Table of Contents**PRAXAIR, INC. AND SUBSIDIARIES****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS****(UNAUDITED)****1. Summary of Significant Accounting Policies**

Presentation of Condensed Consolidated Financial Statements - In the opinion of Praxair, Inc. (Praxair) management, the accompanying condensed consolidated financial statements include all adjustments necessary for a fair presentation of the results for the interim periods presented and such adjustments are of a normal recurring nature. The accompanying condensed consolidated financial statements should be read in conjunction with the notes to the consolidated financial statements of Praxair, Inc. and subsidiaries in Praxair's 2010 Annual Report on Form 10-K. There have been no material changes to the company's significant accounting policies during 2011.

Accounting Standards Implemented in 2011

The following standards were effective for Praxair in 2011 and their adoption did not have a significant impact on the condensed consolidated financial statements. Refer to Note 1 to the consolidated financial statements of Praxair's 2010 Annual Report on Form 10-K for a summary of these standards:

Disclosures about Fair Value Measurements, and

Multiple-Deliverable Revenue Arrangements

2. Venezuela Currency Devaluation

On January 8, 2010, Venezuela announced a devaluation of the Venezuelan Bolivar and created a two tier exchange rate system. Effective January 1, 2011, the two tier system was eliminated and a single exchange rate of 4.3 (implying a 50% devaluation) is now required for all transactions including Praxair's operations. In the first quarter 2010, Praxair recorded a \$27 million charge (\$26 million after-tax or \$ 0.08 per diluted share) due primarily to the remeasurement of the local Venezuelan balance sheet to reflect the new official 4.3 exchange rate.

3. Supplemental Information**Inventories**

The following is a summary of Praxair's consolidated inventories:

<i>(Millions of dollars)</i>	March 31, 2011	December 31, 2010
Inventories		
Raw materials and supplies	\$ 153	\$ 139
Work in process	51	49
Finished goods	212	211
Total inventories	\$ 416	\$ 399

Financing receivables

Financing receivables is not a normal practice for the company. The balance in both periods relates primarily to government receivables in Brazil and other long-term notes receivable from customers, the majority of which are fully reserved. Collectability is reviewed regularly and

Edgar Filing: PRAXAIR INC - Form 10-Q

uncollectible amounts are written-off as appropriate. The net financing receivables balances at March 31, 2011 and December 31, 2010 are \$46 million and \$51 million, respectively, and are included within the other long-term assets line of the Condensed Consolidated Balance Sheets. The balances at March 31, 2011 and December 31, 2010 are net of credit allowances of \$84 million and \$77 million, respectively. The fluctuation within this account was due primarily to foreign currency movements.

Table of Contents**4. Debt**

The following is a summary of Praxair's outstanding debt at March 31, 2011 and December 31, 2010:

<i>(Millions of dollars)</i>	March 31, 2011	December 31, 2010
SHORT-TERM		
Commercial paper and U.S. bank borrowings	\$ 120	\$ 207
Other bank borrowings (primarily international)	206	163
Total short-term debt	326	370
LONG-TERM		
U.S. borrowings

1.75% Notes due 2012 ^(a, b)	409	411
3.95% Notes due 2013	350	350
2.125% Notes due 2013 ^(a, b)	515	516
4.375% Notes due 2014 ^(a)	299	299
5.25% Notes due 2014	400	400
4.625% Notes due 2015	500	500
3.25% Notes due 2015 ^(a, b)	415	421
5.375% Notes due 2016	400	400
5.20% Notes due 2017	325	325
4.50% Notes due 2019 ^(a)	597	597
4.05% Notes due 2021 ^(a, c)	498	
Other	6	6
International bank borrowings	285	448
Obligations under capital lease	9	9
	5,512	5,187
Less: current portion of long-term debt	(31)	(32)
Total long-term debt	5,481	5,155
Total debt	\$ 5,838	\$ 5,557

(a) Amounts are net of unamortized discounts.

(b) March 31, 2011 and December 31, 2010 include a \$45 million and \$55 million fair value increase, respectively, related to hedge accounting. See Note 5 for additional information.

(c) On March 4, 2011, Praxair issued \$500 million of 4.05% notes due 2021. The proceeds were used to reduce short-term debt, to fund share repurchases under the 2010 share repurchase program and for general corporate purposes.

Table of Contents**5. Financial Instruments**

In its normal operations, Praxair is exposed to market risks relating to fluctuations in interest rates, foreign currency exchange rates, energy costs and to a lesser extent precious metal prices. The objective of financial risk management at Praxair is to minimize the negative impact of such fluctuations on the company's earnings and cash flows. To manage these risks, among other strategies, Praxair routinely enters into various derivative financial instruments (derivatives) including interest-rate swap and treasury rate lock agreements, currency-swap agreements, forward contracts, currency options, and commodity-swap agreements. These instruments are not entered into for trading purposes and Praxair only uses commonly traded and non-leveraged instruments.

There are two types of derivatives that the company enters into: (i) those relating to fair-value exposures, and (ii) those relating to cash-flow exposures. Fair-value exposures relate to recognized assets or liabilities, and firm commitments; while cash-flow exposures relate to the variability of future cash flows associated with recognized assets or liabilities, or forecasted transactions.

When a derivative is executed and hedge accounting is appropriate, it is designated as either a fair-value hedge or a cash-flow hedge. Currently, Praxair designates all interest-rate and treasury rate lock as hedges for accounting purposes; however, currency contracts are generally not designated as hedges for accounting purposes unless they are related to forecasted transactions. Whether designated as hedges for accounting purposes or not, all derivatives are linked to an appropriate underlying exposure. On an ongoing basis, the company assesses the hedge effectiveness of all derivatives designated as hedges for accounting purposes to determine if they continue to be highly effective in offsetting changes in fair values or cash flows of the underlying hedged items. If it is determined that the hedge is not highly effective, then hedge accounting will be discontinued prospectively.

Counterparties to Praxair's derivatives are major banking institutions with credit ratings of investment grade or better and no collateral is required, and there are no significant risk concentrations. Management believes the risk of incurring losses on derivative contracts related to credit risk is remote and any losses would be immaterial.

The following table is a summary of the notional amount and fair value of derivatives outstanding at March 31, 2011 and December 31, 2010 for consolidated subsidiaries:

<i>(Millions of dollars)</i>	Notional Amounts		Fair Value			
	March 31, 2011	December 31, 2010	March 31, 2011	December 31, 2010	March 31, 2011	December 31, 2010
Derivatives Not Designated as Hedging Instruments:						
Currency contracts:						
Balance sheet items (a)	\$ 1,226	\$ 1,011	\$ 2	\$ 2	\$ 2	\$ 2
Anticipated net income (b)	137	137	6	10		
Total	\$ 1,363	\$ 1,148	\$ 6	\$ 12	\$ 2	\$ 2
Derivatives Designated as Hedging Instruments:						
Interest rate swaps (b)	\$ 900	\$ 900	\$ 31	\$ 39	\$	\$
Total Derivatives	\$ 2,263	\$ 2,048	\$ 37	\$ 51	\$	\$ 2

(a) Assets are recorded in prepaid and other current assets, and liabilities are recorded in other current liabilities.

(b) Assets are recorded in other long term assets.

Table of Contents

Currency Contracts

Balance Sheet Items

Foreign currency contracts related to balance sheet items consist of forward contracts entered into to manage the exposure to fluctuations in foreign-currency exchange rates on recorded balance sheet assets and liabilities denominated in currencies other than the functional currency of the related operating unit. The fair value adjustments on these contracts are largely offset by the fair value adjustments recorded on the hedged assets and liabilities.

Anticipated Net Income

The anticipated net income hedge contracts at March 31, 2011 and December 31, 2010 consist of foreign currency options related to anticipated net income in Brazil, Europe and Canada. Over the term of the contracts, the fair value adjustments from net-income hedging contracts are largely offset by the impacts on reported net income resulting from the currency translation process. The accounting rules pertaining to derivatives and hedging do not allow hedges of anticipated net income to be designated as hedging instruments.

