PROSPECTUS

United States 12 Month Oil Fund, LP®*

88,950,000 Shares

***Principal U.S. Listing Exchange: NYSE Arca, Inc.**

The United States 12 Month Oil Fund, LP (“USL”) is an exchange traded fund organized as a limited partnership that issues shares that trade on the NYSE Arca stock exchange (“NYSE Arca”). USL’s investment objective is to track a benchmark of short-term oil futures contracts. USL pays its general partner, United States Commodity Funds LLC (“USCF”), a limited liability company, a management fee and incurs operating costs. Both USCF and USL are located at 1999 Harrison Street, Suite 1530, Oakland, CA 94612. The telephone number for both USCF and USL is 510.522.9600. In order for a hypothetical investment in shares to break even over the next 12 months, assuming a selling price of \$21.30 (the net asset value as of February 28, 2018), the investment would have to generate 0.042% return or \$0.009, rounded to \$0.01.

USL is an exchange traded fund. This means that most investors who decide to buy or sell shares of USL shares place their trade orders through their brokers and may incur customary brokerage commissions and charges. Shares trade on the NYSE Arca under the ticker symbol “USL” and are bought and sold throughout the trading day at bid and ask prices like other publicly traded securities.

Shares trade on the NYSE Arca after they are initially purchased by “Authorized Participants,” institutional firms that purchase and redeem shares in blocks of 50,000 shares called “baskets” through USL’s marketing agent, ALPS Distributors, Inc. (the “Marketing Agent”). The price of a basket is equal to the net asset value (“NAV”) of 50,000 shares on the day that the order to purchase the basket is accepted by the Marketing Agent. The NAV per share is calculated by taking the current market value of USL’s total assets (after close of NYSE Arca) subtracting any liabilities and dividing that total by the total number of outstanding shares. The offering of USL’s shares is a “best efforts” offering, which means that neither the Marketing Agent nor any Authorized Participant is required to purchase a specific number or dollar amount of shares. USCF pays the Marketing Agent a marketing fee consisting of a fixed annual amount plus an incentive fee based on the amount of shares sold. Authorized Participants will not receive from USL, USCF or any of their affiliates any fee or other compensation in connection with the sale of shares. Aggregate compensation paid to the Marketing Agent and any affiliate of USCF for distribution-related services in connection with this offering of shares will not exceed ten percent (10%) of the gross proceeds of the offering.

Investors who buy or sell shares during the day from their broker may do so at a premium or discount relative to the market value of the underlying oil futures contracts in which USL invests due to supply and demand forces at work in the secondary trading market for shares that are closely related to, but not identical to, the same forces influencing the prices of crude oil and the oil futures contracts that serve as USL’s investment benchmark. Investing in USL involves risks similar to those involved with an investment directly in the oil market, the correlation risk described above, and other significant risks. See “**Risk Factors Involved with an Investment in USL**” beginning on page 4.

The offering of USL’s shares is registered with the Securities and Exchange Commission (“SEC”) in accordance with the Securities Act of 1933 (the “1933 Act”). The offering is intended to be a continuous offering and is not expected to terminate until all of the registered shares have been sold or three years from the date of the original offering,

whichever is earlier, unless extended as permitted under the rules under the 1933 Act, although the offering may be temporarily suspended if and when no suitable investments for USL are available or practicable. USL is not a mutual fund registered under the Investment Company Act of 1940 and is not subject to regulation under such Act.

NEITHER THE SEC NOR ANY STATE SECURITIES COMMISSION HAS APPROVED OR DISAPPROVED OF THE SECURITIES OFFERED IN THIS PROSPECTUS, OR DETERMINED IF THIS PROSPECTUS IS TRUTHFUL OR COMPLETE. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE.

USL is a commodity pool and USCF is a commodity pool operator subject to regulation by the Commodity Futures Trading Commission and the National Futures Association under the Commodity Exchange Act.

THE COMMODITY FUTURES TRADING COMMISSION HAS NOT PASSED UPON THE MERITS OF PARTICIPATING IN THIS POOL NOR HAS THE COMMISSION PASSED ON THE ADEQUACY OR ACCURACY OF THIS DISCLOSURE DOCUMENT.

The date of this prospectus is April 27, 2018.

COMMODITY FUTURES TRADING COMMISSION

RISK DISCLOSURE STATEMENT

YOU SHOULD CAREFULLY CONSIDER WHETHER YOUR FINANCIAL CONDITION PERMITS YOU TO PARTICIPATE IN A COMMODITY POOL. IN SO DOING, YOU SHOULD BE AWARE THAT COMMODITY INTEREST TRADING CAN QUICKLY LEAD TO LARGE LOSSES AS WELL AS GAINS. SUCH TRADING LOSSES CAN SHARPLY REDUCE THE NET ASSET VALUE OF THE POOL AND CONSEQUENTLY THE VALUE OF YOUR INTEREST IN THE POOL. IN ADDITION, RESTRICTIONS ON REDEMPTIONS MAY AFFECT YOUR ABILITY TO WITHDRAW YOUR PARTICIPATION IN THE POOL.

FURTHER, COMMODITY POOLS MAY BE SUBJECT TO SUBSTANTIAL CHARGES FOR MANAGEMENT, AND ADVISORY AND BROKERAGE FEES. IT MAY BE NECESSARY FOR THOSE POOLS THAT ARE SUBJECT TO THESE CHARGES TO MAKE SUBSTANTIAL TRADING PROFITS TO AVOID DEPLETION OR EXHAUSTION OF THEIR ASSETS. THIS DISCLOSURE DOCUMENT CONTAINS A COMPLETE DESCRIPTION OF EACH EXPENSE TO BE CHARGED THIS POOL AT PAGE 31 AND A STATEMENT OF THE PERCENTAGE RETURN NECESSARY TO BREAK EVEN, THAT IS, TO RECOVER THE AMOUNT OF YOUR INITIAL INVESTMENT, AT PAGE 32.

THIS BRIEF STATEMENT CANNOT DISCLOSE ALL THE RISKS AND OTHER FACTORS NECESSARY TO EVALUATE YOUR PARTICIPATION IN THIS COMMODITY POOL. THEREFORE, BEFORE YOU DECIDE TO PARTICIPATE IN THIS COMMODITY POOL, YOU SHOULD CAREFULLY STUDY THIS DISCLOSURE DOCUMENT, INCLUDING A DESCRIPTION OF THE PRINCIPAL RISK FACTORS OF THIS INVESTMENT, AT PAGE 4.

YOU SHOULD ALSO BE AWARE THAT THIS COMMODITY POOL MAY TRADE FOREIGN FUTURES OR OPTIONS CONTRACTS. TRANSACTIONS ON MARKETS LOCATED OUTSIDE THE UNITED STATES, INCLUDING MARKETS FORMALLY LINKED TO A UNITED STATES MARKET, MAY BE SUBJECT TO REGULATIONS WHICH OFFER DIFFERENT OR DIMINISHED PROTECTION TO THE POOL AND ITS PARTICIPANTS. FURTHER, UNITED STATES REGULATORY AUTHORITIES MAY BE UNABLE TO COMPEL THE ENFORCEMENT OF THE RULES OF REGULATORY AUTHORITIES OR MARKETS IN NON-UNITED STATES JURISDICTIONS WHERE TRANSACTIONS FOR THE POOL MAY BE EFFECTED.

SWAPS TRANSACTIONS, LIKE OTHER FINANCIAL TRANSACTIONS, INVOLVE A VARIETY OF SIGNIFICANT RISKS. THE SPECIFIC RISKS PRESENTED BY A PARTICULAR SWAP TRANSACTION NECESSARILY DEPEND UPON THE TERMS OF THE TRANSACTION AND YOUR CIRCUMSTANCES. IN GENERAL, HOWEVER, ALL SWAPS TRANSACTIONS INVOLVE SOME COMBINATION OF MARKET RISK, CREDIT RISK, COUNTERPARTY CREDIT RISK, FUNDING RISK, LIQUIDITY RISK, AND OPERATIONAL RISK.

HIGHLY CUSTOMIZED SWAPS TRANSACTIONS IN PARTICULAR MAY INCREASE LIQUIDITY RISK, WHICH MAY RESULT IN A SUSPENSION OF REDEMPTIONS. HIGHLY LEVERAGED TRANSACTIONS MAY EXPERIENCE SUBSTANTIAL GAINS OR LOSSES IN VALUE AS A RESULT OF RELATIVELY SMALL CHANGES IN THE VALUE OR LEVEL OF AN UNDERLYING OR RELATED MARKET FACTOR.

IN EVALUATING THE RISKS AND CONTRACTUAL OBLIGATIONS ASSOCIATED WITH A PARTICULAR SWAP TRANSACTION, IT IS IMPORTANT TO CONSIDER THAT A SWAP

TRANSACTION MAY BE MODIFIED OR TERMINATED ONLY BY MUTUAL CONSENT OF THE ORIGINAL PARTIES AND SUBJECT TO AGREEMENT ON INDIVIDUALLY NEGOTIATED TERMS. THEREFORE, IT MAY NOT BE POSSIBLE FOR THE COMMODITY POOL OPERATOR TO MODIFY, TERMINATE, OR OFFSET THE POOL'S OBLIGATIONS OR THE POOL'S EXPOSURE TO THE RISKS ASSOCIATED WITH A TRANSACTION PRIOR TO ITS SCHEDULED TERMINATION DATE.

PROSPECTUS SUMMARY

This is only a summary of the prospectus and, while it contains material information about USL and its shares, it does not contain or summarize all of the information about USL and the shares contained in this prospectus that is material and/or which may be important to you. You should read this entire prospectus, including “Risk Factors Involved with an Investment in USL” beginning on page 4, before making an investment decision about the shares. For a glossary of defined terms, see Appendix A.

USL

United States 12 Month Oil Fund, LP (“USL”), a Delaware limited partnership, is a commodity pool that continuously issues common shares of beneficial interest that may be purchased and sold on the NYSE Arca stock exchange (“NYSE Arca”). USL is managed and controlled by United States Commodity Funds LLC (“USCF”), a Delaware limited liability company. USCF is registered as a commodity pool operator (“CPO”) with the Commodity Futures Trading Commission (“CFTC”) and is a member of the National Futures Association (“NFA”).

USL’s Investment Objective and Strategy

The investment objective of USL is for the daily changes in percentage terms of its per share net asset value (“NAV”) to reflect the daily changes in percentage terms of the spot price of light, sweet crude oil delivered to Cushing, Oklahoma, as measured by the daily changes in the average of the prices of specified short-term futures contracts on light, sweet crude oil called the “Benchmark Oil Futures Contracts,” plus interest earned on USL’s collateral holdings, less USL’s expenses.

What Are the “Benchmark Oil Futures Contracts”?

The Benchmark Oil Futures Contracts are the futures contracts on light, sweet crude oil as traded on the New York Mercantile Exchange (the “NYMEX”) that is the near month contract to expire, and the contracts for the following 11 months, for a total of 12 consecutive months’ contracts, except when the near month contract is within two weeks of expiration, in which case it will be the futures contract that is the next month contract to expire and the contracts for the following 11 consecutive months. When calculating the daily movement of the average price of the 12 contracts, each contract month is equally weighted.

USL seeks to achieve its investment objective by investing primarily in futures contracts for light, sweet crude oil, other types of crude oil, diesel-heating oil, gasoline, natural gas, and other petroleum-based fuels that are traded on the NYMEX, ICE Futures Europe and ICE Futures U.S. (together, “ICE Futures”) or other U.S. and foreign exchanges (collectively, “Oil Futures Contracts”) and to a lesser extent, in order to comply with regulatory requirements or in view of market conditions, other oil-related investments such as cash-settled options on Oil Futures Contracts, forward contracts for oil, cleared swap contracts and non-exchange traded (“over-the-counter” or “OTC”) transactions that are based on the price of oil, other petroleum-based fuels, Oil Futures Contracts and indices based on the foregoing (collectively, “Other Oil-Related Investments”). Market conditions that USCF currently anticipates could cause USL to invest in Other Oil-Related Investments include those allowing USL to obtain greater liquidity or to execute transactions with more favorable pricing. (For convenience and unless otherwise specified, Oil Futures Contracts and Other Oil-Related Investments collectively are referred to as “Oil Interests” in this prospectus.)

In addition, USCF believes that market arbitrage opportunities will cause daily changes in USL’s share price on the NYSE Arca on a percentage basis to closely track daily changes in USL’s per share NAV on a percentage basis. USCF further believes that the daily changes in the average prices of the Benchmark Oil Futures Contracts have historically closely tracked the daily changes in prices of light, sweet crude oil. USCF believes that the net effect of these relationships will be that the daily changes in the price of USL’s shares on the NYSE Arca on a percentage basis will

closely track the daily changes in the spot price of a barrel of light, sweet crude oil on a percentage basis, less USL's expenses.

Specifically, USL seeks to achieve its investment objective by investing so that the average daily percentage change in USL's NAV for any period of 30 successive valuation days will be within plus/minus ten percent (10%) of the average daily percentage change in the price of the Benchmark Oil Futures Contracts over the same period.

Investors should be aware that USL's investment objective is *not* for its NAV or market price of shares to equal, in dollar terms, the spot price of light, sweet crude oil or any particular futures contract based on light, sweet crude oil, *nor* is USL's investment objective for the percentage change in its NAV to reflect the percentage change of the price of any particular futures contract as measured over a time period *greater than one day*. This is because natural market forces called contango and backwardation have impacted the total return on an investment in USL's shares during the past year relative to a hypothetical direct investment in crude oil and, in the future, it is likely that the relationship between the market price of USL's shares and changes in the spot prices of light, sweet crude oil will continue to be so impacted by contango and backwardation. (It is important to note that the disclosure above ignores the potential costs associated with physically owning and storing crude oil, which could be substantial.)

Principal Investment Risks of an Investment in USL

An investment in USL involves a degree of risk. Some of the risks you may face are summarized below. A more extensive discussion of these risks appears beginning on page 4.

Investment Risk

Investors may choose to use USL as a means of investing indirectly in crude oil. There are significant risks and hazards inherent in the crude oil industry that may cause the price of crude oil to widely fluctuate.

Correlation Risk

To the extent that investors use USL as a means of indirectly investing in crude oil, there is the risk that the daily changes in the price of USL's shares on the NYSE Arca on a percentage basis will not closely track the daily changes in the spot price of light, sweet crude oil on a percentage basis. This could happen if the price of shares traded on the NYSE Arca does not correlate closely with the value of USL's NAV; the changes in USL's NAV do not correlate closely with the changes in the average price of the Benchmark Oil Futures Contracts, or the changes in the average price of the Benchmark Oil Futures Contracts do not closely correlate with the changes in the cash or spot price of crude oil. This is a risk because if these correlations do not exist, then investors may not be able to use USL as a cost-effective way to indirectly invest in crude oil or as a hedge against the risk of loss in crude oil-related transactions.

USCF believes that holding futures contracts whose expiration dates are spread out over a 12 month period of time will cause the total return of such a portfolio to vary compared to a portfolio that holds only a single month's contract (such as the near month contract). In particular, USCF believes that the total return of a portfolio holding contracts with a range of expiration months will be impacted differently by the price relationship between different contract months of the same commodity future compared to the total return of a portfolio consisting of the near month contract. For example, in cases in which the near month contract's price is higher than the price of contracts that expire later in time (a situation known as "backwardation" in the futures markets), then absent the impact of the overall movement in crude oil prices the value of the near month contract would tend to rise as it approaches expiration. Conversely, in cases in which the near month contract's price is lower than the price of contracts that expire later in time (a situation known as "contango" in the futures markets), then absent the impact of the overall movement in crude oil prices the value of the near month contract would tend to decline as it approaches expiration. The total return of a portfolio that owned the near month contract and "rolled" forward each month by selling the near month contract as it approached expiration and purchasing the next month contract to expire would be positively impacted by a backwardation market, and negatively impacted by a contango market. Depending on the exact price relationship of the different month's prices, portfolio expenses, and the overall movement of crude oil prices, the impact of backwardation and contango could have a major impact on the total return of such a portfolio over time. USCF believes that based on historical evidence a portfolio that held futures contracts with a range of expiration dates spread out over a 12 month period of time would typically be impacted less by the positive effect of backwardation and the negative effect of contango compared to a portfolio that held contracts of a single near month. As a result, absent the impact of any other factors, a portfolio of 12 different monthly contracts would tend to have a lower total return than a near month only portfolio in a backwardation market and a higher total return in a contango market. However there can be no assurance that such historical relationships would provide the same or similar results in the future.

Tax Risk

USL is organized and operated as a limited partnership in accordance with the provisions of its limited partnership agreement and applicable state law, and therefore, has a more complex tax treatment than conventional mutual funds.

Over-the-Counter (“OTC”) Contract Risk

USL may also invest in Other Oil-Related Investments, many of which are negotiated or “OTC” contracts that are not as liquid as Oil Futures Contracts and expose USL to credit risk that its counterparty may not be able to satisfy its obligations to USL.

Other Risks

USL pays fees and expenses that are incurred regardless of whether it is profitable.

Unlike mutual funds, commodity pools or other investment pools that manage their investments in an attempt to realize income and gains and distribute such income and gains to their investors, USL generally does not distribute cash to limited partners or other shareholders. You should not invest in USL if you will need cash distributions from USL to pay taxes on your share of income and gains of USL, if any, or for any other reason.

You will have no rights to participate in the management of USL and will have to rely on the duties and judgment of USCF to manage USL.

USL is subject to actual and potential inherent conflicts involving USCF, various commodity futures brokers and “Authorized Participants,” the institutional firms that directly purchase and redeem shares in baskets of 50,000 shares. USCF’s officers, directors and employees do not devote their time exclusively to USL. USCF’s persons are directors, officers or employees of other entities that may compete with USL for their services, including other commodity pools (funds) that USCF manages. USCF could have a conflict between its responsibilities to USL and to those other entities. As a result of these and other relationships, parties involved with USL have a financial incentive to act in a manner other than in the best interests of USL and the shareholders.

USL’s Fees and Expenses

This table describes the fees and expenses that you may pay if you buy and hold shares of USL. You should note that you may pay brokerage commissions on purchases and sales of USL’s shares, which are not reflected in the table. Authorized Participants will pay applicable creation and redemption fees. See “Creation and Redemption of Shares-Creation and Redemption Transaction Fee,” page 57.

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)⁽¹⁾

Management Fees	0.60 % ⁽²⁾
Distribution Fees	None
Other Fund Expenses	0.26 %
Total Annual Fund Operating Expenses	0.86 %

Based on amounts for the year ended December 31, 2017. The individual expense amounts in dollar terms are shown in the table below. As used in this table, (i) Professional Expenses include expenses for legal, audit, tax accounting and printing; and (ii) Independent Director and Officer Expenses include amounts paid to independent directors and for officers’ liability insurance.

Management Fees	\$646,339
Professional Expenses	\$236,426
Registration Fees	\$N/A
Brokerage Commissions	\$17,897
Licensing Fees	\$16,158
Independent Director and Officer Expenses	\$14,120

These amounts are based on USL’s average total net assets, which are the sum of daily total net assets of USL divided by the number of calendar days in the year. For the year ended December 31, 2017, USL’s average total net assets were \$107,723,119.

⁽²⁾ USL is contractually obligated to pay USCF a management fee, which is paid monthly, equal to 0.60% per annum of average daily net assets.

RISK FACTORS INVOLVED WITH AN INVESTMENT IN USL

You should consider carefully the risks described below before making an investment decision. You should also refer to the other information included in this prospectus as well as information found in our periodic reports, which include USL's financial statements and the related notes, that are incorporated by reference. See "Incorporation By Reference of Certain Information," page 60.

USL's investment objective is for the daily percentage changes in the net asset value ("NAV") per share to reflect the daily percentage changes of the spot price of light, sweet crude oil, as measured by the daily percentage changes in the average of the prices of the Benchmark Oil Futures Contracts, plus interest earned on USL's collateral holdings, less USL's expenses. USL seeks to achieve its investment objective by investing so that the average daily percentage change in USL's NAV for any period of 30 successive valuation days will be within plus/minus ten percent (10%) of the average daily percentage change in the price of the Benchmark Oil Futures Contract over the same period. USL's investment strategy is designed to provide investors with a cost-effective way to invest indirectly in crude oil and to hedge against movements in the spot price of light, sweet crude oil. An investment in USL involves investment risk similar to a direct investment in Oil Futures Contracts and Other Oil-Related Investments, and correlation risk, or the risk that investors purchasing shares to hedge against movements in the price of crude oil will have an efficient hedge only if the price they pay for their shares closely correlates with the price of crude oil. In addition to investment risk and correlation risk, an investment in USL involves tax risks, OTC risks, and other risks.

Investment Risk

The NAV of USL's shares relates directly to the value of the Benchmark Oil Futures Contracts and other assets held by USL and fluctuations in the prices of these assets could materially adversely affect an investment in USL's shares. Past performance is not necessarily indicative of futures results; all or substantially all of an investment in USL could be lost.

