## **JUNIATA VALLEY FINANCIAL CORP. AND SUBSIDIARY**

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

#### **1. Basis of Presentation and Accounting Policies**

The consolidated financial statements include the accounts of Juniata Valley Financial Corp. (the “Company”) and its wholly owned subsidiary, The Juniata Valley Bank (the “Bank”). All significant intercompany accounts and transactions have been eliminated.

The accompanying unaudited consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information. Accordingly, they do not include all of the information and footnotes required by U.S. generally accepted accounting principles (U.S. GAAP) for complete consolidated financial statements. In the opinion of management, all adjustments considered necessary for fair presentation have been included. Operating results for the three and nine month periods ended September 30, 2013, are not necessarily indicative of the results for the year ending December 31, 2013. For further information, refer to the consolidated financial statements and notes thereto included in Juniata Valley Financial Corp.’s Annual Report on Form 10-K for the year ended December 31, 2012.

The Company has evaluated events and transactions occurring subsequent to the consolidated statement of financial condition date of September 30, 2013 for items that should potentially be recognized or disclosed in these consolidated financial statements. The evaluation was conducted through the date these consolidated financial statements were issued.

#### **2. Recent Accounting Standards Updates (ASU)**

There were no new accounting pronouncements affecting the Company during the nine months ended September 30, 2013 that were not already adopted by the Company in previous periods.

#### **3. Accumulated other Comprehensive loss**

Edgar Filing: JUNIATA VALLEY FINANCIAL CORP - Form 10-Q

Components of accumulated other comprehensive loss, net of tax consisted of the following (in thousands):

	9/30/2013	12/31/2012
Unrealized (losses) gains on available for sale securities	\$ (539 )	\$ 800
Unrecognized expense for defined benefit pension	(2,118 )	(2,219 )
Accumulated other comprehensive loss	\$ (2,657 )	\$ (1,419 )

## 4. Earnings Per Share

Basic earnings per share (EPS) is computed by dividing net income by the weighted average number of common shares outstanding for the period. Diluted EPS reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock that then shared in the earnings of the Company. Potential common shares that may be issued by the Company relate solely to outstanding stock options and are determined using the treasury stock method. The following table sets forth the computation of basic and diluted earnings per share:

(Amounts, except shares and earnings per share, in thousands)

	Three Months Ended September 30, 2013	Three Months Ended September 30, 2012
Net income	\$ 1,019	\$ 1,132
Weighted-average common shares outstanding	4,208	4,235
Basic earnings per share	\$ 0.24	\$ 0.27
Weighted-average common shares outstanding	4,208	4,235
Common stock equivalents due to effect of stock options	1	1
Total weighted-average common shares and equivalents	4,209	4,236
Diluted earnings per share	\$ 0.24	\$ 0.27
	Nine Months Ended September 30, 2013	Nine Months Ended September 30, 2012
Net income	\$ 3,034	\$ 2,765
Weighted-average common shares outstanding	4,215	4,232
Basic earnings per share	\$ 0.72	\$ 0.65
Weighted-average common shares outstanding	4,215	4,232
Common stock equivalents due to effect of stock options	1	2
Total weighted-average common shares and equivalents	4,216	4,234
Diluted earnings per share	\$ 0.72	\$ 0.65

## 5.

**Securities**

The Company's investment portfolio includes primarily bonds issued by U.S. Government sponsored agencies (approximately 63%) and municipalities (approximately 35%) as of September 30, 2013. Most of the municipal bonds are general obligation bonds with maturities or pre-refunding dates within 5 years. The remaining 2% of the portfolio

includes mortgage-backed securities issued by Government-sponsored agencies and backed by residential mortgages and a group of equity investments in other financial institutions.

The amortized cost and fair value of securities as of September 30, 2013 and December 31, 2012, by contractual maturity, are shown below (in thousands). Expected maturities may differ from contractual maturities because the securities may be called or prepaid with or without prepayment penalties.

Securities Available for Sale	September 30, 2013			
	Amortized Cost	Fair Value	Gross Unrealized Gains	Gross Unrealized Losses
Type and maturity				
Obligations of Government agencies and corporations				
Within one year	\$6,654	\$6,674	\$ 20	\$ -

Securities Available for Sale	December 31, 2012			
	Amortized Cost	Fair Value	Gross Unrealized Gains	Gross Unrealized Losses
Type and maturity				
Obligations of Government agencies and corporations				
Within one year	\$7,908	\$7,996	\$ 88	\$ -
After one year but within five years	42,253	42,796	543	-
After five years but within ten years	22,004	22,025	53	(32 )
	72,165	72,817	684	(32 )
Obligations of state and political subdivisions				
Within one year	10,448	10,505	57	-
After one year but within five years	29,595	29,809	246	(32 )
After five years but within ten years	4,727	4,936	215	(6 )
After ten years	731	726	-	(5 )
	45,501	45,976	518	(43 )
Mortgage-backed securities	2,502	2,526	24	-
Equity securities	985	1,019	145	(111 )
Total	\$121,153	\$122,338	\$ 1,371	\$ (186 )

Certain obligations of the U.S. Government and state and political subdivisions are pledged to secure public deposits, securities sold under agreements to repurchase and for other purposes as required or permitted by law. The carrying value of the pledged assets was \$33,957,000 and \$30,785,000 at September 30, 2013 and December 31, 2012, respectively.

In addition to cash received from the scheduled maturities of securities, some investment securities available for sale are sold or called at current market values during the course of normal operations.

Following is a summary of proceeds received from sales or calls of investment securities transactions and the resulting realized gains and losses (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2013	2012	2013	2012
Gross proceeds from sales of securities	\$ -	\$ -	\$ -	\$ -
Securities available for sale:				
Gross realized gains from called securities	\$ -	\$ -	\$ -	\$ 2
Gross realized losses from called securities	(1 )	-	-	-

Accounting Standards Codification (ASC) Topic 320, *Investments – Debt and Equity Securities*, clarifies the interaction of the factors that should be considered when determining whether a debt security is other-than-temporarily impaired. For debt securities, management must assess whether (a) it has the intent to sell the security and (b) it is more likely than not that it will be required to sell the security prior to its anticipated recovery. These steps are taken before an assessment is made as to whether the entity will recover the cost basis of the investment. For equity securities, consideration is given to management's intention and ability to hold the securities until recovery of unrealized losses in assessing potential other-than-temporary impairment. More specifically, factors considered to determine other-than-temporary impairment status for individual equity holdings include the length of time the stock has remained in an unrealized loss position, the percentage of unrealized loss compared to the carrying cost of the stock, dividend reduction or suspension, market analyst reviews and expectations, and other pertinent factors that would affect expectations for recovery or further decline.

In instances when a determination is made that an other-than-temporary impairment exists and the entity does not intend to sell the debt security and it is not more likely than not that it will be required to sell the debt security prior to its anticipated recovery, the other-than-temporary impairment is separated into the amount of the total other-than-temporary impairment related to a decrease in cash flows expected to be collected from the debt security (the credit loss) and the amount of the total other-than-temporary impairment related to all other factors. The amount of the total other-than-temporary impairment related to the credit loss is recognized in earnings. The amount of the total other-than-temporary impairment related to all other factors is recognized in other comprehensive (loss) income.

The following table shows gross unrealized losses and fair value, aggregated by category and length of time that individual securities have been in a continuous unrealized loss position, at September 30, 2013 and December 31, 2012 (in thousands):

Edgar Filing: JUNIATA VALLEY FINANCIAL CORP - Form 10-Q

	Unrealized Losses at September 30, 2013					
	Less Than 12 Months		12 Months or More		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
Obligations of U.S. Government agencies and corporations	\$49,793	\$ (1,351 )	\$ -	\$ -	\$49,793	\$ (1,351 )
Obligations of state and political subdivisions	17,658	(196 )	1,632	(13 )	19,290	(209 )
Mortgage-backed securities	1,067	(8 )	-	-	1,067	(8 )
Debt securities	68,518	(1,555 )	1,632	(13 )	70,150	(1,568 )
Equity securities	-	-	222	(66 )	222	(66 )
Total temporarily impaired securities	\$68,518	\$ (1,555 )	\$ 1,854	\$ (79 )	\$70,372	\$ (1,634 )

	Unrealized Losses at December 31, 2012					
	Less Than 12 Months		12 Months or More		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
Obligations of U.S. Government agencies and corporations	\$11,471	\$ (32 )	\$ -	\$ -	\$11,471	\$ (32 )
Obligations of state and political subdivisions	13,040	(43 )	-	-	13,040	(43 )
Debt securities	24,511	(75 )	-	-	24,511	(75 )
Equity securities	249	(13 )	251	(98 )	500	(111 )
Total temporarily impaired securities	\$24,760	\$ (88 )	\$ 251	\$ (98 )	\$25,011	\$ (186 )

There are 92 debt securities that were in an unrealized loss position on September 30, 2013, and three that had an unrealized loss for more than 12 months. These securities depreciated 2.2% from their amortized cost basis. The unrealized losses noted above are considered to be temporary impairments. The decline in the values of the debt securities is due only to interest rate fluctuations, rather than erosion of issuer credit quality. As a result, the payment of contractual cash flows, including principal repayment, is not considered to be at risk. As the Company does not intend to sell the securities, does not believe it will be required to sell the securities before recovery and expects to recover the entire amortized cost basis, none of the debt securities are deemed to be other-than-temporarily impaired.

