CALCULATION OF REGISTRATION FEE UNDER THE SECURITIES ACT OF 1933

Title of Securities Being Registered	Amount Being Registered	Proposed Maximum Offering Price Per Unit⁽²⁾	Proposed Maximum Aggregate Offering Price⁽²⁾	Amount of Registration Fee⁽³⁾
Term Preferred Shares, Series 2020	35,000 Shares ⁽¹⁾	\$1,000	\$35,000,000	\$3,524.50

(1) The Fund will offer 35,000 Term Preferred Shares, Series 2020, at an offering price of \$1,000 per share.

(2) Estimated solely for the purpose of calculating the registration fee.

(3) \$116.20 of which has been previously paid.

The Registrant hereby amends this Registration Statement on such date or dates as may be necessary to delay its effective date until the Registrant shall file a further amendment that specifically states this Registration Statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933 or until the Registration Statement shall become effective on such dates as the Securities and Exchange Commission, acting pursuant to said Section 8(a), may determine.

The information in this prospectus is not complete and may be changed. We may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities and we are not soliciting offers to buy these securities in any jurisdiction where the offer or sale is not permitted.

Subject to Completion

Preliminary Prospectus dated November 9, 2015

PROSPECTUS

\$35,000,000

Nuveen Short Duration Credit Opportunities Fund

TERM PREFERRED SHARES

35,000 Shares, Series 2020

Liquidation Preference \$1,000 Per Share

The Offering. *Nuveen Short Duration Credit Opportunities Fund (the Fund) is offering 35,000 Term Preferred Shares, Series 2020 (Term Preferred Shares), with a liquidation preference of \$1,000 per share. The Fund intends to use the net proceeds from the sale of Term Preferred Shares to increase the Fund's leverage.*

The Fund. *This prospectus sets forth concisely information about the Fund that a prospective investor should know before investing, and should be retained for future reference. The Fund is a diversified, closed-end management investment company. The Fund's investment objective is to provide current income and the potential for capital appreciation.*

Edgar Filing: Nuveen Short Duration Credit Opportunities Fund - Form N-2/A

Unlisted Shares. The Term Preferred Shares are not listed or traded on any securities exchange. An investment in Term Preferred Shares may be illiquid and there may be no active secondary trading market. Thus, Term Preferred Shares are not suitable for investors who seek the return of their investment within a specified timeframe before the term redemption date of the Term Preferred Shares.

*Investing in Term Preferred Shares involves risks. See **Risk Factors** beginning on page 55. Certain of these risks are summarized in Prospectus Summary Special Risk Considerations beginning on page 11 of this prospectus.*

Neither the Securities and Exchange Commission (SEC) nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

PRICE \$1,000 A SHARE

	<u>Price to Public</u>	<u>Underwriting Discounts and Commissions</u>	<u>Estimated Offering Costs⁽¹⁾</u>	<u>Proceeds, after expenses, to the Fund</u>
Per Share	\$1,000	\$7.50	\$13.21	\$979.29
Total	\$35,000,000	\$262,500	\$462,350	\$34,275,150

⁽¹⁾ Total expenses of issuance and distribution, excluding underwriting discounts and commissions, are estimated to be \$462,350. The Fund has agreed to pay, from its own assets, an upfront structuring fee to Morgan Stanley & Co. LLC. See Underwriter Additional Compensation to be Paid by the Fund on page 81 of this prospectus.

Book-Entry Only. It is expected that the Term Preferred Shares will be delivered to the underwriter in book-entry form only, through the facilities of The Depository Trust Company, on or about November 16, 2015.

(continued from previous page)

Investment Strategies. The Fund seeks to achieve its investment objective by investing, under normal circumstances, at least 70% of its Managed Assets (as defined on page 7) in adjustable rate corporate debt instruments. The Fund's portfolio will be invested primarily in below investment grade adjustable rate corporate debt instruments (commonly referred to as junk bonds), including senior secured loans, second lien loans, and other adjustable rate corporate debt instruments. The Fund cannot assure you that it will achieve its investment objective.

Leverage. The Fund utilizes structural leverage obtained through borrowings. The issuance of the Term Preferred Shares will increase the Fund's structural leverage. In addition to structural leverage, the Fund employs financial leverage to seek to enhance its potential current income and capital appreciation over time. The Fund may utilize derivatives such as credit default swaps, interest rate swaps and total return swaps that have the economic effect of financial leverage by creating additional investment exposure. See The Fund's Investments. There is no assurance that the Fund's leveraging strategy will be successful. Leverage involves special risks. See Risk Factors Fund Level Risks Leverage Risk.

Initial Dividend Rate: 1.500% Series 2020 Term Preferred Shares

The dividend rate payable on the Term Preferred Shares on any date will be determined in accordance with the Fund's Statement Establishing and Fixing the Rights and Preferences of Term Preferred Shares (the Statement) and with reference to the following table:

<u>Date</u>	<u>Dividend Rate</u>
From and including the Date of Original Issue to but excluding November 1, 2017	1.500%
From and including November 1, 2017 to but excluding May 1, 2018	1.750%
From and including May 1, 2018 to but excluding November 1, 2018	2.000%
From and including November 1, 2018 to but excluding May 1, 2019	2.500%
From and including May 1, 2019 to but excluding November 1, 2019	3.500%
From and including November 1, 2019 to but excluding May 1, 2020	4.000%
From and including May 1, 2020 to but excluding November 1, 2020	5.000%

See Description of Term Preferred Shares Dividends and Dividend Periods.

Dividends. Dividends on the Term Preferred Shares will be payable monthly. The first dividend period for the Term Preferred Shares will commence on the date of original issuance of Term Preferred Shares and end on November 30, 2015 and each subsequent dividend period will be a calendar month (or the portion thereof occurring prior to the redemption of such Term Preferred Shares). Dividends will be paid on the first business day of the month next following a dividend period and upon redemption of the Term Preferred Shares (each payment date a Dividend Payment Date). Dividends with respect to any monthly dividend period will be declared and paid to holders of record of Term Preferred Shares as their names shall appear on the registration books of the Fund at the close of business on the day immediately preceding such Dividend Payment Date (or, if such day is not a business day, the next preceding business day).

Redemption. The Fund is required to redeem the Term Preferred Shares on November 1, 2020 unless earlier redeemed or repurchased by the Fund. In addition, Term Preferred Shares are subject to optional redemption by the Fund in certain circumstances. Term Preferred Shares will be subject to redemption at the option of the Fund, subject to payment of a premium through October 31, 2016, and at their liquidation

Edgar Filing: Nuveen Short Duration Credit Opportunities Fund - Form N-2/A

preference thereafter. See Description of Term Preferred Shares Redemption.

Priority of Payment. *The Fund has entered into a credit agreement with State Street Bank and Trust Company (the Credit Agreement), and has an outstanding balance. See Use of Leverage. The rights of lenders, such as State Street Bank and Trust Company, and any other creditors to receive payments of interest on and repayments of principal of any borrowings are senior to the rights of holders of Term Preferred Shares and the Fund's common shares, with respect to the payment of dividends and other distributions, and upon liquidation. The Fund may not be permitted to redeem Term Preferred Shares unless at such time, the Fund meets certain asset coverage requirements and no event of default or other circumstance exists under the Credit Agreement that would limit or otherwise block payments in redemption. Term Preferred Shares, however, will be senior securities that represent stock of the Fund and are senior, with priority in all respects, to the Fund's common shares as to payments of dividends and as to distribution of assets upon dissolution, liquidation or winding up of the affairs of the Fund. The Fund may issue additional preferred shares on parity with Term Preferred Shares, subject to certain limitations. The Fund may not issue additional classes of shares that are senior to Term Preferred Shares and other outstanding preferred shares of the Fund as to payments of dividends or as to distribution of assets upon dissolution, liquidation or winding up of the affairs of the Fund. See Description of Term Preferred Shares.*

(continued from previous page)

Redemption and Paying Agent. *The redemption and paying agent for Term Preferred Shares will be State Street Bank and Trust Company, Canton, Massachusetts. State Street has subcontracted the redemption and paying agency servicing of the Fund to Computershare, Inc.*

You should read this prospectus, which contains important information about the Fund, before deciding whether to invest in Term Preferred Shares and retain it for future reference. A Statement of Additional Information, dated _____, 2015, and as it may be supplemented, containing additional information about the Fund has been filed with the SEC and is incorporated by reference in its entirety into this prospectus. You may request a free copy of the Statement of Additional Information, the table of contents of which is on page 83 of this prospectus, annual and semi-annual reports to shareholders, when available, and other information about the Fund, and make shareholder inquiries by calling (800) 257-8787 or by writing to the Fund, or from the Fund's website (www.nuveen.com). The information contained in, or that can be accessed through, the Fund's website is not part of this prospectus. You also may obtain a copy of the Statement of Additional Information (and other information regarding the Fund) from the SEC's website (www.sec.gov).

Term Preferred Shares do not represent a deposit or obligation of, and are not guaranteed or endorsed by, any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation, the Federal Reserve Board or any other government agency.

You should rely only on the information contained or incorporated by reference into this prospectus. The Fund has not authorized anyone to provide you with different information. If anyone provides you with different or inconsistent information, you should not rely on it. The Fund is not making an offer of Term Preferred Shares in any state where the offer is not permitted. You should not assume that the information contained in this prospectus is accurate as of any date other than the date on the front of this prospectus. The Fund's business, financial condition and prospects may have changed since that date. The Fund will update this prospectus to reflect any material changes to the disclosures herein.

PROSPECTUS SUMMARY

This is only a summary. You should review the more detailed information contained elsewhere in this prospectus and in the Statement of Additional Information, dated _____, 2015, and as it may be supplemented (the SAI), including the Fund's Statement Establishing and Fixing the Rights and Preferences of Term Preferred Shares (the Statement), attached as Appendix A to the SAI, prior to making an investment in the Fund, especially the information set forth under the heading Risk Factors.

The Fund

Nuveen Short Duration Credit Opportunities Fund (the Fund) is a diversified, closed-end management investment company. The Fund's common shares, \$.01 par value (Common Shares), are traded on the New York Stock Exchange (the NYSE) under the symbol JSD. See Description of Outstanding Shares and Debt Common Shares. As of July 31, 2015, the Fund had 10,095,286 Common Shares outstanding and net assets applicable to Common Shares of \$188,031,360. The Fund commenced investment operations on May 25, 2011.

The Offering

The Fund is offering 35,000 Term Preferred Shares, Series 2020 (Series 2020 Term Preferred Shares or Term Preferred Shares), at a purchase price of \$1,000 per share. Term Preferred Shares are being offered by Morgan Stanley & Co. LLC, acting as underwriter. See Underwriter. The Fund intends to use the net proceeds from the sale of Term Preferred Shares to increase the Fund's leverage. The first issuance date of the Term Preferred Shares upon the closing of this offering is referred to herein as the Date of Original Issue.

Priority of Payment

The Fund has entered into a credit agreement with State Street Bank and Trust Company (the Credit Agreement), and has an outstanding balance. See Use of Leverage. The rights of lenders, such as State Street Bank and Trust Company, and any other creditors to receive payments of interest on and repayments of principal of any borrowings are senior to the rights of holders of Term Preferred Shares and Common Shares (each, a Shareholder), with respect to the payment of dividends and other distributions, and upon liquidation.

Under the Credit Agreement, the Fund may not be permitted to redeem Term Preferred Shares unless at such time, the Fund meets certain asset coverage requirements and no event of default or other circumstance exists under the Credit Agreement that would limit or otherwise block payments in redemption. In particular, the Fund may not make a redemption payment with respect to such shares, in the event that Asset Coverage (as defined below) is less than 225%. Additionally, under the Credit Agreement, the Fund cannot (i) permit the aggregate amount of total liabilities that are senior securities representing indebtedness to exceed $33\frac{1}{3}\%$ of the Fund's adjusted net assets immediately after giving effect to any Borrowings (as defined below), (ii) at any time permit the aggregate amount of total liabilities that are senior securities representing indebtedness to

exceed 38% of the Fund's adjusted net assets, (iii) at any time that Borrowings are outstanding under the Credit Agreement, fail to have Asset Coverage of at least 225%, or (iv) at any time that Borrowings are outstanding under the Credit Agreement, permit the Preferred Adjusted Asset Coverage (as defined below) to be less than 200%. As used herein, Preferred Adjusted Asset Coverage means Asset Coverage, excluding the liquidation preference of any preferred shares for which an irrevocable deposit sufficient to pay the full redemption price for such preferred shares has been made. If the Fund defaults on these obligations under the Credit Agreement, the Fund is required to immediately prepay the principal amount of any Borrowings under the Credit Agreement (together with accrued interest thereon) and take other action to immediately cure such default. If any Borrowings under the Credit Agreement are outstanding and the Fund fails to have Asset Coverage of at least 225% as of the close of business on any Business Day on which Asset Coverage is required to be calculated, the Fund must, no later than the close of business on the twentieth Business Day (as defined below) following such event, prepay any Borrowings such that the Fund regains Asset Coverage of at least 225%. No Borrowings under the Credit Agreement may be used to make an irrevocable deposit to pay the redemption price for any preferred shares.

Term Preferred Shares will be senior securities that constitute stock of the Fund and are senior, with priority in all respects, to the Fund's Common Shares as to payments of dividends and as to distribution of assets upon dissolution, liquidation or winding up of the affairs of the Fund. The Fund may not issue additional classes of shares that are senior to the Term Preferred Shares as to payments of dividends and as to distribution of assets upon dissolution, liquidation or winding up of the affairs of the Fund.

Who May Want to Invest

You should consider your investment goals, time horizons and risk tolerance before investing in Term Preferred Shares. An investment in Term Preferred Shares is not appropriate for all investors and is not intended to be a complete investment program. Term Preferred Shares are designed as a short-term investment to help achieve the after-tax income and capital preservation goals of investors, and not as a trading vehicle. Term Preferred Shares may be an appropriate investment for you if you are seeking:

Consistent monthly dividends;

Return of your capital investment after a limited term of approximately five years;

A security that benefits from significant over-collateralization and related protective provisions; and

A short-term fixed income investment with potentially less price volatility than longer-dated fixed income securities.

However, keep in mind that you will need to assume the risks associated with an investment in Term Preferred Shares and the Fund. See Risk Factors.

Dividend Rate

Term Preferred Shares pay a dividend at an initial rate of 1.500% per annum of the \$1,000 liquidation preference per share, subject to adjustment as set forth below and in accordance with the Statement (the Dividend Rate). The Dividend Rate will not in any event be lower than the initial 1.500% Dividend Rate.

The Dividend Rate payable on the Term Preferred Shares on any date will be determined with reference to the following table:

<u>Date</u>	<u>Dividend Rate</u>
From and including the Date of Original Issue to but excluding November 1, 2017	1.500%
From and including November 1, 2017 to but excluding May 1, 2018	1.750%
From and including May 1, 2018 to but excluding November 1, 2018	2.000%
From and including November 1, 2018 to but excluding May 1, 2019	2.500%
From and including May 1, 2019 to but excluding November 1, 2019	3.500%
From and including November 1, 2019 to but excluding May 1, 2020	4.000%
From and including May 1, 2020 to but excluding November 1, 2020	5.000%

See Description of Term Preferred Shares Dividends and Dividend Periods Dividend Rate.

Dividend Payments

The holders of Term Preferred Shares will be entitled to receive cumulative cash dividends and other distributions on each such share, when, as and if declared by, or under authority granted by, the Board of Trustees of the Fund (the Board of Trustees), out of funds legally available for payment. Dividends on the Term Preferred Shares will be payable monthly. The first dividend period for the Term Preferred Shares will commence on the Date of Original Issue of Term Preferred Shares and end on November 30, 2015 and each subsequent dividend period will be a calendar month (or the portion thereof occurring prior to the redemption of such Term Preferred Shares) (each dividend period a Dividend Period). Dividends will be paid on the first Business Day of the month next following a Dividend Period and upon redemption of the Term Preferred Shares (each payment date a Dividend Payment Date). Dividends with respect to any monthly Dividend Period will be declared and paid to holders of record of Term Preferred Shares as their names shall appear on the registration books of the Fund at the close of business on the day immediately preceding such Dividend Payment Date (or, if such day is not a Business Day, the next preceding Business Day). See Description of Term Preferred Shares Dividends and Dividend Periods.

Business Day means any day (a) other than a day on which commercial banks in The City of New York, New York are required or authorized by law or executive order to close and (b) on which the NYSE is not closed.

On account of the foregoing provisions, only the holders of Term Preferred Shares on the record date for a Dividend Period will be entitled to receive dividends and other distributions payable with respect to such Dividend Period, and holders of Term Preferred Shares who sell shares before such a record date and purchasers of Term Preferred Shares who purchase shares after such a record date should take the effect of the foregoing provisions into account in evaluating the price to be received or paid for such Term Preferred Shares.

Term Redemption

The Fund is required to provide for the mandatory redemption of all outstanding Term Preferred Shares on November 1, 2020 at a redemption price equal to \$1,000 per share plus an amount equal to accumulated but unpaid dividends thereon (whether or not earned or declared but excluding interest thereon) to (but excluding) the redemption date (the **Term Redemption Price**) out of funds legally available therefore and to the extent permitted by any credit agreement in effect on such date. No amendment, alteration or repeal of the obligations of the Fund to redeem all of the Term Preferred Shares on November 1, 2020 can be effected without the unanimous vote or consent of the holders of Term Preferred Shares outstanding at such time. See **Description of Term Preferred Shares Redemption** and **Voting Rights**.

Asset Coverage and Corrective

Action

If the Fund fails to have Asset Coverage (as defined under **Asset Coverage** below) of at least 225% as of the close of business on any Business Day on which such Asset Coverage is required to be calculated and such failure is not cured as of the close of business on the date that is 30 calendar days following such Business Day (the **Asset Coverage Cure Date**), the Fund will, to the extent permitted by the Investment Company Act of 1940, as amended (the **1940 Act**) and Massachusetts law and pursuant to the terms and conditions of any credit agreement, loan agreement, credit facility or other agreement representing borrowings of the Fund that is in effect at such time, by the close of business on the Business Day next following such Asset Coverage Cure Date, determine (i) the Corrective Action (as defined below) to be taken to cause the Fund to regain Asset Coverage; (ii) if applicable, the identity and market value of assets of the Fund to be sold in connection with a Corrective Action; and (iii) the date, which date will not be later than 20 Business Days following such Asset Coverage Cure Date, on which the Fund will regain Asset Coverage. As used herein, **Corrective Action** means, for the purpose of allowing the Fund to comply with the Asset Coverage requirements, (a) the irrevocable deposit with the

Redemption and Paying Agent (as defined below) of certain securities described in the Statement to fund the redemption of Term Preferred Shares; (b) the repayment of indebtedness of the Fund; (c) corrective trades involving Fund assets; or (d) any combination of the actions described in clauses (a) through (c) above. If Term Preferred Shares are to be redeemed in such an event, they will be redeemed out of funds legally available therefore and to the extent permitted by any credit agreement in effect on such date at a redemption price equal to their \$1,000 liquidation preference per share plus accumulated but unpaid dividends thereon (whether or not declared, but excluding interest thereon) to (but excluding) the date fixed for such redemption (the Asset Coverage Redemption Price). Corrective trades described above may be made at a time when it would be disadvantageous for the Fund to do so.

Optional Redemption

Term Preferred Shares will be subject to optional redemption (in whole or, from time to time, in part) at the sole option of the Fund out of funds legally available therefor and to the extent permitted by any credit agreement in effect on such date, at the redemption price per share equal to the sum of the \$1,000 liquidation preference per share plus (i) a premium of 0.5% of the liquidation preference (with no such premium on or after November 1, 2016) and (ii) an amount equal to accumulated but unpaid dividends thereon (whether or not earned or declared but excluding interest thereon) to (but excluding) the date fixed for such redemption. See Description of Term Preferred Shares Redemption Optional Redemption.

Federal and State Income Taxes

The Fund has elected to be treated, and intends to continue to qualify each year, as a regulated investment company under Subchapter M of the Internal Revenue Code of 1986, as amended (the Code). As a regulated investment company, the Fund generally does not expect to be subject to federal income tax. The Fund has received an opinion from its tax counsel that for federal income tax purposes, the Term Preferred Shares will be treated as equity in the Fund. See Tax Matters.

Ratings

The Fund will use commercially reasonable efforts to cause at least one rating agency with respect to the Term Preferred Shares (each a Rating Agency and collectively the Rating Agencies) to publish a credit rating with respect to Term Preferred Shares for so long as Term Preferred Shares are outstanding. The Board of Trustees has the right to terminate the designation of any of the Rating Agencies for purposes of the Term Preferred Shares, provided that at least one Rating Agency continues to maintain a rating with respect to the Term Preferred Shares. The Board of Trustees has initially designated each of Moody's Investor Services, Inc. (Moody's) and Fitch Ratings, Inc. (Fitch) as a Rating Agency.

Asset Coverage

If the Fund fails to maintain at least 225% asset coverage as of the close of business on each Business Day, and such failure is not cured as of the Asset Coverage Cure Date, the Fund shall be required to take Corrective Action as provided above. Asset Coverage for Term Preferred Shares is calculated pursuant to Section 18(h) of the 1940 Act, as in effect on the date of the Statement, and is determined on the basis of values calculated as of a time within 48 hours (only including Business Days) preceding each daily determination (Asset Coverage). See Description of Term Preferred Shares Asset Coverage.

The Fund estimates that on the Date of Original Issue, the Asset Coverage, based on the composition of its portfolio as of October 15, 2015, and after giving effect to (i) the issuance of Term Preferred Shares offered hereby (\$35,000,000), and (ii) \$725,000 of underwriting discounts and commissions and estimated offering costs for such Term Preferred Shares, will be 273%.

Voting Rights

Except as otherwise provided in the Fund's Declaration of Trust, the Statement or as otherwise required by law, (i) each holder of Term Preferred Shares shall be entitled to one vote for each Term Preferred Share held by such holder on each matter submitted to a vote of Shareholders of the Fund and (ii) the holders of outstanding preferred shares, including the Term Preferred Shares, and of Common Shares (Common Shares and Term Preferred Shares shall hereinafter be referred to together as the Shares) shall vote together as a single class; provided that holders of preferred shares, including the Term Preferred Shares, voting separately as a class, shall elect at least two of the Fund's trustees and will elect a majority of the Fund's trustees to the extent the Fund fails to pay dividends on any preferred shares, including the Term Preferred Shares, in an amount equal to two full years of dividends on that stock. See Description of Term Preferred Shares Voting Rights.

Liquidation Preference

The liquidation preference of Term Preferred Shares will be \$1,000 per share (the Liquidation Preference). In the event of any liquidation, dissolution or winding up of the affairs of the Fund, whether voluntary or involuntary, the holders of Term Preferred Shares will be entitled to receive a liquidation distribution per share equal to the Liquidation Preference plus an amount equal to all unpaid dividends and other distributions accumulated to (but excluding) the date fixed for distribution or payment (whether or not earned or declared by the Fund, but excluding interest thereon). See Description of Term Preferred Shares Liquidation Rights.

Investment Objective and Policies

The Fund's investment objective is to provide current income and the potential for capital appreciation. The Fund cannot assure you that it will achieve its investment objective.

The Fund's portfolio will be invested primarily in below investment grade adjustable rate corporate debt instruments, including senior secured loans, second lien loans, and other adjustable rate corporate debt instruments. Under normal market circumstances, the Fund invests at least 70% of its Managed Assets in adjustable rate senior loans and second lien loans. Managed Assets means the total assets of the Fund, minus the sum of its accrued liabilities (other than Fund liabilities incurred for the express purpose of creating leverage). Total assets for this purpose shall include assets attributable to the Fund's use of effective leverage (whether or not those assets are reflected in the Fund's financial statements for purposes of generally accepted accounting principles). See The Fund's Investments for additional information on the types of securities in which the Fund may invest. Senior loans and second lien loans are made to U.S. and non-U.S. corporations, partnerships and other business entities (Borrowers, and each, a Borrower) that operate in various industries and geographic regions. Senior loans, second lien loans and other adjustable rate instruments pay interest at rates which are determined periodically at short-term intervals on the basis of an adjustable base lending rate, primarily the London Interbank Offered Rate (LIBOR), plus a premium, and are therefore regarded as having short-term durations. In addition, the Fund may make limited tactical investments in high yield debt and other debt instruments as described herein.

The Fund also may enter into tactical short positions consisting primarily of high yield debt. The high yield debt instruments may have intermediate-term or even long-term durations, but investments in those instruments will not be made in a manner that will cause the Fund's average portfolio duration (including the effect of leverage) to exceed two years. Short selling involves selling instruments that may be owned, and if not owned, borrowing the same instruments for delivery to the purchaser, with an obligation to replace the borrowed instruments at a later date. Short selling allows the short seller to profit from declines in market prices to the extent such declines exceed the transaction costs and the costs of borrowing the instruments.

Substantially all of the Fund's portfolio likely will be invested in corporate debt instruments that are, at the time of investment, rated below investment grade or unrated but judged by the portfolio managers to be of comparable quality. A debt instrument is considered investment grade quality if it is rated within the four highest letter grades (BBB or Baa or better) by at least one nationally recognized statistical rating organization (NRSRO) that rates such instrument (even if it is rated lower by another), or if it is unrated but judged to be of comparable quality by the portfolio managers. Debt instruments of below investment grade quality are regarded as having predominately speculative characteristics with respect to capacity to pay interest and repay principal and are commonly referred to as junk

bonds or high yield debt, which implies higher price volatility and default risk than investment grade instruments of comparable terms and duration. See [Risk Factors Issuer Level Risks Issuer Credit Risk](#), [Risk Factors Issuer Level Risks Below Investment Grade Risk](#) and [Risk Factors Security Level Risks Short Exposure Risk](#).

The Fund uses leverage to seek to enhance current income and capital appreciation.

Under normal circumstances:

The Fund invests at least 70% of its Managed Assets in adjustable rate corporate debt instruments, including senior secured loans, second lien loans, and other adjustable rate corporate debt instruments.

The Fund may make limited tactical investments in high yield debt and other debt instruments as described herein in an aggregate amount of up to 30% of its Managed Assets.

No more than 30% of the Fund's Managed Assets may be invested in debt instruments that are, at the time of investment, rated CCC+ or Caa1 or below by any NRSRO or that are unrated but judged by the portfolio managers to be of comparable quality.

The Fund may enter into tactical short positions, consisting primarily of high yield debt, either directly or through the use of derivatives, including credit default swaps, creating a negative investment exposure or hedging existing long (positive) investment exposure in a notional amount up to 20% of its Managed Assets.

The Fund may invest up to 20% of its Managed Assets in debt instruments of non-U.S. issuers (which term for purposes of this prospectus includes Borrowers) that are U.S. dollar or non-U.S. dollar denominated. The Fund's investments in debt instruments of non-U.S. issuers may include debt instruments located, or conducting their business, in emerging market countries.

The Fund may invest up to 10% of its Managed Assets in securities of other open- or closed-end investment companies (including exchange traded funds (ETFs)) that invest primarily in securities of the types in which the Fund may invest directly.

See [The Fund's Investments Investment Objective](#), and [Investment Policies](#).

The Fund may enter into certain derivative transactions, such as credit default swaps and interest rate swaps, as a hedging technique to protect against potential adverse changes in the market value of portfolio instruments. The Fund also may use derivatives to attempt to protect the net asset value (NAV) of the Fund, to facilitate the sale of certain portfolio instruments, to manage the Fund's effective

interest rate exposure, and as a temporary substitute for purchasing or selling particular instruments. The Fund also may enter into derivative transactions such as total return swaps on an underlying index to create investment exposure to the extent such transactions may facilitate implementation of the Fund's investment strategy.

Under normal market circumstances, the Fund will maintain an average duration of two years or less for its portfolio (including the effect of leverage, but after the effect of derivatives used to shorten duration). In this prospectus, average duration and average portfolio duration are each defined to be the modified duration of the Fund's portfolio, which is the measure of a debt instrument's or a portfolio's price sensitivity with respect to changes in market yields adjusted to reflect the effect of the Fund's effective leverage. When the average duration of the portfolio is expected to be longer than two years, the Fund will use interest rate swaps, interest rate futures or other derivative instruments to shorten such duration. Prices of instruments with shorter durations tend to be less sensitive to interest rate changes than instruments with longer durations. In general, the value of a portfolio of instruments with a shorter duration can be expected to be less sensitive to interest rate changes than a portfolio with a longer duration. For example, the price of a bond with an effective duration of two years will rise (fall) two percent for every one percent decrease (increase) in its yield, and the price of a five-year duration bond will rise (fall) five percent for a one percent decrease (increase) in its yield.

During temporary defensive periods or in order to keep the Fund's cash fully invested, including during the period when the net proceeds of the offering of Term Preferred Shares are first being invested, the Fund may deviate from its investment policies and objective. During such periods, the Fund may invest up to 100% of its Managed Assets in short-term investments, including high quality, short-term securities, or may invest in short-, intermediate-, or long-term U.S. Treasury securities. There can be no assurance that such strategies will be successful. For a more complete discussion of the Fund's portfolio composition, see The Fund's Investments.

