Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or shorter period that the registrant was required to submit and post such files). Yes No

Edgar Filing: SRI SURGICAL EXPRESS INC - Form 10-K

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Small reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Table of Contents

The aggregate market value of the voting common stock held by non-affiliates of the registrant, based on the closing sale price of the common stock on June 30, 2011, as reported on the NASDAQ Global Market, was approximately \$23,232,139. For purposes of this determination, the registrant excluded shares of common stock known to be held by officers, directors, and 10% shareholders, because those persons might be deemed affiliates. This determination of affiliate status is not necessarily conclusive for other purposes.

The registrant had 6,503,128 shares of common stock outstanding as of February 24, 2012.

DOCUMENTS INCORPORATED BY REFERENCE

List hereunder the following documents if incorporated by reference and the Part of the Form 10-K (e.g., Part I, Part II, etc.) into which the document is incorporated.

Portions of the Proxy Statement for the registrant's 2012 Annual Meeting of Shareholders are incorporated by reference into Part III of this Annual Report on Form 10-K.

PART I

Item 1. Business

This Annual Report on Form 10-K, other documents that we publicly disseminate, and oral statements that are made on our behalf might contain both statements of historical fact and forward-looking statements. These forward-looking statements do not guarantee future performance, and our actual results could differ materially from those indicated by the forward-looking statements. Examples of forward-looking statements include: (i) projections of our revenue, earnings, capital structure, and other financial items, (ii) statements of our plans and objectives, (iii) statements of our expected future economic performance, and (iv) assumptions underlying our statements regarding SRI/Surgical Express, Inc. and our business. Among the factors that could cause or contribute to differences are those discussed below under the section entitled Risk Factors . We do not undertake to update our forward-looking statements.

The Company

SRI Surgical Express, Inc. (SRI Surgical , the Company , we , us or our) is a supplier and reprocessor of reusable surgical linen and instrumentation. Our tagline, Environmental Solutions, Delivered Daily[®] reflects SRI Surgical 's commitment to provide our healthcare clients with high quality reusable products, and the opportunity to reduce waste in the Operating Room (OR). Reducing waste in the OR begins with purchasing the appropriate reusable products that meet the needs of the clinical user and minimize the use of disposable products in the surgical environment. We believe our reusable surgical gowns, drapes, table covers, towels, and instruments provide the opportunity for waste avoidance and environmental sustainability in the surgical arena. We start with products that have been manufactured specifically to be reusable and to be reprocessed. Our products are not single use products that are reprocessed for economic benefit.

We have ten reprocessing facilities that are regionally located across the United States. These facilities adhere to the standards of the United States Food and Drug Administration (FDA) regulated medical device manufacturing environment. We guarantee that our surgical linens will always be 100% inspected, repaired when necessary, and sterilized properly. No other company in the industry provides this service for their reusable surgical products.

SRI Surgical has a history of commitment to the environment. In addition to providing our healthcare clients with environmentally friendly surgical linens and instruments, we have a demonstrated commitment to waste reduction in the communities that we serve, as both a healthcare service provider and a corporate citizen. SRI Surgical is a Charter Member of Practice Greenhealth, a networking organization for institutions in the healthcare community that are committed to sustainable, eco-friendly practices. In 2011, we were awarded Practice Greenhealth 's Champion for Change Award for the third year in a row. This award recognizes organizations that demonstrate successful accomplishments in greening their organization as well as assisting healthcare clients in improving their environmental performance. SRI Surgical is also an EPA WasteWise Partner. The EPA WasteWise program targets the reduction of waste in the business environment. In 2009, we received the EPA 's Design for the Environment recognition for becoming a member of the Safer Detergents Stewardship Initiative (SDSI). SRI Surgical is also a member of the EPA 's Climate Leaders, a consortium of small business leaders that are measuring their greenhouse gas emissions and setting and achieving goals to reduce them, and the EPA 's SmartWay Transport Partnership program, which identifies products and services that reduce transportation-related emissions. In 2009, we received the EPA 's Transport Award, which recognizes organizations that have made outstanding contributions to reducing climate change emissions and other air pollutants.

We also offer expert daily instrument reprocessing at both our facilities (off-site) and our customers ' facilities (on-site). This innovative offering provides customized, high quality surgical instrument sets on a per-procedure fee basis. Sets processed at our FDA-regulated facilities have a consistently high level of quality built into every set. After each use, our highly trained instrument-processing technicians follow a thorough

Table of Contents

cleaning and inspection process to help ensure that the instruments are in proper working order. We ensure instrument availability and functionality, which offers our customers an opportunity to achieve high efficiency levels. In addition, we manage the instrumentation and supply chain of hospitals, surgery centers and operating rooms and their central sterilization facilities. In this setting, by using our expertise in implementing and managing FDA-regulated instrument processing facilities, we can deliver desired quality and performance levels that our customers seek.

Our integrated closed-loop process starts with daily delivery of reusable and disposable surgical supplies and instruments to healthcare providers. After use, we pick up the reusable surgical linens, basins, and instruments used in surgery and return them to our processing facilities. Used products arriving at our processing facilities are sorted, cleaned, inspected, packaged, sterilized, and shipped back to the healthcare providers. This closed-loop system significantly reduces the level of on-hand inventory healthcare providers need to maintain at their facilities and greatly simplifies our customers' surgical supply chain process. This process also allows healthcare providers to reduce medical waste disposal costs and increase the quality of products used by their staff and physicians. Additionally, as a result of our daily just-in-time delivery model, our customers' working capital requirements are favorably affected by their ability to carry less on-hand inventory of disposable products to support their surgical procedures.

We are well positioned to help healthcare providers reduce operating costs while improving the quality of care, so that they can respond to pressures created by the continued growth of managed care and reductions in procedure reimbursement. To reduce operating costs, we offer comprehensive procedure bundling solutions and outsourcing of surgical instrument processing. By providing surgical instruments of superior functionality and bundling solutions that allow surgical staff to shift focus from supply management to patient management, we help our customers significantly reduce operating and capital costs, increase revenue, and improve the quality of patient care.

During 2010, we entered into a three-year reusable surgical products agreement with KP Select, Inc. the purchasing agent for the Kaiser Permanente Healthcare System (Kaiser Permanente). This agreement was effective March 1, 2010 and gives us the ability to contract with any Kaiser Permanente hospital that designates KP Select as its purchasing agent. Kaiser Permanente is a 48-hospital system located in the states of California, Ohio, Maryland, Oregon, Washington, and other states. This agreement allows us to assist Kaiser Permanente with its environmental awareness initiative, but does not commit Kaiser Permanente or its member hospitals to purchase any minimum quantity of products or services from us. During 2011, we serviced a total of 17 Kaiser Permanente hospitals under this agreement.

We entered into a three-year reusable surgical products agreement with Catholic Healthcare West (currently known as Dignity Health), which was effective January 1, 2011. This agreement gives us the ability to contract with any Dignity Health hospital that chooses to use our products. Dignity Health is a 40-hospital system located in California, Arizona, and Nevada. This agreement allows us to assist Dignity Health with its environmental awareness initiative, but does not commit Dignity Health or its member hospitals to purchase any minimum quantity of products or services from us. As of December 31, 2011, six Dignity Health hospitals were under contract under this agreement.

In 2008, we entered into a five-year Supply and Co-Marketing Agreement (the Co-Marketing Agreement) with Cardinal Health 200, Inc. (Cardinal or Cardinal Health), an affiliate of Cardinal Health, Inc. Under the terms of the Co-Marketing Agreement, Cardinal is our exclusive supplier of more than 400 disposable surgical packs, and provides for a new product offering, the Hybrid Preference Pack®, in which we combine our reusable surgical packs with Cardinal Health's disposable surgical packs. We share profits from sales of the Hybrid Preference Pack based on an agreed-upon margin split. This new product couples the convenience of disposables with the waste-wise benefits of our reusable products. This environmentally friendly solution reduces packaging and medical waste, saves water and energy consumption, reduces chemical usage and provides just-in-time delivery and retrieval.

Table of Contents

The Co-Marketing Agreement allows us to focus on our strengths: reusable surgical products, instrumentation and management of central sterilization and supply chain activities. The Co-Marketing Agreement gives our environmentally friendly solution greater reach and visibility throughout the healthcare market. It brings together the strengths of two organizations that are market leaders in their segments for a more efficient and effective delivery of healthcare solutions.

In June 2009, we entered into a four-year national brand distribution agreement with Cardinal Health's medical and surgical supply chain business. This agreement appoints Cardinal a non-exclusive, authorized distributor of our products. Cardinal Health includes our products on its master merchandise file and categorizes our products as a national brand. This agreement expands upon our current supply and co-marketing relationship with Cardinal Health's Presource surgical kitting business and gives us access to a national distribution network that currently serves the Federal government as well as other healthcare providers not currently using our reusable product offering.

We maintain an internet website located at www.srisurgical.com, which makes available, free of charge, our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and any amendments to those reports filed or furnished to the Securities and Exchange Commission (SEC). This information is made available as soon as reasonably practicable after we electronically file it with or furnish it to the SEC. Our Code of Ethics and Corporate Compliance Policies are also posted on our website. Information contained on our website, whether currently posted or posted in the future, is not part of this document or any documents incorporated by reference in this document.

Market

Since our introduction in the early 1990's of reusable surgical gowns and drapes of exceptional quality for healthcare providers' use, we have added custom disposable surgical packs to our product offering. Since the early 2000's, we have supplied and reprocessed high quality surgical instruments for our customers. Our ability to offer reusable surgical gowns and drapes, custom disposable surgical packs and reusable surgical instruments enables us to supply most everything our customers require for surgical procedures.

According to the American Hospital Association and Verispan, a healthcare consulting organization, the United States healthcare market includes approximately 5,800 acute care hospitals and 5,300 surgery centers.

The following market conditions and strategies provide continuing opportunities for us:

Continued Pressure on Providers to Contain Costs and Improve Profitability. With the growth of managed care and a decrease in surgical service reimbursements, economic constraints require providers to continually increase their efficiency and reduce their overall cost structure. To assist them in reducing their costs of operation, we offer products and services that help our customers eliminate inventory, reduce staff, capital expenditures and medical waste, and improve their overall supply chain efficiency.

Increased Outsourcing of Provider Functions That Do Not Involve Patient Care. Providers with significant staff, capital and space dedicated to in-house processing of reusable surgical products and surgical instruments are outsourcing these functions to qualified outsourcing providers. By enabling our customers to outsource non-core functions, we allow them to increasingly focus on patient care.

Concern Regarding the Transmission of Infectious Diseases. The healthcare industry must manage the risk of infectious disease. These concerns increase the need for surgical barrier fabrics that protect surgeons and surgical staff from blood borne pathogens. Industry response to these concerns led to the promulgation of the Association for the Advancement of Medical Instrumentation (AAMI) PB70 standard, which establishes levels I, II, III and IV indicating increasing barrier protection. Using this standard as a guideline, the FDA mandates that any company marketing its products according to the AAMI PB70 standard submit a 510(k) prior to

Table of Contents

marketing the various levels. Our line of *GreenGown*[®] gowns helps to prevent liquid and viral strike-through in critical areas during surgical procedures and is cleared by the FDA for appropriate barrier labeling. Additionally, our FDA-regulated processes for decontamination and reprocessing of surgical instrumentation enable healthcare providers to better manage the risk of transmission of infectious diseases.

Concern Regarding the Handling and Disposal of Biohazardous Waste. The disposal of large volumes of infectious and hazardous waste generated by the healthcare industry continues to attract increased public awareness. Healthcare providers are under pressure to reduce their generation of biohazardous waste because of restrictions on incineration and limited access to dump sites. This market dynamic offers an advantage to companies that provide outsourced reusable alternatives to disposable surgical products.

Leverage Infrastructure with Increased Penetration in Markets. Our existing facilities combined currently have significant available capacity to access more of the national market. Distribution expansion, if prudently executed, could provide opportunity for business growth with incremental capital investment.

Activities by Hospitals, Hospital Groups and the Federal Government to Become Better Stewards of the Environment and to Create Facilities that Practice Environmental Sustainability. Increasing governmental pressure and public awareness are driving healthcare institutions, including government run institutions, to develop plans and implement policies to control their impact upon the communities in which they reside. The realization that the healthcare industry ranks second only to the food industry in waste generation is fueling increased interest in methods to control and eliminate waste through more aggressive efforts to reduce, reuse, and recycle. Through its Green Procurement Strategy (DoD GPP), the U.S. Department of Defense is implementing an agency-wide green procurement program designed to reduce resource consumption and solid waste generation. Green procurement includes, among other things, the acquisition of environmentally preferable products and services. Our reusable products are ideally suited to enable these institutions to respond aggressively by reducing waste through reuse of their surgical linens and basin sets. Additionally, our agreement with Cardinal s distribution group allows us to reach more healthcare facilities that currently do not utilize our reusable product offering, including healthcare facilities operated by the U.S. Government. As part of that agreement, our products are listed on the Department of Defense s distribution and pricing agreement (more commonly known as the DAPA list). Having our products included on the DAPA list, through the agreement with Cardinal, allows government-operated hospitals the ability to purchase our products.

Customers

As of December 31, 2011, we served a customer base of approximately 470 hospitals and surgery centers located throughout the United States. Our strategy is to further expand on the supply chain management needs of our current customer base, and grow our customer base by focusing on hospitals and surgery centers that are surgical procedure intensive.

We maintain agreements (typically three (3) year terms) to supply several group purchasing organizations (GPOs), including Novation, LLC, HealthTrust Purchasing Group, L.P., MedAssets, Inc. (including the acquisition of The Broadlane Group, effective November 16, 2010), Intermountain Health Services, Inc., Premier Purchasing Partners, L.P., and Hospital Corporation of America. Novation is the supply company for 25,000 Voluntary Hospitals of America, Inc. and University Health System Consortium organizations. HealthTrust Purchasing is a GPO representing over 1,400 not-for-profit hospitals and for profit acute care facilities. MedAssets is the largest independent healthcare purchasing group in the United States serving more than 180 health systems and 4,000 hospitals. Intermountain Health Services, Inc. is a healthcare purchasing group that services 23 hospitals. Premier has more than 2,500 member hospitals and 72,000 other healthcare sites. Hospital Corporation of America represents 164 hospitals and over 100 freestanding surgery centers in 20 states. Through these relationships, our products and services are potentially available to the vast majority of providers and surgery centers in our service areas.

Table of Contents

Products

Our principal reusable surgical products are *GreenGown* surgical gowns. We also offer reusable towels, surgical drapes, and stainless steel basin sets as part of our reusable surgical product line. We provide these products in a variety of configurations for a provider's specific needs. A major benefit of our reusable system is reduced medical waste because of the elimination of disposable, single-use products.

Our *GreenGown* liquid resistant Level III and liquid proof Level IV gowns are made of some of the most technologically advanced materials available, providing users with a highly breathable gown and excellent protection. This added protection is critical to healthcare providers given the continuing concerns of doctors, staff, and regulatory authorities regarding transmission of blood borne pathogens, including HIV and hepatitis viruses. The Level III and Level IV gowns are ideal for procedures with high bodily fluid volume and of longer duration. Our Standard Level II gown is made from an advanced micro-fiber polyester liquid resistant fabric, ensuring a high degree of comfort to the user, and is a cost-effective alternative to higher priced gowns. We believe this gown is ideal for procedures with minimal fluid exposure and of shorter duration. In November 2008, we obtained FDA 510(k) clearance to market our surgical gowns as Level III and Level IV, and our surgical drape as Level IV, which is intended for use in healthcare facilities, and they are in compliance with AAMI PB70 standard. In May 2009, we obtained FDA 510(k) clearance to market our Standard surgical gowns Level II, which is intended for use in healthcare facilities, as they are in compliance with AAMI PB70 standard.

