UNIVERSAL CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1. BASIS OF PRESENTATION

Universal Corporation, with its subsidiaries (Universal or the Company), is the world's leading leaf tobacco merchant and processor. Because of the seasonal nature of the Company's business, the results of operations for any fiscal quarter will not necessarily be indicative of results to be expected for other quarters or a full fiscal year. All adjustments necessary to state fairly the results for the period have been included and were of a normal recurring nature. Certain amounts in prior year statements have been reclassified to conform to the current year presentation. As part of the process of preparing its financial statements, the Company performed an evaluation of subsequent events occurring from September 30, 2009, the date of the consolidated balance sheet included in this report, through November 6, 2009, the date its financial statements were issued. This Form 10-Q should be read in conjunction with the financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the fiscal year ended March 31, 2009.

NOTE 2. ACCOUNTING PRONOUNCEMENTS

Recent Pronouncements Adopted Through September 30, 2009

Effective September 30, 2009, the Company adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 168, The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles a replacement of FASB Statement No. 162 (SFAS 168). SFAS 168 established the FASB Accounting Standards Codification (Codification) as the source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities in preparing financial statements in conformity with generally accepted accounting principles in the United States. All guidance in the Codification carries the same level of authority, and all changes or additions to U.S. generally accepted accounting principles are now issued as Accounting Standards Updates. SFAS 168 did not make any changes to existing accounting guidance that impact the Company's accounting and financial reporting.

Effective April 1, 2009, Universal adopted FASB Statement of Financial Accounting Standards No. 160, Noncontrolling Interests in Consolidated Financial Statements an amendment of ARB No. 51 (SFAS 160). SFAS 160, which is now set forth in Topic 810 of the Codification, requires that noncontrolling interests in subsidiaries that are included in a company's consolidated financial statements, commonly referred to as minority interests, be reported as a component of shareholders' equity in the balance sheet. It also requires that a company's consolidated net income and comprehensive income include the amounts attributable to both the company's interest and the noncontrolling interest in the subsidiary, identified separately in the financial statements. Finally, the new guidance requires certain disclosures about noncontrolling interests in the consolidated financial statements. Adoption of this guidance did not have a material impact on the Company's financial statements.

Table of Contents

UNIVERSAL CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Effective April 1, 2009, Universal also adopted FASB Statement of Financial Accounting Standards No. 141R, Business Combinations (SFAS 141R), which requires that companies record assets acquired, liabilities assumed, and noncontrolling interests in business combinations at fair value, separately from goodwill, as of the acquisition date. This approach differs from the cost allocation approach provided under previous accounting guidance and can result in recognition of a gain at acquisition date if the cost to acquire a business is less than the net fair value of the assets acquired, liabilities assumed, and noncontrolling interests. SFAS 141R, which is now set forth under Topic 805 of the Codification, also provides new guidance on recording assets and liabilities that arise from contingencies in a business combination, and it requires that transaction costs associated with business combinations be charged to expense instead of being recorded as part of the cost of the acquired business. Universal will apply the guidance to all future business combinations.

Effective June 30, 2009, the Company adopted FASB Statement of Financial Accounting Standards No. 165, Subsequent Events (SFAS 165). SFAS 165, which is now set forth under Topic 855 of the Codification, establishes standards for accounting and disclosure for events occurring after the balance sheet date but before financial statements are issued. It defines the period after the balance sheet date during which events or transactions should be evaluated for potential recognition or disclosure, and it provides guidance on recognition and disclosure of actual transactions or events occurring after the balance sheet date. The adoption of SFAS 165 did not have a material effect on the Company's financial statements.

NOTE 3. GUARANTEES AND OTHER CONTINGENT LIABILITIES

Guarantees and Other Contingent Liabilities

Guarantees of bank loans to growers for crop financing and construction of curing barns or other tobacco producing assets are industry practice in Brazil and support the farmers' production of tobacco there. At September 30, 2009, the Company's total exposure under guarantees issued by its operating subsidiary in Brazil for banking facilities of farmers in that country was approximately \$154 million (\$176 million face amount including unpaid accrued interest, less \$22 million recorded for the fair value of the guarantees). About 70% of these guarantees expire within one year, and all of the remainder expire within five years. The subsidiary withholds payments due to the farmers on delivery of tobacco and forwards those payments to the third-party banks. Failure of farmers to deliver sufficient quantities of tobacco to the subsidiary to cover their obligations to the third-party banks could result in a liability for the subsidiary under the related guarantees; however, in that case, the subsidiary would have recourse against the farmers. The maximum potential amount of future payments that the Company's subsidiary could be required to make at September 30, 2009, was the face amount, \$176 million including unpaid accrued interest (\$163 million as of September 30, 2008, and \$139 million at March 31, 2009). The fair value of the guarantees was a liability of approximately \$22 million at September 30, 2009 (\$28 million at September 30, 2008, and \$35 million at March 31, 2009). In addition to these guarantees, the Company has other contingent liabilities totaling approximately \$56 million, primarily related to a bank guarantee that bonds an appeal of a 2006 fine in the European Union, as discussed below.

Table of Contents

UNIVERSAL CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

European Commission Fines and Other Legal Matters

European Commission Fines in Spain

In October 2004, the European Commission (the Commission) imposed fines on five companies active in the raw Spanish tobacco processing market totaling 20 million for colluding on the prices paid to, and the quantities bought from, the tobacco growers in Spain. Two of the Company's subsidiaries, Tabacos Espanoles S.A. (TAES), a purchaser and processor of raw tobacco in Spain, and Deltafina, S.p.A. (Deltafina), an Italian subsidiary, were among the five companies assessed fines. In its decision, the Commission imposed a fine of 108,000 on TAES and a fine of 11.88 million on Deltafina. Deltafina did not and does not purchase or process raw tobacco in the Spanish market, but was and is a significant buyer of tobacco from some of the Spanish processors. The Company recorded a charge of about 12 million (approximately \$14.9 million at the September 2004 exchange rate) in the second quarter of fiscal year 2005 to accrue the full amount of the fines assessed against the Company's subsidiaries.

In January 2005, Deltafina filed an appeal in the Court of First Instance of the European Communities. Although a hearing on the matter was held in June 2009, the outcome of the appeal is uncertain, and an ultimate resolution to the matter could take several years. The Company has deposited funds in an escrow account with the Commission in the amount of the fine in order to stay execution during the appeal process. This deposit is accounted for as a non-current asset.

European Commission Fines in Italy

In 2002, the Company reported that it was aware that the Commission was investigating certain aspects of the leaf tobacco markets in Italy. Deltafina buys and processes tobacco in Italy. The Company reported that it did not believe that the Commission investigation in Italy would result in penalties being assessed against it or its subsidiaries that would be material to the Company's earnings. The reason the Company held this belief was that it had received conditional immunity from the Commission because Deltafina had voluntarily informed the Commission of the activities that were the basis of the investigation.

On December 28, 2004, the Company received a preliminary indication that the Commission intended to revoke Deltafina's immunity for disclosing in April 2002 that it had applied for immunity. Neither the Commission's Leniency Notice of February 19, 2002, nor Deltafina's letter of provisional immunity, contains a specific requirement of confidentiality. The potential for such disclosure was discussed with the Commission in March 2002, and the Commission never told Deltafina that disclosure would affect Deltafina's immunity. On November 15, 2005, the Company received notification from the Commission that the Commission had imposed fines totaling 30 million (about \$44 million at the September 30, 2009 exchange rate) on Deltafina and the Company jointly for infringing European Union antitrust law in connection with the purchase and processing of tobacco in the Italian raw tobacco market.

Table of Contents

UNIVERSAL CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The Company does not believe that the decision can be reconciled with the Commission's Statement of Objections and the facts. In January 2006, the Company and Deltafina each filed appeals in the Court of First Instance of the European Communities. Based on consultation with outside legal counsel, the Company believes it is probable that it will prevail in the appeals process and has not accrued a charge for the fine. Deltafina has provided a bank guarantee to the Commission in the amount of the fine plus accrued interest in order to stay execution during the appeal process.