Swap

Prior to the closing date of this offering, the Fund expects to enter into an interest rate swap with Morgan Stanley Capital Services LLC that seeks to convert the economic impact of the dividend payable by the Fund on the Term Preferred Shares to a variable rate exposure. Under the swap, the Fund would receive a fixed payment at a rate equal to the applicable dividend rate being paid by the Fund on the Term Preferred Shares and in turn pay a fixed spread to the one-month LIBOR index. Morgan Stanley Capital Services LLC has the right, but not the obligation, to terminate the swap agreement on the first business day of each month beginning on November 1, 2018. Settlement of the swap is contingent on the closing of the Term Preferred Shares offering. The swap termination date is not

contractually tied to the redemption of the Term Preferred Shares. Terms and conditions of the swap may be modified by the mutual written agreement of the Fund and Morgan Stanley Capital Services LLC.

Investment Adviser

Nuveen Fund Advisors, LLC (Nuveen Fund Advisors), the Fund's investment adviser, is responsible for determining the Fund's overall investment strategy and its implementation. Nuveen Fund Advisors, a registered investment adviser, is a wholly-owned subsidiary of Nuveen Investments, Inc. (Nuveen Investments). Founded in 1898, Nuveen Investments and its affiliates had approximately \$223 billion of assets under management as of September 30, 2015. See Management of the Fund Investment Adviser, Sub-Adviser and Portfolio Managers.

Nuveen Investments is a wholly-owned subsidiary of TIAA-CREF. TIAA-CREF is a national financial services organization with approximately \$834 billion in assets under management as of September 30, 2015, and is the leading provider of retirement services in the academic, research, medical and cultural fields. Nuveen Investments operates as a separate subsidiary within TIAA-CREF's asset management business.

Sub-Adviser

Symphony Asset Management, LLC (Symphony) serves as the Fund's investment sub-adviser and is an affiliate of Nuveen Fund Advisors. Symphony is a registered investment adviser. Symphony oversees the day-to-day investment operations of the Fund.

Use of Leverage

In addition to offering Term Preferred Shares, the Fund employs leverage through borrowing (Borrowings). The Fund has entered into a Credit Agreement with State Street Bank and Trust Company. The borrowing capacity under the Credit Agreement was reduced from \$95,000,000 to \$85,200,000 in an amendment to the Credit Agreement dated October 30, 2015. The term of the Credit Agreement ends on August 4, 2016. The Fund has the right to augment or replace the Credit Agreement with a new credit agreement in the future, and any such augmented or replacement credit agreement may contain terms that are materially different than the terms contained in the existing Credit Agreement, including terms that limit payments to holders of Term Preferred Shares. As of July 31, 2015, the Fund's outstanding balance on these Borrowings under the Credit Agreement was \$85,200,000. For the fiscal year ended July 31, 2015, the average daily balance outstanding and the average annual interest rate on these Borrowings were \$85,132,055 and 0.87%, respectively. This credit facility is secured by substantially all of the assets of the Fund. Issuance of Term Preferred Shares will increase the Fund's leverage.

Leverage involves special risks. See Risk Factors Fund Level Risks Leverage Risk. There is no assurance that the Fund's leveraging strategy will be successful. See Use of Leverage.

The Fund pays a management fee to Nuveen Fund Advisors (which in turn pays a portion of its fee to the Fund's sub-adviser, Symphony) based on a percentage of Managed Assets. Managed Assets for this purpose includes the proceeds realized and managed from the Fund's use of leverage as set forth in the Fund's investment management agreement. Nuveen Fund Advisors will be responsible for using leverage to pursue the Fund's investment objective, and will base its decision regarding whether and how much leverage to use for the Fund based on its assessment of whether such use of leverage will advance the Fund's investment objective. However, a decision to increase the Fund's leverage will have the effect, all other things being equal, of increasing Managed Assets and therefore Nuveen Fund Advisors' and Symphony's fees. Thus, Nuveen Fund Advisors and Symphony may have a conflict of interest in determining whether to increase the Fund's use of leverage. Nuveen Fund Advisors will seek to manage that potential conflict by only increasing the Fund's use of leverage when it determines that such increase is in the best interest of the Fund and is consistent with the Fund's investment objective, and by periodically reviewing the Fund's performance and use of leverage with the Board of Trustees.

Unlisted Shares

The Term Preferred Shares are not listed or traded on any securities exchange.

Redemption and Paying Agent

The Fund has entered into an amendment to its Transfer Agency and Service Agreement with State Street Bank and Trust Company, Canton, Massachusetts (the "Redemption and Paying Agent") for the purpose of causing the Fund's transfer agent and registrar to serve as transfer agent and registrar, dividend disbursing agent, and redemption and paying agent with respect to Term Preferred Shares. State Street has subcontracted the transfer agency servicing and dividend disbursing and redemption and paying agency servicing of the Fund to Computershare, Inc.

Special Risk Considerations

Investment in the Fund, and in Term Preferred Shares in particular, involves special risk considerations, which are summarized below. The Fund is designed as a long-term investment and not as a trading vehicle. The Fund is not intended to be a complete investment program. See "Risk Factors" for a more complete discussion of the special risk considerations of an investment in the Fund.

Risks of Investing in Term Preferred Shares

Subordination Risk. While holders of Term Preferred Shares will have equal liquidation and distribution rights to any other preferred shares that might be issued by the Fund, they will be subordinated to the rights of holders of senior indebtedness of the Fund, including the Credit Agreement or any other credit agreement in effect on such date. Therefore, dividends, distributions, payments in redemption and

other payments to holders of Term Preferred Shares (i) may be blocked by the terms of the Credit Agreement or any other credit agreement in effect on such date and (ii) may be subject to prior payments due to the holders of senior indebtedness. The Fund also has the right to augment or replace the Credit Agreement with a new credit agreement in the future, and any such augmented or replacement credit agreement may contain terms that are materially different than the terms contained in the existing Credit Agreement, including terms that limit payments to holders of Term Preferred Shares.

In addition, the 1940 Act may provide debt holders with voting rights that are superior to the voting rights of preferred shares holders, including holders of Term Preferred Shares. The rights of lenders, creditors and counterparties of the Fund will also be senior to those of holders of Term Preferred Shares.

Capital Structure Risk. As noted above, the Fund has entered into the Credit Agreement, and has an outstanding balance. The rights of lenders, such as State Street Bank and Trust Company, to receive payments of interest on and repayments of principal of any borrowings are senior to the rights of the Fund's equity holders, such as holders of Term Preferred Shares and Common Shares, with respect to the payment of dividends and other distributions, and upon liquidation. The Fund may not be permitted to declare dividends and other distributions with respect to the Term Preferred Shares and Common Shares or redeem Term Preferred Shares unless at such time, the Fund meets certain asset coverage requirements and no event of default or other circumstance exists under the Credit Agreement (or any other credit agreement in effect as of such date) that would limit or otherwise block payments in redemption.

Interest Rate Risk Term Preferred Shares. Term Preferred Shares pay dividends at the Dividend Rate (as described in Dividend Rate above). The Dividend Rate will be adjusted each year in accordance with the Statement, but will not in any event be lower than the initial 1.500% Dividend Rate. Prices of fixed income investments vary inversely with changes in market yields. The market yields on securities comparable to Term Preferred Shares may increase, which would likely result in a decline in the secondary market price of Term Preferred Shares prior to the term redemption date.

Unlisted Shares Risk. Because the Fund has no prior trading history for preferred shares, it is difficult to predict the trading patterns of Term Preferred Shares, including the effective costs of trading Term Preferred Shares. Moreover, Term Preferred Shares will not be listed on a stock exchange. Thus, an investment in Term Preferred Shares may be illiquid and there may be no active trading market.

Ratings Risk. The Fund expects that, at issuance, the Term Preferred Shares will be rated by at least one Rating Agency designated by the

Board of Trustees, and that such rating will be a requirement of issuance of such Shares by the underwriter pursuant to an underwriting agreement. There can be no assurance that the Term Preferred Shares will receive any particular rating from a Rating Agency, or that any such ratings will be maintained at the level originally assigned through the term of the Term Preferred Shares. In the event that one or more Rating Agency does not issue a rating on the Term Preferred Shares at all or at the minimum level required, the issuance and sale of Term Preferred Shares in this offering may not be completed. Ratings do not eliminate or mitigate the risks of investing in Term Preferred Shares. A rating issued by a Rating Agency is only the opinion of the entity issuing the rating at that time, and is not a guarantee as to quality, or an assurance of the future performance, of the rated security (in this case, Term Preferred Shares). In addition, the manner in which the Rating Agency obtains and processes information about a particular security may affect the Rating Agency's ability to timely react to changes in an issuer's circumstances (in this case, the Fund) that could influence a particular rating. A Rating Agency could downgrade Term Preferred Shares, which may make Term Preferred Shares less liquid in the secondary market and reduce market prices.

Early Redemption Risk. The Fund may voluntarily redeem Term Preferred Shares or may redeem Term Preferred Shares to meet regulatory requirements and satisfy the asset coverage requirements of the Term Preferred Shares. Such redemptions may be at a time that is unfavorable to holders of Term Preferred Shares. The Fund expects to voluntarily redeem Term Preferred Shares before the Term Redemption Date to the extent that market conditions allow the Fund to issue other preferred shares or debt securities at a rate that is lower than the then-current Dividend Rate on Term Preferred Shares. For further information, see Description of Term Preferred Shares Redemption and Asset Coverage.

Tax Risks. To qualify for the favorable U.S. federal income tax treatment generally accorded to regulated investment companies, among other things, the Fund must derive in each taxable year at least 90% of its gross income from certain prescribed sources. Additionally, in order to qualify as a regulated investment company, the Fund must meet certain distribution requirements. The failure to pay distributions could result in the Fund ceasing to qualify as a regulated investment company. Nevertheless, the Fund might not distribute all of its net investment income, and the Fund is not required to distribute any portion of its net capital gains. If for any taxable year the Fund does not qualify as a regulated investment company, all of its taxable income (including its net capital gain) would be subject to tax at regular corporate rates without any deduction for distributions to stockholders, and such distributions would be taxable as ordinary dividends to the extent of the Fund's current and accumulated earnings and profits. The value of Term Preferred Shares may be adversely affected by changes in tax rates and policies.

In addition, the Fund will treat Term Preferred Shares as equity in the Fund for federal income tax purposes. See also the opinion of counsel included as Appendix D to the SAI. If the Term Preferred Shares were treated as debt rather than as equity for such purposes, the timing and character of such income to holders could be affected. See Tax Matters.

Swap Risk. Swap agreements are typically over-the-counter, two-party contracts entered into primarily by institutional investors for periods typically ranging from a few weeks to more than one year, where the parties agree to exchange the returns (or differentials in rates of return) earned or realized on particular predetermined investments or instruments, which may be adjusted for an interest factor. Interest rate swaps involve the exchange with another party of their respective commitments to pay or receive interest (for example, an exchange of floating rate payments for fixed-rate payments). The use of interest rate swaps is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio security transactions. There can be no assurance that any interest rate swap entered into by the Fund, including the interest rate swap associated with the Term Preferred Shares, as described above under Swap, will have the intended effect.

Income Shortfall Risk. The securities held in the Fund's portfolio generally pay interest based on long-term yields. Long-term, as well as intermediate-term and short-term interest rates may fluctuate. If the interest rates paid on the securities held by the Fund fall below the Dividend Rate, the Fund's ability to pay dividends on Term Preferred Shares could be jeopardized.

Reinvestment Risk Term Preferred Shares. Given the five-year term and potential for early redemption of Term Preferred Shares, holders of Term Preferred Shares may face an increased reinvestment risk, which is the risk that the return on an investment purchased with proceeds from the sale or redemption of Term Preferred Shares may be lower than the return previously obtained from an investment in Term Preferred Shares.

General Risks of Investing in the Fund

Investment and Market Risk. An investment in the Fund's Shares is subject to investment risk, including the possible loss of the entire principal amount that you invest. Your investment in Shares represents an indirect investment in the securities owned by the Fund, substantially all of which are traded on a national securities exchange or in the over-the-counter markets. Your Shares at any point in time may be worth less than your original investment. See Risk Factors Fund Level Risks Investment and Market Risk.

Leverage Risk. The use of leverage created through Borrowings and issuing preferred shares, such as the Term Preferred Shares, creates

an opportunity for increased net income and returns, but also creates special risks for Shareholders, including potential interest rate risks and the likelihood of greater volatility of NAV and market price of, and distributions on, the Shares. Issuance of Term Preferred Shares will increase the Fund's leverage. There is no assurance that the Fund's leveraging strategy will be successful. Changes in the value of the Fund's portfolio, including risk of loss and costs attributable to Borrowings or preferred shares, such as the Term Preferred Shares, will be borne entirely by holders of Common Shares. The Fund's use of leverage can result in a greater decrease in NAV in declining markets. The Fund's use of leverage similarly can magnify the impact of changing market conditions on market prices for the Fund's Common Shares.

So long as the rate of distributions received from the Fund's portfolio investments purchased with Borrowings, net of applicable Fund expenses, exceeds the then current interest rate on any Borrowings, the investment of the proceeds of Borrowings will generate more cash flow than will be needed to make interest payments. If so, the excess cash flow will be available to pay higher distributions to holders of Term Preferred Shares and Common Shares. However, if the rate of cash flow received from the Fund's portfolio investments purchased with Borrowings, net of applicable Fund expenses, is less than the then current interest rate on any Borrowings, the Fund may be required to utilize other Fund assets to make interest payments on Borrowings and this may result in reduced net investment income available for distribution to holders of Term Preferred Shares and Common Shares.

The Fund will use derivatives, such as interest rate swaps, to manage the Fund's effective interest rate exposure. However, the Fund cannot assure you that the use of leverage will result in a higher yield or return to Shareholders. The income benefit from leverage will be reduced to the extent that the difference narrows between the net earnings on the Fund's portfolio securities and its cost of leverage. Because of the costs of leverage, the Fund may incur losses even if the Fund has positive returns, if they are not sufficient to cover the costs of leverage. The Fund's cost of leverage includes interest on Borrowings and dividends paid on preferred shares, such as the Term Preferred Shares, as well as any one-time costs (*e.g.*, issuance costs) and ongoing fees and expenses associated with such leverage.

For risks associated with the issuance of preferred shares, such as the Term Preferred Shares, see "Risks of Investing in Term Preferred Shares" above.

Furthermore, the amount of fees paid to Nuveen Fund Advisors (which in turn pays a portion of its fees to Symphony) for investment advisory services will be higher if the Fund uses leverage because the fees will be calculated based on the Fund's Managed Assets; this may create an incentive for Nuveen Fund Advisors and Symphony to leverage the Fund or increase its leverage.

The Fund may invest in the securities of other investment companies, which may themselves be leveraged and therefore present similar risks to those described above and magnify the Fund's leverage risk.

See Risk Factors Fund Level Risks Leverage Risk and Use of Leverage.

Recent Market Conditions. In the recent past, the debt and equity capital markets in the United States were negatively impacted by significant write-offs in the financial services sector relating to sub-prime mortgages and the re-pricing of credit risk in the broadly syndicated market, among other things. These events, along with the downgrade to the United States credit rating, deterioration of the housing market, the failure of major financial institutions and the resulting United States federal government actions led in the recent past, and may lead in the future, to worsening general economic circumstances, which did, and could, materially and adversely impact the broader financial and credit markets and reduce the availability of debt and equity capital for the market as a whole and financial firms in particular. These events may increase the volatility of the value of securities owned by the Fund and/or result in sudden and significant valuation increases or decreases in its portfolio. These events also may make it more difficult for the Fund to accurately value its securities or to sell its securities on a timely basis.

While the extreme volatility and disruption that U.S. and global markets experienced for an extended period of time beginning in 2007 and 2008 have generally subsided, uncertainty and periods of volatility remain, and risks to a robust resumption of growth persist. Federal Reserve policy, including with respect to certain interest rates as well as the decision to cease purchasing securities pursuant to quantitative easing, may cause interest rates to rise, and may adversely affect the value, volatility and liquidity of dividend and interest paying securities. Market volatility, rising interest rates and/or a return to unfavorable economic circumstances could impair the Fund's ability to achieve its investment objectives.

General market uncertainty and consequent re-pricing of risk have led to market imbalances of sellers and buyers, which in turn have resulted in significant valuation uncertainties in a variety of securities and significant and rapid value decline in certain instances. Additionally, periods of market volatility remain, and may continue to occur in the future, in response to various political, social and economic events both within and outside of the United States. These circumstances resulted in, and in many cases continue to result in, greater price volatility, less liquidity, widening credit spreads and a lack of price transparency, with many securities remaining illiquid and of uncertain value. Such market circumstances may make valuation of some of the Fund's securities uncertain and/or result in sudden and significant valuation increases or declines in its holdings. If there is a significant decline in the value of the Fund's portfolio, this may impact the asset coverage levels for any outstanding leverage the Fund may have.

Market Discount from Net Asset Value. Common Shares of closed-end investment companies like the Fund have during some periods traded at prices higher than NAV and have during other periods traded at prices lower than NAV. The Fund cannot predict whether Common Shares will trade at, above or below NAV. This characteristic is a risk separate and distinct from the risk that the Fund's NAV could decrease as a result of investment activities. Holders of Common Shares bear a risk of loss to the extent that the price at which they sell their Common Shares is lower in relation to the Fund's NAV than at the time of purchase, assuming a stable NAV.

The NAV per Common Share will also be reduced by costs associated with any future issuances of Common or preferred shares. As compared to Term Preferred Shares, the Common Shares are designed primarily for long-term investors, and you should not view the Fund as a vehicle for trading purposes.

Issuer Level Risks

Issuer Credit Risk. Issuers of debt instruments in which the Fund may invest may default on their obligations to pay principal or interest when due. This non-payment would result in a reduction of income to the Fund, a reduction in the value of a debt instrument experiencing non-payment and, potentially, a decrease in the NAV of the Fund. See Risk Factors Issuer Level Risks Issuer Credit Risk.

Below Investment Grade Risk. The Fund invests in debt instruments that are rated below investment grade at the time of investment or that are unrated but judged by the portfolio managers to be of comparable quality. Debt instruments of below investment grade quality are regarded as having predominately speculative characteristics with respect to the issuer's capacity to pay interest and repay principal, and are commonly referred to as junk bonds or high yield debt, which may be subject to higher price volatility and default risk than investment grade instruments of comparable terms and duration. Issuers of lower grade instruments may be highly leveraged and may not have available to them more traditional methods of financing. The prices of these lower grade instruments are typically more sensitive to negative developments, such as a decline in the issuer's revenues or a general economic downturn, than are the prices of higher rated instruments. See Risk Factors Issuer Level Risks Below Investment Grade Risk.

Non-U.S. Issuer Risk. Investments in securities of non-U.S. issuers may involve special risks not presented by investments in instruments of U.S. issuers, including the following: (i) less publicly available information about non-U.S. issuers or markets due to less rigorous disclosure or accounting standards or regulatory practices; (ii) many non-U.S. markets are smaller, less liquid and more volatile;

(iii) potential adverse effects of fluctuations in currency exchange rates or controls on the value of the Fund's investments; (iv) the economies of non-U.S. countries may grow at slower rates than expected or may experience a downturn or recession; (v) the impact of economic, political, social or diplomatic events; (vi) possible seizure of a company's assets; (vii) restrictions imposed by non-U.S. countries limiting the ability of non-U.S. issuers to make payments of principal and/or interest due to blockages of foreign currency exchanges or otherwise and (viii) withholding and other non-U.S. taxes may decrease the Fund's return. See Risk Factors Issuer Level Risks Non-U.S. Securities Risk.

Emerging Markets Risk. Risks of investing in securities of emerging markets issuers include: smaller market capitalization of securities markets, which may suffer periods of relative illiquidity; significant price volatility; restrictions on foreign investment; and possible restrictions on repatriation of investment income and capital. In addition, foreign investors may be required to register the proceeds of sales; future economic or political crises could lead to price controls, forced mergers, expropriation or confiscatory taxation, seizure, nationalization, or creation of government monopolies. Certain emerging markets also may face other significant internal or external risks, including a heightened risk of war, and ethnic, religious and racial conflicts. In addition, governments in many emerging market countries participate to a significant degree in their economies and securities markets, which may impair investment and economic growth, and which may in turn diminish the value of the companies in those markets.

Security Level Risks

Senior Loan Risk. Senior loans hold the most senior position in the capital structure of a business entity, are typically secured with specific collateral and have a claim on the assets and/or stock of the Borrower that is senior to that held by subordinated debt holders and stockholders of the Borrower. Senior loans that the Fund intends to invest in are usually rated below investment grade, and share the same risks of other below investment grade debt instruments.

Although the Fund invests primarily in senior loans that are secured by specific collateral, there can be no assurance the liquidation of such collateral would satisfy a Borrower's obligation to the Fund in the event of Borrower default or that such collateral could be readily liquidated under such circumstances. In the event of bankruptcy of a Borrower, the Fund could also experience delays or limitations with respect to its ability to realize the benefits of any collateral securing a senior loan.

In the event of bankruptcy of a Borrower, the Fund could also experience delays or limitations with respect to its ability to realize the benefits of any collateral securing a senior loan. If a secured loan

is foreclosed, the Fund would likely bear the costs and liabilities associated with owning and disposing of the collateral. The collateral may be difficult to sell and the Fund would bear the risk that the collateral may decline in value while the Fund is holding it. Some senior loans are subject to the risk that a court, pursuant to fraudulent conveyance or other similar laws, could subordinate the senior loans to presently existing or future indebtedness of the Borrower or take other action detrimental to lenders, including the Fund. Such court action could under certain circumstances include invalidation of senior loans.

Second Lien Loans and Unsecured Loans Risk. Second lien loans and unsecured loans generally are subject to the same risks associated with investments in senior loans, as discussed above. Because second lien loans and unsecured loans are lower in priority of payment to senior loans, they are subject to the additional risk that the cash flow of the Borrower and property securing the loan, if any, may be insufficient to meet scheduled payments after giving effect to the senior secured obligations of the Borrower. This risk is generally higher for unsecured loans, which are not backed by a security interest in any specific collateral.

Subordinated Loans and Other Subordinated Debt Instruments. Issuers of subordinated loans and other subordinated debt instruments in which the Fund may invest usually will have, or may be permitted to incur, other debt that ranks equally with, or senior to, such subordinated loans or other debt instruments. By their terms, such debt instruments may provide that the holders are entitled to receive payment of interest or principal on or before the dates on which the Fund is entitled to receive payments in respect of subordinated loans or other subordinated debt instruments in which it invests. Also, in the event of insolvency, liquidation, dissolution, reorganization or bankruptcy of an issuer, holders of debt instruments ranking senior to the Fund's subordinated loans or other debt instruments would typically be entitled to receive payment in full before the Fund receives any distribution in respect of its investment. After repaying such senior creditors, the issuer may not have any remaining assets to use for repaying its obligation to the Fund. In the case of debt ranking equally with subordinated loans or other subordinated debt instruments in which the Fund invests, the Fund would have to share on an equal basis any distributions with other creditors holding such debt in the event of an insolvency, liquidation, dissolution, reorganization or bankruptcy of the relevant issuer.

Risk of Settlement Delays. Portfolio transactions in loans may settle in as short as seven days but typically can take up to two or three weeks, and in some cases much longer. Unlike the securities markets, there is no central clearinghouse for loan transactions, and the loan market has not established enforceable settlement standards or remedies for failure to settle.

Loans Not Considered Securities. Loan interests may not be considered securities, and purchasers, such as the Fund, therefore may not be entitled to rely on the anti-fraud protections of the federal securities laws.

Interest Rate Risk. Interest rate risk is the risk that fixed rate debt instruments will decline in value because of changes in market interest rates. When market interest rates rise, the market value of such instruments generally will fall. The Fund's investment in such fixed rate instruments means that the NAV of the Fund and market price of the Shares will tend to decline if market interest rates rise. Market interest rates in the U.S. and in certain other countries in which the Fund may invest currently are near historically low levels. Because interest rates on most adjustable rate instruments typically only reset periodically (e.g., monthly or quarterly), a sudden and significant increase in market interest rates may cause a decline in the value of these investments and in the Fund's NAV. See Risk Factors Security Level Risks Interest Rate Risk.

Risks in Loan Valuation. The Fund utilizes independent pricing services approved by the Board of Trustees to value portfolio instruments at their market value. If the pricing services are unable to provide a market value or if a significant event occurs such that the valuation(s) provided are deemed unreliable, the Fund may value portfolio instrument(s) at their fair value, which is generally the amount an owner might reasonably expect to receive upon a current sale. Valuation risks associated with investing in adjustable rate corporate debt instruments include, but are not limited to: a limited number of market participants, a lack of publicly-available information, resale restrictions, settlement delays, corporate actions and adverse market conditions which may make it difficult to value or sell such instruments.

Prepayment Risk. During periods of declining interest rates or for other purposes, issuers may exercise their option to prepay principal earlier than scheduled, forcing the Fund to reinvest in lower yielding instruments. This is known as call or prepayment risk. Prepayments cannot be predicted with accuracy. Loans in particular may be subject to early prepayment and thus the actual maturity of loans is typically shorter than their stated final maturity calculated solely on the basis of the stated life and payment schedule.

Short Exposure Risk. The Fund may enter into tactical short positions, either directly or through derivatives, to create negative investment exposure or to hedge existing investment exposure. Short selling involves selling instruments that may be owned, and if not owned, borrowing the same instruments for delivery to the purchaser, with an obligation to replace the borrowed instruments at a later date. Short selling allows the short seller to profit from declines in market prices to the extent such declines exceed the transaction costs and the costs of borrowing the instruments. A short sale creates the risk of an

unlimited loss, in that the price of the underlying instrument could theoretically increase without limit, thus increasing the cost of buying those instruments to cover the short position. There can be no assurance that the instruments necessary to cover a short position will be available for purchase. Purchasing instruments to close out the short position can itself cause the price of the instruments to rise further, thereby exacerbating the loss. The success of the Fund's short selling to create negative investment exposure is dependent on Symphony's ability to correctly determine which investments are likely to decline in value, either in absolute terms or relative to corresponding long positions in the portfolio, which may be different than Symphony's ability to invest in long portfolio positions.

Illiquid Securities Risk. The Fund may invest in securities that, at the time of investment, are illiquid. Illiquid securities are not readily marketable and may include some restricted securities. Illiquid securities involve the risk that the securities will not be able to be sold at the time desired by the Fund or at prices approximating the value at which the Fund is carrying the securities on its books.

Derivatives Risk, Including the Risk of Swaps. The Fund's use of derivatives involves risks different from, and possibly greater than, the risks associated with investing directly in the investments underlying the derivatives. The risks associated with derivatives include (i) the imperfect correlation between the value of such instruments and the underlying assets, (ii) the possible default of the counterparty to the transaction, (iii) illiquidity of the derivative instruments, and (iv) high volatility losses caused by unanticipated market movements, which are potentially unlimited. Whether the Fund's use of derivatives is successful will depend on, among other things, if Nuveen Fund Advisors and Symphony correctly forecast market values, interest rates and other applicable factors. If Nuveen Fund Advisors and Symphony incorrectly forecast these and other factors, the investment performance of the Fund will be unfavorably affected. In addition, the derivatives market is largely unregulated. It is possible that developments in the derivatives market could adversely affect the Fund's ability to successfully use derivative instruments.

The Fund may enter into debt-related derivatives instruments including credit default swap contracts and interest rate swaps. The Fund may enter into total return swaps on an underlying index to create investment exposure. Like most derivative instruments, the use of swaps is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. Credit default and total return swap agreements may effectively add leverage to the Fund's portfolio. Total return swap agreements are subject to the risk that a counterparty will default on its payment obligations to the Fund thereunder. In addition, the use of swaps requires an understanding by Nuveen Fund Advisors and Symphony of not only of the referenced asset, rate or index, but also of the swap itself. The derivatives market, including the swaps market, is

subject to a changing regulatory environment which could adversely affect the Fund's ability to successfully use derivative instruments. See Risk Factors Security Level Risks Derivatives Risk, Including the Risk of Swaps, Risk Factors Security Level Risks Counterparty Risk, Risk Factors Other Risks Hedging Risk and the SAI.

Legislation and Regulatory Risk. At any time after the date of this prospectus, legislation or additional regulations may be enacted that could negatively affect the assets of the Fund or the issuers of such assets. Legislation or regulation may also change the way in which the Fund itself is regulated. There can be no assurance that future legislation, regulation or deregulation will not have a material adverse effect on the Fund or will not impair the ability of the Fund to achieve its investment objective.

In addition, as new rules and regulations resulting from the passage of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act) are implemented and new international capital and liquidity requirements are introduced under the Basel III Accords (Basel III), the market may not react the way Nuveen Fund Advisors or Symphony expects. In the event Nuveen Fund Advisors and Symphony incorrectly forecast market reaction, the Fund may not achieve its investment objective.

Counterparty Risk. Changes in the credit quality of the companies that serve as the Fund's counterparties with respect to derivatives or other transactions supported by another party's credit may affect the value of those instruments. Certain entities that have served as counterparties in the markets for these transactions have recently incurred significant losses and financial hardships, including bankruptcy, as a result of exposure to sub-prime mortgages and other lower quality credit investments that have experienced recent defaults or otherwise suffered extreme credit deterioration. As a result, such hardships have reduced these entities' capital and called into question their continued ability to perform their obligations under such transactions. By using such derivatives or other transactions, the Fund assumes the risk that its counterparties could experience similar financial hardships. See Risk Factors Security Level Risks Counterparty Risk.

