**Sonic Foundry, Inc.**

**Notes to Condensed Consolidated Financial Statements**

**June 30, 2011**

**(Unaudited)**

**1. Basis of Presentation and Significant Accounting Policies**

Sonic Foundry, Inc. (the Company) is in the business of providing enterprise solutions and services for the web communications market.

***Interim Financial Data***

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States ( GAAP ) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and notes required by GAAP for complete financial statements. In the opinion of management, all adjustments (consisting only of adjustments of a normal and recurring nature) considered necessary for fair presentation of the results of operations have been included. Operating results for the three and nine month periods ended June 30, 2011 are not necessarily indicative of the results that might be expected for the year ending September 30, 2011.

The condensed consolidated balance sheet at September 30, 2010 has been derived from audited financial statements at that date, but do not include all of the information and disclosures required by GAAP. For a more complete discussion of accounting policies and certain other information, refer to the Company s annual report filed on Form 10-K for the fiscal year ended September 30, 2010.

***Revenue Recognition***

**General**

Revenue is recognized when persuasive evidence of an arrangement exists, delivery occurs or services are rendered, the sales price is fixed and determinable and collectability is reasonably assured. Revenue is deferred when undelivered products or services are essential to the functionality of delivered products, customer acceptance is uncertain, significant obligations remain, or the fair value of undelivered elements is unknown. The Company does not offer customers the right to return product, other than for exchange or repair pursuant to a warranty or stock rotation. The Company s policy is to reduce revenue when it incurs an obligation for price rebates or other such programs during the period the obligation and sale occurs. The following policies apply to the Company s major categories of revenue transactions.

**Products**

Products are considered delivered, and revenue is recognized, when title and risk of loss have been transferred to the customer. Under the terms and conditions of the sale, this occurs at the time of shipment to the customer. Product revenue currently represents sales of our Mediasite recorder and Mediasite related products such as our server software.

**Services**

The Company sells support and content hosting contracts to their customers, typically one year in length and records the related revenue ratably over the contractual period. Support contracts cover phone and electronic technical support availability over and above the level provided by our distributors, software upgrades on a when and if available basis, advance hardware replacement and an extension of the standard hardware warranty from 90 days to one year. The manufacturer the Company contracts with to build the units performs hardware warranty service. The Company also sells installation, training, event webcasting, and customer content hosting services. Revenue for

---

**Table of Contents**

those services is recognized when performed in the case of installation, training and event webcasting services and is recognized ratably over the contract period when these additional elements are sold with hosting. Service amounts invoiced to customers in excess of revenue recognized are recorded as deferred revenue until the revenue recognition criteria are met.

**Revenue Arrangements that Include Multiple Elements**

The Company has historically applied the software revenue recognition rules as prescribed by Accounting Standards Codification (ASC) Subtopic 985-605. In October 2009, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) Number 2009-14, *Certain Revenue Arrangements That Include Software Elements*, which amended ASC Subtopic 985-605. This ASU removes tangible products containing software components and non-software components that function together to deliver the product's essential functionality from the scope of the software revenue recognition rules. In the case of the Company's hardware products with embedded software, the Company has determined that the hardware and software components function together to deliver the product's essential functionality, and therefore, the revenue from the sale of these products no longer falls within the scope of the software revenue recognition rules. Revenue from the sale of software-only products remains within the scope of the software revenue recognition rules. Installation, training, and post customer support no longer fall within the scope of the software revenue recognition rules, except when they are sold with and relate to a software-only product. Revenue recognition for products that no longer fall under the scope of the software revenue recognition rules is similar to that for other tangible products. ASU Number 2009-13, *Multiple-Deliverable Revenue Arrangements*, which amended ASC Topic 605 and was also issued in October 2009, is applicable for multiple-deliverable revenue arrangements. ASU 2009-13 allows companies to allocate revenue in a multiple-deliverable arrangement in a manner that better reflects the transaction's economics. ASU 2009-13 and 2009-14 are effective for revenue arrangements entered into or materially modified in the Company's fiscal year 2011.

Under the software revenue recognition rules, the fee from a multiple-deliverable arrangement is allocated to each of the undelivered elements based upon vendor-specific objective evidence (VSOE), which is limited to the price charged when the same deliverable is sold separately, with the residual value from the arrangement allocated to the delivered element. The portion of the fee that is allocated to each deliverable is then recognized as revenue when the criteria for revenue recognition are met with respect to that deliverable. If VSOE does not exist for all of the undelivered elements, then all revenue from the arrangement is typically deferred until all elements have been delivered to the customer. All revenue arrangements, with the exception of hosting contracts, entered into prior to October 1, 2010 and the sale of all software-only products and associated services have been accounted for under this guidance during the nine-month period ended June 30, 2011.

Under the revenue recognition rules for tangible products as amended by ASU 2009-13, the fee from a multiple-deliverable arrangement is allocated to each of the deliverables based upon their relative selling prices as determined by a selling-price hierarchy. A deliverable in an arrangement qualifies as a separate unit of accounting if the delivered item has value to the customer on a stand-alone basis. A delivered item that does not qualify as a separate unit of accounting is combined with the other undelivered items in the arrangement and revenue is recognized for those combined deliverables as a single unit of accounting. The selling price used for each deliverable is based upon VSOE if available, third-party evidence (TPE) if VSOE is not available, and best estimate of selling price (ESP) if neither VSOE nor TPE are available. TPE is the price of the Company's or any competitor's largely interchangeable products or services in stand-alone sales to similarly situated customers. ESP is the price at which the Company would sell the deliverable if it were sold regularly on a stand-alone basis, considering market conditions and entity-specific factors. All revenue arrangements negotiated after September 30, 2010, excluding the sale of all software-only products and associated services, have been accounted for under this guidance during the nine-month period ended June 30, 2011.

The selling prices used in the relative selling price allocation method are as follows: (1) for the Company's products and services are based upon VSOE, (2) for hardware products with embedded software for which VSOE does not exist are based upon ESP. The Company does not believe TPE exists for any of these products and services because they are differentiated from competing products and services in terms of functionality and performance and there are no competing products or services that are largely interchangeable. Management establishes ESP for hardware products with embedded software using a cost plus margin approach with consideration for market conditions, such as the impact of competition and geographic considerations, and entity-specific factors, such as the cost of the

## **Table of Contents**

product and the Company's profit objectives. Management believes that ESP is reflective of reasonable pricing of that deliverable as if priced on a stand-alone basis. When a sales transaction includes deliverables that are divided between ASC Topic 605 and ASC Subtopic 985-605, the Company allocates the selling price using the relative selling price method.

While the pricing model, currently in use, captures all critical variables, unforeseen changes due to external market forces may result in a revision of the inputs. These modifications may result in the consideration allocation differing from the one presently in use. Absent a significant change in the pricing inputs or the way in which the industry structures its deals, future changes in the pricing model are not expected to materially affect our allocation of arrangement consideration.

Billings for hosting are spread ratably over the term of the hosting agreement, with the typical hosting agreement having a term of 12 months, with renewal on an annual basis. The Company sells most hosting contracts without the inclusion of products, and occasionally some hosting contracts in conjunction with the sale of product. When the hosting arrangement is sold in conjunction with product, the product revenue is recognized immediately while the remaining hosting revenue is spread ratably over the term of the hosting agreement. The selling price is allocated between these elements using the relative selling price method. The Company uses the estimated selling price method for development of the selling price for hardware products with embedded software.