In 2011, we introduced our GreenWrap[®], a reusable sterilization wrap that protects instrument sterility, while being environmentally friendly. The GreenWrap is designed specifically for steam sterilization of surgical instrument trays. The GreenWrap is made of a proprietary material of Infused[®] polyester fabric, which is low linting and breathable, allowing for excellent penetration of the steam sterilant. The GreenWrap material is significantly stronger than heavy-duty disposable wrap.

During 2010, W.L. Gore and Associates (Gore), the supplier of the barrier fabric used in our Level III and Level IV surgical gowns and our Level IV drapes, notified us that it intends to exit the medical fabrics market in a timed, phased manner. Gore gave its customers the option to make advance purchases of fabric to bridge their process of transitioning to another supplier, and we expect to make substantial purchases of fabric pursuant to this program. See *Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations*. As a result of Gore's exit from the medical fabrics market, we are in the process of identifying, evaluating and engaging a new supplier of barrier fabric to replace Gore. See *Item 1A. Risk Factors - We Rely on Key Suppliers*

We utilize radio-frequency identification (RFID) technology in our ten processing facilities. RFID technology is a method for identifying and tracking objects based on the use of a small tag that stores a unique code. We utilize multi-read RFID tags in our reusable surgical gowns and drapes, which allow us to replace the use of labor-intensive bar code scanning to track product usage. This technology offers us improved inventory control and monitoring of product quality. SRI Surgical holds a patent covering this process.

We contract with third-party vendors for cutting and sewing of gowns and drapes. We have procurement arrangements with Standard Textile Co., Inc. (Standard Textile) and Forum Industries, Inc. (Forum) as our supply source for reusable surgical products. The Standard Textile agreement expired in August 2008 and we continue to work with Standard Textile on a month-to-month basis. The Forum agreement is a three-year agreement and expires in January 2015.

To complement our reusable surgical products, we offer disposable packs containing single-use disposable products, such as gauze, needles, syringes, and tubing. These packs are developed to a customer's specifications, and in combination with our reusable line of surgical products, offer a cost-effective, high-quality alternative to custom procedure packs containing all disposable products. As mentioned above, in 2008, we entered into the Co-Marketing Agreement with Cardinal (see *Item 1. Business - the Company*). Under this agreement, Cardinal

Table of Contents

is appointed our sole vendor of disposable surgical packs for our existing customer base on the date the agreement was signed. In addition, this agreement provides for a new product offering known as the Hybrid Preference Pack. The Hybrid Preference Pack combines our reusable products with Cardinal's disposable surgical packs. This combined product responds to hospital and surgery center green initiatives by providing environmentally preferred purchasing options that maximize value and minimize waste. In addition to the agreement with Cardinal, we also have the ability to sell directly to Department of Defense (DoD) through our own DoD distribution and pricing agreement account and product listing.

Our instrument-processing program, called AccuSetSM, offers our customers the benefit of consistently available surgical instruments processed at an FDA-regulated facility. Our thorough cleaning and inspection process assures that surgical instruments are functional and meet rigorous quality standards. We offer general, laparoscopic, orthopedic, arthroscopic, ophthalmic, neurological, ENT (ear, nose and throat) and L&D (labor and delivery) instrument processing at our facilities. We also offer an overnight instrument processing program, ReadyCaseSM OnDemand. The program makes available to hospitals and surgery centers additional processing capabilities at our FDA-regulated facilities should they find themselves in sudden need. As of December 31, 2011, we service instrument programs at 69 hospitals.

We offer instruments as part of the AccuSet program pursuant to a Joint Marketing Agreement with Aesculap, Inc. (Aesculap), one of the oldest and largest worldwide suppliers of surgical instruments. In 2003, we signed a 10-year Joint Marketing Agreement under which Aesculap provides most of the surgical instruments that we supply to our customers and are used in their surgical procedures. Aesculap receives an agreed upon fee from us for each procedure based on the number and kinds of procedures performed with its instruments and the number and combination of instruments used for each procedure. We are currently in discussions with Aesculap regarding a new agreement. We have also developed vendor relationships with many leading manufacturers of surgical instruments to procure instrumentation preferred by our customers that Aesculap does not manufacture. These vendor relationships expand the range of solutions that we offer our customers. We expect our instrument-processing program will continue to grow.

ReadyCase, our surgical supply and instrument delivery system, combines reusable products, disposable packs, surgical instruments, and physician preference items to provide most of the products required for a surgical procedure. The system allows our healthcare customers to develop and implement best practice protocols. We believe that ReadyCase is the most complete case cart system available in the market. By delivering a high percentage of surgical products and instruments used in a procedure, ReadyCase offers our customers the potential to reduce their supply chain management costs, improve their operational efficiency, and increase their revenue by improving throughput in their surgical area.

We also provide an outsource solution for our customers' instrument processing and sterilization needs. Utilizing our expertise in managing FDA-regulated instrument processing facilities, we offer cost-effective management of hospital and surgery center instrumentation supply chain and central sterilization facilities.

Employees

As of December 31, 2011, we employed 799 people. Our employees are not covered by a collective bargaining agreement. We consider our employee relations to be positive.

Competition

We compete primarily with sellers of disposable gowns, drapes, basins and custom packs. Our principal competitors are Cardinal Converters (a subsidiary of Cardinal Health, Inc.), Medline Industries, Inc., DeRoyal Industries, Inc., and Kimberly Clark Corporation. We also compete with third party instrument processors and the in-house processing capabilities of hospitals and surgery centers to provide surgical instruments and reusable products.

Table of Contents

The challenging healthcare environment in recent years has led to increasingly intense competition among suppliers and manufacturers of surgical products. As providers seek to reduce operating costs in response to pressure from governments, insurance companies, and health maintenance organizations, suppliers and manufacturers are being forced to compete on price, service, quality and delivery of innovative solutions that improve the healthcare supply chain. Because we believe competitive pressure will continue to intensify for the foreseeable future, we must position SRI Surgical to effectively compete based on our high quality service and innovative outsourcing solutions.

Regulation

Substantially all of our products and services are subject to extensive government regulation in the United States by federal, state, and local governmental agencies, including the FDA, the Department of Transportation (DOT), and the Occupational Safety and Health Administration (OSHA).

Our reusable products are regulated as medical devices by the FDA, which regulates the development, production, distribution, and promotion of medical devices in the United States. Various states in which we do business also regulate medical devices. Pursuant to the Federal Food, Drug and Cosmetics Act (the FDA Act), our medical devices are subject to general controls regarding FDA inspections of our facilities, current Good Manufacturing Practices (cGMP s), the Quality System Regulations (QSR), labeling, maintenance of records, and medical device reporting with the FDA. To the extent required, we have obtained FDA pre-market approval of our devices under Section 510(k) of regulations issued under the Code of Federal Regulations (CFR), which provides for FDA approval on an expedited basis for products shown to be substantially equivalent to devices already cleared by the FDA and currently legally marketable in the United States. Products must be produced in establishments registered with the FDA and manufactured in accordance with the QSR, as defined under the FDA Act. In addition, our medical devices must be initially listed with the FDA, and our labeling and promotional activities are subject to scrutiny by the FDA and, in certain instances, by the Federal Trade Commission. The Medical Device Reporting regulation obligates us to provide information to the FDA on serious injuries or deaths alleged to have been associated with the use of a product or in connection with certain product failures that could have caused serious injury or death. If we fail to comply with the applicable provisions of the FDA Act, the FDA may institute proceedings to detain or seize products, impose fines, enjoin future company activities, impose product labeling restrictions, or enforce product recalls or withdrawals from the market.

We and our hospital customers also must comply with regulations of OSHA, including the blood borne pathogen standards requiring standard (universal) precautions which must be observed to minimize exposure to blood and other bodily fluids. To comply with these requirements, our employees wear appropriate personal protective equipment when handling soiled linens and materials in the facility s decontamination area. Properly used, our products allow our hospital customers to protect their employees in compliance with the OSHA regulations. Additionally, we must comply with local regulations governing the discharge of water used in our operations. We use locally licensed contractors to dispose of any biohazardous waste generated by our customers and received by us and therefore do not need to obtain permits for biohazardous waste disposal. We must comply with DOT and OSHA regulations governing the transportation of biohazardous materials, which include containing and labeling waste as well as reporting various discharges. We comply with these regulations by confining soiled products inside marked liquid proof bags for transport within secured and appropriately labeled transfer carts.

In addition, other federal, state and local regulatory authorities, including those enforcing laws, which relate to the environment, fire hazard control, and working conditions, have jurisdiction to take actions that could have a material adverse effect on us. We make expenditures from time to time to comply with environmental regulations, but do not expect to make any material capital expenditures for environmental compliance during 2012. However, current environmental estimates could be modified as a result of changes in our plans, legal requirements or other factors.

Table of Contents

Item 1A. Risk Factors

The cautionary statements set forth below, as well as factors described elsewhere in this Annual Report on Form 10-K and in other SEC filings, discuss important factors that could cause actual results to differ materially from any forward-looking statements that we make. We assume no obligation to update these forward-looking statements.

We may need additional capital in the future, which might not be available. Our business is capital intensive and requires annual expenditures for additional surgical products. Should we need or otherwise decide to raise additional funds, we may not be able to obtain financing on favorable terms, if at all. If we cannot raise funds, if needed, on acceptable terms, we may not be able to develop or enhance our products, take advantage of future opportunities, respond to competitive pressures or unanticipated requirements, or otherwise support our operations.

We are party to a credit facility (the Credit Facility) with Bank of America, N.A., which requires us to maintain minimum fixed charge coverage and maximum funded debt to EBITDA ratio covenants. As of December 31, 2011, we were not in compliance with the required fixed charge coverage ratio under the Credit Facility. Our lender waived this default, only through February 29, 2012, and we anticipate being in default under this covenant following our 2012 first quarter. There is no assurance that our lender will waive this or other defaults. A default under the Credit Facility could have a material adverse effect on our business, financial condition and results of operations. See *Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources* .

We cannot predict the effect that health care reform and other changes in government programs may have on our business, financial condition, results of operations or cash flows. In March 2010, the Patient Protection and Affordable Care Act as amended by the Health Care and Education Reconciliation Act of 2010 (Health Care Reform Legislation) was signed into law. In general, the Health Care Reform Legislation seeks to reduce health care costs and decrease over time the number of uninsured legal U.S. residents, by among other things, requiring employers to offer, and individuals to carry, health insurance or be subject to penalties. At this time, we cannot predict the full impact of the Health Care Reform Legislation due to its complexity and lack of implementing regulations or interpretive guidance, as well as our inability to foresee the law's impact on our customers. Implementation of the Health Care Reform Legislation could ultimately have a material adverse effect on us.

Our future growth is dependent on the sales process and market acceptance of our products and services. Our future performance depends on our ability to maintain and increase revenues from new and existing customers. Our sales process to acquire new customers is typically extended in duration, because of industry factors such as the approval process in hospitals for purchases from new suppliers, the duration of existing supply contracts, and implementation delays pending termination of a hospital's previous supply relationships. Our future performance also depends on the market accepting our product and service offerings, which emphasize the supply of reusable surgical products to a market that predominantly uses disposable products. We are also regularly developing new instrument processing programs. We are subject to a risk that the market will not broadly accept these product offerings, which would adversely affect our revenues and operating results.

We rely on key suppliers. We rely on Aesculap as our major source of supply of instruments for our instrument processing programs. Any failure of Aesculap to furnish instruments for any reason could materially and adversely affect our ability to service these programs until we secure one or more alternative suppliers.

As disclosed under *Item 1. Business - Products*, Gore, our supplier of the barrier fabric that we use in our Level III and Level IV surgical gowns and our Level IV drapes, notified us that it is exiting the medical fabrics market. We are making significant advance purchases of fabric to bridge the process of transitioning to another supplier. We are currently in the process of identifying, evaluating, and engaging new suppliers. Any failure by us to make adequate advance purchases of barrier fabric from Gore or to engage a new supplier of barrier fabric

Table of Contents

that meets our requirements in a timely manner could materially adversely affect us. There is no assurance that we will be able to develop a replacement product in a timely manner. If we were unable to develop a replacement product, this would have a material adverse impact on our results of operations.

In November 2008, we entered into a Co-Marketing Agreement with Cardinal. The Co-Marketing Agreement appoints Cardinal the exclusive supplier of disposable products for our customers. If this arrangement does not provide the results that we expect, we could be materially and adversely affected.

We are subject to fluctuations in the availability and cost of commodity items used in our products and distribution network. We depend on various component raw materials supplied by others for our operations and certain products we offer our customers. Our supplier relationships could be interrupted due to natural disasters or other events or could be terminated. A sustained interruption in the flow of adequate supplies, or a shortage of a particular item, could have an adverse effect on our business, as we may not be able to manage price fluctuations in commodity type items.

Additionally, our distribution network uses diesel fuel. Oil and gas prices remain volatile and have fluctuated significantly in recent years, causing our costs to distribute our products to fluctuate. The healthcare industry is highly competitive and many of our customers have cost-containment initiatives, so we might not be able to pass along cost increases through higher prices or fuel surcharges. If we cannot fully offset cost increases through other cost reductions, or recover these costs through price increases or fuel surcharges, our results of operations could be adversely affected. We might also be adversely affected by increases in the cost of cotton, which is a component of our towels.

The loss of a significant customer or purchasing organization could adversely affect our operating results. During the year ended December 31, 2011, hospitals belonging to three group purchasing organizations (GPOs), Novation, LLC, HealthTrust Purchasing Group, L.P. and MedAssets, Inc. accounted for approximately 58% of our sales. No single healthcare provider accounted for more than 10% of our revenues in 2011. Our business with these GPOs is pursuant to agreements (typically three (3) year terms), which are subject to renewal from time to time through competitive processes. Although each GPO member hospital makes its purchasing decisions on an individual basis, the loss of a substantial portion of a GPO hospitals' business would adversely affect our revenues and results of operations.

Intense competition in the markets in which we operate could adversely affect us. Our business is highly competitive. Competitors include a number of distributors and manufacturers, as well as the in-house reprocessing operations of hospitals. Certain of our existing and potential competitors possess substantially greater resources than we possess. Some of our competitors, including Cardinal Converters (a subsidiary of Cardinal Health, Inc.) and Medline Industries, Inc., serve as the sole supplier of a wide assortment of products to a significant number of hospitals. While we have a substantial array of surgical products, many of our competitors have a greater number of products for the entire hospital, which in some instances is a competitive disadvantage for us. There is no assurance that we will be able to compete effectively with existing or potential competitors. See *Item 1. Business Competition*.

The loss of key executives and employees could adversely affect us. Our success depends upon the contributions of executives and key employees. The loss of executives and certain key employees in sales, operations and marketing could have a significant adverse effect on our ability to penetrate our markets, operate efficiently, and develop and sell new products and services. We also believe our success will depend in large part upon our ability to attract and retain additional highly skilled personnel.

Our ability to effectively grow depends on our ability to improve our operational systems. We have expanded our operations since inception and may continue to expand to pursue existing and potential market opportunities. This growth places a significant demand on management, financial and operational resources. To manage growth effectively, we must implement and improve our operational systems, procedures and controls on a timely basis and continue to invest in the operational infrastructure of our business.

Table of Contents

Our product liability insurance may not be sufficient to cover all claims. The use of medical devices such as surgical instruments entails an inherent risk of product liability or other claims initiated by patients or hospitals. Any of those claims in excess of our insurance coverage or not covered by insurance could adversely affect our results of operations.

