Semi-Annual Report

This report provides management's discussion of fund performance for AllianceBernstein Income Fund (the Fund) for the semi-annual reporting period ended June 30, 2008. The Fund is a closed-end fund that trades under the New York Stock Exchange symbol ACG.

Investment Objectives and Policies

This closed-end fund is designed to provide high current income consistent with the preservation of capital. The Fund normally invests at least 80% of its net assets in income-producing securities. The Fund normally invests at least 65% of its assets in securities issued or guaranteed by the U.S. Government, its agencies or instrumentalities, and repurchase agreements pertaining to U.S. Government securities. The Fund may also invest up to 35% of its assets in other fixed-income securities, including those issued by non-governmental issuers in the U.S. and those issued by foreign governments. The Fund may invest up to 35% of its net assets in below-investment-grade securities. Additionally, the Fund may utilize other investment instruments, including options, swaps, forwards and futures, and may employ leverage. For more information regarding the Fund's risks, please see "A Word About Risk" on page 4 and "Note G Risks Involved in Investing in the Fund" of the Notes to Financial Statements on page 47.

Investment Results

The table on page 6 provides performance data for the Fund and its benchmark, the Lehman Brothers (LB) U.S.

Aggregate Index, for the six- and 12-month periods ended June 30, 2008.

The Fund modestly underperformed its benchmark, which is not leveraged, for the six-month period ended June 30, 2008. Detracting from performance was the Fund's exposure to non-benchmark sectors including emerging market, high-yield corporate and high-yield bank loan debt, which underperformed in the flight to quality. Contributing positively to performance was the Fund's underweight in investment-grade corporates, which underperformed. The Fund's use of leverage positively contributed to performance during this period.

For the 12-month period ended June 30, 2008, the Fund outperformed its benchmark. The Fund's overweight in governments and emerging market local debt, which significantly outperformed early in the period, contributed positively to relative performance. Its underweight in investment-grade corporates, which underperformed, also helped. The Fund's use of leverage also contributed positively to performance during this period.

Market Review and Investment Strategy

After a tumultuous first quarter marked by a wholesale and often indiscriminate flight from risk, global fixed-income markets made fitful progress toward regaining stability in the reporting period ended June 30, 2008. Non-government debt outperformed during the period as yield

spreads tightened, but it could not retrace all of the shortfall from the first quarter's flight to quality. Also, the U.S. dollar stabilized against major currencies, halting a multi-year decline in value.

Since mid-2007, central banks have taken extraordinary steps to support the stability of the global financial system. Over just seven months, the U.S. Federal Reserve (the Fed) cut interest rates by 300 basis points and, in concert with its counterparts including the European Central Bank (ECB), Swiss National Bank and Bank of Japan introduced special liquidity facilities to ease funding pressures for financial institutions. In retrospect, the turning point may have come in March 2008, when the Fed orchestrated the takeover of the investment bank Bear Stearns. The Fed's decisive action reassured investors that authorities would do their utmost to avert a financial-market meltdown.

There are some signs that a sense of normality is slowly returning to the credit markets. Issuance of investment-grade corporate debt rebounded strongly from the depressed levels of the previous two quarters, hitting successive record highs in April and May. However, as evidenced by the tumble in stock prices and renewed spread-widening seen in June, the road to recovery will likely be a bumpy one. Write-offs at banks and brokerages continue to mount, impacting earnings and contributing to rising uncertainty. Soaring oil prices are pressuring corporate earnings. Central banks are faced with

the ugly specter of rising inflation and slowing economic growth.

For the six-month period ended June 30, 2008, government debt outperformed non-government debt, with U.S. Treasuries returning 2.23% and agencies returning 1.70%. Fully hedged government debt in developed nations outside of the U.S. returned -0.19% for the semi-annual period. Within the non-government sectors, mortgage-backed securities (MBS) returned 1.93% followed by corporates at -0.84%, commercial mortgage-backed securities (CMBS) at -2.40% and asset-backed securities (ABS) at -2.71%. The flight to quality also impacted the non-benchmark sectors, with the high-yield market returning -1.31%, emerging-market debt returning -0.21% and high-yield bank loans returning -0.51%.

Quantitative analysis continues to suggest that some of the most attractive opportunities today are in investment-grade corporate debt, where spreads remain very wide compared with historical averages. The Fund modestly added to positions during the semi-annual period. Additionally, the Fund is maintaining an overweight in financials. The Fund has also been adding to positions in super-senior, AAA-rated U.S. CMBS, which are trading at extraordinarily cheap valuations that the management team (the Team) believes are out of line with fundamentals. The CMBS purchased in the Fund offer significant credit protection. After decisively outperforming other fixed-income sectors over the past few years, emerging-market debt on a risk-adjusted basis has

2 ALLIANCEBERNSTEIN INCOME FUND

become unattractive to the Team. In fact, select emerging markets are trading at tighter historical spreads than some higher-rated sectors. The Team has thus reduced exposure to emerging-market debt.

The Team's quantitative and fundamental research also led the Fund to keep its underweight position on the U.S. dollar versus a basket of currencies. The Team sees little support for

the U.S. dollar in the near term. The significant interest-rate differential between the U.S. and other developed countries persists, and the U.S.'s current account deficit is still large. Among the Fund's long currency positions were the Swedish krona, Norwegian krone, Canadian dollar and Singapore dollar. The Fund was also short the British pound and Japanese yen.

ALLIANCEBERNSTEIN INCOME FUND 3

HISTORICAL PERFORMANCE

An Important Note About the Value of Historical Performance

The performance on page 6 represents past performance and does not guarantee future results. Current performance may be lower or higher than the performance information shown. All fees and expenses related to the operation of the Fund have been deducted. Performance assumes reinvestment of distributions and does not account for taxes.