Equity securities owned by the Company consist of common stock of various financial services providers (“Bank Stocks”) and are evaluated quarterly for evidence of other-than-temporary impairment. There were eight equity securities that were in an unrealized loss position on September 30, 2013, and have carried unrealized losses for 12 months or more. Individually, none of these eight equity securities have significant unrealized losses and each has increased in value during the first nine months of 2013. Management has identified no other-than-temporary impairment as of September 30, 2013 in the equity portfolio. Management continues to track the performance of each stock owned to determine if it is prudent to recognize any further other-than-temporary impairment charges. The Company has the ability and intent to hold its equity securities until recovery of unrealized losses.

## 6. Loans and Related Allowance for Credit Losses

Loans that the Company has the intent and ability to hold for the foreseeable future or until maturity or payoff are stated at the outstanding unpaid principal balances, net of any deferred fees or costs and the allowance for loan losses. Interest income on all loans, other than nonaccrual loans, is accrued over the term of the loans based on the amount of principal outstanding. Unearned income is amortized to income over the life of the loans, using the interest method.

The loan portfolio is segmented into commercial and consumer loans. Commercial loans are comprised of the following classes of loans: (1) commercial, financial and agricultural, (2) commercial real estate, (3) real estate

construction, a portion of (4) mortgage loans and (5) obligations of states and political subdivisions. Consumer loans are comprised of a portion of (4) mortgage loans and (6) personal loans.

Loans on which the accrual of interest has been discontinued are designated as non-accrual loans. Accrual of interest on loans is generally discontinued when the contractual payment of principal or interest has become 90 days past due or reasonable doubt exists as to the full, timely collection of principal or interest. However, it is the Company's policy to continue to accrue interest on loans over 90 days past due as long as (1) they are guaranteed or well secured and (2) there is an effective means of timely collection in process. When a loan is placed on non-accrual status, all unpaid interest credited to income in the current year is reversed against current period income, and unpaid interest accrued in prior years is charged against the allowance for loan losses. Interest received on nonaccrual loans generally is either applied against principal or reported as interest income, according to management's judgment as to the collectability of principal. Generally, accruals are resumed on loans only when the obligation is brought fully current with respect to interest and principal, has performed in accordance with the contractual terms for a reasonable period of time and the ultimate collectability of the total contractual principal and interest is no longer in doubt.

The Company originates loans in the portfolio with the intent to hold them until maturity. At the time the Company no longer intends to hold loans to maturity based on asset/liability management practices, the Company transfers loans from its portfolio to held for sale at fair value. Any write-down recorded upon transfer is charged against the allowance for loan losses. Any write-downs recorded after the initial transfers are recorded as a charge to other non-interest expense. Gains or losses recognized upon sale are included in gains on sales of loans which is a component of non-interest income.

The Company also originates residential mortgage loans with the intent to sell. These individual loans are normally funded by the buyer immediately. The Company maintains servicing rights on these loans, and the fair value of the servicing rights is carried as a component of other assets. Servicing rights are not material to the Company's consolidated financial statements.

The allowance for credit losses consists of the allowance for loan losses and the reserve for unfunded lending commitments. The allowance for loan losses ("allowance") represents management's estimate of losses inherent in the loan portfolio as of the consolidated statement of financial condition date and is recorded as a reduction to loans. The reserve for unfunded lending commitments represents management's estimate of losses inherent in its unfunded lending commitments and is recorded in other liabilities on the consolidated statement of financial condition, when necessary. The amount of the reserve for unfunded lending commitments is not material to the consolidated financial statements. The allowance for loan losses is increased by the provision for loan losses, and decreased by charge-offs, net of recoveries. Loans deemed to be uncollectible are charged against the allowance for loan losses, and subsequent recoveries, if any, are credited to the allowance.

For financial reporting purposes, the provision for loan losses charged to current operating income is based on management's estimates, and actual losses may vary from estimates. These estimates are reviewed and adjusted at least quarterly and are reported in earnings in the periods in which they become known.

Loans included in any class are considered for charge-off when:

- principal or interest has been in default for 120 days or more and for which no payment has been received during the previous four months;
- all collateral securing the loan has been liquidated and a deficiency balance remains;
- a bankruptcy notice is received for an unsecured loan;
- a confirming loss event has occurred; or
- the loan is deemed to be uncollectible for any other reason.

The allowance for loan losses is maintained at a level considered adequate to offset probable losses on the Company's existing loans. The analysis of the allowance for loan losses relies heavily on changes in observable trends that may indicate potential credit weaknesses. Management's periodic evaluation of the adequacy of the allowance is based on the Company's past loan loss experience, known and inherent risks in the portfolio, adverse situations that may affect

the borrower's ability to repay, the estimated value of any underlying collateral, composition of the loan portfolio, current economic conditions and other relevant factors. This evaluation is inherently subjective as it requires material estimates that may be susceptible to significant revision as more information becomes available.

In addition, regulatory agencies, as an integral part of their examination process, periodically review the Company's allowance for loan losses and may require the Company to recognize additions to the allowance for loan losses based on their judgments about information available to them at the time of their examination, which may not be currently available to management. Based on management's comprehensive analysis of the loan portfolio, management believes the level of the allowance for loan losses as of September 30, 2013 was adequate.

There are two components of the allowance: a specific component for loans that are deemed to be impaired; and a general component for contingencies.

A loan is considered to be impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loans and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan by loan basis by the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's observable market price or the fair value of the collateral if the loan is collateral dependent.

The estimated fair values of substantially all of the Company's impaired loans are measured based on the estimated fair value of the loan's collateral. For commercial loans secured with real estate, estimated fair values are determined primarily through third-party appraisals. When a real estate secured loan becomes impaired, a decision is made regarding whether an updated certified appraisal of the real estate is necessary. This decision is based on various considerations, including the age of the most recent appraisal, the loan-to-value ratio based on the current appraisal and the condition of the property. Appraised values may be discounted to arrive at the estimated selling price of the collateral, which is considered to be the estimated fair value. The discounts also include the estimated costs to sell the property. For commercial loans secured by non-real estate collateral, estimated fair values are determined based on the borrower's financial statements, inventory reports, aging accounts receivable, equipment appraisals or invoices. Indications of value from these sources are generally discounted based on the age of the financial information or the quality of the assets. For such loans that are classified as impaired, an allowance is established when the discounted cash flows (or collateral value or observable market price) of the impaired loan is lower than the carrying value of that loan. The Company generally does not separately identify individual consumer segment loans for impairment disclosures, unless such loans are subject to a restructuring agreement.

Loans whose terms are modified are classified as troubled debt restructurings if the Company grants borrowers concessions and it is deemed that those borrowers are experiencing financial difficulty. Concessions granted under a troubled debt restructuring generally involve a below-market interest rate based on the loan's risk characteristics or an extension of a loan's stated maturity date. Nonaccrual troubled debt restructurings are restored to accrual status if principal and interest payments, under the modified terms, are current for a sustained period of time after modification. Loans classified as troubled debt restructurings are designated as impaired.

The component of the allowance for contingencies relates to other loans that have been segmented into risk rated categories. The borrower's overall financial condition, repayment sources, guarantors and value of collateral, if appropriate, are evaluated quarterly or when credit deficiencies arise, such as delinquent loan payments. Credit quality risk ratings include regulatory classifications of special mention, substandard, doubtful and loss. Loans classified as special mention have potential weaknesses that deserve management's close attention. If uncorrected, the potential weaknesses may result in deterioration of the repayment prospects. Loans classified as substandard have one or more well-defined weaknesses that jeopardize the liquidation of the debt. Substandard loans include loans that are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any.

Loans classified doubtful have all the weaknesses inherent in loans classified substandard with the added characteristic that collection or liquidation in full, on the basis of current conditions and facts, is highly improbable. Loans classified as a loss are considered uncollectible and are charged to the allowance for loan losses. Loans not classified are rated pass. Specific reserves may be established for larger, individual classified loans as a result of this evaluation, as discussed above. Remaining loans are categorized into large groups of smaller balance homogeneous loans and are collectively evaluated for impairment. This computation is generally based on historical loss experience adjusted for qualitative factors. The historical loss experience is averaged over a ten-year period for each of the portfolio segments. The ten-year timeframe was selected in order to capture activity over a wide range of economic conditions and has been consistently used for the past seven years. The qualitative risk factors are reviewed for relevancy each quarter and include:

National, regional and local economic and business conditions, as well as the condition of various market segments, including the underlying collateral for collateral dependent loans;

- Nature and volume of the portfolio and terms of loans;
- Experience, ability and depth of lending and credit management and staff;
- Volume and severity of past due, classified and nonaccrual loans, as well as other loan modifications;
- Existence and effect of any concentrations of credit and changes in the level of such concentrations; and
- Effect of external factors, including competition.

Each factor is assigned a value to reflect improving, stable or declining conditions based on management's best judgment using relevant information available at the time of the evaluation. Adjustments to the factors are supported through documentation of changes in conditions in a narrative accompanying the allowance for loan loss calculation.

### Commercial, Financial and Agricultural Lending

The Company originates commercial, financial and agricultural loans primarily to businesses located in its primary market area and surrounding areas. These loans are used for various business purposes, which include short-term loans and lines of credit to finance machinery and equipment purchases, inventory and accounts receivable. Generally, the maximum term for loans extended on machinery and equipment is shorter and does not exceed the projected useful life of such machinery and equipment. Most business lines of credit are written with a five year maturity, subject to an annual credit review.

Commercial loans are generally secured with short-term assets; however, in many cases, additional collateral, such as real estate, is provided as additional security for the loan. Loan-to-value maximum values have been established by the Company and are specific to the type of collateral. Collateral values may be determined using invoices, inventory reports, accounts receivable aging reports, collateral appraisals, etc.

