## Forward-Looking Statements

The Private Securities Litigation Reform Act of 1995 provides a "safe harbor" for forward-looking statements made by or on behalf of Photronics, Inc. ("Photronics" or the "Company"). These statements are based on management's beliefs, as well as assumptions made by, and information currently available to, management. Forward-looking statements may be identified by words like "expect", "anticipate", "believe", "plan", "projects", and similar expressions, or the negative of such terms, or other comparable terminology. All forward-looking statements involve risks and uncertainties that are difficult to predict. In particular, any statement contained in this quarterly report on Form 10-Q, in press releases, written statements, or other documents filed with the Securities and Exchange Commission, or in the Company's communications and discussions with investors and analysts in the normal course of business through meetings, phone calls, or conference calls regarding the consummation and benefits of future acquisitions, expectations with respect to future sales, financial performance, operating efficiencies, or product expansion, are subject to known and unknown risks, uncertainties, and contingencies, many of which are beyond the control of the Company. These factors may cause actual results, performance, or achievements to differ materially from anticipated results, performance, or achievements expressed or implied by such forward-looking statements. Factors that might affect such forward-looking statements include, but are not limited to, overall economic and business conditions; economic and political conditions in international markets; the demand for the Company's products; competitive factors in the industries and geographic markets in which the Company competes; changes in federal, state and international tax requirements (including tax rate changes, new tax laws and revised tax law interpretations); interest rate fluctuations and other capital market conditions, including changes in the market price of the Company's common stock; foreign currency exchange rate fluctuations; changes in technology; the timing, impact, and other uncertainties of future acquisitions; the seasonal and cyclical nature of the semiconductor and flat panel display industries; management changes; damage or destruction to the Company's facilities, or the facilities of its customers or suppliers, by natural disasters, labor strikes, political unrest, or terrorist activity; the ability of the Company to (i) place new equipment in service on a timely basis; (ii) obtain additional financing; (iii) achieve anticipated synergies and other cost savings in connection with acquisitions and productivity programs; (iv) fully utilize its tools; (v) achieve desired yields, pricing, product mix, and market acceptance of its products and (vi) obtain necessary export licenses. Any forward-looking statements should be considered in light of these factors. Accordingly, there is no assurance that the Company's expectations will be realized. The Company does not assume responsibility for the accuracy and completeness of the forward-looking statements and does not assume an obligation to provide revisions to any forward-looking statements, except as otherwise required by securities and other applicable laws.

 Three Months and Six Months Ended April 29, 2012 and May 1, 2011  
 (unaudited)  
 (in thousands, except share amounts)

## NOTE 1 - BASIS OF FINANCIAL STATEMENT PRESENTATION

Photronics, Inc. and its subsidiaries ("Photronics" or "the Company") is one of the world's leading manufacturers of photomasks, which are high precision photographic quartz plates containing microscopic images of electronic circuits. Photomasks are a key element in the manufacture of semiconductors and flat panel displays ("FPDs"), and are used as masters to transfer circuit patterns onto semiconductor wafers and flat panel substrates during the fabrication of integrated circuits ("ICs") and a variety of FPDs and, to a lesser extent, other types of electrical and optical components. The Company currently operates principally from eight manufacturing facilities, two of which are located in Europe, two in Taiwan, one in Korea, and three in the United States. The Company ceased manufacturing photomasks at its Singapore facility in December 2011.

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for annual financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation have been included. Operating results for the interim period are not necessarily indicative of the results that may be expected for the fiscal year ending October 28, 2012. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's Annual Report on Form 10-K for the year ended October 30, 2011.

## NOTE 2 - CHANGES IN EQUITY

## NOTE 3 - JOINT VENTURE, TECHNOLOGY LICENSE AND OTHER AGREEMENTS WITH MICRON TECHNOLOGY, INC.

On May 5, 2006, Photronics and Micron Technology, Inc. ("Micron") entered into the MP Mask joint venture ("MP Mask"), which develops and produces photomasks for leading-edge and advanced next generation semiconductors. As part of the formation of the joint venture, Micron contributed its existing photomask technology center located in Boise, Idaho, (headquarters of MP Mask) and Photronics invested \$135 million in exchange for a 49.99% interest in MP Mask (to which \$64.2 million of the original investment was allocated), a license for photomask technology of Micron, and certain supply agreements.

This joint venture is a variable interest entity ("VIE") (as that term is defined in the Accounting Standards Codification ("ASC")) because all costs of the joint venture are passed on to the Company and Micron through purchase agreements they have entered into with the joint venture, and it is dependent upon the Company and Micron for any additional cash requirements. On a quarterly basis the Company reassesses whether its interest in MP Mask gives it a controlling financial interest in this VIE. The purpose of this quarterly reassessment is to identify the primary beneficiary (which is defined in the ASC as the entity that consolidates a VIE) of the VIE. As a result of the reassessment in the current quarter, the Company determined that Micron is still the primary beneficiary of the VIE, by virtue of its tie-breaking voting rights within MP Mask's Board of Managers, thereby giving it the power to direct the activities of MP Mask that most significantly impact its economic performance, including its decision making authority in the ordinary course of business and its purchasing the majority of products produced by the VIE.

The Company has utilized MP Mask for both high-end IC photomask production and research and development purposes. MP Mask charges its variable interest holders based on their actual usage of its facility. MP Mask separately charges for any research and development activities it engages in at the requests of its owners. The Company recorded cost of sales of \$2.1 million and \$4.1 million and research and development expenses of \$0.2 million and \$0.5 million during the three and six month periods ended April 29, 2012. Cost of sales of \$4.8 million and \$8.3 million and research and development expenses of \$0.2 million and \$0.5 million were recorded during the three and six month periods ended May 1, 2011.

MP Mask is governed by a Board of Managers, appointed by Micron and the Company. Since MP Mask's inception, Micron, as a result of its majority ownership, has held majority voting power on the Board of Managers. The voting power held by each party is subject to change as ownership interests change. Under the MP Mask joint venture operating agreement, the Company may be required to make additional capital contributions to MP Mask up to the maximum amount defined in the operating agreement. However, should the Board of Managers determine that further additional funding is required, MP Mask shall pursue its own financing. If MP Mask is unable to obtain its own financing, it may request additional capital contributions from the Company. Should the Company choose not to make a requested contribution to MP Mask, its ownership percentage may be reduced. The Company increased its investment in the MP Mask joint venture by \$5.4 million and \$5.8 million during the three and six month periods ended April 29, 2012, respectively. During the three and six month periods ended May 1, 2011, the Company increased its investment in MP Mask by \$6.2 million and \$10.2 million, respectively. These investments were primarily related to capital calls made by the joint venture. In May 2012 the Company made an additional capital contribution to MP Mask of \$7.5 million.

Index

The Company's investment in the VIE, which represents its maximum exposure to loss, was \$85.8 million at April 29, 2012, and \$80.0 million at October 30, 2011. These amounts are reported in the Company's condensed consolidated balance sheets as "Investment in joint venture". The Company recorded income from its investment in the VIE of \$0.6 million in the six month period ended May 1, 2011, and recorded no income from its investment in the three month period ended May 1, 2011, or in the three or six month periods ended April 29, 2012. Income from the VIE is included in "Investment and other income, net" in the condensed consolidated statements of operations.

