**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS**

**GENERAL**

State Street Corporation is a financial holding company headquartered in Boston, Massachusetts. Through its subsidiaries, including its principal banking subsidiary, State Street Bank and Trust Company, referred to as State Street Bank, State Street Corporation provides a full range of products and services to meet the needs of institutional investors worldwide. Unless otherwise indicated or unless the context requires otherwise, all references in this Management's Discussion and Analysis to State Street, we, us, our or similar terms mean State Street Corporation and its subsidiaries on a consolidated basis. All references in this Form 10-Q to the parent company are to State Street Corporation. At September 30, 2010, we had consolidated total assets of \$172.96 billion, consolidated total deposits of \$105.03 billion, consolidated total shareholders' equity of \$17.57 billion and employed 28,940.

Our customers include mutual funds, collective investment funds and other investment pools, corporate and public retirement plans, insurance companies, foundations, endowments and investment managers. Our two lines of business, Investment Servicing and Investment Management, provide products and services including custody, recordkeeping, daily pricing and administration, shareholder services, foreign exchange, brokerage and other trading services, securities finance, deposit and short-term investment facilities, loan and lease financing, investment manager and alternative investment operations outsourcing, performance, risk and compliance analytics, investment research services and investment management, including passive and active U.S. and non-U.S. equity and fixed-income strategies. We had \$20.23 trillion of assets under custody and administration and \$1.90 trillion of assets under management at September 30, 2010. Information about these assets, and financial information about our business lines, is provided in the Consolidated Results of Operations Total Revenue and Line of Business Information sections of this Management's Discussion and Analysis.

This Management's Discussion and Analysis is part of our Quarterly Report on Form 10-Q for the third quarter of 2010, which we filed with the SEC, and updates the Management's Discussion and Analysis in our Annual Report on Form 10-K for the year ended December 31, 2009, which we refer to as the 2009 Form 10-K, and in our Quarterly Reports on Form 10-Q for the quarters ended March 31, 2010 and June 30, 2010. We previously filed these reports with the SEC. You should read the financial information in this Management's Discussion and Analysis and elsewhere in this Form 10-Q in conjunction with the financial and other information contained in those reports. Certain previously reported amounts have been reclassified to conform to current period classifications as presented in this Form 10-Q.

We prepare our consolidated financial statements in accordance with United States generally accepted accounting principles, which we refer to as GAAP, and which require management to make judgments in the application of its accounting policies that involve significant estimates and assumptions about the effect of matters that are inherently uncertain. Certain accounting policies are considered by management to be relatively more significant in this respect. These policies relate to the accounting for fair value measurement; the accounting for interest revenue recognition and other-than-temporary impairment; and the accounting for goodwill and other intangible assets. Additional information about these accounting policies is included in the Significant Accounting Estimates section of Management's Discussion and Analysis in our 2009 Form 10-K. These accounting policies were not changed during the first nine months of 2010.

Certain financial information provided in this Management's Discussion and Analysis has been prepared on both a GAAP basis and a non-GAAP, or operating basis. Management measures and compares certain financial information on an operating basis, as it believes this presentation supports meaningful comparisons from period to period and the analysis of comparable financial trends with respect to State Street's normal

**Table of Contents**

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS (Continued)**

ongoing business operations. Management believes that operating-basis financial information, which reports revenue from non-taxable sources on a fully taxable-equivalent basis and excludes the effect of revenue and expenses outside of the normal course of our business, facilitates an investor's understanding and analysis of State Street's underlying financial performance and trends. Operating-basis financial information should be considered in addition to, not as a substitute for or superior to, financial information prepared in accordance with GAAP.

**FORWARD-LOOKING STATEMENTS**

This Form 10-Q, including this Management's Discussion and Analysis, contains forward-looking statements as defined by U.S. securities laws, including statements about industry trends, management's future expectations and other matters that do not relate strictly to historical facts and are based on assumptions by management. Forward-looking statements are often, but not always, identified by such forward-looking terminology as plan, expect, look, believe, anticipate, estimate, seek, may, will, trend, target and goal, or similar terms or variations thereof. Forward-looking statements include, among other things, statements about our confidence in our strategies and our expectations about our financial performance, market growth, acquisitions and divestitures, new technologies, services and opportunities, the outcome of legal proceedings and our earnings.

Forward-looking statements are subject to various risks and uncertainties, which change over time, are based on management's expectations and assumptions at the time the statements are made, and are not guarantees of future results. Management's expectations and assumptions, and the continued validity of the forward-looking statements, are subject to change due to a broad range of factors affecting the national and global economies, the equity, debt, currency and other financial markets, as well as factors specific to State Street and its subsidiaries, including State Street Bank. Factors that could cause changes in the expectations or assumptions on which forward-looking statements are based include, but are not limited to:

changes in law or regulation that may adversely affect our, our clients' or our counterparties' business activities and the products or services that we sell, including additional or increased taxes or assessments, capital adequacy requirements and changes that expose us to risks related to compliance;

financial market disruptions and the economic recession, whether in the U.S. or internationally, and monetary and other governmental actions, including regulation, taxes and fees, designed to address or otherwise be responsive to such disruptions and recession, including actions taken in the U.S. and internationally to address the financial and economic disruptions that began in 2007;

increases in the volatility of, or declines in the levels of, our net interest revenue, changes in the composition of the assets on our consolidated balance sheet and the possibility that we may be required to change the manner in which we fund those assets;

the financial strength and continuing viability of the counterparties with which we or our clients do business and to which we have investment, credit or financial exposure;

the liquidity of the U.S. and international securities markets, particularly the markets for fixed-income securities, and the liquidity requirements of our clients;

## Edgar Filing: STATE STREET Corp - Form 10-Q

the credit quality, credit agency ratings, and fair values of the securities in our investment securities portfolio, a deterioration or downgrade of which could lead to other-than-temporary impairment of the respective securities and the recognition of an impairment loss in our consolidated statement of income;

**Table of Contents**

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS (Continued)**

the maintenance of credit agency ratings for our debt and depository obligations as well as the level of credibility of credit agency ratings;

the performance and demand for the products and services we offer, including the level and timing of redemptions and withdrawals from our collateral pools and other collective investment products;

the risks that acquired businesses will not be integrated successfully, or that the integration will take longer than anticipated, that expected synergies will not be achieved or unexpected dysnergies will be experienced, that client and deposit retention goals will not be met, that other regulatory or operational challenges will be experienced or that disruptions from the transaction will harm relationships with clients, employees or regulators;

the ability to complete acquisitions, divestitures and joint ventures, including the ability to obtain regulatory approvals, the ability to arrange financing as required, and the ability to satisfy other closing conditions;

the possibility of our clients incurring substantial losses in investment pools where we act as agent, and the possibility of further general reductions in the valuation of assets;

our ability to attract deposits and other low-cost, short-term funding;

potential changes to the competitive environment, including changes due to the effects of consolidation and perceptions of State Street as a suitable service provider or counterparty;

the level and volatility of interest rates and the performance and volatility of securities, credit, currency and other markets in the U.S. and internationally;

our ability to measure the fair value of the investment securities on our consolidated balance sheet;

the results of litigation, government investigations and similar disputes or proceedings;

adverse publicity or other reputational harm;

our ability to grow revenue, attract, retain and compensate highly skilled people, control expenses and attract the capital necessary to achieve our business goals and comply with regulatory requirements;

## Edgar Filing: STATE STREET Corp - Form 10-Q

our ability to control operating risks, information technology systems risks and outsourcing risks, and our ability to protect our intellectual property rights, the possibility of errors in the quantitative models we use to manage our business and the possibility that our controls will fail or be circumvented;

the potential for new products and services to impose additional costs on us and expose us to increased operational risk;

changes in accounting standards and practices; and

changes in the interpretation of existing tax laws by U.S. and non-U.S. tax authorities that affect the amount of taxes due.

Therefore, actual outcomes and results may differ materially from what is expressed in our forward-looking statements and from our historical financial results due to the factors discussed in this section and elsewhere in this Form 10-Q or disclosed in our other SEC filings, including the risk factors discussed in our 2009 Form 10-K. Forward-looking statements should not be relied upon as representing our expectations or beliefs as of any date subsequent to the time this Form 10-Q is filed with the SEC. We undertake no obligation to revise the forward-looking statements contained in this Form 10-Q to reflect events after the time it is filed with the SEC. The factors discussed above are not intended to be a complete summary of all risks and uncertainties that may affect

**Table of Contents**

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS (Continued)**

our businesses. We cannot anticipate all potential economic, operational and financial developments that may adversely affect our consolidated results of operations and financial condition.

Forward-looking statements should not be viewed as predictions, and should not be the primary basis upon which investors evaluate State Street. Any investor in State Street should consider all risks and uncertainties disclosed in our SEC filings, including our filings under the Securities Exchange Act of 1934, in particular our reports on Forms 10-K, 10-Q and 8-K, or registration statements filed under the Securities Act of 1933, all of which are accessible on the SEC's website at [www.sec.gov](http://www.sec.gov) or on our website at [www.statestreet.com](http://www.statestreet.com).

- (2) Adjustments related to preferred stock issued in connection with the U.S. Treasury's TARP program in 2008 and redeemed in June 2009. See note 15 to the consolidated financial statements in this Form 10-Q.
- (3) Adjustments for the third quarter and first nine months of 2010 represent allocation of earnings to participating securities using the two-class method. See note 15 to the consolidated financial statements in this Form 10-Q.
- (4) Return on common shareholders' equity for the nine months ended September 30, 2009 was determined by dividing annualized net income before extraordinary loss available to common shareholders by average common shareholders' equity for the respective period.

---

**Table of Contents**

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS (Continued)**

**Financial Highlights**

This section provides highlights with respect to our financial results for the third quarter of 2010 presented in the preceding table. Additional information, including information with respect to our year-to-date results, is provided under Consolidated Results of Operations, which follows this section.

During the second quarter of 2010, we completed our acquisitions of Intesa Sanpaolo's securities services business (May 17, 2010) and Mourant International Finance Administration (April 1, 2010). For the third quarter of 2010, these acquired businesses added approximately \$120 million of revenue and \$90 million of expenses, excluding merger and integration costs, to our consolidated statement of income, and \$180 million of revenue and \$140 million of expenses, excluding merger and integration costs, from the respective acquisition dates through September 30, 2010. We also recorded aggregate merger and integration costs of about \$8 million in connection with these acquisitions during the third quarter of 2010 and \$42 million from the respective acquisition dates through September 30, 2010.

Total revenue for the third quarter of 2010 increased 3% compared to the same period in 2009, with total fee revenue up 7% in the same comparison. Servicing fee revenue increased 19% compared to the third quarter of 2009, primarily the result of the addition of revenue from the acquired Intesa and Mourant businesses, the impact of new business won and installed in the current quarter and prior periods on current-period revenue and increases in equity market valuations. Management fee revenue declined 3% compared to the third quarter of 2009, primarily as a result of the impact of changes in business mix, as reflected in assets under management, partly offset by improvement in equity market valuations.

Trading services revenue declined 15% compared to the third quarter of 2009, primarily as a result of a 30% decline in foreign exchange trading services, related to lower spreads on foreign exchange trading and lower trading volumes, as the weakness in the trading markets continued. This decline was slightly offset by a 3% increase in brokerage and other fees, due to strength in electronic trading and transition management, the latter overseas. Securities finance revenue declined 35% compared to the third quarter of 2009, primarily as a result of lower spreads and lower levels of client demand in the securities lending market. The average balance of securities on loan for the third quarter of 2010 was \$382 billion, compared to \$399 billion for the third quarter of 2009. Processing fees and other revenue increased 58%, from \$45 million to \$71 million, primarily as a result of higher levels of net revenue related to structured products and income from joint ventures in the third quarter of 2010.

Net interest revenue was essentially flat for the third quarter of 2010 compared to the third quarter of 2009, on both a GAAP and fully taxable-equivalent basis (the latter \$757 million compared to \$754 million, reflecting increases from tax-equivalent adjustments of \$33 million and \$31 million, respectively). Generally, the impact of a larger investment securities portfolio, as we continued our re-investment strategy, combined with the full-quarter impact of the deposits added by the acquired Intesa business, was largely offset by a lower level of discount accretion (\$189 million in the third quarter of 2010 compared to \$279 million in the third quarter of 2009). This accretion was generated by the assets added to our consolidated balance sheet in connection with the May 2009 commercial paper conduit consolidation, which is discussed under Total Revenue Net Interest Revenue in this Management's Discussion and Analysis.

Net interest margin, computed on fully taxable-equivalent net interest revenue, decreased 11 basis points from 2.47% in the third quarter of 2009 to 2.36% in the third quarter of 2010. The above-mentioned \$189 million of discount accretion accounted for 59 basis points of net interest margin for the third quarter of 2010, compared to 91 basis points for the third quarter of 2009. Excluding the effect of accretion, fully taxable-equivalent net

**Table of Contents**

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION**

**AND RESULTS OF OPERATIONS (Continued)**

interest revenue for the third quarter of 2010 would have been \$568 million (\$757 million less \$189 million), an increase of 20% from \$475 million (\$754 million less \$279 million) for the third quarter of 2009, and net interest margin for the third quarter of 2010 would have been 1.77% compared to 1.56% for the third quarter of 2009.

We recorded net realized gains of \$91 million from sales of available-for-sale securities during the third quarter of 2010, compared to net realized gains of \$141 million during the third quarter of 2009. Separately, we recorded net other-than-temporary impairment of \$74 million during the third quarter of 2010, largely related to non-agency mortgage-backed securities, compared to \$99 million during the third quarter of 2009. The aggregate net realized gains and net impairment losses resulted in net gains related to investment securities of \$17 million for the third quarter of 2010, compared to net gains of \$42 million for the same period in 2009.

Total expenses for the third quarter of 2010 declined 12% compared to the third quarter of 2009, from \$1.73 billion to \$1.53 billion. If the third-quarter 2009 provision of \$250 million for legal exposure related to certain active fixed-income strategies managed by State Street Global Advisors, or SSgA, is excluded, total expenses in the quarterly comparison increased 3%, from \$1.48 billion (\$1.73 billion less \$250 million) to \$1.53 billion, primarily reflective of the addition of salaries and employee benefits and information systems and communication expenses from the acquired Intesa and Mourant businesses, as well as higher expenses related to transaction processing, partly offset by a decline in other expenses associated with a \$50 million insurance recovery related to legal proceedings.

We recorded income tax expense of \$236 million for the third quarter of 2010, compared to \$160 million for the third quarter of 2009. Our effective tax rate for the third quarter of 2010 was 30.1%, compared to 32.8% for the same period in 2009.

At September 30, 2010, we had aggregate assets under custody and administration of \$20.23 trillion, which increased \$1.43 trillion, or 8%, from \$18.79 trillion at December 31, 2009, and increased \$2.29 trillion, or 13%, from \$17.94 trillion at September 30, 2009. At September 30, 2010, we had aggregate assets under management of \$1.90 trillion, which decreased \$7 billion from \$1.91 trillion at December 31, 2009, and increased \$169 billion, or 10%, from \$1.74 trillion at September 30, 2009. The increases in assets under custody and administration from September 30, 2009 and December 31, 2009 to September 30, 2010 reflected the addition of servicing assets from the Intesa and Mourant acquisitions and the installation of new business, as well as higher asset valuations associated with the improvement in the global financial markets. The increase in assets under management from September 30, 2009 to September 30, 2010 primarily reflected increases in asset valuations and net new business. The decrease in assets under management from December 31, 2009 to September 30, 2010 reflected net lost business partly offset by asset appreciation.

During the third quarter and first nine months of 2010, we won mandates for approximately \$477 billion and \$1.07 trillion, respectively, in assets to be serviced; \$114 billion of the \$477 billion and \$286 billion of the aggregate of \$1.07 trillion was installed prior to September 30, 2010, with the remainder expected to be installed during the fourth quarter of 2010 and in 2011. The new business not installed by September 30, 2010 was not included in assets under custody and administration at that date, and had no impact on servicing fee revenue for the third quarter or first nine months of 2010, as the assets are not included until their installation is complete and we begin to service them. Once installed, the assets generate servicing fee revenue in subsequent periods. We will provide various services for these assets including accounting, fund administration, custody, foreign exchange, securities finance, transfer agency, performance analytics, compliance reporting and monitoring, hedge fund servicing, private equity administration, real estate administration, depository banking services, wealth management services and investment manager operations outsourcing.

**Table of Contents**

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS (Continued)**

**CONSOLIDATED RESULTS OF OPERATIONS**

This section discusses our consolidated results of operations for the third quarter and first nine months of 2010 compared to the same periods in 2009, and should be read in conjunction with the consolidated financial statements and accompanying condensed notes included in this Form 10-Q.

**TOTAL REVENUE**

(Dollars in millions)	Quarters Ended September 30,			Nine Months Ended September 30,		
	2010	2009	% Change	2010	2009	% Change
Fee revenue:						
Servicing fees	\$ 989	\$ 833	19%	\$ 2,826	\$ 2,394	18%
Management fees	213	219	(3)	656	593	11
Trading services	228	269	(15)	796	824	(3)
Securities finance	68	105	(35)	249	487	(49)
Processing fees and other	71	45	58	278	111	150
Total fee revenue	1,569	1,471	7	4,805	4,409	9
Net interest revenue:						
Interest revenue	904	898	1	2,628	2,409	9
Interest expense	180	175	3	585	542	8
Net interest revenue	724	723		2,043	1,867	9
Gains related to investment securities, net	17	42		62	84	
Total revenue	\$ 2,310	\$ 2,236	3	\$ 6,910	\$ 6,360	9

**Fee Revenue**

Servicing and management fees collectively comprised approximately 77% and 72%, respectively, of our total fee revenue for the third quarter and first nine months of 2010 compared to approximately 72% and 68%, respectively, for the corresponding periods in 2009. These fees are a function of several factors, including the mix and volume of assets under custody and administration and assets under management, securities positions held and the volume of portfolio transactions, and the types of products and services used by customers, and are generally affected by changes in worldwide equity and fixed-income valuations.

Generally, servicing fees are affected, in part, by changes in daily average valuations of assets under custody and administration, while management fees are affected by changes in month-end valuations of assets under management. Additional factors, such as the level of transaction volumes, changes in service level, balance credits, customer minimum balances, pricing concessions and other factors, may have a significant effect on servicing fee revenue. Generally, management fee revenue is more sensitive to market valuations than servicing fee revenue. Management fees for enhanced index and actively managed products are generally earned at higher rates than those for passive products. Enhanced index and actively managed products may also involve performance fee arrangements. Performance fees are generated when the performance of certain managed funds exceeds benchmarks specified in the management agreements. Generally, we experience more volatility with performance fees compared with more traditional management fees.

## Edgar Filing: STATE STREET Corp - Form 10-Q

In light of the above, we estimate, assuming all other factors remain constant, that a 10% increase or decrease in worldwide equity values would result in a corresponding change in our total revenue of approximately 2%. If fixed-income security values were to increase or decrease by 10%, we would anticipate a

**Table of Contents**

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS (Continued)**

corresponding change of approximately 1% in our total revenue. We would expect the foregoing relationships to exist in normalized financial markets, which we have not experienced since mid-2007. The disrupted conditions that began during the second half of 2007 have adversely affected our market-driven revenues, particularly foreign exchange trading services and securities finance. Even though the financial markets began to improve during the second half of 2009, the effect of the disrupted conditions on our total revenue, particularly our market-driven revenue, has been more significant than we would anticipate in normalized markets.

The following tables present selected equity market indices for the quarters and nine months ended September 30, 2010 and 2009. Daily averages and the averages of month-end indices demonstrate worldwide changes in equity market valuations that affect servicing and management fee revenue, respectively. Quarter-end indices are indicative of the factors influencing the values of assets under custody and administration and assets under management as of those dates. The index names listed in the table are service marks of their respective owners.

**INDEX**

**Servicing Fees**

Servicing fees include fee revenue from U.S. mutual funds, collective investment funds worldwide, corporate and public retirement plans, insurance companies, foundations, endowments, and other investment pools. Products and services include custody; product- and participant-level accounting; daily pricing and administration; recordkeeping; investment manager and alternative investment manager operations outsourcing services; master trust and master custody; and performance, risk and compliance analytics.

The 19% increase in servicing fees in the quarterly comparison reflected the addition of revenue from the acquired Intesa and Mourant businesses, the impact of new business won and installed in the current quarter and prior periods on current-period revenue and increases in daily average equity market valuations. The 18% increase in the nine-month comparison reflected the impact of new business won and installed in the current quarter and prior periods on current-period revenue, increases in daily average equity market valuations and the addition of revenue from the acquired Intesa and Mourant businesses. For the third quarter and first nine months of 2010, servicing fees generated from customers outside the U.S. were approximately 44% and 41% of total servicing fees compared to approximately 37% for both the third quarter and first nine months of 2009. The following tables set forth the composition of assets under custody and administration.

***Management Fees***

Management fees declined 3% in the third quarter of 2010 compared to the third quarter of 2009 and increased 11% for the first nine months of 2010 compared to the first nine months of 2009. The quarterly decrease resulted primarily from changes in business mix, discussed below, partly offset by increases in average month-end equity market valuations. The increase in the nine-month comparison was due to the effect of net new business on current-period revenue and increases in equity market valuations. Average month-end equity market valuations, individually presented in the preceding INDEX tables, were up an average of 6% for the third quarter of 2010 compared to the third quarter of 2009, and were up an average of 23% in the nine-month comparison. The relative percentage of our assets under management at September 30, 2010 related to passive equity and fixed-income strategies, which generally earn management fees at lower rates compared with active strategies, increased compared to September 30, 2009 and December 31, 2009. For the third quarter and first nine months of 2010, management fees generated from customers outside the U.S. were approximately 31% and 32%, respectively, of total management fees compared to approximately 35% and 33% for the third quarter and first nine months of 2009, respectively.