In underwriting commercial loans, an analysis of the borrower's character, capacity to repay the loan, the adequacy of the borrower's capital and collateral, as well as an evaluation of conditions affecting the borrower, is performed. Analysis of the borrower's past, present and future cash flows is also an important aspect of the Company's analysis.

Concentration analysis assists in identifying industry specific risk inherent in commercial, financial and agricultural lending. Mitigants include the identification of secondary and tertiary sources of repayment and appropriate increases in oversight.

Commercial, financial and agricultural loans generally present a higher level of risk than certain other types of loans, particularly during slow economic conditions.

## Commercial Real Estate Lending

The Company engages in commercial real estate lending in its primary market area and surrounding areas. The Company's commercial real estate portfolio is secured primarily by residential housing, commercial buildings, raw land and hotels. Generally, commercial real estate loans have terms that do not exceed 20 years, have loan-to-value ratios of up to 80% of the appraised value of the property and are typically secured by personal guarantees of the borrowers.

As economic conditions deteriorate, the Company reduces its exposure in real estate loans with higher risk characteristics. In underwriting these loans, the Company performs a thorough analysis of the financial condition of the borrower, the borrower's credit history, and the reliability and predictability of the cash flow generated by the property securing the loan. Appraisals on properties securing commercial real estate loans originated by the Company are performed by independent appraisers.

Commercial real estate loans generally present a higher level of risk than certain other types of loans, particularly during slow economic conditions.

### Real Estate Construction Lending

The Company engages in real estate construction lending in its primary market area and surrounding areas. The Company's real estate construction lending consists of commercial and residential site development loans, as well as commercial building construction and residential housing construction loans.

The Company's commercial real estate construction loans are generally secured with the subject property, and advances are made in conformity with a pre-determined draw schedule supported by independent inspections. Terms of construction loans depend on the specifics of the project, such as estimated absorption rates, estimated time to complete, etc.

In underwriting commercial real estate construction loans, the Company performs a thorough analysis of the financial condition of the borrower, the borrower's credit history, the reliability and predictability of the cash flow generated by the project using feasibility studies, market data, etc. Appraisals on properties securing commercial real estate loans originated by the Company are performed by independent appraisers.

Real estate construction loans generally present a higher level of risk than certain other types of loans, particularly during slow economic conditions. The difficulty of estimating total construction costs adds to the risk as well.

### Mortgage Lending

The Company's real estate mortgage portfolio is comprised of consumer residential mortgages and business loans secured by one-to-four family properties. One-to-four family residential mortgage loan originations, including home equity installment and home equity lines of credit loans, are generated by the Company's marketing efforts, its present customers, walk-in customers and referrals. These loans originate primarily within the Company's market area or with customers primarily from the market area.

The Company offers fixed-rate and adjustable rate mortgage loans with terms up to a maximum of 25-years for both permanent structures and those under construction. The Company's one-to-four family residential mortgage originations are secured primarily by properties located in its primary market area and surrounding areas. The majority of the Company's residential mortgage loans originate with a loan-to-value of 80% or less. Home equity installment loans are secured by the borrower's primary residence with a maximum loan-to-value of 80% and a maximum term of 15 years. Home equity lines of credit are secured by the borrower's primary residence with a maximum loan-to-value of 90% and a maximum term of 20 years.

In underwriting one-to-four family residential real estate loans, the Company evaluates the borrower's ability to make monthly payments, the borrower's repayment history and the value of the property securing the loan. The ability to repay is determined by the borrower's employment history, current financial conditions, and credit background. The analysis is based primarily on the customer's ability to repay and secondarily on the collateral or security. Most properties securing real estate loans made by the Company are appraised by independent fee appraisers. The Company generally requires mortgage loan borrowers to obtain an attorney's title opinion or title insurance, and fire and property insurance (including flood insurance, if necessary) in an amount not less than the amount of the loan. The Company does not engage in sub-prime residential mortgage originations.

Residential mortgage loans and home equity loans generally present a lower level of risk than certain other types of consumer loans because they are secured by the borrower's primary residence. Risk is increased when the Company is in a subordinate position for the loan collateral.

#### Obligations of States and Political Subdivisions

The Company lends to local municipalities and other tax-exempt organizations. These loans are primarily tax-anticipation notes and, as such, carry little risk. Historically, the Company has never had a loss on any loan of this type.

## Personal Lending

The Company offers a variety of secured and unsecured personal loans, including vehicle loans, mobile home loans and loans secured by savings deposits as well as other types of personal loans.

Personal loan terms vary according to the type and value of collateral and creditworthiness of the borrower. In underwriting personal loans, a thorough analysis of the borrower's willingness and financial ability to repay the loan as agreed is performed. The ability to repay is determined by the borrower's employment history, current financial conditions and credit background.

Personal loans may entail greater credit risk than do residential mortgage loans, particularly in the case of personal loans which are unsecured or are secured by rapidly depreciable assets, such as automobiles or recreational equipment. In such cases, any repossessed collateral for a defaulted personal loan may not provide an adequate source of repayment of the outstanding loan balance as a result of the greater likelihood of damage, loss or depreciation. In addition, personal loan collections are dependent on the borrower's continuing financial stability, and thus are more likely to be affected by adverse personal circumstances. Furthermore, the application of various federal and state laws, including bankruptcy and insolvency laws, may limit the amount which can be recovered on such loans.

The following table presents the classes of the loan portfolio summarized by the aggregate pass rating and the classified ratings of special mention, substandard and doubtful within the Company's internal risk rating system as of September 30, 2013 and December 31, 2012 (in thousands):

As of September 30, 2013	Pass	Special Mention	Substandard	Doubtful	Total
Commercial, financial and agricultural	\$18,695	\$5,662	\$ 287	\$ -	\$24,644

Total	\$248,741	\$14,739	\$9,049	\$4,971	\$277,500

The Company has certain loans in its portfolio that are considered to be impaired. It is the policy of the Company to recognize income on impaired loans that have been transferred to nonaccrual status on a cash basis, only to the extent that it exceeds principal balance recovery. Until an impaired loan is placed on nonaccrual status, income is recognized on the accrual basis. Collateral analysis is performed on each impaired loan at least quarterly and results are used to determine if a specific reserve is necessary to adjust the carrying value of each individual loan down to the estimated fair value. Generally, specific reserves are carried against impaired loans based upon estimated collateral value until a confirming loss event occurs or until termination of the credit is scheduled through liquidation of the collateral or foreclosure. Charge off will occur when a confirmed loss is identified. Professional appraisals of collateral, discounted for expected selling costs, appraisal age, economic conditions and other known factors are used to determine the charge-off amount. The following tables summarize information regarding impaired loans by portfolio class as of September 30, 2013 and December 31, 2012 (in thousands):

The following table summarizes information regarding troubled debt restructurings by loan portfolio class at September 30, 2013, in thousands of dollars. There were no loans identified as troubled debt restructurings during 2012.

As of September 30, 2013	Number of Contracts	Pre-Modification Outstanding Recorded Investment	Post-Modification Outstanding Recorded Investment	Recorded Investment
Accruing troubled debt restructurings:				
Real estate - commercial	1	\$ 64	\$ 61	\$ 61
Real estate - mortgage	5	558	569	569
	6	\$ 622	\$ 630	\$ 630

The Company's troubled debt restructurings are also impaired loans, which may result in a specific allocation and subsequent charge-off if appropriate. As of September 30, 2013, there were no specific reserves or charge-offs relating to the troubled debt restructurings. The amended terms of the restructured loans vary, whereby interest rates have been reduced, principal payments have been reduced or deferred for a period of time and/or maturity dates have been extended. One restructured loan was delinquent in excess of 90 days with respect to the terms of the restructuring as of September 30, 2013. This loan has a balance of \$61,000 and is in the process of foreclosure.

The following table summarizes loans whose terms have been modified resulting in troubled debt restructurings during the three and nine months ended September 30, 2013, in thousands of dollars:

Edgar Filing: JUNIATA VALLEY FINANCIAL CORP - Form 10-Q

	Number of Contracts	Pre-Modification Outstanding Recorded Investment	Post-Modification Outstanding Recorded Investment	Recorded Investment
Three months ended September 30, 2013				
Accruing troubled debt restructurings:				
Real estate - mortgage	1	\$ 46	\$ 50	\$ 50
	1	\$ 46	\$ 50	\$ 50
Nine months ended September 30, 2013				
Accruing troubled debt restructurings:				
Real estate - commercial	1	\$ 64	\$ 61	\$ 61
Real estate - mortgage	5	558	569	569
	6	\$ 622	\$ 630	\$ 630

There were no loans modified resulting in troubled debt restructurings during the three and nine months ended September 30, 2012. There have been no defaults of troubled debt restructuring that took place during the three and nine months ended September 30, 2013 and 2012 within 12 months of restructure.

The following tables summarize the activity in the allowance for loan losses and recorded investments in loans receivable (in thousands):

As of, and for the periods ended September 30, 2013

## **7. Acquisition**

On September 8, 2006, the Company completed its acquisition of a branch office in Richfield, PA. The acquisition included real estate, deposits and loans. The assets and liabilities of the acquired branch office were recorded on the consolidated statement of financial condition at their estimated fair values as of September 8, 2006, and its results of operations have been included in the consolidated statements of income since such date.