We may incur significant costs related to self-insurance retention levels under our employee benefits and workers compensation programs. We retain a liability up to \$110,000 annually for each medical insurance plan member up to an estimated annual aggregate liability limit of \$3.1 million. We are insured for aggregate claims of \$1.0 million in excess of this amount, and retain liability for additional excess claims. Also, we retain the first \$250,000 of each workers compensation claim incurred. If the number of claims or their severity increases, this could have a material adverse effect on our financial position and results of operations. (See *Critical Accounting Policies* for additional information)

Changes in federal or state regulations could materially adversely affect us. Significant aspects of our business are subject to federal, state and local statutes and regulations governing, among other things, medical waste-disposal and workplace health and safety. In addition, most of the products furnished or sold by us are subject to regulation as medical devices by the FDA, as well as by other federal, state and local agencies. Our facilities are subject to quality systems inspections by FDA officials. The FDA has the power to enjoin future violations, seize adulterated or misbranded devices, and require the manufacturer to remove products from the market, and publicize relevant facts. Federal, state or local governments might impose additional restrictions or adopt interpretations of existing laws that could materially adversely affect us. (See *Item 1. Business Regulation.*)

Failure to maintain adequate internal systems and effective internal controls over financial reporting and information systems could adversely affect us. Adequate internal systems and an effective system of internal controls are necessary to ensure proper financial reporting and disclosure. A significant deficiency or material weakness in our system of internal controls, as defined under the Public Company Accounting Oversight Board guidelines, could adversely affect our ability to report our financial condition, results of operations or cash flows, and related disclosures.

We adopted a rights plan that could make it more difficult for a third party to acquire us. On November 10, 2010, our Board of Directors adopted a shareholder rights plan to better assure that we can evaluate and respond to a disclosed indication of interest. The plan could discourage, delay, or prevent a hostile third party from acquiring a large portion of our securities, initiating a tender offer or proxy contest, or acquiring us, even if our shareholders might receive a premium for their shares over then-current market prices.

The effects and results of our exploration and evaluation of strategic alternatives are uncertain. On September 14, 2011, we announced that our Board of Directors initiated a process to explore and evaluate strategic alternatives for the Company, which may include a full or partial sale, merger, or equity investment. There can be no assurance that this process will lead to a transaction. In addition, this process may distract the attention of our Board of Directors and management from our business, cause us to incur significant expenses pursuing one or more transactions unsuccessfully, or impair our relationships with customers, suppliers and employees. If we are unable to effectively manage these risks, our business, financial condition, or results of operations may be adversely affected.

Our stock price has fluctuated and might continue to be volatile. During the 12-month period ended December 31, 2011, the sale price of our common stock on the NASDAQ Stock Market System ranged from \$2.65 to \$6.50. The closing price of our common stock on February 24, 2012 was \$3.90. Our common stock price might continue to be volatile in the future.

Table of Contents**Item 2. Properties**

We operate ten reusable processing facilities that range in size from 30,000 to 63,500 square feet, which are located in Baltimore, Chattanooga, Cincinnati, Dallas, Houston, Los Angeles, Raleigh, Salt Lake City, Stockton, and Tampa. Each facility has standardized processes and equipment, including computerized and fully automated heavy-duty washers, dryers, and sterilizers to achieve consistent decontamination and sterilization of reusable surgical products and instruments. We follow the Quality System Regulations at each facility, and regularly implement at all facilities efficiencies that have been developed and tested at another location.

We maintain service centers in Atlanta, Detroit, Louisville, Miami and Oklahoma City to facilitate distribution of our products to our customers.

We own our Chattanooga, Cincinnati, Houston, and Stockton processing facilities, as well as our corporate headquarters. We lease the remaining processing facilities and service centers.

We believe that our existing facilities adequately serve our current requirements. The table below summarizes our properties and the major markets they serve as of December 31, 2011:

	Square Footage (Approx.)	Lease Expiration	Selected Markets Served
Processing Facilities:			
Baltimore, Maryland	58,700	May 31, 2017	Baltimore, Philadelphia, Richmond, New Jersey
		(Options to 2027)	
Chattanooga, Tennessee	50,000	Owned	Atlanta, Birmingham, Nashville, Mississippi
Cincinnati, Ohio	50,000	Owned	Columbus, Cincinnati, Louisville, Lexington, Detroit, Cleveland
Dallas, Texas	31,000	March 31, 2013	Dallas, Oklahoma City, Tulsa
Houston, Texas	30,000	Owned	Houston, San Antonio, Austin
Los Angeles, California	30,400	November 30, 2012	San Diego, Los Angeles
Raleigh, North Carolina	63,500	March 31, 2017 (Options to 2027)	South Carolina, North Carolina
Salt Lake City, Utah	31,800	July 6, 2012	Utah, Idaho
Stockton, California	57,000	Owned	Sacramento, San Francisco, Oakland
Tampa, Florida	63,000	March 31, 2017	Florida, Georgia
		(Options to 2022)	
Service Centers:			
Atlanta	3,150	March 31, 2013	
Detroit, Michigan	7,300	November 30, 2012	
Louisville, Kentucky	8,660	Month-to-Month	
Miami, Florida	4,000	Month-to-Month	
Oklahoma City, Oklahoma	3,600	February 29, 2012	
Corporate Office:			
Tampa, Florida	42,000	Owned	

We are currently negotiating amended lease agreements on the facilities that are scheduled to expire in 2012. We believe new or amended leases will be completed prior to each lease expiration date.

Item 3. Legal Proceedings

From time to time, we are subject to legal proceedings that arise in the ordinary course of our business. We do not believe these proceedings, individually or in the aggregate, will have a material adverse effect on our financial position, results of operations, or cash flows.

Table of Contents**PART II****Item 5. Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities
Common Stock Information**

Our common stock trades publicly on The NASDAQ Stock Market LLC (NASDAQ Global Market) (the "NASDAQ") under the symbol "STRC". On February 24, 2012, there were approximately 35 holders of record of our common stock. The table below sets forth the high and low sales prices for our common stock for fiscal years 2010 and 2011, as reported on the NASDAQ.

Common Stock Price Range

Year ended December 31, 2010	High	Low
First quarter	\$ 3.50	\$ 2.05
Second quarter	\$ 5.38	\$ 3.35
Third quarter	\$ 3.99	\$ 2.70
Fourth quarter	\$ 4.80	\$ 2.51
Year ended December 31, 2011		
First quarter	\$ 6.50	\$ 4.02
Second quarter	\$ 5.26	\$ 4.03
Third quarter	\$ 4.90	\$ 2.65
Fourth quarter	\$ 4.91	\$ 3.76

We have never declared or paid cash dividends on our common stock and do not anticipate paying dividends on our common stock in the foreseeable future. Additionally, financial covenants in our credit facility prohibit the payment of cash dividends. See *Management's Discussion and Analysis of Financial Condition and Results of Operations*, *Liquidity and Capital Resources* and *Notes to Financial Statements*.

Stock Performance Graph

The following graph shows a comparison of our cumulative total shareholder return, NASDAQ Global Market (U.S.), and the NASDAQ Health Care Index. This graph assumes that \$100 was invested on December 31, 2006 in our common stock and in the other indices and in each case, assumes reinvestment of all dividends. Historic stock price performance does not necessarily indicate future stock price performance.

Table of Contents**Item 6. Selected Financial Data**

The following table contains certain selected financial data that have been derived from our audited financial statements. The data should be read in conjunction with the Financial Statements and Notes thereto incorporated into Item 8 and *Management's Discussion and Analysis of Financial Condition and Results of Operations* incorporated into Item 7.

	Years Ended December 31,

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis should be read with our financial statements and Notes included elsewhere in this Annual Report on Form 10-K. This discussion and analysis contains trend analysis and might contain forward-looking statements. These statements are based on current expectations and actual results might differ materially. Among the factors that could cause actual results to vary are those described in the *Overview* section below and in Item 1A. *Risk Factors*.

Overview

Edgar Filing: SRI SURGICAL EXPRESS INC - Form 10-K

We provide daily processing, assembly and delivery of reusable and disposable surgical products and instruments through our state-of-the-art, FDA-regulated service centers. Our integrated closed-loop process starts with daily delivery of reusable and disposable surgical supplies and instruments to healthcare providers.

Table of Contents

After use, we pick up the reusable textiles, basins and instruments used in surgery and return them to our processing facilities. Used products arriving at our processing facilities are sorted, cleaned, inspected, packaged, sterilized and shipped back to the healthcare providers. We also manage the instrumentation and supply chain of hospitals, surgery centers and operating rooms and their central sterilization facilities.

We believe our facilities are strategically situated to capitalize on future market opportunities. These facilities have significant available capacity to access more of the national market.

We derive our revenue from the sale and servicing of reusable and disposable surgical products and instruments and the management of our customers' supply chain and central sterilization functions. Reusable products include linens (gowns, towels and drapes) and basins (stainless steel cups, carafes, trays and basins). Disposable accessory packs supplement the reusable products with highly customizable components. We sell our products and services through a direct sales force located throughout most of the major markets in the United States. Our revenue growth is primarily determined by the number of customers, the number and type of surgical procedures that we service for each customer, and pricing for our various types of surgical packs and procedures. Revenues are recognized as the agreed upon products and services are delivered, generally daily. We incur most of our cost of revenues from processing the reusable surgical products and instruments at our processing facilities.

We are a party to a five-year Supply and Co-Marketing Agreement (the "Co-Marketing Agreement") with Cardinal Health 200, Inc. ("Cardinal"), an affiliate of Cardinal Health, Inc, which expires in 2013. We appointed Cardinal as our exclusive provider of disposable surgical products. We jointly market an environmentally friendly combined reusable pack (produced by us) and disposable surgical pack (produced by Cardinal) called the Hybrid Preference Pack. The Co-Marketing Agreement gives us an opportunity to focus on our core strengths: reusable surgical products, instrumentation and management of central sterilization and supply chain activities. The Co-Marketing Agreement gives our environmentally friendly solution greater reach and visibility throughout the healthcare market and combines the strengths of two organizations that are market leaders in their segments for a more efficient and effective delivery of healthcare solutions. We amended and restated the Co-Marketing Agreement in February 2010 to provide, among other things, that we purchase from Cardinal Health the disposable component products included in the Hybrid Preference Packs, instead of receiving them on a consignment basis. The change in the arrangement for disposable component products contributed approximately \$100,000 of the \$760,000 increase in our gross margins in 2011 and approximately \$200,000 of the \$2.7 million increase in our gross margins in 2010.

Under the terms of the Co-Marketing Agreement with Cardinal Health, we received \$1.0 million and \$250,000 in January 2009 and 2010, respectively, which was initially recognized in other accrued expenses in our balance sheets. The amounts received from Cardinal Health reimbursed us for certain expenses incurred for marketing and sales, opening depots in territories not currently served by us, and to close our disposable products assembly plant located in Plant City, Florida, among other items. During the years ended December 31, 2010 and 2009, we incurred costs of \$37,000 and \$485,000, respectively, related to certain costs, including severance, asset disposal and other costs, associated with the closing of our disposable assembly facility in Plant City, Florida. The costs directly associated with the plant closing were applied against the payment received from Cardinal Health. Additionally, during the years ended December 31, 2010 and 2009, we incurred costs of \$399,000 and \$329,000, respectively, related to the hiring of sales and marketing professionals to support the agreement, as well as software development, and training and management sessions in an effort to support the agreement. The direct costs incurred in support of the agreement with Cardinal Health were applied against the payment received from Cardinal Health. We accounted for cash incentive payments under the provisions of Accounting Standards Codification ("ASC") 605-50-45-13b, *Revenue Recognition: Customer Payments and Incentives*, which requires that consideration received from a vendor that is a reimbursement for cost incurred to sell the vendor's product be characterized as a reduction of that cost when recognized in the income statement.

Most of our surgical instrument supply arrangements with customers use instruments owned by Aesculap, which receives an agreed upon fee for each procedure based on the number and kinds of procedures performed

Table of Contents

with its instruments and the number and combination of instruments used for each procedure. This arrangement allows us to limit our cost of capital for instrument programs. In addition to the Aesculap-owned instruments, we purchase surgical instruments from other vendors to service customers who have requirements that Aesculap cannot fulfill. We expect instrument revenues will continue to grow and, as a result, we expect our instrument inventory will continue to grow.

Our products and services are directly connected to surgical procedures performed by our customers based on our daily delivery model. As such, variations in surgical procedure volumes have a direct impact on the demand for our products and services. The healthcare industry displays trends that have historically been reflected in a seasonality pattern in our revenue. For example, our first quarter usually has reduced surgical volumes as individuals delay elective procedures until they meet deductible limits within their healthcare plans. The second quarter typically tends to ramp up as individuals meet deductibles and spring-time activities increase, thus creating the need for unscheduled procedures. The third quarter again typically exhibits less demand as individuals delay elective procedures and enjoy summertime activities. During the fourth quarter, individuals typically opt to have elective procedures before flex spending accounts are lost and deductibles reset with the new year, in addition to non-elective, mandatory procedures. Another factor influencing each quarter and seasonality is the distribution of holidays that curtail all but emergency procedures.

Our profitability is primarily determined by our revenues, the efficiency with which we deliver products and services to our customers, and our ability to control our costs. Although our revenues increased during 2011 as compared to 2010, during the year we experienced significant increases in employee health insurance claims, for which we retain a portion of the liability under our health insurance plan, as well as increases in towel and fuel costs attributable to increased commodity prices for cotton and fuel. Under our health insurance plan, we retain a liability up to \$110,000 annually for each plan member, up to an aggregate liability limit of \$3.1 million. We are insured for aggregate claims of \$1.0 million in excess of the \$3.1 million aggregate liability limit. The increases in health care, towel and fuel costs have had a significant impact on our gross margin and net loss for the year ended December 31, 2011.

Our principal strategic opportunity to improve our operating results is to capitalize on our service capabilities and considerable infrastructure by leveraging our current relationships with existing customers and adding new customers. We continue to focus on introducing our current and potential new customers to our physician-specific ReadyCase case cart management system, which has been our principal source of new sales. In addition, the Co-Marketing Agreement with Cardinal Health allows our sales force to focus on our strengths: reusable surgical products, instrumentation, and management of central sterilization and supply chain activities. The agreement gives our environmentally friendly solution greater reach and visibility throughout the healthcare market. It combines the strengths of two organizations that are leaders in their segments for a more efficient and effective delivery of healthcare solutions. See *Item 1. Business The Company*.

We are incurring expenses in connection with our exploration of strategic alternatives, which will continue in the first quarter of 2012.

Critical Accounting Policies and Estimates

The preparation of our financial statements and related disclosures in conformity with accounting principles generally accepted in the United States of America requires management to make judgments, assumptions, and estimates that affect the amounts reported in our financial statements and accompanying notes. On an ongoing basis, we evaluate our estimates and assumptions based upon historical experience and various other factors and circumstances. We believe that these estimates and assumptions are reasonable under the circumstances; however, actual results may vary from these estimates and assumptions. Note B to our financial statements describes the significant accounting policies and methods that we use in preparing our financial statements. We identified the following critical accounting policies that affect the more significant judgments, assumptions and estimates used in preparing our financial statements.

Table of Contents

Allowance for Doubtful Accounts. Our allowance for doubtful accounts is based on our assessment of the collectability of specific customer accounts, the overall aging of the balances and the financial stability of the customer. The use of different estimates or assumptions could produce different allowance balances. If a major customer's creditworthiness deteriorates or customer defaults run at a rate higher than historical experience, we would be required to increase this allowance, which could adversely affect our results of operations.

Reserves for Shrinkage, Obsolescence, and Scrap for Reusable Surgical Products and Instruments. We determine our reserves for shrinkage and obsolescence of our reusable surgical products and instruments based on historical experience. Any linen products not scanned by our RFID system for a 210-day period are considered lost and written off. We determine our reserve for scrap based upon quality assurance standards and historical evidence. We periodically verify the quantity of other reusable surgical products by counting and by applying observed turn rates. A third party, Aesculap, owns most of the surgical instruments that we use. We base our reserve for owned surgical instrument losses on our assessment of our historical loss experience, including periodic physical counts. Using different estimates or assumptions could produce different reserve balances for our reusable products and instruments. We review this reserve quarterly. If actual shrinkage, obsolescence or scrap differs from our estimates, our reserve would increase or decrease accordingly, which could adversely affect our results of operations.

