Table of Contents**Forward-Looking Statements**

This report contains certain forward-looking statements that are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements present the Company's expectations or forecasts of future events. These statements can be identified by the fact that they do not relate strictly to historical or current facts. They are frequently accompanied by words such as "believe," "intend," "expect," "anticipate," "plan," or "estimate" and other words of similar meaning, and include statements relating to the Company's liquidity sources and the adequacy of those sources to meet the Company's working capital needs, anticipated capital expenditures and debt obligations for the next twelve months; the Company's beliefs and expectations regarding the impact of the global economy on consumer demand and on its operating and financial results during 2009 and beyond; the Company's beliefs and expectations regarding significant improvements in the Company's operations during the fourth quarter of fiscal 2009 and first quarter of fiscal 2010; the Company's ability to increase the amount of sales of its products and expected sales levels of its products; the Company's ability to increase prices and maintain or improve its gross margins; the Company's ability to maintain good relationships with its suppliers and major customers; the Company's ability to make itself more attractive to new and existing customers; the Company's ability to pass cost increases on to its customers; the Company's ability to compete for limited shelf space at home improvement retailers; the Company's expectations regarding the importance of service and promotional support to its major customers; the Company's expectations regarding consolidation among the national and large regional home improvement retailers and expectations regarding increases in their future market share and its effect on the Company, including the Company's reliance on Home Depot and Lowe's; the Company's expectations regarding Home Depot's and Lowe's plans for store growth; the Company's ability to continue to do business around the world; the Company's ability to successfully expand its market share, capitalize on new customers and cross-sell its products; the Company's ability to introduce new and innovative products, expand existing product lines, and increase its sales and market penetration; the Company's ability to successfully identify and complete acquisitions and to improve its distribution capabilities; the Company's intent to delist its common stock from NASDAQ and deregister its common stock under the Exchange Act and the expected timing of such actions; the Company's expectations that its common stock will continue to trade on the Pink Sheets; the Company's potential consolidation of operations; the Company's ability to continue its performance and that of its products; the Company's ability to evaluate both domestic and worldwide specialty tool companies; the Company's ability to enhance its position as a worldwide manufacturer and distributor of specialty tools; expectations regarding the growth in sales of the largest home improvement retailers as compared to the rate of sales growth in the overall market; expectations regarding the strength of the housing, residential and commercial construction and home improvement markets; expectations regarding broadening the Company's product lines; expectations regarding growth trends in the flooring segment of the home improvement market and among its customer base and its impact on the Company; expectations regarding degree of credit risk due to the Company being directly affected by the well being of the home center industry; expectations regarding sources of supply for its products; expectations regarding competition in the home improvement market; expectations that the Company will continue to penetrate more foreign markets; expectations regarding the benefits that the Company can offer and are not otherwise available to foreign manufacturers; expectations regarding payment of dividends; expectations regarding the impact of inflation; expectations regarding the steps the Company plans to implement for fiscal 2010 to remediate its material weaknesses; expectations regarding recently issued accounting standards; the Company's ability to improve its distribution capabilities through increased use of technology and reevaluation of geographic locations; the Company's ability to compete with foreign competitors; the impact of the loss of one or more of the Company's patents; the adequacy of the Company's existing physical facilities; the ability of the Company to lease facilities for future needs; the expected impact of the outcome of any legal proceedings in which the Company is involved; the Company's expectations regarding its future effective tax rate; the cost of compliance with Environmental Laws and the Company's anticipated expenditures on monitoring of wells and other environmental activity.

These forward-looking statements are based on currently available information and are subject to risks and uncertainties which could cause actual results to differ materially from those discussed in the forward-looking statements and from historical results of operations (See Item 1A-Risk Factors). Among the risks and uncertainties which could cause such a difference are the assumptions

Table of Contents

upon which the Company bases its assessments of its future working capital and capital expenditures; the general economic conditions in North America and the world; the state of the housing, residential and commercial construction and home improvement markets; the Company's ability to satisfy its working capital needs and to finance its anticipated capital expenditures; the Company's ability to comply with the covenants in its debt facilities and its ability to obtain additional financing if necessary; the Company's dependence upon a limited number of customers for a substantial portion of its sales and the continued success of initiatives with those customers; the success of the Company's marketing and sales efforts; interruptions in supply or price changes in the items purchased by the Company; improvements in productivity and cost reductions; increased pricing pressures from customers and competitors and the ability to defend market share in the face of price competition; the Company's ability to maintain and improve its brands; the Company's reliance upon certain major foreign suppliers; the Company's reliance upon suppliers and sales agents for the purchase of finished products which are then resold by it; the level of demand for the Company's products among existing and potential new customers; the Company's ability to successfully delist its common stock under NASDAQ and deregister its common stock under the Exchange Act on its anticipated timeline; the Company's ability to have its common stock trade on the Pink Sheets; the Company's ability to successfully implement the remedial measures to address its material weaknesses; the Company's dependence upon the efforts of Mr. Lewis Gould, the Company's Chief Executive Officer and certain other key personnel; the Company's ability to successfully integrate new management personnel into the Company; the Company's ability to accurately predict the number and type of employees required to conduct its operations and the compensation required to be paid to such personnel; the Company's ability to manage its growth, and the risk of economic and market factors affecting the Company or its customers; the impact of new accounting standards on the Company; the Company's belief that there will be no future adverse effect on the fair value of the Company's goodwill or other intangible assets; decisions by management related to accounting issues, and regulation and litigation matters; and other risks and uncertainties described elsewhere herein and in other reports filed by the Company with the Securities and Exchange Commission.

All forward looking statements included herein are made only as of the date such statements are made and the Company does not undertake any obligation to publicly update or correct any forward-looking statements to reflect events or circumstances that subsequently occur or of which the Company hereafter becomes aware. Subsequent written and oral forward-looking statements attributable to the Company or persons acting on its behalf are expressly qualified in their entirety by the cautionary statements set forth above and elsewhere in this report and in other reports filed by the Company with the Securities and Exchange Commission.

PART I

Item 1. Business
General

Founded in 1979 and incorporated in Delaware in 1996, Q.E.P. Co., Inc. (the Company or Q.E.P.) manufactures, markets and distributes a broad line of specialty tools and flooring related products for the home improvement market in the United States of America and throughout the world. Under brand names including Q.E.P.®, ROBERTS®, Capitol®, Vitrex®, PRCI® and Elastiment®, the Company markets over 3,000 specialty tools and flooring related products used primarily for surface preparation and installation of ceramic tile, carpet, vinyl and wood flooring. Q.E.P.'s products include flooring adhesives and underlayments, wet saws, trowels, floats, tile cutters, spacers, nippers, pliers, carpet trimmers and cutters, seaming tape, tack strips, knives, dry set powders and grouts. These products are sold to home improvement retailers, including national and regional chains such as Home Depot and Lowe's, international chain stores such as Bunnings, Wickes, Topps Tiles, Leroy Merlin and Sodimac, specialty distributors to the hardware, construction, flooring and home improvement trades and chain or independent hardware, tile, and carpet retailers for use by the do-it-yourself consumers as well as the construction or remodeling professional.

Table of Contents

The Company's principal subsidiaries include Roberts Consolidated Industries, Inc., a worldwide leader in the carpet installation market; Roberts Capitol, Inc., a manufacturer of adhesives in Dalton, Georgia; QEP California, Inc., a manufacturer of adhesives in Adelanto, California; Boiardi Products Corp. of Little Falls, N.J., a manufacturer of a full line of thin-set mortars, grouts, self-leveling concrete toppings and crack-suppressing waterproof membranes used in the flooring industry; Roberts Company Canada Limited, a manufacturer of adhesives and grouts, and a distributor of flooring accessories in Canada; Q.E.P. Aust. Pty, Ltd., one of the largest distributors of tools and installation products for all types of flooring in the Australian marketplace; Q.E.P. Co. N.Z. Limited, a distributor of accessory flooring supplies in New Zealand; Q.E.P. Co. U.K., Ltd. and Q.E.P. Roberts Ireland, Ltd., distributors of accessory flooring and safety products in the United Kingdom and Ireland; PRCI S.A., a distributor of ceramic tile tools to the retail and distribution marketplace in France; Q.E.P. Roberts Mexicana S. de R.L. de C.V., a distributor of flooring installation products in Mexico; Q.E.P. Chile Limitada, a distributor of ceramic tile accessories located in Santiago, Chile; Zocalis, S.R.L., an Argentinean manufacturer of ceramic borders and trim; Q.E.P. Peru S.A.C., a Peruvian distributor of ceramic borders and trim; Q.E.P. Co. HK Limited., a Hong Kong registered company with a representative office in Shanghai, China, that provides purchasing services to QEP and its subsidiaries; and Harmony Depot Trading Shanghai Company Limited, a licensed trading company in China.

The Company operates in five business segments: Domestic, Canada, Europe, Australia/New Zealand and Other. Management has chosen to organize the segments into geographic areas, with each segment being the responsibility of a segment manager, except for the Canadian segment and Mexico in the Other segment, which are managed by members of the Domestic segment's senior management team. Each segment markets and sells flooring-related products to the residential, new construction, do-it-yourself and professional remodeling and renovation markets and home centers. The European segment is made up of our operations in the UK, France, and Ireland. The Other segment is made up of operations in Latin America and Asia.

Market Overview

The Company is a supplier of specialty flooring installation products and sells to the home improvement market. According to the industry information published by *Floor Covering Weekly*, a trade publication, total floor covering sales for 2007 in the United States were approximately \$21.7 billion, a decline of 7.5% from 2006. The housing starts and turnover decline that started in 2005, continued to decline in 2008. With the slowdown in residential construction, the unprecedented number of home foreclosures, the weakening of consumer demand and the uncertainty in the financial markets, the Company expects that 2009 will also be a challenging year for the home improvement market. The Company believes, however, that the long-term demographics for housing are sound. As in prior years, the continued dominance of national home improvement retailers results from their ability to offer broad product lines, project advice and orientation, competitive pricing, aggressive promotions, and multiple location, large-format stores.

The Company's two largest customers, Home Depot and Lowe's, accounted for approximately \$122 billion of home center sales for their fiscal year 2008. Home Depot and Lowe's, experienced annual sales decline of 8% and less than 1% in fiscal 2008, respectively, according to their published financial reports and both have plans to continue increasing the number of stores each operates at slower than recent historical rates. As consolidation continues among home improvement retailers, the Company expects that the sales growth rate of the largest national and regional home improvement retailers will continue to increase at greater rates than the sales growth rate in the overall market. The Company expects that the growth trends in the flooring segment of the home improvement market and among its customer base will directly affect the Company's ability to generate growth in its sales and net income, its expansion opportunities and the nature of its sales and marketing initiatives.

Table of Contents

Business Strategy

The Company's long-term strategy is to continue to enhance its position as a worldwide leading manufacturer and distributor of specialty tools and related products by introducing new products in traditional and non-traditional segments, cross-selling products among its channels of distribution, expanding market share by obtaining new customers, capitalizing on the expected long-term growth of its largest customers and of the home improvement market as a whole, and seeking new markets through acquisitions and product line expansion. Key elements of the Company's strategy include:

Increase Sales By Expanding Product Lines and Adding New Customers. The Company seeks to expand its product lines by introducing new and innovative products which can be marketed to the Company's existing customer base. Through its prior acquisitions, the Company has expanded the number of products available and its line of flooring installation products. In addition to expanding product offerings through acquisitions, the Company internally develops and offers products both in response to customer demands and in order to develop an expanded product line. The Company believes that broadening its product lines in traditional and non-traditional segments will make it a more attractive supplier to the major home improvement retailers and specialty distributors, thereby increasing the Company's sales and market penetration. Additionally, the Company is targeting mass merchandisers as prospective customers for a portion of its current product line.

Capitalize on Cross-Selling Opportunities. The Company believes that there are significant opportunities for cross selling its products among its existing markets and channels of distribution. The Company has sought to identify acquisition candidates with complementary product lines and to cross sell acquired product lines to its existing customer base and its existing product lines to the customers of the acquired business.

Pursue Strategic Acquisitions. The Company has historically broadened its product lines, increased its customer base and increased its manufacturing, distribution and marketing capabilities through acquisitions. The Company expects to continue to evaluate acquisitions of both domestic and worldwide specialty tool and adhesive manufacturers, distributors and other companies whose products, distribution channels and brand names are complementary to those of the Company and which could offer further opportunities for product cross selling, expansion of manufacturing and marketing operations and the addition of new customers.

Enhance Distribution and Manufacturing Capabilities. In order to effectively serve the customer base and help to control cost increases, the Company seeks to improve its distribution capabilities through the increased use of technology as well as reviewing its facilities for correct size and geographic location. The Company considers and evaluates consolidating its manufacturing and distribution operations where appropriate. The Company currently has distribution and manufacturing capabilities located throughout the United States, Canada, Australia, New Zealand, the United Kingdom, Mexico, France, Ireland, and South America. The Company has also entered into license and royalty agreements with third parties that grant them the right to manufacture, market and distribute products using the Company's Roberts® and Smoothedge® brand names to customers, other than mass merchants. The Company estimates that in fiscal 2009, it manufactured approximately 26% of its Q.E.P.® and Roberts® product lines.

Products

The Company manufactures, markets and distributes a broad line of over 3,000 specialty tools and flooring related products. The Company's products are offered under brand names including Q.E.P.®, ROBERTS®, Capitol®, Vitrex®, PRCI® and Elastiment® and are used primarily for surface preparation and installation of ceramic tile, carpet, vinyl and wood flooring and laminate.

The Company manufactures and distributes adhesives, underlayment, grouts, mortars, dry set powders and distributes an assortment of carpet installation tools as well as floats, tile cutters, trowels, electric saws, nippers and other products to the flooring industry. These products are sold to distributors, retailers and do-it-yourself customers. Although the Company manufactures and distributes over 3,000 products, a majority of the Company's sales are to customers who purchase between 20 and 250 individual stock-keeping

Table of Contents

units. As the Company seeks to broaden its product lines, the competition for limited shelf space available at home improvement retailers for specialty tools and related products may limit sales of existing or newly introduced products.