AllianceBernstein Income Fund Shareholder Information

The Fund's NYSE trading symbol is ACG. Weekly comparative net asset value (NAV) and market price information about the Fund is published each Monday in *The Wall Street Journal*, each Sunday in *The New York Times*, and each Saturday in *Barron's* and in other newspapers in a table called Closed-End Bond Funds. For additional shareholder information regarding this Fund, please see page 55.

Benchmark Disclosure

The unmanaged Lehman Brothers (LB) U.S. Aggregate Index does not reflect fees and expenses associated with the active management of a mutual fund portfolio. The Index covers the U.S. investment-grade fixed-rate bond market, including government and credit securities, agency mortgage pass-through securities, asset-backed securities and commercial mortgage-backed securities. The Index is not leveraged, whereas the Fund utilizes leverage. An investor cannot invest directly in an index, and its results are not indicative of the performance for any specific investment, including the Fund.

A Word About Risk

The Fund participates in a credit facility for the purpose of utilizing investment leverage. The Fund may utilize additional leverage through other investment techniques or reverse repurchase agreements and dollar rolls.

Reverse repurchase agreements involve sales by the Fund of portfolio assets concurrently with an agreement by the Fund to repurchase the same assets at a later date at a fixed price. Generally, the effect of such a transaction is that the Fund can recover all or most of the cash invested in the portfolio securities involved during the term of the reverse repurchase agreement, while it will be able to keep the interest income associated with those portfolio securities. Such transactions are only advantageous if the interest cost to the Fund of the reverse repurchase agreement transaction is less than the cost of otherwise obtaining the cash.

The Fund may enter into dollar rolls in which the Fund sells securities for delivery in the current month and simultaneously contracts to repurchase substantially similar (same type and coupon) securities on a specified future date. During the roll period, the Fund forgoes principal and interest paid on the securities. The Fund is compensated by the difference between the current sales price and the lower forward price for the future purchase (often referred to as the "drop") as well as by the interest earned on the cash proceeds of the initial sale.

Reverse repurchase agreements and dollar rolls are speculative techniques and are considered borrowings by the Fund.

The effect of leverage can realize shareholders higher returns than if the Fund were not leveraged, and the use of leverage techniques can add to the net asset value (NAV) of the Common Stock. However, the risks of such techniques are potentially a higher volatility of the NAV of the Common Stock, potentially more volatility in the market value of the Common Stock, and the relatively greater effect on the NAV of the Common Stock caused by favorable or adverse changes in the currency exchange rates. In addition, changes in the interest rate environment can increase or decrease shareholder returns. The Fund maintains asset coverage of at least 300% with respect to borrowings.

(Historical Performance continued on next page)

HISTORICAL PERFORMANCE

(continued from previous page)

To the extent that the current interest rate on the Fund's indebtedness approaches the net return on the leveraged portion of the Fund's investment portfolio, then the benefit to the shareholders will be reduced. If the rate on indebtedness were to exceed the net return on the same portion of the portfolio, then this would result in a lower rate of return for the shareholders. Similarly, the use of leverage in a declining market can advance the decrease of the Fund's NAV more so than if the Fund were not leveraged, which would likely be reflected in a greater decline in the market price for shares of Common Stock than if the Fund were not leveraged. In extreme cases, if the Fund's current investment income were not sufficient to meet interest payments on indebtedness or if the Fund failed to maintain the asset coverage required by the 1940 Act, then it could be necessary for the Fund to liquidate certain investments at a time when it may be disadvantageous to do so, thereby reducing its NAV.

Part of the Fund's assets will be invested in foreign securities. A significant portion of the Fund's investments in foreign securities is in emerging markets. Since the Fund invests in foreign currency denominated securities, fluctuations may be magnified by changes in foreign exchange rates. The Fund also may seek investment opportunities by taking long or short positions in currencies through the use of currency-related derivatives, including forward currency exchange contracts, futures and options on futures swaps and options. Foreign markets can be more volatile than the U.S. market due to increased risks of adverse issuer, political, regulatory, market or economic developments. The Fund may invest in high yield bonds or below-investment grade securities ("junk bonds"). High yield bonds involve a greater risk of default and price volatility than other bonds.

While the Fund invests principally in fixed-income securities, in order to achieve its investment objectives, the Fund may at times use certain types of investment derivatives, such as options, futures, forwards and swaps. These instruments involve risks different from, and in certain cases, greater than, the risks presented by more traditional investments. These risks include the risk that the value of a derivative instrument may not correlate perfectly, or at all, with the value of the assets, reference rates or indices that they are designed to track. Other risk include: the possible absence of a liquid secondary market for a particular instrument and possible exchange-imposed price fluctuation limits, either of which may make it difficult or impossible to close out a position when desired; the risk that adverse price movements in an instrument can result in a loss substantially greater than the Fund's initial investment in that instrument (in some cases, the potential loss is unlimited); and the risk that the counterparty will not perform its obligations.

* The position represents an unfunded loan commitment. Investments in unfunded loan commitments obligate the Fund to fund these commitments at the borrower's discretion. At period end, the market value and unrealized loss of these unfunded loan commitments amounted to \$104,709 and \$(4,047), respectively. The coupon rate will be determined at the time of funding and will be based upon the London-Interbank Offered Rate (LIBOR) plus a premium which was determined at the time of purchase.

(a) Positions, or portion thereof, with an aggregate market value of \$781,723,837 have been segregated to collateralize open forward currency exchange contracts.

(b) Variable rate coupon, rate shown as of June 30, 2008.

(c) Positions, or portion thereof, with an aggregate market value of \$1,371,562,801 have been pledged to collateralize the loan payable outstanding.

(d) Positions, or portions thereof, with a market value of \$598,046,321 have been segregated to collateralize reverse repurchase agreements.

(e) Positions, or portions thereof, with a market value of \$6,215,459 have been segregated to collateralize margin requirements for open futures contracts.

