December 31, 2013

Letter to Stockholders (unaudited)

Performance

For the year ended December 31, 2013, the Morgan Stanley India Investment Fund, Inc. (the "Fund") had total returns of -3.42%, based on net asset value, and -5.67% based on market value per share (including reinvestment of distributions), compared to its benchmark, the Morgan Stanley Capital International (MSCI) India Index (the "Index")*, which returned -3.83%. On December 31, 2013, the closing price of the Fund's shares on the New York Stock Exchange was \$17.48, representing a 13.0% discount to the Fund's net asset value per share. Past performance is no guarantee of future results.

Factors Affecting Performance

- 2013 was an eventful year for the Indian equity markets, with the fear of the U.S. tapering its quantitative easing program increasing volatility in the currency and the equity markets. In August 2013, the currency had depreciated more than 25% for the year-to-date period at the time. To fight the currency weakness, the Reserve Bank of India had to tighten domestic liquidity. This led the market to decline 3.83% for the year ended December 31, 2013, as measured by the Index.
- Overall, both sector allocation and stock selection contributed to the Fund's performance relative to the Index during the period.
- From a top-down angle, the Fund's underweight exposure to the financials, energy and utilities sectors, and overweight exposure to the information technology, telecommunications and health care sectors were positive contributors. However, this was partially offset by the negative effect of the Fund's underweight exposure to the consumer staples sector.
- At the stock level, positions in financials, information technology, consumer discretionary and industrial stocks boosted performance. However, exposure to consumer staples and health care stocks hurt performance over this period.

Management Strategies

- We believe Indian equities are likely to continue to experience heightened volatility levels in 2014, but some macro-economic factors, both domestic and global, appear to be slowly turning in favor of equities.
- The significant improvement in India's current account deficit and the large FCNR (foreign currency non-resident) deposit raising by the Reserve Bank of India in the last few months could ensure that the rupee is well placed to withstand any global liquidity crunch.
- Another major event is the upcoming general elections in the second quarter of 2014. Historically, in emerging market countries including India, leadership changes have been a significant catalyst in equity market performance.

Morgan Stanley India Investment Fund, Inc.

December 31, 2013

Letter to Stockholders (unaudited) (cont'd)

- As of the close of the period, the Fund had overweight exposures to industrials, financials and consumer discretionary, and underweights to consumer staples, utilities, energy, and information technology.

Sincerely,

John H. Gernon
President and Principal Executive Officer January 2014

*The Morgan Stanley Capital International (MSCI) India Index is a free-float adjusted market capitalization weighted index that is designed to measure the performance of the large and mid cap segments of the Indian market. The performance of the Index is calculated in U.S. dollars and assumes reinvestment of net dividends. It is not possible to invest directly in an index.

Morgan Stanley India Investment Fund, Inc.

December 31, 2013

Notes to Financial Statements

The Morgan Stanley India Investment Fund, Inc. (the "Fund") was incorporated in Maryland on December 22, 1993, and is registered as a non-diversified, closed-end management investment company under the Investment Company Act of 1940, as amended (the "Act"). The adviser, Morgan Stanley Investment Management Inc. (the "Adviser"), and sub-adviser, Morgan Stanley Investment Management Company (the "Sub-Adviser"), seek long-term capital appreciation through investments primarily in equity securities of Indian Issuers.

A. Significant Accounting Policies: The following significant accounting policies are in conformity with U.S. generally accepted accounting principles ("GAAP"). Such policies are consistently followed by the Fund in the preparation of its financial statements. GAAP may require management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results may differ from those estimates.

1. Security Valuation: (1) An equity portfolio security listed or traded on an exchange is valued at its latest reported sales price (or at the exchange official closing price if such exchange reports an official closing price), if there were no sales on a given day, the security is valued at the mean between the last reported bid and asked prices; (2) all other equity portfolio securities for which over-the-counter market quotations are readily available are valued at its latest reported sales price. In cases where a security is traded on more than one exchange, the security is valued on the exchange designated as the primary market; (3) when market quotations are not readily available, including circumstances under which the Adviser determines that the closing price, last sale price or the mean between the last reported bid and asked prices are not reflective of a security's market value, portfolio securities are valued at their fair value as determined in good faith under procedures established by and under the general supervision of the Fund's Board of Directors (the