In the first quarter of 2008 a capital lease agreement with Micron commenced for the U.S. nanoFab facility in Boise, Idaho. Quarterly lease payments, which bore interest at 8%, were \$3.8 million through January 2013. This lease was cancelled in the third fiscal quarter of 2009, at which time the Company and Micron (the lessor) entered into a new lease agreement for the facility. Under the provisions of the new lease agreement, quarterly lease payments were reduced from \$3.8 million to \$2.0 million, the term of the lease was extended from December 31, 2012 to December 31, 2014, and ownership of the property would not transfer to the Company at the end of the lease term. The interest rate of the new lease agreement remained at 8%. As a result of the new lease agreement, the Company reduced its lease obligation and the carrying value of its assets under capital leases by approximately \$28 million. The Company paid the capital lease obligation in full in April 2011 with a portion of the net proceeds of the March 2011 issuance of its 3.25% convertible senior notes.

In the second quarter of fiscal 2012 the Company paid \$35 million to Micron in connection with the purchase of the U.S. nanoFab facility and the remaining term of the operating lease agreement through 2014 was cancelled. Also in connection with this purchase, the Company entered into a \$25 million term loan agreement in the second quarter of fiscal 2012 (see Notes 4 and 14 for further discussion).

## NOTE 4 - LONG-TERM BORROWINGS

Long-term borrowings consist of the following:

	April 29, 2012	October 30, 2011
3.25% convertible senior notes due on April 1, 2016	\$ 115,000	\$ 115,000
Term loan, which bears interest at a variable rate, as defined (2.5% at April 29, 2012)	25,000	-

In March 2012 the Company, in connection with its purchase of the U.S. nanoFab facility (see Notes 3 and 14 for further discussion), further amended the credit facility. The amendment included the addition of a \$25 million term loan maturing in March 2017 with minimum quarterly principal payments of \$0.6 million (quarterly payments

commence in June 2012 and are based on a ten year repayment period). The amendment also included a twenty-five basis point reduction in the interest rate charged on any borrowings under the credit facility. The credit facility bears interest (2.5% at April 29, 2012), based on the Company's total leverage ratio, at LIBOR plus a spread, as defined in the credit facility.

In March 2011 the Company issued through a private offering, pursuant to Rule 144A under the Securities Act of 1933, as amended, \$115 million aggregate principal amount of 3.25% convertible senior notes. The notes mature on April 1, 2016, and note holders may convert each \$1,000 principal amount of notes to 96.3879 shares of common stock (equivalent to an initial conversion price of \$10.37 per share of common stock) at any time prior to the close of business on the second scheduled trading day immediately preceding April 1, 2016. The conversion rate is subject to adjustment upon the occurrence of certain events, which are described in the indenture dated March 28, 2011. The Company is not required to redeem the notes prior to their maturity date. Interest on the notes accrues in arrears, and is paid semiannually through the notes' maturity date. Interest payments on the notes commenced on October 1, 2011. The net proceeds of the notes were approximately \$110.7 million, which were used, in part, to acquire \$35.4 million of the Company's 5.5% convertible senior notes which were to mature on October 1, 2014, and to repay, in full, its then outstanding obligations under capital leases of \$19.8 million.

Index

In March 2011 the Company amended its credit facility (“the credit facility”) which, as amended, included, among other things: i) a reduction of the aggregate commitments of the lenders from \$65 million to \$30 million; ii) a reduction of the applicable interest rates and modifications of the leverage ratios related thereto; iii) an extension of the maturity date to April 30, 2015; iv) an increase in the permitted amount of certain financed capital assets up to \$75 million outstanding at any one time; v) an allowance to issue the 3.25% convertible senior notes; vi) an increase in the investments “basket” from \$15 million to \$25 million per year; vii) an allowance to repurchase the 5.5% convertible senior notes and other indebtedness; and viii) removal of the limitation on maximum last twelve months capital expenditures.

The credit facility is secured by substantially all of the Company’s assets located in the United States, as well as common stock the Company owns in certain of its foreign subsidiaries, and is subject to the following financial covenants: minimum fixed charge ratio, total leverage ratio and minimum unrestricted cash balance. As of April 29, 2012, the Company had no outstanding borrowings under the credit facility and \$30 million was available for borrowing.

In June 2011 the Company acquired \$5.0 million of its 5.5% convertible senior notes in exchange for 0.7 million shares of its common stock, with a fair value of \$6.5 million, and cash of \$3.2 million (the note holders received 147.529 shares and cash of \$647 for each \$1,000 note). The Company, in connection with this repurchase, recorded an extinguishment loss of \$5.0 million, which included the write off of deferred financing fees of \$0.3 million.

In March 2011 the Company acquired \$30.4 million of its 5.5% convertible senior notes in exchange for 4.5 million shares of its common stock, with a fair value of \$39.2 million, and cash of \$19.7 million (the note holders received 147.529 shares and cash of \$647 for each \$1,000 note). The Company, in connection with this repurchase, recorded an extinguishment loss of \$30.1 million, which included the write off of deferred financing fees of \$1.7 million. The loss is included in other income (expense) in the Company’s condensed consolidated statements of operations.

In September 2009 the Company issued, through a public offering, \$57.5 million aggregate principal amount of 5.5% convertible senior notes, which were to mature on October 1, 2014. Under the terms of the offering, the note holders could convert each \$1,000 principal amount of notes to 196.7052 shares of common stock (equivalent to an initial conversion price of \$5.08 per share of common stock) on, or before, September 30, 2014. The conversion rate is subject to adjustment upon the occurrence of certain events which are described in the indenture dated September 16, 2009. The Company is not required to redeem the notes prior to their maturity. The net proceeds of this offering were approximately \$54.9 million, which were used to reduce amounts outstanding under the Company’s credit facility. As discussed above, \$35.4 million aggregate principal amount of these notes were acquired by the Company during fiscal year 2011.

In April 2011 the Company entered into a five year, \$21.2 million capital lease for manufacturing equipment. Payments under the lease, which bears interest at 3.09%, are \$0.4 million per month through March 2016. The lease agreement provides that the Company must maintain the equipment in good working order, and includes a cross default with cross acceleration provision related to certain nonfinancial covenants incorporated in the Company's credit facility agreement. As of April 29, 2012, the total amount payable through the end of the lease term was \$17.9 million, of which \$16.9 million represented principal and \$1.0 million represented interest.

In January 2010 the Company borrowed \$3.7 million from a customer to purchase manufacturing equipment. This loan bears interest at 4.75% and is primarily being repaid with product supplied to the customer. Product valued at \$0.2 million and \$0.5 million was shipped to the customer and applied against the loan during the three and six month periods ended April 29, 2012, respectively, and product valued at \$0.3 million and \$0.6 million was applied against the loan in the respective prior year periods. The Company estimates that the loan will be fully repaid in fiscal 2013.