Reserves for Shrinkage and Obsolescence for Inventories. We determine our reserves for shrinkage and obsolescence of our inventories based on historical data, including the results of cycle counts performed during the year and the evaluation of the aging of our disposable surgical products. Using different estimates or assumptions could produce different reserve balances. We review this reserve quarterly. If actual losses differ from our estimates, our reserve would increase or decrease accordingly, which could adversely affect our results of operations.

Amortization of Reusable Surgical Products and Instruments. Our reusable surgical products are stated at cost. We amortize linens and basins on a basis similar to the units of production method. Useful lives for each product are based on the estimated total number of available uses for each product. The expected total available usage for our linen products using the three principal fabrics (accounting for approximately 75% of the reusable surgical products) is 75, 100, and 125 uses, based on several factors, including our actual historical experience with these products. We believe our RFID technology enables us to evaluate the useful lives of linen products more often. Basins are amortized on a straight-line basis over their estimated useful life, up to 20 years. We amortize owned surgical instruments on the straight-line method based on a four-year useful life. If our actual use experience with these products is shorter than these assumptions, our amortization rates for reusable products and instruments would increase, which could adversely affect our results of operations.

Health Insurance Reserves. We offer employee benefit programs including health insurance to eligible employees. We retain a liability up to \$110,000 annually for each plan member. Our policy has an estimated annual aggregate liability limit of \$3.1 million and provides insurance for aggregate claims of \$1.0 million in excess of this amount. We accrue health insurance costs using estimates to approximate the liability for reported claims and claims incurred but not reported. Using different estimates or assumptions could produce different reserve balances. If actual claim results exceed our estimates, our health insurance reserve would increase, which could adversely affect our results of operations.

Workers' Compensation Insurance Reserve. Our workers' compensation insurance program is a large dollar deductible, self-funded plan. We retain a liability of \$250,000 for each claim occurrence. Our policy has an annual aggregate liability limit of \$1.6 million. We base our reserve on historical claims experience and reported claims. We accrue workers' compensation insurance costs using estimates to approximate the liability for reported claims and claims incurred but not reported. We review this reserve quarterly. If actual claims differ from our estimates, the reserve would increase or decrease accordingly, which could adversely affect our results of operations.

Table of Contents

Income Taxes. Our effective tax rate is based on our income or losses and statutory tax rates in the various jurisdictions in which we operate. Significant judgment is required in determining our effective tax rate and evaluating our tax positions. Income taxes have been provided using the asset and liability method in accordance with ASC Topic 740, *Income Taxes*, (ASC 740). In accordance with ASC 740, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in the tax rate is recognized in operations in the period that includes the enactment date of the rate change. The tax benefits must be reduced by a valuation allowance in certain circumstances. Realization of the deferred tax benefits is dependent on generating sufficient taxable income prior to the expiration of any net operating loss carry-forwards. We periodically review deferred tax assets for recoverability, and provide valuation allowances as necessary.

Stock-Based Compensation. In accordance with ASC Topic 718, *Share-Based Payments* , (ASC 718) and the Security and Exchange Commission Staff Accounting Bulletin No. 107 (SAB 107), we recognize stock-based compensation expense in our statements of operations. We have converted from the binomial model to the Black-Scholes model to determine the fair value of our issued options. Both option pricing models require the input of subjective assumptions, including the expected life of the option, the price volatility of the underlying stock, expected interest rates and forfeitures. If actual results differ significantly from our assumptions, stock-based compensation could increase or decrease. For further discussion of our stock-based compensation, see *Note B Summary of Significant Accounting Policies Stock-Based Compensation* and *Note J Stock-Based Compensation* to the financial statements.

Results of Operations

We operate on a 52-53 week fiscal year ending the Sunday nearest December 31st. The financial statements are reflected as of December 31, 2011, 2010 and 2009 for presentation purposes only. The actual end of each period was January 1, 2012, January 2, 2011, and January 3, 2010, respectively. There are 52 weeks in each of 2011, 2010 and 2009.

The following table sets forth for the periods shown the percentage of revenues represented by certain items reflected in our statements of operations:

	Years Ended December 31,		
	2011	2010	2009
Revenues	100.0%	100.0%	100.0%
Cost of revenues	78.1	77.4	79.6
Gross profit	21.9	22.6	20.4
Distribution expenses	8.0	7.5	7.0
Selling and administrative expenses	15.0	16.2	16.9
Loss from operations	(1.1)	(1.1)	(3.5)

Table of Contents

Year ended December 31, 2011 compared to year ended December 31, 2010

Revenues

Revenues increased \$6.7 million, or 6.7%, to \$107.6 million for the year ended December 31, 2011, compared to \$100.9 million for the year ended December 31, 2010. As noted above, we operate on a 52-53 week fiscal year. Those weeks break down into a number of operating days, which varies after taking into account company holidays. As a result, a key metric we utilize to run our business is our average daily revenue. There were 254 billing days in both 2011 and 2010. Our average daily revenue was \$424,000 and \$397,000 in 2011 and 2010, respectively. The increase in our average daily revenue in 2011 when compared to 2010 is primarily related to the increase in demand for our reusable surgical product offering and Hybrid Preference Pack offering. Partially offsetting these increases were lower procedure volumes and industry pricing pressures, as well as customer losses.

Under the Supply and Co-Marketing Agreement with Cardinal Health, we accounted for disposable component products that were included in the Hybrid Preference Packs on a consignment basis and did not recognize any associated revenue. On February 3, 2010 the Company entered into the Amended and Restated Supply Agreement, at which time the Company began purchasing the disposable component products that were included in the Hybrid Preference Packs and recognizing the associated revenue upon sale. During 2011, the Company recognized \$4.3 million of revenue related to the disposable component products of the Hybrid Preference Packs, which accounted for approximately \$17,000 of the average daily revenue in 2011. During 2010, the Company recognized \$2.7 million of revenue related to the disposable component products of the Hybrid Preference Packs, which accounted for approximately \$11,000 of the average daily revenue in 2010.

Gross Profit

Gross profit increased \$760,000, or 3.3%, to \$23.5 million for the year ended December 31, 2011, compared to \$22.8 million for the prior year. As a percentage of revenues, gross profit decreased by 0.7 percentage points to 21.9% for the year ended December 31, 2011, compared to 22.6% for the prior year. The increase in gross profit was primarily due to higher revenues of approximately \$6.7 million, labor efficiency increases of \$175,000 and lower instrument related costs of \$215,000 primarily as a result of a change in the services provided to a customer. Partially offsetting these items were higher employee health insurance costs of \$780,000 caused by an increase in the number of larger claims, higher fixed costs (excluding increased health insurance costs) of \$736,000 to support our growth in revenue, higher towel costs of \$672,000 attributable to increased cotton prices, higher disposable material costs of \$502,000 and production costs of \$216,000, due to growth in revenue and higher levels of product loss of \$74,000.

The increase in disposable material costs relates almost entirely to our purchasing disposable materials from Cardinal Health. The disposable products purchased under the Hybrid Preference Pack program have lower margins because we are no longer assembling these products and incur a higher cost per product than in prior years. Prior to February 2010, we received the disposable packs contained in the Hybrid Preference Packs on consignment from Cardinal Health. Consequently, we did not recognize gross revenues or costs associated with these disposable packs. Under the terms of the amended agreement, effective February 2010, we purchase the disposable packs from Cardinal Health and therefore recognize all associated revenues and costs of the Hybrid Preference Pack. We pay Cardinal Health for the disposable packs that we purchase without regard to our risk of collecting those amounts due from our customers.

Distribution Expenses

Distribution expenses increased \$1.1 million, or 14.5%, to \$8.6 million for the year ended December 31, 2011, compared to \$7.5 million in the prior year. The increase in distribution expenses in 2011 when compared to the prior year was primarily due to higher labor-related costs of \$527,000 to support additional routes and customers due to our growth, higher vehicle fuel costs of \$489,000 primarily related to the increase in the price per gallon of diesel fuel, and higher vehicle lease expense of \$148,000 servicing new customers.

Table of Contents

Selling and Administrative Expenses

Selling and administrative expenses decreased \$203,000, or 1.2%, to \$16.2 million for the year ended December 31, 2011, compared to \$16.4 million in the prior year. The decrease in selling and administrative expenses in 2011 is primarily attributable to decreased travel costs of \$259,000, decreased professional fees of \$195,000, decreased payroll-related costs (excluding health insurance costs) of \$102,000 and decreased depreciation expense of \$87,000. Cost control measures were implemented in 2011 resulting in reduced selling and administrative expenses. Partially offsetting these savings were higher sales and marketing expenses of \$252,000. Similar costs in 2010 were applied against the funds received from Cardinal. Additionally, higher group purchasing organization (GPO) related marketing and administrative fees of \$130,000 were incurred due our increased revenues, as well as higher health insurance costs of \$67,000.

Interest Expense

For the year ended December 31, 2011, interest expense decreased \$47,000, or 6.7%, to \$655,000, compared to \$702,000 in the prior year. The decrease in interest expense is primarily due to lower interest rates offset by generally higher average outstanding balances.

Other Income

Other income was \$362,000 for the year ended December 31, 2011, primarily as a result of rental income, which is essentially the same as the prior year. In 2007, we entered into an agreement to lease to a third party a portion of our corporate headquarters under a non-cancelable operating lease. This lease will expire in March 2012 and will not be renewed.

Income Tax Expense

Our effective tax rate is a function of our income or loss before taxes and statutory tax rates, as well as minimum taxes, in the various jurisdictions in which we operate. Income tax expense is a function of our net income or loss, effective tax rate and valuation allowances. Our effective tax rate for 2011 was 2.2%, compared to 6.8% for 2010, principally because a valuation allowance recorded in 2011 to reduce certain deferred tax assets.

Net Loss Per Common Share

We recorded a loss per common share of \$0.24 on a basic and diluted per share basis for 2011, the same level as our loss per common share in 2010.

Year ended December 31, 2010 compared to year ended December 31, 2009

Revenues

Revenues increased \$2.4 million, or 2.4%, to \$100.9 million for the year ended December 31, 2010, compared to \$98.4 million for the year ended December 31, 2009. As noted above, we operate on a 52-53 week fiscal year. Those weeks break down into a number of operating days, which varies after taking into account company holidays. As a result, a key metric we utilize to run our business is our average daily revenue. There were 254 billing days in 2010 and 258 billing days in 2009. Our average daily revenue was \$397,000 and \$382,000 in 2010 and 2009, respectively. The increase in our average daily revenue in 2010 when compared to 2009 is primarily related to the increase in demand for our reusable surgical product offering and the amendment to the co-marketing agreement under which we now recognize all revenues for Hybrid Preference Pack customers. Partially offsetting these increases were lower procedure volumes and industry pricing pressures, as well as, customer losses.

Under the Supply and Co-Marketing Agreement with Cardinal Health, the Company accounted for disposable component products that were included in the Hybrid Preference Packs on a consignment basis and

Table of Contents

did not recognize any associated revenue. On February 3, 2010 the Company entered into the Amended and Restated Supply Agreement, at which time the Company began purchasing the disposable component products that were included in the Hybrid Preference Packs and recognizing the associated revenue upon sale. During 2010, the Company recognized \$2.7 million of revenue related to the disposable component products of the Hybrid Preference Packs, which accounted for approximately \$11,000 of the average daily revenue increase in 2010 compared to 2009.

Gross Profit

Gross profit increased \$2.7 million, or 13.3%, to \$22.8 million for the year ended December 31, 2010, compared to \$20.1 million for the prior year. As a percentage of revenues, gross profit increased by 2.2 percentage points to 22.6% for the year ended December 31, 2010, compared to 20.4% for the prior year. The increase in gross profit was primarily due to higher revenues of approximately \$2.4 million, lower reusable surgical product loss of \$1.8 million, lower instrument usage fees of \$844,000, lower repairs and maintenance of \$301,000 and lower sterilization expense of \$147,000 relating to the closure of our Plant City operations in 2009, as well as improved labor efficiency of \$472,000 and the change in the co-marketing agreement with Cardinal which accounted for less than \$200,000. Partially offsetting these items were higher disposable material costs of \$2.5 million, as well as, higher pack consumable costs of \$223,000, as result of the increase in our revenues.

The lower reusable surgical product loss was due to lower levels of product loss in 2010, as well as the prior year adjustment for additional product loss that was recorded in the three months ended September 30, 2009, see Note P *Third Quarter 2009 Adjustments*. The lower levels of product loss in 2010 are attributable to our focus on the management of linens at customer locations, as well as improved technology to track linens once they leave our facilities. The lower instrument usage fees were primarily the result of the loss of a large instrument customer during 2010, as well as the change in the mix of instrument sets used by our customers. The increase in disposable material costs relates almost entirely to our purchasing disposable materials from Cardinal Health. The disposable products purchased under the Hybrid Preference Pack program have lower margins because we are no longer assembling these products and incur a higher cost per product than in prior years. Prior to February 2010, we received the disposable packs contained in the Hybrid Preference Packs on consignment from Cardinal Health. Consequently, we did not recognize gross revenues or costs associated with these disposable packs. Under the terms of the amended agreement, effective February 2010, we now purchase the disposable packs from Cardinal Health and therefore recognize all associated revenues and costs of the Hybrid Preference Pack. We pay Cardinal Health for the disposable packs that we purchase without regard to our risk of collecting those amounts due from our customers.

Distribution Expenses

Distribution expenses increased \$592,000, or 8.5%, to \$7.5 million for the year ended December 31, 2010, compared to \$6.9 million in the prior year. The increase in distribution expenses in 2010 when compared to the prior year was primarily due to higher vehicle fuel costs, as well as increased labor-related costs and vehicle lease expense, as we added additional drivers and vehicles to service new customer routes. The increase in vehicle fuel costs was caused by the increase in diesel fuel costs and miles driven to service new customer routes.

Selling and Administrative Expenses

Selling and administrative expenses decreased \$244,000, or 1.5%, to \$16.4 million for the year ended December 31, 2010, compared to \$16.6 million in the prior year. The decrease in selling and administrative expenses in 2010 is primarily attributable to the extra week of operations in fiscal 2009 (our 53-week year end), lower other professional fees of \$274,000, lower severance-related costs of \$206,000 primarily due to the departure of a former officer in 2009, and lower payroll-related costs of \$114,000, which were partially offset by higher group purchasing organization (GPO) related marketing and administrative fees of \$208,000, as well as \$120,000 of costs incurred in the fourth quarter relating to the unsolicited expression of interest from a potential acquirer.

Table of Contents

Interest Expense

For the year ended December 31, 2010, interest expense increased \$83,000, or 13.4%, to \$702,000, compared to \$619,000 in the prior year. The increase in interest expense is primarily due to higher interest rates as well as generally higher average outstanding balances.

Other Income

Other income was \$361,000 for the year ended December 31, 2010, primarily as a result of rental income, which is essentially the same as the prior year. In 2007, we entered into an agreement to lease to a third party a portion of our corporate headquarters under a non-cancelable operating lease.

Income Tax Expense

Our effective tax rate is a function of our income or loss before taxes and statutory tax rates, as well as minimum taxes, in the various jurisdictions in which we operate. Income tax expense (benefit) is a function of our net income or loss, effective tax rate and valuation allowances. Our effective tax rate for 2010 was 6.8%, compared to 2.2% for 2009, principally because a valuation allowance recorded in 2010 to reduce certain deferred tax assets and the reduced level of loss in 2010.

Net Loss Per Common Share

We recorded a loss per common share of \$0.24 on a basic and diluted per share basis for 2010 compared with a loss per common share of \$0.58 in 2009.

Liquidity and Capital Resources

Our principal sources of capital have been cash flows from operations and borrowings under our revolving credit facility. As of December 31, 2011, we had approximately \$1.9 million in cash and cash equivalents, compared to approximately \$1.3 million as of December 31, 2010. In addition, as of December 31, 2011, we had \$5.2 million available under our credit facility, after accounting for amounts outstanding under the credit facility, certain letters of credit principally associated with our future raw material purchases, self-insurance policies and a general reserve.