***Trading Services***

Trading services revenue, which includes foreign exchange trading services revenue and brokerage and other trading fees, was down 15% in the third quarter of 2010 compared to the third quarter of 2009 and down 3% in the nine-month comparison. Foreign exchange trading services revenue for the third quarter and the first nine months of 2010 totaled \$107 million and \$426 million, respectively, down 30% and 20% from \$152 million and \$533 million, respectively, compared to the corresponding prior-year periods. The quarterly decrease was primarily the result of reduced spreads, a 6% decrease in aggregate customer volumes, substantially foreign exchange trading and sales, and a slight decrease in currency volatility. The nine-month decrease was primarily the result of the effect of reduced spreads and a 24% decline in currency volatility.

## Edgar Filing: STATE STREET Corp - Form 10-Q

partly offset by a 10% increase in customer volumes, with volumes up in both custody foreign exchange services and foreign exchange trading and sales.

Brokerage and other trading fees totaled \$121 million for the third quarter of 2010, up 3% from \$117 million for the third quarter of 2009, and for the first nine months of 2010 totaled \$370 million, up 27% from

**Table of Contents**

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS (Continued)**

\$291 million for the first nine months of 2009. The increases in both comparisons were primarily the result of higher electronic trading volumes and increased levels of transition management revenue, particularly non-U.S. transitions.

***Securities Finance***

Our securities finance business consists of two components: investment funds with a broad range of investment objectives which are managed by SSgA and engage in agency securities lending, which we refer to as the SSgA lending funds; and an agency lending program for third-party investment managers and asset owners, which we refer to as the agency lending funds. Additional information with respect to the SSgA lending funds is also provided under "Line of Business Information - Investment Management" in this Management's Discussion and Analysis.

Securities finance revenue for the third quarter of 2010 decreased 35% compared to the third quarter of 2009, primarily the result of lower spreads across all lending programs as well as a 4% decline in the average volume of securities on loan, from \$399 billion for the third quarter of 2009 to \$382 billion for the third quarter of 2010. For the first nine months of 2010, securities finance revenue declined 49% compared to the first nine months of 2009, principally the result of lower spreads, as average lending volume (\$405 billion for both periods) was flat compared to the first nine months of 2009.

Market influences are expected to continue to affect our revenue from, and the profitability of, our securities lending activities for the remainder of 2010. While the average volume of securities on loan has generally stabilized over the past six quarters, spreads have declined significantly compared to those earned in late 2007 and throughout 2008 (which were extraordinarily high), reflecting prevailing interest rates and the effects of government actions taken to stimulate the economy.

In August 2010, SSgA removed the redemption restrictions from the SSgA lending funds, and we anticipate providing participants in the collateral pools underlying certain agency lending funds with greater control over their use of liquidity within such pools by the end of 2010 or in early 2011. These actions are expected to provide an opportunity for increased securities lending volumes, although their effect will be influenced by overall market and customer-specific factors and could, particularly in the short-term, result in decreased lending volumes. As long as securities lending spreads remain below the more normal levels generally experienced prior to late 2007, customer demand is likely to remain at a reduced level and our revenues from our securities lending activities will be adversely affected relative to the revenues we earned over the past two years.

During the disruption in the global financial markets that began in mid-2007, we have been able to manage the outflows from the cash collateral pools supporting the agency lending funds, as well as the effect of the disruptions in the credit markets, in a manner that substantially reduced the risk of loss to our clients. We imposed in 2008 and 2009, and continued to impose during the first nine months of 2010, restrictions on participant redemptions from the agency lending collateral pools in order to manage the liquidity in those pools. The net asset value of the agency lending collateral pools, determined using pricing information from independent third parties, fell, and has remained, below \$1.00 per unit since 2007. As of September 30, 2010, the net asset value per unit, based on the market value of the agency lending collateral pools, ranged from \$0.96 to \$1.00, with the weighted-average net asset value per unit as of that date equal to \$0.993, compared to a weighted-average net asset value per unit of \$0.986 as of December 31, 2009.

At September 30, 2010, the aggregate net asset value of the agency lending collateral pools, assuming a constant net asset value of \$1.00 per unit, would have been approximately \$63 billion, which exceeded the aggregate market value of those collateral pools as of the same date by approximately \$423 million. However, we

**Table of Contents**

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS (Continued)**

continue to transact purchases into and redemptions out of these pools at \$1.00 per unit. We continue this practice for a number of reasons, including the fact that none of the securities in the cash collateral pools is currently in default or considered to be materially impaired, and the fact that there are restrictions on withdrawals from the agency lending collateral pools, which, absent a substantial reduction in the lending program, should permit the securities in the collateral pools to be held until they recover to their par value.

As of September 30, 2010, approximately 48% of the aggregate assets in the agency lending collateral pools had expected maturities of greater than 90 days. During the third quarter of 2010, as referenced earlier in this section, we announced plans to increase our agency lending clients ability to manage their access to liquidity in the agency lending collateral pools. We intend to separate certain agency lending collateral pools into two separate funds, one with complete liquidity and the other which will hold only longer-dated securities and which will only transact in-kind redemptions. We currently anticipate that such split will occur by the end of 2010 or in early 2011. This approach is intended to provide participants in these agency lending collateral pools with greater ability to manage their level of participation in the lending program and their access to liquidity.

As previously disclosed, in 2009, we determined that withdrawals by two related participants in one of the agency lending collateral pools were inconsistent with our redemption restrictions. In response, we redeemed in-kind the remaining units of such participants, effectively distributing, together with prior cash withdrawals, the same amount of cash and longer-dated securities that the participants would have received under the redemption restrictions. We remain in litigation with these participants; see note 7 to the consolidated financial statements included in this Form 10-Q. We also undertook a review of our implementation of the redemption restrictions with respect to other participants in the agency lending collateral pools. This review identified potential inconsistencies in connection with our implementation of the redemption policy. As a result of this review, and based on our assessment of the amount required to compensate clients for the dilutive effect of redemptions which may not have been consistent with the intent of the policy, we recorded a pre-tax charge of \$75 million in our second-quarter 2010 consolidated statement of income to establish a reserve to address these potential inconsistencies.

***Processing Fees and Other***

Processing fees and other revenue was \$71 million and \$278 million for the third quarter and first nine months of 2010, respectively, compared to \$45 million and \$111 million, respectively, for the same periods in 2009. The increase in the quarterly comparison was due primarily to higher net revenue from structured products, including fees from our tax-exempt investment program, and an increase in income from joint ventures. In the nine-month comparison, the increase primarily resulted from higher net revenue from structured products, including fees from our tax-exempt investment program, net revenue related to certain tax-advantaged investments and an increase in income from joint ventures.

<sup>(1)</sup> Amounts represent averages of asset-backed commercial paper purchases under the Federal Reserve's AMLF, and associated borrowings. The AMLF expired in February 2010.

<sup>(2)</sup> Amounts include tax-equivalent adjustments of \$96 million for 2010 and \$94 million for 2009.

Net interest revenue is defined as the total of interest revenue earned on interest-earning assets less interest expense incurred on interest-bearing liabilities. Interest-earning assets, which principally consist of investment securities, interest-bearing deposits with banks, repurchase agreements, loans and leases and other liquid assets, are financed primarily by customer deposits and short-term borrowings. Net interest margin represents the relationship between annualized fully taxable-equivalent net interest revenue and average total interest-earning assets for the period. Changes in the components of average interest-earning assets and interest-bearing liabilities are discussed in more detail below. Additional detail about the components of interest revenue and interest expense is provided in note 12 to the consolidated financial statements included in this Form 10-Q.

For the third quarter of 2010, on both a GAAP and fully taxable-equivalent basis, net interest revenue was essentially flat compared to the third quarter of 2009 (with fully taxable-equivalent net interest revenue of

**Table of Contents**

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS (Continued)**

\$757 million compared to \$754 million, reflecting increases from tax-equivalent adjustments of \$33 million and \$31 million, respectively). For the nine months ended September 30, 2010, net interest revenue increased 9% on both a GAAP and fully taxable-equivalent basis compared to the corresponding 2009 period (with fully taxable-equivalent net interest revenue of \$2.14 billion compared to \$1.96 billion, reflecting increases from tax-equivalent adjustments of \$96 million and \$94 million, respectively). If the discount accretion related to former conduit securities, more fully described below, is excluded, fully taxable-equivalent net interest revenue for the third quarter of 2010 compared to the third quarter of 2009 increased to \$568 million (\$757 million less accretion of \$189 million) from \$475 million (\$754 million less \$279 million), an increase of 20%. The increase was primarily the result of the impact of a higher portfolio allocation to fixed-rate investment securities, U.S. and non-U.S. investment portfolio growth, and the impact of the Intesa deposits added in May 2010 in connection with that acquisition, partly offset by lower spreads on both floating-rate investment securities and non-U.S. transaction deposits.

The increases in the nine-month comparison referenced above were the result of a higher level of discount accretion in 2010; if the accretion (\$573 million for the nine months ended September 30, 2010 and \$391 million from the date of the conduit consolidation through September 30, 2009) is excluded, net interest revenue for the first nine months of 2010 was flat compared to the first nine months of 2009.

In May 2009, we elected to take action that required the consolidation onto our balance sheet, for financial reporting purposes, of the assets and liabilities of the asset-backed commercial paper conduits that we sponsored and administered. Upon consolidation, the aggregate fair value of the conduits' investment securities of approximately \$16.6 billion was established as their carrying amount, resulting in a \$6.1 billion discount to the assets' aggregate par value of approximately \$22.7 billion. To the extent that the expected future cash flows from the securities exceed their carrying amount, the portion of the discount not related to credit will accrete into interest revenue over the securities' remaining terms.

The timing and ultimate recognition of this accretion depends on factors that are outside of our control, including anticipated prepayment speeds and credit quality. The impact of these factors is uncertain and can be significantly influenced by general economic and financial market conditions. The timing and recognition of accretion can also be influenced by our ongoing management of the risk and other characteristics associated with our investment portfolio, including any resulting sales of securities from which we would otherwise generate accretion. Subsequent to the May 2009 consolidation, we have recorded aggregate discount accretion in interest revenue of \$1.19 billion, composed of \$621 million in 2009 and \$573 million in the first nine months of 2010, the latter composed of \$212 million, \$172 million and \$189 million in the first, second and third quarters of 2010, respectively. Depending on the factors discussed above, among others, we anticipate that, until the securities mature or are sold, discount accretion will be a material component of our net interest revenue, and may increase the volatility of our net interest revenue and margin.

Interest-bearing deposits with banks, including cash balances held at the Federal Reserve to satisfy reserve requirements, averaged \$13.02 billion for the third quarter of 2010, a decrease of 35% compared to \$20.14 billion for the third quarter of 2009, and for the first nine months of 2010 averaged \$12.50 billion, a decrease of 54% compared to \$27.40 billion for the same period in 2009. An average of \$3.23 billion was held at the Federal Reserve Bank during the third quarter of 2010, a decrease of 56% compared to \$7.38 billion for the same period in 2009. Balances for both periods exceeded minimum reserve requirements. The overall decreases in all comparisons reflected excess liquidity held by us during 2009 due to the then-ongoing financial markets instability, that was re-allocated to higher-yielding investment securities.

**Table of Contents**

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS (Continued)**

Average securities purchased under resale agreements decreased 27%, from \$4.42 billion for the third quarter of 2009 to \$3.21 billion in the third quarter of 2010, and decreased 32% from \$4.17 billion to \$2.83 billion in the nine-month comparison, mainly due to lower customer demand.

Average trading account assets decreased 90% from \$2.51 billion for the first nine months of 2009 to \$249 million for the first nine months of 2010. The decrease was due to the absence of conduit asset-backed commercial paper purchased by us, which was eliminated for financial reporting purposes when the conduits were consolidated onto our balance sheet in May 2009 as previously described.

Our average investment securities portfolio increased 16% from \$84.81 billion for the third quarter of 2009 to \$98.17 billion for the third quarter of 2010, and increased 25% in the nine-month comparison. The increases in both comparisons were due to significant improvement in the unrealized losses on our available-for-sale securities and the partial re-allocation of excess cash balances previously held at the Federal Reserve into higher-yielding investment securities as the financial markets stabilized. The year-to-date period also reflected the effect of the May 2009 conduit consolidation. During the first nine months of 2010, we continued to execute our strategy of investing primarily in AAA and AA rated securities. Securities rated AAA and AA comprised approximately 82% of our investment securities portfolio (approximately 71% AAA rated) at September 30, 2010, compared to 80% AAA and AA rated (approximately 69% AAA rated) at September 30, 2009.

Loans and leases averaged \$12.08 billion for the third quarter of 2010, up 19% from \$10.13 billion for the third quarter of 2009 and \$11.71 billion for the nine months ended September 30, 2010, up 26% from \$9.31 billion for the first nine months of 2009. The increase in the quarterly comparison was primarily related to increased customer demand for short-term liquidity. The increase in the nine-month comparison primarily reflected the structured asset-backed loans added in connection with the May 2009 conduit consolidation. For the third quarter of 2010, approximately 29% of the average loan and lease portfolio, compared to 24% for the same period in 2009, was composed of U.S. and non-U.S. short-duration advances that provide liquidity to customers in support of their transaction flows. U.S. short-duration advances averaged approximately \$2.02 billion for the third quarter of 2010, up 10% compared to \$1.84 billion for the third quarter of 2009, and \$1.85 billion for the nine months ended September 30, 2010, down 20% from the first nine months of 2009. Non-U.S. short-duration advances increased 140% to \$1.45 billion in the quarterly comparison, and 46% to \$1.14 billion in the nine-month comparison, mainly due to activity associated with customers added in connection with the Intesa acquisition.

The lower average level of liquidity provided to U.S. customers during the first nine months of 2010 compared to the first nine months of 2009 was primarily the result of a decrease in customer demand and not a reduction in credit availability from, or committed lines provided by, State Street. As transaction flows returned to levels more consistent with those experienced prior to late 2007, domestic customer demand for short-term liquidity declined.

Average interest-bearing deposits increased 16% from \$69.50 billion for the third quarter of 2009 to \$80.35 billion for the third quarter of 2010. For the nine-month period, average interest-bearing deposits increased 8% to \$74.54 billion from \$69.29 billion in the 2009 period. For both periods, the increases reflected the deposits added in connection with the Intesa acquisition, partly offset by the return of customer deposits to levels more consistent with those experienced prior to late 2007.

Average other short-term borrowings decreased 18% to \$12.89 billion for the third quarter of 2010 from the same period in 2009 and decreased 2% to \$14.88 billion for the first nine months of 2010 compared to the

**Table of Contents**

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION**

**AND RESULTS OF OPERATIONS (Continued)**

corresponding period in 2009. In both comparisons, the decrease reflected the absence of borrowings under the Federal Reserve's term auction facility, which is further discussed under "Liquidity" in this Management's Discussion and Analysis.

Average long-term debt decreased 4% to \$8.57 billion for the third quarter of 2010 compared to \$8.95 billion for the third quarter of 2009 and increased 15% to \$8.72 billion compared to \$7.60 billion in the nine-month comparison. The decrease in the quarterly comparison resulted from a maturity of subordinated debt in the second quarter of 2010. The increase in the nine-month comparison resulted from the issuance of an aggregate of approximately \$4 billion of unsecured senior notes by State Street and State Street Bank in March 2009 under the FDIC's Temporary Liquidity Guarantee Program, as well as the May 2009 issuance of unsecured senior notes, partly offset by the subordinated debt maturity.

Several factors could affect future levels of our net interest revenue and margin, including the mix of customer liabilities, actions of the various central banks, changes in U.S. and non-U.S. interest rates, the shapes of the various yield curves around the world and the amount of discount accretion generated by the former conduit securities in our investment portfolio (discussed earlier in this section). In the second half of 2009, based on market conditions, we re-initiated our strategy of re-investing proceeds from amortizing and maturing securities into highly rated investment securities, such as U.S. Treasuries and federal agency mortgage-backed securities and asset-backed securities. The pace at which we continue to re-invest and the types of securities purchased will depend on market conditions over time. These factors and the level of interest rates worldwide are expected to dictate what effect the re-investment program will have on future levels of our net interest revenue and net interest margin.

**Gains (Losses) Related to Investment Securities, Net**

In connection with our ongoing management of the investment portfolio, we may, from time to time, sell available-for-sale securities, including former conduit securities, to manage risk, to reduce our risk profile, to take advantage of favorable market conditions, or for other reasons. We recorded net realized gains of \$91 million from sales of approximately \$4 billion of available-for-sale securities in the third quarter of 2010, and net realized gains of \$286 million from sales of approximately \$18 billion of available-for-sale securities during the first nine months of 2010, compared to net realized gains of \$141 million and \$260 million, respectively, during the 2009 periods. Of the \$91 million of net gains realized during the third quarter of 2010, none related to sales of former conduit securities, and of the \$286 million of gains realized during the first nine months of 2010, \$110 million related to sales of former conduit securities. For the third quarter and the period from the the conduit consolidation through September 30, 2009, gross realized gains related to sales of former conduit securities were \$78 million for both periods, and gross realized losses related to sales of former conduit securities were \$24 million for both periods.

The aggregate unrealized losses on securities for which other-than-temporary impairment was recorded in the third quarter and first nine months of 2010 were \$132 million and \$612 million, respectively. Of these totals, \$58 million and \$388 million, respectively, related to factors other than credit, and were recorded, net of related taxes, as a component of other comprehensive income in our consolidated statement of condition. For the third quarter of 2010, we recorded the remaining \$74 million (with \$3 million related to former conduit securities) in our consolidated statement of income, compared to \$99 million (with \$18 million related to former conduit securities) for the third quarter of 2009. For the first nine months of 2010, we recorded the remaining \$224 million (with \$29 million related to former conduit securities) in our consolidated statement of income, compared to \$176 million (with \$18 million related to former conduit securities) for the first nine months of 2009.

**Table of Contents**

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS (Continued)**

For the third quarter and first nine months of 2010, the substantial majority of the impairment losses related to non-agency mortgage-backed securities, which management concluded had experienced credit losses resulting from deterioration in financial performance of those securities during the period. The securities are reported as asset-backed securities in note 3 to the consolidated financial statements included in this Form 10-Q.

(In millions)	Quarters Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
Net realized gains from sales of available-for-sale securities	\$ 91	\$ 141	\$ 286	\$ 260
Gross losses from other-than-temporary impairment	(132)	(828)	(612)	(1,008)
Losses not related to credit <sup>(1)</sup>	58	729	388	832
Net impairment losses	(74)	(99)	(224)	(176)
Gains related to investment securities, net	\$ 17	\$ 42	\$ 62	\$ 84
Impairment associated with expected credit losses	\$ (71)	\$ (63)	\$ (201)	\$ (110)
Impairment associated with management's intent to sell the impaired securities prior to their recovery in value	(1)	(23)	(1)	(53)
Impairment associated with adverse changes in timing of expected future cash flows	(2)	(13)	(22)	(13)
Net impairment losses	\$ (74)	\$ (99)	\$ (224)	\$ (176)

<sup>(1)</sup> Pursuant to new accounting standards adopted on April 1, 2009, these losses were not recorded in our consolidated statement of income, but were recognized as a component of other comprehensive income, net of related taxes, in our consolidated balance sheet; refer to the following discussion and to note 9 to the consolidated financial statements included in this Form 10-Q.

Management regularly reviews the investment securities portfolio to identify other-than-temporary impairment of individual securities. Impairment related to expected losses represents the difference between the discounted values of the expected future cash flows from the securities compared to their current amortized cost basis, with each discount rate commensurate with the effective yield on the underlying security. For debt securities held to maturity, other-than-temporary impairment remaining after credit-related impairment (which credit-related impairment is recorded in our consolidated statement of income) is recognized, net of related taxes, as a component of other comprehensive income in the shareholders' equity section of our consolidated balance sheet, and is accreted prospectively over the remaining terms of the securities based on the timing of their estimated future cash flows. For other-than-temporary impairment of debt securities that results from management's decision to sell the security prior to its recovery in value, the entire difference between the security's fair value and its amortized cost basis is recorded in our consolidated statement of income.

The accounting for other-than-temporary impairment was adopted by us, pursuant to new accounting standards, on April 1, 2009. Prior to that date, we recognized losses from other-than-temporary impairment of debt and equity securities for either a change in management's intent to hold the securities or expected credit losses, and such impairment losses, which reflected the entire difference between the fair value and amortized cost basis of each individual security, were recorded in our consolidated statement of income.

## Edgar Filing: STATE STREET Corp - Form 10-Q

Additional information about investment securities, the gross realized gains and losses that compose the net realized sale gains and our process to identify other-than-temporary impairment, is provided in note 3 to the consolidated financial statements included in this Form 10-Q.

**Table of Contents**

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS (Continued)**

**PROVISION FOR LOAN LOSSES**

We recorded provisions for loan losses of \$1 million during the third quarter of 2010 and \$26 million during the first nine months of 2010, compared to \$16 million during the third quarter of 2009 and \$114 million during the first nine months of 2009. The majority of the provision recorded in 2010 resulted from a revaluation of the collateral supporting certain of the commercial real estate loans acquired in 2008 in connection with indemnified repurchase agreements with an affiliate of Lehman.