NOTE 5 - COMMON STOCK WARRANTS

In September 2009 the Company entered into two warrant agreements with Intel Capital Corporation to purchase a total of 750,000 shares of the Company's common stock. Under one warrant agreement 500,000 shares of the Company's common stock can be purchased at an exercise price of \$4.15 per share and under the second warrant agreement 250,000 shares of the Company's common stock can be purchased at an exercise price of \$5.08 per share. The warrant agreements expire in September 2014. Also in September 2009, the Company and Intel Corporation entered into an agreement to share technical and operations information regarding the development of the Company's products, the capabilities of the Company's photomask manufacturing lines and the alignment of photomask toolsets. Intel Capital Corporation also invested in the Company's convertible debt offering of September 2009. The warrants were recorded at their fair value on their date of grant, which was determined using the Black-Scholes option pricing model. As of April 29, 2012, none of the warrants issued to Intel Capital Corporation had been exercised.

Index

In conjunction with the May 2009 amendment to its then existing credit facility, the Company also entered into a warrant agreement with its lenders. See Note 6 for further discussion of these warrants.

## NOTE 6 - DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

The Company utilizes derivative instruments to reduce its exposure to the effects of the variability of interest rates and foreign currencies on its financial performance when it believes such action is warranted. Historically, the Company has been a party to derivative instruments to hedge either the variability of cash flows of a prospective transaction or the fair value of a recorded asset or liability. In certain instances, the Company has designated these transactions as hedging instruments. However, whether or not a derivative was designated as being a hedging instrument, the Company's purpose for engaging in the derivative has always been for risk management (and not speculative) purposes. The Company historically has not been a party to a significant number of derivative instruments and does not expect its derivative activity to significantly increase in the foreseeable future.

In addition to the utilization of derivative instruments discussed above, the Company attempts to minimize its risk of foreign currency exchange rate variability by, whenever possible, procuring production materials within the same country that it will utilize the materials in manufacturing, and by selling to customers from manufacturing sites within the country in which the customers are located.

In May 2009, in connection with an amendment to its credit facility, the Company issued 2.1 million warrants, each exercisable for one share of the Company's common stock at an exercise price of \$0.01 per share. Forty percent of the warrants were exercisable upon issuance, and the remaining balance was to become exercisable in twenty percent increments at various points in time after October 31, 2009. As a result of certain net cash settleable put provisions within the warrant agreement, the warrants were recorded as a liability in the Company's consolidated balance sheet. As of the issuance date and for future periods that such warrants remained outstanding, the Company had adjusted the liability based upon the current fair value of the warrants, with any changes in their fair value being recognized in earnings. Due to the warrants' exercise price of \$0.01 per share, their fair value approximated the market price of the Company's common stock. Approximately 1.2 million of these warrants were cancelled as a result of the Company's early repayment of certain amounts under its credit facility during the year ended November 1, 2009, and the associated liability was reduced accordingly. During the three month period ended January 29, 2012, all of the 0.2 million of these warrants that remained outstanding were exercised. In connection with this exercise, the Company recognized a gain of \$0.1 million, included in investment and other income, net, in its condensed consolidated statements of operations. Warrant exercises during the three and six month periods ended May 1, 2011, resulted in the Company recognizing losses of \$0.7 million and \$0.8 million, respectively, which were also included in investment and other income (expense), net. See Note 5 for disclosures related to other common stock warrants.

A portion of an existing loss on a cash flow hedge in the amount of \$0.1 million is expected to be reclassified into earnings over the next twelve months.

The table below presents the effect of derivative instruments on the Company's condensed consolidated balance sheets at April 29, 2012 and October 30, 2011.

Derivatives Not Designated as Hedging Instruments Under ASC 815		Fair Value at	
		April 29, 2012	October 30, 2011

## NOTE 7 - SHARE-BASED COMPENSATION

In March 2007 shareholders approved a new share-based compensation plan ("Plan"), under which options, restricted stock, restricted stock units, stock appreciation rights, performance stock, performance units, and other awards based on, or related to, shares of the Company's common stock may be granted from shares authorized but unissued or shares previously issued and reacquired by the Company. A maximum of six million shares of common stock may be issued under the Plan. Awards may be granted to officers, employees, directors, consultants, advisors, and independent contractors of the Company or its subsidiaries. In the event of a change in control (as defined in the Plan), the vesting of awards may be accelerated. The Plan, aspects of which are more fully described below, prohibits further awards from being issued under prior plans. The Company incurred total share-based compensation costs for the three and six month periods ended April 29, 2012, of \$0.7 million and \$1.4 million, respectively, and \$0.6 million and \$1.1 million for the three and six month periods ended May 1, 2011, respectively. The Company received cash from option exercises of \$0.1 million and \$0.2 million for the three and six month periods ended April 29, 2012, respectively, and \$0.1 million and \$0.2 million for the three and six month periods ended May 1, 2011, respectively. No share-based compensation cost was capitalized as part of an asset and no related income tax benefits were recorded during the periods presented.

## Stock Options

Option awards generally vest in one to four years, and have a ten-year contractual term. All incentive and non-qualified stock option grants have an exercise price equal to the market value of the underlying common stock on the date of grant. The grant date fair values of options are based on closing prices of the Company's common stock on the dates of grant using the Black-Scholes option pricing model. Expected volatility is based on the historical volatility of the Company's stock. The Company uses historical option exercise behavior and employee termination data to estimate expected term, which represents the period of time that the options granted are expected to remain outstanding. The risk-free rate of return for the estimated term of the option is based on the U.S. Treasury yield curve in effect at the date of grant. The weighted-average inputs and risk-free rate of return ranges used to calculate the grant date fair value of options issued during the three and six month periods ended April 29, 2012 and May 1, 2011, are presented in the following table.

	Three Months Ended		Six Months Ended	
	April 29, 2012	May 1, 2011	April 29, 2012	May 1, 2011
Expected volatility	102.2%	98.8%	102.1%	98.7%

Index

Information on outstanding and exercisable option awards as of April 29, 2012, is presented below.

Options	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life	Aggregate Intrinsic Value
Outstanding at April 29, 2012	4,099,414	\$ 8.43	6.4 years	\$ 6,106
Exercisable at April 29, 2012	2,320,526	\$ 11.17	4.9 years	\$ 3,236

There were 32,000 share options granted during the three month period ended April 29, 2012, with a grant date fair value of \$4.72 per share, and there were 369,250 share options granted during the three month period ended May 1, 2011, with a weighted-average grant date fair value of \$4.81 per share. There were 524,500 share options granted during the six month period ended April 29, 2012, with a weighted-average grant date fair value of \$4.47 per share and 620,750 share options granted during the six month period ended May 1, 2011, with a weighted-average grant date fair value of \$4.75 per share. As of April 29, 2012, the total unrecognized compensation cost related to unvested option awards was approximately \$4.3 million. That cost is expected to be recognized over a weighted-average amortization period of 2.8 years.

## Restricted Stock

The Company periodically grants restricted stock awards. The restrictions on these awards lapse over a service period that has ranged from less-than-one to eight years. No restricted stock awards were granted during the three month period ended April 29, 2012, and 168,750 restricted stock awards were issued during the six month period ended April 29, 2012, with a weighted-average grant date fair value of \$6.28 per share. No restricted stock awards were granted during the three month period ended May 1, 2011, and 176,250 restricted stock awards were issued during the six month period ended May 1, 2011, with a weighted-average grant date fair value of \$6.71 per share. As of April 29, 2012, the total compensation cost not yet recognized related to unvested restricted stock awards was approximately \$1.7 million. That cost is expected to be recognized over a weighted-average amortization period of 2.6 years. As of April 29, 2012, there were 285,127 shares of restricted stock outstanding.