"Directors"). Occasionally, developments affecting the closing prices of securities and other assets may occur between the times at which valuations of such securities are determined (that is, close of the foreign market on which the securities trade) and the close of business of the New York Stock Exchange ("NYSE"). If developments occur during such periods that are expected to materially affect the value of such securities, such valuations may be adjusted to reflect the estimated fair value of such securities as of the close of the NYSE, as determined in good faith by the Directors or by the Adviser using a pricing service and/or procedures approved by the Directors; (4) quotations of foreign portfolio securities, other assets and liabilities and forward contracts stated in foreign currency are translated into U.S. dollar equivalents at the prevailing market rates prior to the close of the NYSE; (5) investments in mutual funds, including the Morgan Stanley Institutional Liquidity Funds, are valued at the net asset value as of the close of each business day; and (6) short-term debt securities with remaining maturities of 60 days or less at the time of purchase may be valued at amortized cost, unless the Adviser determines such valuation does not reflect the securities' market value, in which case these securities will be valued at their fair market value determined by the Adviser.

Under procedures approved by the Directors, the Fund's Adviser has formed a Valuation Committee. The Valuation Committee provides administration and oversight of the Fund's valuation policies and procedures, which are reviewed at least annually by the Directors. These procedures allow the Fund to utilize independent pricing services, quotations from securities and financial instrument dealers, and other market sources to determine fair value.

The Fund has procedures to determine the fair value of securities and other financial instruments for which market

Morgan Stanley India Investment Fund, Inc.

December 31, 2013

Notes to Financial Statements (cont'd)

prices are not readily available. Under these procedures, the Valuation Committee convenes on a regular and ad hoc basis to review such securities and considers a number of factors, including valuation methodologies and significant unobservable valuation inputs, when arriving at fair value. The Valuation Committee may employ a market-based approach which may use related or comparable assets or liabilities, recent transactions, market multiples, book values, and other relevant information for the investment to determine the fair value of the investment. An income-based valuation approach may also be used in which the anticipated future cash flows of the investment are discounted to calculate fair value. Discounts may also be applied due to the nature or duration of any restrictions on the disposition of the investments. Due to the inherent uncertainty of valuations of such investments, the fair values may differ significantly from the values that would have been used had an active market existed. The Valuation Committee employs various methods for calibrating these valuation approaches including a regular review of valuation methodologies, key inputs and assumptions, transactional back-testing or disposition analysis, and reviews of any related market activity.

2. Fair Value Measurement: Financial Accounting Standards Board ("FASB") Accounting Standards Codification™ ("ASC") 820, "Fair Value Measurements and Disclosures" ("ASC 820"), defines fair value as the value that the Fund would receive to sell an investment or pay to transfer a liability in a timely transaction with an independent buyer in the principal market, or in the absence of a principal market the most advantageous market for the investment or liability. ASC 820 establishes a three-tier hierarchy to distinguish between (1) inputs that reflect the assumptions market participants would use in valuing an asset or liability developed based on market data

obtained from sources independent of the reporting entity (observable inputs) and (2) inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in valuing an asset or liability developed based on the best information available in the circumstances (unobservable inputs) and to establish classification of fair value measurements for disclosure purposes. Various inputs are used in determining the value of the Fund's investments. The inputs are summarized in the three broad levels listed below.

- Level 1 unadjusted quoted prices in active markets for identical investments
- Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 significant unobservable inputs including the Fund's own assumptions in determining the fair value of investments. Factors considered in making this determination may include, but are not limited to, information obtained by contacting the issuer, analysts, or the appropriate stock exchange (for exchange-traded securities), analysis of the issuer's financial statements or other available documents and, if necessary, available information concerning other securities in similar circumstances

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities and the determination of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to each security.

The following is a summary of the inputs used to value the Fund's investments as of December 31, 2013.

Transfers between investment levels may occur as the markets fluctuate and/or the availability of data used in an investment's valuation changes. The Fund recognizes transfers between the levels as of the end of the period. As of December 31, 2013, securities with a total value of approximately \$204,844,000 transferred from Level 2 to Level 1. At December 31, 2012, the fair value of certain securities were adjusted due to developments which occurred between the time of the close of the foreign markets on which they trade and the close of business on the NYSE which resulted in their Level 2 classification.

Following is a reconciliation of investments in which significant unobservable inputs (Level 3) were used in determining fair value.

3. Foreign Currency Translation and Foreign Investments: The books and records of the Fund are maintained in U.S. dollars. Amounts denominated in Indian rupees are translated into U.S. dollars as follows:

investments, other assets and liabilities at the prevailing rate of exchange on the valuation date;

investment transactions and investment income at the prevailing rates of exchange on the dates of such transactions.