The commercial real estate loans are reviewed on a quarterly basis, and any provisions for loan losses that are recorded reflect management's current expectations with respect to future cash flows from these loans, based on an assessment of economic conditions in the commercial real estate market and other factors. Future changes in expectations with respect to these loans could result in additional provisions for loan losses.

Number of employees at quarter end **28,940** 27,130

Salaries and employee benefits expenses increased in the third-quarter and nine-month comparisons, primarily in connection with the addition of employees and associated expenses of the acquired Intesa and Mouton businesses, the impact of higher staffing levels in other units and, with respect to the nine-month comparison, the effect of our reinstatement of cash incentive compensation accruals. In addition, the nine-month comparison was affected by higher benefits requirements in payroll taxes, medical insurance and pensions. During the first nine months of 2009, salaries and employee benefits expenses were abnormally low, as we did not accrue cash incentive compensation for the first six months of 2009 as part of our plan to increase our tangible common equity.

Information systems and communications expenses for the third quarter and first nine months of 2010 reflected higher levels of spending on telecommunications hardware and software for our global infrastructure, as

---

**Table of Contents**

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION**

**AND RESULTS OF OPERATIONS (Continued)**

well as the addition of expenses from the acquired Intesa and Mourant businesses. The increase in transaction processing services expense resulted from higher external contract services costs, as well as higher levels of sub-custody expenses.

As previously reported, on June 30, 2010, we recorded an aggregate pre-tax charge of \$414 million, which included \$9 million of associated legal costs. In connection with the charge, we made a one-time cash contribution of \$330 million to the cash collateral pools underlying the SSgA lending funds. The cash contribution reflected the cost to us to restore the net asset value per unit of such collateral pools to \$1.00 as of June 30, 2010. As a result of this contribution, SSgA removed the redemption restrictions from these SSgA lending funds in August 2010. We also established a \$75 million reserve to address potential inconsistencies in connection with our implementation of redemption restrictions applicable to the collateral pools underlying our agency lending program.

Our decision with respect to the one-time cash contribution was based on many factors, including our assessment with respect to previously disclosed asserted and unasserted claims and our evaluation of the ultimate resolution of such claims, as well as the effect of the redemption restrictions originally imposed by SSgA on the lending funds. The contribution was not the result of any obligation by State Street to support the SSgA lending funds or the underlying collateral pools. State Street has no obligation to provide cash or other support to the SSgA lending funds or the collateral pools underlying the SSgA lending funds at any future date, and has no intention to provide any such support associated with realized or unrealized losses in the collateral pools that may arise in the future.

The \$75 million reserve was based on the results of a review of our implementation of the redemption restrictions with respect to participants in the agency lending collateral pools, and our assessment of the amount required to compensate clients for the dilutive effect of redemptions which may not have been consistent with the intent of the policy.

Other expenses declined in the quarterly comparison, primarily due to a \$50 million insurance recovery related to legal proceedings, partly offset by higher securities processing costs and a higher level of other intangible assets amortization associated with the Intesa and Mourant acquisitions. Other expenses increased in the nine-month comparison, primarily due to higher legal costs, higher other intangible assets amortization related to the acquisitions and higher securities processing costs, partly offset by reduced FDIC assessments and the insurance recoveries.

**Income Tax Expense**

We recorded income tax expense of \$236 million for the third quarter of 2010, compared to income tax expense of \$160 million for the third quarter of 2009. For the first nine months of 2010, income tax expense was \$361 million, compared to \$540 million for the corresponding 2009 period. Our effective tax rates for the third quarter and first nine months of 2010 were 30.1% and 19.7%, respectively, compared to 32.8% and 29.3%, respectively, for the third quarter and first nine months of 2009. Our effective tax rate for the first nine months of 2010 included a discrete tax benefit of \$180 million, recorded in the second quarter of 2010, generated by the restructuring of former non-U.S. conduit assets. Excluding the discrete tax benefit, the effective tax rate for the first nine months of 2010 was 29.5%.

AND RESULTS OF OPERATIONS (Continued)**

**LINE OF BUSINESS INFORMATION**

We have two lines of business: Investment Servicing and Investment Management. Given our services and management organization, the results of operations for these lines of business are not necessarily comparable with those of other companies, including companies in the financial services industry. Information about revenues, expenses and capital allocation methodologies with respect to these lines of business is provided in note 23 to the consolidated financial statements included in our 2009 Form 10-K.

The following is a summary of our line of business results. The amounts presented in the *Other* column for 2010 represent merger and integration costs recorded in connection with acquisitions. The amounts presented in the *Other* column for 2009 represent merger and integration costs recorded in connection with our acquisition of Investors Financial, and, for the nine months ended September 30, 2009, also include net interest revenue earned in connection with our participation in the AMLF. The amounts presented in both *Other* columns were not allocated to State Street's business lines.

**Investment Servicing**

Total revenue for the third quarter of 2010 increased 6% compared to the third quarter of 2009, and 11% in the nine-month comparison. Total fee revenue in the same comparisons increased 11% and 12%, respectively, with the increases mainly attributable to growth in servicing fees and processing fees and other revenue. The growth in servicing fees in the quarterly comparison resulted from the addition of servicing fee revenue from the acquired Intesa and Maurant businesses, the impact of new business won and installed in the current and prior periods on current-period revenue, and increases in daily average equity market valuations. In the nine-month comparison, the growth was associated with the impact of new business won and installed, increases in equity valuations and the addition of revenue from the acquired Intesa and Maurant businesses.

## Edgar Filing: STATE STREET Corp - Form 10-Q

Processing fees and other revenue for the third quarter and first nine months of 2010 increased compared to the 2009 periods, primarily as a result of higher net revenue from structured products and higher levels of income from joint ventures and, in the nine-month comparison, net revenue related to certain tax-advantaged investments.

The increases in servicing fees and processing fees and other revenue were partly offset by a decline in securities finance revenue in both the quarterly and nine-month comparisons, primarily due to lower spreads across all lending programs, as the comparative levels of average securities on loan were down slightly (in the quarterly comparison, \$382 billion compared to \$399 billion) or flat (in the nine-month comparison, \$405 billion for both periods).

---

**Table of Contents**

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS (Continued)**

Servicing fees, trading services revenue and gains related to investment securities, net, for our Investment Servicing business line are identical to the respective consolidated results. Refer to the Servicing Fees, Trading Services and Gains (Losses) Related to Investment Securities, Net sections under Consolidated Results of Operations Total Revenue in this Management's Discussion and Analysis for a more in-depth discussion. A discussion of processing fees and other revenue is provided under Processing Fees and Other in the Total Revenue section.

Net interest revenue for the third quarter of 2010 was essentially flat compared to the third quarter of 2009, and up 10% for the first nine months of 2010 compared to the corresponding 2009 period. In the quarterly comparison, higher levels of investment securities and the impact of the deposits added in connection with the Intesa acquisition were offset by a lower level of discount accretion generated by the former conduit assets. In the nine-month comparison, the increase was generally due to a higher level of discount accretion. The discount accretion is discussed more fully under Total Revenue Net Interest Revenue in this Management's Discussion and Analysis. A portion of consolidated net interest revenue is recorded in our Investment Management business line based on the volume of customer liabilities attributable to that business.

Total expenses from operations increased 5% for the third quarter and 11% for the first nine months of 2010 compared to the corresponding periods in 2009. In the quarterly comparison, expenses were added from the acquired Intesa and Marrant businesses. The increase in the nine-month comparison resulted primarily from the absence of cash incentive compensation accruals during the first six months of 2009, as we did not accrue cash incentive compensation as part of our plan to increase our tangible common equity, and the addition of expenses from the acquired Intesa and Marrant businesses.

**Investment Management**

Total revenue for the third quarter of 2010 decreased 12% compared to the third quarter of 2009, and decreased 5% for the first nine months of 2010 compared to the first nine months of 2009, generally as a result of changes in management fees and securities finance revenue. In the quarterly comparison, both management fees and securities finance revenue declined; in the nine-month comparison, an 11% increase in management fees was more than offset by a 72% decline in securities finance revenue.

Management fees, which are generated by SSgA, decreased 3% in the third quarter of 2010 compared to the third quarter of 2009, and increased 11% in the nine-month comparison. The decrease in the quarterly comparison was mainly due to changes in business mix, as customers moved from active management strategies to passive strategies, partly offset by increases in average month-end equity market valuations. The year-to-date increase generally resulted from the effect of net new business on current-period revenue and increases in equity market valuations.

The declines in securities finance revenue both from the third quarter of 2009 to the third quarter of 2010 and from the first nine months of 2009 to the first nine months of 2010 generally resulted from lower spreads across all lending programs.

Management fees for the Investment Management business line are identical to the respective consolidated results. Refer to the Fee Revenue Management Fees section under Total Revenue in this Management's Discussion and Analysis for a more-in depth discussion.

Total expenses from operations for the third quarter of 2010 decreased 13% compared to the third quarter of 2009, and increased 13% for the first nine months of 2010 compared to the first nine months of 2009. The

---

**Table of Contents**

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS (Continued)**

decrease in the quarterly comparison largely resulted from reduced information systems and communications costs and an insurance recovery related to legal proceedings. The increase in the nine-month comparison was primarily associated with higher salaries and employee benefits expenses related to higher staffing levels and higher expenses for securities processing.

As previously reported, on June 30, 2010, we made a one-time cash contribution of \$330 million to the collateral pools underlying the SSgA lending funds, which restored the net asset value per unit of the pools to \$1.00 as of that date. The cash contribution was equal to the aggregate excess of the amortized cost of the collateral pools' assets over their fair value on the date of the payment. The cash contribution, combined with continuing improvement in market conditions during 2010, enabled us to remove the redemption restrictions from the pools during the third quarter of 2010. As of June 30, 2010, subsequent to the cash contribution, and as of September 30, 2010, the net asset value per unit of the collateral pools, based on the fair value of the underlying assets, was equal to \$1.00. SSgA will not have an ongoing interest in the lending funds as a result of the cash contribution. Specifically, the increase in fund liquidity will benefit the third-party investors in the funds.

Our decision with respect to the cash contribution was based on many factors, including our assessment relative to previously disclosed asserted and unasserted claims and our evaluation of the ultimate resolution of such claims, as well as the effect of the redemption restrictions originally imposed by SSgA on the lending funds. The contribution was not the result of any obligation by State Street to support the SSgA lending funds or the underlying collateral pools. State Street has no obligation to provide cash or other support to the SSgA lending fund or the collateral pools underlying the SSgA lending funds at any future date, and has no intention to provide any such support associated with realized or unrealized losses in the collateral pools that may arise in the future.

**FINANCIAL CONDITION**

The structure of our consolidated statement of condition is primarily driven by the liabilities generated by our Investment Servicing and Investment Management businesses. As our clients execute their worldwide cash management and investment activities, they use short-term investments and deposits that constitute the majority of our liabilities. These liabilities are generally in the form of non-interest-bearing demand deposits; interest-bearing transaction account deposits, which are denominated in a variety of currencies; and repurchase agreements, which generally serve as short-term investment alternatives for our clients.

Our clients' needs and our operating objectives determine the volume, mix and currency denomination of our consolidated balance sheet. Deposits and other liabilities generated by client activities are invested in assets that generally match the liquidity and interest-rate characteristics of the liabilities. As a result, our assets consist primarily of securities held in our available-for-sale or held-to-maturity portfolios and short-term money-market instruments, such as interest-bearing deposits, federal funds sold and securities purchased under resale agreements. The actual mix of assets is determined by the characteristics of the customer liabilities and our desire to maintain a well-diversified portfolio of high-quality assets. The management of our consolidated balance sheet structure is conducted within specific Board of Directors-approved policies for interest-rate risk, credit risk and liquidity.

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS (Continued)**

We manage our investment securities portfolio to align with interest-rate and duration characteristics of our customer liabilities and in the context of our overall consolidated balance sheet structure, which is maintained within internally approved risk limits, and in consideration of the global interest-rate environment. We consider a well-diversified, high-credit quality investment securities portfolio to be an important element in the management of our consolidated balance sheet. The portfolio continues to be concentrated in securities with high credit quality, with approximately 82% of the carrying value of the portfolio AAA or AA rated. The percentages of the carrying value of the investment securities portfolio by external credit rating were as follows as of September 30, 2010 and December 31, 2009:

	September 30, 2010	December 31, 2009
AAA <sup>(1)</sup>	71%	69%
AA	11	11
A	6	7
BBB	3	4
Below BBB	9	8
Non-rated		1
	<b>100%</b>	<b>100%</b>

<sup>(1)</sup> Includes U.S. Treasury securities.

As of September 30, 2010, the investment portfolio of approximately 10,180 securities was diversified with respect to asset class. Approximately 79% of the carrying value of the portfolio at September 30, 2010 was composed of mortgage-backed and asset-backed securities. The largely floating-rate asset-backed portfolio consists primarily of credit card- and student loan-backed securities. Mortgage-backed securities are split between securities of Federal National Mortgage Association, Federal Home Loan Mortgage Corporation and U.S. and non-U.S. large-issuer collateralized mortgage obligations.

Certain asset-backed and municipal (state and political subdivisions) securities have the benefit of third-party guarantees from financial guaranty insurance companies. The aggregate amortized cost of securities with underlying guarantees was approximately \$4.71 billion at September 30, 2010 and \$4.96 billion at December 31, 2009. Asset-backed securities comprised approximately \$744 million of the total at September 30, 2010, of which approximately \$190 million are currently drawing on the underlying guarantees in order to make contractual principal and interest payments to State Street. In these cases, the performance of the underlying security is highly dependent on the performance of the guarantor. Of the \$190 million currently drawing on the guarantees, approximately 47% is supported by guarantors rated below investment grade or non-rated.

In assessing other-than-temporary impairment, we may from time to time place reliance on support from third-party financial guarantors for certain asset-backed and municipal (state and political subdivisions) securities. Factors taken into consideration when determining the level of support include the guarantor's credit rating and management's assessment of the guarantor's financial condition. For those companies management deems to be under financial duress, we assume an immediate default by those guarantors (commensurate with our prior assumption of a January 1, 2010 default), with a modest recovery of claimed amounts (up to 20%). In addition, for various forms of collateralized securities, management considers the liquidation value of the underlying collateral based on expected housing prices and other relevant factors.

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS (Continued)**

***Impairment***

Net unrealized losses on securities available for sale were as follows as of September 30, 2010 and December 31, 2009:

(In millions)	September 30, 2010	December 31, 2009
Fair value	\$ 80,719	\$ 72,699
Amortized cost	80,729	74,843
Net unrealized loss, pre-tax	\$ (10)	\$ (2,144)
Net unrealized loss, after-tax	\$ (6)	\$ (1,316)

The net unrealized loss amounts excluded the remaining net unrealized loss of \$604 million, or \$372 million after-tax, and \$1.01 billion, or \$635 million after-tax, respectively, as of September 30, 2010 and December 31, 2009, generally related to the 2008 reclassification of securities available for sale to securities held to maturity. These after-tax amounts were also recorded in other comprehensive income. The decline in the remaining after-tax unrealized loss on transferred securities resulted primarily from amortization and from the recognition of losses from other-than-temporary impairment on certain of the securities.

We conduct periodic reviews of individual securities to assess whether other-than-temporary impairment exists. To the extent that other-than-temporary impairment is identified, the impairment is separated into a credit component and a non-credit component. The credit component is recorded in our consolidated statement of income, and the non-credit component is recorded, net of related taxes, in other comprehensive income as long as management does not intend to sell the security.

The assessment of other-than-temporary impairment involves an evaluation of economic and security-specific factors, which are more fully described in note 3 to the consolidated financial statements included in this Form 10-Q. Such factors are based on estimates, derived by management, which contemplate current market conditions and security-specific performance. To the extent that market conditions are worse than management's expectations, other-than-temporary impairment could increase, in particular the credit component that would be recorded in our consolidated statement of income.

Generally, indices that measure trends in national housing prices are published in arrears. As of December 31, 2009, national housing prices, according to the Case-Shiller National Home Price Index, had declined by approximately 29% peak-to-current. Through June 30, 2010, there was an improvement of approximately 1%, resulting in a peak-to-current decline of approximately 28%. Despite increased stabilization in housing prices, management's base assumption is that by year-end 2010, the peak-to-current housing price will decline by an additional 5% to 10%.

Despite nominal improvement in the above-mentioned housing prices, the performance of certain mortgage products and vintages continues to deteriorate. In addition, management continues to believe that there will be further declines in housing prices as indicated above. The combination of these factors has led to an increase in management's overall loss expectations. Our investment portfolio continues to be sensitive to management's estimates of defaults and prepayment speeds. Ultimately, other-than-temporary impairment is based on specific cusip-level detailed analysis of the unique characteristics of each security. In addition, we perform sensitivity analysis across each significant product type within the non-agency U.S. residential mortgage-backed portfolio. For example, as it relates to our U.S. non-agency prime and Alt-A residential mortgage-backed portfolios, if we were to increase default estimates to 110% of management's current expectations with a corresponding 10%

**Table of Contents****MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION****AND RESULTS OF OPERATIONS (Continued)**

slowdown of prepayment speeds to 90% of management's current expectations, we estimate that other-than-temporary impairment on these securities related to credit would increase by approximately \$5 million to \$15 million. This impairment would be recorded in our consolidated statement of income. As it relates to our U.S. sub-prime asset-backed portfolio, if we were to increase default estimates to 110% of management's current expectations with a corresponding 10% slowdown of prepayment speeds to 90% of management's current expectations, we estimate that other-than-temporary impairment on these securities related to credit would increase by approximately \$75 million to \$125 million. This impairment would be recorded in our consolidated statement of income.

The sensitivity estimates discussed above are based on a number of factors, including, but not limited to, the level of housing prices and the timing of defaults. To the extent that such factors differ substantially from management's current expectations, resulting loss estimates may differ materially from those stated. Excluding the securities for which other-than-temporary impairment was recorded, management considers the aggregate decline in fair value of the remaining securities and the resulting net unrealized losses to be temporary and not the result of any material changes in the credit characteristics of the securities. Additional information about our assessment of impairment is provided in note 3 to the consolidated financial statements included in this Form 10-Q.

Several major U.S. financial institutions are participating in a mortgage foreclosure moratorium with respect to residential mortgages. Generally, we have no direct exposure to this moratorium, since we do not originate, purchase or service residential mortgage loans. However, the rate at which existing residential mortgage foreclosure issues are resolved, which could slow due to the continuation or modification of foreclosure moratorium programs, as well as certain outcomes of the resolution of these issues, may affect, among other things, our investment securities portfolio. Such effects could include the timing of cash flows or the credit quality associated with the mortgages collateralizing certain of our residential mortgage-backed securities, and, accordingly, could also affect the amount of other-than-temporary impairment that we recognize in future periods.

**Loans and Lease Financing**

(In millions)	September 30, 2010	December 31, 2009

-----------	----	--------	----	--------

**Table of Contents**

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS (Continued)**

Institutional and corporate balances primarily represented short-term extensions of credit pursuant to lending facilities with fund clients, as well as insurance, corporate and other borrowers. Securities settlement balances were composed of short-duration advances to our clients to provide liquidity in support of their transaction flows associated with securities settlement activities. The purchased receivables were structured asset-backed loans added in connection with the May 2009 conduit consolidation, and represent undivided interests in securitized pools of underlying third-party receivables.

The commercial real estate loans were acquired in 2008 pursuant to indemnified repurchase agreements with an affiliate of Lehman. These loans, which are primarily collateralized by direct and indirect interests in commercial real estate, were recorded at their then-current fair value, based on management's expectations with respect to future cash flows from the loans using appropriate market discount rates as of the date of acquisition. The majority of the loans is accounted for under the provisions of ASC Topic 310-30, *Loans and Debt Securities Acquired with Deteriorated Credit Quality* (formerly AICPA Statement of Position No. 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer*). The provisions of ASC Topic 310-30 require management to periodically estimate the loans' expected future cash flows, and if the timing and amount of cash flows expected to be collected can be reasonably estimated, these cash flows are used to record interest revenue on the loans. If the loans' expected future cash flows increase, the increase is recorded over the remaining terms of the loans as an increase to the loans' yield. If expected future cash flows decrease, an allowance for loan losses is established and the accretable yield on the loans is maintained. In accordance with ASC Topic 310-30 and our accounting policy with respect to non-accrual loans, we would place these acquired commercial real estate loans on non-accrual status in the future if and when we were unable to reasonably estimate their expected future cash flows.

During the second quarter of 2010, as a result of a settlement related to the Lehman-related indemnified repurchase agreements, we acquired an additional commercial real estate loan and recorded it at its then-current fair value of \$16 million. This loan, prior to acquisition, had been performing in accordance with its contractual terms and had no evidence of credit deterioration as of the acquisition date, and accordingly is not accounted for under the above-described provisions of ASC Topic 310-30.

At September 30, 2010, approximately \$146 million of the above-described commercial real estate loans had been placed by management on non-accrual status. This was based on management's expectations with respect to future cash flows from the loans. Future changes in expectations with respect to the aggregate commercial real estate loan portfolio could result in additional non-accrual loans and provisions for loan losses.

