NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

Basis of Presentation and Consolidation

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

We prepare our consolidated financial statements in accordance with Securities and Exchange Commission requirements and include all adjustments of a normal recurring nature that are necessary to fairly present our consolidated results of operations, financial position, and cash flows for all periods presented. Interim period results are not necessarily indicative of full year results. This quarterly report should be read in conjunction with our most recent Annual Report on Form 10-K.

Our consolidated financial statements include the accounts of International Game Technology (IGT, we, our, or the Company), including all majority-owned or controlled subsidiaries and variable interest entities (VIEs) for which we are the primary beneficiary. All appropriate inter-company accounts and transactions are eliminated.

Our fiscal year is reported on a 52/53-week period that ends on the Saturday nearest to September 30 each year. Similarly, our quarters end on the Saturday nearest to the last day of the quarter end month. For simplicity, all fiscal periods are presented as ending on the calendar month end. Accordingly, this report presents the following periods:

	Actual	Period End	Presented as
Current quarter	June 28, 2008		June 30, 2008
Prior year quarter	June 30, 2007		June 30, 2007
Prior fiscal year end	September 29, 2007		September 30, 2007

Use of Estimates

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

Our consolidated financial statements are prepared in conformity with accounting principles generally accepted in the United States (US). Accordingly, we are required to make estimates, judgments and assumptions that we believe are reasonable based on our historical experience, contract terms, observance of known trends in our company and the industry as a whole, and information available from other outside sources. Our estimates affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. Actual results may differ from initial estimates.

Recently Issued Accounting Standards

FSP EITF 03-6-1

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

In June 2008, the Financial Accounting Standards Board (FASB) issued FASB Staff Position (FSP) EITF 03-6-1, *Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities*. This FSP mandates that unvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents be considered participating securities and be included in the computation of earnings per share (EPS) pursuant to the two-class method. This change will become effective for fiscal years beginning after December 15, 2008, or the first quarter of IGT's fiscal 2010, and requires retrospective application for all periods presented. We estimate the computation under the two-class method incorporating unvested restricted stock awards as participating securities will reduce our annual diluted EPS by approximately \$0.01 per share.

EITF 07-5

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

In June 2008, the FASB ratified Emerging Issues Task Force (EITF) Issue No. 07-5, *Determining Whether an Instrument (or Embedded Feature) Is Indexed to an Entity's Own Stock*. EITF 07-5 mandates a two-step process for evaluating whether an equity-linked financial instrument or embedded feature is indexed to the entity's own stock. It is effective for fiscal years beginning after December 15, 2008 and interim periods within

Table of Contents

those fiscal years, which is the first quarter of IGT's fiscal 2010. EITF 07-5 may simplify share repurchase transactions and we do not expect the adoption of this issue will have a material impact on our results of operations, financial position or cash flows.

FSP APB 14-1

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

In May 2008, the FASB issued FSP Accounting Principles Board Opinion (APB) 14-1, *Accounting For Convertible Debt Instruments That May Be Settled in Cash Upon Conversion (Including Partial Cash Settlement)*. This FSP requires that convertible debt instruments that may be settled in cash upon conversion be separated into a debt and equity component. The debt component will be equal to the fair value of a similar liability and reflect the entity's borrowing rate for nonconvertible instruments. The equity component will be the residual difference between the proceeds and the value of the debt component. The rule is effective for fiscal years beginning after December 15, 2008 and interim periods within those fiscal years, and requires retrospective restatement of all periods presented. We will adopt FSP APB 14-1 in the first quarter of our fiscal 2010 and continue evaluating the extent to which it will increase interest expense related to our convertible debentures and reduce diluted EPS.

SFAS 161

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

In March 2008, the FASB issued Statement of Financial Accounting Standards (SFAS) 161, *Disclosures about Derivative Instruments and Hedging Activities - an amendment of SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities*. This statement requires disclosures about derivatives and hedging activities including enhanced disclosure about (a) how and why an entity uses derivative instruments, (b) how derivative instruments and related hedged items are accounted for under SFAS 133, and (c) how derivative instruments and related hedged items affect financial position, financial performance and cash flows. This statement is effective for periods beginning after November 15, 2008, which is IGT's second quarter of fiscal 2009. We expect the adoption of this statement will expand our future disclosures.

SFAS 141(R) and SFAS 160

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

In December 2007, the FASB issued SFAS 141(R), *Business Combinations*, and SFAS 160, *Noncontrolling Interests in Consolidated Financial Statements - an amendment of ARB 51*. These statements will change the way companies account for business combinations and noncontrolling interests (i.e. minority interests), requiring more assets and liabilities to be measured at fair value as of the acquisition date. Contingent consideration liabilities will require remeasurement at fair value in each subsequent reporting period. Acquisition related costs, such as fees for attorneys, accountants, and investment bankers, will be expensed as incurred and no longer be capitalized as part of the business purchase price. Noncontrolling interests will initially be measured at fair value and classified as a separate component of equity.

Both statements provide for prospective application in fiscal years beginning on or after December 15, 2008, which is IGT's fiscal 2010, and earlier application is prohibited. SFAS 141(R) applies only to business combinations consummated after fiscal years beginning on or after the effective date, with the exception of income taxes. For all acquisitions, regardless of the consummation date, deferred tax assets and uncertain tax position adjustments occurring after the measurement period will be recorded as a component of income tax expense in accordance with SFAS 141(R), rather than adjusted through goodwill. SFAS 160 requires retrospective application for presentation and disclosures in comparative financial statements presented after the effective date (i.e. reclassifying noncontrolling interests to appear in equity).

SFAS 159

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

In February 2007, the FASB issued SFAS 159, *The Fair Value Option for Financial Assets and Financial Liabilities*, permitting entities to elect fair value measurement for many financial instruments and certain other items. Unrealized gains and losses on designated items will be recognized in earnings at each subsequent period. SFAS 159 also establishes presentation and disclosure requirements for similar types of assets and liabilities measured at fair value. We are required to adopt this statement in fiscal 2009 and continue evaluating the potential impact to our future results of operations, financial position or cash flows, which depends on the extent to which we elect fair value measurement for eligible items.

Table of Contents

SFAS 157 (including FSPs)

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

In September 2006, the FASB issued SFAS 157, *Fair Value Measurements*, which defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. SFAS 157 does not require any new fair value measurements, but provides guidance on how to measure fair value by providing a fair value hierarchy used to classify the source of the information. This standard is effective for fiscal years beginning after November 15, 2007, which is fiscal 2009 for IGT. In February 2008, the FASB issued FSP FAS 157-2, *Effective Date of FASB Statement No.157*, delaying the effective date of SFAS 157 for nonfinancial assets and liabilities until fiscal years beginning after November 15, 2008, which is fiscal 2010 for IGT. We continue evaluating to what extent it will impact our future results of operations, financial position or cash flows.

2. Variable Interest Entities and Investments in Unconsolidated Affiliates

Variable Interest Entities

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

As the primary beneficiary, we consolidated the wide area progressive (WAP) trusts in Iowa and New Jersey (NJ) beginning June 30, 2004 under FASB Interpretation No. (FIN) 46 (revised December 2003), *Consolidation of Variable Interest Entities*. In both Iowa and New Jersey, IGT licenses WAP systems to the trusts and casino members that are responsible for the funding of the progressive jackpots. Consolidated trust assets and equivalent liabilities relate primarily to jackpot funding. The consolidation of these VIE trusts increases gaming operations revenues and interest income, which are offset by equivalent gaming operations costs and interest expense, resulting in no material impact to gross profit or net income.

Consolidated Iowa and NJ VIE trust assets and equivalent liabilities totaled \$111.5 million at June 30, 2008 and \$116.5 million at September 30, 2007. Consolidated VIE trusts comprised less than 0.1% of total revenues for the quarters and nine month periods ended June 30, 2008 and 2007.

Investments in Unconsolidated Affiliates

Walker Digital Gaming, LLC

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

In February 2006, IGT paid \$56.0 million for a 10% equity interest in Walker Digital Gaming, LLC (WDG) (formerly known as Casino IP Holdings, LLC), a VIE formed with our involvement to hold, develop, and license WDG intellectual property (IP) identified for gambling use. In January 2008, we invested \$14.0 million in WDG for an additional 2% equity interest, bringing our total equity interest to 12%. This relationship facilitates the development, introduction, and integration of certain WDG innovations into IGT product lines. We are not the primary beneficiary of WDG and apply the equity method of accounting.

Additionally in January 2008, we advanced the first of four \$15.0 million annual funding commitments under a new global license and development agreement. These annual advances will be applied to future IGT royalty obligations due WDG. The new arrangement provides IGT exclusive license to and fixed pricing for WDG's IP portfolio, excluding certain pre-existing third party licenses, for 12 years with an option to extend to 20 years for a fifth payment of \$15.0 million.

At June 30, 2008, our net equity investment of \$57.0 million plus the \$60.0 million in annual royalty advances represents our maximum exposure to loss. We recognized a loss of \$4.5 million in the current nine months and \$3.9 million in the first nine months of fiscal 2007, primarily comprised of amortization expense on certain intangible assets. As the loss is not material to our financial statements, it is presented as a component of selling, general and administrative expense.

China LotSynergy Holdings, Ltd.

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

In May 2007, we entered into strategic business arrangements with China LotSynergy Holdings, Ltd. (CLS), a company involved in the development of the China lottery market and other related activities. As part of this arrangement, we invested \$33.6 million, including transaction costs, for approximately 5% of the outstanding ordinary shares of CLS, a public company listed on the Growth Enterprise Market of the Hong Kong Exchange. We record this equity investment under the cost method and recognize our portion of net accumulated earnings in CLS only to the extent distributed through dividends.

Table of Contents

At June 30, 2008, the estimated market value of our investment in CLS stock was approximately \$13.6 million. As a result of the decline, we reviewed our investment for impairment and determined our CLS stock is temporarily impaired, and accordingly no impairment loss was recorded at June 30, 2008. Although the fair value is down from cost, the duration of the decline has been short. We believe the decline is a temporary weakness partially related to localized market conditions surrounding new regulations which we expect to be resolved as new games are approved. Additionally, because this is a strategic investment, we have the intent and ability to retain our investment for a period of time sufficient to allow for a recovery of market value. We will continue to monitor this investment and reassess it for impairment on a quarterly basis until the fair value recovers or an impairment loss is recorded.