The net assets of USL consist primarily of investments in Oil Futures Contracts and, to a lesser extent, in Other Oil-Related Investments. The NAV of USL's shares relates directly to the value of these assets (less liabilities, including accrued but unpaid expenses), which in turn relates to the price of light, sweet crude oil in the marketplace. Crude oil prices depend on local, regional and global events or conditions that affect supply and demand for oil.

Economic conditions impacting crude oil. The demand for crude oil correlates closely with general economic growth rates. The occurrence of recessions or other periods of low or negative economic growth will typically have a direct adverse impact on crude oil prices. Other factors that affect general economic conditions in the world or in a major region, such as changes in population growth rates, periods of civil unrest, government austerity programs, or currency exchange rate fluctuations, can also impact the demand for crude oil. Sovereign debt downgrades, defaults, inability to access debt markets due to credit or legal constraints, liquidity crises, the breakup or restructuring of fiscal, monetary, or political systems such as the European Union, and other events or conditions that impair the functioning of financial markets and institutions also may adversely impact the demand for crude oil.

Other crude oil demand-related factors. Other factors that may affect the demand for crude oil and therefore its price, include technological improvements in energy efficiency; seasonal weather patterns, which affect the demand for crude oil associated with heating and cooling; increased competitiveness of alternative energy sources that have so far generally not been competitive with oil without the benefit of government subsidies or mandates; and changes in technology or consumer preferences that alter fuel choices, such as toward alternative fueled vehicles.

Other crude oil supply-related factors. Crude oil prices also vary depending on a number of factors affecting supply. For example, increased supply from the development of new oil supply sources and technologies to enhance recovery from existing sources tends to reduce crude oil prices to the extent such supply increases are not offset by

commensurate growth in demand. Similarly, increases in industry refining or petrochemical manufacturing capacity may impact the supply of crude oil. World oil supply levels can also be affected by factors that reduce available supplies, such as adherence by member countries to the Organization of the Petroleum Exporting Countries (“OPEC”) production quotas and the occurrence of wars, hostile actions, natural disasters, disruptions in competitors’ operations, or unexpected unavailability of distribution channels that may disrupt supplies.

Technological change can also alter the relative costs for companies in the petroleum industry to find, produce, and refine oil and to manufacture petrochemicals, which in turn may affect the supply of and demand for oil.

Other factors impacting the crude oil market. The supply of and demand for crude oil may also be impacted by changes in interest rates, inflation, and other local or regional market conditions, as well as by the development of alternative energy sources.

Price volatility may possibly cause the total loss of your investment. Futures contracts have a high degree of price variability and are subject to occasional rapid and substantial changes. Consequently, you could lose all or substantially all of your investment in USL.

Correlation Risk

Investors purchasing shares to hedge against movements in the price of crude oil will have an efficient hedge only if the price investors pay for their shares closely correlates with the price of crude oil. Investing in USL's shares for hedging purposes involves the following risks:

- The market price at which the investor buys or sells shares may be significantly less or more than the NAV.
- Daily percentage changes in NAV may not closely correlate with daily percentage changes in the average of the prices of the Benchmark Oil Futures Contracts.
- Daily percentage changes in the average of the prices of the Benchmark Oil Futures Contracts may not closely correlate with daily percentage changes in the price of light, sweet crude oil.

The market price at which investors buy or sell shares may be significantly less or more than NAV.

USL's NAV per share will change throughout the day as fluctuations occur in the market value of USL's portfolio investments. The public trading price at which an investor buys or sells shares during the day from their broker may be different from the NAV of the shares. Price differences may relate primarily to supply and demand forces at work in the secondary trading market for shares that are closely related to, but not identical to, the same forces influencing the prices of the light, sweet crude oil and the Benchmark Oil Futures Contracts at any point in time. USCF expects that exploitation of certain arbitrage opportunities by "Authorized Participants," the institutional firms that directly purchase and redeem shares in blocks of 50,000 shares ("Creation Baskets" and "Redemption Baskets" respectively, together, "baskets"), and their clients and customers will tend to cause the public trading price to track NAV per share closely over time, but there can be no assurance of that.

The NAV of USL's shares may also be influenced by non-concurrent trading hours between the NYSE Arca and the various futures exchanges on which crude oil is traded. While the shares trade on the NYSE Arca from 9:30 a.m. to 4:00 p.m. Eastern Time, the trading hours for the futures exchanges on which sweet light crude oil trade may not necessarily coincide during all of this time. For example, while the shares trade on the NYSE Arca until 4:00 p.m. Eastern Time, liquidity in the global light, sweet crude market will be reduced after the close of the NYMEX at 2:30 p.m. Eastern Time. As a result, during periods when the NYSE Arca is open and the futures exchanges on which sweet, light crude oil is traded are closed, trading spreads and the resulting premium or discount on the shares may widen and, therefore, increase the difference between the price of the shares and the NAV of the shares.

Daily percentage changes in USL's NAV may not correlate with daily percentage changes in the average of the prices of the Benchmark Oil Futures Contracts.

It is possible that the daily percentage changes in USL's NAV per share may not closely correlate to daily percentage changes in the average of the prices of the Benchmark Oil Futures Contracts. Non-correlation may be attributable to disruptions in the market for light, sweet crude oil, the imposition of position or accountability limits by regulators or exchanges, or other extraordinary circumstances. As USL approaches or reaches position limits with respect to the Benchmark Oil Futures Contracts and other Oil Futures Contracts or in view of market conditions, USL may begin investing in Other Oil-Related Investments. In addition, USL is not able to replicate exactly the changes in the average price of the Benchmark Oil Futures Contracts because the total return generated by USL is reduced by expenses and transaction costs, including those incurred in connection with USL's trading activities, and increased by interest income from USL's holdings of Treasuries (defined below). Tracking the Benchmark Oil Futures Contracts requires trading of USL's portfolio with a view to tracking the Benchmark Oil Futures Contracts over time and is dependent upon the skills of USCF and its trading principals, among other factors.

Daily percentage changes in the average price of the Benchmark Oil Futures Contracts may not correlate with daily percentage changes in the spot price of light, sweet crude oil.

The correlation between changes in the average prices of the Benchmark Oil Futures Contracts and the spot price of crude oil may at times be only approximate. The degree of imperfection of correlation depends upon circumstances such as variations in the speculative oil market, supply of and demand for Oil Futures Contracts (including the Benchmark Oil Futures Contracts) and Other Oil-Related Investments, and technical influences in oil futures trading.

Natural forces in the oil futures market known as “backwardation” and “contango” may increase USL’s tracking error and/or negatively impact total return.

The design of USL’s Benchmark Oil Futures Contracts consists of the near month contract to expire and the contracts for the 11 following months, which are changed to the next month contract to expire and the contracts for the 11 following months during one day each month. In the event of a crude oil futures market where near month contracts trade at a higher price than next month to expire contracts, a situation described as “backwardation” in the futures market, then absent the impact of the overall movement in crude oil prices the value of the benchmark contract would tend to rise as it approaches expiration. Conversely, in the event of a crude oil futures market where near month contracts trade at a lower price than next month contracts, a situation described as “contango” in the futures market, then absent the impact of the overall movement in crude oil prices the value of the benchmark contract would tend to decline as it approaches expiration. When compared to total return of other price indices, such as the spot price of crude oil, the impact of backwardation and contango may cause the total return of USL’s per share NAV to vary significantly. Moreover, absent the impact of rising or falling oil prices, a prolonged period of contango could have a significant negative impact on USL’s per share NAV and total return and investors could lose part or all of their investment. See “Additional Information About USL, its Investment Objective and Investments” for a discussion of the potential effects of contango and backwardation.

Accountability levels, position limits, and daily price fluctuation limits set by the exchanges have the potential to cause tracking error, which could cause the price of shares to substantially vary from the average of the prices of the Benchmark Oil Futures Contracts.

Designated contract markets, such as the NYMEX and ICE Futures have established accountability levels and position limits on the maximum net long or net short futures contracts in commodity interests that any person or group of persons under common trading control (other than as a hedge, which an investment by USL is not) may hold, own or control. In addition to accountability levels and position limits, the NYMEX and ICE Futures also set daily price limits on futures contracts. The daily price fluctuation limit establishes the maximum amount that the price of a futures contract may vary either up or down from the previous day’s settlement price. Once the daily price fluctuation limit has been reached in a particular futures contract, no trades may be made at a price beyond that limit.

The accountability levels for the Benchmark Oil Futures Contracts and other Oil Futures Contracts traded on U.S.-based futures exchanges, such as the NYMEX, are not a fixed ceiling, but rather a threshold above which the NYMEX may exercise greater scrutiny and control over an investor’s positions. The current accountability level for investments for any one-month in the Benchmark Oil Futures Contracts is 10,000 contracts. In addition, the NYMEX imposes an accountability level for all months of 20,000 net futures contracts for light, sweet crude oil. In addition, the ICE Futures maintains the same accountability levels, position limits and monitoring authority for its light, sweet crude oil contract as the NYMEX. If USL and the Related Public Funds exceed these accountability levels for investments in the futures contracts for light, sweet crude oil, the NYMEX and ICE Futures will monitor such exposure and may ask for further information on their activities, including the total size of all positions, investment and trading strategy, and the extent of liquidity resources of USL and the Related Public Funds. If deemed necessary by the NYMEX and/or ICE Futures, USL could be ordered to reduce its net oil futures contracts back to the accountability level. As of December 31, 2017, USL held 1,541 NYMEX Crude Oil Futures CL contracts. As of December 31, 2017, USL did not hold any Oil Futures Contracts traded on the ICE Futures. For the year ended December 31, 2017, USL did not exceed accountability levels imposed by the NYMEX or ICE Futures, however, the aggregated total of the Related Public Funds did exceed the accountability levels. No action was taken by NYMEX and USL did not reduce the number of Oil Futures Contracts held as a result.

Position limits differ from accountability levels in that they represent fixed limits on the maximum number of futures contracts that any person may hold and cannot allow such limits to be exceeded without express Commodity Futures Trading Commission (“CFTC”) authority to do so. In addition to accountability levels and position limits that may apply

at any time, the NYMEX and the ICE Futures impose position limits on contracts held in the last few days of trading in the near month contract to expire. It is unlikely that USL will run up against such position limits because USL's investment strategy is to close out its positions and "roll" from the near month contracts to expire to the next month contracts during a one-day period beginning two weeks from expiration of the contracts. For the year ended December 31, 2017, USL did not exceed any position limits imposed by the NYMEX and ICE Futures.

The CFTC has proposed to adopt limits on speculative positions in 25 physical commodity futures and option contracts as well as swaps that are economically equivalent to such contracts in the agriculture, energy and metals markets (the “Position Limit Rules”). The Position Limit Rules would, among other things: identify which contracts are subject to speculative position limits; set thresholds that restrict the size of speculative positions that a person may hold in the spot month, other individual months, and all months combined; create an exemption for positions that constitute bona fide hedging transactions; impose responsibilities on designated contract markets (“DCMs”) and swap execution facilities (“SEFs”) to establish position limits or, in some cases, position accountability rules; and apply to both futures and swaps across four relevant venues: OTC, DCMs, SEFs as well as certain non-U.S. located platforms. The CFTC’s first attempt at finalizing the Position Limit Rules, in 2011, was successfully challenged by market participants in 2012 and, since then, the CFTC has repropounded them and solicited comments from market participants multiple times. At this time, it is unclear how the Position Limit Rules may affect USL, but the effect may be substantial and adverse. By way of example, the Position Limit Rules may negatively impact the ability of USL to meet its investment objectives through limits that may inhibit USCF’s ability to sell additional Creation Baskets of USL.

Until such time as the Position Limit Rules are adopted, the regulatory architecture in effect prior to the adoption of the Position Limit Rules will govern transactions in commodities and related derivatives. Under that system, the CFTC enforces federal limits on speculation in agricultural products (e.g., corn, wheat and soy), while futures exchanges establish and enforce position limits and accountability levels for agricultural and certain energy products (e.g., oil and natural gas). As a result, USL may be limited with respect to the size of its investments in any commodities subject to these limits.

Under existing and recently adopted CFTC regulations, for the purposes of position limits, a market participant is generally required, subject to certain narrow exceptions, to aggregate all positions for which that participant controls the trading decisions with all positions for which that participant has a 10 percent or greater ownership interest in an account or position, as well as the positions of two or more persons acting pursuant to an express or implied agreement or understanding with that market participant (the “Aggregation Rules”). The Aggregation Rules will also apply with respect to the Position Limit Rules if and when such Position Limit Rules are adopted.

All of these limits may potentially cause a tracking error between the price of USL’s shares and the average of the prices of the Benchmark Oil Futures Contracts. This may in turn prevent investors from being able to effectively use USL as a way to hedge against crude oil-related losses or as a way to indirectly invest in crude oil.

USL has not limited the size of its offering and is committed to utilizing substantially all of its proceeds to purchase Oil Futures Contracts and Other Oil-Related Investments. If USL encounters accountability levels, position limits, or price fluctuation limits for Oil Futures Contracts on the NYMEX or ICE Futures, it may then, if permitted under applicable regulatory requirements, purchase Oil Futures Contracts on other exchanges that trade listed crude oil futures or enter into swaps or other transactions to meet its investment objective. In addition, if USL exceeds accountability levels on either the NYMEX or ICE Futures and is required by such exchanges to reduce its holdings, such reduction could potentially cause a tracking error between the price of USL’s shares and the average of the prices of the Benchmark Oil Futures Contracts.

Tax Risk

An investor’s tax liability may exceed the amount of distributions, if any, on its shares.

Cash or property will be distributed at the sole discretion of USCF. USCF has not and does not currently intend to make cash or other distributions with respect to shares. Investors will be required to pay U.S. federal income tax and, in some cases, state, local, or foreign income tax, on their allocable share of USL’s taxable income, without regard to whether they receive distributions or the amount of any distributions. Therefore, the tax liability of an investor with

respect to its shares may exceed the amount of cash or value of property (if any) distributed.

An investor's allocable share of taxable income or loss may differ from its economic income or loss on its shares.

Due to the application of the assumptions and conventions applied by USL in making allocations for tax purposes and other factors, an investor's allocable share of USL's income, gain, deduction or loss may be different than its economic profit or loss from its shares for a taxable year. This difference could be temporary or permanent and, if permanent, could result in it being taxed on amounts in excess of its economic income.

Items of income, gain, deduction, loss and credit with respect to shares could be reallocated and USL could be liable for U.S. federal income tax, if the U.S. Internal Revenue Service (“IRS”) does not accept the assumptions and conventions applied by USL in allocating those items, with potential adverse consequences for an investor.

The U.S. tax rules pertaining to partnerships are complex and their application to large, publicly traded partnerships such as USL is in many respects uncertain. USL applies certain assumptions and conventions in an attempt to comply with the intent of the applicable rules and to report taxable income, gains, deductions, losses and credits in a manner that properly reflects shareholders’ economic gains and losses. These assumptions and conventions may not fully comply with all aspects of the Internal Revenue Code (the “Code”) and applicable Treasury Regulations, however, and it is possible that the IRS will successfully challenge USL’s allocation methods and require USL to reallocate items of income, gain, deduction, loss or credit in a manner that adversely affects investors.

USL may be liable for U.S. federal income tax on any “imputed understatement” of tax resulting from an adjustment as a result of an IRS audit. The amount of the imputed understatement generally includes increases in allocations of items of income or gains to any investor and decreases in allocations of items of deduction, loss, or credit to any investor without any offset for any corresponding reductions in allocations of items of income or gain to any investor or increases in allocations of items of deduction, loss, or credit to any investor. If USL is required to pay any U.S. federal income taxes on any imputed understatement, the resulting tax liability would reduce the net assets of USL and would likely have an adverse impact on the value of the shares. Under certain circumstances, USL may be eligible to make an election to cause the investors to take into account the amount of any imputed understatement, including any interest and penalties. The ability of a publicly traded partnership such as USL to make this election is uncertain. If the election is made, USL would be required to provide investors who owned beneficial interests in the shares in the year to which the adjusted allocations relate with a statement setting forth their proportionate shares of the adjustment (“Adjusted K-1s”). The investors would be required to take the adjustment into account in the taxable year in which the Adjusted K-1s are issued.

USL could be treated as a corporation for federal income tax purposes, which may substantially reduce the value of the shares.

USL has received an opinion of counsel that, under current U.S. federal income tax laws, USL will be treated as a partnership that is not taxable as a corporation for U.S. federal income tax purposes, provided that (i) at least 90 percent of USL’s annual gross income will be derived from (x) income and gains from commodities (not held as inventory) or futures, forwards, options, swaps and other notional principal contracts with respect to commodities, and (y) interest income, (ii) USL is organized and operated in accordance with its governing agreements and applicable law and (iii) USL does not elect to be taxed as a corporation for federal income tax purposes. Although USCF anticipates that USL has satisfied and will continue to satisfy the “qualifying income” requirement for all of its taxable years, that result cannot be assured. USL has not requested and will not request any ruling from the IRS with respect to its classification as a partnership not taxable as a corporation for federal income tax purposes. If the IRS were to successfully assert that USL is taxable as a corporation for federal income tax purposes in any taxable year, rather than passing through its income, gains, losses and deductions proportionately to shareholders, USL would be subject to tax on its net income for the year at corporate tax rates. In addition, although USCF does not currently intend to make distributions with respect to shares, any distributions would be taxable to shareholders as dividend income. Taxation of USL as a corporation could materially reduce the after-tax return on an investment in shares and could substantially reduce the value of the shares.

USL is organized and operated as a limited partnership in accordance with the provisions of the LP Agreement and applicable state law, and therefore, USL has a more complex tax treatment than traditional mutual funds.

USL is organized and operated as a limited partnership in accordance with the provisions of the LP Agreement and applicable state law. No U.S. federal income tax is paid by USL on its income. Instead, USL will furnish shareholders

each year with tax information on IRS Schedule K-1 (Form 1065) and each U.S. shareholder is required to report on its U.S. federal income tax return its allocable share of the income, gain, loss and deduction of USL.

This must be reported without regard to the amount (if any) of cash or property the shareholder receives as a distribution from USL during the taxable year. A shareholder, therefore, may be allocated income or gain by USL but receive no cash distribution with which to pay the tax liability resulting from the allocation, or may receive a distribution that is insufficient to pay such liability.

In addition to federal income taxes, shareholders may be subject to other taxes, such as state and local income taxes, unincorporated business taxes, business franchise taxes and estate, inheritance or intangible taxes that may be imposed by the various jurisdictions in which USL does business or owns property or where the shareholders reside. Although an analysis of those various taxes is not presented here, each prospective shareholder should consider their potential impact on its investment in USL. It is each shareholder's responsibility to file the appropriate U.S. federal, state, local and foreign tax returns.

If USL is required to withhold tax with respect to any Non-U.S. shareholders, the cost of such withholding may be borne by all shareholders.

Under certain circumstances, USL may be required to pay withholding tax with respect to allocations to Non-U.S. shareholders. Although the LP Agreement provides that any such withholding will be treated as being distributed to the Non-U.S. shareholder, USL may not be able to cause the economic cost of such withholding to be borne by the Non-U.S. shareholder on whose behalf such amounts were withheld since it does not generally expect to make any distributions. Under such circumstances, the economic cost of the withholding may be borne by all shareholders, not just the shareholders on whose behalf such amounts were withheld. This could have a material impact on the value of the shares.

The impact of U.S. tax reform on USL is uncertain.

On December 22, 2017, H.R. 1, the bill formerly known as the Tax Cuts and Jobs Act of 2017 (the "Tax Act"), was signed into law. The Tax Act substantially alters the U.S. federal tax system in a variety of ways, including significant changes to the taxation of business entities, the deductibility of interest expense, and the tax treatment of capital investment. We cannot predict with certainty how any changes in the tax laws might affect the U.S. economy or the demand for and the price of commodities. As a result, it is possible that the Tax Act, as well as any U.S. Treasury regulations, administrative interpretations or court decisions interpreting the Tax Act and any future legislation related to tax reform, could have unexpected or negative impacts on USL and some or all of its shareholders. Shareholders are urged to consult with their tax advisor regarding tax legislative, regulatory, or administrative developments and proposals and their potential effect on an investment in USL.

OTC Contract Risk

USL will be subject to credit risk with respect to counterparties to OTC contracts entered into by USL or held by special purpose or structured vehicles.

USL faces the risk of non-performance by the counterparties to the OTC contracts. Unlike in futures contracts, the counterparty to these contracts is generally a single bank or other financial institution, rather than a clearing organization backed by a group of financial institutions. As a result, there will be greater counterparty credit risk in these transactions. A counterparty may not be able to meet its obligations to USL, in which case USL could suffer significant losses on these contracts.