Potential Conflicts of Interest Risk. Nuveen Fund Advisors and Symphony each provide a wide array of portfolio management and other asset management services to a mix of clients and may engage in ordinary course activities in which their respective interests or those of their clients may compete or conflict with those of the Fund. For example, Nuveen Fund Advisors and Symphony may provide investment management services to other funds and accounts that follow investment objectives similar to those of the Fund. In certain circumstances, and subject to its fiduciary obligations under the Investment Advisers Act of 1940, Symphony may have to allocate a limited investment opportunity among its clients, which include

closed-end funds, open-end funds and other commingled funds. For additional information about potential conflicts of interest, and the way in which Nuveen Fund Advisors and Symphony address such conflicts, please see the SAI.

Other Risks

Reinvestment Risk. Reinvestment risk is the risk that income from the Fund's portfolio will decline if and when the Fund invests the proceeds from matured, traded or called bonds at market interest rates that are below the portfolio's current earnings rate. See Risk Factors Other Risks Reinvestment Risk.

Anti-Takeover Provisions. The Fund's Declaration of Trust (the Declaration) and the Fund's By-Laws (the By-Laws) include provisions that could limit the ability of other entities or persons to acquire control of the Fund or convert the Fund to open-end status. These provisions could have the effect of depriving Shareholders of opportunities to sell their Shares at a premium over the then current market price of the Shares. See Certain Provisions in the Declaration of Trust and By-Laws and Risk Factors Other Risks Anti-Takeover Provisions.

In addition, an investment in the Fund's Shares raises other risks, which are more fully disclosed in the Risk Factors section of this prospectus.

Custodian and Transfer Agent

State Street Bank and Trust Company serves as custodian of the Fund's assets and Common Share transfer agent. See Custodian, Transfer Agent, Dividend Disbursing Agent and Redemption and Paying Agent.

Governing Law

The Declaration of Trust and the Statement are governed by the laws of the Commonwealth of Massachusetts.

FINANCIAL HIGHLIGHTS

The following Financial Highlights table is intended to help a prospective investor understand the Fund's financial performance for the periods shown. Certain information reflects financial results for a single Common Share or share of preferred stock of the Fund, including Term Preferred Shares. The total returns in the table represent the rate an investor would have earned or lost on an investment in Common Shares of the Fund (assuming reinvestment of all dividends). The information with respect to the fiscal year ended July 31, 2015 has been audited by KPMG LLP, whose report for the fiscal year ended July 31, 2015, along with the financial statements of the Fund including the Financial Highlights for each of the periods indicated therein, are included in the Fund's 2015 Annual Report. KPMG LLP has not reviewed or examined any records, transactions or events after the date of such Annual Report. The financial highlights for the fiscal year ended July 31, 2014 and prior were audited by another independent auditor. A copy of the 2015 Annual Report may be obtained from www.sec.gov or by visiting www.nuveen.com. The information contained in, or that can be accessed through, the Fund's website is not part of this prospectus. Past results are not indicative of future performance.

The following per share data and ratios have been derived from information provided in the financial statements.

Selected data for a Common Share outstanding throughout each period:

	Year Ended July 31				
	2015	2014	2013	2012	2011(d)
PER SHARE OPERATING PERFORMANCE					
Beginning NAV	\$ 19.48	\$ 19.91	\$ 19.49	\$ 19.08	\$ 19.10
Investment Operations:					
Net Investment Income (Loss) (a)	1.22	1.29	1.61	1.56	0.05
Net Realized/Unrealized Gain (Loss)	(0.87)	(0.02)	0.49	0.25	0.08
Total	0.35	1.27	2.10	1.81	0.13
Less Distributions:					
Net Investment Income	(1.16)	(1.37)	(1.61)	(1.40)	(0.11)
Accumulated Net Realized Gains	(0.04)	(0.33)	(0.07)		
Total	(1.20)	(1.70)	(1.68)	(1.40)	(0.11)
Common Share:					
Offering Costs			*		(0.04)
Premium Per Share Sold Through Shelf Offering				*	
Ending NAV	\$ 18.63	\$ 19.48	\$ 19.91	\$ 19.49	\$ 19.08
Ending Share Price	\$ 16.41	\$ 18.20	\$ 19.89	\$ 19.54	\$ 18.37
Total Returns:					
Based on NAV (b)	1.87%	6.59%	11.17%	9.96%	0.49%
Based on Share Price (b)	(3.27)%	0.16%	10.77%	14.77%	(7.58)%
RATIOS/SUPPLEMENTAL DATA					
Ending Net Assets (000)	\$ 188,031	\$ 196,613	\$ 201,031	\$ 195,165	\$ 190,868

Edgar Filing: Nuveen Short Duration Credit Opportunities Fund - Form N-2/A

Ratios to Average Net Assets (c)					
Expenses	1.78%	1.88%	1.80%	1.75%	1.16%**
Net Investment Income (Loss)	6.43%	6.52%	8.12%	8.25%	1.52%**
Portfolio Turnover Rate (e)	31%	45%	82%	62%	5%
Borrowings at the End of the Period:					
Aggregate Amount Outstanding (000)	\$ 85,200	\$ 85,000	\$ 85,000	\$ 85,000	\$
Asset Coverage Per \$1,000 Share	\$ 3,207	\$ 3,313	\$ 3,365	\$ 3,296	\$

- (a) Per share Net Investment Income (Loss) is calculated using the average daily shares method.
- (b) Total Return Based on NAV is the combination of changes in the market price per share and the effect of reinvested dividend income and reinvested capital gains distributions, if any, at the average price paid per share at the time of reinvestment. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending market price. The actual reinvestment for the last dividend declared in the period may take place over several days, and in some instances may not be based on the market price, so the actual reinvestment price may be different from the price used in the calculation. Total returns are not annualized.
- Total Return Based on Ending Share Price is the combination of changes in share NAV, reinvested dividend income at NAV and reinvested capital gains distributions at NAV, if any. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending NAV. The actual reinvest price for the last dividend declared in the period may often be based on the Fund's market price (and not its NAV), and therefore may be different from the price used in the calculation. Total returns are not annualized.
- (c) Net Investment Income (Loss) ratios reflect income earned and expenses incurred on assets attributable to borrowings, as described in Footnote 9 Borrowing Arrangements in the most recent shareholder report. Each ratio includes the effect of all interest expense and other costs related to borrowings as follows:

Ratios of Borrowings Interest Expense to Average Net Assets	
Year Ended 7/31:	
2015	0.45%
2014	0.50
2013	0.50
2012	0.47
2011 (d)	

- (d) For the period May 25, 2011 (commencement of operations) through July 31, 2011.
- (e) Portfolio Turnover Rate is calculated based on the lesser of long-term purchases or sales (as disclosed in Note 5 Investment Transactions, in the most recent Shareholder report) divided by the average long-term market value during the period.
- * Rounds to less than \$0.01 per share.
- ** Annualized.

THE FUND

The Fund is a diversified, closed-end management investment company registered under the 1940 Act. The Fund was organized as a Massachusetts business trust on January 3, 2011, pursuant to the Declaration and governed by the laws of the Commonwealth of Massachusetts. The Fund's Common Shares are listed on the NYSE under the symbol JSD.

The following provides information about the Fund's outstanding Shares as of July 31, 2015:

Title of Class	Amount Authorized	Amount Held by the Fund or for its Account	Amount Outstanding
Common Shares	unlimited	0	10,095,286
Preferred Shares	unlimited		
Term Preferred Shares		0	0

The Fund's principal office is located at 333 West Wacker Drive, Chicago, Illinois 60606, and its telephone number is (800) 257-8787.

USE OF PROCEEDS

The net proceeds of the offering will be approximately \$34,275,150, after payment of the underwriting discounts and commissions and estimated offering costs. The Fund intends to use the net proceeds from the sale of Term Preferred Shares to increase the Fund's leverage. Any net proceeds from the sale of Term Preferred Shares will be invested in accordance with the Fund's investment objective and policies as soon as practicable after completion of the offering. The Fund currently anticipates that it will be able to invest substantially all of the net proceeds in securities that meet the Fund's investment objectives and policies within approximately two weeks after completion of the offering.

DESCRIPTION OF TERM PREFERRED SHARES

The following is a brief description of the terms of Term Preferred Shares. A complete description of the terms of Term Preferred Shares can be found in the Fund's Declaration of Trust and the Statement. These documents are filed with the Securities and Exchange Commission as exhibits to the Fund's registration statement of which this prospectus is a part and the Statement also is attached as Appendix A to the SAI. Copies may be obtained as described under Available Information.

General

At the time of issuance the Term Preferred Shares will be fully paid and non-assessable and have no preemptive, conversion, or exchange rights or rights to cumulative voting. The Fund has entered into the Credit Agreement with State Street Bank and Trust Company and has an outstanding balance. The rights of lenders, such as State Street Bank and Trust Company, and any other creditors to receive payments of interest on and repayments of principal of any borrowings are senior to the rights of holders of Term Preferred Shares and Common Shares, with respect to the payment of dividends and other distributions, and upon liquidation. The Fund may not be permitted to declare dividends and other distributions with respect to the Term Preferred Shares and Common Shares or redeem Term Preferred Shares unless at such time, the Fund meets certain asset coverage requirements and no event of default or other circumstance exists under the Credit Agreement that would limit or otherwise block payments in redemption.

Term Preferred Shares will rank equally with any other series of preferred shares of the Fund that might be issued in the future, as to payment of dividends and the distribution of the Fund's assets upon dissolution, liquidation or winding up of the affairs of the Fund. Term Preferred Shares and all other preferred shares, if any, are senior as to dividends and other distributions to the Fund's Common Shares. The Fund may issue additional series of preferred shares in the future, and any such series, together with the Term Preferred Shares, are herein collectively referred to as preferred shares.

Except in certain limited circumstances, holders of Term Preferred Shares will not receive certificates representing their ownership interest in such shares, and the Term Preferred Shares will be represented by one or more global certificates to be held by and on behalf of the Securities Depository for the Term Preferred Shares. The Depository Trust Company will act as Securities Depository with respect to the Term Preferred Shares.

Dividends and Dividend Periods

Edgar Filing: Nuveen Short Duration Credit Opportunities Fund - Form N-2/A

General. The following is a general description of dividends and dividend periods. The holders of Term Preferred Shares will be entitled to receive cumulative cash dividends and other distributions on such shares, when, as and if declared by, or under authority granted by, the Board of Trustees, out of funds legally available for payment and in preference to dividends and other distributions on Common Shares of the Fund, calculated separately for each Dividend Period for such Term Preferred Shares at the Dividend Rate for such Term Preferred Shares in effect during such Dividend Period, on an amount equal to the Liquidation Preference for such Term Preferred Shares. The Dividend Rate is computed on the basis of a 360-day year consisting of twelve

30-day months. Dividends so declared and payable will be paid to the extent permitted under state law and the Declaration of Trust, and to the extent available, in preference to and priority over any dividend declared and payable on the Common Shares.

Dividend Rate. The Dividend Rate for Term Preferred Shares is an initial rate of 1.500%. The Dividend Rate for Term Preferred Shares will be adjusted periodically as set forth below and in accordance with the Statement and/or upon the occurrence of certain events resulting in a Default (as defined below). The Dividend Rate will not in any event be lower than the initial 1.500% Dividend Rate.

The Dividend Rate payable on the Term Preferred Shares on any date will be determined with reference to the following table:

Date	Dividend Rate
From and including the Date of Original Issue to but excluding November 1, 2017	1.500%
From and including November 1, 2017 to but excluding May 1, 2018	1.750%
From and including May 1, 2018 to but excluding November 1, 2018	2.000%
From and including November 1, 2018 to but excluding May 1, 2019	2.500%
From and including May 1, 2019 to but excluding November 1, 2019	3.500%
From and including November 1, 2019 to but excluding May 1, 2020	4.000%
From and including May 1, 2020 to but excluding November 1, 2020	5.000%

Payment of Dividends and Dividend Periods. Dividends on the Term Preferred Shares will be payable monthly. The first Dividend Period for the Term Preferred Shares will commence on the Date of Original Issue of Term Preferred Shares and end on November 30, 2015 and each subsequent Dividend Period will be a calendar month (or the portion thereof occurring prior to the redemption of such Term Preferred Shares). Dividends will be paid on the Dividend Payment Date the first Business Day of the month next following a Dividend Period and upon redemption of the Term Preferred Shares. Dividends with respect to any monthly Dividend Period will be declared and paid to holders of record of Term Preferred Shares as their names shall appear on the registration books of the Fund at the close of business on the day immediately preceding such Dividend Payment Date (or, if such day is not a Business Day, the next preceding Business Day). Dividends payable on Term Preferred Shares for any period of less than a full monthly Dividend Period, including in connection with the first Dividend Period for such shares or upon any redemption of such shares on any redemption date other than on a Dividend Payment Date, will be computed on the basis of a 360-day year consisting of twelve 30-day months and the actual number of days elapsed for any period of less than one month.

On account of the foregoing provisions, only the holders of Term Preferred Shares on the record date for a Dividend Period will be entitled to receive dividends and other distributions payable with respect to such Dividend Period, and holders of Term Preferred Shares who sell shares before such a record date and purchasers of Term Preferred Shares who purchase shares after such a record date should take the effect of the foregoing provisions into account in evaluating the price to be received or paid for such Term Preferred Shares.

Increased Rate Default. The Dividend Rate will be adjusted to the Increased Rate (as defined below) for any date the Fund fails to deposit with the Redemption and Paying Agent by 12:00 noon, New York City time, on the (i) applicable Dividend Payment Date, Deposit Securities sufficient to pay the full amount of any dividend on Term Preferred Shares payable on such Dividend Payment Date (a Dividend Default) or (ii) applicable Redemption Date (as defined below), Deposit Securities sufficient to pay the full amount of the redemption price payable on such Redemption Date (a Redemption Default) and, together with a Dividend Default, referred to as a Default). A Dividend Default or a Redemption Default shall end on the Business Day on which, by 12:00 noon, New York City time, an amount equal to all unpaid dividends and any unpaid redemption price, as applicable, shall have been deposited irrevocably in trust in same-day funds with the Redemption and Paying Agent. In the case of a Default, the applicable dividend rate will be equal to the Increased Rate for each calendar day on which such Default is in effect. The Increased Rate for any such calendar day shall be equal to the applicable Dividend Rate in effect on such day plus five percent (5%) per annum.

Reporting of Increased Rate. In the event that an Increased Rate is in effect for any outstanding series of Term Preferred Shares, the Fund will, as soon as practicable (but in no event later than five Business Days following the first day that such Increased Rate is in effect), make public disclosure via press release of the effectiveness of the Increased Rate and the date on which such Increased Rate was effective. In addition, following the end of a Default triggering such Increased Rate, the Fund will, as soon as practicable (but in no event later than five Business Days following the last day that such Increased Rate is in effect) make public disclosure via press release announcing the date on which such Increased Rate ceased to be effective. For the avoidance of doubt, if the initial public disclosure via press release also includes the date on which such Increased Rate ceased to be effective, a separate press release disclosing that fact will not be required to be issued. The Fund will have no other obligation with respect to notification of any person concerning the effectiveness of the Increased Rate on such date.

Mechanics of Payment of Dividends. Not later than 12:00 noon, New York City time, on a Dividend Payment Date, the Fund is required to deposit with the Redemption and Paying Agent sufficient funds for the payment of dividends in the form of Deposit Securities. Deposit Securities will generally consist of (i) cash or cash equivalents; (ii) direct obligations of the United States or its agencies or instrumentalities that are entitled to the full faith and credit of the United States (U.S. Government Obligations); (iii) investments in money market funds registered under the 1940 Act that qualify under Rule 2a-7 under the 1940 Act and certain similar investment vehicles that invest principally in U.S. Government Obligations; or (iv) any letter of credit from a bank or other financial institution that has a credit rating from at least one NRSRO that is the highest applicable rating generally ascribed by such NRSRO to bank deposits or short-term debt of banks or such other financial institutions, in each case either that is a demand obligation payable to the holder on any Business Day or that has a maturity date, mandatory redemption date or mandatory payment date, preceding the relevant Redemption Date, Dividend Payment Date or other payment date.

All Deposit Securities paid to the Redemption and Payment Agent for the payment of dividends will be held in trust for the payment of such dividends to the holders of Term Preferred Shares. Dividends will be paid by the Redemption and Payment Agent to the holders of Term Preferred Shares as their names appear on the registration books of the Fund. Dividends that are in arrears for any past Dividend Period may be declared and paid at any time, without reference to any regular Dividend Payment Date. Such payments are made to holders of Term Preferred Shares as their names appear on the registration books of the Fund on such date, not exceeding 15 calendar days preceding the payment date thereof, as may be fixed by the Board of Trustees. Any payment of dividends in arrears will first be credited against the earliest accumulated but unpaid dividends. No interest or sum of money in lieu of interest will be payable in respect of any dividend payment or payments on any Term Preferred Shares which may be in arrears. See Restrictions on Dividend, Redemption and Other Payments.

Upon failure to pay dividends for at least two years, the holders of Term Preferred Shares will acquire certain additional voting rights. See Voting Rights below. Such rights shall be the exclusive remedy of the holders of Term Preferred Shares upon any failure to pay dividends on Term Preferred Shares.

Restrictions on Dividend, Redemption and Other Payments

No full dividends and other distributions will be declared or paid on Term Preferred Shares for any Dividend Period, or a part of a Dividend Period, unless the full cumulative dividends and other distributions due through the most recent dividend payment dates for all outstanding preferred shares (including Term Preferred Shares) have been, or contemporaneously are, declared and paid through the most recent dividend payment dates for each preferred share. If full cumulative dividends and other distributions due have not been paid on all outstanding preferred shares of any series, any dividends and other distributions being declared and paid on Term Preferred Shares will be declared and paid as nearly pro rata as possible in proportion to the respective amounts of dividends and other distributions accumulated but unpaid on the shares of each such series of preferred shares on the relevant dividend payment date. No holders of Term Preferred Shares will be entitled to any dividends and other distributions in excess of full cumulative dividends and other distributions as provided in the Statement.

For so long as any Term Preferred Shares are outstanding, the Fund will not: (x) declare or pay any dividend or other distribution (other than a dividend or distribution paid in Common Shares) in respect of the Common Shares, (y) call for redemption, redeem, purchase or otherwise acquire for consideration any Common Shares, or (z) pay any proceeds of the liquidation of the Fund in respect of the Common Shares, unless, in each case, (A) immediately thereafter, the Fund shall be in compliance with the 200% asset coverage limitations set forth under the 1940 Act after deducting the amount of such dividend or other distribution or redemption or purchase price or liquidation proceeds, (B) all cumulative dividends and other distributions of shares of all series of preferred shares of the Fund ranking on a parity with the Term Preferred Shares due on or prior to the date of the applicable dividend, distribution, redemption, purchase or acquisition shall have been declared and paid (or shall have been declared and sufficient funds or Deposit Securities as permitted by the terms of such preferred shares for the payment thereof shall have been deposited irrevocably with the applicable paying agent) and (C) the Fund shall have deposited Deposit Securities with the Redemption and Paying Agent in accordance with the requirements described in the Statement with respect to outstanding preferred shares of any series to be redeemed pursuant to a Term Redemption or Corrective Action resulting from the failure to comply with the Asset Coverage requirements described below for which a Notice of Redemption shall have been given or shall have been required to be given in accordance with the terms described in the Statement on or prior to the date of the applicable dividend, distribution, redemption, purchase or acquisition.

Except as required by law, the Fund will not redeem any Term Preferred Shares unless all accumulated and unpaid dividends and other distributions on all outstanding Term Preferred Shares and other series of preferred shares ranking on a parity with the Term Preferred Shares with respect to dividends and other distributions for all applicable past dividend periods (whether or not earned or declared by the Fund) (x) shall have been or are contemporaneously paid or (y) shall have been or are contemporaneously declared and Deposit Securities or sufficient funds (in accordance with the terms of such preferred shares) for the payment of such dividends and other distributions shall have been or are contemporaneously deposited with the Redemption and Paying Agent or other applicable paying agent, provided, however, that the foregoing shall not prevent the purchase or acquisition of outstanding Term Preferred Shares pursuant to an otherwise lawful purchase or exchange offer made on the same terms to holders of all outstanding Term Preferred Shares and any other series of preferred shares for which all accumulated and unpaid dividends and other distributions have not been paid.

Notwithstanding the 1940 Act's requirements, as described below, Term Preferred Shares have an Asset Coverage (as defined for purposes of the Term Preferred Shares) of at least 225% instead of 200%. Under the 1940 Act, the Fund may not (i) declare any dividend with respect to any preferred shares if, at the time of such declaration (and after giving effect thereto), asset coverage with respect to any borrowings of the Fund that are senior securities representing indebtedness (as defined in the 1940 Act), would be less than 200% (or such other percentage as may in the future be specified in or under the 1940 Act as the minimum asset coverage for senior securities representing indebtedness of a closed-end investment company as a condition of declaring dividends on its preferred shares) or (ii) declare any other distribution on the preferred shares or purchase or redeem preferred shares if at the time of the declaration or redemption (and after giving effect thereto), asset coverage with respect to such borrowings that are senior securities representing indebtedness would be less than 300% (or such higher percentage as may in the future be specified in or under the 1940 Act as the minimum asset coverage for senior securities representing indebtedness of a closed-end investment company as a condition of declaring distributions, purchases or redemptions of its shares). Senior securities representing indebtedness generally means any bond, debenture, note or similar obligation or instrument constituting a security (other than shares of capital stock) and evidencing indebtedness and could include the Fund's obligations under any borrowings. For purposes of determining asset coverage for senior securities representing indebtedness in connection with the payment of dividends or other distributions on or purchases or redemptions of stock, the term senior security does not include any promissory note or other evidence of indebtedness issued in consideration of any loan, extension or renewal thereof, made by a bank or other person and privately arranged, and not intended to be publicly distributed. The term senior security also does not include any such promissory note or other evidence of indebtedness in any case where such a loan is for temporary purposes only and in an amount not exceeding 5% of the value of the total assets of the Fund at the time when the loan is made; a loan is presumed under the 1940

Act to be for temporary purposes if it is repaid within 60 calendar days and is not extended or renewed; otherwise it is presumed not to be for temporary purposes. For purposes of determining whether the 200% and 300% statutory asset coverage requirements described above apply in connection with dividends or distributions on or purchases or redemptions of preferred shares, such asset coverages may be calculated on the basis of values calculated as of a time within 48 hours (only including Business Days) next preceding the time of the applicable determination.

Asset Coverage

If the Fund fails to maintain Asset Coverage of at least 225% as of the close of business on each Business Day, and such failure is not cured as of the Asset Coverage Cure Date, the Fund will, to the extent permitted by the 1940 Act, and Massachusetts law and pursuant to the terms and conditions of any credit agreement, loan agreement, credit facility or other agreement representing borrowings of the Fund that is in effect at such time, be required to take Corrective Action as provided below. Asset Coverage means asset coverage of a class of senior security which is a stock, as defined for purposes of Section 18(h) of the 1940 Act as in effect on the date of the Statement, determined on the basis of values calculated as of a time within 48 hours (only including Business Days) next preceding the time of such determination. For purposes of this determination, no Term Preferred Shares or other preferred shares shall be deemed to be outstanding for purposes of the computation of Asset Coverage if, prior to or concurrently with such determination, sufficient Deposit Securities or other sufficient funds (in accordance with the terms of such preferred shares) to pay the full redemption price for such preferred shares (or the portion thereof to be redeemed) shall have been irrevocably deposited in trust with the paying agent for such preferred shares and the requisite notice of redemption for such preferred shares (or the portion thereof to be redeemed) shall have been given. In such event, the Deposit Securities or other sufficient funds so deposited shall not be included as assets of the Fund for purposes of the computation of Asset Coverage.

Redemption

Term Redemption. The Fund is required to redeem (the *Term Redemption*) all of the Term Preferred Shares on November 1, 2020 (the *Term Redemption Date*), at a redemption price equal to the Liquidation Preference per share plus an amount equal to accumulated but unpaid dividends thereon (whether or not earned or declared but excluding interest thereon) to (but excluding) the Term Redemption Date (the *Term Redemption Price*) out of funds legally available therefore and to the extent permitted by any credit agreement in effect on such date.

Asset Coverage and Corrective Action. If the Fund fails to have Asset Coverage of at least 225% as provided in the Statement and such failure is not cured as of the close of business on the Asset Coverage Cure Date, the Fund will, to the extent permitted by the 1940 Act, and Massachusetts law and pursuant to the terms and conditions of any credit agreement, loan agreement, credit facility or other agreement representing borrowings of the Fund that is in effect at such time, by the close of business on the Business Day next following such Asset Coverage Cure Date, determine (i) the Corrective Action (as defined below) to be taken to cause the Fund to regain Asset Coverage; (ii) if applicable, the identity and market value of assets of the Fund to be sold in connection with a Corrective Action; and (iii) the date, which date will not be later than 20 Business Days following such Asset Coverage Cure Date, on which the Fund will regain Asset Coverage. As used herein, *Corrective Action* means, for the purpose of allowing the Fund to comply with the Asset Coverage requirements, (a) the irrevocable deposit of Deposit Securities with the Redemption and Paying Agent to fund the redemption of Term Preferred Shares; (b) the repayment of indebtedness of the Fund; (c) corrective trades involving Fund assets; or (d) any combination of the actions described in clauses (a) through (c) above. In the event that any Term Preferred Shares are to be redeemed, the Fund will redeem such Term Preferred Shares out of funds legally available therefore and to the extent permitted by any credit agreement in effect on such date at a price per share equal to the liquidation price of the applicable Term Preferred Shares, which is equal to the Liquidation Preference of such Term Preferred Share plus accumulated but unpaid dividends and other distributions thereon (whether or not earned or declared but excluding interest thereon) to (but excluding) the

date fixed for redemption by the Board of Trustees (the *Asset Coverage Redemption Price*). Corrective trades described above may be made at a time when it would be disadvantageous for the Fund to do so. In the event that any Term Preferred Shares are redeemed to regain compliance with the Asset Coverage requirements, the Fund will effect a redemption on the date fixed by the Fund, which date will not be later than 20 calendar days after the Asset Coverage Cure Date, except that if the Fund does not have funds legally available for the redemption of all of the required number of Term Preferred Shares and other preferred shares which have been designated to be redeemed or the Fund otherwise is unable to effect such redemption on or prior to 20 calendar days after the Asset Coverage Cure Date, the Fund will redeem those Term Preferred Shares and other preferred shares, if any, which it was unable to redeem on the earliest practicable date on which it is able to effect such redemption.

If fewer than all of the outstanding Term Preferred Shares are to be redeemed pursuant to the Asset Coverage mandatory redemption provisions above, the Term Preferred Shares to be redeemed will be selected either (i) pro rata among Term Preferred Shares, (ii) by lot or (iii) in such other manner as the Board of Trustees may determine to be fair and equitable, in each case, in accordance with the 1940 Act; provided, in each such case, that such method of redemption shall be subject to any applicable procedures of the Security Depository.

Optional Redemption. On any Business Day (such Business Day, an *Optional Redemption Date*), the Fund may redeem out of funds legally available therefore and to the extent permitted by any credit agreement in effect on such date in whole, or from time to time, in part outstanding Term Preferred Shares, at a redemption price equal to the Liquidation Preference, *plus* an amount equal to all unpaid dividends and other distributions accumulated to (but excluding) the *Optional Redemption Date* (whether or not earned or declared by the Fund, but excluding interest thereon), *plus* the applicable *Optional Redemption Premium* per share (as calculated below) (the *Optional Redemption Price*). The *Optional Redemption Premium* with respect to each Term Preferred Share will be an amount equal to:

if the *Optional Redemption Date* occurs on or after November 16, 2015, and prior to November 1, 2016, 0.5% of the Liquidation Preference; or

if the *Optional Redemption Date* occurs on or after November 1, 2016, 0.00% of the Liquidation Preference.

If fewer than all of the outstanding Term Preferred Shares are to be redeemed pursuant to the optional redemption provisions above, the Term Preferred Shares to be redeemed will be selected either (i) pro rata among Term Preferred Shares, (ii) by lot or (iii) in such other manner as the Board of Trustees may determine to be fair and equitable, in each case, in accordance with the 1940 Act; provided, in each such case, that such method of redemption shall be subject to any applicable procedures of the Security Depository. Subject to the provisions of the Statement and applicable law, the Board of Trustees will have the full power and authority to prescribe the terms and conditions upon which Term Preferred Shares will be redeemed from time to time.

Redemption Procedures. The Fund will file a notice of its intention to redeem with the Securities and Exchange Commission so as to provide the 30 calendar day notice period contemplated by Rule 23c-2 under the 1940 Act, or such shorter notice period as may be permitted by the Securities and Exchange Commission or its staff.