### Reserves

The Company records reserves for stock rotations, price adjustments, rebates, and sales incentives to reduce revenue and accounts receivable for these and other credits granted to customers. Such reserves are recorded at the time of sale and are calculated based on historical information (such as rates of product stock rotations) and the specific terms of sales programs, taking into account any other known information about likely customer behavior. If actual customer behavior differs from our expectations, additional reserves may be required. Also, if the Company determines that it can no longer accurately estimate amounts for stock rotations and sales incentives, the Company would not be able to recognize revenue until resellers sell the inventory to the final end user.

### Shipping and Handling

The Company's shipping and handling costs billed to customers are included in other revenue. Costs related to shipping and handling are included in cost of revenue and are recorded at the time of shipment to the customer.

### *Concentration of Credit Risk and Other Risks and Uncertainties*

The Company's cash and cash equivalents are deposited with two major financial institutions. At times, deposits in these institutions exceed the amount of insurance provided on such deposits. The Company has not experienced any losses on such amounts and believes that it is not exposed to any significant credit risk on these balances.

We assess the realization of our receivables by performing ongoing credit evaluations of our customers' financial condition. Through these evaluations, we may become aware of a situation where a customer may not be able to meet its financial obligations due to deterioration of its financial viability, credit ratings or bankruptcy. Our reserve requirements are based on the best facts available to us and are reevaluated and adjusted as additional information is received. Our reserves are also based on amounts determined by using percentages applied to certain aged receivable categories. These percentages are determined by a variety of factors including, but not limited to, current economic trends, historical payment and bad debt write-off experience. Allowance for doubtful accounts for accounts receivable was \$90,000 as of June 30, 2011 and \$105,000 at September 30, 2010.

### *Cash and Cash Equivalents*

The Company considers all highly liquid investments purchased with an original maturity of three months or less to be cash equivalents.

**Table of Contents****Inventory Valuation**

Inventory consists of raw materials and supplies used in the assembly of Mediasite units and finished Mediasite units. Inventory of completed Mediasite units and spare parts are carried at the lower of cost or market, with cost determined on a first-in, first-out basis. Inventory consists of the following (in thousands):

	June 30, 2011	September 30, 2010
Raw materials and supplies	\$ 10	\$ 10
Finished goods	564	531
	\$ 574	\$ 541

**Stock Based Compensation**

The Company uses a lattice valuation model to account for all employee stock options granted. The lattice valuation model is a more flexible analysis to value options because of its ability to incorporate inputs that change over time, such as actual exercise behavior of option holders. The Company uses historical data to estimate the option exercise and employee departure behavior in the lattice valuation model. Expected volatility is based on historical volatility of the Company's stock. The Company considers all employees to have similar exercise behavior and therefore has not identified separate homogenous groups for valuation. The expected term of options granted is derived from the output of the option pricing model and represents the period of time that options granted are expected to be outstanding. The risk-free rate for periods the options are expected to be outstanding is based on the U.S. Treasury yields in effect at the time of grant. Forfeitures are based on actual behavior patterns.

The fair value of each option grant is estimated using the assumptions in the following table:

	Three months ended June 30,	
	2011	2010
Expected life	4.8 years	4.6 years
Risk-free interest rate	0.97%	1.24%
Expected volatility	71.60%	83.75%
Expected forfeiture rate	13.24%	16.32%
Expected exercise factor	1.31	1.24
Expected dividend yield	0%	0%

A summary of option activity as of June 30, 2011 and changes during the nine months then ended is presented below:

	Options	Weighted- Average Exercise Price	Weighted- Average Remaining Contractual Period
Outstanding at October 1, 2010	764,718	\$ 10.98	5.7
Granted	143,551	14.07	9.8
Exercised	(111,527)	10.48	1.4
Forfeited	(26,790)	11.27	6.6
Outstanding at June 30, 2011	769,952	11.61	6.3
Exercisable at June 30, 2011	533,696	12.05	5.1

**Table of Contents**

A summary of the status of the Company's non-vested shares and changes during the nine month period ended June 30, 2011 is presented below:

<b>Non-vested Shares</b>	<b>Shares</b>	<b>2011 Weighted-Average Grant Date Fair Value</b>
Non-vested at October 1,	209,131	\$ 4.28
Granted	143,551	6.05
Vested	(97,419)	5.30
Forfeited	(19,007)	4.36
<b>Non-vested at June 30,</b>	<b>236,256</b>	<b>\$ 5.15</b>

The weighted average grant date fair value of options granted during the nine months ended June 30, 2011 was \$6.05. As of June 30, 2011, there was \$824 thousand of total unrecognized compensation cost related to non-vested share-based compensation, including \$137 thousand of estimated forfeitures. The cost is expected to be recognized over a weighted-average remaining life of 2.14 years.

Stock-based compensation recorded in the three month period ended June 30, 2011 of \$157 thousand was allocated \$107 thousand to selling and marketing expenses, \$12 thousand to general and administrative expenses, and \$38 thousand to product development expenses. Stock-based compensation recorded in the nine month period ended June 30, 2011 of \$527 thousand was allocated \$361 thousand to selling and marketing expenses, \$36 thousand to general and administrative expenses, and \$130 thousand to product development expenses. Cash received from option and warrant exercises under all stock option plans for the three and nine month periods ended June 30, 2011 was \$418 thousand and \$1.45 million, respectively. Cash received from option and warrant exercises under all stock option plans for the three and nine month periods ended June 30, 2010 was \$1 and \$12 thousand, respectively. There were no tax benefits realized for tax deductions from option exercises in either of the nine month periods ended June 30, 2011 or 2010. The Company currently expects to satisfy share-based awards with registered shares available to be issued.

The Company also has an Employee Stock Purchase Plan (Purchase Plan) under which an aggregate of 100,000 common shares may be issued. The Shareholders approved an amendment to increase the number of shares of common stock subject to the plan from 50,000 to 100,000 at the Company's annual meeting in March 2011. All employees who have completed 90 days of employment with the Company on the first day of each offering period and customarily work twenty hours per week or more are eligible to participate in the Purchase Plan. An employee who, after the grant of an option to purchase, would hold common stock and/or hold outstanding options to purchase stock possessing 5% or more of the total combined voting power or value of the Company will not be eligible to participate. Eligible employees may make contributions through payroll deductions of up to 10% of their compensation. No participant in the Purchase Plan is permitted to purchase common stock under the Purchase Plan if such option would permit his or her rights to purchase stock under the Purchase Plan to accrue at a rate that exceeds \$25,000 of the fair market value of such shares, or that exceeds 1,000 shares, for each calendar year. The Company makes a bi-annual offering to eligible employees of options to purchase shares of common stock under the Purchase Plan on the first trading day of January and July. Each offering period is for a period of six months from the date of the offering, and each eligible employee as of the date of offering is entitled to purchase shares of common stock at a purchase price equal to the lower of 85% of the fair market value of common stock on the first or last trading day of the offering period. There were 5,405 shares purchased by employees for the six month offering ended December 31, 2010 which were issued in January 2011. A total of 50,418 shares are available to be issued under the plan. Due to the timing of the increase of shares pursuant to the plan, the Company did not offer any shares for purchase during the six month period ending June 30, 2011.