The Company maintains a research and development program through which it seeks to identify new product opportunities within its core markets. Methods by which the Company seeks to identify product opportunities include soliciting product feedback from customers through its outside sales force and manufacturers' representatives, review of product brochures and catalogs issued by foreign and domestic competitors of specialty tools, review of product concepts with buyers employed by its customers, and attendance at industry trade shows and conventions at which new product concepts are introduced and discussed. The Company also considers participation in joint ventures, royalty agreements and evaluation of product samples to be an important part of its effort to identify new product opportunities. The Company maintains a product quality control program primarily to verify the quality of its existing products and to develop ideas for additional products or enhancements to existing products.

Relationship with Major Customers

In 1982, the Company began selling products to Home Depot, which is currently the largest home improvement retailer in the world and the second largest retailer in the United States based on annual sales volume. In 1993, the Company added Lowe's as a customer, which is the second largest home improvement retailer in the world and eighth largest retailer in the United States. Home Depot and Lowe's are the Company's two largest customers accounting for 59% and 7% of the Company's fiscal 2009 sales, respectively.

Because of the importance of home improvement retailers to its business, the Company has worked with these major customers to supplement their customer service programs to ensure that the specific needs of the end user are given a high priority. Features of the Company's customer service programs for its major customers include providing a wide range of in-store services, such as, assistance with inventory, maintenance of product displays, introduction of new products, maintaining rapid shipping capabilities, delivering orders promptly, holding education classes for retail store personnel, packaging with multilingual labels, prepaying delivery for product shipments with minimum purchase requirements, participating in cooperative promotions and special sales events, providing product research for buyers, operating a customer service hotline, providing parts and repair service, extension of advertising and other promotional allowances, accepting orders electronically and billing through electronic data interchange, bar coding for each individual stock-keeping unit, and incorporating anti-theft tags in packaging. The Company believes that its major customers place considerable value on service and promotional support and frequently evaluate its service and promotional activities in an effort to serve its customers more effectively.

The Company believes that the consolidation among home improvement retailers will continue and that the national and large regional home improvement retailers will continue to increase their market share in the near future, although Home Depot and Lowe's have plans to increase the number of stores each operates over the next several years at slower than historical rates. As a result, the Company expects the percentage of its sales to these customers to continue to be significant.

The loss of, or any significant reduction in business with, Home Depot or Lowe's as a customer of the Company would have a material adverse effect on the financial position and results of operations of the Company.

Manufacturing and Suppliers

The Company estimates that in fiscal 2009 it manufactured approximately 26% of its Q.E.P.® and Roberts® product lines. The Company manufactures flooring adhesives at its facilities in Mexico Missouri; Dalton, Georgia; Adelanto California; and Bramalea, Ontario. Carpet installation tools and ceramic tile spacers are produced at the Company's facility in Mexico, Missouri. Grouts and related products are manufactured at the Company's Little Falls, New Jersey, and Bramalea, Ontario, Canada facilities; and laminate flooring underlayment is manufactured in Dalton, Georgia.

Table of Contents

The Company purchased finished products and raw materials from approximately 150 different suppliers in fiscal 2009. Although the Company believes that multiple sources of supply exist for nearly all of the products and components purchased from outside suppliers and generally maintains at least two sources of supply for each item purchased, interruptions in supply or price changes in the items purchased by the Company could have a material adverse effect on the Company's operations. The Company receives products from its suppliers into its four main North American warehouses located in Mexico, Missouri; Dalton, Georgia; Adelanto, California and Bramalea, Ontario, Canada. Disruption in supply to any of these warehouses may result in excessive inventory levels and added costs to the Company. In fiscal 2009, the Company purchased approximately \$11.4 million and \$7.7 million of finished products for its domestic operations from two foreign suppliers representing 12% and 8%, respectively of total domestic product purchases.

Distribution, Sales and Marketing

The Company's specialty tools and related products are currently sold through four distinct distribution channels: (i) the Company's sales staff; (ii) independent manufacturing representatives; (iii) outside salaried and commissioned sales representatives; and (iv) in-house telemarketing sales force. Management estimates that gross sales through its primary distribution channels in fiscal 2009 were as follows: 78% to national and regional home improvement retailers and 22% to specialty distributors, other specialty retailers and original equipment manufacturers.

The Company maintains an in-house creative services department through which it produces and develops color product catalogs, signage, point of purchase materials, display layouts and distinctive packaging to enhance sales per square foot at the retail level and to reinforce the Company's brand images. The Company maintains a website which allows customers to obtain product information, catalogues and order replacement parts. The Company also informs customers of product promotions through direct contact via regular mail, e-mail or fax.

The Company's marketing and sales representatives, or its manufacturers' representatives, conduct regular visits to many customers' individual retail stores. In addition, the Company or its sales representatives provide product knowledge classes for retail store personnel. The Company also evaluates the product mix at its customers' locations from time to time with a view toward evolving the product mix to increase sales per square foot. When the Company secures a new customer, or introduces a new product into existing customer stores, the Company generally resets all displays and assists store personnel in becoming familiar with the Company's product line or new product, as applicable.

Competition

The Company believes that competition in the home improvement flooring product market is based primarily on product quality, delivery capabilities, brand name recognition, availability of retail shelf space and price. The Company believes that its competitive strengths are its product quality, its wide range of products, delivery capabilities, brand recognition and strong customer relationships. The Company faces competition largely on a product-by-product basis from numerous manufacturing and distribution companies. The Company believes that the diversity of its product portfolio, among other things, allows it to compete effectively, although some competitors may sell larger quantities of a particular product than the Company.

The Company is aware of a number of competitors, many of which are foreign and may have greater financial, marketing and other resources than the Company. The Company's international sales, excluding Canada, accounted for approximately 20% of net sales during fiscal year 2009. Fiscal 2009 net sales generated by the Company's Australian/New Zealand subsidiaries were approximately 11%, its European subsidiaries were approximately 7% and its Latin American subsidiaries were approximately 2%. The Company is continuing to penetrate more markets within the countries it currently serves and, as a result, the Company may experience competition from foreign companies, which could adversely affect the Company's gross margins on its international sales.

Table of Contents

Certain of the Company's larger customers have in the past contacted one or more of the Company's foreign suppliers to discuss purchasing home improvement products directly from these suppliers. Although the Company believes that its diversified product line, brand recognition and customer service will continue to offer benefits not otherwise available to the Company's customers from foreign manufacturers, the Company could experience competition from one or more foreign manufacturers which now serve as suppliers to the Company. If one or more of the Company's larger customers were to begin purchasing products previously supplied by the Company directly from foreign manufacturers, the Company's business would be adversely affected. Increased competition from these manufacturers or others could result in lower sales, price reductions or loss of market share, each of which would have an adverse effect on the Company's results of operations.

Environmental Matters

The Company is subject to federal, state and local laws, regulations and ordinances governing activities or operations that may have adverse environmental effects, such as discharges to air and water, handling and disposal practices for solid, special and hazardous wastes, imposing liability for the cost of clean up, and for certain damages resulting from sites of past spills, disposal or other releases of hazardous substances (together, Environmental Laws). Sanctions which may be imposed for violation of Environmental Laws include the payment or reimbursement of investigative and clean up costs, administrative penalties and, in certain cases, prosecution under environmental criminal statutes. The Company's manufacturing facilities are subject to environmental regulation by, among other agencies, the Environmental Protection Agency, the Occupational Safety and Health Administration, and various state authorities in the states where such facilities are located. The activities of the Company, including its manufacturing operations at its leased facilities, are subject to the requirements of Environmental Laws. The Company believes that the cost of compliance with Environmental Laws to date has not been material to the Company. The Company is not currently aware of any situations requiring remedial or other action which would involve a material expense to the Company, or expose the Company to material liability under Environmental Laws. As the operations of the Company involve the storage, handling, discharge and disposal of substances which are subject to regulation under Environmental Laws, there can be no assurance that the Company will not incur any material liability under Environmental Laws in the future or will not be required to expend funds in order to effect compliance with applicable Environmental Laws.

The Company completed testing at its facility in Bramalea, Ontario, Canada for leakage of hazardous materials and, as a result, in fiscal 1999 the Company prepared a plan to remediate the contamination over a period of years and this plan was subsequently approved by the Canadian Ministry of Environment. Through fiscal 2009, the Company has spent approximately \$1.0 million and anticipates spending approximately \$0.1 million on ongoing monitoring of wells and other environmental activity per year for the next three years.

During fiscal 2005, the Company settled a lawsuit that was filed on December 27, 2002 whereby Roberts Holdings International, Inc. (Roberts Holding), an inactive subsidiary of the Company, was named as a third party defendant in a case before the United States District Court for the Western District of Michigan titled Strebtor Inc. v. International Paper Co., Case No. 1:02 CV0948. The third party plaintiff alleged that Roberts Holding is a successor to a company known as Roberts Consolidated Industries, Inc. and was required to indemnify previous owners for costs associated with the clean-up of a property in Kalamazoo, Michigan. The Company agreed to pay \$40,000 per year beginning in October 2004 for five consecutive years in settlement of this action. In accordance with the settlement agreement, the final payment was made in fiscal 2009.

Intellectual Property

The Company markets its specialty tools and related products under various trademarks owned by the Company or its subsidiaries, including Q.E.P.®, ROBERTS®, Capitol®, Vitrex®, PRCI® and Elastiment. The Company has devoted substantial time, effort

Table of Contents

and expense to the development of brand name recognition and goodwill for products sold under its trademarks, has not received any notice that its use of such marks infringes upon the rights of others, and is not aware of any activities which would appear to constitute infringement of any of its marks. Roberts Consolidated Industries, Inc. has secured domestic and foreign patents relating to certain of its products. These patents are scheduled to expire in the years 2009 through 2026. Although the patents are important to the operation of Roberts Consolidated Industries, Inc., the Company does not believe that the loss of any one or more of these patents would have a material adverse effect on the Company. Roberts Consolidated Industries, Inc. also licenses its name to various foreign distributors and a domestic manufacturer of tackstrip and carpet seaming tape.

Employees

As of May 1, 2009, the Company had 381 employees, including 58 administrative employees, 79 sales and marketing employees, 148 manufacturing and operation employees and 96 employees responsible for shipping activities. Of the 381 total employees, 21 are part-time and 66 are located outside of the Company's North American subsidiaries. The Company has not experienced any work stoppages and none of the Company's employees are represented by a union. The Company considers its relations with the employees to be good.

Item 1A. Risk Factors

You should carefully consider the risks described below and all other information contained in this annual report on Form 10-K, including our consolidated financial statements and the related notes thereto. The risks and uncertainties described below are not the only ones facing us. Additional risks and uncertainties not presently known to us, or not presently deemed material by us, may also impair our operations and performance. If any of the following risks actually occur, our business, financial condition or results of operations could be materially adversely affected.

The current weakness and any further deterioration of the global economic environment could negatively impact the Company's business, working capital, liquidity, access to the credit markets and business prospects.

The current weakness in the global economic environment and the credit and financial markets could negatively impact the Company's business in several ways. For instance, falling home prices, increases in foreclosure rates, increases in unemployment rates, declines in the equity markets, a tightening of credit availability, and concerns about the general health of the global economy have led to a significant decline in consumer confidence and consumer discretionary spending, which has caused and may continue to cause consumers to delay undertaking or determine not to undertake new home improvement projects, cause a decline in customer transactions overall, cause the Company's customers to delay purchasing or determining not to purchase Company products, or cause the Company's customers to extend or implement inventory management programs and consequently adversely affect the Company's financial performance. Other factors that could adversely affect the demand for the Company's products and consequently its financial performance include currency exchange rate fluctuations, interest rate fluctuations, fuel and other energy costs, inflation or deflation of commodity prices, slower rates of growth in real disposable personal income, and other factors beyond the Company's control.

The Company intends to delist from the NASDAQ Global Market and deregister its common stock under the Securities Exchange Act of 1934 which could negatively affect the Company and its stockholders, including having a negative impact on the liquidity and trading prices of the Company's common stock.

On May 29, 2009 the Company announced that its Board of Directors had approved the voluntary delisting of its common stock from the NASDAQ Global Market and the deregistering of its common stock under the Exchange Act.

The Company expects to file a Form 25, Notification of Removal from Listing and/or Registration under Section 12(b) of the Exchange Act, with the Securities and Exchange Commission and the NASDAQ on or before July 2, 2009. Upon filing of the Form 25 or shortly thereafter, the Company anticipates that its common stock will be quoted in the over-the-counter market on the Pink Sheets, a centralized electronic quotation service for over-the-counter securities. The Company expects its common stock will continue to trade on the Pink Sheets, so long as market makers continue to make a market in the Company's common stock.

The Company also intends to deregister its common stock and become a non-reporting company under the Exchange Act. On or before July 13, 2009, the Company expects to file a Form 15, Notice of Termination of Registration and Suspension of Duty to File, with the Securities and Exchange Commission to terminate its reporting obligations under the Exchange Act. When the Form 15 has been filed, the Company's obligation to file reports and other information under the Exchange Act, such as Forms 10-K, 10-Q and 8-K, will immediately be suspended.

Securities quoted on the Pink Sheets generally have significantly less liquidity than securities traded on a national securities exchange, including lower trading volumes, delays in the timing of transactions, reduced securities analyst and news coverage, and lower market prices than might otherwise be obtained. Stockholders may find it difficult to resell their shares at prices quoted on the Pink Sheets or at all. Additionally, the Company's common stock may be more adversely affected by changes in general market conditions, fluctuations in the Company's operating results, changes in the market's perception of the Company's business, and

Table of Contents

announcements made by the Company, its competitors or parties with whom it has business relationships. Further, the Company cannot ensure that market makers will make a market in the Company's common stock or that trading of its common stock will continue on the Pink Sheets.

The Company's common stock not being traded on a national securities exchange could have other adverse effects, including limitations on the Company's ability to issue additional securities for financing or other purposes, or to otherwise arrange for any financing it needs in the future, and the loss of confidence in the Company by current or prospective employees, customers, suppliers and others with whom the Company has or may seek to initiate business relationships. Additionally, once the Company's obligation to file reports and other information with the Securities and Exchange Commission under the Exchange Act is suspended, there will likely be less information publicly available about the Company.

The Company depends on a limited number of customers and the loss of one or more of these customers could adversely affect our business.