If the Fund shall determine or be required to redeem, in whole or in part, Term Preferred Shares, it will deliver a notice of redemption (a *Notice of Redemption*) by overnight delivery, by first class mail, postage prepaid or by electronic means to the holders of such Term Preferred Shares to be redeemed, or request the Redemption and Paying Agent, on behalf of the Fund, to promptly do so by overnight delivery, by first class mail or by electronic means. A *Notice of Redemption* will be provided not more than 45 calendar days prior to the date fixed for redemption and not less than five calendar days prior to such date set forth in such *Notice of Redemption* (the *Redemption Date*). Each *Notice of Redemption* will state: (i) the *Redemption Date*; (ii) the series of and number of Term Preferred Shares to be redeemed; (iii) the CUSIP number(s) of such Term Preferred Shares; (iv) the applicable *Redemption Price* of Term Preferred Shares to be redeemed on a per share basis; (v) if applicable, the place or places where the certificate(s) for such Term Preferred Shares (properly

endorsed or assigned for transfer, if the Board of Trustees will so require and the Notice of Redemption states) are to be surrendered for payment of the redemption price; (vi) that dividends on Term Preferred Shares to be redeemed will cease to accumulate from and after the redemption date; and (vii) the provisions of the Statement under which such redemption is made. If fewer than all Term Preferred Shares held by any holder are to be redeemed, the Notice of Redemption mailed to such holder shall also specify the number of Term Preferred Shares to be redeemed from such holder or the method of determining such number. The Fund may provide in any Notice of Redemption relating to an optional redemption contemplated to be effected pursuant to the Statement that such redemption is subject to one or more conditions precedent and that the Fund will not be required to effect such redemption unless each such condition has been satisfied. No defect in any Notice of Redemption or delivery thereof will affect the validity of redemption proceedings except as required by applicable law.

If the Fund gives a Notice of Redemption, then at any time from and after the giving of such Notice of Redemption and prior to 12:00 noon, New York City time, on the Redemption Date (so long as any conditions precedent to such redemption have been met or waived by the Fund), the Fund will (i) irrevocably deposit with the Redemption and Paying Agent Deposit Securities having an aggregate market value at the time of deposit no less than the redemption price of the Term Preferred Shares to be redeemed on the Redemption Date and (ii) give the Redemption and Paying Agent irrevocable instructions and authority to pay the applicable redemption price to the holders of Term Preferred Shares called for redemption on the Redemption Date. The Fund may direct the Redemption and Paying Agent with respect to the investment of any Deposit Securities consisting of cash so deposited prior to the Redemption Date, provided that the proceeds of any such investment will be available at the opening of business on the Redemption Date as same day funds. Notwithstanding the foregoing, if the Redemption Date is the Term Redemption Date, then such irrevocable deposit of Deposit Securities (which may come in whole or in part from the Term Redemption Liquidity Account described below) will be made no later than 15 calendar days prior to the Term Redemption Date.

Following the giving of a Notice of Redemption, upon the date of the irrevocable deposit of Deposit Securities by the Fund for purposes of redemption of Term Preferred Shares, all rights of the holders of Term Preferred Shares so called for redemption shall cease and terminate except the right of the holders thereof to receive the Term Redemption Price, Asset Coverage Redemption Price or Optional Redemption Price thereof, as applicable (any of the foregoing referred to herein as the Redemption Price), and such Term Preferred Shares shall no longer be deemed outstanding for any purpose whatsoever (other than the transfer thereof prior to the applicable Redemption Date and other than the accumulation of dividends and other distributions thereon in accordance with the terms of the Term Preferred Shares up to (but excluding) the applicable Redemption Date). The Fund will be entitled to receive, promptly after the Redemption Date, any Deposit Securities in excess of the aggregate Redemption Price of Term Preferred Shares called for redemption on the Redemption Date. Any Deposit Securities so deposited that are unclaimed at the end of 90 calendar days from the Redemption Date will, to the extent permitted by law, be repaid to the Fund, after which the holders of Term Preferred Shares so called for redemption shall look only to the Fund for payment of the Redemption Price. The Fund will be entitled to receive, from time to time after the Redemption Date, any interest on the Deposit Securities so deposited.

On or after a Redemption Date, each holder of Term Preferred Shares in certificated form (if any) that are subject to redemption will surrender the certificate(s) evidencing such Term Preferred Shares to the Fund at the place designated in the Notice of Redemption and will then be entitled to receive the Redemption Price, without interest, and in the case of a redemption of fewer than all Term Preferred Shares represented by such certificate(s), a new certificate representing Term Preferred Shares that were not redeemed.

Notwithstanding the other redemption provisions described herein, except as otherwise required by law, (i) the Fund will not redeem any Term Preferred Shares unless all accumulated and unpaid dividends and other distributions on all outstanding Term Preferred Shares and shares of other series of preferred shares ranking on a parity with the Term Preferred Shares with respect to dividends and other distributions for all applicable past dividend periods (whether or not earned or declared by the Fund) (x) shall have been or are contemporaneously

paid or (y) shall have been or are contemporaneously declared and Deposit Securities or sufficient funds or securities (in accordance with the terms of such preferred shares) for the payment of such dividends and other distributions shall have been or are contemporaneously deposited with the Redemption and Paying Agent as set forth in the Statement, and (ii) if, as of the Redemption Date for Term Preferred Shares, any redemption required with respect to any outstanding preferred shares (including shares of other series of Term Preferred Shares) ranking on a parity with such Term Preferred Shares (x) shall not have been made on the redemption date therefor or is not contemporaneously made on the Redemption Date or (y) shall not have been or is not contemporaneously noticed and Deposit Securities or sufficient funds or securities (in accordance with the terms of such Term Preferred Shares or other preferred shares) for the payment of such redemption shall not have been or are not contemporaneously deposited with the Redemption and Paying Agent for such other Term Preferred Shares or other preferred shares in accordance with the terms of such other Term Preferred Shares or other preferred shares, then any redemption required hereunder shall be made as nearly as possible on a pro rata basis with all other preferred shares then required to be redeemed (or in respect of which securities or funds for redemption are required to be deposited) in accordance with the terms of such preferred shares, and the number of shares of such Term Preferred Shares to be redeemed from the respective holders shall be determined pro rata among the outstanding shares of such Term Preferred Shares or in such other manner as the Board of Trustees may determine to be fair and equitable and that is in accordance with the 1940 Act; provided, in each such case, that such method of redemption shall be subject to any applicable procedures established by the Securities Depository, and provided, further, however, that the Fund will not be prevented from the purchase or acquisition of outstanding Term Preferred Shares pursuant to an otherwise lawful purchase or exchange offer made on the same terms to holders of all outstanding Term Preferred Shares and any other series of preferred shares for which all accumulated and unpaid dividends and other distributions have not been paid.

If any redemption for which a Notice of Redemption has been provided is not made (i) by reason of the absence of legally available funds of the Fund in accordance with the Declaration of Trust of the Fund, the Statement and applicable law or (ii) pursuant to the terms and conditions of any credit agreement in effect on the date on which such redemption is scheduled, such redemption shall be made as soon as practicable to the extent such funds become available or as permitted by such credit agreement. No Redemption Default will be deemed to have occurred if the Fund has failed to deposit in trust with the Redemption and Paying Agent the applicable Redemption Price with respect to any shares where (1) the Notice of Redemption relating to such redemption provided that such redemption was subject to one or more conditions precedent and (2) any such condition precedent has not been satisfied at the time or times and in the manner specified in such Notice of Redemption. Notwithstanding the fact that a Notice of Redemption has been provided with respect to any Term Preferred Shares, dividends will be declared and paid on such Term Preferred Shares in accordance with their terms regardless of whether Deposit Securities for the payment of the Redemption Price of such Term Preferred Shares shall have been deposited in trust with the Redemption and Paying Agent for that purpose.

Notwithstanding anything to the contrary in the Statement or in any Notice of Redemption, if the Fund has not redeemed Term Preferred Shares on the applicable Redemption Date, the holders of the Term Preferred Shares subject to redemption shall continue to be entitled to (a) receive dividends on such Term Preferred Shares accumulated at the Dividend Rate for the period from, and including, such Redemption Date through, but excluding, the date on which such Term Preferred Shares are actually redeemed and such dividends, to the extent accumulated, but unpaid, during such period (whether or not earned or declared but without interest thereon) will be included in the Redemption Price for such Term Preferred Shares and (b) transfer the Term Preferred Shares prior to the date on which such Term Preferred Shares are actually redeemed, provided that all other rights of holders of such Term Preferred Shares will have terminated upon the date of deposit of Deposit Securities in accordance with the Statement.

The Fund may, in its sole discretion and without a shareholder vote, modify the redemption procedures with respect to notification of redemption for the Term Preferred Shares, provided that such modification does not materially and adversely affect the holders of Term Preferred Shares or cause the Fund to violate any applicable law, rule or regulation.

Term Redemption Liquidity Account and Liquidity Requirement

On or prior to May 1, 2020 (the Liquidity Account Initial Date), the Fund will identify and designate on its books and records or otherwise in accordance with the Fund's normal procedures (the Term Redemption Liquidity Account) Deposit Securities or any other security or investment owned by the Fund that is assigned a rating by any of Moody's, Fitch or Standard & Poor's Rating Services, a Standard & Poor's Financial Services LLC business (Standard & Poor's or S&P), of not less than B3 by Moody's, B- by Standard & Poor's, B- by Fitch, or an equivalent rating by any other NRSRO (or any such rating's future equivalent) (each a Liquidity Account Investment and collectively the Liquidity Account Investments) with a market value equal to at least 110% of the Term Redemption Amount (as defined below) with respect to such Term Preferred Shares. The Term Redemption Amount for Term Preferred Shares is equal to the Term Redemption Price to be paid on the Term Redemption Date, based on the number of Term Preferred Shares then outstanding and the Dividend Rate that will be in effect for the period of time beginning on the date of the creation of the Term Redemption Liquidity Account for such Term Preferred Shares and ending on the Term Redemption Date for such Term Preferred Shares. If, on any date after the Liquidity Account Initial Date, the aggregate market value of the Liquidity Account Investments included in the Term Redemption Liquidity Account for Term Preferred Shares as of the close of business on any Business Day is less than 110% of the Term Redemption Amount, then the Fund will cause Nuveen Fund Advisors to take all such necessary actions, including identifying and designating additional assets of the Fund as Liquidity Account Investments, so that the aggregate market value of the Liquidity Account Investments included in the Term Redemption Liquidity Account is at least equal to 110% of the Term Redemption Amount not later than the close of business on the next succeeding Business Day. With respect to assets of the Fund identified and designated as Liquidity Account Investments with respect to the Term Preferred Shares, Nuveen Fund Advisors, on behalf of the Fund, will be entitled to release any Liquidity Account Investments from such identification and designation and to substitute therefor other Liquidity Account Investments, so long as (i) the assets of the Fund identified and designated as Liquidity Account Investments at the close of business on such date have a market value equal to at least 110% of the Term Redemption Amount and (ii) the assets of the Fund designated and segregated in accordance with the Custodian's normal procedures, from other assets of the Fund, and identified as Deposit Securities at the close of business on such date have a market value at least equal to the Liquidity Requirement (if any) (as set forth below) that is applicable to such date. The Fund will not permit any lien, security interest or encumbrance to be created or permitted to exist on or in respect of any Liquidity Account Investments included in the Term Redemption Liquidity Account, other than liens, security interests or encumbrances arising by operation of law.

The market value of the Deposit Securities held in the Term Redemption Liquidity Account for the Term Preferred Shares, from and after the 15th day of the calendar month (or, if such day is not a Business Day, the next succeeding Business Day) that is the number of months preceding the calendar month in which the Term Redemption Date occurs in each case specified in the table set forth below, will not be less than the percentage of the Term Redemption Amount for the Term Preferred Shares set forth below opposite such number of months (the Liquidity Requirement):

Number of Months Preceding Month of Term Redemption Date	Value of Deposit Securities as Percentage of Term Redemption Amount
5	20%
4	40%
3	60%
2	80%
1	100%

If the aggregate market value of the Deposit Securities included in the Term Redemption Liquidity Account for the Term Preferred Shares as of the close of business on any Business Day is less than the Liquidity Requirement for such Business Day, the Fund will cause the segregation of additional or substitute Deposit Securities in respect of the Term Redemption Liquidity Account, so that the aggregate market value of the

Deposit Securities included in the Term Redemption Liquidity Account is at least equal to the Liquidity Requirement not later than the close of business on the next succeeding Business Day.

The Deposit Securities included in the Term Redemption Liquidity Account may be applied by the Fund, in its discretion, towards payment of the Term Redemption Price. Upon the deposit by the Fund with the Redemption and Paying Agent of Deposit Securities having an initial combined market value sufficient to effect the redemption of the Term Preferred Shares on the Term Redemption Date, the requirement of the Fund to maintain the Term Redemption Liquidity Account as described above will lapse and be of no further force and effect.

Liquidation Rights

In the event of any liquidation, dissolution or winding up of the affairs of the Fund, whether voluntary or involuntary, the holders of Term Preferred Shares will be entitled to receive out of the assets of the Fund available for distribution to shareholders, after satisfying claims of creditors but before any distribution or payment shall be made in respect of the Common Shares, a liquidation distribution equal to the Liquidation Preference of \$1,000 per share, plus an amount equal to all unpaid dividends and other distributions accumulated to (but excluding) the date fixed for such distribution or payment (whether or not earned or declared by the Fund, but without interest thereon), and such holders shall be entitled to no further participation in any distribution or payment in connection with any such liquidation, dissolution or winding up.

If, upon any liquidation, dissolution or winding up of the affairs of the Fund, whether voluntary or involuntary, the assets of the Fund available for distribution among the holders of all Term Preferred Shares, and any other outstanding preferred shares, shall be insufficient to permit the payment in full to such holders of Term Preferred Shares of the Liquidation Preference plus accumulated and unpaid dividends and other distributions and the amounts due upon liquidation with respect to such other preferred shares, then the available assets shall be distributed among the holders of such Term Preferred Shares and such other series of preferred shares ratably in proportion to the respective preferential liquidation amounts to which they are entitled. In connection with any liquidation, dissolution or winding up of the affairs of the Fund whether voluntary or involuntary, unless and until the Liquidation Preference on each outstanding Term Preferred Share plus accumulated and unpaid dividends and other distributions has been paid in full to the holders of Term Preferred Shares, no dividends, distributions or other payments will be made on, and no redemption, purchase or other acquisition by the Fund will be made by the Fund in respect of, the Common Shares.

Neither the sale of all or substantially all of the property or business of the Fund, nor the merger, consolidation or reorganization of the Fund into or with any other business or statutory trust, corporation or other entity, nor the merger, consolidation or reorganization of any other business or statutory trust, corporation or other entity into or with the Fund will be a dissolution, liquidation or winding up, whether voluntary or involuntary, for purposes of the provisions relating to liquidation set forth in the Statement.

Voting Rights

Except as otherwise provided in the Fund's Declaration of Trust, the Statement, or as otherwise required by applicable law, each holder of Term Preferred Shares will be entitled to one vote for each Term Preferred Share held by such holder on each matter submitted to a vote of shareholders of the Fund. The holders of outstanding preferred shares, including the Term Preferred Shares, will vote together with holders of Common Shares of the Fund as a single class. Under applicable rules of the NYSE, the Fund is currently required to hold annual meetings of shareholders.

In addition, the holders of outstanding preferred shares, including the Term Preferred Shares, will be entitled, as a class, to the exclusion of the holders of all other securities and classes of Common Shares, to elect two trustees of the Fund at all times. The holders of outstanding Common

Edgar Filing: Nuveen Short Duration Credit Opportunities Fund - Form N-2/A

Shares and preferred shares, including Term Preferred Shares, voting together as a single class, will elect the balance of the trustees of the Fund.

Notwithstanding the foregoing, if (i) at the close of business on any dividend payment date for dividends on any outstanding preferred share, including any outstanding Term Preferred Shares, accumulated dividends (whether or not earned or declared) on the preferred shares, including the Term Preferred Shares, equal to at least two full year's dividends shall be due and unpaid and sufficient cash or specified securities shall not have been deposited with the Redemption and Paying Agent or other applicable paying agent for the payment of such accumulated dividends; or (ii) at any time holders of any preferred shares are entitled under the 1940 Act to elect a majority of the trustees of the Fund (a period when either of the foregoing conditions exists, a Voting Period), then the number of members constituting the Board of Trustees will automatically be increased by the smallest number that, when added to the two trustees elected exclusively by the holders of preferred shares, including the Term Preferred Shares, as described above, would constitute a majority of the Board as so increased by such smallest number; and the holders of the preferred shares, including the Term Preferred Shares, will be entitled as a class on a one-vote-per-share basis, to elect such additional trustees. The terms of office of the persons who are trustees at the time of that election will not be affected by the election of the additional trustees. If the Fund thereafter shall pay, or declare and set apart for payment, in full all dividends payable on all outstanding preferred shares, including Term Preferred Shares, for all past dividend periods, or the Voting Period is otherwise terminated, (i) the voting rights stated above shall cease, subject always, however, to the reversion of such voting rights in the holders of preferred shares upon the further occurrence of any of the events described herein, and (ii) the terms of office of all of the additional trustees so elected will terminate automatically. Any preferred shares, including Term Preferred Shares, and any preferred shares issued after the date hereof will vote with Term Preferred Shares as a single class on the matters described above, and the issuance of any other preferred shares, may reduce the voting power of the holders of Term Preferred Shares. A Voting Period will terminate when all of the conditions described above cease to exist.

As soon as practicable after the accrual of any right of the holders of preferred shares to elect additional trustees as described above, the Fund will call a special meeting of such holders and notify the Redemption and Paying Agent and/or such other person as is specified in the terms of such preferred shares to receive notice, (i) by mailing or delivery by electronic means or (ii) in such other manner and by such other means as are specified in the terms of such Preferred Shares, a notice of such special meeting to such holders, such meeting to be held not less than 10 nor more than 30 calendar days after the date of the delivery by electronic means or mailing of such notice. If the Fund fails to call such a special meeting, it may be called at the expense of the Fund by any such holder on like notice. The record date for determining the holders of preferred shares entitled to notice of and to vote at such special meeting shall be the close of business on the fifth Business Day preceding the calendar day on which such notice is mailed or otherwise delivered. At any such special meeting and at each meeting of holders of preferred shares held during a Voting Period at which trustees are to be elected, such holders, voting together as a class (to the exclusion of the holders of all other securities and classes of capital stock of the Fund), will be entitled to elect the number of additional trustees prescribed above on a one-vote-per-share basis.

Except as otherwise permitted by the terms of the Statement, so long as any Term Preferred Shares are outstanding, the Fund will not, without the affirmative vote of the holders of at least a majority of Term Preferred Shares of all series outstanding at the time, voting as a separate class, amend, alter or repeal the provisions of the Declaration of Trust or the Statement, whether by merger, consolidation or otherwise, so as to (i) alter or abolish any preferential right of such Term Preferred Share, or (ii) create, alter or abolish any right in respect of redemption of such Term Preferred Share; provided that a division, stock split or reverse stock split of a Term Preferred Share will not, by itself, be deemed to have any of the effects set forth in clause (i) or (ii) above. So long as any Term Preferred Shares are outstanding, the Fund will not, without the affirmative vote or consent of at least $66\frac{2}{3}\%$ of the holders of Term Preferred Shares outstanding at the time, voting as a separate class, file a voluntary application for relief under United States bankruptcy law or any similar application under state law for so long as the Fund is solvent and does not foresee becoming insolvent. No vote of the holders of Common Shares will be required to amend, alter or repeal the provisions of the Statement, including any appendix.

Except as otherwise permitted by the terms of the Statement, and subject to the paragraph below, so long as any Term Preferred Shares are outstanding, the Fund will not, without the affirmative vote or consent of the

holders of at least a majority of the Term Preferred Shares outstanding at the time, voting as a separate class, amend, alter or repeal: (i) the provisions of the appendix to the Statement relating to a series of Term Preferred Shares, whether by merger, consolidation or otherwise, so as to materially and adversely affect any preference, right or power set forth in such appendix of the series of Term Preferred Shares or the holders thereof; or (ii) the provisions of the appendix of the Statement for a series of Term Preferred Shares setting forth the Liquidation Preference for such Term Preferred Shares; provided that a division, stock split or reverse stock split of a Term Preferred Share shall not, by itself, be deemed to violate clause (i) or (ii) above. For purposes of clause (i) above, no matter shall be deemed to materially and adversely affect any preference, right or power of a Term Preferred Share or the holder thereof unless such matter (i) alters or abolishes any preferential right of such Term Preferred Share, or (ii) creates, alters or abolishes any right in respect of redemption of such Term Preferred Share. For the avoidance of doubt, no vote of the holders of Common Shares will be required to amend, alter or repeal the provisions of the Statement, including any appendix to the Statement.

So long as any Term Preferred Shares are outstanding, the Fund will not, without the unanimous vote or consent of the holders of such Term Preferred Shares outstanding at the time, voting as a separate class, amend, alter or repeal the provisions of the appendix to the Statement relating to such Term Preferred Shares, which provisions obligate the Fund to (i) pay the Term Redemption Price on the Term Redemption Date for Term Preferred Shares, (ii) accumulate dividends at the Dividend Rate (as set forth in the Statement and the applicable appendix to the Statement) for the Term Preferred Shares or (iii) pay the Optional Redemption Premium (if any) provided for in the appendix to the Statement for such Term Preferred Shares; provided that a division, stock split or reverse stock split of a Term Preferred Share shall not, by itself, be deemed to violate clause (i), (ii) or (iii) above. For the avoidance of doubt, no vote of the holders of Common Shares will be required to amend, alter or repeal the provisions of the Statement, including any appendix to the Statement.

Unless a higher percentage is provided for in the Declaration of Trust of the Fund, (i) the affirmative vote of the holders of at least a majority of the outstanding preferred shares, including the Term Preferred Shares outstanding at the time, voting as a separate class, will be required (i) to approve any conversion of the Fund from a closed-end to an open-end investment company, (ii) to approve any plan of reorganization (as such term is defined in Section 2(a)(33) of the 1940 Act) adversely affecting such preferred shares or (iii) to approve any other action requiring a vote of security holders of the Fund under Section 13(a) of the 1940 Act. For purposes of the foregoing, the vote of a majority of the outstanding preferred shares means the vote at an annual or special meeting duly called of (i) 67% or more of such shares present at a meeting, if the holders of more than 50% of such shares are present or represented by proxy at such meeting, or (ii) more than 50% of such shares, whichever is less.

For purposes of determining any rights of the holders of Term Preferred Shares to vote on any matter, whether such right is created by the Statement, by the provisions of the Declaration of Trust, by statute or otherwise, no holder of Term Preferred Shares will be entitled to vote any Term Preferred Shares and no Term Preferred Shares will be deemed to be outstanding for the purpose of voting or determining the number of shares required to constitute a quorum if, prior to or concurrently with the time of determination of shares entitled to vote or the time of the actual vote on the matter, as the case may be, the requisite Notice of Redemption with respect to such Term Preferred Shares will have been given in accordance with the Statement, and Deposit Securities for the payment of the Redemption Price of such Term Preferred Shares will have been deposited in trust with the Redemption and Paying Agent for that purpose. No Term Preferred Shares held (legally or beneficially) by the Fund will have any voting rights or be deemed to be outstanding for voting or for calculating the voting percentage required on any other matter or other purposes.

Notwithstanding anything herein to the contrary, the Rating Agency Guidelines discussed below, as they may be amended from time to time by the respective Rating Agency, may be amended by the respective Rating Agency without the vote, consent or approval of the Fund, the Board of Trustees and any holder of preferred shares, including any Term Preferred Shares, or any other shareholder of the Fund.

Unless otherwise required by law or the Declaration of Trust, holders of Term Preferred Shares will not have any relative rights or preferences or other special rights with respect to voting other than those specifically set forth in the Voting Rights section of the Statement. The holders of Term Preferred Shares will have no rights to cumulative voting. In the event that the Fund fails to declare or pay any dividends on Term Preferred Shares, the exclusive remedy of the holders will be the right to vote for additional trustees as discussed above; provided that the foregoing does not affect the obligation of the Fund to accumulate and, if permitted by applicable law, the Declaration of Trust and the Statement, pay dividends at the Increased Rate as discussed above.

Rating Agencies

The Fund will use commercially reasonable efforts to cause at least one Rating Agency with respect to the Term Preferred Shares to issue long term credit rating with respect to Term Preferred Shares for so long as such Term Preferred Shares are outstanding. The Board of Trustees has initially designated each of Moody's and Fitch as a Rating Agency. The Fund will use commercially reasonable efforts to comply with any applicable Rating Agency Guidelines. Rating Agency Guidelines are guidelines of any Rating Agency, as they may be amended or modified from time to time, compliance with which is required to cause such Rating Agency to continue to issue a rating with respect to Term Preferred Shares for so long as such Term Preferred Shares are outstanding. If a Rating Agency ceases to rate securities of closed-end management investment companies generally, the Board of Trustees will terminate the designation of such Rating Agency as a Rating Agency. The Board of Trustees may elect to terminate the designation of any Rating Agency previously designated by the Board of Trustees to act as a Rating Agency for purposes of the Statement so long as either (i) immediately following such termination, there would be at least one Rating Agency with respect to the Term Preferred Shares or (ii) it replaces the terminated Rating Agency with another NRSRO and provides notice thereof to the holders of Term Preferred Shares; provided that such replacement will not occur unless such replacement Rating Agency will have at the time of such replacement (i) published a rating for the Term Preferred Shares and (ii) entered into an agreement with the Fund to continue to publish such rating subject to the Rating Agency's customary conditions. A copy of the current Rating Agency Guidelines will be provided to any holder of Term Preferred Shares promptly upon request therefor made by such holder to the Fund by writing the Fund at 333 West Wacker Dr., Chicago, Illinois 60606.

The Board of Trustees may also elect to designate one or more other NRSROs as Rating Agencies with respect to Term Preferred Shares by notice to the holders of the Term Preferred Shares. The Rating Agency Guidelines of any Rating Agency may be amended by such Rating Agency without the vote, consent or approval of the Fund, the Board of Trustees or any holder of preferred shares, including any Term Preferred Shares, or Common Shares.

Issuance of Additional Preferred Stock

So long as any Term Preferred Shares are outstanding, the Fund may, without the vote or consent of the holders thereof, authorize, establish and create and issue and sell shares of one or more series of a class of preferred shares, ranking on a parity with Term Preferred Shares as to payment of dividends and the distribution of assets upon dissolution, liquidation or the winding up of the affairs of the Fund, in addition to then outstanding Term Preferred Shares, including additional series of Term Preferred Shares, and authorize, issue and sell additional shares of any such series of preferred shares then outstanding or so established or created, including additional Term Preferred Shares, in each case in accordance with applicable law, provided that the Fund will, immediately after giving effect to the issuance of such additional preferred shares and to its receipt and application of the proceeds thereof, including to an irrevocable deposit in respect of the redemption of preferred shares or the repayment of indebtedness with such proceeds, have Asset Coverage of at least 225%.

Actions on Other than Business Days

Edgar Filing: Nuveen Short Duration Credit Opportunities Fund - Form N-2/A

Unless otherwise provided herein or in the Statement, if the date for making any payment, performing any act or exercising any right is not a Business Day, such payment will be made, act performed or right exercised on

the next succeeding Business Day, with the same force and effect as if made or done on the nominal date provided therefor, and, with respect to any payment so made, no dividends, interest or other amount will accrue for the period between such nominal date and the date of payment.

Modification

To the extent permitted by applicable law and the Statement, the Board of Trustees, without the vote of the holders of Term Preferred Shares, may interpret, supplement or amend the provisions of the Statement or any appendix thereto to supply any omission, resolve any inconsistency or ambiguity or to cure, correct or supplement any defective or inconsistent provision, including any provision that becomes defective after the date hereof because of impossibility of performance or any provision that is inconsistent with any provision of any other preferred shares of the Fund.

THE FUND'S INVESTMENTS

Investment Objective

The Fund's investment objective is to provide current income and the potential for capital appreciation.

Investment Philosophy

Symphony believes that deep fundamental credit analysis and bottom-up portfolio construction are key to managing risk within the below investment grade corporate credit market. Symphony utilizes an industry focused approach that seeks to select the debt instruments of corporate issuers that provide attractive income opportunities and offer the potential for additional total return through the identification of near-term catalysts (such as restructurings, refinancing, mergers and acquisitions, liquidity events, management changes, rating and earnings announcements) and relative value opportunities. At the same time, Symphony's fundamental approach seeks to evaluate and minimize potential downside risks associated with below investment grade instruments. Additionally, Symphony focuses primarily on liquid securities to help implement its highly active management style, which helps the team manage and optimize risk exposures over the course of the investment cycle.

Investment Process

In identifying securities for potential purchase, Symphony evaluates the universe of below investment grade corporate issuers from an industry perspective. Symphony's analysts are industry experts and will seek long and short investment opportunities across an issuer's capital structure. Symphony's investment process involves the holistic review of each investment, taking into account such factors as issuer liquidity, company and industry dynamics, relative value, potential corporate actions, and other possible positive or negative catalysts. Symphony then evaluates the identified investment candidates for liquidity constraints and other technical factors. Symphony also combines its deep industry view with a top-down macro overlay which allows the team to make tactical investments in undervalued debt instruments within appropriate sectors given industry and economic activity, and avoid or short issuers and sectors where the team has a negative outlook. The final portfolio is constructed using risk management and monitoring systems to ensure proper diversification.

