**Cautionary Language**

This current report on Form 8-K (including statements in Exhibit 99.01 incorporated by reference herein) contains forward-looking statements which are based on current expectations, forecasts and assumptions that involve risks and uncertainties that could cause actual outcomes and results to differ materially, including statements about the closing of the transaction, Intuit 's company strategy, strategic outcomes, potential divestitures and organizational realignment and their impact on Intuit 's business. Any statements in this Form 8-K (including statements in Exhibit 99.01 incorporated by reference herein) that are not statements of historical fact (including statements containing the words will , believes, plans, anticipates, expects, look forward to, estimates and similar expressions) should be considered to be forward-looking statements. The following factors, among others, could cause actual results and future events to differ materially from those set forth or contemplated in the forward-looking statements: inherent difficulty in predicting consumer behavior; difficulties in receiving, processing, or filing customer tax submissions; consumers may not respond as we expected to our advertising and promotional activities; product introductions and price competition from our competitors can have unpredictable negative effects on our revenue, profitability and market position; governmental encroachment in our tax businesses or other governmental activities or public policy affecting the preparation and filing of tax returns could negatively affect our operating results and market position; we may not be able to successfully innovate and introduce new offerings and business models to meet our growth and profitability objectives, and current and future offerings may not adequately address customer needs and may not achieve broad market acceptance, which could harm our operating results and financial condition; business interruption or failure of our information technology and communication systems may impair the availability of our products and services, which may damage our reputation and harm our future financial results; as we upgrade and consolidate our customer facing applications and supporting

information technology infrastructure, any problems with these implementations could interfere with our ability to deliver our offerings; any failure to properly use and protect personal customer information and data could harm our revenue, earnings and reputation; if we are unable to develop, manage and maintain critical third party business relationships, our business may be adversely affected; increased government regulation of our businesses may harm our operating results; if we fail to process transactions effectively or fail to adequately protect against potential fraudulent activities, our revenue and earnings may be harmed; any significant offering quality problems or delays in our offerings could harm our revenue, earnings and reputation; our participation in the Free File Alliance may result in lost revenue opportunities and cannibalization of our traditional paid franchise; the continuing global economic downturn may continue to impact consumer and small business spending, financial institutions and tax filings, which could negatively affect our revenue and profitability; year-over-year changes in the total number of tax filings that are submitted to government agencies due to economic conditions or otherwise may result in lost revenue opportunities; our revenue and earnings are highly seasonal and the timing of our revenue between quarters is difficult to predict, which may cause significant quarterly fluctuations in our financial results; our financial position may not make repurchasing shares advisable or we may issue additional shares in an acquisition causing our number of outstanding shares to grow; our inability to adequately protect our intellectual property rights may weaken our competitive position and reduce our revenue and earnings; our acquisition and divestiture activities may disrupt our ongoing business, may involve increased expenses and may present risks not contemplated at the time of the transactions; our use of significant amounts of debt to finance acquisitions or other activities could harm our financial condition and results of operation; and litigation involving intellectual property, antitrust, shareholder and other matters may increase our costs. More details about these and other risks that may impact our business are included in our Form 10-K for fiscal 2012 and in our other SEC filings.