**Table of Contents**

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS (Continued)**

The following table presents activity in the allowance for loan losses for the periods indicated:

(In millions)	Quarters Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
Beginning balance	\$ 102	\$ 108	\$ 79	\$ 18
Provision for loan losses:				
Commercial real estate loans	3		23	98
Other	(2)	16	3	16
Charge-offs:				
Commercial real estate loans	(1)	(61)	(4)	(69)
Other		(10)		(10)
Other	(1)			
Total	\$ 101	\$ 53	\$ 101	\$ 53

The majority of the provision for loan losses recorded in 2010 was related to commercial real estate loans, primarily the result of a revaluation of the collateral supporting certain of the commercial real estate loans acquired in 2008. The charge-offs recorded in 2010 related to the commercial real estate loans, as management considered certain of these loans no longer collectible.

The commercial real estate loans are reviewed on a quarterly basis, and any provisions for loan losses that are recorded reflect management's current expectations with respect to future cash flows from these loans, based on an assessment of economic conditions in the commercial real estate market and other factors.

**Capital**

The management of both regulatory and economic capital involves key metrics evaluated by management to assess whether our actual level of capital is commensurate with our risk profile, is in compliance with all regulatory requirements, and is sufficient to provide us with the financial flexibility to undertake future strategic business initiatives.

***Regulatory Capital***

Our objective with respect to regulatory capital management is to maintain a strong capital base in order to provide financial flexibility for our business needs, including funding corporate growth and supporting customers' cash management needs, and to provide protection against loss to depositors and creditors. We strive to maintain an optimal level of capital, commensurate with our risk profile, on which an attractive return to shareholders is expected to be realized over both the short and long term, while protecting our obligations to depositors and creditors and satisfying regulatory capital adequacy requirements. Additional information about our capital management process is provided in the Financial Condition section of Management's Discussion and Analysis in our 2009 Form 10-K.

**Table of Contents****MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION****AND RESULTS OF OPERATIONS (Continued)**

At September 30, 2010, State Street and State Street Bank met all capital adequacy requirements to which they were subject. Regulatory capital amounts and ratios at September 30, 2010, and December 31, 2009 are presented in the table below.

(Dollars in millions)	Regulatory Guidelines <sup>(1)</sup>		State Street		State Street Bank	
	Minimum	Well Capitalized	September 30, 2010	December 31, 2009	September 30, 2010	December 31, 2009
Tier 1 risk-based capital ratio	4%	6%	15.8%	17.7%	15.7%	17.3%
Total risk-based capital ratio	8	10	17.1	19.1	17.3	19.0
Tier 1 leverage ratio	4	5	8.3	8.5	8.1	8.2
Tier 1 risk-based capital			\$ 11,964	\$ 12,005	\$ 11,546	\$ 11,378
Total risk-based capital			12,914	12,961	12,662	12,482
Adjusted risk-weighted assets and market-risk equivalents:						
Balance sheet risk-weighted assets			\$ 60,864	\$ 56,780	\$ 58,648	\$ 54,832
Off-balance sheet equivalent risk-weighted assets			13,933	10,159	13,933	10,159
Market risk equivalent assets			828	752	780	703
Total			\$ 75,625	\$ 67,691	\$ 73,361	\$ 65,694
Adjusted quarterly average assets			\$ 144,824	\$ 140,978	\$ 142,298	\$ 138,914

- <sup>(1)</sup> State Street Bank must meet the regulatory designation of "well capitalized" in order to maintain the parent company's status as a financial holding company, including a minimum tier 1 risk-based capital ratio of 6%, a minimum total risk-based capital ratio of 10% and a tier 1 leverage ratio of 5%. In addition, State Street must meet Federal Reserve guidelines for "well capitalized" for a bank holding company to be eligible for a streamlined review process for acquisition proposals. These guidelines require a minimum tier 1 risk-based capital ratio of 6% and a minimum total risk-based capital ratio of 10%.

At September 30, 2010, State Street's and State Street Bank's regulatory capital ratios decreased compared to December 31, 2009. The decreases in the risk-based ratios were primarily the result of the reduction of capital related to the goodwill and other intangible assets recorded in connection with the Intesa and Mournant acquisitions in the second quarter of 2010. In addition, balance sheet risk-weighted assets increased, as short-duration advances to clients to provide liquidity in support of their transaction flows increased, largely in connection with the Intesa acquisition. Finally, off-balance sheet equivalent risk-weighted assets increased, primarily the result of higher levels of foreign exchange derivative activity. At September 30, 2010, regulatory capital ratios for State Street and State Street Bank exceeded the regulatory minimum and well-capitalized thresholds.

**Other**

The current minimum regulatory capital requirements enforced by the U.S. banking regulators are based on a 1988 international accord, commonly referred to as Basel I, which was developed by the Basel Committee on Banking Supervision. In 2004, the Basel Committee released the final version of its new capital adequacy framework, referred to as Basel II. Basel II governs the capital adequacy of large, internationally active banking organizations, such as State Street, that generally rely on sophisticated risk management and measurement systems, and requires these organizations to enhance their measurement and management of the risks underlying their business activities and to better align regulatory capital requirements with those risks.

**Table of Contents**

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS (Continued)**

Basel II adopts a three-pillar framework for addressing capital adequacy: minimum capital requirements, which incorporate the measurement of credit risk, market risk and operational risk; supervisory review, which addresses the need for a banking organization to assess its capital adequacy position relative to its overall risk, rather than only with respect to its minimum capital requirement; and market discipline, which imposes public disclosure requirements on a banking organization intended to allow the assessment of key information about the organization's risk profile and its associated level of regulatory capital.

In December 2007, U.S. banking regulators jointly issued final rules to implement the Basel II framework in the U.S. The framework does not supersede or change the existing prompt corrective action and leverage capital requirements applicable to banking organizations in the U.S., and explicitly reserves the regulators' authority to require organizations to hold additional capital where appropriate. In addition, in response to the current financial crisis, the Basel Committee has proposed new guidelines, referred to as Basel III. Basel III would establish more stringent capital and liquidity requirements, including higher minimum regulatory capital ratios, new capital buffers, higher risk-weighted asset calibrations, more restrictive definitions of qualifying capital, a liquidity coverage ratio and a net stable funding ratio. These requirements, as well as related provisions of the Dodd-Frank Act and other international regulatory initiatives, could have a material impact on our businesses and our profitability.

Prior to full implementation of the Basel II framework, State Street is required to complete a defined qualification period, during which it must demonstrate that it complies with the related regulatory requirements to the satisfaction of the Federal Reserve, its and State Street Bank's primary U.S. banking regulator. State Street is currently in the qualification period for Basel II.

The Basel Committee has not yet published the final criteria that will constitute Basel III, and a significant implementation period is expected to be incorporated into the final accord. In addition, U.S. banking regulators will need to adopt rules to implement the final accord. Consequently, it is not possible to determine with certainty at this time how our regulatory capital and our operations will align with the regulatory capital requirements of Basel III, or when we will be expected to be compliant with the Basel regulatory capital requirements. However, we believe that we will be able to comply with the relevant Basel II and Basel III regulatory capital requirements by their implementation dates as applied to us.

**Economic Capital**

We define economic capital as the capital required to protect holders of our senior debt, and obligations higher in priority, against unexpected economic losses over a one-year period at a level consistent with the solvency of a firm with our target AA- senior debt rating. Economic capital requirements are one of several important measures used by management and the Board of Directors to assess the adequacy of our capital levels in relation to State Street's risk profile. Our Asset, Liability and Capital Committee, or ALCCO, is responsible for overseeing our economic capital process. The framework and methodologies used to quantify economic capital for each of the risk types described below have been developed by our Enterprise Risk Management, Global Treasury and Corporate Finance groups and are designed to be generally consistent with our risk management principles and Basel II. This economic capital framework has been approved by senior management. Due to the evolving nature of quantification techniques, we expect to periodically refine the methodologies, assumptions, and data used to estimate our economic capital requirements, which could result in a different amount of capital needed to support our business activities.

**Table of Contents**

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS (Continued)**

We quantify capital requirements for the risks inherent in our business activities and group them into one of the following broadly-defined categories:

Market risk: the risk of adverse financial impact due to fluctuations in market prices, primarily as they relate to our trading activities;

Interest-rate risk: the risk of loss in non-trading asset and liability management positions, primarily the impact of adverse movements in interest rates on the repricing mismatches that exist between balance sheet assets and liabilities;

Credit risk: the risk of loss that may result from the default or downgrade of a borrower or counterparty;

Operational risk: the risk of loss from inadequate or failed internal processes, people and systems, or from external events, which is consistent with the Basel II definition; and

Business risk: the risk of negative earnings resulting from adverse changes in business factors, including changes in the competitive environment, changes in the operational economics of our business activities, and the effect of strategic and reputation risks.

Economic capital for each of these five categories is estimated on a stand-alone basis using statistical modeling techniques applied to internally-generated and, in some cases, external data. These individual results are then aggregated at the State Street consolidated level. A capital reduction, or diversification benefit, is then applied to reflect the unlikely event of experiencing an extremely large loss in each risk type at the same time.

**Liquidity**

The objective of liquidity management is to ensure that we have the ability to meet our financial obligations in a timely and cost-effective manner, and that we maintain sufficient flexibility to fund strategic corporate initiatives as they arise. Effective management of liquidity involves assessing the potential mismatch between the future cash needs of our clients and our available sources of cash under normal and adverse economic and business conditions. Significant uses of liquidity, described more fully below, consist primarily of funding deposit withdrawals and funding outstanding commitments to extend credit or commitments to purchase securities as they are drawn upon. Liquidity is provided by the maintenance of broad access to the global capital markets and by our consolidated balance sheet asset structure.

Sources of liquidity come from two primary areas: access to the global capital markets and liquid assets carried on our consolidated balance sheet. Our ability to source incremental funding at reasonable rates of interest from wholesale investors in the capital markets is the first source of liquidity we would access to accommodate the uses of liquidity described below. On-balance sheet liquid assets are also an integral component of our liquidity management strategy. These assets provide liquidity through maturities of the assets, but more importantly, they provide us with the ability to raise funds by pledging the securities as collateral for borrowings or through outright sales. Each of these sources of liquidity is used in our management of daily cash needs and is available in a crisis scenario should we need to accommodate potential large, unexpected demand for funds.

Uses of liquidity result from the following: withdrawals of unsecured client deposits; draw-downs on unfunded commitments to extend credit or to purchase securities, generally provided through lines of credit; and short-duration advance facilities. Client deposits are generated largely from our investment servicing activities,

**Table of Contents**

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS (Continued)**

and are invested in a combination of term investment securities and short-term money market assets whose mix is determined by the characteristics of the deposits. Most of the client deposits are payable upon demand or are short-term in nature, which means that withdrawals can potentially occur quickly and in large amounts. Similarly, clients can request disbursement of funds under commitments to extend credit, or can overdraw their deposit accounts rapidly and in large volumes. In addition, a large volume of unanticipated funding requirements, such as large draw-downs of existing lines of credit, could require additional liquidity.

Material risks to sources of short-term liquidity could include, among other things, adverse changes in the perception in the financial markets of our financial condition or liquidity needs, and downgrades by major independent credit rating agencies of our deposits and our debt securities, which would restrict our ability to access the capital markets and could lead to withdrawals of unsecured deposits by our clients.

In managing our liquidity, we have issued term wholesale certificates of deposit, or C/Ds, and invested those funds in short-term money market assets which are recorded in our consolidated balance sheet and would be available to meet cash needs. At September 30, 2010, this wholesale C/D portfolio totaled \$9.66 billion, compared to \$5.74 billion at December 31, 2009. In connection with our management of liquidity where we seek to maintain access to sources of back-up liquidity at reasonable costs, we have participated in the Federal Reserve's secured lending program available to financial institutions, referred to as the term auction facility, or TAF. State Street Bank terminated its participation in the TAF in February 2010, and consequently had no TAF balance outstanding at September 30, 2010, compared to \$2.0 billion at December 31, 2009. Since then, the Federal Reserve has terminated the TAF program. The highest TAF balance outstanding during the first nine months of 2010 for State Street Bank was \$2.0 billion, compared to \$10.0 billion during the year ended December 31, 2009. The average TAF balance outstanding for the first nine months of 2010 for State Street Bank was approximately \$300 million, compared to an average TAF balance of approximately \$4.9 billion for the year ended December 31, 2009.

In addition to these funding sources, at September 30, 2010, asset-backed commercial paper issued to third parties by the former conduits, which were consolidated into our financial statements in May 2009, totaled approximately \$6.85 billion, compared to \$12.07 billion at December 31, 2009. We continue to market the conduit commercial paper program to investors in order to fund the remaining former conduit assets.

While maintenance of our high investment-grade credit rating is of primary importance to our liquidity management program, on-balance sheet liquid assets represent significant liquidity that we can directly control, and provide a source of cash in the form of principal maturities and the ability to borrow from the capital markets using our securities as collateral. Our liquid assets consist primarily of cash balances at central banks in excess of regulatory requirements and other short-term liquid assets, such as federal funds sold and interest-bearing deposits with banks, the latter of which are multicurrency instruments invested with major multinational banks; and high-quality, marketable investment securities not already pledged, which generally are more liquid than other types of assets and can be sold or borrowed against to generate cash quickly. At September 30, 2010, the value of our liquid assets, as defined, totaled \$88.38 billion, compared to \$75.98 billion as of December 31, 2009. Due to the unusual size and volatile nature of our quarter-end client deposits, we maintained approximately \$20.22 billion at central banks on September 30, 2010, compared to \$22.45 at December 31, 2009, both in excess of regulatory required minimums.

Aggregate investment securities carried at \$46.85 billion as of September 30, 2010, compared to \$40.96 billion as of December 31, 2009, were designated as pledged for public and trust deposits, borrowed funds and for other purposes as provided by law, and are excluded from the liquid assets calculation, unless

---

**Table of Contents**

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS (Continued)**

pledged to the Federal Reserve Bank of Boston or internally between State Street affiliates. Liquid assets included securities pledged to the Federal Reserve Bank of Boston to secure State Street Bank's ability to borrow from their discount window should the need arise. This access to primary credit is an important source of back-up liquidity for State Street Bank. As of September 30, 2010, State Street Bank had no outstanding primary credit borrowings from the discount window.

Based upon our level of liquid assets and our ability to access the capital markets for additional funding when necessary, including our ability to issue debt and equity securities under our current universal shelf registration, management considers overall liquidity at September 30, 2010 to be sufficient to meet State Street's current commitments and business needs, including supporting the liquidity of the commercial paper conduits and accommodating the transaction and cash management needs of our clients.

As referenced above, our ability to maintain consistent access to liquidity is fostered by the maintenance of high investment-grade ratings on our debt, as measured by the major independent credit rating agencies. Factors essential to retaining high credit ratings include diverse and stable core earnings; strong risk management; strong capital ratios; diverse liquidity sources, including the global capital markets and customer deposits; and strong liquidity monitoring procedures. High ratings on debt minimize borrowing costs and enhance our liquidity by increasing the potential market for our debt. A downgrade or reduction of these credit ratings could have an adverse effect to our ability to access funding at favorable interest rates.

We maintain an effective universal shelf registration that allows for the public offering and sale of debt securities, capital securities, common stock, depositary shares and preferred stock, and warrants to purchase such securities, including any shares into which the preferred stock and depositary shares may be convertible, or any combination thereof. We have, as discussed previously, issued in the past, and we may issue in the future, securities pursuant to the shelf registration. The issuance of debt or equity securities will depend on future market conditions, funding needs and other factors.

We currently maintain a corporate commercial paper program, unrelated to the former conduit asset-backed commercial paper program, under which we can issue up to \$3 billion with original maturities of up to 270 days from the date of issue. At September 30, 2010, we had \$2.73 billion of commercial paper outstanding, compared to \$2.78 billion at December 31, 2009. Corporate commercial paper issuances are recorded in other short-term borrowings in our consolidated statement of condition.

State Street Bank currently has Board authority to issue bank notes up to an aggregate of \$5 billion, and up to \$1 billion of subordinated bank notes. As of September 30, 2010, State Street Bank's outstanding unsecured senior notes, issued pursuant to the aforementioned Board authority, totaled \$2.45 billion. These notes are guaranteed pursuant to the FDIC's Temporary Liquidity Guarantee Program.

State Street Bank currently maintains a line of credit with a financial institution of CAD \$800 million, or approximately \$777 million, as of September 30, 2010, to support its Canadian securities processing operations. The line of credit has no stated termination date and is cancelable by either party with prior notice. As of September 30, 2010, no balance was outstanding on this line of credit.

AND RESULTS OF OPERATIONS (Continued)**

**Risk Management**

The global scope of our business activities requires that we balance what we perceive to be the primary risks in our businesses with a comprehensive and well-integrated risk management function. The measurement, monitoring and mitigation of risks are essential to the financial performance and successful management of our businesses. These risks, if not effectively managed, can result in current losses to State Street as well as erosion of our capital and damage to our reputation. Our systematic approach also allows for a more precise assessment of risks within a framework for evaluating opportunities for the prudent use of capital.

We have a disciplined approach to risk management that involves all levels of management. The Board, through its Risk and Capital Committee, provides extensive review and oversight of our overall risk management programs, including the approval of key risk management policies and the periodic review of State Street's Risk Appetite Statement, which is an integral part of our overall Internal Capital Adequacy Assessment Process, or ICAAP. The Risk Appetite Statement outlines the quantitative limits and qualitative goals that define and constrain our risk appetite and defines responsibilities for measuring and monitoring risk against limits, which are reported regularly to the Board. In addition, State Street utilizes a variety of key risk indicators to monitor risk on a more granular level. Enterprise Risk Management, or ERM, a dedicated corporate group, provides oversight, support and coordination across business units and is responsible for the formulation and maintenance of enterprise-wide risk management policies and guidelines. In addition, ERM establishes and reviews approved limits and, in collaboration with business line management, monitors key risks. Our Chief Risk Officer meets regularly with the Board or its Risk and Capital Committee, as appropriate, and has the authority to escalate issues as necessary.

The execution of duties in the management of people, products, business operations and processes is the responsibility of business unit managers. The function of risk management is designing and directing the implementation of risk management programs and processes consistent with corporate and regulatory standards, and providing oversight of the business-owned risks. Accordingly, risk management is a shared responsibility between ERM and the business lines, and requires joint efforts in goal setting, program design and implementation, resource management, and performance evaluation between business and functional units.

Responsibility for risk management is overseen by a series of management committees, as well as the Board's Risk and Capital Committee. The Management Risk and Capital Committee, or MRAC, with our Chief Risk Officer and Chief Financial Officer acting as co-chairs, aligns State Street's strategy, budget, risk appetite and capital adequacy. The Major Risk Committee, or MRC, is responsible for the formulation, recommendation and approval of policies, guidelines and programs governing the identification, analysis, measurement and control of material risks across State Street. Co-Chaired by our Chief Risk Officer and Chief Financial Officer, the MRC focuses on the review of business activities with significant impact on risk and capital. ALCCO, chaired by our Treasurer, oversees the management of our consolidated balance sheet, the management of our global liquidity and interest-rate risk positions, our regulatory and economic capital, the determination of the framework for capital allocation and strategies for capital structure, and debt and equity issuances.

Our Fiduciary Review Committee, chaired by the head of ERM, reviews the criteria for the acceptance of fiduciary duties, and assists our business lines with their fiduciary responsibilities executed on behalf of customers. Our Credit Committee, chaired by our Chief Credit Officer, acts as the credit and counterparty risk guidelines committee for State Street. Our Operational Risk Committee, co-chaired by the head of ERM and the head of Operational Risk, provides cross-business oversight of operational risk to identify, measure, manage and control operational risk in an effective and consistent manner across State Street. Our Model Assessment

**Table of Contents**

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS (Continued)**

Committee, chaired within ERM, provides recommendations concerning technical modeling issues and independently validates qualifying financial models utilized by our businesses. Several other committees with specialized risk management functions report up to the MRC.

While we believe that our risk management program is effective in managing the risks in our businesses, both internal and external factors may create risks that cannot always be prospectively identified or anticipated. Additional information about our process for managing market risk for both our trading and asset-and-liability management activities, as well as credit risk, operational risk and business risk, can be found in the Financial Condition section of Management's Discussion and Analysis in our 2009 Form 10-K.

***Market Risk***

Market risk is defined as the risk of adverse financial impact due to fluctuations in interest rates, foreign exchange rates and other market-driven factors and prices. State Street is exposed to market risk in both its trading and non-trading, or asset and liability management, activities. The market risk management processes related to these activities, discussed in further detail below, apply to both on- and off-balance sheet exposures.

We primarily engage in trading and investment activities to serve our clients' needs and to contribute to our overall corporate earnings and liquidity. In the conduct of these activities, we are subject to, and assume, market risk. The level of market risk that we assume is a function of our overall objectives and liquidity needs, our clients' requirements and market volatility. Interest-rate risk, a component of market risk, is more thoroughly discussed in the Asset and Liability Management portion of this Market Risk section.

***Trading Activities***

Market risk associated with foreign exchange and other trading activities is managed through corporate guidelines, including established limits on aggregate and net open positions, sensitivity to changes in interest rates, and concentrations, which are supplemented by stop-loss thresholds. We use a variety of risk management tools and methodologies, including value-at-risk, to measure, monitor and manage market risk. All limits and measurement techniques are reviewed and adjusted as necessary on a regular basis by business managers, the market risk management group and the Trading and Market Risk Committee.

We use a variety of derivative financial instruments to support our clients' needs, conduct trading activities and manage our interest-rate and currency risk. These activities are designed to create trading revenue and to hedge potential earnings volatility. In addition, we provide services related to derivatives in our role as both a manager and a servicer of financial assets.