Investment Policies

The Fund's portfolio will be invested primarily in below investment grade adjustable rate corporate debt instruments, including senior secured loans, second lien loans, and other adjustable rate corporate debt instruments. Under normal market circumstances, the Fund invests at least 70% of its Managed Assets in adjustable rate senior loans and second lien loans. Senior loans and second lien loans are made to Borrowers that operate in various industries and geographic regions. Senior loans, second lien loans and other adjustable rate instruments pay interest at rates which are determined periodically at short-term intervals on the basis of an

adjustable base lending rate, primarily LIBOR, plus a premium, and are therefore regarded as having short-term durations. In addition, the Fund may make limited tactical investments in high yield debt and other debt instruments as described herein.

The Fund also may enter into tactical short positions consisting primarily of high yield debt. The high yield debt instruments may have intermediate-term or even long-term durations, but investments in those instruments will not be made in a manner that will cause the Fund's average portfolio duration (including the effect of leverage) to exceed two years. Short selling involves selling instruments that may be owned, and if not owned, borrowing the same instruments for delivery to the purchaser, with an obligation to replace the borrowed instruments at a later date. Short selling allows the short seller to profit from declines in market prices to the extent such declines exceed the transaction costs and the costs of borrowing the instruments.

Substantially all of the Fund's portfolio likely will be invested in corporate debt instruments that are, at the time of investment, rated below investment grade or unrated but judged by the portfolio managers to be of comparable quality. A debt instrument is considered investment grade quality if it is rated within the four highest letter grades (BBB or Baa or better) by at least one NRSRO that rates such instrument (even if it is rated lower by another), or if it is unrated by any NRSRO but judged to be of comparable quality by the portfolio managers. Such debt instruments are regarded as having predominately speculative characteristics with respect to capacity to pay interest and repay principal and are commonly referred to as junk bonds or high yield debt, which implies higher price volatility and default risk than investment grade instruments of comparable terms and duration. See Risk Factors Issuer Level Risks Issuer Credit Risk and Risk Factors Issuer Level Risks Below Investment Grade Risk.

Under normal circumstances:

The Fund invests at least 70% of its Managed Assets in adjustable rate corporate debt instruments, including senior secured loans, second lien loans, and other adjustable rate corporate debt instruments.

The Fund may make limited tactical investments in high yield debt and other debt instruments as described herein in an aggregate amount of up to 30% of its Managed Assets.

No more than 30% of the Fund's Managed Assets may be invested in debt instruments that are, at the time of investment, rated CCC+ or Caa1 or below by any NRSRO or that are unrated but judged by the portfolio managers to be of comparable quality.

The Fund may enter into tactical short positions consisting primarily of high yield debt, either directly or through the use of derivatives, including credit default swaps, creating investment exposure or hedging existing long (positive) investment exposure in a notional amount up to 20% of its Managed Assets. Initially, these short positions will not increase the Fund's leverage ratio or overall investment exposure because the Fund will not use any proceeds or cash from short sales to invest in additional debt instruments.

The Fund may invest up to 20% of its Managed Assets in debt instruments of non-U.S. issuers (which term for purposes of this prospectus includes Borrowers) that are U.S. dollar or non-U.S. dollar denominated. The Fund's investments in debt instruments of non-U.S. issuers may include debt instruments of issuers located, or conducting their business, in emerging markets countries.

The Fund may invest up to 10% of its Managed Assets in securities of other open- or closed-end investment companies (including exchange-traded funds, often referred to as ETFs) that invest primarily in securities of the types in which the Fund may invest directly.

The Fund may enter into certain derivative transactions as a hedging technique to protect against potential adverse changes in the market value of portfolio instruments. The Fund also may use derivatives to attempt to protect the NAV of the Fund, to facilitate the sale of certain portfolio instruments, to manage the Fund's effective interest rate exposure, and as a temporary substitute for purchasing or selling particular instruments.

The Fund

also may enter into derivative transactions such as total return swaps on an underlying index to create investment exposure to the extent such transactions may facilitate implementation of the Fund's investment strategy.

Under normal market circumstances, the Fund will maintain an average duration of two years or less for its portfolio (including the effect of leverage, but after the effect of derivatives used to shorten duration). When the average duration of the portfolio is expected to be longer than two years, the Fund will use interest rate swaps, interest rate futures or other derivative instruments to shorten such duration. For example, the Fund may use futures with an interest-bearing instrument as the underlying asset, such as a bond. Bond futures are typically used to adjust duration positions by creating offsetting positions that thereby reduce the portfolio's overall average duration. Values of instruments with shorter durations tend to be less sensitive to interest rate changes than instruments with longer durations. To the extent the Fund utilizes interest rate swaps and futures to maintain an average portfolio duration of two years or less, and such instruments do not perform as intended resulting in the Fund's portfolio behaving as if it had an average duration longer than two years, the Fund's NAV may be more susceptible to interest rate increases than it would have had those instruments performed as intended. See [Use of Leverage](#) and [The Fund's Investments Portfolio Composition and Other Information](#) [Other Investments](#) [Hedging Transactions](#) for additional information.

As previously noted, in this prospectus, [average duration](#) and [average portfolio duration](#) are each defined to be the modified duration of the Fund's portfolio, which is the measure of a debt instrument's or a portfolio's price sensitivity with respect to changes in market yields adjusted to reflect the effect of the Fund's effective leverage. In general, the value of a portfolio of instruments with a shorter duration can be expected to be less sensitive to interest rate changes than a portfolio with a longer duration. For example, the price of a bond with an effective duration of two years will rise (fall) two percent for every one percent decrease (increase) in its yield, and the price of a five-year duration bond will rise (fall) five percent for a one percent decrease (increase) in its yield. See [The Fund's Investments Portfolio Composition and Other Information](#) [Adjustable Rate Corporate Debt Instruments](#) [Senior Loans](#).

The Fund uses leverage to seek to enhance its potential current income and capital appreciation over time. The use of leverage involves increased risk, including increased variability of the Fund's net income, distributions and/or NAV in relation to market changes. See [Risk Factors](#) [Fund Level Risks](#) [Leverage Risk](#). Credit risk is the risk that issuers of debt instruments held by the Fund will be unable or unwilling to make principal or interest payments when due, and the related risk that the value of an instrument may decline because of concerns about the issuer's ability or unwillingness to make such payments. Interest rate risk is the risk that the prices of portfolio instruments will fall (or rise) if market interest rates for those instruments rise (or fall).

The Fund may utilize the following forms of structural leverage: (a) borrowings, including loans from certain financial institutions, and/or the issuance of debt securities, including fixed and floating rate notes or liquidity supported variable rate demand obligations (previously defined as [Borrowings](#)); and (b) the issuance of Preferred Shares or other senior securities ((a) and (b) are collectively referred to as [structural leverage](#)). The Fund's leverage strategy may not work as planned or achieve its goals. As previously defined, [effective leverage](#) is the combination of the amount of structural leverage plus the amount of leverage from derivatives transactions or other portfolio techniques that have the economic effect of leverage. The Fund may utilize derivatives, such as credit default swaps, that have the economic effect of financial leverage by creating additional investment exposure. The Fund also may use a portion of the proceeds received from the Fund's sale of borrowed securities ([short sales](#)) to purchase additional long positions in debt instruments, which also would have the economic effect of financial leverage. The Fund does not currently intend to use any proceeds from short sales to invest in additional debt instruments. The Fund may use effective leverage, subject to its fundamental investment policies, in an amount permissible under the 1940 Act.

So long as the rate of return, net of applicable Fund expenses, on the Fund's portfolio investments exceeds the then current interest rate on any [Borrowings](#) or the preferred share dividend rate, the investment of the proceeds of [Borrowings](#) or preferred shares (if outstanding) will generate more income than will be needed to make interest or dividend payments. If so, the excess will be available to pay higher dividends to Common

Shareholders. Given the current economic and debt market environment with historically low short-term to intermediate-term interest rates, the Fund currently uses derivatives such as interest rate swaps, with terms that may range from one to seven years, to manage the Fund's effective interest rate exposure.

Interest rate swaps do not involve the delivery of securities or other underlying assets or principal. Accordingly, the risk of loss with respect to the swap counterparty on such transactions is limited to the net amount of interest payments that the Fund is to receive. Interest rate swap positions are valued daily. Although there are economic advantages of entering into interest rate swap transactions, there are also additional risks. The Fund helps manage the credit risks associated with interest rate swap transactions by entering into agreements only with counterparties whom Nuveen Fund Advisors and Symphony believe have the financial resources to honor their obligations and by having Nuveen Fund Advisors and Symphony continually monitor the financial stability of the swap counterparties.

Depending on the state of interest rates in general, the Fund's use of interest rate swaps could enhance or harm the overall performance of the Shares. In addition, if the counterparty to an interest rate swap defaults, the Fund would not be able to use the anticipated net receipts under the swap to offset the interest payments on Borrowings or the dividend payments on any outstanding preferred shares. Depending on whether the Fund would be entitled to receive net payments from the counterparty on the swap, which in turn would depend on the general state of short-term interest rates at that point in time, such a default could negatively impact the performance of the Shares. In addition, at the time an interest rate swap transaction reaches its scheduled termination date, there is a risk that the Fund would not be able to obtain a replacement transaction or that the terms of the replacement would not be as favorable as on the expiring transaction. If this occurs, it could have a negative impact on the performance of the Shares. The Fund could be required to prepay the principal amount of any Borrowings. Such redemption or prepayment would likely result in the Fund seeking to terminate early all or a portion of any swap transaction. Early termination of a swap could result in a termination payment by or to the Fund.

The Fund will not enter into interest rate swap transactions having a notional amount that exceeds the outstanding amount of the Fund's leverage. See [Use of Leverage](#) and [The Fund's Investments Portfolio Composition and Other Information Other Investments Hedging Transactions](#) for additional information.

The use of leverage creates special risks for Shareholders. See [Risk Factors Fund Level Risks Leverage Risk](#). The Fund's leverage strategy may not work as planned or achieve its goals.

During temporary defensive periods or in order to keep the Fund's cash fully invested, including during the period when the net proceeds of the offering of Shares are being invested, the Fund may deviate from its investment policies and objectives. During such periods, the Fund may invest up to 100% of its Managed Assets in short-term investments, including high quality, short-term securities or may invest in short-, intermediate-, or long-term U.S. Treasury Bonds. There can be no assurance that such strategies will be successful. For more information, see the SAI under [Tax Matters](#).

The Fund's investment objective and certain investment policies in the SAI specifically identified as such are considered fundamental and may not be changed without shareholder approval. See [Investment Restrictions](#) in the SAI. All of the Fund's other investment policies are not considered to be fundamental by the Fund and can be changed by the Board of Trustees without a vote of the Fund's Shareholders. The Fund cannot change its investment objective or fundamental policies without the approval of the holders of a majority of the outstanding Common Shares and preferred shares, including Term Preferred Shares, voting together as a single class, and of the holders of a majority of the outstanding preferred shares, including Term Preferred Shares, voting as a separate class. When used with respect to particular shares of the Fund, a majority of the outstanding shares means (i) 67% or more of the shares present at a meeting, if the holders of more than 50% of the shares are present or represented by proxy, or (ii) more than 50% of the shares, whichever is less. See [Description of Shares Preferred Shares Voting Rights](#) for additional information with respect to the voting rights of holders of preferred shares.

Portfolio Composition and Other Information

The Fund's portfolio will be composed principally of the following investments. More detailed information about the Fund's portfolio investments are contained below under "Portfolio Composition" and in the SAI under "Portfolio Composition."

Adjustable Rate Corporate Debt Instruments

The Fund's portfolio will be invested primarily in below investment grade adjustable rate corporate debt instruments, including senior secured loans, second lien loans, and other adjustable rate corporate debt instruments. Adjustable rate instruments pay interest at rates which are determined periodically at short-term intervals on the basis of an adjustable base lending rate plus a premium.

Senior loans. The Fund may invest in (i) senior loans made by banks or other financial institutions to Borrowers, (ii) assignments of such interests in senior loans, or (iii) participation interests in senior loans. Senior loans hold the most senior position in the capital structure of a Borrower, are typically secured with specific collateral and have a claim on the assets and/or stock of the Borrower that is senior to that held by subordinated debt holders and stockholders of the Borrower. The capital structure of a Borrower may include senior loans, senior and junior subordinated debt, preferred stock and common stock issued by the Borrower, typically in descending order of seniority with respect to claims on the Borrower's assets. The proceeds of senior loans primarily are used by Borrowers to finance leveraged buyouts, recapitalizations, mergers, acquisitions, stock repurchases, refinancings, internal growth and for other corporate purposes. A senior loan is typically originated, negotiated and structured by a U.S. or non-U.S. commercial bank, insurance company, finance company or other financial institution ("Agent") for a lending syndicate of financial institutions which typically includes the Agent ("Lenders"). The Agent typically administers and enforces the senior loan on behalf of the other Lenders in the syndicate. In addition, an institution, typically but not always the Agent, holds any collateral on behalf of the Lenders. The Fund normally will rely primarily on the Agent to collect principal of and interest on a senior loan. Also, the Fund usually will rely on the Agent to monitor compliance by the Borrower with the restrictive covenants in a loan agreement.

Senior loans typically have rates of interest that are redetermined either daily, monthly, quarterly or semi-annually by reference to a base lending rate plus a premium or credit spread. These base lending rates are primarily LIBOR, and secondarily the prime rate offered by one or more major U.S. banks and the certificate of deposit rate or other base lending rates used by commercial lenders. As adjustable rate loans, the frequency of how often a senior loan resets its interest rate will impact how closely such senior loans track current market interest rates. The senior loans held by the Fund will have a dollar-weighted average period until the next interest rate adjustment of approximately 90 days or less. As a result, as short-term interest rates increase, interest payable to the Fund from its investments in senior loans should increase, and as short-term interest rates decrease, interest payable to the Fund from its investments in senior loans should decrease. In the experience of Symphony, the average life of senior loans in recent years has been approximately two years because of prepayments.

The Fund primarily purchases senior loans by assignment from a participant in the original syndicate of Lenders or from subsequent assignees of such interests. The purchaser of an assignment typically succeeds to all the rights and obligations under the loan agreement with the same rights and obligations as the assigning Lender. Assignments may, however, be arranged through private negotiations between potential assignees and potential assignors, and the rights and obligations acquired by the purchaser of an assignment may differ from, and be more limited than, those held by the assigning Lender.

The Fund may purchase participation interests in the original syndicate making senior loans. Loan participation interests typically represent direct participations in a loan to a corporate Borrower, and generally are offered by banks or other financial institutions or lending syndicates. The Fund may participate in such syndications, or can buy part of a senior loan, becoming a part Lender. When purchasing a participation interest,

the Fund assumes the credit risk associated with the corporate Borrower and may assume the credit risk associated with an interposed bank or other financial intermediary. The participation interests in which the Fund may invest may not be rated by any NRSRO. See Risk Factors Security Level Risks Loan Participation Risk.

The Fund may purchase and retain in its portfolio senior loans payable by Borrowers that have experienced, or may be perceived to be likely to experience, credit problems, including involvement in or recent emergence from bankruptcy reorganization proceedings or other forms of debt restructuring. Such investments may provide opportunities for enhanced income as well as capital appreciation. At times, in connection with the restructuring of a senior loan either outside of bankruptcy court or in the context of bankruptcy court proceedings, the Fund may determine or be required to accept equity securities or junior debt instruments in exchange for all or a portion of a senior loan. See The Fund's Investments Portfolio Composition and Other Information Other Investments Warrants and Equity Securities.

Second lien loans. The Fund may invest in second lien loans and unsecured loans. Such loans are made by public and private corporations and other non-governmental Borrowers for a variety of purposes. As in the case of senior loans, the Fund may purchase interests in second lien loans and unsecured loans through assignments or participations.

Second lien loans have similar characteristics as senior loans except that such interests are second in lien property rather than first. Second lien loans are second in priority of payment to one or more senior loans of the related Borrower and are typically secured by a second priority security interest or lien to or on specified collateral securing the Borrower's obligation under the interest. They typically have similar protections and rights as senior loans. Second lien loans are not (and by their terms cannot become) subordinate in priority of payment to any obligation of the related Borrower other than senior loans of such Borrower. Second lien loans may feature fixed or floating rate interest payments. Because second lien loans are second to senior loans, they present a greater degree of investment risk but often pay interest at higher rates reflecting this additional risk. In addition, second lien loans of below investment grade quality share many of the risk characteristics of other below investment grade debt instruments.

Unsecured loans generally have lower priority in right of payment compared to holders of secured interests of the Borrower. Unsecured loans are not secured by a security interest or lien to or on specified collateral securing the Borrower's obligation under the interest. Unsecured loans by their terms may be or may become subordinate in right of payment to other obligations of the Borrower, including senior loans, second lien loans and other interests. Unsecured loans may have fixed or adjustable floating rate interest payments. Because unsecured loans are subordinate to senior loans and other secured debt of the Borrower, they present a greater degree of investment risk but often pay interest at higher rates reflecting this additional risk. Such investments generally are of below investment grade quality. Unsecured loans of below investment grade quality share the same risks of other below investment grade debt instruments.

Adjustable rate subordinated loans. The subordinated loans in which the Fund may invest are typically privately-negotiated investments that rank subordinate in priority of payment to senior debt, such as senior loans, and are often unsecured. Because subordinated interests may rank lower as to priority of payment than senior loans and second lien loans of the Borrower, they may present a greater degree of investment risk than senior loans and second lien loans but often pay interest at higher rates reflecting this additional risk. Other than their more subordinated status, such investments have many characteristics and risks similar to senior loans and second lien loans discussed above. Subordinated interests of below investment grade quality share risks of other below investment grade debt instruments. Subordinated loans rank senior to common and preferred equity in a Borrower's capital structure. Subordinated loans may have elements of both debt and equity instruments, offering fixed or adjustable rates of return in the form of interest payments associated with senior debt, while providing lenders an opportunity to participate in the capital appreciation of a Borrower, if any, through an equity interest. This equity interest may take the form of warrants or direct equity investments which will be in conjunction with the subordinated loans. Due to their higher risk profile and often less restrictive covenants as compared to senior loans, subordinated loans generally earn a higher return than secured senior loans. The warrants associated with

subordinated loans are typically detachable, which allows lenders the opportunity to receive repayment of their principal on an agreed amortization schedule while retaining their equity interest in the Borrower. Subordinated loans also may include a put feature, which permits the holder to sell its equity interest back to the Borrower at a price determined through an agreed formula.

The Fund may invest in subordinated loans that are primarily unsecured and that provide for relatively high, adjustable rates of interest, providing the Fund with significant current interest income. The subordinated loans in which the Fund may invest may have interest-only payments in the early years, with amortization of principal deferred to the later years of the subordinated loans. In some cases, the Fund may acquire subordinated loans that, by their terms, convert into equity or additional debt instruments or defer payments of interest for the first few years after issuance. Also, in some cases the subordinated loans in which the Fund may invest will be collateralized by a subordinated lien on some or all of the assets of the Borrower. Typically, subordinated loans in which the Fund may invest will have maturities of four to eight years.

The subordinated loan industry is highly specialized and the Fund will rely on Symphony and its employees' expertise in sourcing, evaluating, structuring, documenting and monitoring such investments by the Fund.

Certain structured notes. The Fund may invest in structured notes (as described below) that are designed to provide returns and risks that emulate those of senior loans, second lien loans and other adjustable rate corporate debt instruments.

The Fund acting as Originating Lender, Sole Lender and/or Agent. The Fund, in connection with its investments in senior secured loans, second lien loans and other loans, particularly those made to middle-market companies, may act as one of the group of lenders originating a loan (Originating Lender), may purchase the entire amount of a particular loan (Sole Lender), and may act as Agent in the negotiation of the terms of a loan and in the formation of a group of investors in a Borrower's loan.

When the Fund acts as an Originating Lender or Sole Lender it will generally participate in structuring the loan, and may share in an origination fee paid by the Borrower. When the Fund is an Originating Lender or Sole Lender it will generally have a direct contractual relationship with the Borrower, and may enforce compliance by the Borrower with the terms of the loan agreement. As Sole Lender the Fund generally also would have full voting and consent rights under the applicable loan agreement.

Acting in the capacity of an Agent with respect to a loan may subject the Fund to certain risks in addition to those associated with the Fund's role as a lender.

The Fund's ability to receive fee income also may be constrained by certain requirements for qualifying as a regulated investment company under the Code. The Fund intends to comply with those requirements and may limit its investments in loans in which it acts as Originating Lender, Sole Lender or Agent in order to do so.

Other Investments

The Fund may invest in fixed or floating rate debt instruments and other securities as described below:

Edgar Filing: Nuveen Short Duration Credit Opportunities Fund - Form N-2/A

Structured products. The Fund may invest in structured products such as structured notes issued by a financial institution. As a fundamental policy, the Fund will not invest in collateralized loan obligations.

Structured notes have a defined maturity and pay a nominal interest rate, and potentially additional returns, based upon the cash flow or rate of return earned on either a reference portfolio of leveraged loans or the return represented by a reference index to the market for adjustable rate corporate loans. Such instruments may be leveraged or geared by applying a multiplier to the rate of total return on the underlying investments or referenced market index. Structured products that employ leverage increase the potential for gain and the risk of

loss in that particular structured product investment. As a result, a relatively small decline in the value of the underlying investments or referenced indicator could result in a relatively large loss in the value of a structured product. Holders of structured products bear risks of the underlying investment, index or reference obligation (including income risk, credit risk and market risk) and are subject to counterparty risk.

The Fund may have the right to receive payments to which it is entitled only from the structured product, and generally does not have direct rights against the issuer or the entity that sold the assets to the structured product. While certain structured products enable the investor to acquire interests in a pool of securities without the brokerage and other expenses associated with directly holding the same securities, investors in structured products generally pay their share of the structured product's administrative and other expenses. Structured products may be private investment funds (structured as trusts or other types of pooled investment companies that are excluded from the definition of investment company under the 1940 Act by the operation of Section 3(c) (1) or 3(c) (7) thereof) or investment companies that are registered under the 1940 Act. Investment in such products involve operating expenses and fees that are in addition to the expenses and fees of the Fund, and such expenses and fees are borne indirectly by holders of the Shares. For structured products that are registered under the 1940 Act, please also see The Fund's Investments Portfolio Composition and Other Information Other Investments Other Investment Companies.

Debtor-in-possession loans (DIPs). The Fund may invest in debtor-in-possession loans (DIPs), which are newly issued loans in connection with special situation restructuring and refinancing transactions. DIPs are loans to a debtor-in-possession in a proceeding under the U.S. bankruptcy code that have been approved by the bankruptcy court. DIPs are typically adjustable rate and fully secured by a lien on the debtor's otherwise unencumbered assets or secured by a junior lien on the debtor's encumbered assets (so long as the loan is fully secured based on the most recent current valuation or appraisal report of the debtor). DIPs are often required to close with certainty and in a rapid manner in order to satisfy existing creditors and to enable the issuer to emerge from bankruptcy or to avoid a bankruptcy proceeding.

Derivatives. The Fund may invest in certain derivative instruments. Such instruments may include credit default swaps, or other derivative instruments whose prices, in Symphony's opinion, correlate with the prices of the Fund's investments. Credit default swaps may require initial premium (discount) payments as well as periodic payments (receipts) related to the interest leg of the swap or to the default of a reference obligation. If the Fund is a seller of a contract, the Fund would be required to pay the par (or other agreed upon) value of a referenced debt obligation to the counterparty in the event of a default or other credit event by the reference issuer, such as a U.S. or foreign corporate issuer, with respect to such debt obligations. In return, the Fund would receive from the counterparty a periodic stream of payments over the term of the contract provided that no event of default has occurred. If no default occurs, the Fund would keep the stream of payments and would have no payment obligations. As the seller, the Fund would be subject to investment exposure on the notional amount of the swap. If the Fund is a buyer of a contract, the Fund would have the right to deliver a referenced debt obligation and receive the par (or other agreed-upon) value of such debt obligation from the counterparty in the event of a default or other credit event (such as a credit downgrade) by the reference issuer, such as a U.S. or foreign corporation, with respect to its debt obligations. In return, the Fund would pay the counterparty a periodic stream of payments over the term of the contract provided that no event of default has occurred. If no default occurs, the counterparty would keep the stream of payments and would have no further obligations to the Fund. Interest rate swaps involve the exchange by the Fund with a counterparty of their respective commitments to pay or receive interest, such as an exchange of fixed-rate payments for floating rate payments. The Fund will usually enter into interest rate swaps on a net basis; that is, the two payment streams will be netted out in a cash settlement on the payment date or dates specified in the instrument, with the Fund receiving or paying, as the case may be, only the net amount of the two payments.

The Fund may utilize certain derivative instruments as a hedging technique to protect against potential adverse changes in the market value of portfolio securities. The Fund also may use derivatives to attempt to protect the NAV of the Fund, to facilitate the sale of certain portfolio securities, to manage the Fund's effective

interest rate exposure as a temporary substitute for purchasing or selling particular securities. From time to time, the Fund also may utilize derivative instruments to create investment exposure to the extent such derivatives may facilitate implementation of the Fund's investment strategy.

Other derivative instruments that may be used, or other transactions that may be entered into, by the Fund may include the purchase or sale of futures contracts on securities, credit-linked notes, securities indices, other indices or other financial instruments; options on futures contracts; exchange-traded and over-the-counter options on securities or indices; index linked securities; swaps; and currency exchange transactions. Some, but not all, of the derivative instruments may be traded and listed on an exchange. The positions in derivatives will be marked-to-market daily at the closing price established on the exchange or at a fair value.

Hedging transactions. As noted above, the Fund may invest in certain derivative instruments as a hedging technique to protect against potential adverse changes in the market value of portfolio securities. These types of strategies may generate taxable income. There is no assurance that these derivative strategies will be available at any time, that Nuveen Fund Advisors and Symphony will determine to use them for the Fund or, if used, that the strategies will be successful. See *Hedging Strategies and Other Uses Of Derivatives* in the SAI for further information on hedging transactions.

Limitations on the Use of Futures, Options on Futures and Swaps. Nuveen Fund Advisors has claimed, with respect to the Fund, the exclusion from the definition of "commodity pool operator" under the Commodity Exchange Act (CEA) provided by Commodity Futures Trading Commission (CFTC) Regulation 4.5 and is therefore not currently subject to registration or regulation as such under the CEA with respect to the Fund. In addition, Symphony has claimed the exemption from registration as a commodity trading advisor provided by CFTC Regulation 4.14(a)(8) and is therefore not currently subject to registration or regulation as such under the CEA with respect to the Fund. Under CFTC Regulation 4.5, if the Fund uses futures, options on futures or swaps other than for bona fide hedging purposes (as defined by the CFTC), the aggregate initial margin and premiums on these positions (after taking into account unrealized profits and unrealized losses on any such positions and excluding the amount by which options that are "in-the-money" at the time of purchase are "in-the-money") may not exceed 5% of the Fund's NAV, or alternatively, the aggregate net notional value of those positions may not exceed 100% of the Fund's NAV (after taking into account unrealized profits and unrealized losses on any such positions). The Fund intends to comply with Regulation 4.5's requirements such that Nuveen Fund Advisors will not be required to register as a commodity pool operator with the CFTC with respect to the Fund. The Fund reserves the right to employ futures, options on futures and swaps to the extent allowed by CFTC regulations in effect from time to time and in accordance with the Fund's policies. The requirements for qualification as a regulated investment company may also limit the extent to which the Fund may employ futures, options on futures or swaps.

Other corporate debt instruments. Corporate debt instruments generally are used by corporations to borrow money from investors. The issuer pays the investor a fixed or variable rate of interest and normally must repay the amount borrowed on or before maturity. Certain debt instruments in which the Fund may invest may be "perpetual" in that they have no maturity date and some may be convertible into equity securities of the issuer or its affiliates. The Fund may invest in debt instruments of any quality and such debt instruments may be secured or unsecured. In addition, certain debt instruments in which the Fund may invest may be subordinated to the payment of an issuer's senior debt.

U.S. Government securities. U.S. Government securities include (1) U.S. Treasury obligations, which differ in their interest rates, maturities and times of issuance: U.S. Treasury bills (maturities of one year or less), U.S. Treasury notes (maturities of one year to ten years) and U.S. Treasury bonds (generally maturities of greater than ten years) and (2) obligations issued or guaranteed by U.S. Government agencies and instrumentalities that are supported by any of the following: (i) the full faith and credit of the U.S. Treasury, (ii) the right of the issuer to borrow an amount limited to a specific line of credit from the U.S. Treasury, (iii) discretionary authority of the U.S. Government to purchase certain obligations of the U.S. Government agency or instrumentality or (iv) the credit of the agency or instrumentality. The Fund also may invest in any other security or agreement collateralized or otherwise secured by U.S. Government securities. Agencies and instrumentalities of the U.S.

Government include but are not limited to: Federal Land Banks, Federal Financing Banks, Banks for Cooperatives, Federal Intermediate Credit Banks, Farm Credit Banks, Federal Home Loan Banks, FHLMC, FNMA, GNMA, Student Loan Marketing Association, United States Postal Service, Small Business Administration, Tennessee Valley Authority and any other enterprise established or sponsored by the U.S. Government. Because the U.S. Government generally is not obligated to provide support to its instrumentalities, the Fund invests in obligations issued by these instrumentalities only if Symphony determines that the credit risk with respect to such obligations is minimal.

The principal of and/or interest on certain U.S. Government securities which may be purchased by the Fund could be (i) payable in non-U.S. currencies rather than U.S. dollars or (ii) increased or diminished as a result of changes in the value of the U.S. dollar relative to the value of non-U.S. currencies. The value of such portfolio securities may be affected by changes in the exchange rate between foreign currencies and the U.S. dollar.