***Per share computation***

Basic and diluted net income (loss) per share information for all periods is presented under the requirements of FASB ASC-260-10. Basic earnings (loss) per share has been computed using the weighted-average number of

**Table of Contents**

shares of common stock outstanding during the period, less shares that may be repurchased, and excludes any dilutive effects of options and warrants. In periods where the Company reports net income, diluted net income per share is computed using common equivalent shares related to outstanding options and warrants to purchase common stock. The numerator for the calculation of basic and diluted earnings per share is net income (loss). The following table sets forth the computation of basic and diluted weighted average shares used in the earnings per share calculations:

	Three Months Ended June 30,		Nine Months Ended June 30,	
	2011	2010	2011	2010
<b>Denominator</b>				
Denominator for basic earnings per share weighted average common shares	3,786,349	3,615,219	3,724,413	3,612,277
Effect of dilutive options and warrants (treasury method)	192,939	24,261	204,988	
Denominator for diluted earnings per share adjusted weighted average common shares	3,979,288	3,639,480	3,929,401	3,612,277
Options and warrants outstanding during each period, but not included in the computation of diluted earnings per share because they are antidilutive				866,383

**New Accounting Pronouncements**

The Company adopted in October 2010, the Accounting Standards Update 2009-13, *Revenue Recognition (Topic 605) Multiple-Deliverable Revenue Arrangements* (ASU 2009-13) and ASU 2009-14, *Software (Topic 985) Certain Revenue Arrangements That Include Software Elements* (ASU 2009-14). ASU 2009-13 modifies the requirements that must be met for an entity to recognize revenue from the sale of a delivered item that is part of a multiple-element arrangement when other items have not yet been delivered. ASU 2009-13 eliminates the requirement that all undelivered elements must have either: (i) vendor-specific objective evidence, or VSOE, or (ii) third-party evidence, or TPE, before an entity can recognize the portion of an overall arrangement consideration that is attributable to items that already have been delivered. In the absence of VSOE or TPE of the standalone selling price for one or more delivered or undelivered elements in a multiple-element arrangement, entities will be required to estimate the selling prices of those elements. Overall arrangement consideration will be allocated to each element (both delivered and undelivered items) based on their relative selling prices, regardless of whether those selling prices are evidenced by VSOE or TPE or are based on the entity's estimated selling price. The residual method of allocating arrangement consideration has been eliminated. ASU 2009-14 modifies the software revenue recognition guidance to exclude from its scope tangible products that contain both software and non-software components that function together to deliver a product's essential functionality. These new updates are effective prospectively for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010. Entities must adopt the amendments resulting from both of these ASUs in the same period using the same transition method, where applicable. The adoption of these ASUs did not have a material impact on the Company's consolidated financial statements.

In July 2010, the FASB issued ASU 2010-20, *Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses* (ASU 2010-20). The standard amends ASC Topic 310, *Receivables* to enhance disclosures about the credit quality of financing receivables and the allowance for credit losses by requiring an entity to provide a greater level of disaggregated information and to disclose credit quality indicators, past due information, and modifications of its financing receivables. ASU 2010-20 is effective for interim or annual fiscal years beginning after December 15, 2010. The Company's adoption of ASU 2010-20 did not have a material impact on its consolidated financial statements.

**Table of Contents**

In December 2010 the Financial Accounting Standards Board ( FASB ) issued Accounting Standards Update ( ASU ) 2010-28, Intangibles Goodwill and Other (Topic 350): When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts . ASU 2010-28 modifies Step 1 of the goodwill impairment test for reporting units with zero or negative carrying amounts by requiring an entity to perform Step 2 of the goodwill impairment test if it is more likely than not that a goodwill impairment exists. This update will be effective for fiscal years beginning after December 15, 2010. The adoption of this guidance is not expected to have an impact on the Company s consolidated financial statements.

In May 2011, the FASB issued ASU 2011-04 Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in US GAAP and IFRSs , (ASU 2011-04), which amends ASC 820. This update clarifies the existing guidance and amends the wording used to describe many of the requirements in US GAAP for measuring fair value and for disclosing information about fair value measurements. This update is effective for fiscal years, and interim periods within those years, beginning after December 15, 2011, with prospective application required. The adoption of this guidance is not expected to have an impact on the Company s consolidated financial statements.

Other accounting standards that have been issued or proposed by the FASB or other standards-setting bodies that do not require adoption until a future date are not expected to have a material impact on the Company s financial statements upon adoption.

**2. Related Party Transactions**

During the three and nine month periods ended June 30, 2011, the Company incurred fees of \$63 thousand and \$180 thousand, respectively, to a law firm, a partner of which is a director and stockholder of the Company. The Company incurred similar fees of \$60 thousand and \$190 thousand, respectively, during the three and nine month periods ended June 30, 2010. The Company had accrued liabilities for unbilled services of \$60 thousand at June 30, 2011 and \$54 thousand at September 30, 2010, respectively, to the same law firm.

During the three and nine month periods ended June 30, 2011, the Company recorded Mediasite product and customer support billings of \$190 thousand and \$622 thousand, respectively, to Mediasite KK, a Japanese reseller in which the Company has an equity interest. The Company recorded billings of \$120 thousand and \$493 thousand, respectively, in the three and nine month periods ended June 30, 2010. Mediasite KK owed the Company \$193 thousand at June 30, 2011 and \$63 thousand at September 30, 2010. The Company accounts for its investment in Mediasite KK under the equity method. The recorded value of this investment as of June 30, 2011 and September 30, 2010 is zero.

As of June 30, 2011 and September 30, 2010, the Company had a loan outstanding to an executive totaling \$26 thousand. This loan is secured by Company stock.

**3. Purchase Commitments**

The Company enters into unconditional purchase commitments on a regular basis for the supply of Mediasite product. As of June 30, 2011, the Company had outstanding commitments to purchase \$1.65 million of Mediasite product, which is not recorded on the Company s Condensed Consolidated Balance Sheet.

**4. Borrowing Arrangements**

*Silicon Valley Bank*

On June 16, 2008, the Company and its wholly-owned subsidiary, Sonic Foundry Media Systems, Inc. (collectively, the Companies ) entered into an Amended and Restated Loan and Security Agreement (the Amended Loan Agreement ) with Silicon Valley Bank ( Silicon Valley Bank ) providing for a credit facility in the form of a \$3,000,000 secured revolving line of credit and a \$1,000,000 term loan. The ability to borrow up to the maximum \$3,000,000 amount of the revolving line of credit is determined by applying an applicable percentage to eligible accounts receivable, which, is reduced by, among other things, a reserve. Prior to the First Amendment, discussed

**Table of Contents**

below, the reserve was equal to the balance of the term loan when EBITDA, as defined, would have been less than \$200,000 during the preceding six month period. Prior to the Second Amended Agreement, the revolving line of credit accrued interest at a per annum rate equal to the following: (i) during such period that Sonic Foundry maintained an Adjusted Quick Ratio (as defined) of greater than 2.00 to 1.00, the greater of one percentage point (1.0%) above Silicon Valley Bank's prime rate, or seven percent (7.0%); or (ii) during such period that Sonic Foundry maintained an Adjusted Quick Ratio equal to or less than 2.00 to 1.00, the greater of one and one-half percent (1.5%) above Silicon Valley Bank's prime rate, or seven and one-half percent (7.5%). Under the Amended Loan Agreement and the Second Amended Agreement, the outstanding term loan will continue to accrue interest at a per annum rate equal to the greater of (i) one percentage point (1.0%) above Silicon Valley's prime rate; or (ii) eight and three quarters percent (8.75%). Prior to the First Amendment, the maturity of both the term loan and the revolving line of credit was June 1, 2010. At the maturity date all outstanding borrowings and any unpaid interest thereon must be repaid, and all outstanding letters of credit must be cash collateralized. Principal on the term loan is to be repaid in thirty-six (36) monthly installments, and prior to the First Amendment as defined below, was to be repaid in full on May 1, 2010.

