ 6,172

Three months ended June 30, 2009 and 2008

We incurred noninterest expenses of \$4.0 million for the three months ended June 30, 2009 compared to \$3.2 million for the three months ended June 30, 2008, an increase of \$778,000 or 24.4%.

Noninterest expense as a percentage of noninterest income and net interest income, or the efficiency ratio, was 72.9% for the three months ended June 30, 2009 compared to 61.8% for the same period in 2008. The primary reason for the higher efficiency ratio in the 2009 period is due to increased FDIC insurance premiums and the additional retail offices and their related expenses. The initial operating costs for our two new office locations in their first year of operations exceed the benefits from obtaining additional low cost deposits. As these branch offices increase their retail deposits, we anticipate that our efficiency ratio will begin to improve; however, no assurance can be given that the levels of deposits will cover the additional expenses or that other costs will not increase.

Edgar Filing: SOUTHERN FIRST BANCSHARES INC - Form 10-Q

For the three months ended June 30, 2009, compensation and benefits, occupancy, and data processing and related costs represented 69.3% of the total noninterest expense compared to 78.4% for the same period in 2008.

Six months ended June 30, 2009 and 2008

We incurred noninterest expenses of \$7.4 million for the six months ended June 30, 2009 compared to \$6.2 million for the six months ended June 30, 2008, an increase of \$1.2 million, or 19.8%

The efficiency ratio, or noninterest expense as a percentage of noninterest income and net interest income, was 71.7% for the six months ended June 30, 2009 compared to 62.6% for the same period in 2008. Increased FDIC insurance premiums and expenses related to the additional two retail offices contributed to the higher efficiency ratio for the 2009 period. The initial operating costs for our two new office locations in their first year of operations exceed the benefits from obtaining additional low cost deposits. As these branch offices increase their retail deposits, we anticipate that our efficiency ratio will begin to improve; however, no assurance can be given that the levels of deposits will cover the additional expenses or that other costs will not increase.

For the six months ended June 30, 2009, compensation and benefits, occupancy, and data processing and related costs represented 73.9% of the total noninterest expense compared to 79.2% for the same period in 2008.

22

The following table sets forth information related to our compensation and benefits (dollars in thousands).

	Three months ended June 30,		Six months ended June 30,	
	2009	2008	2009	2008
Base compensation	\$ 1,411	\$ 1,243	\$ 2,748	\$ 2,402
Incentive compensation	233	318	442	565
Total compensation	1,644	1,561	3,190	2,967
Benefits	352	293	767	641
Capitalized loan origination costs	(33)	(48)	(69)	(84)
Total compensation and benefits	\$ 1,963	\$ 1,806	\$ 3,888	\$ 3,524

Three months ended June 30, 2009 and 2008

Edgar Filing: SOUTHERN FIRST BANCSHARES INC - Form 10-Q

Total compensation and benefits expense was \$2.0 million and \$1.8 million for the three months ended June 30, 2009 and 2008, respectively. Compensation and benefits represented 49.5% and 56.7% of our total noninterest expense for the three months ended June 30, 2009 and 2008, respectively. The \$157,000 increase in compensation and benefits in the second quarter of 2009 compared to the same period in 2008 resulted from increases of \$168,000 in base compensation and \$59,000 in benefits expense, partially offset by a reduction of \$85,000 in incentive compensation expense. In addition, loan origination compensation expense, which is required to be capitalized and amortized over the life of the loan as a reduction of loan interest income, decreased by \$15,000.

The \$168,000 increase in base compensation expense related to the cost of four additional employees as well as the employees hired in mid-June 2008 to staff our two new office locations. In addition, to staffing the new office locations, we have added positions in mortgage origination, client services and accounting and human resources. Incentive compensation represented 11.9% and 17.6 % of total compensation and benefits for the three months ended June 30, 2009 and 2008, respectively. The incentive compensation expense recorded for the second quarters of 2009 and 2008 represented an accrual of the estimated incentive compensation earned during the second quarter of the respective year. Benefits expense increased \$59,000 in the second quarter of 2009 compared to the same period in 2008. Benefits expense represented 21.4% and 18.8% of the total compensation for the three months ended June 30, 2009 and 2008, respectively.

Six months ended June 30, 2009 and 2008

Total compensation and benefits expense was \$3.9 million and \$3.5 million for the six months ended June 30, 2009 and 2008, respectively. Compensation and benefits represented 52.6% and 57.1% of our total noninterest expense for the six months ended June 30, 2009 and 2008, respectively. The \$364,000 increase in compensation and benefits in the first six months of 2009 compared to the same period in 2008 resulted from increases of \$346,000 in base compensation and \$126,000 in benefits expense, partially offset by a reduction of \$123,000 in incentive compensation. In addition, loan origination compensation expense, which is required to be capitalized and amortized over the life of the loan as a reduction of loan interest income, decreased by \$15,000.

The \$346,000 increase in base compensation expense related to the cost of 4 additional employees as well as the employees hired in mid-June 2008 to staff our two new office locations. In addition, to staffing the new office locations, we have added positions in mortgage origination, client services and accounting and human resources. Incentive compensation represented 11.4% and 16.0 % of total compensation and benefits for the six months ended June 30, 2009 and 2008, respectively. The incentive compensation expense recorded for the first six months of 2009 and 2008 represented an accrual of the estimated incentive compensation earned during the first six months of the respective year. Benefits expense increased \$126,000 in the first six months of 2009 compared to the same period in 2008. Benefits expense represented 24.0% and 21.6% of the total compensation for the six months ended June 30, 2009 and 2008, respectively.

23

The following tables set forth information related to our data processing and related costs (dollars in thousands).

	Three months ended		Six months ended	
	June 30,		June 30,	
	2009	2008	2009	2008
Data processing costs	\$ 257	\$ 261	\$ 551	\$ 510
Debit card transaction expense	26	24	48	44
Courier expense	27	24	54	48

Edgar Filing: SOUTHERN FIRST BANCSHARES INC - Form 10-Q

Other expenses	35	35	66	63
Total data processing and related costs	\$ 345	\$ 344	\$ 719	\$ 665

Three and six months ended June 30, 2009 and 2008

Total data processing and related costs were \$345,000 and \$344,000, an increase of \$1,000 for the three months ended June 30, 2009 and 2008, respectively. During the three months ended June 30, 2009, our data processing costs for our core processing system were \$257,000 compared to \$261,000 for the three months ended June 30, 2008. During the first six months of 2009 and the same period of 2008, our data processing and related costs were \$719,000 and \$665,000, respectively, an increase of \$54,000, or 8.1%. We have contracted with an outside computer service company to provide our core data processing services.