If a counterparty becomes bankrupt or otherwise fails to perform its obligations due to financial difficulties, USL may experience significant delays in obtaining any recovery in a bankruptcy or other reorganization proceeding. USL may obtain only limited recovery or may obtain no recovery in such circumstances.

Valuing OTC derivatives may be less certain than actively traded financial instruments.

In general, valuing OTC derivatives is less certain than valuing actively traded financial instruments such as exchange traded futures contracts and securities or cleared swaps because the price and terms on which such OTC derivatives are entered into or can be terminated are individually negotiated, and those prices and terms may not reflect the best price or terms available from other sources. In addition, while market makers and dealers generally quote indicative prices or terms for entering into or terminating OTC contracts, they typically are not contractually obligated to do so, particularly if they are not a party to the transaction. As a result, it may be difficult to obtain an independent value for an outstanding OTC derivatives transaction.

Other Risks

Certain of USL's investments could be illiquid, which could cause large losses to investors at any time or from time to time.

Futures positions cannot always be liquidated at the desired price. It is difficult to execute a trade at a specific price when there is a relatively small volume of buy and sell orders in a market. A market disruption, such as a foreign government taking political actions that disrupt the market for its currency, its crude oil production or exports, or another major export, can also make it difficult to liquidate a position. Because both Oil Futures Contracts and Other Oil-Related Investments may be illiquid, USL's Oil Interests may be more difficult to liquidate at favorable prices in periods of illiquid markets and losses may be incurred during the period in which positions are being liquidated. The large size of the positions that USL may acquire increases the risk of illiquidity both by making its positions more difficult to liquidate and by potentially increasing losses while trying to do so.

OTC contracts that are not subject to clearing may be even less marketable than futures contracts because they are not traded on an exchange, do not have uniform terms and conditions, and are entered into based upon the creditworthiness of the parties and the availability of credit support, such as collateral, and in general, they are not transferable without the consent of the counterparty. These conditions make such contracts less liquid than standardized futures contracts traded on a commodities exchange and could adversely impact USL's ability to realize the full value of such contracts. In addition, even if collateral is used to reduce counterparty credit risk, sudden changes in the value of OTC transactions may leave a party open to financial risk due to a counterparty default since the collateral held may not cover a party's exposure on the transaction in such situations.

USL is not actively managed and tracks the Benchmark Oil Futures Contracts during periods in which the prices of the Benchmark Oil Futures Contracts are flat or declining as well as when the prices are rising.

USL is not actively managed by conventional methods. Accordingly, if USL's investments in Oil Interests are declining in value, USL will not close out such positions except in connection with paying the proceeds to an Authorized Participant upon the redemption of a basket or closing out futures positions in connection with the monthly change in the Benchmark Oil Futures Contracts. USCF will seek to cause the NAV of USL's shares to track the Benchmark Oil Futures Contracts during periods in which its price is flat or declining as well as when the price is rising.

The NYSE Arca may halt trading in USL's shares, which would adversely impact an investor's ability to sell shares.

USL's shares are listed for trading on the NYSE Arca under the market symbol "USL." Trading in shares may be halted due to market conditions or, in light of NYSE Arca rules and procedures, for reasons that, in the view of the NYSE Arca, make trading in shares inadvisable. In addition, trading is subject to trading halts caused by extraordinary market volatility pursuant to "circuit breaker" rules that require trading to be halted for a specified period based on a specified market decline. Additionally, there can be no assurance that the requirements necessary to maintain the listing of USL's shares will continue to be met or will remain unchanged.

The liquidity of the shares may also be affected by the withdrawal from participation of Authorized Participants, which could adversely affect the market price of the shares.

In the event that one or more Authorized Participants which have substantial interests in the shares withdraw from participation, the liquidity of the shares will likely decrease, which could adversely affect the market price of the shares and result in investors incurring a loss on their investment.

Shareholders that are not Authorized Participants may only purchase or sell their shares in secondary trading markets, and the conditions associated with trading in secondary markets may adversely affect investors' investment in the shares.

Only Authorized Participants may directly purchase from or redeem shares from USL in Creation Baskets or Redemption Baskets. All other investors that desire to purchase or sell shares must do so through the NYSE Arca or in other markets, if any, in which the shares may be traded. Shares may trade at a premium or discount to NAV per share.

The lack of an active trading market for USL's shares may result in losses on an investor's investment in USL at the time the investor sells the shares.

Although USL's shares are listed and traded on the NYSE Arca, there can be no guarantee that an active trading market for the shares will be maintained. If an investor needs to sell shares at a time when no active trading market for them exists, the price the investor receives upon sale of the shares, assuming they were able to be sold, likely would be lower than if an active market existed.

Limited partners and shareholders do not participate in the management of USL and do not control USCF, so they do not have any influence over basic matters that affect USL.

The limited partners and shareholders take no part in the management or control, and have a minimal voice in USL's operations or business. Limited partners and shareholders must therefore rely upon the duties and judgment of USCF to manage USL's affairs. Limited partners and shareholders have no right to elect USCF on an annual or any other continuing basis. If USCF voluntarily withdraws, however, the holders of a majority of USL's outstanding shares (excluding for purposes of such determination shares owned, if any, by the withdrawing general partner and its affiliates) may elect its successor. USCF may not be removed as general partner except upon approval by the affirmative vote of the holders of at least 66 2/3 percent of USL's outstanding shares (excluding shares, if any, owned by USCF and its affiliates), subject to the satisfaction of certain conditions set forth in the LP Agreement.

Limited partners may have limited liability in certain circumstances, including potentially having liability for the return of wrongful distributions.

Under Delaware law, a limited partner might be held liable for USL's obligations as if it were a general partner if the limited partner participates in the control of the partnership's business and the persons who transact business with the partnership think the limited partner is the general partner.

A limited partner will not be liable for assessments in addition to its initial capital investment in any of USL's shares. However, a limited partner may be required to repay to USL any amounts wrongfully returned or distributed to it under some circumstances. Under Delaware law, USL may not make a distribution to limited partners if the distribution causes USL's liabilities (other than liabilities to partners on account of their partnership interests and nonrecourse liabilities) to exceed the fair value of USL's assets. Delaware law provides that a limited partner who receives such a distribution and knew at the time of the distribution that the distribution violated the law will be liable to the limited partnership for the amount of the distribution for three years from the date of the distribution.

The LLC Agreement provides limited authority to the Non-Management Directors, and any Director of USCF may be removed by USCF's parent company, which is wholly owned by Concierge, a controlled public company where the majority of shares are owned by Nicholas Gerber along with certain other family members and certain other shareholders.

USCF's Board of Directors (the "Board") currently consists of four Management Directors, each of whom are also executive officers or employees of USCF ("Management Directors"), and three Non-Management Directors, each of whom are considered independent for purposes of applicable NYSE Arca and Securities and Exchange Commission ("SEC") rules. Under USCF's Sixth Amended and Restated Limited Liability Company Agreement, dated as of May 15, 2015 (as amended from time to time), the ("LLC Agreement"), the Non-Management Directors have only such authority as the Management Directors expressly confer upon them, which means that the Non-Management Directors may have less authority to control the actions of the Management Directors than is typically the case with the independent members of a company's Board. In addition, any Director may be removed by written consent of Wainwright Holdings, Inc. ("Wainwright"), which is the sole member of USCF. The sole shareholder of Wainwright is Concierge Technologies Inc., a company publicly traded under the ticker symbol "CNCG" ("Concierge"). Mr. Nicholas Gerber along with certain family members and certain other shareholders, own the majority of the shares in Concierge, which is the sole shareholder of Wainwright, the sole member of USCF. Accordingly, although USCF is governed by the Board, which consists of both Management Directors and Non-Management Directors, pursuant to the LLC Agreement, it is possible for Mr. Gerber to exercise his indirect control of Wainwright to effect the removal of any Director (including the Non-Management Directors which comprise the Audit Committee) and to replace that Director with another Director. Having control in one person could have a negative impact on USCF and USL, including their regulatory obligations.

There is a risk that USL will not earn trading gains sufficient to compensate for the fees and expenses that it must pay and as such USL may not earn any profit.

USL pays brokerage charges of approximately 0.02% of average total net assets based on brokerage fees of \$3.50 per buy or sell, management fees of 0.60% of NAV on its average net assets, and OTC spreads and extraordinary expenses (e.g., subsequent offering expenses, other expenses not in the ordinary course of business, including the indemnification of any person against liabilities and obligations to the extent permitted by law and required under the LP Agreement and under agreements entered into by USCF on USL's behalf and the bringing and defending of actions at law or in equity and otherwise engaging in the conduct of litigation and the incurring of legal expenses and the

settlement of claims and litigation) that cannot be quantified.

These fees and expenses must be paid in all cases regardless of whether USL's activities are profitable. Accordingly, USL must earn trading gains sufficient to compensate for these fees and expenses before it can earn any profit.

Regulation of the commodity interests and energy markets is extensive and constantly changing; future regulatory developments are impossible to predict but may significantly and adversely affect USL.

The futures markets are subject to comprehensive statutes, regulations, and margin requirements. In addition, the CFTC and futures exchanges are authorized to take extraordinary actions in the event of a market emergency, including, for example, the retroactive implementation of speculative position limits or higher margin requirements, the establishment of daily price limits and the suspension of trading. Regulation of commodity interest transactions in the United States is a rapidly changing area of law and is subject to ongoing modification by governmental and judicial action. Considerable regulatory attention has been focused on non-traditional investment pools that are publicly distributed in the United States. In addition, various national governments outside of the United States have expressed concern regarding the disruptive effects of speculative trading in the energy markets and the need to regulate the derivatives markets in general. The effect of any future regulatory change on USL is impossible to predict, but it could be substantial and adverse.

An investment in USL may provide little or no diversification benefits. Thus, in a declining market, USL may have no gains to offset losses from other investments, and an investor may suffer losses on an investment in USL while incurring losses with respect to other asset classes.

Historically, Oil Futures Contracts and Other Oil-Related Investments have generally been non-correlated to the performance of other asset classes such as stocks and bonds. Non-correlation means that there is a low statistically valid relationship between the performance of futures and other commodity interest transactions, on the one hand, and stocks or bonds, on the other hand.

However, there can be no assurance that such non-correlation will continue during future periods. If, contrary to historic patterns, USL's performance were to move in the same general direction as the financial markets, investors will obtain little or no diversification benefits from an investment in USL's shares. In such a case, USL may have no gains to offset losses from other investments, and investors may suffer losses on their investment in USL at the same time they incur losses with respect to other investments.

Variables such as drought, floods, weather, embargoes, tariffs and other political events may have a larger impact on crude oil prices and crude oil-linked instruments, including Oil Futures Contracts and Other Oil-Related Investments, than on traditional securities. These additional variables may create additional investment risks that subject USL's investments to greater volatility than investments in traditional securities.

Non-correlation should not be confused with negative correlation, where the performance of two asset classes would be opposite of each other. There is no historical evidence that the spot price of crude oil and prices of other financial assets, such as stocks and bonds, are negatively correlated. In the absence of negative correlation, USL cannot be expected to be automatically profitable during unfavorable periods for the stock market, or vice versa.

USL is not a registered investment company so shareholders do not have the protections of the 1940 Act.

USL is not an investment company subject to the Investment Company Act of 1940 ("1940 Act"). Accordingly, investors do not have the protections afforded by that statute, which, for example, requires investment companies to have a majority of disinterested directors and regulates the relationship between the investment company and its investment manager.

Trading in international markets could expose USL to credit and regulatory risk.

USL invests primarily in Oil Futures Contracts, a significant portion of which are traded on United States exchanges, including the NYMEX. However, a portion of USL's trades may take place on markets and exchanges outside the United States. Some non-U.S. markets present risks because they are not subject to the same degree of regulation as their U.S. counterparts. Trading on such non-U.S. markets or exchanges presents risks because they are not subject to the same degree of regulation as their U.S. counterparts, including potentially different or diminished investor protections. In trading contracts denominated in currencies other than U.S. dollars, USL is subject to the risk of adverse exchange-rate movements between the dollar and the functional currencies of such contracts. Additionally, trading on non-U.S. exchanges is subject to the risks presented by exchange controls, expropriation, increased tax burdens and exposure to local economic declines and political instability. An adverse development with respect to any of these variables could reduce the profit or increase the loss earned on trades in the affected international markets.

USL and USCF may have conflicts of interest, which may permit them to favor their own interests to the detriment of shareholders.

USL is subject to actual and potential inherent conflicts involving USCF, various commodity futures brokers and Authorized Participants. USCF's officers, directors and employees do not devote their time exclusively to USL and are also directors, officers or employees of other entities that may compete with USL for their services. They could have a conflict between their responsibilities to USL and to those other entities. As a result of these and other relationships, parties involved with USL have a financial incentive to act in a manner other than in the best interests of USL and the shareholders. USCF has not established any formal procedure to resolve conflicts of interest. Consequently, investors are dependent on the good faith of the respective parties subject to such conflicts of interest to resolve them equitably. Although USCF attempts to monitor these conflicts, it is extremely difficult, if not impossible, for USCF to ensure that these conflicts do not, in fact, result in adverse consequences to the shareholders.

USL may also be subject to certain conflicts with respect to the futures commission merchant ("FCM"), including, but not limited to, conflicts that result from receiving greater amounts of compensation from other clients, or purchasing opposite or competing positions on behalf of third party accounts traded through the FCM. In addition, USCF's principals, officers, directors or employees may trade futures and related contracts for their own account. A conflict of interest may exist if their trades are in the same markets and at the same time as USL trades using the clearing broker to be used by USL. A potential conflict also may occur if USCF's principals, officers, directors or employees trade their accounts more aggressively or take positions in their accounts which are opposite, or ahead of, the positions taken by USL.

USL could terminate at any time and cause the liquidation and potential loss of an investor's investment and could upset the overall maturity and timing of an investor's investment portfolio.

USL may terminate at any time, regardless of whether USL has incurred losses, subject to the terms of the LP Agreement. In particular, unforeseen circumstances, including the adjudication of incompetence, bankruptcy, dissolution, or removal of USCF as the general partner of USL, could cause USL to terminate unless a majority interest of the limited partners within 90 days of the event elects to continue the partnership and appoints a successor general partner, or the affirmative vote of a majority in interest of the limited partners subject to certain conditions. However, no level of losses will require USCF to terminate USL. USL's termination would cause the liquidation and potential loss of an investor's investment. Termination could also negatively affect the overall maturity and timing of an investor's investment portfolio.

USL does not expect to make cash distributions.

USL has not previously made any cash distributions and intends to reinvest any realized gains in additional Oil Interests rather than distributing cash to limited partners or other shareholders. Therefore, unlike mutual funds, commodity pools or other investment pools that actively manage their investments in an attempt to realize income and gains from their investing activities and distribute such income and gains to their investors, USL generally does not expect to distribute cash to limited partners. An investor should not invest in USL if the investor will need cash distributions from USL to pay taxes on its share of income and gains of USL, if any, or for any other reason. Nonetheless, although USL does not intend to make cash distributions, the income earned from its investments held directly or posted as margin may reach levels that merit distribution, *e.g.*, at levels where such income is not necessary to support its underlying investments in Oil Interests and investors adversely react to being taxed on such income without receiving distributions that could be used to pay such tax. If this income becomes significant then cash distributions may be made.

An unanticipated number of redemption requests during a short period of time could have an adverse effect on USL's NAV.

If a substantial number of requests for redemption of Redemption Baskets are received by USL during a relatively short period of time, USL may not be able to satisfy the requests from USL's assets not committed to trading. As a consequence, it could be necessary to liquidate positions in USL's trading positions before the time that the trading strategies would otherwise dictate liquidation.

Money Market Reform

The SEC adopted amendments to Rule 2a-7 under the 1940 Act, which became effective in 2016, to reform money market funds ("MMFs"). While the new rule applies only to MMFs, it may indirectly affect institutional investors such as USL. A portion of USL's assets that are not used for margin or collateral in the Oil Futures Contracts currently are invested in government MMFs. USL does not hold any non-government MMFs and, particularly in light of recent changes to the rule governing the operation of MMFs, does not anticipate investing in any non-government MMFs. However, if USL invests in other types of MMFs besides government MMFs in the future, USL could be negatively impacted by investing in an MMF that does not maintain a stable \$1.00 NAV or that has the potential to impose redemption fees and gates (temporary suspension of redemptions).

The failure or bankruptcy of a clearing broker could result in a substantial loss of USL's assets and could impair USL in its ability to execute trades.

In the event of the bankruptcy of a clearing broker or an exchange's clearing house, USL could be exposed to a risk of loss with respect to its assets that are posted as margin. If such a bankruptcy were to occur, USL would be afforded the protections granted to customers of an FCM, and participants to transactions cleared through a clearing house, under the United States Bankruptcy Code and applicable CFTC regulations. Such provisions generally provide for a pro rata distribution to customers of customer property held by the bankrupt FCM or an exchange's clearing house if the customer property held by the FCM or the exchange's clearing house is insufficient to satisfy all customer claims. In any case, there can be no assurance that these protections will be effective in allowing USL to recover all, or even any, of the amounts it has deposited as margin.

Bankruptcy of a clearing FCM can be caused by, among other things, the default of one of the FCM's customers. In this event, the exchange's clearing house is permitted to use the entire amount of margin posted by USL (as well as margin posted by other customers of the FCM) to cover the amounts owed by the bankrupt FCM. Consequently, USL could be unable to recover amounts due to it on its futures positions, including assets posted as margin, and could sustain substantial losses.

CFTC regulations impose several requirements on FCMs that are designed to protect customers, including mandating certain customer protections, risk management programs, internal monitoring and controls, capital and liquidity standards, customer disclosures and auditing and examination programs. There can be no assurance these regulations will prevent losses to, or not materially adversely affect, USL or its investors.

Notwithstanding that USL could sustain losses upon the failure or bankruptcy of its FCM, the majority of USL's assets are held in Treasuries, cash and/or cash equivalents with Brown Brothers Harriman & Co. (the "Custodian") and would not be impacted by the bankruptcy of an FCM.

Notwithstanding that USL could sustain losses upon the failure or bankruptcy of its FCM, the majority of USL's assets are held in Treasuries, cash and/or cash equivalents with Brown Brothers Harriman & Co. (the "Custodian") and would not be impacted by the bankruptcy of an FCM.

The failure or bankruptcy of USL's Custodian could result in a substantial loss of USL's assets.

The majority of USL's assets are held in Treasuries, cash and/or cash equivalents with the Custodian. The failure or insolvency of the Custodian could result in a complete loss of USL's assets held by the Custodian, which, at any given time, would likely comprise a substantial portion of USL's total assets.

Third parties may infringe upon or otherwise violate intellectual property rights or assert that USCF has infringed or otherwise violated their intellectual property rights, which may result in significant costs and diverted attention.

It is possible that third parties might utilize USL's intellectual property or technology, including the use of its business methods, trademarks and trading program software, without permission. USCF has a patent for USL's business method and has registered its trademarks. USL does not currently have any proprietary software. However, if it obtains proprietary software in the future, any unauthorized use of USL's proprietary software and other technology could also adversely affect its competitive advantage. USL may not have adequate resources to implement procedures for monitoring unauthorized uses of its patents, trademarks, proprietary software and other technology. Also, third parties may independently develop business methods, trademarks or proprietary software and other technology similar to that of USCF or claim that USCF has violated their intellectual property rights, including their copyrights, trademark rights, trade names, trade secrets and patent rights. As a result, USCF may have to litigate in the future to protect its trade secrets, determine the validity and scope of other parties' proprietary rights, defend itself against claims that it has infringed or otherwise violated other parties' rights, or defend itself against claims that its rights are invalid. Any litigation of this type, even if USCF is successful and regardless of the merits, may result in significant costs, divert its resources from USL, or require it to change its proprietary software and other technology or enter into royalty or licensing agreements.

Due to the increased use of technologies, intentional and unintentional cyber-attacks pose operational and information security risks.

With the increased use of technologies such as the internet and the dependence on computer systems to perform necessary business functions, USL is susceptible to operational and information security risks. In general, cyber incidents can result from deliberate attacks or unintentional events. Cyber-attacks include, but are not limited to, gaining unauthorized access to digital systems for purposes of misappropriating assets or sensitive information, corrupting data, or causing operational disruption. Cyber-attacks may also be carried out in a manner that does not require gaining unauthorized access, such as causing denial-of-service attacks on websites. Cyber security failures or breaches of USL's clearing broker or third party service provider (including, but not limited to, index providers, the administrator and transfer agent, the custodian), have the ability to cause disruptions and impact business operations, potentially resulting in financial losses, the inability of USL shareholders to transact business, violations of applicable

privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, and/or additional compliance costs.

In addition, substantial costs may be incurred in order to prevent any cyber incidents in the future. USL and its shareholders could be negatively impacted as a result. While USL has established business continuity plans, there are inherent limitations in such plans.