Net cash provided by operating activities for 2011 was \$8.0 million as compared to \$8.5 million last year. Net cash from operations during 2011 primarily related to depreciation and amortization expense of \$8.8 million, the provision for slow moving reusable surgical products and shrinkage of \$1.7 million, stock-based compensation expense of \$633,000, an increase in accounts payable of \$387,000 and a decrease in prepaid and other assets of \$310,000, which was partially offset by an increase in accounts receivable of \$1.5 million, an increase in inventories of \$958,000 and our net loss of \$1.6 million. When compared to cash from operations during 2010, the decrease is primarily attributable to the increase in our accounts receivables which is a function of our increased revenues and the timing of our collections, as well as the increase in inventories which is primarily due to the purchase of approximately \$504,000 of raw material from Gore. We estimate that our expenditures in 2012 for raw material purchases from Gore will be approximately \$6.7 million.

Net cash used in investing activities in 2011 was \$10.5 million as compared to \$7.2 million in 2010. Cash used in investing activities primarily related to purchases of property, plant and equipment and reusable surgical products. The increase in net cash used in investing activities is primarily due to increased reusable surgical product purchases to support the increase in our reusable business. We estimate that our expenditures in 2012 for property, plant and equipment will be approximately \$2.0 million and reusable surgical products expenditures will be approximately \$6.5 million, an amount that may fluctuate depending on the growth of our business. We expect instrument revenues will continue to grow and, as a result, we expect our instrument inventory will continue to grow. We estimate that our expenditures in 2012 for instrument inventory will be approximately \$1.0 million.

Table of Contents

As noted under Item 1. *Business Products*, as a result of Gore's intent to exit the medical fabrics market, we will purchase approximately \$7.2 million of fabric to bridge the process of transitioning to another supplier. We intend to finance this purchase through our credit facility.

Net cash provided by financing activities in 2011 was \$3.0 million compared to net cash used in financing activities of \$793,000 in 2010. Cash provided by financing activities was primarily a result of the timing of advances and repayments under our credit facility. Additionally, during 2011 we had proceeds from the reissuance of bonds of \$6.0 million, which was offset by the redemption of the outstanding bonds in the amount of \$6.6 million.

Credit Facility

On August 4, 2011, we entered into a \$28.7 million Credit Facility with our existing lender, which amended our \$24.3 million credit facility that was set to mature on August 7, 2011. The Credit Facility includes a \$3.7 million term loan on our Tampa headquarters, and a revolving loan of up to \$25.0 million for working capital, letters of credit, capital expenditures and other purposes. Actual amounts available under the revolving loan are determined by a defined borrowing base calculation. As a result of the borrowing base calculation as of December 31, 2011, we had \$18.4 million available for advances, of which we had used \$13.2 million of the revolving loan, including \$9.3 million of advances, \$3.8 million of availability for letters of credit to support our future raw materials purchases and self-insurance policies, and \$0.1 million maintained as a required reserve. As a result, at December 31, 2011, we had excess availability of \$5.2 million. As of December 31, 2011, we had \$3.6 million outstanding on the term loan, which is classified as a mortgage payable and amortizes based on a 20-year schedule. The Credit Facility matures on August 4, 2016.

The Credit Facility is secured by substantially all of the Company's assets. The interest rate on the revolving and term loans varies between 50 and 250 basis points over the Base Rate (as defined in the Credit Facility) or LIBOR depending on the level of the fixed charge coverage ratio. The type of interest rate is an election that we periodically make. As of December 31, 2011, \$7.5 million of the outstanding revolving loan was based on LIBOR plus 2.50% (3.0% as of December 31, 2011) and the remaining outstanding revolving loan balance of approximately \$1.8 million was at the Prime Rate plus 1.00% (4.25% at December 31, 2011). As of December 31, 2011, \$3.5 million of the outstanding term loan was based on LIBOR plus 2.50% (3.0% as of December 31, 2011) and the remaining outstanding term loan balance of approximately \$65,000 was at the Prime Rate plus 1.00% (4.25% at December 31, 2011).

The Credit Facility requires us to comply with (a) a fixed charge coverage ratio of 1.0 to 1.0 through March 31, 2012 and 1.1 to 1.0 thereafter; (b) a funded debt to EBITDA ratio not to exceed 2.0 to 1.0; (c) a limit on annual capital expenditures of \$2.0 million each year through December 31, 2013 increasing to \$2.5 million annually for 2014 and 2015; and (d) a limit on annual reusable surgical product capital expenditures of \$9.0 million each year through December 31, 2013, increasing to \$10.0 million annually in 2014 and \$11.0 million annually in 2015.

As of December 31, 2011, we did not comply with the required fixed charge coverage ratio under the Credit Facility. On February 28, 2012, we entered into an amendment to the Credit Facility with our lender, under which our lender waived this default. Additionally the interest rate on the revolving and term loans increased to between 250 and 450 basis points over the Base Rate or LIBOR depending on the level of the fixed charge coverage ratio, which represents a 200 basis point increase. Our fixed charge coverage ratio will not be tested on January 31, 2012 or February 29, 2012 and we must maintain a minimum excess availability of not less than \$2.5 million during the period February 1, 2012 through and including five business days following our lender's receipt of required monthly compliance information from us for the period ending March 31, 2012. We anticipate being in default under this financial covenant following our 2012 first quarter but, we believe that we will be able to obtain a waiver or amendment from our lender or have alternative financing options available to us, but there is a risk that will not occur. See, *Risk Factors* We may need additional capital in the future, which might not be available.

Table of Contents

The Credit Facility includes typical provisions restricting us from paying dividends, incurring additional debt, making loans and investments, encumbering its assets, entering into a new business, or entering into certain merger, consolidation, or liquidation transactions.

Bonds

In 1999, we issued public bonds to fund the construction of two of our reusable processing facilities. Interest rates on the bonds adjusted based upon rates that approximate LIBOR. In October 2008, \$6.0 million of our bonds were tendered. The holders of the tendered bonds were paid from draws against the letters of credit under our Credit Facility. Under the terms of the indentures relating to the bonds, the tendered bonds could be remarketed at any time prior to their maturity in 2014.

On March 10, 2011, the \$6.0 million of tendered bonds were reissued, generating approximately \$6.0 million of proceeds. The proceeds were used to pay down our outstanding notes payable.

On July 1, 2011, we redeemed all of our public bonds with a principal amount of \$6.6 million with funds available under our Credit Facility. The bonds were redeemed at par value, therefore no gain or loss was recognized as a result of the redemption of the bonds.

Contractual Obligations

Our contractual cash obligations for future minimum payments, including interest, under our notes payable to bank, mortgage, operating leases and raw material purchases, as of December 31, 2011, are as follows:

Payments due by period (000 s)	Total	Less than 1 year	2-3 years	4-5 years	More than 5 years
Notes payable, mortgage and bonds payable	\$ 12,885	\$ 215	\$ 430	\$ 12,240	\$
Operating leases	9,476	2,448	3,533	2,636	859
Raw materials	6,669	6,669			
Total contractual cash obligations	\$ 29,030	\$ 9,332	\$ 3,963	\$ 14,876	\$ 859

In addition, as part of our ReadyCase delivery system, we offer instruments for use and reprocessing pursuant to our Joint Marketing Agreement with Aesculap. Under the terms of this agreement, Aesculap furnishes and repairs the surgical instruments that we deliver to customers and receives an agreed upon fee for each procedure. We also procure our reusable surgical products from a limited number of other vendors. We are not bound to purchase any minimum quantity of products; however, we expect to make substantial payments to these vendors to fulfill our reusable surgical product requirements. Our purchases under these arrangements in 2011 were \$16.3 million. Amounts paid under these agreements will vary based upon changes in customer demand, amortization rates, product prices, and other variables affecting our business.

We believe that our existing cash and cash equivalents together with expected cash provided by operations and the Credit Facility will be adequate to finance our operations for at least the next 12 months.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

Our principal exposure to market risk is change in interest rates under our various debt instruments and borrowings. The outstanding balance under our revolving loan portion of the Credit Facility was approximately \$9.3 million as of December 31, 2011. Our interest rate on the revolving loan varies between 50 and 250 basis points over the Base Rate (as defined in the Credit Facility) or LIBOR depending on the level of fixed charge coverage ratio. As of December 31, 2011, \$7.5 million of the outstanding revolving loan was based on LIBOR plus 2.50% (3.0% at December 31, 2011) and the remaining outstanding revolving loan balance of approximately

Table of Contents

\$1.8 million was at the Prime Rate plus 1.00% (4.25% at December 31, 2011). We are subject to changes in our interest rate on this revolving loan based on fluctuations in interest rates. Assuming an outstanding balance on this revolving loan of \$9.3 million, if the Prime and LIBOR Rates increase (decrease) by 100 basis points, our interest payments would increase (decrease) by \$23,000 per quarter.

The outstanding balance under the term loan portion of the Credit Facility was approximately \$3.6 million as of December 31, 2011. Interest on the term loan varies between 50 and 250 basis points over the Base Rate (as defined in the credit facility) or LIBOR depending on the level of fixed charge coverage ratio. We periodically elect the type of interest rate for this loan. As of December 31, 2011, \$3.5 million of the outstanding term loan was based on LIBOR plus 2.50% (3.0% at December 31, 2011) and the remaining outstanding term loan balance of approximately \$65,000 was at the Prime Rate plus 1.00% (4.25% at December 31, 2011). Assuming an outstanding balance of this facility of \$3.6 million, if the Prime and LIBOR Rates increase (decrease) by 100 basis points, our interest payments would increase (decrease) by \$9,000 per quarter.

As noted above, as of December 31, 2011, we did not comply with the required fixed charge coverage ratio under the Credit Facility. The interest rate on the revolving and term loans increased to between 250 and 450 basis points over the Base Rate or LIBOR depending on the level of the fixed charge coverage ratio, which represents a 200 basis point increase. Assuming an outstanding balance on the revolving and term loans of \$9.3 million and \$3.6 million, respectively, the 200 basis point increase in the Prime and LIBOR Rates would increase our interest payments by \$47,000 and \$18,000 per quarter on our revolving and term loans, respectively.

We do not have any other material market risk sensitive instruments.

Table of Contents

Item 8. Financial Statements and Supplementary Data

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Shareholders of

SRI/Surgical Express, Inc.

We have audited the accompanying balance sheets of SRI/Surgical Express, Inc. (a Florida corporation) as of December 31, 2011 and 2010, and the related statements of operations, shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2011. Our audits of the basic financial statements included the financial statement schedule listed in the index appearing under Item 15 (a)(2). These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of SRI/Surgical Express, Inc. as of December 31, 2011 and 2010, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2011 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

NOTES TO FINANCIAL STATEMENTS

NOTE A DESCRIPTION OF ORGANIZATION AND BUSINESS

SRI/Surgical Express, Inc. (SRI Surgical or the Company) is a supplier and reprocessor of reusable surgical linen and instrumentation to hospitals and surgery centers across the United States. The Company offers a combination of high quality reusable surgical products (including gowns, towels, drapes, basins and surgical instruments), disposable surgical products, and instruments in a comprehensive case cart management system. At ten regional facilities, the Company collects, sorts, cleans, inspects, packages, and sterilizes its reusable surgical products and instruments, and delivers daily on a just-in-time basis. The Company also provides an outsource solution for the management of hospital instrumentation and central sterilization. The Company operates in one industry segment.

NOTE B SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Financial Statement Presentation

The Company presents an unclassified balance sheet as a result of the extended amortization period (predominantly three to six years) of its reusable surgical products. The Company provides reusable surgical products to its customers on a per use basis similar to a rental arrangement.

The Company operates on a 52-53 week fiscal year ending the Sunday nearest December 31st. The financial statements reflect the Company's year-end as of December 31st for presentation purposes only. The actual end of each period was January 1, 2012, January 2, 2011, and January 3, 2010. There were 52 weeks included in each of the years ended December 31, 2011, 2010 and 2009.

Use of Estimates

Management is required to make certain estimates and assumptions during the preparation of financial statements and accompanying notes in conformity with accounting principles generally accepted in the United States of America. These estimates and assumptions affect the amounts reported in the financial statements and accompanying notes. Actual results could differ materially from those estimates and assumptions.

Cash and Cash Equivalents

The Company considers all highly liquid investments with a maturity of three months or less when purchased to be cash and cash equivalents.

The Company maintains its cash and cash equivalents in financial institutions the Company considers of high credit quality. From time to time, the cash balances in these accounts exceed the Federal Deposit Insurance Corporation insured limits. To date, the Company has not experienced any losses in such accounts and believes it is not exposed to significant credit risk on its cash and cash equivalents.

Accounts Receivable, Net

The Company has accounts receivable from hospitals and surgery centers. The Company does not believe that there is sufficient credit risk associated with those receivables to require a form of collateral from its customers. The allowance for doubtful accounts as of December 31, 2011 and 2010 was approximately \$128,000 and \$122,000, respectively. The allowance for doubtful accounts relates to accounts receivable not expected to be collected and is based on management's assessment of specific customer balances, the overall aging of the balances, and the financial stability of the customers.

Table of Contents*Concentration of Credit Risk*

For the year ended December 31, 2011, revenues relating to hospitals belonging to three group purchasing organizations (Novation, LLC, HealthTrust Purchasing Group, L.P., and MedAssets, Inc.) collectively accounted for approximately 58% of the Company's revenues. For the years ended December 31, 2010 and 2009, revenues relating to hospitals belonging to these group purchasing organizations collectively accounted for approximately 55% and 62%, respectively, of the Company's revenues. No single hospital or surgery center customer accounted for more than 10% of the Company's revenues for the year ended December 31, 2011, 2010 or 2009.

Unbilled Receivable

Included in prepaid expenses and other assets are unbilled receivables related to certain instruments purchased on behalf of a vendor in the amounts of \$11,000 and \$189,000 at December 31, 2011 and 2010, respectively.

Inventories, Net

Inventories consist of raw materials, principally consumables, supplies, and disposable surgical products; and finished goods consisting of assembled packs of various combinations of raw materials and disposable accessory packs purchased from third parties. Inventories are valued at the lower of cost or market, with cost being determined on the first-in, first-out method. As of December 31, 2011 and 2010, inventory consists of the following:

	December 31,	
	2011	2010
	(in 000 s)	
Raw materials	\$ 1,710	\$ 1,053
Finished goods	2,758	2,457
	4,468	3,510
Less: Inventory reserve	(111)	(112)
	\$ 4,357	\$ 3,398

At December 31, 2011, approximately \$504,000 of raw material purchased from Gore is included in the raw materials inventory balance.

Reusable Surgical Products, Net

The Company's reusable surgical products, consisting principally of linens (gowns, towels, and drapes), basins (stainless steel medicine cups, carafes, trays, basins) and owned surgical instruments, are stated at cost. Amortization of linens is computed on a basis similar to the units of production method. Estimated useful lives for each product are based on the estimated total number of available uses for each product. The expected total available usage for our linen products using the three principal fabrics (accounting for approximately 75% of the reusable surgical products) is 75, 100, and 125 uses, based on several factors, including our actual historical experience with these products. The Company believes RFID technology enables it to evaluate the useful lives of linen products more efficiently. Basins are amortized on a straight-line basis over their estimated useful life, up to 20 years. Owned surgical instruments are amortized straight-line over a period of four years. Accumulated amortization as of December 31, 2011 and 2010 was approximately \$16.9 million and \$15.4 million, respectively.

As of December 31, 2011 and 2010, the reusable surgical products balances include reserves for shrinkage, obsolescence and scrap related to reusable surgical products of approximately \$1,258,000 and \$1,140,000, respectively.

Table of Contents

Property, Plant and Equipment, Net

Property, plant and equipment are stated at cost. Depreciation and amortization are computed on the straight-line method with a half-year convention over the estimated useful lives of the assets, or the term of the related leases for leasehold improvements, whichever is shorter.