U.S. Foreign Corrupt Practices Act

As a result of a posting to the Company's Ethics Complaint hotline alleging improper activities that involved or related to certain of its tobacco subsidiaries, the Audit Committee of the Company's Board of Directors engaged an outside law firm to conduct an investigation of the alleged activities. That investigation revealed that there have been payments that may have violated the U.S. Foreign Corrupt Practices Act. The payments involved approximated \$2 million over a seven-year period. In addition, the investigation revealed activities in foreign jurisdictions that may have violated the competition laws of such jurisdictions, but the Company believes those activities did not violate U.S. antitrust laws. The Company voluntarily reported these activities to the Department of Justice (DOJ) and Securities and Exchange Commission (SEC) in March 2006. On June 6, 2006, the SEC notified the Company that a formal order of investigation had been issued.

The Company has engaged in settlement discussions with the DOJ and SEC to resolve the above-referenced matter. Although those discussions are ongoing, the Company expects to enter into agreements with the DOJ and the SEC to resolve the matter, and it believes it is probable that such resolution will include injunctive relief, disgorgement and prejudgment interest, fines, penalties, and the retention of an independent compliance monitor. Since this matter arose, the Company has recorded accruals that it believes are adequate to satisfy the estimated financial settlement it expects with the resolution of this matter. However, because the Company's discussions are ongoing, it cannot predict with certainty when or whether an agreement will be reached with the DOJ and SEC, or the precise terms of any such agreement. The Company will continue to cooperate with the authorities in this matter while resolution discussions proceed.

Other Legal Matters

In addition to the above-mentioned matters, various subsidiaries of the Company are involved in other litigation and tax examinations incidental to their business activities. While the outcome of these matters cannot be predicted with certainty, management is vigorously defending these matters and does not currently expect that any of them will have a material adverse effect on the Company's financial position. However, should one or more of these matters be resolved in a manner adverse to management's current expectation, the effect on the Company's results of operations for a particular fiscal reporting period could be material.

Table of Contents**UNIVERSAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****NOTE 4. EARNINGS PER SHARE**

The following table sets forth the computation of basic and diluted earnings per share:

(in thousands, except per share data)	Three Months Ended September 30,		Six Months Ended September 30,	
	2009	2008	2009	2008
Basic Earnings Per Share				
Numerator for basic earnings per share				
Net income attributable to Universal Corporation	\$ 52,515	\$ 41,782	\$ 96,260	\$ 62,893
Less: Dividends on convertible perpetual preferred stock	(3,713)	(3,713)	(7,425)	(7,425)
Earnings available to Universal Corporation common shareholders for calculation of basic earnings per share	48,802	38,069	88,835	55,468
Denominator for basic earnings per share				
Weighted average shares outstanding	24,801	25,404	24,892	26,146
Basic earnings per share	\$ 1.97	\$ 1.50	\$ 3.57	\$ 2.12
Diluted Earnings Per Share				
Numerator for diluted earnings per share				
Earnings available to Universal Corporation common shareholders	\$ 48,802	\$ 38,069	\$ 88,835	\$ 55,468
Add: Dividends on convertible perpetual preferred stock (if conversion assumed)	3,713	3,713	7,425	7,425
Earnings available to Universal Corporation common shareholders for calculation of diluted earnings per share	52,515	41,782	96,260	62,893
Denominator for diluted earnings per share:				
Weighted average shares outstanding	24,801	25,404	24,892	26,146
Effect of dilutive securities (if conversion or exercise assumed)				
Convertible perpetual preferred stock	4,732	4,716	4,730	4,715
Employee share-based awards	162	229	147	224
Denominator for diluted earnings per share	29,695	30,349	29,769	31,085
Diluted earnings per share	\$ 1.77	\$ 1.38	\$ 3.23	\$ 2.02

For the three- and six-month periods ended September 30, 2009 and 2008, certain employee share-based awards were not included in the computation of diluted earnings per share because their effect would have been anti-dilutive. These awards included stock appreciation rights and stock options totaling 725,201 shares at a weighted-average exercise price of \$50.33 for the quarter and six months ended September 30, 2009, and 404,800 shares at a weighted-average exercise price of \$58.96 for the quarter and six months ended September 30, 2008.

Table of Contents**UNIVERSAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****NOTE 5. COMPREHENSIVE INCOME**

Comprehensive income for each period presented in the consolidated statements of income and retained earnings was as follows:

(in thousands of dollars - all amounts net of income taxes)	Three Months Ended September 30,		Six Months Ended September 30,	
	2009	2008	2009	2008
Net income	\$ 54,672	\$ 45,967	\$ 98,476	\$ 67,107
Foreign currency translation adjustment	5,448	(11,845)	13,592	(10,155)
Foreign currency hedge adjustment	3,056	(7,009)	14,268	(5,414)
Total comprehensive income	63,176	27,113	126,336	51,538
Less: comprehensive income attributable to noncontrolling interests in subsidiaries (including foreign currency translation adjustment)	(2,199)	(4,117)	(2,274)	(4,106)
Comprehensive income attributable to Universal Corporation	\$ 60,977	\$ 22,996	\$ 124,062	\$ 47,432

NOTE 6. INCOME TAXES

The Company's consolidated effective income tax rates on pre-tax earnings were approximately 27% and 30% for the quarter and six months ended September 30, 2009, respectively. During the quarter, the Company reversed certain income taxes previously recorded for uncertain tax positions due to the expiration of the statute of limitations for the related tax years. Excluding this reversal, the effective tax rate for both the quarter and six months would have been approximately 33%. That rate was lower than the 35% U.S. federal statutory rate, primarily due to higher earnings of certain foreign subsidiaries in the African region where income tax rates are generally below the U.S. rate due to the structure of the ownership of the region. For the quarter and six months ended September 30, 2008, the effective income tax rate was approximately 33%, and was lower than the U.S. federal statutory income tax rate primarily due to changes in the Company's overall tax position that allowed it to utilize foreign tax credit carryforwards and reverse a valuation allowance that had previously been recorded on those carryforwards.

NOTE 7. DERIVATIVES AND HEDGING ACTIVITIES

Universal is exposed to various risks in its worldwide operations and uses derivative financial instruments to manage two specific types of risks interest rate risk and foreign currency exchange rate risk. Interest rate risk has been managed by entering into interest rate swap agreements, and foreign currency exchange rate risk has been managed by entering into forward foreign currency exchange contracts. However, the Company's policy also permits other instruments. In addition, management works to manage foreign currency exchange rate risk by minimizing net monetary positions in non-functional currencies, which may include

Table of Contents

UNIVERSAL CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

using local borrowings. The disclosures below provide additional information about the Company's hedging strategies, the derivative instruments used, and the effects of these activities on the consolidated statements of income and the consolidated balance sheets.

Fair Value Hedging Strategy for Interest Rate Risk

The Company has entered into interest rate swap agreements to manage its exposure to interest rate risk, with a strategy of maintaining a level of floating rate debt that approximates the interest rate exposure on committed inventories. The strategy is implemented by borrowing at floating interest rates and converting a portion of the Company's fixed-rate debt to floating rates. The interest rate swap agreements allow the Company to receive amounts equal to the fixed interest payments it is obligated to make on the underlying debt instruments in exchange for making floating-rate interest payments that adjust semi-annually based on changes in the benchmark interest rate.

The interest rate swap agreements are designated and qualify as hedges of the exposure to changes in the fair value of the underlying debt instruments created by fluctuations in prevailing market interest rates. In all cases, the critical terms of each interest rate swap agreement match the terms of the underlying debt instrument, and there is no hedge ineffectiveness. At September 30, 2009, the total notional amount of the Company's receive-fixed/pay-floating interest rate swaps was \$170 million.

