Vice President & Chief Financial Officer

Taiwan Semiconductor Manufacturing Company, Ltd. Financial Statements for the Six Months Ended June 30, 2005 and 2004 and Independent Auditors Report

#### INDEPENDENT AUDITORS REPORT

The Board of Directors and Shareholders

Taiwan Semiconductor Manufacturing Company, Ltd.

We have audited the accompanying balance sheets of Taiwan Semiconductor Manufacturing Company, Ltd. as of June 30, 2005 and 2004, and the related statements of income, changes in shareholders equity and cash flows for the six months then ended. These financial statements are the responsibility of the Company s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the Rules Governing the Audit of Financial Statements by Certified Public Accountants and auditing standards generally accepted in the Republic of China. Those rules and standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Taiwan Semiconductor Manufacturing Company, Ltd. as of June 30, 2005 and 2004, and the results of its operations and its cash flows for the six months then ended in conformity with the Guidelines Governing the Preparation of Financial Reports by Securities Issuers and accounting principles generally accepted in the Republic of China.

We have also audited the consolidated financial statements of Taiwan Semiconductor Manufacturing Company, Ltd. and subsidiaries as of and for the six months ended June 30, 2005, and have expressed an unqualified opinion with an explanatory paragraph stating that single period presentation of consolidated financial statements is permitted at the initial filing of semi-annual consolidated financial statements..

July 13, 2005

#### Notice to Readers

The accompanying financial statements are intended only to present the financial position, results of operations and cash flows in accordance with accounting principles and practices generally accepted in the Republic of China and not those of any other jurisdictions. The standards, procedures and practices to audit such financial statements are those generally accepted and applied in the Republic of China.

For the convenience of readers, the auditors report and the accompanying financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. If there is any conflict between the English version and the original Chinese version or any difference in the interpretation of the two versions, the Chinese-language auditors report and financial statements shall prevail.

# TAIWAN SEMICONDUCTOR MANUFACTURING COMPANY, LTD. NOTES TO FINANCIAL STATEMENTS FOR THE SIX MONTHS ENDED JUNE 30, 2005 AND 2004 (Amounts in Thousands of New Taiwan Dollars, Unless Specified Otherwise)

#### 1. GENERAL

Taiwan Semiconductor Manufacturing Company, Ltd. (the Company or TSMC), a Republic of China (R.O.C.) corporation, was incorporated as a venture among the Government of the R.O.C., acting through the Development Fund of the Executive Yuan; Philips Electronics N.V. and certain of its affiliates (Philips); and certain other private investors. On September 5, 1994, its shares were listed on the Taiwan Stock Exchange (TSE). On October 8, 1997, TSMC listed some of its shares of stock on the New York Stock Exchange (NYSE) in the form of American Depositary Shares (ADSs).

The Company is engaged mainly in the manufacturing, selling, packaging, testing and computer-aided designing of integrated circuits and other semiconductor devices and the manufacturing of masks.

As of June 30, 2005 and 2004, the Company had 18,734 and 17,559 employees, respectively.

## 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The financial statements are presented in conformity with Guidelines Governing the Preparation of Financial Reports by Securities Issuers and accounting principles generally accepted in the R.O.C.

For the convenience of readers, the accompanying financial statements have been translated into English from the original Chinese version prepared and used in the R.O.C. If there is any conflict between the English version and the original Chinese version or any difference in the interpretation of the two versions, the Chinese-language financial statements shall prevail.

Significant accounting policies are summarized as follows:

#### **Use of Estimates**

The preparation of financial statements in conformity with the aforementioned guidelines and principles requires management to make reasonable assumptions and estimates of matters that are inherently uncertain. The actual results may differ from management s estimates.

#### Classification of Current and Non-current Assets and Liabilities

Current assets are those expected to be converted to cash, sold or consumed within one year from the balance sheet date. Current liabilities are obligations due on demand within one year from the balance sheet date. Assets and liabilities that are not classified as current are non-current assets and liabilities, respectively.

#### **Cash Equivalents**

Government bonds under repurchase agreements, treasury bills, notes, and commercial papers acquired with maturities less than three months from the date of purchase are classified as cash equivalents.

#### **Short-term Investments**

Short-term investments primarily consist of corporate bonds, agency bonds, asset-backed securities, bond funds, government bonds and others.

-9-

Short-term investments are recorded at historical cost and are carried at the lower of cost or market value as of the balance sheet date. An allowance for decline in value is provided and is charged to current income when the aggregate carrying amount of the investments exceeds the aggregate market value. A reversal of the allowance is recorded for a subsequent recovery of the market value.

The costs of funds and listed stocks sold are accounted for using the weighted-average method; whereas other securities sold are accounted for using the specific identification method.

The market value of funds is determined using the net asset value of the funds at the end of the period, and the market value of listed stocks is determined using the average-closing price of the listed stocks for the last month of the period. The market value of other short-term investments is determined using the average of bid and ask prices as of the balance sheet date.

Cash dividends are recorded as investment income in the current period.

#### Allowance for Doubtful Receivables

An allowance for doubtful receivables is provided based on a review of the collectibility of accounts receivables. The Company determines the amount of allowance for doubtful receivables by examining the historical collection experience and current trends in the credit quality of its customers as well as its internal credit policies.

## Revenue Recognition and Allowance for Sales Returns and Others

The Company recognizes revenue when evidence of an arrangement exists, the shipment is made, price is fixed or determinable, and the collectibility is reasonably assured. Revenues from the design and manufacturing of photo masks, which are used as manufacturing tools in the fabrication process, are recognized when the photo masks are qualified by our customers. The Company records a provision for estimated future returns and other allowances in the same period the related revenue is recorded. Provisions for estimated sales returns and other allowances are generally made at a specific percentage based on historical experience, our management s judgment, and any known factors that would significantly affect the allowance.

Sales are determined using the fair value taking into account related sales discounts agreed to by the Company and its customers. Sales agreements typically provide that payment is due 30 days from invoice date for a majority of the customers and 30 to 45 days after the end of the month in which the sales occur for some customers. Since the receivables from sales are collectible within one year and such transactions are frequent, the fair value of receivables is equivalent to the nominal amount of cash to be received.

#### **Inventories**

Inventories are stated at the lower of cost or market value. Inventories are recorded at standard cost and adjusted to the approximate weighted-average cost at the end of the period. Market value represents replacement cost for raw materials, supplies and spare parts and net realizable value for finished goods and work in process. The Company assesses the impact of changing technology on its inventories on hand and writes off inventories that are considered obsolete. Ending inventories are evaluated for estimated excess quantities and obsolescence based on a demand forecast within a specific time horizon, which is generally 180 days or less. Estimated losses on scrap and slow-moving items are recognized and included in the allowance for losses.

#### **Long-term Investments**

Investments in companies wherein the Company exercises significant influence on the operating and financial policy decisions are accounted for using the equity method of accounting. The Company s proportionate share in the net income or net loss of investee companies is recognized in the investment income/loss recognized by equity method, net account. When equity investments are made, the difference, if any, between the cost of investment and the Company s proportionate share of the investee s net equity is amortized using the straight-line method over five years and is also recorded in the investment income/loss recognized by equity method, net account.

When the Company subscribes to additional investee shares at a percentage different from its existing equity interest, the resulting carrying amount of the investment in the investee differs from the amount of the Company s proportionate share in the investee s net equity. The Company records such difference as an adjustment to long-term investments with the corresponding amount charged or credited to capital surplus.

Investments in companies wherein the Company does not exercise significant influence are recorded at historical cost. Cash dividends are recognized as investment income in the year received but are accounted for as reductions in the carrying amount of the long-term investments if the dividends are received in the same year that the related investments are acquired. Stock dividends are recorded as an increase in the number of shares held and do not affect investment income or the carrying amount of the investment.

Investments in mutual funds are stated at the lower of aggregate cost or net asset value. An allowance is recognized when the net asset value of the funds is lower than their cost, with the corresponding amount recorded as a reduction to shareholders—equity. A reversal of the allowance will result from a subsequent recovery of the net asset value. When an indication of significant impairment is identified in an investee company, the carrying amount of this investment is reduced to reflect an other-than-temporary decline, with the related impairment loss charged to current income.

The costs of stocks and mutual funds sold are determined using the weighted-average method.

Investments in long-term bonds are stated at amortized cost. The discount or premium is amortized over the duration period using the interest method, and recorded as an adjustment to interest income.

When investments in publicly-traded stocks are reclassified from short-term investments to long-term investments or from long-term investments to short-term investments, the Company recognizes a loss to the extent, if any, that the market value of such investments is lower than the carrying amount, and the market value becomes the new basis. If an investee company recognizes an unrealized loss on its long-term investments using the lower-of-cost-or-market method, the Company also recognizes a corresponding unrealized loss in proportion to its ownership percentage in the investee company and records the amount as a component of its shareholders equity.

Gains or losses on sales from the Company to investee companies accounted for using the equity method are deferred in proportion to the Company s ownership percentages in the investee companies until realized through transactions with third parties. The entire amount of the gains or losses on sales to majority-owned subsidiaries is deferred until such gains or losses are realized through the subsequent sales of the related products to third parties. Gains or losses on sales from investee companies to the Company are deferred in proportion to the Company s ownership percentages in the investee companies until realized through transactions with third parties. Gains or losses on sales between investee companies accounted for using the equity method are deferred in proportion to the Company s weighted-average ownership percentages in the investee companies which record such gains or losses until realized through transactions with third parties.

If an investee s functional currency is a foreign currency, translation adjustments will result from the process of translating the investee s financial statements into the reporting currency of the Company. Such adjustments are accumulated and reported as a separate component of shareholders equity.

## Property, Plant and Equipment, Assets Leased to Others and Idle Assets

Property, plant and equipment and assets leased to others are stated at cost less accumulated depreciation. When an indication of significant impairment is identified, any excess of the carrying amount of an asset over its recoverable amount is recognized as a loss. If the recoverable amount increases in the future period, the subsequent reversal of the impairment loss would be recognized as a gain. However, the increased carrying amount of an asset due to a reversal of an impairment loss should not exceed the carrying amount that would have been determined (net of depreciation), had no impairment loss been recognized for the asset in prior years. Idle assets are stated at the lower of net realizable value or book value. Significant additions, renewals and betterments incurred during the construction period are capitalized. Maintenance and repairs are expensed in the period incurred. Interest expense incurred during the purchase and construction period is also capitalized.

Depreciation is computed using the straight-line method over the following estimated service lives: buildings 10 to 20 years; machinery and equipment 5 years; and office equipment 3 to 5 years.

Upon sale or disposal of property, plant and equipment, the related cost and accumulated depreciation are removed from the corresponding accounts, with any gain or loss credited or charged to non-operating gains or losses in the period of sale or disposal.

#### Goodwill

Goodwill represents the excess of the consideration paid for acquisition over the fair market value of identifiable net assets acquired and acquisition costs. Goodwill is amortized using the straight-line method over the estimated life of 10 years. If an event occurs or circumstances change that more likely than not reduce the fair value of goodwill below its carrying amount, an impairment loss is charged to current income. Subsequent recovery in the fair value of the goodwill may not be recorded such as to reverse the impairment loss previously recorded.

## **Deferred Charges**

Deferred charges consist of technology license fees, software and system design costs and other charges. The amounts are amortized as follows: Technology license fees—the shorter of the estimated life of the technology or the term of the technology transfer contract; software and system design costs and other charges—3 years. When an indication of significant impairment is identified, any excess of the carrying amount of an asset over its recoverable amount is recognized as a loss. If the recoverable amount increases in a future period, the amount previously recognized as impairment would be reversed and recognized as a gain. However, the adjusted amount may not exceed the carrying amount that would have been determined, net of amortization, as if no impairment loss had been recognized.

#### **Pension Costs**

The Company records net periodic pension costs on the basis of actuarial calculations. Unrecognized net transition obligation and unrecognized net gains or losses are amortized over 25 years.

#### **Income Tax**

The Company uses an inter-period tax allocation method for income tax. Deferred income tax assets and liabilities are recognized for the tax effects of temporary differences and unused tax credits. Valuation allowances are provided to the extent, if any, that it is more likely than not that deferred income tax assets will not be realized. A deferred tax asset or liability is classified as current or noncurrent in accordance with the classification of its related asset or liability. However, if a deferred tax asset or liability does not relate to an asset or liability in the financial statements, then it is classified as either current or noncurrent based on the expected length of time before it is realized or settled. Any tax credits arising from the purchases of machinery, equipment and technology, research and development expenditures, personnel training, and investments in important technology-based enterprises are recognized using the flow-through method.

