Item 7.01 Regulation FD Disclosure

The information included in Exhibit 99 is incorporated by reference in response to this Item 7.01, and is deemed to be furnished, not filed, pursuant to Item 7.01 of Form 8-K.

On September 5-7, 2006, members of PG&E Corporation's management will participate in the Lehman Brothers CEO Energy/Power Conference in New York, N.Y. at which the presentation attached hereto as Exhibit 99 will be used.

Exhibit 99 attached to this report contains forward-looking statements regarding management's guidance for PG&E Corporation's 2006 and 2007 earnings per share from operations, as well as forecasted capital expenditures, rate base growth, and targeted average annual growth rate for earnings per share from operations over the 2006-2010 time period. These statements are based on current expectations and various assumptions which management believes are reasonable, including that the settlement agreement reached among parties in Pacific Gas and Electric Company's (Utility) 2007 General Rate Case (GRC) proceeding is approved by the California Public Utilities Commission (CPUC) and that the Utility earns its authorized rate of return on equity of 11.35% on forecasted rate base amounts. These statements and assumptions are necessarily subject to various risks and uncertainties, the realization or resolution of which are outside of management's control. Actual results may differ materially. Factors that could cause actual results to differ materially include:

- Unanticipated changes in operating expenses or capital expenditures, which may affect the Utility's ability to earn its authorized rate of return;
 - How the Utility manages its responsibility to procure electric capacity and energy for its customers;
- The adequacy and price of natural gas supplies, and the ability of the Utility to manage and respond to the volatility of the natural gas market for its customers;
- The operation of the Utility's Diablo Canyon nuclear power plant, which could cause the Utility to incur potentially significant environmental costs and capital expenditures, and the extent to which the Utility is able to timely increase its spent nuclear fuel storage capacity at Diablo Canyon;
- Whether the Utility is able to recognize the benefits expected to result from its efforts to improve customer service through implementation of specific initiatives to streamline business processes and deploy new technology;
- The outcome of proceedings pending at the Federal Energy Regulatory Commission (FERC) and the CPUC, including the Utility's 2007 GRC and the Utility's application for approval of new long-term generation resource commitments;
- How the CPUC administers the capital structure, stand-alone dividend, and first priority conditions of the CPUC's decisions permitting the establishment of holding companies for the California investor-owned electric utilities, and the outcome of the CPUC's new rulemaking proceeding concerning the relationship between the California investor-owned energy utilities and their holding companies and non-regulated affiliates;
- The impact of the recently adopted Energy Policy Act of 2005 and future legislative or regulatory actions or policies affecting the energy industry;
 - Increased municipalization and other forms of bypass in the Utility's service territory; and
 - Other factors discussed in PG&E Corporation's SEC reports.

Item 9.01 Financial Statements and Exhibits
