ROYAL GOLD, INC.

Notes to Consolidated Financial Statements

(Unaudited)

1. OPERATIONS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Royal Gold, Inc. (Royal Gold , the Company , we , us , or our), together with its subsidiaries, is engaged in the business of acquiring and managing precious metals royalties, metal streams, and similar interests. Royalties are non-operating interests in mining projects that provide the right to revenue or metals produced from the project after deducting specified costs, if any. A metal stream is a purchase agreement that provides, in exchange for an upfront deposit payment, the right to purchase all or a portion of one or more metals produced from a mine, at a price determined for the life of the transaction by the purchase agreement.

Summary of Significant Accounting Policies

The accompanying unaudited consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles (U.S. GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X under the Securities Exchange Act of 1934, as amended. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for annual financial statements. In the opinion of management, all adjustments which are of a normal recurring nature considered necessary for a fair presentation of our interim financial statements have been included in this Form 10-Q. Operating results for the three months ended September 30, 2015, are not necessarily indicative of the results that may be expected for the fiscal year ending June 30, 2016. These interim unaudited financial statements should be read in conjunction with the Company's Annual Report on Form 10-K for the fiscal year ended June 30, 2015 filed with the Securities and Exchange Commission on August 6, 2015 (Fiscal 2015 10-K).

Asset Impairment

We evaluate long-lived assets for impairment whenever events or changes in circumstances indicate that the related carrying amounts of an asset or group of assets may not be recoverable. The recoverability of the carrying value of royalty and stream interests in production and development stage mineral properties is evaluated based upon estimated future undiscounted net cash flows from each royalty and stream interest property using estimates of proven and probable reserves and other relevant information received from the operators. We evaluate the recoverability of the carrying value of royalty interests in exploration stage mineral properties in the event of significant decreases in the price of gold, silver, copper, nickel and other metals, and whenever new information regarding the mineral properties is obtained from the operator indicating that production will not likely occur or may be reduced in the future, thus affecting the future recoverability of our royalty interests. Impairments in the carrying value of each property are measured and recorded to the extent that the carrying value in each property exceeds its estimated fair value, which is generally calculated using estimated future discounted cash flows.

Estimates of gold, silver, copper, nickel and other metal prices, operators' estimates of proven and probable reserves related to our royalty or streaming properties, and operators' estimates of operating and capital costs are subject to certain risks and uncertainties which may affect the

Edgar Filing: ROYAL GOLD INC - Form 10-Q

recoverability of our investment in these royalty and stream interests in mineral properties. It is possible that changes could occur to these estimates, which could adversely affect the net cash flows expected to be generated from these royalty and stream interests.

Notes to Consolidated Financial Statements

(Unaudited)

2. ACQUISITIONS

Acquisition of Gold and Silver Stream at Pueblo Viejo

On September 29, 2015, RGLD Gold AG (RGLD Gold), a wholly-owned subsidiary of the Company, closed its previously announced Precious Metals Purchase and Sale Agreement with Barrick Gold Corporation (Barrick) and its wholly-owned subsidiary, BGC Holdings Ltd. (BGC) for a percentage of the gold and silver production attributable to Barrick 's 60% interest in the Pueblo Viejo mine located in the Dominican Republic. Pursuant to the Precious Metals Purchase and Sale Agreement, RGLD Gold made a single advance payment of \$610 million to BGC as part of the closing. The transaction is effective as of July 1, 2015 for the gold stream and January 1, 2016 for the silver stream.

BGC will deliver gold to RGLD Gold in amounts equal to 7.50% of Barrick 's interest in the gold produced at the Pueblo Viejo mine from July 1, 2015 until 990,000 ounces of gold have been delivered, and 3.75% of Barrick 's interest in gold produced thereafter. RGLD Gold will pay BGC 30% of the spot price per ounce of gold delivered until 550,000 ounces of gold have been delivered, and 60% of the spot price per ounce delivered thereafter.

BGC will deliver silver to RGLD Gold in amounts equal to 75% of Barrick 's interest in the silver produced at the Pueblo Viejo mine beginning on January 1, 2016 until 50 million ounces of silver have been delivered, and 37.50% of Barrick 's interest in silver produced thereafter. RGLD Gold will pay BGC 30% of the spot price per ounce of silver delivered until 23.10 million ounces of silver have been delivered, and 60% of the spot price per ounce of silver delivered thereafter.

The Pueblo Viejo gold and silver stream acquisition has been accounted for as an asset acquisition. The advance payment of \$610 million, plus direct transaction costs, have been recorded as a production stage stream interest within *Royalty and stream interests, net* on our consolidated balance sheets.

Acquisition of Gold Stream on Wassa, Bogoso and Prestea

On July 28, 2015, RGLD Gold closed its previously announced \$130 million gold stream transaction with a wholly-owned subsidiary of Golden Star Resources Ltd. (together Golden Star), pursuant to which RGLD Gold will advance financing to Golden Star, subject to certain conditions, for development projects at certain mines in Ghana,

and in return for which Golden Star will sell and deliver gold to RGLD Gold.

Also on July 28, 2015 and separate from the stream transaction, the Company also funded a previously announced \$20 million, 4-year term loan to Golden Star and received warrants to purchase 5 million shares of Golden Star common stock, with a grant date fair value of approximately \$0.8 million. Interest under the term loan will be due quarterly at a rate equal to 62.5% of the average daily gold price for the relevant quarter divided by 10,000, but not to exceed 11.5%. The warrants have a term of four years and an exercise price of \$0.27.

Pursuant to the stream transaction and subject to certain conditions, RGLD Gold will make \$130 million in advance payments to Golden Star in stages, including the \$40 million upfront payment made in connection with closing, \$15 million paid in September 2015, and the balance on a pro rata basis with spending on the Wassa and Prestea underground projects, which RGLD Gold expects to make in four quarterly payments as follows: (i) \$30 million on December 1, 2015, and (ii) \$15 million on each of March 1, 2016, June 1, 2016 and September 1, 2016. Golden Star will deliver to RGLD Gold 8.5% of gold produced from the Wassa, Bogoso and Prestea projects, until 185,000 ounces have been delivered, 5.0% until an additional 22,500 ounces have been delivered, and 3.0% thereafter. RGLD Gold will pay

Table of Contents

ROYAL GOLD, INC.

Notes to Consolidated Financial Statements

(Unaudited)

Golden Star a cash price equal to 20% of the spot price for each ounce delivered at the time of delivery until 207,500 ounces have been delivered, which cash price shall increase to 30% of the spot price for each ounce delivered thereafter.

The Wassa, Bogoso and Prestea gold stream acquisition has been accounted for as an asset acquisition. The \$55 million paid as part of the aggregate advance payments of \$130 million, plus direct acquisition costs, has been recorded as separate components of *Royalty and stream interests, net* on our consolidated balance sheets. Accordingly, approximately \$46.1 million and \$10.1 million was allocated to production stage and exploration stage stream interest, respectively, as of September 30, 2015. Future advance payments, plus any direct acquisition costs incurred, will be recorded as a production stage or an exploration stream interest accordingly. The acquisition costs of the production stage stream interest will be depleted using the units of production method, which is estimated using aggregate proven and probable reserves for Wassa, Bogoso and Prestea, as provided by Golden Star.

The \$20 million four-year term loan and the received warrants have been recorded within *Other assets* on our consolidated balance sheets. The warrants have been classified as a financial asset instrument and are recorded at fair value at each reporting period using the Black-Scholes model. Any change in the fair value of the warrants at subsequent reporting periods will be recorded within *Interest and other* on our consolidated statements of operations and comprehensive income.

Acquisition of Gold and Silver Stream at Rainy River

On July 20, 2015, RGLD Gold entered into a \$175 million Purchase and Sale Agreement with New Gold, Inc. ("New Gold"), for a percentage of the gold and silver production from the Rainy River Project located in Ontario, Canada ("Rainy River"). Pursuant to the Purchase and Sale Agreement, RGLD Gold will make two advance payments to New Gold, consisting of \$100 million, which was paid at closing on July 20, 2015, and \$75 million once capital spending at Rainy River is 60% complete (currently expected by mid-calendar 2016). Also under the Purchase and Sale Agreement, New Gold will deliver to RGLD Gold 6.50% of the gold produced at Rainy River until 230,000 gold ounces have been delivered, and 3.25% thereafter. New Gold also will deliver 60% of the silver produced at Rainy River until 3.10 million silver ounces have been delivered, and 30% thereafter. RGLD Gold will pay New Gold 25% of the spot price per ounce of gold and silver at the time of delivery.

The Rainy River gold and silver stream acquisition has been accounted for as an asset acquisition. The \$100 million paid as part of the aggregate advance payments of \$175 million, plus direct transaction costs, have been recorded as a development stage stream interest within *Royalty and stream interests, net* on our consolidated balance sheets.