Adjustments of prior years tax liabilities are added to or deducted from the current year s tax provision. Income tax on unappropriated earnings of 10% is expensed in the year of shareholder approval which is the year subsequent to the year the earnings are generated.

## **Stock-based Compensation**

Employee stock option plans that are amended or have options granted on or after January 1, 2004 must be accounted for by the interpretations issued by the Accounting Research and Development Foundation. The Company adopted the intrinsic value method and any compensation cost determined using this method is charged to expense over the employee vesting period.

### **Treasury Stock**

When the Company repurchases its outstanding common stock, the cost of the reacquired stock is recorded as treasury stock as a reduction to shareholders—equity. When the Company retires treasury stock, the treasury stock account is reduced and the common stock as well as the capital surplus—additional paid-in capital are reversed in proportionate to the equity percentage of the retirement. When the book value of the treasury stock exceeds the sum of the par value and additional paid-in capital, the difference is charged to capital surplus—treasury stock transactions and to retained earnings for any remaining amount. The Company—s stock held by its subsidiaries is also treated as treasury stock and reclassified from long-term investments to treasury stock. The cash dividends received by the subsidiaries from the Company are recorded under capital surplus—treasury stock transactions.

## **Foreign-currency Transactions**

Foreign currency transactions are recorded in New Taiwan dollars at the rates of exchange in effect when the transactions occur. Exchange gains or losses derived from foreign currency transactions or monetary assets and liabilities denominated in foreign currencies are recognized in current income. At the end of each period, assets and liabilities denominated in foreign currencies are revalued at the prevailing exchange rates with the resulting gains or losses recognized in current income.

#### **Derivative Financial Instruments**

The Company enters into foreign currency forward contracts to manage foreign exchange exposures on foreign-currency-denominated assets and liabilities. The contracts are recorded in New Taiwan dollars at the current rate of exchange of the contract date. The differences in the New Taiwan dollar amounts translated using the current rates and the amounts translated using the contracted forward rates on the contract date are amortized over the terms of the forward contracts using the straight-line method. At the end of each period, the receivables or payables arising from forward contracts are restated using the prevailing exchange rates at the balance sheet date with the resulting differences credited or charged to income. In addition, the receivables and payables related to the forward contracts of the same counter party are netted with the resulting amount presented as either an asset or a liability. Any resulting gain or loss upon settlement is credited or charged to income in the period of settlement.

The Company enters into cross-currency swap contracts to manage currency exposures on foreign-currency-denominated assets and liabilities. The principal amount is recorded using the current rate at the contract date. The differences in the New Taiwan dollar amounts translated using the current rates and the amounts translated using the contracted rates on the contract dates are amortized over the terms of the contracts using the straight-line method. At the end of each period, the receivables or payables arising from cross-currency swap contracts are restated using the prevailing exchange rate with the resulting differences credited or charged to income. In addition, the receivables and payables related to the contracts of the same counter party are netted with the resulting amount presented as either an asset or a liability. The difference in interest computed pursuant to the contracts on each settlement date or the balance sheet date is recorded as an adjustment to the interest income or expense associated with the hedged items. Any resulting gain or loss upon settlement is credited or charged to income in the period of settlement.

The Company enters into interest rate swap contracts to manage exposures to changes in interest rates on existing assets or liabilities. The cash settlement receivable or payable computed pursuant to the contracts on each settlement date or the balance sheet date is recorded as an adjustment to interest income or expense associated with the hedged items.

#### Reclassifications

Certain accounts in the financial statements as of and for the six months ended June 30, 2004 have been reclassified to conform to the financial statements as of and for the six months ended June 30, 2005.

## 3. CASH AND CASH EQUIVALENTS

	\$ 49,408,608	\$41,199,013
Market value	\$49,408,608	\$41,491,242

The Company entered into investment management agreements with three well-known financial institutions (fund managers) to manage investment portfolios for the Company. In accordance with the investment guidelines and terms in these agreements, the securities invested by the fund managers cannot be below a pre-defined credit rating. As of June 30, 2005, the Company had investment portfolios with these fund managers that aggregated to an original amount of US\$1,200,000 thousand. The investment portfolios included securities such as corporate bonds, agency bonds, asset-backed securities, government bonds and others. Securities acquired with maturities less than three months from the date of purchase were reclassified as cash equivalents.

\$76,434,570 \$52,580,744

For the six months ended June 30, 2005 and 2004, net investment loss and income recognized from the equity method investees was NT\$786,018 thousand and NT\$2,053,966 thousand, respectively. The carrying amounts of investments accounted for under the equity method and the related investment loss or income were determined based on the audited financial statements of the investees as of and for the same periods as the Company.

-16-

Other investments consisted of the following structured time-deposits:

	Principal	Interests	Range of Interest	Maturity
	Amount	Receivable	Rates	Date Date
June 30, 2005				
Step-up callable deposits				
Domestic bank	\$ 2,000,000	\$ 7,624	2.05-2.20%	Jul. 2007 to Aug. 2007 Jul. 2006 to Jul.
Foreign bank Callable range accrual deposits	2,000,000	10,403	1.40-2.44%	2007
Foreign bank	6,955,960	20,237	(See below)	Sep. 2009 to Jan. 2010
	\$ 10,955,960	\$ 38,264	,	
June 30, 2004				
Step-up callable deposits				
Foreign bank	\$ 3,364,250	\$ 2,474	1.44%-3.25%	Jun. 2007 to Jun. 2009

The interest rate of the step-up callable deposits is determined by the Company and the related banks. The amount of interest earned by the Company for the callable range accrual deposits is based on a pre-defined range as determined by the 3-month or 6-month LIBOR plus an agreed upon rate ranging between 2.1% and 3.45%. Based on the terms of the deposits, if the 3-month or 6-month LIBOR moves outside of the pre-defined range, the interest paid to the Company is at a fixed rate between zero and 1.5%. Under the term of the contracts, the bank has the right to cancel the contracts prior to the maturity date.

As of June 30, 2005 and 2004, deposits that resided in banks located in Hong Kong amounted to NT\$2,529,440 thousand and NT\$1,688,750 thousand, respectively; those that resided in banks located in Singapore amounted to NT\$632,360 thousand and NT\$675,500 thousand, respectively.

#### 7. PROPERTY, PLANT AND EQUIPMENT

Accumulated depreciation consisted of the following:

	Jun	June 30		
	2005	2004		
Buildings	\$ 39,229,473	\$ 32,452,205		
Machinery and equipment	286,453,058	238,344,951		
Office equipment	5,171,727	4,268,797		
	\$ 330,854,258	\$ 275,065,953		

There was no capitalized interest for the six months ended June 30, 2005. Interest expense for the six months ended June 30, 2004 was NT\$760,090 thousand (before deducting the amount capitalized of NT\$157,109 thousand for the six months ended June 30, 2004). The interest rate used for purposes of calculating the capitalized amount was 2.80% for the six months ended June 30, 2004.

	30,000,000
Current portion	(10,500,000)
	\$ 19,500,000
	-18-

#### 10. OTHER LONG-TERM PAYABLES

The Company entered into several license arrangements for certain semiconductor-related patents. Future payments under the agreements as of June 30, 2005 were as follows:

Year of Repayment	Amount
2005 (3 <sup>rd</sup> to 4 <sup>th</sup> quarter)	\$ 1,144,732
2006	462,413
2007	442,652
2008	252,944
2009	252,944
2010 and thereafter	505,888
	3,061,573
Current portion (under accrued expenses and other current liabilities)	(1,417,437)
	\$ 1,644,136

#### 11. PENSION PLAN

The Company has a defined benefit plan for all regular employees that provides benefits based on the employee s length of service and average monthly salary or wage for the six-month period prior to retirement.

The Company contributes an amount equal to 2% of salaries and wages paid each month to a pension fund (the Fund). The Fund is administered by a pension fund monitoring committee (the Committee) and deposited in the Committee s name in the Central Trust of China.

For the six months ended June 30, 2005 and 2004, the changes in the Fund and accrued pension cost are summarized as follows:

	Six Months Ended June 3 2005 2004	
The Fund		
Balance, beginning of period	\$ 1,428,001	\$1,191,702
Contribution	122,103	116,844
Interest	15,629	15,562
Payment	(8,419)	
Balance, end of period	\$ 1,557,314	\$ 1,324,108
Accrued pension cost		
Balance, beginning of period	\$3,101,196	\$ 2,600,251
Accruals	309,054	246,798
Balance, end of period	\$ 3,410,250	\$ 2,847,049
Zalance, that is period	Ψ 5, 110,250	\$ <b>2</b> ,0 17,0 17

The Labor Pension Act became effective on July 1, 2005 and this pension mechanism is deemed a defined contribution plan. The employees who were subject to the Labor Standards Law prior to the enforcement of this Act

may choose to be subject to the pension mechanism under this Act or may continue to be subject to the pension mechanism under the Labor Standards Law. For those employees who were subject to the Labor Standards Law prior to July 1, 2005 and still work for the same company after July 1, 2005 and choose to be subject to the pension mechanism under this Act, their seniority as of July 1, 2005 shall be maintained. The rate of contribution by an employer to the Labor Pension Fund per month shall not be less than 6% of each employee s monthly salary or wage.

-19-

#### 12. INCOME TAX

a. A reconciliation of income tax expense based on income before income tax at statutory rate and current income tax expense before income tax credits was as follows:

	Six Months Ended June 30 2005 2004		
	2003	2004	
Income tax expense based on income before income tax at statutory rate (25%)	\$ (8,499,431)	\$ (10,388,989)	
Tax-exempt income	4,734,183	6,233,394	
Temporary and permanent differences	(635,273)	(294,984)	
Current income tax expense before income tax credits	\$ (4,400,521)	\$ (4,450,579)	
b. Income tax benefit consisted of the following:			
Current income tax expense before income tax credits	\$ (4,400,521)	\$ (4,450,579)	
Additional tax at 10% on unappropriated earnings	(1,489,709)	(821,767)	
Income tax credits	5,890,230	5,272,346	
Other income tax adjustments	39,788	(278,489)	
Net change in deferred income tax assets			
Investment tax credits	2,512,133	(883,812)	
Temporary differences	1,708,642	528,349	
Net change in valuation allowance of deferred income tax assets	(3,070,953)	1,276,796	
Income tax benefit	\$ 1,189,610	\$ 642,844	
c. Deferred income tax assets (liabilities) consisted of the following:			
	June 30		
	2005	2004	
Current deferred income tax assets			
Investment tax credits	\$ 5,330,000	\$ 6,144,000	
Noncurrent deferred income tax assets, net			
Investment tax credits	\$ 23,066,717	\$ 18,622,082

Valuation allowance	(16,010,999)	(11,495,051)	
	, , , ,		

## d. Integrated income tax information:

The balance of the imputation credit account (ICA) as of June 30, 2005 and 2004 was NT\$15,569 thousand and NT\$347 thousand, respectively.

The expected and actual creditable ratios for distribution of earnings of 2004 and 2003 were 0.11% and 0.03%, respectively.

The imputation credit allocated to the shareholders is based on its balance as of the date of dividend distribution. The expected creditable ratio may be adjusted when the actual distribution of the imputation credits is made.

-20-

- e. All earnings generated prior to December 31, 1997 have been appropriated.
- f. As of June 30, 2005, investment tax credits consisted of the following:

Regulation	Item	(	Total Creditable Amount	Remaining Creditable Amount	Expiry Year
Statute for Upgrading Industries	Purchase of machinery and equipment	\$	134,467 4,886,421 4,139,371 11,007,440 2,189,404	\$ 2,325,728 4,139,371 11,007,440 2,189,404	2005 2006 2007 2008 2009

### 14. SHAREHOLDERS EQUITY

The Company has issued a total of 668,351 thousand ADSs which are traded on the NYSE as of June 30, 2005. The number of common shares represented by the ADSs is 3,341,754 thousand (one ADS represents five common shares). On May 10, 2005, the Board of Directors approved the offering of up to 1,050,000 thousand common shares in the form of ADSs by certain existing shareholders. As of July 13, 2005, the proposed offering is still waiting for the approval by the R.O.C. Securities and Futures Bureau (SFB).