Data processing costs decreased \$4,000, or 1.5%, from \$261,000 to \$257,000 for the three months ended June 30, 2009 compared to the same period in 2008. While a significant portion of the fee charged by the third party processor is directly related to the number of loan and deposit accounts and the related number of transactions, we incurred certain non-recurring costs during the three months ended June 30, 2008. We opened two new retail offices during the summer of 2008 which were charged additional data communications for the initial set-up process. In addition, during 2008, we contracted with a third party to provide certain IT technical support and assistance. These additional costs in 2008 equaled approximately \$29,000. During the six months ended June 30, 2009 and 2008, data processing costs for our core processing system were \$551,000 and \$510,000, respectively, an increase of \$41,000, or 8.0%.

We receive income from debit card transactions performed by our clients. Since we outsource this service, we are charged related transaction expenses from our merchant service provider. Debit card transaction expense was \$26,000 and \$24,000 for the three months ended June 30, 2009 and 2008, respectively, and \$48,000 and \$44,000 for the six months ended June 30, 2009 and 2008, respectively.

Occupancy expense represented 11.1% and 11.0% of total noninterest expense for the three months ended June 30, 2009 and 2008, respectively. Occupancy expense increased by \$91,000 for the three months ended June 30, 2009 and 2008 from \$349,000 to \$440,000, respectively. The increase is primarily due to the increased costs of depreciation and maintenance associated with the two retail offices opened in July 2008. For the six months ended June 30, 2009, occupancy expense increased \$160,000 to \$857,000 from \$697,000 for the same period ended June 30, 2008. Occupancy expense represented 11.6% and 11.3% of total noninterest expense for the first six months of 2009 and 2008, respectively.

The remaining \$529,000 increase in noninterest expense for the three month period ended June 30, 2009 compared to the same period in 2008 resulted primarily from increases of \$496,000 in insurance expense, \$28,000 in professional fees, \$13,000 in marketing expenses, and \$17,000 in telephone expense, partially offset by a decrease of \$25,000 in other noninterest expenses. The significant increase in insurance expense is primarily related to the special one-time assessment of approximately \$300,000 charged by the FDIC for insurance premiums as well as an overall increase in the assessment rate. The increase in professional fees relates primarily to increased legal, accounting, and directors fees, while the increases in marketing and telephone expenses are largely due to the two new retail offices added in July 2008. In addition, the \$25,000 decrease in other expense is primarily due to a \$41,000 decrease in office supplies, partially offset by a \$15,000 increase in collection expenses.

For the six month period ended June 30, 2009, remaining noninterest expenses increased \$643,000 from the same period in 2008. Of this amount, \$520,000 was related to insurance expense, \$50,000 to professional fees, \$22,000 to marketing expenses, \$34,000 to telephone expenses, and \$17,000 to other expenses. The significant increase in insurance expense is primarily related to the special assessment of approximately \$300,000 charged by the FDIC for insurance premiums as well as an overall increase in the assessment rate. The increase in professional fees relates primarily to increased legal, accounting, and directors fees, while the increases in marketing and telephone expenses are largely due to the two new retail offices added in July 2008. In addition, the \$17,000 increase in other expense is primarily due to a \$94,000

Edgar Filing: SOUTHERN FIRST BANCSHARES INC - Form 10-Q

increase in collection expenses, partially offset by decreases of \$29,000 in office supplies, \$33,000 in deposit account losses, and \$11,000 in business meal expenses.

24

Income tax expense was \$144,000 for the three months ended June 30, 2009 compared to \$406,000 during the same period in 2008. For the six months ended June 30, 2009, income tax expense was \$352,000 compared to \$778,000 for the same period in 2008. Our effective tax rate was 28.9% and 32.0%, respectively, for the three month periods ended June 30, 2009 and 2008, respectively, and 29.5% and 32.6% for the six month periods ended June 30, 2009 and 2008, respectively. The lower net income during the first and second quarters of 2009 increased the impact that our tax-exempt income had in lowering our effective tax rate from the same periods in the prior year.

Balance Sheet Review

General

At June 30, 2009, we had total assets of \$743.1 million, consisting principally of \$569.4 million in loans, \$102.6 million in investments, \$30.3 million in federal funds sold, \$9.0 million in cash and due from banks and \$13.6 million in bank owned life insurance. Our liabilities at June 30, 2009 totaled \$683.8 million, which consisted principally of \$496.1 million in deposits, \$13.8 million in short-term repurchase agreements, \$154.7 million in notes payable and other borrowings, and \$13.4 million in junior subordinated debentures. At June 30, 2009, our shareholders' equity was \$59.3 million.

At December 31, 2008, we had total assets of \$693.0 million, consisting principally of \$566.6 million in loans, \$85.4 million in investments, \$8.8 million in federal funds sold, \$4.4 million in cash and due from banks and \$13.4 million in bank owned life insurance. Our liabilities at December 31, 2008 totaled \$653.2 million, consisting principally of \$469.5 million in deposits, \$164.7 million in notes payable and other borrowings, and \$13.4 million of junior subordinated debentures. At December 31, 2008, our shareholders' equity was \$39.8 million.

Federal Funds Sold

At June 30, 2009, our federal funds sold were \$30.3 million, or 4.1% of total assets. At December 31, 2008, our \$8.8 million in short-term investments in federal funds sold on an overnight basis comprised 1.3% of total assets.

Investments

Edgar Filing: SOUTHERN FIRST BANCSHARES INC - Form 10-Q

At June 30, 2009, the \$102.6 million in our investment securities portfolio represented approximately 13.8% of our total assets. We held Government sponsored enterprise securities, municipal securities, and mortgage-backed securities with a fair value of \$93.6 million and an amortized cost of \$92.7 million for an unrealized gain of \$924,000.

Contractual maturities and yields on our investments that are available for sale and are held to maturity at June 30, 2009 are shown in the following table (dollars in thousands). Expected maturities may differ from contractual maturities because issuers may have the right to call or prepay obligations with or without call or prepayment penalties. We had no securities with maturities less than one year at June 30, 2009.

One to Five Years	Five to Ten Years	Over Ten Years	Total

At June 30, 2009, the Company had unrealized losses on 9 of its individual investments in government sponsored enterprises, state and political subdivisions, and FNMA preferred stock. The Company believes, based on industry analyst reports and credit ratings that the deterioration in the value of these investments is attributed to market turmoil and liquidity and not the credit quality of the issuer. The Company has the ability and intent to hold these securities until such time as the value recovers or the securities mature. In addition, the Company held 2 collateralized

Edgar Filing: SOUTHERN FIRST BANCSHARES INC - Form 10-Q

mortgage obligations (CMOs) that were in an unrealized loss position at June 30, 2009.