Interest Rate Contracts

Interest Rate Swaps

At March 31, 2011, Praxair had the following interest-rate swap agreements outstanding that effectively convert fixed-rate interest to variable-rate interest:

January 14, 2010 agreement related to the \$500 million 2.125% fixed-rate notes that mature in 2013, and

September 2009 agreement related to the \$400 million 3.25% fixed-rate notes that mature in 2015.

These interest rate swap agreements were designated as fair value hedges with the resulting fair value adjustments recognized in earnings along with an equally offsetting charge/benefit to earnings for the changes in the fair value of the underlying debt instruments. At March 31, 2011, \$31 million was recognized as an increase in the fair value of these notes (\$15 million and \$16 million, respectively).

In October 2010, Praxair terminated the interest-rate swap agreements, which were originally entered into on January 4, 2010, on the \$400 million 1.75% notes that mature in 2012 and received a \$16 million cash payment, including interest receivable of \$3 million. The previously recorded debt increase of \$13 million will be recognized in earnings as a reduction to interest expense over the remaining term of the underlying debt, or about two years. During 2011, \$1 million was recognized as a reduction to interest expense and \$10 million remains unrecognized at March 31, 2011 (\$11 million at December 31, 2010) and is shown as an increase to long-term debt.

During 2002, Praxair entered into and terminated \$500 million notional amount of interest-rate swap agreements that effectively converted fixed-rate interest to variable-rate interest on the \$500 million 6.375% notes that mature in April 2012 and received a \$47 million cash payment. The previously recorded debt increase of \$47 million is being recognized in earnings as a reduction to interest expense over the remaining term of the underlying debt, or about ten years. During the quarters ended March 31, 2011 and 2010, \$1 million was recognized as a reduction to interest expense, respectively, and \$4 million remains unrecognized at March 31, 2011 (\$5 million at December 31, 2010) and is shown as an increase to long-term debt.

Treasury Rate Locks

In December 2008, Praxair entered into treasury rate lock contracts totaling \$500 million notional amount to hedge the cash flow exposure attributable to the changes in the treasury rate portion of the interest rate on a forecasted debt issuance. The treasury rate locks were designated as and accounted for as cash flow hedges. In January 2009, the company settled the treasury rate locks and received a cash payment of \$16 million (\$10 million net of taxes) which was recorded as a gain in AOCI. On August 13, 2009, Praxair issued \$600 million of 4.50% notes due August 2019, which represents the forecasted debt issuance that was originally hedged in December 2008. The gain recorded in AOCI is currently being reclassified to earnings as a decrease to interest expense over the remaining term of these notes.

Table of Contents

In February 2008, Praxair entered into a treasury rate lock to hedge the cash flow exposure attributable to the \$500 million of 4.625% notes issued on March 7, 2008. The treasury rate lock was accounted for as a cash flow hedge with the resulting fair value adjustments recorded in AOCI. The treasury rate lock was settled at a loss of \$7 million (\$4 million net of taxes) which was recorded in AOCI and is currently being reclassified to earnings as an increase to interest expense over the remaining term of the underlying debt.

The gains (losses) for treasury rate lock contracts are reclassified to earnings as interest expense-net. The amount of gains (losses) reclassified to earnings for the quarters ended March 31, 2011 and 2010 was less than \$1 million, respectively. Net gains (losses) of \$1 million are expected to be reclassified to earnings over the next twelve months. There was no ineffectiveness.

The following table summarizes the impacts of the Company's derivatives on the consolidated statement of income for the quarters ended March 31, 2011 and 2010:

<i>(Millions of dollars)</i>	Amount of Pre-Tax Gain (Loss) Recognized in Earnings (a)	
	Quarter Ended March 31,	
	2011	2010
Derivatives Not Designated as Hedging Instruments		
Currency contracts:		
Balance sheet items		
Debt-related	\$ (6)	\$ (6)
Other balance sheet items	3	
Anticipated net income	(4)	
Total	\$ (7)	\$ (6)

- (a) The gains (losses) on balance sheet items are largely offset by gains (losses) recorded on the underlying hedged assets and liabilities. The gains (losses) for the derivatives and the underlying hedged assets and liabilities related to debt items are recorded in the consolidated statement of income as interest expense-net. Other balance sheet items and anticipated net income gains (losses) are recorded in the consolidated statement of income as other income (expense)-net.

There was no pre-tax gain (loss) recognized in AOCI for the quarters ended March 31, 2011 and 2010.

6. Fair Value Disclosures

The fair value hierarchy prioritizes the input to valuation techniques used to measure fair value into three broad levels as follows:

Level 1 quoted prices in active markets for identical assets or liabilities

Level 2 quoted prices for similar assets and liabilities in active markets or inputs that are observable

Level 3 inputs that are unobservable (for example cash flow modeling inputs based on assumptions)

Assets and Liabilities Measured at Fair Value on a Recurring Basis

The following table summarizes assets and liabilities measured at fair value on a recurring basis at March 31, 2011:

**Fair Value Measurements
Using**

Edgar Filing: PRAXAIR INC - Form 10-Q

(Millions of dollars)

	Level 1	Level 2	Level 3	Total
Assets				
Derivative assets	\$	\$ 37	\$	\$ 37
Investments	2			2
Total	\$ 2	\$ 37	\$	\$ 39
Liabilities				
Derivative liabilities	\$	\$	\$	\$

Table of Contents

The fair values of the derivative assets and liabilities are based on market prices obtained from independent brokers or determined using quantitative models that use as their basis readily observable market parameters that are actively quoted and can be validated through external sources, including third-party pricing services, brokers and market transactions. Investments are marketable securities traded on an exchange.

The fair values of cash and cash equivalents, short-term debt, accounts receivable-net, and accounts payable approximate carrying amounts because of the short maturities of these instruments. The fair value of long-term debt is estimated based on the quoted market prices for the same or similar issues. At March 31, 2011, the estimated fair value of Praxair's long-term debt portfolio was \$5,812 million versus a carrying value of \$5,512 million. At December 31, 2010, the estimated fair value of Praxair's long-term debt portfolio was \$5,498 million versus a carrying value of \$5,187 million. Differences from carrying amounts are attributable to interest-rate changes subsequent to when the debt was issued.

Assets measure at Fair Value on a Non-Recurring Basis

Certain assets are valued at fair value on a non-recurring basis.

During the fourth quarter 2010, Praxair decided to sell the U.S. homecare portion of its North American healthcare business. Accordingly, the net assets of the business were written-down to fair value representing the Company's best estimate of the cash proceeds that will be realized upon eventual sale or other disposition of the net assets of the business. This resulted in a pre-tax charge to earnings of \$58 million during the fourth quarter 2010. The estimated fair value was not significant to the Company's consolidated financial position. On February 2, 2011, the company announced that it had entered into a definitive agreement for sale of the U.S. homecare business to Apria Healthcare Group Inc. The sale was finalized on March 4, 2011.

7. Earnings Per Share Praxair, Inc. Shareholders

Basic earnings per share is computed by dividing Net Income Praxair, Inc. for the period by the weighted average number of Praxair common shares outstanding. Diluted earnings per share is computed by dividing Net Income Praxair, Inc. for the period by the weighted average number of Praxair common shares outstanding and dilutive common stock equivalents, as follows:

	Quarter Ended March 31,	
	2011	2010
Numerator (Millions of dollars)		
Net Income - Praxair, Inc.	\$ 398	\$ 314
Denominator (Thousands of shares)		
Weighted average shares outstanding	303,449	306,144
Shares earned and issuable under compensation plans	622	649
Weighted average shares used in basic earnings per share	304,071	306,793
Effect of dilutive securities		
Stock options and awards	4,524	4,366
Weighted average shares used in diluted earnings per share	308,595	311,159
Basic Earnings Per Share	\$ 1.31	\$ 1.02
Diluted Earnings Per Share	\$ 1.29	\$ 1.01

Table of Contents

Stock options of 1,630,690 and 3,214,550 were antidilutive and therefore excluded in the computation of diluted earnings per share for the quarters ended March 31, 2011 and 2010, respectively.