(f) Security is exempt from registration under Rule 144A of the Securities Act of 1933. These securities are considered liquid and may be resold in transactions exempt from registration, normally to qualified institutional buyers. At June 30, 2008, the aggregate market value of these securities amounted to \$136,653,189 or 6.7% of net assets.

(g) Indicates a security that has a zero coupon that remains in effect until a predetermined date at which time the stated coupon rate becomes effective until final maturity.

(h) Represents entire or partial position segregated as collateral for when issued and delayed delivery securities.

(i) Non-income producing security.

(j) Investment in affiliated money market fund.

FINANCIAL ACCOUNTING STANDARDS NO. 157**June 30, 2008 (unaudited)**

The Fund adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements (FAS 157), effective January 1, 2008. In accordance with FAS 157, fair value is defined as the price that the Fund would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. FAS 157 also establishes a framework for measuring fair value, and a three-level hierarchy for fair value measurements based upon the transparency of inputs to the valuation of an asset or liability. Inputs may be observable or unobservable and refer broadly to the assumptions that market participants would use in pricing the asset or liability. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Fund. Unobservable inputs reflect the Fund's own assumptions about the assumptions that market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. Each investment is assigned a level based upon the observability of the inputs which are significant to the overall valuation. The three-tier hierarchy of inputs is summarized below.

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The following table summarizes the valuation of the Fund's investments by the above fair value hierarchy levels as of June 30, 2008:

	Investments In Securities	Other Financial Instruments*
Level		
Level 1	\$ 59,069,139	\$ 312,103
Level 2	2,541,921,197	611,339
Level 3	405,844,450	58,274
Total	\$ 3,006,834,786	\$ 981,716

* Other financial instruments are derivative instruments not reflected in the Portfolio of Investments, such as futures, forwards and swap contracts, which are valued at the unrealized appreciation/depreciation on the instrument.

Following is a reconciliation of investments in which significant unobservable inputs (Level 3) were used in determining fair value:

	Investments In Securities	Other Financial Instruments
Balance as of 12/31/07	\$ 484,849,971	\$ 0
Accrued discounts /premiums	3,748,646	0
Realized gain (loss)	14,495,726	0 *
Change in unrealized appreciation/depreciation	(35,309,899)	58,274
Net purchases (sales)	(50,873,320)	0
Net transfers in and/or out of Level 3	(11,066,674)	0
Balance as of 6/30/08	\$ 405,844,450	\$ 58,274
Net change in unrealized appreciation/depreciation from Investments still held as of 6/30/08	\$ (30,891,120)	\$ 0

* The realized gain (loss) recognized during the period ended 6/30/08 for other financial instruments was \$0.

NOTES TO FINANCIAL STATEMENTS

June 30, 2008 (unaudited)

NOTE A

Significant Accounting Policies

AllianceBernstein Income Fund, Inc. (the "Fund") is registered under the Investment Company Act of 1940 as a diversified, closed-end management investment company. The financial statements have been prepared in conformity with U.S. generally accepted accounting principles which require management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities in the financial statements and amounts of income and expenses during the reporting period. Actual results could differ from those estimates. The following is a summary of significant accounting policies followed by the Fund.

1. Security Valuation

Portfolio securities are valued at their current market value determined on the basis of market quotations or, if market quotations are not readily available or are deemed unreliable, at fair value as determined in accordance with procedures established by and under the general supervision of the Fund's Board of Directors.

In general, the market value of securities which are readily available and deemed reliable are determined as follows. Securities listed on a national securities exchange (other than securities listed on the NASDAQ Stock Market, Inc. ("NASDAQ")) or on a foreign securities exchange are valued at the last sale price at the close of the exchange or foreign securities exchange. If there has been no sale on such day, the securities are valued at the mean of the closing bid and asked prices on such day. Securities listed on more than one exchange are valued by reference to the principal exchange on which the securities are traded; securities listed only on NASDAQ are valued in accordance with the NASDAQ Official Closing Price; listed put or call options are valued at the last sale price. If there has been no sale on that day, such securities will be valued at the closing bid prices on that day; open futures contracts and options thereon are valued using the closing settlement price or, in the absence of such a price, the most recent quoted bid price. If there are no quotations available for the day of valuation, the last available closing settlement price is used; securities traded in the over-the-counter market, ("OTC") are valued at the mean of the current bid and asked prices as reported by the National Quotation Bureau or other comparable sources; U.S. government securities and other debt instruments having 60 days or less remaining until maturity are valued at amortized cost if their original maturity was 60 days or less; or by amortizing their fair value as of the 61st day prior to maturity if their original term to maturity exceeded 60 days; fixed-income securities, including mortgage backed and asset backed securities, may be valued on the basis of prices provided by a pricing service or at a price obtained from one or more of the major broker/dealers. In cases where broker/dealer quotes are obtained, AllianceBernstein L.P. (the "Adviser") may establish procedures whereby changes in market yields or spreads are used to adjust, on a daily basis, a recently obtained quoted price on a security; and OTC and other

derivatives are valued on the basis of a quoted bid price or spread from a major broker/dealer in such security.

Securities for which market quotations are not readily available (including restricted securities) or are deemed unreliable are valued at fair value. Factors considered in making this determination may include, but are not limited to, information obtained by contacting the issuer, analysts, analysis of the issuer's financial statements or other available documents. In addition, the Fund may use fair value pricing for securities primarily traded in non-U.S. markets because most foreign markets close well before the Fund values its securities at 4:00 p.m., Eastern Time. The earlier close of these foreign markets gives rise to the possibility that significant events, including broad market moves, may have occurred in the interim and may materially affect the value of those securities.