Cash Flow Hedging Strategy for Foreign Currency Exchange Rate Risk Related to Forecast Purchases of Tobacco

The majority of the tobacco production in most countries outside the United States where Universal operates is sold in export markets at prices denominated in U.S. dollars. However, purchases of tobacco from farmers and most processing costs (such as labor and energy) in those countries are usually denominated in the local currency. Changes in exchange rates between the U.S. dollar and the local currencies where tobacco is grown and processed affect the ultimate U.S. dollar cost of the processed tobacco and therefore can adversely impact the gross profit earned on the sale of that tobacco. Since the Company is able to reasonably forecast the volume, timing, and local currency cost of its tobacco purchases, it has routinely entered into forward contracts to sell U.S. dollars and buy the local currency at future dates that coincide with the expected timing of a portion of those purchases. This strategy contemplates the Company's pricing arrangements with key customers and substantially eliminates the variability of future U.S. dollar cash flows for tobacco purchases for the foreign currency notional amount hedged. The hedging strategy has been used for tobacco purchases in Brazil, where the large crops, the terms of sale to customers, and the availability of derivative markets make it particularly desirable to manage the related foreign exchange rate risk.

The Company did not designate the forward contracts it entered for the 2007-2008 crop year as hedges, and therefore it recognized all related gains and losses in earnings on a mark-to-market basis each reporting period. For the 2008-2009 crop cycle, all contracts were designated and qualify as hedges of the future cash flows associated with forecast purchases of tobacco. As a result, except for insignificant amounts related to any ineffective portion of the hedging

Table of Contents

UNIVERSAL CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

strategy, gains and losses on the forward contracts are recognized in comprehensive income as they occur, but are not recognized in earnings until the related tobacco is sold to third-party customers.

From September 2008 through July 2009, the Company hedged approximately \$241 million U.S. dollar notional amount related to 2008-2009 crop tobacco purchases in Brazil, primarily related to customer contractual requirements. As noted above, all of the related forward contracts were designated and accounted for as cash flow hedges. Purchases of the 2008-2009 crop were completed in July 2009, and all forward contracts related to that crop matured and were settled by that time. Sales of the 2008-2009 crop began during the first quarter of fiscal year 2010. During the six months ended September 30, 2009, a portion of the hedge gains and losses previously recorded in accumulated other comprehensive income was reclassified to cost of goods sold related to those sales. For all remaining hedge gains and losses recorded in accumulated other comprehensive loss at September 30, 2009, the Company expects to complete the sale of the tobacco and recognize the amounts in earnings during fiscal year 2010.

From October 2007 through July 2008, the Company hedged approximately \$240 million U.S. dollar notional amount related to the 2007-2008 crop in Brazil, but they were not designated and accounted for as hedges, so gains and losses on those contracts were recorded in earnings as they occurred.

Hedging Strategy for Foreign Currency Exchange Rate Risk Related to Net Local Currency Monetary Assets and Liabilities of Foreign Subsidiaries

Most of the Company's foreign subsidiaries transact the majority of their sales in U.S. dollars and finance the majority of their operating requirements with U.S. dollar borrowings, and therefore use the U.S. dollar as their functional currency. These subsidiaries normally have certain monetary assets and liabilities on their balance sheets that are denominated in the local currency. Those assets and liabilities can include cash and cash equivalents, accounts receivable and accounts payable, advances to farmers and suppliers, deferred income tax assets and liabilities, recoverable value-added taxes, and other items. Net monetary assets and liabilities denominated in the local currency are remeasured into U.S. dollars each reporting period, generating gains and losses that the Company records in earnings as a component of selling, general and administrative expenses. The level of net monetary assets or liabilities denominated in the local currency normally fluctuates throughout the year based on the operating cycle, but it is most common for monetary assets to exceed monetary liabilities at most times of the year, sometimes by a significant amount. When this situation exists and the local currency weakens against the U.S. dollar, remeasurement losses are generated. Conversely, remeasurement gains are generated on a net monetary asset position when the local currency strengthens against the U.S. dollar. Due to the size of its operations and the fact that it provides significant financing to farmers for crop production, the Company's subsidiary in Brazil has significant exposure to currency remeasurement gains and losses due to fluctuations in exchange rates at certain times of the year. To manage a portion of its exposure to currency remeasurement gains and losses in Brazil during fiscal year 2009, the Company entered into forward contracts to sell the Brazilian currency and buy U.S. dollars at future dates coinciding with expected changes in the overall net

Table of Contents

UNIVERSAL CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

local currency monetary asset position of the subsidiary. Gains and losses on the forward contracts were recorded in earnings as a component of selling, general, and administrative expenses for each reporting period as they occurred, and thus directly offset the related remeasurement losses or gains for the notional amount hedged in the consolidated statements of income. Accordingly, the Company did not designate these contracts as hedges for accounting purposes. The notional amount of these contracts totaled approximately \$36 million in U.S. dollars, and all of the contracts matured and were settled before March 31, 2009. To further mitigate currency remeasurement exposure, the Company's Brazilian subsidiary has obtained short-term local currency financing during certain periods. This strategy, while not involving the use of derivative instruments, is intended to minimize the subsidiary's net monetary position by financing a portion of the local currency monetary assets with local currency monetary liabilities and thus hedging a portion of the overall position. During the six months ended September 30, 2009, such local borrowings in Brazil approximated \$31 million.

The Company has several foreign subsidiaries that transact the majority of their sales and finance the majority of their operating requirements in their local currency, and therefore use their respective local currencies as the functional currency for reporting purposes. From time to time, these subsidiaries sell tobacco to customers in transactions that are not denominated in the functional currency. In those situations, the subsidiaries routinely enter into forward exchange contracts to offset currency risk for the period of time the related trade account receivable is outstanding with the customer. The contracts are not designated as hedges for accounting purposes.

Table of Contents**UNIVERSAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)*****Effect of Derivative Financial Instruments on the Consolidated Statements of Income***

The table below outlines the effects of the Company's use of derivative financial instruments on the consolidated statements of income for the quarter and six months ended September 30, 2009 and 2008.

(in thousands of dollars)	Three Months Ended September 30,		Six Months Ended September 30,	
	2009	2008	2009	2008

Total gain (loss) recognized in earnings for forward foreign currency exchange contracts not designated as hedges	\$ (18)	\$ 91	\$ 335	\$ 2,132

Table of Contents**UNIVERSAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

For the interest rate swap agreements designated as fair value hedges, since the hedges have no ineffectiveness, the gain or loss recognized in earnings on the derivative is offset by a corresponding loss or gain on the underlying hedged debt.

For the forward foreign currency exchange contracts designated as cash flow hedges of tobacco purchases in Brazil, a net hedge loss of approximately \$1.6 million remained in accumulated other comprehensive loss at September 30, 2009. That balance reflects losses on the settled contracts, less the amount reclassified to earnings related to tobacco sold through September 30, 2009. The balance in accumulated other comprehensive loss will be recognized in earnings as a component of cost of goods sold during fiscal year 2010 as the remaining 2008-2009 Brazilian crop tobacco is sold to customers. Based on the hedging strategy, as the loss or gain is recognized in earnings, it is offset by a change in the expected direct cost for the tobacco or by a change in sales prices if the strategy has been mandated by the customer. Margins on the sale of the tobacco are generally not significantly affected.

Effect of Derivative Financial Instruments on the Consolidated Balance Sheets

The table below outlines the effects of the Company's derivative financial instruments on the consolidated balance sheets at September 30, 2009 and 2008, and March 31, 2009:

(in thousands of dollars)	Derivatives in a Fair Value Asset Position			Derivatives in a Fair Value Liability Position				
	Balance Sheet Location	Fair Value as of Sept. 30, 2009	Fair Value as of Sept. 30, 2008	Fair Value as of March 31, 2009	Balance Sheet Location	Fair Value as of Sept. 30, 2009	Fair Value as of Sept. 30, 2008	Fair Value as of March 31, 2009

Total		\$ 741	\$	\$ 45		\$ 10	\$	\$ 712

Table of Contents**UNIVERSAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****NOTE 8. FAIR VALUE MEASUREMENTS**

Universal adopted the current accounting guidance for fair value measurements effective April 1, 2008, for financial assets and liabilities, and effective April 1, 2009, for nonfinancial assets and liabilities. The financial assets and liabilities measured at fair value include money market funds, available-for-sale securities, trading securities associated with deferred compensation plans, interest rate swap agreements, forward foreign currency exchange contracts, and guarantees of bank loans to tobacco growers. The application of the fair value guidance to nonfinancial assets and liabilities primarily includes assessments of goodwill and long-lived assets for potential impairment.