On April 14, 2009, the Companies executed the First Amendment to the Amended Loan Agreement with Silicon Valley Bank (the First Amendment). The First Amendment, among other things, a) refinanced the \$361,111 outstanding balance of the Term Loan with a new Term Loan 2 in the amount of \$1,000,000, due in 36 equal monthly installments of principal and interest; b) continued to require a reserve under the Revolving Line for the balance of the term loan unless, for three (3) consecutive monthly periods, the ratio of EBITDA to Debt Service, in each case for the three (3) month period then ending is greater than or equal to 1.25 to 1.00; c) modified the minimum requirements under the EBITDA covenant, but maintained a provision to override such covenant if the Company maintains a minimum Adjusted Quick Ratio of 1.75 to 1.00; and d) extended the maturity date of the Revolving Line to October 1, 2011 and the Term Loan 2 to April 1, 2012. The First Amendment also required the Company to continue to maintain certain of their depository, operating and securities accounts with Silicon Valley Bank, and to continue to comply with certain other restrictive loan covenants, including covenants limiting the Companies' ability to dispose of assets, make acquisitions, be acquired, incur indebtedness, grant liens, make investments, pay dividends, and repurchase stock.

On June 27, 2011, the Companies executed the Second Amended and Restated Loan and Security Agreement with Silicon Valley Bank (the Second Amended Agreement). Under the Second Amended Agreement, the revolving line of credit will continue to have a maximum principal amount of \$3,000,000. Interest will accrue on the revolving line of credit at the per annum rate of one percent (1.0%) above the Prime Rate (as defined), provided that Sonic Foundry maintains an Adjusted Quick Ratio (as defined) of greater than 2.0 to 1.0, or one-and-one half percent (1.5%) above the Prime Rate, if Sonic Foundry does not maintain an Adjusted Quick Ratio of greater than 2.0 to 1.0. The Second Amended Agreement does not provide for a minimum interest rate on the revolving loan. The Second Amended Agreement also provides for an increase in the advance rate on domestic receivables from 75% to 80%, and extends the facility maturity date to October 1, 2013. Under the Second Amended Agreement, the existing term loan will continue to accrue interest at a per annum rate equal to the greater of (i) one percentage point (1.0%) above Silicon Valley Bank's prime rate; or (ii) eight and three quarters percent (8.75%). In addition, a new term loan can be issued in multiple draws provided that the total term loan from Silicon Valley Bank shall not exceed \$2,000,000 and provided further that total term debt shall not exceed \$2,400,000. Under the Second Amended Agreement, any new draws on the term loan will accrue interest at a per annum rate equal to the Prime Rate plus three and three quarters percent (3.75%). The Second Amended Agreement does not provide for a minimum interest rate on the new term loan. Each draw on the new term loan will be amortized over a 36-month period. All draws on the term loan must be made within ten (10) months of June 27, 2011. The Second Amended Agreement also requires Sonic Foundry to continue to comply with certain financial covenants, including covenants to maintain an Adjusted Quick Ratio (as defined) of at least 1.75 to 1.00 and Debt Service Coverage Ratio of at least 1.25 to 1.00, the latter of which will be waived if certain funds are reserved.

At June 30, 2011, a balance of \$704 thousand was outstanding on the term loans with Silicon Valley Bank and no balance was outstanding on the revolving line of credit. At June 30, 2011, there was \$2.2 million available under this credit facility for advances. At June 30, 2011 the Company was in compliance with all covenants in the Second Amended Agreement.

---

## **Table of Contents**

The Second Amended Agreement contains events of default that include, among others, non-payment of principal or interest, inaccuracy of any representation or warranty, violation of covenants, bankruptcy and insolvency events, material judgments, cross defaults to certain other indebtedness, and material adverse changes. The occurrence of an event of default could result in the acceleration of the Companies' obligations under the Second Amended Agreement.

Pursuant to the Second Amended Agreement, the Companies pledged as collateral to Silicon Valley Bank substantially all non-intellectual property business assets. The Companies also entered into an Intellectual Property Security Agreement with respect to intellectual property assets.

### ***Partners for Growth***

On March 5, 2010, the Companies executed a \$1,250,000 Loan and Security Agreement (the "Term Loan") and a \$750,000 Revolving Loan and Security Agreement (the "Revolving Loan") with Partners for Growth II, L.P. ("PFG"), (collectively the "Agreements").

The Term Loan bears interest at 11.75% per annum with principal due in 36 equal monthly payments of \$34,722 beginning April 1, 2011 and continuing through March 1, 2014. At June 30, 2011, a balance of \$946,000 was outstanding on the Term Loan.

The Term Loan is collateralized by substantially all the Companies' assets, including intellectual property, subject to a first lien held by Silicon Valley Bank, requires compliance with an adjusted quick ratio covenant of 1.75:1.00. As of June 30, 2011, the Companies were in compliance with this covenant.

Coincident with execution of the Agreements, the Company entered into a Warrant Purchase Agreement ("Purchase Agreement") and a Warrant Agreement ("Warrant") with PFG. Pursuant to the terms of the Purchase Agreement, PFG purchased a warrant to purchase up to 76,923 shares of common stock of the Company at an exercise price of \$6.25 per share, subject to certain adjustments, for a purchase price of \$3,333. A warrant to purchase 48,077 shares of common stock was immediately exercisable. PFG exercised 24,039 shares in November 2010 and the remaining 24,038 shares in January 2011. Both such warrant exercise transactions were completed on a cashless basis resulting in 14,595 and 13,712 shares issued, respectively. The remaining warrant to purchase 28,846 shares of common stock has expired.

The Company valued the warrants issued pursuant to the Purchase Agreement using the Black-Scholes method assuming a 1) life of seven years; 2) volatility factor of 86.9%; 3) risk free interest rate of 1.38%. The resulting value of the warrants, less \$3,333 proceeds received from PFG, is treated as a debt discount and netted against the carrying value of the Term Loan on the consolidated balance sheet. The discount is amortized at a constant rate applied to the outstanding balance of the Term Loan with a corresponding increase to non-cash interest expense. At June 30, 2011 the remaining balance of the discount was \$139 thousand.

On June 28, 2011, the Companies entered into a Consent and Modification No. 1 to Loan and Security Agreement ("Consent and Modification Agreement") with PFG. Under the Consent and Modification Agreement, PFG consented to the Companies incurring additional indebtedness to Silicon Valley Bank, provided that total outstanding term indebtedness owed to PFG and Silicon Valley Bank does not exceed \$1,900,000.

### **5. Income Taxes**

The Company is subject to taxation in the U.S. and various state jurisdictions. All of the Company's tax years are subject to examination by the U.S. and state tax authorities due to the carryforward of unutilized net operating losses.

Deferred income taxes are provided for temporary differences between financial reporting and income tax basis of assets and liabilities, and are measured using currently enacted tax rates and laws. Deferred income taxes also arise from the future benefits of net operating loss carryforwards. A valuation allowance equal to 100% of the net deferred tax assets has been recognized due to uncertainty regarding future realization.

**Table of Contents**

Beginning with an acquisition in fiscal year 2002, the Company has amortized Goodwill for tax purposes over a 15 year life. Goodwill is not amortized for book purposes.

The difference between the book and tax balance of Goodwill creates a Deferred Tax Liability and an annual tax expense. Because of the long term nature of the goodwill timing difference, tax planning strategies cannot be applied related to the Deferred Tax Liability. The balance of the Deferred Tax Liability at June 30, 2011 was \$1.67 million and at September 30, 2010 was \$1.49 million.

The Company's practice is to recognize interest and/or penalties related to income tax matters in income tax expense. The Company had no accruals for interest and penalties on the Company's Condensed Consolidated Balance Sheets at September 30, 2010 or June 30, 2011, and has not recognized any interest or penalties in the Condensed Consolidated Statements of Operations for either the three or nine month periods ended June 30, 2011 or 2010. The Company's tax rate differs from the expected tax rate each reporting period as a result of the aforementioned items.