Acquisition of an Additional Gold Royalty Interest at Pascua-Lama

Edgar Filing: ROYAL GOLD INC - Form 10-Q

On July 10, 2015, the Company entered into an assignment of rights agreement with a private Chilean citizen whereby Royal Gold acquired an additional 0.22% net smelter return (NSR) sliding-scale royalty interest on the Pascua-Lama project, which is owned and operated by Barrick and located on the border between Argentina and Chile. The Company paid \$8.0 million for the additional interest at closing and will pay an additional \$2.0 million if the project comes into production by the end of calendar 2018 or an additional \$1.0 million if the project enters production in calendar 2019. Upon the July 10, 2015 closing, Royal Gold's total gold NSR royalty interest in the Pascua-Lama project increased to 5.45% at gold prices above \$800 per ounce, while the additional gold equivalent royalty on proceeds from copper produced from the Chilean portion of the project, increased to 1.09%.

The additional gold royalty interest acquired on Pascua-Lama has been accounted for as an asset

Table of Contents

ROYAL GOLD, INC.

Notes to Consolidated Financial Statements

(Unaudited)

acquisition. The \$8.0 million paid for the additional interest at closing, plus direct transaction costs, have been recorded as development stage royalty interest within *Royalty and stream interests, net* on our consolidated balance sheets.

Acquisition of Gold Stream at Carmen de Andacollo

On July 9, 2015, RGLD Gold entered into a Long Term Offtake Agreement (the Andacollo Stream Agreement) with Compañía Minera Teck Carmen de Andacollo (CMCA), a 90% owned subsidiary of Teck Resources Limited (Teck). Pursuant to the Andacollo Stream Agreement, CMCA will sell and deliver to RGLD Gold 100% of payable gold from the Carmen de Andacollo (Andacollo) copper-gold mine until 900,000 ounces have been delivered, and 50% thereafter, subject to a fixed payable percentage of 89%. RGLD Gold made a \$525 million advance payment in cash to CMCA upon entry into the Andacollo Stream Agreement, and RGLD Gold will also pay CMCA 15% of the monthly average gold price for the month preceding the delivery date for all gold purchased under the Andacollo Stream Agreement.

The transaction will encompass certain of CMCA's presently owned mining concessions on the Andacollo mine, as well as any other mining concessions presently owned or acquired by CMCA or any of its affiliates within a 1.5 kilometer area of interest, and certain other mining concessions that CMCA or its affiliates may acquire. The Andacollo Stream Agreement is effective July 1, 2015, and applies to all final settlements of gold received on or after that date. Deliveries to RGLD Gold will be made monthly, and RGLD Gold began receiving gold deliveries during the quarter ended September 30, 2015.

The Company accounted for the acquisition of the stream interest at Andacollo as an asset acquisition. For US GAAP financial reporting purposes, the Company's new consolidated carrying value in its stream interest at Andacollo is approximately \$388.2 million, which includes direct acquisition costs, and is recorded as production stage stream interest within *Royalty and stream interests, net* on our consolidated balance sheets.

Termination of Royalty Interest at Carmen de Andacollo

On July 9, 2015, Royal Gold Chile Limitada (RG Chile), a wholly owned subsidiary of the Company, entered into a Royalty Termination Agreement with CMCA. The Royalty Termination Agreement terminated an amended Royalty Agreement originally dated January 12, 2010, which provided RG Chile with a royalty equivalent to 75% of the gold produced from the sulfide portion of the Andacollo mine until 910,000 payable ounces have been produced, and 50% of the gold produced thereafter. CMCA paid total consideration of \$345 million to RG Chile in connection with the Royalty Termination Agreement. The net carrying value of the Andacollo royalty on the date of termination was approximately \$207.5 million. The royalty termination transaction will be taxable in Chile and the United States.

4. AVAILABLE-FOR-SALE SECURITIES

The Company's available-for-sale securities as of September 30, 2015 and June 30, 2015 consist of the following:

As of September 30, 2015 (Amounts in thousands)				
	Cost Basis	Gain	Loss	Fair Value
Non-current:				
Seabridge	\$ 9,565		(3,741)	\$ 5,824
	\$ 9,565	\$	\$ (3,741)	\$ 5,824

Edgar Filing: ROYAL GOLD INC - Form 10-Q

As of June 30, 2015 (Amounts in thousands)				
	Cost Basis	Gain	Unrealized Loss	Fair Value
Non-current:				
Seabridge	\$ 9,565		(3,292)	\$ 6,273
	\$ 9,565	\$	\$ (3,292)	\$ 6,273

Our only available-for-sale security is the investment in Seabridge Gold, Inc. (Seabridge) common stock, acquired in June 2011. The Company s policy for determining whether declines in fair value of

Table of Contents**ROYAL GOLD, INC.**

Notes to Consolidated Financial Statements

(Unaudited)

available-for-sale securities are other than temporary includes a quarterly analysis of the investments and a review by management of all investments for which the cost exceeds the fair value. Any temporary declines in fair value are recorded as a charge to other comprehensive income. If such impairment is determined by the Company to be other than temporary, the investment's cost basis is written down to fair value and recorded in net income during the period the Company determines such impairment to be other than temporary. Based on the Company's quarterly analysis of its investments and our ability and intent to hold these investments for a reasonable period of time, there were no write downs on our available-for-sale securities during the three months ended September 30, 2015. The Company will continue to evaluate its investment in Seabridge common stock considering additional facts and circumstances as they arise, including, but not limited to, the progress of development of Seabridge's KSM project.

5. DEBT

The Company's non-current debt as of September 30, 2015 and June 30, 2015 consists of the following:

	As of September 30, 2015 Non-current	As of June 30, 2015 Non-current
	(Amounts in thousands)	
Convertible notes due 2019, net	\$ 324,780	\$ 322,110
Revolving credit facility	350,000	
Total debt	\$ 674,780	\$ 322,110

Convertible Senior Notes Due 2019

In June 2012, the Company completed an offering of \$370 million aggregate principal amount of 2.875% convertible senior notes due 2019 (2019 Notes). The 2019 Notes bear interest at the rate of 2.875% per annum, and the Company is required to make semi-annual interest payments on the outstanding principal balance of the 2019 Notes on June 15 and December 15 of each year, beginning December 15, 2012. The 2019 Notes mature on June 15, 2019. Interest expense recognized on the 2019 Notes for the three months ended September 30, 2015, was \$5.6 million compared to \$5.4 million for the three months ended September 30, 2014, and included the contractual coupon interest, the accretion of the debt discount and amortization of the debt issuance costs.

Revolving credit facility

Edgar Filing: ROYAL GOLD INC - Form 10-Q

The Company maintains a \$650 million revolving credit facility. As of September 30, 2015, the Company had \$350.0 million outstanding and \$300.0 million available under the revolving credit facility. Borrowings under the revolving credit facility bear interest at a floating rate of LIBOR plus a margin of 1.25% to 3.00%, based on Royal Gold's defined leverage ratio. As of September 30, 2015, the interest rate on borrowings under the revolving credit facility was LIBOR plus 1.25% for an all-in rate of 1.46%. Royal Gold may repay borrowings under the revolving credit facility at any time without premium or penalty.

As discussed in Note 6 to the notes to consolidated financial statements in the Company's Fiscal 2015 10-K, the Company has financial covenants associated with its revolving credit facility. At September 30, 2015, the Company was in compliance with each financial covenant.

6. REVENUE

Revenue is comprised of the following:

	For The Three Months Ended	
	September 30, 2015	September 30, 2014
	(Amounts in thousands)	
Stream interests	\$ 37,857	\$ 19,657
Royalty interests	36,199	49,369
Total revenue	\$ 74,056	\$ 69,026

7. STOCK-BASED COMPENSATION

The Company recognized stock-based compensation expense as follows:

	For The Three Months Ended	
	September 30, 2015	September 30, 2014
	(Amounts in thousands)	
Stock options	\$ 109	\$ 112
Stock appreciation rights	392	355
Restricted stock	1,370	1,170
Performance stock	2,356	812
Total stock-based compensation expense	\$ 4,227	\$ 2,449

Stock-based compensation expense is included within general and administrative in the consolidated statements of operations and comprehensive income.

During the three months ended September 30, 2015 and 2014, the Company granted the following stock-based compensation awards:

Edgar Filing: ROYAL GOLD INC - Form 10-Q

For The Three Months Ended
September 30, September 30,
2015 2014
(Number of shares)

Stock options	24,312	19,760
Stock appreciation rights	97,817	87,890
Restricted stock	72,062	55,589
Performance stock	47,297	46,800
Total equity awards granted	241,488	210,039

As of September 30, 2015, unrecognized compensation expense (expressed in thousands below) and weighted-average vesting period for each of our stock-based compensation awards was as follows:

Table of Contents**ROYAL GOLD, INC.**

Notes to Consolidated Financial Statements

(Unaudited)

	Unrecognized compensation expense	Weighted- average vesting period (years)
Stock options	\$ 831	2.2
Stock appreciation rights	3,085	2.2
Restricted stock	7,450	3.4
Performance stock	4,707	1.3

8. EARNINGS PER SHARE (EPS)

Basic earnings (loss) per common share were computed using the weighted average number of shares of common stock outstanding during the period, considering the effect of participating securities. Unvested stock-based compensation awards that contain non-forfeitable rights to dividends or dividend equivalents are considered participating securities and are included in the computation of earnings per share pursuant to the two-class method. The Company's unvested restricted stock awards contain non-forfeitable dividend rights and participate equally with common stock with respect to dividends issued or declared. The Company's unexercised stock options, unexercised SSARs and unvested performance stock do not contain rights to dividends. Under the two-class method, the earnings (loss) used to determine basic earnings (loss) per common share are reduced by an amount allocated to participating securities. Use of the two-class method has an immaterial impact on the calculation of basic and diluted earnings (loss) per common share.