8. Goodwill and Other Intangible Assets

Changes in the carrying amount of goodwill for the three months ended March 31, 2011 were as follows:

<i>(Millions of dollars)</i>	North America	South America	Europe	Asia	Surface Technologies	Total
Balance, December 31, 2010	\$ 1,303	\$ 246	\$ 343	\$ 33	\$ 141	\$ 2,066
Acquisitions						
Purchase adjustments & other	(2)					(2)
Foreign currency translation	8	6	23		5	42
Balance, March 31, 2011	\$ 1,309	\$ 252	\$ 366	\$ 33	\$ 146	\$ 2,106

Impairment tests have been performed annually during the second quarter of each year since the initial adoption of the goodwill accounting standard in 2002, and no impairments were indicated. Also, there were no indicators of impairment through March 31, 2011.

Changes in the carrying amounts of other intangibles for the quarter ended March 31, 2011 were as follows:

<i>(Millions of dollars)</i>	Customer & License/Use Agreements	Non-compete Agreements	Patents & Other	Total
Cost:				
Balance, December 31, 2010	\$ 166	\$ 28	\$ 24	\$ 218
Additions				
Foreign currency translation	4			4
Other		(2)		(2)
Balance, March 31, 2011	\$ 170	\$ 26	\$ 24	\$ 220
Less: Accumulated amortization				
Balance, December 31, 2010	\$ (63)	\$ (16)	\$ (7)	\$ (86)
Amortization expense	(4)	(1)		(5)
Foreign currency translation	(2)			(2)
Other		2		2
Balance, March 31, 2011	\$ (69)	\$ (15)	\$ (7)	\$ (91)
Net balance at March 31, 2011	\$ 101	\$ 11	\$ 17	\$ 129

Table of Contents

There are no expected residual values related to these intangible assets. The remaining weighted-average amortization period for intangible asset is approximately 13 years.

Total estimated annual amortization expense is as follows:

<i>(millions of dollars)</i>	
Remaining 2011	\$ 14
2012	18
2013	16
2014	14
2015	14
Thereafter	53
	\$ 129

9. Share-Based Compensation

Share-based compensation of \$14 million (\$10 million after tax) and \$10 million (\$7 million after tax) was recognized during the quarters ended March 31, 2011 and 2010, respectively. The expense was recorded primarily in selling, general and administrative expenses. There was no share-based compensation cost that was capitalized. For further details regarding Praxair's share-based compensation arrangements and prior year grants, refer to Note 15 to the consolidated financial statements of Praxair's 2010 Annual Report on Form 10-K.

Stock Options

The weighted-average fair value of options granted during quarter ended March 31, 2011 was \$17.70 (\$12.55 in 2010) based on the Black-Scholes Options-Pricing model.

The following weighted-average assumptions were used for grants in 2011 and 2010 :

	Quarter Ended	
	March 31,	
	2011	2010
Dividend yield	2.0%	2.4%
Volatility	22.3%	20.8%
Risk-free interest rate	2.2%	2.5%
Expected term years	5	5

The following table summarizes option activity under the plans as of March 31, 2011 and changes during the period then ended (averages are calculated on a weighted basis; life in years; intrinsic value expressed in millions):

	Number of Options (000 s)	Average Exercise Price	Average Remaining Life	Aggregate Intrinsic Value
Outstanding at January 1, 2011	15,895	\$ 58.68		
Granted	1,655	97.82		
Exercised	(1,467)	50.02		
Cancelled or Expired	(335)	81.87		
Outstanding at March 31, 2011	15,748	63.08	6.1	\$ 607

Edgar Filing: PRAXAIR INC - Form 10-Q

Exercisable at March 31, 2011	12,517	\$ 57.70	5.3	\$ 550
-------------------------------	--------	----------	-----	--------

Table of Contents

The aggregate intrinsic value represents the difference between the company's closing stock price of \$101.60 as of March 31, 2011 and the exercise price multiplied by the number of options outstanding as of that date. The total intrinsic value of stock options exercised during the quarter ended March 31, 2011 was \$69 million (\$21 million during the first quarter of 2010).

Cash received from option exercises under all share-based payment arrangements for the quarter ended March 31, 2011 was \$73 million (\$18 million during the first quarter of 2010). The cash tax benefit realized from stock option exercises totaled \$24 million for the quarter ended March 31, 2011, of which \$18 million in excess tax benefits was classified as financing cash flows (\$5 million and \$5 million for the same time periods in 2010).

As of March 31, 2011, \$41 million of unrecognized compensation cost related to non-vested stock options is expected to be recognized over a weighted-average period of approximately 1.3 years.

Performance-Based and Restricted Stock Awards

During the quarter ended March 31, 2011, the company granted performance-based stock units to employees which vest on the third anniversary of their grant date. The actual number of shares issued in settlement of a vested award can range from zero to 150 percent of the target number of shares granted based upon the company's attainment of specified performance targets at the end of a three-year period. Compensation expense related to these awards is recognized over the three-year performance period based on the fair value of the closing market price of the company's common stock on the date of the grant and the estimated performance that will be achieved. Compensation expense will be adjusted during the three-year performance period based upon the estimated performance levels that will be achieved.

During the quarter ended March 31, 2011, the company granted restricted stock units to employees. The majority of the restricted stock units vest at the end of or ratably over a three-year service period. Compensation expense related to the restricted stock units is recognized on a straight-line basis over the vesting period.

The weighted-average fair value of performance-based stock and restricted stock units granted during the quarter ended March 31, 2011 was \$92.06 and \$91.55, respectively (\$70.99 and \$71.12 for the same periods in 2010). This is based on the closing market price of Praxair's common stock on the grant date adjusted for dividends that will not be paid during the vesting period.

The following table summarizes non-vested performance-based and restricted stock award activity as of March 31, 2011 and changes during the period then ended (shares based on target amounts, averages are calculated on a weighted basis):

Performance-Based and Restricted Stock Activity	Performance-Based		Restricted Stock	
	Number of Shares (000 s)	Average Grant Date Fair Value	Number of Shares (000 s)	Average Grant Date Fair Value
Non-vested at January 1, 2011	674	\$ 62.80	300	\$ 65.14
Granted	307	92.06	104	91.55
Vested			(30)	70.55
Cancelled	(11)	70.91	(2)	69.83
Non-vested at March 31, 2011	970	\$ 71.75	372	\$ 72.29

Table of Contents

As of March 31, 2011, based on current estimates of future performance, \$50 million of unrecognized compensation cost related to performance-based awards is expected to be recognized through the first quarter of 2013 and \$19 million of unrecognized compensation cost related to the restricted stock awards is expected to be recognized through the first quarter of 2017.

10. Retirement Programs

The components of net pension and postretirement benefits other than pensions (OPEB) costs for the quarters ended March 31, 2011 and 2010 are shown below:

<i>(Millions of dollars)</i>	Quarter Ended March 31,			
	Pensions		OPEB	
	2011	2010	2011	2010
Service cost	\$ 11	\$ 10	\$ 1	\$ 2
Interest cost	31	30	4	4
Expected return on plan assets	(38)	(33)		
Net amortization and deferral	11	8	(2)	
Net periodic benefit cost	\$ 15	\$ 15	\$ 3	\$ 6

Praxair estimates that 2011 contributions to its pension plans will be in the range of \$95 to \$105 million, of which \$8 million have been made through March 31, 2011. On April 6, 2011, Praxair made a cash contribution of \$75 million to one of its U.S. pension plans.

11. Commitments and Contingencies

Praxair is subject to various lawsuits and government investigations that arise from time to time in the ordinary course of business. These actions are based upon alleged environmental, tax, antitrust and personal injury claims, among others. Praxair has strong defenses in these cases and intends to defend itself vigorously. It is possible that the company may incur losses in connection with some of these actions in excess of accrued liabilities. Management does not anticipate that in the aggregate such losses would have a material adverse effect on the company's consolidated financial position or liquidity; however, it is possible that the final outcomes could have a significant impact on the company's reported results of operations in any given period (see Note 17 to the consolidated financial statements of Praxair's 2010 Annual Report on Form 10-K).