Capital surplus can only be used to offset a deficit under the Company Law. However, the capital surplus generated from donations and the excess of the issue price over the par value of capital stock (including the stock issued for new capital, mergers, convertible bonds and the surplus from treasury stock transactions) may be appropriated as stock dividends, which is restricted to a certain percentage of the paid in common stock of the Company.

-22-

As of June 30, 2005 and 2004, capital surplus consisted of the following:

	June 30		
	2005	2004	
From merger	\$24,003,546	\$ 24,132,297	
Additional paid-in capital	23,139,481	23,172,550	
From convertible bonds	9,360,424	9,410,632	
From long-term investments	126,128	115,665	
From treasury stock transactions	91,241	54,715	
Donations	55	55	
	\$ 56,720,875	\$ 56,885,914	

The Company s Articles of Incorporation as revised on May 10, 2005 provide that, when allocating the net profits for each fiscal year, the Company shall first offset its losses in previous years and then set aside the following items accordingly:

- a. Legal capital reserve at 10% of the profits left over, until the accumulated legal capital reserve has equaled the Company s total capital;
- b. Special capital reserve in accordance with relevant laws or regulations or as requested by the authorities in charge;
- c. Bonus to directors and supervisors and bonus to employees of the Company equal to not more than 0.3% and not less than 1% of the remainder, respectively. Directors who also serve as executive officers of the Company are not entitled to receive the bonus to directors and supervisors. The Company may issue stock bonuses to employees of an affiliated company meeting the conditions set by the Board of Directors or, by the person duly authorized by the Board of Directors;
- d. Any balance left over shall be allocated according to the resolution of the shareholders meeting. The Company s Articles of Incorporation also stipulate that profits of the Company may be distributed by way of cash dividend and/or stock dividend. However, distribution of profits shall be made preferably by way of cash dividend. Distribution of profits may also be made by way of stock dividend; provided, however, the ratio for stock dividend shall not exceed 50% of total distribution.

Any appropriations of net income are recorded in the financial statement in the year of shareholder approval. The appropriation for legal capital reserve is made until the reserve equals the aggregate par value of the Company s outstanding capital stock. The reserve can only be used to offset an accumulated deficit or the portion in excess of 50% of the outstanding capital stock can be distributed as dividends and bonuses when the reserve balance has reached 50% of the aggregate par value of the outstanding capital stock of the Company.

A special capital reserve equivalent to the net debit balance of the other components of shareholder s equity (for example, unrealized loss on long-term investments and cumulative translation adjustments, but excluding treasury stock) shall be made from unappropriated earnings pursuant to existing regulations promulgated by the SFB. Any special reserve appropriated may be reversed to the extent that the net debit balance reverses.

The appropriations of earnings for 2004 and 2003 were approved in the shareholders meetings on May 10, 2005 and May 11, 2004, respectively. The appropriations and dividends per share are as follows:

	Appropriation of Earnings		Dividend (1	ls Per ( NT\$)	Share
	For Fiscal	For Fiscal	For Fiscal Year	F	For Siscal Year
	<b>Year 2004</b>	<b>Year 2003</b>	2004	4	2003
Legal capital reserve	\$ 8,820,201	\$ 4,725,870			
Special capital reserve	2,226,427	(68,945)			
Employees profit sharing in cash	3,086,215	681,628			
Employees profit sharing in stock	3,086,215	2,726,514			
Cash dividends to preferred shareholders		184,493	\$	\$	0.35
Cash dividends to common shareholders	46,504,097	12,159,971	2.00		0.60
Stock dividends to common shareholders	11,626,024	28,373,267	0.50		1.41
Bonus to directors and supervisors	231,466	127,805			
	\$ 75,580,645	\$48,910,603			

The amounts of the above appropriations of earnings for 2004 and 2003 are consistent with the resolutions of the meetings of the Board of Directors on February 22, 2005 and February 17, 2004. However, the Company Law prescribes that TSMC, as a holder of treasury stock, shall not participate in the appropriation of earnings. Therefore, the actual cash dividend per share and stock dividend per share are slightly more than those in the aforementioned resolution. If the above bonus to employee, directors and supervisors had been paid entirely in cash and charged against income for 2004 and 2003, the after income tax basic earnings per share for the years ended December 31, 2004 and 2003 would have decreased from NT\$3.97 to NT\$3.70 and NT\$2.33 to NT\$2.15, respectively. The shares distributed as a bonus to employees represented 1.33% and 1.35% of the Company s total outstanding common shares as of December 31, 2004 and 2003, respectively.

The above information about the appropriations of bonus to employees, directors and supervisors is available at Market Observation System website.

Under the Integrated Income Tax System that became effective on January 1, 1998, the R.O.C. resident shareholders are allowed a tax credit for their proportionate share of the income tax paid by the Company on earnings generated since January 1, 1998.

#### 15. STOCK-BASED COMPENSATION PLANS

The Company s Employee Stock Option Plans under the 2005 Plan, 2003 Plan and 2002 Plan were approved by the SFB on January 6, 2005, October 29, 2003 and June 25, 2002, respectively. The maximum number of units authorized to be granted under the 2005 Plan, the 2003 Plan and the 2002 Plan was 11,000 thousand, 120,000 thousand and 100,000 thousand, respectively, with each unit eligible to subscribe to one common share when exercisable. The options may be granted to qualified employees of the Company or any of its domestic or foreign subsidiaries, in which the Company s shareholding with voting rights, directly or indirectly, is more than fifty percent (50%). The options of all the plans are valid for ten years and exercisable at certain percentages subsequent to the second anniversary of the grant date. Under the terms of the plans, the options are granted at an exercise price equal to the closing price of the Company s common shares listed on the TSE on the grant date.

Under the 2003 Plan and the 2002 Plan, units that had never been granted, or had been granted and subsequently cancelled were expired as of June 30, 2005.

Information about outstanding stock options for the six months ended June 30, 2005 and 2004 was as follows:

Sin months and all lune 20, 2005	Number of Options (in Thousands)	Av Ex 1	ighted- verage cercise Price NT\$)
Six months ended June 30, 2005			
Beginning balance Options granted Options exercised Options cancelled	64,367 14,864 (2,941) (2,931)	\$	40.5 48.4 39.9 42.7
Ending balance	73,359		42.1
Six months ended June 30, 2004			
Beginning balance Options granted Options cancelled	49,357 20,091 (2,510)	\$	43.0 47.4 45.1
Ending balance	66,938		44.2

The number of outstanding options and exercise prices have been adjusted to reflect the appropriations of dividends in accordance with the plans.

As of June 30, 2005, information about outstanding and exercisable options was as follows:

	<b>Options Outstanding</b>			Options Exercisable		
		Weighted- average	Weighted- average		Weighted- average	
Range of	Number of Options	Remaining	Exercise	Number of Options	Exercise	
Exercise	(in	Contractual Life	Price	(in	Price	
Price (NT\$)	Thousands)	(Years)	(NT\$)	Thousands)	(NT\$)	
29.9-42.1 47.0-54.5	50,195 23,164	7.60 9.33	38.8 49.2	25,032	38.8	
.,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,	20,10	,	.,,,			
	73,359			25,032		

No compensation cost was recognized under intrinsic value method for the six months ended June 30, 2005 and 2004. Had the Company used the fair value based method (based on the Black-Scholes model) to evaluate the options granted after January 1, 2004, the assumptions and pro forma results of the Company for the six months ended June 30, 2005 and 2004 would have been as follows:

		Six Months Ended June 30			June 30
			2005		2004
Assumptions:					
Expected dividend yield			1.00%-3.44%		1.00%
Expected volatility		4	3.77%-46.15%	4	3.19%-43.25%
Risk free interest rate			3.07%-3.85%		3.07%-3.85%
Expected life			5 years		5 years
Net income:					
Net income as reported		\$	35,187,334	\$	42,198,802
Pro forma net income			35,140,859		42,184,898
Earnings per share (EPS)	after income tax (NT\$):				
Basic EPS as reported		\$	1.43	\$	1.70
Pro forma basic EPS			1.42		1.70
Diluted EPS as reported			1.43		1.70
Pro forma diluted EPS			1.42		1.70

The estimated weighted average fair value per unit for the options granted during the six months ended June 30, 2005 and 2004 was NT\$17.69 and NT\$19.75, respectively.

#### 16. TREASURY STOCK

Six months ended June 30, 2005	Beginning Shares	Increase/ Distribute	Decrease	(Shares in Thousands) Ending Shares
Reclassification of parent company stock held by subsidiaries from long-term investments	45,521	2,242	901	46,862
Six months ended June 30, 2004  Reclassification of parent company stock held by subsidiaries from long-term investments Repurchase under share buyback plan	40,597	5,676 124,720	303	45,970 124,720
	40,597	130,396	303	170,690

Proceeds from the sales of treasury stock for the six months ended June 30, 2005 and 2004 were NT\$49,364 thousand and NT\$18,218 thousand, respectively. The Company s capital stock held by a subsidiary as an investment is recorded as treasury stock, with the holder having the same rights as other common shareholders. As of June 30, 2005 and

2004, the book value of the treasury stock was NT\$1,552,573 thousand and NT\$1,616,669 thousand, respectively; the market value was NT\$2,648,643 thousand and NT\$2,247,024 thousand, respectively. The Company s stocks held by its subsidiaries are treated as treasury stock and the holders are entitled to the rights of shareholders. However, starting from June 24, 2005, in accordance with the revised Company Law, the holders will be no longer entitled to the right to vote

-26-

The Company held a special meeting of the board of directors and approved a share buyback plan to repurchase the Company s common shares listed on the TSE during the period from March 24, 2004 to May 23, 2004. The Company repurchased 124,720 thousand common shares for a total cost of NT\$7,059,798 thousand. All the treasury stock repurchased under the buyback plan was retired on August 16, 2004.

#### 17. EARNINGS PER SHARE

EPS is computed as follows:

			Number of		(NT\$)
	Amounts (N Before	lumerator) After	Shares (Denominator)	Before Income	After Income
Six months ended June 30, 2005	Income Tax	Income Tax	(in Thousands)	Tax	Tax
Basic EPS Income available to common shareholders	\$ 33,997,724	\$ 35,187,334	24,676,592	\$ 1.38	\$ 1.43
Effect of dilutive potential common stock stock options			10,537		
Diluted EPS Income available to common shareholders (including effect of dilutive potential common stock)	\$ 33,997,724	\$ 35,187,334	24,687,129	\$ 1.38	\$ 1.43
Six months ended June 30, 2004					
Basic EPS Income available to common shareholders	\$41,555,958	\$ 42,198,802	24,760,690	\$ 1.68	\$ 1.70
Effect of dilutive potential common stock stock options			9,703		
Diluted EPS Income available to common shareholders (including effect of dilutive potential common stock)	\$41,555,958	\$ 42,198,802	24,770,393	\$ 1.68	\$ 1.70

#### 18. RELATED PARTY TRANSACTIONS

The terms of sales to related parties are not significantly different from those to third parties. For other related party transactions, prices are determined in accordance with the related contractual agreements.

#### 19. SIGNIFICANT LONG-TERM LEASES

The Company leases land from the Science-Based Industrial Park Administration. These lease agreements expire on various dates from March 2008 to December 2020 and can be renewed upon their expiration.