Although the net assets of the Fund are presented at the foreign exchange rates and market values at the close of the period, the Fund does not isolate that portion of the results of operations arising as a result of changes in the foreign exchange rates from the fluctuations arising from changes in the market prices of securities held at period end. Similarly, the Fund does not isolate the effect of changes in foreign exchange rates from the fluctuations arising from changes in the market prices of securities sold during the period. Accordingly, realized and unrealized foreign currency gains (losses) on investments in securities are included in the reported net realized and unrealized gains (losses) on investment transactions and balances.

Net realized gains (losses) on foreign currency transactions represent net foreign exchange gains (losses) from sales and maturities of foreign currency forward exchange contracts, disposition of foreign currency, currency gains (losses) realized between the trade and settlement dates on securities transactions, and the difference between the amount of investment income and foreign withholding taxes recorded on the Fund's books and the U.S. dollar equivalent amounts actually received or paid. Net unrealized currency gains (losses) from valuing foreign currency denominated assets and liabilities at period end exchange rates are reflected as a component of unrealized appreciation (depreciation) on investments and foreign currency translations in the Statement of Assets and Liabilities. The change in unrealized currency gains (losses) on foreign currency translations for the period is reflected in the Statement of Operations.

A significant portion of the Fund's net assets consist of Indian securities which involve certain considerations and risks not typically associated with investments in the United States. In addition to its smaller size, less liquidity and greater volatility, the Indian securities market is less developed than the U.S. securities market and there is often

Morgan Stanley India Investment Fund, Inc.

December 31, 2013

Notes to Financial Statements (cont'd)

substantially less publicly available information about Indian issuers than there is about U.S. issuers. Settlement mechanisms are also less developed and are accomplished, in certain cases, only through physical delivery, which may cause the Fund to experience delays or other difficulties in effecting transactions.

4. Indemnifications: The Fund enters into contracts that contain a variety of indemnifications. The Fund's maximum exposure under these arrangements is unknown. However, the Fund has not had prior claims or losses pursuant to these contracts and expects the risk of loss to be remote.

5. Other: Security transactions are accounted for on the date the securities are purchased or sold. Investments in new Indian securities are made by making applications in the public offerings. The issue price, or a portion thereof, is paid at the time of application and reflected as share application money on the Statement of Assets and Liabilities Upon allotment of the securities, this amount plus any remaining amount of issue price is recorded as cost of investments. Realized gains (losses) on the sale of investment securities are determined on the specific identified cost basis. Interest income is recognized on the accrual basis, if any.

B. Advisory/Sub-Advisory Fees: The Adviser, a wholly-owned subsidiary of Morgan Stanley, provides the Fund with advisory services under the terms of an Investment Advisory Agreement, calculated weekly and payable monthly, at an annual rate of 1.10% of the Fund's average weekly net assets.

The Adviser has entered into a Sub-Advisory Agreement with the Sub-Adviser, a wholly-owned subsidiary of Morgan Stanley. The Sub-Adviser provides the Fund with advisory services subject to the overall supervision of the Adviser and the Fund's Officers and Directors. The Adviser pays the Sub-Adviser on a

monthly basis a portion of the net advisory fees the Adviser receives from the Fund.

C. Administration Fees: The Adviser also serves as Administrator to the Fund and provides administrative services pursuant to an Administration Agreement for an annual fee, accrued daily and paid monthly, of 0.08% of the Fund's average weekly net assets. The Adviser has agreed to limit the administration fee through a waiver so that it will be no greater than the previous administration fee of 0.02435% of the Fund's average weekly net assets plus \$24,000 per annum. This waiver may be terminated at any time. For the year ended December 31, 2013, approximately \$169,000 of administration fees were waived pursuant to this arrangement. Under a Sub-Administration Agreement between the Administrator and State Street Bank and Trust Company ("State Street"), State Street provides certain administrative services to the Fund. For such services, the Administrator pays State Street a portion of the fee the Administrator receives from the Fund.

Cim Fund Services Ltd., whose registered office is in Mauritius, provides sub-administrative services to the Fund, including maintaining certain Fund records and preparing certain periodic filings, under an agreement whereby Cim Fund Services Ltd. is paid a fee of \$18,000 per annum plus reimbursement for certain out-of-pocket expenses.

D. Custodian Fees: State Street (the "Custodian") and its affiliates serve as Custodian for the Fund. The Custodian holds cash, securities, and other assets of the Fund as required by the Act. Custody fees are payable monthly based on assets held in custody, investment purchases and sales activity and account maintenance fees, plus reimbursement for certain out-of-pocket expenses.

E. Federal Income Taxes: It is the Fund's intention to continue to qualify as a regulated investment company and distribute all of its taxable income. Accordingly, no provision for Federal income taxes is required in the financial statements.

Morgan Stanley India Investment Fund, Inc.