## **Table of Contents**

### **ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

#### **Risks and Uncertainties**

The following discussion of the consolidated financial position and results of operations of the Company should be read in conjunction with the consolidated financial statements and notes thereto included elsewhere in this form 10-Q and the Company's annual report filed on form 10-K for the fiscal year ended September 30, 2010. In addition to historical information, this discussion contains forward-looking statements such as statements of the Company's expectations, plans, objectives and beliefs. These statements use such words as may, will, expect, anticipate, believe, plan, and other similar terminology.

Actual results could differ materially from expectations due to changes in the market acceptance of our products, competition, market introduction or product development delays; all of which would impact our strategy to develop a network of inside regional sales managers and distribution partners that target customer opportunities for multi-unit and repeat purchases. If the Company does not achieve multi-unit and repeat purchases, our business will be harmed.

Our future success will continue to depend upon our ability to develop new products, product enhancements or service offerings that address future needs of our target markets and to respond to these changing standards and practices. The success of new products, product enhancements or service offerings depend on several factors, including the timely completion, quality and market acceptance of the product, enhancement or service. Our revenue could be reduced if we do not timely develop innovative new products, product enhancements or service offerings which address the needs of our customers or prospective customers or if our current or future competitors develop such new products, product enhancements or service offerings more timely or do so in a way that causes our customers or prospective customers to buy our competitors products instead of our products.

Uncertainty about current global economic conditions poses a risk as businesses, educational institutions and state governments are likely to postpone spending in response to tighter credit, negative financial news and/or declines in income or asset values. Most of our customers and potential customers are public colleges, universities, schools and other education providers who depend substantially on government funding in order to purchase products and services such as the Company provides. Many state governments are under substantial budget constraints and will likely reduce spending for education providers, without Federal government support. Proposed federal government support for education may not be approved or, if approved, may not succeed in eliminating reductions in spending for our products and services.

In response to global economic conditions, many manufacturers and distributors have reduced the level of inventory they maintain as well as their staff levels. As a result, many components, including some of which the Company requires to build its products, are in short supply and have lengthening lead times for delivery. While we believe there are multiple sources of supply for our products and the component parts required to build them, even a short term disruption of supply of component parts or completed products near the end of a quarter would have a negative impact on our revenues. As a result of the foregoing, we may not be able to meet demand for our products, which could negatively affect revenues in the quarter of the disruption or longer depending upon the magnitude of the event, and could harm our reputation.

Other factors that may impact actual results include: our ability to effectively integrate acquired businesses, length of time necessary to close on sales leads to multi-unit purchasers, our ability to service existing accounts, global and local business conditions, legislation and governmental regulations, competition, our ability to effectively maintain and update our product portfolio, shifts in technology, political or economic instability in local markets, and currency and exchange rate fluctuations, as well as other issues which may be identified from time to time in Sonic Foundry's Securities and Exchange Commission filings and other public announcements.

#### **Overview**

Sonic Foundry, Inc. is a technology leader in the emerging web communications marketplace, providing enterprise solutions and services that link an information-driven world. The company's principal product line, Mediasif® is a

web communication and content management system that automatically and cost-effectively webcasts lectures and presentations. Trusted by Fortune 500 companies, top education institutions and Federal, state and local government agencies for a variety of critical communication needs, Mediasite is the leading one-to-many multimedia communication solution for capturing knowledge and sharing it online.

### **New Accounting Pronouncements**

The Company adopted in October 2010, the Accounting Standards Update 2009-13, *Revenue Recognition (Topic 605) Multiple-Deliverable Revenue Arrangements* (ASU 2009-13) and ASU 2009-14, *Software (Topic 985) Certain Revenue Arrangements That Include Software Elements* (ASU 2009-14). ASU 2009-13 modifies the requirements that must be met for an entity to recognize revenue from the sale of a delivered item that is part of a multiple-element arrangement when other items have not yet been delivered. ASU 2009-13 eliminates the requirement that all undelivered elements must have either: (i) vendor-specific objective evidence, or VSOE, or (ii) third-party evidence, or TPE, before an entity can recognize the portion of an overall arrangement consideration that is attributable to items that already have been delivered. In the absence of VSOE or TPE of the standalone selling price for one or more delivered or undelivered elements in a multiple-element arrangement, entities will be required to estimate the selling prices of those elements. Overall arrangement consideration will be allocated to each element (both delivered and undelivered items) based on their relative selling prices, regardless of whether those selling prices are evidenced by VSOE or TPE or are based on the entity's estimated selling price. The residual method of allocating arrangement consideration has been eliminated. ASU 2009-14 modifies the software revenue recognition guidance to exclude from its scope tangible products that contain both software and non-software components that function together to deliver a product's essential functionality. These new updates are effective prospectively for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010. Entities must adopt the amendments resulting from both of these ASUs in the same period using the same transition method, where applicable. The adoption of these ASUs did not have a material impact on the Company's consolidated financial statements.

In July 2010, the FASB issued ASU 2010-20, *Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses* (ASU 2010-20). The standard amends ASC Topic 310, *Receivables* to enhance disclosures about the credit quality of financing receivables and the allowance for credit losses by requiring an entity to provide a greater level of disaggregated information and to disclose credit quality indicators, past due information, and modifications of its financing receivables. ASU 2010-20 is effective for interim or annual fiscal years beginning after December 15, 2010. The Company's adoption of ASU 2010-20 did not have a material impact on its consolidated financial statements.

In December 2010 the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2010-28, *Intangibles Goodwill and Other (Topic 350): When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts*. ASU 2010-28 modifies Step 1 of the goodwill impairment test for reporting units with zero or negative carrying amounts by requiring an entity to perform Step 2 of the goodwill impairment test if it is more likely than not that a goodwill impairment exists. This update will be effective for fiscal years beginning after December 15, 2010. The adoption of this guidance is not expected to have an impact on the Company's consolidated financial statements.

In May 2011, the FASB issued ASU 2011-04 *Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in US GAAP and IFRSs*, (ASU 2011-04), which amends ASC 820. This update clarifies the existing guidance and amends the wording used to describe many of the requirements in US GAAP for measuring fair value and for disclosing information about fair value measurements. This update is effective for fiscal years, and interim periods within those years, beginning after December 15, 2011, with prospective application required. The adoption of this guidance is not expected to have an impact on the Company's consolidated financial statements.

## **Table of Contents**

### **Critical Accounting Policies**

We have identified the following as critical accounting policies to our Company and have discussed the development, selection of estimates and the disclosure regarding them with the audit committee of the board of directors:

Revenue recognition, allowance for doubtful accounts and reserves;

Impairment of long-lived assets;

Valuation allowance for net deferred tax assets; and

Accounting for stock-based compensation.

*Revenue Recognition, Allowance for Doubtful Accounts and Reserves*

### *General*

Revenue is recognized when persuasive evidence of an arrangement exists, delivery occurs or services are rendered, the sales price is fixed or determinable and collectability is reasonably assured. Revenue is deferred when undelivered products or services are essential to the functionality of delivered products, customer acceptance is uncertain, significant obligations remain, or the fair value of undelivered elements is unknown. The Company does not offer customers the right to return product, other than for exchange or repair pursuant to a warranty or stock rotation. The Company's policy is to reduce revenue when it incurs an obligation for price rebates or other such programs during the period the obligation and sale occurs. The following policies apply to the Company's major categories of revenue transactions.