The following tables summarize the effects of dilutive securities on diluted EPS for the period:

	For The Three Months Ended	
	September 30, 2015	September 30, 2014
	(in thousands, except per share data)	
Net (loss) income available to Royal Gold common stockholders	\$ (45,046)	\$ 18,680
Weighted-average shares for basic EPS	65,048,439	64,962,883
Effect of other dilutive securities		144,598
Weighted-average shares for diluted EPS	65,048,439	65,107,481
Basic (loss) earnings per share	\$ (0.69)	\$ 0.29
Diluted (loss) earnings per share	\$ (0.69)	\$ 0.29

The calculation of weighted average shares includes all of our outstanding common stock. The Company intends to settle the principal amount of the 2019 Notes in cash. As a result, there will be no impact to diluted earnings per share unless the share price of the Company's common stock exceeds the conversion price of \$105.31.

Table of Contents**ROYAL GOLD, INC.**

Notes to Consolidated Financial Statements

(Unaudited)

9. INCOME TAXES

For The Three Months Ended
September 30, September 30,
2015 2014
(Amounts in thousands, except rate)

Income tax expense	\$	59,177	\$	3,959
Effective tax rate		415.7%		17.3%

The increase in the effective tax rate for the three months ended September 30, 2015 is primarily related to the discrete tax impacts attributable to the Company's Andacollo transactions (Note 2) and the planned liquidation of our Chilean subsidiary.

As of September 30, 2015 and June 30, 2015, the Company had \$15.2 million and \$15.1 million of total gross unrecognized tax benefits, respectively. If recognized, these unrecognized tax benefits would positively impact the Company's effective income tax rate.

The Company's continuing practice is to recognize potential interest and/or penalties related to unrecognized tax benefits as part of its income tax expense. At September 30, 2015 and June 30, 2015, the amount of accrued income-tax-related interest and penalties was \$5.0 million and \$4.6 million, respectively.

10. SEGMENT INFORMATION

The Company manages its business under two reportable segments, consisting of the acquisition and management of royalty interests and the acquisition and management of stream interests. Royal Gold's long-lived assets (royalty and stream interests, net) are geographically distributed as shown in the following table:

Table of Contents**ROYAL GOLD, INC.**

Notes to Consolidated Financial Statements

11. FAIR VALUE MEASUREMENTS

FASB Accounting Standards Codification (ASC) 820, *Fair Value Measurements and Disclosures* (ASC 820) establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are described below:

Edgar Filing: ROYAL GOLD INC - Form 10-Q

Level 1: Quoted prices for identical instruments in active markets;

Level 2: Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets; and

Table of Contents**ROYAL GOLD, INC.**

Notes to Consolidated Financial Statements

(Unaudited)

Level 3: Prices or valuation techniques requiring inputs that are both significant to the fair value measurement and unobservable (supported by little or no market activity).

The following table sets forth the Company's financial assets measured at fair value on a recurring basis (at least annually) by level within the fair value hierarchy.

	Carrying Amount	At September 30, 2015			
		Total	Fair Value Level 1	Level 2	Level 3
Assets (In thousands):					
Marketable equity securities(1)	\$ 5,824	\$ 5,824	\$ 5,824	\$	\$
Warrants(2)	\$ 541	\$ 541	\$	\$ 541	\$
Total assets		\$ 6,365	\$ 5,824	\$ 541	\$
Liabilities (In thousands):					
Debt(3)	\$ 401,780	\$ 354,094	\$ 354,094	\$	\$
Total liabilities		\$ 354,094	\$ 354,094	\$	\$

(1) Included in *Available for sale securities* on the Company's consolidated balance sheets.

(2) Included in *Other assets* on the Company's consolidated balance sheets.

(3) Included in the carrying amount is the equity component of our 2019 Notes in the amount of \$77 million, which is included within *Additional paid-in capital* on the Company's consolidated balance sheets.

The Company's marketable equity securities classified within Level 1 of the fair value hierarchy are valued using quoted market prices in active markets. The fair value of the Level 1 marketable equity securities is calculated as the quoted market price of the marketable equity security multiplied by the quantity of shares held by the Company. The Company's debt classified within Level 1 of the fair value hierarchy is valued using quoted prices in an active market. During the three months ended September 30, 2015, the warrants issued by Golden Star (Note 2) were added to the Level 2 fair value hierarchy.

As of September 30, 2015, the Company also had assets that, under certain conditions, are subject to measurement at fair value on a non-recurring basis like those associated with royalty and stream interests, intangible assets and other long-lived assets. For these assets, measurement at fair value in periods subsequent to their initial recognition is applicable if any of these assets are determined to be impaired. If recognition of these assets at their fair value becomes necessary, such measurements will be determined utilizing Level 3 inputs.

12. COMMITMENTS AND CONTINGENCIES

Rainy River Gold and Silver Stream Acquisition

As of September 30, 2015, the Company has a remaining commitment, subject to certain conditions, of \$75.0 million as part of its Rainy River gold and silver stream acquisition in August 2015 (Note 2).

Wassa, Bogoso and Prestea Gold Stream Acquisition

As of September 30, 2015, the Company has a remaining commitment, subject to certain conditions, of \$75.0 million as part of its Wassa, Bogoso and Prestea gold stream acquisition in July 2015 (Note 2).

Table of Contents

ROYAL GOLD, INC.

Notes to Consolidated Financial Statements

(Unaudited)

Ilovoica Gold Stream Acquisition

As of September 30, 2015, the Company has a remaining commitment, subject to certain conditions, of \$167.5 million as part of its Ilovoica gold stream acquisition in October 2014.

Voisey's Bay

The Company indirectly owns a royalty on the Voisey's Bay mine in Newfoundland and Labrador owned by Vale Newfoundland & Labrador Limited ("VNL"). The royalty is directly owned by the Labrador Nickel Royalty Limited Partnership ("LNRLP"), in which the Company's wholly-owned indirect subsidiary, Canadian Minerals Partnership, is the general partner and 89.99% owner. The remaining interests in LNRLP are owned by Altius Investments Ltd. (10%), a company unrelated to Royal Gold, and the Company's wholly-owned indirect subsidiary, Voisey's Bay Holding Corporation (0.01%).

On December 5, 2014, LNRLP filed amendments to its October 16, 2009 Statement of Claim in the Supreme Court of Newfoundland and Labrador Trial Division against Vale Inco Limited, now known as Vale Canada Limited ("Vale Canada") and its wholly-owned subsidiaries, Vale Inco Atlantic Sales Limited and VNL, related to calculation of the NSR on the sale of concentrates, including nickel concentrates, from the Voisey's Bay mine. LNRLP asserts that the defendants have incorrectly calculated the NSR since production at Voisey's Bay began in late 2005, have indicated an intention to calculate the NSR in a manner LNRLP believes will violate the royalty agreement when Voisey's Bay concentrates are processed at Vale's new Long Harbour processing facility, and have breached their contractual duties of good faith and honest performance in several ways. LNRLP requests an order in respect of the correct calculation of future payments, and unspecified damages for non-payment and underpayment of past royalties to the date of the claim, together with additional damages until the date of trial, interest, costs and other damages. The litigation is in the discovery phase.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

General

This Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) is intended to provide information to assist you in better understanding and evaluating our financial condition and results of operations. Royal Gold, Inc. (Royal Gold , the Company , we , us , or our), recommends that you read this MD&A in conjunction with our consolidated financial statements included in Item 1 of this Quarterly Report on Form 10-Q, as well as our Annual Report on Form 10-K for the fiscal year ended June 30, 2015 filed with the Securities and Exchange Commission (the SEC) on August 6, 2015 (the Fiscal 2015 10-K).

This MD&A contains forward-looking information. You should review our important note about forward-looking statements following this MD&A.

We refer to GSR, NSR, metal stream and other types of royalty or similar interests throughout this MD&A. These terms are defined in our Fiscal 2015 10-K.

Overview

Royal Gold, together with its subsidiaries, is engaged in the business of acquiring and managing precious metals royalties, metal streams, and similar interests. Royalties are non-operating interests in mining projects that provide the right to revenue or metals produced from the project after deducting specified costs, if any. A metal stream is a purchase agreement that provides, in exchange for an upfront deposit payment, the right to purchase all or a portion of one or more metals produced from a mine, at a price determined for the life of the transaction by the purchase agreement. We seek to acquire existing royalty and stream interests or to finance projects that are in production or in the development stage in exchange for royalty or stream interests. In the ordinary course of business, we engage in a continual review of opportunities to acquire existing royalty and stream interests, establishing new streams on operating mines, to create new royalty and stream interests through the financing of mine development or exploration, or to acquire companies that hold royalty and stream interests. We currently, and generally at any time, have acquisition opportunities in various stages of active review, including, for example, our engagement of consultants and advisors to analyze particular opportunities, analysis of technical, financial and other confidential information, submission of indications of interest, participation in preliminary discussions and negotiations and involvement as a bidder in competitive processes.