## NOTE 8 - CONSOLIDATION, RESTRUCTURING AND RELATED CHARGES

In the first quarter of fiscal 2012 the Company ceased the manufacture of photomasks at its Singapore facility and, in connection therewith, recorded charges of \$0.1 million and \$1.2 million during the three and six month periods ended April 29, 2012, respectively. The Company expects that this restructuring will be completed in fiscal 2012, and expects its total cost to range between \$1.5 million and \$1.9 million, with that cost primarily being comprised of employee termination costs and asset write-downs. The following table sets forth the Company's restructuring reserve primarily related to its Singapore facility as of April 29, 2012, and reflects the activity affecting the reserve for the three and six month periods then ended.

January 30, 2012	Three Months Ended April 29, 2012		April 29, 2012	October 31, 2011	Six Months Ended April 29, 2012		April 29, 2012
	Charges	Utilized			Charges	Utilized

Index

## NOTE 9 - INCOME TAXES

The effective income tax rates for the three and six month periods ended April 29, 2012 differ from the U.S. statutory rate of 35% primarily due to changes in the deferred tax asset and valuation allowance combined with income taxed at lower rates in non-U.S. jurisdictions. The effective income tax rates for the three and six month periods ended May 1, 2011, differ from the U.S. statutory rate, primarily due to the impact of the non-deductible debt extinguishment loss recorded in the second quarter of fiscal 2011, combined with income taxed at lower rates in non-U.S. jurisdictions. Entities within certain jurisdictions are excluded from the Company's effective income tax rate if they are projected to generate a loss for the year and the tax benefits of such losses are not anticipated to be realized in the foreseeable future.

The liability for unrecognized tax benefits included in the condensed consolidated balance sheets at April 29, 2012 and October 30, 2011, is \$2.0 million and \$1.9 million, respectively, which, if recognized would reduce the effective tax rate. There have been no material changes in the Company's liability for unrecognized tax benefits or related disclosures subsequent to the annual reporting period ended October 30, 2011.

PKLT, the Company's FPD manufacturing facility in Taiwan, is accorded a tax holiday which commences in 2012 and expires in 2017. The tax holiday did not impact the 2012 effective rate based on PKLT's current tax loss position, and had no dollar or per share effect in the three or six month periods ended April 29, 2012 and May 1, 2011.

## NOTE 10 - EARNINGS (LOSS) PER SHARE

The calculation of basic and diluted earnings (loss) per share is presented below.

	Three Months Ended		Six Months Ended	
	April 29, 2012	May 1, 2011	April 29, 2012	May 1, 2011
Net income (loss) attributable to Photronics, Inc.	\$ 8,818	\$ (16,438 )	\$ 13,086	\$ (4,327 )
Effect of dilutive securities:				
Interest expense on convertible notes, net of related tax effects	1,542	-	3,084	-
Gains related to common stock warrants fair value adjustment	-	-	(94 )	-
Earnings (loss) for diluted earnings (loss) per share	\$ 10,360	\$ (16,438 )	\$ 16,076	\$ (4,327 )
Weighted-average common shares computations:				
Weighted-average common shares used for basic earnings (loss) per share	60,086	55,685	59,952	54,751
Effect of dilutive securities:				
Convertible notes	15,423	-	15,423	-
Share-based payment awards	829	-	830	-
Common stock warrants	252	-	267	-
Potentially dilutive common shares	16,504	-	16,520	-
Weighted-average common shares used for diluted earnings (loss) per	76,590	55,685	76,472	54,751

share

Basic earnings (loss) per share	\$ 0.15	\$ (0.30 )	\$ 0.22	\$ (0.08 )
Diluted earnings (loss) per share	\$ 0.14	\$ (0.30 )	\$ 0.21	\$ (0.08 )

In periods in which the Company incurred a net loss, the assumed exercises and vestings of certain outstanding share-based awards had an antidilutive effect. The assumed exercise of certain outstanding common stock warrants and the conversion of convertible senior notes to common stock would also have been antidilutive in the periods that the Company reported a net loss. The table below shows the amounts of incremental weighted-average shares of these share-based payment awards, common stock warrants, and convertible debt that were not considered potentially dilutive common shares in the fiscal periods presented.

16

Index

	Three Months Ended		Six Months Ended	
	April 29, 2012	May 1, 2011	April 29, 2012	May 1, 2011
Convertible notes	-	13,336	-	14,455
Share-based payment awards	-	1,374	-	1,221
Common stock warrants	-	554	-	535
Total potentially dilutive shares excluded	-	15,264	-	16,211

The table below shows the outstanding weighted-average share-based payment awards that were excluded from the calculation of diluted earnings or loss per share because their exercise price exceeded the average market value of the common shares for the period or, under application of the treasury stock method, they were otherwise determined to be anti-dilutive.

	Three Months Ended		Six Months Ended	
	April 29, 2012	May 1, 2011	April 29, 2012	May 1, 2011
Potentially dilutive share-based payment awards excluded	2,471	2,215	2,511	2,044

## NOTE 11 – GEOGRAPHIC INFORMATION

The Company operates as a single operating segment as a manufacturer of photomasks, which are high precision quartz plates containing microscopic images of electronic circuits for use in the fabrication of ICs and FPDs. Geographic net sales are based primarily on where the Company's manufacturing facility is located. The Company's net sales by geographic area and for ICs and FPDs for the three and six month periods ended April 29, 2012 and May 1, 2011, and its long-lived assets by geographic area as of April 29, 2012, and October 30, 2011, are presented below.

	Three Months Ended		Six Months Ended	
	April 29, 2012	May 1, 2011	April 29, 2012	May 1, 2011
Net sales				
Asia	\$ 69,937	\$ 79,482	\$ 140,173	\$ 158,173
Europe	10,386	13,046	20,734	23,810
North America	37,128	40,575	68,698	71,943
	\$ 117,451	\$ 133,103	\$ 229,605	\$ 253,926
IC	\$ 89,111	\$ 100,999	\$ 175,917	\$ 189,800
FPD	28,340	32,104	53,688	64,126
	\$ 117,451	\$ 133,103	\$ 229,605	\$ 253,926

	As of	
	April 29, 2012	October 30, 2011
Long-lived assets		
Asia	\$ 186,939	\$ 197,956
Europe	10,200	10,879
North America	185,661	159,845
	\$ 382,800	\$ 368,680

Index

The Company is typically impacted during its first fiscal quarter by the North American and European holiday periods, as some customers reduce their effective workdays and orders during these periods. Additionally, the Company can be impacted during its first or second quarter by the Asian New Year holiday period, which may also reduce customer orders.

## NOTE 12 - FAIR VALUE MEASUREMENTS

The accounting framework for determining fair value includes a hierarchy for ranking the quality and reliability of the information used to measure fair value, which enables the reader of the financial statements to assess the inputs used to develop those measurements. The fair value hierarchy consists of three tiers as follows: Level 1, defined as quoted market prices in active markets for identical securities; Level 2, defined as inputs other than Level 1 that are observable, either directly or indirectly; and Level 3, defined as unobservable inputs that are not corroborated by market data.