ADDITIONAL INFORMATION ABOUT USL, ITS INVESTMENT OBJECTIVE AND INVESTMENTS

USL is a Delaware limited partnership organized on June 27, 2007. It operates pursuant to the terms of the Third Amended and Restated Agreement of Limited Partnership dated as of December 15, 2017 (as amended from time to time, the “LP Agreement”), which grants full management control of USL to USCF. USL maintains its main business office at 1999 Harrison Street, Suite 1530, Oakland, CA 94612.

The net assets of USL consist primarily of investments in Oil Futures Contracts and, to a lesser extent, in order to comply with regulatory requirements or in view of market conditions, Other Oil-Related Investments. Market conditions that USCF currently anticipates could cause USL to invest in Other Oil-Related Investments include those allowing USL to obtain greater liquidity or to execute transactions with more favorable pricing.

USL invests substantially the entire amount of its assets in Oil Futures Contracts while supporting such investments by holding the amounts of its margin, collateral and other requirements relating to these obligations in short-term obligations of the United States of two years or less (“Treasuries”), cash and cash equivalents. The daily holdings of USL are available on USL’s website at www.uscfinvestments.com.

USL invests in Oil Interests to the fullest extent possible without being leveraged or unable to satisfy its current or potential margin or collateral obligations with respect to its investments in Oil Interests. In pursuing this objective, the primary focus of USCF, is the investment in Oil Futures Contracts and the management of USL’s investments in Treasuries, cash and/or cash equivalents for margining purposes and as collateral.

USL seeks to invest in a combination of Oil Interests such that the daily changes in its NAV, measured in percentage terms, will closely track the daily changes in the price of the Benchmark Oil Futures Contracts, also measured in percentage terms. As a specific benchmark, USCF endeavors to place USL’s trades in Oil Interests and otherwise manage USL’s investments so that “A” will be within plus/ minus ten percent (10%) of “B”, where:

A is the average daily percentage change in USL’s per share NAV for any period of 30 successive valuation days; *i.e.*, any NYSE Arca trading day as of which USL calculates its per share NAV; and

B is the average daily percentage change in the average of the prices of the Benchmark Oil Futures Contracts over the same period.

USCF believes that market arbitrage opportunities will cause the daily changes in USL’s share price on the NYSE Arca to closely track the daily changes in USL’s NAV per share. USCF further believes that the daily changes in USL’s NAV in percentage terms will closely track the daily changes in percentage terms in the average price of the Benchmark Oil Futures Contracts, less USL’s expenses.

The following two graphs demonstrate the correlation between the changes in USL’s NAV and the changes in the Benchmark Oil Futures Contract. The first graph exhibits the daily changes in the last 30 valuation days ended December 31, 2017. The second graph measures monthly changes from December 11, 2012 through December 31, 2017.

****PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE RESULTS***

****PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE RESULTS***

USCF employs a “neutral” investment strategy in order to track changes in the average prices of the Benchmark Oil Futures Contracts regardless of whether these prices go up or go down. USL’s “neutral” investment strategy is designed to permit investors generally to purchase and sell USL’s shares for the purpose of investing indirectly in crude oil in a cost-effective manner, and/or to permit participants in the oil or other industries to hedge the risk of losses in their crude oil-related transactions. Accordingly, depending on the investment objective of an individual investor, the risks generally associated with investing in crude oil and/or the risks involved in hedging may exist. In addition, an investment in USL involves the risk that the daily changes in the price of USL’s shares, in percentage terms, will not accurately track the daily changes in the average prices of the Benchmark Oil Futures Contracts, in percentage terms, and that daily changes in the Benchmark Oil Futures Contracts, in percentage terms, will not closely correlate with daily changes in the spot prices of light, sweet crude oil, in percentage terms.

An alternative tracking measurement of the return performance of USL versus the return of its Benchmark Oil Futures Contracts can be calculated by comparing the actual average of the prices of its return of USL, measured by changes in its per share NAV, versus the expected changes in its per share NAV under the assumption that USL's returns had been exactly the same as the daily changes in its Benchmark Oil Futures Contracts.

For the year ended December 31, 2017, the actual total return of USL as measured by changes in its per share NAV was 3.24%. This is based on an initial per share NAV of \$20.39 as of December 31, 2016 and an ending per share NAV as of December 31, 2017 of \$21.05. During this time period, USL made no distributions to its shareholders. However, if USL's daily changes in its per share NAV had instead exactly tracked the changes in the daily total return of the Benchmark Oil Futures Contracts, USL would have had an estimated per share NAV of \$21.06 as of December 31, 2017, for a total return over the relevant time period of 3.29%. The difference between the actual per share NAV total return of USL of 3.24% and the expected total return based on the Benchmark Oil Futures Contracts of 3.29% was an error over the time period of (0.05)%, which is to say that USL's actual total return underperformed the benchmark result by that percentage. USL incurs expenses primarily composed of the management fee, brokerage commissions for the buying and selling of futures contracts, and other expenses. The impact of these expenses, offset by interest and dividend income, and net of positive or negative execution, tends to cause daily changes in the per share NAV of USL to track slightly lower than daily changes in the price of the Benchmark Oil Futures Contracts.

Impact of Contango and Backwardation on Total Returns

Several factors determine the total return from investing in futures contracts. One factor arises from "rolling" futures contracts that will expire at the end of the current month (the "near" or "front" month contract) forward each month prior to expiration. For a strategy that entails holding the near month contract, the price relationship between that futures contract and the next month futures contract will impact returns. For example, if the price of the near month futures contract is higher than the next futures month contract (a situation referred to as "backwardation"), then absent any other change, the price of a next month futures contract tends to rise in value as it becomes the near month futures contract and approaches expiration. Conversely, if the price of a near month futures contract is lower than the next month futures contract (a situation referred to as "contango"), then absent any other change, the price of a next month futures contract tends to decline in value as it becomes the near month futures contract and approaches expiration.

As an example, assume that the price of crude oil for immediate delivery, is \$50 per barrel, and the value of a position in the near month futures contract is also \$50. Over time, the price of crude oil will fluctuate based on a number of market factors, including demand for oil relative to supply. The value of the near month futures contract will likewise fluctuate in reaction to a number of market factors. If an investor seeks to maintain a position in a near month futures contract and not take delivery of physical barrels of crude oil, the investor must sell the current near month futures contract as it approaches expiration and invest in the next month futures contract. In order to continue holding a position in the current near month futures contract, this "roll" forward of the futures contract must be executed every month.

Contango and backwardation are natural market forces that have impacted the total return on an investment in USL's shares during the past year relative to a hypothetical direct investment in crude oil. In the future, it is likely that the relationship between the market price of USL's shares and changes in the spot prices of light, sweet crude oil will continue to be impacted by contango and backwardation. It is important to note that this comparison ignores the potential costs associated with physically owning and storing crude oil, which could be substantial.

If the futures market is in backwardation, e.g., when the price of the near month futures contract is higher than the price of the next month futures contract, the investor would buy a next month futures contract for a lower price than the current near month futures contract. Assuming the price of the next month futures contract was \$49 per barrel, or 2% cheaper than the \$50 near month futures contract, then, hypothetically, and assuming no other changes (e.g., to

either prevailing crude oil prices or the price relationship between the spot price, the near month contract and the next month contract, and, ignoring the impact of commission costs and the income earned on cash and/or cash equivalents), the value of the \$49 next month futures contract would rise to \$50 as it approaches expiration. In this example, the value of an investment in the next month futures contract would tend to outperform the spot price of crude oil. As a result, it would be possible for the new near month futures contract to rise 12% while the spot price of crude oil may have risen a lower amount, e.g., only 10%. Similarly, the spot price of crude oil could have fallen 10% while the value of an investment in the futures contract might have fallen another amount, e.g., only 8%. Over time, if backwardation remained constant, this difference between the spot price and the futures contract price would continue to increase.

If the futures market is in contango, an investor would be buying a next month futures contract for a higher price than the current near month futures contract. Again, assuming the near month futures contract is \$50 per barrel, the price of the next month futures contract might be \$51 per barrel, or 2% more expensive than the front month futures contract. Hypothetically, and assuming no other changes, the value of the \$51 next month futures contract would fall to \$50 as it approaches expiration. In this example, the value of an investment in the second month would tend to underperform the spot price of crude oil. As a result, it would be possible for the new near month futures contract to rise only 10% while the spot price of crude oil may have risen a higher amount, e.g., 12%. Similarly, the spot price of crude oil could have fallen 10% while the value of an investment in the second month futures contract might have fallen another amount, e.g., 12%. Over time, if contango remained constant, this difference between the spot price and the futures contract price would continue to increase.

The chart below compares the daily price of the near month crude oil futures contract to the price of 13th month crude oil futures contract (i.e. a contract one year forward) over the last 10 years. When the price of the near month futures contract is higher than the price of the 13th month futures contract, the market would be described as being in backwardation. When the price of the near month futures contract is lower than the 13th month futures contract, the market would be described as being in contango. Although the price of the near month futures contract and the price of the 13th month futures contract tend to move together, it can be seen that at times the near month futures contract prices are higher than the 13th month futures contract prices (backwardation) and, at other times, the near month futures contract prices are lower than the 13th month futures contract prices (contango).

***PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE RESULTS**

An alternative way to view the same data is to subtract the dollar price of the 13th month crude oil futures contract from the dollar price of the near month crude oil futures contract, as shown in the chart below. When the difference is positive, the market is in backwardation. When the difference is negative, the market is in contango. The crude oil market spent time in both backwardation and contango during the last ten years.

***PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE RESULTS**

An investment in a portfolio that owned only the near month crude oil futures contract would likely produce a different result than an investment in a portfolio that owned an equal number of each of the near 12 months' of crude oil futures contracts. Generally speaking, when the crude oil futures market is in backwardation, a portfolio of only the near month crude oil futures contract may tend to have a higher total return than a portfolio of 12 months' of the crude oil futures contract. Conversely, if the crude oil futures market was in contango, the portfolio containing only 12 months' of crude oil futures contracts may tend to outperform the portfolio holding only the near month crude oil futures contract.

Historically, the crude oil futures markets have experienced periods of contango and backwardation, with backwardation being in place roughly as often as contango since oil futures trading started in 1982. Following the global financial crisis in the fourth quarter of 2008, the crude oil market moved into contango and remained in contango for a period of several years. During parts of 2009, the level of contango was unusually steep as a combination of slack U.S. and global demand for crude oil and issues involving the physical transportation and storage of crude oil at Cushing, Oklahoma, the primary pricing point for oil traded in the U.S., led to unusually high inventories of crude oil. A combination of improved transportation and storage capacity, along with growing demand for crude oil globally, moderated the inventory build-up and led to reduced levels of contango by 2011. However, at the end of November, 2014, global crude oil inventories grew rapidly after OPEC decided to defend its market share against U.S. shale-oil producers, resulting in another period during which the crude oil market remained primarily in contango, sometimes steep contango. This period of contango continued through December 31, 2017. In addition, the crude oil markets are expected to remain in contango until U.S. and global oil inventories decline significantly. If OPEC's recent cuts in oil production have their intended effect on the crude oil market then such a decline may occur in 2018.

USCF believes that holding futures contracts whose expiration dates are spread out over a 12 month period of time will cause the total return of such a portfolio to vary compared to a portfolio that holds only a single month's contract (such as the near month contract). In particular, USCF believes that the total return of a portfolio holding contracts with a range of expiration months will be impacted differently by the price relationship between different contract months of the same commodity future compared to the total return of a portfolio consisting of the near month contract. USCF believes that based on historical evidence a portfolio that held futures contracts with a range of expiration dates spread out over a 12 month period of time would typically be impacted less by the positive effect of backwardation, and less by the negative effect of contango, compared to a portfolio that held contracts of a single near month. As a result, absent the impact of any other factors, a portfolio of 12 different monthly contracts would tend to have a lower total return than a near month only portfolio in a backwardation market and a higher total return in a contango market. However there can be no assurance that such historical relationships would provide the same or similar results in the future.

Periods of contango or backwardation do not materially impact USL's investment objective of having the daily percentage changes in its per share NAV track the daily percentage changes in the average of the prices of the Benchmark Oil Futures Contracts since the impact of backwardation and contango tend to equally impact the daily percentage changes in price of both USL's shares and the Benchmark Oil Futures Contracts. It is impossible to predict with any degree of certainty whether backwardation or contango will occur in the future. It is likely that both conditions will occur during different periods.

In managing USL's assets USCF does not use a technical trading system that issues buy and sell orders. USCF instead employs a quantitative methodology whereby each time a Creation Basket is sold, USCF purchases Oil Interests, such as the Benchmark Oil Futures Contracts, that have an aggregate market value that approximates the amount of Treasuries and/or cash received upon the issuance of the Creation Basket.

The specific Oil Futures Contracts purchased depend on various factors, including a judgment by USCF as to the appropriate diversification of USL's investments in futures contracts with respect to the month of expiration, and the prevailing price volatility of particular contracts. In addition, USL may make use of a mixture of standard sized futures contracts as well as the smaller sized "mini" contracts. While USCF has made significant investments in NYMEX Oil Futures Contracts, for various reasons, including the ability to enter into the precise amount of exposure to the crude oil market, position limits or other regulatory requirements limiting USL's holdings, and market conditions, it may invest in Futures Contracts traded on other exchanges or invest in Other Oil-Related Investments. To the extent that USL invests in Other Oil-Related Investments, it would prioritize investments in contracts and instruments that are economically equivalent to the Benchmark Oil Futures Contracts, including cleared swaps that satisfy such criteria, and then, to a lesser extent, it would invest in other types of cleared swaps and other contracts, instruments and non-cleared swaps, such as swaps in the over-the-counter market (or commonly referred to as the "OTC market"). If USL is required by law or regulation, or by one of its regulators, including a futures exchange, to reduce its position in the Futures Contracts to the applicable position limit or to a specified accountability level or if market conditions dictate it would be more appropriate to invest in Other Oil-Related Investments, a substantial portion of USL's assets could be invested in accordance with such priority in Other Oil-Related Investments that are intended to replicate the return on the Futures Contracts. As USL's assets reach higher levels, it is more likely to exceed position limits, accountability levels or other regulatory limits and, as a result, it is more likely that it will invest in accordance with such priority in Other Oil-Related Investments at such higher levels. In addition, market conditions that USCF currently anticipates could cause USL to invest in Other Oil-Related Investments include those allowing USL to obtain greater liquidity or to execute transactions with more favorable pricing. See "Risk Factors Involved With an Investment in USL" for a discussion of the potential impact of the regulation on USL's ability to invest in OTC transactions and cleared swaps.

USCF may not be able to fully invest USL's assets in the Oil Futures Contracts having an aggregate notional amount exactly equal to USL's NAV. For example, as standardized contracts, the Futures Contracts are for a specified amount of a particular commodity, and USL's NAV and the proceeds from the sale of a Creation Basket are unlikely to be an exact multiple of the amounts of those contracts. As a result, in such circumstances, USL may be better able to achieve the exact amount of exposure to changes in price of the Benchmark Oil

Futures Contracts through the use of Other Oil-Related Investments, such as OTC contracts that have better correlation with changes in price of the Benchmark Oil Futures Contracts.

USL anticipates that to the extent it invests in Oil Futures Contracts other than contracts on light, sweet crude oil (such as futures contracts for diesel-heating oil, natural gas, and other petroleum-based fuels) and Other Oil-Related Investments, it will enter into various non-exchange-traded derivative contracts to hedge the short-term price movements of such Oil Futures Contracts and Other Oil-Related Investments against the current Benchmark Oil Futures Contracts.

USCF does not anticipate letting USL's Oil Futures Contracts expire and taking delivery of the underlying commodity. Instead, USCF closes existing positions, e.g., when it changes the Benchmark Oil Futures Contracts or Other Oil-Related Investments or it otherwise determines it would be appropriate to do so and reinvests the proceeds in new Oil Futures Contracts or Other Oil-Related Investments. Positions may also be closed out to meet orders for Redemption Baskets and in such case proceeds for such baskets will not be reinvested.

The Benchmark Oil Futures Contracts are changed from the near month contract to expire and the 11 following months to the next month contract to expire and the 11 following months during one day each month. On that day, USCF "rolls" USL's positions by closing, or selling, USL's Oil Interests and reinvests the proceeds from closing these positions in new Oil Interests.

The anticipated dates on which the Benchmark Oil Futures Contracts are changed and USL's Oil Interests are "rolled" will be posted on USL's website at www.uscfinvestments.com, and are subject to change without notice.

By remaining invested as fully as possible in Oil Futures Contracts or Other Oil-Related Investments, USCF believes that the changes in percentage terms in USL's per share NAV will continue to closely track the daily changes in percentage terms in the average of the prices of the price of the Benchmark Oil Futures Contracts. USCF believes that certain arbitrage opportunities result in the price of the shares traded on the NYSE Arca closely tracking the per share NAV of USL. Additionally, Oil Futures Contracts traded on the NYMEX have closely tracked the spot price of light, sweet crude oil. Based on these expected interrelationships, USCF believes that the changes in the price of USL's shares traded on the NYSE Arca have closely tracked on a daily basis and will continue to closely track the changes in the spot price of light, sweet crude oil, on a percentage basis.

What are the Trading Policies of USL?

Investment Objective

The investment objective of USL is for the daily changes in percentage terms of its per share net asset value ("NAV") to reflect the daily changes in percentage terms of the spot price of light, sweet crude oil delivered to Cushing, Oklahoma, as measured by the daily changes in the average of the prices of specified short-term futures contracts on light, sweet crude oil called the "Benchmark Oil Futures Contracts," plus interest earned on USL's collateral holdings, less USL's expenses. The Benchmark Oil Futures Contracts are the futures contracts on light, sweet crude oil as traded on the New York Mercantile Exchange (the "NYMEX") that is the near month contract to expire, and the contracts for the following 11 months, for a total of 12 consecutive months' contracts, except when the near month contract is within two weeks of expiration, in which case it will be measured by the futures contract that is the next month contract to expire and the contracts for the following 11 consecutive months. When calculating the daily movement of the average price of the 12 contracts, each contract month is equally weighted.

Liquidity

USL invests only in Futures Contracts and Other Oil-Related Investments that, in the opinion of USCF, are traded in sufficient volume to permit the ready taking and liquidation of positions in these financial interests and in Other Oil-Related Investments that, in the opinion of USCF, may be readily liquidated with the original counterparty or through a third party assuming the position of USL.

Spot Commodities

While the Oil Futures Contracts traded can be physically settled, USL does not intend to take or make physical delivery. USL may from time to time trade in Other Oil-Related Investments, including contracts based on the spot price of crude oil.

Leverage

USCF endeavors to have the value of USL's Treasuries, cash and cash equivalents, whether held by USL or posted as margin or other collateral, at all times approximate the aggregate market value of its obligations under its Oil Interests. Commodity pools' trading positions in futures contracts or other related investments are typically required to be secured by the deposit of margin funds that represent only a small percentage of a futures contract's (or other commodity interest's) entire market value. While USCF has not and does not intend to leverage USL's assets, it is not prohibited from doing so under the LP Agreement.

Borrowings

Borrowings are not used by USL unless USL is required to borrow money in the event of physical delivery, if USL trades in cash commodities, or for short-term needs created by unexpected redemptions.

OTC Derivatives (Including Spreads and Straddles)

In addition to Oil Futures Contracts, there are also a number of listed options on the Oil Futures Contracts on the principal futures exchanges. These contracts offer investors and hedgers another set of financial vehicles to use in managing exposure to the crude oil market. Consequently, USL may purchase options on crude Oil Futures Contracts on these exchanges in pursuing its investment objective.

In addition to the Oil Futures Contracts and options on the Oil Futures Contracts, there also exists an active non-exchange-traded market in derivatives tied to crude oil. These derivatives transactions (also known as OTC contracts) are usually entered into between two parties in private contracts. Unlike most of the exchange-traded Oil Futures Contracts or exchange-traded options on the Oil Futures Contracts, each party to such contract bears the credit risk of the other party, *i.e.*, the risk that the other party may not be able to perform its obligations under its contract. To reduce the credit risk that arises in connection with such contracts, USL will generally enter into an agreement with each counterparty based on the Master Agreement published by the International Swaps and Derivatives Association, Inc. (“ISDA”) that provides for the netting of its overall exposure to its counterparty.

USCF assesses or reviews, as appropriate, the creditworthiness of each potential or existing counterparty to an OTC contract pursuant to guidelines approved by the Board.

USL may enter into certain transactions where an OTC component is exchanged for a corresponding futures contract (“Exchange for Related Position” or “EFRP” transactions). In the most common type of EFRP transaction entered into by USL, the OTC component is the purchase or sale of one or more baskets of USL shares. These EFRP transactions may expose USL to counterparty risk during the interim period between the execution of the OTC component and the exchange for a corresponding futures contract. Generally, the counterparty risk from the EFRP transaction will exist only on the day of execution.