2. Currency Translation

Assets and liabilities denominated in foreign currencies and commitments under forward currency exchange contracts are translated into U.S. dollars at the mean of the quoted bid and asked prices of such currencies against the U.S. dollar. Purchases and sales of portfolio securities are translated into U.S. dollars at the rates of exchange prevailing when such securities were acquired or sold. Income and expenses are translated into U.S. dollars at rates of exchange prevailing when accrued.

Net realized gain or loss on foreign currency transactions represents foreign exchange gains and losses from sales and maturities of foreign fixed income investments, foreign currency exchange contracts, holding of foreign currencies, currency gains or losses realized between the trade and settlement dates on foreign investment transactions, and the difference between the amounts of dividends, interest and foreign withholding taxes recorded on the Fund's books and the U.S. dollar equivalent amounts actually received or paid. Net unrealized currency gains and losses from valuing foreign currency denominated assets and liabilities at period end exchange rates are reflected as a component of net unrealized appreciation or depreciation of investments and foreign currency denominated assets and liabilities.

3. Taxes

It is the Fund's policy to meet the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its investment company taxable income and net realized gains, if any, to shareholders. Therefore, no provisions for federal income or excise taxes are required. The Fund may be subject to taxes imposed by countries in which it invests. Such taxes are generally based on income and/or capital gains earned or repatriated. Taxes are accrued and applied to net investment income, net realized gains and net unrealized appreciation/depreciation as such income and/or gains are earned.

4. Investment Income and Investment Transactions

Dividend income is recorded on the ex-dividend date or as soon as the Fund is informed of the dividend. Interest income is accrued daily. Investment transactions are accounted for on the date the securities are purchased or sold. Investment gains or losses are determined on the identified cost basis. The Fund amortizes premiums and accretes discounts as adjustments to interest income.

5. Dividends and Distributions

Dividends and distributions to shareholders, if any, are recorded on the ex-dividend date. Income dividends and capital gains distributions are determined in accordance with federal tax regulations and may differ from those determined in accordance with U.S. generally accepted accounting principles. To the extent these differences are permanent, such amounts are reclassified within the capital accounts based on their federal tax basis treatment; temporary differences do not require such reclassification.

6. Repurchase Agreements

It is the Fund's policy that its custodian or designated subcustodian take control of securities as collateral under repurchase agreements and to determine on a daily basis that the value of such securities are sufficient to cover the value of the repurchase agreements. If the seller defaults and the value of the collateral declines or if bankruptcy proceedings are commenced with respect to the seller of the security, realization of collateral by the Fund may be delayed or limited.

NOTE B

Advisory Fee and Other Transactions with Affiliates

Under the terms of the investment advisory agreement (the "Advisory Agreement"), the Fund pays the Adviser a monthly advisory fee in an amount equal to the sum of 1/12th of .30 of 1% of the Fund's average weekly net assets up to \$250 million, 1/12th of .25 of 1% of the Fund's average weekly net assets in excess of \$250 million, and 4.75% of the Fund's daily gross income (i.e., income other than gains from the sale of securities and foreign currency transactions or gains realized from options and futures contracts less interest on money borrowed by the Fund) accrued by the Fund during the month (the "Income Component"). However, such monthly advisory fee shall not exceed in the aggregate 1/12th of .80% of the Fund's average weekly net assets during the month (approximately .80% on an annual basis). Prior to February 12, 2007 the advisory fee could not exceed in the aggregate 1/12th of .95% of the Fund's average weekly net assets during the month (approximately .95% on an annual basis).

During the six months ended June 30, 2008, the Adviser reimbursed the Fund \$1,062 for trading losses incurred due to a trade entry error.

Under the terms of the Shareholder Inquiry Agency Agreement with AllianceBernstein Investor Services, Inc. ("ABIS"), a wholly-owned subsidiary of the

Adviser, the Fund reimburses ABIS for costs relating to servicing phone inquiries on behalf of the Fund. During the six months ended June 30, 2008, there was no reimbursement paid to ABIS.

Pursuant to the Advisory agreement, the Fund paid \$93,004 to the Adviser representing the cost of certain legal and accounting services provided to the Fund by the Adviser for the six months ended June 30, 2008.

The Fund may invest in the AllianceBernstein Fixed-Income Shares, Inc. Government STIF Portfolio, an open-end management investment company managed by the Adviser. The Government STIF Portfolio is offered as a cash management option to mutual funds and other institutional accounts of the Adviser, and is not available for direct purchase by members of the public. The Government STIF Portfolio pays no investment management fees but does bear its own expenses. AllianceBernstein Fixed-Income Shares, Inc. - Prime STIF Portfolio, also an open-end management investment company managed by the Adviser and which had been offered as a cash management option, ceased operations on February 29, 2008. A summary of the Fund transactions in shares of the Government STIF Portfolio and Prime STIF Portfolio for the six months ended June 30, 2008 is as follows:

	Market Value December 31, 2007 (000)	Purchases at Cost (000)	Sales Proceeds (000)	Dividend Income (000)	Market Value June 30, 2008 (000)
Government STIF	\$ 0	\$ 489,871	\$ 430,802	\$ 29	\$ 59,069
Prime STIF	50,297	224,488	274,785	1,535	0

NOTE C

Investment Transactions

Purchases and sales of investment securities (excluding short-term investments) for the six months ended June 30, 2008 were as follows:

	Purchases	Sales
Investment securities (excluding U.S. government securities)	\$ 298,214,426	\$ 289,163,049
U.S. government securities	161,689,137	107,403,819

The cost of investments for federal income tax purposes was substantially the same as the cost for financial reporting purposes. Accordingly, gross unrealized appreciation and unrealized depreciation (excluding futures, foreign currency and swap transactions) are as follows:

Gross unrealized appreciation	\$ 127,155,775
Gross unrealized depreciation	(85,211,597)
Net unrealized appreciation	\$ 41,944,178

1. Financial Futures Contracts

The Fund may buy or sell financial futures contracts for the purpose of hedging its portfolio against adverse effects of anticipated movements in the market. The Fund bears the market risk that arises from changes in the value of these financial instruments and the imperfect correlation between movements in the price of the futures contracts and movements in the price of the securities hedged or used for cover. The Fund may also purchase or sell futures contracts for foreign currencies or options thereon for non-hedging purposes as a means of making direct investment in foreign currencies, as described below under **Currency Transactions**.