## Assets and Liabilities Measured at Fair Value on a Recurring Basis

The table below presents assets and liabilities as of October 30, 2011, that are measured at fair value on a recurring basis. The Company did not have any assets or liabilities measured at fair value on a recurring basis as of April 29, 2012.

	October 30, 2011			
	Quoted Prices in Active Markets for Identical Instruments (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
Common stock warrants (liability)	\$-	\$1,147	\$ -	\$1,147
Total liabilities	\$-	\$1,147	\$ -	\$1,147

The fair value of the common stock warrants liability was determined using the Black-Scholes option pricing model. A significant observable input into the model included the market price of the Company's common stock at the measurement date. Gains or losses related to fair value adjustments to the common stock warrants liability are included in other income (expense), net.

## Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis

The Company did not have any nonfinancial assets or liabilities measured at fair value on a nonrecurring basis as of April 29, 2012 and October 30, 2011.

## Fair Value of Other Financial Instruments

The fair values of the Company's cash and cash equivalents (Level 1 measurements), accounts receivable, accounts payable, and certain other current assets and current liabilities (Level 2 measurements) approximate their carrying value due to their short-term maturities. The fair value of the Company's financing loan with a customer is a Level 2 measurement that approximates its carrying value due to its short-term maturity. The fair value of the Company's

variable rate long-term debt is a Level 2 measurement and approximates its carrying value due to the variable nature of the underlying interest rates. The fair value of the Company's convertible senior notes is a Level 2 measurement, that is determined using recent bid prices. The table below presents the fair and carrying values of the Company's convertible senior notes at April 29, 2012 and October 30, 2011.

	April 29, 2012		October 30, 2011	
	Fair Value	Carrying Value	Fair Value	Carrying Value
3.25% convertible senior notes	\$ 113,862	\$ 115,000	\$ 109,260	\$ 115,000
5.5% convertible senior notes	\$ 32,734	\$ 22,054	\$ 32,791	\$ 22,054

Index

## NOTE 13 - SUBSIDIARY SHARE REPURCHASE

Since the second quarter of fiscal 2011, the board of directors of Photronics Semiconductor Mask Corporation (PSMC), a subsidiary of the Company based in Taiwan, authorized several share repurchase programs for PSMC to purchase for retirement shares of its outstanding common stock. For the three and six month periods ended April 29, 2012, PSMC purchased 15.7 million and 18.0 million shares, respectively, at a cost of \$6.7 million and \$7.6 million, respectively. In the second quarter of fiscal 2011, PSMC purchased 7.7 million shares for \$3.3 million. These repurchase programs increased the Company's ownership in PSMC to 59.14% at May 1, 2011, to 62.25% at October 30, 2011, and to 66.81% at April 29, 2012.

The table below presents the effect of the change in the Company's ownership interest in PSMC on the Company's equity for the three and six month periods ended April 29, 2012 (15.7 million and 18.0 million shares of common stock of PSMC repurchased, respectively) and May 1, 2011 (7.7 million shares of PSMC stock repurchased).

	Three Months Ended		Six Months Ended	
	April 29, 2012	May 1, 2011	April 29, 2012	May 1, 2011
Net income (loss) attributable to Photronics, Inc.	\$8,818	\$(16,438 )	\$13,086	\$(4,327 )
Increase (decrease) in Photronics, Inc.'s additional paid-in capital	866	(328 )	1,017	(328 )
Decrease in accumulated other comprehensive income	(32 )	-	(35 )	-
Change from net income (loss) attributable to Photronics, Inc. and transfer from noncontrolling interest	\$9,652	\$(16,766 )	\$14,068	\$(4,655 )

Subsequent to the quarter ended April 29, 2012, PSMC completed its most recent share repurchase program in May 2012 with the repurchase of an additional 2.9 million shares for \$1.3 million, which increased the Company's ownership in PSMC to 67.60%.

## NOTE 14 – OPERATING LEASES

The Company leases various real estate and equipment under non-cancelable operating leases.

In connection with the Company's purchase of the U.S. nanoFab facility in the second quarter of fiscal 2012 (see Notes 3 and 4), the Company's lease agreement with Micron for the U.S. nanoFab facility was cancelled, which reduced the Company's related outstanding operating lease commitments by a total of \$15 million for fiscal years 2013 and 2014.

Future minimum lease payments under non-cancelable operating leases with initial terms in excess of one year as of April 29, 2012, are as follows:

2012	\$1,200
2013	1,329
2014	642
2015	542
2016	500
Thereafter	896

\$5,109

See Note 4 for disclosures related to the Company's capital lease obligation.

Index

NOTE 15 - COMMITMENTS AND CONTINGENCIES

As of April 29, 2012, the Company had commitments outstanding for capital expenditures of approximately \$55 million.

The Company is subject to various claims that arise in the ordinary course of business. The Company believes such claims, individually or in the aggregate, will not have a material effect on its condensed consolidated financial statements.

NOTE 16 - RECENT ACCOUNTING PRONOUNCEMENTS

In June 2011 the FASB issued ASU No. 2011-05, "Presentation of Comprehensive Income", with the purpose of increasing the prominence of items reported in other comprehensive income. The amended guidance requires that all non-owner changes in stockholders' equity be presented either in a single continuous statement of comprehensive income or in two separate statements. The amendments also required that reclassification adjustments for items that are reclassified from other comprehensive income to net income in the statement(s) be presented on the face of the financial statements. However, in December 2011 the FASB issued ASU No. 2011-12 that deferred the effective date for amendments to the presentation of reclassifications of items out of other comprehensive income. ASU No. 2011-12 was issued to allow the FASB time to redeliberate whether it is necessary to require entities to present reclassification adjustments, by component, in both the statement where net income is presented and the statement where comprehensive income is presented for both interim and annual financial statements, as originally required under ASU No. 2011-05. This deferral was still in effect as of April 29, 2012. During the FASB's redeliberation period, entities will continue to report reclassifications out of accumulated other comprehensive income using guidance in effect before ASU No. 2011-05 was issued. ASU No. 2011-05 is to be applied retrospectively and is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2011. The Company adopted ASU No. 2011-05, subject to the deferral provisions of ASU No. 2011-12, on January 30, 2012.

In May 2011 the FASB issued ASU No. 2011-04, "Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs", which amended its guidance on fair value measurements with the purpose of achieving commonality of its fair value measurement and disclosure requirements with those of IFRSs. ASU No. 2011-04 clarifies the FASB's intentions regarding the application of existing fair value measurement and disclosure requirements, changes certain principles for measuring fair value and changes the disclosure requirements for fair value measurements. ASU No. 2011-04 is to be applied prospectively and is effective during interim and annual periods beginning after December 15, 2011. The Company adopted ASU No. 2011-04 on January 30, 2012, and has included its required disclosures in Note 12.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview

Management's discussion and analysis ("MD&A") of the Company's financial condition, results of operations and outlook should be read in conjunction with its condensed consolidated financial statements and related notes. Various segments of this MD&A contain forward-looking statements, all of which are presented based on current expectations and may be adversely affected by uncertainties and risk factors (presented throughout this filing and in the Company's Annual Report on Form 10-K for the fiscal 2011 year), that may cause actual results to materially differ from these expectations.