Our clients use derivatives to manage the financial risks associated with their investment goals and business activities. With the growth of cross-border investing, our clients have an increasing need for foreign exchange forward contracts to convert currency for international investments and to manage the currency risk in their international investment portfolios. As an active participant in the foreign exchange markets, we provide foreign exchange forward contracts and options in support of these client needs.

As part of our trading activities, we assume positions in the foreign exchange and interest-rate markets by buying and selling cash instruments and using derivatives, including foreign exchange forward contracts, foreign exchange and interest-rate options and interest-rate swaps. As of September 30, 2010, the aggregate notional amount of these derivatives was \$753.82 billion, of which \$650.11 billion was composed of foreign exchange

**Table of Contents****MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION****AND RESULTS OF OPERATIONS (Continued)**

forward, swap and spot contracts. In the aggregate, we seek to closely match long and short foreign exchange forward positions to minimize currency and interest-rate risk. All foreign exchange contracts are valued daily at current market rates. Additional information about trading derivatives is provided in note 11 to the consolidated financial statements included in this Form 10-Q.

As noted above, we use a variety of risk measurement tools and methodologies, including value-at-risk, or VaR, which is an estimate of potential loss for a given period within a stated statistical confidence interval. We use a risk measurement system to estimate VaR daily. We have adopted standards for estimating VaR, and we maintain capital for market risk in accordance with applicable regulatory guidelines. VaR is estimated for a 99% one-tail confidence interval and an assumed one-day holding period using a historical observation period of two years. A 99% one-tail confidence interval implies that daily trading losses should not exceed the estimated VaR more than 1% of the time, or less than three business days out of a year. The methodology uses a simulation approach based on historically observed changes in foreign exchange rates, interest rates (U.S. and non-U.S.) and foreign exchange implied volatilities, and takes into account the resulting diversification benefits provided from the mix of our trading positions.

Like all quantitative risk measures, VaR is subject to limitations and assumptions inherent in our methodology. Our methodology gives equal weight to all market-rate observations regardless of how recently the market rates were observed. The estimate is calculated using static portfolios consisting of trading positions held at the end of each business day. Therefore, implicit in the VaR estimate is the assumption that no intra-day actions are taken by management during adverse market movements. As a result, the methodology does not include risk associated with intra-day changes in positions or intra-day price volatility.

The following table presents VaR with respect to our trading activities, for trading positions held during the periods indicated, as measured by our VaR methodology. The generally lower total VaR amounts compared to component VaR amounts primarily relate to diversification benefits across risk types.

**VALUE-AT-RISK**

	Nine Months Ended September 30,					
	2010			2009		
(In millions)	Annual Average	Maximum	Minimum	Annual Average	Maximum	Minimum
Foreign exchange rates	\$ 3.2	\$ 9.4	\$ 0.6	\$ 3.2	\$ 9.7	\$ 0.5
Interest-rates	1.6	4.9	1.6	1.6	2.9	0.6
Total VaR for trading assets	\$ 4.5	\$ 10.2	\$ 1.8	\$ 3.7	\$ 9.2	\$ 1.2

We back-test the estimated one-day VaR on a daily basis. This information is reviewed and used to confirm that all relevant trading positions are properly modeled. For the nine months ended September 30, 2010 and 2009, we did not experience any actual trading losses in excess of our end-of-day VaR estimate.

Our VaR measurement methodology also measures VaR associated with certain assets classified as trading account assets in our consolidated balance sheet. These assets are not held in connection with typical trading activities, and thus are not reflected in the foregoing VaR table. In the table below, the VaR associated with these assets is reported as VaR for non-trading assets. Total regulatory VaR is calculated as the sum of the VaR for trading assets and the VaR for non-trading assets, with no diversification benefits recognized. The average, maximum and minimum amounts are calculated for each line item separately.

**Table of Contents**

AND RESULTS OF OPERATIONS (Continued)**

**Total Regulatory VALUE-AT-RISK**

(In millions)	Nine Months Ended September 30,					
	Annual Average	2010 Maximum	Minimum	Annual Average	2009 Maximum	Minimum
VaR for trading assets	\$ 4.5	\$ 10.2	\$ 1.8	\$ 3.7	\$ 9.2	\$ 1.1
VaR for non-trading assets	3.1	6.7	2.3	2.1	2.4	1.6
Total regulatory VaR	\$ 7.6	\$ 13.1	\$ 4.7	\$ 4.5	\$ 9.2	\$ 1.2

*Asset and Liability Management Activities*

The primary objective of asset and liability management is to provide sustainable and growing net interest revenue, or NIR, under varying economic environments, while protecting the economic values of our balance sheet assets and liabilities from the adverse effects of changes in interest rates. Most of our NIR is earned from the investment of deposits generated by our Investment Servicing and Investment Management lines of business. We structure our balance sheet assets to generally conform to the characteristics of our balance sheet liabilities, but we manage our overall interest-rate risk position in the context of current and anticipated market conditions and within internally-approved risk guidelines.

Our investment activities and our use of derivative financial instruments are the primary tools used in managing interest-rate risk. We invest in financial instruments with currency, repricing, and maturity characteristics we consider appropriate to manage our overall interest-rate risk position. In addition to on-balance sheet assets, we use certain derivative instruments, primarily interest-rate swaps, to alter the interest-rate characteristics of specific balance sheet assets or liabilities. The use of derivatives is subject to ALCCO-approved guidelines. Additional information about our use of derivatives is provided in note 11 to the consolidated financial statements included in this Form 10-Q.

As a result of growth in our non-U.S. operations, including the Intesa and Maurant acquisitions, non-U.S. dollar denominated customer liabilities are a significant portion of our consolidated balance sheet. This growth results in exposure to changes in the shape and level of non-U.S. dollar yield curves, which we include in our consolidated interest-rate risk management process.

To measure, monitor, and report on our interest-rate risk position, we use (1) NIR simulation, or NIR-at-risk, which measures the impact on NIR over the next twelve months to immediate, or rate shock, and gradual, or rate ramp, changes in market interest rates; and (2) economic value of equity, or EVE, which measures the impact on the present value of all NIR-related principal and interest cash flows of an immediate change in interest rates. NIR-at-risk is designed to measure the potential impact of changes in market interest rates on NIR in the short term. EVE, on the other hand, is a long-term view of interest-rate risk, but with a view toward liquidation of State Street. Both of these measures are subject to ALCCO-approved guidelines, and are monitored regularly, along with other relevant simulations, scenario analyses and stress tests by both Global Treasury and ALCCO.

In calculating our NIR-at-risk, we start with a base amount of NIR that is projected over the next twelve months, assuming our forecasted yield curve over the period. Our existing balance sheet assets and liabilities are adjusted by the amount and timing of transactions that are forecasted to occur over the next twelve months. That yield curve is then shocked, or moved immediately,  $\pm 100$  basis points in a parallel fashion, or at all points

**Table of Contents****MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION****AND RESULTS OF OPERATIONS (Continued)**

along the yield curve. Two new twelve-month NIR projections are then developed using the same balance sheet and forecasted transactions, but with the new yield curves, and compared to the base scenario. We also perform the calculations using interest rate ramps, which are  $\pm 100$  basis point changes in interest rates that are assumed to occur gradually over the next twelve months, rather than immediately as we do with interest-rate shocks.

EVE is based on the change in the present value of all NIR-related principal and interest cash flows for changes in market rates of interest. The present value of existing cash flows with a then-current yield curve serves as the base case. We then apply an immediate parallel shock to that yield curve of  $\pm 200$  basis points and recalculate the cash flows and related present values. A large shock is used to better capture the embedded option risk in our mortgage-backed securities that results from borrowers' prepayment opportunities.

Key assumptions used in the models described above include the timing of cash flows; the maturity and repricing of balance sheet assets and liabilities, especially option-embedded financial instruments like mortgage-backed securities; changes in market conditions; and interest-rate sensitivities of our customer liabilities with respect to the interest rates paid and the level of balances. These assumptions are inherently uncertain and, as a result, the models cannot precisely predict future NIR or predict the impact of changes in interest rates on NIR and economic value. Actual results could differ from simulated results due to the timing, magnitude and frequency of changes in interest rates and market conditions, changes in spreads and management strategies, among other factors. Projections of potential future streams of NIR are assessed as part of our forecasting process.

The following table presents the estimated exposure of NIR for the next twelve months, calculated as of September 30, 2010 and December 31, 2009, due to an immediate  $\pm 100$  basis point shift in then-current interest rates. Estimated incremental exposures presented below are dependent on management's assumptions about asset and liability sensitivities under various interest-rate scenarios, such as those previously discussed, and do not reflect any additional actions management may undertake in order to mitigate some of the adverse effects of interest-rate changes on State Street's financial performance.

<b>NIR-AT-RISK</b> <b>(In millions)</b>	<b>Estimated Exposure to</b> <b>Net Interest Revenue</b>	
	<b>September 30,</b> <b>2010</b>	<b>December 31,</b> <b>2009</b>
<b>Rate change:</b>		
+100 bps shock	\$ 20	\$ (165)
-100 bps shock	(272)	(330)
+100 bps ramp	(8)	(128)
-100 bps ramp	(147)	(112)

The benefit to NIR-at-risk over the next 12 months for an upward-100-basis-point shock as of September 30, 2010 compared to December 31, 2009 was primarily the result of lower levels of projected short-term wholesale funding, such as C/Ds. NIR sensitivity to a downward-100-basis-point shock as of September 30, 2010 also improved compared to December 31, 2009, largely due to a lower level of forecasted liquid assets as market conditions gradually normalize.

Interest-rate ramps, compared to interest-rate shocks, delay the full effect of rate movements, as customer deposits largely begin to re-price immediately, or changes in asset yields lag modestly. Accordingly, NIR-at-risk to an upward-100-basis-point ramp as of September 30, 2010 improved compared to December 31, 2009. Due to lower levels of projected short-term wholesale funding, when rates are ramped downward as opposed to a shock, liabilities do not provide enough funding relief to offset the decline in asset yields. While asset yields declined

**Table of Contents**

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS (Continued)**

similarly in a downward-100-basis-point ramp as of September 30, 2010 compared to December 31, 2010, the projected lower level of wholesale funding did not allow funding costs to decline nearly as much as in previous periods. Accordingly, NIR-at-risk to a downward-100-basis-point ramp as of September 30, 2010 increased compared to December 31, 2009.

Other important factors which affect the levels of NIR are balance sheet size and mix; interest-rate spreads; the slope and interest-rate level of U.S. dollar and non-U.S. dollar yield curves and the relationship between them; the pace of change in market interest rates; and management actions taken in response to the preceding conditions.

The following table presents estimated EVE exposures, calculated as of September 30, 2010 and December 31, 2009, assuming an immediate and prolonged shift in interest rates, the impact of which would be spread over a number of years.

<b>ECONOMIC VALUE OF EQUITY (In millions)</b>	<b>Estimated Exposure to Economic Value of Equity</b>	
	<b>September 30, 2010</b>	<b>December 31, 2009</b>
<b>Rate change:</b>		
+200 bps shock	\$ (1,535)	\$ (1,205)
- 200 bps shock	311	(434)

The increase in the exposure to EVE for an upward-200-basis-point shock as of September 30, 2010 compared to December 31, 2009 is attributable to the re-investment of investment portfolio amortization and other run-off into fixed-rate securities, as well as a continuing slowing of prepayment speeds in the mortgage-backed securities portfolio despite very low mortgage rates. These same factors account for the improvement in the exposure to EVE for a downward-200-basis-point shock as of September 30, 2010 compared to December 31, 2009.

***Credit Risk***

Credit and counterparty risk is defined as the risk of financial loss if a borrower or counterparty is either unable or unwilling to repay borrowings or settle a transaction in accordance with contractual terms. We assume credit and counterparty risk for both our on- and off-balance sheet exposures. The extension of credit and the acceptance of counterparty risk by State Street are governed by corporate guidelines based on each counterparty's risk profile, the markets served, counterparty and country concentrations, and regulatory compliance. Our focus on large institutional investors and their businesses requires that we assume concentrated credit risk for a variety of products and durations. We maintain comprehensive guidelines and procedures to monitor and manage all aspects of credit and counterparty risk that we undertake. Counterparties are evaluated on an individual basis at least annually, while significant exposures to counterparties are reviewed daily. Processes for credit approval and monitoring are in place for all credit extensions. As part of the approval and renewal process, due diligence is conducted based on the size and term of the exposure, as well as the creditworthiness of the counterparty. At any point in time, having one or more counterparties to which our exposure exceeds 10% of our consolidated total shareholders' equity, exclusive of unrealized gains or losses, is not unusual. Exposure to these counterparties is regularly evaluated by ERM.

We provide, on a limited basis, traditional loan products and services to key clients and prospects in a manner that is intended to enhance client relationships, increase profitability and manage risk. We employ a relationship model in which credit decisions are based upon credit quality and the overall institutional relationship.

**Table of Contents**

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS (Continued)**

An allowance for loan losses is maintained to absorb probable credit losses in the loan and lease portfolio that can be estimated, and is reviewed regularly by management for adequacy. An internal rating system is used to assess potential risk of loss. State Street's risk-rating process incorporates the use of risk rating tools in conjunction with management judgment. Qualitative and quantitative inputs are captured in a transparent and replicable manner, and following a formal review and approval process, an internal credit rating based on State Street's credit scale is assigned. The provision for loan losses is a charge to current earnings to maintain the overall allowance for loan losses at a level considered adequate relative to the level of credit risk in the loan and lease portfolio. Information about provisions for loan losses is included in the "Provision for Loan Losses" section of this Management's Discussion and Analysis.

We purchase securities under agreements to resell, referred to as repurchase agreements. Most repurchase agreements are short-term, with maturities of less than 90 days. Risk is managed through a variety of processes, including establishing the acceptability of counterparties; limiting purchases largely to low-risk U.S. government securities; taking possession or control of pledged assets; monitoring levels of underlying collateral; and limiting the duration of the agreements. Securities are revalued daily to determine if we believe that additional collateral is necessary from the borrower.

We also provide clients with off-balance sheet liquidity and credit enhancement facilities in the form of letters and lines of credit and standby bond purchase agreements. These exposures are subject to an initial credit analysis, with detailed approval and review processes. These facilities are also actively monitored and reviewed annually. We maintain a separate reserve for probable credit losses related to certain of these off-balance sheet activities, which is recorded in accrued expenses and other liabilities in our consolidated statement of condition. Management reviews the adequacy of this reserve on a regular basis.

On behalf of our clients, we lend their securities to creditworthy banks, broker/dealers and other institutions. In most circumstances, we indemnify our clients for the fair market value of those securities against a failure of the borrower to return such securities. Though these transactions are collateralized, the substantial volume of these activities necessitates detailed credit-based underwriting and monitoring processes. The aggregate amount of indemnified securities on loan totaled \$350.22 billion at September 30, 2010, and \$365.25 billion at December 31, 2009. We require the borrowers to provide collateral in an amount equal to or in excess of 100% of the fair market value of the securities borrowed. State Street holds the collateral received in connection with its securities lending services as agent, and these holdings are not recorded in our consolidated statement of condition. The securities on loan and the collateral are revalued daily to determine if additional collateral is necessary. We held, as agent, cash and securities totaling \$360.89 billion and \$375.92 billion as collateral for indemnified securities on loan at September 30, 2010 and December 31, 2009, respectively.

The collateral held by us is invested on behalf of our clients. In certain cases, the collateral is invested in third-party repurchase agreements, for which we indemnify the client against loss of the principal invested. We require the repurchase agreement counterparty to provide collateral in an amount equal to or in excess of 100% of the amount of the repurchase agreement. The indemnified repurchase agreements and the related collateral are not recorded in our consolidated statement of condition. Of the collateral of \$360.89 billion at September 30, 2010 and \$375.92 billion at December 31, 2009 referenced above, \$90.94 billion at September 30, 2010 and \$77.73 billion at December 31, 2009 was invested in indemnified repurchase agreements. We held, as agent, \$95.20 billion and \$82.62 billion as collateral for indemnified investments in repurchase agreements at September 30, 2010 and December 31, 2009, respectively.

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS (Continued)**

Investments in debt and equity securities, including investments in affiliates, are monitored regularly by Corporate Finance, Global Treasury and ERM. Procedures are in place for assessing impairment of investment securities, as discussed in note 3 to the consolidated financial statements included in this Form 10-Q.

**OFF-BALANCE SHEET ARRANGEMENTS**

Information about off-balance sheet arrangements is provided in notes 7, 8 and 11 to the consolidated financial statements included in this Form 10-Q.

**NEW ACCOUNTING PRONOUNCEMENTS**

Information with respect to new accounting pronouncements is provided in note 1 to the consolidated financial statements included in this Form 10-Q.

**QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

The information with respect to quantitative and qualitative disclosures about market risk is set forth in the Market Risk section of Management's Discussion and Analysis of Financial Condition and Results of Operations included in this Form 10-Q.

**CONTROLS AND PROCEDURES**

State Street has established and maintains disclosure controls and procedures that are designed to ensure that material information relating to State Street and its subsidiaries on a consolidated basis required to be disclosed in its reports filed or submitted under the Securities Exchange Act of 1934 is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to State Street management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. For the quarter ended September 30, 2010, State Street's management carried out an evaluation, with the participation of the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of State Street's disclosure controls and procedures. Based on the evaluation of these disclosure controls and procedures, the Chief Executive Officer and Chief Financial Officer concluded that State Street's disclosure controls and procedures were effective as of September 30, 2010.

State Street has also established and maintains internal control over financial reporting as a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes in accordance with GAAP. In the ordinary course of business, State Street routinely enhances its internal control over financial reporting by either upgrading its current systems or implementing new systems. Enhancements have been made and will be made to State Street's internal control over financial reporting as a result of these efforts. During the quarter ended September 30, 2010, no change occurred in State Street's internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, State Street's internal control over financial reporting.

**STATE STREET CORPORATION**

**CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**(UNAUDITED)**

**Note 1. Summary of Significant Accounting Policies**

The accounting and financial reporting policies of State Street Corporation conform to accounting principles generally accepted in the United States of America, referred to as GAAP. State Street Corporation, the parent company, is a financial holding company headquartered in Boston, Massachusetts. Unless otherwise indicated or unless the context requires otherwise, all references in these notes to consolidated financial statements to State Street, we, us, our or similar references mean State Street Corporation and its subsidiaries on a consolidated basis. Our principal banking subsidiary, State Street Bank and Trust Company, is referred to as State Street Bank. We have two lines of business:

Investment Servicing provides services for U.S. mutual funds, collective investment funds and other investment pools, corporate and public retirement plans, insurance companies, foundations and endowments worldwide. Products include custody, product- and participant-level accounting; daily pricing and administration; master trust and master custody; recordkeeping; foreign exchange, brokerage and other trading services; securities finance; deposit and short-term investment facilities; loans and lease financing; investment manager and alternative investment manager operations outsourcing; and performance, risk and compliance analytics to support institutional investors.

Investment Management offers a broad array of services for managing financial assets, including investment management and investment research services, primarily for institutional investors worldwide. These services include passive and active U.S. and non-U.S. equity and fixed-income strategies, and other related services, such as securities finance.

The consolidated financial statements accompanying these condensed notes are unaudited. In the opinion of management, all adjustments, consisting only of normal recurring adjustments, which are necessary for a fair statement of the consolidated results of operations in these financial statements, have been made. Certain previously reported amounts have been reclassified to conform to current period classifications as presented in this Form 10-Q. Events occurring subsequent to the date of our consolidated statement of condition were evaluated for potential recognition or disclosure in our consolidated financial statements through the date we filed this Form 10-Q with the SEC.

The preparation of consolidated financial statements requires management to make estimates and assumptions that affect the amounts reported in the accompanying consolidated financial statements and these condensed notes. Actual results could differ from those estimates. Consolidated results of operations for the three and nine months ended September 30, 2010 are not necessarily indicative of the results that may be expected for any future period or for the year ending December 31, 2010.

The consolidated statement of condition at December 31, 2009 has been derived from the audited financial statements at that date, but does not include all footnotes required by GAAP for a complete set of financial statements. The accompanying consolidated financial statements and these condensed notes should be read in conjunction with the financial and risk factors information included in our 2009 Form 10-K, which we previously filed with the SEC.

***New Accounting Pronouncements***

The FASB is currently deliberating potentially significant changes to the U.S. accounting framework as part of an overall convergence effort with the International Accounting Standards Board under a previously signed memorandum of understanding. Some of these proposed changes have been exposed for comment, while others

**Table of Contents**

**STATE STREET CORPORATION**

**CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

**(UNAUDITED)**

**Note 1. Summary of Significant Accounting Policies (Continued)**

are expected to be exposed for comment over the next twelve to eighteen months. These new proposals include potential changes to the accounting for financial instruments and hedging, the accounting for leases, revenue recognition and financial statement presentation. We will disclose the nature of the proposed changes and their potential effect, if any, on our consolidated financial statements in our future filings, as the proposals are issued and we evaluate them. These proposed changes, once finalized, may have a material effect on our consolidated financial statements.

In July 2010, the FASB issued an amendment to GAAP that will require new qualitative and quantitative disclosures about the credit quality of financing receivables and the allowance for loan losses. The amendment will require disclosures with respect to impaired loans, loan modifications and non-accrual and past-due receivables, as well as a roll-forward of the allowance for loan losses. The disclosures will be required to be disaggregated by class of financing receivable or portfolio segment, as defined in the amendment. The new GAAP will be effective, for State Street, as of December 31, 2010, except for the roll-forward of the allowance for loan losses, which will be required beginning on January 1, 2011.

