NEWS RELEASE

Release Time IMMEDIATE
 Date 21 April 2010
 Number 11/10

BHP BILLITON PRODUCTION REPORT FOR THE NINE MONTHS ENDED 31 MARCH 2010

BHP Billiton reached agreement with the majority of its iron ore customers to permanently move existing contracts to index based prices on a landed equivalent basis.

Record petroleum production was achieved for the nine months ended March 2010 with strong growth in its high margin crude operations, following the successful start-up of Pyrenees (Australia) and strong performances from operations in the Gulf of Mexico (USA).

Year to date production records for iron ore on the back of projects delivered from our deep inventory of ongoing expansions. Western Australia Iron Ore (Australia) and Samarco (Brazil) also achieved year to date production records.

Year to date production records were also achieved for nickel, alumina and zinc, and at North West Shelf, Hunter Valley Energy Coal, Nickel West and Worsley (all Australia), Mad Dog (USA), Alumar refinery (Brazil) and Zamzama (Pakistan).

Quarterly production records achieved for alumina, and at North West Shelf and Worsley (both Australia) and Samarco and Alumar refinery (both Brazil).

Iron ore and metallurgical coal production was impacted by weather related disruptions.

Petroleum

	MAR 2010 YTD	MAR 2010 QTR	MAR YTD10 vs MAR YTD09	MAR Q10 vs MAR Q09	MAR Q10 vs DEC Q09
Crude Oil, Condensate and Natural Gas Liquids (000 bbl)	69,476	21,915	26%	22%	-4%
Natural Gas (bcf)	281.63	89.58	5%	9%	-3%
Total Petroleum Products (million boe)	116.41	36.84	17%	16%	-4%

Total Petroleum Production Petroleum has delivered its third consecutive year to date production record. Production was higher than the nine months ended March 2009 due to the successful start-up of Pyrenees, strong performances from Shenzi and Atlantis (both USA), and no weather related interruptions. This was partially offset by natural decline from existing producing fields. Production declined against the December 2009 quarter due to expected lower seasonal demand in eastern Australia and the planned manifold installation at Atlantis. The Atlantis manifold installation is expected to continue into the beginning of the June 2010 quarter.

Crude Oil, Condensate, and Natural Gas Liquids Crude and condensate production was 29 per cent higher than the nine months ended March 2009 due to the successful start-up of Pyrenees and strong performance from Shenzi. Strong reservoir performance from Atlantis North and the lack of weather related impacts also contributed to the significant increase in crude production.

Edgar Filing: BHP BILLITON LTD - Form 6-K

Production was lower than the December 2009 quarter due to natural field decline, the planned manifold installation at Atlantis, higher pricing impacting volume entitlements for Algeria and planned downtime at Stybarrow (Australia).

Natural Gas Production was higher than the nine months ended March 2009 mainly due to the contribution from North West Shelf LNG Train 5, strong natural gas production in Pakistan and gas associated with strong production from the Gulf of Mexico assets. This was partially offset by natural field decline and a planned shut down at the UK operations.

Production was down against the December 2009 quarter mainly due to lower seasonal demand in eastern Australia.

Aluminium

	MAR 2010 YTD	MAR 2010 QTR	MAR YTD10 vs MAR YTD09	MAR Q10 vs MAR Q09	MAR Q10 vs DEC Q09
Alumina (000 tonnes) (a)	2,801	1,021	9%	24%	9%
Aluminium (000 tonnes)	932	306	1%	1%	-2%

Alumina Production was higher than all comparative periods due to the continued ramp up of the Alumar refinery expansion and increased volume from Worsley. Alumar refinery ramp up period has been extended and will reach expanded capacity in late calendar year 2010. In the March 2010 quarter, Worsley recovered all the hydrate stockpiled during the calciner outage in the September 2009 quarter.

Aluminium Production across all operations was in line with comparative periods.

Base Metals

	MAR 2010 YTD	MAR 2010 QTR	MAR YTD10 vs MAR YTD09	MAR Q10 vs MAR Q09	MAR Q10 vs DEC Q09
Copper (000 tonnes)	784.1	229.1	-13%	-19%	-15%
Lead (tonnes)	185,570	61,127	8%	29%	-3%
Zinc (tonnes)	152,857	46,597	28%	18%	-22%
Silver (000 ounces)	33,949	11,491	11%	32%	-2%
Uranium Oxide Concentrate (Uranium) (tonnes)	1,567	89	-45%	-90%	-74%

Copper Production for the nine months and quarter ended March 2010 decreased mainly due to the Olympic Dam (Australia) Clark Shaft incident, industrial action at Spence (Chile), and lower grades at Cerro Colorado (Chile) and Antamina (Peru). The cessation of Pinto Valley (USA) sulphide mining also impacted production when compared to the nine months and quarter ended March 2009. This was in part offset by the successful repair of the Escondida (Chile) Laguna Seca SAG mill in the September 2009 quarter.

Production in the March 2010 quarter was also impacted by lower grade and safety interventions at Escondida. Lower production was partly offset by stronger production at Spence as it returned to capacity during the quarter following the industrial disruptions in the December 2009 quarter.

Recommissioning of the Clark Shaft commenced during the March 2010 quarter and it is expected to return to normal operation by the end of the June 2010 quarter. Olympic Dam also brought forward planned maintenance activities during the repair period.

Lead Production was higher than the nine months and quarter ended March 2009 due to increased grade at Cannington (Australia).