Under the accounting guidance, fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The framework for measuring fair value under the guidance is based on a fair value hierarchy that distinguishes between observable inputs (i.e., inputs that are based on market data obtained from independent sources) and unobservable inputs (i.e., inputs that require the Company to make its own assumptions about market participant assumptions because little or no market data exists). There are three levels within the fair value hierarchy:

Level	Description
1	quoted prices in active markets for identical assets or liabilities that the Company has the ability to access as of the reporting date;
2	quoted prices in active markets for similar assets or liabilities, or quoted prices for identical or similar assets or liabilities, in markets that are not active, or inputs other than quoted prices that are observable for the asset or liability; and
3	unobservable inputs for the asset or liability.

In measuring the fair value of liabilities, the Company considers the risk of non-performance in determining fair value.

Table of Contents**UNIVERSAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

At September 30, 2009, the Company had certain financial assets and financial liabilities that were required to be measured and reported at fair value on a recurring basis. These assets and liabilities are listed in the table below and classified based on how their values were determined under the fair value hierarchy:

(in thousands of dollars)	September 30, 2009			Total
	Level 1	Level 2	Level 3	
Assets:				
Money market funds	\$ 17,000	\$	\$	\$ 17,000
Trading securities associated with deferred compensation plans	18,575			18,575
Interest rate swaps		11,905		11,905
Forward foreign currency exchange contracts		741		741
Total assets	\$ 35,575	\$ 12,646	\$	\$ 48,221
Liabilities:				
Guarantees of bank loans to tobacco growers	\$	\$	\$ 21,940	\$ 21,940
Forward foreign currency exchange contracts		10		10
Total liabilities	\$	\$ 10	\$ 21,940	\$ 21,950

Money market funds

The fair values of money market funds, which are reported in cash and cash equivalents in the consolidated balance sheets, are based on quoted market prices (Level 1). The fair values of the Company's money market funds approximate cost due to the short-term maturities and the high credit quality of the issuers of the underlying securities.

Trading securities associated with deferred compensation plans

Trading securities represent mutual fund investments that are matched to employee deferred compensation obligations. These investments are bought and sold as employees defer compensation, receive distributions, or make changes in the funds underlying their accounts. Quoted market prices (Level 1) are used to determine the fair values of the mutual funds and their underlying securities.

Interest rate swaps

The fair values of interest rate swap contracts are determined based on dealer quotes using a discounted cash flow model matched to the contractual terms of each instrument. Since inputs to the model are observable and significant judgment is not required in determining the fair values, interest rate swaps are classified within Level 2 of the fair value hierarchy.

Table of Contents**UNIVERSAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)*****Forward foreign currency exchange contracts***

The fair values of forward foreign currency exchange contracts are also determined based on dealer quotes using a discounted cash flow model matched to the contractual terms of each instrument. Since inputs to the model are observable and significant judgment is not required in determining the fair values, forward foreign currency exchange contracts are classified within Level 2 of the fair value hierarchy.

Guarantees of bank loans to tobacco growers

The fair values of the Company's guarantees of bank loans to tobacco growers are determined by using internally-tracked historical loss data for such loans to develop an estimate of future losses under the guarantees outstanding at the measurement date. The present value of the cash flows associated with those estimated losses is then calculated at a risk-adjusted interest rate. This approach is sometimes referred to as the contingent claims valuation method. Although historical loss data is an observable input, significant judgment is required in applying this information to the portfolio of guaranteed loans outstanding at each measurement date and in selecting a risk-adjusted interest rate. The guarantees of bank loans to tobacco growers are therefore classified within Level 3 of the fair value hierarchy.

A reconciliation of the change in the balance of the financial liability for guarantees of bank loans to tobacco growers (Level 3) for the six months ended September 30, 2009, is as follows:

(in thousands of dollars)	Six Months Ended September 30, 2009
Balance at beginning of year	\$ 35,154
Transfer to allowance for loss on direct loans to farmers (removal of prior crop year loans from portfolio and addition of current crop year loans)	(21,009)
Change in discount rate and estimated collection period	702
Currency remeasurement	7,093
Balance at end of period	\$ 21,940

Universal has not elected to report at fair value any financial instruments or other items not otherwise required to be reported at fair value under current accounting guidance.

NOTE 9. PENSION AND OTHER POSTRETIREMENT BENEFIT PLANS

The Company has several defined benefit pension plans covering U.S. salaried employees and certain foreign and other employee groups. These plans provide retirement benefits based primarily on employee compensation and years of service. The Company also provides postretirement health and life insurance benefits for eligible U.S. employees attaining specific age and service levels.

Table of Contents

The components of the Company's net periodic benefit cost were as follows:

(in thousands of dollars)	Pension Benefits		Other Postretirement Benefits	
	Three Months Ended September 30,		Three Months Ended September 30,	
	2009	2008	2009	2008
Service cost	\$ 1,026	\$ 1,446	\$ 164	\$ 216
Interest cost	3,698	3,438	706	640
Expected return on plan assets	(3,455)	(3,338)	(38)	(37)
Settlement cost		961		
Net amortization and deferral	244	69	(255)	(12)
Net periodic benefit cost	\$ 1,513	\$ 2,576	\$ 577	\$ 807

(in thousands of dollars)	Pension Benefits		Other Postretirement Benefits	
	Six Months Ended September 30,		Six Months Ended September 30,	
	2009	2008	2009	2008
Service cost	\$ 2,041	\$ 2,899	\$ 327	\$ 456
Interest cost	7,366	6,894	1,411	1,395
Expected return on plan assets	(6,891)	(6,680)	(76)	(78)
Curtailement loss		815		
Settlement cost	1,250	3,302		
Net amortization and deferral	490	639	(510)	(24)
Net periodic benefit cost	\$ 4,256	\$ 7,869	\$ 1,152	\$ 1,749

During the six months ended September 30, 2009, the Company made contributions of approximately \$11 million to its qualified and non-qualified pension plans. Additional contributions of approximately \$8 million are expected during the remaining six months of fiscal year 2010.

NOTE 10. STOCK-BASED COMPENSATION

Universal's shareholders have approved Executive Stock Plans (Plans) under which officers, directors, and employees of the Company may receive grants and awards of common stock, restricted stock, restricted stock units (RSUs), performance share awards (PSAs), stock appreciation rights (SARs), incentive stock options, and non-qualified stock options. The Company's practice is to award grants of stock-based compensation to officers on an annual basis at the first regularly scheduled meeting of the Executive Compensation, Nominating and Corporate Governance Committee of the Board of Directors (the Compensation Committee) in the fiscal year, which is scheduled on a day between two and twelve business days following the public release of the Company's annual financial results. The Compensation Committee administers the Company's Plans consistently following previously defined guidelines. Awards of restricted stock, RSUs, PSAs, SARs, and non-qualified stock options are currently outstanding under the Plans. The non-qualified stock options and SARs have an exercise price equal to the closing price of a share of the Company's common stock on the grant date. All stock options currently outstanding are fully vested and exercisable, and they expire ten years after the grant date. The SARs are settled in shares of common stock, vest in equal one-third tranches one, two,

Table of Contents**UNIVERSAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

and three years after the grant date, and expire ten years after the grant date, except that SARs granted after fiscal year 2007 expire on the earlier of three years after the grantee's retirement date or ten years after the grant date. The RSUs vest five years from the grant date and are then paid out in shares of common stock. Under the terms of the RSU awards, grantees receive dividend equivalents in the form of additional RSUs that vest and are paid out on the same date as the original RSU grant. The PSAs vest three years from the grant date, are paid out in shares of common stock at the vesting date, and do not carry rights to dividends or dividend equivalents prior to vesting. Shares ultimately paid out under PSA grants are dependent on the achievement of predetermined performance measures established by the Compensation Committee and can range from zero to 150% of the stated award. The Company's outside directors automatically receive shares of restricted stock following each annual meeting of shareholders. These shares vest upon the individual's retirement from service as a director.