As of September 30, 2015, the Company owned stream interests on five producing properties and two development stage properties and owned royalty interests on 34 producing properties, 22 development stage properties and 135 exploration stage properties, of which the Company considers 48 to be evaluation stage projects. The Company uses evaluation stage to describe exploration stage properties that contain mineralized material and on which operators are engaged in the search for reserves. We do not conduct mining operations on the properties in which we hold royalty and streaming interests, and except for our interest in the Peak Gold, LLC, we are not required to contribute to capital costs, exploration costs, environmental costs or other operating costs on those properties. During the three months ended September 30, 2015, we focused on the management of our existing royalty and stream interests and the acquisition of additional royalty and stream interests.

Our financial results are primarily tied to the price of gold and, to a lesser extent, the price of silver, copper and nickel, together with the amounts of production from our producing stage royalty and stream interests. The price of gold, silver, copper, nickel and other metals has fluctuated widely in recent years and most recently has experienced declines from highs experienced in the first half of our fiscal year 2013. The marketability and the price of metals are influenced by numerous factors beyond the control of

Table of Contents

the Company and significant declines in the price of gold, silver, copper or nickel could have a material and adverse effect on the Company's results of operations and financial condition.

For the three months ended September 30, 2015 and 2014, gold, silver, copper and nickel price averages and percentage of revenue by metal were as follows:

Metal	Three Months Ended			
	September 30, 2015		September 30, 2014	
	Average Price	Percentage of Revenue	Average Price	Percentage of Revenue
Gold (\$/ounce)	\$ 1,124	81%	\$ 1,282	76%
Silver (\$/ounce)	\$ 14.91	3%	\$ 19.76	4%
Copper (\$/pound)	\$ 2.39	5%	\$ 3.17	10%
Nickel (\$/pound)	\$ 4.79	7%	\$ 8.43	4%
Other	N/A	4%	N/A	6%

Recent Business Developments

Acquisition of Gold and Silver Stream at Pueblo Viejo

On September 29, 2015, RGLD Gold AG ("RGLD Gold"), a wholly-owned subsidiary of the Company, closed its previously announced Precious Metals Purchase and Sale Agreement with Barrick Gold Corporation ("Barrick") and its wholly-owned subsidiary, BGC Holdings Ltd. ("BGC") for a percentage of the gold and silver production attributable to Barrick's 60% interest in the Pueblo Viejo mine located in the Dominican Republic. Pursuant to the Precious Metals Purchase and Sale Agreement, RGLD Gold made a single advance payment of \$610 million to BGC as part of the closing. The transaction is effective as of July 1, 2015 for the gold stream and January 1, 2016 for the silver stream.

BGC will deliver gold to RGLD Gold in amounts equal to 7.50% of Barrick's interest in the gold produced at the Pueblo Viejo mine from July 1, 2015 until 990,000 ounces of gold have been delivered, and 3.75% of Barrick's interest in gold produced thereafter. RGLD Gold will pay BGC 30% of the spot price per ounce of gold delivered until 550,000 ounces of gold have been delivered, and 60% of the spot price per ounce delivered thereafter. RGLD Gold expects to receive its first delivery of gold from Pueblo Viejo on December 15, 2015, for gold production during the period July 1, 2015 to November 30, 2015. Barrick informed RGLD Gold that the first delivery will include approximately 8,900 ounces relating to July and August 2015 production, in addition to delivery of gold for production during the period including September through November 2015.

BGC will deliver silver to RGLD Gold in amounts equal to 75% of Barrick's interest in the silver produced at the Pueblo Viejo mine beginning on January 1, 2016 until 50.00 million ounces of silver have been delivered, and 37.50% of Barrick's interest in silver produced thereafter. RGLD Gold will pay BGC 30% of the spot price per ounce of silver delivered until 23.10 million ounces of silver have been delivered, and 60% of the spot price per ounce of silver delivered thereafter.

Edgar Filing: ROYAL GOLD INC - Form 10-Q

The Pueblo Viejo mine is an open-pit mining operation located approximately 60 miles northwest of Santo Domingo, in the Dominican Republic, and is owned by a joint venture in which Barrick owns a 60% interest and is responsible for operations, and in which Goldcorp Inc. (Goldcorp) owns a 40% interest. The mine began production in 2013. Barrick reported calendar 2014 production, on a 100% basis, of 1.11 million ounces of gold and 3.85 million ounces of silver, with all-in sustaining costs of \$588 per ounce of gold. Barrick also reported proven and probable gold reserves attributable to Barrick of 9.3 million contained ounces at 3.30 grams per tonne, and attributable proven and probable silver

Table of Contents

reserves of 58.3 million contained ounces grading 20.7 grams per tonne, in each case as of December 31, 2014.

Acquisition of Gold Stream on Wassa, Bogoso and Prestea

On July 28, 2015, RGLD Gold closed its previously announced \$130 million gold stream transaction with a wholly-owned subsidiary of Golden Star Resources Ltd. (together Golden Star), pursuant to which RGLD Gold will advance financing to Golden Star, subject to certain conditions, for development projects at certain mines in Ghana, and in return for which Golden Star will sell and deliver gold to RGLD Gold.

Also on July 28, 2015 and separate from the stream transaction, the Company also funded a previously announced \$20 million, 4-year term loan to Golden Star and received warrants to purchase 5 million shares of Golden Star common stock. Interest under the term loan will be due quarterly at a rate equal to 62.5% of the average daily gold price for the relevant quarter divided by 10,000, but not to exceed 11.5%. The warrants have a term of four years and an exercise price of \$0.27.

Pursuant to the stream transaction and subject to certain conditions, RGLD Gold will make \$130 million in advance payments to Golden Star in stages, including the \$40 million upfront payment made in connection with closing, \$15 million paid in September 2015, and the balance on a pro rata basis with spending on the Wassa and Prestea underground projects, which RGLD Gold expects to make in four quarterly payments as follows: (i) \$30 million on December 1, 2015, and (ii) \$15 million on each of March 1, 2016, June 1, 2016 and September 1, 2016. Golden Star will deliver to RGLD Gold 8.5% of gold produced from the Wassa, Bogoso and Prestea projects, until 185,000 ounces have been delivered, 5.0% until an additional 22,500 ounces have been delivered, and 3.0% thereafter. RGLD Gold will pay Golden Star a cash price equal to 20% of the spot price for each ounce delivered at the time of delivery until 207,500 ounces have been delivered, which cash price shall increase to 30% of the spot price for each ounce delivered thereafter. RGLD Gold sold approximately 3,200 ounces of gold delivered from Golden Star during the quarter ended September 30, 2015, and has approximately 3,100 ounces of gold remaining in inventory as of such date.

The Wassa mine is located approximately 90 miles west of Accra and has operated continuously since 2005. Golden Star forecasts calendar 2015 production of 113,000 ounces of gold from the single Wassa open pit. Open pit proven and probable reserves are 831,000 ounces at 1.39 grams per tonne. RGLD Gold's investment will fund development of the Wassa underground deposit, which has 746,000 ounces of proven and probable gold reserves at 4.27 grams per tonne. Once the underground deposit is in production, Golden Star expects average annual gold production of 150,000 ounces of gold over the life of mine from the combined open pit and underground at Wassa.

Bogoso and Prestea are located approximately 125 miles west of Accra and have produced over 9 million ounces from both open pit and underground sources over the last 100 years. Underground development at Prestea is already well advanced and Golden Star plans to modify the Bogoso plant to process Prestea material. Golden Star expects to spend \$40 million of capital investment on Prestea, which includes hoist and shaft upgrades, electrical infrastructure, ventilation and a process plant upgrade. Once in full production, Golden Star expects annual production of approximately 75,000 ounces from Prestea, with estimated life of mine production of 322,000 ounces. Golden Star forecasts underground gold production from the Wassa and Prestea mines by the second quarter of calendar 2016 and early calendar 2017, respectively.

Table of Contents

Acquisition of Gold and Silver Stream at Rainy River

On July 20, 2015, RGLD Gold entered into a \$175 million Purchase and Sale Agreement with New Gold, Inc. ("New Gold"), for a percentage of the gold and silver production from the Rainy River Project located in Ontario, Canada ("Rainy River"). Pursuant to the Purchase and Sale Agreement, RGLD Gold will make two advance payments to New Gold, consisting of \$100 million, which was paid at closing on July 20, 2015, and \$75 million once capital spending at Rainy River is 60% complete (currently expected by mid-calendar 2016). Also under the Purchase and Sale Agreement, New Gold will deliver to RGLD Gold 6.50% of the gold produced at Rainy River until 230,000 gold ounces have been delivered, and 3.25% thereafter. New Gold also will deliver 60% of the silver produced at Rainy River until 3.10 million silver ounces have been delivered, and 30% thereafter. RGLD Gold will pay New Gold 25% of the spot price per ounce of gold and silver at the time of delivery.

The Rainy River Project is located approximately 40 miles northwest of Fort Frances in western Ontario, Canada. Over its first nine years of full production, the 21,000 tonne per day, combined open pit-underground operation is scheduled to produce an average of 325,000 ounces of gold per year. Permits to begin major earthworks construction are in place, and, as of mid-calendar 2015, detailed engineering is 95% complete and 14% of the total development capital estimate of \$877 million has been spent. Rainy River has an estimated fourteen year mine life based on current reserves and is projected by New Gold to start-up in mid-calendar 2017.