Effective April 1, 2009, the Company adopted FSP 157-4, Determining Fair Value When the Volume and Level of Activity for the Asset of Liability Have Significantly Decreased and Identifying Transactions That are not Orderly. FSP 157-4 allows fair value to be based on internal calculations or external fair value models that use market participant data, independently sourced market observable data or unobserved inputs that are corroborated by market data if listed prices or active market quotes are not readily available. Our private label CMOs, which are non-agency securities, were priced based on an internally developed cash flow model due to market illiquidity. To determine our pricing valuation, the Company obtained fair values for its private label Collateralized Mortgage Obligations (CMO) investments from third party pricing vendors. In addition, we evaluated recent transaction volumes, price quotations and related price variability, broker information available to us, and market liquidity to the extent possible. We noted that this market has had little, if any, new issuance since the credit crisis began. The company determined that most sales are forced and do not reflect the true economic value of these securities.

The two major components in the bank's internal model are the prepayment speeds of the securities and the dollar amount of loan defaults compared to the excess collateral amounts in each pool. The prepayment speeds utilized in the model are based on the prior prepayments rates for the specific securities and the anticipated future prepayment speeds for like securities. The default rates are based on both the historical loss rates for each security and an analysis of the current loan delinquency amounts in each portfolio. Anticipated loss amounts are determined based on the various levels of delinquency, with higher percentages being assigned to loans over 90 days or loans in foreclosure. The anticipated loss amounts are then compared to the dollar amount of the excess collateral included in each pool. Based on the bank's calculations and assumptions, management anticipates receiving all of the outstanding principal and the related interest for each security. The valuation change has been recorded as a change in the unrealized gain/loss recognized in other comprehensive income.

At December 31, 2008, the \$85.4 million in our investment securities portfolio represented approximately 12.3% of our total assets. We held Government sponsored enterprise securities, municipal securities, and mortgage-backed securities with a fair value of \$77.1 million and an amortized cost of \$78.6 million for an unrealized loss of \$1.5 million.

26

Contractual maturities and yields on our investments at December 31, 2008 are shown in the following table (dollars in thousands). Expected maturities may differ from contractual maturities because issuers may have the right to call or prepay obligations with or without call or prepayment penalties. At December 31, 2008, we had no securities with a maturity of less than one year.

	One to Five Years		Five to Ten Years		Over Ten Years		Total	
	Amount	Yield	Amount	Yield	Amount	Yield	Amount	Yield
Available for Sale								
Government sponsored enterprises	\$ -	- %	\$ 11,238	5.19 %	\$ 7,470	5.06%	\$ 18,708	5.14 %

Edgar Filing: SOUTHERN FIRST BANCSHARES INC - Form 10-Q

Other investments at December 31, 2008 consisted of Federal Reserve Bank stock with a cost of \$1.3 million, investments in Greenville First Statutory Trust I and II of \$186,000 and \$217,000, respectively, and Federal Home Loan Bank stock with a cost of \$6.7 million.

Loans

Since loans typically provide higher interest yields than other types of interest earning assets, a substantial percentage of our earning assets are invested in our loan portfolio. For the six months ended June 30, 2009 and 2008, average loans were \$566.7 million and \$537.8 million, respectively. Before the allowance for loan losses, total loans outstanding at June 30, 2009 were \$569.4 million. Average loans for the year ended December 31, 2008 were \$547.7 million. Before the allowance for loan losses, total loans outstanding at December 31, 2008 were \$566.6 million.

The principal component of our loan portfolio is loans secured by real estate mortgages. Most of our real estate loans are secured by residential or commercial property. We do not generally originate traditional long term residential mortgages, but we do issue traditional second mortgage residential real estate loans and home equity lines of credit. We obtain a security interest in real estate whenever possible, in addition to any other available collateral. This collateral is taken to increase the likelihood of the ultimate repayment of the loan. Generally, we limit the loan-to-value ratio on loans we make to 80%. Due to the short time our portfolio has existed, the current mix may not be indicative of the ongoing portfolio mix. We attempt to maintain a relatively diversified loan portfolio to help reduce the risk inherent in concentration in certain types of collateral.

27

The following table summarizes the composition of our loan portfolio at June 30, 2009 and December 31, 2008 (dollars in thousands).

	June 30, 2009		December 31, 2008	
	Amount	% of Total	Amount	% of Total

Total loans, net	\$ 561,684		\$ 559,602	

Maturities and Sensitivity of Loans to Changes in Interest Rates

The information in the following tables is based on the contractual maturities of individual loans, including loans which may be subject to renewal at their contractual maturity. Renewal of such loans is subject to review and credit approval, as well as modification of terms upon maturity. Actual repayments of loans may differ from the maturities reflected below because borrowers have the right to prepay obligations with or without prepayment penalties.

The following table summarizes the loan maturity distribution by type and related interest rate characteristics at June 30, 2009 (dollars in thousands).

		One year or less	After one but within five years	After five years	Total
Real estate mortgage	\$	78,834	\$ 258,243	\$ 73,904	\$ 410,981

Provision and Allowance for Loan Losses

We have established an allowance for loan losses through a provision for loan losses charged to expense on our statement of income. The allowance for loan losses represents an amount which we believe will be adequate to absorb probable losses on existing loans that may become uncollectible. Our judgment as to the adequacy of the allowance for loan losses is based on a number of assumptions about future events, which we believe to be reasonable, but which may or may not prove to be accurate. Our determination of the allowance for loan losses is based on evaluations of the collectibility of loans, including consideration of factors such as the balance of impaired loans, the quality, mix, and size of our overall loan portfolio, economic conditions that may affect the borrower's ability to repay, the amount and quality of collateral securing the loans, our historical loan loss experience, and a review of specific problem loans. We also consider subjective issues such as changes in the lending policies and procedures, changes in the local/national economy, changes in volume or type of credits, changes in volume/severity of problem loans, quality of loan review and board of director oversight, concentrations of credit, and peer group comparisons. Due to our limited operating history, the provision for loan losses has been made primarily as a result of our assessment of general loan loss risk compared to banks of similar size and maturity. Due to the rapid growth of our bank over the past several years and our short operating history, a large portion of the loans in our loan portfolio and of our lending relationships are of relatively recent origin. In general, loans do not begin to show signs of credit deterioration or default until they have been outstanding for some period of time, a process known as seasoning. As a result, a portfolio of older loans will usually behave more predictably than a newer portfolio. Because our loan portfolio is relatively new, the current level of delinquencies and defaults may not be representative of the level that will prevail when the portfolio becomes more seasoned, which may be higher than current levels. If delinquencies and defaults increase, we may be required to increase our provision for loan losses, which would adversely affect our results of operations and financial condition. Periodically, we adjust the amount of the allowance based on changing circumstances. We charge recognized losses to the allowance and add subsequent recoveries back to the allowance for loan losses. There can be no assurance that charge-offs of loans in future periods will not exceed the allowance for loan losses as estimated at any point in time or that provisions for loan losses will not be significant to a particular accounting period.