Among such matters are:

Claims by the Brazilian taxing authorities against several of the company's Brazilian subsidiaries relating to non-income and income tax matters. During May 2009, the Brazilian government published Law 11941/2009 instituting a new voluntary amnesty program (Refis Program) which allowed Brazilian companies to settle certain federal tax disputes at reduced amounts. During the 2009 third quarter, Praxair decided that it was economically beneficial to settle many of its outstanding federal tax disputes and these disputes were enrolled in the Refis Program and settled (see Note 2 to the consolidated financial statements of Praxair's 2010 Annual Report on Form 10-K). During January 2010, the Brazilian state of Rio de Janeiro (Rio) published Law 5647/2010 instituting a new state amnesty program (Rio Amnesty Program) which allows Brazilian companies to settle certain disputes with the state of Rio at reduced amounts. During the 2010 first quarter, Praxair decided that it was economically beneficial to settle several of its outstanding disputes with the state of Rio and these disputes were enrolled in the Program and settled. The final settlements related to both the Refis and Rio Amnesty Programs are subject to final calculation and review by the Brazilian federal and Rio state governments, respectively, and the company currently anticipates these reviews will conclude during the next year. Any differences from amounts recorded will be adjusted to income at that time.

Table of Contents

After enrollment in the amnesty programs, at March 31, 2011 the most significant remaining claims relate to a state VAT tax matter associated with a procedural issue and a federal income tax matter where the taxing authorities are challenging the tax rate that should be applied to income generated by a subsidiary company. The total estimated exposure relating to such claims, including interest and penalties as appropriate, is approximately \$185 million. Praxair has not recorded any liabilities related to such claims based on management judgments, after considering judgments and opinions of outside counsel. Because litigation in Brazil historically takes many years to resolve, it is very difficult to estimate the timing of resolution of these matters; however, it is possible that certain of these matters may be resolved within the near term. The company is vigorously defending against the proceedings.

On September 1, 2010, CADE (Brazilian Administrative Council for Economic Defense) announced alleged anticompetitive activity on the part of five industrial gas companies in Brazil and imposed fines on all five companies. Originally, CADE imposed a civil fine of R\$ 2.2 billion Brazilian reais (US\$1.3 billion) against White Martins, the Brazil-based subsidiary of Praxair, Inc. In response to a motion for clarification, the fine was reduced to R\$1.7 billion Brazilian reais (US\$1 billion) due to a calculation error made by CADE. On September 2, 2010, Praxair issued a press release and filed a report on Form 8-K rejecting all claims and stating that the fine represents a gross and arbitrary disregard of Brazilian law.

On October 19, 2010, White Martins filed an annulment petition (appeal) with the Federal Court in Brasilia seeking to have the fine against White Martins overturned. In order to suspend payment of the fine pending the completion of the appeal process, Brazilian law required that the company tender a form of guarantee in the amount of the fine as security. Currently, 50% of the guarantee is satisfied by letters of credit with a financial institution and 50% of the guarantee is satisfied by equity of a Brazilian subsidiary.

Praxair strongly believes that the allegations are without merit and that the fine will be annulled during the appeal process. The company further believes that it has strong defenses and will vigorously defend against the allegations and related fine up to such levels of the Federal Courts in Brazil as may be necessary. Because appeals in Brazil historically take many years to resolve, it is very difficult to estimate when the appeal will be finally decided. Based on management judgments, after considering judgments and opinions of outside counsel, no reserve has been recorded for this proceeding as management does not believe that a loss is probable.

Claims brought by welders alleging that exposure to manganese contained in welding fumes caused neurological injury. Praxair has never manufactured welding consumables. Such products were manufactured prior to 1985 by a predecessor company of Praxair. As of December 31, 2010, Praxair was a co-defendant with many other companies in lawsuits alleging personal injury caused by manganese contained in welding fumes. There were a total of 349 individual claimants in these cases, a significant decline since 2005. The cases were pending in several state and federal courts. The federal cases have been transferred to the U.S. District Court for the Northern District of Ohio for coordinated pretrial proceedings. The plaintiffs seek unspecified compensatory and, in most instances, punitive damages. In the past, Praxair has either been dismissed from the cases with no payment or has settled a few cases for nominal amounts. These claims raise numerous, individual issues that make them generally unsuited for class action status. Separately, various class actions for medical monitoring have been proposed but none have been certified. No reserves have been recorded for these cases as management does not believe that a loss from them is probable or reasonably estimable.

Table of Contents**12. Segments**

Sales and operating profit by segment for the quarters ended March 31, 2011 and 2010 are shown below. For a description of Praxair's operating segments, refer to Note 18 to the consolidated financial statements of Praxair's 2010 Annual Report on Form 10-K.

<i>(Millions of dollars)</i>	Quarter Ended	
	2011	March 31, 2010
SALES^(a)		
North America	\$ 1,334	\$ 1,238
Europe	343	338
South America	558	458
Asia	310	258
Surface Technologies	157	136
	\$ 2,702	\$ 2,428

	(783)	(1,017)
Less: noncontrolling interests (CTA)	11	1
AOCI - Praxair, Inc.	\$ (794)	\$ (1,018)

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations
Adjusted Amounts and Comparisons**

The discussion of consolidated results and outlook in this Management's Discussion and Analysis (MD&A) is based on adjusted amounts and comparisons with adjusted amounts. Adjusted amounts are non-GAAP measures that supplement an understanding of the company's financial information by presenting information that investors, financial analysts and management use to help evaluate the company's performance and ongoing business trends on a comparable basis. See the Consolidated Results section of this MD&A for a summary of these adjusted amounts. A reconciliation of reported amounts to adjusted amounts can be found in the Non-GAAP Financial Measures section of this MD&A.

Consolidated Results

The following table provides summary data for the quarters ended March 31, 2011 and 2010:

<i>(Dollar amounts in millions, except per share data)</i>	Quarter Ended March 31,		
	2011	2010	Variance
Reported Amounts			
Sales	\$ 2,702	\$ 2,428	11%
Gross margin ^(a)	\$ 1,166	\$ 1,047	11%
As a percent of sales	43.2%	43.1%	
Selling, general and administrative	\$ 308	\$ 294	5%
As a percent of sales	11.4%	12.1%	
Depreciation and amortization	\$ 244	\$ 228	7%
Venezuela currency devaluation ^(b)	\$	\$ 27	
Other income (expense) - net	\$ (1)	\$ (1)	
Operating profit	\$ 591	\$ 479	23%
As a percent of sales	21.9%	19.7%	
Interest expense - net	\$ 35	\$ 32	9%
Effective tax rate	28.1%	29.3%	
Net income - Praxair, Inc.	\$ 398	\$ 314	27%
Diluted earnings per share	\$ 1.29	\$ 1.01	28%
Diluted shares outstanding	308,595	311,159	%
Adjusted Amounts for 2010 ^(c)			
Operating profit	\$ 591	\$ 506	17%
As a percent of sales	21.9%	20.8%	
Effective tax rate	28.1%	27.8%	
Net income - Praxair, Inc.	\$ 398	\$ 340	17%
Diluted earnings per share	\$ 1.29	\$ 1.09	18%

(a) Gross margin excludes depreciation and amortization expense.

(b) See Note 2 to the condensed consolidated financial statements.

(c) Adjusted amounts are non-GAAP measures. 2010 adjusted amounts exclude the impact of the Venezuela currency devaluation. Variances are calculated using adjusted amounts, when appropriate. A reconciliation of reported amounts to adjusted amounts can be found in the Non-GAAP Financial Measures section of this MD&A. Certain 2011 amounts are included for reference purposes.

Table of Contents***2010 Venezuela Currency Devaluation***

On January 8, 2010, Venezuela announced a devaluation of the Venezuelan Bolivar and created a two tier exchange rate system. Effective January 1, 2011, the two tier system was eliminated and a single exchange rate of 4.3 (implying a 50% devaluation) is now required for all transactions including Praxair's operations. In the first quarter 2010, Praxair recorded a \$27 million charge (\$26 million after-tax or \$ 0.08 per diluted share) due primarily to the remeasurement of the local Venezuelan balance sheet to reflect the new official 4.3 exchange rate.