During the six-month period ended September 30, 2009 and 2008, Universal issued the following stock-based awards, representing the regular annual grants to officers and outside directors of the Company:

	Six Months Ended September 30,	
	2009	2008
SARs:		
Number granted	253,800	132,000
Exercise price	\$ 35.30	\$ 51.32
Grant date fair value	\$ 7.85	\$ 11.65
RSUs:		
Number granted	63,450	36,500
Grant date fair value	\$ 35.30	\$ 51.32
PSAs:		
Number granted	63,450	31,600
Grant date fair value	\$ 29.67	\$ 45.96
Restricted Shares:		
Number granted	17,550	14,500
Grant date fair value	\$ 39.76	\$ 54.38

The grant date fair value of the SARs was estimated using the Black-Scholes pricing model and the following assumptions:

	2009	2008
Expected term	5.0 years	5.0 years
Expected volatility	39.0%	31.3%
Expected dividend yield	5.21%	3.50%
Risk-free interest rate	2.51%	3.32%

Fair value expense for stock-based compensation is recognized ratably over the period from grant date to the earlier of: (1) the vesting date of the award, or (2) the date the grantee is eligible to retire without forfeiting the award. For employees who are already eligible to retire at

Table of Contents

UNIVERSAL CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

the date an award is granted, the total fair value of all non-forfeitable awards is recognized as expense at the date of grant. As a result, Universal typically incurs higher stock compensation expense in the first quarter of each fiscal year when grants are awarded than in the other three quarters. For PSAs, the Company generally recognizes fair value expense ratably over the performance and vesting period based on management's judgment of the ultimate award that is likely to be paid out based on the achievement of the predetermined performance measures. For the six months ended September 30, 2009 and 2008, the Company recorded total stock-based compensation expense of approximately \$3.3 million and \$2.8 million, respectively. The Company expects to recognize stock-based compensation expense of approximately \$2.6 million during the remaining six months of fiscal year 2010.

NOTE 11. OPERATING SEGMENTS

The principal approach used by management to evaluate the Company's performance is by geographic region, although some components of the business are evaluated on the basis of their worldwide operations. The Company evaluates the performance of its segments based on operating income after allocated overhead expenses (excluding significant non-recurring charges or credits), plus equity in pretax earnings of unconsolidated affiliates.

Table of Contents**UNIVERSAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Operating results for the Company's reportable segments for each period presented in the consolidated statements of income and retained earnings were as follows:

(in thousands of dollars)	Three Months Ended September 30,		Six Months Ended September 30,	
	2009	2008	2009	2008
SALES AND OTHER OPERATING REVENUES				
Flue-cured and burley leaf tobacco operations:				
North America	\$ 49,874	\$ 54,866	\$ 86,006	\$ 103,293
Other regions (1)	547,177	686,276	1,068,349	1,087,761
Subtotal	597,051	741,142	1,154,355	1,191,054
Other tobacco operations (2)	50,867	44,448	109,675	100,823
Consolidated sales and other operating revenues	\$ 647,918	\$ 785,590	\$ 1,264,030	\$ 1,291,877
OPERATING INCOME				
Flue-cured and burley leaf tobacco operations:				
North America	\$ 7,948	\$ 3,750	\$ 8,254	\$ 3,324
Other regions (1)	61,477	62,453	125,386	97,638
Subtotal	69,425	66,203	133,640	100,962
Other tobacco operations (2)	12,045	12,575	21,243	15,953
Segment operating income	81,470	78,778	154,883	116,915
Less:				
Equity in pretax earnings of unconsolidated affiliates (3)	5,605	7,583	9,246	7,533
Consolidated operating income	\$ 75,865	\$ 71,195	\$ 145,637	\$ 109,382

(1) Includes South America, Africa, Europe, and Asia regions, as well as inter-region eliminations.

(2) Includes Dark Air-Cured, Special Services, and Oriental, as well as inter-company eliminations. Sales and other operating revenues for this reportable segment include limited amounts for Oriental because its financial results consist principally of equity in the pretax earnings of an unconsolidated affiliate.

(3) Item is included in segment operating income, but not included in consolidated operating income.

Table of Contents**UNIVERSAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****NOTE 12. CHANGES IN SHAREHOLDERS EQUITY AND NONCONTROLLING INTERESTS IN SUBSIDIARIES**

As discussed in Note 2, the Company adopted SFAS 160 (now set forth in Topic 810 of the Codification) effective April 1, 2009, and revised its financial statement presentation for noncontrolling interests in subsidiaries to reflect the new guidance. A reconciliation of the changes in Universal Corporation shareholders equity and noncontrolling interests in subsidiaries for the six months ended September 30, 2009 and 2008 is as follows:

(in thousands of dollars)	Six Months Ended September 30, 2009			Six Months Ended September 30, 2008		
	Universal Corporation	Noncontrolling Interests	Total	Universal Corporation	Noncontrolling Interests	Total
Balance at beginning of year	\$ 1,029,473	\$ 3,771	\$ 1,033,244	\$ 1,115,631	\$ 3,182	\$ 1,118,813

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

This Quarterly Report on Form 10-Q and the following Management's Discussion and Analysis of Financial Condition and Results of Operations contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Among other things, these statements relate to the Company's financial condition, results of operation, and future business plans, operations, opportunities, and prospects. In addition, the Company and its representatives may from time to time make written or oral forward-looking statements, including statements contained in other filings with the Securities and Exchange Commission and in reports to shareholders. These forward-looking statements are generally identified by the use of words such as we expect, believe, anticipate, could, should, may, plan, will, predict, estimate, and similar expressions or words of similar import. These forward-looking statements are based upon management's current knowledge and assumptions about future events and involve risks and uncertainties that could cause actual results, performance, or achievements to be materially different from any anticipated results, prospects, performance, or achievements expressed or implied by such forward-looking statements. Such risks and uncertainties include: anticipated levels of demand for and supply of its products and services; costs incurred in providing these products and services; timing of shipments to customers; changes in market structure; changes in exchange rates; and general economic, political, market, and weather conditions. For a further description of factors that may cause actual results to differ materially from such forward-looking statements, see Item 1A, Risk Factors of our Annual Report on Form 10-K for the fiscal year ended March 31, 2009. We caution investors not to place undue reliance on any forward-looking statements as these statements speak only as of the date when made, and we undertake no obligation to update any forward-looking statements made in this report. This Form 10-Q should be read in conjunction with our Annual Report on Form 10-K for the fiscal year ended March 31, 2009.

Liquidity and Capital Resources*Overview*

The first half of the fiscal year is generally a period of significant working capital investment in both Brazil and Africa, as crops are delivered by farmers. In fiscal year 2010, we funded those requirements using cash on hand, customer advances, and operating cash flows. In addition, we purchased common stock under our share repurchase program, which is based on free cash flow generated in prior years and an assessment of our future capital needs.

Our liquidity and capital resource requirements are predominantly short term in nature and relate to working capital for tobacco crop purchases. Working capital needs are seasonal within each geographic region. The geographic dispersion and the timing of working capital needs permit us to predict our general level of cash requirements, although crop size, prices paid to farmers, and currency fluctuations affect requirements each year. Peak working capital requirements are generally reached during the first and second fiscal quarters. Each geographic area follows a cycle of buying, processing, and shipping, although in many regions, we also

Table of Contents

provide agricultural materials to farmers during the growing season. The timing of the elements of each cycle is influenced by such things as local weather conditions and individual customer shipping requirements, which may change the level or the duration of crop financing. Despite a predominance of short-term needs, we maintain a relatively large portion of our total debt as long-term to reduce liquidity risk.