The Company is substantially dependent on two of its customers, Home Depot and Lowe's, for a large percentage of its revenues. These two customers accounted for approximately 66% and 61% of the Company's total net sales in fiscal 2009 and fiscal 2008, respectively. The Company expects that it will continue to rely upon these customers for a significant portion of its revenues. Either customer may significantly reduce its orders for the Company's products for a number of reasons, including changes in demand for the Company's products, extension or implementation of inventory management programs, delays or changes in scheduled product introductions, or changes in store upgrade or expansion plans. Should this happen, the Company's revenue could be temporarily or permanently affected, which could materially and adversely affect the Company's business, including but not limited to exposing the Company to excess inventory levels. Any significant and continuing reduction in business with Home Depot or Lowe's would have a material adverse effect on the financial position, results of operations and liquidity of the Company.

Risks associated with foreign currency exchange fluctuations related to the Company's financial reporting of its international operations and to its buying in currencies other than the local currencies in which it operates could adversely affect the Company's business, financial position and results of operations.

The Company is exposed to foreign currency risks resulting from changes in currency exchange rates because of its international operations and its dependence on Asian suppliers. The deterioration in the global economic environment has resulted in significant volatility in the global currency markets. Most recently, the volatility has resulted in a substantial strengthening of the U.S. dollar against the Canadian, European and Australian currencies. A relatively stronger U.S. dollar means that the revenues, profits and losses of our international operations will translate into lower U.S. dollar amounts. Moreover, the general strengthening of the Chinese Renminbi and inflationary pressures in China during the first half of the year put increased pressures on U.S. Dollar denominated pricing from major suppliers. The Company does not use forward contracts or other derivative instruments to mitigate the risks associated with fluctuating exchange rates. Although the Company finances certain foreign operations utilizing debt denominated in the currency of the local operating unit in order to mitigate its foreign currency exposure, the Company cannot predict the effect foreign currency fluctuations will have on its results of operations in future periods.

Volatility in currency exchange rates has affected and may continue to affect the Company's financial results. The Company records foreign currency translation adjustments as other comprehensive income. For fiscal 2009, comprehensive loss resulting from foreign currency translation adjustments was \$3.4 million and for fiscal 2008 comprehensive income was \$2.1 million. Further fluctuations in currency exchange rates could adversely affect the Company's results of operations in future periods.

Table of Contents

The Company may be unable to pass on to its customers increases in the costs of raw materials.

The prices of many of the Company's raw materials vary with market conditions. In addition the price of many of the Company's finished goods is impacted by changes in currency, freight costs and raw materials at the point of production. Over the past two years, the Company's costs of raw materials and fuel-related costs have fluctuated significantly and may continue to do so indefinitely due to the volatility of currency exchange rates and oil, gas and energy costs. Although the Company generally attempts to pass on increases in the costs of raw materials and fuel-related costs to its customers, the Company's ability to pass these increases on varies depending on the product line, rate and magnitude of any increase. There may be periods of time during which increases in these costs cannot be recovered. During such periods of time, the Company's profitability may be materially adversely affected.

If the Company is unable to manage its relationships with suppliers or if the domestic and international supply chain for finished products and raw materials is disrupted, the Company's sales and gross margin would be adversely affected.

The Company purchases finished products and raw materials from approximately 150 different suppliers. If the Company is unable to effectively and efficiently manage the relationships with its suppliers, this could negatively impact the Company's business plan and financial results. Additionally, the Company depends on suppliers that are located both domestically and internationally. Political or financial instability among suppliers, trade restrictions, tariffs, currency exchange rates and transport capacity and costs are beyond the Company's control and could negatively impact the Company's business if they seriously disrupted the movement of products through the Company's supply chain.

The Company's largest customers may seek to purchase products directly from foreign suppliers.

Certain of the Company's largest customers have in the past contacted one or more of the Company's foreign suppliers to discuss purchasing home improvement products directly from these suppliers. Although the Company believes that its diversified product line, brand recognition and customer service will continue to offer benefits not otherwise available to the Company's customers from foreign manufacturers, the Company could experience competition from one or more foreign manufacturers that now serve as suppliers to the Company.

The Company has debt service obligations which are subject to restrictive covenants that limit the Company's flexibility to manage its business and could trigger an acceleration of the Company's outstanding indebtedness.

The Company's credit facilities require that the Company maintain specific financial ratios, maintain minimum EBITDA and comply with certain covenants, including various financial covenants that contain numerous restrictions on the Company's ability to incur additional debt, pay dividends or make other restricted payments, sell assets, or take other actions. Furthermore, the Company's existing credit facilities are, and future financing arrangements are likely to be, secured by substantially all of the Company's assets. If the Company breaches any of these covenants, a default could result under one or more of these agreements. The Company has in the past violated certain covenants under its credit facilities and cannot provide assurance that it will not violate certain covenants in the future. A default, if not waived by the Company's lenders, could result in the acceleration of outstanding indebtedness and cause the Company's debt to become immediately due and payable. In the event of default, if the lenders elect to pursue their remedies under one or more of the credit facilities, including limiting or terminating the Company's right to borrow, the Company may be unable to obtain the capital it needs to continue its operations as a going concern.

The Company could be required to record a significant charge to earnings if it determines that its deferred income taxes, deferred costs, goodwill or other intangible assets become impaired.

During fiscal 2009, the Company determined that goodwill related to certain of the Company's reporting units was impaired and recorded a non-cash charge of \$7.9 million for the impairment. Future significant declines in the Company's market capitalization or expected cash flows, or other significant adverse changes in the business climate could result in further goodwill impairment or in the impairment of either deferred costs or other intangible assets. A future write down of its deferred income taxes, deferred costs, goodwill or other intangible assets could result in material non-cash charges that are adverse to our operating results and financial position.

Table of Contents

The Company's inability to maintain access to the debt and capital markets may adversely affect our business and financial results

The Company's ability to invest in its business, refinance maturing debt obligations and make strategic acquisitions requires access to sufficient bank credit lines and capital markets to support short-term borrowings and cash requirements. If the Company's level of cash flow is insufficient and it is unable to access additional resources, the Company could experience a material adverse effect on its business and financial results.

The Company may not be able to retain key personnel or replace them when they leave.

Senior management changes, including, without limitation to Lewis Gould, the Company's Chief Executive Officer, and Leonard Gould, the Company's President, could disrupt the Company's ability to manage its business, and any such disruption could adversely affect the Company's operations, growth, financial condition and results of operations. The Company's success is also dependent upon its ability to hire and retain qualified finance and accounting, sales, marketing, operations, and other personnel. The Company cannot assure you that it will be able to hire or retain the personnel necessary for its planned operations or that the loss of any such personnel will not have a material impact on the Company's financial condition and results of operations.

The Company faces intense competition in its industry, which could decrease demand for its products and could have a material adverse effect on its profitability.

The Company's industry is highly competitive. The Company faces competition from a large number of manufacturers and independent distributors. Many of its competitors are larger and have greater resources and access to capital than the Company. In order to maintain the Company's competitive position, the Company will need to continue to develop new products and expand its customer base both domestically and internationally. Competitive pressures may also result in decreased demand for the Company's products. Any of these factors could have a material adverse effect on the Company.

The Company has been, and in the future may be subject to claims and liabilities under environmental, health and safety laws and regulations, which could be significant.

The Company is subject to federal, state and local laws, regulations and ordinances governing activities or operations that may have adverse environmental effects, such as discharges to air and water, and handling and disposal practices for solid, special and hazardous wastes. The activities of the Company, including its manufacturing operations at its owned and leased facilities, are subject to the requirements of Environmental Laws. The Company has received various notices from state and federal agencies that it may be responsible for certain environmental remediation activities and is, or has been, a defendant in environmental litigation. Although the Company is not currently aware of any situation requiring remedial or other action that would involve a material expense to the Company or expose the Company to material liability under Environmental Laws, the Company cannot provide assurance that it will not incur any material liability under Environmental Laws in the future or that it will not be required to expend funds in order to effect compliance with applicable Environmental Laws, either of which could have a material adverse effect on the Company.

The Company and its independent auditors have identified material weaknesses in the Company's internal control over financial reporting and the Company cannot assure you that additional material weaknesses will not be identified in the future.

The Company and its independent auditors have identified material weaknesses in the Company's internal control over financial reporting relating to the Company's procedures for (i) the reconciliation and elimination of intercompany balances, and (ii) the local

Table of Contents

preparation and review of the financial results of its foreign subsidiaries. A material weakness in internal control over financial reporting is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis. Although the Company has implemented, and continues to implement, various measures to improve internal control over financial reporting, there can be no assurance that the Company will be able to remedy the material weaknesses that have been identified or that additional material weaknesses will not be identified by the Company or its independent auditors. Any failure to remediate the material weaknesses identified by the Company and its independent auditors or to implement required new or improved controls, or difficulties encountered in their implementation, could harm the Company's operating results, cause the Company to fail to meet its reporting obligations or result in material misstatements in the Company's financial statements. Any such failure could affect the ability of the Company's management to certify that the Company's internal controls are effective when it provides an assessment of internal control over financial reporting pursuant to rules of the Securities and Exchange Commission under Section 404 of the Sarbanes-Oxley Act of 2002 and could affect the results of the Company's independent registered public accounting firm's attestation report when it becomes applicable for the year ending February 28, 2010. Inferior internal controls could also cause investors to lose confidence in the Company's reported financial information, which could have a negative effect on the trading price of the Company's stock. For more discussion, see "Controls and Procedures" beginning on page 26.

Item 1B. Unresolved Staff Comments

Not Applicable.

Item 2. Properties

The Company operates 28 facilities in the United States, Canada, Australia, Europe, South America, New Zealand and China. Six of these facilities are used in whole or in part for manufacturing operations. The remainder of the facilities are used for administrative, sales and warehousing functions.

The following are the Company's most significant physical properties and their current function:

Located in the United States: Boca Raton, Florida (administration/corporate headquarters), Mexico, Missouri (manufacturing, distribution, administration), Dalton, Georgia (manufacturing, distribution, administration) and Adelanto, California (manufacturing, distribution, administration).

Located outside the United States: Bramalea, Canada (manufacturing, distribution, administration); Dandenong (distribution) and Wetherill Park (administration and distribution), Australia; and Lancashire, UK (distribution, administration);

The Company currently owns the facilities in Adelanto, California and Bramalea, Ontario, Canada. The Company leases all other facilities.

The Company believes that its existing facilities are adequate to meet its current needs and that additional facilities can be leased to meet future needs.

Item 3. Legal Proceedings

The Company is involved in litigation from time to time in the ordinary course of its business. Based on information currently available to management, the Company does not believe that the outcome of any legal proceedings in which the Company is involved will have a material adverse impact on the Company.

Item 4. Submission of Matters to a Vote of Security Holders

No matters were submitted to a vote of security holders of the Company during the fourth quarter of the period covered by this report.

Table of Contents**PART II****Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities
Market Price and Dividend Information**

The Company's Common Stock is traded on the Nasdaq Global Market. The following table sets forth the high and low sales price per share for the Common Stock for each quarter during fiscal year 2009 and 2008, as reported on the Nasdaq Global Market.

	Fiscal Year Ended February 28 or 29,			
	2009		2008	
	High	Low	High	Low
First Quarter	\$ 9.23	\$ 6.14	\$ 6.74	\$ 5.26
Second Quarter	\$ 7.46	\$ 4.90	\$ 13.10	\$ 5.40
Third Quarter	\$ 6.79	\$ 3.01	\$ 14.99	\$ 9.33
Fourth Quarter	\$ 3.58	\$ 0.84	\$ 10.97	\$ 8.18

On May 8, 2009, the closing price of the Common Stock on the Nasdaq Global Market was \$2.42. As of that date, there were 26 holders of record of the Company's common stock.

The Company has not paid cash dividends on its common stock and does not intend for the foreseeable future to declare or pay any cash dividends on this stock; rather it intends to retain earnings, if any, for the future operation and expansion of the Company's business. Any determination to declare or pay dividends will be at the discretion of the Company's board of directors and will depend upon the Company's future results of operations, financial condition, capital requirements, considerations imposed by applicable law and other factors deemed relevant by the board of directors. The Company's credit facility also prohibits the payment of dividends on its common stock without the consent of the lenders.

Issuer Purchases of Equity Securities

Since fiscal 1999, the Company repurchased shares of its outstanding common stock from Ms. Susan Gould, Corporate Secretary having a value of approximately \$1.0 million pursuant to a Board resolution to purchase, from time to time, up to 1,000 shares of Common Stock per month at a price per share equal to \$.50 less than the closing price of the common stock on the date of repurchase. This individual is not obligated to sell any shares of common stock to the Company. As of February 28, 2009, this individual has sold a total of 138,038 shares to the Company. During fiscal 2009, the Company repurchased 12,000 shares from Ms. Gould under this plan.

During the second quarter of fiscal 2009, the Company entered into a formal purchase plan pursuant to which the Company may purchase up to \$2.0 million of its common shares from time to time on the open market or in privately negotiated transactions. During the third quarter of fiscal 2009, the Company discontinued purchases under the plan. In fiscal 2009, the Company purchased 68,778 shares of common stock at an aggregated cost of \$0.4 million under this plan, including 10,000 shares of common stock from Ms. Susan Gould at a cost of approximately \$0.1 million.

Through February 28, 2009 the number of shares held in treasury was 163,756 at an aggregate cost of \$1.1 million. No shares were repurchased in the fourth quarter of fiscal 2009.

Equity Compensation Plan Information

The following table provides information as of February 28, 2009 about shares of the Company's Common Stock to be issued upon exercise of options, warrants and other rights under the Company's existing equity compensation plans.

Table of Contents

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Executive Overview

The Company is a worldwide leader in the manufacturing, marketing and distribution of a broad line of specialty tools and flooring related products, marketing over 3,000 specialty tools and related products used primarily for the surface preparation and installation of ceramic tile, carpet, vinyl and wood flooring. The Company's products are sold to home improvement retailers, specialty distributors to the hardware, construction, flooring and home improvement trades, chain or independent hardware, tile and carpet retailers for use by the do-it-yourself consumer as well as the construction or remodeling professional, and original equipment manufacturers. The Company has executed a growth strategy directed at improving overall performance and profitability of operations that has included growth through acquisitions and strategic alliances, enhanced cross selling of products within and among the Company's channels of distribution, and, where feasible, the reduction of risk associated with certain large customer concentrations. In addition, the Company has implemented various working capital management and cost control measures in order to remain responsive to changing economic circumstances.