USL may employ spreads or straddles in its trading to mitigate the differences in its investment portfolio and its goal of tracking the price of the Benchmark Oil Futures Contract. USL would use a spread when it chooses to take simultaneous long and short positions in futures written on the same underlying asset, but with different delivery months.

During all of 2017 and through February 28, 2018, USL limited its derivatives activities to Oil Futures Contracts and EFRP transactions. USL did not engage in trading in futures contracts listed on a foreign exchange or forward contracts, including options on such contracts. USL does not anticipate engaging in trading in futures contracts listed on a foreign exchange, forward contracts or options on such contracts, but it may do so as outlined in USL’s listing exemptive order or as permitted under current regulations.

Pyramiding

USL has not and will not employ the technique, commonly known as pyramiding, in which the speculator uses unrealized profits on existing positions as variation margin for the purchase or sale of additional positions in the same or another commodity interest.

Prior Performance of USL

***PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE RESULTS**

USCF manages USL which is a commodity pool that issues shares traded on the NYSE Arca. The chart below shows, as of February 28, 2018, the number of Authorized Participants, the total number of baskets created and redeemed since inception and the number of outstanding shares for USL.

# of Authorized Participants	Baskets Purchased	Baskets Redeemed	Outstanding Shares
10	351	-310	3,900,000
22			

Since the commencement of the offering of USL shares to the public on December 6, 2007 to February 28, 2018, the simple average daily change in the Benchmark Oil Futures Contracts was (0.011)%, while the simple average daily change in the per share NAV of USL over the same time period was (0.013)%. The average daily difference was (0.002)% (or (0.2) basis points, where 1 basis point equals 1/100 of 1%). As a percentage of the daily movement of the Benchmark Oil Futures Contracts, the average error in daily tracking by the per share NAV was (0.769)%, meaning that over this time period USL's tracking error was within the plus or minus 10% range established as its benchmark tracking goal.

The table below shows the relationship between the trading prices of the shares and the daily NAV of USL, since inception through February 28, 2018. The first row shows the average amount of the variation between USL's closing market price and NAV, computed on a daily basis since inception, while the second and third rows depict the maximum daily amount of the end of day premiums and discounts to NAV since inception, on a percentage basis. USCF believes that maximum and minimum end of day premiums and discounts typically occur because trading in the shares continues on the NYSE Arca until 4:00 p.m. New York time while regular trading in the Benchmark Futures Contracts on the NYMEX ceases at 2:30 p.m. New York time and the value of the relevant Benchmark Futures Contracts, for purposes of determining its end of day NAV, can be determined at that time.

	USL
Average Difference	\$(0.03)
Max Premium %	11.13 %
Max Discount %	(9.72)%

For more information on the performance of USL, see the Performance Tables below.

Annual Rate of Return	7.59 %	(37.2)%	(36.07)%	19.94 %	3.24 %	1.19 **

* The monthly rate of return is calculated by dividing the ending NAV of a given month by the ending NAV of the previous month, subtracting 1 and multiplying this number by 100 to arrive at a percentage increase or decrease.

**Through February 28, 2018.

Draw-down: Losses experienced by the fund over a specified period. Draw-down is measured on the basis of monthly returns only and does not reflect intra-month figures.

Worst Monthly Percentage Draw-down: The largest single month loss sustained during the most recent five calendar years and year-to-date.

Worst Peak-to-Valley Draw-down: The largest percentage decline in the NAV per share over the history of the fund. This need not be a continuous decline, but can be a series of positive and negative returns where the negative returns are larger than the positive returns. Worst Peak-to-Valley Draw-down represents the greatest cumulative percentage decline in month-end per share NAV is not equaled or exceeded by a subsequent month-end per share NAV.

USL'S OPERATIONS

USCF and its Management and Traders

USCF is a single member limited liability company that was formed in the state of Delaware on May 10, 2005. USCF maintains its main business office at 1999 Harrison Street, Suite 1530, Oakland, California 94612. USCF is a wholly-owned subsidiary of Wainwright Holdings, Inc., a Delaware corporation ("Wainwright"), which is an intermediate holding company that owns USCF and another advisor of exchange traded funds and mutual funds. Wainwright is a wholly owned subsidiary of Concierge Technologies, Inc. (publicly traded under the ticker CNCG) ("Concierge"), a publicly traded holding company that owns various financial and non-financial businesses. Mr. Nicholas Gerber (discussed below), along with certain family members and certain other shareholders, owns the majority of the shares in Concierge. Wainwright is a holding company that currently holds both USCF, as well as USCF Advisers LLC, an investment adviser registered under the Investment Advisers Act of 1940, as amended. USCF Advisers LLC serves as the investment adviser for the USCF SummerHaven SHPEN Index Fund ("BUYN"), the USCF SummerHaven SHPEI Index Fund ("BUY"), each a series of the USCF ETF Trust, as well as the USCF Commodity Strategy Fund, a series of the USCF Mutual Funds Trust. USCF ETF Trust and USCF Mutual Funds Trust are registered under the 1940 Act. USCF Advisers LLC was also the investment adviser for the Stock Split Index Fund ("TOFR") and the USCF Restaurant Leaders Fund ("MENU"), each a series of the USCF ETF Trust, until October 2017 when both funds liquidated all of their assets and distributed cash pro rata to all remaining shareholders. The Board of Trustees for the USCF ETF Trust and USCF Mutual Funds Trust consist of different independent trustees than those independent directors who serve on the Board of Directors of USCF. USCF is a member of the National Futures Association (the "NFA") and registered as a commodity pool operator ("CPO") with the Commodity Futures Trading Commission (the "CFTC") on December 1, 2005 and as a swaps firm on August 8, 2013.

USCF serves as general partner of USL. USCF also serves as the general partner of the United States Natural Gas Fund, LP ("UNG"), the United States Short Oil Fund, LP ("DNO"), the United States Gasoline Fund, LP ("UGA"), the United States Diesel-Heating Oil Fund, LP ("UHN"), the United States Oil Fund, LP ("USO"), the United States 12 Month Natural Gas Fund, LP ("UNL") and the United States Brent Oil Fund, LP ("BNO"). USCF is also the sponsor of the United States Commodity Index Fund ("USCI"), the United States Copper Index Fund ("CPER"), the United States Agriculture Index Fund ("USAG"), and the USCF Canadian Crude Oil Index Fund ("UCCO"), each a series of the United States Commodity Index Funds Trust. UCCO is currently in registration and has not commenced operations.

In addition, USCF is the sponsor of the USCF Funds Trust, a Delaware Statutory Trust, and two of its series: the United States 3x Oil Fund (“USOU”) and the United States 3x Short Oil Fund (“USOD”), which commenced operations on July 20, 2017.

All funds listed previously, other than UCCO, are referred to collectively herein as the “Related Public Funds.”

The Related Public Funds are subject to reporting requirements under the Securities Exchange Act of 1934, as amended (“Exchange Act”) and, if registered under the 1940 Act, a Related Public Fund also must comply with the reporting requirements under the 1940 Act. For more information about each of the Related Public Funds, investors in USL may call 1-800-920-0259 or visit www.uscfinvestments.com or the Securities and Exchange Commission’s (the “SEC”) website at www.sec.gov.

USCF is required to evaluate the credit risk of USL to the FCM, oversee the purchase and sale of USL's shares by certain authorized participants ("Authorized Participants"), review daily positions and margin requirements of USL and manage USL's investments. USCF also pays the fees of ALPS Distributors, Inc., which serves as the marketing agent for USL (the "Marketing Agent"), and Brown Brothers Harriman & Co. ("BBH&Co."), which serves as the administrator (the "Administrator") and the custodian (the "Custodian") for USL. In no event may the aggregate compensation paid for the Marketing Agent and any affiliate of USCF for distribution-related services in connection with the offering of shares exceed ten percent (10%) of the gross proceeds of this offering.

The limited partners take no part in the management or control, and have a minimal voice in USL's operations or business. Limited partners have no right to elect USCF on an annual or any other continuing basis. If USCF voluntarily withdraws, however, the holders of a majority of USL's outstanding shares (excluding for purposes of such determination shares owned, if any, by the withdrawing general partner and its affiliates) may elect its successor. USCF may not be removed as general partner except upon approval by the affirmative vote of the holders of at least 66 2/3 percent of USL's outstanding shares (excluding shares, if any, owned by USCF and its affiliates), subject to the satisfaction of certain conditions set forth in the LP Agreement.

The business and affairs of USCF are managed by the Board, which is comprised of the Management Directors, each of whom is also an executive officers and employee of USCF, and three independent directors who meet the independent director requirements established by the NYSE Arca Equities Rules and the Sarbanes-Oxley Act of 2002. The Management Directors have the authority to manage USCF pursuant to the terms of the LLC Agreement. Through its Management Directors, USCF manages the day-to-day operations of USL. The Board has an audit committee, which is made up of the three independent directors (Gordon L. Ellis, Malcolm R. Fobes III and Peter M. Robinson,). The audit committee is governed by an audit committee charter that is posted on USL's website at www.uscfinvestments.com. The Board has determined that each member of the audit committee meets the financial literacy requirements of the NYSE Arca and the audit committee charter. The Board has further determined that each of Messrs. Ellis and Fobes have accounting or related financial management expertise, as required by the NYSE Arca, such that each of them is considered an "Audit Committee Finance Expert" as such term is defined in Item 407(d)(5) of Regulation S-K.

USL has no executive officers. Pursuant to the terms of the LP Agreement, USL's affairs are managed by USCF.

The following are individual Principals, as that term is defined in CFTC Rule 3.1, for USCF: John P. Love, Stuart P. Crumbaugh, Nicholas D. Gerber, Melinda D. Gerber, Andrew Ngim, Robert Nguyen, Peter Robinson, Scott Schoenberger, Gordon Ellis, Malcolm Fobes, Ray Allen, Kevin Baum, Carolyn Yu, and Wainwright Holdings Inc. The individuals who are Principals due to their positions are John P. Love, Stuart P. Crumbaugh, Nicholas D. Gerber, Andrew Ngim, Robert Nguyen, Peter Robinson, Gordon Ellis, Malcolm Fobes, Ray Allen, Kevin Baum and Carolyn Yu. In addition, Wainwright is a Principal because it is the sole member of USCF. None of the Principals owns or has any other beneficial interest in USL. Ray Allen and Andrew Ngim make trading and investment decisions for USL. Andrew Ngim and Ray Allen direct the execution of trades on behalf of USL. In addition, Nicholas D. Gerber, John P. Love, Robert Nguyen, Ray Allen, Kevin Baum, Kathryn Rooney, Maya Lowry, and Ryan Katz are registered with the CFTC as Associated Persons of USCF and are NFA Associate Members. John P. Love, Robert Nguyen, Ray Allen, Kevin Baum, Kathryn Rooney, Maya Lowry, and Ryan Katz are also registered with the CFTC as Swaps Associated Persons.

Ray W. Allen, 61, Portfolio Manager of USCF since January 2008. Mr. Allen was the portfolio manager of: (1) UGA from February 2008 until March 2010, and then portfolio manager since May 2015, (2) UHN from April 2008 until March 2010, and then portfolio manager since May 2015, (3) UNL from November 2009 until March 2010, and then portfolio manager since May 2015. In addition, he has been the portfolio manager of: (1) DNO since September 2009,

(2) USO and USL since March 2010, (3) BNO since June 2010, (4) UNG since May 2015, and (5) USOU and USOD since July 2017. Mr. Allen also has served as the portfolio manager of the USCF Commodity Strategy Fund, a series of USCF Mutual Funds Trust, since October 2017. Mr. Allen has been a principal of USCF listed with the CFTC and NFA since March 2009 and has been registered as an associated person of USCF since July 2015 and from March 2008 to November 2012. Additionally, Mr. Allen has been approved as an NFA swaps associated person of USCF since July 2015. As of February 2017, he also is an associated person and swap associated person of USCF Advisers LLC. USCF Advisers LLC, an affiliate of USCF, is an investment adviser registered under the Investment Advisers Act of 1940, and, as of February 2017, is registered as a commodity pool operator, NFA member and swap firm. Mr. Allen earned a B.A. in Economics from the University of California at Berkeley and holds an NFA Series 3 registration.

Kevin A. Baum, 47, has served as a Portfolio Manager of USCF since March 2016 and as the Chief Investment Officer of USCF since September 1, 2016. Prior to joining USCF, Mr. Baum temporarily retired from December 2015 to March 2016. Mr. Baum served as the Vice President and Senior Portfolio Manager for Invesco PowerShares Capital Management LLC, an investment manager that manages a family of exchange-traded funds, from October 2014 through December 2015. Mr. Baum was temporarily retired from May 2012 through September 2014. From May 1993 to April 2012, Mr. Baum worked as the Senior Portfolio Manager, Head of Commodities for OppenheimerFunds, Inc., a global asset manager. Mr. Baum has been an NFA member since March 2016 and a principal, swap associated person, and associated person of USCF since April 2016 and, as of January 2017, a branch manager of USCF. As of February 2017, he also is an associated person, swap associated person, and branch manager of USCF Advisers LLC. USCF Advisers LLC, an affiliate of USCF, is an investment adviser registered under the Investment Advisers Act of 1940, and, as of February 2017, is registered as a commodity pool operator, NFA member and swap firm. Mr. Baum is a CFA Charterholder, CAIA Charterholder, and earned a B.B.A. in Finance from Texas Tech University.

Stuart P. Crumbaugh, 54, Chief Financial Officer, Secretary and Treasurer of USCF since May 2015 and also the Chief Financial Officer of Concierge Technologies, Inc., the parent of Wainwright Holdings, Inc. (“Wainwright”) since December 2017. In addition, Mr. Crumbaugh has served as a director of Wainwright, the parent and sole member of USCF, since December 2016. Mr. Crumbaugh has been a principal of USCF listed with the CFTC and NFA since July 1, 2015 and, as of January 2017, he is a principal of USCF Advisers LLC. USCF Advisers LLC, an affiliate of USCF, is an investment adviser registered under the Investment Advisers Act of 1940, and, as of February 2017, is registered as a commodity pool operator, NFA member and swap firm. Since June 2015, Mr. Crumbaugh has been the Treasurer and Secretary of USCF Advisers LLC. He also serves as a Management Trustee of USCF ETF Trust from May 2015 to present and as Management Trustee of the USCF Mutual Funds Trust from October 2016 to present. Mr. Crumbaugh joined USCF as the Assistant Chief Financial Officer on April 6, 2015. Prior to joining USCF, Mr. Crumbaugh was the Vice President Finance and Chief Financial Officer of Sikka Software Corporation, a software service healthcare company providing optimization software and data solutions from April 2014 to April 6, 2015. Mr. Crumbaugh served as a consultant providing technical accounting, IPO readiness and M&A consulting services to various early stage companies with the Connor Group, a technical accounting consulting firm, for the periods of January 2014 through March 2014; October 2012 through November 2012; and January 2011 through February 2011. From December 2012 through December 2013, Mr. Crumbaugh was Vice President, Corporate Controller and Treasurer of Auction.com, LLC, a residential and commercial real estate online auction company. From March 2011 through September 2012, Mr. Crumbaugh was Chief Financial Officer of IP Infusion Inc., a technology company providing network routing and switching software enabling software-defined networking solutions for major mobile carriers and network infrastructure providers. Mr. Crumbaugh earned a B.A. in Accounting and Business Administration from Michigan State University in 1987 and is a Certified Public Accountant – Michigan (inactive).

Nicholas D. Gerber, 55, Chairman of the Board of Directors of USCF since June 2005. Mr. Gerber also served as President and Chief Executive Officer of USCF from June 2005 through June 2015 and Vice President since June 2015. Mr. Gerber co-founded USCF in 2005 and prior to that, he co-founded Ameristock Corporation in March 1995, a California-based investment adviser registered under the Investment Advisers Act of 1940 from March 1995 until January 2013. From January 26, 2015 to the present, Mr. Gerber is also the Chief Executive Officer, President and Secretary of Concierge Technologies, Inc. (“Concierge”), which is a company publicly traded under the ticker symbol “CNGC.” Concierge is the sole shareholder of Wainwright. From August 1995 to January 2013, Mr. Gerber served as Portfolio Manager of Ameristock Mutual Fund, Inc. On January 11, 2013, the Ameristock Mutual Fund, Inc. merged with and into the Drexel Hamilton Centre American Equity Fund, a series of Drexel Hamilton Mutual Funds. Drexel Hamilton Mutual Funds is not affiliated with Ameristock Corporation, the Ameristock Mutual Fund, Inc. or USCF. From the period June 2014 to the present, Mr. Gerber also serves as Chairman of the Board of Trustees of USCF ETF Trust, an investment company registered under the Investment Company Act of 1940, as amended, and has previously served as President of USCF Advisers LLC. From October 2016 to the present, Mr. Gerber also serves as Chairman of

the Board of Trustees of USCF Mutual Funds Trust, an investment company registered under the Investment Company Act of 1940, as amended. USCF Advisers LLC, an affiliate of USCF, is an investment adviser registered under the Investment Advisers Act of 1940, and, as of February 2017, is registered as a commodity pool operator, NFA member and swap firm. In addition to his role as Chairman of the Board of USCF ETF Trust, he also served as its President and Chief Executive Officer from June 2014 until December 2015. Mr. Gerber also has served USCF Advisers on the Board of Managers since June 2013 and as the Vice President since June 2015. In the above roles, Mr. Gerber has gained extensive experience in evaluating and retaining third-party service providers, including custodians, accountants, transfer agents, and distributors. Mr. Gerber has been a principal of USCF listed with the CFTC and NFA since November 2005, an NFA associate member and associated person of USCF since December 2005 and a Branch Manager of USCF since May 2009. Mr. Gerber is a principal of USCF Advisers LLC as of January 2017. Additionally, as of February 2017, he is an associated person, swap associated person, and branch manager of USCF Advisers LLC. Mr. Gerber earned an MBA degree in finance from the University of San Francisco, a B.A. from Skidmore College and holds an NFA Series 3 registration.

John P. Love, 46, President and Chief Executive Officer of USCF since June 2015 and Management Director of USCF since October 2016. Mr. Love previously served as a Senior Portfolio Manager for the Related Public Funds from March 2010 through June 2015. Prior to that, while still at USCF, he was a Portfolio Manager beginning with the launch of USO in April 2006. Mr. Love was the portfolio manager of USO from April 2006 until March 2010 and the portfolio manager for USL from December 2007 until March 2010. Mr. Love has been the portfolio manager of UNG since April 2007, and the portfolio manager of UGA, UHN, and UNL since March 2010. USCF Advisers LLC, an affiliate of USCF, is an investment adviser registered under the Investment Advisers Act of 1940, and, as of February 2017, is registered as a commodity pool operator, NFA member and swap firm. He also acted as co-portfolio manager of the Stock Split Index Fund, a series of the USCF ETF Trust for the period from September 2014 to December 2015, when he was promoted to the position of President and Chief Executive Officer upon Mr. Gerber's resignation from those positions. In addition, Mr. Love has served as on the Board of Managers of USCF Advisers LLC since November 2016 and as its President since June 2015. Mr. Love also is a director of Wainwright Holdings Inc., a position he has held since December 2016. Mr. Love has been a principal of USCF listed with the CFTC and NFA since January 17, 2006. Mr. Love has been registered as an associated person of USCF since February 2015 and from December 1, 2005 to April 16, 2009. Mr. Love has also been registered as a branch manager of USCF since March 2016. Additionally, Mr. Love has been approved as an NFA swaps associated person since February 2015. Mr. Love is a principal of USCF Advisers LLC as of January 2017. Additionally, as of February 2017, he is an associated person, swap associated person, and branch manager of USCF Advisers LLC. Mr. Love earned a B.A. from the University of Southern California, holds an NFA Series 3 and FINRA Series 7 registrations and is a CFA Charterholder.

Andrew F Ngim, 57, co-founded USCF in 2005 and has served as a Management Director since May 2005 and, since August 15, 2016, has served as the Chief Operating Officer of USCF. Mr. Ngim has served as the portfolio manager for USCI, CPER and USAG since January 2013. Mr. Ngim also served as USCF's Treasurer from June 2005 to February 2012. In addition, he has been on the Board of Managers and has served as the Assistant Secretary and Assistant Treasurer of USCF Advisers since its inception in June 2013. Prior to and concurrent with his services to USCF and USCF Advisers, from January 1999 to January 2013, Mr. Ngim served as a Managing Director for Ameristock Corporation, a California-based investment adviser, which he co-founded in March 1995, and was Co-Portfolio Manager of Ameristock Mutual Fund, Inc. from January 2000 to January 2013. Mr. Ngim also served as portfolio manager of (1) the Stock Split Index Fund from September 2014 to October 2017, and (2) the USCF Restaurant Leaders Fund from November 2016 to October 2017, both series of the USCF ETF Trust. From December 2017 to the present, Mr. Ngim also serves as the portfolio manager for the USCF SummerHaven SHPEI Index Fund and the USCF SummerHaven SHPEN Index Fund, both of which are series of the USCF ETF Trust. Mr. Ngim serves as a Management Trustee of the USCF ETF Trust from August 2014 to the present and as a Management Trustee for the USCF Mutual Funds Trust from October 2016 to present. Mr. Ngim has been a principal of USCF listed with the CFTC and NFA since November 2005 and a principal of USCF Advisers LLC since January 2017. USCF Advisers LLC, an affiliate of USCF, is an investment adviser registered under the Investment Advisers Act of 1940, and, as of February 2017, is registered as a commodity pool operator, NFA member and swap firm. Mr. Ngim earned his B.A. from the University of California at Berkeley.