Operations

We used \$134 million in net cash flow to fund operating activities during the first six months of fiscal year 2010. Tobacco inventory, at \$920 million, was up \$334 million during the first six months of fiscal year 2010 on seasonal tobacco crop purchases in several areas, including Africa, North America, and Asia. Tobacco inventory levels are \$142 million higher than September 30, 2008, levels, primarily reflecting shipments from Africa, the Philippines, and Argentina that are expected to be completed later this year than last year. Inventory is usually financed with a mix of cash, notes payable, and customer deposits, depending on our borrowing capabilities, interest rates, and exchange rates, as well as those of our customers.

Advances to suppliers were \$89 million at September 30, 2009, a reduction of \$125 million from March 31, 2009, as crops were delivered in payment of those balances primarily in Asia, Africa, and South America. Compared to the same time last year, advances to suppliers were \$80 million lower, reflecting lower advances in Brazil that are offset by higher farmer guarantees there and lower advances in Argentina. Accounts receivable increased by \$31 million compared to March 31, 2009, reflecting seasonal increases.

We generally do not purchase material quantities of tobacco on a speculative basis. At September 30, 2009, our uncommitted inventories were \$66 million, or about 7%, of total tobacco inventory, compared to \$124 million, or about 21%, of our March 31, 2009, inventory, and \$74 million, or about 9%, of our September 30, 2008 inventory. These percentages are within normal ranges for our business within their respective times of year.

Customer deposits were up \$56 million in the first six months of fiscal year 2010, reflecting the normal seasonal increase.

Investment

During the six months ended September 30, 2009, we invested about \$26 million in our fixed assets compared to \$22 million in the first six months of last year. Depreciation expense was approximately \$21 million and \$20 million in the six months ended September 30, 2009 and 2008, respectively. Our intent is to limit maintenance capital spending to a level below depreciation expense in order to maintain strong cash flow. However, from time to time larger projects may be undertaken. Earlier this year, we announced that we plan to spend approximately \$12 million in fiscal year 2010 on an expansion and upgrade of our processing facility in Lancaster, Pennsylvania, to accommodate the consolidation of our U.S. dark tobacco processing into that facility. In addition, we expect to spend approximately twice that on other customer-related investment opportunities, the largest part of which will be spent during the current fiscal year.

Table of Contents*Financing*

We define our net debt as the sum of notes payable and overdrafts, long-term debt (including current portion), and customer advances and deposits, less cash, cash equivalents, and short-term investments on our balance sheet. We also define our total capitalization as our net debt plus shareholders' equity. Net debt increased by about \$260 million to \$641 million during the six months ended September 30, 2009, primarily due to seasonal working capital requirements. Net debt as a percentage of total capitalization was approximately 36% at September 30, 2009, up from about 27% at March 31, 2009, and down from approximately 39% at September 30, 2008. Net debt was about \$24 million lower than September 30, 2008 levels, and it was at the lower end of our operating range of 35% to 45% of total capitalization. We also repaid \$79.5 million in long-term debt that matured in September 2009, and we provided \$11 million in funding to our pension plans during the six months.

As of September 30, 2009, we were in compliance with the covenants of our debt agreements. We had \$245 million available under a committed revolving credit facility that will expire on August 31, 2012, \$62 million in cash and cash equivalents, and \$30 million available under a committed credit facility that will expire in December 2009. Our short-term debt totaled \$301 million, and we had no current maturities of long-term debt. In addition, we had about \$565 million in unused, uncommitted credit lines. Our seasonal working capital requirements typically increase significantly between March and September and decline after mid-year. We plan to spend approximately \$30 million to expand and upgrade our Lancaster dark tobacco processing facility and complete other new investments requested by our customers. While available capital resources from our cash balances, committed credit facilities, and uncommitted credit lines exceed these anticipated needs, we may explore issuing additional long-term debt in order to better control liquidity risk.

On November 7, 2007, we announced that our Board of Directors had approved the purchase of up to \$150 million of our common stock through November 2009. The purchases were carried out from time to time on the open market at prevailing market prices. During the six months ended September 30, 2009, we purchased 304,000 shares of common stock at an aggregate cost of \$11.2 million (average price per share of \$37.04), which brought our total purchases under the program to 2.86 million shares at an aggregate cost of \$139 million (average price per share of \$48.66). The program expires on November 15, 2009. On November 5, 2009, we announced that our Board of Directors had approved a new authorization for the purchase of up to \$150 million of our common stock through November 5, 2012. The purchases are to be carried out from time to time on the open market or in privately negotiated transactions at prices not exceeding prevailing market rates. The program will be based on free cash flow generated in prior years and an assessment of our capital needs. As of September 30, 2009, we had approximately 24.7 million common shares outstanding.

Derivatives

From time to time, we use interest rate swap agreements to manage our exposure to changes in interest rates. These agreements typically adjust interest rates on designated long-term obligations from fixed to variable. The swaps are accounted for as fair value hedges. At September 30, 2009, the fair value of our outstanding interest rate swap agreements was an asset of \$11.9 million.

Table of Contents

We also enter forward contracts from time to time to hedge certain foreign currency exposures, primarily related to forecast purchases of tobacco in Brazil. We account for our hedges of forecast tobacco purchases as cash flow hedges. At September 30, 2009, all forward contracts to hedge 2008-2009 crop tobacco purchases were settled, and we had approximately \$1.6 million in losses on those contracts recorded in accumulated other comprehensive loss. At September 30, 2009, we had other forward contracts outstanding that were not designated as hedges, and the fair value of those contracts was not material.

Results of Operations

Amounts included in the following discussion are attributable to Universal Corporation and exclude earnings related to non-controlling interests in subsidiaries.

Net income for the first six months of fiscal year 2010, which ended on September 30, 2009, was \$96.3 million, or \$3.23 per diluted share. Results were above last year's net income of \$62.9 million, or \$2.02 per diluted share, mostly because of a \$17 million decline in currency-related costs, better margins, and a favorable tax rate related to the reversal of provisions for uncertain tax positions due to expiration of the time period during which those positions could be challenged by the tax authorities. Revenues for the six months of about \$1.3 billion were flat, as lower volumes due to later shipments and reduced old crop tobacco sales were offset by a better mix of business and higher prices in some areas.

For the second quarter of fiscal year 2010, net income was \$52.5 million, or \$1.77 per diluted share, compared to last year's net income of \$41.8 million, or \$1.38 per diluted share. The increase was primarily due to a \$25 million decline in currency-related costs and the tax provision reversal. Revenues for the quarter of about \$648 million were down significantly, as some shipments were either accelerated into the first quarter or delayed until later in the year.

Flue-cured and Burley Operations

First Six Months

Operating income for our flue-cured and burley tobacco operations, which comprise our North America and Other Regions segments, increased by more than 30% to \$134 million for the first half of this fiscal year, largely on the strength of lower currency-related costs and better margins. Revenues were flat, primarily because a better mix of business and higher prices in some areas offset the effect of lower volumes from shipment delays and lower old crop shipments. In North America, operating income increased by nearly \$5 million due to higher prices and improved experience with farmer advances in some areas, although revenues declined on lower sales of old crop leaf and lower Canadian volumes. Earnings for the Other Regions segment were up by 28%, primarily due to lower currency-related costs in Brazil. Volumes improved in Asia and South America, although shipment delays in some areas limited that improvement. African shipments were substantially lower this year because the current crop will be shipped later and first quarter shipments of old crop were reduced. Earnings in Africa improved because of a better product mix and additional processing income. In Europe, lower

Table of Contents

margins and a weaker local currency reduced reported results. Revenues for Other Regions were nearly flat for the six months as lower volumes, especially in Africa, were offset by improved mix.

Second Quarter

In the second quarter of fiscal year 2010, operating income for flue-cured and burley operations increased by 5% to \$69 million, compared to the same period last year. Revenues for the group at \$597 million were markedly lower as improvements in product mix overall did not offset the impact of lower volumes, primarily related to late shipments in Africa and accelerated shipments from Brazil and Europe in the first quarter of fiscal year 2010. Operating income for the North America segment increased by \$4 million, largely reflecting some pricing improvements and lower costs, which more than offset the effects of lower volumes shipped. Revenues for North America were down on lower volumes. Results for the Other Regions segment were flat on lower volumes, as operating margins improved mostly because of lower currency losses this year. Although average sales prices in the Other Regions segment were slightly higher in the quarter, that increase was not sufficient to offset the effect on segment revenues of lower shipments from Africa.