Acquisition of an Additional Gold Royalty Interest at Pascua-Lama

On July 10, 2015, the Company entered into an assignment of rights agreement with a private Chilean citizen whereby Royal Gold acquired an additional 0.22% NSR sliding-scale royalty interest on the Pascua-Lama project, which is owned and operated by Barrick and located on the border between Argentina and Chile. The Company paid \$8.0 million for the additional interest at closing and will pay an additional \$2.0 million if the project comes into production by the end of calendar 2018 or an additional \$1.0 million if the project enters production in calendar 2019. Upon the July 10, 2015 closing, Royal Gold's total gold NSR royalty interest in the Pascua-Lama project increased to 5.45% at gold prices above \$800 per ounce, while the additional gold equivalent royalty on proceeds from copper produced from the Chilean portion of the project, increased to 1.09%.

Acquisition of Gold Stream at Carmen de Andacollo

On July 9, 2015, RGLD Gold entered into a Long Term Offtake Agreement (the "Andacollo Stream Agreement") with Compañía Minera Teck Carmen de Andacollo ("CMCA"), a 90% owned subsidiary of Teck Resources Limited ("Teck"). Pursuant to the Andacollo Stream Agreement, CMCA will sell and deliver to RGLD Gold 100% of payable gold from the Carmen de Andacollo ("Andacollo") copper-gold mine until 900,000 ounces have been delivered, and 50% thereafter, subject to a fixed payable percentage of 89%. RGLD Gold made a \$525 million advance payment in cash to CMCA upon entry into the Andacollo Stream Agreement, and RGLD Gold will also pay CMCA 15% of the monthly average gold price for the month preceding the delivery date for all gold purchased under the Andacollo Stream Agreement.

The transaction will encompass certain of CMCA's presently owned mining concessions on the Andacollo mine, as well as any other mining concessions presently owned or acquired by CMCA or any of its affiliates within a 1.5 kilometer area of interest, and certain other mining concessions that CMCA or its affiliates may acquire. The Andacollo Stream Agreement is effective as of July 1, 2015, and applies to all final settlements of gold received on or after that date. RGLD Gold sold approximately 9,500 ounces of gold delivered from CMCA during the

Edgar Filing: ROYAL GOLD INC - Form 10-Q

quarter ended September 30, 2015, and has approximately 300 ounces of gold remaining in inventory as of such date.

Table of Contents*Termination of Royalty Interest at Carmen de Andacollo*

On July 9, 2015, Royal Gold Chile Limitada (RG Chile), a wholly owned subsidiary of the Company, entered into a Royalty Termination Agreement with CMCA. The Royalty Termination Agreement terminated an amended Royalty Agreement originally dated January 12, 2010, which provided RG Chile with a royalty equivalent to 75% of the gold produced from the sulfide portion of the Andacollo mine until 910,000 payable ounces have been produced, and 50% of the gold produced thereafter. CMCA paid total consideration of \$345 million to RG Chile in connection with the Royalty Termination Agreement. The royalty termination transaction will be taxable in Chile and the United States.

Principal Royalty and Stream Interests

The Company considers both historical and future potential revenues in determining which royalty and stream interests in our portfolio are principal to our business. Estimated future potential revenues from both producing and development properties are based on a number of factors, including reserves subject to our royalty and stream interests, production estimates, feasibility studies, metal price assumptions, mine life, legal status and other factors and assumptions, any of which could change and could cause the Company to conclude that one or more of such royalty and stream interests are no longer principal to our business. Our principal producing and development royalty and stream interests are listed alphabetically in the following tables.

Please refer to our Fiscal 2015 10-K for further discussion of our principal producing and development royalty and stream interests.

Principal Producing Properties

Mine	Location	Operator	Royalty or stream interests (Gold unless otherwise stated)
Andacollo	Region IV, Chile	Compañía Minera Teck Carmen de Andacollo	Gold stream - 100% of gold produced (until 900,000 ounces delivered; 50% thereafter)
Cortez	Nevada, USA	Barrick	GSR1: 0.40% to 5.0% sliding-scale GSR GSR2: 0.40% to 5.0% sliding-scale GSR GSR3: 0.71% GSR NVR1: 1.014% NVR; 0.618% NVR (Crossroads)
Holt	Ontario, Canada	St Andrew Goldfields Ltd. (St Andrew)	0.00013 x quarterly average gold price NSR
Mt. Milligan	British Columbia, Canada	Thompson Creek Metals Company Inc. (Thompson Creek)	Gold stream - 52.25% of payable gold
Peñasquito	Zacatecas, Mexico	Goldcorp	2.0% NSR (gold, silver, lead, zinc)
Pueblo Viejo(1)	Dominican Republic	Barrick (60%)	Gold stream - 7.5% of gold produced (until 990,000 ounces delivered; 3.75% thereafter) Silver stream - 75% of silver produced (until 50.0 million ounces delivered; 37.5% thereafter)
Voisey's Bay	Newfoundland and Labrador, Canada	Vale Newfoundland & Labrador Limited (Vale)	2.7% NSR (nickel, copper, cobalt)
Wassa/Bogoso/Pretea(1)		Golden Star	

Edgar Filing: ROYAL GOLD INC - Form 10-Q

Western Region of
Ghana

Gold stream - 8.5% of gold produced (until 185,000 ounces delivered); 5.0% of gold produced (until an additional 22,500 ounces delivered; 3.0% thereafter)

Table of Contents

(1) The gold and silver stream at Pueblo Viejo and the gold stream at Wassa/Bogoso/Pretea were acquired during the three months ended September 30, 2015. Please refer to Recent Business Developments above for further discussion on these acquisitions.

Principal Development Properties

Mine	Location	Operator	Royalty or stream interests (Gold unless otherwise stated)
Rainy River(1)	Ontario, Canada	New Gold	Gold stream - 6.5% of gold produced (until 230,000 ounces delivered; 3.25% thereafter) Silver stream - 60% of silver produced (until 3.1 million ounces delivered; 30% thereafter)
Pascua-Lama(1)	Region III, Chile	Barrick	0.78% to 5.45% sliding-scale NSR 1.09% fixed rate royalty (copper)

(1) The gold and silver stream at Rainy River and the additional royalty interest at Pascua-Lama were acquired during the three months ended September 30, 2015. Please refer to Recent Business Developments above for further discussion on these acquisitions.

Operators Production Estimates by Royalty and Stream Interest for Calendar 2015

We received annual production estimates from many of the operators of our producing mines during the first calendar quarter of 2015. The following table shows such production estimates for our principal producing properties for calendar 2015 as well as the actual production reported to us by the various operators through September 30, 2015. The estimates and production reports are prepared by the operators of the mining properties. We do not participate in the preparation or calculation of the operators' estimates or production reports and have not independently assessed or verified the accuracy of such information. Please refer to Property Developments below within this MD&A for further discussion on any updates at our principal producing or development properties.

Operators Estimated and Actual Production by Royalty and Stream Interest for Calendar 2015**Principal Producing Properties**

For the period January 1, 2015 through September 30, 2015

Royalty/Stream	Calendar 2015 Operator's Production Estimate(1),(2)			Calendar 2015 Operator's Production Actual(3),(4)		
	Gold (oz.)	Silver (oz.)	Base Metals (lbs.)	Gold (oz.)	Silver (oz.)	Base Metals (lbs.)
Andacollo(5)	52,200			33,600		

Edgar Filing: ROYAL GOLD INC - Form 10-Q

Cortez GSR1	104,100		101,300	
Cortez GSR2	27,900		30,400	
Cortez GSR3	132,000		131,700	
Cortez NVR1	97,200		97,600	
Holt	64,000		48,700	
Mount Milligan(6)	200,000-220,000		159,800	
Penasquito(7),(8)	700,000-750,000	24-26 million	690,400	19.5 million
			175-185 million	133.4 million
			400-415 million	299.5 million
Pueblo Viejo(9)	625,000-675,000		438,000	
Wassa/Bogoso/Pretea(10)	205,000-215,000		170,300	

(1) Production estimates received from our operators are for calendar 2015. There can be no assurance that production estimates received from our operators will be achieved. Please refer to our cautionary language regarding forward-looking statements following this MD&A, as

Table of Contents

well as the Risk Factors identified in Part I, Item 1A, of our Fiscal 2015 10-K for information regarding factors that could affect actual results.

(2) Vale did not release public production guidance for calendar 2015, thus estimated and actual production information for Voisey's Bay is not shown in the table.

(3) Actual production figures shown are for the period January 1, 2015 through September 30, 2015, unless otherwise noted.

(4) Actual production figures for Andacollo and Cortez are based on information provided to us by the operators, and actual production figures for Holt, Mount Milligan, Peñasquito (gold) and Wassa/Bogoso/Prestea are the operators' publicly reported figures.

(5) The estimated and actual production figures shown for Andacollo are contained gold in concentrate.

(6) The estimated and actual production figures shown for Mount Milligan are payable gold in concentrate.

(7) The estimated gold and silver production figures reflect payable gold and silver in concentrate and doré, while the estimated lead and zinc production figures reflect payable metal in concentrate.