The Company sells substantially all of its photomasks to semiconductor designers and manufacturers, and manufacturers of FPDs. Photomask technology is also being applied to the fabrication of other higher performance electronic products such as photonics, micro-electronic mechanical systems and certain nanotechnology applications. Thus, the Company's selling cycle is tightly interwoven with the development and release of new semiconductor designs and flat panel applications, particularly as it relates to the semiconductor industry's migration to more advanced design methodologies and fabrication processes. The Company believes that the demand for photomasks primarily depends on design activity rather than sales volumes from products produced using photomask technologies. Consequently, an increase in semiconductor or FPD sales does not necessarily result in a corresponding increase in photomask sales. However, the reduced use of customized ICs, reductions in design complexity, other changes in the technology or methods of manufacturing or designing semiconductors, or a slowdown in the introduction of new semiconductor or FPD designs could reduce demand for photomasks even if demand for semiconductors and FPDs increases. Advances in semiconductor, FPD and photomask design and semiconductor production methods could also reduce the demand for photomasks. Historically, the semiconductor industry has been volatile, with sharp periodic downturns and slowdowns. These downturns have been characterized by, among other things, diminished product demand, excess production capacity and accelerated erosion of selling prices.

Index

The global semiconductor industry is driven by end markets which have been closely tied to consumer driven applications of high performance semiconductor devices including, but not limited to, mobile communications and computing solutions. The Company is typically required to fulfill its customer orders within a short period of time, sometimes within 24 hours. This results in the Company having a minimal level of backlog orders, typically one to two weeks for IC photomasks and two to three weeks for FPD photomasks. The Company cannot predict the timing of the industry's transition to volume production of next generation technology nodes or the timing of up and down cycles with precise accuracy, but believes that such transitions and cycles will continue into the future, beneficially and adversely affecting its business, financial condition and operating results in the near term. The Company believes its ability to remain successful in these environments is dependent upon achieving its goals of being a service and technology leader and efficient solutions supplier, which it believes should enable it to continually reinvest in its global infrastructure.

## Material Changes in Results of Operations

Three and Six Months ended April 29, 2012 and May 1, 2011

The following table represents selected operating information expressed as a percentage of net sales.

	Three Months Ended		Six Months Ended	
	April 29, 2012	May 1, 2011	April 29, 2012	May 1, 2011
Net sales	100.0 %	100.0 %	100.0 %	100.0 %
Cost of sales	(74.6 )	(72.6 )	(75.9 )	(73.6 )
Gross margin	25.4	27.4	24.1	26.4
Selling, general and administrative expenses	(10.4 )	(8.6 )	(10.2 )	(8.7 )
Research and development expenses	(3.8 )	(3.0 )	(3.9 )	(3.0 )
Consolidation, restructuring and related charges	-	-	(0.5 )	-
Operating income	11.2	15.8	9.5	14.7
Debt extinguishment loss	-	(22.8 )	-	(11.9 )
Other expense, net	(0.8 )	(1.9 )	(0.6 )	(0.7 )
Net income (loss) before income taxes	10.4	(8.9 )	8.9	2.1
Income tax provision	(2.3 )	(2.4 )	(2.6 )	(2.7 )
Net income (loss)	8.1	(11.3 )	6.3	(0.6 )
Net income attributable to noncontrolling interests	(0.6 )	(1.0 )	(0.6 )	(1.1 )
Net income (loss) attributable to Photronics, Inc.	7.5 %	(12.3 )%	5.7 %	(1.7 )%

Note: All of the following tabular comparisons, unless otherwise indicated, are for the three months ended April 29, 2012 (Q2-12) and May 1, 2011 (Q2-11) and for the six months ended April 29, 2012 (YTD-12) and May 1, 2011 (YTD-11), in millions of dollars.

## Net Sales

Three Months Ended

Six Months Ended

Edgar Filing: PHOTRONICS INC - Form 10-Q

	Q2-12	Q2-11	Percent Change	YTD-12	YTD-11	Percent Change
IC	\$89.1	\$101.0	(11.8 )%	\$175.9	\$189.8	(7.3 )%
FPD	28.4	32.1	(11.7 )%	53.7	64.1	(16.3 )%
Total net sales	\$117.5	\$133.1	(11.8 )%	\$229.6	\$253.9	(9.6 )%

21

---

Index

Net sales for Q2-12 decreased 11.8% to \$117.5 million as compared to \$133.1 million for Q2-11. The decrease was primarily due to decreased demand for mainstream products due to a slow down in the industry, which was partially offset by increased demand for high-end products. Revenues attributable to high-end products increased by \$7.9 million to \$50.6 million in Q2-12 as compared to \$42.7 million in Q2-11. High-end photomask applications include mask sets for 45 nanometer and below for IC products, and G8 and above and active matrix organic light-emitting diode (AMOLED) display screen technologies for FPD products. By geographic area, net sales in Q2-12 as compared to Q2-11 decreased by \$9.5 million or 12.0% in Asia, decreased by \$3.4 million or 8.5% in North America, and decreased by \$2.7 million or 20.4% in Europe. As a percent of total sales, net sales in Q2-12 in Asia were 59%, North America 32% and Europe 9%, and in Q2-11 were in Asia 60%, North America 30%, and Europe 10%.

Net sales for YTD-12 decreased 9.6% to \$229.6 million as compared to \$253.9 million for YTD-11. The decrease was primarily due to decreased demand for mainstream products due to a slow down in the industry, which was partially offset by increased demand for high-end products. Revenues attributable to high-end products increased by \$21.3 million to \$93.4 million in YTD-12 as compared to \$72.1 million in YTD-11. The Company's quarterly revenues can be affected by the seasonal purchasing of its customers. Although demand for the Company's products is typically negatively impacted during the first six months of its fiscal year by the North American, European and Asian holiday periods, such seasonality was not experienced during YTD-11.

## Gross Margin

	Three Months Ended			Six Months Ended		
	Q2-12	Q2-11	Percent Change	YTD-12	YTD-11	Percent Change
Gross margin	\$29.9	\$36.5	(18.2)%	\$55.3	\$67.1	(17.5)%
Percentage of net sales	25.4%	27.4%		24.1%	26.4%	

Gross margin percentage decreased to 25.4% in Q2-12 from 27.4% in Q2-11 and decreased to 24.1% in YTD-12 from 26.4% in YTD-11. These decreases were a result of the decrease in sales from the prior year periods, as the Company operates in a high fixed cost environment and, to the extent that the Company's revenues and utilization increase or decrease, gross margin will generally be positively or negatively impacted. The decreases in gross margins as a result of decreases in sales were partially offset by reduced manufacturing expenses related to the Singapore restructure and the purchase of the U.S. nanoFab facility.