In May 2007, we also invested \$72.0 million, including transaction costs, in a 4% zero-coupon unsecured convertible note of CLS due May 31, 2015, which becomes partially or wholly convertible after three years at a split-adjusted initial conversion price of HK\$0.96 per share. CLS may call the note for redemption in full at accreted value under certain circumstances on or after May 31, 2012. IGT may require CLS to repay some or all of the note at accreted value on May 31, 2012.

At June 30, 2008, the convertible note is classified as available-for-sale for accounting purposes and carried at its estimated market value of \$73.9 million with unrealized holding gains of \$0.4 million. Our evaluation of the convertible note terms determined that no feature met the SFAS 133 definition of a derivative requiring bifurcation at June 30, 2008. See Note 14 for related foreign currency derivatives.

Additionally, IGT entered into a Technical Cooperation Agreement (TCA) to provide technical support, assistance and consulting services to CLS and exclusively explore opportunities for providing products and services in connection with the China Welfare Lottery. IGT is restricted from selling or transferring any of its shares in CLS or the convertible note for three years, after which either party may terminate the exclusivity provision in the TCA allowing IGT to sell or transfer its shares in CLS or the convertible note.

In September 2007, we established a 50/50 joint venture, IGT Synergy Holding Ltd., to explore opportunities in connection with the China Welfare Lottery. During the first nine months of fiscal 2008, we funded \$1.0 million of the \$14.5 million accrued at September 2007 for our unconditional commitment to contribute capital in installments over two years. We account for IGT Synergy Holding Ltd. under the equity method and it had no earnings or losses during the first nine months of fiscal 2008.

5. Acquisitions

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

Pro forma financial information is not provided, as these acquisitions are not material to our consolidated financial statements.

Cyberview Technology, Inc.

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

On July 8, 2008, we paid approximately \$76.0 million for substantially all of the assets of Cyberview Technology, Inc. (Cyberview), a group of companies that develop, produce and implement innovative, integrated gaming systems solutions. We simultaneously entered into a separate license agreement providing rights to certain additional Cyberview patents for a one-time fee of approximately \$9.0 million. We anticipate this purchase will enable more immediate access to the fixed odds betting terminal (FOBT) market in the United Kingdom (UK), as well as further strengthen our IP portfolio and enhance our server based initiatives.

Million-2-1

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

In June 2008, we completed the acquisition of Million-2-1 (M-2-1), a mobile gaming company based in Manchester, UK, for approximately \$10.2 million. Additionally, we committed to pay earn-out consideration up to a maximum of approximately \$14.8 million payable through fiscal 2011 contingent upon M-2-1 meeting

Table of Contents

certain financial targets. If paid, a portion will be recorded as additional purchase price and a portion as compensation expense ratably over the service period through June 2011. In addition to gaining access to M-2-1's IP, we anticipate this business combination will enable us to establish new markets and channels for IGT's game content.

With the business valuation not yet complete at June 30, 2008, we preliminarily allocated the purchase price to:

- ♣ tangible assets of \$1.7 million, including cash of \$0.6 million
- ♣ identifiable intangible assets of \$8.3 million
- ♣ goodwill of \$3.1 million, may be deductible for tax purposes
- ♣ liabilities of \$2.9 million

Digideal

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

In June 2007, we invested \$31.2 million in voting convertible preferred and common stock of Digideal Corporation (Digideal), a Spokane, Washington gaming technology firm. We acquired a 58% controlling interest and Digideal's results were consolidated in our financial statements beginning June 22, 2007. In addition to gaining access to Digideal's IP portfolio, we plan to work jointly to expand game content and electronic table game products. Additional five-year agreements provide IGT exclusive manufacturing and distribution rights, as well as a fixed-price option to purchase all remaining outstanding shares.

We allocated the aggregate purchase to:

- ♣ tangible assets of \$14.9 million, including cash of \$12.4 million
- ♣ identifiable intangible assets of \$9.0 million
- ♣ in-process research and development (R&D) of \$0.5 million with no future alternative use, immediately charged to R&D expense
- ♣ goodwill of \$11.1 million, not deductible for tax purposes
- ♣ liabilities of \$4.3 million

During the second quarter of fiscal 2008, we increased our investment in Digideal by approximately 5% for \$3.0 million, with an allocation of \$2.2 million to goodwill and \$0.4 million to identifiable intangibles.

Venture Catalyst Incorporated

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

In December 2006, we completed the acquisition of Venture Catalyst Incorporated (VCAT), renamed Mariposa Software, Inc. (Mariposa). We anticipate the Mariposa casino systems applications for customer relationship management will enhance our server-based initiatives. We allocated the aggregate purchase price of \$21.9 million to:

- ♣ tangible assets of \$6.8 million, including cash of \$3.5 million
- ♣ identifiable intangible assets of \$8.2 million
- ♣ in-process R&D of \$0.1 million with no future alternative use, immediately charged to R&D expense
- ♣ goodwill of \$10.9 million, not deductible for tax purposes
- ♣ liabilities of \$4.1 million

Table of Contents**6. Allowances for Receivables**

<i>(In millions)</i>	June 30, 2008	September 30, 2007
Allowance for doubtful accounts	\$ 17.6	\$ 20.9
Allowance for doubtful notes and contracts		
Current	\$ 20.9	\$ 12.5
Non-current	7.0	12.6
	\$ 27.9	\$ 25.1

7. Concentrations of Credit Risk

Financial instruments that potentially subject us to concentrations of credit risk consist principally of cash and equivalents, investments, and receivables. We place short-term investments in high credit quality financial institutions and in short-duration high-quality securities. With the exception of US Government and Agency securities, our short-term investment policy limits the amount of credit exposure in any one financial institution, industry group or type of investment. Cash on deposit may be in excess of Federal Deposit Insurance Corporation limits.

Our receivables are concentrated in the following legalized gaming regions at June 30, 2008:

North America	69 %	International	31 %
Nevada	13	Latin America	11
Oklahoma	8	Europe	10
California	5	Other (less than 5% individually)	10
Indiana	5		
Mississippi	5		
Other (less than 5% individually)	33		

Our unfunded development financing loans totaled \$141.0 million at June 30, 2008. During the first quarter of 2008, IGT agreed to provide up to \$75.0 million in development financing to a charitable gaming property in Alabama, with \$15.0 million funded through June 30, 2008. In April 2008, IGT agreed to provide up to \$140.0 million in new financing to a consortium of Argentina gaming operators, canceling previous arrangements executed in April 2007. The new agreements include a fully collateralized \$100.0 million development credit facility and \$40.0 million in gaming equipment financing, with \$19.0 million funded through June 30, 2008.

Auction Rate Securities

IGT held \$21.6 million (par value) of available-for-sale auction rate securities (ARS) at June 30, 2008. These instruments are fixed rate debt securities with underlying long-term maturities, designed to reset to market rates when traded through a modified Dutch auction process at

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

predetermined short-term intervals, typically 7, 28 or 35 days. These debt securities have historically traded at par.

Our ARS consist of AAA rated issuances, collateralized by student loans guaranteed by the US government under the Federal Family Education Loan Program. The issuers additionally provide certain credit enhancements, such as over-collateralization, reserve accounts, insurance, and excess spread to further secure the value of the debt. The issuers provide a third party guarantee, such that if a student loan defaults, the guarantor is obligated to pay the issuer 100% of the outstanding principal and interest. The guarantor is then able to submit a claim to the Federal Department of Education, which guarantees payment of 97%-100% of the outstanding amounts to the guarantor.

With global credit and capital market uncertainties, investment banks and brokers were unwilling to purchase ARS when investor demand fell short and auctions for student loan ARS began failing in February 2008. The immediate effect of a failed auction is that holders cannot sell the securities at auction and the interest rates generally reset to a maximum auction interest rate. As a result of the failed auctions, our ARS currently lack

Table of Contents

liquidity and were reclassified from current to non-current assets. We may not be able to access these funds prior to maturity without a loss of principal until a future auction is successful or the issuer calls the security.

With insufficient observable ARS market information available at June 30, 2008, we used market participant assumptions, such as credit quality, discounted cash flows, the probability of an issuer call before the stated maturity, and the impact of extended periods of maximum auction rates, to estimate their fair value. Based on our analysis, we recorded a temporary impairment of \$1.1 million to other comprehensive income. We believe this temporary impairment is primarily attributable to the limited liquidity. We continue to receive ARS interest payments and have no reason to believe any of the underlying issuers are at risk of default. We have the ability and intent to hold our ARS throughout the estimated recovery period. We expect to realize our investments par value without significant loss primarily due to the underlying collateral security.

9. Credit Facilities and Indebtedness

Outstanding <i>(In millions)</i>	June 30, 2008	September 30, 2007
Senior credit facility	\$ 1,075.0	\$ 600.0
Foreign credit facilities	5.6	5.2
2.6% Debentures	900.0	900.0
Installment purchase contract	3.1	3.4
Notes payable, net	\$ 1,983.7	\$ 1,508.6

We continue to be in compliance with all applicable covenants at June 30, 2008.

Senior Credit Facility

As of June 30, 2008, \$1.4 billion was available under our \$2.5 billion unsecured revolving credit facility, \$4.1 million was reserved for letters of credit, and outstanding borrowings carried a 3.43% weighted average interest rate. The outstanding amount at June 30, 2008 included an \$80.0 million draw requested and not yet funded with the related receivable included in other current assets.

Applicable interest rates and facility fees may fluctuate based on our public credit ratings or debt to capitalization ratio. At June 30, 2008, the facility fee was 12.5 basis points (bps) and the interest rate was LIBOR (London Inter-Bank Offering Rate) plus 37.5 bps. We can borrow at rates for one, two, three or six month durations at our discretion and other durations with bank group approval. One, three and six month LIBOR rates at the end of the period were 2.47%, 2.79% and 3.15%, respectively.