Commercial paper. Commercial paper represents short-term unsecured promissory notes issued in bearer form by corporations such as banks or bank holding companies and finance companies. The rate of return on commercial paper may be linked or indexed to the level of exchange rates between the U.S. dollar and a foreign currency or currencies.

Warrants and equity securities. The Fund may acquire equity securities and warrants issued by an issuer or its affiliates as part of a package of investments in the issuer or its affiliates issued in connection with an adjustable rate instrument or other debt instrument of the issuer. The Fund also may convert a warrant so acquired into the underlying security.

Repurchase agreements. The Fund may enter into repurchase agreements (the purchase of a security coupled with an agreement to resell that security at a higher price) with respect to its permitted investments. The Fund's repurchase agreements will provide that the value of the collateral underlying the repurchase agreement will always be at least equal to the repurchase price, including any accrued interest earned on the agreement, and will be marked to market daily.

Non-U.S. Companies. The Fund may invest in dollar-denominated securities of non-U.S. companies through the direct investment in securities of such companies and through depositary receipts. The Fund will classify an issuer of a security as being located in a country based on the determination of an unaffiliated, recognized financial data provider. Such determinations are based on a number of criteria, such as the issuer's country of domicile, the primary stock exchange on which the security trades, the location from which the majority of the issuer's revenue comes and the issuer's reporting currency. The Fund may purchase depositary receipts such as American Depositary Receipts (ADRs), European Depositary Receipts (EDRs) and Global Depositary Receipts (GDRs). ADRs, EDRs and GDRs are certificates evidencing ownership of shares of foreign issuers and are alternatives to purchasing directly the underlying foreign securities in their national markets and currencies.

Zero coupon bonds. A zero coupon bond is a bond that typically does not pay interest either for the entire life of the obligation or for an initial period after the issuance of the obligation. When held to its maturity, the holder receives the par value of the zero coupon bond, which generates a return equal to the difference between the purchase price and its maturity value. A zero coupon bond is normally issued and traded at a deep discount from face value. This original issue discount (OID) approximates the total amount of interest the security will accrue and compound prior to its maturity and reflects the payment deferral and credit risk associated with the instrument. Because zero coupon securities and other OID instruments do not pay cash interest at regular intervals, the instruments' ongoing accruals require ongoing judgments concerning the collectability of deferred payments and the value of any associated collateral. As a result, these securities may be subject to greater value fluctuations and less liquidity in the event of adverse market conditions than comparably rated securities that pay cash on a current basis. Because zero coupon bonds, and OID instruments generally, allow an issuer to avoid or delay the need to generate cash to meet current interest payments, they may involve greater payment deferral and credit risk than coupon loans and bonds that pay interest currently or in cash. The Fund generally will be required

to distribute dividends to shareholders representing the income of these instruments as it accrues, even though the Fund will not receive all of the income on a current basis or in cash. Thus, the Fund may have to sell other investments, including when it may not be advisable to do so, and use the cash proceeds to make income distributions to its shareholders. For accounting purposes, these cash distributions to shareholders will not be treated as a return of capital.

Further, Nuveen Fund Advisors collects management fees on the value of a zero coupon bond or OID instrument attributable to the ongoing non-cash accrual of interest over the life of the bond or other instrument. As a result, Nuveen Fund Advisors receives non-refundable cash payments based on such non-cash accruals while investors incur the risk that such non-cash accruals ultimately may not be realized.

When-issued and delayed delivery transactions. The Fund may buy and sell securities on a when-issued or delayed delivery basis, making payment or taking delivery at a later date, normally within 15 to 45 days of the trade date. This type of transaction may involve an element of risk because no interest accrues on the bonds prior to settlement and, because bonds are subject to market fluctuations, the value of the bonds at time of delivery may be less (or more) than cost. A separate account of the Fund will be established with its custodian consisting of cash, cash equivalents, or liquid securities having a market value at all times at least equal to the amount of the commitment.

Illiquid securities. The Fund may invest in securities and other instruments that, at the time of investment, are illiquid (*i.e.*, securities that are not readily marketable). For this purpose, illiquid securities may include, but are not limited to, restricted securities (securities the disposition of which is restricted under the federal securities laws), securities that may only be resold pursuant to Rule 144A under the Securities Act of 1933, as amended (the "1933 Act") that are deemed to be illiquid, and certain repurchase agreements.

Restricted securities may be sold only in privately negotiated transactions or in a public offering with respect to which a registration statement is in effect under the 1933 Act. Where registration is required, the Fund may be obligated to pay all or part of the registration expenses and a considerable period may elapse between the time of the decision to sell and the time the Fund may be permitted to sell a security under an effective registration statement. If, during such a period, adverse market conditions were to develop, the Fund might obtain a less favorable price than that which prevailed when it decided to sell. Illiquid securities will be priced at fair value as determined in good faith by the Board of Trustees or its delegate. If, through the appreciation of illiquid securities or the depreciation of liquid securities, the Fund should be in a position where more than 50% of the value of its Managed Assets is invested in illiquid securities, including restricted securities that are not readily marketable, the Fund will take such steps as are deemed advisable, if any, to protect liquidity.

Short positions. The Fund may enter into tactical short positions, consisting primarily of high yield debt, either directly or through the use of derivatives including credit default swaps, creating a negative investment exposure or hedging existing long (positive) investment exposure in a notional amount up to 20% of its Managed Assets. Initially, these short positions will not increase the Fund's leverage ratio or overall investment exposure because the Fund will not use any proceeds or cash from short sales to invest in additional debt instruments. All or a portion of the proceeds received from the Fund's short sales may in the future be used to purchase additional long positions in corporate debt instruments, which would increase the Fund's effective leverage ratio. See Risk Factors Fund Level Risks Leverage Risk.

Other investment companies. The Fund may invest up to 10% of its Managed Assets in securities of other open- or closed-end investment companies (including ETFs) that invest primarily in securities of the types in which the Fund may invest directly. In addition, the Fund may invest a portion of its Managed Assets in pooled investment vehicles (other than investment companies) that invest primarily in securities of the types in which the Fund may invest directly. The Fund generally expects that it may invest in other investment companies and/or other pooled investment vehicles either during periods when it has large amounts of uninvested cash, such as the period shortly after the Fund receives the proceeds of the offering of its Term Preferred Shares or Borrowings. The Fund may invest in investment companies that are advised by Nuveen Fund Advisors, Symphony or their

respective affiliates to the extent permitted by applicable law and/or pursuant to exemptive relief from the SEC. The Fund has not applied for and currently does not intend to apply for such relief. As a stockholder in an investment company, the Fund will bear its ratable share of that investment company's expenses, and would remain subject to payment of the Fund's advisory and administrative fees with respect to assets so invested. Common shareholders would therefore be subject to duplicative expenses to the extent the Fund invests in other investment companies.

Symphony will take expenses into account when evaluating the investment merits of an investment in an investment company relative to available security investments. In addition, the securities of other investment companies may also be leveraged and will therefore be subject to the same leverage risks described herein. As described in the section entitled "Risk Factors," the NAV and market value of leveraged shares will be more volatile and the yield to Common Shareholders will tend to fluctuate more than the yield generated by unleveraged shares.

Portfolio Turnover

The Fund may engage in portfolio trading when considered appropriate, but short-term trading will not be used as the primary means of achieving the Fund's investment objective. Although the Fund cannot accurately predict its annual portfolio turnover rate, it is generally not expected to exceed 100% under normal circumstances. For the fiscal year ended July 31, 2015, the Fund's portfolio turnover rate was 31%. However, there are no limits on the Fund's rate of portfolio turnover, and investments may be sold without regard to length of time held when, in Symphony's opinion, investment considerations warrant such action. A higher portfolio turnover rate would result in correspondingly greater brokerage commissions and other transactional expenses that are borne by the Fund. Although these commissions and expenses are not reflected in the Fund's Total Annual Expenses under Summary of Fund Expenses in this prospectus, they will be reflected in the Fund's total return. In addition, high portfolio turnover may result in the realization of net short-term capital gains by the Fund which, when distributed to shareholders, will be taxable as ordinary income. See "Tax Matters."

PORTFOLIO COMPOSITION

The following table sets forth certain information with respect to the composition of the Fund's securities as of August 31, 2015.

<u>Portfolio Allocation*</u>	<u>Percent</u>
Variable Rate Senior Loan Interests	82.4%
Corporate Bonds	11.6%
Cash and Equivalents	5.5%
Common Stocks	0.4%
Credit Default Swap	0.1%
Total	100%

* The relative percentages of the value of the investments attributable the securities could change over time as a result of rebalancing the Fund's assets by Symphony, market value fluctuations, issuance of additional shares and other events.

USE OF LEVERAGE

Edgar Filing: Nuveen Short Duration Credit Opportunities Fund - Form N-2/A

The amounts and forms of leverage used by the Fund may vary with prevailing market or economic conditions. The timing and terms of any leverage transactions are determined by the Board of Trustees. In addition to the structural leverage afforded by the issuance of the Term Preferred Shares, the Fund employs additional structural leverage through Borrowings. The Fund has entered into a Credit Agreement with State

Street Bank and Trust Company. The borrowing capacity under the Credit Agreement was reduced from \$95,000,000 to \$85,200,000 in an amendment to the Credit Agreement dated October 30, 2015. The term of the Credit Agreement ends on August 4, 2016. The Fund has the right to augment or replace the Credit Agreement with a new credit agreement in the future, and any such augmented or replacement credit agreement may contain terms that are materially different than the terms contained in the existing Credit Agreement, including terms that limit payments to holders of Term Preferred Shares. As of July 31, 2015, the Fund's outstanding balance on these Borrowings under the Credit Agreement was \$85,200,000. For the fiscal year ended July 31, 2015, the average daily balance outstanding and average annual interest rate on these borrowings were \$85,132,055 and 0.87%, respectively. This credit facility is secured by substantially all of the assets of the Fund. Issuance of Term Preferred Shares will increase the Fund's leverage. The amount of outstanding borrowings may vary with prevailing market or economic conditions. The Fund borrows money at rates generally available to institutional investors. The Fund's leverage ratio will increase as a result of the Term Preferred Shares issuance. Following an offering of additional Common Shares from time to time, the Fund's leverage ratio will decrease as a result of the increase in net assets attributable to Shares. The Fund's leverage ratio may decline further to the extent that the net proceeds of an offering of Shares are used to reduce the Fund's structural leverage. A lower leverage ratio may result in lower (higher) returns to Shareholders over a period of time to the extent that net returns on the Fund's investment portfolio exceed (fall below) its cost of leverage over that period, which lower (higher) returns may impact the level of the Fund's distributions. See Risk Factors Fund Level Risks Leverage Risk.

As discussed above, the Fund is offering Term Preferred Shares. The Fund may in the future issue additional types of preferred securities to increase the Fund's leverage.

The Fund's Borrowings, including those under the Credit Agreement with State Street Bank and Trust Company, have seniority over Term Preferred Shares. The rights of lenders, such as State Street Bank and Trust Company, and any other creditors to receive payments of interest on and repayments of principal of any Borrowings are senior to the rights of holders of Term Preferred Shares and Common Shares, with respect to the payment of dividends and other distributions, and upon liquidation. The Fund may not be permitted to declare dividends and other distributions with respect to the Term Preferred Shares and Common Shares or redeem Term Preferred Shares unless at such time, the Fund meets certain asset coverage requirements and no event of default or other circumstance exists under the Credit Agreement or with respect to any other Borrowings that would limit or otherwise block payments in redemption.

Borrowings and preferred shares, such as the Term Preferred Shares, will have seniority over the Common Shares. Leverage involves special risks. There is no assurance that the Fund's leveraging strategy will be successful. The Fund will seek to invest the proceeds from structural leverage in a manner consistent with the Fund's objective and policies.

Prior to the closing date of this offering, the Fund expects to enter into an interest rate swap with Morgan Stanley Capital Services LLC that seeks to convert the economic impact of the dividend payable by the Fund on the Term Preferred Shares to a variable rate exposure. Under the swap, the Fund would receive a fixed payment at a rate equal to the applicable dividend rate being paid by the Fund on the Term Preferred Shares and in turn pay a fixed spread to the one-month LIBOR index. Morgan Stanley Capital Services LLC has the right, but not the obligation, to terminate the swap agreement on the first business day of each month beginning on November 1, 2018. Settlement of the swap is contingent on the closing of the Term Preferred Shares offering. The swap termination date is not contractually tied to the redemption of the Term Preferred Shares. Terms and conditions of the swap may be modified by the mutual written agreement of the Fund and Morgan Stanley Capital Services LLC.

So long as the Fund's portfolio is invested in securities that provide a higher rate of return than the Fund's cost of leverage (after taking expenses into consideration), the leverage will cause you to receive a higher current rate of return than if the Fund were not leveraged.

Changes in the value of the Fund's portfolio, including costs attributable to Borrowings or preferred shares, such as the Term Preferred Shares, will be borne entirely by the Common Shareholders. If there is a net decrease

(or increase) in the value of the Fund's investment portfolio, the leverage will decrease (or increase) the NAV per Common Share to a greater extent than if the Fund were not leveraged.

Given the current economic and debt market environment with historically low short-term to intermediate-term interest rates, the Fund may use derivatives such as interest rate swaps, with terms that may range from one to seven years, to manage the Fund's effective interest rate exposure.

The Fund pays Nuveen Fund Advisors a management fee (which in turn pays a portion of its fee to the Fund's sub-adviser, Symphony) based on a percentage of Managed Assets. Managed Assets for this purpose includes the proceeds realized from the Fund's use of leverage as set forth in the Fund's investment management agreement. See Management of the Fund Investment Management and Sub-Advisory Agreements. Nuveen Fund Advisors will be responsible for using leverage to pursue the Fund's investment objective, and will base its decision regarding whether and how much to leverage to use for the Fund based solely on its assessment of whether such use of leverage will advance the Fund's investment objective. However, a decision to increase the Fund's leverage will have the effect of increasing Managed Assets and therefore Nuveen Fund Advisors' and Symphony's management fee. Thus, Nuveen Fund Advisors and Symphony may have a conflict of interest in determining whether to increase the Fund's use of leverage. Nuveen Fund Advisors will seek to manage that incentive by only increasing the Fund's use of leverage when it determines that such increase is in the best interest of the Fund and is consistent with the Fund's investment objective, and by periodically reviewing the Fund's performance and use of leverage with the Board of Trustees.

Under the 1940 Act, the Fund generally is not permitted to borrow or issue commercial paper or notes unless immediately after the borrowing or commercial paper or note issuance the value of the Fund's total assets less liabilities other than the principal amount represented by commercial paper, notes or borrowings, is at least 300% of such principal amount. The Fund intends, to the extent possible, to prepay all or a portion of the principal amount of any outstanding borrowing, notes or commercial paper to the extent necessary in order to maintain the required asset coverage. Failure to maintain certain asset coverage requirements could result in an event of default and entitle the debt holders to elect a majority of the Board of Trustees.

Under the 1940 Act, the Fund is not permitted to issue preferred shares unless immediately after such issuance, the value of the Fund's asset coverage is at least 200% of the liquidation value of the outstanding preferred shares (*i.e.*, such liquidation value may not exceed 50% of the Fund's asset coverage). In addition, the Fund is not permitted to declare any cash dividend or other distribution on its Common Shares unless, at the time of such declaration, the value of the Fund's asset coverage less liabilities other than borrowings is at least 200% of such liquidation value. The Fund intends, to the extent possible, to purchase or redeem preferred shares from time to time to the extent necessary in order to maintain asset coverage with respect to the preferred shares.

The Fund utilizes the following forms of structural leverage: (a) borrowings, including loans from certain financial institutions, and/or the issuance of debt securities, including fixed and floating rate notes or liquidity supported variable rate demand obligations (previously defined as Borrowings); and (b) the issuance of preferred shares, including Term Preferred Shares, or other senior securities ((a) and (b) are collectively referred to as structural leverage).

The Fund's leverage strategy may not work as planned or achieve its goals. As previously defined, effective leverage is the combination of the amount of structural leverage plus the amount of leverage from derivatives transactions or other portfolio techniques that have the economic effect of leverage. The Fund may utilize derivatives, such as credit default swaps, that have the economic effect of financial leverage by creating additional investment exposure. The Fund also may use a portion of the proceeds received from the Fund's sale of borrowed securities (short sales) to purchase additional long positions in debt instruments, which also would have the economic effect of financial leverage. The Fund does not currently intend to use any proceeds from short sales to invest in additional debt instruments. The Fund may use effective leverage, subject to its fundamental investment policies, in an amount permissible under the 1940 Act.

So long as the rate of return, net of applicable Fund expenses, on the Fund's portfolio investments exceeds the then current interest rate on Borrowings and the Term Preferred Shares' dividend rate, the investment of the proceeds of Borrowings and the Term Preferred Shares will generate more income than will be needed to make interest and dividend payments. If so, the excess will be available to pay higher dividends to Common Shareholders. Given the current economic and debt market environment with historically low short-term to intermediate-term interest rates, the Fund currently uses derivatives such as interest rate swaps, with terms that may range from one to seven years, to manage the Fund's effective interest rate exposure.

Interest rate swaps do not involve the delivery of securities or other underlying assets or principal. Accordingly, the risk of loss with respect to the swap counterparty on such transactions is limited to the net amount of interest payments that the Fund is to receive. Interest rate swap positions are valued daily. Although there are economic advantages of entering into interest rate swap transactions, there are also additional risks. The Fund helps manage the credit risks associated with interest rate swap transactions by entering into agreements only with counterparties whom Nuveen Fund Advisors and Symphony believe have the financial resources to honor their obligations and by having Nuveen Fund Advisors and Symphony continually monitor the financial stability of the swap counterparties.

Depending on the state of interest rates in general, the Fund's use of interest rate swaps could enhance or harm the overall performance of the Shares. In addition, if the counterparty to an interest rate swap defaults, the Fund would not be able to use the anticipated net receipts under the swap to offset the interest payments on Borrowings or the dividend payments on outstanding Term Preferred Shares. Depending on whether the Fund would be entitled to receive net payments from the counterparty on the swap, which in turn would depend on the general state of short-term interest rates at that point in time, such a default could negatively impact the performance of the Shares. In addition, at the time an interest rate swap transaction reaches its scheduled termination date, there is a risk that the Fund would not be able to obtain a replacement transaction or that the terms of the replacement would not be as favorable as on the expiring transaction. If this occurs, it could have a negative impact on the performance of the Shares. The Fund could be required to prepay the principal amount of any Borrowings. Such redemption or prepayment would likely result in the Fund seeking to terminate early all or a portion of any swap transaction. Early termination of a swap could result in a termination payment by or to the Fund. See *Use of Leverage* and *Risk Factors Fund Level Risks Leverage Risk*. The Fund's leverage strategy may not work as planned or achieve its goals.

The Fund is subject to certain restrictions imposed by either guidelines of one or more rating agencies that may issue ratings for the Term Preferred Shares, commercial paper or notes, or by the lender in the case of the Credit Agreement. These guidelines currently impose asset coverage or portfolio composition requirements that are more stringent than those imposed on the Fund by the 1940 Act. It is not anticipated that these covenants or guidelines will impede Nuveen Fund Advisors and Symphony from managing the Fund's portfolio in accordance with the Fund's investment objective and policies. In addition to other considerations, to the extent that the Fund believes that the covenants and guidelines required by the rating agencies or lenders would impede its ability to meet its investment objective, or if the Fund is unable to obtain the rating on borrowings or preferred shares such as the Term Preferred Shares, the Fund will not incur borrowings or issue preferred shares.

The Fund may also borrow money for repurchase of its shares or as a temporary measure for extraordinary or emergency purposes, including the payment of dividends and the settlement of securities transactions which otherwise might require untimely dispositions of Fund securities.

Effects of Leverage

Assuming the utilization of leverage through Term Preferred Shares of approximately 37% of the Fund's Managed Assets, at a dividend rate of 1.500% payable on such Term Preferred Shares, the income generated by the Fund's portfolio (net of non-leverage expenses) must exceed 0.555% in order to cover such dividend payments and other expenses specifically related to Term Preferred Shares. Of course, these numbers are merely estimates, used for illustration.

Edgar Filing: Nuveen Short Duration Credit Opportunities Fund - Form N-2/A

The following table is furnished in response to requirements of the SEC. It is designed to illustrate the effect of leverage on Common Share total return, assuming investment portfolio total returns (comprised of income and changes in the value of securities held in the Fund's portfolio) of 10%, 5%, 0%, 5% and 10%. These assumed investment portfolio returns are hypothetical figures and are not necessarily indicative of the investment portfolio returns experienced or expected to be experienced by the Fund. See Risk Factors. The table further reflects the issuance of Term Preferred Shares representing 37% of the Fund's Managed Assets, net of expenses, and the Fund's currently projected initial dividend rate on the Term Preferred Shares of 1.500%.

Assumed Portfolio Total Return (Net of Expenses)	(10)%	(5)%	0%	5%	10%
Common Share Total Return	(16.75)%	(8.82)%	(0.88)%	7.06%	14.99%

Common Share Total Return is composed of two elements: the Common Share dividends paid by the Fund (the amount of which is largely determined by the net investment income of the Fund after paying dividends on the Term Preferred Shares) and gains or losses on the value of the securities the Fund owns. As required by SEC rules, the table above assumes that the Fund is more likely to suffer capital losses than to enjoy capital appreciation. For example, to assume a total return of 0% the Fund must assume that the interest it receives on its portfolio investments is entirely offset by losses in the value of those investments.

RISK FACTORS

Risk is inherent in all investing. Investing in any investment company security involves risk, including the risk that you may receive little or no return on your investment or even that you may lose part or all of your investment. Therefore, before investing you should consider carefully the following risks that you assume when you invest in Term Preferred Shares. The section below does not describe all of the risks associated with an investment in the Fund. Additional risks and uncertainties may also adversely affect and impact the Fund.

Risks of Investing in Term Preferred Shares

Subordination Risk.

While holders of Term Preferred Shares will have equal liquidation and distribution rights to any other preferred shares that might be issued by the Fund, they will be subordinated to the rights of holders of senior indebtedness of the Fund, including the Credit Agreement or any other credit agreement in effect on such date. Therefore, dividends, distributions, payments in redemption and other payments to holders of Term Preferred Shares (i) may be blocked by the terms of the Credit Agreement or any other credit agreement in effect on such date and (ii) may be subject to prior payments due to the holders of senior indebtedness. The Fund also has the right to augment or replace the Credit Agreement with a new credit agreement in the future, and any such augmented or replacement credit agreement may contain terms that are materially different than the terms contained in the existing Credit Agreement, including terms that limit payments to holders of Term Preferred Shares.

In addition, the 1940 Act may provide debt holders with voting rights that are superior to the voting rights of preferred shares holders, including holders of Term Preferred Shares. The rights of lenders, creditors and counterparties of the Fund will also be senior to those of holders of Term Preferred Shares.

Capital Structure Risk.

As noted above, the Fund has entered into the Credit Agreement, and has an outstanding balance. The rights of lenders, such as State Street Bank and Trust Company, and any other creditors to receive payments of interest on and repayments of principal of any borrowings are senior to the rights of the Fund's equity holders, such as holders of Term Preferred Shares and Common Shares, with respect to the payment of dividends and other distributions, and upon liquidation. The Fund may not be permitted to declare dividends and other distributions with respect to the Term Preferred Shares and Common Shares or redeem Term Preferred Shares unless at such time, the Fund meets certain asset coverage requirements and no event of default or other circumstance exists under the Credit Agreement (or any other credit agreement in effect as of such date) that would limit or otherwise block payments in redemption.

Interest Rate Risk Term Preferred Shares.

Term Preferred Shares pay dividends at the Dividend Rate (as described above in Dividends and Dividend Periods Dividend Rate). The Dividend Rate will be adjusted each year in accordance with the Statement, but will not in any event be lower than the initial 1.500% Dividend Rate. Prices of fixed income investments vary inversely with changes in market yields. The market yields on securities comparable to Term Preferred Shares may increase, which would likely result in a decline in the secondary market price of Term Preferred Shares prior to the term redemption date. See Description of Term Preferred Shares Dividends and Dividend Periods.

Unlisted Shares Risk.

Because the Fund has no prior trading history for preferred shares, it is difficult to predict the trading patterns of Term Preferred Shares, including the effective costs of trading Term Preferred Shares. Moreover, Term Preferred Shares will not be listed on a stock exchange. Thus, an investment in Term Preferred Shares may be illiquid and there may be no active trading market.

Ratings Risk.

The Fund expects that, at issuance, the Term Preferred Shares will be rated at certain minimum levels by Rating Agencies designated by the Board of Trustees, and that such ratings will be a requirement of issuance of such Shares by the underwriter pursuant to an underwriting agreement. There can be no assurance that the Term Preferred Shares will receive any particular rating from a Rating Agency, or that any such ratings will be maintained at the level originally assigned through the term of Term Preferred Shares. In the event that one or more of the Rating Agencies do not issue a rating on the Term Preferred Shares at all or at the minimum level required, the issuance and sale of Term Preferred Shares in this offering may not be completed. Ratings do not eliminate or mitigate the risks of investing in Term Preferred Shares. A rating issued by a Rating Agency (including Moody's and Fitch) is only the opinion of the entity issuing the rating at that time, and is not a guarantee as to quality, or an assurance of the future performance, of the rated security (in this case, Term Preferred Shares). In addition, the manner in which the Rating Agency obtains and processes information about a particular security may affect the Rating Agency's ability to timely react to changes in an issuer's circumstances (in this case, the Fund) that could influence a particular rating. A Rating Agency could downgrade Term Preferred Shares, which may make Term Preferred Shares less liquid in the secondary market and reduce market prices.

Early Redemption Risk.

The Fund may voluntarily redeem Term Preferred Shares or may be forced to redeem Term Preferred Shares to meet regulatory requirements and satisfy the asset coverage requirements of the Term Preferred Shares. Such redemptions may be at a time that is unfavorable to holders of Term Preferred Shares. The Fund expects to voluntarily redeem Term Preferred Shares before the Term Redemption Date to the extent that market conditions allow the Fund to issue other preferred shares or debt securities at a rate that is lower than the then-current Dividend Rate on Term Preferred Shares. For further information, see Description of Term Preferred Shares Redemption and Asset Coverage.

Tax Risks.

To qualify for the favorable U.S. federal income tax treatment generally accorded to regulated investment companies, among other things, the Fund must derive in each taxable year at least 90% of its gross income from certain prescribed sources. Additionally, in order to qualify for treatment as a regulated investment company, the Fund must meet certain distribution requirements. The failure to pay distributions could result in the Fund ceasing to qualify as a regulated investment company. Nevertheless, the Fund might not distribute all of its net investment income, and the Fund is not required to distribute any portion of its net capital gain. If for any taxable year the Fund does not qualify as a regulated investment company, all of its taxable income (including its net capital gain) would be subject to tax at regular corporate rates without any deduction for distributions to stockholders, and such distributions would be taxable as ordinary dividends to the extent of the Fund's current and accumulated earnings and profits. The value of Term Preferred Shares may be adversely affected by changes in tax rates and policies.

In addition, the Fund will treat Term Preferred Shares as equity in the Fund for federal income tax purposes. Because there is no controlling legal precedent on the classification of Term Preferred Shares as equity for federal income tax purposes, investors should be aware that the Internal Revenue Service (IRS) could assert a contrary position meaning that the IRS could attempt to classify Term Preferred Shares as debt. If the IRS prevailed on such a position, dividends paid on Term Preferred Shares (including dividends already paid) would be treated as interest payments. Although there is no controlling legal precedent, the Fund's treatment of the Term Preferred Shares as equity is consistent with the holding of a private letter ruling issued by the IRS to another regulated investment company that preferred stock similar to Term Preferred Shares qualifies as equity for federal income tax purposes. In general, private letter rulings may not be used or cited as precedent, but the courts recognize that private letter rulings reveal the interpretation put upon the statute by the IRS and that they may be helpful in establishing consistency of administrative treatment. In addition, private letter rulings are authority for purposes of determining whether there is substantial authority for the tax treatment of an item in

connection with the imposition of the accuracy-related penalty under Section 6662 of the Code. The Fund does not intend currently to seek a ruling on the equity status of Term Preferred Shares. See Tax Matters. See also the opinion of counsel included as Appendix D to the SAI.

Swap Risk.

Swap agreements are typically over-the-counter, two-party contracts entered into primarily by institutional investors for periods typically ranging from a few weeks to more than one year, where the parties agree to exchange the returns (or differentials in rates of return) earned or realized on particular predetermined investments or instruments, which may be adjusted for an interest factor. Interest rate swaps involve the exchange with another party of their respective commitments to pay or receive interest (for example, an exchange of floating rate payments for fixed-rate payments). The use of interest rate swaps is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio security transactions. Interest rate swaps do not involve the delivery of securities or other underlying assets or principal. Accordingly, the risk of loss with respect to interest rate swaps is limited to the net amount of interest payments that the Fund is contractually obligated to make. If the other party to an interest rate swap defaults, the Fund's risk of loss generally consists of the net amount of interest payments that the Fund contractually is entitled to receive. There can be no assurance that any interest rate swap entered into by the Fund, including the interest rate swap associated with the Term Preferred Shares, as described above under Use of Leverage, will have the intended effect.