The Company had sales of \$203.6 million for fiscal 2009 compared to \$217.5 million in fiscal 2008, a decrease of \$13.9 million or 6%. The Company attributes this to the weakening of the economic environment, especially during the latter half of fiscal 2009. Falling home prices, increases in foreclosure rates, decreases in new construction, increases in unemployment rates, significant declines in the equity markets, a tightening of credit availability, and concerns about the general health of the global economy led to a significant decline in consumer confidence and consumer discretionary spending resulting in a significant softening of the residential and commercial improvement and construction markets. As a result, in the latter half of fiscal 2009, this softening of the residential and commercial improvement and construction markets along with concerns of a deeper deterioration of the global economic environment led to a decrease in sales by customers in almost all of the markets in which we operate and in the implementation of inventory management programs by our most significant customers. Although the effects of the challenging global economic environment were more sharply experienced by the Company's domestic segment, its international segments have also felt the economic pressure that the Company experienced domestically.

Additionally, the deterioration in the global economic environment resulted in significant volatility in the global currency markets. Substantially all of the revenues of the Company's international operations are denominated in currencies other than the U.S. dollar, including the Canadian dollar, the British pound, the Euro and the Australian dollar, although significant portions of our international operations' purchases are priced in US dollars. Starting late in the Company's second fiscal 2009 quarter, currency volatility resulted in a substantial strengthening of the U.S. dollar against these four currencies. A relatively stronger US dollar means that the revenues of the Company's international operations translate into lower U.S. dollar amounts. Moreover, inflationary pressures in China and the general strengthening of the Chinese Renminbi against the U.S. dollar through the Company's second fiscal 2009 quarter placed increased pressures on pricing from the Company's major suppliers.

Due to the pressures on the global economic environment in the second half of fiscal 2009, the corresponding decline in Company sales, earnings and cash flow, and the continuing economic uncertainty, the Company took significant actions in the third and fourth quarter of fiscal 2009 to reduce expenses and adjust its operating plans. The Company's cash management and cost reduction measures included tighter purchasing, inventory and working capital management, workforce reductions, work schedule adjustments for manufacturing and distribution personnel, business restructurings, reductions in planned expenses, and the restructuring of the Company's credit facilities.

Late in the last quarter of fiscal 2009 and continuing into fiscal 2010 the Company experienced significant improvements in the Company's operations as a result of both modestly improving economic circumstances and the working capital and expense control measures implemented. As the Company looks forward to fiscal year 2010, it is extremely difficult to project how the global economic environment will perform and whether the recently experienced improvements in the Company's operations will continue or be undermined by a resurgence of weaknesses in the economies in which the Company operates or by new pressures on the general performance of those economies.

Table of Contents

The Company's gross profit as a percent of sales decreased to 27.5% in fiscal 2009 from 28.9% in fiscal 2008. This decrease is due to commodity price volatility during fiscal 2009 that resulted in overall higher cost of certain of the Company's finished products and raw material components compared to fiscal 2008. Additionally, the Company provided certain price concessions and increased rebates and allowances to one of its home center customers in exchange for incremental penetration of existing products in new stores.

Total operating expenses for fiscal 2009 increased by \$7.3 million or 14% compared to fiscal 2008 due to a non-cash goodwill impairment charge of \$7.9 million. In fiscal 2009, total operating expenses excluding the goodwill impairment charge decreased by \$0.6 million or 1% compared to the previous year. As a percentage of sales, operating expenses excluding the impairment charge were 26% for fiscal 2009 compared to 24% for fiscal 2008. This increase was primarily due to additional shipping costs incurred in fiscal 2009 related to the rollout of a national specialty tile tool program with one of the Company's home center customers. Additionally, fiscal 2008 included a one-time gain of \$0.6 million on the sales of the Company's Stone Mountain operation.

Principally as a result of the decline in the Company's market valuation during the third quarter of fiscal 2009, the Company reevaluated the carrying value of goodwill. The impairment tests indicated that the carrying amount of the goodwill exceeded fair value in certain of the Company's operations, and led the Company to conclude that goodwill was impaired. The Company recorded a non-cash impairment charge of \$7.9 million to reduce the carrying value of goodwill to its implied fair value. The non-cash charge for impairment was recorded at the Company's Domestic (\$6.5 million), Australia/New Zealand (\$1.1 million) and Europe (\$0.3 million) segments.

Net loss for fiscal 2009 was \$7.3 million or \$2.13 per diluted share compared with net income of \$2.2 million or \$0.61 per diluted share for fiscal 2008. The decrease was due principally to the \$7.9 million non-cash impairment charge and the reduction in net sales due to the global economic downturn partially offset by \$1.4 million, non-tax deductible, expense in fiscal 2008 for the settlement of the Company's put warrant obligation.

Accounting Policies and Estimates

Significant accounting policies are contained in Note B to the Consolidated Financial Statements. The following are our most critical accounting policies which are those that require complex judgments and estimates about the effect of matters that are inherently uncertain and may change in subsequent periods.

Revenue Recognition

The Company recognizes revenue when products are shipped and title has passed to the customer, the selling price is fixed and determinable, and collectibility of the sales price is reasonably assured. The Company provides for estimated costs of future anticipated product returns based on historical experience when the related revenues are recognized. The Company records estimated reductions to revenue for customer programs including volume-based incentives. The Company presents taxes collected from customers and remitted to governmental authorities on a net basis.

Inventories

The Company records inventory at the lower of standard cost or market, which approximates first-in, first-out or net realizable value. The Company maintains reserves for excess and obsolete inventory based on market conditions and expected future demand. If actual market conditions were to be less favorable than those projected by management, additional inventory reserves could be required.

Table of Contents*Accounts Receivable*

The Company's accounts receivable are principally due from home centers or flooring accessory distributors. Credit is extended based on an evaluation of a customer's financial condition, and collateral is not required. Accounts receivable are due at various times based on each customer's credit worthiness and selling arrangement. The outstanding balances are stated net of an allowance for doubtful accounts. The Company determines its allowance by considering a number of factors, including the length of time trade accounts receivable are past due, the customer's previous loss history, the customer's ability to pay its obligations and the condition of the general economy and the industry as a whole.

Impairment Evaluations

The Company evaluates the recoverability of long-lived assets, including property, plant and equipment, and identifiable intangible assets, whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. The Company performs indefinite-lived impairment tests on at least an annual basis and more frequently in certain circumstances. When the Company determines that the carrying amount of long-lived assets may not be recoverable based upon the existence of certain indicators, the assets are assessed for impairment based on the future undiscounted cash flows expected to result from the use of the asset. For goodwill and other indefinite-lived intangibles, impairment assessments are initially evaluated using the estimated future discounted cash flows of the asset's reporting unit using a discount rate determined by management to be commensurate with the risk inherent in the current business model and are also impacted by the Company's market capitalization. In both instances, if the carrying amount of the asset being tested exceeds its fair value, an impairment of the value has occurred and the asset may be written down. The Company will assess impairment of its intangible assets as of August 31st of each fiscal year or whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Should the Company's operating performance and resulting cash flows be less than expected or should the Company's market capitalization decrease, an impairment charge could be incurred which may have a material impact on the Company's results of operations.

Income Taxes

The Company accounts for income taxes in accordance with Statement of Financial Accounting Standard No. 109, *Accounting for Income Taxes*, as clarified by FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* (FIN 48). Under this method, deferred income taxes are determined based on the estimated future tax effects of differences between the financial statement and tax basis of assets and liabilities given the provisions of enacted tax laws. Deferred income tax provisions and benefits are based on changes to the assets or liabilities from year to year. In providing for deferred taxes, the Company considers tax regulations of the jurisdictions in which it operates, estimates of future taxable income, and available tax planning strategies. If tax regulations, operating results or the ability to implement tax-planning strategies vary, adjustments to the carrying value of deferred tax assets and liabilities may be required. Valuation allowances are recorded related to deferred tax assets based on the *more likely than not* criteria of FAS No. 109.

FIN 48 requires that the Company recognize the financial statement benefit of a tax position only after determining that the relevant tax authority would more likely than not sustain the position following an audit. For tax positions meeting the *more-likely-than-not* threshold, the amount recognized in the financial statements is the largest benefit that has a greater than 50 percent likelihood of being realized upon ultimate settlement with the relevant tax authority.

Results of Operations**Fiscal 2009 as compared to Fiscal 2008***Sales*

Net sales for the twelve months ended February 28, 2009 (*fiscal 2009* , or the *fiscal 2009 period*) were \$203.6 million compared to \$217.5 million for the twelve months ended February 29, 2008 (*fiscal 2008* , or the *fiscal 2008 period*), a decrease of \$13.9 million or 6%.

Table of Contents

Net sales at the Company's North American subsidiaries declined by approximately \$5.4 million in fiscal 2009 compared to fiscal 2008. This decline was due to the weakening of the economy and the effect of customer inventory reduction programs in fiscal 2009, along with the sale of the Company's O Tool and Stone Mountain operations in the first half of fiscal 2008. These declines were partially offset by additional sales to the Company's largest home center customer due to the penetration of existing products in new stores and the introduction of new products in existing stores. Currency translation contributed \$1.1 million in lower sales to the Company's North American operation due to changes in the Canadian Dollar compared to the US Dollar.

Sales at the Company's foreign subsidiaries decreased by approximately \$8.5 million in fiscal 2009 compared to fiscal 2008 due to the effects of the weakening global economy, with declines of \$4.2 million in the Europe segment and \$4.3 million in the Australia/New Zealand segment. Currency translation contributed \$2.5 million to the decline in sales due primarily to changes in the Australian Dollar and British Pound compared to the US Dollar.

Sales from the Company's non-North American subsidiaries were 20% and 23% of total sales in fiscal 2009 and 2008, respectively.

Gross Profit

Gross profit for fiscal 2009 was \$56.0 million compared to \$62.8 million in fiscal 2008, a decrease of \$6.8 million or 11%. As a percentage of net sales, gross profit declined to 27.5% in the fiscal 2009 period from 28.9% in the fiscal 2008 period.

The decrease in gross profit was partially attributable to the sales volume decrease at the Company's domestic and foreign operations. Additionally, the Company's domestic operation provided its largest home center customer with additional sales rebates and allowances, and price concessions on certain product lines as part of the award in the first quarter of fiscal 2009 of a national specialty tile tool program. Currency translation contributed \$1.0 million to the decline in gross profit due primarily to changes in the Canadian Dollar, Australian Dollar and British Pound compared to the US Dollar.

Operating Expenses

Total operating expenses, excluding the non-cash charge for goodwill impairment, for fiscal 2009 were \$52.5 million compared to \$53.1 million in fiscal 2008, a decrease of \$0.6 million, or 1%.

Shipping expenses for fiscal 2009 were \$22.6 million compared to \$23.0 million for fiscal 2008, a decrease of approximately \$0.4 million or 2%. The decrease in shipping expenses is due to lower sales volume partially offset by additional shipping cost incurred in the second quarter of fiscal 2009 associated with the rollout of the national specialty tile tool program. Foreign currency exchange rate changes reduced shipping expenses by \$0.4 million. During fiscal 2009, shipping expenses as a percent of sales remained consistent with fiscal 2008 at approximately 11%.

General and administrative expenses for fiscal 2009 were \$17.1 million compared to \$18.1 million for fiscal 2008, a decrease of approximately \$1.0 million or 5%. The decrease is primarily attributed to the accrual of \$1.0 million in management bonuses in fiscal 2008 that were not repeated in fiscal 2009. Foreign currency exchange rate changes reduced general and administrative expenses by \$0.4 million. During fiscal 2009, general and administrative expenses as a percentage of sales remained consistent with fiscal 2008 at approximately 8%.

Selling and marketing costs for fiscal 2009 were \$12.9 million compared to \$13.2 million in fiscal 2008, a decrease of \$0.2 million or 2%. Foreign currency exchange rate changes reduced selling and marketing expenses by \$0.2 million in fiscal 2009. As a percent of sales, selling and marketing expenses were approximately 6% for both fiscal 2009 and fiscal 2008.

Table of Contents

Impairment Loss on Goodwill

The Company performed its annual impairment test during the second quarter of fiscal 2009 and determined that there was no impairment to goodwill. However, principally as a result of the decline in the Company's market valuation during the third quarter of fiscal 2009, the Company reevaluated its remaining goodwill for impairment. Earnings forecasts for each of our reporting units that supported the fair value estimates used in the impairment test performed in the second quarter of fiscal 2009 were updated. The updated valuations considered market approaches, the present value of future cash flows and the market valuation of the Company as of the third quarter of fiscal 2009. These tests indicated that the carrying amount of the goodwill exceeded fair value in certain of the Company's operating entities, and led the Company to conclude that goodwill was impaired. The non-cash charge for impairment was recorded at the Company's Domestic (\$6.5 million), Australia/New Zealand (\$1.1 million) and Europe (\$0.3 million) segments.

After the non-cash charge for impairment, \$0.8 million of goodwill remains in the Canada segment. No balance remains in the Domestic, Australia/New Zealand, Europe or Other segments.

The Company will continue to assess the potential of impairment of goodwill in accordance with FASB Statement No. 142 in future periods. Should the Company's business prospects change, and its expectations for acquired business be further reduced, or other circumstances that affect our business dictate, the Company may be required to recognize additional impairment charges.

Other Income / Expense

Other income for fiscal 2009 was \$0.1 million compared to \$1.1 million in fiscal 2008, a decrease of \$1.0 million. During fiscal 2008, the Company recorded a net gain of \$0.8 million on the sale of its O Tool, Stone Mountain and one its U.K. operations.

Changes in the Put Warrant Liability

In fiscal 2008, the Company agreed to a cash settlement of \$2.3 million for its then outstanding put warrant obligation. As a result of the settlement, the Company reported additional put warrant expense of \$1.4 million in fiscal 2008.

Interest Expense

Interest expense for the fiscal 2009 period was \$1.7 million compared to \$2.5 million in fiscal 2008. Interest expense decreased as a result of lower interest rates during the fiscal 2009 period, which was partially offset by higher average borrowing in the fiscal 2009 period, and interest income of \$0.2 million relating to certain IRS tax refunds.

Income Taxes

The Company recorded a provision for income taxes in fiscal 2009 of \$1.1 million compared to \$3.5 million in fiscal 2008. Estimated tax rates are based upon the most recent effective tax rates available in every jurisdiction in which the Company operates.