Robert L. Nguyen, 58, Management Director and principal since July 2015. Mr. Nguyen served on the Board of Wainwright from December 2014 to December 2016. Mr. Nguyen co-founded USCF in 2005 and served as a Management Director until March 2012. Mr. Nguyen was an Investment Manager with Ribera Investment Management, an investment adviser registered under the Investment Advisers Act of 1940, from January 2013 to March 2015. Prior to and concurrent with his services to USCF, from January 2000 to January 2013, Mr. Nguyen served as a Managing Principal for Ameristock Corporation, a California-based investment adviser registered under the Investment Advisers Act of 1940, which he co-founded in March 1995. Mr. Nguyen was a principal of USCF listed with the CFTC and NFA from November 2005 through March 2012 and an associated person of USCF listed with the CFTC and NFA from November 2007 through March 2012. Mr. Nguyen has been a principal of USCF listed

with the CFTC and NFA since July 2015 and an associated person and a swap associated person of USCF listed with the CFTC and NFA since December 2015. As of February 2017, he also is an associated person and swap associated person of USCF Advisers LLC. USCF Advisers LLC, an affiliate of USCF, is an investment adviser registered under the Investment Advisers Act of 1940, and, as of February 2017, is registered as a commodity pool operator, NFA member and swap firm. Mr. Nguyen earned his B.S. from California State University at Sacramento, and holds NFA Series 3 and FINRA Series 7 registrations.

Carolyn M. Yu, 59, General Counsel and Chief Compliance Officer of USCF since May 2015 and February 2013, respectively, and from August 2011 through April 2015, Ms. Yu served as Assistant General Counsel. Since May 2015, Ms. Yu has served as Chief Legal Officer and Chief Compliance Officer of USCF Advisers LLC and USCF ETF Trust as well as Chief AML Officer of USCF ETF Trust. Prior to May 2015, Ms. Yu was the Assistant Chief Compliance Officer and AML Officer of the USCF ETF Trust. Previously, Ms. Yu served as Branch Chief with the Securities Enforcement Branch for the State of Hawaii, Department of Commerce and Consumer Affairs from February 2008 to August 2011. Since August 2013, in the case of USCF, and January 2017, in the case of USCF Advisers LLC, Ms. Yu has been a principal listed with the CFTC and NFA. USCF Advisers LLC, an affiliate of USCF, is an investment adviser registered under the Investment Advisers Act of 1940, and, as of February 2017, is registered as a commodity pool operator, NFA member and swap firm. Ms. Yu earned her JD from Golden Gate University School of Law and a B.S. in business administration from San Francisco State University.

Gordon L. Ellis, 71, Independent Director of USCF since September 2005. Previously, Mr. Ellis was a founder of International Absorbents, Inc., Director and Chairman since July 1985 and July 1988, respectively, and Chief Executive Officer and President since November 1996. He also served as Chairman of Absorption Corp., a wholly-owned subsidiary of International Absorbents, Inc., which is a leading developer and producer of environmentally friendly pet care and industrial products, from May July 1985 until July 2010 when it was sold to Kinderhook Industries, a private investment banking firm and remained as a director until March 2013 when Absorption Corp was sold again to J. Rettenmaier & Söhne Group, a German manufacturing firm. Concurrent with that, he founded and has served as Chairman from November 2010 to present of Lupaka Gold Corp., a firm that acquires, explores, develops, and evaluates gold mining properties in Peru, South America. Mr. Ellis has his Chartered Directors designation from The Director's College (a joint venture of McMaster University and The Conference Board of Canada). He has been a principal of USCF listed with the CFTC and NFA since November 2005. Mr. Ellis is an engineer and earned an MBA in international finance.

Malcolm R. Fobes III, 53, Independent Director of USCF and Chairman of USCF's audit committee since September 2005. He founded and is the Chairman and Chief Executive Officer of Berkshire Capital Holdings, Inc., a California-based investment adviser registered under the Investment Advisers Act of 1940 that has been sponsoring and providing portfolio management services to mutual funds since June 1997. Mr. Fobes serves as Chairman and President of The Berkshire Funds, a mutual fund investment company registered under the Investment Company Act of 1940. Since 1997, Mr. Fobes has also served as portfolio manager of the Berkshire Focus Fund, a mutual fund registered under the Investment Company Act of 1940, which concentrates its investments in the electronic technology industry. He was also contributing editor of *Start a Successful Mutual Fund: The Step-by-Step Reference Guide to Make It Happen* (JV Books, 1995). Mr. Fobes has been a principal of USCF listed with the CFTC and NFA since November 2005. He earned a B.S. in finance with a minor in economics from San Jose State University in California.

Peter M. Robinson, 60, Independent Director of USCF since September 2005. Mr. Robinson has been a Research Fellow since 1993 with the Hoover Institution, a public policy think tank located on the campus of Stanford University. He authored three books and has been published in the New York Times, Red Herring, and Forbes ASAP and is the editor of *Can Congress Be Fixed?: Five Essays on Congressional Reform* (Hoover Institution Press, 1995). Mr. Robinson has been a principal of USCF listed with the CFTC and NFA since December 2005. He earned an MBA from the Stanford University Graduate School of Business, graduated from Oxford University in 1982 after studying politics, philosophy, and economics and graduated summa cum laude from Dartmouth College in 1979.

USL's Service Providers

Custodian, Registrar, Transfer Agent and Administrator

In its capacity as the Custodian for USL, BBH&Co holds USL's Treasuries, cash and/or cash equivalents pursuant to a custodial agreement. BBH&Co. is also the registrar and transfer agent for the shares. In addition, in its capacity as Administrator for USL, BBH&Co. performs certain administrative and accounting services for USL and prepares certain SEC, NFA and CFTC reports on behalf of USL.

Currently, USCF pays BBH&Co. for its services, in the foregoing capacities, a minimum amount of \$75,000 annually for its custody, fund accounting and fund administration services rendered to USL and each of the Related Public Funds, as well as a \$20,000 annual fee for its transfer agency services. In addition, USCF pays BBH&Co. an asset-based charge of (a) 0.06% for the first \$500 million of the Related Public Funds' combined net assets, (b) 0.0465% for the Related Public Funds' combined net assets greater than \$500 million but less than \$1 billion, and (c) 0.035% once the Related Public Funds' combined net assets exceed \$1 billion. The annual minimum amount will not apply if the asset-based charge for all accounts in the aggregate exceeds \$75,000. USCF also pays transaction fees

ranging from \$7 to \$15 per transaction.

BBH&Co.'s principal business address is 50 Post Office Square, Boston, MA 02110. BBH&Co., a private bank founded in 1818, is neither a publicly held company nor insured by the Federal Deposit Insurance Corporation. BBH&Co. is authorized to conduct a commercial banking business in accordance with the provisions of Article IV of the New York State Banking Law, New York Banking Law §§160–181, and is subject to regulation, supervision, and examination by the New York State Department of Financial Services. BBH&Co. is also licensed to conduct a commercial banking business by the Commonwealths of Massachusetts and Pennsylvania and is subject to supervision and examination by the banking supervisors of those states.

28

Marketing Agent

USL also employs ALPS Distributors, Inc. (“ALPS Distributors”) as the Marketing Agent, which is further discussed under “What is the Plan of Distribution?” USCF pays the Marketing Agent an annual fee. In no event may the aggregate compensation paid to the Marketing Agent and any affiliate of USCF for distribution-related services in connection with the offering of shares exceed ten percent (10%) of the gross proceeds of the offering.

ALPS Distributors’ principal business address is 1290 Broadway, Suite 1100, Denver, CO 80203. ALPS Distributors is a broker-dealer registered with FINRA and a member of the Securities Investor Protection Corporation.

Relationship with Charles Schwab & Co., Inc.

USCF or the Marketing Agent, or an affiliate of USCF or the Marketing Agent, may directly or indirectly make cash payments to certain broker-dealers for participating in activities that are designed to make registered representatives and other professionals more knowledgeable about exchange-traded funds and exchange-traded products, including USL and the Related Public Funds, or for other activities, such as participation in marketing activities and presentations, educational training programs, conferences, the development of technology platforms and reporting systems. USCF and/or the Marketing Agent have, or may in the future have, arrangements to make payments, other than for the educational programs and marketing activities described above, to Charles Schwab & Co., Inc. (“Schwab”). Pursuant to the arrangement between USCF and Schwab, Schwab has agreed to promote certain exchange-traded funds and exchange-traded products to Schwab’s customers, which may include USL and certain of the Related Public Funds, and not to charge certain of its customers any commissions when those customers purchase or sell shares of participating exchange-traded funds and exchange-traded products. Payments to a broker-dealer or intermediary may create potential conflicts of interest between the broker-dealer or intermediary and its clients. These amounts, which may be significant, are paid by USCF and/or the Marketing Agent from their own resources and not from the assets of USL or the Related Public Funds.

Futures Commission Merchant

On October 8, 2013, USCF entered into a Futures and Cleared Derivatives Transactions Customer Account Agreement with RBC Capital Markets, LLC (“RBC Capital” or “RBC”) to serve as USL’s FCM. This agreement requires RBC Capital to provide services to USL, as of October 10, 2013, in connection with the purchase and sale of Oil Interests that may be purchased or sold by or through RBC Capital for USL’s account. USL pays RBC Capital commissions for executing and clearing trades on behalf of USL.

RBC Capital’s primary address is 3 World Financial Center 200 Vesey St. New York, New York 10281. RBC Capital is registered in the United States with FINRA as a broker-dealer and with the CFTC as an FCM. RBC Capital is a member of various U.S. futures and securities exchanges.

RBC Capital is a large broker dealer subject to many different complex legal and regulatory requirements. As a result, certain of RBC Capital’s regulators may from time to time conduct investigations, initiate enforcement proceedings and/or enter into settlements with RBC Capital with respect to issues raised in various investigations. RBC Capital complies fully with its regulators in all investigations being conducted and in all settlements it reaches. In addition, RBC Capital is and has been subject to a variety of civil legal claims in various jurisdictions, a variety of settlement agreements and a variety of orders, awards and judgments made against it by courts and tribunals, both in regard to such claims and investigations. RBC Capital complies fully with all settlements it reaches and all orders, awards and judgments made against it.

RBC Capital has been named as a defendant in various legal actions, including arbitrations, class actions and other litigation including those described below, arising in connection with its activities as a broker-dealer. Certain of the actual or threatened legal actions include claims for substantial compensatory and/or punitive damages or claims for indeterminate amounts of damages. RBC Capital is also involved, in other reviews, investigations and proceedings (both formal and informal) by governmental and self-regulatory agencies regarding RBC Capital's business, including among other matters, accounting and operational matters, certain of which may result in adverse judgments, settlements, fines, penalties, injunctions or other relief.

RBC Capital contests liability and/or the amount of damages as appropriate in each pending matter. In view of the inherent difficulty of predicting the outcome of such matters, particularly in cases where claimants seek substantial or indeterminate damages or where investigations and proceedings are in the early stages, RBC Capital cannot predict the loss or range of loss, if any, related to such matters; how or if such matters will be resolved; when they will ultimately be resolved; or what the eventual settlement, fine, penalty or other relief, if any, might be. Subject to the foregoing, RBC Capital believes, based on current knowledge and after consultation with counsel, that the outcome of such pending matters will not have a material adverse effect on the consolidated financial condition of RBC Capital.

On April 27, 2017, pursuant to an offer of settlement, a Panel of the Chicago Board of Trade Business Conduct Committee (“Panel”) found that RBC Capital engaged in EFRP transactions which failed to satisfy the Rules of the Chicago Board of Trade (the “Exchange”) in one or more ways. Specifically, the Panel found that RBC Capital traders entered into EFRP trades in which RBC Capital accounts were on both sides of the transactions. While the purpose of the transactions was to transfer positions between the RBC Capital accounts, the Panel found that the manner in which the trades occurred violated the Exchange’s prohibition on wash trades. The Panel found that RBC Capital thereby violated CBOT Rules 534 and (legacy) 538.B. and C. In accordance with the settlement offer, the Panel ordered RBC Capital to pay a \$175,000 fine.

On June 18, 2015, in connection with the Municipalities Continuing Disclosure Cooperation initiative of the SEC, the SEC commenced and settled an administrative proceeding against RBC Capital for willful violations of Sections 17(a)(2) of the Securities Act of 1933, as amended (“1933 Act”) after the firm self-reported instances in which it conducted inadequate due diligence in certain municipal securities offerings and as a result, failed to form a reasonable basis for believing the truthfulness of certain material representations in official statements issued in connection with those offerings. RBC Capital paid a fine of \$500,000.

RBC Capital and certain affiliates were named as defendants in a lawsuit relating to their role in transactions involving investments made by a number of Wisconsin school districts in certain collateralized debt obligations. These transactions were also the subject of a regulatory investigation, which was resolved in 2011. RBC Capital reached a final settlement with all parties in the civil litigation, and the civil action against RBC Capital was dismissed with prejudice on December 6, 2016.

On July 31, 2015, RBC Capital was added as a new defendant in a pending putative class action initially filed in November 2013 in the United States District Court for the Southern District of New York. The action is brought against multiple foreign exchange dealers and alleges collusive behavior, among other allegations, in foreign exchange trading. Various regulators are also conducting inquiries regarding potential violations of law by a number of banks and other entities, including RBC Capital, regarding foreign exchange trading. In September 2017, the U.S. District Court entered an order preliminarily approving a pending settlement with class plaintiffs. Canadian class actions and one other U.S. action that is purportedly brought on behalf of different classes of plaintiffs remain pending.

On April 13, 2015, RBC Capital’s affiliate, Royal Bank of Canada Trust Company (Bahamas) Limited (RBC Bahamas), was charged in France with complicity in tax fraud. RBC Bahamas believes that its actions did not violate French law and contested the charge in the French court. The trial of this matter has concluded and a verdict was delivered on January 12, 2017, acquitting the company and the other defendants. The French prosecutor’s office has appealed.

Thornburg Mortgage Inc. (now known as “TMST”) and RBC Capital were parties to a master repurchase agreement executed in September 2003 whereby TMST financed its purchase of residential mortgage-backed securities. Upon TMST’s default during the financial crisis, RBC Capital valued TMST’s collateral at allegedly deflated prices. After TMST’s bankruptcy filing, TMST’s trustee brought suit against RBC Capital in 2011 for breach of contract. In 2015,

TMST was awarded more than \$45 million in damages. RBC Capital has appealed. The appeals court set a briefing schedule and simultaneously ordered the parties to participate in a mediation. The parties have subsequently reached an agreement to settle the matter; a motion to approve the settlement was filed with the bankruptcy court on January 10, 2016 and granted on February 27, 2017.

On October 14, 2014, the Delaware Court of Chancery (the “Court of Chancery”) in a class action brought by former shareholders of Rural/Metro Corporation, held RBC Capital liable for aiding and abetting a breach of fiduciary duty by three Rural/Metro directors, but did not make an additional award for attorney’s fees. A final judgment was entered on February 19, 2015 in the amount of US\$93 million plus post judgment interest. RBC Capital appealed the Court of Chancery’s determination of liability and quantum of damages, and the plaintiffs cross-appealed the ruling on additional attorneys’ fees. On November 30, 2015, the Delaware Supreme Court affirmed the Court of Chancery with respect to both the appeal and cross-appeal. RBC Capital is cooperating with an investigation by the SEC relating to this matter. In particular, the SEC contended that RBC Capital caused materially false and misleading information to be included in the proxy statement that Rural filed to solicit shareholder approval for the sale in violation of section 14(A) of the Exchange Act and Rule 14A-9 thereunder. On August 31, 2016, RBC Capital was ordered by the SEC to cease and desist and paid \$500,000 in disgorgement, plus interest of \$77,759 and a civil penalty of \$2 million.

On March 11, 2013, the New Jersey Bureau of Securities entered a consent order settling an administrative complaint against RBC Capital, which alleged that RBC Capital failed to follow its own procedures with respect to monthly account reviews and failed to maintain copies of the monthly account reviews with respect to certain accounts that James Hankins Jr. maintained at the firm in violation of N.J.S.A. 49:3-58(a)(2)(xi) and 49:3-59(b). Without admitting or denying the findings of fact and conclusions of law, RBC Capital consented to a civil monetary penalty of \$150,000 (of which \$100,000 was suspended as a result of the firm's cooperation) and to pay disgorgement of \$300,000.

Please see RBC Capital's Form BD, which is available on the FINRA BrokerCheck program, for more details.

RBC Capital will act only as clearing broker for USL and as such will be paid commissions for executing and clearing trades on behalf of USL. RBC Capital has not passed upon the adequacy or accuracy of this prospectus. RBC Capital will not act in any supervisory capacity with respect to USCF or participate in the management of USCF or USL.

RBC Capital is not affiliated with USL or USCF. Therefore, neither USCF nor USL believes that there are any conflicts of interest with RBC Capital or its trading principals arising from its acting as USL's FCM.

Currently, USCF does not employ commodity trading advisors for the trading of USL contracts. USCF currently does, however, employ SummerHaven Investment Management, LLC as a trading Advisor for USCI, CPER and USAG. If, in the future, USCF does employ commodity trading advisors for USL, it will choose each advisor based on arm's-length negotiations and will consider the advisor's experience, fees and reputation.

USL's Fees and Expenses

This table describes the fees and expenses that you may pay if you buy and hold shares of USL. You should note that you may pay brokerage commissions on purchases and sales of USL's shares, which are not reflected in the table. Authorized Participants will pay applicable creation and redemption fees. See "Creation and Redemption of Shares-Creation and Redemption Transaction Fee," page 57.

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)⁽¹⁾

Management Fees	0.60 % ⁽²⁾
Distribution Fees	None
Other Fund Expenses	0.26 %
Total Annual Fund Expenses	0.86 %

Based on amounts for the year ended December 31, 2017. The individual expense amounts in dollar terms are shown in the table below. As used in this table, (i) Professional Expenses include expenses for legal, audit, tax accounting and printing; and (ii) Independent Director and Officer Expenses include amounts paid to independent directors and for officers' liability insurance.

Management Fees	\$646,339
Professional Expenses	\$236,426
Registration Fees	\$N/A
Brokerage commissions	\$17,897
Licensing fees	\$16,158
Independent Director and Officer Expenses	\$14,120

These amounts are based on USL's average total net assets, which are the sum of daily total net assets of USL divided by the number of calendar days in the year. For the year ended December 31, 2017, USL's average total net assets were \$107,723,119.

(2) USL is contractually obligated to pay USCF a management fee, which is paid monthly, equal to 0.60% per annum of average daily net assets.

31

Breakeven Analysis

The breakeven analysis below indicates the approximate dollar returns and percentage required for the redemption value of a hypothetical initial investment in a single share to equal the amount invested twelve months after the investment was made. For purposes of this breakeven analysis, an initial selling price of \$21.30 per share which equals the NAV per share at the close of trading on February 28, 2018, is assumed. In order for a hypothetical investment in shares to break even over the next 12 months, assuming a selling price of \$21.30 the investment would have to generate 0.042% return or \$0.009, rounded to \$0.01.

This breakeven analysis refers to the redemption of baskets by Authorized Participants and is not related to any gains an individual investor would have to achieve in order to break even. The breakeven analysis is an approximation only. As used in this table, (i) Professional Expenses include expenses for legal, audit, tax accounting and printing; and (ii) Independent Director and Officer Expenses include amounts paid to independent directors and for officers' liability insurance.

Assumed initial selling price per share	\$	21.30	
Management Fees (0.600%)(1)	\$	0.128	
Creation Basket Fee (0.010%)(2)	\$	(0.002)
Estimated Brokerage Fee (0.017%)(3)	\$	0.004	
Interest Income (0.816%)(4)	\$	(0.174)
Registration Fee (0.000)(5)	\$	—	
NYMEX Licensing Fee (0.015%)(6)	\$	0.003	
Independent Director and Officer Expenses (0.013%)(7)	\$	0.003	
Professional Expenses (0.219%)(8)	\$	0.047	
Amount of trading income (loss) required for the redemption value at the end of one year to equal the initial selling price of the share	\$	0.009	
Percentage of initial selling price per share		0.042	%

USL is contractually obligated to pay USCF a management fee of 0.600% per annum on its average total net assets. "Average total net assets" are the sum of the daily total net assets of USL (the NAV of USL calculated as set (1) forth in "Calculating Per Share NAV" beginning on page 53) divided by the number of calendar days in the year. On days when markets are closed, the daily total net assets are the daily total net assets from the last day when the market was open. See page 53 for a discussion of net assets of USL.

