PIMCO Corporate Opportunity Fund Letter to Shareholders

July 15, 2009

Dear Shareholder:

Please find enclosed the semi-annual report for the PIMCO Corporate Opportunity Fund (the Fund) for the fiscal six-month period ended May 31, 2009.

During the reporting period, central banks around the globe reduced or maintained their key-lending rates at historic lows and added significant liquidity to shore up money markets. The Federal Reserve maintained the Federal Funds Rate within a range of 0% to 0.25% and purchased large amounts of securities (such as mortgage-backed securities and U.S. Treasuries) to encourage bank lending to consumers and businesses. Yields on U.S. Treasuries increased towards the latter part of the six-month period, due partly in response to these U.S. Government asset purchase programs.

Corporate bond performance was negatively impacted in the first part of the reporting period as investors generally avoided risk sectors in favor of U.S. Treasuries and other safe-haven investments. During the second part of the semiannual period, however, increased liquidity and attractive yields on corporate bonds relative to U.S. Treasuries encouraged investors to return to the corporate bond market, thus benefiting performance. The Barclays Capital U.S. Credit Index, an unmanaged index generally representative of the investment grade corporate bond market, returned 10.89% for the six-month period. This compares favorably to the return of the Barclays Capital U.S. Aggregate Index, a broad unmanaged index generally representative of the domestic taxable investment-grade fixed income market, which posted a return of 5.10%.

The unprecedented liquidity constraints and resulting imbalances in the financial markets during the reporting period initiated the following important actions by the Fund:

• In three separate actions in December and March, the Fund redeemed portions of its ARPS. In total, \$240 million of ARPS were redeemed at the full liquidation preference of \$25,000 per share. The redemptions were intended to resolve issues that served as impediments to the goal of regular, uninterrupted dividend payments on the Fund s common shares.

• On March 20, 2009, the Fund announced payment of its previously declared but postponed February 2009 common share dividend and the delayed declaration of its March 2009 dividend. Severe market disruptions negatively impacted prices for securities in the Fund s portfolios, causing the asset ratio to decline below an asset coverage level of at 200%. The

PIMCO Corporate Opportunity Fund Letter to Shareholders

Fund is not permitted to pay or declare common share dividends unless the Fund s Auction Rate Preferred Shares (ARPS) have asset coverage of at least 200% after the payment or the declaration of the common share dividend.

• On April 6, 2009, the Fund issued a press release to make explicit that the Fund s investment policies permit the holding of common stock received from conversion of other portfolio securities, such that common stock may represent up to 20% of total assets. The Fund may invest in preferred stock and convertible securities, which may allow for conversion into common stock. The policy enables the Fund to hold common stock received in such conversions until adequate value can be realized or it otherwise deems it appropriate to dispose of the common stock.

Press releases that include further information on these Fund actions, including more detailed descriptions of potential benefits and risks, are available at www.allianzinvestors.com/ closedendfunds.

For specific information on the Fund as well as a discussion of the factors that most affected performance, please review the following pages. If you have any questions regarding the information provided, we encourage you to contact your financial advisor or call the Fund s shareholder servicing agent at (800) 254-5197. In addition, a wide range of information and resources is available on our website, www.allianzinvestors.com/closedendfunds.

Together with Allianz Global Investors Fund Management LLC, the Fund s investment manager, and Pacific Investment Management Company LLC (PIMCO), the Fund s sub-adviser, we thank you for investing with us.

Sincerely,

Hans W. Kertess Chairman Brian S. Shlissel President & Chief Executive Officer

PIMCO Corporate Opportunity Fund Fund Insights/Performance & Statistics

May 31, 2009 (unaudited)

Market Price

• For the fiscal six-months ended May 31, 2009, PIMCO Corporate Opportunity Fund (the Fund) returned 27.83% on net asset value (NAV) and 52.07% on market price.

• The Barclays Capital U.S. Credit and U.S. High Yield Indices (unmanaged indices generally representative of the U.S. investment grade and non-investment grade corporate bond markets, respectively) generated total returns of 10.89% and 36.55%, respectively, for the six-month period ended May 31, 2009.

• The Fund s average duration of 5.82 years detracted from total return as U.S. interest rates rose during the six-month period.

• The Fund s weighting in the banking sector detracted from performance as banking issuers posted relatively weaker returns compared to the broader credit market.

• The Fund s exposure to non-bank finance companies detracted from returns as non-bank finance issuers underperformed most other credit sectors during the period.

• The Fund s weighting in communications issues contributed positively to performance as these bonds outperformed the broader market during the period.

• The Fund s exposure to natural gas issues contributed positively to performance as these issues outperformed most other credit sectors during the period.

• The Fund s emphasis on A-rated securities, which underperformed all lower-rated tiers of the quality spectrum, detracted from performance during the period.

Total Return(1):	Market Price	Net Asset Value (NAV)

PIMCO Corporate Opportunity Fund Fund Insights/Performance & Statistics

May 31, 2009 (unaudited) (continued)

(1) **Past performance is no guarantee of future results.** Total return is calculated by determining the percentage change in net asset value or market share price (as applicable) in the specified period. The calculation assumes that all income dividends and capital gain distributions have been reinvested. Total return does not reflect broker commissions or sales charges. Total return for a period of less than one year is not annualized. Total return for a period of more than one year represents the average annual total return.

Performance at market price will differ from its results at NAV. Although market price returns typically reflect investment results over time, during shorter periods returns at market price can also be influenced by factors such as changing views about the Fund, market conditions, supply and demand for the Fund s shares, or changes in Fund distributions.