At the time the Fund enters into a futures contract, the Fund deposits and maintains as collateral an initial margin with the broker, as required by the exchange on which the transaction is effected. Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in the value of the contract. Such receipts or payments are known as variation margin and are recorded by the Fund as unrealized gains or losses. Risks may arise from the potential inability of a counterparty to meet the terms of the contract. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the time it was closed.

2. Forward Currency Exchange Contracts

The Fund may enter into forward currency exchange contracts in order to hedge its exposure to changes in foreign currency exchange rates on its foreign portfolio holdings or to hedge certain firm purchase and sales commitments denominated in foreign currencies and for non-hedging purposes as a means of making direct investments in foreign currencies, as described below under **Currency Transactions**. A forward currency exchange contract is a commitment to purchase or sell a foreign currency at a future date at a negotiated forward rate. The gain or loss arising from the difference between the original contract and the closing of such contract would be included in net realized gain or loss on foreign currency transactions.

Fluctuations in the value of open forward currency exchange contracts are recorded for financial reporting purposes as net unrealized appreciation or depreciation by the Fund.

The Fund's custodian will place and maintain cash not available for investment or other liquid assets in a separate account of the Fund having a value at least equal to the aggregate amount of the Fund's commitments under forward currency exchange contracts entered into with respect to position hedges. Risks may arise from the potential inability of a counterparty to meet the terms of a contract and from unanticipated movements in the value of a foreign currency relative to the U.S. dollar. The face or contract amount, in U.S. dollars reflects the total exposure the Fund has in that particular currency contract.

3. Option Transactions

For hedging purposes, the Fund may purchase and write (sell) put and call options on U.S. and foreign securities, including government securities, and foreign currencies that are traded on U.S. and foreign securities exchanges and over-the-counter markets. The Fund may also use options transactions for non-hedging purposes as a means of making direct investments in foreign currencies, as described below under "Currency Transactions".

The risk associated with purchasing an option is that the Fund pays a premium whether or not the option is exercised. Additionally, the Fund bears the risk of loss of the premium and change in market value should the counterparty not perform under the contract. Put and call options purchased are accounted for in the same manner as portfolio securities. The cost of securities acquired through the exercise of call options is increased by premiums paid. The proceeds from securities sold through the exercise of put options are decreased by the premiums paid.

When the Fund writes an option, the premium received by the Fund is recorded as a liability and is subsequently adjusted to the current market value of the option written. Premiums received from written options which expire unexercised are recorded by the Fund on the expiration date as realized gains from options written. The difference between the premium received and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is also treated as a realized gain, or if the premium received is less than the amount paid for the closing purchase transaction, as a realized loss. If a call option is exercised, the premium received is added to the proceeds from the sale of the underlying security or currency in determining whether the Fund has realized a gain or loss. If a put option is exercised, the premium received reduces the cost basis of the security or currency purchased by the Fund. In writing an option, the Fund bears the market risk of an unfavorable change in the price of the security or currency underlying the written option. Exercise of an option written by the Fund could result in the Fund selling or buying a security or currency at a price different from the current market value. For the six months ended June 30, 2008, the Fund had no transactions in written options.

4. Swap Agreements

The Fund may enter into swaps to hedge its exposure to interest rates, credit risk, or currencies. The Fund may also enter into swaps for non-hedging purposes as a means of making direct investments in foreign currencies, as described below under "Currency Transactions". A swap is an agreement that obligates two parties to exchange a series of cash flows at specified intervals based upon or calculated by reference to changes in specified prices or rates for a specified amount of an underlying asset. The payment flows are usually netted against each other, with the difference being paid by one party to the other.

Risks may arise as a result of the failure of the counterparty to the swap contract to comply with the terms of the swap contract. The loss incurred by the failure

of a counterparty is generally limited to the net interim payment to be received by the Fund, and/or the termination value at the end of the contract. Therefore, the Fund considers the creditworthiness of each counterparty to a swap contract in evaluating potential credit risk. Additionally, risks may arise from unanticipated movements in interest rates or in the value of the underlying securities.

As of January 1, 2004, the Fund has adopted the method of accounting for interim payments on swap contracts in accordance with Financial Accounting Standards Board Statement No. 133. The Fund accrues for the interim payments on swap contracts on a daily basis, with the net amount recorded within unrealized appreciation/depreciation of swap contracts on the statement of assets and liabilities. Once the interim payments are settled in cash, the net amount is recorded as realized gain/loss on swaps, in addition to realized gain/loss recorded upon termination of swap contracts on the statement of operations. Prior to January 1, 2004, these interim payments were reflected within interest income/expense in the statement of operations. Fluctuations in the value of swap contracts are recorded as a component of net change in unrealized appreciation/depreciation of investments.

The Fund may enter into credit default swaps. The Fund may purchase credit protection on the referenced obligation of the credit default swap (Buy Contract) or provide credit protection on the referenced obligation of the credit default swap (Sale Contract). A sale/(buy) in a credit default swap provides upon the occurrence of a credit event, as defined in the swap agreement, for the Portfolio to buy/(sell) from/(to) the counterparty at the notional amount (the Notional Amount) and receive/(deliver) the principal amount of the referenced obligation. If a credit event occurs, the maximum payout amount for a Sale Contract is limited to the Notional Amount of the swap contract (Maximum Payout Amount). During the term of the swap agreement, the Fund receives/(pays) fixed payments from/(to) the respective counterparty, calculated at the agreed upon interest rate applied to the Notional Amount. These interim payments are recorded within unrealized appreciation/depreciation of swap contracts on the statement of assets and liabilities.