Results of Operations

As previously described, references to adjusted amounts refer to reported amounts adjusted to exclude the impact of special items and are non-GAAP measures. A reconciliation of reported amounts to adjusted amounts can be found in the Non-GAAP Financial Measures section of this MD&A.

	Quarter Ended March 31, 2011 vs. 2010 % Change
Sales	
Volume	8 %
Price/Mix/Other	1 %
Cost pass-through	%
Currency	2 %
Acquisitions/ divestitures	%
Total sales change	11 %

Sales increased \$274 million, or 11%, for the first quarter versus 2010. The underlying increase in sales of 9% reflects higher volumes in all geographies coupled with the impact of higher overall pricing. Sales to the chemicals, metals, electronics and manufacturing end markets showed the strongest growth compared with the prior year. Currency effects added 2% to sales in the quarter.

Gross margin in 2011 improved \$119 million, or 11%, for the first quarter versus 2010 primarily due to higher volumes and price. The gross margin percentage increased slightly to 43.2% in 2011, due to higher price.

Selling, general and administrative (SG&A) expenses increased \$14 million, or 5%, for the first quarter versus 2010, but decreased as a percentage of sales. The increase in SG&A expenses was due primarily to benefit costs, currency, incentive compensation and other labor costs associated with increased business activity.

Depreciation and amortization expense increased \$16 million, or 7%, for the first quarter versus 2010 periods. The increase was due to depreciation associated with new project start-ups and currency impacts.

Other income (expense) net for the 2011 first quarter was a \$1-million expense, consistent with the first quarter of 2010.

Operating profit increased \$85 million, or 17%, for the first quarter 2011 versus adjusted operating profit for the same period in 2010. This increase was driven primarily by higher sales volumes, price and lower costs due to ongoing productivity initiatives and cost reductions.

Interest expense net increased \$3 million, or 9%, for the first quarter versus 2010 primarily due to higher debt levels.

The effective tax rate for the first quarter 2011 was 28.1% consistent with the adjusted effective tax rate for the same period in 2010.

Praxair's significant sources of equity income are in China, Italy, the Middle East, and Norway. Income from equity investments increased \$2 million as compared to the same period in 2010. This increase relates primarily to higher earnings in Italy and Norway and the acquisition of ROC in the Middle East.

Table of Contents

Net income Praxair, Inc. for the first quarter 2011 increased \$58 million, or 17%, as compared to the adjusted net income Praxair, Inc. for the same period in 2010. The increase was due primarily to higher operating profit partially offset by higher interest and income taxes.

Diluted earnings per share (EPS) for the first quarter 2011 increased \$0.20 per diluted share, or 18%, as compared to the adjusted diluted earnings per share for the same period in 2010. The underlying increase in EPS is attributable to an increase in net income Praxair, Inc. coupled with a lower number of diluted shares outstanding due to the impact of the company's net repurchases of common stock since 2010.

The number of employees at March 31, 2011 was 25,482, reflecting a decrease of 779 employees from December 31, 2010 primarily due to the U.S. homecare divestiture completed on March 4, 2011.

Segment Discussion

The following summary of sales and operating profit by segment provides a basis for the discussion that follows:

<i>(Dollar amounts in millions)</i>	Quarter ended March 31,		
	2011	2010	Variance
SALES			
North America	\$ 1,334	\$ 1,238	8%
Europe	343	338	1%
South America	558	458	22%
Asia	310	258	20%
Surface Technologies	157	136	15%
	\$ 2,702	\$ 2,428	11%
OPERATING PROFIT			
North America	\$ 322	\$ 277	16%
Europe	65	67	(3)%
South America	133	109	22%
Asia	46	34	35%
Surface Technologies	25	19	32%
Segment operating profit	591	506	17%
Venezuela currency devaluation (Note 2)		(27)	
Total operating profit	\$ 591	\$ 479	

North America

	Quarter Ended March 31, 2011 vs. 2010 % Change
Sales	
Volume	6 %
Price/Mix/Other	1 %
Currency	2 %
Acquisitions/divestitures	(1)%
Total sales change	8 %

Table of Contents

Sales increased \$96 million, or 8%, in the first quarter versus 2010 primarily due to 6% volume growth as merchant liquid and packaged gases volumes both showed strong growth. Underlying sales, including price, increased 7% due to the strengthening manufacturing, chemicals, metals and energy end-markets. Currency appreciation in Canada and Mexico increased sales by 2%. The U.S. homecare divestiture decreased sales by 1% versus the prior-year quarter.

Operating profit increased \$45 million, or 16%, versus 2010. Operating profit grew as a result of higher volumes, price and benefits from ongoing productivity initiatives and cost reductions.

Europe

	Quarter ended March 31, 2011 vs. 2010 % Change
Sales	
Volume	3 %
Cost pass-through	1 %
Currency	(3) %
Total sales change	1 %

Sales increased \$5 million, or 1%, for the first quarter versus 2010. Excluding currency effects, sales increased 4% primarily due to 3% volume growth. Growth was due primarily to higher on-site and merchant volumes in Germany, Italy and Spain.

Operating profit decreased \$2 million, or 3%, for the first quarter versus 2010 due to product mix and currency effects, including a net income hedge loss of \$2 million (see Note 5 to the condensed consolidated financial statements).

South America

	Quarter ended March 31, 2011 vs. 2010 % Change
Sales	
Volume	10 %
Price/Mix/Other	4 %
Cost pass-through	1 %
Currency	7 %
Total sales change	22 %

Sales increased \$100 million, or 22%, for the first quarter versus 2010. Currency appreciation increased sales by 7%. Underlying sales, excluding currency and cost pass-through, grew 14% versus the prior-year quarter. This increase was due to strong volume growth and higher overall pricing to metals, manufacturing and healthcare customers. Onsite, merchant and packaged gases in Brazil all grew versus prior-year.

Operating profit increased \$24 million, or 22%, for the first quarter versus 2010. Underlying operating profit grew primarily due to higher volumes and higher pricing. Operating profit for the prior-year quarter included a benefit from a decision to settle certain disputes under a special amnesty program enacted by the State of Rio de Janeiro, which was largely offset by charges in connection with a non-core service business restructuring.

Table of Contents**Asia**

	Quarter ended March 31, 2011 vs. 2010 % Change
Sales	
Volume	14 %
Price/Mix/Other	1 %
Cost pass-through	2 %
Currency	3 %
 Total sales change	 20 %

Sales increased \$52 million, or 20%, for the first quarter versus 2010 largely due to 14% volume growth. Onsite and merchant volumes in China, India and Korea grew from stronger demand for metals, electronics and chemical customers and new plant start-ups. Higher cost pass-through and currency effects increased sales by 5%.

Operating profit increased \$12 million, or 35%, for the first quarter versus 2010. Operating profit increased faster than sales due to the effect of higher volumes, price and lower costs due to ongoing productivity initiatives and cost reductions.

Surface Technologies

	Quarter ended March 31, 2011 vs. 2010 % Change
Sales	
Volume/Price	14 %
Cost pass-through	1 %
 Total sales change	 15 %

Sales increased \$21 million, or 15%, for the first quarter versus 2010. Underlying sales increased 14% for the quarter due to higher aviation and industrial coatings volumes.

Operating profit increased \$6 million, or 32%, for the first quarter versus 2010. The increase was principally driven by higher volumes.

Currency

The results of Praxair's non-U.S. operations are translated to the company's reporting currency, the U.S. dollar, from the functional currencies used in the countries in which the company operates. For most foreign operations, Praxair uses the local currency as its functional currency. There is inherent variability and unpredictability in the relationship of these functional currencies to the U.S. dollar and such currency movements may materially impact Praxair's results of operations in any given period.