An investment in the Fund involves risk, including the loss of principal. Total return, market price, market yield and net asset value will fluctuate with changes in market conditions. This data is provided for information only and is not intended for trading purposes. Closed-end funds, unlike open-end funds, are not continuously offered. There is a onetime public offering and once issued, shares of closed-end funds are sold in the open market through a stock exchange. Net asset value is equal to total assets attributable to common shareholders less total liabilities divided by the number of common shares outstanding. Holdings are subject to change daily.

(2) Market Price Yield is determined by dividing the annualized current monthly per share dividend (comprised of net investment income) payable to common shareholders by the market price per common share at May 31, 2009.

PIMCO Corporate Opportunity Fund Notes to Financial Statements

May 31, 2009 (unaudited)

1. Organization and Significant Accounting Policies

PIMCO Corporate Opportunity Fund (the Fund), was organized as a Massachusetts business trust on September 13, 2002. Prior to commencing operations on December 27, 2002, the Fund had no operations other than matters relating to its organization and registration as a diversified, closed-end management investment company registered under the Investment Company Act of 1940 and the rules and regulations thereunder, as amended. Allianz Global Investors Fund Management LLC (the Investment Manager) serves as the Fund s Investment Manager and is an indirect, wholly-owned subsidiary of Allianz Global Investors of America L.P. (Allianz Global). Allianz Global is an indirect, wholly-owned subsidiary of Allianz SE, a publicly traded European insurance and financial services company. The Fund has an unlimited amount of \$0.00001 par value per share of common stock authorized.

The Fund s investment objective is to seek maximum total return through a combination of current income and capital appreciation in a diversified portfolio of U.S. dollar-denominated corporate debt obligations of varying maturities and of other income-producing securities.

The preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimated.

In the normal course of business, the Fund enters into contracts that contain a variety of representations that provide general indemnifications. The Fund s maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Fund that have not yet occurred. However, the Fund expects the risk of any loss to be remote.

The following is a summary of significant accounting policies consistently followed by the Fund:

(a) Valuation of Investments

Portfolio securities and other financial instruments for which market quotations are readily available are stated at market value. Market value is generally determined on the basis of last reported sales prices, or if no sales are reported, based on quotes obtained from a quotation reporting system, established market makers, or independent pricing services.

Portfolio securities and other financial instruments for which market quotations are not readily available or for which a development/event occurs that may significantly impact the value of a security, are fair-valued, in good faith, pursuant to procedures established by the Board of Trustees, or persons acting at their discretion pursuant to procedures established by the Board of Trustees, including certain fixed income securities which may be valued with reference to securities whose prices are more readily available. The Fund s investments, including over-the-counter options, are valued daily using prices supplied by an independent pricing service or dealer quotations, or by using the last sale price on the exchange that is the primary market for such securities, or the last quoted mean price for those securities for which the

over-the-counter market is the primary market or for listed securities in which there were no sales. Independent pricing services use information provided by market makers or estimates of market values obtained from yield data relating to investments or securities with similar characteristics. Exchange-traded options, futures and options on futures are valued at the settlement price determined by the relevant exchange. Securities purchased on a when-issued or delayed-delivery basis are marked to market daily until settlement at the forward settlement value. Short-term securities maturing in 60 days or less are valued at amortized cost, if their original term to maturity was 60 days or less, or by amortizing their value on the 61st day prior to maturity, if the original term to maturity exceeded 60 days. Investments initially valued in currencies other than U.S. dollar are converted to the U.S. dollar using exchange rates obtained from pricing services. As a result, the net asset value (NAV) of the Fund s shares may be affected by changes in the value of currencies in relation to the U.S. dollar. The value of securities traded in markets outside the United States or denominated in currencies other than the U.S. dollar may be affected significantly on a day that the New York Stock Exchange (NYSE) is closed and the NAV may change on days when an investor is not able to purchase or sell shares.

The prices used by the Fund to value securities may differ from the value that would be realized if the securities were sold and these differences could be material to the financial statements of the Fund. The Fund s NAV is normally determined daily as of the close of regular trading (normally, 4:00 p.m. Eastern time) on the NYSE on each day the NYSE is open for business.

PIMCO Corporate Opportunity Fund Notes to Financial Statements

May 31, 2009 (unaudited)

1. Organization and Significant Accounting Policies (continued)

(b) Fair Value Measurement

The Fund has adopted the Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 157, Fair Value Measurements (SFAS 157). This standard clarifies the definition of fair value for financial reporting, establishes a framework for measuring fair value and requires additional disclosure about the use of the fair value measurements. Under this standard, fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (i.e. the exit price) in an orderly transaction between market participants. The three levels of the fair value hierarchy under SFAS 157 are described below:

• Level 1 quoted prices in active markets for identical investments that the Fund has the ability to access

• Level 2 valuations based on other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.) or quotes from inactive exchanges

• Level 3 valuations based on significant unobservable inputs (including the Fund s own assumptions in determining the fair value of investments)

An investment asset or liability s level within the fair value hierarchy is based on the lowest level input, individually or in the aggregate, that is significant to fair value measurement.

The valuation techniques used by the Fund to measure fair value during the six months ended May 31, 2009 maximized the use of observable inputs and minimized the use of unobservable inputs.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used at May 31, 2009 in valuing each Fund s investments carried at value:

Valuation Inputs Level 1 Quoted Prices

Investments in Se	curities	Other Financial
Assets	Liabilities	Instruments*
\$26,298,485	\$	\$7,404,389

Level 2 Other Significant Observable Inputs Level 3 Significant Unobservable Inputs Total 1,030,628,430 30,871,830 \$1,087,798,745 (16,025,590) \$(8,621,201)