As of June 30, 2005, future remaining lease payments were as follows:

Year	Amount
2005 (3 <sup>rd</sup> to 4 <sup>th</sup> quarter)	\$ 129,503
2006	251,415
2007	251,415
2008	233,250
2009	227,195
2010 and thereafter	1,292,511

\$ 2,385,289

#### 20. SIGNIFICANT COMMITMENTS AND CONTINGENCIES

The significant commitments and contingencies of the Company as of June 30, 2005 are as follows:

- a. On June 20, 2004, the Company and Philips revised the Technical Cooperation Agreement, which was originally signed on May 12, 1997, with an effective date from January 1, 2004 for five years. Upon expiration, this amended Technical Cooperation Agreement will be terminated at the expiration date and will not be automatically renewed. Under this amended Technical Cooperation Agreement, the Company will pay Philips royalties based on a fixed amounts mutually agreed-on, rather than under certain percentage of the Company s annual net sales. The Company and Philips agree to cross license the patents owned by each party. The Company also obtained through Philips a number of patent cross licenses.
- b. Under a technical cooperation agreement with ITRI, the Company shall reserve and allocate up to 35% of certain of its production capacity for use by the Ministry of Economic Affairs (MOEA) or any other party designated by the MOEA. The term of this agreement is for five years beginning January 1, 1987 and is automatically renewed for successive periods of five years unless otherwise terminated by either party with one year prior notice. The agreement was automatically renewed in 1992 and 1997 and on January 1, 2002.
- c. On October 28, 1992, the Company entered into a letter agreement with Philips under which Philips has an option on up to 30% of the Company s capacity as agreed in the agreement on most favored terms and conditions for similar orders, as long as Philips and its affiliates shareholding in the Company remains at 24.8% or higher. As of June 30, 2005, Philips and its affiliates shareholding in the Company is 18.74%.
- d. Under several foundry agreements, the Company shall reserve a portion of its production capacity for certain major customers that have guarantee deposits with the Company. As of June 30, 2005, the Company had a total of US\$47,868 thousand of guarantee deposits.
- e. Under a Shareholders Agreement entered into with Philips and EDB Investments Pte Ltd. on March 30, 1999, the parties formed a joint venture company, SSMC, for the purpose of constructing an integrated circuit foundry in Singapore. As of June 30, 2005, the Company is equity interest in SSMC was 32%. The Company and Philips committed to buy specific percentages of the production capacity of SSMC. The Company and Philips are required, in the aggregate, to purchase up to 70% of SSMC is full capacity, but the Company along is not required to purchase more than 28% of the annual installed capacity. If any party defaults on the commitment and the capacity utilization of SSMC fall below a specific percentage of its total capacity, the defaulting party is required to compensate SSMC for all related unavoidable costs.

- f. The Company provides technical services to SSMC under a Technical Cooperation Agreement (the Agreement) entered into on May 12, 1999. The Company receives compensation for such services computed at a specific percentage of net selling price of certain products sold by SSMC. The Agreement shall remain in force for ten years and may be automatically renewed for successive periods of five years each unless pre-terminated by either party under certain conditions.
- g. Under a Technology Transfer Agreement (TTA) with National Semiconductor Corporation (National) entered into on June 27, 2000, the Company shall receive payments for the licensing of certain technology to National. The agreement was to remain in force for ten years and could be automatically renewed for successive periods of two years thereafter unless either party gives notice for early termination under certain conditions. In January 2003, the Company and National entered into a Termination Agreement whereby the TTA was terminated for convenience. Under the Termination Agreement, the Company will be relieved of any further obligation to transfer any additional technology. In addition, the Company granted National an option to request the transfer of certain technologies under the same terms and conditions as the terminated TTA. The option will expire in January 2008.
- h. Beginning in 2001, the Company entered into several licensing arrangements for certain semiconductor patents. The terms of the contracts range from five to ten years with payments to be made in the form of royalties over the term of the related contracts. The Company has recorded the related amounts as a liability with the corresponding amounts recorded as deferred charges which are amortized and charged to cost of sales on a straight-line basis over the estimated life of the technology or the term of the contract, whichever is shorter.
- i. In November 2002, the Company entered into an Amended and Restated Joint Technology Cooperation Agreement with Philips, Freescale Semiconductor, Inc. and STMicroelectronics to jointly develop 90-nm to 65-nm advanced CMOS Logic and e-DRAM technologies. The Company also agreed to align 0.12 micron CMOS Logic technology to enhance its foundry business opportunities. The Company will contribute process technologies and share a portion of the costs associated with this joint development project.
- j. In December 2003, the Company entered into a Technology Development and License Agreement with Freescale Semiconductor, Inc. to jointly develop 65-nm SOI (silicon on insulator) technology. The Company will also license related 90-nm SOI technology from Freescale Semiconductor, Inc. Any intellectual properties arising out of the co-development project shall be jointly owned by the parties. In accordance with the agreement, the Company will pay royalties to Freescale Semiconductor, Inc. and will share a portion of the costs associated with the joint development project.
- k. The Company provides a technology transfer to VIS under a Manufacturing License and Technology Transfer Agreement entered into in August 2004. The Company receives compensation for such technology transfer in the form of royalty payments from VIS computed at specific percentages of net selling price of certain products sold by VIS. VIS agreed to reserve its certain capacity to manufacture for the Company certain products at prices as agreed by the parties.
- 1. Amounts available under unused letters of credit as of June 30, 2005 were NT\$6,480 thousand.
- m. The Company provided guarantees on loans amounting to US\$30,000 thousand and US\$40,000 thousand for TSMC Development, Inc. (TSMC Development) and TSMC-North America, respectively.
- n. TSMC, TSMC-North America and WaferTech filed a series of lawsuits in late 2003 and 2004 in both state and federal courts in California and with the U.S. International Trade Commission against Semiconductor Manufacturing International Corporation (SMIC), SMIC (Shanghai) and SMIC Americas. The lawsuits alleged that SMIC companies infringed multiple TSMC patents and misappropriated TSMC s trade secrets. These suits have been settled out of court on January 30, 2005. As part of the settlement, SMIC will pay TSMC US\$175 million over six years to resolve TSMC s patent infringement and trade secret claims.

#### 21. ADDITIONAL DISCLOSURES

Following are the additional disclosures required by the SFB for the Company and its investees:

- a. Financing provided: Please see Table 1 attached;
- b. Endorsement/guarantee provided: Please see Table 2 attached;
- c. Marketable securities held: Please see Table 3 attached:
- d. Marketable securities acquired or disposed of at costs or prices of at least NT\$100 million or 20% of the paid-in capital: Please see Table 4 attached;
- e. Acquisition of individual real estate properties at costs of at least NT\$100 million or 20% of the paid-in capital: None;
- f. Disposal of individual real estate properties at prices of at least NT\$100 million or 20% of the paid-in capital: None;
- g. Total purchases from or sales to related parties of at least NT\$100 million or 20% of the paid-in capital: Please see Table 5 attached;
- h. Receivable from related parties amounting to at least NT\$100 million or 20% of the paid-in capital: Please see Table 6 attached:
- i. Names, locations, and related information of investees on which the Company exercises significant influence: Please see Table 7 attached:
- i. Financial instrument transactions:
  - 1) Derivative financial instruments

The Company entered into derivative financial instrument transactions during the six months ended June 30, 2005 and 2004 to manage exposures related to foreign-exchange rate and interest rate fluctuations. Certain information on these contracts was as follows:

a) Outstanding forward exchange contracts as of June 30, 2005 and 2004

Financial Instruments	Currency		Contract Amount Thousands)
<u>June 30, 2005</u> Sell	US\$/NT\$	Jul. 2005 to Aug. 2005	US\$103,000
<u>June 30, 2004</u> Sell	US\$/NT\$	July. 2004 to Apr. 2005	US\$2,158,000
Sell	EUR/US\$	Aug. 2004	EUR 20,000

As of June 30, 2005 and 2004, payables from forward exchange contracts (included in the other current liabilities account) aggregated NT\$38,173 thousand and NT\$903,322 thousand, respectively.

#### b) Cross currency swap contracts

Outstanding cross currency swap contracts as of June 30, 2005 were as follows:

	Contract Amount	Range of	Interest Rate
<b>Maturity Date</b>	(in Thousands)	<b>Interest Rate Paid</b>	Received
Jul. 2005 to Aug. 2005	US\$2,045,000	3.10%-3.40%	1.03%-1.22%
	(US\$/NT\$)		

The Company did not enter into any cross currency swap contracts during the six months ended June 30, 2004.

As of June 30, 2005, payables resulted from cross currency swap contracts (included in the other current liabilities account) were NT\$705,607 thousand.

During the six months ended June 30, 2005 and 2004, the net exchange gain or loss arising from forward exchange contracts and cross currency swap contracts was recognized in the foreign exchange loss, net account and the difference in interest was recorded in interest income or expense.

#### c) Interest rate swap contracts

The Company rescinded all outstanding interest rate swap contracts during the three months ended March 31, 2005 before their original maturities. The rescission loss of NT\$28,295 thousand was recognized in the interest expense account. There were no outstanding contracts at June 30, 2005.

Outstanding contracts as of June 30, 2004 were as follows:

	Amount
Period	(in Thousands)
Sep. 2003 to Dec. 2005	NT\$ 500,000
Oct. 2003 to Dec. 2005	NT\$ 500,000
Oct. 2003 to Dec. 2005	NT\$ 500,000
Oct. 2003 to Dec. 2005	NT\$ 500,000
Oct. 2003 to Dec. 2005	NT\$ 500,000
Nov. 2003 to Dec. 2005	NT\$ 500,000
	Sep. 2003 to Dec. 2005 Oct. 2003 to Dec. 2005 Oct. 2003 to Dec. 2005 Oct. 2003 to Dec. 2005 Oct. 2003 to Dec. 2005

#### d) Transaction risk

- i) Credit risk. Credit risk represents the positive net settlement amount of those contracts with positive fair values at the balance sheet date. The positive net settlement amount represents the loss to be incurred by the Company if the counter-parties breached the contracts. The banks, which are the counter-parties to the foregoing derivative financial instruments, are reputable financial institutions. Management believes its exposure related to the potential default by those counter-parties is low.
- ii) Market price risk. All derivative financial instruments are intended as hedges for fluctuations in foreign exchange rates and interest rates. Gains or losses from these hedging instruments are likely to be offset by gains or losses from the hedged items. Thus, market price risk is believed to be low.

Contract

iii) Cash flow risk and the amount and period of future cash needs.

As of June 30, 2005, the Company s future cash needs for outstanding forward exchange contracts and cross currency swap contracts were as follows:

	Inflow	Outflow
	(in	
Term	Thousands)	(in Thousands)
Within one year	NT\$67,304,233	US\$2,148,000

The Company has sufficient operating capital to meet the above cash needs. In addition, there will be corresponding cash inflow for the cash outflow. Therefore, the cash flow risk is low.

2) Fair values of financial instruments were as follows:

	June 30	0, 2005	June 30	0, 2004
	Carrying		Carrying	
	Amount	Fair Value	Amount	Fair Value
Non-derivative financial instruments				
Assets				
Short-term investments	\$49,408,608	\$49,408,608	\$41,199,013	\$41,491,242
Long-term investments (securities with				
market price)	32,451,393	39,638,685	16,928,153	23,154,967
Liabilities Bonds payable (including current				
portion)	30,000,000	30,429,929	35,000,000	35,729,923
Derivative financial instruments				
Assets (liabilities)				
Forward exchange contracts (sell)	(39,969)	(36,560)	(761,592)	(538,407)
Cross currency swap contracts	(674,894)	(452,530)		
Interest rate swap contracts				(26,956)

The above financial instruments do not include cash and cash equivalents, receivables, other financial assets, payables, and payable to contractors and equipment suppliers. The carrying amounts of the aforementioned financial instruments reported in the balance sheet approximate their fair values.

The above financial instruments also exclude refundable deposits, guarantee deposits, long-term investments that do not have quoted market prices as well as other long-term payables. The future cash inflow and outflow of the deposits approximate their fair values. Some of long-term investments do not have quoted market prices; therefore, fair values for those long-term investments are not shown above. The fair value of other long-term payables is determined using the discounted value of expected cash flows, which approximates their carrying amount.

Fair values of financial instruments were determined as follows:

- a) Fair value of short-term and publicly traded long-term investments is based on quoted market prices.
- b) Fair value of bonds payable is based on their quoted market price.
- c) Fair value of derivative financial instruments is the amount receivable from or payable to the counter-party if the contracts were terminated on the balance sheet date.

The fair values of some financial and non-financial instruments were not included in the fair values disclosed above. Accordingly, the sum of the fair values of the financial instruments listed above does not represent the fair value of the Company as a whole.

- k. Information on investment in Mainland China
  - 1) The name of the investee company in mainland China, the main businesses and products, its issued capital, method of investment, information on inflow or outflow of capital, ratio of ownership, equity in the net gain or net loss, ending balance, amount received as earnings distributions from the investment, and the limitation on investment: Please see Table 8 attached.
  - 2) Significant direct or indirect transactions with the investee company, its prices and terms of payment, unrealized gain or loss, and other related information which is helpful to understand the impact of investment in mainland China on financial reports: Please see Note 18.