Foreign Credit Facilities

Our available foreign credit facilities at June 30, 2008 totaled \$46.3 million with a 2.56% weighted average interest rate. The \$5.6 million outstanding carried a 1.39% weighted average interest rate. These subsidiary credit facilities renew annually and are guaranteed by the parent company, International Game Technology.

2.6% Senior Convertible Debentures issued December 20, 2006

The market price condition for convertibility of our 2.6% Debentures has not yet been met.

We evaluated all features of the Debentures for SFAS 133 embedded derivatives and determined the contingent interest feature represents an embedded derivative requiring bifurcation. The value of this derivative was nominal at June 30, 2008 and September 30, 2007, and no related derivative liability was recorded. Any future derivative value will be recorded as a liability and adjusted through interest expense for changes in fair value.

Redeemed 1.75% Zero-Coupon Senior Convertible Debentures

On December 26, 2006, we called our outstanding 1.75% Debentures for redemption, giving holders the right to convert before January 10, 2007 for aggregate consideration comprised of shares and cash under the terms of the applicable indentures. The call resulted in payments to holders of \$612.7 million, as well as non-cash increases to additional paid-in capital (APIC) of \$1.2 million for 7.3 million shares issued and \$47.5 million for related deferred tax liabilities during fiscal 2007.

Table of Contents**10. Earnings Per Share**

Weighted average antidilutive stock award shares excluded from diluted EPS	7.9	3.5	4.4	2.4

We repurchased 9.4 million additional shares or 3% of outstanding shares from the end of the quarter through August 5, 2008.

11. Income Taxes

Our provision for income taxes is based on estimated effective annual income tax rates. The provision differs from income taxes currently payable because certain items of income and expense are recognized in different periods for financial statement purposes than for tax return purposes. We reduce deferred tax assets by a valuation allowance when it is more likely than not that some or all of the deferred tax assets will not be realized.

We adopted the provisions of FIN 48, *Accounting for Uncertainty in Income Taxes – an interpretation of FASB Statement No. 109*, during the first quarter of fiscal 2008. FIN 48 requires financial statement recognition of an uncertain tax position taken or expected to be taken in a tax return, when it is more likely than not to be sustained upon examination. This assessment further requires us to presume that tax authorities evaluate the technical merits of transactions individually and with full knowledge of all facts and circumstances surrounding the issue. A recognized tax position is recorded in the financial statements at the largest amount of benefit that has a greater than 50% likelihood of being realized upon settlement. FIN 48 also requires that changes in judgment resulting in subsequent recognition, de-recognition or change in the measurement of a tax position taken in a prior annual period, including any related interest and penalties, be recognized as a discrete item during the period in which the change occurs.

The implementation of FIN 48 as of the beginning of fiscal 2008 increased our unrecognized tax benefits by \$89.9 million, increased deferred tax assets by \$55.4 million, and decreased retained earnings by \$34.5 million. As of October 1, 2007, our net unrecognized tax benefits totaled \$131.6 million, comprised of a \$153.5 million liability, net of a \$21.9 million asset, and included accrued interest and penalties of \$39.4 million. Unrecognized tax benefits of \$76.2 million as of October 1, 2007 would impact the effective tax rate if recognized. Upon the adoption of FIN 48, we reclassified our reserves for uncertain tax positions from accrued income taxes to other non-current liabilities.

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

Interest and penalties related to unrecognized tax benefits are included in our income tax provisions and this policy did not change as a result of the adoption of FIN 48. At June 30, 2008, our net unrecognized tax benefits increased to \$138.1 million, primarily related to additional interest and penalties. Unrecognized tax benefits of \$90.5 million as of June 30, 2008 would impact the effective tax rate if recognized.

We conduct business globally and file US federal, state, local and foreign income tax returns. With few exceptions, we are no longer subject to US federal, state, local or non-US income tax examinations for fiscal years before 2000. While we believe we adequately provided for all tax positions, amounts asserted by tax authorities could be greater or less than our accrued position. We believe it is reasonably possible that the total amounts of unrecognized tax benefits may decrease within the next twelve months as a result of the potential closure of the IRS audits for the periods 2000 and 2001. An estimate of the range cannot be made at this time.

Table of Contents**12. Stockholders Equity*****Treasury Stock***

We repurchased 13.9 million shares of our common stock during the first nine months of fiscal 2008 for a total cost of \$510.9 million. In December 2007, we retired 400.0 million treasury shares which decreased treasury stock by \$3.7 billion, APIC by \$0.9 billion and retained earnings by \$2.8 billion.

13. Contingencies***Litigation***

IGT has been named in and has brought lawsuits in the normal course of business. We do not expect the outcome of these suits, including the lawsuits described below, to have a material adverse effect on our financial position or results of future operations.

Bally

On December 7, 2004, IGT filed a complaint in US District Court for the District of Nevada, alleging that defendants Alliance Gaming Corp., Bally Gaming Int'l, Inc., and Bally Gaming, Inc. infringed six US patents held by IGT: US Patent numbers 6,827,646; 5,848,932; 5,788,573; 5,722,891; 6,712,698 and 6,722,985. On January 21, 2005, defendants filed an answer denying the allegations in the complaint and raising various affirmative defenses to IGT's asserted claims. Defendants also asserted fourteen counterclaims against IGT, including counterclaims for a declaratory judgment of non-infringement, invalidity and unenforceability of the asserted patents, and for antitrust violations and intentional interference with prospective business advantage. IGT has successfully moved for partial summary judgment on defendants' counterclaims for intentional interference with prospective business advantage and defendants' antitrust allegations related to the gaming machine market. IGT

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

denies the remaining allegations. On May 9, 2007, the Court issued an order construing disputed terms of the asserted patent claims. Trial is scheduled for October 2008.

On April 28, 2006, IGT filed a complaint in US District Court for the District of Delaware, alleging that defendants Bally Technologies, Inc., Bally Gaming Int'l, Inc., and Bally Gaming, Inc. infringed nine US patents held by IGT: US Patent numbers RE 38,812; RE 37,885; 6,832,958; 6,319,125; 6,244,958; 6,431,983; 6,607,441; 6,565,434; and 6,620,046. The complaint alleges that the BALLY POWER BONUSING technology infringes one or more of the claims of the asserted IGT patents. The lawsuit seeks monetary damages and an injunction. On June 30, 2006, defendants filed an answer denying the allegations in the complaint and raising various affirmative defenses to IGT's asserted claims. Defendants also asserted twelve counterclaims against IGT, including counterclaims for a declaratory judgment of non-infringement, invalidity, unenforceability of the asserted patents, antitrust violations, unfair competition, and intentional interference with prospective business advantage. IGT denies these allegations. On February 25, 2008, pursuant to a stipulation by the parties, the court dismissed without prejudice all claims, counterclaims and affirmative defenses related to US Patent numbers 6,832,958, 6,319,125, 6,244,958, 6,565,434, and 6,620,046. Trial is scheduled for May 2009.

Table of Contents

On September 5, 2006, Bally Gaming, Inc. filed a complaint in US District Court for the District of Nevada alleging that IGT is infringing US Patent No. 7,100,916, entitled Indicator Wheel System. The products named in the complaint are IGT's gaming machines with wheel features, including, without limitation, *Wheel of Fortune*®, *Wheel of Gold*®, *The Addams Family*, *American Bandstand*®, *The Apprentice*, *Dilbert's Wheelbert*, *Drew Carey Great Balls of Cash*, *Elvira*®, *I Dream of Jeannie*, *I Love Lucy*, *Indiana Jones: Raiders of the Lost Ark*, *M*A*S*H**, *Megabucks*® with *Morgan Fairchild*, *Regis On the Town*, *Sinatra* and *The Twilight Zone*® gaming machines. The lawsuit seeks unspecified monetary damages and an injunction. On October 6, 2006, IGT filed an answer and counterclaims denying infringement and seeking a declaration that the patent is invalid and non-infringed. IGT intends to vigorously defend this lawsuit. Discovery is closed. Both parties have filed summary judgment motions.

Aristocrat

On June 30, 2005, Aristocrat Technologies Australia PTY Ltd. filed a patent infringement lawsuit against IGT. The complaint was served on IGT on December 13, 2005. Aristocrat alleged that IGT willfully infringed US Patent No. 6,093,102. Aristocrat alleged that the patent covered its Reel Power® video slot technology and IGT's *Multiway*® video slot games. The lawsuit sought unspecified damages and an injunction. On January 13, 2006, Aristocrat filed a First Amended Complaint adding Aristocrat Technologies, Inc. as a plaintiff. On April 20, 2007, the US District Court for the District of Nevada issued an order granting summary judgment in favor of IGT declaring the Aristocrat patent invalid. Summary judgment was entered in favor of IGT on April 23, 2007. Aristocrat appealed the decision to the US Court of Appeals for the Federal Circuit. The Federal Circuit affirmed the judgment in IGT's favor on March 28, 2008. Aristocrat requested a rehearing en banc, which was denied. The deadline for Aristocrat to file a petition for certiorari in the United States Supreme Court is currently September 18, 2008.

On June 12, 2006, Aristocrat Technologies Australia PTY Ltd. and Aristocrat Technologies, Inc. filed a patent infringement lawsuit against IGT. Aristocrat alleged that IGT willfully infringed US Patent No. 7,056,215, which issued on June 6, 2006. On December 15, 2006, Aristocrat filed an amended complaint, adding allegations that IGT willfully infringed US Patent No. 7,108,603, which issued on September 19, 2006. The IGT products named in the original and amended complaints were the *Fort Knox*® mystery progressive slot machines. On June 13, 2007, the US District Court for the Northern District of California entered an order granting summary judgment in favor of IGT declaring both patents invalid. Aristocrat appealed to the US Court of Appeals for the Federal Circuit. A decision is pending.