In February 2010, the FASB issued an amendment to GAAP related to fair value measurement disclosures. The amendment requires new disclosures for significant transfers of financial assets and liabilities into and out of level 1 and level 2 of the prescribed valuation hierarchy, and requires the disaggregation of information about purchases, sales, issuances and settlements for financial assets and liabilities categorized in level 3 of the valuation hierarchy. The amendment also provides several clarifications with respect to disclosures about valuation techniques and inputs. The requirement to disclose disaggregated information about purchases, sales, issuances and settlements for financial assets and liabilities categorized in level 3 of the valuation hierarchy was deferred, with respect to State Street, to January 1, 2011. The disclosures currently required by the amendment are provided in note 10.

**Note 2. Acquisitions**

On May 17, 2010, we completed our acquisition of Intesa Sanpaolo's securities services business in a cash acquisition financed through available capital. We acquired the Intesa business to enhance our position as a worldwide service provider to institutional investors by expanding our business in Europe, particularly in Italy. The acquisition includes the global custody, depository banking, correspondent banking and fund administration portions of Intesa's business, with operations in Italy and Luxembourg. It also includes a long-term investment servicing agreement with Intesa for State Street to service Intesa's investment management affiliates. The acquired Intesa business added approximately \$564 billion of assets under custody and administration as of June 30, 2010, which assets are not recorded in our consolidated financial statements. Results of operations of the acquired Intesa business are included in our consolidated financial statements beginning on May 17, 2010.

We accounted for the Intesa transaction using the acquisition method of accounting, and the assets acquired, liabilities assumed and consideration paid were recorded in our consolidated balance sheet at their estimated fair values on the acquisition date. Our allocation of the purchase price was preliminary as of September 30, 2010, and is subject to future adjustment over the measurement period as information needed to measure the fair values of certain assets and liabilities is obtained.

**Table of Contents****STATE STREET CORPORATION****CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(UNAUDITED)****Note 2. Acquisitions (Continued)****(In millions)**

Total fair value of consideration	\$ 2,179
Allocation of purchase price (preliminary):	
Book value of tangible net assets acquired	841
Adjustments to reflect assets acquired and liabilities assumed at fair value:	
Write-off of certain assets and liabilities, net	(379)
Contingent asset	79
Customer relationship intangibles	696
Core deposit intangible	369
Other intangible	15
Deferred tax liability, net	(360)
Estimated fair value of net assets acquired	1,261
Goodwill resulting from acquisition	\$ 918

The goodwill, substantially all of which is not expected to be tax deductible, represents the expected long-term value of cost savings, growth opportunities and business efficiencies created by the integration of the acquired Intesa business.

In connection with the acquisition, we may be entitled to a purchase price adjustment allowing for a return of a portion of the purchase price should we lose the business of certain key clients during a defined period subsequent to the closing of the transaction. This contingent asset, which is presented in the preceding table, will be re-measured to fair value at each subsequent reporting date through the end of the defined purchase price adjustment period, with any changes in its fair value recorded in our consolidated statement of income.

On April 1, 2010, we completed our acquisition of Maurant International Finance Administration, or Maurant, in a cash transaction financed through available capital. We acquired Maurant to enhance our position as an administrator of alternative investments and to expand our presence outside of the U.S. In connection with our acquisition of Maurant, a provider of fund administration services, particularly for alternative investment funds such as private equity, real estate and hedge funds with operations in Jersey in the Channel Islands, Dublin, Singapore and New York, we recorded \$73 million of goodwill and \$59 million of other intangible assets in our consolidated balance sheet, and added approximately \$122 billion of assets under administration as of June 30, 2010. The assets under administration are not recorded in our consolidated financial statements. Our allocation of the purchase price was preliminary as of September 30, 2010, and is subject to future adjustment over the measurement period as information needed to measure the fair values of certain assets and liabilities is obtained.

During the second and third quarters of 2010, in connection with the two acquisitions, we recorded aggregate merger and integration costs in our consolidated statement of income. These costs consisted only of direct and incremental costs to integrate the acquired businesses into our operations. These costs do not include ongoing expenses of the combined organization.

Impairment associated with management's intent to sell the impaired securities prior to their recovery in value	(1)	(23)	(1)	(53)
Impairment associated with adverse changes in timing of expected future cash flows	(2)	(13)	(22)	(13)
Net impairment losses	\$ (74)	\$ (99)	\$ (224)	\$ (176)

<sup>(1)</sup> Pursuant to new accounting standards adopted on April 1, 2009, these losses were recorded, net of related taxes, as a component of other comprehensive income; see note 9.

Gross realized gains from sales of available-for-sale securities for the nine months ended September 30, 2010 included \$110 million of gains from sales of former conduit securities, all of which occurred in the first three months of 2010. For both the three and nine months ended September 30, 2009, gross realized gains included \$78 million, and gross realized losses included \$24 million, from sales of former conduit securities. Net impairment losses for the three and nine months ended September 30, 2010 included \$3 million and \$29 million, respectively, and for both the three and nine months ended September 30, 2009 included \$18 million, related to former conduit securities.

The substantial majority of the impairment losses was related to non-agency securities collateralized by mortgages, which management concluded had experienced credit losses based on the present value of the securities' expected future cash flows. These securities are classified as asset-backed securities in the preceding investment securities tables.

## Edgar Filing: STATE STREET Corp - Form 10-Q

We conduct periodic reviews of individual securities to assess whether other-than-temporary impairment exists. Impairment exists when the current fair value of an individual security is below its amortized cost basis. For debt securities available for sale and held to maturity, other-than-temporary impairment is recorded in our consolidated statement of income when management intends to sell (or may be required to sell) the securities before they recover in value, or when management expects the present value of cash flows expected to be collected from the securities to be less than the amortized cost of the impaired security (a credit loss).

**Table of Contents**

**STATE STREET CORPORATION**

**CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

**(UNAUDITED)**

**Note 3. Investment Securities (Continued)**

Our review of impaired securities generally includes:

the identification and evaluation of securities that have indications of possible other-than-temporary impairment, such as issuer-specific concerns including deteriorating financial condition or bankruptcy;

the analysis of expected future cash flows of securities, based on quantitative and qualitative factors;

the analysis of the collectability of those future cash flows, including information about past events, current conditions and reasonable and supportable forecasts;

the analysis of individual impaired securities, including consideration of the length of time the security has been in an unrealized loss position, the anticipated recovery period, and the magnitude of the overall price decline;

discussion and evaluation of factors or triggers that could cause individual securities to be deemed other-than-temporarily impaired and those that would not support other-than-temporary impairment; and

documentation of the results of these analyses.

Factors considered in determining whether impairment is other than temporary include:

the length of time the security has been impaired;

the severity of the impairment;

the cause of the impairment and the financial condition and near-term prospects of the issuer;

activity in the market of the issuer which may indicate adverse credit conditions; and

our intention not to sell, and the likelihood that we will not be required to sell, the security for a period of time sufficient to allow for recovery in value.

The majority of our investment securities portfolio is composed of debt securities. Debt securities that are not deemed to be credit-impaired are subject to additional management analysis to assess whether management intends to sell, or, more likely than not, would not be required to sell, the security before the expected recovery to its amortized cost basis. In most cases, management has no intent to sell and believes that it is more likely than not that it will not be required to sell the security before recovery to its amortized cost basis. Where the decline in the security's fair value is deemed to be other than temporary, the loss is recorded in our consolidated statement of income.

A critical component of the evaluation for other-than-temporary impairment of our debt securities is the identification of credit-impaired securities for which management does not expect to receive cash flows sufficient to recover the entire amortized cost basis of the security. The following describes our process for identifying credit impairment in security types with the most significant unrealized losses as of September 30, 2010.

#### *Mortgage- and Asset-Backed Securities*

For recent vintages of U.S. mortgage-backed securities (in particular, sub-prime first-lien mortgages, Alt-A mortgages and home equity lines of credit (2006 and 2007 originations) that have significant unrealized losses as a percentage of their amortized cost), credit impairment is assessed using cash flow models, tailored for

**Table of Contents****STATE STREET CORPORATION****CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(UNAUDITED)****Note 3. Investment Securities (Continued)**

each security, that estimate the future cash flows on the underlying mortgages, using the security-specific collateral and transaction structure. Estimates of future cash flows are subject to management's judgment. The future cash flows and performance of our portfolio of U.S. mortgage-backed securities are a function of a number of factors, including, but not limited to, the condition of the U.S. economy, the condition of the U.S. residential mortgage markets, and the level of loan defaults, prepayments and loss severities. Management's estimates of future losses also consider the underwriting and historical performance of our specific securities.

Loss rates are determined for each security and take into consideration collateral type, vintage, borrower profile, third-party guarantees, current levels of subordination, geography and other factors. By using these factors, management develops a roll-rate analysis to gauge future expected credit losses based on current delinquencies and expected future loss trends. Based on management's analysis, we believe that the most significant exposure to credit losses resides in our 2006 and 2007 U.S. residential mortgage-backed securities portfolio. Critical assumptions with respect to the aforementioned 2006 and 2007 originations include:

	Sub-Prime	Alt-A	Non-Agency Prime
<b>September 30, 2010:</b>			
Prepayment rate	2-3%	7%	7-10%
Cumulative loss estimates	39	30	16
Loss severity <sup>(1)</sup>	68	57	47
Peak-to-trough housing price decline <sup>(2)</sup>	33-38	33-38	33-38
	Sub-Prime	Alt-A	Non-Agency Prime
<b>December 31, 2009:</b>			
Prepayment rate	5%	5%	10%
Cumulative loss estimates	41	14	8
Loss severity <sup>(1)</sup>	70	41	40
Peak-to-trough housing price decline <sup>(2)</sup>	37	37	37

<sup>(1)</sup> Loss severity rates consider the initial loan-to-value ratio, lien position, geography, expected collateral value and other factors.

<sup>(2)</sup> Management's expectation of the Case-Shiller National Home Price Index.

For securities that relate to these vintages, other-than-temporary impairment has been recorded on certain assets when both fair value was below carrying value and a credit loss existed. During the three and nine months ended September 30, 2010, we recorded credit-related other-than-temporary impairment on securities in these vintages of \$59 million and \$158 million, respectively, with \$6 million and \$26 million, respectively, related to sub-prime first-lien mortgages, \$19 million and \$43 million, respectively, related to Alt-A mortgages, and \$34 million and \$89 million, respectively, related to non-agency prime mortgages. During the three months ended September 30, 2009 and the period from April 1, 2009 through September 30, 2009, we recorded credit-related other-than-temporary impairment on securities in these vintages of \$64 million and \$91 million, respectively, with \$19 million related to sub-prime first-lien mortgages for both the three-month and year-to-date periods, \$10 million and \$16 million, respectively, related to Alt-A mortgages and \$35 million and \$56 million, respectively, related to non-agency prime mortgages.

**Table of Contents****STATE STREET CORPORATION****CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(UNAUDITED)****Note 3. Investment Securities (Continued)**

The assumptions presented above are used by management to identify those securities which are subject to further analysis of potential credit losses. Since the assumptions are based on the unique characteristics of each security, management uses a range of point estimates for prepayment speeds and housing prices which reflect the collateral profile of the securities within each asset class. In addition, in measuring expected credit losses, the individual characteristics of each security are examined to determine whether there are any additional factors that would increase or mitigate the expected loss. Once losses are determined, the timing of the loss will also affect the ultimate other-than-temporary impairment, since the loss is ultimately subject to a discount commensurate with the purchase yield of the security. Primarily as a result of rising delinquencies and management's continued expectation of declining housing prices, and in consideration of the aforementioned factors, we recorded an aggregate of \$74 million and \$224 million of other-than-temporary impairment during the three and nine months ended September 30, 2010, respectively.

*Unsecured Obligations*

Unsecured obligations generally consist of corporate bonds. Credit analysis is largely dependent on third-party credit ratings and, to the extent possible, a detailed analysis of the borrower's financial condition. Individual bond positions must meet minimum rating requirements, which vary based on the sector of the bond issuer. Fundamental inputs to the impairment assessment include downgrades in ratings and/or management's assessment of the financial condition of the borrower. These and other factors are used in determining if an expected shortfall in contractual cash flows is expected.

\* \* \*

After a review of the investment portfolio, taking into consideration current economic conditions, adverse situations that might affect our ability to fully collect interest and principal, the timing of future payments, the credit quality and performance of the collateral underlying asset-backed securities and other relevant factors, and excluding the securities for which other-than-temporary impairment was recorded during the nine months ended September 30, 2010, management considers the aggregate decline in fair value of the remaining securities and the resulting gross pre-tax unrealized losses of \$2.84 billion related to 1,669 securities at September 30, 2010 to be temporary and not the result of any material changes in the credit characteristics of the securities.

The following table presents activity with respect to credit-related losses recognized in our consolidated statement of income associated with securities considered other-than-temporarily impaired:

(In millions)

Balance at December 31, 2009	\$ 175
Plus expected credit-related losses for which other-than-temporary impairment was not previously recognized	87
Plus expected credit-related losses for which other-than-temporary impairment was previously recognized	137
Less losses realized for securities sold	(9)
Less losses realized for securities intended or required to be sold	(1)
Balance at September 30, 2010	\$ 389

**Table of Contents****STATE STREET CORPORATION****CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(UNAUDITED)****Note 3. Investment Securities (Continued)*****Conduit Consolidation***

The May 2009 consolidation of the asset-backed commercial paper conduits added debt securities to our investment securities portfolio, which we account for under specialized accounting standards based on specific characteristics of the securities.

***Securities with Evidence of Credit Deterioration***

In May 2009, in connection with the conduit consolidation, we added \$343 million of securities which had evidence of deterioration in credit quality since their issuance, and management considered it probable, as of the date of consolidation, that we would be unable to collect all contractually required payments from the securities. As a result, these securities are accounted for pursuant to the provisions of ASC Topic 310-30, *Loans and Debt Securities Acquired with Deteriorated Credit Quality* (formerly AICPA Statement of Position No. 03-3, *Accounting for Certain Loans or Debt Securities Acquired in a Transfer*). Pursuant to the provisions of ASC Topic 310-30, the excess of management's estimate of undiscounted future principal, interest and other contractual cash flows from these securities over their initial recorded investment is accreted into interest revenue on a level-yield basis over the securities' estimated remaining terms. On a quarterly basis, management updates its expected cash flow assumptions. Subsequent decreases in these securities' expected future cash flows are either recognized prospectively through an adjustment of the yields on the securities over their remaining terms, or are evaluated for other-than-temporary impairment.

During the three months ended September 30, 2010, no gross losses from other-than-temporary impairment on these securities were recorded. For the nine months ended September 30, 2010, \$1 million of gross losses from other-than-temporary impairment on these securities was recorded, all of which related to credit and which was recorded in our consolidated statement of income. Increases in expected future cash flows will be recognized prospectively over the securities' estimated remaining terms through a recalculation of their yields.

The excess of the securities' expected future cash flows as of the date of the acquisition over their then-recorded fair value is referred to as the accretable yield, and is recognized in interest revenue over the securities' estimated remaining terms. The difference as of the date of the acquisition between contractually required payments and the cash flows expected to be collected is referred to as the non-accretable difference. Changes in expected future principal cash flows subsequent to the date of acquisition will either affect the accretable yield or will result in a loss from other-than-temporary impairment. Changes in expected future cash flows will result in reclassifications to/from the non-accretable difference.

The following table presents activity for the nine months ended September 30, 2010 in the accretable yield related to the acquired debt securities.

**(In millions)**

Accretable yield, December 31, 2009	\$ 279
Accretion	(35)
Other adjustments	12

Accretable yield, September 30, 2010	\$ 256
--------------------------------------	--------

**Table of Contents****STATE STREET CORPORATION****CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(UNAUDITED)****Note 3. Investment Securities (Continued)***Beneficial Interests in a Securitization*

In May 2009, in connection with the conduit consolidation, we added \$4.34 billion of securities which were considered to be beneficial interests in a securitization that were not of high credit quality. As a result, these securities are accounted for pursuant to the provisions of ASC Topic 325-40, *Beneficial Interests in Securitized Financial Assets* (formerly FASB Emerging Issues Task Force Issue No. 99-20, *Recognition of Interest Income and Impairment on Purchased Beneficial Interests and Beneficial Interests That Continue to Be Held by a Transferor in Securitized Financial Assets*). Pursuant to the provisions of ASC Topic 325-40, the excess of management's estimate of undiscounted future principal, interest and other contractual cash flows from these securities over their initial recorded investment is accreted into interest revenue on a level-yield basis over the securities' estimated remaining terms. Subsequent decreases in these securities' expected future cash flows are either recognized prospectively through an adjustment of the yields on the securities over their remaining terms, or are evaluated for other-than-temporary impairment.

During the three and nine months ended September 30, 2010, we recorded gross losses from other-than-temporary impairment on these securities of \$17 million and \$51 million, respectively, with \$2 million and \$22 million, respectively, related to credit. Increases in expected future cash flows are recognized prospectively over the securities' estimated remaining terms through a recalculation of their yields.

Less allowance for loan losses	<b>(101)</b>	(79)
Net loans	<b>\$ 13,665</b>	\$ 10,729

Institutional and corporate balances primarily represented short-term extensions of credit pursuant to lending facilities with fund clients, as well as insurance, corporate and other borrowers. Securities settlement

**Table of Contents****STATE STREET CORPORATION****CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(UNAUDITED)****Note 4. Loans and Lease Financing (Continued)**

balances were composed of short-duration advances to our clients to provide liquidity in support of their transaction flows associated with securities settlement activities. The purchased receivables were structured asset-backed loans added in connection with the May 2009 conduit consolidation, and represent undivided interests in securitized pools of underlying third-party receivables.

The commercial real estate loans were acquired in 2008 pursuant to indemnified repurchase agreements with an affiliate of Lehman. These loans, which are primarily collateralized by direct and indirect interests in commercial real estate, were recorded at their then-current fair value, based on management's expectations with respect to future cash flows from the loans using appropriate market discount rates as of the date of acquisition. These cash flow estimates are updated quarterly to reflect changes in management's expectations, which consider market conditions and other factors. During the three months ended June 30, 2010, as a result of a settlement related to the Lehman-related indemnified repurchase agreements, we acquired an additional commercial real estate loan and recorded it at its then-current fair value of \$16 million. This loan, prior to acquisition, had been performing in accordance with its contractual terms and had no evidence of credit deterioration as of the acquisition date.

At September 30, 2010, approximately \$146 million of the commercial real estate loans had been placed by management on non-accrual status. This was based on management's expectations with respect to future cash flows from the loans.

The following table presents activity in the allowance for loan losses for the periods indicated:

(In millions)	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
Beginning balance	\$ 102	\$ 108	\$ 79	\$ 18
Provision for loan losses:				
Commercial real estate loans	3		23	98
Other	(2)	16	3	16
Charge-offs:				
Commercial real estate loans	(1)	(61)	(4)	(69)
Other		(10)		(10)
Other	(1)			
Total	\$ 101	\$ 53	\$ 101	\$ 53

The majority of the provision for loan losses recorded in 2010 was related to commercial real estate loans, primarily the result of a revaluation of the collateral supporting certain of the commercial real estate loans acquired in 2008. The charge-offs recorded in 2010 related to the above-described commercial real estate loans, as management considered certain of these loans no longer collectible.

The commercial real estate loans are reviewed on a quarterly basis, and any provisions for loan losses that are recorded reflect management's current expectations with respect to future cash flows from these loans, based on an assessment of economic conditions in the commercial real estate market and other factors.

**Table of Contents****STATE STREET CORPORATION****CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(UNAUDITED)****Note 5. Goodwill and Other Intangible Assets**

Total	\$	14,499	\$	12,023
-------	----	--------	----	--------

**Note 7. Commitments and Contingencies**

***Off-Balance Sheet Commitments and Contingencies***

In the normal course of our business, we hold assets under custody and management in a custodial or fiduciary capacity. Management conducts regular reviews of its responsibilities in this regard and considers the results in preparing the consolidated financial statements. In the opinion of management, no contingent liabilities existed at September 30, 2010, that would have had a material adverse effect on State Street's consolidated results of operations or financial condition.

**Table of Contents****STATE STREET CORPORATION****CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(UNAUDITED)****Note 7. Commitments and Contingencies (Continued)**

On behalf of our clients, we lend their securities to brokers and other institutions. In most circumstances, we indemnify our clients for the fair market value of those securities against a failure of the borrower to return such securities. We require the borrowers to provide collateral in an amount equal to or in excess of 100% of the fair market value of the securities borrowed. Securities on loan are revalued daily to determine if additional collateral is necessary. Collateral received in connection with our securities lending services is held by us as agent and is not recorded in our consolidated statement of condition. The collateral held by us as agent is invested on behalf of our clients. In certain cases, the collateral is invested in third-party repurchase agreements, for which we indemnify the client against loss of the principal invested. We require the counterparty to the repurchase agreement to provide collateral in an amount equal to or in excess of 100% of the amount of the repurchase agreement. In our role as agent, the indemnified repurchase agreements and the related collateral are not recorded in our consolidated statement of condition.