Despite having a pre-tax loss in fiscal 2009, the Company recorded an income tax provision due to various permanent differences, including approximately \$7.2 million of goodwill impairment charges that are non deductible for tax purposes and a full valuation allowance taken on certain of the Company's net operating losses, primarily in the UK and Mexico, and foreign tax rate differential.

The effective tax rate for fiscal 2008 was 62% due to the put warrant expense that provides no tax benefit, full valuation allowance taken on certain of the Company's net operating losses, primarily in the UK and Mexico, and foreign tax rate differential.

Table of Contents

Net Income

Due to the reasons stated above the Company recorded net loss of \$7.3 million or \$2.13 per diluted share in fiscal 2009 compared to net income of \$2.2 million or \$0.61 per diluted share in fiscal 2008.

Liquidity and Capital Resources

General Economic Conditions

Global financial markets experienced a significant decline in liquidity and credit availability during the Company's fiscal 2009 third quarter and have remained unsettled since that time. Moreover, during the second half of the Company's fiscal 2009 year in particular, broad weaknesses developed in each of the major economies in which the Company operates, including weakness in consumer spending, substantial declines in housing markets, changes in business inventories and instability in the foreign exchange markets. In response, the Company implemented significant actions to reduce expenses and improve liquidity. Those actions included tighter purchasing, inventory and working capital management, workforce reductions, work schedule adjustments for manufacturing and distribution personnel, business restructurings, reductions in planned expenses, and the restructuring of the Company's credit facilities.

As a result, late in the Company's fourth fiscal 2009 quarter and continuing into the Company's first fiscal 2010 quarter, the Company realized significant improvements in its operations, reestablished its credit facilities worldwide and substantially improved liquidity. Nonetheless, market conditions are likely to continue to be extremely challenging during the Company's 2010 fiscal year given the continued uncertainty in the global economic and financial markets. Accordingly, the Company will continue to focus on liquidity preservation to ensure its ability to fund its operations, secure its supply chains and be well positioned to respond to growth opportunities as they arise.

Credit Facilities

The Company has historically relied on internally generated funds from operations and several bank lines of credit to support the working capital requirements of its various operations (see Note I to the consolidated financial statements).

As a result of operating losses driven by the sudden weakness in economic conditions and volatility in the securities markets that affected the Company during its fiscal 2009 third quarter (including the third quarter non-cash charge of \$7.9 million for the impairment of goodwill) and that continued into its fiscal fourth quarter, as of the end of each of those fiscal quarters the Company was in violation of certain financial covenants under its domestic revolving credit and Canadian mortgage facility, as well as under certain other international and domestic facilities. Consequently, in January 2009, the Company entered into a Forbearance Agreement applicable to its domestic revolving credit and Canadian mortgage facility under which the revolving credit facility was reduced and the lenders agreed to forbear from exercising any of their default rights and remedies in response to the occurrence and continuance of the default, subject to the Company's compliance with certain requirements enumerated in the Forbearance Agreement.

In April 2009 the Company amended its domestic revolving credit facility and Canadian mortgage facility, amended the revolving credit facility of its U.K. subsidiary, and refinanced the revolving credit and term loan facilities of its Australian subsidiary. As a result, the Company's violation of the financial covenants under its domestic revolving credit and Canadian mortgage facility was cured, as well as other international and domestic facilities, and the Forbearance Agreement was terminated.

The Company believes that its internally generated funds from operations, its revised financing facilities, including available bank lines of credit, and its existing cash balances will provide the liquidity necessary to satisfy the Company's working capital needs and will be adequate to finance anticipated capital expenditures and debt obligations for the next twelve months. There can be no assurance, however, that the assumptions upon which the Company bases its future working capital and capital expenditure

Table of Contents

requirements and the assumptions upon which it bases its belief that funds will be available to satisfy such requirements will prove to be correct. If these assumptions are not correct, the Company may be required to raise additional capital through loans or the issuance of debt securities that would require the support or consent of the Company's current lenders, or through the issuance of equity securities.

Working Capital and Cash Flow

Working capital was approximately \$5.9 million as of February 28, 2009, a decrease of approximately \$3.2 million from approximately \$9.1 million at February 29, 2008.

Net cash used in operating activities during the fiscal 2009 period was \$0.5 million compared to cash provided by operating activities of \$7.2 million for the comparable fiscal 2008 period, a decline of \$7.7 million. The reduction in cash flow from operating activities in fiscal 2009 reflected a decline of \$5.3 million in net income as adjusted for non-cash income statement items, which would include adjustments for depreciation, amortization, goodwill impairment, change in the fair value of the put warrant, deferred taxes, and the gain on the sale of plant, equipment and businesses. Additionally, during fiscal 2009, the Company used net cash of \$5.2 million associated with the increase in inventory, for the upfront consideration paid related to national specialty tool program and the decrease in accounts payable and accrued liabilities. This use of cash was partially offset by the reduction in accounts receivable and prepayments that provided cash of \$2.6 million. For the same period in fiscal 2008, increases in inventory and prepayments, and reduction in trade payables used cash of \$2.0 million and the reduction in accounts receivable and other assets provided cash of \$1.8 million.

Net cash used in investing activities was \$0.5 million in fiscal 2009. This was comprised of the final proceeds from the sale of the Company's O Tool operation of \$0.3 million that was offset by capital expenditures of \$0.8 million. Cash provided by investing activities in fiscal 2008 was \$1.1 million, which was comprised of the initial proceeds from the sale of the Company's O Tool operation, proceeds from the sale of the Stone Holding operation and proceeds from the sale of equipment of \$4.0 million, partially offset by capital expenditures of \$3.0 million, which consist primarily of the purchase of a manufacturing and distribution facility in Adelanto, California for \$2.1 million.

Net cash provided by financing activities was \$0.9 million in fiscal 2009 as compared to cash used in financing activities of \$8.3 million in fiscal 2008. During fiscal 2009, the Company increased its borrowings under its lines of credit and Canadian mortgage facility by \$2.6 million primarily to finance its working capital requirements and fund \$1.5 million of scheduled debt maturities. In fiscal 2008, the Company repaid \$3.2 million on its line of credit and \$6.2 million of long-term debt, settled the Company's put warrant obligation of \$2.3 million and financed \$1.7 million for the Adelanto, California facility and refinanced \$1.4 million of long-term debt associated with its Australian subsidiary.

During the second quarter of fiscal 2009, the Company entered into a purchase plan under which it purchased the Company's common stock from time to time on the open market or in privately negotiated transactions. During the third quarter of fiscal 2009, the Company discontinued purchases under the plan. The Company funded the repurchases through the use of borrowings under the current credit facility.

To the extent the Company raises additional capital by issuing equity securities or obtaining borrowings convertible into equity, ownership dilution to existing stockholders will result, and future investors may be granted rights superior to those of existing stockholders. Moreover, additional capital may be unavailable to the Company on acceptable terms, or may not be available at all.

On May 29, 2009, the Company announced that it intends to delist its common stock from the NASDAQ Global Market and deregister its common stock under the Securities Exchange Act of 1934 which could have a negative impact on the Company's liquidity. The Company's Board of Directors concluded that the costs of compliance, the demands on management time, and the Company resources required to maintain its listed and registered status outweigh the benefits the Company receives from that status given the low trading volume in its stock, the Company's low market capitalization and the limited analyst coverage of the Company.

Impact of Inflation and Changing Prices

During fiscal 2008 and continuing through fiscal 2009, the Company experienced price volatility in certain key commodities and components related to the purchase of raw materials and finished goods. The Company believes that its level of gross profit as a percent of net sales is affected by both increases and decreases in these prices. Other than the changes described, the effect of inflation on the Company's operations has been minimal.

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

For the year ended February 28, 2009, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including Lewis Gould, the Company's Chief Executive Officer, and Richard Brooke, the Company's Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures as of the end of the period covered by this report pursuant to Exchange Act Rule 13a-15(e). The Company's disclosure controls and procedures are designed to provide reasonable assurance that the information required to be disclosed in its reports filed under the Exchange Act is recorded, processed, summarized and reported within the time periods specified by the Securities and Exchange Commission's rules and forms, and is accumulated and communicated to management, including the Company's Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosures. Based upon the Company's evaluation, the Chief Executive Officer and the Chief Financial Officer concluded that as a result of the material weaknesses in the Company's internal control over financial reporting described more fully below, the Company's disclosure controls and procedures were not effective as of February 28, 2009.

A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Management necessarily applied its judgment in assessing the benefits of controls relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. The design of any system of controls is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions, regardless of how remote. Because of the inherent limitations in a control system, misstatements due to error or fraud may occur and may not be detected.

Management's Annual Report on Internal Control over Financial Reporting

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rule 13a-15(f) under the Exchange Act. Under the supervision and with the participation of the Company's management, Chief Executive Officer and Chief Financial Officer, the Company conducted an evaluation of the effectiveness of its internal control over financial reporting as of February 28, 2009 based on criteria set forth in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Table of Contents

On performing this assessment, management identified the following material weaknesses:

Intercompany Accounts A material weakness existed with the recording, reconciling and elimination of intercompany account balances between the Company's Domestic and foreign subsidiaries and amongst the Company's foreign subsidiaries.

Review of Foreign Operations A material weakness existed with the local preparation and review of the financial results of certain of the Company's foreign operations.

As a result of these material weaknesses in the Company's internal control over financial reporting, the Company's management concluded that its internal control over financial reporting, as of February 28, 2009, was not effective based on the criteria set forth by COSO in Internal Control Integrated Framework. A material weakness in internal control over financial reporting is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the Company's annual or interim financial statements will not be prevented or detected on a timely basis.

This annual report does not include an attestation report of the Company's independent registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's independent registered public accounting firm pursuant to temporary rules of the Securities and Exchange Commission that permit the Company to provide only management's report in this Annual Report on Form 10-K.

Management's Plan for Remediation of Material Weaknesses

The Company has implemented and continues to implement various measures to address the identified material weaknesses and to improve the overall internal control over financial reporting. The following steps are planned for fiscal 2010 to remediate the conditions leading to the above stated material weaknesses:

Intercompany Accounts (i) identify, procure and implement an appropriate technology to record, match and track intercompany transactions, (ii) complete timely reconciliation of all intercompany accounts, and (iii) record in a timely manner the foreign currency translation and exchange rate gains or losses related to intercompany accounts.

Review of Foreign Operations (i) use of a comprehensive, standard financial close disclosure checklist, (ii) provide additional training to financial personnel at the Company's foreign subsidiaries, and (iii) implement an internal review function over all foreign operations coordinated through the Company's corporate office.

Changes in Internal Control over Financial Reporting

During the quarter ended February 28, 2009, as part of the Company's remedial measures discussed above related to the Company's foreign operations, the Company employed an additional staff accountant, in part to perform operational and accounting reviews of certain of the Company's foreign operations.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Shareholders

Q.E.P. Co., Inc. and Subsidiaries

We have audited the accompanying consolidated balance sheets of Q.E.P. Co., Inc. (a Delaware Corporation) and Subsidiaries as of February 28, 2009 and February 29, 2008, and the related consolidated statements of operations, shareholders' equity and comprehensive income (loss), and cash flows for the years then ended. Our audits of the basic consolidated financial statements included the financial statement schedule listed in the index appearing under Item 15(a)(2). These financial statements and the financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and the financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Q.E.P. Co., Inc. and Subsidiaries as of February 28, 2009 and February 29, 2008, and the results of their operations and their cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

Table of Contents

Q.E.P. CO., INC. AND SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

NOTE A DESCRIPTION OF BUSINESS

Q.E.P. Co., Inc. (the Company) is a leading manufacturer, marketer and distributor of a broad line of specialty tools and flooring related products for the home improvement market. Under brand names including Q.E.P.®, ROBERTS®, Capitol®, Vitrex®, PRCI® and Elastiment®, the Company markets specialty tools and flooring related products used primarily for the surface preparation and installation of ceramic tile, carpet, vinyl and wood flooring. Q.E.P. and its subsidiaries market approximately 3,000 products in the U.S., Canada, Australia, Europe and Latin America. The Company sells its products primarily to large home improvement retail centers, as well as traditional distribution outlets in all the markets it serves.

NOTE B SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

1. Principles of Consolidation

The consolidated financial statements include the accounts of Q.E.P. Co., Inc. and its wholly owned subsidiaries, after eliminating all significant inter-company accounts and transactions.

2. Cash and Cash Equivalents

The Company considers all highly liquid debt instruments purchased with an original maturity of three months or less to be cash equivalents. Cash and cash equivalents include \$0.7 million and \$0.9 million of foreign balances as of February 28, 2009 and February 29, 2008, respectively.

3. Accounts Receivable

The Company's accounts receivable are principally due from home centers or flooring accessory distributors. Credit is extended based on an evaluation of a customer's financial condition and collateral is not required. Accounts receivable are due at various times based on each customer's credit worthiness and selling arrangement. The outstanding balances are stated net of an allowance for doubtful accounts. The Company determines its allowance by considering a number of factors, including the length of time trade accounts receivable are past due, the customer's previous loss history, the customer's ability to pay its obligations, and the condition of the general economy and the industry as a whole. An account may be determined to be uncollectible if all collection efforts have been exhausted, the customer has filed for bankruptcy, and all recourse against the account is exhausted, or disputes are unresolved and negotiations to settle are exhausted. Uncollectible accounts are written off against the allowance. Payments subsequently received on such receivables are credited to the allowance for doubtful accounts.

4. Inventories

Inventories are stated at the lower of standard cost or market, which approximates first-in, first-out or net realizable value.

5. Property and Equipment

Property and equipment are stated at cost. Depreciation is recorded using the straight-line method in amounts sufficient to relate the cost of depreciable assets to operations over their estimated service lives. Leasehold improvements are amortized over their expected useful life or the remaining life of the respective lease, whichever is shorter.

Table of Contents

The following are the estimated lives of the Company's property and equipment:

Machinery and warehouse equipment	5 to 10 years
Furniture and computer equipment	3 to 10 years
Capital leases	3 to 5 years
Building	30 to 33 years
Leasehold improvements	5 to 15 years

Maintenance and repairs are charged to expense and significant renewals and betterments are capitalized. When property is sold or otherwise disposed of, the cost and related accumulated depreciation are removed from the accounts, and any resulting gain or loss is reflected in operations for the period.