Edgar Filing: SOUTHERN FIRST BANCSHARES INC - Form 10-Q

The following table summarizes the activity related to our allowance for loan losses for the six months ended June 30, 2009 and 2008 (dollars in thousands):

	June 30, 2009	2008
Balance, beginning of period	\$ 7,005	\$ 5,751
Loans charged-off	(995)	(598)
Recoveries of loans previously charged-off	4	10
Net loans (charged-off) recovery	\$ (991)	\$ (588)
Provision for loan losses	1,725	1,300
Balance, end of period	\$ 7,739	\$ 6,463
Allowance for loan losses to gross loans	1.36%	1.18%
Net charge-offs to average loans	0.35%	0.22%

We do not allocate the allowance for loan losses to specific categories of loans. Instead, we evaluate the adequacy of the allowance for loan losses on an overall portfolio basis utilizing our credit grading system which we apply to each loan. We have retained an independent consultant to review the loan files on a test basis to confirm the grading of our loans.

The allowance for loan losses was \$7.7 million and \$7.0 million at June 30, 2009 and December 31, 2008, respectively, or 1.36% and 1.24% of outstanding loans, respectively. During the year ended December 31, 2008, we had net charged-off loans of \$1.9 million. During the six months ended June 30, 2009 and 2008 we had net charge-offs of \$991,000 and \$588,000, respectively.

29

Nonperforming Assets

The following table shows the nonperforming assets and the related percentage of nonperforming assets to total assets and gross loans for the six months ended June 30, 2009 and the year ended December 31, 2008 (dollars in thousands). Generally, a loan is placed on nonaccrual status when it becomes 90 days past due as to principal or interest, or when we believe, after considering economic and business conditions and collection efforts, that the borrower's financial condition is such that collection of the loan is doubtful. A payment of interest on a loan that is classified as nonaccrual is recognized as a reduction in principal when received.

Edgar Filing: SOUTHERN FIRST BANCSHARES INC - Form 10-Q

	June 30, 2009	December 31, 2008
Loans on nonaccrual:		
Mortgage	\$ 6,771	6,818
Commercial	1,801	868
Consumer	114	13
Total nonaccrual loans	8,686	7,699
Total of nonperforming loans	8,686	7,699
Other nonperforming assets	4,465	2,116
Total nonperforming assets	\$ 13,151	9,815
Loans over 90 days past due (1)	\$ 6,156	7,008
Nonperforming assets as a percentage of:		
Total assets	1.77 %	1.42 %
Gross loans	2.31 %	1.73 %

(1)Loans over 90 days are included in nonaccrual loans

At June 30, 2009 nonperforming assets were \$13.2 million, or 1.77% of total assets and 2.31% of gross loans. Comparatively, nonperforming assets were \$9.8 million, or 1.42% of total assets and 1.73% of gross loans at December 31, 2008. Nonaccrual loans increased \$987,000 to \$8.7 million at June 30, 2009 from \$7.7 million at December 31, 2008. This increase is primarily related to commercial real estate and business loans. The amount of foregone interest income on the nonaccrual loans in the first six months of 2009 was approximately \$305,000. The amount of interest income recorded in the first six months of 2009 for loans that were on nonaccrual at June 30, 2009 was approximately \$13,000.

Other nonperforming assets include real estate acquired in settlement of loans. These assets increased \$2.4 million to \$4.5 million at June 30, 2009 from \$2.1 million at December 31, 2008. The balance at June 30, 2009 includes five commercial properties totaling \$4.2 million and two pieces of residential real estate for \$311,000. We believe that these properties are appropriately valued at the lower of cost or market as of June 30, 2009.

At June 30, 2009, impaired loans amounted to approximately \$8.7 million for which a \$1.4 million reserve was allocated in the allowance.

Deposits and Other Interest-Bearing Liabilities

Edgar Filing: SOUTHERN FIRST BANCSHARES INC - Form 10-Q

Our primary source of funds for loans and investments is our deposits, advances from the FHLB, and short-term repurchase agreements. National and local market trends over the past several years suggest that consumers have moved an increasing percentage of discretionary savings funds into investments such as annuities, stocks, and fixed income mutual funds. Accordingly, it has become more difficult to attract deposits. We have chosen to obtain a portion of our certificates of deposits from areas outside of our market. The deposits obtained outside of our market area generally have comparable rates compared to rates being offered for certificates of deposits in our local market. We also utilize out-of-market deposits in certain instances to obtain longer-term deposits than are readily available in our local market. The amount of out-of-market deposits was \$218.2 million at June 30, 2009 and \$200.9 million at December 31, 2008.

We generally obtain out-of-market time deposits of \$100,000 or more through brokers with whom we maintain ongoing relationships. We have adopted guidelines regarding our use of brokered CDs that limit our brokered CDs to 50% of total deposits and dictate that our current interest rate risk profile determines the terms. In addition, we do not obtain time deposits of \$100,000 or more through the Internet. These guidelines allow us to take advantage of the attractive terms that wholesale funding can offer while mitigating the inherent related risk.

30

We anticipate being able to either renew or replace these out-of-market deposits when they mature, although we may not be able to replace them with deposits with the same terms or rates. Our loan-to-deposit ratio was 115% and 121% at June 30, 2009 and December 31, 2008, respectively.

The following table shows the average balance amounts and the average rates paid on deposits held by us for the six months ended June 30, 2009 and 2008 (dollars in thousands).

	2009		2008	
	Amount	Rate	Amount	Rate
Noninterest bearing demand deposits	\$ 34,536	- %	\$ 31,446	- %
Interest bearing demand deposits	42,513	0.68 %	38,009	1.16 %
Money market accounts	83,271	1.17 %	87,536	2.14 %
Savings accounts	2,092	0.18 %	1,826	0.39 %
Time deposits less than \$100,000	44,291	3.20 %	44,542	4.36 %
Time deposits greater than \$100,000	274,459	2.88 %	254,262	4.62 %
Total deposits	\$ 481,162	2.20 %	\$ 457,621	3.50 %

The increase in time deposits of \$100,000 or more for the six months ended June 30, 2009 compared to the 2008 period resulted primarily from a \$14.12 million increase in wholesale deposits.

Core deposits, which exclude out-of-market deposits and time deposits of \$100,000 or more, provide a relatively stable funding source for our loan portfolio and other earning assets. Our core deposits were \$219.7 million and \$205.9 million at June 30, 2009 and December 31, 2008, respectively.