Included in the purchase price of the branch was goodwill and core deposit intangible of \$2,046,000 and \$449,000, respectively. The core deposit intangible is being amortized over a ten-year period on a straight line basis. Amortization expense was \$12,000 in each of the third quarters of 2013 and 2012. During the first nine months of both 2013 and 2012, amortization expense was \$34,000. Accumulated amortization of core deposit intangible through September 30, 2013 was \$319,000. The goodwill is not amortized, but is measured annually for impairment or more frequently if certain events occur which might indicate goodwill has been impaired. There was no impairment of goodwill during either of the nine month periods ended September 30, 2013 or 2012.

## **8. Investment in Unconsolidated Subsidiary**

The Company owns 39.16% of the outstanding common stock of Liverpool Community Bank (LCB), Liverpool, PA. This investment is accounted for under the equity method of accounting. The investment is being carried at \$4,094,000 as of September 30, 2013. The Company increases its investment in LCB for its share of earnings and decreases its investment by any dividends received from LCB. The investment is evaluated quarterly for impairment. A loss in value of the investment which is determined to be other than a temporary decline would be recognized as a loss in the period in which such determination is made. Evidence of a loss in value might include, but would not necessarily be limited to, absence of an ability to recover the carrying amount of the investment or inability of LCB to sustain an earnings capacity which would justify the current carrying value of the investment.

## **9. Fair Value Measurement**

Fair value measurement and disclosure guidance defines fair value as the price that would be received to sell an asset or transfer a liability in an orderly transaction (that is, not a forced liquidation or distressed sale) between market participants at the measurement date under current market conditions. Additional guidance is provided on determining when the volume and level of activity for the asset or liability has significantly decreased. The guidance also includes guidance on identifying circumstances when a transaction may not be considered orderly.

Fair value measurement and disclosure guidance provides a list of factors that a reporting entity should evaluate to determine whether there has been a significant decrease in the volume and level of activity for the asset or liability in relation to normal market activity for the asset or liability. When the reporting entity concludes there has been a significant decrease in the volume and level of activity for the asset or liability, further analysis of the information from that market is needed, and significant adjustments to the related prices may be necessary to estimate fair value in accordance with fair value measurement and disclosure guidance.

This guidance clarifies that, when there has been a significant decrease in the volume and level of activity for the asset or liability, some transactions may not be orderly. In those situations, the entity must evaluate the weight of the evidence to determine whether the transaction is orderly. The guidance provides a list of circumstances that may indicate that a transaction is not orderly. A transaction price that is not associated with an orderly transaction is given little, if any, weight when estimating fair value.

Fair value measurement and disclosure guidance defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability. The price in the principal (or most advantageous) market used to measure the fair value of the asset or liability is not adjusted for transaction costs. An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets and liabilities; it is not a forced transaction. Market participants are buyers and sellers in the principal market that are (i) independent, (ii) knowledgeable, (iii) able to transact and (iv) willing to transact.

Fair value measurement and disclosure guidance requires the use of valuation techniques that are consistent with the market approach, the income approach and/or the cost approach. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets and liabilities. The income approach uses valuation techniques to convert future amounts, such as cash flows or earnings, to a single present amount on a discounted basis. The cost approach is based on the amount that currently would be required to replace the service capacity of an asset (replacement cost). Valuation techniques should be consistently applied. Inputs to valuation techniques refer to the assumptions that market participants would use in pricing the asset or liability. Inputs may be observable, meaning those that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from independent sources, or unobservable, meaning those that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. In that regard, the guidance establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

**Level 1 Inputs** – Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

**Level 2 Inputs** – Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These might include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (such as interest rates, volatilities, prepayment speeds, credit risks, etc.) or inputs that are derived principally from or corroborated by market data by correlation or other means.

**Level 3 Inputs** – Unobservable inputs for determining the fair values of assets or liabilities that reflect an entity's own assumptions about the assumptions that market participants would use in pricing the assets or liabilities.

An asset's or liability's placement in the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement.

A description of the valuation methodologies used for instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below.

In general, fair value is based upon quoted market prices, where available. If such quoted market prices are not available, fair value is based upon internally developed models that primarily use, as inputs, observable market-based parameters. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value. These adjustments may include amounts to reflect counterparty credit quality and the Company's creditworthiness, among other things, as well as unobservable parameters. Any such valuation adjustments are applied consistently over time. The Company's valuation methodologies may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. While management believes the Company's valuation methodologies are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date.

**Securities Available for Sale.** Debt securities classified as available for sale are reported at fair value utilizing Level 2 inputs. For these securities, the Company obtains fair value measurement from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bond's terms and conditions, among other things. Equity securities classified as available for sale are reported at fair value using Level 1 inputs.

**Impaired Loans.** Certain impaired loans are reported on a non-recurring basis at the fair value of the underlying collateral since repayment is expected solely from the collateral. Fair value is generally determined based upon independent third-party appraisals of the properties, or discounted cash flows based upon the expected proceeds. These assets are included as Level 3 fair values, based upon the lowest level of input that is significant to the fair value measurements.

**Other Real Estate Owned.** Certain assets included in other real estate owned are carried at fair value as a result of impairment and accordingly, are presented as measured on a non-recurring basis. Values are estimated using Level 3 inputs, based on appraisals that consider the sales prices of property in the proximate vicinity.

**Mortgage Servicing Rights.** The fair value of servicing assets is based on the present value of estimated future cash flows on pools of mortgages stratified by rate and maturity date and are considered Level 3 inputs.

The following table summarizes financial assets and financial liabilities measured at fair value as of September 30, 2013 and December 31, 2012, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value (in thousands). There were no transfers of assets between fair value Level 1 and Level 2 during the quarter ended September 30, 2013.

	September 30, 2013	(Level 1) Quoted Prices in Active Markets for Identical Assets	(Level 2) Significant Other Observable Inputs	(Level 3) Significant Other Unobservable Inputs
<b>Measured at fair value on a recurring basis:</b>				
<b>Debt securities available-for-sale:</b>				
Obligations of U.S. Government agencies and corporations	\$ 80,271	\$ -	\$ 80,271	\$ -
Obligations of state and political subdivisions	44,682	-	44,682	-
Mortgage-backed securities	2,003	-	2,003	-
Equity securities available-for-sale	1,197	1,197	-	-
<b>Measured at fair value on a non-recurring basis:</b>				
Impaired loans	3,106	-	-	3,106
Other real estate owned	50	-	-	50
Mortgage servicing rights	146	-	-	146

Edgar Filing: JUNIATA VALLEY FINANCIAL CORP - Form 10-Q

	December 31, 2012	for Identical Assets	Observable Inputs	Unobservable Inputs
Measured at fair value on a recurring basis:				
Debt securities available-for-sale:				
Obligations of U.S. Government agencies and corporations	\$ 72,817	\$ -	\$ 72,817	\$ -
Obligations of state and political subdivisions	45,976	-	45,976	-
Mortgage-backed securities	2,526	-	2,526	-
Equity securities available-for-sale	1,019	1,019	-	-
Measured at fair value on a non-recurring basis:				
Impaired loans	2,056	-	-	2,056
Other real estate owned	50	-	-	50
Mortgage servicing rights	98	-	-	98

The following table presents additional quantitative information about assets measured at fair value on a nonrecurring basis and for which Level 3 inputs have been used to determine fair value:

September 30, 2013	Fair Value Estimate	Valuation Technique	Unobservable Input	Range	Weighted Average
Impaired loans	\$ 3,106	Appraisal of collateral (1)	Appraisal and liquidation adjustments (2)	(7)% - (10)%	(9.1 )%
Other real estate owned	50	Appraisal of collateral (1)	Appraisal and liquidation adjustments (2)	0%	0 %
Mortgage servicing rights	146	Multiple of annual servicing fee	Estimated pre-payment speed, based on rate and term	300% - 400%	326 %
December 31, 2012	Fair Value Estimate	Valuation Technique	Unobservable Input	Range	Weighted Average
Impaired loans	2,056	Appraisal of collateral (1)	Appraisal and liquidation adjustments (2)	(7)% - (10)%	(8.1 )%
Other real estate owned	\$ 50	Appraisal of collateral (1)	Appraisal and liquidation adjustments (2)	0%	0 %
Mortgage servicing rights	98	Multiple of annual servicing fee	Estimated pre-payment speed, based on rate and term	300% - 400%	326 %

(1) Fair value is generally determined through independent appraisals of the underlying collateral that generally include various level 3 inputs which are not identifiable.

Appraisals may be adjusted by management for qualitative factors such as economic conditions and estimated (2) liquidation expenses. The range of liquidation expenses and other appraisal adjustments are presented as a percent of the appraisal.

#### *Fair Value of Financial Instruments*

Management uses its best judgment in estimating the fair value of the Company's financial instruments; however, there are inherent weaknesses in any estimation technique. Therefore, the fair value estimates herein are not necessarily indicative of the amounts the Company could have realized in sales transactions on the dates indicated. The estimated fair value amounts have been measured as of their respective year ends and have not been re-evaluated or updated for purposes of these consolidated financial statements subsequent to those respective dates. As such, the estimated fair values of these financial instruments subsequent to the respective reporting dates may be different from the amounts reported at each quarter end.

The information presented below should not be interpreted as an estimate of the fair value of the entire Company since a fair value calculation is provided only for a limited portion of the Company's assets and liabilities. Due to a wide

range of valuation techniques and the degree of subjectivity used in making the estimates, comparisons between the Company's disclosures and those of other companies may not be meaningful.

The following describes the estimated fair value of the Company's financial instruments as well as the significant methods and assumptions not previously disclosed used to determine these estimated fair values.

Carrying values approximate fair value for cash and due from banks, interest-bearing demand deposits with banks, restricted stock in the Federal Home Loan Bank, loans held for sale, interest receivable, mortgage servicing rights, non-interest bearing deposits, securities sold under agreements to repurchase, short-term borrowings and interest payable. Other than cash and due from banks, which are considered Level 1 inputs, and mortgage servicing rights, which are Level 3 inputs, these instruments are Level 2 inputs.