To help understand the reported results, the following is a summary of the significant currencies underlying Praxair's consolidated results and the exchange rates used to translate the financial statements (rates of exchange expressed in units of local currency per U.S. dollar):

Table of Contents

Currency	Percent of YTD 2011 Consolidated Sales ^(a)	Exchange Rate for Income Statement First Quarter Average		Exchange Rate for Balance Sheet

Net cash (used for) provided by financing activities	\$ (10)	\$ 150

Cash Flow from Operations

Cash provided by operations of \$359 million for first quarter decreased \$124 million versus 2010. The decrease was primarily due to working capital changes, which were partially offset by increased net income Praxair, Inc. plus depreciation and amortization during the current quarter. The working capital changes were primarily due to increased accounts receivable that support higher sales levels and higher incentive compensation payments related to the strong 2010 earnings levels.

Praxair estimates that 2011 contributions to its pension plans will be in the range of \$95 to \$105 million, of which \$8 million have been made through March 31, 2011. On April 6, 2011, Praxair made a cash contribution of \$75 million to one of its U.S. pension plans.

In the third quarter 2009, Praxair recorded the net impact related to a Federal tax amnesty program in Brazil (see Note 2 to the consolidated financial statements of Praxair's 2010 Annual Report on Form 10-K). The program required a cash outlay of \$34 million in the 2009 fourth

Edgar Filing: PRAXAIR INC - Form 10-Q

quarter and is expected to require up to an additional \$60 million of cash payments in the next twelve months depending on the timing of the Brazilian government consolidation process.

Table of Contents

Investing

Net cash used for investing of \$304 million for the first quarter increased \$20 million versus 2010. Capital expenditures of \$334 million relate largely to new production plants under contract for customers in North and South America, China and India.

Divestitures and asset sales of \$30 million increased \$22 million versus 2010 primarily due to the sale of the U.S. homecare business which closed on March 4, 2011.

A cash outlay of approximately \$70 million is anticipated during the second quarter of 2011 to complete the ROC acquisition.

Financing

Cash used for financing activities was \$10 million in 2011 versus cash provided by of \$150 million in 2010.

In 2011, net debt increases of \$263 million were more than offset by \$138 million of net common stock repurchases and \$152 million of cash dividends. Net common stock repurchases of \$138 million increased \$70 million versus 2010. Cash dividends of \$152 million increased \$14 million from the year ago period to \$0.50 per share (\$0.45 per share for 2010).

In 2010, net cash provided by financing of \$150 million was primarily due to net debt increases of \$356 million, partially offset by \$68 million of net common stock repurchases and \$138 million of cash dividends.

At March 31, 2011, Praxair's total debt outstanding was \$5,838 million, an increase of \$281 million from December 31, 2010. On March 4, 2011, Praxair issued \$500 million of 4.05% notes due 2021. The proceeds were used to reduce short-term debt, fund share repurchases under the share repurchase program and for general corporate purposes.

The company intends to secure a new credit facility to replace the \$1,000 million Senior Unsecured credit facility that is set to expire in December 2011.

Legal Proceedings

See Note 11 to the condensed consolidated financial statements for a description of current legal proceedings.

Non-GAAP Financial Measures

The following non-GAAP measures are intended to supplement investors' understanding of the company's financial information by providing measures which investors, financial analysts and management use to help evaluate the company's financial leverage, return on net assets employed and operating performance. Special items which the company does not believe to be indicative of on-going business trends are excluded from these calculations so that investors can better evaluate and analyze historical and future business trends on a consistent basis. Definitions of these non-GAAP measures may not be comparable to similar definitions used by other companies and are not a substitute for similar GAAP measures.

Table of Contents

The following are the non-GAAP measures presented in the MD&A:

<i>(Dollar amounts in millions, except per share data)</i>	Quarter Ended March 31,	
	2011	2010
Debt-to-capital	47.2%	48.5%
After-tax return on capital	14.4%	13.6%
Return on equity	26.6%	25.4%
Adjusted EBITDA	\$ 844	\$ 741
Debt-to-adjusted EBITDA	1.7	1.8

	Quarter Ended March 31,	
	2011	2010 (a)
Adjusted amounts for 2010:		
Operating profit	\$ 591	\$ 506
As a percent of sales	21.9%	20.8%
Effective tax rate	28.1%	27.8%
Net income - Praxair, Inc.	\$ 398	\$ 340
Diluted earnings per share	\$ 1.29	\$ 1.09

Debt-to-Capital Ratio

The debt-to-capital ratio is a measure used by investors, financial analysts and management to provide a measure of financial leverage and insights into how the company is financing its operations.

<i>(Dollar amounts in millions)</i>	March 31, 2011	December 31, 2010
Total debt	\$ 5,838	\$ 5,557
Equity		
Praxair, Inc. shareholders' equity	6,165	5,792
Noncontrolling interests	372	353
Total equity	6,537	6,145
Total capital	\$ 12,375	\$ 11,702
DEBT-TO-CAPITAL RATIO	47.2%	47.5%

After-tax Return on Capital (ROC)

After-tax return on capital is a measure used by investors, financial analysts and management to evaluate the return on net assets employed in the business. ROC measures the after-tax operating profit that the company was able to generate with the investments made by all parties in the business (debt, noncontrolling interests and Praxair, Inc. shareholders' equity).

Table of Contents

<i>(Dollar amounts in millions)</i>	Quarter Ended March 31,	
	2011	2010
Operating profit (a)	591	\$ 506
Less: income taxes (a)	(156)	(132)
Less: tax benefit on interest expense*	(10)	(9)
Add: equity income	9	7
Net operating profit after-tax (NOPAT)	\$ 434	\$ 372
Beginning capital	\$ 11,702	\$ 10,703
Ending capital	\$ 12,375	\$ 11,134
Average capital	\$ 12,039	\$ 10,919
ROC%	3.6%	3.4%
ROC% (annualized)	14.4%	13.6%

*Tax benefit on interest expense is computed using the effective rate adjusted for non-recurring income tax benefits. The effective tax rate used was 28% for 2011 and 2010.

Return on Praxair, Inc. Shareholders' Equity (ROE)

Return on Praxair, Inc. shareholders' equity is a measure used by investors, financial analysts and management to evaluate operating performance from a Praxair shareholder perspective. ROE measures the net income attributable to Praxair, Inc. that the company was able to generate with the money shareholders have invested.

<i>(Dollar amounts in millions)</i>	Quarter Ended March 31,	
	2011	2010
Net income - Praxair, Inc. (a)	\$ 398	\$ 340
Beginning Praxair, Inc. shareholders' equity	\$ 5,792	\$ 5,315
Ending Praxair, Inc. shareholders' equity	\$ 6,165	\$ 5,398
Average Praxair, Inc. shareholders' equity	\$ 5,979	\$ 5,357
ROE%	6.7%	6.3%
ROE% (annualized)	26.6%	25.4%

Adjusted EBITDA and Debt-to-Adjusted EBITDA Ratio

These measures are used by investors, financial analysts and management to assess a company's ability to meet its financial obligations.

New Accounting Standards

Refer to Note 1 of the condensed consolidated financial statements for information regarding new accounting standards.

Outlook

For the second quarter of 2011, diluted earnings per share are expected to be in the range of \$1.33 to \$1.38.

For the full year of 2011, Praxair expects sales of about \$11 billion. Reported diluted earnings per share are expected to be in the range of \$5.35 to \$5.45. Full-year capital expenditures are expected to be in the range of \$1.6-1.8 billion supporting the current backlog of projects under contract with customers, which will come on stream in 2011 through 2012.

Praxair provides quarterly updates on operating results, material trends that may affect financial performance, and financial earnings guidance via quarterly earnings releases and investor teleconferences. These updates are available on the company's website, www.praxair.com, but are not incorporated herein.