(8) The actual gold production figure for gold reflects payable gold in concentrate and doré as reported by the operator. The actual production for silver, lead and zinc were not publicly available. The Company's royalty interest at Peñasquito includes gold, silver, lead and zinc.

(9) The gold and silver stream at Pueblo Viejo was acquired during the quarter ended September 30, 2015 and the first gold delivery is expected in December 2015 for the period July 1 – November 30, 2015. Please refer to Recent Business Developments above for further information. The estimated and actual production figures shown are payable gold in doré and represent Barrick's 60% interest in Pueblo Viejo.

(10) The gold stream at Wassa/Bogoso/Prestea was acquired during the quarter ended September 30, 2015. Please refer to Recent Business Developments above for further information. The estimated production figure shown is payable gold in doré.

Property Developments

The following information is provided by the operators of the property, either to Royal Gold or in various documents made publicly available.

Andacollo

In late September 2015, a major earthquake in Chile damaged Teck's ship loading facilities at the port of Coquimbo. Teck reported that production to-date has not been materially affected, but shipments of concentrate have been temporarily suspended through the port facility while the operator completes damage assessments and repairs. Alternate loading arrangements are being arranged. Teck reported that there was sufficient storage capacity at the port and mine site through to the end of October 2015.

Andacollo delivers gold to RGLD Gold within five business days following the end of the month in which final smelter settlement occurs. RGLD Gold typically sells gold ounces over a few weeks following physical receipt. Andacollo final settlements generally take five to six months from the bill-of-lading date. The difference in timing between Andacollo quarterly production and final smelter settlements may result in divergences of ounces reported by Teck and those reported by Royal Gold for future quarters.

Cortez

Production attributable to our royalty interest at Cortez decreased approximately 62% over the prior year quarter as mining moved into Cortez Hills, which is not subject to our royalty interest. Barrick has indicated that mining in calendar 2015 will include Cortez Hills, which is not subject to our interest, and Crossroads pre-stripping. Waste stripping in the Crossroads pit carried out during the first half of calendar 2015 has ended while dewatering wells were completed and started pumping in anticipation of additional stripping in calendar 2016. As a result, production subject to our interests is expected to be lower during the remainder of calendar 2015.

Table of Contents

Holt

Production attributable to our royalty interest at Holt increased 10 % over the prior year quarter as a result of higher head grades due to stope sequencing and lower dilution. St Andrew reported Zone 4 contributed 80% of the ore and Zone 6 contributed the remainder of production at Holt. Throughput was similar to the previous two quarters and mill recoveries were at their expected level of 95%.

Mount Milligan

Thompson Creek reported production of 53,800 ounces of payable gold during the quarter, a decrease of 11% over the prior year quarter. Mill throughput averaged 44,077 tonnes per day for the quarter, a 9% increase over the prior year quarter, while grade was lower by 19%. Thompson Creek reported some challenges in further increasing mill throughput in the quarter due to issues with the SAG screen deck. Thompson Creek scheduled the installation of a second SAG discharge screen deck in October 2015, which they expect will allow them to increase throughput. Mill availability was impacted by scheduled shutdowns to complete maintenance on the primary crusher, reline the ball mills and to perform the annual inspection of the SAG mill motor. Gold recoveries were slightly lower during the quarter, averaging 67.3%.

Thompson Creek delivers gold to RGLD Gold within two business days of receipt of final smelter settlement proceeds and RGLD Gold typically sells gold ounces over a few weeks following physical receipt. Mount Milligan final settlements generally take five months from the bill-of-lading date. The difference in timing between Mount Milligan quarterly production results and final smelter settlements may result in divergences of ounces reported by Thompson Creek and those reported by Royal Gold for each quarter.

Peñasquito

Gold, silver, lead and zinc production attributable to our royalty interest at Peñasquito increased approximately 58%, 12%, 19% and 39%, respectively. Production was driven primarily by higher gold grades in sulphide as a result of positive model reconciliation. As a result of continued strong performance, Goldcorp has stated they expect to exceed their production guidance of between 700,000 and 750,000 ounces. Peñasquito continued with the Metallurgical Enhancement Project (MEP) feasibility study which remains on schedule to be completed in early calendar 2016.

Phoenix Gold

On November 3, 2015, Rubicon Minerals Corporation (Rubicon) reported that they are moving to suspend underground activities at the Phoenix Gold Project while they enhance the geological model and develop a project implementation plan, which they expect in the second quarter of calendar 2016. The mill is currently operating and Rubicon reported that they have a stock pile of approximately 11,000 tonnes of mineralized material at a grade of approximately 4.0 grams per tonne that they expect to process in November 2015.

Table of Contents

Voisey's Bay

Historically, Vale supplied us with Voisey's Bay nickel concentrate shipment data on a monthly basis, and copper concentrate shipment data on a quarterly basis. This data allowed us to estimate our Voisey's Bay quarterly royalty revenue for financial reporting purposes. We did not receive all of this data for the months relevant to the royalty payments due for the December 2014 and March 2015 quarters, and in April 2015 we announced our intention to recognize Voisey's Bay royalty revenue on a cash basis, or in the period in which actual payment information is received from Vale, beginning with the June 2015 quarter. Production attributable to our royalty interest at Voisey's Bay for the September 2015 quarter (from Vale's production during the June 2015 quarter) was 1.7 million pounds of copper and 37.8 million pounds of nickel.

Vale reported that it is processing a blend of nickel matte from its Indonesian operations and nickel concentrates from Voisey's Bay at its new Long Harbour hydrometallurgical plant, and that it will process only Voisey's Bay concentrate at Long Harbour by the end of calendar 2015 or early calendar 2016. We received the first two quarterly royalty payments relating to processing Voisey's Bay nickel concentrates at Long Harbour. In response to questions concerning Vale's determination of the Long Harbour smelter and refining charges deducted from actual proceeds to calculate the net smelter return royalty payable, Vale recently stated that the charges included the cost of product sold, pre-operating costs, depreciation and cost of capital. Royal Gold strongly disagrees with Vale's determination that these charges are permissible deductions pursuant to the royalty agreement and is requesting further clarification of the basis for these charges while aggressively pursuing its legal remedies. See Note 12 to the consolidated financial statements for discussion of litigation between the Company and Vale.

Wassa, Bogoso and Prestea

Golden Star reported access decline development for the Wassa underground project in July 2015 and the completion of 382 meters through October 28, 2015. Production from development ore is expected in March 2016. Golden Star stated they are on track to meet production guidance of 110,000-115,000 ounces of gold at Wassa for calendar 2015.

At Prestea, mining permits were received for development of surface pits south of Prestea, which contained free milling ores with high gold recoveries, and production has been realized from this source during the quarter. Drilling continued during the quarter to extend the life of oxide ore mining beyond calendar 2016. Construction capital expenditure for the underground mine was approved during the third quarter of 2015 and work has commenced on procurement for long-lead electrical and winder upgrade components. Rehabilitation works are ongoing in 17 level and 24 level access development and in the Central Shaft. All rehabilitation works are on schedule for completion in the first quarter of 2016. Mechanical and electrical rehabilitation work is planned to be completed in the third quarter of 2016 whereupon development will commence. Pre-development of the resource will take place from the fourth quarter of 2016 to mid-2017. Stoping is expected to start in mid-2017, ramping up to 500 tonnes per day by the end of the 2017. The feasibility study is scheduled to be finalized in November 2015.

Table of Contents

The processing of non-refractory tailings at Bogoso was suspended during the current quarter in order to make way for the processing of higher grade ore from the Prestea open pits at the Bogoso non-refractory plant. The Prestea open pits are now in operation, while the underground mine is currently in re-development. Stoping at Prestea is expected to start in mid-calendar 2017, ramping up to 500 tonnes per day by the end of calendar 2017. Golden Star stated they are on track to meet production guidance of 95,000-100,000 ounces of gold at Bogoso/Prestea for calendar 2015.

Golden Star delivers gold to RGLD Gold within five business days of the receipt of the final smelter settlement proceeds and RGLD Gold typically sells gold ounces over a few weeks following physical receipt. The difference in timing between Wassa, Bogoso and Prestea quarterly production results and final smelter settlements may result in divergences of ounces reported by Golden Star figures and those reported by Royal Gold for each quarter.

Results of Operations

Quarter Ended September 30, 2015, Compared to Quarter Ended September 30, 2014

For the quarter ended September 30, 2015, we recorded a net loss attributable to Royal Gold stockholders of \$45.0 million, or (\$0.69) per basic and diluted share, as compared to net income attributable to Royal Gold stockholders of \$18.7 million, or \$0.29 per basic and diluted share, for the quarter ended September 30, 2014. The decrease in our earnings per share was primarily attributable to an increase in tax expense due to the Company's termination of the Andacollo royalty interest, as discussed below, and the planned liquidation of our Chilean subsidiary of approximately \$56.0 million. This decrease was partially offset by an increase in our revenue, which is also discussed below. The effect of the tax expense attributable to the termination of the Andacollo royalty interest during the quarter ended September 30, 2015, was \$0.86 per share.