## Selling, General and Administrative Expenses

	Three Months Ended			Six Months Ended		
	Q2-12	Q2-11	Percent Change	YTD-12	YTD-11	Percent Change
Selling, general and administrative expenses	\$ 12.2	\$ 11.5	6.6%	\$ 23.5	\$ 22.2	6.2%
Percentage of net sales	10.4%	8.6%		10.2%	8.7%	

Selling, general and administrative expenses increased to \$12.2 million in Q2-12, compared with \$11.5 million in Q2-11, and to \$23.5 million in YTD-12 as compared to \$22.2 million in YTD-11. These increases were primarily due to increased employee compensation and selling-related expenses.

## Research and Development

Edgar Filing: PHOTRONICS INC - Form 10-Q

	Three Months Ended			Six Months Ended		
	Q2-12	Q2-11	Percent Change	YTD-12	YTD-11	Percent Change
Research and development	\$4.4	\$3.9	12.7 %	\$8.9	\$7.7	15.2 %
Percentage of net sales	3.8	% 3.0	%	3.9	% 3.0	%

22

---

Index

Research and development expenses consist primarily of global development efforts related to high-end process technologies for advanced sub-wavelength reticle solutions for IC technologies. Research and development expenses increased by \$0.5 million to \$4.4 million in Q2-12, as compared to \$3.9 million in Q2-11, and by \$1.2 million to \$8.9 million in YTD-12, as compared to \$7.7 million in YTD-11. The increase in research and development expenses in Q2-12 and YTD-12 as compared to the same periods in the prior year was primarily due to increased expenditures in the U.S.

## Consolidation, Restructuring and Related Charges

	Three Months Ended		Six Months Ended	
	Q2-12	Q2-11	YTD-12	YTD-11
Employee terminations and other	\$ 28	\$ -	\$ 914	\$ -
Asset write-downs	30	-	262	-
Total consolidation, restructuring and related charges	\$ 58	\$ -	\$ 1,176	\$ -

In the first quarter of fiscal 2012 the Company ceased the manufacture of photomasks at its Singapore facility and, in connection therewith, recorded charges of \$0.1 million and \$1.2 million during the three and six month periods ended April 29, 2012. The Company expects that this restructuring will be completed in fiscal 2012, and expects its total cost to range between \$1.5 million and \$1.9 million, with that cost primarily being comprised of employee termination costs and asset write-downs.

## Other Income (Expense), net

	Three Months Ended		Six Months Ended	
	Q2-12	Q2-11	YTD-12	YTD-11
Interest expense	\$ (1.8 )	\$ (1.9 )	\$ (3.6 )	\$ (3.6 )
Investment and other income (expense), net	0.8	(0.7 )	2.2	2.0
Debt extinguishment loss	-	(30.3 )	-	(30.3 )
Other income (expense), net	\$ (1.0 )	\$ (32.9 )	\$ (1.4 )	\$ (31.9 )

Interest expense decreased slightly in Q2-12 as compared to Q2-11, as a result of lower weighted-average interest rates on the Company's long-term borrowings. Interest expense was unchanged in YTD-12 as compared to YTD-11, as a result of lower weighted average interest rates on the Company's long-term debt, which were offset by increased average outstanding debt balances.

Investment and other income (expense), net increased in Q2-12 as compared to Q2-11 by \$1.5 million due to increased interest and investment income attributable to the Company's higher cash equivalents balance, the incurrence of a non-cash loss in Q2-11 related to unexercised outstanding warrants on the Company's common stock, and less unfavorable foreign currency transaction results in Q2-12. On a comparative YTD basis, investment and other income (expense), net increased by \$0.2 million as a result of increased interest and investment income attributable to the Company's higher cash equivalents balance and a gain related to warrants on the Company's common stock occurring in YTD-12 as compared to a loss in YTD-11, which were partially offset by less favorable foreign currency transaction results in YTD-12.

In the second quarter of fiscal 2011 the Company acquired \$30.4 million aggregate principal amount of its 5.5% convertible senior notes by delivering \$19.7 million in cash and approximately 4.5 million shares of its common stock, with an approximate fair value of \$39.2 million. In connection with this acquisition the Company recorded a debt extinguishment loss of \$30.1 million, which included the write-off of \$1.7 million of deferred financing fees.

Index

## Income Tax Provision

	Three Months Ended		Six Months Ended	
	Q2-12	Q2-11	YTD-12	YTD-11
Income tax provision	\$ 2.7	\$ 3.3	\$ 6.0	\$ 6.7
Effective income tax rate	21.8 %	(27.7 )%	29.4 %	127.4 %

The effective income tax rate in Q2-12 and YTD-12 decreased from the comparable prior year periods primarily due to the impact of the nondeductible debt extinguishment loss recorded in Q2-11 with no comparable item in 2012. In addition, in fiscal 2012, income tax provisions recorded in jurisdictions in which the Company generated income before income taxes were, due to valuation allowances, not significantly offset by income tax benefits recorded in jurisdictions in which the Company incurred losses before income taxes.

## Net Income Attributable to Noncontrolling Interests

Net income attributable to noncontrolling interests decreased to \$0.7 million in Q2-12 as compared to \$1.4 million in Q2-11, and to \$1.3 million in YTD-12 as compared to \$2.9 million in YTD-11, primarily due to decreased net income at PSMC, the Company's non-wholly owned subsidiary in Taiwan.

As a result of share repurchase programs in 2011 and 2012 by PSMC to purchase for retirement shares of its outstanding common stock, the Company's ownership percentage in PSMC had, as of April 29, 2012, increased 9.28% to 66.81%. See Note 13 of the Condensed Consolidated Financial Statements for further information. The Company's ownership percentage in its subsidiary in Korea was 99.7% at April 29, 2012, and did not change over the periods presented.

## Liquidity and Capital Resources

The Company's working capital was \$220.6 million at April 29, 2012, and \$209.3 million at October 30, 2011. The increase in working capital was primarily the result of increased cash and cash equivalents, and accounts receivable balances at April 29, 2012, than at October 30, 2011. The increase in cash and cash equivalents to \$192.0 million at April 29, 2012, as compared to \$189.9 million at October 30, 2011, was primarily the result of cash generated by operating activities. Net cash provided by operating activities was \$62.4 million for the six month period ended April 29, 2012, a slight decrease from \$64.0 million for the six month period ended May 1, 2011. Net cash used in investing activities for the six month period ended April 29, 2012, was \$75.1 million, which was comprised primarily of capital expenditure payments, including \$35 million for the U.S. nanoFab facility. Net cash provided by financing activities of \$15.3 million for the six month period ended April 29, 2012, was primarily comprised of proceeds of a \$25 million term loan, which is discussed below, partially offset by payments to repurchase the common stock of a subsidiary and repayments of long-term borrowings.

The Company's credit facility ("the credit facility") provides for revolving credit of \$30 million through April 2015. The credit facility bears interest (2.5% at April 29, 2012) at LIBOR plus a spread based upon the Company's total leverage ratio, as defined in the agreement. As of April 29, 2012, the Company had no outstanding revolving borrowings under the credit facility. The credit facility is secured by substantially all of the Company's assets located in the United States, as well as common stock the Company owns in certain of its foreign subsidiaries. The credit facility is subject to the following financial covenants: minimum fixed charge ratio, total leverage ratio and minimum unrestricted cash balance.