Forward-looking Statements

This document contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These statements are based on management's reasonable expectations and assumptions as of the date the statements are made but involve risks and uncertainties. These risks and uncertainties include, without limitation: the performance of stock markets generally; developments in worldwide and national economies and other international events and circumstances; changes in foreign currencies and in interest rates; the cost and availability of electric power, natural gas and other raw materials; the ability to achieve price increases to offset cost increases; catastrophic events including natural disasters, epidemics and acts of war and terrorism; the ability to attract, hire, and retain qualified personnel; the impact of changes in financial accounting standards; the impact of changes in pension plan liabilities; the impact of tax, environmental, healthcare and other legislation and government regulation in jurisdictions in which the company operates; the cost and outcomes of investigations, litigation and regulatory proceedings; continued timely development and market acceptance of new products and applications; the impact of competitive products and pricing; future financial and operating performance of major customers and industries served; and the effectiveness and speed of integrating new acquisitions into the business. These risks and uncertainties may cause actual future results or circumstances to differ materially from the projections or estimates contained in the forward-looking statements. The company assumes no obligation to update or provide revisions to any forward-looking statement in response to changing circumstances. The above listed risks and uncertainties are further described in Item 1A (Risk Factors) in this report which should be reviewed carefully. Please consider the company's forward-looking statements in light of those risks.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Refer to Item 7A. to Part II of Praxair's 2010 Annual Report on Form 10-K for discussion.

Item 4. Controls and Procedures

- (a) Based on an evaluation of the effectiveness of Praxair's disclosure controls and procedures, which was made under the supervision and with the participation of management, including Praxair's principal executive officer and principal financial officer, the principal executive officer and principal financial officer have each concluded that, as of the end of the quarterly period covered by this report, such disclosure controls and procedures are effective in ensuring that information required to be disclosed by Praxair in reports that it files under the Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and accumulated and communicated to management including Praxair's principal executive officer and principal financial officer, to allow timely decisions regarding required disclosure.

- (b) There were no changes in Praxair's internal control over financial reporting that occurred during the quarterly period covered by this report that have materially affected, or are reasonably likely to materially affect, Praxair's internal control over financial reporting.

Table of Contents

PART II - OTHER INFORMATION

Praxair, Inc. and Subsidiaries

Item 1. Legal Proceedings

See Note 11 to the condensed consolidated financial statements for a description of current legal proceedings.

Item 1A. Risk Factors

Due to the size and geographic reach of the company's operations, a wide range of factors, many of which are outside of the company's control, could materially affect the company's future operations and financial performance. Management believes the following risks may significantly impact the company:

General Economic Conditions - Weakening economic conditions in markets in which the company does business may adversely impact the company's financial results and/or cash flows.

Praxair serves approximately 25 diverse industries across more than 40 countries, which generally leads to financial stability through various business cycles. However, a broad decline in general economic or business conditions in the industries served by its customers could adversely affect the demand for Praxair's products and impair the ability of our customers to satisfy their obligations to the company, resulting in uncollected receivables and/or unanticipated contract terminations or project delays. In addition, many of the company's customers are in businesses that are cyclical in nature, such as the chemicals, metals and refining industries. Downturns in these industries may adversely impact the company during these cycles. Additionally, such conditions could impact the utilization of the company's manufacturing capacity which may require the company to recognize impairment losses on tangible assets such as property, plant and equipment as well as intangible assets such as intellectual property or goodwill.

Cost and Availability of Raw Materials and Energy - Increases in the cost of energy and raw materials and/or disruption in the supply of these materials could result in lost sales or reduced profitability.

Energy is the single largest cost item in the production and distribution of industrial gases. Most of Praxair's energy requirements are in the form of electricity, natural gas and diesel fuel for distribution. Praxair attempts to minimize the financial impact of variability in these costs through the management of customer contracts. Large customer contracts typically have escalation and pass-through clauses to recover energy and feedstock costs. Such attempts may not successfully mitigate cost variability which could negatively impact its financial condition or results of operations. The supply of energy has not been a significant issue in the geographic areas where it conducts business. However, regional energy conditions are unpredictable and may pose future risk.

For carbon dioxide, carbon monoxide, helium, hydrogen, specialty gases and surface technologies, raw materials are largely purchased from outside sources. Praxair has contracts or commitments for, or readily available sources of, most of these raw materials; however, their long-term availability and prices are subject to market conditions. A disruption in supply of such raw materials could impact the company's ability to meet contractual supply commitments.

International Events and Circumstances - The company's international operations are subject to the risks of doing business abroad and international events and circumstances may adversely impact its business, financial condition or results of operations.

Praxair has substantial international operations which are subject to risks including devaluations in currency exchange rates, transportation delays and interruptions, political and economic instability and disruptions, restrictions on the transfer of funds, the imposition of duties and tariffs, import and export controls, changes in governmental policies, labor unrest, possible nationalization and/or expropriation of assets, domestic and international tax laws and compliance with governmental regulations. These events could have an adverse effect on the international operations in the future by reducing the demand for its products, decreasing the prices at

Table of Contents

which it can sell its products, reducing the U.S. dollar value of revenue from international operations or otherwise having an adverse effect on its business. In particular, due to recent government actions related to business and currency regulations, there is considerable risk associated with operations in Venezuela (see Note 2 to the condensed consolidated financial statements). At March 31, 2011, Praxair's sales and net assets in Venezuela were less than 1% of Praxair's consolidated amounts.

Global Financial Markets Conditions - Macroeconomic factors may impact the company's ability to obtain financing or increase the cost of obtaining financing which may adversely impact the company's financial results and/or cash flows.

Volatility and disruption in the U.S. and global credit and equity markets, from time to time, could make it more difficult for Praxair to obtain financing for its operations and/or could increase the cost of obtaining financing. In addition, the company's borrowing costs can be affected by short and long-term debt ratings assigned by independent rating agencies which are based, in significant part, on the company's performance as measured by certain criteria such as interest coverage and leverage ratios. A decrease in these debt ratings could increase the cost of borrowing or make it more difficult to obtain financing. While the impact of continued volatility in the global credit markets cannot be predicted with certainty, the company believes that it has sufficient operating flexibility, cash reserves, and funding sources to maintain adequate amounts of liquidity to meet its business needs around the world.

Competitor Actions - The inability to effectively compete could adversely impact results of operations.

Praxair operates within a highly competitive environment worldwide. Competition is based on price, product quality, delivery, reliability, technology and service to customers. Competitors' behavior related to these areas could potentially have significant impacts on the company's financial results.

Governmental Regulations - The company is subject to a variety of United States and foreign government regulations. Changes in these regulations could have an adverse impact on the business, financial position and results of operations.

The company is subject to regulations in the following areas, among others:

Environmental protection;

Domestic and international tax laws and currency controls;

Safety;

Securities laws (e.g., SEC and generally accepted accounting principles in the United States);

Trade and import/ export restrictions;

Antitrust matters;

Global anti-bribery laws; and

Healthcare reimbursement regulations

Changes in these or other regulatory areas may impact the company's profitability, may require the company to spend additional resources to comply with the regulations, or may restrict the company's ability to compete effectively in the marketplace. Noncompliance with such laws and

Edgar Filing: PRAXAIR INC - Form 10-Q

regulations could result in penalties or sanctions that could have an adverse impact on the company's financial results. Environmental protection and healthcare reimbursement legislation are discussed further below.

Praxair is subject to various environmental and occupational health and safety laws and regulations, including those governing the discharge of pollutants into the air or water, the storage, handling and disposal of chemicals, hazardous substances and wastes, the remediation of contamination, the regulation of greenhouse gas emissions, and other potential climate change initiatives. Violations of these laws could result in substantial penalties, third party claims for property damage or personal injury, or sanctions. The company may also be subject to liability for the investigation and remediation of environmental contamination at properties that it owns or operates and at other properties where Praxair or its predecessors have operated or arranged for the disposal of hazardous wastes.

Table of Contents

Although management does not believe that any such liabilities will have a material adverse impact on its financial position and results of operations, management cannot provide assurance that such costs will not increase in the future or will not become material. See the section captioned "Management's Discussion and Analysis - Environmental Matters" in Item 7 of Praxair's 2009 Annual Report on Form 10-K.