Zinc Production was higher than the nine months and quarter ended March 2009 due to higher zinc grade, and increased plant availability and utilisation at Cannington and Antamina. Production was lower than the December 2009 quarter due to lower ore milled at Cannington, and a decreased proportion of ore containing zinc at Antamina.

Silver Production was higher than the nine months and quarter ended March 2009 due to increased grade at Cannington.

Uranium Production was significantly below all comparative periods due to the Clark Shaft outage at Olympic Dam, noted above.

Diamonds & Specialty Products

	MAR 2010 YTD	MAR 2010 QTR	MAR YTD10 vs MAR YTD09	MAR Q10 vs MAR Q09	MAR Q10 vs DEC Q09
Diamonds (000 carats)	2,310	770	0%	-19%	1%

Diamonds Production was lower than the March 2009 quarter due to lower average grade. During the quarter a higher proportion of ore was sourced from the Fox pit at Ekati (Canada).

Stainless Steel Materials

	MAR 2010 YTD	MAR 2010 QTR	MAR YTD10 vs MAR YTD09	MAR Q10 vs MAR Q09	MAR Q10 vs DEC Q09
Nickel (000 tonnes) (b)	127.7	43.3	30%	8%	-12%

Nickel Production for the nine months ended March 2010 increased following the major furnace rebuild at Nickel West Kalgoorlie (Australia) in the prior period. Production in the March 2010 quarter was impacted by a restriction in hydrogen supply at Nickel West Kwinana (Australia) and by planned and unplanned downtime at Nickel West Kalgoorlie and Cerro Matoso (Colombia).

Iron Ore

	MAR 2010 YTD	MAR 2010 QTR	MAR YTD10 vs MAR YTD09	MAR Q10 vs MAR Q09	MAR Q10 vs DEC Q09
Iron Ore (000 tonnes)	93,719	31,164	7%	11%	-4%

Iron Ore Production was higher than the nine months and quarter ended March 2009 due to the successful delivery of growth projects. Western Australia Iron Ore Rapid Growth Project 4 (RGP4) ramp up is progressing well. However, current quarter production was impacted by weather related disruptions and project tie-in activities at Western Australia Iron Ore.

Manganese

	MAR 2010 YTD	MAR 2010 QTR	MAR YTD10 vs MAR YTD09	MAR Q10 vs MAR Q09	MAR Q10 vs DEC Q09
Manganese Ore (000 tonnes)	4,403	1,710	11%	133%	11%
Manganese Alloy (000 tonnes)	365	171	-25%	64%	31%

Manganese Ore Production continued to ramp up during the March 2010 quarter, in line with improved demand.

Manganese Alloy As highlighted in the previous report, production reached full capacity at the end of the March 2010 quarter following the progressive recovery of market conditions.

Metallurgical Coal

	MAR 2010 YTD	MAR 2010 QTR	MAR YTD10 vs MAR YTD09	MAR Q10 vs MAR Q09	MAR Q10 vs DEC Q09
Metallurgical Coal (000 tonnes)	26,454	8,157	-2%	7%	-8%

Metallurgical Coal Production for the quarter was impacted by wet weather disruptions at Queensland Coal and planned longwall moves at Illawarra Coal (both Australia). Cyclone activity resulted in the suspension of shipments from the Hay Point Coal Terminal (Australia) from 11 March 2010. During this period production was constrained due to limited stockpile capacity. All mines had returned to normal operations by mid April 2010.

Hay Point Coal Terminal resumed loading on 2 April 2010 from one berth and on 7 April 2010 from both berths. Further testing and repair work is continuing, with completion expected by the end of April 2010.

Energy Coal

	MAR 2010 YTD	MAR 2010 QTR	MAR YTD10 vs MAR YTD09	MAR Q10 vs MAR Q09	MAR Q10 vs DEC Q09
Energy Coal (000 tonnes)	49,861	16,342	2%	11%	6%

Energy Coal Production was higher than all comparative periods mainly due to the continuing ramp up of the Klipspruit (South Africa) expansion and record production at Hunter Valley Energy Coal. During the March 2010 quarter, long vessel queues at the Newcastle Port (Australia) delayed export sales from Hunter Valley Energy Coal.

(a) Excluding Suriname which was sold effective 31 July 2009.

(b) Excluding Yabulu which was sold effective 31 July 2009.

Throughout this report, unless otherwise stated, production volumes refer to BHP Billiton share and exclude suspended and sold operations.

This report, together with the Exploration and Development Report, represents the Interim Management Statement for the purposes of the UK Listing Authority's Disclosure and Transparency Rules. There have been no significant changes in the financial position of the Group in the quarter ended 31 March 2010.

Edgar Filing: BHP BILLITON LTD - Form 6-K

(a) LPG and Ethane are reported as Natural Gas Liquid (NGL).

Product-specific conversions are made and NGL is reported in barrels of oil equivalent (boe).

(b) Suriname was sold effective 31 July 2009.

(c) Metal production is reported on the basis of payable metal.

(d) The Pinto Valley operations were placed on care and maintenance in February 2009.

(e) Yabulu was sold effective 31 July 2009.

(f) Iron ore production is reported on a wet tonnes basis.

(g) Newman includes Mt Newman Joint Venture and Jimblebar.

(h) Shown on 100% basis. BHP Billiton interest in saleable production is 60%.

(i) Production includes Medium Carbon Ferro Manganese.

(j) Metallurgical coal production is reported on the basis of saleable product. Production figures include some thermal coal.

(k) Shown on 100% basis. BHP Billiton interest in saleable production is 80%.