Interest bearing time deposits with banks - The estimated fair value is determined by discounting the contractual future cash flows, using the rates currently offered for deposits of similar remaining maturities.

Loans – For variable-rate loans that reprice frequently and which entail no significant changes in credit risk, carrying values approximated fair value. Substantially all commercial loans and real estate mortgages are variable rate loans. The fair value of other loans (i.e. consumer loans and fixed-rate real estate mortgages) are estimated by calculating the present value of the cash flow difference between the current rate and the market rate, for the average maturity, discounted quarterly at the market rate.

Fixed rate time deposits - The estimated fair value is determined by discounting the contractual future cash flows, using the rates currently offered for deposits of similar remaining maturities.

Other interest bearing liabilities – The fair value is estimated using discounted cash flow analysis, based on incremental borrowing rates for similar types of arrangements.

Commitments to extend credit and letters of credit – The fair value of commitments to extend credit is estimated using the fees currently charged to enter into similar agreements, taking into account market interest rates, the remaining terms and present credit-worthiness of the counterparties. The fair value of guarantees and letters of credit is based on fees currently charged for similar agreements.

The estimated fair values of the Company’s financial instruments are as follows (in thousands):

## Financial Instruments

(in thousands)

	September 30, 2013		December 31, 2012	
	Carrying Value	Fair Value	Carrying Value	Fair Value

## 10. Defined Benefit Retirement Plan

The Company sponsors a defined benefit retirement Plan (the "Plan") which covers substantially all of its employees employed prior to December 31, 2007. As of January 1, 2008, the Plan was amended to close the Plan to new entrants. All active participants as of December 31, 2007 became 100% vested in their accrued benefit and, as long as they remained eligible, continued to accrue benefits until December 31, 2012. The benefits are based on years of service and the employee's compensation. Effective December 31, 2012, the Plan was amended (frozen) to cease future service accruals after that date. The Company's funding policy is to contribute annually no more than the maximum amount that can be deducted for federal income tax purposes. Contributions are intended to provide for benefits attributed to service through December 31, 2012. The Company has made no contributions in the first nine months of 2013 and does not expect to contribute to the Plan in the remainder of 2013. Pension expense included the following components for the three and nine month periods ended September 30, 2013 and 2012:

*(Dollars in thousands)*

	Three Months Ended September 30,		Nine Months Ended September 30,

## 11. Commitments, Contingent Liabilities and Guarantees

In the ordinary course of business, the Company makes commitments to extend credit to its customers through letters of credit, loan commitments and lines of credit. At September 30, 2013, the Company had \$36,981,000 outstanding in loan commitments and other unused lines of credit extended to its customers as compared to \$43,164,000 at December 31, 2012.

The Company does not issue any guarantees that would require liability recognition or disclosure, other than its letters of credit. Letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. Generally, letters of credit have expiration dates within one year of issuance. The credit risk involved in issuing letters of credit is essentially the same as the risks that are involved in extending loan facilities to customers. The Company generally holds collateral and/or personal guarantees supporting these commitments. The Company had outstanding \$1,258,000 and \$1,293,000 of letters of credit commitments as of September 30, 2013 and December 31, 2012, respectively. Management believes that the proceeds obtained through a liquidation of collateral and the enforcement of guarantees would be sufficient to cover the potential amount of future payments required under the corresponding guarantees. The current amount of the liability as of September 30, 2013 for payments under letters of credit issued was not material. Because these instruments have fixed maturity dates, and because many of them will expire without being drawn upon, they do not generally present any significant liquidity risk.

Additionally, the Company has committed to fund and sell qualifying residential mortgage loans to the Federal Home Loan Bank of Pittsburgh in the total amount of \$25,000,000. As of September 30, 2013, \$6,900,000 remains to be

delivered on that commitment, of which \$472,000 has been committed to borrowers.

## **12. Subsequent Events**

In October 2013, the Board of Directors declared a dividend of \$0.22 per share for the fourth quarter of 2013 to shareholders of record on November 15, payable on December 2, 2013.

**Item 2.**

**Management's Discussion and Analysis of Financial Condition and Results of Operations**

Forward Looking Statements:

This discussion may contain "forward looking" information as defined by the Private Securities Litigation Reform Act of 1995. When words such as "believes", "expects", "anticipates" or similar expressions are used in this discussion, Juniata Valley is making forward-looking statements. Such information is based on Juniata Valley's current expectations, estimates and projections about future events and financial trends affecting the financial condition of its business. These statements are not historical facts or guarantees of future performance, events or results. Such statements involve potential risks and uncertainties and, accordingly, actual results may differ materially from this "forward looking" information. Many factors could affect future financial results. Juniata Valley undertakes no obligation to publicly update or revise forward looking information, whether as a result of new or updated information, future events, or otherwise. For a more complete discussion of certain risks and uncertainties affecting the Company, please see the sections entitled "Risk Factors" set forth in the Company's most recent Annual Report on form 10-K filed with the Securities and Exchange Commission.

Critical Accounting Policies:

Disclosure of the Company's significant accounting policies is included in the notes to the consolidated financial statements of the Company's Annual Report on Form 10-K for the year ended December 31, 2012. Some of these policies require significant judgments, estimates, and assumptions to be made by management, most particularly in connection with determining the provision for loan losses and the appropriate level of the allowance for loan losses, as well as management's evaluation of the investment portfolio for other-than-temporary impairment, the assessment of goodwill for impairment and the valuation of deferred tax assets. There have been no changes in critical accounting policies since December 31, 2012.

General:

The following discussion relates to the consolidated financial condition of the Company as of September 30, 2013, as compared to December 31, 2012, and the consolidated results of operations for the three and nine months ended September 30, 2013, compared to the same periods in 2012. This discussion should be read in conjunction with the interim consolidated financial statements and related notes included herein.

Overview:

Juniata Valley Financial Corp. is a Pennsylvania corporation organized in 1983 to be the holding company of The Juniata Valley Bank. The Bank is a state-chartered bank headquartered in Mifflintown, Pennsylvania. Juniata Valley Financial Corp. and its subsidiary bank derive substantially all of their income from banking and bank-related services, including interest earned on residential real estate, commercial mortgage, commercial and consumer loans, interest earned on investment securities and fee income from deposit services and other financial services to its customers through 12 locations in central Pennsylvania. Juniata Valley Financial Corp. also owns 39.16% of Liverpool Community Bank (LCB), located in Liverpool, Pennsylvania. The Company accounts for LCB as an unconsolidated subsidiary using the equity method of accounting.

Financial Condition:

Total assets as of September 30, 2013, were \$456.8 million, increasing by 1.8% from December 31, 2012. Deposits decreased by \$3.0 million, with non-interest bearing deposits increasing by \$2.0 million and interest-bearing deposits decreasing by \$5.0 million.

The table below shows changes in deposit volumes by type of deposit (in thousands of dollars) between December 31, 2012 and September 30, 2013.

	September 30, 2013	December 31, 2012	Change \$	%
Deposits:				
Demand, non-interest bearing	\$ 73,299	\$ 71,318	\$1,981	2.8 %
NOW and money market	92,412	90,349	2,063	2.3
Savings	59,818	56,382	3,436	6.1
Time deposits, \$100,000 and more	31,668	33,007	(1,339)	(4.1)
Other time deposits	126,545	135,695	(9,150)	(6.7)
Total deposits	\$ 383,742	\$ 386,751	\$(3,009)	(0.8)%

Overall, total loans increased by \$5.3 million, between December 31, 2012 and September 30, 2013, as shown in the table below (in thousands of dollars). Increases in commercial and business loan activity offset the reduction that continues to occur in the real estate – mortgage category, as individual borrowers have been attracted to fixed rate loans which the Company originates and sells in the secondary market.

	September 30, 2013	December 31, 2012	Change \$	%
Loans:				
Commercial, financial and agricultural	\$ 24,644	\$ 19,296	\$5,348	27.7 %
Real estate - commercial	77,282	69,187	8,095	11.7
Real estate - construction	20,297	18,092	2,205	12.2
Real estate - mortgage	143,218	153,122	(9,904)	(6.5)
Obligations of states and political subdivisions	12,753	12,769	(16)	(0.1)
Personal	4,588	5,034	(446)	(8.9)
Total loans	\$ 282,782	\$ 277,500	\$5,282	1.9 %

A summary of the activity in the allowance for loan losses for each of the nine-month periods ended September 30, 2013 and 2012 (in thousands) are presented below.

	Periods Ended September 30,	
	2013	2012
Balance of allowance - January 1	\$ 3,281	\$ 2,931
Loans charged off	(1,100 )	(755 )
Recoveries of loans previously charged off	20	7
Net charge-offs	(1,080 )	(748 )
Provision for loan losses	266	1,237
Balance of allowance - end of period	\$ 2,467	\$ 3,420
Ratio of net charge-offs during period to average loans outstanding	0.39 %	0.26 %

During the first nine months of 2013, the Company recorded charge-offs of \$1,100,000. Of the 2013 charge-offs, \$1,026,000 was due to specific loss confirming events in the first quarter which were the subjects of specific reserves.

As of September 30, 2013, 66 loans, with aggregate outstanding balances of \$9,260,000, were individually evaluated for impairment. A collateral analysis was performed on each of these 66 loans in order to establish a portion of the reserve needed to carry impaired loans at fair value. As a result, seven loans were determined to have insufficient collateral, and specific reserves, totaling \$372,000, were established for each of the seven impaired loans.