Taiwan Semiconductor Manufacturing Company, Ltd. and Subsidiaries Consolidated Financial Statements for the Six Months Ended June 30, 2005 and Independent Auditors Report

#### INDEPENDENT AUDITORS REPORT

The Board of Directors and Shareholders

Taiwan Semiconductor Manufacturing Company, Ltd.

We have audited the accompanying consolidated balance sheet of Taiwan Semiconductor Manufacturing Company, Ltd and subsidiaries as of June 30, 2005, and the related consolidated statements of income, changes in shareholders equity and cash flows for the six months then ended. These consolidated financial statements are the responsibility of the Company s management. Our responsibility is to express an opinion on these consolidated financial statements based on our audit.

We conducted our audit in accordance with the Rules Governing the Audit of Financial Statements by Certified Public Accountants and auditing standards generally accepted in the Republic of China. Those rules and standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Taiwan Semiconductor Manufacturing Company, Ltd. and subsidiaries as of June 30, 2005, and the results of their consolidated operations and their consolidated cash flows for the six months then ended in conformity with the Guidelines Governing the Preparation of Financial Reports by Securities Issuers and accounting principles generally accepted in the Republic of China.

As disclosed in Note 2 to the consolidated financial statements, in accordance with the rule regulated by the Securities and Futures Bureau of the Republic of China, beginning in 2005, public companies are required to file their semi-annual consolidated financial statements. The rule also states that single period presentation of consolidated financial statements is permitted at the initial adoption of the rule.

July 13, 2005

#### Notice to Readers

The accompanying consolidated financial statements are intended only to present the consolidated financial position, results of operations and cash flows in accordance with accounting principles and practices generally accepted in the Republic of China and not those of any other jurisdiction. The standards, procedures and practices to audit such consolidated financial statements are those generally accepted and applied in the Republic of China. For the convenience of readers, the auditors—report and the accompanying consolidated financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. If there is any conflict between the English version and the original Chinese version or any difference in the interpretation of the two versions, the Chinese-language auditors—report and consolidated financial statements shall prevail.

# TAIWAN SEMICONDUCTOR MANUFACTURING COMPANY, LTD. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS FOR THE SIX MONTHS ENDED JUNE 30, 2005

(Amounts in Thousands of New Taiwan Dollars, Unless Specified Otherwise)

#### 1. GENERAL

Taiwan Semiconductor Manufacturing Company, Ltd. (TSMC), a Republic of China (R.O.C.) corporation, was incorporated as a venture among the Government of the R.O.C., acting through the Development Fund of the Executive Yuan; Philips Electronics N.V. and certain of its affiliates (Philips); and certain other private investors. On September 5, 1994, its shares were listed on the Taiwan Stock Exchange (TSE). On October 8, 1997, TSMC listed some of its shares of stock on the New York Stock Exchange (NYSE) in the form of American Depositary Shares (ADSs).

TSMC is engaged mainly in the manufacturing, selling, packaging, testing and computer-aided designing of integrated circuits and other semiconductor devices and the manufacturing of masks.

As of June 30, 2005, TSMC and its subsidiaries had 20,991 employees.

#### 2. SIGNIFICANT ACCOUNTING POLICIES

The consolidated financial statements are presented in conformity with Guidelines Governing the Preparation of Financial Reports by Securities Issuers and accounting principles generally accepted in the R.O.C. In accordance with the rule regulated by the R.O.C. Securities and Futures Bureau (SFB), beginning in 2005, public companies are required to file their semi-annual consolidated financial statements. The rule also states that single period presentation of consolidated financial statements is permitted in the year of initial adoption of the rule. For the convenience of readers, the accompanying consolidated financial statements have been translated into English from the original Chinese version prepared and used in the R.O.C. If there is any conflict between the English version and the original Chinese version or any difference in the interpretation of the two versions, the Chinese-language consolidated financial statements shall prevail.

Significant accounting policies are summarized as follows:

#### Consolidation

The consolidated financial statements include, as of and for the six months ended June 30, 2005, the accounts of all directly and indirectly majority owned subsidiaries of TSMC, and the accounts of Global UniChip Corporation (GUC), Global UniChip Corporation NA (GUC NA) and VisEra Technologies Company, Ltd. (VisEra) over which TSMC has control. All significant intercompany balances and transactions have been eliminated upon consolidation.

The consolidating entities as of June 30, 2005 were as follows:

		Ownership % as of	
Name of Investor	Name of Investee	June 30, 2005	Remark
TSMC	TSMC North America (TSMC NA)	100%	As of June 30, 2005, TSMC NA held 13,923 thousand common shares in TSMC (approximately 0.06% of outstanding common shares).

The following diagram presents information regarding the relationship and ownership percentages between TSMC and the investees that are under its control as of June 30, 2005:

TSMC NA is engaged in the sales and marketing of integrated circuits and semiconductor devices. TSMC Europe and TSMC Japan are engaged mainly in marketing activities. TSMC Technology is engaged mainly in engineering support activities. TSMC Shanghai is engaged in the manufacturing and sales of integrated circuits at the order of and pursuant to product design specifications provided by customers. TSMC Partners, TSMC Development, Chi Cherng and Hsin Ruey are engaged in investing activities. TSMC International is engaged in investment in companies involved in the design, manufacture, and other related business in the semiconductor industry. Emerging Alliance, VTAF II, ISDF and ISDF II are engaged in investing in new start-up technology companies. WaferTech is engaged in the manufacturing, selling, testing and computer-aided designing of integrated circuits and other semiconductor devices. GUC is engaged in the researching, developing, manufacturing, testing and marketing of integrated circuits. VisEra is engaged in the manufacturing, wholesaling and retailing of electronic spare parts. GUC NA is engaged in providing products consulting in North America.

TSMC and the foregoing consolidating entities are hereinafter referred to collectively as the Company . Minority interest in subsidiaries and investees aforementioned is presented under minority interest in subsidiaries in the consolidated balance sheet.

#### **Consolidated Cash Flows**

In compliance with the revised R.O.C. Statement of Financial Accounting Standard (SFAS) No. 7 Consolidated Financial Statements, the Company retroactively adjusted the balance of cash and cash equivalents as of January 1, 2005 in the consolidated statement of cash flows for the six months ended June 30, 2005 so that it includes the cash and cash equivalent amounts for GUC, GUC NA, and VisEra as of January 1, 2005 since they became the consolidating entities of TSMC beginning in 2005.

#### **Use of Estimates**

The preparation of consolidated financial statements in conformity with the aforementioned guidelines and principles requires management to make reasonable assumptions and estimates of matters that are inherently uncertain. The actual results may differ from management s estimates.

#### Classification of Current and Noncurrent Assets and Liabilities

Current assets are those expected to be converted to cash, sold or consumed within one year from the balance sheet date. Current liabilities are obligations due on demand within one year from the balance sheet date. Assets and liabilities that are not classified as current are noncurrent assets and liabilities, respectively.

#### **Cash Equivalents**

Government bonds under repurchase agreements, treasury bills and notes acquired with maturities less than three months from the date of purchase are classified as cash equivalents.

#### **Short-term Investments**

Short-term investments primarily consist of corporate bonds, agency bonds, asset-backed securities, bond and stock funds, government bonds and others.

Short-term investments are recorded at historical cost and are carried at the lower of cost or market value as of the balance sheet date. An allowance for decline in value is provided and is charged to current income when the aggregate carrying amount of the investments exceeds the aggregate market value. A reversal of the allowance is recorded for a subsequent recovery of the market value.

The costs of funds and listed stocks sold are accounted for using the weighted-average method; whereas other securities sold are accounted for using the specific identification method.

The market value of funds is determined using the net asset value of the funds at the end of the period, and the market value of listed stocks is determined using the average-closing price of the listed stocks for the last month of the period. The market value of other short-term investments is determined using the average of bid and ask prices as of the balance sheet date.

Cash dividends are recorded as investment income in the current period.

#### Allowance for Doubtful Receivables

An allowance for doubtful receivables is provided based on a review of the collectibility of accounts receivables. The Company determines the amount of allowance for doubtful receivables by examining the historical collection experience and current trends in the credit quality of its customers as well as its internal credit policies.

#### Revenue Recognition and Allowance for Sales Returns and Others

The Company recognizes revenue when evidence of an arrangement exists, the shipment is made, price is fixed or determinable, and the collectibility is reasonably assured. Revenues from the design and manufacturing of photo masks, which are used as manufacturing tools in the fabrication process, are recognized when the photo masks are qualified by our customers. The Company records a provision for estimated future returns and other allowances in the same period the related revenue is recorded. Provisions for estimated sales returns and other allowances are generally made at a specific percentage based on historical experience, management s judgment, and any known factors that would significantly affect the allowance.

Sales are determined using the fair value taking into account related sales discounts agreed to by the Company and its customers. Sales agreements typically provide that payment is due 30 days from invoice date for a majority of the customers and 30 to 45 days after the end of the month in which the sales occur for some customers. Since the receivables from sales are collectible within one year and such transactions are frequent, the fair value of receivables is equivalent to the nominal amount of cash to be received.

#### **Inventories**

Inventories are stated at the lower of cost or market value. Inventories are recorded at standard cost and adjusted to the approximate weighted-average cost at the end of the period. Market value represents replacement cost for raw materials, supplies and spare parts and net realizable value for finished goods and work in process. The Company assesses the impact of changing technology on its inventory on hand and writes off inventories that are considered obsolete. Ending inventories are evaluated for estimated excess quantities and obsolescence based on demand forecast within a specific time horizon, which is generally 180 days or less. Estimated losses on scrap and slow-moving items are recognized and included in the allowance for losses.

#### **Long-term Investments**

Investments in companies wherein the Company exercises significant influence on the operating and financial policy decisions are accounted for using the equity method of accounting. The Company s proportionate share in the net income or net loss of investee companies is recognized in the investment income/loss recognized by equity method, net account. When equity investments are made, the difference, if any, between the cost of investment and the Company s proportionate share of investee s net equity is amortized using the straight-line method over five years and is also recorded in the investment income/loss recognized by equity method, net account.

When the Company subscribes to additional investee shares at a percentage different from its existing equity interest, the resulting carrying amount of the investment in the investee differs from the amount of the Company s proportionate share in the investee s net equity. The Company records such difference as an adjustment to long-term investments with the corresponding amount charged or credited to capital surplus.

Investments in companies wherein the Company does not exercise significant influence are recorded at historical cost. Cash dividends are recognized as investment income in the year received but are accounted for as reductions in the carrying amount of the long-term investments if the dividends are received in the same year that the related investments are acquired. Stock dividends are recorded as an increase in the number of shares held and do not affect investment income or the carrying amount of the investment. An allowance is recognized for any decline in the market value of investments in publicly traded stocks with readily ascertainable fair market value with the corresponding amount recorded as an unrealized loss, a component of shareholders—equity. A reversal of the allowance will result from a subsequent recovery of the market value of such investments.

Investments in mutual funds are stated at the lower of aggregate cost or net asset value. An allowance is recognized when the net asset value of the funds is lower than their cost, with the corresponding amount recorded as a reduction to shareholders—equity. A reversal of the allowance will result from a subsequent recovery of the net asset value. When an indication of significant impairment is identified in an investee company, the carrying amount of this investment is reduced to reflect an other-than-temporary decline, with the related impairment loss charged to current income.

The costs of stocks and mutual funds sold are determined using the weighted-average method.

Investments in long-term bonds are stated at amortized cost. The discount or premium is amortized over the duration period using the interest method, and recorded as an adjustment to interest income.

When investments in publicly-traded stocks are reclassified from short-term investments to long-term investments or from long-term investments to short-term investments, the Company recognizes a loss to the extent, if any, that the market value of such investments is lower than the carrying amount, and the market value becomes the new basis. If an investee company recognizes an unrealized loss on its long-term investments using the lower-of-cost-or-market method, the Company also recognizes a corresponding unrealized loss in proportion to its ownership percentage in the investee company and records the amount as a component of its shareholders equity.