Brochu v. Loto Quebec

Loto Quebec commenced an action in warranty against VLC, Inc., a wholly-owned subsidiary of IGT, and another manufacturer of video lottery machines in October 2003, in the Superior Court of the Province of Quebec, District of Quebec, seeking indemnification for any damages that may be awarded against Loto Quebec in a class action suit, also filed in the Superior Court of the Province of Quebec. The class action claim against Loto Quebec, to which neither IGT nor any of its affiliates are parties, was filed by Jean Brochu on behalf of himself and a class of other persons who allegedly developed pathological behaviors through the play of video lottery machines made available by Loto Quebec in taverns and other public locations. In this action, the plaintiff seeks to recover on behalf of the class damages of approximately CAD\$578.7 million, representing CAD\$4,863 per class member, and CAD\$119.0 million in punitive damages. Loto Quebec filed its Plea in Defense in the main action in February 2006. The Superior Court adjourned the trial date scheduled for late 2007 pending a decision by the Court of Appeals of the Superior Court's ruling regarding the class action time period. The Superior Court scheduled the trial to commence on September 15, 2008. On August 1, 2008, Loto Quebec filed a discontinuance of the action in warranty against VLC. Notwithstanding the discontinuance, Loto Quebec may still pursue the claims it asserted, or could have asserted, in the action in warranty through arbitration against VLC.

Environmental Matters

Colorado Central Station Casino (CCSC), a casino operation sold by IGT in April 2003, is located in an area that has been designated by the Environmental Protection Agency (EPA) as an active Superfund site because of contamination from historic mining activity in the area. In order for Anchor Coin, an entity IGT acquired in December 2001, to develop the CCSC site, it voluntarily entered into an administrative order of consent with the EPA to conduct soil removal and analysis (a requirement imposed on similarly situated property developers within the region) in conjunction with re-routing mine drainage. The work and obligations contemplated by the agreement were completed by Anchor Gaming (Anchor) in June 1998, and the EPA subsequently issued a termination of the order.

Table of Contents

The EPA, together with other property developers excluding CCSC, continues remediation activities at the site. While we believe our remediation obligations are complete, it is possible that additional contamination may be identified and we could be obligated to participate in remediation efforts. Under the guidance in Statement of Position 96-1, *Environmental Remediation Liabilities*, we determined the incurrence of additional remediation costs is neither probable nor reasonably estimable and no liability is recorded at this time.

Miller

In June 2003, a class action lawsuit was filed in Clark County, Nevada, District Court against Acres Gaming Inc. (Acres) and its directors, entitled Paul Miller v. Acres Gaming Incorporated, et al. The complaint alleged that Acres directors breached their fiduciary duties to their stockholders in connection with the approval of the merger transaction between Acres and IGT and sought to enjoin and/or void the merger agreement among other forms of relief. On September 19, 2003, the Court denied plaintiff's motion for a temporary restraining order to prevent Acres stockholders from voting on the merger. On September 24, 2003, plaintiff petitioned the Nevada Supreme Court to vacate the denial of the temporary restraining order and to enjoin Acres from holding its stockholder vote on the merger. The Nevada Supreme Court denied the petition on September 25, 2003.

On November 5, 2003, the plaintiff amended his complaint to recover damages. On December 23, 2003, defendants filed a motion to dismiss plaintiff's second amended complaint for failure to state a claim on which relief may be granted. On May 7, 2004, the Court issued an order denying defendants' motion to dismiss.

Pursuant to stipulation of the parties, plaintiff filed a third amended complaint on September 9, 2004. Defendants filed a motion to dismiss the third amended complaint on September 14, 2004. On March 15, 2006, the Court issued an order denying defendants' motion to dismiss the third complaint. On April 7, 2006, defendant filed a Notice of Removal to US District Court for the District of Nevada (Las Vegas). Plaintiff filed a motion to remand the action to state court, which was granted by order dated August 15, 2006. On November 30, 2006, the case was transferred to business court and discovery continues. Plaintiff filed a motion for class certification on October 5, 2007, which was denied by decision dated December 4, 2007. Plaintiff filed a petition for Writ of Mandamus, or in the alternative, prohibition in March, 2008 seeking to have the Nevada Supreme Court vacate the District Court's order denying class certification. On May 9, 2008, the Nevada Supreme Court denied plaintiff's petition. In August 2008, the parties to this action entered into a Stipulation for Dismissal with Prejudice as to All Parties.

OSHA / Wrongful Termination Matter

On July 8, 2004, two former employees filed a complaint with the US Department of Labor, Occupational Safety and Health Administration (OSHA), alleging retaliatory termination in violation of the Sarbanes-Oxley Act of 2002. The former employees allege that they were terminated in retaliation for questioning whether Anchor and its executives failed to properly disclose information allegedly affecting the value of Anchor's patents in connection with IGT's acquisition of Anchor in December 2001. The former employees also allege that the acquired patents are overvalued on the financial statements of IGT. Outside counsel, retained by an independent committee of our Board of Directors, reviewed the allegations and found them to be entirely without merit.

On November 10, 2004, the employees withdrew their complaint filed with OSHA and filed a notice of intent to file a complaint in federal court. On December 1, 2004, a complaint was filed under seal in the US District Court for Nevada, based on the same facts set forth above regarding

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

their OSHA complaint. IGT filed a motion for summary judgment as to all claims in plaintiffs' complaint. On June 14, 2007, the US District Court for the District of Nevada entered an order granting summary judgment in favor of IGT as to plaintiffs' Sarbanes-Oxley whistle-blower claims and dismissed their state law claims without prejudice. Plaintiffs' motion for reconsideration of the District Court's decision was denied. Plaintiffs appealed to the US Court of Appeals for the Ninth Circuit. Appellate briefing has been completed. Oral argument has not been scheduled.

In conjunction with the Anchor acquisition purchase price allocation as of December 31, 2001, IGT used the relief of royalty valuation methodology to estimate the fair value of the patents at \$164.4 million. The carrying value of the patents at June 30, 2008 totaled \$71.2 million, with a remaining life of approximately 8 years.

Table of Contents

Arrangements with Off-Balance Sheet Risks

In the normal course of business, we are party to financial instruments with off-balance sheet risk, such as performance bonds, guarantees and product warranties not reflected in our balance sheet. We do not expect any material losses to result from these arrangements, and we are not dependent on off-balance sheet financing arrangements to fund our operations.

Performance Bonds

Performance bonds outstanding related to gaming operations totaled \$6.5 million at June 30, 2008. We are liable to reimburse the bond issuer in the event of exercise due to nonperformance.

Letters of Credit

Outstanding letters of credit issued under our line of credit to ensure payment to certain vendors and governmental agencies totaled \$4.1 million at June 30, 2008.

IGT Licensor Arrangements

Our sales agreements that include software and IP licensing arrangements may provide a clause whereby IGT indemnifies the third party licensee against liability and damages (including legal defense costs) arising from any claims of patent, copyright, trademark or trade secret infringement. Should such a claim occur, we could be required to make payments to the licensee for any liabilities or damages incurred. Historically, we have not incurred any significant costs due to infringement claims. As we consider the likelihood of incurring future costs to be remote, no liability has been recorded.

Product Warranties

The majority of our products are generally covered by a warranty for periods ranging from 90 days to one year. We estimate accrued warranty costs in the table below based on historical trends in product failure rates and expected costs to provide warranty services.

Nine Months Ended June 30,

2008

2007

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

(In millions)

Balance at beginning of fiscal year	\$	8.7	\$	8.3
Reduction for payments made		(6.9)		(6.8)
Accrual for new warranties issued		8.5		9.3
Adjustments for pre-existing warranties		(0.7)		(1.5)
Ending balance	\$	9.6	\$	9.3

Self-Insurance

We are self-insured for various levels of workers' compensation, directors' and officers' liability, and electronic errors and omissions liability, as well as employee medical, dental, prescription drug, and disability coverage. We purchase stop loss coverage to protect against unexpected claims. Accrued insurance claims and reserves include estimated settlements for known claims, and actuarial estimates of claims incurred but not reported.

Taxes

We are subject to sales, use, income, gaming and other tax audits and administrative proceedings in various US federal, state, local and foreign jurisdictions. While we believe we have properly reported our tax liabilities in each jurisdiction, we can give no assurance that taxing authorities will not propose adjustments that increase our tax liabilities.

Table of Contents

14. Foreign Currency Derivatives

Subsidiary Operations

Net foreign currency exposure related to monetary assets and liabilities denominated in nonfunctional currency decreased to \$44.2 million at June 30, 2008 from \$73.9 million at September 30, 2007 primarily due to reduced inter-company liabilities. The notional amount of foreign currency contracts hedging this exposure totaled \$37.6 million at June 30, 2008 and \$63.6 million at September 30, 2007. These forward contracts were recorded as a fair value asset of \$0.8 million at June 30, 2008 and a fair value liability of \$3.3 million at September 30, 2007.

Investment in CLS

Additionally, during the third quarter of fiscal 2007 we executed 5-year forward contracts designated as SFAS 133 foreign currency fair value hedges to protect most of the US dollar value of our Hong Kong dollar investment in the CLS convertible note (See Note 2). The notional amount of foreign currency contracts hedging this exposure totaled \$49.9 million. We recorded a fair value asset of \$0.5 million at June 30, 2008 and \$0.2 million at September 30, 2007. There was no ineffectiveness during the nine months ended June 30, 2008.

15. Business Segments

We view our business in two operating segments, each incorporating all types of revenues:

- ♣ North America includes our operations in the US and Canada
- ♣ International encompasses our efforts in all other jurisdictions worldwide

We measure segment profit on the basis of operating income. Certain income and expenses related to company-wide initiatives are managed at the corporate level and not allocated to any operating segment. We do not recognize inter-company revenues or expenses upon the transfer of gaming products between operating segments. Segment accounting policies are consistent with those of our consolidated financial statements.

Our business segments are designed to allocate resources within a framework of management responsibility. Operating costs from one segment may benefit other segments. We continually evaluate the alignment of our business development and administrative functions for reporting purposes, which may result in changes to segment allocations.