### *Products*

Products are considered delivered, and revenue is recognized, when title and risk of loss have been transferred to the customer. Under the terms and conditions of the sale, this occurs at the time of shipment to the customer. Product revenue currently represents sales of our Mediasite recorders and Mediasite related products such as our server software.

### *Services*

We sell support and content hosting contracts to our customers, typically one year in length, and records the related revenue ratably over the contractual period. Our support contracts cover phone and electronic technical support availability over and above the level provided by our distribution partners, software upgrades on a when and if available basis, advance hardware replacement and an extension of the standard hardware warranty from 90 days to one year. The manufacturers we contract with to build the units provide a limited one-year warranty on the hardware. We also sell installation, training, event webcasting, and customer content hosting services. Revenue for those services is recognized when performed in the case of installation, training and event webcasting services and is recognized ratably over the contract period when these additional elements are sold with hosting. Service amounts invoiced to customers in excess of revenue recognized are recorded as deferred revenue until the revenue recognition criteria are met.

### *Revenue Arrangements that Include Multiple Elements*

The Company has historically applied the software revenue recognition rules as prescribed by Accounting Standards Codification (ASC) Subtopic 985-605. In October 2009, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) Number 2009-14, Certain Revenue Arrangements That Include Software Elements, which amended ASC Subtopic 985-605. This ASU removes tangible products containing software components and non-software components that function together to deliver the product's essential functionality from the scope of the software revenue recognition rules. In the case of the Company's hardware products with embedded software, the Company has determined that the hardware and software components function together to deliver the product's essential functionality, and therefore, the revenue from the sale of these products no longer falls within the scope of the software revenue recognition rules. Revenue from the sale of

## Edgar Filing: SONIC FOUNDRY INC - Form 10-Q

software-only products remains within the scope of the software revenue recognition rules. Installation, training, and post customer support no longer fall within the scope of the software revenue recognition rules, except when they are sold with and relate to a software-only product. Revenue recognition for products that no longer fall under the scope of the software revenue recognition rules is similar to that for other tangible products. ASU Number 2009-13, Multiple-Deliverable Revenue Arrangements, which amended ASC Topic 605 and was also issued in October 2009, is applicable for multiple-deliverable revenue arrangements. ASU 2009-13 allows companies to allocate revenue in a multiple-

## **Table of Contents**

deliverable arrangement in a manner that better reflects the transaction's economics. ASU 2009-13 and 2009-14 were adopted and are effective for revenue arrangements entered into or materially modified in the Company's fiscal year 2011.

Under the software revenue recognition rules, the fee from a multiple-deliverable arrangement is allocated to each of the undelivered elements based upon vendor-specific objective evidence (VSOE), which is limited to the price charged when the same deliverable is sold separately, with the residual value from the arrangement allocated to the delivered element. The portion of the fee that is allocated to each deliverable is then recognized as revenue when the criteria for revenue recognition are met with respect to that deliverable. If VSOE does not exist for all of the undelivered elements, then all revenue from the arrangement is typically deferred until all elements have been delivered to the customer. All revenue arrangements, with the exception of hosting contracts, entered into prior to October 1, 2010 and the sale of all software-only products and associated services have been accounted for under this guidance during the nine-month period ended June 30, 2011.

Under the revenue recognition rules for tangible products as amended by ASU 2009-13, the fee from a multiple-deliverable arrangement is allocated to each of the deliverables based upon their relative selling prices as determined by a selling-price hierarchy. A deliverable in an arrangement qualifies as a separate unit of accounting if the delivered item has value to the customer on a stand-alone basis. A delivered item that does not qualify as a separate unit of accounting is combined with the other undelivered items in the arrangement and revenue is recognized for those combined deliverables as a single unit of accounting. The selling price used for each deliverable is based upon VSOE if available, third-party evidence (TPE) if VSOE is not available, and best estimate of selling price (ESP) if neither VSOE nor TPE are available. TPE is the price of the Company's or any competitor's largely interchangeable products or services in stand-alone sales to similarly situated customers. ESP is the price at which the Company would sell the deliverable if it were sold regularly on a stand-alone basis, considering market conditions and entity-specific factors. All revenue arrangements negotiated after September 30, 2010, excluding the sale of all software-only products and associated services, have been accounted for under this guidance during the nine-month period ended June 30, 2011.

The selling prices used in the relative selling price allocation method are as follows: (1) for the Company's products and services are based upon VSOE, (2) for hardware products with embedded software for which VSOE does not exist are based upon ESP. The Company does not believe TPE exists for any of these products and services because they are differentiated from competing products and services in terms of functionality and performance and there are no competing products or services that are largely interchangeable. Management establishes ESP for hardware products with embedded software using a cost plus margin approach with consideration for market conditions, such as the impact of competition and geographic considerations, and entity-specific factors, such as the cost of the product and the Company's profit objectives. Management believes that ESP is reflective of reasonable pricing of that deliverable as if priced on a stand-alone basis. When a sales transaction includes deliverables that are divided between ASC Topic 605 and ASC Subtopic 985-605, the Company allocates the selling price using the relative selling price method.

While the pricing model, currently in use, captures all critical variables, unforeseen changes due to external market forces may result in a revision of the inputs. These modifications may result in the consideration allocation differing from the one presently in use. Absent a significant change in the pricing inputs or the way in which the industry structures its deals, future changes in the pricing model are not expected to materially affect our allocation of arrangement consideration.

Billings for hosting are spread ratably over the term of the hosting agreement, with the typical hosting agreement having a term of 12 months, with renewal on an annual basis. The Company sells most hosting contracts without the inclusion of products, and occasionally some hosting contracts in conjunction with the sale of product. When the hosting arrangement is sold in conjunction with product, the product revenue is recognized immediately while the remaining hosting revenue is spread ratably over the term of the hosting agreement. The selling price is allocated between these elements using the relative selling price method. The Company uses the estimated selling price method for development of the selling price for hardware products with embedded software.

## **Table of Contents**

### *Reserves*

We record reserves for stock rotations, price adjustments, rebates, and sales incentives to reduce revenue and accounts receivable for these and other credits we may grant to customers. Such reserves are recorded at the time of sale and are calculated based on historical information (such as rates of product stock rotations) and the specific terms of sales programs, taking into account any other known information about likely customer behavior. If actual customer behavior differs from our expectations, additional reserves may be required. Also, if we determine that we can no longer accurately estimate amounts for stock rotations and sales incentives, we would not be able to recognize revenue until the customers exercise their rights, or such rights lapse, whichever is later.

### *Credit Evaluation and Allowance for Doubtful Accounts*

We assess the realization of our receivables by performing ongoing credit evaluations of our customers' financial condition. Through these evaluations, we may become aware of a situation where a customer may not be able to meet its financial obligations due to deterioration of its financial viability, credit ratings or bankruptcy. Our reserve requirements are based on the best facts available to us and are reevaluated and adjusted as additional information is received. Our reserves are also based on amounts determined by using percentages applied to certain aged receivable categories. These percentages are determined by a variety of factors including, but not limited to, current economic trends, historical payment and bad debt write-off experience. Allowance for doubtful accounts for accounts receivable was \$90,000 as of June 30, 2011 and \$105,000 at September 30, 2010.

### *Impairment of long-lived assets*

We assess the impairment of goodwill on an annual basis or whenever events or changes in circumstances indicate that the fair value of these assets is less than the carrying value.

If we determine that the fair value of goodwill is less than its carrying value, based upon the annual test or the existence of one or more indicators of impairment, we would then measure impairment based on a comparison of the implied fair value of goodwill with the carrying amount of goodwill. To the extent the carrying amount of goodwill is greater than the implied fair value of goodwill, we would record an impairment charge for the difference.