Gains or losses on sales from the Company to investee companies accounted for using the equity method are deferred in proportion to the Company s ownership percentage in the investee companies until realized through transactions with third parties. Gains or losses on sales from investee companies to the Company are deferred in proportion to the Company s ownership percentages in the investee companies until realized through transactions with third parties. If an investee s functional currency is a foreign currency, translation adjustments will result from the process of translating the investee s financial statements into the reporting currency of the Company. Such adjustments are accumulated and reported as a separate component of shareholders equity.

#### Property, Plant and Equipment, Assets Leased to Others and Idle Assets

Property, plant and equipment and assets leased to others are stated at cost less accumulated depreciation. Properties covered by agreements qualifying as capital leases are carried at the lower of the leased equipment s market value or the present value of the minimum lease payments at the inception date of the lease. Idle assets are stated at the lower of net realizable value or book value. Significant additions, renewals and betterments incurred during the construction period are capitalized. Maintenance and repairs are expensed in the period incurred. When an indication of significant impairment is identified, any excess of the carrying amount of an asset over its recoverable amount is recognized as a loss. If the recoverable amount increases in the future period, the subsequent reversal of the impairment loss would be recognized as a gain. However, the increased carrying amount of an asset due to a reversal of an impairment loss should not exceed the carrying amount that would have been determined (net of depreciation), had no impairment loss been recognized for the asset in prior years.

Depreciation is computed using the straight-line method over the following estimated service lives: land improvements 20 years; buildings 10 to 50 years; machinery and equipment 3 to 10 years; office equipment 3 to 15 years; leased assets 20 years and other equipment 3 to 10 years.

Upon sale or disposal of property, plant and equipment, the related cost and accumulated depreciation are removed from the corresponding accounts, with any gain or loss credited or charged to non-operating gains or losses in the period of sale or disposal.

#### Goodwill

Goodwill represents the excess of the consideration paid for acquisition over the fair market value of identifiable net assets acquired and acquisition costs. Goodwill is amortized using the straight-line method over the estimated life of 10 years. If an event occurs or circumstances change that more likely than not reduce the fair value of goodwill below its carrying value, an impairment loss is charged to current income. Subsequent recovery in the fair value of the goodwill may not be recorded such as to reverse the impairment loss previously recorded.

#### **Deferred Charges**

Deferred charges consist of technology license fees, software and system design costs and other charges. The amounts are amortized as follows: technology license fees—the shorter of the estimated life of the technology or the term of the technology transfer contract, software and system design costs and other charges—2 or 3 years. When an indication of significant impairment is identified, any excess of the carrying amount of an asset over its recoverable amount is recognized as a loss. If the recoverable amount increases in a future period, the amount previously recognized as impairment would be reversed and recognized as a gain. However, the adjusted amount may not exceed the carrying amount that would have been determined (net of amortization), as if no impairment loss had been recognized.

#### Pension Costs

For employees under defined benefit pension plans, the related net periodic pension costs are recorded based on the actuarial calculations; unrecognized net transition obligation and unrecognized net gains or losses are amortized over 25 years or the average remaining service period of the employees. For employees under defined contribution pension plans, the related net periodic pension costs are recorded based on the actual contributions made to the pension funds.

#### **Income Tax**

The Company uses an inter-period tax allocation method for income tax. Deferred income tax assets and liabilities are recognized for the tax effects of temporary differences, unused tax credits, and net operating loss carryforwards. Valuation allowances are provided to the extent, if any, that it is more likely than not that deferred income tax assets will not be realized. A deferred tax asset or liability is classified as current or noncurrent in accordance with the classification of its related asset or liability. However, if a deferred tax asset or liability does not relate to an asset or liability in the financial statements, then it is classified as either current or noncurrent based on the expected length of time before it is realized or settled.

Any tax credits arising from the purchases of machinery, equipment and technology, research and development expenditures, personnel training, and investments in important technology-based enterprises are recognized using the flow-through method.

Adjustments to prior years tax liabilities are added to or deducted from the current year s tax provision. Income taxes on unappropriated earnings (excluding earnings from foreign consolidated subsidiaries) of 10% are expensed in the year of shareholder approval which is the year subsequent to the year the earnings are generated.

#### **Stock-based Compensation**

Employee stock option plans that are amended or have options granted on or after January 1, 2004 are accounted for by the interpretations issued by the Accounting Research and Development Foundation. The Company adopted the intrinsic value method and any compensation cost determined using this method is charged to expense over the employee vesting period.

#### **Treasury Stock**

TSMC s stock held by its subsidiaries is treated as treasury stock and reclassified from long-term investments to treasury stock. The cash dividends received by the subsidiaries from TSMC are recorded under capital surplus treasury stock transactions.

#### **Foreign-currency Transactions**

Foreign currency transactions are recorded in New Taiwan dollars at the rates of exchange in effect when the transactions occur. Exchange gains or losses derived from foreign currency transactions or monetary assets and liabilities denominated in foreign currencies are recognized in current income. At the end of each period, assets and liabilities denominated in foreign currencies are revalued at the prevailing exchange rates with the resulting gains or losses recognized in current income.

#### **Derivative Financial Instruments**

The Company enters into foreign currency forward contracts to manage foreign exchange exposures on foreign-currency-denominated assets and liabilities. The contracts are recorded in New Taiwan dollars at the current rate of exchange of the contract date. The differences in the New Taiwan dollar amounts translated using the current rates and the amounts translated using the contracted forward rates on the contract date are amortized over the terms of the forward contracts using the straight-line method. At the end of each period, the receivables or payables arising from forward contracts are restated using the prevailing current rates at the balance sheet date with the resulting differences credited or charged to income. In addition, the receivables and payables related to the forward contracts of the same counter party are netted with the resulting amount presented as either an asset or a liability. Any resulting gain or loss upon settlement is credited or charged to income in the period of settlement.

The Company enters into cross-currency swap contracts to manage currency exposures on foreign-currency-denominated assets and liabilities. The principal amount is recorded using the current rate at the contract date. The differences in the New Taiwan dollar amounts translated using the current rates and the amounts translated using the contracted rates on the contract date are amortized over the terms of the contracts using the straight-line method. At the end of each period, the receivables or payables arising from cross-currency swap contracts are restated using the prevailing current rate with the resulting differences credited or charged to income. In addition, the receivables and payables related to the contracts of the same counter party are netted with the resulting amount presented as either an asset or a liability. The difference in interest computed pursuant to the contracts on each settlement date or the balance sheet date is recorded as an adjustment to the interest income or expense associated with the hedged items. Any resulting gain or loss upon settlement is credited or charged to income in the period of settlement.

The Company enters into interest rate swap contracts to manage exposures to changes in interest rates on existing assets or liabilities. The cash settlement receivable or payable computed pursuant to the contracts on each settlement date or balance sheet date is recorded as an adjustment to interest income or expense associated with the hedged items.

#### **Translation of Foreign-currency Financial Statements**

R.O.C. SFAS No. 14, Accounting for Foreign-currency Transactions, applies to foreign subsidiaries that use the local currency as their functional currency. The financial statements of foreign subsidiaries are translated into New Taiwan dollars at the following exchange rates: Assets and liabilities—current rate on the balance sheet date; shareholders equity—historical rates; income and expenses—average rate during the period. The resulting translation adjustments are recorded as a separate component under shareholders—equity.

Market value	\$ 50,391,628

TSMC entered into investment management agreements with three well-known financial institutions (fund managers) to manage investment portfolios. In accordance with the investment guidelines and terms in these agreements, the securities invested by the fund managers cannot be below a pre-defined credit rating. As of June 30, 2005, TSMC had investment portfolios with these fund managers that aggregated to an original amount of US\$1,200,000 thousand. The investment portfolios included securities such as corporate bonds, agency bonds, asset-backed securities, government bonds and others. Securities acquired with maturities less than three months from the date of purchase were reclassified as cash equivalents.

Formosa Chemical & Fiber Corporation	135,487	
	16,342,005	
Other investments	10,955,960	
	\$ 39,251,283	

For the six months ended June 30, 2005, investment income recognized from the equity method investees was NT\$623,046 thousand. The carrying amounts of investments accounted for under the equity method and the related investment income were determined based on the audited financial statements of the investees as of and for the same period as the Company.

As of June 30, 2005, other investments consisted of the following structured time-deposits:

Step-up callable deposits	Principal	_	nterest ceivable	Range of Interest Rates	Maturity Date
Domestic bank	\$ 2,000,000	\$	7,624	2.05%-2.20%	Jul. 2007 to Aug. 2007 Jul. 2006 to
Foreign bank <u>Callable range accrual deposits</u>	2,000,000		10,403	1.40%-2.44%	Jul. 2007
Foreign bank	6,955,960		20,237	(See below)	Sep. 2009 to Jan. 2010
	\$ 10,955,960	\$	38,264		

The interest rate of the step-up callable deposits is determined by the Company and the related banks. The amount of interest earned by the Company for the callable range accrual deposits is based on a pre-defined range as determined by the 3-month or 6-month LIBOR plus an agreed upon rate ranging between 2.10% and 3.45%. Based on the terms of the deposits, if the 3-month or 6-month LIBOR moves outside of the pre-defined range, the interest paid to the Company is at a fixed rate between zero and 1.5%. Under the term of the contracts, the bank has the right to cancel the contracts prior to the maturity date.

As of June 30, 2005, deposits that reside in banks located in Hong Kong and Singapore amounted to NT\$2,529,440 thousand and NT\$632,360 thousand, respectively.

As of June 30, 2005, the fair value of publicly traded long-term investments accounted for using the cost method was NT\$192,292 thousand.

#### 7. PROPERTY, PLANT AND EQUIPMENT

Accumulated depreciation consisted of the following:

	June 30, 2005
Land improvements	\$ 184,622
Buildings	42,260,855
Machinery and equipment	316,242,660
Office equipment	6,231,969
Leased assets	46,704
Other equipment	51,962

\$ 365,018,772

The Company entered into agreements to lease certain buildings that qualify as capital leases. The term of the lease is from December 2003 to December 2013.

#### 8. DEFERRED CHARGES, NET

	<b>June 30, 2005</b>

	9,438,386
Current portion (under accrued expenses and other current liabilities)	(1,417,437)
	\$ 8.020.949

The payables for royalties were accrued for the future payment in connection with several license arrangements that the Company entered into for certain semiconductor related patents.

15,000,000

30,000,000

Future payments for the Company s other long-term payables under the agreements as of June 30, 2005 were as follows:

Year	Amount
2005 (3 <sup>rd</sup> to 4 <sup>th</sup> quarter)	\$ 1,144,732
2006	462,413
2007	442,652
2008	252,944
2009	252,944
2010 and thereafter	6,882,701
	9,438,386
Current portion (under accrued expenses and other current liabilities)	(1,417,437)
	\$ 8,020,949

#### 13. PENSION PLANS

TSMC and GUC have defined benefit plans for all regular employees that provide benefits based on the employee s length of service and average monthly salary or wage for the six-month period prior to retirement and the one-month period prior to retirement, respectively.

TSMC and GUC contribute at an amount equal to 2% of salaries and wages paid each month to their respective pension funds (the Funds). The Funds are administered by their respective pension fund monitoring committees (the Committees) and deposited in the Committees name in the Central Trust of China.

The changes in the Funds and accrued pension cost are summarized as follows:

	Six Months Ended June 30, 2005		
The Funds	¢ 1.425.600		
Balance, beginning of period Contribution Interest Payment	\$ 1,435,609 123,331 15,629 (8,419)		
Balance, end of period	\$ 1,566,150		
Accrued pension cost Balance, beginning of period Accruals	\$ 3,113,041 310,849		
Balance, end of period	\$ 3,423,890		

The Labor Pension Act became effective on July 1, 2005 and this pension mechanism is deemed a defined contribution plan. The employees who were subject to the Labor Standards Law prior to the enforcement of this Act may choose to be subject to the pension mechanism under this Act or may continue to be subject to the pension mechanism under the Labor Standards Law. For those employees who were subject to the Labor Standards Law prior to July 1, 2005 and still work for the same business entity after July 1, 2005 and choose to be subject to the pension mechanism under this Act, their seniority as of July 1, 2005 shall be maintained. The rate of contribution by an employer to the Labor Pension Fund per month shall not be less than 6% of each employee s month salary or wage.