Item 2. Management's Discussion and Analysis Of Financial Condition and Results of Operations

FORWARD LOOKING STATEMENTS

This report contains statements that do not relate to historical or current facts, but are forward looking statements within the meaning outlined in the Private Securities Litigation Reform Act of 1995. These statements relate to analyses and other information based on forecasts of future results and estimates of amounts not yet determinable. These statements may also relate to future events or trends, our future prospects and proposed new products, services, developments or business strategies, among other things. These statements can generally (although not always) be identified by their use of terms and phrases such as anticipate, believe, could, would, estimate, expect, intend, may, plan, predict, project, pursue, will, continue, and other similar terms and phrases, as well as the use of the future tense.

Examples of forward looking statements in this report include, but are not limited to, the following categories of expectations about:

- ♣ our ability to introduce new products and their impact on replacement demand
- ♣ the timing, features, benefits, and expected success of new product introductions
- ♣ growth of our business through technology and intellectual property (IP) acquisition
- ♣ our leadership position in the market
- ♣ the advantages offered to customers by our anticipated products and product features
- ♣ gaming growth, expansion, and new market opportunities
- ♣ fluctuations in future gross margins and tax rates
- ♣ increasing product sales or machine placements
- ♣ legislative or regulatory developments and related market opportunities
- ♣ available capital resources to fund future operating requirements, capital expenditures, payment obligations, and share repurchases
- ♣ timing and amount of future share repurchases and dividends
- ♣ expectations regarding losses from off-balance sheet arrangements
- ♣ financial returns to shareholders related to management of our costs

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

Actual results could differ materially from those expressed or implied in our forward looking statements. Our future financial condition and results of operations, as well as any forward looking statements, are subject to change and to inherent known and unknown risks and uncertainties. See Item 1A, Risk Factors, in this report for a discussion of these and other risks and uncertainties. You should not assume at any point in the future that the forward looking statements in this report are still valid. We do not intend, and undertake no obligation, to update our forward looking statements to reflect future events or circumstances.

OVERVIEW

The following Management's Discussion and Analysis (MDA) is intended to enhance the reader's understanding of our operations and current business environment. It should be read in conjunction with our Annual Report on Form 10-K for the year ended September 30, 2007.

Italicized text with an attached superscript trademark or copyright notation in this document indicates trademarks of IGT or its licensors. For a complete list of trademark and copyright ownership information, please visit our website at www.IGT.com.

International Game Technology is a global company specializing in the design, manufacture, and marketing of computerized gaming equipment, network systems, licensing and services. We are a leading supplier of gaming products to the world, providing a diverse offering of quality products and services at competitive prices that are designed to increase the potential for operator profits by serving players better.

Our annual revenues totaled \$2.6 billion in fiscal 2007. We operate in two segments, North America and International, with certain unallocated company-wide income and expenses managed at the corporate level. International continues to be a growing contributor, constituting 20% of operating income in fiscal 2007. See BUSINESS SEGMENT RESULTS below and Note 15 of our Unaudited Condensed Consolidated Financial Statements for additional segment information and current quarter financial results.

We are currently operating in a difficult domestic environment. The combination of limited opportunities from new or expanding properties, lower replacement demand, improved competition and economic uncertainty has negatively impacted our North America results. Our gaming operations business has also been affected by lower interest rates, which increase jackpot funding costs. In the face of these challenges, we remain focused on strategic initiatives that we believe will maintain our status as a leading provider of innovative gaming products and services.

Our current product development efforts reflect our commitment to the future of gaming industry technology as our business model continues to evolve toward a more systems-centric, networked gaming environment. In support of the networked gaming environment we released several new machine models during the current quarter, and expect to see more new releases in the fourth quarter of fiscal 2008. The timing of revenues from these releases remains dependent, in part, on our customers' capital spending, which may be adversely impacted by current economic conditions. We remain on track for initial deployment of our server-based (*sb*TM) applications in 2009, and expect to realize a meaningful financial benefit from *sb*TM technology beginning in fiscal 2010 as we further differentiate IGT gaming products by offering operators new ways to engage and interact with players.

We believe market opportunities may arise as operators expand in existing markets and from political action as governments continue to look to gaming to provide tax revenues in support of public programs. In the third quarter, we saw new openings or expansions in a number of domestic jurisdictions including Indiana, Oklahoma and Nevada. During the first half of the year, California voters approved new tribal compacts for 17,000 additional slot machines, and Florida voters approved an additional 6,000 machines for three pari-mutuel facilities in Miami-Dade County. In November, voters in Maryland will have the opportunity to vote on a ballot proposal to legalize up to 15,000 gaming machines at five locations in that state. We also expect to benefit from further gaming expansion in international markets, especially in Southeast Asia.

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

We continue to utilize our capital for strategic business combinations and acquisitions of important technologies and IP. We anticipate our acquisition of Million-2-1 may establish new markets and channels for our game content in the mobile gaming business. Additionally, we believe the July 2008 Cyberview Technologies, Inc. (Cyberview) asset purchase and license agreement will enable more immediate access to the fixed odds betting market in the United Kingdom (UK), further strengthen our IP portfolio and enhance our *sb*TM initiatives. We also remain focused on other capital deployment objectives including investments and alliances to expand our geographic reach, product lines and customer base. We also expect to be prudent and opportunistic in using our available liquidity to return value to our shareholders through continued share repurchases and dividends.

As we move forward in this challenging operating environment, we intend to manage our costs at a level that enables us to deliver innovative products while maximizing financial returns to shareholders.

RECENTLY ISSUED ACCOUNTING STANDARDS

See Note 1 of our Unaudited Condensed Consolidated Financial Statements for information regarding recently issued accounting standards that may materially impact IGT upon adoption.

CRITICAL ACCOUNTING ESTIMATES

Our consolidated financial statements were prepared in conformity with accounting principles generally accepted in the United States (US). Accordingly, we are required to make estimates incorporating judgments and assumptions we believe are reasonable based on our historical experience, contract terms, observance of known trends in our company and the industry as a whole, as well as information available from other outside sources. Our estimates affect amounts recorded in the financial statements and actual results may differ from initial estimates.

We consider the following accounting estimates to be the most critical to fully understanding and evaluating our reported financial results. They require us to make subjective or complex judgments about matters that are inherently uncertain or variable. Senior management discussed the development, selection and disclosure of the following accounting estimates, considered most sensitive to changes from external factors, with the Audit Committee of our Board of Directors:

- ♣ goodwill, other intangible assets, and royalties
- ♣ jackpot liabilities and expenses
- ♣ inventory and gaming operations equipment
- ♣ share-based compensation
- ♣ income taxes

For a discussion of our critical accounting estimates, please refer to MDA in our Annual Report on Form 10-K for the year ended September 30, 2007. Except for income tax estimates related to the adoption of Financial Accounting Standards Board (FASB) Interpretation No. (FIN) 48 described below, we have made no significant changes to our critical accounting estimates since September 30, 2007.

We adopted the provisions of FIN 48, *Accounting for Uncertainty in Income Taxes - an interpretation of FASB Statement No. 109*, during the first quarter of fiscal 2008. This pronouncement provides a financial statement recognition threshold and measurement attribute for tax positions taken or expected to be taken in a tax return. Under FIN 48, we may recognize a tax benefit from an uncertain position only if it is more likely than not that the position will be sustained upon examination by taxing authorities based on the technical merits of the issue. The amount recognized in the financial statements is the largest benefit that we believe has greater than a 50% likelihood of being realized upon settlement. The implementation of FIN 48 as of the beginning of fiscal 2008 increased our unrecognized tax benefits by \$89.9 million, increased deferred tax assets by \$55.4 million and decreased retained earnings by \$34.5 million. See Note 11 of our Unaudited Condensed Consolidated Financial Statements for additional information about FIN 48 and the impact of adoption.

We exercise significant judgment when evaluating our uncertain tax positions and the related tax benefits. Although we believe our assumptions are reasonable, there is no guarantee that the final outcome of the related matters will not differ from the amounts reflected in our historical income tax provisions and accruals. We adjust our reserves for uncertain tax positions based on changes in facts and circumstances such as the closing of a tax audit or changes in estimates. Our income tax provision may be impacted to the extent that the final outcome of these tax positions is different than the amounts recorded. As of June 30, 2008, our net unrecognized tax benefits totaled \$138.1 million, \$90.5 million of which would impact the effective tax rate if recognized.

Diluted EPS		\$ 0.35		\$ 0.41		\$ (0.06)	-15%		\$ 0.92		\$ 1.14		\$ (0.22)	-19%

Consolidated results decreased during the current periods compared to the same periods in fiscal 2007 due to weak North America replacement sales demand and lower gaming operations play levels amid unfavorable economic conditions. Comparability for the first nine months was also significantly affected by:

- ♣ prior year gains from hurricane insurance settlements and an airplane sale
- ♣ interest rate declines impacting jackpot expense
- ♣ favorable foreign currency exchange rates

Consolidated Gaming Operations

Despite continued growth in our installed base of recurring revenue machines, revenues were down compared to the prior year primarily due to lower play levels in North America. Additionally, our installed base growth is increasingly from stand-alone lease and central determination system (CDS) units which generally provide lower revenues and gross profit per unit compared to wide area progressive (WAP) units. International revenue and gross profit improvements partially offset declines in North America reflecting the increasing geographic footprint of

our gaming operations.

In addition, year to date gross profit and margin were adversely affected by technological obsolescence charges of \$10.4 million related to the transition toward new products, as well as the prior year hurricane property insurance gain of \$5.0 million.

Consolidated Product Sales

Total product sales revenues and gross profit were down from the same prior year periods primarily due to fewer machine shipments across most markets. Gross margin improvements were due to a favorable product and jurisdictional mix, including a greater contribution from non-machine sales. IGT increased systems installations from the prior year quarter by nearly 100, with 790 systems installed worldwide as of June 30, 2008. Product sales margins are expected to continue to fluctuate depending on the geographic mix and types of products sold.