Edgar Filing: SOUTHERN FIRST BANCSHARES INC - Form 10-Q

All of our time deposits are certificates of deposits. The maturity distribution of our time deposits of \$100,000 or more at June 30, 2009 was as follows (dollars in thousands):

Three months or less	\$ 99,408
Over three through six months	58,314
Over six through twelve months	37,566
Over twelve months	79,252
Total	\$ 274,540

Capital Resources

Total shareholders' equity at June 30, 2009 was \$59.3 million. At December 31, 2008, total shareholders' equity was \$39.8 million. The \$19.5 million increase during the first six months of 2009 resulted primarily from the \$17.3 million issuance of preferred stock as well as \$843,000 from net income earned and \$1.5 million from an unrealized gain on securities available for sale.

On February 27, 2009, as part of the CPP, the Company entered into the CPP Purchase Agreement with the Treasury Department, pursuant to which we sold 17,299 shares of our Series T Preferred Stock and the CPP Warrant to purchase 330,554 shares of our common stock for an aggregate purchase price of \$17.3 million in cash. The Series T Preferred Stock will be entitled to cumulative dividends at a rate of 5% per annum for the first five years, and 9% per annum thereafter. The CPP Warrant has a 10-year term and is immediately exercisable upon its issuance, with an exercise price, subject to anti-dilution adjustments equal to \$7.85 per share of the common stock.

The following table shows the return on average assets (net income divided by average total assets), return on average equity (net income divided by average equity), and equity to assets ratio (average equity divided by average total assets) annualized for the six months ended June 30, 2009 and the year ended December 31, 2008. Since our inception, we have not paid cash dividends.

31

	June 30, 2009	December 31, 2008
Return on average assets	0.24 %	0.27 %
Return on average equity	3.24 %	4.70 %
Return on average common equity	1.84 %	4.70 %
Equity to total assets ratio	7.37%	5.73 %
Common equity to total assets ratio	5.85 %	5.73 %

Edgar Filing: SOUTHERN FIRST BANCSHARES INC - Form 10-Q

Our return on average assets was 0.24% for the six months ended June 30, 2009, a slight decrease from 0.27% for the year ended December 31, 2008. In addition, our return on average equity decreased to 3.24% from 4.70% for the six months ended June 30, 2009 and the year ended December 31, 2008, respectively. The increase in the equity to total assets ratio from December 31, 2008 is primarily related to the \$17.3 million received in conjunction with the issuance of preferred stock. In addition, our return on average common equity was 1.84% and our common equity to total assets ratio was 5.85% for the six months ended June 30, 2009.

Under the capital adequacy guidelines, regulatory capital is classified into two tiers. These guidelines require an institution to maintain a certain level of Tier 1 and Tier 2 capital to risk-weighted assets. Tier 1 capital consists of common shareholders' equity, excluding the unrealized gain or loss on securities available for sale, minus certain intangible assets. In determining the amount of risk-weighted assets, all assets, including certain off-balance sheet assets, are multiplied by a risk-weight factor of 0% to 100% based on the risks believed to be inherent in the type of asset. Tier 2 capital consists of Tier 1 capital plus the general reserve for loan losses, subject to certain limitations. We are also required to maintain capital at a minimum level based on total average assets, which is known as the Tier 1 leverage ratio.

At both the holding company and bank level, we are subject to various regulatory capital requirements administered by the federal banking agencies. To be considered well-capitalized, we must maintain total risk-based capital of at least 10%, Tier 1 capital of at least 6%, and a leverage ratio of at least 5%. To be considered adequately capitalized under these capital guidelines, we must maintain a minimum total risk-based capital of 8%, with at least 4% being Tier 1 capital. In addition, we must maintain a minimum Tier 1 leverage ratio of at least 4%.

In October, 2008, President Bush signed in law the EESA in response to the financial crises affecting the banking system. The Treasury Department and banking regulators are implementing a number of programs under this legislation to address capital and liquidity issues in the banking system. Under the Treasury Department's CPP, we received \$17.3 million through issuance of Series T Preferred Stock and the CPP Warrant for common stock to the Treasury Department. The Series T Preferred Stock issuance and the related CPP Warrant both qualify for Tier 1 capital and added approximately 300 basis points to that measure. The fair value allocation of the \$17.3 million between the shares of Series T Preferred Stock and the CPP Warrant resulted in \$15.9 million allocated to the shares of Series T Preferred Stock and \$1.4 million allocated to the CPP Warrant. See discussion of shareholders' equity above for additional details.

The following table sets forth the holding company's and the bank's various capital ratios at June 30, 2009 and at December 31, 2008. For all periods, the bank was considered well-capitalized and the holding company met or exceeded its applicable regulatory capital requirements.

	June 30, 2009		December 31, 2008	
	Holding Company	Bank	Holding Company	Bank
Total risk-based capital	13.4 %	12.8 %	10.4 %	12.8 %
Tier 1 risk-based capital	12.1 %	11.5 %	9.2 %	11.6 %
Leverage capital	10.0 %	9.6 %	7.7 %	9.8 %

Effect of Inflation and Changing Prices

Edgar Filing: SOUTHERN FIRST BANCSHARES INC - Form 10-Q

The effect of relative purchasing power over time due to inflation has not been taken into account in our consolidated financial statements. Rather, our financial statements have been prepared on an historical cost basis in accordance with generally accepted accounting principles.

Unlike most industrial companies, our assets and liabilities are primarily monetary in nature. Therefore, the effect of changes in interest rates will have a more significant impact on our performance than will the effect of changing prices and inflation in general. In addition, interest rates may generally increase as the rate of inflation increases, although not necessarily in the same magnitude. As discussed previously, we seek to manage the relationships between interest sensitive assets and liabilities in order to protect against wide rate fluctuations, including those resulting from inflation.

32

Off-Balance Sheet Risk

Commitments to extend credit are agreements to lend money to a client as long as the client has not violated any material condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require the payment of a fee. At June 30, 2009, unfunded commitments to extend credit were \$80.6 million, of which \$9.5 million was at fixed rates and \$71.1 million was at variable rates. At December 31, 2008, unfunded commitments to extend credit were \$89.0 million, of which approximately \$13.8 million was at fixed rates and \$75.1 million was at variable rates. A significant portion of the unfunded commitments related to consumer equity lines of credit. Based on historical experience, we anticipate that a significant portion of these lines of credit will not be funded. We evaluate each client's credit worthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by us upon extension of credit, is based on our credit evaluation of the borrower. The type of collateral varies but may include accounts receivable, inventory, property, plant and equipment, and commercial and residential real estate.