In the second quarter of fiscal 2012 the Company paid \$35 million to Micron in connection with the purchase of the U.S. nanoFab facility and, in connection therewith, amended the credit facility to include the addition of a \$25 million term loan maturing in March 2017, with minimum quarterly principal payments of \$0.6 million (quarterly payments are based on a ten year repayment period commencing in June 2012). The amendment also included a twenty-five basis point reduction in the interest rate charged on any borrowings under the credit facility. As a result of the purchase of the U.S. nanoFab facility, the Company's lease agreement with Micron for the U.S. nanoFab facility was cancelled, which reduced the Company's related outstanding operating lease commitments by a total of \$15 million for fiscal years 2013 and 2014.

At April 29, 2012, the Company had capital commitments outstanding of approximately \$55 million. The Company believes that its currently available resources, together with its capacity for growth, and its access to equity and other financing sources, will be sufficient to satisfy its currently planned capital expenditures, as well as its anticipated working capital requirements for the next twelve months. However, the Company cannot assure that additional sources of financing would be available to the Company on commercially favorable terms, should the Company's capital requirements exceed cash available from operations, existing cash, and cash available under its credit facility.

## Index

The Company's liquidity is highly dependent on its sales volume, cash conversion cycle, and the timing of its capital expenditures (which can vary significantly from period to period), as it operates in a high fixed cost environment. Although the Company continues to evaluate further cost reduction initiatives, depending on conditions in the semiconductor and FPD markets, the Company's cash flows from operations and current holdings of cash may not be adequate to meet its current and long-term needs for capital expenditures, operations and debt repayments. Historically, in certain years, the Company has used external financing to fund these needs. Due to conditions in the credit markets, some financing instruments used by the Company in the past may not be currently available to it. The Company cannot assure that additional sources of financing would be available to it on commercially favorable terms should its cash requirements exceed cash available from operations, existing cash, and cash available under its credit facility.

## Off-Balance Sheet Arrangements

Under the MP Mask joint venture operating agreement, in order to maintain its 49.99% ownership interest, the Company may be required to make additional capital contributions to the joint venture up to the maximum amount specified in the operating agreement. Cumulatively through April 29, 2012, the Company has contributed \$30.6 million to the joint venture (including a capital contribution of \$5.5 million made during the three month period ended April 29, 2012), and has received distributions from the joint venture totaling \$10.0 million. In May 2012 the Company made an additional capital contribution to MP Mask of \$7.5 million.

The Company leases certain office facilities and equipment under operating leases that may require it to pay taxes, insurance and maintenance expenses related to the properties. Certain of these leases contain renewal or purchase options exercisable at the end of the lease terms.

## Business Outlook

A majority of the Company's revenue growth is expected to continue to come from the Asian region, as customers increase their use of manufacturing foundries located outside of North America and Europe. Additional revenue growth is also anticipated in North America, as the Company benefits from advanced technology it may utilize under its technology license with Micron. The Company's Korean and Taiwanese operations are non-wholly owned subsidiaries and, therefore, a portion of earnings generated at each of these locations is allocated to noncontrolling interests.

The Company continues to assess its global manufacturing strategy and monitor its market capitalization, sales volume and related cash flows from operations. This ongoing assessment could result in future facility closures, asset redeployments, additional impairments of intangible or long-lived assets, workforce reductions, or the addition of increased manufacturing facilities, all of which would be based on market conditions and customer requirements.

## Effect of Recent Accounting Pronouncements

See Note 16 of the condensed consolidated financial statements for a summary of recent accounting pronouncements that have affected the Company's financial reporting.

## ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company records derivatives on the condensed consolidated balance sheets as assets or liabilities, measured at fair value. The Company does not engage in derivative instruments for speculative purposes. Gains or losses resulting from changes in the values of those derivatives are reported in the condensed consolidated statements of operations, or as accumulated other comprehensive income or loss, a separate component of equity, depending on the use of the

derivatives and whether they qualify for hedge accounting. In order to qualify for hedge accounting, among other criteria, the derivative must be a hedge of an interest rate, price, foreign currency exchange rate, or credit risk, that is expected to be highly effective at the inception of the hedge and be highly effective in achieving offsetting changes in the fair value or cash flows of the hedged item during the term of the hedge, and formally documented at the inception of the hedge. The types of risks hedged are those related to the variability of future cash flows caused by movements in foreign currency exchange and interest rates. The Company documents its risk management strategy and hedge effectiveness at the inception of, and during the term of each hedge.

Index

Foreign Currency Exchange Rate Risk

The Company conducts business in several major international currencies through its worldwide operations and its financial position, financial performance and cash flows may be affected by fluctuations in the exchange rates of these currencies. Changes in exchange rates can positively or negatively affect the Company's sales, operating margins, assets, liabilities, and equity. The functional currencies of the Company's Asian subsidiaries are the Korean won, the New Taiwan dollar, and the Singapore dollar. The functional currencies of the Company's European subsidiaries are the British pound and the euro.

The Company attempts to minimize its risk of foreign currency transaction losses by producing its products in the same country in which the products are sold (thereby generating revenues and incurring expenses in the same currency), and by managing its working capital. In some instances, the Company may sell or purchase products in a currency other than the functional currency of the country where it was produced. There can be no assurance that this approach will continue to be successful, especially in the event of a significant adverse movement in the value of any foreign currencies against the U.S. dollar. In certain prior years the Company experienced significant foreign exchange losses on these transactions.

The Company's primary net foreign currency exposures as of April 29, 2012, included the Korean won, the Japanese yen, the New Taiwan dollar, the Singapore dollar, the British pound, and the euro. As of April 29, 2012, a 10% adverse movement in the value of these currencies against the U.S. dollar would have resulted in a net unrealized pre-tax loss of \$2.7 million. The Company does not believe that a 10% change in the exchange rates of other non-U.S. dollar currencies would have a material effect on its consolidated financial position, results of operations, or cash flows.

Interest Rate Risk

At April 29, 2012, the Company had \$25.0 million in variable rate borrowings. A 10% change in interest rates would not have had a material effect on the Company's consolidated financial position, results of operations, or cash flows in the three and six month periods ended April 29, 2012.

Item 4.

CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

The Company has established and currently maintains disclosure controls and procedures, as such term is defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), designed to ensure that information required to be disclosed in its reports filed under the Exchange Act, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to management, including the Company's chief executive officer and chief financial officer, as appropriate, to allow for timely decisions regarding required disclosure. In designing and evaluating disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

The Company's management, under the supervision and with the participation of the Company's chief executive officer and chief financial officer, evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures as of the end of the period covered by this report. Based upon that evaluation the Company's chief executive officer and chief financial officer concluded that the Company's disclosure controls and procedures

were effective at a reasonable assurance level as of the end of the period covered by this report.

#### Changes in Internal Control over Financial Reporting

There was no change in the Company's internal control over financial reporting during the Company's second quarter of fiscal 2012 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Index

## PART II. OTHER INFORMATION

## Item 1A. RISK FACTORS

There have been no material changes to risks relating to the Company's business as disclosed in Part 1, Item 1A of the Company's Form 10-K for the year ended October 30, 2011.

## Item 6. EXHIBITS

	(a)	Exhibits
Exhibit Number	Description
