NXP Semiconductors Reports Second Quarter 2011 Results

	Q2 2011
GAAP Gross margin	46.7%
GAAP Operating margin	11.9%
GAAP Earnings per share	\$ 0.33
Non-GAAP Gross margin	47.8%
Non-GAAP Operating margin	20.4%
Non-GAAP Earnings per share	\$ 0.51

Trailing twelve month adjusted EBITDA \$1,164 million

Net debt reduced \$383 million year-on-year to \$3,847 million

Standard and Poor's raises corporate credit rating to B+ from B-
Eindhoven, The Netherlands, July 28, 2011 NXP Semiconductors N.V. (NASDAQ: NXPI) today reported financial results for the second quarter 2011, ended July 3, 2011, and provided guidance for the third quarter 2011.

Second Quarter 2011 GAAP Results

Product Revenue from continuing operations was \$1,025 million, an increase of 10.7 percent from the \$926 million reported in the second quarter of 2010, and an increase of 4.7 percent from the \$979 million reported in the first quarter of 2011. Product Revenue is the combination of revenue from the HPMS and Standard Products segments. Total revenue from continuing operations was \$1,121 million, an increase of 0.2 percent from the \$1,119 million reported in second quarter of 2010 and an increase of 3.6 percent from the \$1,082 million reported in the first quarter of 2011.

Revenue attributable to the combination of the Manufacturing Operations and Corporate and Other segments was \$96 million, a 50.3 percent decrease from the \$193 million reported in the second quarter of 2010, and a 6.8 percent decrease from the \$103 million reported in the first quarter of 2011. The anticipated decline was primarily due to lower revenue in the Manufacturing Operations segment, as contractual obligations to provide manufacturing services for previously divested businesses continue to expire. Included in the total revenue for the second quarter of 2010 was \$28 million related to the divested NuTune business.

Gross profit from continuing operations for the second quarter of 2011 was \$523 million, or 46.7 percent of revenue, as compared to \$446 million, or 39.9 percent of revenue reported in the second quarter of 2010. This compares to the \$506 million, or 46.8 percent of revenue reported in the first quarter 2011.

Operating income from continuing operations for the second quarter of 2011 was \$133 million, or 11.9 percent of revenue, as compared to an operating income of \$76 million reported in the second quarter of 2010, or 6.8 percent of revenue. This compares to an operating income of \$108 million, or 10.0 percent of revenue as reported in the first quarter of 2011.

Net income for the second quarter of 2011 was \$84 million or \$0.33 per share (diluted). This compares to a net loss of \$362 million, or a loss of \$1.68 per share reported in the second quarter of 2010, and net income of \$187 million or \$0.73 per share (diluted) reported in the first quarter of 2011. During the second quarter of 2011 net income was impacted as compared to the first quarter of 2011 due to currency fluctuations on the company's U.S. dollar-denominated debt.

All current and all prior period financial figures have been restated to reflect the previously announced divestiture of NXP's Sound Solutions business. The historical results of the Sound Solutions business are treated as a discontinued operation in NXP's financial statements.

Second Quarter 2011 non-GAAP Results

Non-GAAP gross profit from continuing operations was \$536 million, or 47.8 percent of revenue, an increase from the \$456 million, or 40.8 percent of revenue reported in the second quarter of 2010. This compares to \$517 million, or 47.8 percent of revenue reported in the first quarter of 2011.

Non-GAAP operating income from continuing operations was \$229 million, or 20.4 percent of revenue, an increase from the \$165 million, or 14.7 percent of revenue, reported in the second quarter of 2010. This compares to the non-GAAP operating income of \$223 million, or 20.6 percent of revenue reported in the first quarter of 2011.

Non-GAAP net income was \$130 million, or \$0.51 per share (diluted). This compares to non-GAAP net income of \$74 million, or \$0.34 per share (diluted) reported in the second quarter of 2010, and a net income of \$117 million or \$0.46 per share (diluted) reported in the first quarter of 2011.

NXP delivered revenue growth during the second quarter at the high end of our original guidance with all of our business lines delivering sequential revenue growth, said Richard Clemmer, NXP Chief Executive Officer. Our quarterly performance marks the ninth consecutive quarter of sequential product revenue growth, a demonstration of the continued customer adoption of our overall product portfolio. As an example of customer recognition, NXP was recently awarded the Bosch Supplier Award from the Bosch Group, the automotive industries largest electronics supplier. The award was due to demonstrated excellence in the areas of manufacturing quality, technology and continuous improvement in product supply. We are very proud of the recognition bestowed on NXP.