Credit default swaps may involve greater risks than if a Fund had invested in the referenced obligation directly. Credit default swaps are subject to general market risk, liquidity risk, counterparty risk and credit risk. If the Fund is a buyer and no credit event occurs, it will lose its investment. In addition, if the Fund is a seller and a credit event occurs, the value of the referenced obligation received by the Fund coupled with the periodic payments previously received, may be less than the Maximum Payout Amount it pays to the buyer, resulting in a loss to the Fund.

At June 30, 2008, the Fund had Sale Contracts outstanding with Maximum Payout Amounts aggregating \$25,980,000, with net unrealized appreciation of \$315,482, and terms of less than one year to 3 years, as reflected in the portfolio of investments.

In certain circumstances, the Fund may hold Sale Contracts on the same referenced obligation and with the same counterparty it has purchased credit protection, which may reduce its obligation to make payments on Sale Contracts, if a credit event occurs. As of June 30, 2008, the Fund did not have Buy Contracts outstanding with respect to the same referenced obligation and same counterparty of certain Sale Contracts outstanding.

5. Currency Transactions

The Fund may invest in non-U.S. Dollar securities on a currency hedged or unhedged basis. The Fund may seek investment opportunities by taking long or short positions in currencies through the use of currency-related derivatives, including forward currency exchange contracts, futures and options on futures, swaps, and options. The Fund may enter into transactions for investment opportunities when it anticipates that a foreign currency will appreciate or depreciate in value but securities denominated in that currency are not held by the Fund and do not present attractive investment opportunities. Such transactions may also be used when the Adviser believes that it may be more efficient than a direct investment in a foreign currency-denominated security. The Fund may also conduct currency exchange contracts on a spot basis (i.e., for cash at the spot rate prevailing in the currency exchange market for buying or selling currencies).

6. Dollar Rolls

The Fund may enter into dollar rolls. Dollar rolls involve sales by the Fund of securities for delivery in the current month and the Fund simultaneously contracting to repurchase substantially similar (same type and coupon) securities on a specified future date. During the roll period, the Fund forgoes principal and interest paid on the securities. The Fund is compensated by the difference between the current sales price and the lower forward price for the future purchase (often referred to as the "drop") as well as by the interest earned on the cash proceeds of the initial sale. Dollar rolls involve the risk that the market value of the securities the Fund is obligated to repurchase under the agreement may decline below the repurchase price. Dollar rolls are speculative techniques and may be considered to be borrowings by the Fund. For the six months ended June 30, 2008, the Fund did not earn drop income.

7. Reverse Repurchase Agreements

Under a reverse repurchase agreement, the Fund sells securities and agrees to repurchase them at a mutually agreed upon date and price. At the time the Fund enters into a reverse repurchase agreement, it will establish a segregated account with the custodian containing liquid assets having a value at least equal to the repurchase price.

For the six months ended June 30, 2008, the average amount of reverse repurchase agreements outstanding was \$598,901,768 and the daily weighted average annualized interest rate was 2.44%.

NOTE D

Common Stock

During the six months ended June 30, 2008 and the year ended December 31, 2007, the Fund did not issue any shares in connection with the Fund's dividend reinvestment plan.

NOTE E

Securities Lending

The Fund has entered into a securities lending agreement with AG Edwards & Sons, Inc. (the "Lending Agent"). Under the terms of the agreement, the Lending Agent, on behalf of the Fund, administers the lending of portfolio securities to certain broker-dealers. In return, the Fund receives fee income from the lending transactions or it retains a portion of interest on the investment of any cash received as collateral. The Fund also continues to receive dividends or interest on the securities loaned. Under the terms of the securities lending agreement, security voting rights pass to the borrower, although the Fund can at will terminate a loan and regain the right to vote upon receipt of the security. Unrealized gain or loss on the value of the securities loaned that may occur during the term of the loan will be reflected in the accounts of the Fund. All loans are continuously secured by collateral exceeding the value of the securities loaned. All collateral consists of either cash or U.S. government securities. The Lending Agent may invest the cash collateral received in accordance with the investment restrictions of the Fund in one or more of the following investments: U.S. government or U.S. government agency obligations, bank obligations, corporate debt obligations, asset-backed securities, investment funds, structured products, repurchase agreements and an eligible money market fund. The Lending Agent will indemnify the Fund for any loss resulting from a borrower's failure to return a loaned security when due. As of June 30, 2008, the Fund had no securities out on loan. For the six months ended June 30, 2008, the Fund earned fee income of \$180 which is included in interest income in the accompanying statement of operations.

NOTE F

Bank Borrowing

The Fund participates in a credit facility for a commercial paper asset securitization program with Societe Generale ("SG") as Administrative Agent, and Barton Capital Corporation ("Barton") as lender. The credit facility expires on August 8, 2012 and has a maximum limit of \$400 million. Under the SG Program, Barton will fund advances to the Fund through the issuance of commercial paper rated A-1+ by Standard & Poor's Ratings Services and P-1 by Moody's Investors Service, Inc. The collateral value must be at least 171% of outstanding borrowings. The borrowings under the SG program are secured by the pledging of the Fund's portfolio securities as collateral. The interest rate on the Fund's borrowings is based on the interest rate carried by the commercial paper. The weighted average annual interest rate was 3.73% and the average borrowing was \$400,000,000 for the six months. At June 30, 2008, the interest rate in effect was 3.20% and the amount of borrowings outstanding was \$400,000,000.