6. *Goodwill and Other Intangible Assets*

Goodwill is tested for impairment using a fair value approach applied to each reporting unit. Impairment charges are recognized for amounts where the reporting unit's goodwill exceeds its fair value. The Company amortizes the cost of other intangibles over their estimated useful lives. Amortizable intangible assets may also be tested for impairment if indications of impairment exist. The impairment test is based on a valuation provided by an independent appraiser and the Company's market capitalization. If the Company determines that the asset is impaired, it is written down to fair value. The Company's annual impairment assessment date is August 31.

7. *Impairment of Long-Lived Assets*

The Company evaluates its long-lived assets and definite-lived intangibles for impairment whenever events or circumstances indicate that the carrying amount of such assets or intangibles may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to its fair value as provided by an independent appraiser. If such an asset is considered to be impaired, the impairment to be recognized is the amount by which the carrying amount of the asset exceeds its fair value. Assets to be disposed of are reported at the lower of the carrying amount or fair value less costs to sell.

8. *Income Taxes*

Deferred income taxes are determined based on the estimated future tax effects of differences between the financial statement and tax basis of assets and liabilities given the provisions of enacted tax laws. Deferred income tax provisions and benefits are based on changes to the assets or liabilities from year to year. In providing for deferred taxes, the Company considers tax regulations of the jurisdictions in which it operates, estimates of future taxable income, and available tax planning strategies. If tax regulations, operating results or the ability to implement tax-planning strategies vary, adjustments to the carrying value of deferred tax assets and liabilities may be required. Valuation allowances are recorded related to deferred tax assets based on the "more likely than not" criteria.

The Company recognizes the financial statement benefit of a tax position only after determining that the relevant tax authority would more likely than not sustain the position following an audit. For tax positions meeting the "more-likely-than-not" threshold, the amount recognized in the financial statements is the largest benefit that has a greater than 50 percent likelihood of being realized upon ultimate settlement with the relevant tax authority.

9. *Leases*

Leases which meet certain criteria are classified as capital leases. For such leases, assets and obligations are recorded initially at the present value of the contractual lease payments. The capitalized leases are amortized using the straight-line method over the shorter of the assets' estimated economic lives or the term of the lease. Interest expense relating to the lease liabilities is recorded to affect a constant rate of interest over the terms of the obligations. Leases not meeting capitalization criteria are classified as operating leases and related rentals are charged to expense as incurred.

Table of Contents

10. Stock-Based Compensation

The Company grants stock options for a fixed number of shares to employees and directors with an exercise price equal to at least 85% of the fair market value of the shares at the date of grant. As of the current date, however, no options have been issued at a discount to market price. The Company has recognized compensation expense related to outstanding stock options that vested in fiscal 2009 and 2008. No stock options were granted in fiscal 2009 or 2008.

The fair value of each option at date of grant is estimated using the Black-Scholes option pricing model with the weighted average assumptions for grants. Expected volatility is based on the historical volatility of the Company's stock. The expected lives of the options represents the period that the options granted are expected to be outstanding and was calculated based on historical averages. The risk free rate is based on the yield curve of a zero coupon U.S. Treasury bond over the term of the expected life. The Company does not expect to pay a dividend on common stock.

11. Earnings Per Share

Basic earnings per share is computed based on weighted average shares outstanding during the period. Diluted earnings per share is computed using the weighted average number of common and dilutive common stock equivalent shares outstanding during the period. Dilutive common stock equivalent shares consist of the dilutive effect of stock options and warrant common stock equivalents.

12. Fair Value of Financial Instruments

The following methods and assumptions were used in estimating the indicated fair values of financial instruments:

Cash and cash equivalents, trade accounts receivable and payable, and short term debt: The carrying amount approximates fair value due to the short maturity of these instruments.

Long term debt: The fair value of the Company's borrowings approximates the carrying value based on current rates offered to the Company for similar debt.

13. Foreign Currencies

The financial statements of subsidiaries outside the United States are measured using the local currency as the functional currency. Assets and liabilities recorded in foreign currencies are translated at the exchange rate on the balance sheet date. Translation adjustments resulting from this process are charged or credited to equity. Revenues, costs and expenses are translated at average rates of exchange prevailing during the year. Gains and losses on foreign currency transactions are included in general and administrative expenses. In fiscal 2009, a loss of \$0.5 million was recorded on foreign currency transactions. A net gain of \$0.1 million was recorded in fiscal 2008 for foreign currency transactions.

14. Revenue Recognition

Sales are recognized when merchandise is shipped and title has passed to the customer, the selling price is fixed and determinable and collectibility of the sales price is reasonably assured. Such revenue is recorded net of estimated sales returns, discounts and allowances. The Company establishes reserves for returns and allowances based on current and historical information and trends. Sales and accounts receivable have been reduced by such amounts. The Company presents taxes collected from customers and remitted to governmental authorities on a net basis.

Table of Contents

The Company accounts for upfront consideration given to customers as a reduction to revenue at the earlier of the Company making payment or incurring an obligation to the customer, unless the Company has an agreement with the vendor in which the Company can control the benefit, in which case the incentive is recorded as a deferred cost asset and is expensed as a reduction to revenue over the term of the agreement. The Company evaluates the impairment of deferred cost assets on a quarterly basis.

15. Shipping Costs

Shipping costs, other than costs billed to customers, are expensed as incurred. Shipping costs billed to customers are included in net sales.

16. Advertising Costs

Advertising costs are expensed as incurred and totaled \$0.1 million for both the year ended February 28, 2009 and February 29, 2008. These costs are recorded in selling and marketing expenses and primarily consist of advertising in trade publications.

Advertising allowances are expensed as incurred and totaled \$4.6 million and \$4.1 million for the years ended February 28, 2009 and February 29, 2008, respectively. The majority of these allowances were paid to the Company's two largest customers. In return, the Company receives and tracks the advertising of its products in various forms of media on a local, regional and national level. These retailers also display the Company's products on in-store signage and send advertising of the Company's products directly to its professional contractor customers. The Company is not able to reasonably estimate the fair value of the benefit received under these arrangements. Accordingly, the Company accounts for these promotional funds as a reduction to the selling price and the costs are included in net sales.

17. Use of Estimates

In preparing financial statements, management is required to make certain estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the revenues and expenses during the reporting period. Significant estimates include the valuation of income taxes, the allowance for doubtful accounts and inventory valuation reserves, and the impairment evaluation of goodwill, other intangible and long-lived assets. Actual results could differ from those estimates.

18. Comprehensive Income (Loss)

Comprehensive income (loss) is defined as the change in equity of a business enterprise during a period from transactions and other events and circumstances from non-owner sources. The Company's balance in comprehensive income (loss) is specifically derived from foreign currency translation adjustments. The Company presents accumulated other comprehensive income (loss), net of taxes, in its consolidated statement of shareholders' equity.

NOTE C EARNINGS PER SHARE

Basic earnings per share is computed by dividing net income (loss), after deducting preferred stock dividends accumulated during the period, by the weighted average number of shares of common stock outstanding. Diluted earnings per share is computed by dividing net income, after deducting preferred stock dividends accumulated during the period, by the weighted average number of shares of common and dilutive common stock equivalent shares outstanding. The amount of preferred stock dividends is immaterial in all periods presented. There were approximately 0.2 million and 0.1 million common stock equivalent shares excluded from the dilutive

Table of Contents

earnings per share calculation because they were anti-dilutive in fiscal 2009 and fiscal 2008, respectively. The following is a reconciliation of the number of shares used in the basic and diluted computation of income per share (in thousands):

	Year Ended	
	February 28, 2009	February 29, 2008
Weighted average number of common shares outstanding - basic	3,415	3,435
Dilution from stock options		153
Weighted average number of common shares outstanding - diluted	3,415	3,588

NOTE D SEGMENT INFORMATION

The Company operates in five business segments: Domestic, Canada, Europe, Australia/New Zealand and Other. Management has chosen to organize the segments into geographic areas, with each segment being the responsibility of a segment manager, except for the Canadian segment and Mexico in the Other segment, which are managed by members of the Domestic segment's senior management team. Each segment markets and sells flooring-related products to the residential, new construction, do-it-yourself and professional remodeling and renovation markets and home centers. The European segment is made up of our operations in the UK, France, and Ireland. The Other segment is made up of operations in Latin America and Asia.

The performance of the business is evaluated at the segment level. Cash, debt and income taxes generally are managed centrally. Accordingly, we evaluate performance of our segments based on operating earnings exclusive of financing activities and income taxes. The fiscal 2009 operating income includes a non-cash charge for the impairment of goodwill in the Company's Domestic segment of \$6.5 million, Australia/New Zealand segment of \$1.1 million and Europe segment of \$0.3 million. Segment results were as follows (in thousands):

	Year Ended	
	February 28, 2009	February 29, 2008
Net sales		
Domestic	\$ 140,346	\$ 143,762
Canada	21,924	23,909

Australia/New Zealand	5,773	13,499
Other	1,616	2,641
	\$ 68,965	\$ 85,626

Amounts are attributed to the country of the legal entity that recognized the sale or holds the assets. The intercompany sales are billed at prices established by the Company. The price takes into account the product cost and overhead of the selling location.

NOTE E INVENTORIES

Inventories consisted of the following (in thousands):

	February 28, 2009	February 29, 2008
Raw materials and work-in-process	\$ 3,304	\$ 3,891
Finished goods	21,142	22,605
	\$ 24,446	\$ 26,496

NOTE F PROPERTY AND EQUIPMENT

Property, plant and equipment consisted of the following (in thousands):

Edgar Filing: QEP CO INC - Form 10-K

	February 28, 2009	February 29, 2008
Machinery and warehouse equipment	\$ 7,549	\$ 8,551
Office furniture, equipment and computer equipment	7,337	7,975
Building and leasehold improvements	6,664	7,209
	21,550	23,735
Less: Accumulated depreciation and amortization	(15,325)	(15,884)
	\$ 6,225	\$ 7,851

Depreciation expense of property and equipment was \$1.5 million and \$1.8 million for fiscal 2009 and 2008, respectively. Amortization of assets recorded under capital leases is included in depreciation expense.

F-12

Table of Contents**NOTE G INTANGIBLE ASSETS**

Intangible assets with definite lives are amortized while intangibles with indefinite lives, such as goodwill, are tested annually for impairment or when events or changes in circumstances indicate the carrying value may not be recoverable. The Company performs an impairment test on goodwill during the second quarter of each fiscal year. The Company performed an impairment test during the second quarter of fiscal 2009 and determined that there was no impairment to goodwill. However, deterioration in the credit markets during the latter half of fiscal 2009 created substantial general market volatility resulting in significant declines in the market values of a broad range of equity securities. The Company's market valuation similarly was affected by these market conditions, which market valuation is a critical consideration in the determination of the fair value of the Company's reporting units.

Accordingly, the Company updated the fair value of its reporting units used in the impairment test performed in the second quarter of fiscal 2009. The updated valuations considered market approaches, the present value of future cash flows and the market valuation of the Company as at November 30, 2008. As a result, the fair value of certain of the Company's reporting units was below their carrying amounts and the Company recorded a non-cash charge of \$7.9 million for the impairment of goodwill. The non-cash charge was recorded in the Company's Domestic (\$6.5 million), Australia/New Zealand (\$1.1 million) and European (\$0.3 million) segments. After the non-cash charge for impairment, \$0.8 million of goodwill remains in the Canada segment; no balance remains in the Domestic, Australia/New Zealand, European or Other segments. No impairment charge was recorded for fiscal 2008.

The Company will continue to assess the impairment of goodwill and other intangible in the future. If the Company's operating performance and resulting cash flows in the future are less than expected or should the Company's market capitalization decrease, an additional impairment charge could be incurred which may have a material impact on the Company's results of operations.

The changes in the carrying amount of goodwill were as follows (in thousands):

	Goodwill
Balance on February 28, 2007	\$ 9,563
Reductions to goodwill due to sale of businesses	(423)
Translation adjustments	545
Balance on February 29, 2008	9,685
Goodwill impairment	(7,927)
Translation adjustments	(932)
Balance on February 28, 2009	\$ 826

All other intangible assets are subject to amortization. The total balance of intangible assets is classified as follows (in thousands):

	Weighted Avg Useful Life	February 28, 2009			February 29, 2008		
		Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Trademarks	20	2,993	(1,303)	1,690	3,081	(1,165)	1,916
Other intangibles	5	1,187	(886)	301	1,419	(618)	801

Table of Contents**NOTE H DEFERRED COSTS**

The Company records the upfront consideration given to customers associated with future purchase agreements as deferred costs within the non-current assets classification. These deferred costs are expensed as a reduction to sales on a straight line basis over the term of the agreement. As of February 28, 2009, the Company had unamortized deferred costs of \$2.2 million. No deferred costs were recorded as of February 29, 2008. The Company evaluates the impairment of deferred costs on a quarterly basis.

The Company expensed approximately \$1.5 million of deferred costs in fiscal 2009.

NOTE I DEBT

Total debt consists of the following (in thousands):

	February 28, 2009	February 29, 2008
Lines of Credit		
Domestic revolving credit facility	\$ 22,266	\$ 21,107
International credit facilities	2,566	3,430
Notes Payable		
Mortgage facilities	3,259	3,561
Term loan facilities	1,169	2,723
Capital lease facilities	306	415
	\$ 29,566	\$ 31,236
Less current installments	26,124	26,514
Long Term Debt	\$ 3,442	\$ 4,722

The aggregate maturities of long term debt during each of the next five fiscal years as of February 28, 2009 are as follows (in millions): \$1.3 in 2010, \$0.7 in 2011, \$1.5 in 2012 and \$1.2 in 2013.

Interest paid for all debt was approximately \$1.9 million and \$2.7 million in fiscal 2009 and 2008, respectively.

General

In April 2009 the Company amended its domestic revolving credit facility and Canadian mortgage facility, amended the revolving credit facility of its U.K. subsidiary, and refinanced the revolving credit and term loan facilities of its Australian subsidiary. As a result, the Company's violation of certain financial covenants under its domestic revolving credit facility and Canadian mortgage facility as of February 28, 2009 was cured, as well as under certain other international and domestic facilities.