(In billions)	September 30, 2010	December 31, 2009
Aggregate fair value of indemnified securities on loan	\$ 350.22	\$ 365.25
Aggregate fair value of cash and securities held as collateral for indemnified securities	360.89	375.92
Collateral for indemnified securities invested in indemnified repurchase agreements	90.94	77.73
Aggregate fair value of cash and securities held as collateral for indemnified repurchase agreements	95.20	82.62
<b>Legal Proceedings</b>		

In the ordinary course of business, we and our subsidiaries are involved in disputes, litigation and regulatory inquiries and investigations, both pending and threatened. These matters, if resolved adversely against us, may result in monetary damages, fines and penalties or require changes in our business practices. The resolution of these proceedings is inherently difficult to predict. However, we do not believe that the amount of any judgment, settlement or other action arising from any pending proceeding will have a material adverse effect on our consolidated financial condition, although the outcome of certain of the matters described below may have a material adverse effect on our consolidated results of operations for the period in which such matter is resolved or a reserve is determined to be required. We may be subject to proceedings in the future that, if adversely resolved, would have a material adverse effect on our businesses or on our future consolidated results of operations or financial condition. Except where otherwise noted below, we have not recorded a reserve with respect to the claims discussed, and do not believe that potential exposure, if any, as to any matter discussed can be reasonably estimated.

As previously reported, the SEC has requested information regarding two registered mutual funds managed by State Street Global Advisors, or SSgA, that invested in sub-prime securities. As of June 30, 2007, these funds had net assets of less than \$300 million, and the net asset value per share of the funds experienced an average decline of approximately 7.23% during the third quarter of 2007. Average returns for industry peer funds were positive during the same period. These funds were not covered by our regulatory settlement with the SEC, the Massachusetts Attorney General and the Massachusetts Securities Division of the Office of the Secretary of State announced in February 2010, which concerned certain unregistered SSgA-managed funds that pursued active

**Table of Contents**

**(UNAUDITED)**

**Note 7. Commitments and Contingencies (Continued)**

fixed-income strategies. Four lawsuits by individual investors in those active fixed-income strategies remain pending. The U.S. Attorney's office in Boston has also requested information in connection with our active-fixed income strategies.

State Street is currently defending two putative ERISA class actions by investors in unregistered SSgA-managed funds which participated in the securities lending program. One complaint alleges that we failed to exercise prudence in our management of the collateral pools in which the SSgA lending funds had invested cash collateral from securities lending activities, and that investors were injured as a result of the redemption restrictions imposed by us in October 2008 (and which we removed in August 2010). In June 2010, in order to permit SSgA to remove the redemption restrictions on its funds that engage in securities lending and mitigate potential liability concerns, we made an aggregate one-time cash contribution to certain collateral pools and liquidity trusts of \$330 million. This contribution eliminated the difference between the market value of the portfolio holdings of the collateral pools and liquidity trusts and the amortized cost of such holdings. The second complaint challenges the division of securities lending-related revenue between the SSgA lending funds and State Street in its role as lending agent.

As previously reported, two participants in our agency securities lending program have brought suit against us challenging actions taken by us in response to their withdrawal from the program. We believe that certain withdrawals by these participants were inconsistent with the redemption policy applicable to the agency lending collateral pools and, consequently, redeemed their remaining interest through an in-kind distribution that reflected the assets these participants would have received had they acted in accordance with the collateral pools' redemption policy. The excess of the aggregate par of the assets received by the two participants in such redemption over the aggregate market value of such assets as of September 30, 2010 was \$49 million. In taking these actions, we believe that we acted in the best interests of all participants in the collateral pools. We have not established a reserve with respect to this litigation.

We instituted redemption restrictions with respect to our agency lending collateral pools in the fall of 2008 during the disruption in the financial markets. As previously reported, we established a \$75 million reserve on June 30, 2010 to address potential inconsistencies in connection with our implementation of those redemption restrictions. The reserve, which still existed as of September 30, 2010, reflects our assessment of the amount required to compensate clients for the dilutive effect of redemptions which may not have been consistent with the intent of the policy. For a discussion of the aggregate net assets and net asset values per unit at September 30, 2010 of the agency lending collateral pools, see Management's Discussion and Analysis of Financial Condition and Results of Operations Consolidated Results of Operations Fee Revenue Securities Finance in this Form 10-Q.

We continue to cooperate with the SEC in its investigation with respect to the SSgA lending funds and the agency lending program. Neither the civil proceedings described above nor the SEC investigation have been terminated as a result of the one-time cash contribution to the cash collateral pools underlying the SSgA lending funds or the establishment of the \$75 million reserve, and there can be no assurance as to the outcome of those matters.

As previously reported, the Attorney General of the State of California has commenced an action under the California False Claims Act and California Business and Professional Code related to services State Street

**Table of Contents**

**STATE STREET CORPORATION**

**CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

**(UNAUDITED)**

**Note 7. Commitments and Contingencies (Continued)**

provides to California state pension plans. The California Attorney General asserts that the pricing of certain foreign exchange transactions for these pension plans was not consistent with the terms of the applicable custody contracts and related disclosures to the plans, and that, as a result, State Street made false claims and engaged in unfair competition. The Attorney General asserts actual damages of \$56 million for periods from 2001 to 2007 and seeks additional penalties. We provide custody and foreign exchange services to government pension plans in other jurisdictions, and attorneys general from a number of these other jurisdictions, as well as the U.S. Attorney General's office, have requested information in connection with inquiries into our foreign exchange pricing. In October 2010, we entered into a \$12 million settlement with the State of Washington. This settlement resolves a contract dispute related to the manner in which we priced some foreign exchange transactions during our ten-year relationship with the State of Washington that ended in 2007. Our contractual obligations to the State of Washington were significantly different from those presented in our ongoing litigation in California.

Three shareholder-related class action complaints are currently pending in federal court in Boston. One complaint purports to be brought on behalf of State Street shareholders. The two other complaints purport to be brought on behalf of participants and beneficiaries in the State Street Salary Savings Program who invested in the plan's State Street stock investment option. The complaints variously allege violations of the federal securities laws and ERISA in connection with our foreign exchange trading business, our investment securities portfolio and our asset-backed commercial paper conduit program. In addition, two State Street shareholders have filed a shareholder derivative complaint in Massachusetts state court alleging fiduciary breaches by present and former directors and officers of State Street in connection with the SSgA active fixed-income funds that were the subject of the February 2010 settlement with the SEC referred to above. We have moved to dismiss the complaint based on the Board of Directors' consideration and rejection of the shareholders' original demand letter.

As previously reported, we managed, through SSgA, four common trust funds for which, in our capacity as manager and trustee, we appointed various Lehman entities as prime broker. As of September 15, 2008 (the date two of the Lehman entities involved entered insolvency proceedings), these funds had cash and securities held by Lehman with net asset values of approximately \$312 million. Some customers who invested in the funds managed by us brought litigation against us seeking compensation and additional damages, including double or treble damages, for their alleged losses in connection with our prime brokerage arrangements with Lehman's entities. A total of seven customers were invested in such funds, of which four currently have suits pending against us. Three cases are pending in federal court in Boston and the fourth is pending in Nova Scotia. We have entered into settlements with two customers, one of which was entered into after the customer obtained a \$42 million judgment from a Dutch court. As of September 15, 2008, the five customers with whom we have not entered into settlement agreements had approximately \$180 million invested in the funds at issue.

***Tax Contingencies***

In the normal course of our business, we are subject to challenges from U.S. and non-U.S. income tax authorities regarding the amount of taxes due. These challenges may result in adjustments to the timing or amount of taxable income or deductions or the allocation of taxable income among tax jurisdictions.

The IRS has completed its review of our 2000-2003 income tax returns. During those years, we entered into leveraged leases known as sale-in, lease-out, or SILO, transactions, which the IRS has since classified as tax shelters. The IRS has disallowed tax losses resulting from these leases. During 2008, while we were engaged in

---

**Table of Contents**

**STATE STREET CORPORATION**

**CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

**(UNAUDITED)**

**Note 7. Commitments and Contingencies (Continued)**

settlement discussions with the IRS, the IRS won a court victory in a SILO case involving other taxpayers. Shortly after that decision, the IRS suspended all SILO settlement discussions and issued a standard SILO settlement offer to most taxpayers that had entered into such transactions. After reviewing the settlement offer, we decided not to accept it but to continue to pursue our appeal rights within the IRS. We believe that we reported the tax effects of all SILO lease transactions properly based upon applicable statutes, regulations and case law in effect at the time we entered into them.

We originally recorded net interest revenue and deferred tax liabilities with respect to our SILO transactions based on projected cash flows. In consideration of the terms of the settlement offer and the context in which it was issued, we revised our projections of the timing and amount of cash flows and reflected those revisions in our leveraged lease accounting. We also substantially reserved for tax-related interest expense that we may incur upon resolution of this matter.

While it is unclear whether we will be able to reach an acceptable resolution with the IRS, management believes we are sufficiently accrued as of September 30, 2010 for tax exposures, including exposures related to SILO transactions, and related interest expense. If management revises its evaluation of this tax position in a future period, the effect of the revision will be recorded in income tax expense in that period.

***Other Contingencies***

In the normal course of our business, we offer products that provide book-value protection primarily to plan participants in stable value funds managed by non-affiliated investment managers of postretirement defined contribution benefit plans, particularly 401(k) plans. The book-value protection is provided on portfolios of intermediate, investment grade fixed-income securities, and is intended to provide safety and stable growth of principal invested. The protection is intended to cover any shortfall in the event that a significant number of plan participants withdraw funds when book value exceeds market value and the liquidation of the assets is not sufficient to redeem the participants. To manage our exposure associated with this contingency, we impose significant restrictions and constraints on the timing and cause of the withdrawals, the manner in which the portfolio is liquidated and the manner in which the funds are accessed, and the investment parameters of the underlying portfolio. These constraints, combined with structural protections, are designed to provide adequate cushion and guard against payments even under extreme stress scenarios.

As of September 30, 2010 and December 31, 2009, the aggregate notional amount of these contingencies, which are individually accounted for as derivative financial instruments, totaled \$49.43 billion and \$52.95 billion, respectively. The notional amounts of these contingencies are presented as trading derivatives, specifically written options, in the table of aggregate notional amounts of derivative financial instruments provided in note 11. As of September 30, 2010, we have not made a payment under these contingencies. Management believes that the probability of material payment under these contingencies is remote.

**Note 8. Variable Interest Entities**

We are involved with various types of variable interest entities, or VIEs, as defined by GAAP, some of which are recorded in our consolidated financial statements and all of which are described below. We also invest

**Table of Contents**

**STATE STREET CORPORATION**

**CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

**(UNAUDITED)**

**Note 8. Variable Interest Entities (Continued)**

in various forms of asset-backed securities, which we carry in our investment securities portfolio. These asset-backed securities meet the GAAP definition of asset securitization entities, which entities are considered to be VIEs. We are not considered to be the primary beneficiary of these VIEs, as defined by GAAP, since we do not have control over their activities. Additional information about asset-backed securities is provided in note 3.

***Tax-Exempt Investment Program***

In the normal course of our business, we structure and sell certificated interests in pools of tax-exempt investment-grade assets, principally to our mutual fund customers. We structure these pools as partnership trusts, and the trusts are recorded in our consolidated statement of condition as investment securities available for sale and other short-term borrowings. We may also provide liquidity and re-marketing services to the trusts. As of September 30, 2010 and December 31, 2009, we carried investment securities available for sale, composed of securities related to state and political subdivisions, with a fair value of \$3.04 billion and \$3.13 billion, respectively, and other short-term borrowings of \$2.53 billion and \$2.74 billion, respectively, in our consolidated statement of condition in connection with these trusts.

We transfer assets to the trusts from our investment securities portfolio at adjusted book value, and the trusts finance the acquisition of these assets by selling certificated interests issued by the trusts to third-party investors and to State Street as residual holder. These transfers do not meet the de-recognition criteria defined by GAAP, and therefore are recorded in our consolidated financial statements. The trusts had a weighted-average life of approximately 7.8 years at September 30, 2010, compared to approximately 8.1 years at December 31, 2009. Under separate legal agreements, we provide standby bond purchase agreements to these trusts, which obligate State Street to acquire the certificated interests at par value in the event that the re-marketing agent is unable to place the certificated interests with investors. Our obligations as standby bond purchase agreement provider terminate in the event of the following credit events: payment default, bankruptcy of the issuer or credit enhancement provider, the imposition of taxability, or the downgrade of an asset held by the trust below investment grade. Our commitments to the trusts under these standby bond purchase agreements totaled \$2.80 billion at September 30, 2010, none of which was utilized at period-end. In the event that our obligations under these agreements are triggered, no material impact to our consolidated results of operations or financial condition is expected to occur, because the securities are already recorded at fair value in our consolidated statement of condition.

***Asset-Backed Commercial Paper Program***

We sponsor and administer multi-seller asset-backed commercial paper programs, or conduits. These conduits, the first of which was established in 1992, were originally designed to satisfy the demand of our institutional clients, particularly mutual fund customers, for commercial paper. The conduits obtain funding through various sources, including our customer deposit base, the issuance of the above-described commercial paper to independent third parties or other short-term sources of liquidity. We consider the activities of the conduits in our liquidity management process, and offer the program to our clients to fund the conduits' assets. The conduits hold diversified investments, which are primarily mortgage- and asset-backed securities purchased from independent third parties, collateralized by mortgages, student loans, automobile and equipment loans and credit card receivables, among other asset types. Since we have determined that we are the primary beneficiary of the conduits, their assets and liabilities are recorded in our consolidated financial statements.

**Table of Contents****STATE STREET CORPORATION****CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(UNAUDITED)****Note 8. Variable Interest Entities (Continued)*****Collateralized Debt Obligations***

We serve as collateral manager for a series of collateralized debt obligations, referred to as CDOs. A CDO is a structured investment vehicle which purchases a portfolio of assets funded through the issuance of several classes of debt and equity, the repayment of and return on which are linked to the performance of the underlying assets. We have determined that we are not the primary beneficiary of these VIEs, and do not record them in our consolidated financial statements. At September 30, 2010 and December 31, 2009, the aggregate notional value of these CDOs was \$1.0 billion and \$2.0 billion, respectively. At September 30, 2010 and December 31, 2009, the carrying value of the underlying collateral was \$336 million and \$1.2 billion, respectively. We did not acquire or transfer any investment securities to a CDO during the nine months ended September 30, 2010 or 2009.

**Note 9. Shareholders' Equity**

Accumulated other comprehensive loss included the following after-tax components as of the dates indicated.

(In millions)	September 30, 2010	December 31, 2009
Foreign currency translation	\$ 220	\$ 281
Net unrealized loss on hedges of net investments in non-U.S. subsidiaries	(14)	(14)
Net unrealized gain (loss) on available-for-sale securities portfolio	355	(1,001)
Net unrealized loss related to reclassified securities	(372)	(635)
Net unrealized loss on available-for-sale securities	(17)	(1,636)
Net unrealized loss on fair value hedges of available-for-sale securities	(193)	(113)
Expected losses from other-than-temporary impairment on available-for-sale securities related to factors other than credit	(152)	(159)
Expected losses from other-than-temporary impairment on held-to-maturity securities related to factors other than credit	(418)	(387)
Minimum pension liability	(196)	(192)
Net unrealized loss on cash flow hedges	(12)	(18)
<b>Total</b>	<b>\$ (782)</b>	<b>\$ (2,238)</b>

For the nine months ended September 30, 2010, we realized net gains of \$286 million from sales of available-for-sale securities. Unrealized pre-tax gains of \$102 million were included in other comprehensive income, or OCI, at December 31, 2009, net of deferred taxes of \$41 million, related to these sales. For the nine months ended September 30, 2009, we realized net gains of \$260 million from sales of available-for-sale securities. Unrealized pre-tax gains of \$60 million were included in OCI at December 31, 2008, net of deferred taxes of \$24 million, related to these sales.

**Table of Contents****STATE STREET CORPORATION****CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(UNAUDITED)****Note 9. Shareholders' Equity (Continued)**

Total comprehensive income	\$ 1,471	\$ 1,379	\$ 2,956	\$ 495

**Note 10. Fair Value*****Fair Value Measurements***

We carry trading account assets, investment securities available for sale and various types of derivative financial instruments at fair value in our consolidated statement of condition on a recurring basis. Changes in the fair value of these financial assets and liabilities are recorded either as components of our consolidated statement of income or as components of OCI within shareholders' equity in our consolidated statement of condition.

We measure fair value for the above-described financial assets and liabilities in accordance with accounting standards which govern the measurement of the fair value of financial instruments. Management believes that its valuation techniques and underlying assumptions used to measure fair value conform to the provisions of these standards. We categorize the financial assets and liabilities that we carry at fair value based upon a prescribed three-level valuation hierarchy. The hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (level 1) and the lowest priority to valuation methods using significant unobservable inputs (level 3). If the inputs used to measure a financial asset or liability cross different levels of the hierarchy, categorization is based on the lowest-level input that is significant to the fair value measurement. Management's assessment of the significance of a particular input to the overall fair value measurement of a financial asset or liability requires judgment, and considers factors specific to that asset or liability. The three levels are described below.

*Level 1. Financial assets and liabilities with values based on unadjusted quoted prices for identical assets or liabilities in an active market.* Fair value is measured using unadjusted quoted prices in active markets for identical securities. Examples of level 1 financial instruments include active exchange-traded equity securities and U.S. government securities.

*Level 2. Financial assets and liabilities with values based on quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the asset or liability.* Level 2 inputs include the following:

## Edgar Filing: STATE STREET Corp - Form 10-Q

- a) Quoted prices for similar assets or liabilities in active markets;
- b) Quoted prices for identical or similar assets or liabilities in non-active markets;
- c) Pricing models whose inputs are observable for substantially the full term of the asset or liability; and

---

**Table of Contents**

**STATE STREET CORPORATION**

**CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

**(UNAUDITED)**

**Note 10. Fair Value (Continued)**

- d) Pricing models whose inputs are derived principally from or corroborated by observable market information through correlation or other means for substantially the full term of the asset or liability.

The fair value of the securities categorized in level 2 is measured primarily using information obtained from independent third parties. This third-party information is subject to review by management as part of a validation process, which includes obtaining an understanding of the underlying assumptions and the level of market participant information used to support those assumptions. In addition, management compares significant assumptions used by third parties to available market information. Such information may include known trades or, to the extent that trading activity is limited, includes comparisons to market research information pertaining to credit expectations, execution prices and the timing of cash flows.

The fair value of the derivative instruments categorized in level 2 predominantly represents foreign exchange contracts used in our trading activities, for which fair value is measured using discounted cash flow techniques, with inputs consisting of observable spot and forward points, as well as observable interest rate curves. With respect to derivative instruments, we evaluated the impact on valuation of the credit risk of our counterparties and our own credit risk. We considered factors such as the likelihood of default by us and our counterparties, our current and potential future net exposures and remaining maturities in determining the appropriate measurements of fair value. Valuation adjustments associated with these factors were not significant for the three or nine months ended September 30, 2010.

Our level 2 financial assets primarily included various types of interest-rate and foreign exchange derivative instruments, as well as trading account assets and fixed-income investment securities.

*Level 3. Financial assets and liabilities with values based on prices or valuation techniques that require inputs that are both unobservable in the market and significant to the overall fair value measurement.* These inputs reflect management's judgment about the assumptions that a market participant would use in pricing the asset or liability, and are based on the best available information, some of which is internally developed. The following provides a more detailed discussion of our financial assets and liabilities that we may categorize in level 3 and the related valuation methodology.

For certain investment securities available for sale, fair value was measured using information obtained from third-party sources or through the use of pricing models. Management evaluated its methodologies used to determine fair value, but considered the level of observable market information to be insufficient to categorize the securities in level 2.

Foreign exchange contracts carried in other assets and other liabilities were primarily composed of forward contracts and options. The fair value of foreign exchange forward contracts was measured using discounted cash flow techniques. However, in certain circumstances, extrapolation was required to develop certain forward points, which were not observable. The fair value of foreign exchange options was measured using an option pricing model. Because of a limited number of observable transactions, certain model inputs were unobservable, such as volatilities which were based on historical experience.

The fair value of certain interest-rate caps with long-dated maturities, also carried in other assets and other liabilities, was measured using a matrix pricing approach. Observable market prices were not

**Table of Contents****STATE STREET CORPORATION****CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(UNAUDITED)****Note 10. Fair Value (Continued)**

available for these derivatives, so extrapolation was necessary to value these instruments, since they had a strike and/or maturity outside of the matrix.

The following tables present information with respect to our financial assets and liabilities carried at fair value in our consolidated statement of condition as of September 30, 2010 and December 31, 2009. There were no significant transfers of financial assets or liabilities between levels 1 and 2 during the three or nine months ended September 30, 2010.

(In millions)	Fair Value Measurements on a Recurring Basis as of September 30, 2010				Total Net Carrying Value in Consolidated Statement of Condition

### ***Fair Values of Financial Instruments***

Fair value estimates for financial instruments not carried at fair value on a recurring basis in our consolidated statement of condition, as defined by GAAP, are generally subjective in nature, and are made as of a specific point in time based on the characteristics of the financial instruments and relevant market information. Disclosure of fair value estimates is not required by GAAP for certain items, such as lease financing, equity method investments, obligations for pension and other post-retirement plans, premises and equipment, other intangible assets and income tax assets and liabilities. Accordingly, aggregate fair value estimates presented do not purport to represent, and should not be considered representative of, our underlying market or franchise value. In addition, because of potential differences in methodologies and assumptions used to estimate fair values, our fair value estimates should not be compared to those of other financial institutions.

**Table of Contents****STATE STREET CORPORATION****CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(UNAUDITED)****Note 10. Fair Value (Continued)**

We use the following methods to estimate the fair value of our financial instruments:

For financial instruments that have quoted market prices, those quoted prices are used to estimate fair value.