At June 30, 2009 there was a \$4.9 million commitment under letters of credit. At December 31, 2008 there was a \$4.8 million commitment under letters of credit. The credit risk and collateral involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. Since most of the letters of credit are expected to expire without being drawn upon, they do not necessarily represent future cash requirements.

Except as disclosed in this document, we are not involved in off-balance sheet contractual relationships, unconsolidated related entities that have off-balance sheet arrangements or transactions that could result in liquidity needs or other commitments that significantly impact earnings.

Market Risk and Interest Rate Sensitivity

Market risk is the risk of loss from adverse changes in market prices and rates, which principally arises from interest rate risk inherent in our lending, investing, deposit gathering, and borrowing activities. Other types of market risks, such as foreign currency exchange rate risk and commodity price risk, do not generally arise in the normal course of our business.

Edgar Filing: SOUTHERN FIRST BANCSHARES INC - Form 10-Q

We actively monitor and manage our interest rate risk exposure in order to control the mix and maturities of our assets and liabilities utilizing a process we call asset/liability management. The essential purposes of asset/liability management are to ensure adequate liquidity and to maintain an appropriate balance between interest sensitive assets and liabilities in order to minimize potentially adverse impacts on earnings from changes in market interest rates. Our asset/liability management committee (ALCO) monitors and considers methods of managing exposure to interest rate risk. We have both an internal ALCO consisting of senior management that meets at various times during each month and a board ALCO that meets monthly. The ALCOs are responsible for maintaining the level of interest rate sensitivity of our interest sensitive assets and liabilities within board-approved limits.

Our interest rate risk exposure is managed principally by measuring our interest sensitivity gap, which is the positive or negative dollar difference between assets and liabilities that are subject to interest rate repricing within a given period of time. Interest rate sensitivity can be managed by repricing assets or liabilities, selling securities available for sale, replacing an asset or liability at maturity, or adjusting the interest rate during the life of an asset or liability. Managing the amount of assets and liabilities repricing in this same time interval helps to hedge the risk and minimize the impact on net interest income of rising or falling interest rates. We generally would benefit from increasing market rates of interest when we have an asset-sensitive gap position and generally would benefit from decreasing market rates of interest when we are liability-sensitive.

33

The following table sets forth information regarding our rate sensitivity as of June 30, 2009 for each of the time intervals indicated (dollars in thousands).

	Within three months	After three but within twelve months	After one but within five Years	After five years	Total
Interest-earning assets:					
Federal funds sold	\$ 30,281	\$ -	\$ -	\$ -	\$ 30,281
Investment securities	14,930	9,946	32,200	36,331	93,407
Loans	287,476	40,858	172,985	57,698	559,017
Total earning assets	\$ 332,687	\$ 50,804	\$ 205,185	\$ 94,029	\$ 682,705
Interest-bearing liabilities:					
Money market and NOW	\$ 137,351	\$ -	\$ -	\$ -	\$ 137,351
Regular savings	2,307	-	-	-	2,307
Time deposits	112,748	123,101	82,406	-	318,255
Short-term repurchase agreements	13,821	-	-	-	13,821
Note payable and other borrowings	75,100	26,975	37,600	15,000	154,675
Junior subordinated debentures	13,403	-	-	-	13,403
Total interest-bearing liabilities	\$ 354,730	\$ 150,076	\$ 120,006	\$ 15,000	\$ 639,812
Period gap	\$ (22,043)	\$ (99,272)	\$ 85,179	\$ 79,029	
Cumulative gap	(22,043)	(121,315)	(36,136)	42,893	

Edgar Filing: SOUTHERN FIRST BANCSHARES INC - Form 10-Q

Ratio of cumulative gap to total earning assets (3.2%) (17.8%) (5.3 %) 6.3 %

The following table sets forth information regarding our rate sensitivity, as of December 31, 2008, at each of the time intervals (dollars in thousands).

	Within three months	After three but within twelve months	After one but within five years	After five years	Total
Interest-earning assets:					
Federal funds sold	\$ 8,800	-	-	-	8,800
Investment securities	4,673	22,187	26,209	23,882	76,951
Loans	262,203	41,558	191,387	64,269	559,417
Total earning assets	\$ 275,676	63,745	217,596	88,151	645,168
Interest-bearing liabilities:					
Money market and NOW	\$ 122,608	-	-	-	122,608
Regular savings	1,918	-	-	-	1,918

Period gap	\$ (57,911)	(86,366)	98,447	78,151	
Cumulative Gap	(57,911)	(144,277)	(45,830)	32,321	
Ratio of cumulative gap to total earning assets	(9.0%)	(22.4%)	(7.1%)	5.0%	

34

We were liability sensitive during the year ended December 31, 2008 and through the six months ended June 30, 2009. Our variable rate loans and a majority of our deposits reprice over a 12-month period. Approximately 48% and 43% of our loans were variable rate loans at June 30, 2009 and December 31, 2008, respectively. The ratio of cumulative gap to total earning assets after 12 months is (17.8%) because \$121.3 million more liabilities will reprice in a 12 month period than assets. However, our gap analysis is not a precise indicator of our interest sensitivity position. The analysis presents only a static view of the timing of maturities and repricing opportunities, without taking into consideration that changes in interest rates do not affect all assets and liabilities equally. For example, rates paid on a substantial portion of core deposits may change contractually within a relatively short time frame, but those rates are viewed by us as significantly less interest-sensitive than market-based rates such as those paid on noncore deposits. Net interest income may be affected by other significant factors in a given interest rate environment, including changes in the volume and mix of interest-earning assets and interest-bearing liabilities.

Edgar Filing: SOUTHERN FIRST BANCSHARES INC - Form 10-Q

At June 30, 2009, 80.4% of our interest-bearing liabilities were either variable rate or had a maturity of less than one year. Of the \$354.7 million of interest-bearing liabilities set to reprice within three months, 39.4% are transaction, money market or savings accounts which are already at or near their lowest rates and provide little opportunity for benefit should market rates continue to decline or stay constant. However, certificates of deposit that are currently maturing or renewing are repricing at lower rates. We expect to benefit as these deposits reprice, even if market rates increase slightly. At June 30, 2009, we had \$121.3 million more liabilities than assets that reprice within the next twelve months. Included in our other borrowings are a number of FHLB advances and structured repurchase agreements with callable features as of June 30, 2009. We believe that the optionality on many of these borrowings will not be exercised until interest rates increase significantly. In addition, we believe that the interest rates that we pay on the majority of our interest-bearing transaction accounts, would only be impacted by a portion of any change in market rates. This key assumption is utilized in our overall evaluation of our level of interest sensitivity.