Domestic Revolving Credit Facility

The Company has an asset based loan agreement with a domestic financial institution to provide a revolving credit facility and mortgage financing. Under the April 2009 amended agreement the Company is allowed to borrow a maximum of \$27 million under the revolving credit facility based on a percentage of eligible accounts receivable and inventories. The interest rate applicable to the revolving credit facility prior to the reporting of the Company's consolidated financial results for its fiscal quarter ending August 31,

Table of Contents

2009 is equal to Libor plus 375 basis points for advances with fixed maturities or to a Base Rate plus 275 basis points for all other advances. Thereafter, the interest rate applicable to the revolving credit facility is equal to a range of Libor plus 3.00% to 3.75% for advances with fixed maturities or to a range of the Base Rate plus 2.00% to 2.75% for all other advances. The Base Rate varies with fluctuations in money market conditions and the interest rate on Base Rate advances is equal to or higher than the interest rate on advances with fixed maturities.

The April 2009 amended loan agreement requires the Company to maintain certain financial covenants, including a minimum leverage ratio, a minimum EBITDA through August 31, 2009, a fixed charge coverage ratio, and a senior debt to trailing EBITDA ratio. EBITDA excludes charges for non-cash expenses related to goodwill, deferred costs and other intangible assets. The agreement is collateralized by substantially all of the Company's assets, prohibits the Company from incurring certain additional indebtedness, limits certain investments, advances or loans, restricts substantial asset sales and capital expenditures, and prohibits the payment of dividends, except for dividends due on the Company's Series A and C preferred stock. The agreement matures in May 2011. The revolving credit advances are classified as a current liability.

At February 28, 2009, the interest rate under the revolving credit facility was Libor (0.41%) plus 4.50% (the interest rate applicable prior to the April 2009 amendment), the Company had borrowed approximately \$22.3 million and approximately \$4.0 million was available for future borrowings, net of approximately \$0.4 million in outstanding letters of credit.

International Credit Facilities

The Company's U.K. subsidiary has an asset based loan agreement with a domestic financial institution that provides a revolving credit facility that allows the subsidiary to borrow up to \$2.5 million against a percentage of accounts receivable and inventories. The facility has an interest rate and term that varies with the interest rate and term of the Company's domestic revolving credit facility. This agreement is collateralized by substantially all of the subsidiary's assets and is guaranteed by the Company. The agreement prohibits the subsidiary from incurring certain additional indebtedness, limits certain investments, advances or loans, restricts substantial asset sales and capital expenditures, and prohibits the payment of dividends. At February 28, 2009, the interest rate under the agreement was the financial institution's Sterling reference rate (1.10%) plus 4.50%, the subsidiary had borrowed approximately \$1.0 million and approximately \$0.2 million was available for future borrowing. The facility is considered a demand note.

At February 28, 2009, the Company's Australian subsidiary had a payment facility that allowed it to borrow against a certain percentage of accounts receivable and inventories. The subsidiary had borrowed approximately \$1.0 million under the facility at that date. The facility is considered a demand note. In April 2009 the subsidiary repaid the existing facility and entered into a new accounts receivable finance facility with an Australian financial institution that provides the subsidiary with advances of up to AUD2.5 million (approximately \$1.6 million) against a percentage of eligible accounts receivable. Under the agreement, the financial institution purchases eligible accounts receivable, with recourse, from the subsidiary at a charge equal to 0.25% of the receivables purchased. The interest rate applicable to the facility is equal to the Bank Bill Swap Bid Rate (3.27% upon execution of the agreement) plus 250 basis points. The subsidiary's obligations under the facility are collateralized by substantially all of the subsidiary's assets. The facility is cancelable by the Australian financial institution upon three months notice on or after April 9, 2010.

The Company's French subsidiary has lines of credit with three French financial institutions that allow it to borrow an aggregate of approximately \$1.7 million against drafts presented for future settlement in payment of the subsidiary's accounts receivable. As of February 28, 2009, the facilities bear interest rates that range from the Euro Overnight Index Average (1.37%) plus 1.00% to the Euro Interbank Offer Rate (1.33%) plus 1.50% and the subsidiary had borrowed approximately \$0.6 million under these facilities.

Table of Contents

Mortgage Facilities

The Company has a mortgage facility collateralized by its manufacturing, distribution and administrative facility in Canada. As of February 28, 2009, the mortgage balance was approximately \$1.7 million. The mortgage bears an interest rate of Libor (1.26% as of February 28, 2009) plus 4.00% and matures on the same date as the Company's domestic revolving credit facility. The mortgage loan requires payments of less than \$0.1 million per month with a balloon payment upon maturity.

The Company also has a mortgage facility collateralized by its manufacturing and distribution facility in Adelanto, California. As of February 28, 2009, the mortgage balance was approximately \$1.6 million. The mortgage bears an interest rate of Libor (0.41% at February 28, 2009) plus 1.50% and matures in February 2013. The mortgage loan requires principal payments of less than \$0.1 million per month with a balloon payment on maturity.

Term Loan Facilities

At February 28, 2009, the Company's Australian subsidiary had a term loan facility with a balance of approximately \$0.6 million outstanding at that date. In April 2009 the subsidiary repaid the existing facility and entered into a new term loan facility with an Australian financial institution with an initial borrowing of AUD1.0 million (approximately \$0.7 million). The facility matures on April 3, 2012 and requires approximately equal annual repayments of principal. The facility includes an annual fee equal to 2.50% of the outstanding facility and bears interest on a discount basis at a floating rate (3.97% upon execution of the agreement) based on the Bill Swap Bid Rate. The new facility requires the subsidiary to maintain a minimum earnings to interest ratio for its fiscal years ending on and after February 28, 2010. The subsidiary's obligations under the facility are collateralized by substantially all of the subsidiary's assets.

At February 28, 2009, the outstanding balance of an unsecured note issued in connection with a 1999 acquisition was approximately \$0.3 million with an interest rate of 7% and the outstanding balance of an unsecured note issued in connection with a 2004 acquisition was approximately \$0.3 million with an interest rate equal to the EURIBOR three month rate (1.83%).

Lease Agreements

Assets purchased under capital leases are composed primarily of manufacturing and computer equipment. The latest maturity date under these leases is October 2012.

NOTE J COMMITMENTS AND CONTINGENCIES

The Company provides accruals for all direct costs associated with the estimated resolution of contingencies at the earliest date at which it is deemed probable that a liability has been incurred and the amount of such liability can be reasonably estimated.

The Company is involved in litigation from time to time in the ordinary course of its business. Based on information currently available to management, the Company does not believe that the outcome of any legal proceeding in which the Company is involved will have a material adverse impact on the Company.

Table of Contents*Future Minimum Obligations*

The Company conducts its operations from various leased facilities. Future minimum payments under non-cancelable operating leases consist of the following in fiscal years ending after February 28, 2009 (in thousands):

2010	\$ 1,955
2011	1,447
2012	1,022
2013	688
2014	560
Total	\$ 5,672

Total rent expense under non-cancelable operating leases approximated \$2.2 million and \$2.5 million in fiscal 2009 and 2008, respectively.

Contingencies.

The Company is subject to federal, state and local laws, regulations and ordinances governing activities or operations that may have adverse environmental effects, such as discharges to air and water, handling and disposal practices for solid, special and hazardous wastes, and imposing liability for the cost of clean up, and for certain damages resulting from sites of past spills, disposal or other releases of hazardous substances (together, Environmental Laws). Sanctions which may be imposed for violation of Environmental Laws include the payment or reimbursement of investigative and clean up costs, administrative penalties and, in certain cases, prosecution under environmental criminal statutes. The Company's manufacturing facilities are subject to environmental regulation by, among other agencies, the Environmental Protection Agency, the Occupational Safety and Health Administration, and various state authorities in the states where such facilities are located. The activities of the Company, including its manufacturing operations at its leased facilities, are subject to the requirements of Environmental Laws. The Company believes that the cost of compliance with Environmental Laws to date has not been material to the Company. Based on information currently available to management, the Company is not aware of any situation requiring remedial action by the Company or which would expose the Company to liability under Environmental Laws which are reasonably expected to have a material adverse effect on the Company as a whole. As the operations of the Company involve the storage, handling, discharge and disposal of substances which are subject to regulation under Environmental Laws, there can be no assurance that the Company will not incur any material liability under Environmental Laws in the future or will not be required to expend funds in order to effect compliance with applicable Environmental Laws.

The Company completed testing at its facility in Bramalea, Ontario, Canada for leakage of hazardous materials and, as a result, in fiscal 1999 the Company prepared a plan to remediate the contamination over a period of years and this plan was subsequently approved by the Canadian Ministry of Environment. From fiscal 1999 through fiscal 2008, the Company has spent approximately \$0.9 million and anticipates spending less than \$0.1 million on ongoing monitoring of wells and other environmental activity per year for approximately the next three years. The accrued liability at February 28, 2009 was approximately \$0.1 million.

In 2008, the Company and two subsidiaries were named in an environmental suit brought by the owner and former owner of property on which the Company currently operates a facility manufacturing adhesives. The complaint alleges the discharge of hazardous waste, both before and after the Company began to occupy the premises. The plaintiffs alleged that it had incurred clean up costs of approximately \$0.4 million. The Company and its two subsidiaries have denied all liability and are contesting the claims vigorously.

Table of Contents**NOTE K 401(k) BENEFIT PLAN**

The Company and its subsidiaries offer a 401(k) benefit plan which provides for voluntary contributions by employees subject to a maximum annual contribution. The Company may, at the discretion of the board of directors, make contributions to the plan. The Company contributed approximately \$0.1 million in each of the years ended February 28, 2009 and February 29, 2008.

In 2004 the Company adopted the QEP Executive Deferred Compensation Plan. The purpose of the plan is to provide participants with an opportunity to defer receipt of a portion of their salary, bonus, and other specified cash compensation. Participation in the plan is limited to certain management personnel. The Company also entered into a Trust under the plan. The trust is a rabbi trust and is used to set aside the amounts of deferred compensation allocated to the participants in the plan and the earnings from the investment of such amounts. As of February 28, 2009 and February 29, 2008, the Company's liability under the plan was \$0.1 million and \$0.2 million, respectively.

NOTE L INCOME TAXES

Income (loss) before provision for income taxes consisted of the following (in thousands):

	Year Ended February 28 or 29,	
	2009	2008
United States	\$ (2,340)	\$ 4,534
Foreign	(3,825)	1,174
Total	\$ (6,165)	\$ 5,708

The components of the provision for income taxes are as follows (in thousands):

	Year Ended February 28 or 29,	
	2009	2008
Current:		
Federal	\$ 946	\$ 150
State	254	579
Foreign	893	1,261
	2,093	1,990
Deferred:		
Federal	23	1,553

Foreign	(1,037)	292
	(1,003)	1,522
Total income tax provision	\$ 1,090	\$ 3,512

Table of Contents

The tax effects of temporary differences which give rise to deferred tax assets / (liabilities) are as follows (in thousands):

	February 28 or 29,	
	2009	2008
Deferred Tax Assets:		
Provision for doubtful accounts	\$ 103	\$ 104
Accrued expenses	684	968
Fixed assets	286	373
Intangible assets	1,259	794
Inventory	1,074	883
Federal and State net operating loss	118	437
Foreign net operating loss carryforward	3,213	2,824
Foreign tax credit carryforward	554	627
Other	108	102
	7,399	7,112
Less: valuation allowance on certain foreign net operating loss carryforwards and foreign tax credit carryforwards	(3,329)	(3,360)
Total deferred tax assets	4,070	3,752
Deferred Tax Liabilities:		
Prepaid expenses	(132)	(500)
Foreign exchange gain on long-term debt	(177)	(619)
Federal liability on state deferred tax asset	(217)	(92)
Total deferred tax liabilities	(526)	(1,211)
Net deferred tax asset	\$ 3,544	\$ 2,541

The Company has US net operating loss carryforward of approximately \$0.2 million which expire in 2011, all of which relate to the Company's acquisitions in fiscal 2000. The net operating loss carry forward is subject to separate IRC Section 382 Limitation. The Section 382 limitation limits the Company's utilization of its net operating losses to an annual amount after an ownership change.

The Company has net operating losses in various foreign countries of approximately \$11.6 million. Approximately \$4.1 million of these losses expire in the years 2010 through 2019 and the remainder have no limitation on their expiration. The Company has recorded a deferred tax asset based on its estimate of the recoverability of the balance of the foreign net operating losses. Further, the Company has determined that certain foreign net operating losses may not be realized; therefore, a valuation allowance of approximately \$2.8 million has been established.

The Company has a foreign tax credit carry forward of approximately \$0.5 million which begin to expire in 2017. The Company has determined that utilization of these tax credits may not be realized; therefore, a full valuation allowance has been established.

Table of Contents

The following is a reconciliation of the statutory federal income tax rate to the effective rate reported in the financial statements (in thousands except percentage data):

	Year Ended February 28 or 29,		Year Ended February 28 or 29,	
	2009	2008	2009	2008
	Amount	%	Amount	%
Provision for federal income taxes at the statutory rate	\$ (2,096)	-34.0%	\$ 1,941	34.0%
State and local income taxes-net of federal income tax benefit	81	1.3%	168	2.9%
Put warrant liability			488	8.5%

Change in valuation allowance	(32)	-0.5%	702	12.3%
US tax on foreign deemed dividend	16	0.3%		0.0%
Foreign tax rate differential	561	9.1%	445	7.8%
Net change in FIN 48 reserve	94	1.5%	(519)	-9.1%
Other	16	0.3%	235	4.1%
Actual provision	\$ 1,090	17.6%	\$ 3,512	61.7%

On March 1, 2007, the Company adopted Financial Accounting Standards Board (FASB) Interpretation No. 48, Accounting for Uncertainty in Income Taxes, an Interpretation of FASB Statement No. 109 (FIN 48). At the adoption date, the Company applied FIN 48 to all tax positions for which the statute of limitations remained open. Prior to adopting FIN 48, the Company had recorded approximately \$0.5 million for Federal unrecognized tax benefit liability. As a result of the implementation of FIN 48, the Company recognized an increase of approximately \$0.4 million in the liability for unrecognized net tax benefits (in excess of \$0.4 million gross) associated with uncertain state income tax positions, \$0.1 million for accrued penalties and less that \$0.1 million for accrued interest, which was accounted for as a reduction to the March 1, 2007, balance of retained earnings. This resulted in total unrecognized tax benefits of \$0.9 million as of March 1, 2007.