We evaluate all of our long-lived assets, including intangible assets other than goodwill, for impairment in accordance with the provisions of FASB ASC-360-10. Long-lived assets and intangible assets other than goodwill are evaluated for impairment whenever events or changes in circumstances indicate that the carrying value of an asset may not be recoverable based on expected undiscounted cash flows attributable to that asset.

### *Valuation allowance for net deferred tax assets*

Deferred income taxes are provided for temporary differences between financial reporting and income tax basis of assets and liabilities, and are measured using currently enacted tax rates and laws. Deferred income taxes also arise from the future benefits of net operating loss carryforwards. A valuation allowance equal to 100% of the net deferred tax assets has been recognized due to uncertainty regarding future realization.

### *Accounting for stock-based compensation*

The Company uses a lattice valuation model to account for all stock options granted. The lattice valuation model is a more flexible analysis to value options because of its ability to incorporate inputs that change over time, such as actual exercise behavior of option holders. The Company uses historical data to estimate the option exercise and employee departure behavior in the lattice valuation model. Expected volatility is based on historical volatility of the Company's stock. The Company considers all employees to have similar exercise behavior and therefore has not identified separate homogenous groups for valuation. The expected term of options granted is derived from the output of the option pricing model and represents the period of time that options granted are expected to be outstanding. The risk-free rate for periods the options are expected to be outstanding is based on the U.S. Treasury yields in effect at the time of grant. Forfeitures are based on actual behavior patterns.

**Table of Contents****Results of Continuing Operations****Revenue**

Revenue from our business includes the sales of Mediasite recorders and server software products and related services contracts, such as customer support, installation, training, content hosting and event services sold separately. We market our products to educational institutions, corporations and government agencies that need to deploy, manage, index and distribute video content on Internet-based networks. We reach both our domestic and international markets through reseller networks, a direct sales effort and partnerships with system integrators.

***Q3-2011 compared to Q3-2010***

Revenue in Q3-2011 increased \$1.5 million, or 26% from Q3-2010 revenue of \$5.6 million to \$7.1 million. Revenue consisted of the following:

Product revenue from sale of Mediasite recorder units and server software increased from \$3.1 million in Q3-2010 to \$3.9 million in Q3-2011. Product revenue growth includes an increase in recorders sold to domestic higher education customers including an increase in discounted upgrade recorders sold to customers whose product had reached end of hardware warranty eligibility.

	Q3-2011	Q3-2010
Recorders sold	419	313
Rack to mobile ratio	2.9 to 1	2.5 to 1
Average sales price, excluding service (000 s)	\$9.5	\$9.9

Services revenue represents the portion of fees charged for Mediasite customer support contracts amortized over the length of the contract, typically 12 months, as well as training, installation, rental, event and content hosting services. Services revenue increased from \$2.5 million in Q3-2010 to \$3.1 million in Q3-2011 primarily due to an increase in hosting and event services as well as an increase in customer support contracts. At June 30, 2011 \$5.7 million of unrecognized support and service revenue remained in unearned revenue, of which we expect to realize approximately \$2.2 million in the upcoming quarter.

Other revenue relates to freight charges billed separately to our customers.

***YTD-2011 (nine months) compared to YTD-2010 (nine months)***

Revenues for YTD-2011 totaled \$18.5 million compared to YTD-2010 revenues of \$15.0 million, an increase of 23%. Product revenue growth includes an increase in recorders sold to domestic higher education customers including an increase in discounted upgrade recorders sold to customers whose product had reached end of hardware warranty eligibility. Revenues included the following:

\$9.4 million product revenue from the sale of 935 Mediasite recorders and software versus \$7.5 million from the sale of 745 Mediasite recorders and software in 2010.

\$9.0 million from Mediasite customer support contracts, installation, training, event and hosting services versus \$7.4 million in 2010.

## **Table of Contents**

### **Gross Margin**

Gross margin for Q3-2011 was \$4.9 million or 70% of revenue compared to Q3-2010 of \$4.2 million or 74%. Gross margin was affected by an increase in direct and outsourced event labor costs with lower markups for services which the Company does not provide, such as closed captioning. Gross margin was also impacted by a greater volume of discounted upgrade units for customers whose product had reached end of hardware warranty eligibility and by an increase in high definition material cost. These effects were partially offset by a lesser number of higher quantity transactions with corresponding discount pricing in Q3-2011 than in Q3-2010. The significant components of cost of revenue include:

Material and freight costs for the Mediasite recorders. Costs for Q3-2011 Mediasite recorder hardware and other costs totaled \$1.6 million, along with \$83 thousand of freight costs, and \$210 thousand of labor and allocated costs compared to Q3-2010 Mediasite recorder costs of \$1.0 million for hardware, \$64 thousand for freight and \$177 thousand of labor and allocated costs.

Services costs. Staff wages and other costs allocated to cost of service revenue were \$314 thousand in Q3-2011 and \$189 thousand in Q3-2010, resulting in gross margin on services of 90% in Q3-2011 and 93% in Q3-2010. Certain customers contracted with us to provide a suite of professional services, including closed captioning and other services for which we subcontract. Such sub-contracted services increased by approximately \$89 thousand during Q3-2011 over the prior year. These subcontracted services are billed at significantly lower profit margins, and therefore negatively impacted services margins during the quarter.

### **Operating Expenses**

#### **Selling and Marketing Expenses**

Selling and marketing expenses include wages and commissions for sales, marketing and business development personnel, print advertising and various promotional expenses for our products. Timing of these costs may vary greatly depending on introduction of new products and services or entrance into new markets, or participation in major tradeshows.

#### ***Q3-2011 compared to Q3-2010***

Selling and marketing expenses increased \$480 thousand or 19% from \$2.5 million in Q3-2010 to \$3.0 million in Q3-2011. Differences in the major categories include:

Increased salary, incentive compensation and benefits of \$316 thousand primarily as a result of the increase in sales and related commission compensation

Tradeshows and travel increased by \$70 thousand

Costs allocated from General and Administrative increased by \$71 thousand primarily as a result of higher stock compensation expense.

#### ***YTD-2011 compared to YTD-2010***

Selling and marketing expenses increased \$847 thousand or 12% from \$7.0 million in YTD-2010 to \$7.9 million in YTD-2011. YTD increases in the major categories include:

YTD-2011 salary, incentive compensation and benefits increased \$568 thousand from YTD-2010 due to slightly higher staff levels in 2011 and the increase in sales and related commission compensation compared to 2010.

## Edgar Filing: SONIC FOUNDRY INC - Form 10-Q

YTD-2011 facilities expense allocated to selling and marketing increased by \$347 thousand from YTD-2010 primarily due to higher stock compensation expense.

YTD-2011 travel decreased by \$68 thousand from YTD-2010

We anticipate selling and marketing headcount to increase slightly throughout the remainder of the fiscal year.

### **General and Administrative Expenses**

General and administrative ( G&A ) expenses consist of personnel and related costs associated with the facilities, finance, legal, human resource and information technology departments, as well as other expenses not fully allocated to functional areas.

**Table of Contents**

***Q3-2011 compared to Q3-2010***

G&A expenses increased \$148 thousand or 26% over the prior period from \$572 thousand in Q3-2010 to \$720 thousand in Q3-2011. Major components of the change included:

Increased compensation and benefits of \$111 thousand, primarily related to an increase in headcount

Professional services increase of \$44 thousand.

***YTD-2011 compared to YTD-2010***

G&A increased \$87 thousand or 4% from \$2.0 million in YTD-2010 to \$2.1 million in YTD-2011. The increase is primarily due to:

Increased compensation and benefits of \$46 thousand, primarily related to an increase in headcount during the third quarter

Computer supplies increase of \$52 thousand.