Authorized Participants are required to pay a Creation Basket fee of \$350 for each order they place to create one or more baskets. This breakeven analysis assumes a hypothetical investment in a single share, which would equal the (2) \$350 Creation Basket fee divided by the total number of outstanding shares plus the 50,000 shares created by the Creation Basket. This calculation will always result in a value that is below 0.010%, but for purposes of this breakeven analysis we assume a creation basket fee of 0.010%.

This amount is based on the actual brokerage fees for USL calculated on an annualized basis and includes an (3) estimated half-turn commission of \$3.50. A half-turn commission is the commissions liability related to FCM transaction fees for futures contracts on a half-turn basis.

USL earns interest on cash and cash equivalents held at the FCM and Custodian, treasuries, and money market (4) funds at an estimated interest rate of 0.816%. This is a blended rate based on the rate of interest earned on all of the foregoing as of December 31, 2017. The actual rate may vary.

USL pays fees to the SEC and FINRA to register its shares for sale. This amount is based on actual registration (5) fees for USL calculated on an annualized basis. This fee may vary in the future.

The NYMEX Licensing Fee is 0.015% on aggregate net assets of the Related Public Funds, except BNO, USCI, (6) USAG, CPER, USOU, and USOD. For more information see "USL's Fees and Expenses."

Independent Director and Officer Expenses include amounts paid to independent directors and for officers' liability (7) insurance. The foregoing assumes that the average total net assets of USL as of December 31, 2017, which were \$107,723,119, were aggregated with the average total net assets of the Related Public Funds as of December 31, 2017, that the aggregate fees paid to the independent directors for 2017 was \$536,375, and that the allocable portion of the fees borne by USL based on the proportion of its average total net assets when aggregated with the average total net assets of the Related Public Funds equals \$14,120.

Professional Expenses include expenses for legal, audit, tax accounting and printing. USL estimates the costs (8) attributable to Professional Expenses for 2017 is \$236,426. The number in the break-even table assumes USL had \$107,723,119 in average total net assets during the calendar year ended December 31, 2017.

Conflicts of Interest

There are present and potential future conflicts of interest in USL's structure and operation you should consider before you purchase shares. USCF will use this notice of conflicts as a defense against any claim or other proceeding made. If USCF is not able to resolve these conflicts of interest adequately, it may impact USL's and the Related Public Funds' ability to achieve their investment objectives.

USL and USCF may have inherent conflicts to the extent USCF attempts to maintain USL's asset size in order to preserve its fee income and this may not always be consistent with USL's objective of having the value of its share's NAV track changes in the average price of the Benchmark Oil Futures Contracts.

USCF's officers, directors and employees, do not devote their time exclusively to USL. These persons are directors, officers or employees of other entities which may compete with USL for their services. They could have a conflict between their responsibilities to USL and to those other entities.

USCF has adopted policies that prohibit their principals, officers, directors and employees from trading futures and related contracts in which either USL or any of the Related Public Funds invests. These policies are intended to prevent conflicts of interest occurring where USCF, or their principals, officers, directors or employees could give preferential treatment to their own accounts or trade their own accounts ahead of or against USL or any of the Related Public Funds.

USCF has sole current authority to manage the investments and operations of USL, and this may allow it to act in a way that furthers its own interests which may create a conflict with your best interests. Limited partners have limited voting control, which will limit their ability to influence matters such as amendment of the LP Agreement, change in USL's basic investment policy, dissolution of USL, or the sale or distribution of USL's assets.

USCF serves as general partner or sponsor to each of USL, the Related Public Funds, and UCCO. USCF may have a conflict to the extent that its trading decisions for USL may be influenced by the effect they would have on the other funds it manages. By way of example, if, as a result of reaching position limits imposed by the NYMEX, USL purchased gasoline futures contracts, this decision could impact USL's ability to purchase additional gasoline futures contracts if the number of contracts held by funds managed by USCF reached the maximum allowed by the NYMEX. Similar situations could adversely affect the ability of any fund to track its benchmark futures contract.

In addition, USCF is required to indemnify the officers and directors of the other funds, if the need for indemnification arises. This potential indemnification will cause USCF's assets to decrease. If USCF's other sources of income are not sufficient to compensate for the indemnification, then USCF may terminate and you could lose your investment.

Whenever a conflict of interest exists or arises between USCF on the one hand, and the partnership or any limited partner, on the other hand, any resolution or course of action by USCF in respect of such conflict of interest shall be permitted and deemed approved by all partners and shall not constitute a breach of the LP Agreement or of any other agreement or of any duty stated or implied by law or equity, if the resolution or course of action is, or by operation of the LP Agreement is deemed to be, fair and reasonable to the partnership. If a dispute arises, under the LP Agreement it will be resolved either through negotiations with USCF or by courts located in the State of Delaware.

Under the LP Agreement, any resolution is deemed to be fair and reasonable to the partnership if the resolution is:

- approved by the audit committee, although no party is obligated to seek approval and USCF may adopt a resolution or course of action that has not received approval;
- on terms no less favorable to the limited partners than those generally being provided to or available from unrelated third parties; or

fair to the limited partners, taking into account the totality of the relationships of the parties involved including other transactions that may be particularly favorable or advantageous to the limited partners.

The previous risk factors and conflicts of interest are complete as of the date of this prospectus; however, additional risks and conflicts may occur which are not presently foreseen by USCF. You may not construe this prospectus as legal or tax advice. Before making an investment in this fund, you should read this entire prospectus (which can be found on USL's website at www.uscfinvestments.com). You should also consult with your personal legal, tax, and other professional advisors.

Interests of Named Experts and Counsel

USCF has employed Eversheds Sutherland (US) LLP to prepare this prospectus. Neither the law firm nor any other expert hired by USL to give advice on the preparation of this offering document has been hired on a contingent fee basis. None of them have any present or future expectation of interest in USCF, Marketing Agent, Authorized Participants, Custodian, Administrator or other service providers to USL.

Ownership or Beneficial Interest in USL

As of February 28, 2018, no person owned more than five percent (5%) of the shares of USL. Also, as such date, USCF and the principals of USCF do not own any of the shares of USL.

USCF's Responsibilities and Remedies

Pursuant to the DRULPA ("Delaware Revised Uniform Limited Partnership Act"), parties may contractually modify or even eliminate fiduciary duties in a limited partnership agreement to the limited partnership itself, or to another partner or person otherwise bound by the limited partnership agreement. Parties may not, however, eliminate the implied covenant of good faith and fair dealing. Where parties unambiguously provide for fiduciary duties in a limited partnership agreement, those expressed duties become the standard that courts will use to determine whether such duties were breached. For this reason, USL's limited partnership agreement does not explicitly provide for any fiduciary duties so that common law fiduciary duty principles will apply to measure USCF's conduct.

A prospective investor should be aware that USCF has a responsibility to limited partners of USL to exercise good faith and fairness in all dealings. The fiduciary responsibility of a general partner to limited partners is a developing and changing area of the law and limited partners who have questions concerning the duties of USCF should consult with their counsel. In the event that a limited partner of USL believes that USCF has violated its fiduciary duty to the limited partners, he may seek legal relief individually or on behalf of USL under applicable laws, including under DRULPA and under commodities laws, to recover damages from or require an accounting by USCF. Limited partners may also have the right, subject to applicable procedural and jurisdictional requirements, to bring class actions in federal court to enforce their rights under the federal securities laws and the rules and regulations promulgated thereunder by the SEC. Limited partners who have suffered losses in connection with the purchase or sale of the shares may be able to recover such losses from USCF where the losses result from a violation by USCF of the federal securities laws. State securities laws may also provide certain remedies to limited partners. Limited partners should be aware that performance by USCF of its fiduciary duty is measured by the terms of the LP Agreement as well as applicable law. Limited partners are afforded certain rights to institute reparations proceedings under the Commodity Exchange Act ("CEA") for violations of the CEA or of any rule, regulation or order of the CFTC by USCF.

Liability and Indemnification

Under the LP Agreement, neither a general partner nor any employee or other agent of USL nor any officer, director, stockholder, partner, employee or agent of a general partner (a "Protected Person") shall be liable to any partner or USL for any mistake of judgment or for any action or inaction taken, nor for any losses due to any mistake of judgment or to any action or inaction or to the negligence, dishonesty or bad faith of any officer, director, stockholder, partner, employee, agent of USL or any officer, director, stockholder, partner, employee or agent of such general partner,

provided that such officer, director, stockholder, partner, employee, or agent of the partner or officer, director, stockholder, partner, employee or agent of such general partner was selected, engaged or retained by such general partner with reasonable care, except with respect to any matter as to which such general partner shall have been finally adjudicated in any action, suit or other proceeding not to have acted in good faith in the reasonable belief that such Protected Person's action was in the best interests of USL and except that no Protected Person shall be relieved of any liability to which such Protected Person would otherwise be subject by reason of willful misfeasance, gross negligence or reckless disregard of the duties involved in the conduct of the Protected Person's office.

USL shall, to the fullest extent permitted by law, but only out of USL assets, indemnify and hold harmless a general partner and each officer, director, stockholder, partner, employee or agent thereof (including persons who serve at USL's request as directors, officers or trustees of another organization in which USL has an interest as a shareholder, creditor or otherwise) and their respective Legal Representatives and successors (hereinafter referred to as a "Covered Person") against all liabilities and expenses, including but not limited to amounts paid in satisfaction of judgments, in compromise or as fines and penalties, and counsel fees reasonably incurred by any Covered Person in connection with the defense or disposition of any action, suit or other proceedings, whether civil or criminal, before any court or administrative or legislative body, in which such Covered Person may be or may have been involved as a party or otherwise or with which such person may be or may have been threatened, while in office or thereafter, by reason of an alleged act or omission as a general partner or director or officer thereof, or by reason of its being or having been such a general partner, director or officer, except with respect to any matter as to which such Covered Person shall have been finally adjudicated in any such action, suit or other proceeding not to have acted in good faith in the reasonable belief that such Covered Person's action was in the best interest of USL, and except that no Covered Person shall be indemnified against any liability to USL or limited partners to which such Covered Person would otherwise be subject by reason of willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of such Covered Person's office. Expenses, including counsel fees so incurred by any such Covered Person, may be paid from time to time by USL in advance of the final disposition of any such action, suit or proceeding on the condition that the amounts so paid shall be repaid to USL if it is ultimately determined that the indemnification of such expenses is not authorized hereunder.

Meetings

Meetings of limited partners may be called by USCF and may be called by it upon the written request of limited partners holding at least 20% of the outstanding shares of USL. USCF shall deposit written notice to all limited partners of the meeting and the purpose of the meeting, which shall be held on a date not less than 30 nor more than 60 days after the date of mailing of such notice, at a reasonable time and place. USCF may also call a meeting upon not less than 20 and not more than 60 days prior notice.

Each limited partner appoints USCF and each of its authorized officers as its attorney-in-fact with full power and authority in its name, place and stead to execute, swear to, acknowledge, deliver, file and record all ballots, consents, approval waivers, certificates and other instruments necessary or appropriate, in the sole discretion of USCF, to make, evidence, give, confirm or ratify any vote, consent, approval, agreement or other action that is made or given by the partner of USL. However, when the LP Agreement establishes a percentage of the limited partners required to take any action, USCF may exercise such power of attorney made only after the necessary vote, consent or approval of the limited partners.

Termination Events

USL will dissolve at any time upon the happening of any of the following events:

The bankruptcy, dissolution, withdrawal, or removal of USCF, unless a majority in interest of the limited partners within 90 days after such event elects to continue USL and appoints a successor general partner; or
The affirmative vote of a majority in interest of the limited partners, provided that prior to or concurrently with such vote, there shall have been established procedures for the assumption of USL's obligations arising under any agreement to which USL is a party and which is still in force immediately prior to such vote regarding termination, and there shall have been an irrevocable appointment of an agent who shall be empowered to give and receive notices, reports and payments under such agreements, and hold and exercise such other powers as are necessary to permit all other parties to such agreements to deal with such agent as if the agent were the sole owner of USL's interest, which procedures are agreed to in writing by each of the other parties to such agreements.

Provisions of Law

According to applicable law, indemnification of USCF is payable only if USCF determined, in good faith, that the act, omission or conduct that gave rise to the claim for indemnification was in the best interest of USL and the act, omission or activity that was the basis for such loss, liability, damage, cost or expense was not the result of negligence or misconduct and such liability or loss was not the result of negligence or misconduct by USCF, and such indemnification or agreement to hold harmless is recoverable only out of the assets of USL and not from the members, individually.

Provisions of Federal and State Securities Laws

This offering is made pursuant to federal and state securities laws. The SEC and state securities agencies take the position that indemnification of USCF that arises out of an alleged violation of such laws is prohibited unless certain conditions are met.

Those conditions require that no indemnification of USCF or any underwriter for USL may be made in respect of any losses, liabilities or expenses arising from or out of an alleged violation of federal or state securities laws unless: (i) there has been a successful adjudication on the merits of each count involving alleged securities law violations as to the party seeking indemnification and the court approves the indemnification; (ii) such claim has been dismissed with prejudice on the merits by a court of competent jurisdiction as to the party seeking indemnification; or (iii) a court of competent jurisdiction approves a settlement of the claims against the party seeking indemnification and finds that indemnification of the settlement and related costs should be made, provided that, before seeking such approval, USCF or other indemnitee must apprise the court of the position held by regulatory agencies against such indemnification. These agencies are the SEC and the securities administrator of the State or States in which the plaintiffs claim they were offered or sold membership interests.

Provisions of the 1933 Act and NASAA Guidelines

Insofar as indemnification for liabilities arising under the 1933 Act may be permitted to USCF or its directors, officers, or persons controlling USL, USL has been informed that SEC and the various State administrators believe that such indemnification is against public policy as expressed in the 1933 Act and the North American Securities Administrators Association, Inc. (“NASAA”) commodity pool guidelines and is therefore unenforceable.

Books and Records

USL keeps its books of record and account at its office located at 1999 Harrison Street, Suite 1530, Oakland, CA 94612 or at the offices of the Administrator at its office located at 50 Post Office Square, Boston, Massachusetts, 02110, or such office, including of an administrative agent, as it may subsequently designate upon notice. These books and records are open to inspection by any person who establishes to USL’s satisfaction that such person is a limited partner upon reasonable advance notice at all reasonable times during the usual business hours of USL.

USL keeps a copy of USL’s LP Agreement on file in its office which is available for inspection on reasonable advance notice at all reasonable times during its usual business hours by any limited partner.

Statements, Filings, and Reports

At the end of each fiscal year, USL will furnish to banks, broker dealers and trust companies (“DTC Participants”) for distribution to each person who is a shareholder at the end of the fiscal year an annual report containing USL’s audited financial statements and other information about USL. USCF is responsible for the registration and qualification of the shares under the federal securities laws and federal commodities laws and any other securities and blue sky laws of the United States or any other jurisdiction as USCF may select. USCF is responsible for preparing all reports required by the SEC, NYSE Arca and the CFTC, but has entered into an agreement with the Administrator to prepare these reports as required by the SEC, CFTC and the NYSE Arca on USL’s behalf.

The financial statements of USL will be audited, as required by law and as may be directed by USCF, by an independent registered public accounting firm designated from time to time by USCF. The accountants report will be furnished by USL to shareholders upon request. USL will make such elections, file such tax returns, and prepare, disseminate and file such tax reports, as it is advised by its counsel or accountants are from time to time required by any applicable statute, rule or regulation.

Reports to Limited Partners

In addition to periodic reports filed with the SEC, including annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K, all of which can be accessed on the SEC’s website at www.sec.gov or on USL’s

website at www.uscfinvestments.com, USL, pursuant to the LP Agreement, will provide the following reports to limited partners in the manner prescribed below:

Annual Reports. Within 90 days after the end of each fiscal year, USCF shall cause to be delivered to each limited partner who was a limited partner at any time during the fiscal year, an annual report containing the following:

- financial statements of the partnership, including, without limitation, a balance sheet as of the end of the partnership's fiscal year and statements of income, partners' equity and changes in financial position, for such fiscal
- (i) year, which shall be prepared in accordance with accounting principles generally accepted in the United States of America consistently applied and shall be audited by a firm of independent certified public accountants registered with the Public Company Accounting Oversight Board,
- (ii) a general description of the activities of the partnership during the period covered by the report, and a report of any material transactions between the partnership and USCF or any of its affiliates, including fees or
- (iii) compensation paid by the partnership and the services performed by USCF or any such affiliate for such fees or compensation.

Quarterly Reports. Within 45 days after the end of each quarter of each fiscal year, USCF shall cause to be delivered to each limited partner who was a limited partner at any time during the quarter then ended, a quarterly report containing a balance sheet and statement of income for the period covered by the report, each of which may be unaudited but shall be certified by USCF as fairly presenting the financial position and results of operations of the partnership during the period covered by the report. The report shall also contain a description of any material event regarding the business of the partnership during the period covered by the report.

Monthly Reports. Within 30 days after the end of each month, USCF shall cause to be posted on its website and, upon request, to be delivered to each limited partner who was a limited partner at any time during the month then ended, a monthly report containing an account statement, which will include a statement of income (loss) and a statement of changes in NAV, for the prescribed period. In addition, the account statement will disclose any material business dealings between the partnership, USCF, commodity trading advisor (if any), FCM, or the principals thereof that previously have not been disclosed in this prospectus or any amendment thereto, other account statements or annual reports.

USL will provide information to its shareholders to the extent required by applicable SEC, CFTC, and NYSE Arca requirements. An issuer, such as USL, of exchange-traded securities may not always readily know the identities of the investors who own those securities. USL will post the same information that would otherwise be provided in USL's reports to limited partners described above including its monthly account statements, which will include, without limitation, USL's NAV, on USL's website www.uscfinvestments.com.

Fiscal Year

The fiscal year of USL is the calendar year. USCF may select an alternate fiscal year.

Governing Law; Consent to Delaware Jurisdiction

The rights of USCF, USL, DTC (as registered owner of USL's global certificate for shares) and the shareholders, are governed by the laws of the State of Delaware. USCF, USL and DTC and, by accepting shares, each DTC Participant and each shareholder, consent to the jurisdiction of the courts of the State of Delaware and any federal courts located in Delaware. Such consent is not required for any person to assert a claim of Delaware jurisdiction over USCF or USL.

Legal Matters

Litigation and Claims

Within the past 5 years of the date of this prospectus, there have been no material administrative, civil or criminal actions against USCF, USL, or any principal or affiliate of any of them. This includes any actions pending, on appeal, concluded, threatened, or otherwise known to them.

Legal Opinion

Eversheds Sutherland (US) LLP is counsel to advise USL and USCF with respect to the shares being offered hereby and has passed upon the validity of the shares being issued hereunder. Eversheds Sutherland (US) LLP has also provided USL with its opinion with respect to federal income tax matters addressed herein.

Experts

Spicer Jeffries LLP, an independent registered public accounting firm, has audited the effectiveness of USL's internal control over financial reporting and the statements of financial condition of USL as of December 31, 2017 and December 31, 2016, including the schedule of investments as of December 31, 2017 and 2016, and the related statements of operations, changes in partners' capital and cash flows for the years ended December 31, 2017, 2016 and 2015, that appear in the annual report on Form 10-K that is incorporated by reference. The financial statements and management's assessment of the internal control over financial reporting in the Form 10-K were included herein in reliance upon the reports of Spicer Jeffries LLP dated March 14, 2018, given on its authority of such firm as experts in accounting and auditing.

BPM LLP, an independent registered public accounting firm, has audited the statements of financial condition of United States Commodity Funds, LLC as of December 31, 2017 and December 31, 2016 that appear in the annual report on Form 10-K of USL that is incorporated by reference herein. Such financial statements are included in reliance upon the report of such firm, dated February 28, 2018, given their authority as experts in accounting and auditing.

U.S. Federal Income Tax Considerations

The following discussion summarizes the material U.S. federal income tax consequences of the purchase, ownership and disposition of shares in USL, and the U.S. federal income tax treatment of USL, as of the date hereof. This discussion is applicable to a beneficial owner of shares who purchases shares in the offering to which this prospectus relates, including a beneficial owner who purchases shares from an Authorized Participant. Except where noted otherwise, it deals only with shares held as capital assets and does not deal with special situations, such as those of dealers in securities or currencies, financial institutions, tax-exempt entities, insurance companies, persons holding shares as a part of a position in a “straddle” or as part of a “hedging,” “conversion” or other integrated transaction for federal income tax purposes, traders in securities or commodities that elect to use a mark-to-market method of accounting, or holders of shares whose “functional currency” is not the U.S. dollar. Furthermore, the discussion below is based upon the provisions of the Code, as amended, and regulations (“Treasury Regulations”), rulings and judicial decisions thereunder as of the date hereof, and such authorities may be repealed, revoked or modified so as to result in U.S. federal income tax consequences different from those discussed below.