A reconciliation of the beginning and ending balances of unrecognized tax benefits is as follows (in thousands):

	Year Ended February 28 or 29,	
	2009	2008
Unrecognized tax benefit, beginning of year	\$ 445	\$ 907
Additions based on tax position related to the current year	122	201
Addition for tax positions of prior years		61
Reductions for tax positions of prior years	(21)	(194)
Reduction due to statute of limitations	(14)	(4)
Settlements		(526)
Unrecognized tax benefit, end of year	\$ 532	\$ 445

During fiscal 2008, the Company reduced the liability for unrecognized tax benefits by \$0.5 million based on the Internal Revenue Services finalizing the audit of the fiscal 2005 tax return. The amount of unrecognized tax benefits as of February 28, 2009, was approximately \$0.5 million. Any benefit ultimately recognized will reduce the Company's annual effective tax rate.

This amount represents the amount of unrecognized tax benefits that, if recognized, would affect the effective income tax rate in future periods. The Company classifies interest and penalties related to unrecognized tax benefits in tax expense. The Company had approximately \$0.1 million of interest and penalties accrued at February 28, 2009.

The Company is subject to income taxes in the US federal jurisdiction, and various states and foreign jurisdictions. Tax regulations within each jurisdiction are subject to interpretation of the related tax laws and regulations and require significant judgment to apply. With few exceptions, the Company is no longer subject to US federal, state and local, or non-US income tax examinations by tax authorities for the years before 2005.

Table of Contents

Undistributed earnings of the Company's foreign subsidiaries included in retained earnings amounted to approximately \$10.5 million at February 28, 2009. These earnings are considered to be permanently reinvested and, accordingly, no provision for U.S. federal and state income taxes has been provided thereon. Upon distribution of those earnings in the form of dividends or otherwise, the Company would be subject to both U.S. income taxes (net of foreign tax credits) and withholding taxes payable to the various foreign countries. Management has determined that it is not practical to determine the amount of tax that would be payable upon remittance of these earnings.

Cash paid for income taxes was approximately \$1.8 million and \$2.4 million in fiscal 2009 and 2008, respectively.

NOTE M SIGNIFICANT CUSTOMER AND VENDOR INFORMATION

Significant Customer Information

The Company sells products to a large number of customers which are primarily in the United States. The Company performs ongoing credit evaluations of its customers' financial condition and requires no collateral from its customers. The Company's customer base includes a high concentration of home improvement retailers with two such customers accounting for a total of approximately 66% and 61% of sales in fiscal 2009 and 2008, respectively. One customer represented 59% and 51% and the other customer represented 7% and 10% of sales in fiscal 2009 and 2008, respectively. These same two customers represented 55% and 12% of accounts receivable at February 28, 2009, and 49% and 8% of accounts receivable at February 29, 2008.

Significant Vendor Information

Although the Company believes that multiple sources of supply exist for nearly all of the finished products and raw materials purchased from outside suppliers, the Company purchased through two vendors approximately 12% and 8% in fiscal 2009 and 14% and 10% in fiscal 2008 of domestic product purchases.

NOTE N SHAREHOLDERS EQUITY

The Company is authorized to issue a maximum of 2,500,000 shares of \$1 par value preferred stock.

Series A

500,000 of the Company's 2,500,000 authorized shares of preferred stock, \$1 par value per share, are designated as Series A Preferred Stock. The holders of each share of Series A Preferred Stock shall be entitled to receive, before any dividends shall be declared, or paid on, or set aside for the Company's common stock, out of funds legally available for that purpose, cumulative dividends in cash at the rate of \$.035 per share per annum through September 30, 2000, payable in semiannual installments, accruing from the date of issuance of the shares. Commencing October 1, 2000, the rate of dividends is equal to the prime interest rate on the first day of the month in which the dividends are payable, less 1 1/4%.

The Company may redeem any or all of the shares of Series A Preferred Stock outstanding at a price per share of \$1.07 plus an amount equal to any accrued but unpaid dividends thereon during the first year following the issuance of such shares and such price shall be reduced by one percent (1%) each year thereafter until \$1.00 per share is reached. The Series A Preferred Stock has no voting rights, but do have a liquidation preference equal to par value plus accrued but unpaid dividends. During fiscal 1995, the Company issued 425,547 shares of Series A preferred stock in connection with a business acquisition. In fiscal 1997, 106,387 of these shares were converted to 3,129 shares of common stock. At February 28, 2009 and February 29, 2008, there were 319,160 shares of Series A Preferred Stock issued and outstanding. Dividends declared and paid related to the Series A Preferred Stock were immaterial in all periods presented.

Table of Contents

Series B

1,000,000 of the Company's 2,500,000 authorized shares of preferred stock, \$1 par value per share, are designated as Series B Preferred Stock. The holder of each share of Series B Preferred Stock shall be entitled to receive a non-cumulative dividend at the rate of \$.05 per share per annum, payable annually before any dividend shall be set apart for, or paid on, the common shares for such years. The Series B Preferred Stock has no voting rights. The Company may redeem any or all of the shares of Series B Preferred Stock then outstanding at a price per share of \$1.00. At February 28, 2009 and February 29, 2008, there were no outstanding shares of Series B preferred stock.

Series C

1,000,000 of the Company's 2,500,000 authorized shares of preferred stock, \$1 par value per share, are designated as Series C Preferred Stock. The holder of each share of Series C Preferred Stock shall be entitled to receive, before any dividends shall be declared, or paid on, or set aside for the Company's common stock, a cumulative dividends at the rate of \$.035 per share per annum, payable in annual installments accruing from the date of issuance of the shares. The Series C Preferred Stock has no voting rights, but do have a liquidation preference equal to par value plus accrued but unpaid dividends. The Company may redeem any or all of the shares of Series C Preferred Stock at a price per share of \$1.00. During fiscal year 1995, 17,500 shares of Series C Preferred Stock were issued in connection with a business acquisition. At February 28, 2009 and February 29, 2008, there were 17,500 shares of Series C Preferred Stock issued and outstanding. The dividend amounts paid and accrued were immaterial in all periods presented.

Treasury Stock

Since fiscal 1996, the Company has purchased from time to time shares of its common stock to be held in treasury. Through February 28, 2009 the number of shares held in treasury was 163,756 at an aggregate cost of \$1.1 million. During the second quarter of fiscal 2009, the Company entered into a formal purchase plan pursuant to which the Company may purchase up to \$2.0 million of its shares of common stock from time to time on the open market or in privately negotiated transactions. During the third quarter of fiscal 2009, the Company discontinued purchases under the plan. In fiscal 2009, the Company purchased 68,778 shares of common stock at an aggregate cost of \$0.4 million.

NOTE O STOCK PLANS

The Company has adopted a stock option plan for employees, consultants and directors of the Company. Stock options granted pursuant to the plan shall be authorized by the board of directors. The aggregate number of shares which may be issued under the plan, as amended, shall not exceed 1,000,000 shares of common stock. Stock options are granted at prices not less than 85% of the fair market value on the date of the grant. Option terms, vesting and exercise periods vary, except that the term of an option may not exceed ten years. No options have been issued at a discount to market price on the date of the grant. In fiscal 2009 and 2008, the Company recorded compensation cost within general and administrative expenses related to stock option and stock appreciation rights granted in previous periods of less than \$0.1 million and \$0.2 million, respectively. As at February 28, 2009, total compensation cost related to non-vested awards not yet recognized was less than \$0.1 million and is expected to be recognized over one year. No stock options were granted during fiscal 2009 or fiscal 2008.

Table of Contents

The following information relates to options outstanding:

	Shares	Weighted Average Exercise Price
Options outstanding at February 28, 2007	285,625	\$ 7.01
Exercised	(5,000)	\$ 6.75
Cancelled or forfeited	(25,000)	\$ 6.75

Nonvested options at February 28, 2009	10,000	\$ 3.99

The following table summarizes information about stock options outstanding as of February 28, 2009:

Range of exercise prices	Number outstanding	Weighted average remaining contractual life	Weighted average exercise price	Number exercisable	Weighted average exercise price
\$ 3.65 - \$ 5.55	67,250	2.55	\$ 4.13	67,250	\$ 4.13
\$ 5.56 - \$ 7.25	70,000	3.55	\$ 6.58	60,000	\$ 6.55
\$ 7.26 - \$15.56	37,000	5.42	\$ 12.02	37,000	\$ 12.02
Total	174,250			164,250	

During fiscal 2002, the Company issued 50,000 non-qualified stock options to an officer of the Company. These options have an exercise price of \$4.00 and expire in ten years. These options are not included in the above table. The officer exercised 10,000 of these options in fiscal 2007. In addition, in May 2003 the Company granted 50,000 shares of its common stock to the same officer. The value of the shares, as determined by an unrelated third party, was \$0.3 million at the time of the issuance. The value was recorded in expense through fiscal 2006.

From time to time, the Board of Directors has approved the granting of stock appreciation right grants to various members of management. These grants vest 100% after three years. No stock appreciation rights were granted in fiscal 2009 or fiscal 2008. The Company records an

Edgar Filing: QEP CO INC - Form 10-K

expense over the vesting period based on the fair value of the option granted. During fiscal 2009, the Company recorded \$0.1 million of income related to the revaluation of outstanding stock appreciation rights. The expense in fiscal 2008 was \$0.1 million. These awards will be settled in cash and are presented as a liability on the balance sheet. At February 28, 2009, there were 60,000 stock appreciation rights outstanding.

F-23

Table of Contents

The following table represents the assumptions used to estimate the fair value of the stock appreciation rights outstanding as of February 28, 2009:

	2009
Expected stock price volatility	49.7%
Expected lives of options	0.39
Risk-free interest rate	2.0%
Expected dividend yield	0.0%

In fiscal 2009, the Board of Directors approved the granting of 3,000 shares of restricted stock to its non-employee directors. These shares vest after one year.

In fiscal 2009 and fiscal 2008, the Company recorded compensation cost within general and administrative expenses related to restricted stock units of \$0.1 million. As of February 28, 2009, total compensation cost related to restricted stock units not yet recognized was less than \$0.1 million and is expected to be recognized within one year.

In fiscal 2009, the Board of Directors approved the granting of 162,500 shares of restricted stock to the Company's Chief Executive Officer in lieu of a cash payment for the remaining portion of the fiscal year 2008 executive bonus owed to the Chief Executive Officer. The value of the grant of restricted stock was \$0.2 million representing such shares at \$0.99 per share, the closing market price of the Company's common stock on the date of the grant.

As of February 28, 2009 and February 29, 2008, there were 0.4 million shares available for award under the Company's current equity compensation plan. No options were exercised in fiscal 2009. The intrinsic value of options exercised in fiscal 2008 was less than \$0.1 million. At February 28, 2009 the intrinsic value of options outstanding and options exercisable was immaterial. At February 29, 2008 the intrinsic value of options outstanding and options exercisable was \$0.9 million and \$0.8 million, respectively.

NOTE P RECENT ACCOUNTING PRONOUNCEMENTS

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements (SFAS No. 157), which defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles (GAAP), and expands disclosures about fair value measurements. For financial assets and liabilities, this statement is effective for fiscal periods beginning after November 15, 2007 and does not require any new fair value measurements. In February 2008, FASB Staff Position No. 157-2 was issued which delayed the effective date of FASB Statement No. 157 to fiscal years beginning after November 15, 2008 for nonfinancial assets and liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). The adoption of SFAS No. 157 did not have a material effect on the consolidated financial statements. The Company is currently evaluating the impact of adopting the provisions of FSP 157-2.

In April 2008, FASB Staff Position No. 142-3, Determination of the Useful Life of Intangible Assets was issued. This FSP amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of an intangible asset under FASB Statement No. 142, Goodwill and Other Intangibles (FAS 142). The FSP aims to improve the consistency between the useful life of an intangible asset as determined under FAS 142 and the period of expected cash flows used to measure the fair value of the asset under FASB Statement No. 141, Business Combinations, and other applicable accounting literature. As a result of this FSP, entities generally will be able to align the assumptions used for valuing an intangible asset with those used to determine its useful life. This FSP will be effective for financial statements issued for fiscal years beginning after December 15, 2008.

Table of Contents

(the Company's fiscal year ending February 28, 2010) and interim periods within those fiscal years. The Company is currently evaluating the effect, if any, of this statement on its consolidated financial statements.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities (SFAS No. 159), which allows entities the option to measure eligible financial instruments at fair value as of specified dates. Unrealized gains and losses on items for which the fair value option has been elected will be recognized in earnings at each subsequent reporting date. The provisions of SFAS No. 159 were effective for the Company beginning March 1, 2008. Upon adoption, the Company did not elect the fair value option for any items within the scope of SFAS No. 159 and, therefore, the adoption of SFAS No. 159 did not have an impact on its consolidated financial statements.

In April 2009, the FASB issued FSP FAS 107-1 and APB 28-1, Interim Disclosures about Fair Value of Financial Instruments. This FSP amends SFAS No. 107, Disclosures about Fair Value of Financial Instruments, to require disclosure about the fair value of financial instruments in interim financial statements. FSP FAS 107-1 and APB 28-1 is effective for interim reporting periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. The Company will include the disclosures required under this FSP beginning with its August 31, 2009 consolidated financial statements.

NOTE Q: RELATED PARTY TRANSACTIONS

The Company currently employs three individuals that are related to the Company's Chief Executive Officer and to the Company's President. These individuals were paid a total of \$0.3 million and \$0.3 million fiscal 2009 and 2008, respectively.

Since fiscal 1999, the Company repurchased shares of its outstanding common stock from an individual related to the President having a value of approximately \$1.0 million pursuant to a Board resolution to purchase, from time to time, up to 1,000 shares of common stock per month at a price per share equal to \$.50 less than the closing price of the common stock on the date of repurchase. This individual is not obligated to sell any shares of common stock to the Company. As of February 28, 2009, this individual has sold a total of 138,038 shares to the Company under this resolution.

During fiscal 2009, the Company repurchased 10,000 shares in a privately negotiated transaction with Ms. Susan Gould, Secretary of the Company, at a cost of approximately \$0.1 million under the Company's previously announced purchase plan pursuant to which the Company may purchase up to \$2.0 million of its Common Stock from time to time on the open market or in privately negotiated transactions.