We anticipate general and administrative headcount to increase slightly during the remainder of the fiscal year.

**Product Development Expenses**

Product development expenses include salaries and wages of the software research and development staff and an allocation of benefits, facility and administrative expenses.

***Q3-2011 compared to Q3-2010***

Product development expenses increased \$86 thousand, or 11% from \$777 thousand in Q3-2010 to \$863 thousand in Q3-2011 resulting primarily from an increase in costs of \$65 thousand as a result of higher stock compensation expense.

***YTD-2011 compared to YTD-2010***

YTD-2011 product development expenses increased \$266 thousand, or 12% from YTD-2010. The increase is primarily due to costs allocated from General and Administrative increased by \$226 thousand primarily as a result of higher stock compensation expense.

We anticipate product development headcount to increase during the remainder of fiscal 2011. We do not anticipate that any fiscal 2011 software development efforts will qualify for capitalization.

**Other Expense, Net**

Other expense primarily consists of interest costs related to outstanding debt and amortization of a debt discount. Other income is primarily interest income from overnight investment vehicles.

**Liquidity and Capital Resources**

Cash used by operating activities was \$(27) thousand in YTD-2011 compared to cash used by operating activities in YTD-2010 of \$(456) thousand, an improvement of \$429 thousand. Cash provided in YTD-2011 increased primarily by a \$411 change in net income, from a net loss of \$(248) thousand in YTD-2010 to net income of \$163 thousand in YTD-2011. Working capital changes included the positive effects of a \$377 thousand increase in accounts payable, \$527 thousand of share based compensation, \$508 thousand of depreciation expense, \$130 thousand of amortization expense and \$180 thousand of deferred taxes. These were offset by the negative effects of increases in accounts receivable of \$1.2

## Edgar Filing: SONIC FOUNDRY INC - Form 10-Q

million, a decrease in unearned revenue of \$331 thousand, an increase in prepaid expenses and other current assets of \$205 thousand and an increase in inventory of \$116 thousand. In YTD-2010, working capital changes included the negative effects of a \$1.3 million increase in accounts receivable and a \$140 thousand decrease in accounts payable and accrued liabilities. These were mostly offset by the positive effects of a reduction in inventory of \$425 thousand, \$180 thousand of deferred taxes, \$397 thousand of depreciation expense, a decrease in prepaid expenses and other current assets of \$101 thousand and \$180 thousand of share based compensation.

---

**Table of Contents**

Cash used in investing activities was \$417 thousand in YTD-2011 compared to a use of \$293 thousand in YTD-2010 for the purchase of property and equipment.

Cash provided by financing activities was \$1.3 million in YTD-2011 compared to \$647 thousand in YTD-2010. Cash provided in YTD-2011 was due primarily to proceeds from exercise of common stock options of \$1.45 million and \$400 thousand of proceeds from notes payable. This was partially offset by \$563 thousand of cash used for payments on notes payable and capital leases. Cash provided in YTD-2010 was primarily due to a new note payable for \$1.25 million partially offset by \$531 thousand of cash used for payments on notes payable and the line of credit.

The Company believes its cash position is adequate to accomplish its business plan through at least the next twelve months. We will likely evaluate operating or capital lease opportunities to finance equipment purchases in the future and anticipate utilizing the Company's revolving line of credit to support working capital needs. We may also seek additional equity financing, or issue additional shares previously registered in our available shelf registration, although we currently have no plans to do so.

On March 5, 2010, the Company and its wholly-owned subsidiary executed the \$1,250,000 Loan and Security Agreement (the "Term Loan") with Partners for Growth II, L.P. ("PFG"). The Term Loan bears interest at 11.75% per annum with principal due in 36 equal monthly payments of \$34,722 beginning April 1, 2011 and continuing through March 1, 2014. Coincident with closing of the Term Loan the Company repaid the outstanding balance of its revolving line of credit with Silicon Valley Bank ("Silicon Valley Bank").

On June 27, 2011, the Company and its wholly-owned subsidiary executed the Second Amended and Restated Loan and Security Agreement with Silicon Valley Bank (the "Second Amended Agreement"). Under the Second Amended Agreement, the revolving line of credit will continue to have a maximum principal amount of \$3,000,000 with a maturity of October 1, 2013. Interest will accrue on the revolving line of credit at the per annum rate of one percent (1.0%) above the Prime Rate (as defined), provided that Sonic Foundry maintains an Adjusted Quick Ratio (as defined) of greater than 2.0 to 1.0, or one-and-one half percent (1.5%) above the Prime Rate, if Sonic Foundry does not maintain an Adjusted Quick Ratio of greater than 2.0 to 1.0. Under the Second Amended Agreement, the existing term loan will continue to accrue interest at a per annum rate equal to the greater of (i) one percentage point (1.0%) above Silicon Valley Bank's prime rate; or (ii) eight and three quarters percent (8.75%). In addition, a new term loan can be issued in multiple draws provided that the total term loan from Silicon Valley Bank shall not exceed \$2,000,000 and provided further that total term debt shall not exceed \$2,400,000. Under the Second Amended Agreement, any new draws on the term loan will accrue interest at a per annum rate equal to the Prime Rate plus three and three quarters percent (3.75%). Each draw on the new term loan will be amortized over a 36-month period. All draws on the term loan must be made within ten (10) months of June 27, 2011. The Company maintains the revolving line of credit with Silicon Valley and has \$2.2 million available for borrowing at June 30, 2011.

The Company enters into unconditional purchase commitments on a regular basis for the supply of Mediasite product. As of June 30, 2011, the Company had outstanding commitments to purchase \$1.65 million of Mediasite product, which is not recorded on the Company's Condensed Consolidated Balance Sheet.

**Table of Contents**

**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

**Derivative Financial Instruments**

We are not party to any derivative financial instruments or other financial instruments for which the fair value disclosure would be required under FASB ASC-815-10. Our cash equivalents consist of overnight investments in money market funds that are carried at fair value. Accordingly, we believe that the market risk of such investments is minimal.

**Interest Rate Risk**

Our cash equivalents, which consist of overnight money market funds, are subject to interest rate fluctuations, however, we believe this risk is minimal due to the short-term nature of these investments.

Our \$1.65 million of debt outstanding, exclusive of discounts, at June 30, 2011 is fixed rate. We do not expect that an increase in the level of interest rates would have a material impact on our consolidated financial statements. We monitor our positions with, and the credit quality of, the financial institutions that are party to any of our financial transactions.

**Foreign Currency Exchange Rate Risk**

All international sales of our products are denominated in US dollars.

**ITEM 4. CONTROLS AND PROCEDURES**

**Evaluation of Disclosure Controls and Procedures**

Based on evaluations at June 30, 2011, our principal executive officer and principal financial officer, with the participation of our management team, have concluded that our disclosure controls and procedures (as defined in Rules 13a-15 (e) and 15d-15 (e) under the Securities Exchange Act) are effective. Disclosure controls and procedures ensure that information required to be disclosed by us in reports that we file or submit under the Securities Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC, and that material information relating to the Company is accumulated and communicated to management, including our principal executive officer and our principal financial officer, as appropriate to allow timely decisions regarding required disclosures.

**Changes in Internal Controls**

During the period covered by this quarterly report on Form 10-Q, the Company has not made any changes to its internal control over financial reporting (as referred to in Paragraph 4(b) of the Certifications of the Company's principal executive officer and principal financial officer included as exhibits to this report) that have materially affected, or are reasonably likely to affect the Company's internal control over financial reporting.
