TAIWAN, REPUBLIC OF CHINA

(Name and telephone number, including area code, of the person to contact in connection with this report.)

Check the appropriate box to indicate the rule pursuant to which this form is being filed, and provide the period to which the information in this form applies:

Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from

January 1 to December 31, 2013

Introduction:

Himax Technologies, Inc. (“Himax”) is a fabless semiconductor solution provider dedicated to display imaging processing technologies. Himax designs, develops and markets semiconductors that are critical components in display technology; and its principal IC driver and module product families are:

Edgar Filing: Himax Technologies, Inc. - Form SD

- 1) Display driver IC – they are used primarily for any-sized thin film transistor-liquid crystal display (TFT-LCD) panels like mobile, desktop monitors, notebook computers and televisions,
 - 2) Video processor IC – they are used primarily in TFT-LCD panels to process video image such as convert 2D to 3D pictures.
 - 3) LCOS micro display model – they are PICO projectors.
-

4) CMOS IC – they are image sensors used in customer electronics such as digital camera to process and capture pictures.

5) Analog IC – they are used primarily to power IC chips and white Light-Emitting Diode (LED) driver

The majority of these principle products sold by Himax contain Conflict Minerals. Of the total revenue generated by Himax product sales in 2013, about 84.3% was derived from products containing 3GT.

Based upon a Reasonable Country of Origin Investigation with Due Diligence following the OECD Guidelines, the following conclusion has been reached:

Himax’s principal IC driver and module products contains Conflict Minerals have sources that are found to be DRC Conflict Undeterminable

Himax maintains a Conflict Minerals Policy that supports Conflict Free Sourcing. The link to this policy is included below:
