NOTE 7: LAWSUITS AND CLAIMS IN COURSE

A. Agricultural Business

1. Ongoing litigation with the city of Villa Mercedes.

The Misdemeanours Court Judge to the city of Villa Mercedes issued resolution No. 2980/08 about the situation of Cactus in such city, determining that the Company had a 36-month term to stop operating and transferring the establishment located on the Provincial Route 2B.

In such 36-month period, the Company shall not host over 18,500 head of cattle.

Such brief was appealed by Cactus before the Municipality, which was negatively answered on April 7, 2009, by means of Decree No. 0662/09, thus ratifying the Misdemeanour Court Judge's ruling. Under the administrative justice of the city of Villa Mercedes, Cactus would have until April 7, 2012 to conclude its operations and transfer the establishment.

Cactus has filed appeals with the High Court of Justice of the Province of San Luis, objecting the lawfulness of the rulings entered by the Misdemeanours Court Judge of Villa Mercedes. The appeals are pending and the High Court has not ruled on them.

The Company's legal advisors are optimistic about the possibilities of reversing the Misdemeanours Court Judge's ruling.

A ruling of the court of original jurisdiction sustained the claim. That ruling was appealed and the Court of Appeals confirmed the judgment of the court of original jurisdiction, demanding payment from the company of US\$ 3.8 million, plus interest accrued through payment, punitive interest and attorney's fees. In March 2004, LLH paid Ps. 9,156 in cash and EDB.

NOTE 7: (Continued)

The plaintiff requested the court of original jurisdiction to initiate an incidental procedure for execution of sentence by performing a settlement through the Ministry of Economy, the procedure has been questioned by LLR. In view of the fact that the information provided was not sufficient to evaluate the amount settled by the Ministry of Economy, it was requested that the execution be suspended until there is a sentence on the complaint recourse filed to the National Supreme Court for the denial of the extraordinary recourse soliciting that the debt be converted to pesos.

In July 2008, the Court of Appeals notified LLR that by means of a resolution dated June 18, 2008 it had confirmed the settlement approved by the court of original jurisdiction.

On March 17, 2009, the National Supreme Court admitted the incidental procedure and decided to suspend the enforcement of the judgment in so far as the extraordinary appeal lodged by LLR is not resolved.

On February 23, 2010, the Supreme Court of Justice dismissed the action, which rendered the judgment final and compelled LLR to pay the amount calculated by the State, which as of March 31, 2010 was Ps. 12,632 including interest and legal counsel fees, as disclosed in Other current liabilities Payables to National Parks Administration .

Finally, on April 30, 2010 LLR paid the amount claimed.

Besides, if the purchase option previously mentioned were exercised without any new shares being issued in favor of third parties, IRSA's stake in Hersha would amount to 14.60%. Hersha's shares are valued at cost and the purchase option as its current value.

Hersha is a Real Estate Investment Trust (REIT) listed in the New York Stock Exchange (NYSE) under the HT symbol that holds majority interests in 73 hotels throughout the United States of America totaling approximately 9,294 rooms. These hotels are rated as select service and upscale hotels and they are mainly located in the Northeast coast of the US, including New York, New Jersey, Boston, Washington D.C. and Philadelphia, whilst a few are located in northern California and some others in Arizona. In July 2008, IRSA (through its subsidiaries) acquired a 30% interest in Metropolitan 885 Third Ave. LLC (or Metropolitan) whose equity is composed of an office building known as Lipstick Building and debt related to that asset. The transaction included the acquisition of (i) a put right exercisable until July 2011 to sell a 50% portion of the interest acquired at the same value paid plus interest at 4.5% per annum and (ii) a right of first offering to acquire a 60% portion of the 5% of its equity interest. The price paid in this transaction was US\$ 22.6 million.

During year 2009, Metropolitan had incurred losses that became negative their equity mainly from the allowance for impairment booked in connection with the mentioned building. Consequently, IRSA's share in Metropolitan's losses exceeds its equity interest. Therefore, the investment was valued at zero and a liability was recognized and recorded under Other liabilities for an amount of US\$ 1.5 million (equivalent to the maximum amount that IRSA has agreed to contribute in the event of being required to fund Metropolitan's operations).

On December 13, 2006, Shopping Neuquén S.A. entered into an agreement with the Municipality and with the Province of Neuquén by which, mainly, the terms to carry out the commercial and residential venture were rescheduled and authorized Shopping Neuquén S.A. to transfer to third parties the title to the plots of land into which the property is divided, provided that it is not that one on which the shopping center will be built. Such agreement was subject to two conditions, both already complied with, consisting in the ratification of the agreement by means of an ordinance of the legislative body of the Municipality of Neuquén, and that the new architectonic project and the extension of the environmental impact research submitted were approved by such Municipality.

Such agreement concluded the case styled Shopping Neuquén S.A. vs. Municipality of Neuquén in re.: administrative procedural action pending before the High Court of Neuquén where only involved lawyers fees are pending payment, which will be borne by Shopping Neuquén S.A. Such fees are booked in the Provisions account.

After having obtained the approval, the Company had a 150 days term to submit the drafts of the architectonic project, such term maturing on February 17, 2008. However, such drafts presentation took place prior to the referred date. As regards filing thereof, the Municipality of Neuquén made some comments as to feasible solution to the project. Considering this comment an additional term was formally requested to file the new project.

On June 12, 2009, Shopping Neuquén S.A. and the Municipality of Neuquén executed a new agreement by which Shopping Neuquén S.A. committed itself to presenting a new road project and to making those amendments that may be necessary to the general project. c) Tarshop S.A. credit card receivables securitization program

Tarshop S.A. has ongoing securitization programs through which Tarshop S.A., transfers a portion of its customer credit card receivable balances to master trusts that issues certificates to public and private investors.

Under the securitization programs, Trusts may issue two types of certificates representing undivided interests in the Trusts - Títulos de Deuda Fiduciaria (TDF) and Certificates of Participation (CP), which represent debt and equity certificates, respectively. Interest and principal services are paid periodically to the TDF holders throughout the life of the security. CPs are subordinated securities which entitle the CP holders to share pro rata in the cash flows of the securitized credit card receivables, after principal and interest on the TDFs and other fees and expenses have been paid. During the revolving period no payments are made to TDF and CP holders.

Principal collections of the underlying financial assets are used by the Trust to acquire additional credit card receivables throughout the revolving period. Once the revolving period ends, a period of liquidation occurs during which: (i) no further assets are purchased, (ii) all cash collections are used to fulfill the TDF service requirements and (iii) the remaining proceeds are used to fulfill the CPs service requirements.

NOTE 16: CAPITALIZATION PROGRAM FOR EXECUTIVE MANAGEMENT

The Company together with its related Company IRSA has developed a capitalization program for executive management staff through contributions made by employees and by the Company (the Plan).

The Plan is addressed to employees selected by those Companies with the purpose of keeping them in the company and increasing their total compensation through an extraordinary reward, provided that certain specific conditions are complied with.

Participation and contributions to the Plan are on a voluntary basis. Once the beneficiary (the Participant) has accepted, he will be able to make two types of contributions: a monthly one (based on the salary) and an extraordinary one (based on the annual bonus). The suggested contribution is up to 2.5% of the salary and up to 15% of the annual bonus. On the other hand, the Company contribution will be 200% of the monthly contributions and 300% of the employee s extraordinary contributions.

Funds collected from participants contributions will initially be sent to an independent financial means especially created for such purpose and placed in Argentina as a Common Investment Fund, which will be approved by the C.N.V. Such funds will be freely redeemed under the requirement of the participants.

NOTE 1: ACCOUNTING STANDARDS

Below there is a description of the most relevant accounting standards used by the Company in the preparation of these Financial Statements, which have been applied on a consistent basis from the previous period.

a. Presentation standards

These financial statements are stated in Argentine Pesos (Ps.) and have been prepared in accordance with the disclosure and valuation accounting standards contained in the Technical Resolutions issued by the Federación Argentina de Consejos Profesionales de Ciencias Económicas (FACPCE), as approved, with resolutions issued by the Consejo Profesional de Ciencias Económicas de la Ciudad Autónoma de Buenos Aires (CPCECABA) and the Comisión Nacional de Valores (CNV).

The financial statements corresponding to the nine-month periods ended March 31, 2010 and 2009 have not been audited. The Company's management estimates that they include all the adjustments necessary to present fairly the results for each period. The Company's results for the nine-month periods ended March 31, 2010 and 2009 do not necessarily reflect the proportion of the Company's full-year results.

b. The effects of inflation

The financial statements have been prepared in constant currency units recognizing the effects of inflation up to August 31, 1995. As from this date and under professional accounting standards and as required by the enforcement agency, financial statements as of December 31, 2001 were no longer restated. As from January 1st, 2002 and under professional accounting standards, effects for inflation restarted to be recognized considering that accounting measurements restated for the change in the currency purchasing power until August 31, 1995, as those whose original date fell between such date and December 31, 2001, were stated in pesos as of such last date.

On March 25, 2003, the Federal Executive issued Decree No. 664, which established that the financial statements for periods ended after such date should be stated in nominal currency. Consequently, in conformity with Resolution No. 441/03 issued by the CNV, the Company discontinued the restatement of financial statements as from March 1, 2003. Such method does not agree with current professional accounting standards, which require that financial statements should be restated until September 30, 2003. However, given the little significance of inflation rates from March through September 2003, this departure has not generated a significant effect on the financial statements taken as a whole.

Notes to the Unaudited Financial Statements (Continued)**

NOTE 1: (Continued)

The rate used for restatement of items until February 28, 2003 was the domestic whole revenue price index published by the National Institute of Statistics and Census.

c. Comparative Information

Amounts as of June 30, 2009 and as of March 31, 2009, which are disclosed in these financial statements for comparative purposes have been taken from the financial statements as of such dates. Certain figures in the previously mentioned financial statements have been reclassified to be presented comparatively with those of the current period.

These financial statements have been prepared giving effect to the spin-off merger mentioned in Note 13; consequently, the stand-alone financial statements as of March 31, 2010 are not comparable with those issued as of June 30, 2009 and with the nine-month period ended March 31, 2009.

d. Use of estimates

The preparation of the financial statements in conformity with generally accepted accounting principles requires management to make estimates and assessments that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at that date and the reported amounts of revenues and expenses during the period.

Estimates are used when accounting for the allowance for doubtful accounts, depreciations and amortizations, income taxes, deferred liabilities, translation differences, provisions for contingencies, accrual for expenses and assets recoverable value and classification of the current and non-current assets and the current value of the assets and liabilities acquired in business combinations. Actual results could differ from these estimates.

NOTA 2: POLÍTICAS CONTABLES DE MAYOR RELEVANCIA

a. Cash and banks

Cash on hand has been valued at face value.

b. Foreign currency assets and liabilities

Assets and liabilities denominated in foreign currency have been valued at the exchange rates prevailing at the end of the period/year.

NOTE 2: (Continued)

c. Temporary investments

The units of ownership of mutual funds, the mortgage certificates and bonds were valued at quotation value net of sales expenses as of the date of the financial statements. Therefore, interests to collect corresponding to non-convertible notes of IRSA and APSA which are measured according to the mentioned in Note 2.k. are included. Temporary investments do not exceed their recoverable value at the date of the financial statements.

d. Trade accounts receivable and payable

Trade accounts receivable and payable have been valued at nominal value. Values obtained by this do not differ significantly from those that had been valued at their cash price estimated at the time of the transaction, plus interest and implied financial components accrued on the basis of the internal rate of return determined at such time.

e. Credits and short-term debts

Credits and short-term debts have been valued at nominal value plus accrued interest at the end of the period/year. Values obtained by this do not differ significantly from those obtained from the sum of money delivered and/or received, respectively, net of transaction costs, plus financial results accrued at the internal rate of return determined at the moment of the initial measurement.

f. Derivates financial instruments

Forwards relate to cereal commitments deliverable and receivable at a previously agreed price and to purchase and sale of US dollars and receivable.

Premiums collected or paid correspond to options bought or written, respectively, and are included in Other debts and Other receivables, respectively, until its due date.

The assets and liabilities originated in derivatives instruments have been valued at their market value at the date of the financial statements.

Differences generated by the application of the above mentioned valuation criteria to assets and liabilities and derivative instruments corresponding to crops have been recognized under net income of the period under Unrealized (loss) gain on inventories Crops, raw materials and MAT .

Results of purchases and sales of forward transactions with US dollars operations are included under the Financial Results.

g. Other receivables and liabilities

Other current receivables (except VAT credit) have been valued at face value plus the financial results accrued at the closing of the corresponding period. The figures thus obtained are not significantly different from those that would have been obtained if valued on the basis of the best possible estimate of the amounts receivable and payable, respectively, discounted by application of a rate that reflects the time value of money and the specific risks inherent in the transaction estimated at the time of recognizing the item in assets and liabilities, respectively.

The VAT credit has been valued based on the best possible estimate of the discounted amount using a rate that reflects the time value of money and the specific risks inherent in the transaction estimated as of the date of these financial statements.

h. Balances corresponding to financial transactions and receivables and payables with related parties

Receivables and payables with related parties generated by financial transactions and other transactions were valued in accordance with the terms agreed by the parties.

3. Goodwill

- Goodwill

The goodwill represents the excess acquisition cost above the market value of net assets from those subsidiaries acquired at the equity percentage.

The residual value of the goodwill generated by acquiring interests in the companies has been disclosed in the investments on equity investees account (Schedule C).

Upon defining the useful life, the following factors have been considered: (i) nature and expected life of acquired businesses; (ii) stability and expected life of the respective industry branch; (iii) effects that the obsolescence of products, changes in demand and other economic factors may have on the acquired business; (iv) feasibility of maintaining the required disbursement value to obtain future economic benefits from the acquired business and (v) the control period over the acquired business and legal or contractual provisions that may affect its useful life.

Based on these factors, the Company has estimated that it is not possible to estimate the specific useful life for the goodwill generated by applying the acquisition method provided by Technical Resolution No. 18, and it has therefore determined that they shall have an undefined useful life.

The goodwill related to acquiring an additional interest in Cactus, during the previous fiscal year, has been valued at cost, which was calculated as the difference between the value paid and the book value of the interest acquired. As to this goodwill, the Company is currently analyzing the fair value of assets and liabilities acquired identified as provided by Technical Resolution No. 21, caption 1.3.1.

The values thus obtained, do not exceed their respective estimated recoverable values at the end of the period/year.

t. Income tax

The Company has recognized the income tax on the basis of the deferred tax method, thus considering temporary differences between registration of assets and liabilities for accounting and tax purposes. The principal temporary differences originate in the valuation of beef cattle and the sale and replacement of fixed assets.

In order to determine deferred assets and liabilities the tax rate expected to be in effect at the temporary of reversal or use has been applied on the temporary differences identified and tax loss carryforwards, considering the laws enacted as of the date of issuance of these financial statements (35%) (Note 6).

Assets and liabilities generated by the application of the deferred tax method have been valued at face value.

This decision was taken to contribute to the decrease in the draw down and reduction of fluctuations in the listed price of the Company's shares aiming at contributing to strengthening the shares on the market, minimizing possible temporary imbalances that there may be between the supply and demand on the market, considering the excessive cost of capital that the current listed prices showed.

As upon making the attribution calculation, it yielded the need to distribute fractions of shares, they were settled in cash under the Buenos Aires Stock Exchange Regulations. Therefore, 754 shares have not been attributed and they remain in the Company's treasury together with previously existing 5,000,000 shares.

NOTE 24: FINANCIAL AND CAPITAL MARKET SITUATION

As from the last months of 2008, the world's principal financial markets have suffered the impact of volatility conditions as well as lack of liquidity and credit. Consequently, stock-market rates showed a significant fall worldwide together with an evident economic deceleration.

As soon as the largest economies in the world were intervening by injecting liquidity into the markets, interest rates responded with a downward trend which favored, in 2009 and 2010, the recovery of stock and debt market indices. As regards the real economy at the global level, it remains to be seen whether the measures implemented by the different governments have had lasting positive effects.

NOTE 24: (Continued)

As regards Argentina in 2008, the quotation of Government and corporate securities in the stock markets sustained dramatic drops whereas interest rates, the country risk rate and the exchange rates went upwards. In 2009 and during 2010, securities started to recover, particularly the instruments issued by the Argentine Government, with the ensuing impact on the valuation at fair value of the financial assets holdings maintained by Banco Hipotecario in its portfolio.

As to the quotation of Banco Hipotecario's shares, though it significantly appreciated in the past months, it does not reflect the entity's equity and/or business conduct and neither is it representative of Banco Hipotecario's current operational performance.

Amongst the factors considered by the Company to draw the conclusion outlined in the preceding paragraph are: (i) the factors that cause a decline in the quoted value and its historical performance (credit, interest rate, market, etc); (ii) the Company's ability and intent to maintain the investment for a period long enough for the value to recover, (iii) how significant such decline in the quoted value may be to the Company and (iv) Banco Hipotecario's business fundamentals. The assessment of a non-temporary decline is as both a qualitative and quantitative process, subject to several risks and uncertainties.

NOTE 25: SUBSEQUENT EVENTS

After the closing of these financial statements, the Company reached an agreement with TARPON AGRO LLC (Tarpon), a company organized under the laws of the State of Delaware, USA, by which once certain conditions have been complied with, Tarpon will transfer for valuable consideration to the Company the following:

(a) 9,581,750 shares of common stock issued by BrasilAgro (either in shares or ADR s, Shares), and

(b) 6,400,000 first issue warrants from BrasilAgro and 6,400,000 second issue warrants from BrasilAgro.

Once the conditions established in the agreement have been complied with, the actual transfer of Tarpon's shares and warrants to the Company will take place within 10 days of implementing the ADR program that BrasilAgro is planning to launch.

The full price to be paid by the Company to Tarpon will be BRL 131.4 million, payable within 180 days from the actual transfer of the previously mentioned shares and warrants. Assuming that the price is paid off within the established term, it will not be subject to any monetary adjustment.

Buenos Aires, May 12, 2010 - Cresud S.A.C.I.F. y A. (Nasdaq: CRESY BASE: CRES), one of the leading agricultural companies in Argentina, announces today its results for the first nine months of Fiscal Year 2010 ended March 31, 2010.

Effective as from the second quarter of fiscal year 2009, Cresud presents its financial statements in consolidated form with those of IRSA Inversiones y Representaciones Sociedad Anónima, in which we held an equity interest of 57.38% as of March 31, 2010.

Cresud's consolidated income statement for the period beginning July 1, 2009 and ended March 31, 2010 includes the results of IRSA Inversiones y Representaciones Sociedad Anónima for that same period. Cresud's consolidated financial statements as of March 31, 2009, disclosed in the comparative tables include IRSA's consolidated data only for the period beginning October 1, 2008 and ended March 31, 2009, thus affecting the comparability of the income statement.

Results for the first nine months of fiscal year 2010 showed a net income of Ps. 184.7 million compared to a net income of 4.7 million posted in the same period of the previous fiscal year. The increase in net income is mainly due to the higher income from our subsidiary IRSA.

Consolidated agribusiness sales for the period amounted to Ps. 159.4 million, 19.6% higher than those posted for the same period of the previous fiscal year. This rise was caused mainly by the 85.5% increase in sales of beef cattle and the 37.7% increase in sales in the Others segment compared to the same period of the previous fiscal year.

Agribusiness production revenues amounted to Ps. 80.3 million in the period ended March 31, 2010, 27.5% higher than those recorded in the same period of the previous year. The rise is explained mainly by an increase of 34.1% in the crops segment and 27.5% in the beef cattle segment.

Consolidated sales in the real estate business were Ps. 964.1 million for the nine-month period ended March 31, 2010, whereas gross profit from the real estate segment stood at Ps. 605.2 million.

Gross profit during the first nine months of fiscal year 2010 amounted to Ps. 621.5 million compared to Ps. 366.0 million during the same period of the previous year. This increase was mainly due to the effect of considering the gross profit mentioned in the previous paragraph due to the consolidation of the results of the real estate business of our controlled company IRSA.

Operating results for the period ended March 31, 2010 showed a Ps. 416.6 million profit, composed of operating income of Ps. 384.0 million in IRSA's segments for the first nine months of fiscal year 2010 and a Ps. 32.6 million income from Cresud's agribusiness activities for the first nine months of fiscal year 2010, compared to the Ps. 28.3 million operating loss posted by Cresud in the same period of the previous fiscal year. This increase in results from the agribusiness activities is explained mainly by the higher results from agribusiness production, mainly due to the better weather conditions recorded in the 2009/10 season, to an improvement in the relationship between the prices of commodities and their related input costs and to better results in the beef cattle segment as a consequence of the increase in prices between both periods. As harvesting of our various crops concludes, we expect to recognize higher production revenues and results than those recorded in the previous season.

I. Agribusiness Context

The 2008/2009 agricultural season in Argentina's main production areas sustained one of the worst droughts in the past 70 years which adversely affected the agricultural and livestock industry and also had a negative bearing on the expectations for next season. Apart from this weather phenomenon, and mainly during the month of October, there were late frosts, strong winds and storms with hail, which worsened the referred scenario even more in certain areas. During the 2009/10 season there has been an improvement in rainfall which has favored the development of crops. According to the United States Department of Agriculture (USDA)'s May 2010 estimates, Argentina's crops output (wheat, corn and soybean) for the 2009/2010 season is expected to be higher than in the previous cycle though lower than in the 2007/2008 season, as this was the last period to exhibit normal weather conditions. This decrease is partly due to the reduction in the area sown with wheat and corn. According to the Ministry of Agriculture, Cattle Raising, Fishing and Food, the area sown with soybean will rise by 0.6% compared to the previous cycle, whereas the area sown with corn and wheat will decrease by 5.1% and 32.7%, correspondingly, with respect to the previous cycle. The USDA has estimated that Argentina's wheat output for the 2009/2010 season will be 12.0 million tons; while in the 2008/09 season this output had been 10.1 million tons approximately. As regards corn, output for the previous cycle has been 15.0 million tons, whereas the USDA report for May estimated that in the 2009/2010 cycle Argentina's output will be 21.0 million tons. As regards the USDA projections concerning soybean, Argentina's output will be 50.0 million tons, that is 56.3% and 8.2% higher than the production posted in the 2008/09 and 2007/08 seasons, respectively.

As regards beef cattle, in line with the March report published by the Argentine Beef Promotion Institute (IPCVA), beef-cattle slaughtering activities, accumulated for fiscal year 2010, would have been approximately 10.1 million heads, with production at 2.1 million tons of meat. In addition, since July 2009 there has been an increase in the price of beef cattle, due to the contracted supply resulting from the drop in production levels and lower birth rates. As regards external sales, during the first quarter of 2010 exports amounted to 61.6 thousand tons considering all meat cuts, which stood for a 28.6% year-on-year decrease. In monetary terms, revenues from exports were US\$ 312.0 million, 10.8% lower than in the same quarter of the previous year.

II. Summary of Operations

Crops

Crop sales for the first nine months of fiscal year 2010 totaled Ps. 83.5 million, compared to sales for Ps. 79.3 million in the previous period. The volume of crops sold was 123,775 tons at an average price per ton of Ps. 675.1 compared to the 132.828 tons sold at an average price of Ps. 597.2 in the same period of the previous fiscal year. The decrease in the tons sold is mainly due to the decrease in the levels of stock of crops at the beginning of fiscal year 2010. Production revenues totaled Ps. 49.3 million, 34.1% higher than the revenues obtained from production in the same period of fiscal year 2009. In turn, the result from production for the period ended March 31, 2010 was a Ps. 0.1 million loss, compared to the Ps. 15.4 million loss recorded in the same period in the previous fiscal year. The improvement in the result from production derived mainly from better weather conditions and an improvement in the relationship between the prices of commodities and their related input costs. As we conclude the harvesting of coarse grains, to which we allocated most of the hectares during the past quarter, we expect to recognize higher production income and results than those recorded in the previous season.

The stock of crops as of the end of the period totaled 32,585 tons; 13,095 of which were corn, 3,936 were soybean, 4,998 were sunflower and 7,867 were wheat. The rest of the tons correspond to sorghum and other minor crops.

Gross results for the period ended March 31, 2010 posted a Ps. 6.1 million profit compared to a Ps. 0.1 million profit recorded in the same period of the previous fiscal year.

For the current season we have allocated 101,458 hectares to agriculture, 42,996 of which are leased from third parties and 10,832 are operated under concession. Compared to the previous fiscal year, we have decreased the number of total hectares allocated to agriculture by 9,864, which stands for an 8.9% drop, mainly due to the 27.7% decrease in the hectares leased from third parties.

During the season we allocated 50,187 hectares to soybean production and 31,931 hectares to corn production. As of the date of this earnings release, approximately 50% and 19% of the harvest of these respective crops had been completed. This implies that a large portion of the harvest and its related income were still pending recognition as of March 31, 2010.

Beef Cattle

As of March 31, 2010, the Company's beef cattle stock, including breeding and fattening holdings, was 86,476 heads, with a total of 130,758 hectares allocated to beef cattle activities.

Due to the increase in prices during the first nine months of fiscal year 2010, which rose by 68% for our beef cattle mix, we obtained holding results for Ps. 64.5 million.

Beef cattle sales rose compared to the previous fiscal year, from Ps. 11.4 million as of March 31, 2009 to Ps. 21.1 million as of March 31, 2010. During the first nine months of fiscal year 2010, sales totaled 5,526 tons, whereas the tons sold in the same period of fiscal year 2009 had been 3,950. The increase in sales was mainly explained by the sale of the beef cattle stock in the Rucalen farm due to the expiration of the lease agreement.

Beef-cattle production was 4,304 tons, meaning a 21.9% reduction compared to the previous fiscal year. The decrease in production volumes was mainly due to scarce rainfall during 2009, a circumstance that resulted in lower fattening and birth rates and higher death rates during this season.

All these circumstances led to a gross loss of Ps. 0.7 million in the beef cattle segment for the first nine months of fiscal year 2010, compared to a Ps. 0.5 million loss in the same period of the previous fiscal year.

Milk

Milk production increased by 2.6% in the period, from 15.7 million liters as of March 31, 2009 to 16.1 million as of March 31, 2010.

During the first nine months of fiscal year 2010, sales totaled Ps. 16.4 million, 11.2% higher than for the first nine months of fiscal year 2009. The increase in sales is attributable to the increase in the average price of the liter of milk and the increase in production. The efficiency in the daily output per cow was slightly higher than the figure posted in the same period of the previous fiscal year.

Gross income was Ps. 3.4 million, compared to the Ps. 1.7 million loss posted for the first nine months of fiscal year 2009.

In the first nine months of fiscal year 2010, the stock of dairy cattle amounted to 9,026 head over 4,637 hectares allocated to milk production, whereas for the same period of the previous fiscal year we had 8,351 cattle head over 4,106 hectares. On average, there were 3,213 cows in milking per day, 1.8% lower than in the same period of the previous fiscal year.

III. IRSA Inversiones y Representaciones S.A.

In the first nine months of fiscal year 2010, Cresud acquired 10,024,690 shares in IRSA. As a consequence of this acquisition, our equity interest as of March 31, 2010 was 57.38%.

Starting in the second quarter of fiscal 2009, Cresud presents its financial statements consolidated with those of IRSA Inversiones y Representaciones S.A. The following information has been taken from the financial statement of our controlled company IRSA Inversiones y Representaciones S.A. as of March 31, 2010:

III a. Offices and Other Rental Properties

During the last months of calendar year 2009, there was an upward trend in the office leasing market in the City of Buenos Aires. This market, in which IRSA holds a major position, has shown a slow decrease in lease prices along with an increase in vacancy levels since the end of 2008, mainly as a result of two factors: on one hand, supply rose in 2009, increasing the stock of leasable square meters in the downtown area of Buenos Aires and the northern region of Greater Buenos Aires, and on the other, demand was affected by the 2009 international economic crisis. By year end, the market started to show slight signs of recovery, resulting in vacancy levels of 5.8% and average prices of US\$ 29.2 per square meter for the A+ building segment, according to Colliers International's Annual Real Estate Report. Buenos Aires, 2009/2010.

- u The growth in revenues and EBITDA lessened as a result of the smaller amount of leasable properties resulting from sales of non-strategic assets made in fiscal year 2010.
- u During the third quarter of fiscal year 2010 IRSA continued to improve its portfolio mix by selling non-strategic office properties at attractive prices. 1,240 square meters of leasable office space have been disposed of in Edificio Av. Libertador 498 for US\$ 4.3 million.
- u During the second quarter of fiscal year 2010, IRSA agreed to purchase a plot of land of 3,650 square meters in CATALINAS NORTE, a premium office district in the City of Buenos Aires, which may be used to develop an A+ office building.

- III b. Alto Palermo S.A. (APSA): Shopping Centers and Consumer Finance

After an atypical start to 2009 characterized by a smaller inflow of foreign tourists due to the international crisis and the H1N1 virus outbreak (which had affected the pace in the growth of sales during the third and fourth quarters of fiscal year 2009) the shopping center industry experienced a significant rebound during the first nine months of fiscal year 2010. Sales in the summer months grew notably as a result of the recovery in domestic consumption and an inflow of tourists, mainly from Brazil and Chile.

Prospects in this segment for the rest of 2010 are promising, in line with an upsurge in consumption and economic activities.

The following information relates to data extracted from the financial statements of our subsidiary Alto Palermo S.A. (APSA), the company that operates our shopping center business, in which IRSA has a 63.35% interest as of March 31, 2010⁴.

⁴ IRSA holds an option to purchase the equity interest and Convertible notes held by Parque Arauco.

Development of new commercial area in Palermo. This project, currently in development, is expected to begin in the next months. The project includes, in principle, the development of retail stores, including green areas and a restaurant hub, over a total buildable area of approximately 24,000 square meters.

Soleil Factory Shopping Center. The process for transferring this shopping center's goodwill has already started. Upon its completion, possession of part of the building will be delivered. IRSA expects the transaction to be completed in the next months in order for APSA to be able to include this new shopping center into its portfolio.

Alto Palermo's Purchase Option. On January 14, 2010 IRSA announced the acquisition of an option to purchase the entire direct and indirect equity interest held by Parque Arauco S.A. in Alto Palermo S.A., which totals 29.6% of the current shareholding interest and Parque Arauco's holding of US\$ 15,5 million face value of APSA 2014 Convertible Bonds. IRSA paid 6 million dollars for the option, which has been considered an advance payment of the final amount, fixed by both parties at US\$ 126 million. The option may be exercised until August 31, 2010, extendable to November 30 of this year.

The company believes that once the transaction is consummated, not only it will be an excellent business opportunity, but it will also result in the consolidation of IRSA's position in the Argentine shopping center market, placing IRSA at the forefront of this industry.

III c. Sales and Developments

With respect to the demand of residential properties in the Argentinean real estate market throughout the calendar year 2009, there was a slowdown both in demand and supply. However, such deceleration did not significantly impact prices, as in other countries, since many individuals perceive real estate investments in Argentina as a high quality alternative to preserve their wealth. In addition, the low level of housing financing in Argentina, compared to other countries, has helped sustain the value of residential properties.

To date, BrasilAgro has invested, including committed and disbursed amounts, 307.5 million Reais in land purchases, compared to an aggregate of 552.6 Reais raised in the initial public offering of shares. As of March 31, 2010, BrasilAgro's cash flow position was 219 million Reais.

BrasilAgro will remain focused on the agricultural real estate segment, looking for new business opportunities with the aim of consolidating an important portfolio of properties, and on the development of its four main business lines: sugar cane, grains and cotton, forestry and beef cattle.

On March 10, 2010, BrasilAgro agreed to purchase a rural property known as Horizontalina Farm with an area of 14,358 hectares for 37.0 million Reais. The property will be used for crop production.

During the quarter ended March 31, 2010, we purchased in the market 192,900 shares of BrasilAgro. Therefore, as of such date our equity interest in BrasilAgro was 23.23%.

Paraguay

As regards our farmland in the Republic of Paraguay, we started sowing approximately 3,000 hectares developed in the first stage and we have begun to develop approximately 3,000 hectares in the second stage, which are expected to be concluded this calendar year and which are to start production during the next fiscal year, entailing a further addition to the land devoted to agricultural production. As of March 31, summer planting had been completed, with a share of 56% for sorghum, 20% for corn, 20% for soybean and 4% for beans.

Bolivia

During the first nine months of fiscal year 2010, we continued to carry out production activities over approximately 10,832 hectares. This farmland is fit for double-crop of different crops; therefore, it is possible to obtain better results per hectare in the same season. As of March 31, 100% of the winter crops had been harvested with good yields. Including double crops, the distribution of crops over the hectares sown will be 69% soybean, 18% corn, 5% wheat, 5% sunflower and 3% sorghum. As of March 31, summer planting had been completed with a share of 79% for soybean and 21% for corn.

- VII. Prospects for the coming quarter

Last year s adverse weather conditions have ended, giving way to improved records; therefore, prospects for the development of our agricultural production in this season are favorable. Furthermore, we see an improvement in this fiscal year in the relationship between our input costs and our products prices, which

should favorably impact on results for the last quarter of this fiscal year, when the largest part of our production income generated by completion of coarse grain harvesting will be recognized.

As concerns beef cattle, the decrease in supply in the local industry caused by the drop in beef production figures and lower birth rates combined with a sustained demand has led to an upward trend in price levels. In this sense, we have been realizing part of the beef cattle stock in order to materialize holding gains.

In addition, we continue to analyze investment alternatives in the region, where the soil, weather and infrastructure conditions are optimum for agricultural development. We consider that there is an appealing opportunity to acquire and develop agricultural farmlands in South America, replicating our business model. This is one of the reasons that led us to increase our strategic equity interest in BrasilAgro through the recent agreement executed with Tarpon Agro LLC. Besides, we are planning to add more land for agricultural and beef-cattle activities in our farmlands in Paraguay, where we expect to have 9,000 productive hectares for the 2010/2011 season.

Our business segments have shown robust and sound performance. The quality of IRSA's asset portfolio, as shown by its high occupancy levels, has allowed IRSA to capitalize on the effects of the economic recovery and resume a strong pattern of revenues and results.

Shopping centers maintain high occupancy levels and a strong commitment and adhesion by tenants. The pace of sales in the shopping centers has shown a sound recovery during the third quarter of fiscal year 2010, in line with the positive trend that has been observed during the last months. Tenants continue to be loyal and support our new proposals in this segment.

In addition, our subsidiary IRSA will continue working to improve the services they offer to our tenants and consumers, seeking to maintain our successful occupancy levels and traffic in our Shopping Centers. In this sense, our subsidiary IRSA expects to expand their portfolio in the next few months by adding Soleil to our portfolio and launching a new project in Palermo (through our subsidiary Arcos Gourmet S.A.).

With respect to the Consumer Finance business, the first nine months of the fiscal year saw a profit that is the result of the efforts made in the previous year to streamline and stabilize the business in light of the new economic scenario. By the end of the third quarter, operating data in this segment have shown signs of stabilization. However, IRSA will continue to work with the aim of optimizing operating and financial performance in this segment, and in pursuit of this goal IRSA aspires to complete the sales process of Tarshop S.A.'s majority interest to Banco Hipotecario S.A., that will benefit Tarshop with an operating and financial performance capacity commensurate with its future business needs.

As concerns the Office and Non-Shopping Center Rental Properties segment, lease revenues have remained firm, both in pesos and dollars. IRSA believes that there is some stagnation in the market in terms of occupancy rates and pricing levels caused by the market conditions and the addition of footage, mainly in the northern area of the City of Buenos Aires and Greater Buenos Aires. To face this, IRSA has a unique premium portfolio in downtown Buenos Aires that has sparked interest among top-quality lessees in the market. IRSA will continue working towards maintaining high occupancy levels and optimizing our portfolio mix.

Regarding the Sales and Development segment, IRSA will make progress in the development schedule of the Horizons project through IRSA's subsidiary Cyrsa, where IRSA has already started to recognize revenues and the degree of work progress is above 78%. We believe that IRSA's alliance with Cyrela in this company is an excellent opportunity to develop additional successful projects.