Recent legislation in the United States, including the 2010 Patient Protection and Affordable Care Act, contain provisions that will significantly impact government reimbursement of healthcare-related products and services provided by Praxair to its customers. Many provisions are not effective for several years and regulations have either not been issued or their impact is unclear. Therefore, it is not possible to predict the impact on the company's financial results. Praxair is continuously evaluating and monitoring the impact of this legislation, including any actions that may be appropriate.

Catastrophic Events - Catastrophic events could disrupt the operations of the company and/or its customers and suppliers and may have a significant adverse impact on the results of operations.

The occurrence of catastrophic events or natural disasters such as hurricanes, health epidemics, acts of war or terrorism, could disrupt or delay the company's ability to produce and distribute its products to customers and could potentially expose the company to third-party liability claims. In addition, such events could impact the company's customers and suppliers resulting in temporary or long-term outages and/or the limitation of supply of energy and other raw materials used in normal business operations. These situations are outside the company's control and may have a significant adverse impact on the company's financial results.

Retaining Qualified Personnel - The inability to attract and retain qualified personnel may adversely impact the company's business.

If Praxair fails to attract, hire and retain qualified personnel, the company may not be able to develop, market or sell its products or successfully manage its business. Praxair is dependent upon its highly skilled, experienced and efficient workforce to be successful. Much of Praxair's competitive advantage is based on the expertise and experience of its key personnel regarding its marketing, technology, manufacturing and distribution infrastructure, systems and products. The inability to attract and hire qualified individuals or the loss of key employees in very skilled areas could have a negative effect on the company's financial results.

Technological Advances - If the company fails to keep pace with technological advances in the industry or if new technology initiatives do not become commercially accepted, customers may not continue to buy the company's products and results of operations could be adversely affected.

Praxair's research and development is directed toward developing new and improved methods for the production and distribution of industrial gases and the development of new markets and applications for the use of these gases. This results in the frequent introduction of new industrial gas applications and the development of new advanced air separation process technologies. The company also conducts research and development for its surface technologies to improve the quality and durability of coatings and the use of specialty powders for new applications and industries. The results of these research and development activities help Praxair to create a competitive advantage and provide a platform for the company to grow its business at greater percentages than the rate of industrial production growth in the geographies where it operates. If Praxair's research and development activities did not keep pace with competitors or if it did not create new applications that benefit customers, then the company's future results of operations could be adversely affected.

Litigation and Governmental Investigations - The outcomes of litigation and governmental investigations may affect the company's financial results.

Praxair is subject to various lawsuits and governmental investigations arising out of the normal course of business that may result in adverse outcomes. These actions are based upon alleged environmental, tax, antitrust and personal injury claims, among others. Adverse outcomes in some or all of the claims pending may result in significant monetary damages or injunctive relief that could adversely affect its ability to conduct business. While management currently believes that resolving all of these matters, individually or in the aggregate, will not have a material adverse impact on the company's financial position or liquidity, the litigation and other claims Praxair faces are subject to inherent uncertainties and management's view of these matters may change in the future. There

Table of Contents

exists the possibility of a material adverse impact on the company's results of operations for the period in which the effect of an unfavorable final outcome becomes probable and reasonably estimable.

Tax Liabilities - Potential tax liabilities could adversely impact the company's financial position and results of operations.

Praxair is subject to income and other taxes in both the United States and numerous foreign jurisdictions. The determination of the company's worldwide provision for income taxes and other tax liabilities requires judgment and is based on diverse legislative and regulatory structures that exist in the various jurisdictions where the company operates. Although management believes its estimates are reasonable, the ultimate tax outcome may differ from the amounts recorded in its financial statements and may materially affect the company's financial results for the period when such determination is made. See Notes 5 and 17 to the consolidated financial statements of Praxair's 2010 Annual Report on Form 10-K.

Pension Liabilities - Risks related to our pension benefit plans may adversely impact our results of operations and cash flows.

Pension benefits represent significant financial obligations that will be ultimately settled in the future with employees who meet eligibility requirements. Because of the uncertainties involved in estimating the timing and amount of future payments and asset returns, significant estimates are required to calculate pension expense and liabilities related to the company's plans. The company utilizes the services of independent actuaries, whose models are used to facilitate these calculations. Several key assumptions are used in the actuarial models to calculate pension expense and liability amounts recorded in the consolidated financial statements. In particular, significant changes in actual investment returns on pension assets, discount rates, or legislative or regulatory changes could impact future results of operations and required pension contributions. For information regarding the potential impacts regarding significant assumptions used to estimate pension expense, including discount rates and the expected long-term rates of return on plan assets. See *Critical Accounting Policies - Pension Benefits* included in *Management's Discussion and Analysis of Financial Condition and Results of Operations* in Item 7 of Praxair's 2010 Annual Report on Form 10-K.

Operational Risks - Operational risks may adversely impact the company's business or results of operations.

Praxair's operating results are dependent on the continued operation of its production facilities and its ability to meet customer contract requirements and other needs. Insufficient or excess capacity threatens the company's ability to generate competitive profit margins and may expose the company to liabilities related to contract commitments. Operating results are also dependent on the company's ability to complete new construction projects on time, on budget and in accordance with performance requirements. Failure to do so may expose the business to loss of revenue, potential litigation and loss of business reputation.

Also inherent in the management of the company's production facilities and delivery systems, including storage, vehicle transportation and pipelines, are operational risks that require continuous training, oversight and control. Material operating failures at production, storage facilities or pipelines, including fire, toxic release and explosions, or the occurrence of vehicle transportation accidents could result in loss of life, damage to the environment, loss of production and/or extensive property damage, all of which may negatively impact the company's financial results.

Information Technology Systems - The Company may be subject to information technology system failures, network disruptions and breaches in data security.

Praxair utilizes an enterprise resource planning system and other technologies for the exchange of information both within the company and in communicating with third parties. These systems are susceptible to outages due to fire, floods, power loss, telecommunications failures, viruses, break-ins and similar events, or breaches of security. The occurrence of these or other events could disrupt or damage the company's information technology systems and inhibit the ability to access Praxair's information systems. Management has taken steps to address these risks and concerns by implementing advanced security technologies, internal controls, network and data center resiliency and recovery processes. Despite these steps, however, a failure of the company's information technology systems could have a material adverse impact on Praxair's operations, reputation and financial results.

Table of Contents

Acquisitions - The inability to effectively integrate acquisitions could adversely impact the company's financial position and results of operations.

Praxair has evaluated, and expects to continue to evaluate, a wide array of potential strategic acquisitions. Many of these acquisitions, if consummated, could be material to its financial condition and results of operations. In addition, the process of integrating an acquired company, business or group of assets may create unforeseen operating difficulties and expenditures. Although historically the company has been successful with its acquisition strategy and execution, the areas where the company may face risks include:

The need to implement or remediate controls, procedures and policies appropriate for a larger public company at companies that prior to the acquisition lacked these controls, procedures and policies;

Diversion of management time and focus from operating existing business to acquisition integration challenges;

Cultural challenges associated with integrating employees from the acquired company into the existing organization;

The need to integrate each company's accounting, management information, human resource and other administrative systems to permit effective management;

Difficulty with the assimilation of acquired operations and products;

Failure to achieve targeted synergies; and

Inability to retain key employees and business relationships of acquired companies.

Foreign acquisitions involve unique risks in addition to those mentioned above, including those related to integration of operations across different cultures and languages, currency risks and the particular economic, political and regulatory risks associated with specific countries. Also, the anticipated benefit of the company's acquisitions may not materialize. Future acquisitions or dispositions could result in potentially dilutive issuances of equity securities, the incurrence of debt, contingent liabilities or amortization expenses, or impairments of goodwill, any of which could adversely impact the company's financial results.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Purchases of Equity Securities- Certain information regarding purchases made by or on behalf of the company or any affiliated purchaser (as defined in Rule 10b-18(a)(3) under the Securities Exchange Act of 1934, as amended) of its common stock during the quarter ended March 31, 2011 is provided below:

Period	Total Number of Shares Purchased (Thousands)	Average Price Paid Per Share	Total Numbers of Shares Purchased as Part of Publicly Announced Program	Maximum Number (or approximate dollar value) of Shares that May Yet be Purchased Under the