Management believes that the specific reserves carried are adequate to cover potential future losses related to these relationships. There are no other material loans classified as loss, doubtful, substandard, or special mention which management expects to significantly impact future operating results, liquidity or capital resources.

Following is a summary of the Bank's non-performing loans on September 30, 2013 as compared to December 31, 2012.

*(Dollar amounts in thousands)*

Non-performing loans	September 30, 2013	December 31, 2012		
Non-accrual loans	\$ 7,053	\$ 8,846		
Accruing loans past due 90 days or more	724	742		
Accruing restructured loans	630	-		
Total	\$ 8,407	\$ 9,588		
Average loans outstanding	\$ 275,345	\$ 282,282		
Ratio of non-performing loans to average loans outstanding	3.05	%	3.40	%

Stockholders' equity decreased by \$1,357,000, or 2.7%, from December 31, 2012 to September 30, 2013. The market value of securities available for sale decreased significantly as market rates were higher on September 30, 2013 compared to December 31, 2012, resulting in a decrease of \$1,339,000, net of taxes. Offsetting this decrease was an adjustment to other comprehensive income of \$101,000 to record the amortization of the net actuarial loss of the Company's defined benefit retirement plan. Net income exceeded the Company's dividend payout by \$250,000.

Subsequent to September 30, 2013, the following event took place:

On October 15, 2013, the Board of Directors declared a cash dividend for the fourth quarter of 2013 of \$0.22 per share to shareholders of record on November 15, 2013, payable on December 2, 2013.

**Comparison of the Three Months Ended September 30, 2013 and 2012**

## Operations Overview:

Net income for the third quarter of 2013 was \$1,019,000, a decrease of \$113,000 when compared to the third quarter of 2012. The decrease was due primarily to lower non-interest income recorded in the third quarter of 2013 as compared to the same period in 2012, as well as a higher provision for loan losses during the 2013 period. Basic and diluted earnings per share were \$0.24 in the third quarter of 2013, as compared to the \$0.27 reported in the third quarter of 2012. Presented below are selected key ratios for the two periods:

	Three Months Ended September 30,			
	2013		2012	
Return on average assets (annualized)	0.90	%	0.99	%
Return on average equity (annualized)	8.35	%	9.07	%
Average equity to average assets	10.76	%	10.91	%
Non-interest income, excluding securities gains (losses), as a percentage of average assets (annualized)	0.90	%	1.09	%
Non-interest expense as a percentage of average assets (annualized)	2.95	%	2.86	%

The discussion that follows further explains changes in the components of net income when comparing the third quarter of 2013 with the third quarter of 2012.

## Net Interest Income:

Net interest income was \$3,505,000 for the third quarter of 2013, as compared to \$3,566,000 in the same quarter in 2012. Average earning assets declined by 1.8%, and the net interest margin, on a fully tax equivalent basis, decreased by 3 basis points.

Interest on loans decreased \$187,000, or 4.8%, in the third quarter of 2013 as compared to the same period in 2012. A decrease of 28 basis points in the average weighted yield on loans reduced interest income by approximately \$186,000, with the remaining decrease attributable to a lower volume of loans.

Interest earned on investment securities and money market investments decreased \$53,000 in the third quarter of 2013 as compared to the third quarter of 2012, with average balances decreasing \$8.1 million during the period. The yield on money market investments (interest bearing deposits) increased by 123 basis points in the third quarter of 2013 as

compared to the third quarter of 2012, due to a reduction in average balances of interest bearing deposits. The overall pre-tax yield on the investment securities portfolio decreased during the period by 11 basis points.

Average interest-bearing liabilities decreased by \$8.3 million, while average non-interest bearing deposits increased by \$6.9 million. The decrease in average interest-bearing deposits contributed to a reduction in the cost to fund earning assets, which declined by 16 basis points, to 0.69%, in the third quarter of 2013.

Total average earning assets during the third quarter of 2013 were \$411.8 million, compared to \$419.6 million during the third quarter of 2012, yielding 4.09% in 2013 versus 4.25% in 2012. Net interest margin on a fully tax-equivalent basis for the third quarter of 2013 was 3.54%. For the same period in 2012, the fully-tax equivalent net interest margin was 3.57%.

Net interest income and net interest rate spread	\$3,505	3.21 %	\$3,566	3.19 %	\$ 41	\$ (102 )	\$ (61 )
Net interest margin on interest earning assets (3)		3.40 %		3.40 %			
Net interest income and net interest margin-Tax equivalent basis (4)	\$3,652	3.54 %	\$3,750	3.57 %			

Notes:

- 1) Average balances were calculated using a daily average.
- 2) Includes SuperNOW and money market accounts.
- 3) Net margin on interest earning assets is net interest income divided by average interest earning assets.
- 4) Interest on obligations of states and municipalities is not subject to federal income tax. In order to make the net yield comparable on a fully taxable basis, a tax equivalent adjustment is applied against the tax-exempt income utilizing a federal tax rate of 34%.
- 5) Non-accruing loans are included in the above table until they are charged off.
- 6) The change in interest due to rate and volume has been allocated to volume and rate changes in proportion to the relationship of the absolute dollar amounts of the change in each.
- (7) Includes gross unrealized gains (losses) on securities available for sale.

Provision for Loan Losses:

In the third quarter of 2013, the provision for loan losses was \$100,000, as compared to a provision of \$60,000 in the third quarter of 2012. Management regularly reviews the adequacy of the loan loss reserve and makes assessments as to specific loan impairment, historical charge-off expectations, general economic conditions in the Bank's market area, specific loan quality and other factors. The increased provision was primarily the result of analysis of the values of collateral securing certain impaired loans. See the earlier discussion in the Financial Condition section, explaining the information used to determine the provision.

Non-interest Income:

Non-interest income in the third quarter of 2013 was \$1,023,000, compared to \$1,253,000 in the third quarter of 2012, representing a decrease of 18.4%.

The Company began originating mortgages to sell on the secondary market and retain the servicing rights as a strategic objective early in 2012 and has been successful in building a servicing portfolio of approximately \$17.7 million as of September 30, 2013. The mortgage servicing right asset is included as a component of other assets and, as of September 30, 2013, was \$146,000. Gains on the sale of mortgage loans is made up of origination and servicing fees collected from the buyer, origination points collected from the borrower and an adjustment to the fair value of the mortgage servicing rights asset. In the third quarter of 2013, the total net gain on the sale of mortgage loans was \$84,000, a decrease of \$131,000, or 60.9%, from the third quarter of 2012, when origination activity was higher, and when the mortgage servicing rights asset was initially recognized. Fees derived from loan activity was likewise lower in the third quarter of 2013 as compared to the same period one year ago, as the number of consumer loans originated for sale declined.

Due to decreased volumes, commissions from sales of non-deposit products in the third quarter of 2013 were \$55,000, or 43.0%, lower than in the same quarter of the previous year. Trust fee income was essentially unchanged in the third quarter of 2013 as compared to the third quarter of 2012. Investment management and trust services revenue is impacted by fluctuations in the securities market, as trust revenues are based on the value of the underlying investment portfolios. In a sustained low-rate environment, trust revenues may be adversely affected.

Fees derived from electronic payment activity through the use of debit cards and other customer service fees remained steady in the two periods, as did earnings on bank-owned life insurance and annuities.

As a percentage of average assets, annualized non-interest income, exclusive of net gains on the sale of securities, was 0.90% in the third quarter of 2013 as compared to 1.09% in the third quarter of 2012.

Non-interest Expense:

Total non-interest expense was \$3,349,000 in the third quarter of 2013, an increase of \$76,000, or 2.3%, as compared to the third quarter of 2012.

Employee compensation expense increased by 3.3% in the third quarter of 2013 compared to the previous year's third quarter, due primarily to accruals for commissions and bonus. The third quarter of 2012 did not include accruals for employee bonuses, as it was clear that internal targets would not be met for 2012. Employee benefits decreased by

20.2% in the third quarter of 2013, due primarily to decreased costs related to the defined benefit retirement plan that was frozen as of December 31, 2012. Most other non-interest expense categories varied only slightly during the third quarter of 2013 versus the third quarter of 2012, including occupancy, equipment, director compensation, data processing expense, professional fees and FDIC insurance premiums. Costs associated with assets in foreclosure increased by \$16,000, or 44.4%, in the third quarter of 2013 as compared to the same period in 2012. The Company's investment in a low income elderly housing project required amortization of the investment to begin during the second quarter of 2013, and added \$145,000 of non-interest expense in the third quarter of 2013 that was not recorded in the 2012 period.

As a percentage of average assets, annualized non-interest expense was 2.95% in the third quarter of 2013 compared to 2.86% in the third quarter of 2012. Low-income housing investment amortization expense increased this ratio by 13 basis points. Excluding such amortization expense, annualized non-interest expense would have been 2.82% of average assets, representing an improvement of 4 basis points.

Provision for income taxes:

Income tax expense in the third quarter of 2013 was \$60,000 as compared to the \$354,000 recorded in the third quarter of 2012. Starting in the second quarter of 2013, the Company has qualified for a federal tax credit for its investment in a low-income housing project. The tax credit recorded in the third quarter of 2013 was \$185,000, offsetting \$245,000 in regular tax expense. As a result, the effective tax rate in the third quarter of 2013 was 5.6% compared to 23.8% in the third quarter of 2012.