Health Insurance

The Company offers employee benefit programs, including health insurance, to eligible employees. The Company retains a liability of up to \$110,000 annually for each plan member. The policy has an estimated annual aggregate liability limit of \$3.1 million in 2011 and provides insurance for aggregate claims of \$1.0 million in excess of this limit. Health insurance costs are accrued using estimates to approximate the liability for reported claims and claims incurred but not reported. At December 31, 2011 and 2010, the Company accrued a liability of approximately \$357,000 in each year for claims incurred and claims incurred but not reported, which is included in employee related accrued expenses in the accompanying balance sheets.

Workers' Compensation Insurance

The Company has a large dollar deductible, self-funded plan for its workers' compensation insurance program. The Company retains a liability of \$250,000 for each claim occurrence. The policy has an annual aggregate liability limit of \$1.6 million. The Company has obtained letters of credit in the amount of \$1,137,000 with its primary lender to secure the payment of future claims. The Company accrues workers' compensation insurance costs using estimates to approximate the liability for reported claims and claims incurred but not reported, as determined by an independent actuary. As of December 31, 2011 and 2010, the Company accrued a liability of approximately \$1.1 million and \$952,000, respectively, for claims incurred and claims incurred but not reported, which is included in employee related accrued expenses in the accompanying balance sheets.

Revenue Recognition

Revenues are recognized as products and services are delivered, generally daily. Packing slips signed and dated by the customer evidence delivery of product. The Company's contractual relationships with its customers are primarily evidenced by purchase orders or service agreements with terms varying from one to five years, which are generally cancelable by either party.

The Company owns substantially all of the reusable surgical products provided to customers except the surgical instruments. A third party provides most of the surgical instruments that are included in the Company's comprehensive surgical procedure-based delivery and retrieval service. The Company pays a fee to the third party for the use of the surgical instruments. In accordance with ASC Topic 605, *Revenue Recognition* (ASC 605), the Company acts as a principal in this arrangement and has reported the revenue gross for the comprehensive surgical procedure-based delivery and retrieval service. The third party vendor fee charged to the Company is included in cost of revenues in the statements of operations.

Advertising

Costs associated with advertising are charged to expense as incurred. During the fiscal years ended December 31, 2011, 2010 and 2009, advertising costs of approximately \$20,000, \$30,000, and, \$28,000 respectively, were charged to selling and administrative expenses in the Company's statements of operations.

Income Taxes

Income taxes have been provided using the asset and liability method in accordance with ASC Topic 740, *Income Taxes* (ASC 740). In accordance with ASC 740, deferred tax assets and liabilities are recognized for

Table of Contents

the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in the tax rate is recognized in operations in the period that includes the enactment date of the rate change. The tax benefits must be reduced by a valuation allowance in certain circumstances. The deferred tax assets are reviewed periodically for recoverability, and valuation allowances are provided for as necessary.

In July 2006, the Financial Accounting Standards Board (the "FASB") issued an interpretation that is contained in ASC 740, which clarifies the accounting for and disclosure of uncertainty in tax positions. This interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. It also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition associated with tax positions. Interest and penalties, if applicable, are included in income tax expense. The Company determined that this standard did not have a material impact on its financial statements for the years ended December 31, 2011, 2010 and 2009.

Fair Value of Financial Instruments

The carrying amounts of cash and cash equivalents, accounts payable, accrued expenses and accounts receivable approximate fair value due to their short-term nature. The fair values of notes payable, bonds payable and mortgage payable approximate the carrying amounts as the interest rates are based on market interest rates.

Loss Per Share

Basic loss per share is calculated by dividing net loss available for common shareholders by the weighted average number of common shares outstanding during the period. Diluted loss per share is calculated by dividing net loss available for common shareholders by the weighted average number of common and potential common shares outstanding during the period. The number of potential common shares takes into account the dilutive effect of outstanding options, calculated using the treasury stock method.

Employee Termination Costs

The Company incurred \$108,000, \$98,000 and \$326,000 in 2011, 2010, and 2009, respectively, for expenses related to the termination of executive officers and various employees. The Company had approximately \$16,000 and \$0 of employee termination expense accrued as of December 31, 2011 and 2010, respectively.

Stock-based Compensation

The Company accounts for its stock-based compensation plans in accordance with the provisions of ASC Topic 718, *Compensation-Stock Compensation*, (ASC 718). Under ASC 718, all stock-based compensation cost is measured at the grant date, based on the fair value of the award, and is recognized as an expense over the requisite service period. On July 1, 2011, as part of the Company's conversion to a new equity compensation administration and reporting platform, the Company converted to the Black-Scholes valuation model from a binomial (Lattice) model.

The cost for all stock-based awards granted between December 31, 2005 and June 30, 2011, represents the grant-date fair value that was estimated in accordance with the provisions of ASC 718, utilizing a binomial (Lattice) model. The cost of all stock-based awards granted subsequent to June 30, 2011, represents the grant-date fair value that is estimated in accordance with the provisions of ASC 718, utilizing the Black-Scholes valuation model. Because the Company does not accrue dividends, the fair value, when using the Black-Scholes valuation model is essentially the same as the binomial (Lattice) model, when valuing a stock option grant. For

Table of Contents

the years ended December 31, 2011, 2010 and 2009, respectively, stock-based compensation expense was \$633,000, \$636,000 and \$659,000, or \$633,000, \$636,000 and \$659,000 net of income tax, which contributed to a \$0.10 reduction in basic and diluted earnings per share in each year presented.

Fair Value Accounting

The Company defines fair value based on ASC Topic 820, *Fair Value Measurements and Disclosures* (ASC 820). ASC 820 creates a fair value hierarchy, which prioritizes the inputs to be used in determining fair value and requires disclosure of relevant fair value information, which should describe the inputs used to measure fair value, and the effect of those measurements on earnings for the periods presented.

NOTE C PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment consist of the following:

	Useful Lives In Years	December 31, (in 000 s)	
		2011	2010
Land		\$ 1,582	\$ 1,582
Land improvements	15	646	646
Construction in process		1,503	1,267
Buildings and improvements	20-40	16,179	16,100
Leasehold improvements	2-18	8,156	7,943
Machinery and equipment	3-12	22,234	21,482
Office furniture, equipment and computers	3-10	4,380	3,904
		54,680	52,924
Less: Accumulated depreciation and amortization		(30,627)	(27,519)
		\$ 24,053	\$ 25,405

In accordance with ASC Topic 350, *Intangibles-Goodwill and Other* (ASC 350), certain external direct costs of materials and services, and other qualifying costs incurred in connection with developing or obtaining internal use software are capitalized. The Company capitalized costs of internally developed software in the amounts of approximately \$10,000 and \$13,000 during the years ended December 31, 2011 and 2010, respectively. Such capitalized costs primarily relate to the cost of software and certain contracted programming costs, as well as other such qualifying costs.

Construction in process primarily relates to internally developed software-related costs for electronic data interchange, quoting, and data management tools to be used in the Company's daily operations.

For the years ended December 31, 2011, 2010 and 2009, depreciation and amortization expense was approximately \$3.2 million, \$3.2 million, and \$3.4 million, respectively.

NOTE D NOTES PAYABLE

On August 4, 2011, the Company entered into a \$28.7 million Credit Facility with its existing lender, which amended its \$24.3 million credit facility that was set to mature on August 7, 2011. The Credit Facility includes a \$3.7 million term loan on its Tampa headquarters, and a revolving loan of up to \$25.0 million for working capital, letters of credit, capital expenditures and other purposes. Actual amounts available under the revolving loan are determined by a defined borrowing base calculation. As a result of the borrowing base calculation as of December 31, 2011, the Company had \$18.4 million available for advances, of which the Company had used \$13.2 million of the revolving loan, including \$9.3 million of advances, \$3.8 million of availability for letters of

Table of Contents

credit to support the Company's future raw materials purchases and self-insurance policies, and \$0.1 million maintained as a required reserve. As a result, at December 31, 2011, the Company had excess availability of \$5.2 million. As of December 31, 2011, the Company had \$3.6 million outstanding on the term loan, which is classified as a mortgage payable, and amortizes based on a 20-year schedule. The Credit Facility matures on August 4, 2016.

The Credit Facility is secured by substantially all of the Company's assets. The interest rate on the revolving and term loans varies between 50 and 250 basis points over the Base Rate (as defined in the Credit Facility) or LIBOR depending on the level of the fixed charge coverage ratio. The type of interest rate is an election the Company periodically makes. As of December 31, 2011, \$7.5 million of the outstanding revolving loan was based on LIBOR plus 2.50% (3.0% as of December 31, 2011) and the remaining outstanding revolving loan balance of approximately \$1.8 million was at the Prime Rate plus 1.00% (4.25% at December 31, 2011). As of December 31, 2011, \$3.5 million of the outstanding term loan was based on LIBOR plus 2.50% (3.0% as of December 31, 2011) and the remaining outstanding term loan balance of approximately \$65,000 was at the Prime Rate plus 1.00% (4.25% at December 31, 2011).

The Credit Facility requires the Company to comply with (a) a fixed charge coverage ratio of 1.0 to 1.0 through March 31, 2012 and 1.1 to 1.0 thereafter; (b) a funded debt to EBITDA ratio not to exceed 2.0 to 1.0; (c) a limit on annual capital expenditures of \$2.0 million each year through December 31, 2013 increasing to \$2.5 million annually for 2014 and 2015; and (d) a limit on annual reusable surgical product capital expenditures of \$9.0 million each year through December 31, 2013, increasing to \$10.0 million annually in 2014 and \$11.0 million annually in 2015.

As of December 31, 2011, the Company did not comply with the required fixed charge coverage ratio under the Credit Facility. On February 28, 2012, the Company entered into an amendment to the Credit Facility with its lender, under which the Company's lender waived this default. Additionally, the interest rate on the revolving and term loans increased to between 250 and 450 basis points over the Base Rate or LIBOR depending on the level of the fixed charge coverage ratio, which represents a 200 basis point increase. The Company's fixed charge coverage ratio will not be tested on January 31, 2012 or February 29, 2012 and the Company must maintain a minimum excess availability of not less than \$2.5 million during the period February 1, 2012 through and including five business days following the Company's lender's receipt of required monthly compliance information from the Company for the period ending March 31, 2012. Should the Company not be in compliance with any of the Credit Facility covenants at a future date, the Company believes that it would be able to obtain a waiver or amendment from its lender or have alternative financing options available to the Company.

The Credit Facility includes typical provisions restricting the Company from paying dividends, incurring additional debt, making loans and investments, encumbering its assets, entering into a new business, or entering into certain merger, consolidation, or liquidation transactions.

For the years ended December 31, 2011, 2010, and 2009, interest expense was approximately \$655,000, \$702,000, and \$619,000, respectively. Interest expense in 2011 and 2010 included approximately \$130,000 and \$132,000, respectively, of interest related to a mortgage, see Note E Mortgage Payable. Interest expense in 2011 and 2010 included approximately \$19,000 and \$62,000, respectively, of interest related to the bonds, see Note F Bonds Payable.

NOTE E MORTGAGE PAYABLE

As noted above under Note D Notes Payable, on August 4, 2011, the Company replaced the previous mortgage note on the Company's corporate headquarters with a new \$3.7 term loan. The term loan has a term of five (5) years and an amortization schedule based on 20 years, with a balloon payment due on August 4, 2016. As amended pursuant to the restated loan and security credit facility described in Note D above, interest on the term loan varies between 50 and 250 basis points over the Base Rate (as defined in the Credit Facility) or LIBOR

Table of Contents

depending on the level of the fixed charge coverage ratio. The type of interest rate is an election made periodically by the Company. At December 31, 2011, \$3.5 million of the mortgage bears an interest rate of LIBOR plus 2.50% (3.0% at December 31, 2011) and the remaining outstanding balance of approximately \$65,000 was at the Prime Rate plus 1.00% (4.25% at December 31, 2011). As also described in Note D, at December 31, 2011, the Company did not comply with the required fixed charge coverage ratio under the Credit Facility and as a result, beginning on February 28, 2012, interest on the term loan varies between 250 and 300 basis points over the Base Rate or 400 to 450 basis points over LIBOR depending on the level of the fixed charge coverage ratio.

Mortgage payments as of December 31, 2011 for the next five years are as follows (in 000 s):

2012	\$ 215
2013	215
2014	215
2015	215
2016	2,705
Total	\$ 3,565

NOTE F BONDS PAYABLE

In 1999, the Company issued public bonds to fund the construction of two of its reusable processing facilities. Interest rates on the bonds adjusted based upon rates that approximate LIBOR. In October 2008, \$6.0 million of the Company's bonds were tendered. The holders of the tendered bonds were paid from draws against the letters of credit under the Company's Credit Facility. Under the terms of the indentures relating to the bonds, the tendered bonds could be remarketed at any time prior to their maturity in 2014.

On March 10, 2011, the \$6.0 million of tendered bonds were reissued, generating approximately \$6.0 million of proceeds. The proceeds were used to pay down the Company's outstanding notes payable.

On July 1, 2011, the Company redeemed all of its public bonds with a principal amount of \$6.6 million with funds available under the Company's Credit Facility. The bonds were redeemed at par value, therefore no gain or loss was recognized as a result of the redemption of the bonds.

NOTE G COMMITMENTS AND CONTINGENCIES*Operating Leases*

The Company leases facilities, office equipment, and distribution vehicles under non-cancelable operating leases with terms ranging from one to fifteen years. The processing facility leases contain various renewal options and escalating payments. The Company intends to exercise certain aspects of these renewal options when the initial terms expire. The vehicle leases contain contingent rentals based on mileage.

Future minimum lease payments as of December 31, 2011 are as follows (in 000 s):

Years ending December 31	
2012	\$ 2,448
2013	1,885
2014	1,648
2015	1,475
2016	1,161
Thereafter	859
Total	\$ 9,476

Table of Contents

Rental expense for the years ended December 31, 2011, 2010 and 2009 totaled approximately \$3.8 million, \$3.7 million, and \$3.5 million (including contingent rentals of approximately \$324,000, \$313,000, and \$313,000), respectively. The Company is in the process of negotiating renewals of leases that expire in 2012.

Contractual Obligations

The Company offers instruments pursuant to a Joint Marketing Agreement with Aesculap, Inc. (Aesculap). Under the terms of this agreement, Aesculap furnishes and repairs most of the surgical instruments that are delivered to customers and receives an agreed upon fee from the Company for each procedure. The Company has arrangements with Standard Textile Co., Inc. (Standard Textile) and Forum Industries, Inc. (Forum), under which the Company purchases the majority of its reusable surgical linens.

The Company's management believes that Aesculap, Standard Textile and Forum's prices are and will be comparable to prices available from other vendors. Standard Textile is a shareholder of the Company. If Aesculap, Standard Textile or Forum were unable to perform under these procurement arrangements, the Company would need to obtain alternate sources for its reusable surgical products. The Company is not bound to purchase any minimum quantity of products under these agreements, however, the Company is required to purchase at least fifty-percent (50%) of its annual reusable surgical linen requirements from Forum. The Company estimates that its payments under these agreements will be between \$14.0 and \$16.0 million in 2012. Amounts in subsequent years will be comparable, adjusted by changes in the Company's customer demand, amortization rates, product prices, and other variables affecting its business. During the years ended December 31, 2011, 2010, and 2009, the Company purchased reusable surgical linen products in the amounts of \$6.9 million, \$5.7 million, and \$4.8 million, respectively. During the years ended December 31, 2011, 2010, and 2009, the Company incurred fees of \$8.7 million, \$9.4 million, and \$11.3 million, respectively, for instrument usage.