Other Tobacco Operations

The Other Tobacco Operations segment performed well during the first six months of fiscal year 2010. The dark tobacco group saw an improved mix of business that more than offset slightly lower volumes and costs of rationalizing their U.S. operations. Despite an improvement in product mix that benefited current year results, the oriental tobacco joint venture earnings were flat due to the absence of currency gains in the first half of this year. For the second quarter of fiscal year 2010, the segment was flat. Improvement in the dark tobacco business volumes and margin were offset by lower results from the oriental tobacco group where currency gains last year were not repeated. Revenues for the segment were higher in both the quarter and the six months ended September 30, 2009, on higher volumes in the quarter and flat volumes for the six months. Dark tobacco revenues, which are normally the predominant factor in this segment's revenues, were higher in the quarter due to higher prices caused by increased leaf costs during last year's purchasing season and a more favorable product mix. Revenues for dark tobacco were flat for the six months.

Other Information

Cost of sales decreased by 21% to about \$500 million in the quarter ended September 30, 2009, on the lower volumes shipped, and lower costs, as the U.S. dollar had strengthened against the currencies of many origins during the leaf purchasing season. Selling, general, and administrative costs decreased by 15%, reflecting lower currency remeasurement losses this year. For the six months, the pattern was similar with somewhat lower volumes combining with lower costs to reduce cost of sales by about 5% and selling, general, and administrative expenses falling by 5% in response to lower currency remeasurement losses. Interest expense was about \$3 million lower than that of fiscal year 2009 in the quarter and the six months because of lower average borrowing combined with lower average interest rates. The effective income tax rate at 30% for the six months is lower than that of last year because of the reversal of some taxes

Table of Contents

provided on uncertain tax positions due to expiration of the time period during which those positions could be challenged by the tax authorities. Absent that reversal, the rate would be lower than the U.S. statutory income tax rate due to the relative size of earnings in regions with lower statutory tax rates.

General Overview

We are very pleased with our performance so far this year. All of our operations continue to perform well, benefitting from continued cost controls and global coordination. Earlier shipments of Brazilian and European tobacco boosted results in our first fiscal quarter, so we expected lower volumes this period. In addition, some African shipments will be later this year than last. Our costs were lower this quarter, especially those related to currency movement, and that factor has offset the effect of reduced shipments.

We do not foresee an oversupply of flue-cured tobacco in the coming year. In fact, rains in Brazil during the season could reduce the crop there. Although African burley crops were very large this year, they were smaller than we anticipated, and it appears that the supply has been absorbed by the market. We would not expect to see any significant increase in worldwide dealer inventories for flue-cured and burley tobacco. However, looking at the current worldwide situation, the U.S. dollar has weakened in recent weeks, which could increase costs as we enter the next purchasing season.

As we look ahead in the intermediate term, we will maintain our relationship with Japan Tobacco Inc. (JTI), one of our largest customers, as they work on their previously announced steps to enhance direct leaf procurement capabilities in some origins by acquiring and entering joint ventures with smaller leaf merchants. They have made certain announcements in recent weeks regarding their progress toward that goal, and we believe that it is likely that our U.S. flue-cured and burley volumes for JTI as well as our Malawi burley volumes for them will be reduced or eliminated over time, although we expect these actions will have no effect on volumes this fiscal year. We remain focused on measuring the business impact of these volume reductions and believe that we will continue to sell them significant volumes of processed tobacco outside these two countries.

Table of Contents**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK*****Interest Rates***

After inventory is purchased, interest rate risk is limited in the tobacco business because major customers usually pre-finance purchases or pay market rates of interest for inventory purchased for their accounts. Our customers pay interest on tobacco purchased for their order. That interest is paid at rates based on current markets for variable-rate debt. When we fund our committed tobacco inventory with fixed-rate debt, we may not be able to recover interest at that fixed rate if current market interest rates were to fall. As of September 30, 2009, tobacco inventory of \$920 million included about \$854 million in inventory that was committed for sale to customers and about \$66 million that was not committed. Committed inventory, after deducting \$70 million in customer deposits, represents our net exposure of \$784 million. We normally maintain a substantial portion of our debt at variable interest rates either directly or through interest rate exchange agreements in order to mitigate interest rate risk related to carrying fixed-rate debt. We also periodically have large cash balances that we use to fund seasonal tobacco purchases. These cash balances reduce our financing needs. Debt carried at variable interest rates was about \$471 million at September 30, 2009. Although a hypothetical 1% change in short-term interest rates would result in a change in annual interest expense of approximately \$5 million, that amount would be mitigated by changes in charges to customers. Our policy is to work toward a level of floating rate liabilities, including customer deposits, that reflects a substantial portion of our average committed inventory levels over time. In addition to the \$471 million of debt with variable interest rates, about \$162 million of long-term debt has an effective average fixed rate of 5.48%.

Currency

The international tobacco trade generally is conducted in U.S. dollars, thereby limiting foreign exchange risk to that which is related to production costs, overhead, and income taxes in the source country. We also provide farmer advances that are directly related to leaf purchases and are denominated in the local currency. Any currency gains or losses on those advances are usually offset by decreases or increases in the cost of tobacco, which is priced in the local currency. However, the effect of the offset may not occur until a subsequent quarter or fiscal year. Most of our operations are accounted for using the U.S. dollar as the functional currency. Because there are no forward foreign exchange markets in many of our major countries of tobacco origin, we generally manage our foreign exchange risk by matching funding for inventory purchases with the currency of sale, which is usually the U.S. dollar, and by minimizing our net local currency monetary position in individual countries. We are vulnerable to currency gains and losses to the extent that monetary assets and liabilities denominated in local currency do not offset each other. In addition to foreign exchange gains and losses, we are exposed to changes in the cost of tobacco due to changes in the value of the local currency in relation to the U.S. dollar. For example, when we purchased the Brazilian crop in the beginning of fiscal year 2009, the local currency had appreciated significantly against the U.S. dollar. Thus, the cost of the crop increased over the prior year, in U.S. dollar terms. We enter into forward currency exchange contracts to hedge some of the effects of currency movements on

Table of Contents

purchases of tobacco to reduce the volatility of costs, primarily related to the requirements of customer contracts. In addition, we enter some forward contracts to hedge balance sheet exposures.

In certain tobacco markets that are primarily domestic, we use the local currency as the functional currency. Examples of these domestic markets are Hungary, Poland, and the Philippines. In other markets, such as Western Europe, where export sales have been primarily in local currencies, we also use the local currency as the functional currency. In each case, reported earnings are affected by the translation of the local currency into the U.S. dollar.

Derivatives Policies

Hedging interest rate exposure using swaps and hedging foreign exchange exposure using forward contracts are specifically contemplated to manage risk in keeping with management's policies. We may use derivative instruments, such as swaps, forwards, or futures, which are based directly or indirectly upon interest rates and currencies to manage and reduce the risks inherent in interest rate and currency fluctuations. When we use foreign currency derivatives to mitigate our exposure to exchange rate fluctuations, we may choose not to designate them as hedges for accounting purposes, which may result in the effects of the derivatives being recognized in our earnings in periods different from the items that created the exposure.

We do not utilize derivatives for speculative purposes, and we do not enter into market risk-sensitive instruments for trading purposes. Derivatives are transaction specific so that a specific debt instrument, forecast purchase, contract, or invoice determines the amount, maturity, and other specifics of the hedge. Counterparty risk is limited to institutions with long-term debt ratings of A or better.