**Comparison of the Nine Months Ended September 30, 2013 and 2012**

## Operations Overview:

Net income for the first nine months of 2013 was \$3,034,000, an increase of \$269,000, or 9.7%, compared to the first nine months of 2012. The increase was due primarily to a decline in the provision for loan losses. Basic and diluted earnings per share were \$0.72 in the first nine months of 2013, representing an increase of 10.8% from the \$0.65 earned in the first nine months of 2012. Annualized return on average equity for the first nine months in 2013 was 8.14%, compared to the ratio for the same period in the prior year of 7.42%, an increase of 9.7%. For the nine months ended September 30, annualized return on average assets was 0.90% in 2013, versus 0.81% in 2012.

Presented below are selected key ratios for the two periods:

	Nine Months Ended September 30,			
	2013		2012	
Return on average assets (annualized)	0.90	%	0.81	%
Return on average equity (annualized)	8.14	%	7.42	%
Average equity to average assets	11.04	%	10.92	%
Non-interest income, excluding securities gains, as a percentage of average assets (annualized)	0.93	%	1.02	%
Non-interest expense as a percentage of average assets (annualized)	2.88	%	2.86	%

The discussion that follows explains changes in the components of net income when comparing the first nine months of 2013 with the first nine months of 2012.

## Net Interest Income:

Net interest income was \$10,318,000 for the first nine months of 2013, as compared to \$10,986,000 in the same period in 2012. Average earning assets declined by 1.6%, while the net interest margin on a fully tax equivalent basis decreased by 19 basis points.

Interest on loans decreased \$1,059,000, or 8.7%, in the first nine months of 2013 as compared to the same period in 2012. An average weighted yield decrease of 34 basis points lowered interest income by approximately \$662,000, with the remaining decrease attributable to a lower volume of loans.

Interest earned on investment securities and money market investments decreased \$180,000 in the first nine months of 2013 as compared to 2012, despite average balances increasing \$5.8 million during the period. The yield on money market investments (federal funds and interest bearing deposits) decreased by 18 basis points in the first nine months of 2013 as compared to the first nine months of 2012, due to a reduction in average balances. Likewise, the overall pre-tax yield on the investment securities portfolio decreased during the period by 25 basis points.

Average interest-bearing liabilities decreased by \$8.2 million, while average non-interest bearing deposits grew by \$4.9 million. Decreases in deposits, in addition to the lower general rate environment, contributed to the reduction in the cost to fund earning assets, which declined by 18 basis points, to 0.72%, in the first nine months of 2013.

Total average earning assets during the first nine months of 2013 were \$408.6 million, compared to \$415.2 million during the first nine months of 2012, yielding 4.09% in 2013 versus 4.43% in 2012. Funding costs for the earning assets were 0.72% and 0.90% for the first nine months of 2013 and 2012, respectively. Net interest margin on a fully tax-equivalent basis for the first nine months of 2013 was 3.51%. For the same period in 2012, the fully-tax equivalent net interest margin was 3.70%.

Edgar Filing: JUNIATA VALLEY FINANCIAL CORP - Form 10-Q

Stockholders' equity	49,693		49,534				
Total liabilities and stockholders' equity	\$450,100		\$454,695				
Net interest income and net interest rate spread	\$10,318	3.18 %	\$10,986	3.32 %	\$(159 )	\$(510 )	\$(668 )
Net interest margin on interest earning assets (3)		3.37 %		3.53 %			
Net interest income and net interest margin-Tax equivalent basis (4)	\$10,762	3.51 %	\$11,520	3.70 %			

Notes:

- 1) Average balances were calculated using a daily average.
- 2) Includes SuperNOW and money market accounts.
- 3) Net margin on interest earning assets is net interest income divided by average interest earning assets.
- 4) Interest on obligations of states and municipalities is not subject to federal income tax. In order to make the net yield comparable on a fully taxable basis, a tax equivalent adjustment is applied against the tax-exempt income utilizing a federal tax rate of 34%.
- 5) Non-accruing loans are included in the above table until they are charged off.
- 6) The change in interest due to rate and volume has been allocated to volume and rate changes in proportion to the relationship of the absolute dollar amounts of the change in each.
- (7) Includes gross unrealized gains (losses) on securities available for sale.

Provision for Loan Losses:

In the first nine months of 2013, the provision for loan losses was \$266,000, as compared to a provision of \$1,237,000 in the first nine months of 2012. Management regularly reviews the adequacy of the loan loss reserve and makes assessments as to specific loan impairment, historical charge-off expectations, general economic conditions in the Bank's market area, specific loan quality and other factors. The increased provision in 2012 was primarily the result of analysis of the values of collateral securing certain impaired loans. See the earlier discussion in the Financial Condition section, explaining the information used to determine the provision.

Non-interest Income:

Non-interest income in the first nine months of 2013 was \$3,155,000, a decrease of \$335,000, or 9.6%, compared to \$3,490,000 in the first nine months of 2012.

Trust fee income was \$48,000, or 15.7%, lower in the first nine months of 2013 as compared to the first nine months of 2012, due primarily due to lower estate settlement fees.

Customer service fees and fees from debit card activity remained essentially unchanged in the first nine months of 2013 compared to the same period in 2012.

Fees and income derived from the origination, sale and servicing of residential mortgage loans was \$265,000 in the first nine months of 2013, a decrease of \$155,000, or 36.9%, compared to the first nine months of 2012, when refinancing activities were more active. Other non-interest-related fees derived from loan activity decreased by \$20,000 when comparing the first nine months of 2013 to the same period in 2012. Income recorded from the equity investment in an unconsolidated subsidiary was \$34,000 lower in the current year nine month period than in the previous nine month period. A gain of \$53,000 was recorded in the first nine months of 2012 as a result of a life insurance claim. No such activity occurred in the current year.

As a percentage of average assets, annualized non-interest income, exclusive of net gains on the sale of securities, was 0.93% in the first nine months of 2013 versus 1.02% for the same period in 2012.

Non-interest Expense:

Total non-interest expense was \$9,714,000 for the first nine months of 2013, \$24,000, or 0.2%, less than in the first nine months of 2012.

The overall change in non-interest expense was attributable to decreases in cost for employee benefits expenses and costs associated with loan foreclosures (included in other non-interest expense), offset by amortization of an investment in a low income elderly housing project.

On December 31, 2012, the Company froze its defined benefit plan to future service accruals while at the same time enhancing significantly the defined contribution plan for its employees. The result was a reduction in expense of \$148,000 for the first nine months of 2013 compared to the same period in the previous year. Additionally, the cost of medical insurance for employees declined by \$153,000, in the Company's self-funded plan. Small variances in occupancy, equipment, data processing, director compensation, professional fees and FDIC insurance resulted in a net decrease of \$4,000 in the first nine months of 2013 in comparison to the first nine months of 2012. Sales of properties carried as other real estate generated net gains of \$37,000 in the first nine months of 2013, as compared to a net loss of \$3,000 during the same period in 2012. The Company's investment in a low income elderly housing project required amortization of the investment to begin during the second quarter of 2013, adding \$290,000 to non-interest expense in the 2013 period. This increase was offset somewhat by a decrease in costs associated with assets in foreclosure of \$65,000, included in other non-interest expense.

As a percentage of average assets, annualized non-interest expense was 2.88% in the first nine months of 2013 as compared to 2.86% in the same period of 2012, an increase of 2 basis points. The low-income housing investment amortization increased this key ratio by 9 basis points. Excluding the new amortization, annualized non-interest expense would have been 2.79% of average assets, representing an improvement of 7 basis points.

#### Provision for income taxes:

Income tax expense in the first nine months of 2013 was \$459,000, which included the effect of a tax credit in the amount of \$370,000, versus \$736,000 in the same time period in 2012. The tax credit is available to the Company as a result of an equity investment in a local low-income housing project. The effective tax rate in the first nine months of 2013 was 13.1% versus 21.0% in 2012. The reduction in the effective rate is attributed to the tax credit and a higher percentage of tax-exempt income relative to pre-tax earnings in the first half of 2012.

Liquidity:

The objective of liquidity management is to ensure that sufficient funding is available, at a reasonable cost, to meet the ongoing operational cash needs of the Company and to take advantage of income producing opportunities as they arise. While the desired level of liquidity will vary depending upon a variety of factors, it is the primary goal of the Company to maintain a high level of liquidity in all economic environments. Principal sources of asset liquidity are provided by securities maturing in one year or less, other short-term investments such as federal funds sold and cash and due from banks. Liability liquidity, which is more difficult to measure, can be met by attracting deposits and maintaining the core deposit base. The Company is a member of the Federal Home Loan Bank of Pittsburgh for the purpose of providing short-term liquidity when other sources are unable to fill these needs. During the first nine months of 2013, overnight borrowings from the Federal Home Loan Bank averaged \$2,057,000. As of September 30, 2013, the Company had no long-term debt and had unused borrowing capacity with the Federal Home Loan Bank of \$118.0 million.

Funding derived from securities sold under agreements to repurchase (accounted for as collateralized financing transactions) is available through corporate cash management accounts for business customers. This product gives the Company the ability to pay interest on corporate checking accounts.

In view of the sources previously mentioned, management believes that the Company's liquidity is capable of providing the funds needed to meet loan demand.

Off-Balance Sheet Arrangements:

The Company's consolidated financial statements do not reflect various off-balance sheet arrangements that are made in the normal course of business, which may involve some liquidity risk, credit risk, and interest rate risk. These commitments consist mainly of loans approved but not yet funded, unused lines of credit and outstanding letters of credit. These commitments were made using the same credit standards as are used for on-balance sheet instruments. Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the commitment terms. Letters of credit are conditional commitments issued to guarantee the financial performance obligation of a customer to a third party. Unused commitments and letters of credit at September 30, 2013 were \$36,981,000 and \$1,258,000, respectively. Because these instruments have fixed maturity dates, and because many of them will expire without being drawn upon, they do not generally present any significant liquidity risk to the Company. Management believes that any amounts actually drawn upon can be funded in the normal course of operations. The Company has no investment in or financial relationship with any unconsolidated entities that are reasonably likely to have a material effect on liquidity or the availability of capital resources.