Persons considering the purchase, ownership or disposition of shares should consult their own tax advisors concerning the United States federal income tax consequences in light of their particular situations as well as any consequences arising under the laws of any other taxing jurisdiction.

As used herein, a “U.S. shareholder” of a share means a beneficial owner of a share that is a U.S. person. A “U.S. person,” for United States federal income tax purposes, is (i) a citizen or resident of the United States, (ii) a corporation or partnership created or organized in or under the laws of the United States or any political subdivision thereof, (iii) an estate the income of which is subject to United States federal income taxation regardless of its source or (iv) a trust (X) that is subject to the supervision of a court within the United States and the control of one or more United States persons as described in section 7701(a)(30) of the Code or (Y) that has a valid election in effect under applicable Treasury Regulations to be treated as a United States person. A “non-U.S. shareholder” is a holder that is not a U.S. shareholder and a “non-U.S. person” is an individual or entity that is not a U.S. person. If a partnership holds our shares, the tax treatment of a partner will generally depend upon the status of the partner and the activities of the partnership. If you are a partner of a partnership holding our shares, you should consult your own tax advisor regarding the tax consequences.

USL has received the opinion of Eversheds Sutherland (US) LLP, counsel to USL, that the material U.S. federal income tax consequences to USL and to U.S. shareholders and non-U.S. shareholders will be as described below. In rendering its opinion, Eversheds Sutherland (US) LLP has relied on the facts described in this prospectus as well as certain factual representations made by USL and USCF. The opinion of Eversheds Sutherland (US) LLP is not binding on the IRS, and as a result, the IRS may not agree with the tax positions taken by USL. If challenged by the IRS, USL’s tax positions might not be sustained by the courts. No ruling has been requested from the IRS with respect to any matter affecting USL or prospective investors.

EACH PROSPECTIVE INVESTOR IS ADVISED TO CONSULT ITS OWN TAX ADVISOR AS TO HOW U.S. FEDERAL INCOME TAX CONSEQUENCES OF AN INVESTMENT IN USL APPLY TO YOU AND AS TO HOW THE APPLICABLE STATE, LOCAL OR FOREIGN TAXES APPLY TO YOU.

Tax Status of USL

USL is organized and operated as a limited partnership in accordance with the provisions of the LP Agreement and applicable state law. Under the Code, an entity classified as a partnership that is deemed to be a “publicly traded partnership” is generally taxable as a corporation for federal income tax purposes. The Code provides an exception to this general rule for a publicly traded partnership whose gross income for each taxable year of its existence consists of at least 90% “qualifying income” (“qualifying income exception”). For this purpose, section 7704 defines “qualifying income” as including, in pertinent part, interest (other than from a financial business), dividends and gains from the sale or disposition of capital assets held for the production of interest or dividends. In addition, in the case of a partnership a principal activity of which is the buying and selling of commodities (other than as inventory) or of futures, forwards and options with respect to commodities, “qualifying income” includes income and gains from such commodities and futures, forwards and options with respect to commodities. USL and USCF have represented the following to Eversheds Sutherland (US) LLP:

38

At least 90% of USL's gross income for each taxable year will be derived from (i) income and gains from commodities (not held as inventory) or futures, forwards, options, swaps and other notional principal contracts with respect to commodities, and (ii) interest income;

- USL is organized and operated in accordance with its governing agreements and applicable law;
- USL has not elected, and will not elect, to be classified as a corporation for U.S. federal income tax purposes.

Based in part on these representations, Eversheds Sutherland (US) LLP is of the opinion that USL will be classified as a partnership for federal income tax purposes and that it is not taxable as a corporation for such purposes. USL's taxation as a partnership rather than a corporation will require USCF to conduct USL's business activities in such a manner that it satisfies the qualifying income exception on a continuing basis. No assurance can be given that USL's operations for any given year will produce income that satisfies the requirements of the qualifying income exception. Eversheds Sutherland (US) LLP will not review USL's ongoing compliance with these requirements and will have no obligation to advise USL or USL's shareholders in the event of any subsequent change in the facts, representations or applicable law relied upon in reaching its opinion.

If USL failed to satisfy the qualifying income exception in any year, other than a failure that is determined by the IRS to be inadvertent and that is cured within a reasonable time after discovery, USL would be taxable as a corporation for federal income tax purposes and would pay federal income tax on its income at regular corporate rates. In that event, shareholders would not report their share of USL's income or loss on their returns. In addition, distributions to shareholders would be treated as dividends to the extent of USL's current and accumulated earnings and profits. Subject to holding period and other requirements, any such dividend would be a qualifying dividend subject to U.S. federal income tax at the lower maximum tax rates applicable to long-term capital gains. To the extent a distribution exceeded USL's earnings and profits, the distribution would be treated as a return of capital to the extent of a shareholder's basis in its shares, and thereafter as gain from the sale of shares. Accordingly, if USL were to be taxable as a corporation, it would likely have a material adverse effect on the economic return from an investment in USL and on the value of the shares.

The remainder of this summary assumes that USL is classified as a partnership for federal income tax purposes and that it is not taxable as a corporation.

U.S. Shareholders

Tax Consequences of Ownership of Shares

Taxation of USL's Income. No U.S. federal income tax is paid by USL on its income. Instead, USL files annual information returns, and each U.S. shareholder is required to report on its U.S. federal income tax return its allocable share of the income, gain, loss, deduction, and credit of USL. For example, shareholders must take into account their share of ordinary income realized by USL from accruals of interest on Treasuries and other investments, and their share of gain from Oil Interests. These items must be reported without regard to the amount (if any) of cash or property the shareholder receives as a distribution from USL during the taxable year. Consequently, a shareholder may be allocated income or gain by USL but receive no cash distribution with which to pay its tax liability resulting from the allocation, or may receive a distribution that is insufficient to pay such liability. Because USCF currently does not intend to make distributions, it is likely that in any year USL realizes net income and/or gain that a U.S. shareholder will be required to pay taxes on its allocable share of such income or gain from sources other than USL distributions. In addition, individuals with income in excess of \$200,000 (\$250,000 in the case of married individuals filing jointly) and certain estates and trusts are subject to an additional 3.8% tax on their "net investment income," which generally includes net income from interest, dividends, annuities, royalties, and rents, and net capital gains (other than certain amounts earned from trades or businesses). The income subject to the additional 3.8% tax includes any income from businesses involved in the trading of financial instruments or commodities.

Allocations of USL's Profit and Loss. Under Code section 704, the determination of a partner's distributive share of any item of income, gain, loss, deduction or credit is governed by the applicable organizational document unless the allocation provided by such document lacks "substantial economic effect." An allocation that lacks substantial economic effect nonetheless will be respected if it is in accordance with the partners' interests in the partnership, determined by taking into account all facts and circumstances relating to the economic arrangements among the partners. Subject to the discussion below, concerning certain conventions to be used by USL, allocations of USL income pursuant to the Partnership Agreement should be considered as having substantial economic effect or as being in accordance with a shareholder's interest in USL.

In general, USL applies a monthly closing-of-the-books convention in determining allocations of economic profit or loss to shareholders. Income, gain, loss and deduction are determined on a monthly "mark-to-market" basis, taking into account our accrued income and deductions and realized and unrealized gains and losses for the month. Items of taxable income, deduction, gain, loss and credit recognized by USL for federal income tax purposes for any taxable year are allocated among holders in a manner that equitably reflects the allocation of economic profit or loss.

For any applicable period ending on or before December 31, 2017, under the monthly allocation convention used by USL, the investor who holds a share as of the close of business on the last trading day of the current month is treated for purposes of making allocations as if it owned the share throughout the current month regardless of when such shareholder acquired such share. For example, an investor who buys a share on April 10 of a year and sells it on May 20 of the same year will be allocated all of the tax items attributable to April (because he is deemed to hold it through the month of April) but will not be allocated any of the tax items attributable to May. The tax items attributable to that share for May will be allocated to the person who is the actual or deemed holder of the share as of the close of business on the last trading day of May.

Effective for any applicable period beginning on or after January 1, 2018, USL intends to modify its monthly allocation convention. Under the modified monthly allocation convention for any such period, an investor who holds a share as of the close of business on the last trading day of the previous month, such investor will be treated for purposes of making allocations as if it owned the share throughout the current month even if such investor disposes of such share during the current month. For example, an investor who buys a share on April 10 of a year and sells it on May 20 of the same year will be allocated all of the tax items attributable to May (because he is deemed to hold it through the last day of May) but will not be allocated any of the tax items attributable to April. The tax items attributable to that share for April will be allocated to the person who is the actual or deemed holder of the share as of the close of business on the last trading day of March.

Under the monthly convention, an investor who purchases and sells a share during the same month, and therefore does not hold (and is not deemed to hold) the share at the close of business on the last trading day of either that month or the previous month, will receive no allocations with respect to that share for any period. Accordingly, investors may receive no allocations with respect to shares that they actually held, or may receive allocations with respect to shares attributable to periods that they did not actually hold the shares. As a result of the transition to the new monthly convention, an investor who holds shares as of the last business day of December 2017 will be treated for purposes of making allocations as if it owned the share throughout December 2017 and January 2018 regardless of when such investor acquired or sold such share and therefor will be allocated the tax items for that month, as well as the tax items for December 2017 and January 2018.

By investing in shares, a U.S. Shareholder agrees that, in the absence of new legislation, regulatory or administrative guidance, or judicial rulings to the contrary, it will file its U.S. income tax returns in a manner that is consistent with the monthly allocation convention as described above and with the IRS Schedule K-1 or any successor form provided to shareholders by USL.

In addition, for any month in which a Creation Basket is issued or a Redemption Basket is redeemed, USL generally will credit or debit the “book” capital accounts of its existing shareholders with any unrealized gain or loss on USL’s assets. The capital accounts as adjusted in this manner will be used in making tax allocations intended to account for the differences between the tax basis and fair market value of the assets of USL at the time new shares are issued or outstanding shares are redeemed (so-called “reverse Code section 704(c) allocations”). The intended effect of these adjustments is to equitably allocate among shareholders any unrealized appreciation or depreciation in USL’s assets existing at the time of a contribution or redemption for book and tax purposes.

USL applies certain conventions in determining and allocating items for tax purposes in order to reduce the complexity and costs of administration. USCF believes that application of these conventions is consistent with the

intent of the partnership provisions of the Code and the applicable Treasury Regulations, and that the resulting allocations will have substantial economic effect or otherwise should be respected as being in accordance with shareholders' interests in USL for federal income tax purposes. The Code and existing Treasury Regulations do not expressly permit adoption of these conventions although the monthly allocation convention described above is consistent with methods permitted under the applicable Treasury Regulations, as well as the legislative history for the provisions that require allocations to appropriately reflect changes in ownership interests. It is possible that the IRS could successfully challenge USL's allocations methods on the ground that they do not satisfy the technical requirements of the Code or Treasury Regulations, requiring a shareholder to report a greater or lesser share of items of income, gain, loss, deduction, or credit than if our method were respected. USCF is authorized to revise our allocation method to conform to any method permitted under future Treasury Regulations.

The assumptions and conventions used in making tax allocations may cause a shareholder to be allocated more or less income or loss for federal income tax purposes than its proportionate share of the economic income or loss realized by USL during the period it held its shares. This "mismatch" between taxable and economic income or loss in some cases may be temporary, reversing itself in a later period when the shares are sold, but could be permanent.

Section 754 Election. USL has made the election permitted by section 754 of the Code, which election is irrevocable without the consent of the Service. The effect of this election is that, in connection with secondary market sales, we adjust the purchaser's proportionate share of the tax basis of our assets to fair market value, as reflected in the price paid for the shares, as if the purchaser had directly acquired an interest in our assets. The section 754 election is intended to eliminate disparities between a partner's basis in its partnership interest and its share of the tax bases of the partnership's assets, so that the partner's allocable share of taxable gain or loss on a disposition of an asset will correspond to its share of the appreciation or depreciation in the value of the asset since it acquired its interest. Depending on the price paid for shares and the tax bases of USL's assets at the time of the purchase, the effect of the section 754 election on a purchaser of shares may be favorable or unfavorable. In order to make the appropriate basis adjustments in a cost-effective manner, USL will use certain simplifying conventions and assumptions. In particular, all transfers of shares in USL will be deemed to take place at a price (the "single monthly price") equal to the value of such share at the end of the Business Day during the month in which the transfer takes place on which the value of a share is lowest at close of the market. Adjustments to be made under Sections 734(b) and 743(b) of the Code will be made using the same monthly convention, including by reference to the single monthly price. It is possible the IRS will successfully assert that the conventions and assumptions applied are improper and require different basis adjustments to be made, which could adversely affect some shareholders.

Mark to Market of Certain Exchange-Traded Contracts. For federal income tax purposes, USL generally is required to use a "mark-to-market" method of accounting under which unrealized gains and losses on instruments constituting "section 1256 contracts" are recognized currently. A section 1256 contract is defined as: (1) a futures contract that is traded on or subject to the rules of a national securities exchange which is registered with the SEC, a domestic board of trade designated as a contract market by the CFTC, or any other board of trade or exchange designated by the Secretary of the Treasury, and with respect to which the amount required to be deposited and the amount that may be withdrawn depends on a system of "marking to market"; (2) a forward contract on exchange-traded foreign currencies, where the contracts are traded in the interbank market; (3) a non-equity option traded on or subject to the rules of a qualified board or exchange; (4) a dealer equity option; or (5) a dealer securities futures contract.

Under these rules, section 1256 contracts held by USL at the end of each taxable year, including for example Futures Contracts and options on Futures Contracts traded on a U.S. exchange or board of trade or certain foreign exchanges, are treated as if they were sold by USL for their fair market value on the last business day of the taxable year. A shareholder's distributive share of USL's net gain or loss with respect to each section 1256 contract generally is treated as long-term capital gain or loss to the extent of 60 percent thereof, and as short-term capital gain or loss to the extent of 40 percent thereof, without regard to the actual holding period ("60 — 40 treatment").

Many of USL's Futures Contracts and some of their other commodity interests will qualify as "section 1256 contracts" under the Code. Gain or loss recognized through disposition, termination or marking-to-market of USL's section 1256 contracts will be subject to 60 — 40 treatment and allocated to shareholders in accordance with the monthly allocation convention. Cleared swaps and other commodity swaps will most likely not qualify as section 1256 contracts. If a commodity swap is not treated as a section 1256 contract, any gain or loss on the swap recognized at the time of disposition or termination will be long-term or short-term capital gain or loss depending on the holding period of the swap.

Limitations on Deductibility of Losses and Certain Expenses. A number of different provisions of the Code may defer or disallow the deduction of losses or expenses allocated to you by USL, including but not limited to those described below.

A shareholder's deduction of its allocable share of any loss of USL is limited to the lesser of (1) the tax basis in its shares or (2) in the case of a shareholder that is an individual or a closely held corporation, the amount which the shareholder is considered to have "at risk" with respect to our activities. In general, the amount at risk will be your invested capital plus your share of any recourse debt of USL for which you are liable. Losses in excess of the lesser of tax basis or the amount at risk must be deferred until years in which USL generates additional taxable income against which to offset such carryover losses or until additional capital is placed at risk.

Noncorporate taxpayers are permitted to deduct capital losses only to the extent of their capital gains for the taxable year plus \$3,000 of other income. Unused capital losses can be carried forward and used to offset capital gains in future years. In addition, a noncorporate taxpayer may elect to carry back net losses on section 1256 contracts to each of the three preceding years and use them to offset section 1256 contract gains in those years, subject to certain limitations. Corporate taxpayers generally may deduct capital losses only to the extent of capital gains, subject to special carryback and carryforward rules.

For taxable years beginning before January 1, 2026, otherwise deductible expenses incurred by noncorporate taxpayers constituting “miscellaneous itemized deductions,” generally including investment-related expenses (other than interest and certain other specified expenses), are not deductible. For taxable years beginning on or after January 1, 2026, such miscellaneous itemized deductions are deductible only to the extent they exceed 2 percent of the taxpayer’s adjusted gross income for the year. Although the matter is not free from doubt, we believe management fees we pay to USCF and other expenses we incur will constitute investment-related expenses subject to the miscellaneous itemized deduction limitation, rather than expenses incurred in connection with a trade or business, and will report these expenses consistent with that interpretation. In addition, for taxable years beginning on or after January 1, 2026, the Code imposes additional limitations on the amount of certain itemized deductions allowable to individuals with adjusted gross income in excess of certain amounts by reducing the otherwise allowable portion of such deductions by an amount equal to the lesser of:

- 3% of the individual’s adjusted gross income in excess of certain threshold amounts; or
- 80% of the amount of certain itemized deductions otherwise allowable for the taxable year.

For taxable years beginning before January 1, 2026, noncorporate shareholders are entitled to a deduction (subject to certain limitations) equal to their “combined qualified business income.” “Combined qualified business income” for this purpose includes 20% of a noncorporate taxpayer’s “qualified publicly traded partnership income.” In general, “qualified publicly traded partnership income” includes a noncorporate taxpayer’s allocable share of “qualified items” of income, gain, deduction, and loss. A “qualified item” for this purpose is an item of income, gain deduction, or loss that is effectively connected with a US trade or business and includible income for the year. As discussed below, although the matter is not free from doubt, USL believes that the activities directly conducted by USL will not result in USL being engaged in a trade or business within in the United States. *See* “Non-U.S. Shareholders—Withholding on Allocations and Distributions” below. As a result, we do not anticipate that any of our items of income, gain, deduction, or loss will be reported as “qualified publicly traded partnership income” eligible for the deduction for “combined qualified business income.” “Qualified publicly traded partnership income” also includes any gain or loss from the sale of an interest in a partnership to extent attributable to “unrealized receivables” or “inventory” under section 751. (For a discussion of section 751, *see* “Tax Consequences of Disposition of Shares” below.) A noncorporate taxpayer that recognizes any gain or loss from the sale of an interest in USL that is attributable to “unrealized receivables” or “inventory” under section 751 should consult with such taxpayer’s tax advisor to determine whether any portion of such gain or loss constitutes “qualified publicly traded partnership income” eligible for the deduction for “combined qualified business income.”

A taxpayer is generally prohibited from deducting business interest to the extent that it exceeds the sum of (i) business interest income of such taxpayer, (ii) 30% of the adjusted taxable income of such taxpayer, plus (iii) the floor plan financing interest of such taxpayer. In the case of partnerships, this determination is made at the partnership level. To the extent that the business income of the partnership exceeds the amount necessary to absorb all of the partnership’s business interest, such excess amount is allocated to the partners as excess business income, which amount may be used against any business interest of the partner (but not any other partnerships). To the extent that the partnership has any disallowed business interest expense, such amount is allocated among the partners, reduces the partners’ outside basis in their partnership interests by their allocable shares, and is carried forward to future years. Such carry forward may only be used as a deduction to the extent that the partnership has excess business income in the future. In the event that a partner transfers a partnership interest with any excess business interest carry forward amounts, such amounts increase the partner’s basis in its partnership interest immediately before the transfer. Although it is not free from doubt, USL does not anticipate that it will be treated as engaged in a trade or business. As a result, USL does not anticipate that any portion of its interest expense (if any) will constitute business interest or that shareholders will be allocated any excess business income as a result of holding USL shares.

Noncorporate shareholders generally may deduct “investment interest expense” only to the extent of their “net investment income.” Investment interest expense of a shareholder will generally include any interest accrued by USL and any interest paid or accrued on direct borrowings by a shareholder to purchase or carry its shares, such as interest with respect to a margin account. Net investment income generally includes gross income from property held for investment (including “portfolio income” under the passive loss rules but not, absent an election, long-term capital gains or certain qualifying dividend income) less deductible expenses other than interest directly connected with the production of investment income.

To the extent that we allocate losses or expenses to you that must be deferred or disallowed as a result of these or other limitations in the Code, you may be taxed on income in excess of your economic income or distributions (if any) on your shares. As one example, you could be allocated and required to pay tax on your share of interest income accrued by USL for a particular taxable year, and in the same year be allocated a share of a capital loss that you cannot deduct currently because you have insufficient capital gains against which to offset the loss. As another example, you could be allocated and required to pay tax on your share of interest income and capital gain for a year, but be unable to deduct some or all of your share of management fees and/or margin account interest incurred by you with respect to your shares. Shareholders are urged to consult their own professional tax advisors regarding the effect of limitations under the Code on your ability to deduct your allocable share of USL’s losses and expenses.

Tax Basis of Shares

A shareholder's tax basis in its shares is important in determining (1) the amount of taxable gain or lo