December 31, 2013

Notes to Financial Statements (cont'd)

Effective October 1, 2004 there is no capital gains tax in India for long-term investments in specified securities executed on a recognized stock exchange on which securities transaction tax is paid. The current rate of capital gains tax for short-term investments is 16.223% for transactions conducted through a recognized stock exchange and on which securities transaction tax is paid. The Fund invests in India through a registered branch office established in Mauritius. Further, the Fund's central management and control is in Mauritius and it obtains a tax residency certificate from the Mauritian authorities and thus claims the benefits under the double taxation treaty between Mauritius and India. A fund which is a tax resident in Mauritius under the Treaty but has no branch or permanent establishment in India will not be subject to capital gains tax in India on the sale of securities. The dividend income from Indian companies are exempt from Indian income tax.

The Fund currently is subject to and accrues Indian tax on interest earned on Indian securities at 21.63%. The Treaty benefits accorded to foreign investors were challenged by a nongovernmental organization and the matter was litigated before India's Supreme Court (the highest court in India). In October 2003, India's Supreme Court upheld the validity of Treaty benefits accorded to foreign investors on the basis of a certificate of residence issued by Mauritian authorities (such as the one obtained by the Fund).

The Indian Finance Minister ("FM") announced the introduction of a General Anti Avoidance Rule ("GAAR") in the Indian tax law in the final 2012/2013 Indian Budget. Subsequent to the announcement of the Budget, comments were submitted to the FM regarding the GAAR. In response to these comments, on May 7, 2012 the FM announced that the GAAR will be effective as of April 1, 2013, which is a delay of one year from what had been proposed. Furthermore, a committee was formed that is expected to issue rules and guidelines governing the implementation of the GAAR. The Committee submitted its report on September 30, 2012. As per

the press statement issued, dated January 14, 2013, the Government has accepted, with some modification, the major recommendations of the Committee, and it is proposed that implementation of the GAAR will be deferred to the financial year commencing from April 1, 2015. At this time we cannot assess whether the Fund will fall within the scope of the GAAR and, if the GAAR is applicable to the Fund, how it will impact the Fund.

FASB ASC 740-10, *Income Taxes - Overall*, sets forth a minimum threshold for financial statement recognition of the benefit of a tax position taken or expected to be taken in a tax return. Management has concluded there are no significant uncertain tax positions that would require recognition in the financial statements. If applicable, the Fund recognizes interest accrued related to unrecognized tax benefits in "Interest Expense" and penalties in "Other Expenses" in the Statement of Operations. The Fund files tax returns with the U.S. Internal Revenue Service, New York and various states. Each of the tax years in the four-year period ended December 31, 2013, remains subject to examination by taxing authorities.

The tax character of distributions paid may differ from the character of distributions shown in the Statements of Changes in Net Assets due to short-term capital gains being treated as ordinary income for tax purposes. There were no distributions paid during the fiscal years ended 2013 and 2012.

The amount and character of income and gains to be distributed are determined in accordance with income tax regulations which may differ from GAAP. These book/tax differences are either considered temporary or permanent in nature.

Temporary differences are attributable to differing book and tax treatments for the timing of the recognition of gains (losses) on certain investment transactions and the timing of the deductibility of certain expenses.

Permanent differences, primarily due to differing treatments of gains (losses) related to foreign currency transactions and a net

Morgan Stanley India Investment Fund, Inc.**December 31, 2013**

Notes to Financial Statements (cont'd)

operating loss, resulted in the following reclassifications among the components of net assets at December 31, 2013:

Accumulated Net Investment Loss (000)	Accumulated Net Realized Loss (000)	Paid-in- Capital (000)
\$ 1,031	\$ 2,112	\$ (3,143)

At December 31, 2013, the Fund had no distributable earnings on a tax basis.

At December 31, 2013, the aggregate cost for Federal income tax purposes is approximately \$267,781,000. The aggregate gross unrealized appreciation is approximately \$75,538,000 and the aggregate gross unrealized depreciation is approximately \$24,956,000 resulting in net unrealized appreciation of approximately \$50,582,000.

At December 31, 2013, the Fund had available for Federal income tax purposes unused short term and long term capital losses of approximately \$35,913,000 and \$28,239,000, respectively, that do not have an expiration date.

To the extent that capital loss carryforwards are used to offset any future capital gains realized during the carryover period as provided by U.S. Federal income tax regulations, no capital gains tax liability will be incurred by the Fund for gains realized and not distributed. To the extent that capital gains are offset, such gains will not be distributed to the stockholders. During the year ended December 31, 2013, the Fund utilized capital loss carryforwards for U.S. Federal income tax purposes of approximately \$6,024,000.