Our overall profitability remained flat during the quarter as non-GAAP gross margin was nearly 48 percent, a 700 basis point improvement versus the year ago period. We once again delivered improved operating profit during the quarter, as non-GAAP operating margin was just over 20 percent, a 570 basis point improvement versus the year ago period and in-line with our original guidance. However, within our HPMS segment, we experienced a moderation in gross margin expansion due to product mix within certain business lines combined with increased input costs.

On July 4, 2011, we successfully closed the sale of our Sound Solutions business and received \$855 million in gross proceeds. The closure of this transaction enables NXP to continue to focus on its core semiconductor business and to accelerate the process of de-leveraging our balance sheet. We have already applied a portion of the proceeds toward debt repayment.

Within our High Performance Mixed Signal (HPMS) segment, revenue increased 5 percent sequentially, at the high end of our prior expectations. Growth was driven by strong demand within our Wireless Infrastructure, Industrial and Lighting business with high-performance RF power amplifiers, 32-bit ARM-based MCUs and lighting products all showing strong sequential growth. Additionally, as previously anticipated we experienced a seasonal rebound in our Automotive business and continued strength in our Identification business, said Clemmer.

Additional Information

Annualized cost savings for the Redesign Program were \$17 million in the second quarter of 2011, bringing the cumulative total since inception of the program to \$831 million. NXP continues to estimate that the total annualized program savings since inception in September 2008 through its expected completion at the end of 2011 to be between \$900 to 950 million.

Cash paid out for the Redesign Program was \$15 million in the second quarter of 2011, bringing the cumulative total since the beginning of the program to \$712 million. NXP continues to estimate that total program costs since inception in 2008 through its expected completion at the end of 2011 will be no greater than \$725 million.

Net cash interest paid was \$80 million during the second quarter of 2011.

SSMC, NXP's consolidated joint-venture wafer fab with TSMC, reported second quarter 2011 operating income of \$33 million, EBITDA of \$44 million and had an ending cash balance of \$196 million.

Edgar Filing: NXP Semiconductors N.V. - Form 6-K

Utilization in NXP wafer fabs averaged 94 percent in the second quarter 2011 compared to 96 percent in the year ago period and 97 percent in the prior quarter.

During the second quarter of 2011 NXP's total debt balance increased by \$73 million due to a combination of currency fluctuations which impact the company's Euro-based long-term debt and by the issuance of a new term loan, due in 2017 for \$500 million and the drawdown under the Revolving Credit Facility for \$200 million which were partly offset by debt retirement of \$664 million.

On July 5, 2011 NXP announced the completion of its agreement with Dover Corporation (NYSE: DOV) whereby Dover's Knowles Electronics business has acquired NXP's Sound Solutions business, initially announced on December 22, 2010. Under the terms of the agreement, Knowles has acquired NXP's Sound Solutions business for \$855 million in cash.

On July 7, 2011 Standard & Poor's raised NXP's corporate credit rating to B+ from B- and removed all ratings from Credit Watch.

Guidance for the Third Quarter 2011:

Product Revenue for the third quarter of 2011 is anticipated to be in a range of down 5 percent to up 1 percent sequentially as compared to the second quarter of 2011. Product Revenue is the combination of revenue from the HPMS and Standard Products segments.

The combination of revenue from Manufacturing Operations and Corporate and Other segments is anticipated to be approximately \$96 million.

Non-GAAP operating profit from continuing operations is expected to be in a range of \$210 million to \$232 million.

Interest expense is anticipated to be approximately \$72 million.

Cash income tax is anticipated to be approximately \$5 million.

Income attributable to non-controlling interests is anticipated to approximately \$12 million.

Average diluted share count is anticipated to be approximately 257 million shares.

Non-GAAP EPS is anticipated to be in a range of \$0.47 to \$0.56 per share.

Discussion of GAAP to non-GAAP Reconciliations

NXP provides financial information on both a U.S. generally accepted accounting principles (GAAP) and non-GAAP basis. Reconciliations of these non-GAAP measures to the most comparable measures calculated in accordance with GAAP are provided in this release.

Non-GAAP information should not be considered a substitute for any information derived or calculated in accordance with GAAP. NXP provides this information as an additional insight as to how management assesses the performance and allocation of resources among its various segments and because the financial community uses it in its analysis of NXP's operating performance, historical results and projections of NXP's future operating results.

The non-GAAP measures used herein are not intended to be measures of financial performance or condition, liquidity or profitability in accordance with GAAP, and should not be considered as alternatives to net income (loss), operating income, or any other performance measures determined in accordance with GAAP.