Liquidity Risk

Liquidity represents the ability of a company to convert assets into cash or cash equivalents without significant loss, and the ability to raise additional funds by increasing liabilities. Liquidity management involves monitoring our sources and uses of funds in order to meet our day-to-day cash flow requirements while maximizing profits. Liquidity management is made more complicated because different balance sheet components are subject to varying degrees of management control. For example, the timing of maturities of our investment portfolio is fairly predictable and subject to a high degree of control at the time investment decisions are made. However, net deposit inflows and outflows are far less predictable and are not subject to the same degree of control.

At June 30, 2009, our liquid assets, consisting of cash and due from banks and federal funds sold, amounted to \$39.3 million and \$13.2 million, or 5.3% and 1.9% of total assets, respectively. Our investment securities at June 30, 2009 and December 31, 2008 amounted to \$102.6 million and \$85.4 million, or 13.8% and 12.3% of total assets, respectively. Investment securities traditionally provide a secondary source of liquidity since they can be converted into cash in a timely manner. However, a substantial portion of these securities are pledged against outstanding debt. Therefore, the related debt would need to be repaid prior to the securities being sold in order for these securities to be converted to cash.

Our ability to maintain and expand our deposit base and borrowing capabilities serves as our primary source of liquidity. We plan to meet our future cash needs through the liquidation of temporary investments, the generation of deposits, and from additional borrowings. In addition, we will receive cash upon the maturity and sale of loans and the maturity of investment securities. We maintain three federal funds purchased lines of credit with correspondent banks totaling \$38.0 million for which there were no borrowings against the lines at June 30, 2009.

We are also a member of the Federal Home Loan Bank of Atlanta (FHLB), from which applications for borrowings can be made. The FHLB requires that securities, qualifying mortgage loans, and stock of the FHLB owned by the bank be pledged to secure any advances from the FHLB. As of June 30, 2009, we had no additional borrowing capacity from the FHLB, based on the bank's \$7.1 million investment in FHLB stock, as well as qualifying mortgages available to secure any future borrowings. However, we are able to pledge additional securities to the FHLB in order to increase our available borrowing capacity.

We signed a ten-year, five-month lease on our main office building in 2005. The lease provides for annual lease rate escalations based on cost of living adjustments.

We believe that our existing stable base of core deposits, borrowings from the FHLB, and short-term repurchase agreements will enable us to successfully meet our long-term liquidity needs.

As a result of the Treasury's Capital Purchase Program, we received \$17.3 million of capital on February 27, 2009 in exchange for 17,299 shares of preferred stock. This additional capital should allow us to remain well-capitalized and provide additional liquidity on our balance sheet.

35

Accounting, Reporting, and Regulatory Matters

Recently Issued Accounting Standards

The following is a summary of recent authoritative pronouncements that affect accounting, reporting, and disclosure of financial information by us:

In June 2009, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 168, The FASB Accounting Standards Codification™ and the Hierarchy of Generally Accepted Accounting Principles—a replacement of FASB Statement No. 162, (SFAS 168). SFAS 168 establishes the FASB Accounting Standards Codification™ (Codification) as the source of authoritative generally accepted accounting principles (GAAP) for nongovernmental entities. The Codification does not change GAAP. Instead, it takes the thousands of individual pronouncements that currently comprise GAAP and reorganizes them into approximately 90 accounting Topics, and displays all Topics using a consistent structure. Contents in each Topic are further organized first by Subtopic, then Section and finally Paragraph. The Paragraph level is the only level that contains substantive content. Citing particular content in the Codification involves specifying the unique numeric path to the content through the Topic, Subtopic, Section and Paragraph structure. FASB suggests that all citations begin with FASB ASC, where ASC stands for Accounting Standards Codification. SFAS 168, (FASB ASC 105-10-05, 10, 15, 65, 70) is effective for interim and annual periods ending after September 15, 2009 and will not have an impact on the Company's financial position but will change the referencing system for accounting standards. The following pronouncements provide citations to the applicable Codification by Topic, Subtopic and Section in addition to the original standard type and number.

FSP EITF 99-20-1, Amendments to the Impairment Guidance of EITF Issue No. 99-20, (FASB ASC 325-40-65) (FSP EITF 99-20-1) was issued in January 2009. Prior to the FSP, other-than-temporary impairment was determined by using either Emerging Issues Task Force (EITF) Issue No. 99-20, Recognition of Interest Income and Impairment on Purchased Beneficial Interests and Beneficial Interests that Continue to be Held by a Transferor in Securitized Financial Assets, (EITF 99-20) or SFAS No. 115, Accounting for Certain Investments in Debt and Equity Securities, (SFAS 115) depending on the type of security. EITF 99-20 required the use of market participant assumptions regarding future cash flows regarding the probability of collecting all cash flows previously projected. SFAS 115 determined impairment to be other than temporary if it was probable that the holder would be unable to collect all amounts due according to the contractual terms. To achieve a more consistent determination of other-than-temporary impairment, the FSP amends EITF 99-20 to determine any other-than-temporary impairment based on the guidance in SFAS 115, allowing management to use more judgment in determining any other-than-temporary impairment. The FSP was effective for reporting periods ending after December 15, 2008. Management has reviewed the Company's security portfolio and evaluated the portfolio for any other-than-temporary impairments.

On April 9, 2009, the FASB issued three staff positions related to fair value which are discussed below.

FSP SFAS 115-2 and SFAS 124-2 (FASB ASC 320-10-65), Recognition and Presentation of Other-Than-Temporary Impairments, (FSP SFAS 115-2 and SFAS 124-2) categorizes losses on debt securities available-for-sale or held-to-maturity determined by management to be other-than-temporarily impaired into losses due to credit issues and losses related to all other factors. Other-than-temporary impairment (OTTI) exists when it is more likely than not that the security will mature or be sold before its amortized cost basis can be recovered. An OTTI related to credit losses should be recognized through earnings. An OTTI related to other factors should be recognized in other comprehensive income. The FSP does not amend existing recognition and measurement guidance related to other-than-temporary impairments of equity securities. Annual disclosures required in SFAS 115 and FSP SFAS 115-1 and SFAS 124-1 are also required for interim periods (including the aging of securities with unrealized losses).

FSP SFAS 157-4 (FASB ASC 820-10-65), Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That are Not Orderly recognizes that quoted prices may not be determinative of fair value when the volume and level of trading activity has significantly decreased. The evaluation of certain factors may necessitate that fair value be determined using a different valuation technique. Fair value should be the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction, not a forced liquidation or distressed sale. If a transaction is considered to not be orderly, little, if any, weight should be placed on the transaction price. If there is not sufficient information to conclude as to whether or not the transaction is orderly, the transaction price should be considered when estimating fair value. An entity's intention to hold an asset or liability is not relevant in determining fair value. Quoted prices provided by pricing services may still be used when estimating fair value in accordance with SFAS 157; however, the entity should evaluate whether the quoted prices are based on current information and orderly transactions. Inputs and valuation techniques are required to be disclosed in addition to any changes in valuation techniques.