Financial instruments that have no defined maturity, have a remaining maturity of 180 days or less, or reprice frequently to a market rate, are assumed to have a fair value that approximates their reported value, after taking into consideration any applicable credit risk.

For financial instruments for which no quoted market prices are available, fair value is estimated using information obtained from third parties, or by discounting the expected cash flows using an estimated current market interest rate for the financial instrument. The short duration of our assets and liabilities results in a significant number of financial instruments for which fair value equals or closely approximates the amount reported in our consolidated statement of condition. These financial instruments are reported in the following captions in our consolidated statement of condition: cash and due from banks; interest-bearing deposits with banks; securities purchased under resale agreements; accrued income receivable; deposits; securities sold under repurchase agreements; federal funds purchased; and short-term borrowings. In addition, due to the relatively short duration of certain of our net loans (excluding leases), we consider fair value for these loans to approximate their reported value. The fair value of other types of loans, such as purchased receivables and commercial real estate loans, is estimated by discounting expected future cash flows using current rates at which similar loans would be made to borrowers with similar credit ratings for the same remaining maturities. Loan commitments have no reported value because terms are at prevailing market rates.

The reported amounts and estimated fair values for financial instruments defined by GAAP, excluding the aforementioned short-term financial instruments and financial assets and liabilities carried at fair value on a recurring basis, were as follows as of September 30, 2010 and December 31, 2009:

<b>(In millions)</b>	<b>Reported Amount</b>	<b>Fair Value</b>
<b>September 30, 2010:</b>		
Financial Assets:

**STATE STREET CORPORATION**

**CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

**(UNAUDITED)**

**Note 11. Derivative Financial Instruments**

We use derivative financial instruments to support our clients' needs, conduct our trading activities, and manage our interest-rate and currency risk.

As part of our trading activities, we assume positions in both the foreign exchange and interest-rate markets by buying and selling cash instruments and using derivative financial instruments, including foreign exchange forward contracts, foreign exchange and interest-rate options, and interest-rate swaps. All foreign exchange contracts are valued daily at current market rates.

Interest-rate contracts involve an agreement with a counterparty to exchange cash flows based on the movement of an underlying interest-rate index. An interest-rate swap agreement involves the exchange of a series of interest payments, either at a fixed or variable rate, based upon the notional amount without the exchange of the underlying principal amount. An interest-rate option contract provides the purchaser, for a premium, the right, but not the obligation, to receive an interest rate based upon a predetermined notional amount during a specified period. An interest-rate futures contract is a commitment to buy or sell, at a future date, a financial instrument at a contracted price; it may be settled in cash or through the delivery of the contracted instrument.

Foreign exchange contracts involve an agreement to exchange one currency for another currency at an agreed-upon rate and settlement date. Foreign exchange contracts generally consist of foreign exchange forward and spot contracts and option contracts.

Derivative financial instruments involve the management of interest-rate and foreign currency risk, and involve, to varying degrees, market risk and credit and counterparty risk (risk related to repayment). Market risk is defined as the risk of adverse financial impact due to fluctuations in interest rates, foreign exchange rates and other market-driven factors and prices. We use a variety of risk management tools and methodologies to measure, monitor and manage the market risk associated with our trading activities. One such risk-management measure is value-at-risk, or VaR. VaR is an estimate of potential loss for a given period within a stated statistical confidence interval. We use a risk-measurement system to estimate VaR daily. We have adopted standards for estimating VaR, and we maintain capital for market risk in accordance with applicable regulatory guidelines.

Derivative financial instruments are also subject to credit and counterparty risk, which is defined as the risk of financial loss if a borrower or counterparty is either unable or unwilling to repay borrowings or settle a transaction in accordance with the underlying contractual terms. We manage credit and counterparty risk by performing credit reviews, maintaining individual counterparty limits, entering into netting arrangements and requiring the receipt of collateral. Collateral requirements are determined after a comprehensive review of the creditworthiness of each counterparty, and the collateral requirements are monitored and adjusted daily. Collateral is generally held in the form of cash or highly liquid U.S. government securities. We may be required to provide collateral to the counterparty in connection with our entry into derivative financial instruments.

We enter into master netting agreements with many of our derivative counterparties. Certain of these agreements contain credit risk-related contingent features in which the counterparty has the option to declare State Street in default and accelerate cash settlement of our net derivative liabilities with the counterparty in the event our credit rating falls below specified levels. The aggregate fair value of all derivative instruments with credit risk-related contingent features that were in a net liability position as of September 30, 2010 totaled approximately \$532 million, against which we had posted aggregate collateral of approximately \$5 million. If

**Table of Contents**

**STATE STREET CORPORATION**

**CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

**(UNAUDITED)**

**Note 11. Derivative Financial Instruments (Continued)**

State Street's credit rating were downgraded below levels specified in the agreements, the maximum additional amount of payments related to termination events that could have been required pursuant to these contingent features as of September 30, 2010 was approximately \$527 million. Accelerated settlement because of such events would not affect our consolidated results of operations.

***Trading Activities***

In connection with our trading activities, we use derivative financial instruments in our role as a financial intermediary and as both a manager and servicer of financial assets, to accommodate our clients' investment and risk management needs. In addition, we use derivative financial instruments to contribute to our overall corporate earnings and liquidity. These activities are designed to generate trading revenue and to hedge volatility in our net interest revenue. The level of market risk that we assume is a function of our overall objectives and liquidity needs, our clients' requirements and market volatility.

Our clients use derivative financial instruments to manage the financial risks associated with their investment goals and business activities. With respect to cross-border investing, clients have a need for foreign exchange forward contracts to convert currency for international investment and to manage the currency risk in their investment portfolios. As an active participant in the foreign exchange markets, we provide foreign exchange forward contracts and options in support of these client needs. As part of our trading activities, we may assume positions in both the foreign exchange and interest-rate markets by buying and selling cash instruments and using derivative financial instruments, including foreign exchange forward contracts, foreign exchange and interest-rate options, and interest-rate swaps. In the aggregate, foreign exchange forward positions are matched closely to minimize currency and interest-rate risk. All foreign exchange contracts are valued daily at prevailing market rates, and gains or losses in the fair value of trading derivatives are recorded in trading services revenue in our consolidated statement of income.

We offer products that provide book-value protection primarily to plan participants in stable value funds managed by non-affiliated investment managers of post-retirement defined contribution benefit plans, particularly 401(k) plans. The book-value protection is intended to provide safety and stable growth of principal invested, and to cover any shortfall caused by significant withdrawals when book value exceeds market value and the liquidation of the assets is not sufficient to redeem the participants. We account for these contingencies individually as trading derivative financial instruments, specifically written options. These contracts are valued quarterly and unrealized losses, if any, are recorded in other expenses in our consolidated statement of income.

***Asset and Liability Management Activities***

In connection with our asset and liability management activities, we use derivative financial instruments to manage interest-rate risk. Interest-rate risk, defined as the sensitivity of income or financial condition to variations in interest rates, is a significant non-trading market risk to which our assets and liabilities are exposed. We manage interest-rate risk by identifying, quantifying and hedging our exposures, using fixed-rate portfolio securities and a variety of derivative financial instruments, most frequently interest-rate swaps and options (e.g., interest rate caps and floors). Interest-rate swap agreements alter the interest-rate characteristics of specific balance sheet assets or liabilities. When appropriate, forward rate agreements, options on swaps, and exchange-traded futures and options are also used.

**Table of Contents**

**STATE STREET CORPORATION**

**CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

**(UNAUDITED)**

**Note 11. Derivative Financial Instruments (Continued)**

*Fair value hedges*

Derivatives designated as fair value hedges are utilized to mitigate the risk of changes in fair value of recognized assets and liabilities. Gains and losses on fair value hedges are recorded in net interest revenue or in processing fees and other revenue along with the gain or loss on the asset or liability attributable to the hedged risk. Differences between the gains and losses on fair value hedges and the gains and losses on the asset or liability attributable to the hedged risk represent hedge ineffectiveness, which is recorded in net interest revenue or in processing fees and other revenue. We use interest-rate swap agreements in this manner to manage our exposure to changes in the fair value of hedged items caused by changes in interest rates.

We have entered into interest-rate swap agreements to modify our interest revenue from certain available-for-sale securities from a fixed rate to a floating rate. The securities hedged have a weighted-average life of approximately 7.8 years. These securities are hedged with interest-rate swap contracts of similar maturity, repricing and fixed-rate coupons. The interest-rate swap contracts convert the interest revenue from a fixed rate to a floating rate indexed to LIBOR, thereby mitigating our exposure to fluctuations in the fair value of the securities attributable to changes in the benchmark interest rate.

We have entered into an interest-rate swap agreement to modify our interest expense on a subordinated note from a fixed rate to a floating rate. The subordinated note matures in 2018 and pays fixed interest at a 5.25% annual rate. The subordinated note is hedged with an interest-rate swap contract with a similar notional amount, maturity and fixed-rate coupon. The interest-rate swap contract converts the fixed-rate coupon to a floating rate indexed to LIBOR, thereby mitigating our exposure to fluctuations in the fair value of the subordinated note stemming from changes in the benchmark interest rate.

During the three months ended September 30, 2010, we terminated interest-rate swap contracts with an aggregate notional amount of \$900 million, which were used to hedge a senior note maturing in 2014 and a subordinated note maturing in 2016. Cumulative mark-to-market losses of \$19 million and \$25 million, respectively, to increase the carrying amount of the respective notes had been recorded against processing fees and other revenue through the termination dates of the respective interest-rate swap contracts; these losses will be amortized into interest expense in our consolidated statement of income over the remaining terms of the respective notes.

*Cash flow hedges*

Derivatives designated as cash flow hedges are utilized to offset the variability of cash flows to be received from or paid on a floating-rate asset or liability. Gains and losses on cash flow hedges that are considered highly effective are recorded in other comprehensive income until earnings are affected by the hedged item. When gains or losses are reclassified from accumulated other comprehensive income into earnings, they are recorded in net interest revenue. The ineffectiveness of cash flow hedges, defined as the extent to which the changes in fair value of the derivative exceeded the variability of cash flows of the forecasted transaction, is recorded in processing fees and other revenue.

We have entered into interest-rate swap agreements to modify our interest revenue from certain available-for-sale securities from a floating rate to a fixed rate. The securities hedged have a weighted-average

**Table of Contents****STATE STREET CORPORATION****CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(UNAUDITED)****Note 11. Derivative Financial Instruments (Continued)**

life of approximately 3.1 years. These securities are hedged with interest-rate swap contracts of similar maturities, repricing and other characteristics. The interest-rate swap contracts convert the interest revenue from a floating rate to a fixed rate, thereby mitigating our exposure to fluctuations in the cash flows of the securities attributable to changes in the benchmark interest rate.

During the first nine months of 2010, we terminated an interest-rate swap agreement with an aggregate notional amount of \$200 million, which had modified our interest payments on a subordinated note maturing in 2015 from a floating rate to a fixed rate. A cumulative mark-to-market loss of \$24 million on the interest-rate swap agreement was recorded in other comprehensive income as of the termination date; this loss will be amortized into interest expense in our consolidated statement of income over the remaining term of the subordinated note.

The following table presents the aggregate contractual, or notional, amounts of derivative financial instruments held or issued for trading and asset-and-liability management activities as of the dates indicated:

(In millions)	September 30, 2010	December 31, 2009
<b>Trading:</b>		
Interest-rate contracts:		
Swap agreements	\$ 28,312	\$ 261
Options and caps purchased	140	169
Options and caps written	140	169
Futures	30,692	747
Foreign exchange contracts:		
Forward, swap and spot	650,105	565,661
Options purchased	22,206	10,977
Options written	22,221	10,710
Credit derivative contracts:		
Credit default swap agreements	155	170
Other contracts:		
Options written	49,430	52,948
<b>Asset and liability management:</b>		
Interest-rate contracts:		
Swap agreements	1,972	2,577

**Table of Contents****STATE STREET CORPORATION****CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(UNAUDITED)****Note 11. Derivative Financial Instruments (Continued)**

As described above, in connection with our asset and liability management activities, we have executed interest-rate swap agreements designated as fair value and cash flow hedges to manage our interest-rate risk. The aggregate notional amounts of these interest-rate swap agreements and the related assets or liabilities being hedged are presented in the following table.

(In millions)	September 30, 2010			December 31, 2009		
	Fair Value Hedges	Cash Flow Hedges	Total	Fair Value Hedges	Cash Flow Hedges	Total
Available-for-sale investment securities	\$ 1,606	\$ 166	\$ 1,772	\$ 1,707	\$ 170	\$ 1,877
Long-term debt <sup>(1)</sup>	200		200	500	200	700
<b>Total</b>	<b>\$ 1,806</b>	<b>\$ 166</b>	<b>\$ 1,972</b>	<b>\$ 2,207</b>	<b>\$ 370</b>	<b>\$ 2,577</b>

<sup>(1)</sup> As of September 30, 2010 and December 31, 2009, fair value hedges of long-term debt increased the carrying value of long-term debt presented in our consolidated statement of condition by \$97 million and \$31 million, respectively.

The contractual and weighted-average interest rates, which include the effects of hedges related to these financial instruments, were as follows for the periods indicated:

	Three Months Ended September 30,			
	2010	2009	2010	2009
	Contractual Rates	Rate Including Impact of Hedges	Contractual Rates	Rate Including Impact of Hedges
Long-term debt	3.72%	3.33%	3.79%	3.67%

  

	Nine Months Ended September 30,			
	2010	2009	2010	2009
	Contractual Rates	Rate Including Impact of Hedges	Contractual Rates	Rate Including Impact of Hedges
Long-term debt	3.73%	3.28%	4.08%	3.95%

For cash flow hedges, any changes in the fair value of the derivative financial instruments remain in accumulated other comprehensive income and are generally recorded in our consolidated statement of income in future periods when earnings are affected by the variability of the hedged cash flow.

Foreign exchange trading revenue related to foreign exchange contracts was \$107 million and \$152 million for the three months ended September 30, 2010 and 2009, respectively, and \$426 million and \$533 million for the nine months ended September 30, 2010 and 2009, respectively. Future cash requirements, if any, related to foreign exchange contracts are represented by the gross amount of currencies to be

## Edgar Filing: STATE STREET Corp - Form 10-Q

exchanged under each contract unless we and the counterparty have agreed to pay or receive the net contractual settlement amount on the settlement date.

<sup>(1)</sup> Amount for the nine months ended September 30, 2010 included \$67 million related to the third-party asset-backed securitization trusts consolidated into our financial statements on January 1, 2010 in connection with our adoption of a new accounting standard. These trusts were de-consolidated during the three months ended June 30, 2010.

**Table of Contents**

**STATE STREET CORPORATION**

**CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

**(UNAUDITED)**

**Note 13. Securities Lending Charge**

During the three months ended June 30, 2010, we recorded an aggregate pre-tax charge of \$414 million, including associated legal costs of \$9 million, in our consolidated statement of income with respect to the cash collateral pools underlying SSgA-managed investment funds engaged in securities lending, as well as the cash collateral pools underlying our agency lending program. In connection with the charge, we made a one-time cash contribution of \$330 million to the cash collateral pools underlying the SSgA lending funds, based on our assessment with respect to previously disclosed asserted and unasserted claims and our evaluation of the ultimate resolution of such claims, as well as the effect of the redemption restrictions originally imposed by SSgA on the lending funds. In light of our evaluation of these and other issues, we elected to make the cash contribution, which restored the net asset value per unit of the underlying cash collateral pools to \$1.00 as of June 30, 2010. As a result of this action, SSgA removed the redemption restrictions from the SSgA lending funds in August 2010.

The pre-tax charge also included the establishment of a \$75 million reserve to address certain potential inconsistencies in connection with our implementation of the redemption restrictions applicable to the cash collateral pools underlying our agency lending program. This charge was based on the results of a review of our implementation of the redemption restrictions with respect to participants in the agency lending collateral pools, and our assessment of the amount required to compensate clients for the dilutive effect of redemptions which may not have been consistent with the intent of the policy. For additional information, refer to the Legal Proceedings section of note 7.

**Note 14. Income Taxes**

We recorded income tax expense of \$236 million for the three months ended September 30, 2010, compared to income tax expense of \$160 million for the three months ended September 30, 2009. Income tax expense for the nine months ended September 30, 2010 was \$361 million, compared to \$540 million for the nine months ended September 30, 2009. Our effective tax rates for the three and nine months ended September 30, 2010 were 30.1% and 19.7%, respectively, compared to 32.8% and 29.3% for the three and nine months ended September 30, 2009. The decline in income tax expense and in the effective tax rate for the nine months ended September 30, 2010 compared to the 2009 period primarily resulted from a discrete tax benefit of \$180 million, recorded during the three months ended June 30, 2010, generated by the restructuring of former non-U.S. conduit assets. Excluding the discrete tax benefit, the effective tax rate for the nine months ended September 30, 2010 was 29.5%.

We are presently under audit by a number of tax authorities. Unrecognized tax benefits totaled approximately \$414 million at September 30, 2010. It is reasonably possible that these unrecognized tax benefits could change significantly over the next 12 months. We do not expect that any change would have a material adverse effect on our effective tax rate.

**Table of Contents****STATE STREET CORPORATION****CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(UNAUDITED)****Note 15. Earnings Per Common Share**

The following table presents the computation of basic and diluted earnings per common share for the periods indicated:

(Dollars in millions, except per share amounts)	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
<b>Net income before extraordinary loss</b>	<b>\$ 546</b>	<b>\$ 327</b>	<b>\$ 1,473</b>	<b>\$ 1,305</b>
Less:				
Prepayment of preferred stock discount				(106)
Preferred stock dividends				(46)
Accretion of preferred stock discount				(11)
Net income before extraordinary loss available to common equity	<b>546</b>	<b>327</b>	<b>1,473</b>	<b>1,142</b>
Less: Dividends and undistributed earnings allocated to participating securities <sup>(1)</sup>	<b>(6)</b>		<b>(14)</b>	
Net income before extraordinary loss available to common shareholders	<b>\$ 540</b>	<b>\$ 327</b>	<b>\$ 1,459</b>	<b>\$ 1,142</b>
<b>Average shares outstanding (in thousands):</b>				
Basic average shares	<b>495,729</b>	493,453	<b>495,312</b>	462,900
Effect of dilutive securities: stock options and stock awards	<b>2,430</b>	4,837	<b>2,403</b>	3,334
Diluted average shares	<b>498,159</b>	498,290	<b>497,715</b>	466,234
Anti-dilutive securities <sup>(2)</sup>	<b>12,386</b>	8,000	<b>10,590</b>	14,002
<b>Earnings per Share:</b>				
Basic	<b>\$ 1.09</b>	\$ .66	<b>\$ 2.94</b>	\$ 2.48
Diluted <sup>(3)</sup>	<b>\$ 1.08</b>	\$ .66	<b>\$ 2.93</b>	\$ 2.45

(1) Represents the portion of net income available to common equity that is allocated to participating securities; participating securities, which are composed of unvested restricted stock and director stock, have non-forfeitable rights to dividends during the vesting period on a basis equivalent to dividends paid to common shareholders.

(2) Represents stock options, restricted stock and other securities outstanding but not included in the computation of diluted average shares because their effect was anti-dilutive.

(3) Calculations for the three and nine months ended September 30, 2010 reflect the allocation of earnings to participating securities using the two-class method, as this computation was more dilutive than the calculation using the treasury stock method.

**Table of Contents****STATE STREET CORPORATION****CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(UNAUDITED)****Note 16. Line of Business Information**

We report two lines of business: Investment Servicing and Investment Management. Given our services and management organization, the results of operations for these lines of business are not necessarily comparable with those of other companies, including companies in the financial services industry. Information about revenue, expense and capital allocation methodologies is provided in note 23 to the consolidated financial statements included in our 2009 Form 10-K.

The following is a summary of our line of business results. The amounts presented in the Other column for 2010 represent merger and integration costs recorded in connection with acquisitions. The amounts presented in the Other column for 2009 represent merger and integration costs recorded in connection with our acquisition of Investors Financial, and, for the nine months ended September 30, 2009, also include net interest revenue earned in connection with our participation in the AMLF. The amounts presented in both Other columns were not allocated to State Street's business lines.

**Table of Contents****STATE STREET CORPORATION****CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(UNAUDITED)****Note 17. Non-U.S. Activities**

We define non-U.S. activities as those revenue-producing assets and business activities that arise from clients domiciled outside the U.S. Due to the nature of our business, precise segregation of U.S. and non-U.S. activities is not possible. Subjective judgments have been applied to determine results of operations related to our non-U.S. activities, including our application of transfer pricing and our asset and liability management policies. Interest expense allocations are based on the average cost of short-term borrowings.

The following table summarizes our non-U.S. results of operations for the periods indicated:

(In millions)	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

The Shareholders and Board of Directors

State Street Corporation

We have reviewed the consolidated statement of condition of State Street Corporation and subsidiaries as of September 30, 2010, and the related consolidated statements of income for the three- and nine-month periods ended September 30, 2010 and 2009, and the consolidated statements of changes in shareholders' equity and cash flows for the nine-month periods ended September 30, 2010 and 2009. These financial statements are the responsibility of the Corporation's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the consolidated financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated statement of condition of State Street Corporation and subsidiaries as of December 31, 2009, and the related consolidated statements of income, changes in shareholders' equity, and cash flows for the year then ended (not presented herein), and in our report dated February 22, 2010, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying consolidated statement of condition as of December 31, 2009, is fairly stated, in all material respects, in relation to the consolidated statement of condition from which it has been derived.