Operating Expenses

	Quarters Ended June 30,		Favorable (Unfavorable)		Nine Months Ended June 30,		Favorable (Unfavorable)	
	2008	2007	Amount	%	2008	2007	Amount	%
<i>(In millions)</i>

Depreciation and amortization	18.9	22.0	3.1	14%	56.7	60.4	3.7	6%
Total	\$ 200.7	\$ 180.3	\$ (20.4)	-11%	\$ 555.4	\$ 501.3	\$ (54.1)	-11%
Percent of revenues	30 %	26 %			29 %	26 %		

Operating expenses were impacted during the periods by:

♣ additional staffing costs of \$9.1 million during the quarter and \$18.2 million year to date in support of sales and development initiatives

♣ unfavorable fluctuations in bad debt provisions of \$6.4 million for the quarter and \$13.0 million for the first nine months related to credit concerns on certain notes and contracts

Comparability for the nine months was also affected by prior year gains of \$12.0 million from the Gulf Coast hurricane business interruption insurance settlement and \$5.8 million from the sale of a company airplane.

Other Income (Expense) and Taxes

	Quarters Ended June 30,		Favorable (Unfavorable)		Nine Months Ended June 30,		Favorable (Unfavorable)

Total other income (expense)	\$ (5.3)	\$ 0.1	\$ (5.4)	*	\$ (21.7)	\$ 6.7	\$ (28.4)	*

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

Income tax provision	\$ 73.4	\$ 80.0	\$ 6.6	\$ 197.2	\$ 225.0	\$ 27.8
Tax rate	40.4%	37.0%	(3.4) pp	40.4%	36.8%	(3.6) pp

WAP interest income and expense related to previous jackpot winners accrete at approximately the same rate. WAP interest income also includes earnings on restricted cash and investments held for future winners.

The fluctuation in other income (expense) for the quarter and year to date period was primarily attributable to higher interest expense resulting from increased borrowings under our credit facility compared to fiscal 2007. In addition, interest income was down for the year to date period due to lower investment balances and interest rates compared to the same period of fiscal 2007.

Our current year tax provision includes additional amounts related to unrecognized tax benefits in connection with the adoption of FIN 48, as well as discrete items affecting the rate. Our future effective tax rates may continue to be volatile due to changes in uncertain tax positions.

BUSINESS SEGMENT RESULTS - A Year Over Year Comparative Analysis

Operating income for each division reflects applicable operating expenses. See Note 15 of our Unaudited Condensed Consolidated Financial Statements for additional business segment information.

Operating income	\$ 181.2	\$ 199.0	\$ (17.8)	-9%	\$ 470.2	\$ 588.8	\$ (118.6)	-20%	
Operating margin	34%	38%	(4) pp	-11%	33%	39%	(6) pp	-15%	

North America operating results during the current periods were unfavorably affected by lower gaming operations play levels and interest rate declines in the midst of the current economic downturn, as well as continued softness in replacement demand. Operating income was also down compared to the prior year periods due to higher operating expenses as previously discussed.

North America Gaming Operations

Gaming operations revenues and gross profit declined from the prior year periods due to lower play levels, as well as the continued shift in our installed base. With 80% of our installed base made up of variable fee units, a significant portion of our revenues fluctuate directly with casino play levels. Thus, the declines in gaming revenue reported for many US gaming markets adversely affected our gaming operations. In addition, our increasing mix of stand-alone lease and CDS units compared to WAP units also contributed to the decline in revenues. These non-WAP units generally provide lower revenues and gross profit mainly because they carry no IGT sponsored jackpots.

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

Year to date gaming operations gross profit and margin also declined due to technological obsolescence charges of \$5.3 million and increased costs to fund jackpots, as well as the prior year gain of \$5.0 million from hurricane property insurance. These increases were partially offset by lower royalties.

Jackpot expense was negatively impacted compared to the prior year periods by \$6.0 million during the quarter and \$22.8 million for the first nine months of fiscal 2008 due to declining interest rates. This year-over-year impact includes \$13.4 million related to the revaluation of future winner liabilities, most significantly influenced by the 200 basis point decline in the prime rate during the second quarter. The additional cost due to interest rates was substantially offset by fewer WAP units and variations in slot play, for a net increase to jackpot expense of \$1.0 million over the third quarter last year and \$3.0 million for the nine month period.

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

See MDA CRITICAL ACCOUNTING ESTIMATES Jackpot Liabilities and Expenses in our Annual Report on Form 10-K for the year ended September 30, 2007 for additional details regarding the factors affecting jackpot expense.

North America Product Sales

Product sales revenues and gross profit improved during the quarter mainly due to increased systems and IP royalties. Machine revenues reflect an increase in the mix of our premium-priced *Advanced Video Platform (AVP®)*, which offset the effect of fewer units sold compared to the third quarter of fiscal 2007. The decline in gross margin for the quarter is primarily attributable to the increased share of *AVP®* machines which provide higher gross profit, but lower margins.

Product sales revenues and gross profit were down year to date primarily due to fewer units on low replacement demand, partially offset by higher IP royalties and systems sales. The decline in gross margin relates to a higher mix of *AVP®* sales.

Unit shipments continued to be affected by low replacement demand, but new unit shipments increased during the quarter due to new and expanded casinos in several jurisdictions. New unit shipments were 8,600 during the third quarter of fiscal 2008 compared to 6,400 in the prior year quarter and 15,000 during the first nine months of fiscal 2008 versus 16,800 in fiscal 2007. Replacement sales consisted of 3,600 units during the current quarter compared to 6,400 in the third quarter of fiscal 2007 and 11,100 during the first nine months of fiscal 2008 compared to 17,900 in the same prior year period.

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

Operating income	\$ 41.3	\$ 51.7	\$ (10.4)	-20%	\$ 128.5	\$ 114.1	\$ 14.4	13%
Operating margin	28%	28%	- pp	-	28%	26%	2 pp	8%

International operating results declined for the quarter as a result of fewer unit sales. Declines in Japan and the UK during the current nine months were offset by a favorable mix of product sales and continued growth in gaming operations. Revenues significantly benefited during the current quarter and nine months from favorable exchange rates. Total gross margin increased during the periods as improvements in product sales outweighed gaming operations declines. Operating income for the current periods included higher operating expenses, primarily staffing costs and bad debt provisions.

Improved gaming operations revenues during the current periods were primarily the result of increased internet gaming revenues and a growing international installed base. Gaming operations gross profit and margins were negatively impacted by a higher contribution from units with lower revenue and gross profit yields, as well as \$5.1 million in technological obsolescence charges during the nine month period.

Product sales revenues and gross profit were down during the quarter due to fewer unit shipments, primarily in Japan. During the first nine months of fiscal 2008, we realized improvements in product sales gross profit compared to the prior year as increased sales volume and improved product mix in our higher-priced, higher-margin casino markets more than offset declines in unit shipments in the lower-priced, lower-margin markets of Japan and the UK. Additionally, non-machine sales increased substantially as compared to the first nine months of fiscal 2007 with increased sales of parts and systems. Margin improvement was attributable to the favorable mix of non-machine sales, as well as fewer low margin units sold in Japan.

LIQUIDITY AND CAPITAL RESOURCES

Sources of Liquidity

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

At June 30, 2008, our principal sources of liquidity were cash and equivalents and cash from operations. Other sources of capital include, but are not limited to, the issuance of public or private placement debt, bank credit facilities and the issuance of equity securities. Based on past performance and current expectations, we believe our cash and equivalents, cash from operations and available bank credit facilities will satisfy our working capital needs, capital expenditures, and other liquidity requirements associated with our existing operations for the foreseeable future.

Restricted cash and investments, as well as jackpot annuity investments are amounts available only for funding jackpot winner payments. Unrestricted cash and equivalents and marketable securities are summarized below.

Unrestricted Cash/Equivalents and Investment Securities <i>(In millions)</i>	June 30, 2008	September 30, 2007	Increase (Decrease)
Cash and equivalents	\$ 274.3	\$ 261.3	\$ 13.0
Short-term investment securities	-	51.3	(51.3)
Long-term investment securities	20.5	-	20.5
Total	\$ 294.8	\$ 312.6	\$ (17.8)

The decrease in total unrestricted cash and investments at June 30, 2008 was primarily the result of lower cash from operations described below. Working capital increased to \$779.0 million at June 30, 2008 from \$595.5 million at September 30, 2007, primarily due to the accrual of an \$80.0 million senior credit facility draw requested and not yet funded, and increased prepaid licensing rights and inventories.

Our long-term investment securities at June 30, 2008 were AAA rated auction rate securities (ARS), collateralized by student loans guaranteed by the US government. As a result of auction failures in early 2008, these investments are not currently trading and have no readily determinable market value. There has been no interruption in interest receipts on these investments and we have the ability to hold them until the market recovers. Based on our assessment of fair value, we have recorded a temporary impairment of \$1.1 million to other comprehensive income. See Note 7 of our Unaudited Condensed Consolidated Financial Statements for additional information about our ARS.

Cash Flows Summary

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

Nine Months Ended June 30, <i>(In millions)</i>	2008		2007		Favorable (Unfavorable)
Operations	\$	360.7	\$	564.9	\$ (204.2)
Investing		(226.5)		(224.8)	(1.7)
Financing		(125.6)		(406.1)	280.5
Effects of exchange rates		4.4		(4.5)	8.9
Net change in cash	\$	13.0	\$	(70.5)	\$ 83.5

Operating cash flows

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

Reduced operating cash flows during the first nine months of fiscal 2008 compared to the same period last year were primarily the result of lower net income, additional prepayments to secure long-term licensing rights, increased inventories and reduced liabilities. These reductions were partially offset by lesser net changes in operating receivables and jackpot liabilities.

The increase in operating receivables resulted in a reduction to operating cash flows of \$11.5 million since the end of fiscal 2007. Average days sales outstanding for the trailing twelve months at June 30, 2008 increased to 85 days from 79 days last year, primarily due to the issuance of additional long-term customer contract and loan financing.

The increase in inventory resulted in a \$48.2 million reduction to operating cash flows during the nine months ended June 30, 2008. Inventory turns for the trailing twelve months at June 30, 2008 decreased to 2.9 versus 4.1 at June 30, 2007, impacted mostly by inventory build-up for the release of newer and more costly platforms and cabinets, as well as the continued support of legacy platforms.

Decreased accounts payable and accrued liabilities caused a reduction to operating cash flows of \$78.2 million during the first nine months of fiscal 2008 and included \$52.4 million of interest paid. Accrued interest payable totaled \$6.9 million at June 30, 2008 versus \$12.2 million at September 30, 2007.