#### 14. INCOME TAX

a. A reconciliation of income tax expense based on income before income tax at statutory rates and current income tax expense before income tax credits was as follows:

		ix Months Ended one 30, 2005
Income tax expense based on income before income tax at statutory rates	\$	(8,486,984)
Tax-exempt income		4,734,183
Temporary and permanent differences		(863,534)

#### d. Integrated income tax information:

The balance of the imputation credit account of TSMC as of June 30, 2005 was NT\$15,569 thousand.

The expected creditable ratio for distribution of earnings of 2004 of TSMC was 0.11%.

The imputation credit allocated to the shareholders is based on its balance as of the date of dividend distribution. The expected creditable ratio may be adjusted when the actual distribution of the imputation credits is made.

- e. TSMC s earnings generated prior to December 31, 1997 have been appropriated.
- f. As of June 30, 2005, the Company s investment tax credits consisted of the following:

Regulation	Item		Total Freditable Amount	Remaining Creditable Amount	Expiry Year
Statute for Upgrading Industries	Purchase of machinery and equipment	\$	134,467	\$	2005
	• •	4	4,886,593	2,325,900	2006
			4,139,371	4,139,371	2007

		\$	121,017	\$ 91,569	
Statute for Upgrading Industries	Investments in important technology-based enterprises	\$	38,036	\$	2005

As of June 30, 2005, the net operating loss carryforwards were generated by WaferTech, TSMC Development, TSMC Technology and GUC and will expire at various dates through 2025.

g. The sales generated from the following expansion and construction of TSMC s manufacturing plants are exempt from income tax:

Construction of Fab 8 module B
Expansion of Fab 2 modules A and B, Fab 3, Fab 4, Fab 5 and Fab 6
Construction of Fab 12

h. The tax authorities have examined income tax returns of TSMC through 2001. -24 -

**Tax-Exemption Periods** 2002 to 2005 2003 to 2006 2004 to 2007

#### 15. LABOR COST, DEPRECIATION AND AMORTIZATION

#### 16. SHAREHOLDERS EQUITY

TSMC has issued a total of 668,351 thousand ADSs which are traded on the NYSE as of June 30, 2005. The number of common shares represented by the ADSs is 3,341,754 thousand shares (one ADS represents five common shares). On May 10,2005, TSMC s Board of Directors approved the offering of up to 1,050,000 thousand common shares of TSMC in the form of ADSs by certain existing shareholders. As of July 13, 2005, the proposed offering is still waiting for the approval by the SFB.

Capital surplus can only be used to offset a deficit under the Company Law. However, the capital surplus generated from donations and the excess of the issue price over the par value of capital stock (including the stock issued for new capital, mergers, convertible bonds and the surplus from treasury stock transactions) may be appropriated as stock dividends, which is restricted to a certain percentage of the paid-in common stock of TSMC.

As of June 30, 2005, capital surplus consisted of the following:

	Amount
From merger	\$ 24,003,546
Additional paid-in capital	23,139,481
From convertible bonds	9,360,424
From long-term investments	126,128
From treasury stock transactions	91,241
Donations	55

TSMC s Articles of Incorporation as revised on May 10, 2005, provide that when allocating the net profits for each fiscal year, TSMC shall first offset its losses in previous years and then set aside the following items accordingly:

a. Legal capital reserve at 10% of the profits left over, until the accumulated legal capital reserve has equalled TSMC s total capital;

\$ 56,720,875

- b. Special capital reserve in accordance with relevant laws or regulations or as requested by the authorities in charge;
- c. Bonus to directors and supervisors and bonus to employees of TSMC equal to not more than 0.3% and not less than 1% of the remainder, respectively. Directors who also serve as executive officers of TSMC are not entitled to receive the bonus to directors and supervisors. TSMC may issue stock bonuses to employees of an affiliated company meeting the conditions set by the Board of Directors or, by the person duly authorized by the Board of Directors:
- d. Any balance left over shall be allocated according to the resolution of the shareholders meeting. TSMC s Articles of Incorporation also stipulate that profits of TSMC may be distributed by way of cash dividend and/or stock dividend. However, distribution of profits shall be made preferably by way of cash dividend. Distribution of profits may also be made by way of stock dividend; provided however, the ratio for stock dividend shall not exceed 50% of total distribution.

Any appropriations of net income are recorded in the financial statements in the year of shareholder approval. The appropriation for legal capital reserve is made until the reserve equals the aggregate par value of TSMC s outstanding capital stock. The reserve can only be used to offset an accumulated deficit or the portion in excess of 50% of outstanding capital stock can be distributed as dividends and bonuses when the reserve balance has reached 50% of the aggregate par value of the outstanding capital stock of TSMC.

A special capital reserve equivalent to the net debit balance of the other components of shareholder s equity (for example, unrealized loss on long-term investments and cumulative translation adjustments, but excluding treasury stock) shall be made from unappropriated earnings pursuant to existing regulations promulgated by the SFB. Any special capital reserve appropriated may be reversed to the extent that the net debit balance reverses.

TSMC s appropriation of earnings for 2004 was approved in the shareholders meeting on May 10, 2005. The appropriations and dividends per share are as follows:

	Appropriation of Earnings	ividends Per are (NT\$)
Legal capital reserve	\$ 8,820,201	
Special capital reserve	2,226,427	
Employees profit sharing in cash	3,086,215	
Employees profit sharing in stock	3,086,215	
Cash dividends	46,504,097	\$ 2.00
Stock dividends	11,626,024	0.50
Bonus to directors and supervisors	231,466	
	\$ 75.580.645	

The amounts of the above appropriations of earnings for 2004 are consistent with the resolutions of the meeting of TSMC s Board of Directors on February 22, 2005. If the above bonus to employees, directors and supervisors had been paid in cash and charged against income for 2004, the after income tax basic earnings per share for the year ended December 31, 2004 would have decreased from NT\$3.97 to NT\$3.70. The shares distributed as a bonus to employees represented 1.33% of TSMC s total outstanding common shares as of December 31, 2004.

The above information about the appropriations of bonus to employees, directors and supervisors is available at Market Observation Post System website.

Under the Integrated Income Tax System that became effective on January 1, 1998, the R.O.C. resident shareholders are allowed a tax credit for their proportionate share of the income tax paid by TSMC on earnings generated since January 1, 1998.

#### 17. STOCK-BASED COMPENSATION PLANS

TSMC s Employee Stock Option Plans under the TSMC 2005 Plan, the TSMC 2003 Plan and the TSMC 2002 Plan, were approved by the SFB on January 6, 2005, October 29, 2003 and June 25, 2002, respectively. The maximum number of units authorized to be granted under the TSMC 2005 Plan, the TSMC 2003 Plan and the TSMC 2002 Plan was 11,000 thousand, 120,000 thousand and 100,000 thousand, respectively, with each unit eligible to subscribe to one common share when exercisable. The options may be granted to qualified employees of TSMC or any of its domestic or foreign subsidiaries, in which TSMC s shareholding with voting rights, directly or indirectly, is more than fifty percent (50%). The options of all the plans are valid for ten years and exercisable at certain percentages subsequent to the second anniversary of the grant date. Under the terms of the plans, the options are granted at an exercise price equal to the closing price of TSMC s common shares listed on the TSE on the grant date. Under the TSMC 2003 Plan and the TSMC 2002 Plan, units that had never been granted, or had been granted and subsequently cancelled were expired as of June 30, 2005.

Information about TSMC s outstanding stock options for the six months ended June 30, 2005 was as follows:

	Number of Options (in	Av Ex	ighted- verage vercise Price
	Thousands)	(1	NT\$)
Beginning balance	64,367	\$	40.5
Options granted	14,864		48.4
Options exercised	(2,941)		39.9
Options cancelled	(2,931)		42.7
Ending balance	73,359		42.1

The number of outstanding options and exercise prices have been adjusted to reflect the appropriation of dividends in accordance with the plans.

As of June 30, 2005, information about TSMC s outstanding and exercisable options was as follows:

	C	<b>Options Outstand</b>	ling		
				Options I	Exercisable
		Weighted-			
		Average	Weighted-		Weighted-
	Number			Number	
Range of	of	Remaining	Average	of	Average
	<b>Options</b>			<b>Options</b>	
Exercise	(in	Contractual	<b>Exercise</b>	(in	Exercise
		Life	Price		Price
Price (NT\$)	Thousands)	(Years)	(NT\$)	Thousands)	(NT\$)
\$29.9-\$42.1	50,195	7.60	\$ 38.8	25,032	\$ 38.8
47.0-54.5	23,164	9.33	49.2		
	73,359			25,032	

No compensation cost was recognized under intrinsic value method for the six months ended June 30, 2005. Had the Company used the fair value based method (based on the Black-Scholes model) to evaluate the options granted after January 1, 2004, the assumptions and pro forma results of the Company for the six months ended June 30, 2005 would have been as follows:

Assumptions:
--------------

1		
Expected dividend yield		1.00%-3.44%
Expected volatility	4	3.77%-46.15%
Risk free interest rate		3.07%-3.85%
Expected life		5 years
Net income attributable to shareholders of the parent:		
As reported	\$	35,187,334
Pro forma		35,140,859
Consolidated earnings per share (EPS) after income tax (NT\$):		
Basic EPS as reported	\$	1.43
Pro forma basic EPS		1.42
Diluted EPS as reported		1.43
Pro forma diluted EPS		1.42

The estimated weighted average fair value per unit for the options granted during the six months ended June 30, 2005 was NT\$17.69.

#### 18.TREASURY STOCK

(Shares in Thousands)

	Beginning Shares	Increase/ Distribute	Decrease	Ending Shares
Six months ended June 30, 2005				
Reclassification of parent company stock held by				
subsidiaries from long-term investments	45,521	2,242	901	46,862

Proceeds from the sales of treasury stock for the six months ended June 30, 2005 were NT\$49,364 thousand. As of June 30, 2005, the book value and the market value of the treasury stock was NT\$1,552,573 thousand and NT\$2,648,643 thousand, respectively. TSMC s capital stock held by a subsidiary as an investment is recorded as treasury stock. However, starting from June 24, 2005, in accordance with the revised Company Law, the holders will be no longer entitled to the right to vote.

#### 19. CONSOLIDATED EARNINGS PER SHARE

Consolidated EPS for the six months ended June 30, 2005 is computed as follows:

		Number of Shares		
Amounts (I	Numerator)	(Denominator)		ated EPS T\$)
Before Tax	After Tax	(Thousands)	Before Tax	After Tax
\$ 34,183,549	\$ 35,187,334	24,676,592	\$ 1.39	\$ 1.43
		10,537		
\$ 3 <i>4</i> 183 5 <i>4</i> 0	\$ 35 187 33 <i>4</i>	24 687 129	\$ 138	\$ 1.43

#### 20. RELATED PARTY TRANSACTIONS

The Company engages in business transactions with the following related parties:

- a. Industrial Technology Research Institute (ITRI), the Chairman of TSMC is one of its directors
- b. Philips, a major shareholder of TSMC
- c. Investees of TSMC accounted for using equity method VIS SSMC
- d. Omnivision International Holding, Ltd. (Omnivision), a shareholder holding a 25% ownership in VisEra
- e. Huawei Semiconductor (Shanghai) Co., Ltd. (Huawei), the president of which is the president of VisEra
- f. XinTec Inc. (XinTec), the Chairman of VisEra is one of the directors of XinTec

  The transaction with the aforementioned parties in addition to those disclosed in other notes are summarized as
  follows:

	2005	
	Amount	%
For the six months ended June 30		
Sales		
Omnivision	\$ 1,268,365	1
Philips and its affiliates	1,147,115	1

	\$ 1	1,239,322	100
Other long-term payables Philips and its affiliates	\$ 1	1,727,133	100

The terms of sales to related parties are not significantly different from those to third parties. For other related parties transactions, prices are determined in accordance with the related contractual agreements.

#### 21. SIGNIFICANT LONG-TERM LEASES

TSMC and GUC lease land from the SPA. These lease agreements expire on various dates from March 2008 to December 2021 and can be renewed upon their expiration.

- 30 -

TSMC NA leases its office premises and certain equipment under non-cancellable operating agreements. TSMC Japan, TSMC Europe and VisEra have also entered into lease agreements for their office premises. The leases will expire between 2005 and 2010. The agreements can be renewed upon their expiration.