For the quarter ended September 30, 2015, we recognized total revenue of \$74.1 million, which is comprised of stream revenue of \$37.9 million and royalty revenue of \$36.2 million, at an average gold price of \$1,124 per ounce, an average silver price of \$14.91 per ounce, an average nickel price of \$4.79 per pound and an average copper price of \$2.39 per pound. This is compared to total revenue of \$69.0 million for the three months ended September 30, 2014, which was comprised of royalty revenue of \$49.4 million and stream revenue of \$19.7 million, at an average gold price of \$1,282 per ounce, an average silver price of \$19.76 per ounce, an average nickel price of \$8.43 per pound and an average copper price of \$3.17 per pound for the quarter ended September 30, 2014. Revenue and the corresponding production attributable to our royalty and stream interests for the quarter ended September 30, 2015 compared to the quarter ended September 30, 2014 is as follows:

Edgar Filing: ROYAL GOLD INC - Form 10-Q

Total Revenue		\$	74,056			\$	69,026		

- (1) Reported production relates to the amount of metal sales, subject to our royalty and stream interests, for the three months ended September 30, 2015 and 2014, as reported to us by the operators of the mines, and may differ from the operators public reporting.
- (2) Refer to Property Developments above for further discussion on our principal stream interests. Our streams at Andacollo and Wassa/Bogoso/Pretea were acquired during the quarter ended September 30, 2015.
- (3) Refer to Recent Business Developments above for further discussion on the recent Andacollo royalty sale and Andacollo gold stream acquisition.
- (4) Individually, no stream or royalty included within the Other category contributed greater than 5% of our total revenue for either period.

The increase in our total revenue for the quarter ended September 30, 2015, compared with the quarter ended September 30, 2014, resulted primarily from an increase in our stream revenue, which was a result of increased production at Mount Milligan and new production from our streams at Andacollo and Golden Star. Gold ounces purchased and sold during the three months ended September 30, 2015, and gold ounces in inventory as of September 30, 2015, for our streaming interests was as follows:

Edgar Filing: ROYAL GOLD INC - Form 10-Q

Table of Contents

	Three months ended September 30, 2015			As of September 30, 2015
Stream	Gold ounces purchased	Gold ounces sold	Average realized gold price/ounce	Gold ounces in inventory
Mount Milligan	23,783	20,956	\$ 1,120	8,084
Andacollo	9,788	9,513	\$ 1,126	275
Wassa/Bogoso/Pretea	6,335	3,242	\$ 1,118	3,094
Phoenix Gold	75	47	\$ 1,133	28
Total	39,981	33,758	\$ 1,121	11,481

Our royalty revenue decreased during the quarter ended September 30, 2015, compared with the quarter ended September 30, 2014, due to decreases in the average gold, silver, copper and nickel prices and due to a production decrease at Cortez and the recent sale of the Andacollo royalty. These decreases were partially offset by increased production at Peñasquito. Please refer to Recent Business Developments and Property Developments earlier within this MD&A for further discussion on any recent developments regarding properties covered by certain of our royalty and stream interests.

Cost of sales were approximately \$11.5 million for the three months ended September 30, 2015, compared to \$6.7 million for the three months ended September 30, 2014. The increase is primarily attributable to an increase in production at Mount Milligan and new stream production at Andacollo and Wassa/Bogoso/Pretea. Cost of sales is specific to our stream agreements and is the result of RGLD Gold's purchase of gold for a cash payment. For Mount Milligan the cash payment is the lesser of \$435 per ounce, or the prevailing market price of gold when purchased, while the cash payment for our other streams is a set contractual percentage of the gold or silver spot price near the date of metal delivery.

General and administrative expenses increased to \$9.5 million for the three months ended September 30, 2015, from \$7.1 million for the three months ended September 30, 2014. The increase was primarily due to an increase in non-cash stock based compensation expense as a result of management's change in estimate for the number of performance shares that are expected to vest in future periods.

Depreciation, depletion and amortization increased to \$27.1 million for the quarter ended September 30, 2015, from \$22.2 million for the quarter ended September 30, 2014. The increase was primarily attributable to the ramp-up in production at Mount Milligan, new production from the recently acquired stream at Wassa/Bogoso/Pretea and additional production from Andacollo as a result of the recently acquired gold stream.

During the quarter ended September 30, 2015, we recognized an income tax expense totaling \$59.2 million compared with income tax expense of \$4.0 million during the quarter ended September 30, 2014. This resulted in an effective tax rate of 415.7% in the current period, compared with 17.3% in the quarter ended September 30, 2014. The increase in the effective tax rate for the three months ended September 30, 2015 is primarily related to the discrete tax impacts attributable to the Company's Andacollo transactions and the planned liquidation of our Chilean subsidiary. Excluding the discrete item related to the termination of the Andacollo royalty interest, our effective tax rate for the period would have been 22.2%. Refer to Recent Business Developments above for further discussion on the Company's termination of our royalty interest at Andacollo. For a complete discussion of the factors that influence our effective tax rate, refer to Note 11 to the notes to consolidated financial statements in the Company's Fiscal 2015 10-K.

Table of Contents

Liquidity and Capital Resources

Overview

At September 30, 2015, we had current assets of \$152.3 million compared to current liabilities of \$27.1 million for a current ratio of 6 to 1. This compares to current assets of \$790.8 million and current liabilities of \$25.0 million at June 30, 2015, resulting in a current ratio of approximately 32 to 1. The decrease in our current ratio was primarily attributable to a decrease in our cash and equivalents as a result of the recent royalty and stream acquisitions during the current period, as discussed earlier under Recent Business Developments. Please refer to Summary of Cash Flows below for further discussion on changes to our cash and equivalents during the period.

During the quarter ended September 30, 2015, liquidity needs were met from \$74.1 million in revenue, our available cash resources, and borrowings under our revolving credit facility. As of September 30, 2015, the Company had \$300 million available and \$350 million outstanding under its revolving credit facility. The Company was in compliance with each financial covenant as of September 30, 2015. Refer to Note 5 of our notes to consolidated financial statements for further discussion on our debt.

Working capital totaled approximately \$125.2 million at September 30, 2015. When combined with the \$300 million of availability under our revolving credit facility, total liquidity at September 30, 2015, was \$425.2 million. As discussed above under Recent Business Developments, the Company entered into several new significant transactions that, when added to existing firm commitments, totaled approximately \$72.5 million in anticipated capital expenditures for the remainder of fiscal year 2016. The Company plans to fund these commitments with its existing liquidity plus cash flow from operations. Cash flow from operations was \$2.5 million for the three months ended September 30, 2015, which considers the effects of approximately \$47.7 million of total cash taxes related to the termination of the Andacollo royalty. Operating cash flow is expected to increase during the remainder of fiscal year 2016 (assuming similar gold prices) as three of the new transactions are expected to deliver incremental operating cash flow during fiscal year 2016.

We believe that our current financial resources and funds generated from operations will be adequate to cover anticipated expenditures for debt service, general and administrative expense costs and capital expenditures for the foreseeable future. Our current financial resources are also available to fund dividends and for acquisitions of royalty and stream interests, including the remaining conditional commitments incurred in connection with the Ilovica, Golden Star and Rainy River stream acquisitions and the Peak Gold joint venture. Our long-term capital requirements are primarily affected by our ongoing acquisition activities. The Company currently, and generally at any time, has acquisition opportunities in various stages of active review. In the event of one or more substantial royalty and stream interest or other acquisitions, we may seek additional debt or equity financing as necessary.

Please refer to our risk factors included in Part 1, Item 1A of our Fiscal 2015 10-K for a discussion of certain risks that may impact the Company's liquidity and capital resources.

Summary of Cash Flows

Operating Activities

Net cash provided by operating activities totaled \$2.5 million for the three months ended September 30, 2015, compared to \$52.5 million for the three months ended September 30, 2014. The decrease was primarily due to an increase in income taxes paid of \$56.1 million. This decrease was partially offset by an increase in proceeds received from our royalty and streaming interests, net of production taxes and cost of sales.

Table of Contents

Investing Activities

Net cash used in investing activities totaled \$976.1 million for the three months ended September 30, 2015, compared to cash used in investing activities of \$6.3 million for the three months ended September 30, 2014. The increase in cash used in investing activities is primarily due to an increase in acquisitions of royalty and stream interests in mineral properties (primarily Pueblo Viejo and Andacollo stream acquisition) compared to the prior year quarter. Refer to *Recent Business Developments* above for further discussion on our recently acquired streams.

Financing Activities

Net cash provided by financing activities totaled \$335.1 million for the three months ended September 30, 2015, compared to cash used in financing activities of \$14.2 million for the three months ended September 30, 2014. The increase in cash provided by financing activities is primarily due to the Company's \$350 million borrowing under its revolving credit facility to fund stream acquisitions during the current period. Refer to *Recent Business Developments* above for further discussion on our recently acquired streams.

Recently Adopted Accounting Standards

There were no new accounting standards adopted during the three months ended September 30, 2015.