Interest Rate Sensitivity:

Interest rate sensitivity management is overseen by the Asset/Liability Management Committee. This process involves the development and implementation of strategies to maximize net interest margin, while minimizing the earnings risk associated with changing interest rates. Traditional gap analysis identifies the maturity and re-pricing terms of all assets and liabilities. A simulation analysis is used to assess earnings and capital at risk from movements in interest rates. See Item 3 for a description of the complete simulation process and results.

Capital Adequacy:

Bank regulatory authorities in the United States issue risk-based capital standards. These capital standards relate a banking company's capital to the risk profile of its assets and provide the basis by which all banking companies and banks are evaluated in terms of capital adequacy. The risk-based capital standards require all banks to have Tier 1 capital of at least 4% and total capital, including Tier 1 capital, of at least 8% of risk-adjusted assets. Tier 1 capital includes common stockholders' equity and qualifying perpetual preferred stock together with related surpluses and retained earnings. Total capital is comprised of Tier 1 capital, limited life preferred stock, qualifying debt instruments, and the reserves for possible loan losses. Banking regulators have also issued leverage ratio requirements. The leverage ratio requirement is measured as the ratio of Tier 1 capital to adjusted average assets. At September 30, 2013, the Bank exceeded the regulatory requirements to be considered a "well capitalized" financial institution, i.e., a leverage ratio exceeding 5%, Tier 1 capital exceeding 6% and total capital exceeding 10%.

**Item 3. Quantitative and Qualitative Disclosures About Market Risk**

Market risk is the exposure to economic loss that arises from changes in the values of certain financial instruments. The types of market risk exposures generally faced by financial institutions include equity market price risk, interest rate risk, foreign currency risk and commodity price risk. Due to the nature of its operations, only equity market price risk and interest rate risk are significant to the Company.

Equity market price risk is the risk that changes in the values of equity investments could have a material impact on the financial position or results of operations of the Company. The Company's equity investments consist of common stocks of publicly traded financial institutions.

Declines and volatility in the values of financial institution stocks in the last several years have significantly reduced the likelihood of realizing significant gains in the near-term. Although the Company has realized occasional gains from this portfolio in the past, the primary objective of the portfolio is to achieve value appreciation in the long term while earning consistent attractive after-tax yields from dividends. The carrying value of the financial institutions stocks accounted for 0.3% of the Company's total assets as of September 30, 2013. Management performs an impairment analysis on the entire investment portfolio, including the financial institutions stocks, on a quarterly basis. For the nine months ended September 30, 2013, no "other-than-temporary" impairment was identified. There is no assurance that declines in market values of the common stock portfolio in the future will not result in "other-than-temporary" impairment charges, depending upon facts and circumstances present.

The equity investments in the Company's portfolio had an adjusted cost basis of approximately \$985,000 and a fair value of \$1,197,000 at September 30, 2013. Net unrealized gains in this portfolio were approximately \$213,000 at September 30, 2013.

In addition to its equity portfolio, the Company's investment management and trust services revenue could be impacted by fluctuations in the securities markets. A portion of the Company's trust revenue is based on the value of the underlying investment portfolios. If securities values decline, the Company's trust revenue could be negatively impacted.

Interest rate risk creates exposure in two primary areas. First, changes in rates have an impact on the Company's liquidity position and could affect its ability to meet obligations and continue to grow. Second, movements in interest rates can create fluctuations in the Company's net interest income and changes in the economic value of equity.

The primary objective of the Company's asset-liability management process is to maximize current and future net interest income within acceptable levels of interest rate risk while satisfying liquidity and capital requirements. Management recognizes that a certain amount of interest rate risk is inherent, appropriate and necessary to ensure profitability. A simulation analysis is used to assess earnings and capital at risk from movements in interest rates. The model considers three major factors: (1) volume differences; (2) repricing differences; and (3) timing in its income simulation. As of the most recent model run, data was disseminated into appropriate repricing buckets, based upon the static position at that time. The interest-earning assets and interest-bearing liabilities were assigned a multiplier to simulate how much that particular balance sheet item would re-price when interest rates change. Finally, the estimated timing effect of rate changes is applied, and the net interest income effect is determined on a static basis (as if no other factors were present). As the table below indicates, based upon rate shock simulations on a static basis, the Company's balance sheet is relatively rate-neutral as rates decline. Each 100 basis point increase results in approximately \$600,000 decline in net interest income in the static environment. This negative effect of rising rates is offset to a large degree by the positive effect of imbedded options that include loans floating above their floors and likely internal deposit pricing strategies. After applying the effects of options, over a one-year period, the net effect of an immediate 100, 200, 300 and 400 basis point rate increase would change net interest income by \$(230,000), \$(389,000), \$(1,550,000) and \$(1,877,000), respectively. Rate shock modeling was done for a declining rate of 25 basis points only, as the federal funds target rate currently is between zero and 0.25%. As the table below indicates, the net effect of interest rate risk on net interest income is minimal in a rising rate environment through a 200 basis point increase. Juniata's rate risk policies provide for maximum limits on net interest income that can be at risk for 100 through 400 basis point changes in interest rates.

## Effect of Interest Rate Risk on Net Interest Income

(Dollars in thousands)

Change in Interest Rates (Basis Points)	Change in Net Interest Income Due to Interest Rate Risk (Static)	Change in Net Interest Income Due to Imbedded Options	Total Change in Net Interest Income
400	\$ (2,427 )	\$ 550	\$ (1,877 )
300	(1,820 )	270	(1,550 )
200	(1,213 )	824	(389 )
100	(606 )	376	(230 )
0	-	-	-
(25	) 152	(53	) 99

The net interest income at risk position remained within the guidelines established by the Company's asset/liability policy.

No material change has been noted in the Bank's equity value at risk. Please refer to the Annual Report on Form 10-K as of December 31, 2012 for further discussion of this topic.

**Item 4. Controls and Procedures****Disclosure Controls and Procedures**

As of September 30, 2013, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as defined by the Securities Exchange Act of 1934 ("Exchange Act"), Rule 13a-15(e). Disclosure controls and procedures are controls and procedures that are designed to ensure that information required to be disclosed in Company reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. These controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by an issuer in the reports that it files under the Exchange Act is accumulated and communicated to the issuer's management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate, to allow timely decisions regarding required disclosure. Based upon that evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective as of the end of the

period covered by this quarterly report.

It should be noted that any system of controls, however well designed and operated, can provide only reasonable, and not absolute, assurance that the objectives of the system are met. In addition, the design of any control system is based in part upon certain assumptions about the likelihood of future events. Because of these and other inherent limitations of control systems, there can be no assurance that any design will succeed in achieving its stated goals under all potential conditions, regardless of how remote.

Attached as Exhibits 31 and 32 to this quarterly report are certifications of the Chief Executive Officer and the Chief Financial Officer required by Rule 13a-14(a) and rule 15d-14(a) of the Exchange Act. This portion of the Company's quarterly report includes the information concerning the controls evaluation referred to in the certifications and should be read in conjunction with the certifications for a more complete understanding of the topics presented.

### **Changes in Internal Control Over Financial Reporting**

There were no significant changes in the Company's internal control over financial reporting during the fiscal quarter ended September 30, 2013, that has materially affected, or is reasonably likely to materially affect, the internal controls over financial reporting.

## **PART II - OTHER INFORMATION**

### Item 1.

### LEGAL PROCEEDINGS

In the opinion of management of the Company, there are no legal proceedings pending to which the Company or its subsidiary is a party or to which its property is subject, which, if determined adversely to the Company or its subsidiary, would be material in relation to the Company's or its subsidiary's financial condition. There are no proceedings pending other than ordinary routine litigation incident to the business of the Company or its subsidiary. In addition, no material proceedings are pending or are known to be threatened or contemplated against the Company or its subsidiary by government authorities.

### Item 1A.

### RISK FACTORS

There have been no material changes to the risk factors that were disclosed in the Company's Annual Report on Form 10-K for the year ended December 31, 2012.

### Item 2.

### UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The following table provides information on repurchases by the Corporation of its common stock in each month of the quarter ended September 30, 2013:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs (1)
July 1-31, 2013	-	\$ -	-	62,393
August 1-31, 2013	13,292	17.81	13,292	49,101
September 1-30, 2013	5,326	17.81	5,326	43,775
Totals	18,618		18,618	43,775

(1) On March 23, 2001, the Company announced plans to buy back 100,000 (200,000 on a post-split basis) shares of its common stock. There is no expiration date to this buyback plan, but subsequent to the initial plan, the Board of Directors authorized the repurchase of 400,000 additional shares in 2005 and then authorized 200,000 additional shares in September of 2008. As of November 8, 2013, the number of shares that may yet be purchased under the program was 43,775. No repurchase plan or program expired during the quarter. The Company has no stock repurchase plan or program that it has determined to terminate prior to expiration or under which it does not intend to make further purchases.

Certain regulatory restrictions exist regarding the ability of the Bank to transfer funds to the Company in the form of cash dividends, loans or advances. At September 30, 2013, \$34,145,000 of undistributed earnings of the Bank, included in the consolidated stockholders' equity, was available for distribution to the Company as dividends without prior regulatory approval, subject to regulatory capital requirements.