As of June 30, 2005 future remaining lease payments were as follows:

Year	Amount
2005 (3 <sup>rd</sup> to 4 <sup>th</sup> quarter)	\$ 183,984
2006	361,218
2007	357,908
2008	340,247
2009	337,120
2010 and thereafter	1,383,690

\$2,964,167

#### 22. SIGNIFICANT COMMITMENTS AND CONTINGENCIES

The significant commitments and contingencies of the Company as of June 30, 2005 are as follows:

- a. On June 20, 2004, TSMC and Philips revised the Technical Cooperation Agreement, which was originally signed on May 12, 1997, with an effective date from January 1, 2004 for five years. Upon expiration, this amended Technical Cooperation Agreement will be terminated at the expiration date and will not be automatically renewed. Under this amended Technical Cooperation Agreement, TSMC will pay Philips royalties based on a fixed amounts mutually agreed-on, rather than under certain percentage of TSMC s annual net sales. TSMC and Philips agree to cross license the patents owned by each party. TSMC also obtained through Philips a number of patent cross licenses.
- b. Under a technical cooperation agreement with ITRI, TSMC shall reserve and allocate up to 35% of certain of its production capacity for use by the Ministry of Economic Affairs (MOEA) or any other party designated by the MOEA. The term of this agreement is for five years beginning January 1, 1987 and is automatically renewed for successive periods of five years unless otherwise terminated by either party with one year prior notice. The agreement was automatically renewed in 1992 and 1997 and on January 1, 2002.
- c. On October 28, 1992, TSMC entered into a letter agreement with Philips under which Philips has an option on up to 30% of TSMC s capacity as agreed in the agreement on most favored terms and conditions for similar orders, as long as Philips and its affiliates shareholding in TSMC remains at 24.8% or higher. As of June 30, 2005, Philips and its affiliates shareholding in TSMC is 18.74%.
- d. Under several foundry agreements, TSMC shall reserve a portion of its production capacity for certain major customers that have guarantee deposits with TSMC. As of June 30, 2005, TSMC had a total of US\$47,868 thousand of guarantee deposits.
- e. Under a Shareholders Agreement entered into with Philips and EDB Investments Pte Ltd. on March 30, 1999, the parties formed a joint venture company, SSMC, for the purpose of constructing an integrated circuit foundry in Singapore. As of June 30, 2005, TSMC is equity interest in SSMC was 32%. TSMC and Philips committed to buy specific percentages of the production capacity of SSMC. TSMC and Philips are required, in the aggregate, to purchase up to 70% of SSMC is full capacity, but TSMC alone is not required to purchase more than 28% of the annual installed capacity. If any party defaults on the commitment and the capacity utilization of SSMC falls below a specific percentage of its total capacity, the defaulting party is required to compensate SSMC for all related unavoidable costs.

- f. TSMC provides technical services to SSMC under a Technical Cooperation Agreement (the Agreement) entered into on May 12, 1999. TSMC receives compensation for such services computed at a specific percentage of net selling price of certain products sold by SSMC. The Agreement shall remain in force for ten years and may be automatically renewed for successive periods of five years each unless pre-terminated by either party under certain conditions.
- g. Under a Technology Transfer Agreement (TTA) with National Semiconductor Corporation (National) entered into on June 27, 2000, TSMC shall receive payments for the licensing of certain technology to National. The agreement was to remain in force for ten years and could be automatically renewed for successive periods of two years thereafter unless either party gives notice for early termination under certain conditions. In January 2003, TSMC and National entered into a Termination Agreement whereby the TTA was terminated for convenience. Under the Termination Agreement, TSMC will be relieved of any further obligation to transfer any additional technology. In addition, TSMC granted National an option to request the transfer of certain technologies under the same terms and conditions as the terminated TTA. The option will expire in January 2008.
- h. Beginning in 2001, TSMC entered into several licensing arrangements for certain semiconductor patents. The terms of the contracts range from five to ten years with payments to be made in the form of royalties over the term of the related contracts. TSMC has recorded the related amounts as a liability with the corresponding amounts recorded as deferred charges which are amortized and charged to cost of sales on a straight-line basis over the estimated life of the technology or the term of the contract, whichever is shorter.
- i. In November 2002, TSMC entered into an Amended and Restated Joint Technology Cooperation Agreement with Philips, Freescale Semiconductor, Inc. and STMicroelectronics to jointly develop 90-nm to 65-nm advanced CMOS Logic and e-DRAM technologies. TSMC also agreed to align 0.12 micron CMOS Logic technology to enhance its foundry business opportunities. TSMC will contribute process technologies and share a portion of the costs associated with this joint development project.
- j. In December 2003, TSMC entered into a Technology Development and License Agreement with Freescale Semiconductor, Inc. to jointly develop 65-nm SOI (silicon on insulator) technology. TSMC will also license related 90-nm SOI technology from Freescale Semiconductor, Inc. Any intellectual properties arising out of the co-development project shall be jointly owned by the parties. In accordance with the agreement, TSMC will pay royalties to Freescale Semiconductor, Inc. and will share a portion of the costs associated with the joint development project.
- k. TSMC provides a technology transfer to VIS under a Manufacturing License and Technology Transfer Agreement entered into in August 2004. TSMC receives compensation for such technology transfer in the form of royalty payments from VIS computed at specific percentages of net selling price of certain products sold by VIS. VIS agreed to reserve its certain capacity to manufacture for TSMC certain products at prices as agreed by the parties.
- 1. Under an agreement signed with a certain company, TSMC Shanghai has the obligation to purchase certain assets within a specified period at the price agreed upon by both parties. TSMC Shanghai will compensate the other party in case of a breach of the agreement.
- m. Amounts available under unused letters of credit as of June 30, 2005 were NT\$6,480 thousand.
- n. TSMC, TSMC-NA and WaferTech filed a series of lawsuits in late 2003 and 2004 in both state and federal courts in California and with the U.S. International Trade Commission against Semiconductor Manufacturing

International Corporation (SMIC), SMIC (Shanghai) and SMIC Americas. The lawsuits alleged that SMIC companies infringed multiple TSMC patents and misappropriated TSMC s trade secrets. These suits have been settled out of court on January 30, 2005. As part of the settlement, SMIC will pay TSMC US\$175 million over six years to resolve TSMC s patent infringement and trade secret claims.

#### 23. ADDITIONAL DISCLOSURES

Following are the additional disclosures required by the SFB for the Company and its investees:

- a. Financing provided: Please see Table 1 attached;
- b. Endorsement/guarantee provided: Please see Table 2 attached;
- c. Marketable securities held: Please see Table 3 attached;
- d. Marketable securities acquired and disposed of at costs or prices of at least NT\$100 million or 20% of the paid-in capital: Please see Table 4 attached;
- e. Acquisition of individual real estate properties at costs of at least NT\$100 million or 20% of the paid-in capital: None;
- f. Disposal of individual real estate properties at prices of at least NT\$100 million or 20% of the paid-in capital: None;
- g. Total purchases from or sales to related parties amounting to at least NT\$100 million or 20% of the paid-in capital: Please see Table 5 attached;
- h. Receivable from related parties amounting to at least NT\$100 million or 20% of the paid-in capital: Please see Table 6 attached:
- i. Names, locations, and related information of investees of which the Company exercises significant influence: Please see Table 7 attached:
- i. Financial instrument transactions:
  - 1) Derivative financial instruments

The Company entered into derivative financial instrument transactions during the six months ended June 30, 2005 to manage exposures related to foreign exchange rate and interest rate fluctuations. Certain information on these contracts was as follows:

a) Outstanding forward exchange contracts

Outstanding forward exchange contracts as of June 30, 2005 were as follows:

Financial Instruments	Currency	Maturity Date	Contract Amount (in Thousands)
Sell	US\$/NT\$	Jul. 2005 to Aug. 2005	US \$103,000
Sell	US\$/JPY	Jul. 2005	US \$6,500

As of June 30, 2005, payables from forward exchange contracts (included in the other current liabilities account) were NT\$43,086 thousand.

#### b) Outstanding cross currency swap contracts

Outstanding cross currency swap contracts as of June 30, 2005 were as follows:

Maturity Date	Contract Amount (in Thousands)	Range of Interest Rate Paid	Range of Interest Rate Received
Jul. 2005 to Aug. 2005	US\$2,045,000 (US\$/NT\$)	3.1%-3.4%	1.03%-1.22%

As of June 30, 2005, payables from cross currency swap contracts (included in the other current liabilities account) were NT\$705,607 thousand.

The net exchange gain or loss arising from forward exchange contracts and cross currency swap contracts for the six months ended June 30, 2005 was recognized in the foreign exchange loss, net account and the difference in interest was recorded in interest income or expense.

c) Interest rate swap contracts The Company rescinded all outstanding interest rate swap contracts during the three months ended March 31, 2005 before their original maturities. The rescission loss of NT\$28,295 thousand was recognized in the interest expense account. There was no outstanding contract at June 30, 2005.

#### d) Transaction risk

- i) Credit risk. Credit risk represents the positive net settlement amount of those contracts with positive fair values at the balance sheet date. The positive net settlement amount represents the loss to be incurred by the Company if the counter-parties breached the contracts. The banks, which are the counter-parties to the foregoing derivative financial instruments, are reputable financial institutions. Management believes its exposure related to the potential default by those counter-parties is low.
- ii) Market price risk. All derivative financial instruments are intended as hedges for fluctuations in foreign exchange rates and interest rates. Gains or losses from these hedging instruments are likely to be offset by gains or losses from the hedged items. Thus, market price risks are believed to be low.
- iii) Cash flow risk and the amount and period of future cash needs.

As of June 30, 2005, the Company s future cash needs for outstanding forward exchange contracts and cross currency swap contracts were as follows:

Term	(in Thousands)	(in Thousands)
Within one year	NT\$67,304,233	US\$2,154,500
	JPY698,750	

The Company has sufficient operating capital to meet the above cash needs. In addition, there will be corresponding cash inflow for the cash outflow. Therefore, the cash flow risk is low.

-34-

#### 2) Fair values of financial instruments were as follows:

	June 30, 2005		
	Carrying		
	Amount	Fair Value	
Non-derivative financial instruments			
Assets			
Short-term investments, net	\$ 49,558,447	\$50,391,628	
Long-term investments (securities with market price)	32,519,909	39,830,977	
Liabilities			
Bonds payable (including current portion)	30,000,000	30,429,929	
Derivative financial instruments			
Assets (liabilities)			
Forward exchange contracts	(44,882)	(41,381)	
Cross currency swap contracts	(674,894)	(452,530)	

The above financial instruments do not include cash and cash equivalents, receivables, other financial assets, payables, and payable to contractors and equipment suppliers. The carrying amounts of the aforementioned financial instruments reported in the balance sheet approximate their fair values.

The above financial instruments also exclude refundable deposits, guarantee deposits, long-term investments that do not have quoted market prices, long-term bank loans as well as other long-term payables. The future cash inflow and outflow of the deposits approximate their fair values. Some of long-term investments do not have quoted market prices; therefore, fair values for those long-term investments are not shown above. The fair value of long-term loans with floating interest rates is their carrying amount. The fair values of other long-term payables and interest-free long-term loans are determined using the discounted values of expected cash flows, which approximate their carrying amounts.

Fair values of financial instruments were determined as follows:

- a) Fair value of short-term and publicly traded long-term investments is based on quoted market prices.
- b) Fair value of bonds payable is based on their quoted market price.
- c) Fair value of derivative financial instruments is the amount receivable from or payable to the counter-party if the contracts were terminated on the balance sheet date.

The fair values of some financial and non-financial instruments were not included in the fair values disclosed above. Accordingly, the sum of the fair values of the financial instruments listed above does not represent the fair value of the Company as a whole.

- k. Information on investment in Mainland China
  - 1) The name of the investee company in mainland China, the main businesses and products, its issued capital, method of investment, information on inflow or outflow of capital, ratio of ownership, equity in the net gain or net loss, ending balance, amount received as earnings distributions from the investment, and the limitation on investment: Please see Table 8 attached.

- 2) Significant direct or indirect transactions with the investee company, its prices and terms of payment, unrealized gain or loss, and other related information which is helpful to understand the impact of investment in mainland China on financial reports: Please see Table 9 attached.
- 1. Intercompany relationships and significant intercompany transactions: Please see Table 9 attached.