Critical Accounting Policies

Asset Impairment

We evaluate long-lived assets for impairment whenever events or changes in circumstances indicate that the related carrying amounts of an asset or group of assets may not be recoverable. The recoverability of the carrying value of royalty and stream interests in production and development stage mineral properties is evaluated based upon estimated future undiscounted net cash flows from each royalty and stream interest property using estimates of proven and probable reserves and other relevant information received from the operators. We evaluate the recoverability of the carrying value of royalty interests in exploration stage mineral properties in the event of significant decreases in the price of gold, silver, copper, nickel and other metals, and whenever new information regarding the mineral properties is obtained from the operator indicating that production will not likely occur or may be reduced in the future, thus affecting the future recoverability of our royalty interests. Impairments in the carrying value of each property are measured and recorded to the extent that the carrying value in each property exceeds its estimated fair value, which is generally calculated using estimated future discounted cash flows.

Our estimates of gold, silver, copper, nickel and other metal prices, operators' estimates of proven and probable reserves related to our royalty or streaming properties, and operators' estimates of operating, capital and reclamation costs are subject to certain risks and uncertainties which may

affect the recoverability of our investment in these royalty and stream interests in mineral properties. Although we have made our best assessment of these factors based on current market conditions, it is possible that changes could occur, which could adversely affect the net cash flows expected to be generated from these royalty and stream interests.

Forward-Looking Statements

Cautionary Safe Harbor Statement under the Private Securities Litigation Reform Act of 1995: With the exception of historical matters, the matters discussed in this Quarterly Report on Form 10-Q are forward-looking statements that involve risks and uncertainties that could cause actual results to differ materially from projections or estimates contained herein. Such forward-looking statements include, without limitation, statements regarding projected production estimates and estimates pertaining to timing and commencement of production from the operators of properties where we hold royalty and stream interests; effective tax rate estimates; the adequacy of financial resources and funds to cover anticipated expenditures for general and administrative expenses as well as costs associated with exploration and business development and capital expenditures, and our expectation that substantially all our revenues will be derived from royalty and stream interests. Words such as may, could, should, would, believe, estimate, expect, anticipate, plan, forecast, potential, intend, continue, project, comparable words and similar expressions generally indicate forward-looking statements, which speak only as of the date the statement is made. Do not unduly rely on forward-looking statements. Actual results may differ materially from those expressed or implied by these forward-looking statements. Factors that could cause actual results to differ materially from these forward-looking statements include, among others:

- a continued low price environment for gold and other metals prices on which our royalty and stream interests are paid or a continued low price environment for the primary metals mined at properties where we hold royalty and stream interests;
- the production at or performance of properties where we hold royalty and stream interests;
- the ability of operators to bring projects, particularly development stage properties, into production on schedule or operate in accordance with feasibility studies;
- challenges to mining, processing and related permits and licenses, or to applications for permits and licenses, by or on behalf of indigenous populations, non-governmental organizations or other third parties;
- liquidity or other problems our operators may encounter, including shortfalls in the financing required to complete construction and a bring a mine into production;
- decisions and activities of the operators of properties where we hold royalty and stream interests;
- hazards and risks at the properties where we hold royalty and stream interests that are normally associated with developing and mining properties, including unanticipated grade and geological, metallurgical, processing or

other problems, mine operating and ore processing facility problems, pit wall or tailings dam failures, industrial accidents, environmental hazards and natural catastrophes such as floods or earthquakes and access to raw materials, water and power;

- changes in operators' mining, processing and treatment techniques, which may change the production of minerals subject to our royalty and stream interests;
- changes in the methodology employed by our operators to calculate our royalty and stream interests in accordance with the agreements that govern them;
- changes in project parameters as plans of the operators of properties where we hold royalty and stream interests are refined;
- decreases in estimates of reserves and mineralization by the operators of properties where we hold royalty and stream interests;

Table of Contents

- contests to our royalty and stream interests and title and other defects to the properties where we hold royalty and stream interests;
- adverse effects on market demand for commodities, the availability of financing, and other effects from adverse economic and market conditions;
- future financial needs of the Company and the operators;
- federal, state and foreign legislation governing us or the operators of properties where we hold royalty and stream interests;
- the availability of royalty and stream interests for acquisition or other acquisition opportunities and the availability of debt or equity financing necessary to complete such acquisitions;
- our ability to make accurate assumptions regarding the valuation, timing and amount of revenue to be derived from our royalty and stream interests when evaluating acquisitions;
- risks associated with conducting business in foreign countries, including application of foreign laws to contract and other disputes, validity of security interests, environmental, governmental consents for granting interests in exploration and exploration licenses, real estate, contract and permitting laws, currency fluctuations, expropriation of property, repatriation of earnings, taxation, price controls, inflation, import and export regulations, community unrest and labor disputes, endemic health issues, corruption, enforcement and uncertain political and economic environments;
- changes in laws governing us, the properties where we hold royalty and stream interests or the operators of such properties;
- risks associated with issuances of additional common stock or incurrence of indebtedness in connection with acquisitions or otherwise including risks associated with the issuance and conversion of convertible notes;

- acquisition and maintenance of permits and authorizations, completion of construction and commencement and continuation of production at the properties where we hold royalty and stream interests;
- changes in management and key employees; and
- failure to complete future acquisitions;

as well as other factors described elsewhere in this report and our other reports filed with the SEC. Most of these factors are beyond our ability to predict or control. Future events and actual results could differ materially from those set forth in, contemplated by or underlying the forward-looking statements. Forward-looking statements speak only as of the date on which they are made. We disclaim any obligation to update any forward-looking statements made herein, except as required by law. Readers are cautioned not to put undue reliance on forward-looking statements.

RISK**

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET

Our earnings and cash flows are significantly impacted by changes in the market price of gold and other metals. Gold, silver, copper, nickel and other metal prices can fluctuate significantly and are affected by numerous factors, such as demand, production levels, economic policies of central banks, producer hedging, world political and economic events and the strength of the U.S. dollar relative to other currencies. Please see *Volatility in gold, silver, copper, nickel and other metal prices may have an adverse impact on the value of our royalty and stream interests and may reduce our revenues. Certain*

Table of Contents

contracts governing our royalty and stream interests have features that may amplify the negative effects of a drop in metals prices, under Part I, Item 1A of our Fiscal 2015 10-K, for more information that can affect gold, silver, copper, nickel and other metal prices as well as historical gold, silver, copper and nickel prices.

During the three month period ended September 30, 2015, we reported revenue of \$74.1 million, with an average gold price for the period of \$1,124 per ounce, an average silver price of \$14.91 per ounce, an average copper price of \$2.39 per pound and an average nickel price of \$4.79 per pound. Approximately 81% of our total reported revenues for the three months ended September 30, 2015 were attributable to gold sales from our gold producing royalty and stream interests, as shown within the MD&A. For the three months ended September 30, 2015, if the price of gold had averaged 10% higher or lower per ounce, we would have recorded an increase or decrease in revenue of approximately \$6.4 million and \$6.3 million, respectively.

Approximately 7% of our total reported revenues for the three months ended September 30, 2015 were attributable to nickel sales from our nickel producing royalty interests. For the three months ended September 30, 2015, if the price of nickel had averaged 10% higher or lower per pound, we would have recorded an increase or decrease in revenue of approximately \$0.5 million.

Approximately 5% of our total reported revenues for the three months ended September 30, 2015 were attributable to copper sales from our copper producing royalty interests. For the three months ended September 30, 2015, if the price of copper had averaged 10% higher or lower per pound, we would have recorded an increase or decrease in revenue of approximately \$0.5 million.

Approximately 3% of our total reported revenues for the three months ended September 30, 2015 were attributable to silver sales from our silver producing royalty interests. For the three months ended September 30, 2015, if the price of silver had averaged 10% higher or lower per ounce, we would have recorded an increase or decrease in revenue of approximately \$0.3 million.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

As of September 30, 2015, the Company's management, with the participation of the President and Chief Executive Officer (the principal executive officer) and Chief Financial Officer and Treasurer (the principal financial and accounting officer) of the Company, carried out an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended (the Exchange Act)). Based on such evaluation, the Company's President and Chief Executive Officer and its Chief Financial Officer and Treasurer have concluded that, as of September 30, 2015, the Company's disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the required time periods and that such information is accumulated and

communicated to the Company's management, including the President and Chief Executive Officer and its Chief Financial Officer and Treasurer, as appropriate to allow timely decisions regarding required disclosure.

Disclosure controls and procedures involve human diligence and compliance and are subject to lapses in judgment and breakdowns resulting from human failures. As a result, a control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints and the benefits of controls must be considered relative to their costs. Because of the

Table of Contents

inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected.

Changes in Internal Controls

There has been no change in the Company's internal control over financial reporting during the three months ended September 30, 2015, that has materially affected, or that is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Voisey's Bay

Refer to Note 12 of our notes to consolidated financial statements for a discussion of the litigation associated with our Voisey's Bay royalty.

ITEM 1A. RISK FACTORS

Information regarding risk factors appears in Part I, Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations, Forward-Looking Statements, and various risks faced by us are also discussed elsewhere in Part I, Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations of this Quarterly Report on Form 10-Q. In addition, risk factors are included in Part I, Item 1A of our Fiscal 2015 10-K.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Not applicable.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

Not applicable.

ITEM 4. MINE SAFETY DISCLOSURE

Not applicable.

ITEM 5. OTHER INFORMATION

Not applicable.

ITEM 6. EXHIBITS

The exhibits to this Quarterly Report on Form 10-Q are listed in the Exhibit Index.