NOTE G

Risks Involved in Investing in the Fund

Interest Rate Risk and Credit Risk Interest rate risk is the risk that changes in interest rates will affect the value of the Fund's investments in fixed-income debt securities such as bonds or notes. Increases in interest rates may cause the value of the Fund's investments to decline. Credit risk is the risk that the issuer or guarantor of a debt security, or the counterparty to a derivative contract, will be unable or unwilling to make timely principal and/or interest payments, or to otherwise honor its obligations. The degree of risk for a particular security may be reflected in its credit risk rating. Credit risk is greater for medium quality and lower-rated securities. Lower-rated debt securities and similar unrated securities (commonly known as "junk bonds") have speculative elements or are predominantly speculative risks.

Foreign Securities Risk Investing in securities of foreign companies or foreign governments involves special risks which include changes in foreign currency exchange rates and the possibility of future political and economic developments which could adversely affect the value of such securities. Moreover, securities of many foreign companies or foreign governments and their markets may be less liquid and their prices more volatile than those of comparable U.S. companies or of the U.S. government.

The Fund invests in the sovereign debt obligations of countries that are considered emerging market countries at the time of purchase. Therefore, the Fund is susceptible to governmental factors and economic and debt restructuring developments adversely affecting the economics of these emerging market countries. In addition, these debt obligations may be less liquid and subject to greater volatility than debt obligations of more developed countries.

Currency Risk This is the risk that changes in foreign currency exchange rates may negatively affect the value of the Fund's investments or reduce the returns of the Fund. For example, the value of the Fund's investments in foreign currency-denominated securities or currencies may decrease if the U.S. Dollar is strong (*i.e.*, gaining value relative to other currencies) and other currencies are weak (*i.e.*, losing value relative to the U.S. Dollar). Currency markets are generally not as regulated as securities markets. Independent of the Portfolio's investments in securities denominated in foreign currencies, the Portfolio's positions in various foreign currencies may cause the Portfolio to experience investment losses due to the changes in exchange rates and interest rates.

Leverage Risk The Fund participates in a credit facility for the purpose of utilizing investment leverage. The Fund may utilize additional leverage through the investment techniques of reverse repurchase agreements and dollar rolls. Reverse repurchase agreements and dollar rolls are speculative techniques and are considered borrowings by the Fund.

ALLIANCEBERNSTEIN INCOME FUND 47

Notes to Financial Statements

The effect of leverage can produce higher shareholder returns than if the Fund were not leveraged, and the use of leverage techniques can add to the net asset value (NAV) of the Common Stock. However, the risks of such techniques are potentially a higher volatility of the NAV of the Common Stock, potentially more volatility in the market value of the Common Stock and the relatively greater effect on the NAV of the Common Stock caused by favorable or adverse changes in the currency exchange rates. In addition, changes in the interest rate environment can increase or decrease shareholder returns. The Fund maintains asset coverage of at least 300% with respect to borrowings.

To the extent that the current interest rate on the Fund's indebtedness approaches the net return on the leveraged portion of the Fund's investment portfolio, then the benefit to the shareholders will be reduced. If the rate on indebtedness were to exceed the net return on the same portion of the portfolio, then this would result in a lower rate of return for the shareholders. Similarly, the use of leverage in a declining market can advance the decrease of the Fund's NAV more so than if the Fund were not leveraged, which would likely be reflected in a greater decline in the market price for shares of Common Stock than if the Fund were not leveraged. In extreme cases, if the Fund's current investment income were not sufficient to meet interest payments on indebtedness or if the Fund failed to maintain the asset coverage required by the 1940 Act, then it could be necessary for the Fund to liquidate certain investments at a time when it may be disadvantageous to do so, thereby reducing its NAV.

Indemnification Risk In the ordinary course of business, the Fund enters into contracts that contain a variety of indemnifications. The Fund's maximum exposure under these arrangements is unknown. However, the Fund has not had prior claims or losses pursuant to these indemnification provisions and expects the risk of loss thereunder to be remote.

NOTE H

Distributions to Shareholders

The tax character of distributions to be paid for the year ending December 31, 2008 will be determined at the end of the current fiscal year. The tax character of distributions paid during the fiscal years ended December 31, 2007 and December 31, 2006 were as follows:

	2007	2006
Distributions paid from:		
Ordinary income	\$ 176,652,954	\$ 141,066,107
Total taxable distributions	176,652,954	141,066,107
Total distributions paid	\$ 176,652,954	\$ 141,066,107

As of December 31, 2007, the components of accumulated earnings/(deficit) on a tax basis were as follows:

Undistributed ordinary income	\$ 28,096,812
Accumulated capital and other losses	(205,256,320) ^(a)
Unrealized appreciation/(depreciation)	77,217,646 ^(b)
Total accumulated earnings/(deficit)	\$ (99,941,862)

^(a) On December 31, 2007, the Fund had a net capital loss carryforward of \$198,507,153 of which \$8,878,672 expires in the year 2008, \$48,113,872 expires in the year 2009, \$137,668,099 expires in the year 2010 and \$3,846,510 expires in the year 2014. To the extent future capital gains are offset by capital loss carryforwards, such gains will not be distributed. Based on certain provisions in the Internal Revenue Code, various limitations regarding the future utilization of these carryforwards, brought forward as a result of the Fund's merger with ACM Government Securities Fund, ACM Government Spectrum Fund, and ACM Government Opportunity Fund may apply. During the fiscal year, the Fund utilized capital loss carryforwards of \$2,607,576. In addition the Fund had \$63,751,309 of capital loss carryforward which expired in the fiscal year ended December 31, 2007. For the year ended December 31, 2007, the Fund deferred losses on straddles of \$3,430,828. Net capital losses incurred after October 31, and within the taxable year are deemed to arise on the first business day of the Fund's next taxable year. The Fund deferred to January 1, 2008, post October capital loss of \$3,318,339.

^(b) The difference between book-basis and tax-basis unrealized appreciation/(depreciation) is attributable primarily to the tax deferral of losses on wash sales, the difference between book and tax amortization methods for premium, the realization for tax purposes of unrealized gains and losses on certain derivative instruments and the difference between book and tax treatment of swap income.