Income Shortfall Risk.

The securities held in the Fund's portfolio generally pay interest based on long-term yields. Long-term, as well as intermediate-term and short-term interest rates may fluctuate. If the interest rates paid on the securities held by the Fund fall below the Dividend Rate, the Fund's ability to pay dividends on Term Preferred Shares could be jeopardized.

Credit Crisis and Liquidity Risk.

General market uncertainty and extraordinary conditions in the credit markets may impact the liquidity of the Fund's investment portfolio, which in turn, during extraordinary circumstances, could impact the Fund's distributions and/or the liquidity of the Term Redemption Liquidity Account (as described under Description of Term Preferred Shares). Further, there may be market imbalances of sellers and buyers of Term Preferred Shares during periods of extreme illiquidity and volatility. Such market conditions may lead to periods of thin trading in any secondary market for Term Preferred Shares and may make valuation of Term Preferred Shares uncertain. As a result, the spread between bid and asked prices is likely to increase significantly such that a Term Preferred Shares investor may have greater difficulty selling his or her Term Preferred Shares. Less liquid and more volatile trading environments could result in sudden and significant valuation increases or declines in Term Preferred Shares.

Inflation Risk.

Inflation is the reduction in the purchasing power of money resulting from the increase in the price of goods and services. Inflation risk is the risk that the inflation-adjusted (or real) value of an investment in Term Preferred Shares or the income from that investment will be worth less in the future. As inflation occurs, the real value of Term Preferred Shares and dividends on Term Preferred Shares declines.

Reinvestment Risk Term Preferred Shares.

Given the five-year term and potential for early redemption of Term Preferred Shares, holders of Term Preferred Shares may face an increased reinvestment risk, which is the risk that the return on an investment

purchased with proceeds from the sale or redemption of Term Preferred Shares may be lower than the return previously obtained from an investment in Term Preferred Shares.

Other Dividend Risks.

In addition to the interest rate risks noted above, the Fund may otherwise be unable to pay dividends on Term Preferred Shares in extraordinary circumstances.

Fund Level Risks

Investment and Market Risk

An investment in the Fund's Shares is subject to investment risk, including the possible loss of the entire principal amount that you invest. Your investment in Term Preferred Shares represents an indirect investment in the corporate debt obligations owned by the Fund, which generally trade in the over-the-counter markets. Your Term Preferred Shares at any point in time may be worth less than your original investment.

Market Discount from Net Asset Value

Common Shares of closed-end investment companies like the Fund have during some periods traded at prices higher than NAV and have during other periods traded at prices lower than NAV. The Fund cannot predict whether Common Shares will trade at, above or below NAV. This characteristic is a risk separate and distinct from the risk that the Fund's NAV could decrease as a result of investment activities. Holders of Common Shares bear a risk of loss to the extent that the price at which they sell their Common Shares is lower in relation to the Fund's NAV than at the time of purchase, assuming a stable NAV. The NAV per Common Share will be reduced by costs associated with any future offerings of Common or preferred shares, such as the Term Preferred Shares. The Term Preferred Shares are designed primarily for long-term investors, and you should not view the Fund as a vehicle for trading purposes.

Leverage Risk

The use of leverage created through Borrowings and issuing preferred shares, such as the Term Preferred Shares, creates an opportunity for increased net income and returns, but also creates special risks for Shareholders, including potential interest rate risks and the likelihood of greater volatility of NAV and market price of, and distributions on, the Shares. Issuance of Term Preferred Shares will increase the Fund's leverage. There is no assurance that the Fund's leveraging strategy will be successful. Changes in the value of the Funds portfolio, including risk of loss and costs attributable to Borrowings and preferred shares, such as the Term Preferred Shares, will be borne entirely by holders of Common Shares. The Fund's use of leverage can result in a greater decrease in NAV in declining markets. The Fund's use of leverage similarly can magnify the impact of changing market conditions on market prices for the Fund's Common Shares.

Edgar Filing: Nuveen Short Duration Credit Opportunities Fund - Form N-2/A

So long as the rate of distributions received from the Fund's portfolio investments purchased with the proceeds of leverage, net of applicable Fund expenses, exceeds the then current interest or dividend rate on such leverage, the investment of the proceeds of such leverage will generate more cash flow than will be needed to make interest or dividend payments. If so, the excess cash flow will be available to pay higher distributions to holders of Common Shares. However, if the rate of cash flow received from the Fund's portfolio investments purchased with the proceeds of leverage, net of applicable Fund expenses, is less than the then current interest or dividend rate on any such leverage, the Fund may be required to utilize other Fund assets to make interest or dividend payments on such leverage and this may result in reduced net investment income available for distribution to holders of Common Shares.

The Fund will use derivatives, such as interest rate swaps, to manage the Fund's effective interest rate exposure. However, the Fund cannot assure you that the use of leverage will result in a higher yield or return to Shareholders. The income benefit from leverage will be reduced to the extent that the difference narrows between the net earnings on the Fund's portfolio securities and its cost of leverage. Because of the costs of leverage, the Fund may incur losses even if the Fund has positive returns, if they are not sufficient to cover the costs of leverage. The Fund's cost of leverage includes interest on Borrowings and dividends paid on preferred shares, such as the Term Preferred Shares, as well as any one-time costs (e.g., issuance costs) and ongoing fees and expenses associated with such leverage.

Furthermore, the amount of fees paid to Nuveen Fund Advisors (which in turn pays a portion of its fees to Symphony) for investment advisory services will be higher if the Fund uses leverage because the fees will be calculated based on the Fund's Managed Assets this may create an incentive for Nuveen Fund Advisors and Symphony to leverage the Fund or increase its leverage.

The Fund may invest in the securities of other investment companies, which may themselves be leveraged and therefore present similar risks to those described above and magnify the Fund's leverage risk.

Issuer Level Risks

Issuer Credit Risk

Debt instruments in which the Fund may invest are subject to the risk of non-payment of scheduled interest or principal. Such non-payment would result in a reduction of income to the Fund, a reduction in the value of the investment and a potential decrease in the NAV of the Fund. There can be no assurance that the liquidation of any collateral securing a debt obligation would satisfy the issuer's obligation in the event of non-payment of scheduled interest or principal payments, or that such collateral could be readily liquidated. In the event of bankruptcy of an issuer, the Fund could experience delays or limitations with respect to its ability to realize the benefits of the collateral securing a debt obligation. The collateral securing a debt obligation may lose all or substantially all of its value in the event of bankruptcy of an issuer. Some debt obligations are subject to the risk that a court, pursuant to fraudulent conveyance or other similar laws, could subordinate such debt obligations to presently existing or future indebtedness of the issuer or take other action detrimental to the holders of debt obligations, including, in certain circumstances, invalidating such debt obligations or causing interest previously paid to be refunded to the issuer. If interest were required to be refunded, it would negatively affect the Fund's performance.

In evaluating the creditworthiness of issuers, Symphony may consider, and may rely in part on, analyses performed by others. Issuers may have outstanding debt obligations that are rated below investment grade by a NRSRO. NRSROs are private services that provide ratings of the credit quality of debt instruments. Ratings assigned by a NRSRO are not absolute standards of credit quality and do not evaluate market risks or the liquidity of securities. NRSROs may fail to make timely changes in credit ratings and an issuer's current financial condition may be better or worse than a rating indicates. To the extent that the issuer of a security pays a NRSRO for the analysis of its security, an inherent conflict of interest may exist that could affect the reliability of the rating. Many of the debt obligations acquired by the Fund will have been assigned ratings below investment grade quality. Because of the protective features of senior loans, Symphony believes that senior loans tend to have more favorable loss recovery rates as compared to more junior types of below investment grade debt obligations. In addition, Symphony believes there are investment opportunities in the subordinated loan segment, which it believes create the potential for attractive risk-adjusted returns. Symphony does not view ratings as the determinative factor in its investment decisions and relies more upon its credit analysis abilities.

Below Investment Grade Risk

Edgar Filing: Nuveen Short Duration Credit Opportunities Fund - Form N-2/A

The Fund invests in debt instruments that are rated below investment grade at the time of investment or that are unrated but judged by the portfolio managers to be of comparable quality. Substantially all of the Fund's portfolio likely will be invested in debt instruments of below investment grade quality. Debt instruments of

below investment grade quality are regarded as having predominately speculative characteristics with respect to the issuer's capacity to pay interest and repay principal, and are commonly referred to as junk bonds or high yield debt, which may be subject to higher price volatility and default risk than investment grade instruments of comparable terms and duration. Issuers of lower grade instruments may be highly leveraged and may not have available to them more traditional methods of financing. The prices of these lower grade instruments are typically more sensitive to negative developments, such as a decline in the issuer's revenues or a general economic downturn, than are the prices of higher grade instruments. The secondary market for lower grade instruments, including some senior loans and most subordinated loans may not be as liquid as the secondary market for more highly rated instruments, a factor which may have an adverse effect on the Fund's ability to dispose of a particular instrument. There are fewer dealers in the market for lower grade securities than for investment grade obligations. The prices quoted by different dealers for lower grade instruments may vary significantly and the spread between the bid and ask price for such instruments is generally much larger than for higher quality instruments. Under adverse market or economic conditions, the secondary market for lower grade securities could contract further, independent of any specific adverse changes in the condition of a particular issuer, and these instruments may become illiquid. As a result, the Fund could find it more difficult to sell these instruments or may be able to sell the instruments only at prices lower than if such instruments were widely traded. Prices realized upon the sale of such lower rated or unrated instruments, under these circumstances, may be less than the prices used in calculating the Fund's NAV.

Distressed and defaulted securities, including DIPs, generally present the same risks as investments in below investment grade debt instruments. However, in most cases, these risks are of a greater magnitude because of the uncertainties of investing in an issuer undergoing financial distress. An issuer of distressed securities may be in bankruptcy or undergoing some other form of financial restructuring. Interest and/or principal payments on distressed securities may be in default. Distressed securities present a risk of loss of principal value, including potentially a total loss of value. Distressed securities may be highly illiquid and the prices at which distressed securities may be sold may represent a substantial discount to what Symphony believes to be the ultimate value of such obligations.

Non-U.S. Securities Risk

Investments in securities of non-U.S. companies involve special risks not presented by investments in securities of U.S. companies, including less publicly available information about non-U.S. companies or markets due to less rigorous disclosure or accounting standards or regulatory practices; many non-U.S. markets may be smaller, less liquid and more volatile; potential adverse effects of fluctuations in controls on the value of the Fund's investments; the economies of non-U.S. countries may grow at slower rates than expected or may experience a downturn or recession; the impact of economic, political, social or diplomatic events; possible seizure of a company's assets; restrictions imposed by non-U.S. countries limiting the ability of non-U.S. issuers to make payments of principal and/or interest and withholding and other non-U.S. taxes may decrease the Fund's return. These risks are more pronounced to the extent that the Fund invests a significant amount of its assets in companies located in one region and to the extent that the Fund invests in securities of issuers in emerging markets. To the extent the Fund invests in depositary receipts, the Fund will be subject to many of the same risks as when investing directly in non-U.S. securities. The holder of an unsponsored depositary receipt may have limited voting rights and may not receive as much information about the issuer of the underlying securities as would the holder of a sponsored depositary receipt. The Fund's income from non-U.S. issuers may be subject to non-U.S. withholding taxes. In some countries, the Fund also may be subject to taxes on trading profits and, on certain securities transactions, transfer or stamp duties tax. To the extent foreign income taxes are paid by the Fund, it is unlikely that U.S. Shareholders will be able to claim a credit or deduction for U.S. federal income tax purposes. See Tax Matters.

Risks of investing in emerging markets issuers include: smaller market capitalization of securities markets, which may suffer periods of relative illiquidity; significant price volatility; restrictions on foreign investment; and possible restrictions on repatriation of investment income and capital. In addition, foreign investors may be

required to register the proceeds of sales and future economic or political crises could lead to price controls, forced mergers, expropriation or confiscatory taxation, seizure, nationalization, or creation of government monopolies. Inflation and rapid fluctuations in inflation rates have had, and may continue to have, negative effects on the economies and securities markets of certain emerging market countries. Certain emerging markets also may face other significant internal or external risks, including a heightened risk of war, and ethnic, religious and racial conflicts. In addition, governments in many emerging market countries participate to a significant degree in their economies and securities markets, which may impair investment and economic growth, and which may in turn diminish the value of the companies in those markets.

Security Level Risks

Senior Loan Risk

Senior loans hold the most senior position in the capital structure of a business entity, are typically secured with specific collateral and have a claim on the assets and/or stock of the Borrower that is senior to that held by subordinated debt holders and stockholders of the Borrower. Senior loans that the Fund intends to invest in are usually rated below investment grade, and share the same risks of other below investment grade debt instruments.

Although the Fund invests primarily in senior loans that are secured by specific collateral, there can be no assurance the liquidation of such collateral would satisfy a Borrower's obligation to the Fund in the event of Borrower default or that such collateral could be readily liquidated under such circumstances. If the terms of a senior loan do not require the Borrower to pledge additional collateral in the event of a decline in the value of the already pledged collateral, the Fund will be exposed to the risk that the value of the collateral will not at all times equal or exceed the amount of the Borrower's obligations under the senior loan.

In the event of bankruptcy of a Borrower, the Fund could also experience delays or limitations with respect to its ability to realize the benefits of any collateral securing a senior loan. If a secured loan is foreclosed, the Fund would likely bear the costs and liabilities associated with owning and disposing of the collateral. The collateral may be difficult to sell and the Fund would bear the risk that the collateral may decline in value while the Fund is holding it. Some senior loans are subject to the risk that a court, pursuant to fraudulent conveyance or other similar laws, could subordinate the senior loans to presently existing or future indebtedness of the Borrower or take other action detrimental to lenders, including the Fund. Such court action could under certain circumstances include invalidation of senior loans.

Loan interests may not be considered securities, and purchasers, such as the Fund, therefore may not be entitled to rely on the anti-fraud protections of the federal securities laws.

Second Lien Loans and Unsecured Loans Risk

Second lien loans and unsecured loans generally are subject to the same risks associated with investments in senior loans, as discussed above. Because second lien loans and unsecured loans are lower in priority of payment to senior loans, they are subject to the additional risk that the cash flow of the Borrower and property securing the loan, if any, may be insufficient to meet scheduled payments after giving effect to the senior secured obligations of the Borrower. This risk is generally higher for unsecured loans, which are not backed by a security interest in any specific collateral. Second lien loans and unsecured loans are expected to have greater price volatility than senior loans and may be less liquid. Second lien loans and unsecured loans of below investment grade quality also share the same risks of other below investment grade debt instruments.

Subordinated Loans and Other Subordinated Debt Instruments

Issuers of subordinated loans and other subordinated debt instruments in which the Fund may invest usually will have, or may be permitted to incur, other debt that ranks equally with, or senior to, the subordinated loans or other subordinated debt instruments. By their terms, such debt instruments may provide that the holders are

entitled to receive payment of interest or principal on or before the dates on which the Fund is entitled to receive payments in respect of subordinated loans or other subordinated debt instruments in which it invests. Also, in the event of insolvency, liquidation, dissolution, reorganization or bankruptcy of an issuer, holders of debt instruments ranking senior to the subordinated loan or other debt instrument in which the Fund invests would typically be entitled to receive payment in full before the Fund receives any distribution in respect of its investment. After repaying such senior creditors, such issuer may not have any remaining assets to use for repaying its obligation to the Fund. In the case of debt ranking equally with subordinated loans or other subordinated debt instruments in which the Fund invests, the Fund would have to share on an equal basis any distributions with other creditors holding such debt in the event of an insolvency, liquidation, dissolution, reorganization or bankruptcy of the relevant issuer. In addition, the Fund will likely not be in a position to control any issuer by investing in its debt instruments. As a result, the Fund will be subject to the risk that an issuer in which it invests may make business decisions with which the Fund disagrees and the management of such issuer, as representatives of the holders of their common equity, may take risks or otherwise act in ways that do not serve the Fund's interests as a debt investor.

Risk of Settlement Delays

Portfolio transactions in loans may settle in as short as seven days but typically can take up to two or three weeks, and in some cases much longer. Unlike the securities markets, there is no central clearinghouse for loan transactions, and the loan market has not established enforceable settlement standards or remedies for failure to settle.

Loans Not Considered Securities

Loan interests may not be considered securities, and purchasers, such as the Fund, therefore may not be entitled to rely on the anti-fraud protections of the federal securities laws.

Interest Rate Risk

Interest rate risk is the risk that fixed rate debt instruments will decline in value because of changes in market interest rates. When interest rates rise, the value of a fund invested in fixed rate obligations can be expected to decline. Conversely, when interest rates decline, the value of a fund invested in fixed rate obligations can be expected to rise. The Fund's investments in such fixed rate instruments means that the NAV of the Fund and market price of the Shares will tend to decline if market interest rates rise. Market interest rates in the U.S. and in certain other countries in which the Fund may invest are near historically low levels. Because interest rates on most adjustable rate instruments typically only reset periodically (*e.g.*, monthly or quarterly), a sudden and significant increase in market interest rates may cause a decline in the value of these investments and in the Fund's NAV.

Risks in Loan Valuation

The Fund utilizes independent pricing services approved by the Board of Trustees to value portfolio instruments at their market value. If the pricing services are unable to provide a market value or if a significant event occurs such that the valuation(s) provided are deemed unreliable, the Fund may value portfolio instrument(s) at their fair value, which is generally the amount an owner might reasonably expect to receive upon a current sale. Valuation risks associated with investing in adjustable rate corporate debt instruments include, but are not limited to: a limited number of market participants, a lack of publicly-available information, resale restrictions, settlement delays, corporate actions and adverse market conditions which may make it difficult to value or sell such instruments.

Senior Loan Agent Risk

A financial institution's employment as an Agent under a senior loan might be terminated in the event that it fails to observe a requisite standard of care or becomes insolvent. A successor Agent would generally be

appointed to replace the terminated Agent, and assets held by the Agent under the loan agreement would likely remain available to holders of such indebtedness. However, if assets held by the terminated Agent for the benefit of the Fund were determined to be subject to the claims of the Agent's general creditors, the Fund might incur certain costs and delays in realizing payment on a senior loan or loan participation and could suffer a loss of principal and/or interest. In situations involving other interposed financial institutions (*e.g.*, an insurance company or government agency) similar risks may arise.

Loan Participation Risk

The Fund may purchase a participation interest in a loan and by doing so acquire some or all of the interest of a bank or other lending institution in a loan to a Borrower. A participation typically will result in the Fund having a contractual relationship only with the Lender, not the Borrower. As a result, the Fund assumes the credit risk of the Lender selling the participation in addition to the credit risk of the Borrower. By purchasing a participation, the Fund will have the right to receive payments of principal, interest and any fees to which it is entitled only from the Lender selling the participation and only upon receipt by the Lender of the payments from the Borrower. In the event of insolvency or bankruptcy of the Lender selling the participation, the Fund may be treated as a general creditor of the Lender and may not have a senior claim to the Lender's interest in the loan. If the Fund only acquires a participation in the loan made by a third party, the Fund may not be able to control the exercise of any remedies that the Lender would have under the loan. Such third party participation arrangements are designed to give loan investors preferential treatment over high yield investors in the event of a deterioration in the credit quality of the Borrower. Even when these arrangements exist, however, there can be no assurance that the principal and interest owed on the loan will be repaid in full.

Prepayment Risk

During periods of declining interest rates or for other purposes, issuers may exercise their option to prepay principal earlier than scheduled, forcing the Fund to reinvest in lower yielding instruments. This is known as call or prepayment risk. Prepayments cannot be predicted with accuracy. Loans in particular may be subject to early prepayment and thus the actual maturity of loans is typically shorter than their stated final maturity calculated solely on the basis of the stated life and payment schedule. In addition, below investment grade debt instruments frequently have call features that allow an issuer to redeem an instrument at dates prior to its stated maturity at a specified price (typically greater than par) only if certain prescribed conditions are met (commonly referred to as call protection). An issuer may redeem a lower grade instrument if, for example, the issuer can refinance the debt at a lower cost due to declining interest rates or an improvement in the credit standing of the issuer. Senior loans typically have no such call protection. For premium bonds (bonds acquired at prices that exceed their par or principal value) purchased by the Fund, prepayment risk may be increased.

Short Exposure Risk

The Fund may enter into tactical short positions, either directly or through derivatives, to create negative investment exposure to or hedge existing investment exposure. Short selling involves selling securities that may be owned, and if not owned, borrowing the same securities for delivery to the purchaser, with an obligation to replace the borrowed securities at a later date. Short selling allows the short seller to profit from declines in market prices to the extent such declines exceed the transaction costs and the costs of borrowing the securities. A short sale creates the risk of an unlimited loss, in that the price of the underlying security could theoretically increase without limit, thus increasing the cost of buying those securities to cover the short position. There can be no assurance that the securities necessary to cover a short position will be available for purchase. Purchasing securities to close out the short position can itself cause the price of the securities to rise further, thereby exacerbating the loss. The success of the Fund's short selling to create negative investment exposure is dependent on Symphony's ability to correctly determine which investments are likely to decline in value, either in absolute terms or relative to corresponding long positions in the portfolio, which may be different than Symphony's ability to invest in long portfolio positions.

Structured Product Risk

The Fund may invest in structured products such as structured notes. As a fundamental policy, the Fund will not invest in collateralized loan obligations. Holders of structured products bear risks of the underlying investments, index or reference obligation and are subject to counterparty risk. The Fund may have the right to receive payments to which it is entitled only from the structured product, and generally does not have direct rights against the issuer or the entity that sold assets to the special purpose trust. While certain structured products enable the investor to acquire interests in a pool of securities without the brokerage and other expenses associated with directly holding the same securities, investors in structured products generally pay their share of the structured product's administrative and other expenses. When investing in structured products, it is impossible to predict whether the underlying index or prices of the underlying securities will rise or fall, but prices of the underlying indices and securities (and, therefore, the prices of structured products) will be influenced by the same types of political and economic events that affect particular issuers of securities and capital markets generally. Certain structured products may be thinly traded or have a limited trading market and may have the effect of increasing the illiquidity of the Fund's portfolio to the extent that the Fund, at a particular point in time, may be unable to find qualified buyers for these securities. Investments in structured notes involve risks including income risk, credit and market risk. Where the Fund's investments in structured notes are based upon the movement of one or more factors, including interest rates, referenced bonds and stock indices, depending on the factor used and the use of multipliers or deflators, changes in interest rates and movement of the factor may cause significant price fluctuations. Additionally, changes in the reference instrument or security may cause the interest rate on the structured note to be reduced to zero and any further changes in the reference instrument may then reduce the principal amount payable on maturity. Structured notes may be less liquid than other types of securities and more volatile than the reference instrument or security underlying the note.

Warrants and Equity Securities Risk

Investments in warrants and equity securities entail certain risks in addition to those associated with investments in adjustable rate instruments or other debt instruments. The value of warrants and equity securities may be affected more rapidly, and to a greater extent, by company-specific developments and general market conditions. These risks may increase fluctuations in the Fund's NAV. The Fund may possess material non-public information about an issuer as a result of its ownership of an adjustable rate instrument or other debt instrument of such issuer. Because of prohibitions on trading in securities of issuers while in possession of such information, the Fund might be unable to enter into a transaction in a security of such an issuer when it would otherwise be advantageous to do so.

Duration Risk

Duration is the sensitivity, expressed in years, of the price of a fixed income security to changes in the general level of interest rates (or yields). Securities with longer durations tend to be more sensitive to interest rate (or yield) changes than securities with shorter durations. Duration differs from maturity in that it considers potential changes to interest rates, and a security's coupon payments, yield, price and par value and call features, in addition to the amount of time until the security matures. The duration of a security will be expected to change over time with changes in market factors and time to maturity. The duration of the Fund's portfolio is not subject to any limits and therefore the portfolio may be very sensitive to interest rate changes.

Zero Coupon Bonds Risk

The market prices of zero coupon bonds of below investment grade quality will normally be affected to a greater extent by interest rate changes, and therefore tend to be more volatile than securities which pay interest currently and in cash.

Floating-Rate and Fixed-to-Floating-Rate Securities Risk

The market value of floating-rate securities is a reflection of discounted expected cash flows based on expectations for future interest rate resets. The market value of such securities may fall in a declining interest rate environment and may also fall in a rising interest rate environment if there is a lag between the rise in interest rates and the reset. This risk may also be present with respect to fixed-to-floating-rate securities in which the Fund may invest. A secondary risk associated with declining interest rates is the risk that income earned by the Fund on floating-rate and fixed-to-floating-rate securities will decline due to lower coupon payments on floating rate securities.

When-Issued and Delayed Delivery Transactions Risk

When-issued and delayed-delivery transactions may involve an element of risk because no interest accrues on the securities prior to settlement and, because securities are subject to market fluctuations, the value of the securities at time of delivery may be less (or more) than their cost. A separate account of the Fund will be established with its custodian consisting of cash equivalents or liquid securities having a market value at all times at least equal to the amount of any delayed payment commitment.

Illiquid Securities Risk

The Fund may invest in securities and other instruments that, at the time of investment, are illiquid. Illiquid securities are securities that are not readily marketable and may include some restricted securities, which are securities that may not be resold to the public without an effective registration statement under the 1933 Act or, if they are unregistered, may be sold only in a privately negotiated transaction or pursuant to an exemption from registration. Illiquid securities involve the risk that the securities will not be able to be sold at the time desired by the Fund or at prices approximating the value at which the Fund is carrying the securities on its books.

Other Risks Associated With Loans

Many senior loans, second lien loans and other loans in which the Fund invests may not be rated by a NRSRO, will not be registered with the SEC or any state securities commission and will not be listed on any national securities exchange. To the extent that a secondary market does exist for certain loans, the market for them may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods. In addition, the amount of public information available with respect to loans generally may be less extensive than that available for registered or exchange listed securities. As a result, the Fund is particularly dependent on the analytical abilities of Symphony with respect to investments in such loans. Symphony's judgment about the credit quality of a Borrower may be wrong. Economic and other events (whether real or perceived) can reduce the demand for certain loans or loans generally, which may reduce market prices and cause the Fund's NAV to fall. The frequency and magnitude of such changes cannot be predicted. No active trading market may exist for some senior loans and some loans may be subject to restrictions on resale. A secondary market may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods, which may impair the ability to realize full value and thus cause a material decline in the Fund's NAV. During periods of limited supply and liquidity of loans, the Fund's yield may be lower. Other factors (including, but not limited to, rating downgrades, credit deterioration, a large downward movement in stock prices, a disparity in supply and demand of certain loans and other securities or market conditions that reduce liquidity) can reduce the value of loans and other debt obligations, impairing the Fund's NAV.

Derivatives Risk, Including the Risk of Swaps

Edgar Filing: Nuveen Short Duration Credit Opportunities Fund - Form N-2/A

The Fund's use of derivatives involves risks different from, and possibly greater than, the risks associated with investing directly in the investments underlying the derivatives. The risks associated with derivatives include (i) the imperfect correlation between the value of such instruments and the underlying assets, (ii) the possible default of the counterparty to the transaction, (iii) illiquidity of the derivative instruments, and (iv) high

volatility losses caused by unanticipated market movements, which are potentially unlimited. Whether the Fund's use of derivatives is successful will depend on, among other things, if Nuveen Fund Advisors and Symphony correctly forecast market values, interest rates and other applicable factors. If Nuveen Fund Advisors and Symphony incorrectly forecast these and other factors, the investment performance of the Fund will be unfavorably affected. In addition, the derivatives market is largely unregulated. It is possible that developments in the derivatives market could adversely affect the Fund's ability to successfully use derivative instruments.

The Fund is subject to the credit risk that its counterparty (whether a clearing corporation in the case of exchange traded instruments or another third party in the case of over-the-counter instruments) may be unable to meet its obligations. In addition, there is a risk of loss by the Fund of margin deposits in the event of the bankruptcy of the dealer with whom the Fund has an open position in an option or futures or forward contract. Derivative instruments traded in foreign markets may offer less liquidity and greater credit risk than comparable instruments traded in domestic markets. The ability of the Fund to close out its positions also may be affected by exchange imposed daily trading limits on options and futures contracts. If the Fund is unable to close out a position, it will be unable to realize its profit or limit its losses until such time as the option becomes exercisable or expires or the futures or forward contract terminates, as the case may be. The inability to close out options, futures and forward positions could also have an adverse impact on the Fund's ability to use derivative instruments as a hedging strategy.

The Fund may enter into debt-related derivatives instruments including credit default swap contracts and interest rate swaps. The Fund may enter into total return swaps on an underlying index to create investment exposure. Like most derivative instruments, the use of swaps is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. Credit default and total return swap agreements may effectively add leverage to the Fund's portfolio. Total return swap agreements are subject to the risk that a counterparty will default on its payment obligations to the Fund thereunder. In addition, the use of swaps requires an understanding by Nuveen Fund Advisors and Symphony not only of the referenced asset, rate or index, but also of the swap itself. Because they are two-party contracts and because they may have terms of greater than seven days, swap agreements may be considered to be illiquid, increasing the Fund's interest rate risk. Moreover, the Fund bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default or bankruptcy of a swap agreement counterparty. It is possible that developments in the swaps market, including potential government regulation, could adversely affect the Fund's ability to terminate existing swap agreements or to realize amounts to be received under such agreements. The derivatives market, including the swaps market, is subject to a changing regulatory environment. It is possible that regulatory or other developments in the derivatives market could adversely affect the Fund's ability to successfully use derivative instruments. See also, Risk Factors Security Level Risks Counterparty Risk and Risk Factors Other Risks Hedging Risk and Hedging Transactions in the SAI.