Cash flows related to jackpot liabilities fluctuate based on the timing of jackpots and winner payments, volume of play, and market variations in applicable interest rates as described in Note 1 of our Consolidated Financial Statements in our most recent Form 10-K.

Investing cash flows

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

Reduced capital expenditures, summarized below, during the first nine months of fiscal 2008 are primarily attributable to the completion of our Las Vegas campus construction project, as well as fewer additions to our gaming operations installed base.

Nine Months Ended June 30, <i>(In millions)</i>	2008	2007	Increase (Decrease)
Property, plant and equipment	\$ 78.4	\$ 103.6	\$ (25.2)
Gaming operations equipment	134.1	144.3	(10.2)
Intellectual property	9.1	12.2	(3.1)
Total	\$ 221.6	\$ 260.1	\$ (38.5)

Net proceeds from the sale of investment securities during the first nine months of fiscal 2008 were mostly offset by restricted cash requirements. During the same period, we further invested in gaming technologies with payments of:

- ♣ \$15.0 million for additional equity interests in Walker Digital and our CLS joint venture
- ♣ \$3.0 million to acquire additional equity in Digideal
- ♣ \$9.6 million, net of cash acquired, to purchase the UK based mobile gaming firm of Million-2-1

Additionally, we paid approximately \$85.0 million in July 2008 to acquire substantially all of the assets and licensing rights to certain IP of Cyberview, a UK based provider of server-based downloadable gaming systems.

Financing cash flows

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

The reduction in cash used for financing during the current nine months was primarily due to fewer share repurchases and greater net debt proceeds with increased line of credit borrowings on our senior credit facility. During the first nine months of fiscal 2008, we increased the outstanding balance on our revolving lines of credit by \$475.4 million, largely for the purpose of repurchasing IGT common stock. We have \$1.4 billion available on

our senior credit facility and \$46.3 million available on foreign credit facilities. See Note 9 of our Unaudited Condensed Consolidated Financial Statements for additional information about our credit facilities.

Share Repurchases

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

We repurchase IGT common stock to return value to shareholders and reduce outstanding share dilution. We use open market or privately negotiated transactions, such as accelerated share repurchases and structured share repurchases, or Rule 10b5-1 trading plans, depending on market conditions and other factors to achieve timing, cost and volume objectives.

Share Repurchases <i>(In millions)</i>	Quarters Ended June 30,		Nine Months Ended June 30,	
	2008	2007	2008	2007
Shares	8.1	6.4	13.9	14.6
Aggregate cost	\$ 265.9	\$ 248.8	\$ 510.9	\$ 611.5

Additional repurchases from June 30, 2008 through August 5, 2008 totaled 9.4 million shares for an aggregate cost of \$222.4 million. Our remaining repurchase authorization totaled 9.9 million shares as of August 5, 2008.

Financial Condition

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

<i>(In millions)</i>	June 30, 2008	September 30, 2007	Increase (Decrease)
Assets	\$ 4,516.0	\$ 4,167.5	\$ 348.5
Liabilities	3,335.0	2,714.8	620.2
Stockholders' equity	1,181.0	1,452.7	(271.7)

Assets increased primarily due to additional long-term licensing arrangements, the draw on our credit facility, and tax asset increases related to the adoption of FIN 48. Liabilities increased primarily as a result of additional net borrowings discussed above and the adoption of FIN 48, partially offset by reductions in accrued liabilities. See Note 11 of our Unaudited Condensed Consolidated Financial Statements for additional information about the adoption of FIN 48.

Stockholders' equity decreased during the first nine months of fiscal 2008 due to share repurchases, dividends paid and the adoption of FIN 48, partially offset by current period earnings and additional paid-in capital (APIC) related to employee stock plans. Although total stockholders' equity was unaffected by 400.0 million treasury shares retired in December 2007, it decreased treasury stock by \$3.7 billion, APIC by \$0.9 billion and retained earnings by \$2.8 billion.

Contractual Obligations and Commercial Commitments

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

Except for the items described below, our contractual obligations and commercial commitments have not changed materially since those presented in our Annual Report on Form 10-K for the fiscal year ended September 30, 2007.

As described above under CRITICAL ACCOUNTING ESTIMATES and in Note 11 of our Unaudited Condensed Consolidated Financial Statements, we adopted the provisions of FIN 48 during the first quarter of fiscal 2008. At this time, we cannot reasonably estimate the timing of cash settlements with taxing authorities related to our net liability for unrecognized tax benefits of \$138.1 million at June 30, 2008.

We increased the net borrowings on our revolving lines of credit by \$475.4 million for an outstanding balance of \$1.1 billion at June 30, 2008. See Note 9 of our Unaudited Condensed Consolidated Financial Statements for additional information about our credit facilities.

Our unfunded loan commitments for customer development financing increased from \$88.0 million at September 30, 2007 to \$141.0 million at June 30, 2008. We expect to fund \$33.5 million in the remainder of fiscal 2008 and \$107.5 million in fiscal 2009. See Note 7 of our Unaudited Condensed Consolidated Financial Statements for additional information about unfunded loans.

In January 2008, we committed to pay Walker Digital Gaming, LLC an additional \$15.0 million annually over the next three years for licensing rights. See Note 2 of our Unaudited Condensed Consolidated Financial Statements for additional information about this arrangement.

In connection with our acquisition of Million-2-1 (M-2-1) in June 2008, we committed to pay earn-out consideration up to a maximum of approximately \$14.8 million payable through fiscal 2011 contingent upon M-2-1 meeting certain financial targets. See Note 5 of our Unaudited Condensed Consolidated Financial Statements for additional information about this acquisition.

Arrangements with Off-Balance Sheet Risks

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

In the normal course of business, we are a party to financial instruments with off-balance sheet risk, such as performance bonds and other guarantees not reflected in our balance sheet. We may provide indemnifications of varying scope and terms to customers, vendors, lessors, business partners and other parties with respect to certain matters, including but not limited to, losses arising:

- ♣ out of our breach of agreements with those parties
- ♣ from services to be provided by us
- ♣ from IP infringement claims made by third parties

Additionally, we have agreements with our directors and certain officers that require us, among other things, to indemnify them against certain liabilities that may arise by reason of their status or service as directors or officers. We have also agreed to indemnify certain former officers and directors of acquired companies. We maintain director and officer insurance, which may cover our liabilities arising from these indemnification obligations in certain circumstances.

It is not possible to determine the maximum potential obligations under these indemnification undertakings due to the limited history of prior indemnification claims and the unique facts and circumstances involved in each particular agreement. Such indemnification undertakings may not be subject to maximum loss clauses. Historically, we have not incurred material costs related to indemnification obligations.

We do not expect any material losses from, nor are we dependent on, off-balance sheet arrangements to fund our operations. See also Note 13 of our Unaudited Condensed Consolidated Financial Statements.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

Except for the changes to our investments in ARS and China LotSynergy Holdings, Ltd. (CLS) below, there have been no material changes in our assessment of sensitivity to market risk since those presented in our Annual Report on Form 10-K, Item 7A, for the fiscal year ended September 30, 2007.

ARS

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

The fair value of our investments in ARS is affected by changes in interest rates and credit markets. With recent global credit and capital market uncertainties, in February 2008 investment banks and brokers were unwilling to purchase ARS when investor demand fell short, causing the ARS auctions to fail. The immediate effect of a failed auction is that holders cannot sell the securities at auction and the interest rate generally resets to a maximum auction rate.

As a result, our ARS currently lack liquidity and we may be unable to liquidate these investments without a loss of principal prior to the underlying long-term debt maturity, unless a future auction is successful or the issuer calls the security. We estimated the fair value of our \$21.6 million par value ARS portfolio at \$20.5 million as of June 30, 2008. See Note 7 of our Unaudited Condensed Consolidated Financial Statements for additional information about our ARS.

Investment in CLS

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

The value of our CLS investments are affected by changes in foreign currency exchange rates of the Hong Kong dollar and the trading price of CLS stock. The market value of our equity investment in CLS stock was \$13.6 million at June 30, 2008 versus \$43.4 million at September 30, 2007.

Additionally, our investment in the CLS 4% convertible note is subject to interest rate risk and volatility in CLS stock prices. Generally, the fair value of fixed-rate instruments increases as interest rates fall and decreases as interest rates rise. The fair value of convertible notes increases as stock price volatility increases. The CLS note had an estimated fair value of \$73.9 million at June 30, 2008 versus \$78.0 million at September 30, 2007. We executed 5-year forward contracts with an aggregate notional amount of \$49.9 million during the third quarter of fiscal 2007 to mitigate foreign currency risk on most of the note. See Notes 2 and 14 of our Unaudited Condensed Consolidated Financial Statements for additional information about our CLS investments and related foreign currency derivatives.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

We maintain disclosure controls and procedures designed to provide reasonable assurance that information required to be disclosed in our periodic reports filed under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified by the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer (CEO) and Principal Financial Officer (PFO), as appropriate, to allow for timely decisions regarding required disclosure. We recognize that any controls and procedures, no matter how well designed and operated, can only provide reasonable assurance of achieving desired control objectives. Judgment is required when designing and evaluating the cost-benefit relationship of potential controls and procedures.

As of the end of the period covered by this report, with the supervision and participation of management, including our CEO and PFO, we evaluated the effectiveness of the design and operation of our disclosure controls and procedures. Based on this evaluation, our CEO and PFO have concluded that, as of the end of such period, our disclosure controls and procedures were effective at the reasonable assurance level.

Changes in Internal Control Over Financial Reporting

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

There were no changes in internal control over financial reporting that occurred during the most recent fiscal quarter that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

For a description of our legal proceedings, see Note 13 of our Unaudited Condensed Consolidated Financial Statements, which is incorporated by reference in response to this item.

Item 1A. Risk Factors

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

With the exception of the first risk factor below, there have been no material changes in our assessment of risk factors affecting our business since those presented in our Annual Report on Form 10-K, Item 1A, for the fiscal year ended September 30, 2007. For convenience, our updated risk factors are included below.

