ACTION

DECREASE THE NUMBER OF ISSUED AND OUTSTANDING SHARES OF COMMON STOCK THE COMPANY

The Company's Board of Directors unanimously recommended, and the Majority Stockholders have approved, a reverse split of 1 for 75 shares of the outstanding shares of Common Stock held by stockholders of record on the Effective Date. If, as a result of the reverse split, a stockholder is left with a fractional share, that stockholder shall receive one full share in lieu of such fractional share.

Reasons for the Reverse Split.

The effect of the reverse split will be a decrease in the number of issued and outstanding shares of the Company's Common Stock which will generally cause a corresponding increase in the per share trading price of the common stock. However, because some investors may view the reverse stock split negatively, there can be no assurance that the market price of the Common Stock will reflect proportionately the reverse stock split, that any particular price may be achieved, or that any price gain will be sustained in the future. Company's management and Board of Directors believe that a higher per share trading price will broaden the Company's potential shareholders by making it possible for additional potential shareholders to purchase the stock who are presently prohibited from doing so by their brokerage firms, which by policy typically will not allow trading in shares trading below a certain price per share or may charge additional fees for trading the lower priced stock.
