Notes to Schedule of Investments:

\* Portfolio securities and other financial instruments for which market quotations are readily available are stated at market value. Market value is generally determined on the basis of last reported sales prices, or if no sales are reported, based on quotes obtained from a quotation reporting system, established market makers, or pricing services.

Portfolio securities and other financial instruments for which market quotations are not readily available or if a development/event occurs that may significantly impact the value of a security, are fair-valued, in good faith, pursuant to procedures established by the Board of Trustees, or persons acting at their discretion pursuant to procedures established by the Board of Trustees, including certain fixed income securities which may be valued with reference to securities whose prices are more readily available. The Fund s investments, including over-the-counter options, are valued using prices supplied by an independent pricing service or dealer quotations, or by using the last sale price on the exchange that is the primary market for such securities, or the last quoted mean price for those securities for which the over-the-counter market is the primary market or for listed securities in which there were no sales. Prices obtained from independent pricing services use information provided by market makers or estimates of market values obtained from yield data relating to investments or securities with similar characteristics. Exchange traded options, futures and options on futures are valued at the settlement price determined by the relevant exchange. Securities purchased on a when-issued or delayed-delivery basis are marked to market daily until settlement at the forward settlement value. Short-term securities maturing in 60 days or less are valued at amortized cost, if their original term to maturity was 60 days or less, or by amortizing their value on the 61st day prior to maturity, if the original term to maturity exceeded 60 days. Investments initially valued in currencies other than the U.S. dollar are converted to the U.S. dollar using exchange rates obtained from pricing services. As a result, the Net Asset Value (NAV) of the Fund s shares may be affected by changes in the value of currencies in relation to the U.S. dollar. The value of securities traded in markets outside the United States or denominated in currencies other than the U.S. dollar may be affected significantly on a day that the New York Stock Exchange (NYSE) is closed and the NAV may change on days when an investor is not able to purchase or sell shares.

The prices used by the Fund to value securities may differ from the value that would be realized if the securities were sold and these differences could be material. The Fund s NAV is determined weekly on the last business day of the week that the NYSE is open for trading, generally as of close of regular trading (normally, 4:00 p.m. Eastern time) on the NYSE that day.

(a) Private Placement Restricted as to resale and may not have a readily available market. Securities with an aggregate value of \$555,681,679, representing 71.42% of total investments.

(b) Illiquid security.

(c) These securities generally pay interest at rates which are periodically pre-determined by reference to a base lending rate plus a premium. These base lending rates are generally either the lending rate offered by one or more major European banks, such as the LIBOR or the prime rate offered by one or more major United States banks, or the certificate of deposit rate. These securities are generally considered to be restricted as the Fund is ordinarily contractually obligated to receive approval from the Agent bank and/or borrower prior to disposition. Remaining maturities of senior loans may be less than the stated maturities shown as a result of contractual or optional payments by the borrower. Such prepayments cannot be predicted with certainty. The interest rate disclosed reflects the rate in effect on October 31, 2008.

(d) 144A Security Security exempt from registration, under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, typically only to qualified institutional buyers. Unless otherwise indicated, these securities are not considered to be illiquid.

- (e) Security in default.
- (f) Fair valued Securities with an aggregate value of \$6,572,275, representing 0.84% of total investments.

(g) Perpetual maturity security. Maturity date shown is the first call date. Interest rate is fixed until the first call date and variable thereafter.

- (h) All or partial amount segregated as collateral for swaps.
- (i) Non-income producing.
- (j) Issuer in default.

Fair Value Measurements Effective August 1, 2008, the Fund adopted Financial Accounting Standards Board

Statement of Financial Accounting Standards No. 157, Fair Value Measurements (SFAS 157). This standard clarifies

the definition of fair value for financial reporting, establishes a framework for measuring fair value and requires additional

disclosures about the use of the fair value measurements. The three levels of the fair value hierarchy under SFAS 157

are described below:

- Level 1 quoted prices in active markets for identical investments
- Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 significant unobservable inputs (including the Fund s own assumptions in determining the fair value of investments)

The valuation techniques used by the Fund to measure fair value during the three months ended October 31, 2008 maximized the use of observable inputs and minimized the use of unobservable inputs. The Fund utilized the following fair value techniques: multi-dimensional relational pricing model and option adjusted spread pricing.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used at October 31, 2008 in valuing the Fund s investments carried at value:

Valuation Inputs	Investments in Securities	Other Financial Instruments
Level 1 - Quoted Prices	\$	\$
Level 2 - Other Significant Observable Inputs	771,387,768	(24,919,717)
Level 3 - Significant Unobservable Inputs	6,572,275	(220,168)
Total	\$777,960,043	\$(25,139,885)

A roll forward of fair value measurements using significant unobservable inputs (Level 3) at October 31, 2008, were as follows:

	Investments in Securities	Other Financial Instruments
Beginning balance, 7/31/08	\$9,640,720	\$(1,103,417)
Net purchases (sales) and settlements	(1,856,863)	1,024,263
Accrued discounts (premiums)	(376)	
Total realized and unrealized gain (loss)	(1,211,206)	(141,014)
Transfers in and/or out of Level 3		
Ending balance, 10/31/08	\$6,572,275	\$(220,168)