Under the terms of the Co-Marketing Agreement with Cardinal Health, the Company received \$1.0 million and \$250,000 in January 2009 and 2010, respectively, which was initially recognized in other accrued expenses in its balance sheets. The amounts received from Cardinal Health were intended to reimburse the Company for certain expenses incurred for marketing and sales, opening depots in territories not currently served by the Company, and to close its disposable products assembly plant located in Plant City, Florida, among other items. During the years ended December 31, 2010 and 2009, the Company incurred costs of \$37,000 and \$485,000, respectively, related to certain costs, including severance, asset disposal and other costs, associated with the closing of its disposable assembly facility in Plant City, Florida. The costs directly associated with the plant closing were applied against the payment received from Cardinal Health. Additionally, during the years ended December 31, 2010 and 2009, the Company incurred costs of \$399,000 and \$329,000, respectively, related to the hiring of sales and marketing professionals to support the agreement, as well as software development, and training and management sessions in an effort to support the agreement. The direct costs incurred in support of the agreement with Cardinal Health were applied against the payment received from Cardinal Health. The Company accounted for cash incentive payments under the provisions of ASC 605-50-45-13b, *Revenue Recognition: Customer Payments and Incentives*, which requires that consideration received from a vendor that is a reimbursement for cost incurred to sell the vendor's product be characterized as a reduction of that cost when recognized in the income statement.

During 2010, W.L. Gore and Associates (Gore), the supplier of the barrier fabric used in the Company's Level III and Level IV surgical gowns and its Level IV drapes, notified the Company it is exiting the medical fabrics market in early 2012. As a result of its decision, Gore gave its customers the option to make advance purchases of fabric to bridge their process of transitioning to another supplier. The Company will make a substantial purchase of approximately \$7.2 million of fabric pursuant to this program. During the year ended December 31, 2011, the Company purchased raw material barrier fabric from Gore in the amount of \$504,000.

Table of Contents*Management Employment Agreements*

The Company has employment agreements with its Chief Executive Officer and Chief Financial Officer that provide for payment of twelve months and nine months base salary, respectively, and a pro-rated bonus as severance, if involuntarily terminated by the Company. The officers are prohibited from competing with the Company during the two-year period following termination of their employment. The Company incurred a charge of approximately \$238,000 in 2009 in connection with the termination agreement between the Company and a former officer.

Legal Proceedings

From time to time, the Company is involved in claims that arise in the ordinary course of business. The Company does not believe these proceedings, individually or in the aggregate, will have a material adverse effect on its financial position, results of operations, or cash flows.

NOTE H INCOME TAX

The expense for income taxes from continuing operations for the three years ended December 31 were as follows (in 000 \$):

	2011	2010	2009
Current	\$ 34	\$ 100	\$ 82
Deferred			
Total	\$ 34	\$ 100	\$ 82

The reconciliation of the federal statutory income tax rate of 34.0% to the effective income tax rate for the three years ended December 31 was as follows:

	2011	2010	2009
Federal statutory income tax rate	34.0%	34.0%	34.0%
State income taxes, net of federal	(5.6)	(10.0)	4.8
Non-deductible items	(3.6)	(14.0)	(2.7)
Valuation allowance	(26.7)	(14.2)	(38.6)
Alternative Minimum Tax	(1.1)	(2.5)	
Other	0.8	(0.1)	0.3
	(2.2)%	(6.8)%	(2.2)%

Table of Contents

Significant components of the Company's deferred tax assets and liabilities were as follows (in 000's):

	December 31,	
	2011	2010
Deferred tax assets:		
Inventory	\$ 522	\$ 477
Accounts receivable	49	46
Accrued expenses	678	733
State tax credits	866	866
AMT tax credit carryforward	57	76
Federal and state net operating losses	680	438
Goodwill	34	35
Stock options	699	733
Other	27	35
	3,612	3,439
Valuation allowance	(2,778)	(3,238)
	834	201
Deferred tax liabilities:		
Property, plant & equipment	(760)	(85)
Other	(74)	(116)
	(834)	(201)
Net deferred income tax asset (liability)	\$	\$

As of December 31, 2011, the Company has federal net operating loss carry-forwards of \$1.9 million that will expire between 2027 and 2031, as well as state net operating loss carry-forwards of \$6.5 million that expire between 2011 and 2031. At December 31, 2011, the Company also has a net state tax credit carry-forward of approximately \$1.4 million. Approximately \$45,000 of the state tax credit carry-forward has a 15-year carry-forward limitation, which begins to expire in 2012. The remaining state tax credit carry-forward amounts have no expiration period.

ASC Topic 740 requires a valuation allowance to reduce reported deferred tax assets if, based on the weight of the evidence, it is more likely than not that some portion or all of the deferred tax assets will not be realized. After consideration of all the evidence, as of December 31, 2011, an allowance of \$2.8 million has been established to reduce the deferred tax assets to the amount that will more likely than not be realized. During 2011, the valuation allowance decreased \$460,000 primarily as a result of changes in cumulative temporary differences and the effect of the loss incurred during the year. During 2010, the valuation allowance increased \$497,000. The effects in any of the quarters presented were not material.

The Company recognizes the financial statement benefit of a tax position only after determining that the relevant tax authority would more-likely-than-not sustain the position following an audit. For tax positions meeting the more-likely-than-not threshold, the amount recognized in the financial statements is the largest benefit that has a greater than 50 percent likelihood of being realized upon ultimate settlement with the relevant tax authority. Increases or decreases to the unrecognized tax benefits could result from the Company's belief that a position can or cannot be sustained upon examination based on subsequent information or potential lapse of the applicable statute of limitation for certain tax positions. The Company files income tax returns in the U.S. federal jurisdiction, and various state jurisdictions and has open tax years and ongoing tax examinations in major jurisdictions for the years ending December 31, 2007 through 2010.

Table of Contents

NOTE I SHAREHOLDERS EQUITY

Common Stock

Subject to preferences which might be applicable to any outstanding preferred stock, the holders of common stock are entitled to receive dividends when, as, and if declared from time to time by the Board of Directors out of funds legally available. The Company's revolving credit facility restricts the Company from paying dividends. In the event of liquidation, dissolution, or winding-up of the Company, holders of the common stock are entitled to share ratably in all assets remaining after payment of liabilities, subject to prior distribution rights of any preferred stock then outstanding. The common stock has no preemptive or conversion rights and is not subject to call or assessment by the Company. There are no redemption or sinking fund provisions applicable to the common stock.

Preferred Stock

The Company is authorized to issue 5,000,000 shares of preferred stock, \$.001 par value per share. The Board of Directors has the authority, without any further vote or action by the Company's shareholders, to issue preferred stock in one or more series and to fix the number of shares, designations, relative rights (including voting rights), preferences, and limitations of those series to the full extent now or hereafter permitted by Florida law. The Company did not have any outstanding shares of preferred stock at December 31, 2011 or 2010.

The Company is authorized to issue 50,000 shares of Series A Junior Participating Preferred Stock, \$.001 par value per share. The Board of Directors has the authority, by resolution, to increase or decrease the number of shares, except that a decrease will not reduce the number of shares of the Series A Junior Participating Preferred Stock to a number less than the number of shares then outstanding plus the number of shares reserved for issuance on the exercise of options, rights or warrants or upon the conversion of any outstanding securities issued by the Company convertible into Series A Junior Participating Preferred Stock. The Company did not have any outstanding shares of preferred stock at December 31, 2011 or 2010. The Series A Junior Participating Preferred Stock was authorized in connection with the Rights Plan described below.

Rights Plan

On November 5, 2010, the Company's Board of Directors adopted a Shareholder Rights Plan (the Rights Plan) and declared a dividend of one right on each outstanding share of its common stock. The Rights Plan has a term of two years. Each right entitles the registered holder to purchase from the Company a unit consisting of one one-thousandth of a share (a Unit) of Series A Junior Participating Preferred Stock (the Series A Preferred Stock) at a purchase price of \$15.00 per Unit, subject to adjustment.

Under the Rights Plan, the rights generally become exercisable only if a person or group (i) acquires beneficial ownership of 15% or more of the Company's common stock or (ii) announces or commences a tender or exchange offer that would result in that person or group acquiring 15% or more of its common stock. Thereafter, all rights beneficially owned by the person or group that acquired (or that would acquire as a result of a tender or exchange offer) 15% or more of its common stock will become null and void. If they become exercisable, the rights entitle the holder of each right to purchase for the purchase price that number of shares of the Company's common stock that has a market value of twice the exercise price, subject to certain adjustments as provided under the Rights Plan. The rights are redeemable by the Company for \$0.001 per right, subject to adjustment, any time before the rights become exercisable, including to permit an offer to purchase all of its common shares. Until they become exercisable, the rights will not be evidenced by separate certificates and trade automatically with the Company's common stock. The rights expire on November 5, 2012, unless earlier redeemed, exchanged, or amended by the Company.

Table of Contents

NOTE J STOCK-BASED COMPENSATION

The Company maintains five stock option plans: the 1995 Stock Option Plan, the 1996 Non-Employee Director Plan, the 1998 Stock Option Plan, the 2004 Stock Compensation Plan and the 2009 Stock Compensation Plan.

The 1995 Stock Option Plan

The 1995 Stock Option Plan was designed to provide employees with incentive or non-qualified options to purchase up to 700,000 shares of common stock. The options vest ratably over four to five years from the date of grant. All outstanding options vest upon a change in control of the Company. Options granted under this Plan expire no later than ten years after the date granted or sooner in the event of death, disability, retirement or termination of employment. As of December 31, 2011 and 2010, options to purchase 10,500 shares of Company stock were outstanding under this Plan. The 1995 Stock Option Plan terminated on December 21, 2005, although that termination does not adversely affect any options outstanding under the Plan.

The 1996 Non-Employee Director Plan

As amended on May 16, 2001, the Non-Employee Plan was designed to provide for the grant of non-qualified stock options to purchase up to 200,000 shares of common stock to members of the Board of Directors who are not employees of the Company. At the completion of the Company's initial public offering, each non-employee director was granted options to purchase 4,000 shares of common stock for each full remaining year of the director's term.

As of March 2006, the equity component of the director compensation plan was restructured, so that each non-employee director received after that date an annual grant of options to purchase 7,500 shares of common stock as of the date of each Annual Shareholder Meeting. All options vest ratably over a three-year term and have an exercise price equal to the fair market value of the common stock on the date of grant. As of December 31, 2011 and 2010, options to purchase 60,000 and 70,000 shares, respectively, were outstanding under this plan. The 1996 Non-Employee Director Plan terminated on July 14, 2006, although that termination does not adversely affect any options outstanding under the Plan.

The 1998 Stock Option Plan

As amended on May 16, 2001, the 1998 Stock Option Plan is designed to provide employees with incentive or non-qualified options to purchase up to 600,000 shares of common stock. The options vest ratably over four to five years from the date of the grant. All outstanding options vest upon a change in control of the Company. Options granted under this Plan expire no later than ten years after the date granted or sooner in the event of death, disability, retirement, or termination of employment. As of December 31, 2011 and 2010, options to purchase 242,000 and 268,000 shares, respectively, were outstanding under this Plan. The 1998 Stock Option Plan terminated on February 17, 2008, although that termination does not adversely affect any options outstanding under the Plan.

The 2004 Stock Compensation Plan

The 2004 Stock Compensation Plan is designed to further the interests of the Company and its shareholders by providing incentives in the form of incentive or non-qualified stock options or restricted stock grants to key employees and non-employee directors who contribute materially to the success and profitability of the Company. Under this Plan, restricted stock grants are not considered outstanding options upon grant but are considered issued and outstanding stock. Any forfeited restricted stock awards are considered available for grant. Except for annual grants to non-employee directors described below, the equity awards typically vest ratably over five years from the date of the grant. Each non-employee director of the Company receives an annual award

Table of Contents

of options to purchase 7,500 shares of common stock as of the date of the Annual Shareholder Meeting. Under each grant agreement, the options vest ratably over a three-year period and have an exercise price equal to the fair market value of the common stock on the date of grant. All outstanding grants vest upon a change in control of the Company. Options granted under this Plan expire no later than ten years after the date granted or sooner in the event of death, disability, retirement, or termination of employment. At the Company's Annual Meeting of Shareholders on May 24, 2007, the shareholders approved an amendment to the 2004 Stock Compensation Plan to authorize an additional 500,000 shares under the Plan. As of December 31, 2011 and 2010, options to purchase 917,950 and 908,700 shares respectively, were outstanding, and 4,100 and 30,800 options, respectively, were available to be granted as options or restricted stock under this Plan.

The 2009 Stock Compensation Plan

The 2009 Stock Compensation Plan is designed to further the interests of the Company and its shareholders by providing incentives in the form of incentive or non-qualified stock options or restricted stock grants to key employees and non-employee directors who contribute materially to the success and profitability of the Company. Under this Plan, restricted stock grants are not considered outstanding options upon grant but are considered issued and outstanding stock. Any forfeited restricted stock awards are considered to be available for grant. Except for annual grants to non-employee directors described above, the equity awards typically vest ratably over five years from the date of the grant. All outstanding grants vest upon a change in control of the Company. Options granted under this Plan expire no later than ten years after the date granted or sooner in the event of death, disability, retirement, or termination of employment. At the Company's Annual Meeting of Shareholders on May 21, 2009, the shareholders approved the 2009 Stock Compensation Plan and authorized 600,000 shares available for grant under the Plan. As of December 31, 2011 and 2010 options to purchase 81,000 and 0 shares, respectively, were outstanding and 519,000 and 600,000 shares, respectively, were available to be granted as options or restricted stock under this Plan.

Summary Stock Option Information

The fair value of each option grant through June 30, 2011, is estimated on the date of grant using a Binomial options-pricing model. The Company's stock-based compensation expense model uses graded vesting, with shares being earned per day under the accrual method. In addition, the Company estimates forfeitures on the date of grant. The following weighted-average assumptions were used for grants in the years ended December 31, 2011, 2010 and 2009, respectively; no dividend yield for all years; expected volatility of 99%, 103% and 108%; risk-free interest rates of approximately 3.2%, 2.9%, and 3.5%; and expected lives of 8.0, 7.6, and 7.2 years. The weighted average fair value of options granted during the years ended December 31, 2011, 2010 and 2009 were \$4.48, \$2.69, and \$1.03, respectively.

Table of Contents

A summary of the status of the Company's stock option plans and other stock options granted as of December 31, 2011, 2010 and 2009 and changes during the years ended on those dates is presented below:

	Options	Weighted Average Exercise Price
Outstanding as of January 1, 2009	1,106,400	\$ 6.18
Granted	328,350	\$ 1.21
Exercised		
Forfeited	(229,100)	\$ 8.17
Outstanding as of December 31, 2009	1,205,650	\$ 4.45
Granted	359,850	\$ 3.08
Exercised	(2,700)	\$ 0.93
Forfeited	(155,600)	\$ 4.44
Outstanding as of December 31, 2010	1,407,200	\$ 4.11
Granted	96,650	\$ 5.21
Exercised	(450)	\$ 1.29
Forfeited	(41,950)	\$ 15.08
Outstanding as of December 31, 2011	1,461,450	\$ 3.87

The following table summarizes information concerning outstanding and exercisable stock options as of December 31, 2011:

Range of Exercise Prices	Number Outstanding	Weighted Average Remaining Contractual Life (years)	Weighted Average Exercise Price
All Outstanding Options			
\$ 0.93 \$ 2.09	291,950	7.3	\$ 1.22
2.10 3.58	289,000	7.9	\$ 2.71
3.59 4.45	212,850	7.2	\$ 4.04
4.46 4.63	323,000	5.6	\$ 4.53
4.64 16.23	344,650	4.9	\$ 6.36
	1,461,450		\$ 3.87
Exercisable Options			
\$ 0.93 \$ 2.09	138,173	7.3	\$ 1.25
2.10 3.58	83,900	7.5	\$ 2.81
3.59 4.45	124,170	6.1	\$ 4.12
4.46 4.63	291,400	5.6	\$ 4.52
4.64 16.23	238,600	3.2	\$ 6.86
	876,243		\$ 4.42

Edgar Filing: SRI SURGICAL EXPRESS INC - Form 10-K

As of December 31, 2010 and December 31, 2009, there were 651,936 and 521,200 exercisable options outstanding at weighted average exercise prices of \$5.61 and \$6.46, respectively.