ITEM 4. CONTROLS AND PROCEDURES

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in reports we file under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and that such information is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow for timely decisions regarding required disclosure. Our Chief Executive Officer and Chief Financial Officer evaluated, with the participation of other members of management, the effectiveness of our disclosure controls and procedures (as defined in Exchange Act Rule 13a-15(e)), as of the end of the period covered by this Quarterly Report on Form 10-Q. Based on this evaluation, management concluded that our disclosure controls and procedures were effective. There were no changes in our internal controls over financial reporting identified in connection with this evaluation that occurred during our last fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

Table of Contents

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

European Commission Fines in Spain

In October 2004, the European Commission (the Commission) imposed fines on five companies active in the raw Spanish tobacco processing market totaling 20 million for colluding on the prices paid to, and the quantities bought from, the tobacco growers in Spain. Two of our subsidiaries, Tabacos Espanoles S.A. (TAES), a purchaser and processor of raw tobacco in Spain, and Deltafina, S.p.A. (Deltafina), an Italian subsidiary, were among the five companies assessed fines. In its decision, the Commission imposed a fine of 108,000 on TAES and a fine of 11.88 million on Deltafina. Deltafina did not and does not purchase or process raw tobacco in the Spanish market, but was and is a significant buyer of tobacco from some of the Spanish processors. We recorded a charge of about 12 million (approximately \$14.9 million at the September 2004 exchange rate) in the second quarter of fiscal year 2005 to accrue the full amount of the fines assessed against our subsidiaries.

In January 2005, Deltafina filed an appeal in the Court of First Instance of the European Communities. Although a hearing of the matter was held in June 2009, the outcome of the appeal is uncertain, and an ultimate resolution to the matter could take several years. Deltafina has deposited funds in an escrow account with the Commission in the amount of the fine in order to stay execution during the appeal process. This deposit is accounted for as a non-current asset.

European Commission Fines in Italy

In 2002, we reported that we were aware that the Commission was investigating certain aspects of the leaf tobacco markets in Italy. Deltafina buys and processes tobacco in Italy. We reported that we did not believe that the Commission investigation in Italy would result in penalties being assessed against us or our subsidiaries that would be material to our earnings. The reason we held this belief was that we had received conditional immunity from the Commission because Deltafina had voluntarily informed the Commission of the activities that were the basis of the investigation.

On December 28, 2004, we received a preliminary indication that the Commission intended to revoke Deltafina's immunity for disclosing in April 2002 that it had applied for immunity. Neither the Commission's Leniency Notice of February 19, 2002, nor Deltafina's letter of provisional immunity, contains a specific requirement of confidentiality. The potential for such disclosure was discussed with the Commission in March 2002, and the Commission never told Deltafina that disclosure would affect Deltafina's immunity. On November 15, 2005, we received notification that the Commission had imposed fines totaling 30 million (about \$44 million at the September 30, 2009 exchange rate) on Deltafina and Universal Corporation jointly for infringing European Union antitrust law in connection with the purchase and processing of tobacco in the Italian raw tobacco market.

We do not believe that the decision can be reconciled the Commission's Statement of Objections and the facts. In January 2006, both Deltafina and Universal Corporation filed

Table of Contents

appeals in the Court of First Instance of the European Communities. Based on consultation with outside legal counsel, we believe it is probable that we will prevail in the appeals process, and we have not accrued a charge for the fine. Deltafina has provided a bank guarantee to the Commission in the amount of the fine plus accrued interest in order to stay execution during the appeal process.

U.S. Foreign Corrupt Practices Act

As a result of a posting to our Ethics Complaint hotline alleging improper activities that involved or related to certain of our tobacco subsidiaries, the Audit Committee of our Board of Directors engaged an outside law firm to conduct an investigation of the alleged activities. That investigation revealed that there have been payments that may have violated the U.S. Foreign Corrupt Practices Act. The payments involved approximated \$2 million over a seven-year period. In addition, the investigation revealed activities in foreign jurisdictions that may have violated the competition laws of such jurisdictions, but we believe those activities did not violate U.S. antitrust laws. We voluntarily reported these activities to the Department of Justice (DOJ) and Securities and Exchange Commission (SEC) in March 2006. On June 6, 2006, the SEC notified us that a formal order of investigation had been issued.

We have engaged in settlement discussions with the DOJ and SEC to resolve the above-referenced matter. Although those discussions are ongoing, we expect to enter into agreements with the DOJ and the SEC to resolve the matter, and we believe it is probable that such resolution will include injunctive relief, disgorgement and prejudgment interest, fines, penalties, and the retention of an independent compliance monitor. Since this matter arose, we have recorded accruals that we believe are adequate to satisfy the estimated financial settlement we expect with the resolution of this matter. However, because our discussions are ongoing, we cannot predict with certainty when or whether an agreement will be reached with the DOJ and SEC, or the precise terms of any such agreement. We will continue to cooperate with the authorities in this matter while resolution discussions proceed.

Other Legal Matters

In addition to the above-mentioned matters, some of our subsidiaries are involved in other litigation or legal and tax matters incidental to their business activities. While the outcome of these matters cannot be predicted with certainty, management is vigorously defending these matters and does not currently expect that any of them will have a material adverse effect on our financial position. However, should one or more of these matters be resolved in a manner adverse to our current expectation, the effect on our results of operations for a particular fiscal reporting period could be material.

Table of Contents**ITEM 1A. RISK FACTORS**

As of the date of this report, there are no material changes to the risk factors previously disclosed in our Annual Report on Form 10-K for the year ended March 31, 2009. In evaluating our risks, readers should carefully consider the risk factors discussed in our Annual Report on Form 10-K, which could materially affect our business, financial condition or operating results, in addition to the other information set forth in this report and in our other filings with the Securities and Exchange Commission.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The following table summarizes our repurchases of equity securities for the three-month period ended September 30, 2009:

Period (1)	Total Number of Shares Repurchased	Average Price Paid Per Share(2)	Total Number of Shares Repurchased as Part of Publicly Announced Plan or Program(3)	Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs(3)
July 1, 2009 to July 31, 2009	82,370	\$ 36.28	82,370	\$ 15,811,223
August 1, 2009 to August 31, 2009	69,990	37.40	69,990	13,193,285
September 1, 2009 to September 30, 2009	53,720	41.22	53,720	10,979,080
Total	206,080	\$ 37.95	206,080	\$ 10,979,080

- (1) Repurchases are based on the date the shares were traded. This presentation differs from the consolidated statement of cash flows, where the cost of share repurchases is based on the date the transactions were settled.
- (2) Amounts listed for average price paid per share includes broker commissions paid in the transactions.
- (3) The stock repurchase plan, which was authorized by our Board of Directors, became effective and was publicly announced on November 7, 2007. The stock repurchase plan authorizes the purchase of up to \$150 million in common stock in open market or privately negotiated transactions, subject to market conditions and other factors. The stock repurchase plan will expire on the earlier of November 15, 2009, or when we have exhausted the funds authorized for the program.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

The Annual Meeting of Shareholders of the Company (the Meeting) was held on August 4, 2009.

At the Meeting, the shareholders elected three directors to serve three-year terms. The Company had outstanding, as of June 16, 2009, 24,957,727 shares of Common Stock, each of which was entitled to one vote. The majority of the shares entitled to vote constituted a quorum. Each of the three directors received more than an 89% majority of the votes of the outstanding shares. The voting with respect to each nominee was as follows:

Nominee	Votes For	Votes Withheld	Votes Against	Nonvotes
John B. Adams, Jr.	22,324,942	567,611	0	0
Robert C. Sledd	22,448,392	444,161	0	0
Eugene P. Trani	22,295,559	596,994	0	0

Table of Contents

The terms of office of the following directors continued after the Meeting: Chester A. Crocker, Charles H. Foster, Jr., George C. Freeman, III, Thomas H. Johnson, Eddie N. Moore, Jr., Jeremiah J. Sheehan, and Hubert R. Stallard.

In addition, the shareholders re-approved the Universal Corporation Executive Officer Annual Incentive Plan, as amended, by the following vote:

For	Against	Abstain
22,143,220	596,698	152,635

No other matters were voted upon at the Meeting or during the quarter for which this report is filed.