Certain information referred to in this release, including non-GAAP gross margin, non-GAAP operating margin, EBITDA, Adjusted EBITDA and Adjusted EBITDA - last 12 months, have not been derived in accordance with GAAP and can vary from other participants in the semiconductor industry. These measures have limitations as analytical tools and should not be considered in isolation or as substitutes for analysis of NXP's financial results as reported under GAAP. In this release the use of the terms:

Edgar Filing: NXP Semiconductors N.V. - Form 6-K

Non-GAAP gross profit , non-GAAP gross margin , non-GAAP operating margin , non-GAAP operating income and non-GAAP net income are all non-GAAP financial measure that reflect the underlying operating and profit structure of NXP operations net of purchase price accounting (PPA), restructuring, other incidental items and the impact of other non-cash adjustments.

EBITDA, Adjusted EBITDA and Trailing 12 month adjusted EBITDA, are not intended to be a measure of free cash flow for management's discretionary use, as these metrics do not consider certain cash requirements such as interest payments, tax payments, debt service requirements and replacement of fixed assets.

PPA effects reflect the fair value adjustments impacting acquisition accounting and other acquisition adjustments charged to the income statement applied to the formation of NXP on September 29, 2006 and all subsequent acquisitions. The PPA effect on the Company's gross profit refers to additional depreciation charges on tangible fixed assets, resulting from the step-up in fair values. The PPA effect in research and development expenses represents the write-off of in-process R&D. The amortization charges related to long-lived intangible assets are reflected in general and administrative expenses.

Other incidental items consist of process and product transfer costs (which refer to the costs incurred in transferring a production process and products from one manufacturing site to another), and gains and losses resulting from our divestment activities. NXP presents other incidental items in its analysis of results of operations because these costs, gains and losses, have affected the comparability of the company's results over the years.

Net debt refers to the sum total of long and short term debt less total cash and cash equivalents, as reflected on the balance sheet.

Conference Call and Webcast Information

NXP will host a conference call on July 28, 2011 at 4:45 p.m. U.S. Eastern Time (10:45 p.m. Central European Time) to discuss its second quarter 2011 results and provide an outlook for the third quarter of 2011. To listen to the webcast, please visit the Investor Relations section of the NXP website at www.nxp.com/investor. The webcast will be recorded and available for replay shortly after the call concludes.

About NXP Semiconductors

NXP Semiconductors N.V. (NASDAQ: NXPI) provides High Performance Mixed Signal and Standard Product solutions that leverage its leading RF, Analog, Power Management, Interface, Security and Digital Processing expertise. These innovations are used in a wide range of automotive, identification, wireless infrastructure, lighting, industrial, mobile, consumer and computing applications. A global semiconductor company with operations in more than 25 countries, NXP posted revenue of \$4.4 billion in 2010. Additional information can be found by visiting www.nxp.com.

Forward-looking Statements

This document includes forward-looking statements which include statements regarding NXP's business strategy, financial condition, results of operations, and market data, as well as any other statements which are not historical facts. By their nature, forward-looking statements are subject to numerous factors, risks and uncertainties that could cause actual outcomes and results to be materially different from those projected. These factors, risks and uncertainties include the following: market demand and semiconductor industry conditions; the ability to successfully introduce new technologies and products; the end-market demand for the goods into which NXP's products are incorporated; the ability to generate sufficient cash, raise sufficient capital or refinance corporate debt at or before maturity; the ability to meet the combination of corporate debt service, research and development and capital investment requirements; the ability to accurately estimate demand and match manufacturing production capacity accordingly or obtain supplies from third-party producers; the access to production capacity from third-party outsourcing partners; any events that might affect third-party business partners or NXP's relationship with them; the ability to secure adequate and timely supply of equipment and materials from suppliers; the ability to avoid operational problems and product defects and, if such issues were to arise, to correct them quickly; the ability to form strategic partnerships and joint ventures and to successfully cooperate with alliance partners; the ability to win competitive bid selection processes to develop products for use in customers' equipment and products; the ability to successfully establish a brand identity; the ability to successfully hire and retain key management and senior product architects; and, the ability to maintain good relationships with our suppliers. In addition, this document contains information concerning the semiconductor industry and NXP's business segments generally, which is forward-looking in nature and is based on a variety of assumptions regarding the ways in which the semiconductor industry, NXP's market segments and product areas may develop. NXP has based these assumptions on information currently available, if any one or more of these assumptions turn out to be

incorrect, actual market results may differ from those predicted. While NXP does not know what impact any such differences may have on its business, if there are such differences, its future results of operations and its financial condition could be materially adversely affected. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak to results only as of the date the statements were made. Except for any ongoing obligation to disclose material information as required by the United States federal securities laws, NXP does not have any intention or obligation to publicly update or revise any forward-looking statements after we distribute this document, whether to reflect any future events or circumstances or otherwise. For a discussion of potential risks and uncertainties, please refer to the risk factors listed in our SEC filings. Copies of our SEC filings are available from on our Investor Relations website, www.nxp.com/investor or from the SEC website, www.sec.gov.