Table of Contents

The following table summarizes option grant activity from January 1, 2011 through December 31, 2011:

	Shares Available for Grant	Options Outstanding	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life
Balance at January 1, 2011	630,800	1,407,200	\$ 4.11	7.09
Options expired	350	(35,950)	\$ 17.12	
Options and restricted stock granted	(113,650)	96,650	\$ 5.21	
Options and restricted stock forfeited	5,600	(6,000)	\$ 2.88	
Options exercised		(450)	\$ 1.29	
Balance at December 31, 2011	523,100	1,461,450	\$ 3.87	6.46
Options exercisable at December 31, 2011		876,243	\$ 4.42	5.47

* Options expired and forfeited are included in the shares available for grant, but do not include options that had expired or were forfeited during 2011 under terminated plans.

The weighted-average grant date fair value of options granted during the years ended December 31, 2011, 2010 and 2009 was \$4.48, \$2.69 and \$1.03, respectively. For the years ended December 31, 2011 and 2010, the total intrinsic value of options exercised was less than \$1,700 and \$5,000, respectively. There were no options exercised during the year ended December 31, 2009. As of December 31, 2011, there was \$614,000 of unrecognized compensation cost related to non-vested options that is expected to be recognized over a weighted average period of 2.1 years. The total fair value of options and restricted stock vested during the years ended December 31, 2011 and 2010 was \$633,000 and \$636,000, respectively. The total fair value of options vested during the year ended December 31, 2011 that were issued prior to adoption of ASC 718 was \$0. The aggregate intrinsic value of options fully vested at December 31, 2011 was \$550,000. The aggregate intrinsic value of options outstanding at December 31, 2011 and expected to vest was \$1.3 million.

The Company consistently used a binomial model for estimating the fair value of options granted in the years ended December 31, 2010 and 2009, and during the six months ended June 30, 2011. As noted above, as of July 1, 2011, the Company converted to a new equity compensation administration and reporting platform, and converted to the Black-Scholes valuation model from a binomial (Lattice) model. The Company used historical data to estimate the option exercise and employee departure behavior used in the valuation models. Forfeitures are estimated on the date of grant and shares vest on a graded schedule, with shares being earned per day under the accrual method. The expected term of options granted is derived from the output of the option pricing model used and represents the period of time that options granted are expected to be outstanding. The risk-free rates are based on the U.S. Treasury stripped coupon interest in effect at the date of grant based on the expected term of the option granted. Expected volatility is based on historical volatility of the Company's stock.

Following are the weighted-average and range assumptions, where applicable, used for each respective period:

	December 31, 2011 (Binomial/Black- Scholes)	Twelve Months Ended December 31, 2010 (Binomial)	December 31, 2009 (Binomial)
Expected dividend yield	0.0%	0.0%	0.0%
Risk-free interest rate	0.34 to 3.55%	0.47 to 4.08%	1.10 to 3.96%
Weighted-average expected volatility	99.09%	103.34%	108.32%
Expected term	2.5 to 9.0 years	2.5 to 8.9 years	2.5 to 8.8 years
Forfeiture rate	0.51 to 81.79%	0.52 to 28.01%	0.59 to 28.01%
Respective service period	3 to 5 years	3 to 5 years	3 to 5 years

Table of Contents*Restricted Stock Awards*

In fiscal year 2006, the Company granted unvested common stock awards (restricted stock) to certain key employees pursuant to the 2004 Stock Compensation Plan. The shares vest ratably over five years. The restricted stock awards granted in 2006 were accounted for using the measurement and recognition principles of ASC 718. Compensation for restricted stock awards is measured at fair value on the date of grant based on the number of shares expected to vest and the quoted market price of the Company's common stock. Compensation cost for all awards will be recognized in earnings, net of estimated forfeitures, on a straight-line basis over the requisite service period.

In February 2008, the Company granted 25,000 shares of restricted stock and options to purchase 150,000 shares of common stock to the Company's Chief Executive Officer. The option award vested evenly over a three-year period. The 25,000 shares of restricted stock vested entirely on the third anniversary date of the date of grant or upon involuntary termination. These grants were inducement grants made outside of the Company's equity compensation plans.

In February 2011, the Company granted 17,000 shares of restricted stock with a fair value of approximately \$101,000 to a key employee pursuant to the 2004 Stock Compensation Plan. The shares vest ratably over five years.

The Company recorded \$23,000, \$62,000 and \$83,000 in compensation expense related to the restricted stock that vested during the years ended December 31, 2011, 2010, and 2009, respectively. As of December 31, 2011, there was approximately \$83,000 of total unrecognized compensation cost related to restricted stock awards granted under the Plan, which is expected to be recognized over a period of 4.08 years.

The Company received proceeds of less than \$1,000 and \$2,500 from stock option exercises under all stock-based payment arrangements for the years ended December 31, 2011 and 2010, respectively. The Company did not receive any proceeds from stock option exercises under all share-based payment arrangements for the year ended December 31, 2009 because no exercises were made during that year. There were no capitalized stock-based compensation costs at December 31, 2011.

NOTE K LOSS PER SHARE

The following table sets forth the computation of basic and diluted loss per share:

	Years ended December 31,		
	2011	2010	2009
	(in 000 s except per share data)		
Basic			
Numerator:			
Loss available for common shareholders	\$ (1,577)	\$ (1,560)	\$ (3,776)
Denominator:			
Weighted average shares outstanding	6,467	6,450	6,464
Loss per common share - basic	\$ (0.24)	\$ (0.24)	\$ (0.58)
Diluted			
Numerator:			
Net loss	\$ (1,577)	\$ (1,560)	\$ (3,776)
Denominator:			
Weighted average shares outstanding	6,467	6,450	6,464
Effect of dilutive securities:			
Employee stock options			
Weighted average shares outstanding - Diluted	6,467	6,450	6,464
Loss per common share - diluted	\$ (0.24)	\$ (0.24)	\$ (0.58)

Table of Contents

Options to purchase 607,543, 1,043,779 and 1,161,710 shares of common stock for the years ended December 31, 2011, 2010 and 2009, respectively, were not included in the computation of diluted earnings per common share, because the assumed proceeds per share were greater than the average market price, and therefore, were anti-dilutive. The dilutive effect of 200,742, 322,229 and 15,633 options with assumed proceeds per share less than the average market price, were not included for the years ended December 31, 2011, 2010 and 2009, respectively, because the effect would be anti-dilutive due to the Company's net loss for those periods.

NOTE L LEASE AGREEMENT

Effective March 1, 2007, the Company entered into an agreement to lease to a third party a portion of its corporate headquarters under the terms of a non-cancelable operating lease. The lease calls for an initial term of five (5) years with a tenant option to renew for one extension period of five years. The lease agreement provides for escalating rental payments over its term. Under the agreement, the tenant pays an allocated share of the increase over the base year of certain costs, including utilities, maintenance costs and property taxes. The lease will expire in March 2012. During 2012, the Company expects to receive future minimum lease payments of approximately \$97,000.

Rental income, which is included in other income in the statements of operations, was approximately \$361,000 for each of the years ended December 31, 2011, 2010 and 2009.

NOTE M SRI SURGICAL 401(k) PLAN

The Company sponsors the SRI SURGICAL/Surgical Express, Inc. 401(k) Plan (the Plan), a defined contribution plan established under Section 401(k) of the U.S. Internal Revenue Code. Employees are eligible to contribute voluntarily to the Plan after six months of continued service, satisfying 1,000 hours of service and attaining age 21. In addition to the employees' contributions, at its discretion, the Company may contribute 50% of the first 4% of the employee's contribution. The Plan allows for employee elective contributions up to an amount equivalent to 15% of salary. Employees are always vested in their contributed balance and vest ratably in the Company's contribution over three years. For the years ended December 31, 2011, 2010, and 2009, the Company's expense related to the Plan was approximately \$327,000, \$319,000, and \$303,000, respectively.

NOTE N RELATED PARTY TRANSACTIONS

The Company purchases a portion of its reusable surgical products from Standard Textile. Standard Textile is a shareholder of the Company. During the years ended December 31, 2011, 2010, and 2009, the Company purchased products in the amounts of \$3.3 million, \$4.1 million, and \$4.8 million, respectively, from Standard Textile.

During the year ended December 31, 2009, the Company paid approximately \$93,000 in consulting fees to a director and shareholder of the Company for assistance with managing the facilities operations while the Company searched for a new operations leader.

NOTE O SELECTED QUARTERLY FINANCIAL DATA (Unaudited)

The following selected unaudited quarterly information is being disclosed in accordance with Regulation S-K (Item 302):

	Mar. 31, 2011	Quarters Ended		Dec. 31, 2011
		Jun. 30, 2011	Sep. 30, 2011	
	(In thousands, except per share data)			
Revenues	\$ 27,330	\$ 26,781	\$ 26,430	\$ 27,038
Gross profit	\$ 5,909	\$ 5,517	\$ 5,877	\$ 6,225
Net income (loss)	\$ (490)	\$ (810)	\$ (534)	\$ 257
Basic income (loss) per share	\$ (0.08)	\$ (0.13)	\$ (0.08)	\$ 0.04
Diluted income (loss) per share	\$ (0.08)	\$ (0.13)	\$ (0.08)	\$ 0.04

Table of Contents

	Mar. 31, 2010	Quarters Ended		Dec. 31, 2010
		Jun. 30, 2010	Sep. 30, 2010	
		(In thousands, except per share data)		
Revenues	\$ 24,611	\$ 25,047	\$ 24,824	\$ 26,382
Gross profit	\$ 4,932	\$ 5,840	\$ 5,718	\$ 6,278
Net income (loss)	\$ (1,533)	\$ (313)	\$ 21	\$ 265
Basic income (loss) per share	\$ (0.24)	\$ (0.05)	\$ 0.00	\$ 0.04
Diluted income (loss) per share	\$ (0.24)	\$ (0.05)	\$ 0.00	\$ 0.04

In 2011, the sum of quarterly basic and diluted per share amounts do not equal full year basic and diluted per share amounts due to rounding.

NOTE P THIRD QUARTER 2009 ADJUSTMENTS*Reusable Surgical Product Loss and Accrued Liabilities*

As disclosed in the Company's third quarter 2009 Form 10-Q, as part of the Company's effort to reduce its loss and scrap costs, the Company performed additional operational reviews of its reusable surgical products usage during the third quarter ended September 30, 2009, resulting in identification of additional losses that were not known at January 1, 2009. Additionally, account analyses were conducted on accrued liability accounts resulting in identification of costs recognized in periods prior to January 1, 2009, for which a liability did not exist. The amount of the adjustments related to periods prior to January 1, 2009 that were recognized in the three month period ended September 30, 2009 resulted in an increase in cost of revenues and a decrease in selling and administrative expenses totaling approximately \$591,000 and \$82,000, respectively. During the three months ended September 30, 2009, the Company also recognized, in cost of revenues, reusable surgical product losses of \$181,000, for costs incurred during the six months ended June 30, 2009. There was no income tax effects related to these adjustments.

The above costs recognized in the three months ended September 30, 2009 that were incurred in prior periods were principally associated with reusable surgical product losses. As a result of a system error, the Company's information system did not identify certain products as lost. Reusable surgical products that are tracked using RFID technology are expensed if not returned to the Company by a customer within 210 days. However, when new tracking mechanisms were employed in an earlier period in an effort to better control the location of product, the system was not properly updated to record lost product for certain locations. As a result, the Company incurred but did not recognize losses in earlier periods resulting in the estimate of lost products being understated as discussed above.

The Company reviewed the effect of the above errors on prior periods and determined that (a) the errors did not materially affect the financial statements of prior periods (which errors date back to 2005); and (b) the errors did not have a material effect on the financial statements for the first or second quarters of 2009. Because the Company also concluded that the amounts were not material to the year ending December 31, 2009, the Company recorded the adjustments during the quarter ended September 30, 2009.

Table of Contents**SCHEDULE II VALUATION AND QUALIFYING ACCOUNTS****SRI/SURGICAL EXPRESS, INC.**

Description	Balance at Beginning of Period	Charged to Costs and Expenses	Write-offs / Reductions	Balance at end of Period
Allowance for doubtful accounts:				
Year ended December 31, 2009	\$ 106,000	\$ 74,000	\$ (56,000)	\$ 124,000

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures
Management's Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a and 15(f)). Our internal control over financial reporting process was designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of our financial statements in accordance with generally accepted accounting principles. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree or compliance with the policies or procedures may deteriorate.

Our management assessed the effectiveness of our internal control over financial reporting as of December 31, 2011, based upon the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control - Integrated Framework*. Based on this assessment under the framework in *Internal Control - Integrated Framework* issued by COSO, our management concluded that our internal control over financial reporting was effective as of December 31, 2011.

Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of our management, including our chief executive officer and chief financial officer (our Executives), we have evaluated the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities and Exchange Act of 1934, as amended (the Exchange Act), as of the end of the period covered by this Annual Report. Based on that evaluation, we concluded that our disclosure controls and procedures are effective to ensure that information we are required to disclose in the reports that we file or submit under the Exchange Act is (i) recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and (ii) accumulated and communicated to our management, including the Executives, as appropriate, to allow timely decisions regarding required disclosure.

We have also evaluated our internal controls for financial reporting, and there have been no changes that occurred during our most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

Any system of disclosure controls and internal controls, even if well conceived, is inherently limited in detecting and preventing all errors and fraud and provides reasonable, but not absolute, assurance that its objectives are met. The design of a control system must reflect resource constraints. Inherent limitations include the potential for faulty judgments in decision-making, breakdowns because of simple errors or mistakes, and circumvention of controls by individual acts, collusion of two or more people, or management override of the controls.

Item 9B. Other Information

As previously disclosed, on November 5, 2010, our Board of Directors adopted a Shareholder Rights Plan (the Rights Plan) and declared a dividend of one right on each outstanding share of our common stock. The Rights Plan has a term of two years. Each right entitles the registered holder to purchase from the Company a unit consisting of one one-thousandth of a share (a Unit) of Series A Junior Participating Preferred Stock (the Series A Preferred Stock) at a purchase price of \$15.00 per Unit, subject to adjustment.

Table of Contents

Under the Rights Plan, the rights generally become exercisable only if a person or group (i) acquires beneficial ownership of 15% or more of our common stock or (ii) announces or commences a tender or exchange offer that would result in that person or group acquiring 15% or more of our common stock. Thereafter, all rights beneficially owned by the person or group that acquired (or that would acquire as a result of a tender or exchange offer) 15% or more of our common stock will become null and void. If they become exercisable, the rights entitle the holder of each right to purchase for the purchase price that number of shares of our common stock which has a market value of twice the exercise price, subject to certain adjustments as provided under the Rights Plan. The rights are redeemable by us for \$0.001 per right, subject to adjustment, any time before the rights become exercisable, including to permit an offer to purchase all of our common shares. Until the rights become exercisable, they will not be evidenced by separate certificates and trade automatically with our common stock. The rights expire on November 5, 2012, unless we earlier redeem, exchange, or amend them.

We previously disclosed that we received in November 2010 an unsolicited expression of interest to purchase the Company. In response to this expression of interest, our Board of Directors engaged McColl Partners, an investment banking firm, as its financial advisor, and pursued discussions with the interested party and other potentially interested parties that were identified by its financial advisor. At the conclusion of this process, and in reliance on advice from its legal counsel and financial advisor, our Board of Directors unanimously determined that, in light of the Company's value and prospects, our shareholders would be best served by our continuing to pursue our current strategic plan and not further pursuing acquisition discussions at that time.

As previously disclosed in September 2011, we announced that our Board of Directors initiated a process to explore and evaluate strategic alternatives for the Company, which may include a possible strategic alliance, merger or sale. The process is on going and a strategic alternative, if any, has not been decided at this time. See *Item 1A. Risk Factors* *The effects and results of our exploration and evaluation of strategic alternatives is uncertain*