36

FSP SFAS 107-1 and APB 28-1 (FASB ASC 825-10-65), Interim Disclosures about Fair Value of Financial Instruments requires disclosures about the fair value of financial instruments for interim reporting periods of publicly traded companies as well as in annual financial statements and also requires those disclosures in summarized financial information at interim reporting periods. A publicly traded company includes any company whose securities trade in a public market on either a stock exchange or in the over-the-counter market, or any company that is a conduit bond obligor. Additionally, when a company makes a filing with a regulatory agency in preparation for sale of its securities in a public market it is considered a publicly traded company for this purpose.

The three staff positions are effective for periods ending after June 15, 2009, with early adoption of all three permitted for periods ending after March 15, 2009. The Company adopted the staff positions for its second quarter 10-Q. The staff positions had no material impact on the financial statements. Additional disclosures have been provided where applicable.

The Securities and Exchange Commission (SEC) issued Staff Accounting Bulletin (SAB) No. 111 (FASB ASC 320-10-S99-1) on April 9, 2009 to amend Topic 5.M., Other Than Temporary Impairment of Certain Investments in Debt and Equity Securities and to supplement FSP SFAS 115-2 and SFAS 124-2. SAB 111 maintains the staff's previous views related to equity securities; however debt securities are excluded from its scope. The SAB provides that other-than-temporary impairment is not necessarily the same as permanent impairment and unless evidence exists to support a value equal to or greater than the carrying value of the equity security investment, a write-down to fair value should be recorded and accounted for as a realized loss. The SAB was effective upon issuance and had no impact on the Company's financial position.

Edgar Filing: SOUTHERN FIRST BANCSHARES INC - Form 10-Q

SFAS 165 (FASB ASC 855-10-05, 15, 25, 45, 50, 55), Subsequent Events, (SFAS 165) was issued in May 2009 and provides guidance on when a subsequent event should be recognized in the financial statements. Subsequent events that provide additional evidence about conditions that existed at the date of the balance sheet should be recognized at the balance sheet date. Subsequent events that provide evidence about conditions that arose after the balance sheet date but before financial statements are issued, or are available to be issued, are not required to be recognized. The date through which subsequent events have been evaluated must be disclosed as well as whether it is the date the financial statements were issued or the date the financial statements were available to be issued. For nonrecognized subsequent events which should be disclosed to keep the financial statements from being misleading, the nature of the event and an estimate of its financial effect, or a statement that such an estimate cannot be made, should be disclosed. The standard is effective for interim or annual periods ending after June 15, 2009.

SFAS 167 (not yet reflected in FASB ASC), Amendments to FASB Interpretation No. 46(R), (SFAS 167) was also issued in June 2009. The standard amends FIN 46(R) to require a company to analyze whether its interest in a variable interest entity (VIE) gives it a controlling financial interest. A company must assess whether it has an implicit financial responsibility to ensure that the VIE operates as designed when determining whether it has the power to direct the activities of the VIE that significantly impact its economic performance. Ongoing reassessments of whether a company is the primary beneficiary is also required by the standard. SFAS 167 amends the criteria to qualify as a primary beneficiary as well as how to determine the existence of a VIE. The standard also eliminates certain exceptions that were available under FIN 46(R). SFAS 167 is effective as of the beginning of each reporting entity's first annual reporting period that begins after November 15, 2009, for interim periods within that first annual reporting period, and for interim and annual reporting periods thereafter. Earlier application is prohibited. Comparative disclosures will be required for periods after the effective date. The Company does not expect the standard to have any impact on the Company's financial position.

Other accounting standards that have been issued or proposed by the FASB or other standards-setting bodies that do not require adoption until a future date are not expected to have a material impact on the consolidated financial statements upon adoption.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

There have been no material changes in our quantitative and qualitative disclosures about market risk as of June 30, 2009 from that presented in our annual report on Form 10-K for the year ended December 31, 2008. See Market Risk and Interest Rate Sensitivity and Liquidity Risk in Item 2, Management Discussion and Analysis of Financial Condition and Results of Operations for quantitative and qualitative disclosures about market risk, which information is incorporated herein by reference.

37

Item 4. Controls and Procedures.

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures

Edgar Filing: SOUTHERN FIRST BANCSHARES INC - Form 10-Q

as defined in Exchange Act Rule 13a-15(e). Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that our current disclosure controls and procedures are effective as of June 30, 2009. There have been no significant changes in our internal controls over financial reporting during the fiscal quarter ended June 30, 2009 that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

The design of any system of controls and procedures is based in part upon certain assumptions about the likelihood of future events. There can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions, regardless of how remote.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings.

There are no material pending legal proceedings to which the company is a party or of which any of its property is the subject.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

Not applicable

Item 3. Defaults Upon Senior Securities.

Not applicable

Item 4. Submission of Matters to a Vote of Security Holders.

At our company's annual meeting of shareholders held on May 19, 2009, our shareholders (1) elected three members of the board of directors as Class I directors for a three-year term and (2) approved management's proposal on executive compensation.

Election of Directors

The previous terms of the Class I directors expired at the 2009 annual shareholder meeting. Each of the three then current Class I directors was nominated for election and stood for re-election at the 2009 annual shareholder meeting for a three-year term. The number of votes in favor of the Class I directors were as follows: Mr. Cothran 2,602,972; Mr. Johnstone, III 2,603,137; and for Mr. Seaver, Jr. 2,603,137. The number of votes against the Class I directors were as follows: Mr. Cothran 0; Mr. Johnstone, III 0; and Mr. Seaver, Jr. 0. No shareholders voted to abstain, and there were no broker non-votes.

Since a plurality of the votes were attained for the directors that stood for re-election, the approval of the Class I directors to serve a three-year term, expiring at the 2012 annual meeting of shareholders, was recorded in our minute book.

Non-Binding Approval of Executive Compensation

The tabulation of votes on this matter was: For - 2,442,772, Against - 134,256, and Abstained 37,024. There were no broker non-votes.

There were no other matters voted on by the company's shareholders at our 2009 annual shareholder meeting.

Item 5. Other Information.

Not applicable

Item 6. Exhibits.

31.1 Rule 13a-14(a) Certification of the Principal Executive Officer.

31.2 Rule 13a-14(a) Certification of the Principal Financial Officer.

32 Section 1350 Certifications.