NOTE I

Legal Proceedings

As has been previously reported, the staff of the U.S. Securities and Exchange Commission (SEC) and the Office of the New York Attorney General (NYAG) have been investigating practices in the mutual fund industry identified as market timing and late trading of mutual fund shares. Certain other regulatory authorities have also been conducting investigations into these practices within the industry and have requested that the Adviser provide information to them. The Adviser has been cooperating and will continue to cooperate with all of these authorities. The shares of the Fund are not redeemable by the Fund, but are traded on an exchange at prices established by the market. Accordingly, the Fund and its shareholders are not subject to the market timing and late trading practices that are the subject of the investigations mentioned above or the lawsuits described below.

Numerous lawsuits have been filed against the Adviser and certain other defendants in which plaintiffs make claims purportedly based on or related to the same practices that are the subject of the SEC and NYAG investigations referred to above. Some of these lawsuits name the Fund as a party. The lawsuits are now pending in the United States District Court for the District of Maryland pursuant to a ruling by the Judicial Panel on Multidistrict Litigation transferring and

centralizing all of the mutual funds involving market and late trading in the District of Maryland.

The Adviser believes that these matters are not likely to have a material adverse effect on the Fund or the Adviser's ability to perform advisory services relating to the Fund.

NOTE J

Recent Accounting Pronouncements

On July 13, 2006, the Financial Accounting Standards Board (FASB) released FASB Interpretation No. 48 Accounting for Uncertainty in Income Taxes (FIN 48). FIN 48 provides guidance for how uncertain tax positions should be recognized, measured, presented and disclosed in the financial statements. FIN 48 requires the evaluation of tax positions taken or expected to be taken in the course of preparing a fund's tax returns to determine whether the tax positions are more-likely-than-not of being sustained by the applicable tax authority. Tax positions not deemed to meet the more-likely-than-not threshold would be recorded in the current period. Adoption of FIN 48 is required for fiscal years beginning after December 15, 2006 and is to be applied to all open tax years as of the effective date. On June 29, 2007, the Fund implemented FIN 48 which supplements FASB 109, Accounting for Income Taxes . Management has analyzed the Fund's tax positions taken on federal income tax returns for all open tax years (tax years ended December 31, 2004-2006) for purposes of implementing FIN 48, and has concluded that no provision for income tax is required in the Fund's financial statements.

On March 19, 2008, the FASB released Statement of Financial Accounting Standards No. 161, Disclosures about Derivative Instruments and Hedging Activities (FAS 161). FAS 161 requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of and gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative agreements. The application of FAS 161 is required for fiscal years beginning after November 15, 2008 and interim periods within those fiscal years. At this time, management is evaluating the implications of FAS 161 and believes the adoption of FAS 161 will have no material impact on the Fund's financial statements.

ALLIANCEBERNSTEIN INCOME FUND 51

(a) As of January 1, 2004, the Fund has adopted the method of accounting for interim payments on swap contracts in accordance with Financial Accounting Standards Board Statement No. 133. These interim payments are reflected within net realized and unrealized gain (loss) on swap contracts, however prior to January 1, 2004, these interim payments were reflected within interest income/expense on the statement of operations. The effect of this change for the year ended December 31, 2004, was to decrease net investment income per share and increase net realized and unrealized gain (loss) on investment transactions. The effect on the per share amounts was less than \$0.005. The ratio of net investment income to average net assets was decreased by 0.02%

(b) Based on average shares outstanding.

(c) Total investment return is calculated assuming a purchase of common stock on the opening of the first day and a sale on the closing of the last day of each period reported. Dividends and distributions, if any, are assumed for purposes of this calculation, to be reinvested at prices obtained under the Fund's Dividend Reinvestment Plan. Generally, total investment return based on net asset value will be higher than total investment return based on market value in periods where there is an increase in the discount or a decrease in the premium of the market value to the net asset value from the beginning of the end of such periods. Conversely, total investment return based on net asset value will be lower than total investment return based on market value in periods where there is a decrease in the discount or an increase in the premium of the market value to the net asset value from the beginning to the end of such periods. Total investment return calculated for a period of less than one year is not annualized.

(d) Annualized.

(e) Excludes net interest expense of 1.51%, 2.64%, 2.73%, 1.67%, .68% and .57%, respectively, on borrowings (see Notes C and F).

* Includes the impact of proceeds received and credited to the Fund resulting from the class action settlements, which enhanced the Fund's performance by .33% and 1.69% for the six months ended June 30, 2008 and for the year ended December 31, 2007, respectively.

SUMMARY OF GENERAL INFORMATION

Shareholder Information

The daily net asset value of the Fund's shares is available from the Fund's Transfer Agent by calling (800) 426-5523. The Fund also distributes its daily net asset value to various financial publications or independent organizations such as Lipper Inc., Morningstar, Inc. and Bloomberg.

The Fund's NYSE trading symbol is ACG. Weekly comparative net asset value (NAV) and market price information about the Fund is published each Monday in *The Wall Street Journal* and each Sunday in *The New York Times* and other newspapers in a table called "Closed-End Bond Funds."

Dividend Reinvestment Plan

A Dividend Reinvestment Plan provides automatic reinvestment of dividends and capital gains distributions in additional Fund shares. The Plan also allows you to make optional cash investments in Fund Shares through the Plan Agent. If you wish to participate in the Plan and your shares are held in your name, simply complete and mail the enrollment form in the brochure. If your shares are held in the name of your brokerage firm, bank or other nominee, you should ask them whether or how you can participate in the Plan.

For questions concerning shareholder account information, or if you would like a brochure describing the Dividend Reinvestment Plan, please call Computershare Trust Company, N.A. at (800) 219-4218.