New products require regulatory approval and may be subject to complex revenue recognition standards, which could materially affect our financial results.

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

As we introduce new products and transactions become increasingly complex, additional analysis and judgment is required to account for them and to recognize revenues in accordance with generally accepted accounting principles. These transactions may include multi-element arrangements and/or software components. As our products and transactions change, applicable accounting principles or regulatory product approval delays could change the timing of revenue recognition and could adversely affect our financial results for any given period.

Our ability to operate in our existing markets or expand into new jurisdictions could be adversely affected by changing regulations or problems with obtaining or maintaining needed licenses or approvals.

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

We operate only in jurisdictions where gaming is legal. The gaming industry is subject to extensive governmental regulation by US federal, state and local governments, as well as tribal officials or organizations and foreign governments. While the regulatory requirements vary by jurisdiction, most require:

- ♣ licenses and/or permits
- ♣ findings of suitability
- ♣ documentation of qualifications, including evidence of financial stability
- ♣ other required approvals for companies who manufacture or distribute gaming equipment and services
- ♣ individual suitability of officers, directors, major stockholders and key employees

Any delays in obtaining or difficulty in maintaining regulatory approvals needed for expansion within existing markets or into new jurisdictions can negatively affect our opportunities for growth. Further, changes in existing gaming regulations may hinder or prevent us from continuing to operate in those jurisdictions where we currently do business, which would harm our operating results. In particular, the enactment of unfavorable legislation or government efforts affecting or directed at manufacturers or gaming operators, such as referendums to increase gaming taxes or requirements to use local distributors, would likely have a negative impact on our operations.

Slow growth in the establishment of new gaming jurisdictions or the number of new casinos and declines in the rate of replacement for existing gaming machines could limit or reduce our future profits.

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

Demand for our products is driven substantially by the establishment of new gaming jurisdictions, the addition of new casinos or expansion of existing casinos within existing gaming jurisdictions and the replacement of existing gaming machines. The establishment or expansion of gaming in any jurisdiction typically requires a public referendum or other legislative action. As a result, gaming continues to be the subject of public debate, and there are numerous active organizations that oppose gaming. Opposition to gaming could result in restrictions on or even prohibitions of gaming operations or the expansion of operations in any jurisdiction. In addition, the construction of new casinos or expansion of existing casinos fluctuates with demand, general economic conditions and the availability of financing. The rate of gaming growth in North America has diminished and machine replacements are at historically low levels. Slow growth in the establishment of new gaming jurisdictions or delays in the opening of new or expanded casinos and continued declines in or low levels of demand for machine replacements could reduce the demand for our products and our future profits.

Demand for our products and the level of play of our products could be adversely affected by changes in player and operator preferences.

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

As a supplier of gaming machines, we must offer themes and products that appeal to gaming operators and players. If we are unable to anticipate or react timely to any significant changes in player preferences, such as a negative change in the trend of acceptance of our newest systems innovations or jackpot fatigue (declining play levels on smaller jackpots), the demand for our gaming products and the level of play of our gaming products could decline. Further, our products could suffer a loss of floor space to table games and operators may reduce revenue sharing arrangements, each of which would harm our sales and financial results. In addition, general changes in consumer behavior, such as reduced travel activity or redirection of entertainment dollars to other venues, could result in reduced demand and reduced play levels for our gaming products.

Our business is vulnerable to changing economic conditions and unfavorable economic conditions could reduce our product sales and the play levels of our participation games.

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

Unfavorable changes in general economic conditions including recession, economic slowdown, or higher fuel or other transportation costs, may reduce disposable income of casino patrons or result in fewer patrons visiting casinos. A decline in the relative health of the gaming industry would likely result in a decline in the amount of resources our customers have to purchase our products and services. This may also result in reduced play levels, which would cause our cash flows and revenues from revenue sharing products to decline. Our results are also negatively impacted by decreases in interest rates, as lower interest rates cause an increase in our jackpot expense and a reduction of our investment income.

Our success in the competitive gaming industry depends in large part on our ability to develop and manage frequent introductions of innovative products.

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

The gaming industry is intensely competitive, and many of our competitors have substantial resources and specialize in the development and marketing of their products. Increased competition has negatively impacted, and may continue to negatively impact, our results. Because the gaming industry is characterized by dynamic customer demand and rapid technological advances, we must continually introduce and successfully market new themes and technologies in order to remain competitive and effectively stimulate customer demand. Our customers will accept a new product only if it is likely to increase operator profits more than competitors' products. There is no certainty that our new products will attain this market acceptance or that our competitors will not more effectively anticipate or respond to changing customer preferences. In addition, any delays by us in introducing new products on schedule could negatively impact our operating results by providing an opportunity for our competitors to introduce new products and gain market share ahead of us.

Failure to attract, retain and motivate key employees may adversely affect our ability to compete.

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

Our success depends largely on recruiting and retaining talented employees. The market for qualified executives and highly skilled, technical workers is intensely competitive. The loss of key employees or an inability to hire a sufficient number of technical staff could limit our ability to develop successful products and cause delays in getting new products to market.

We may be unable to protect our IP.

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

A significant portion of our revenues is generated from products using certain IP rights and our operating results would be negatively impacted if we are unsuccessful in protecting these rights from infringement. In addition, some of our most popular games and features are based on trademarks, patents and other IP licensed from third parties. The continued success of these games may depend upon our ability to retain or expand these licenses with reasonable terms. We also depend on trade secret law to protect certain proprietary knowledge and have entered into confidentiality agreements with those of our employees who have access to this information. However, there can be no guarantees that our employees will not breach these agreements, and if these agreements are breached it is unlikely that the remedies available to us will be sufficient to compensate us for the damages suffered.

We may be subject to claims of IP infringement or invalidity and adverse outcomes of litigation could unfavorably affect our operating results.

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

Periodically, we receive notification from others claiming that we are infringing upon their patent, trademark or other IP rights. Regardless of their merit, such claims may cause us to incur significant costs. Responding to these claims could also require us to stop selling or to redesign our products, to pay significant amounts in damages or enter into agreements to pay significant licensing fees or royalties. Additionally, if any of these claims prove successful, it could limit our ability to bring new products to market in the future. Our assessment of current IP litigation could change in light of the discovery of facts not presently known to us or determinations by judges, juries or others that do not accord with our evaluation of the possible liability or outcome of such litigation.

Our gaming machines and online operations may experience losses due to fraudulent activities.

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

We incorporate security features into the design of our gaming machines and other systems, including those responsible for our online operations, designed to prevent us and our patrons from being defrauded. However, there can be no guarantee that such security features will continue to be effective in the future. If our security systems fail to prevent fraud, our operating results could be adversely affected. Additionally, if third parties breach our security systems and defraud our patrons, the public may lose confidence in our gaming machines and operations.

Our outstanding Senior Convertible Debentures subject us to additional risks.

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

Our 2.6% Debentures issued in December 2006 contain a net settlement feature. This feature entitles holders of Debentures to receive cash up to \$1,000 and shares for any excess conversion value determined in a manner in the indenture governing the Debentures. Consequently, if a significant number of Debentures are converted or redeemed, we would be required to make significant cash payments to the holders who convert their Debentures.

Our outstanding credit facility subjects us to financial covenants which may limit our flexibility.

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

Our Senior Credit Facility subjects us to a number of financial covenants, which could result in an event of default if we do not comply with these covenants. The Senior Credit Facility also includes restrictions that may limit our flexibility in planning for, or reacting to, changes in our business and the industry.

Investments and development financing loans could adversely impact liquidity or cause us to incur loan losses.

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

We invest in and/or provide financing for expansion or construction of gaming locations and other business purposes, including locations abroad. Such investment and financing activities subject us to increased credit risk in certain regions, as well as other inherent risks such as political or economic instability in related markets. For example, we have investments in CLS, a portion of which have declined in value as described in Note 2 of our Unaudited Condensed Consolidated Financial Statements. Although we have not to date realized any losses associated with our CLS investments, we are monitoring them and will reassess impairment on a quarterly basis. We have in the past and may in the future incur losses on these types of investments and loans. Our results of operations, liquidity or financial position may be negatively impacted if we are unable to collect on loans or benefit from investments we make.

Current environmental laws and regulations, or those enacted in the future, could result in additional liabilities and costs.

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

The manufacturing of our products may require the use of materials that are subject to a variety of environmental, health and safety laws and regulations. Compliance with these laws could increase our costs and impact the availability of components required to manufacture our products. Violation of these laws may subject us to significant fines, penalties or disposal costs, which could negatively impact our results of operations, financial position or cash flows.

The risks related to operations outside of traditional US law could negatively affect our results.

We operate in many countries outside of the US and in tribal jurisdictions with sovereign immunity which subjects us to certain inherent risks including:

- ♣ political or economic instability
- ♣ additional costs of compliance
- ♣ tariffs and other trade barriers
- ♣ fluctuations in foreign exchange rates outside the US
- ♣ adverse changes in the creditworthiness of parties with whom we have significant receivables or forward currency exchange contracts

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

There were no unregistered sales of equity securities.

Issuer Purchases of Equity Securities

Edgar Filing: INTERNATIONAL GAME TECHNOLOGY - Form 10-Q

The purpose of our 1990 common stock repurchase authorization, as amended, is to return value to our shareholders and reduce the number of shares outstanding. We use open market or privately negotiated transactions, as well as Rule 10b5-1 trading plans, depending on market conditions and other factors. The authorization does not specify an expiration date. Our quarterly share repurchases are summarized below.

Periods	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as part of a Publicly Announced Plan	Maximum Number of Shares Still Available for Purchase Under the Plan
<i>(In millions, except per share amounts)</i>				
March 30 - April 26, 2008	2.4	\$ 34.45	2.4	25.1
April 27 - May 24, 2008	2.2	34.68	2.2	22.9
May 25 - June 28, 2008	3.5	30.81	3.5	19.4
Total	8.1	\$ 32.96	8.1	

Item 3. Defaults Upon Senior Securities

None.

Item 4. Submission of Matters to a Vote of Security Holders

None.

Item 5. Other Information

None.

Item 6. Exhibits