Counterparty Risk

Changes in the credit quality of the companies that serve as the Fund's counterparties with respect to derivatives, insured securities or other transactions supported by another party's credit may affect the value of those instruments. Certain entities that have served as counterparties in the markets for these transactions have recently incurred significant losses and financial hardships including bankruptcy as a result of exposure to sub-prime mortgages and other lower quality credit investments that have experienced recent defaults or otherwise suffered extreme credit deterioration. As a result, such hardships have reduced these entities' capital and called into question their continued ability to perform their obligations under such transactions. By using derivatives or other transactions, the Fund assumes the risk that its counterparties could experience similar financial hardships. In the event of insolvency of a counterparty, the Fund may sustain losses or be unable to liquidate a derivatives position.

Call Risk

The Fund may invest in preferred securities and debt instruments, which are subject to call risk. Preferred securities and debt instruments may be redeemed at the option of the issuer, or called, before their stated maturity date. In general, an issuer will call its preferred securities or debt instruments if they can be refinanced by issuing new instruments which bear a lower interest rate. The Fund is subject to the possibility that during periods of falling interest rates, an issuer will call its high-yielding preferred securities or debt instruments. The Fund would then be forced to invest the unanticipated proceeds at lower interest rates, resulting in a decline in the Fund's income.

Issuer Credit Risk

Issuers of preferred securities and debt instruments in which the Fund may invest may default on their obligations to pay dividends, principal or interest when due. This non-payment would result in a reduction of income to the Fund, a reduction in the value of a preferred security or debt instrument experiencing non-payment and, potentially, a decrease in the NAV of the Fund. There can be no assurance that liquidation of collateral would satisfy the issuer's obligation in the event of non-payment of scheduled dividend, interest or principal or that such collateral could be readily liquidated. In the event of bankruptcy of an issuer, the Fund could experience delays or limitations with respect to its ability to realize the benefits of any collateral securing a preferred security or debt instrument. To the extent that the credit rating assigned to a security in the Fund's portfolio is downgraded, the market price and liquidity of such security may be adversely affected. Preferred securities are subordinated borrowings to bonds and debt instruments in a company's capital structure in terms of priority to corporate income and assets upon liquidation, and therefore will be subject to greater credit risk than those debt instruments.

Other Risks

Hedging Risk

The Fund's use of derivatives or other transactions to reduce risk involves costs and will be subject to Nuveen Fund Advisors and Symphony's ability to predict correctly changes in the relationships of such hedge instruments to the Fund's portfolio holdings or other factors. No assurance can be given that Nuveen Fund Advisors and Symphony's judgment in this respect will be correct. In addition, no assurance can be given that the Fund will enter into hedging or other transactions at times or under circumstances in which it may be advisable to do so.

Reinvestment Risk

Reinvestment risk is the risk that income from the Fund's portfolio will decline if and when the Fund invests the proceeds from matured, traded or called securities at market interest rates that are below the portfolio's current earnings rate.

Borrowing Risk

Edgar Filing: Nuveen Short Duration Credit Opportunities Fund - Form N-2/A

In addition to borrowing for leverage (See *Use of Leverage*), the Fund may borrow for temporary or emergency purposes, pay dividends, repurchase its shares, or clear portfolio transactions. Borrowings may exaggerate changes in the NAV of the Fund and may affect the Fund's net income. When the Fund borrows money, it must pay interest and other fees, which will reduce the Fund's returns if such costs exceed the returns on the portfolio securities purchased or retained with such borrowings. Any such borrowings are intended to be temporary. However, under certain market conditions, such borrowings might be outstanding for longer periods of time.

Regulatory Risk

To the extent that legislation or state or federal regulators that regulate certain financial institutions impose additional requirements or restrictions with respect to the ability of such institutions to make loans, particularly in

connection with highly leveraged transactions, the availability of adjustable rate instruments for investment may be adversely affected. Further, such legislation or regulation could depress the market value of adjustable rate instruments.

Anti-Takeover Provisions

The Declaration and By-Laws include provisions that could limit the ability of other entities or persons to acquire control of the Fund or convert the Fund to open-end status. These provisions could have the effect of depriving the Shareholders of opportunities to sell their Shares at a premium over the then current market price of the Shares. See Certain Provisions in the Declaration of Trust and By-Laws.

Other Investment Companies Risk

The Fund may invest up to 10% of its Managed Assets in the securities of other investment companies. Such securities may be leveraged. As a result, the Fund may be indirectly exposed to leverage through an investment in such securities. Utilization of leverage is a speculative investment technique and involves certain risks. An investment in securities of other investment companies that are leveraged may expose the Fund to higher volatility in the market value of such securities and the possibility that the Fund's long-term returns on such securities will be diminished.

Deflation Risk

Deflation risk is the risk that prices throughout the economy decline over time, which may have an adverse effect on the market valuation of companies, their assets and revenues. In addition, deflation may have an adverse effect on the creditworthiness of issuers and may make issuer default more likely, which may result in a decline in the value of the Fund's portfolio.

Market Disruption and Geopolitical Risk

The aftermath of the wars in Iraq and Afghanistan, instability in the Middle East and terrorist attacks in the United States and around the world may have a substantial impact on the U.S. and world economies and securities markets. Terrorist attacks closed some of the U.S. securities markets in 2001, and similar events cannot be ruled out in the future. The wars and occupations, terrorism and related geopolitical risks have led, and may in the future lead, to increased short-term market volatility and may have adverse long-term effects on U.S. and world economies and markets generally. These risks may adversely affect individual issuers and securities markets, interest rates, secondary trading, investor psychology, inflation and other factors relating to the Shares.

Recent Market Conditions

The financial crisis in the United States and many foreign economies over the past several years, including the European sovereign debt and banking crises, has resulted, and may continue to result, in an unusually high degree of volatility in the financial markets, both domestic and foreign. Liquidity in some markets has decreased and credit has become scarcer worldwide.

These market conditions may continue or deteriorate further and may add significantly to the risk of short-term volatility in the Fund. In response to the crisis, the U.S. and other governments and the Federal Reserve and certain foreign central banks have taken steps to support financial markets. Where economic conditions are recovering, they are nevertheless perceived as still fragile. Withdrawal of government support, failure of efforts in response to the crisis, or investor perception that such efforts are not succeeding could adversely impact the value and liquidity of certain securities. Because the situation is widespread and largely unprecedented, it may be unusually difficult to identify both risks and opportunities using past models of the interplay of market forces, or to predict the duration of these market conditions. The severity or duration of these conditions may also be

affected by policy changes made by governments or quasi-governmental organizations. Changes in market conditions will not have the same impact on all types of securities. In addition, since 2010, the risks of investing in certain foreign government debt have increased dramatically as a result of the ongoing European debt crisis, which began in Greece and spread throughout various other European countries. These debt crises and the ongoing efforts of governments around the world to address these debt crises have also resulted in increased volatility and uncertainty in the global securities markets and it is impossible to predict the effects of these or similar events in the future on the Fund, though it is possible that these or similar events could have a significant adverse impact on the value and risk profile of the Fund. Instruments in which the Funds may invest, or the issuers of such instruments, may be affected by the new legislation and regulation in ways that are as yet unforeseeable. The Dodd-Frank Act has initiated a dramatic revision of the U.S. financial regulatory framework that will continue to unfold over several years. The Dodd-Frank Act covers a broad range of topics, including (among many others) a reorganization of federal financial regulators; a process intended to improve financial systemic stability and the resolution of potentially insolvent financial firms; new rules for derivatives trading; the creation of a consumer financial protection watchdog; the registration and additional regulation of hedge and private equity fund managers; and new federal requirements for residential mortgage loans. Many of the implementing regulations have not yet been finalized. Accordingly, the ultimate impact of the Dodd-Frank Act, including on the derivative instruments in which the Fund may invest, is not yet certain. The introduction of new international capital and liquidity requirements under Basel III, a global, voluntary regulatory standard on bank capital adequacy, stress testing and market liquidity risk, may cause lending activity within the financial services sector to be constrained as Basel III rules phase in over the next several years.

Certain Affiliations

Certain broker-dealers may be considered to be affiliated persons of the Fund, Nuveen Fund Advisors, Nuveen Investments and/or TIAA-CREF. Absent an exemption from the SEC or other regulatory relief, the Fund is generally precluded from effecting certain principal transactions with affiliated brokers, and its ability to purchase securities being underwritten by an affiliated broker or a syndicate including an affiliated broker, or to utilize affiliated brokers for agency transactions, is subject to restrictions. The Fund has not applied for and does not currently intend to apply for such relief. This could limit the Fund's ability to engage in securities transactions, purchase certain adjustable rate senior loans, if applicable, and take advantage of market opportunities.

Potential Conflicts of Interest Risk

Nuveen Fund Advisors and Symphony each provide a wide array of portfolio management and other asset management services to a mix of clients and may engage in ordinary course activities in which their respective interests or those of their clients may compete or conflict with those of the Fund. For example, Nuveen Fund Advisors and Symphony may provide investment management services to other funds and accounts that follow investment objectives similar to that of the Fund. In certain circumstances, and subject to its fiduciary obligations under the Investment Advisers Act of 1940, Symphony may have to allocate a limited investment opportunity among its clients, which include closed-end funds, open-end funds, other commingled funds, collateralized loan obligations, collateralized debt obligations, simplified employee pension accounts and other private funds. For additional information about potential conflicts of interest, and the way in which Nuveen Fund Advisors and Symphony address such conflicts, please see the Fund's SAI.

MANAGEMENT OF THE FUND

Trustees and Officers

The Board of Trustees is responsible for the Fund's Management, including supervision of the duties performed by Nuveen Fund Advisors. The names and business addresses of the trustees and officers of the Fund and their principal occupations and other affiliations during the past five years are set forth under Management of the Fund in the SAI.

Investment Adviser, Sub-Adviser and Portfolio Managers

Investment Adviser. Nuveen Fund Advisors, a registered investment adviser, is responsible for the Fund's overall investment strategy and its implementation. Nuveen Fund Advisors also is responsible for managing the Fund's business affairs and providing certain clerical, bookkeeping and other administrative services. Nuveen Fund Advisors is located at 333 West Wacker Drive, Chicago, Illinois 60606.

Nuveen Fund Advisors is a wholly-owned subsidiary of Nuveen Investments. Founded in 1898, Nuveen Investments and its affiliates had approximately \$223 billion of assets under management as of September 30, 2015. Nuveen Investments is a wholly-owned subsidiary of TIAA-CREF. TIAA-CREF is a national financial services organization with approximately \$834 billion in assets under management as of September 30, 2015, and is the leading provider of retirement services in the academic, research, medical and cultural fields. Nuveen Investments operates as a separate subsidiary within TIAA-CREF's asset management business.

Sub-Adviser. Symphony located at 555 California Street, Suite 2975, San Francisco, CA 94104, serves as the Fund's sub-adviser, pursuant to a sub-advisory agreement between Nuveen Fund Advisors and Symphony (the "Sub-Advisory Agreement"). Symphony, a registered investment adviser, commenced operations in 1994 and had approximately \$17.4 billion in assets under management as of September 30, 2015. Symphony is an indirect wholly-owned subsidiary of Nuveen Investments. Symphony oversees day-to-day investment operations of the Fund. Pursuant to the sub-advisory agreement, Symphony will be compensated for the services it provides to the fund with a portion of the management fee Nuveen Fund Advisors receives from the Fund. Nuveen Fund Advisors and Symphony retain the right to reallocate investment advisory responsibilities and fees between themselves in the future.

Portfolio Management. Gunther Stein (a "Portfolio Manager") is Chief Investment Officer and Chief Executive Office at Symphony. Prior to that, he was Director of Fixed Income Strategies. Mr. Stein is responsible for leading Symphony's fixed-income and equity investments strategies and research and overseeing firm trading. Prior to joining Symphony in 1999, Mr. Stein was a high yield portfolio manager at Wells Fargo Bank, where he managed a high yield portfolio, was responsible for investing in public high yield bonds and bank loans and managed a team of credit analysts.

Scott Caraher (a "Portfolio Manager") is a Co-Portfolio Manager and a member of Symphony's fixed-income team, and his responsibilities include portfolio management and trading for Symphony's bank loan strategies and credit and equity research for its fixed-income strategies. Prior to joining Symphony in 2002, Mr. Caraher was an Investment Banking Analyst in the industrial group at Deutsche Banc Alex Brown in New York.

Jenny Rhee (a "Portfolio Manager") joined Symphony in 2001 and since then has been responsible for trading and portfolio management of fixed-income securities. In 2008, Ms. Rhee was a Senior Vice President and Portfolio Manager at Basso Capital Management, and returned to Symphony as a Co-Portfolio Manager in 2009. Prior to initially joining Symphony, Ms. Rhee was an analyst with Epoch Partners.

Additional information about the Portfolio Managers' compensation, other accounts managed by the Portfolio Managers and the Portfolio Managers' ownership of securities in the Fund is provided in the SAI. The SAI is available free of charge by calling (800) 257-8787 or by visiting the Fund's website at www.nuveen.com. The information contained in, or that can be accessed through, the Fund's website is not part of this prospectus or the SAI.

Investment Management and Sub-Advisory Agreements

Edgar Filing: Nuveen Short Duration Credit Opportunities Fund - Form N-2/A

Investment Management Agreement. Pursuant to an investment management agreement between Nuveen Fund Advisors and the Fund (the Investment Management Agreement), the Fund has agreed to pay an annual management fee for the services and facilities provided by Nuveen Fund Advisors, payable on a monthly basis, based on the sum of a fund-level fee and a complex-level fee, as described below.

Edgar Filing: Nuveen Short Duration Credit Opportunities Fund - Form N-2/A

Fund-Level Fee. The annual fund-level fee for the Fund, payable monthly, is calculated according to the following schedule:

<u>Average Daily Managed Assets⁽¹⁾</u>	<u>Fund-Level Fee Rate</u>
For the first \$500 million	0.6500%
For the next \$500 million	0.6375%
For the next \$500 million	0.6250%
For the next \$500 million	0.6125%
For managed assets over \$2 billion	0.6000%

Complex-Level Fee. The annual complex-level fee for the Fund, payable monthly, is calculated according to the following schedule:

<u>Complex-Level Managed Asset Breakpoint Level⁽²⁾</u>	<u>Effective Rate at Breakpoint Level</u>
\$55 billion	0.2000%
\$56 billion	0.1996%
\$57 billion	0.1989%
\$60 billion	0.1961%
\$63 billion	0.1931%
\$66 billion	0.1900%
\$71 billion	0.1851%
\$76 billion	0.1806%
\$80 billion	0.1773%
\$91 billion	0.1691%
\$125 billion	0.1599%
\$200 billion	0.1505%
\$250 billion	0.1469%
\$300 billion	0.1445%

- (1) For the Fund, **Managed Assets** means the total assets of the Fund, minus the sum of its accrued liabilities (other than Fund liabilities incurred for the express purpose of creating leverage). Total assets for this purpose shall include assets attributable to the Fund's use of effective leverage (whether or not those assets are reflected in the Fund's financial statements for purposes of generally accepted accounting principles), such as, but not limited to, the portion of assets in special purpose trusts of which the Fund owns the inverse floater certificates that has been effectively financed by the trust's issuance of floating rate certificates.
- (2) The complex-level fee is calculated based upon the aggregate daily **eligible assets** of all Nuveen Funds. Eligible assets do not include assets attributable to investments in other Nuveen Funds or assets in excess of a determined amount (originally \$2 billion) added to the Nuveen fund complex in connection with Nuveen Fund Advisors' assumption of the management of the former First American Funds effective January 1, 2011. With respect to closed-end funds, eligible assets include assets managed by Nuveen Fund Advisors that are attributable to structural leverage. For these purposes, structural leverage includes the issuance of preferred stock, borrowings and certain investments in the residual interest certificates in tender option bond (TOB) trusts, including the portion of assets held by a TOB trust that has been effectively financed by issuance of floating rate securities, subject to an agreement by Nuveen Fund Advisors as to certain funds to limit the amount of such assets for determining eligible assets in certain circumstances. As of July 31, 2015, the complex-level fee rate for the Fund was 0.1639%.

In addition to the fee of Nuveen Fund Advisors, the Fund pays all other costs and expenses of its operations, including compensation of its trustees (other than those affiliated with Nuveen Fund Advisors and Symphony), custodian, transfer agency and dividend disbursing expenses, legal fees, expenses of independent auditors,

expenses of repurchasing shares, expenses associated with any Borrowings, expenses of issuing any preferred shares, expenses of preparing, printing and distributing shareholder reports, notices, proxy statements and reports to governmental agencies, and taxes, if any. All fees and expenses are accrued daily and deducted before payment of dividends to investors.

A discussion regarding the basis for the Board of Trustees' decision to renew the Investment Management Agreement for the Fund may be found in the Fund's annual report to shareholders dated July 31 of each year.

Sub-Advisory Agreement. Pursuant to the Sub-Advisory Agreement, Symphony will receive from Nuveen Fund Advisors a management fee equal to the portion specified below of the management fee payable by the Fund to Nuveen Fund Advisors, payable on a monthly basis:

<u>Average Daily Managed Assets</u>	<u>Percentage of Net Management Fee</u>
Up to \$125 million	50.0%
\$125 million to \$150 million	47.5%
\$150 million to \$175 million	45.0%
\$175 million to \$200 million	42.5%
\$200 million and over	40.0%

A discussion regarding the basis for the Board of Trustees' decision to renew the Sub-Advisory Agreement for the Fund may be found in the Fund's annual report to shareholders dated July 31 of each year.

NET ASSET VALUE

The Fund's net asset value per share is determined as of the close of regular session trading (normally 4:00 p.m., Eastern Time) on each day the NYSE is open for business. Net asset value is calculated by taking the market value of the Fund's total assets, including interest or dividends accrued but not yet collected, less all liabilities, and dividing by the total number of shares outstanding. The result, rounded to the nearest cent, is the net asset value per share. All valuations are subject to review by the Board of Trustees or its delegate.

The Fund utilizes independent pricing services approved by the Board of Trustees to value portfolio instruments at their market value. If the pricing services are unable to provide a market value or if a significant event occurs such that the valuation(s) provided are deemed unreliable, the Fund may value portfolio instrument(s) at their fair value, which is generally the amount that an owner might reasonably expect to receive upon a current sale. Valuation risks associated with investing in adjustable rate corporate debt instruments include, but are not limited to: a limited number of market participants, a lack of publicly-available information, resale restrictions, settlement delays, corporate actions and adverse market conditions which may make it difficult to value or sell such instruments. It is expected that the Fund's net asset value will fluctuate as a function of interest rate and credit factors. Because of the short-term nature of such instruments, however, the Fund's net asset value is expected to fluctuate less in response to changes in interest rates than the net asset values of investment companies with portfolios consisting primarily of longer term fixed-income instruments. Because non-U.S. instruments may trade on days when Shares are not priced, net asset value can change at times when Shares cannot be sold.

Independent pricing services typically value adjustable rate corporate debt instruments utilizing readily available market quotations obtained from broker-dealers making markets in such instruments. Other debt instruments and derivative instruments held by the Funds may be valued by

Edgar Filing: Nuveen Short Duration Credit Opportunities Fund - Form N-2/A

the pricing services utilizing a range of market-based inputs and assumptions, cash flows, transactions for comparable instruments and correlations between instruments for normal, institutional-size trading units when determining market value. Equity securities listed and trading on U.S. national securities exchanges will be valued at the last reported sales price on the principal exchange on the valuation date. Unlisted equity securities traded primarily in a U.S. over-the-counter

(OTC) market are valued at the last reported sales price on the valuation date, a quoted price as provided by an approved pricing service or market quotations obtained from brokers making markets in such securities. In the absence of readily available market quotations or, when in the opinion of Nuveen Fund Advisors and/or Symphony a significant event has occurred such that market values are deemed unreliable, portfolio instruments may be valued by the Fund at their fair value as determined in good faith by or at the direction of the Board of Trustees. A range of factors and analysis may be considered when determining fair value including relevant market data, interest rates, credit considerations and/or issuer-specific news. The Fund may rely on an independent fair valuation service in making any such fair value determinations or adjustments.

Generally, trading in many foreign securities that the Fund may hold will be substantially completed each day at various times prior to the close of the NYSE. The values of these securities used in determining the net asset value of the Fund generally will be computed as of such times. Occasionally, events affecting the value of foreign securities may occur between such times and the close of the NYSE, which will not be reflected in the computation of the Fund's net asset value (unless the Fund deems that such events would materially affect its net asset value, in which case an adjustment would be made and reflected in such computation). The Fund may rely on an independent fair valuation service in making any such adjustment. Foreign securities and currency held by the Fund will be valued in U.S. dollars; such values will be computed by the custodian based on foreign currency exchange rate quotations supplied by an independent quotation service.

DISTRIBUTIONS

For a discussion of dividends and other distributions applicable to the Term Preferred Shares, see Description of Term Preferred Shares Dividends and Dividend Periods.

The Fund pays regular monthly cash distributions to Common Shareholders at a level rate (stated in terms of a fixed cents per Common Share dividend rate) that reflects the past and projected performance of the Fund. Distributions can only be made from net investment income after paying any accrued dividends to preferred shareholders, if any, or interest and required principal payments on borrowings. The Fund does not currently have any preferred shares outstanding.

The Fund's ability to maintain a level dividend rate will depend on a number of factors. The net income of the Fund includes all interest income accrued on portfolio assets less all expenses of the Fund. Expenses of the Fund are accrued each day. For each year, the Fund will distribute all or substantially all of its net investment income. At least annually, the Fund also intends to distribute substantially all of its net capital gain (which is the excess of net long-term capital gain over net short-term capital loss) and taxable ordinary income, if any, after paying any accrued dividends or making any liquidation payments to preferred shareholders, if any preferred shares are issued in the future, and interest and required principal payments on borrowings. Although it does not now intend to do so, the Board of Trustees may change the Fund's dividend policy and the amount or timing of the distributions, based on a number of factors, including the amount of the Fund's undistributed net investment income and historical and projected investment income and the amount of the expenses and dividend rates on the outstanding preferred shares, including Term Preferred Shares, and expenses and interest on borrowings.

The Fund might not distribute all or a portion of any net capital gain for a taxable year. If the Fund does not distribute all of its net capital gain for a taxable year, it will pay federal income tax on the retained gain. Each Common Shareholder of record as of the end of the Fund's taxable year will include in income for federal income tax purposes, as long-term capital gain his or her share of the retained gain, will be deemed to have paid his or her proportionate share of the tax paid by the fund on such retained gain, and will be entitled to an income tax credit or refund for that share of the tax. The Fund will treat the retained capital gains as a substitute for equivalent cash distributions. While not currently anticipated, if the Fund makes total distributions during a given calendar year in an amount that exceeds the Fund's net investment income and capital gain for that calendar year, the excess will generally be treated by Common Shareholders as a return of capital for tax purposes.

The Fund reserves the right to change its distribution policy and the basis for establishing the rate of its monthly distributions at any time.

DESCRIPTION OF OUTSTANDING SHARES AND DEBT

Common Shares

The Declaration authorizes the issuance of an unlimited number of Common Shares. The Common Shares have a par value of \$0.01 per share and, subject to the rights of holders of preferred shares, including Term Preferred Shares issued, have equal rights to the payment of dividends and the distribution of assets upon liquidation. The Common Shares when issued, were fully paid and, subject to matters discussed in Certain Provisions in the Declaration of Trust and By-Laws, non-assessable, and have no pre-emptive or conversion rights except as may be determined by the Board of Trustees, in their sole discretion, or rights to cumulative voting. Each whole Common Share has one vote with respect to matters upon which a shareholder vote is required, and each fractional share shall be entitled to a proportional fractional vote consistent with the requirements of the 1940 Act and the rules promulgated thereunder, and will vote together as a single class. Whenever the Fund incurs borrowings and/or preferred shares are outstanding, Common Shareholders will not be entitled to receive any cash distributions from the Fund unless all interest on such borrowings has been paid and all accrued dividends on preferred shares have been paid, unless asset coverage (as defined in the 1940 Act) with respect to any borrowings would be at least 300% after giving effect to the distributions and asset coverage (as defined in the 1940 Act) with respect to preferred shares would be at least 200% after giving effect to the distributions. See Preferred Shares below.

The Common Shares are listed on the NYSE and trade under the ticker symbol JSD, subject to notice of issuance. The Fund intends to hold annual meetings of shareholders so long as the Common Shares are listed on a national securities exchange and such meetings are required as a condition to such listing. The Fund will not issue share certificates.

Unlike open-end funds, closed-end funds like the Fund do not provide daily redemptions. Rather, if a shareholder determines to buy additional Common Shares or sell shares already held, the shareholder may conveniently do so by trading on the exchange through a broker or otherwise. Common Shares of closed-end investment companies may frequently trade on an exchange at prices lower than NAV. Common Shares of closed-end investment companies like the Fund have during some periods traded at prices higher than NAV and have during other periods traded at prices lower than NAV.

Because the market value of the Common Shares may be influenced by such factors as distribution levels (which are in turn affected by expenses), call protection, dividend stability, portfolio credit quality, NAV, relative demand for and supply of such shares in the market, general market and economic conditions, and other factors beyond the control of the Fund, the Fund cannot assure you that Common Shares are trading at a price equal to or higher than NAV in the future. The Common Shares are designed primarily for long-term investors, and investors in the Common Shares should not view the Fund as a vehicle for trading purposes. See Repurchase of Fund Shares; Conversion to Open-End Fund.

Borrowings

The Declaration authorizes the Fund, without approval of the Shareholders, to borrow money. In this connection, the Fund may issue notes or other evidence of indebtedness (including bank borrowings or commercial paper) and may secure any such Borrowings by mortgaging, pledging or otherwise subjecting as security the Fund's assets. The Fund borrows money at rates generally available to institutional investors. In connection with such Borrowings, the Fund is required to maintain minimum average balances with the lender or to pay a commitment or other fee to maintain the line of credit. These requirements increase the cost of any such Borrowings over the stated interest rate. Under the

requirements of the 1940 Act, the Fund, immediately after any

such Borrowings, must have an asset coverage of at least 300%. With respect to any such Borrowings, asset coverage means the ratio that the value of the total assets of the Fund, less all liabilities and indebtedness not represented by senior securities (as defined in the 1940 Act), bears to the aggregate amount of such Borrowings represented by senior securities issued by the Fund. Under the Credit Agreement, the Fund is subject to covenants relating to asset coverages, portfolio coverages and otherwise. In particular, the Fund may not make a redemption payment with respect to the Term Preferred Shares, in the event that Asset Coverage is less than 225%. Notwithstanding the requirements of the 1940 Act, under the Credit Agreement, the Fund cannot (i) permit the aggregate amount of total liabilities that are senior securities representing indebtedness to exceed $33\frac{1}{3}\%$ of the Fund's adjusted net assets immediately after giving effect to any Borrowings, (ii) at any time permit the aggregate amount of total liabilities that are senior securities representing indebtedness to exceed 38% of the Fund's adjusted net assets, (iii) at any time that Borrowings are outstanding under the Credit Agreement, fail to have Asset Coverage of at least 225%, or (iv) at any time that Borrowings are outstanding under the Credit Agreement, permit the Preferred Adjusted Asset Coverage (as defined below) to be less than 200%. As used herein, Preferred Adjusted Asset Coverage means Asset Coverage, but excluding any preferred shares for which an irrevocable deposit sufficient to pay the full redemption price for such preferred shares has been made. If the Fund defaults on these obligations under the Credit Agreement, the Fund is required to immediately prepay the principal amount of any Borrowings under the Credit Agreement (together with accrued interest thereon) and take other action to immediately cure such default. If any Borrowings under the Credit Agreement are outstanding and the Fund fails to have Asset Coverage of at least 225% as of the close of business on any Business Day on which Asset Coverage is required to be calculated, the Fund must, no later than the close of business on the twentieth Business Day following such event, prepay any Borrowings such that the Fund regains Asset Coverage of at least 225%. No Borrowings under the Credit Agreement may be used to make an irrevocable deposit to pay the redemption price for any preferred shares.

In addition, as with the issuance of preferred shares, certain types of Borrowings may result in the Fund being subject to certain restrictions imposed by guidelines of one or more rating agencies that may issue ratings for commercial paper or notes issued by the Fund. Such restrictions may be more stringent than those imposed by the 1940 Act.

The rights of lenders to the Fund to receive interest on and repayment of principal of any such Borrowings is senior to those of the Shareholders, and the terms of these Borrowings contain provisions which limit certain activities of the Fund, including the payment of dividends to Shareholders in certain circumstances. Further, the 1940 Act does (in certain circumstances) grant to the lenders to the Fund certain voting rights in the event of default in the payment of interest on or repayment of principal. In the event that such provisions would impair the Fund's eligibility for treatment as a regulated investment company under the Code, the Fund will attempt to repay or restructure the Borrowings to preserve that eligibility. Borrowings, including the Credit Agreement, are ranked senior or equal to all other existing and future Borrowings of the Fund. The Fund may also borrow up to an additional 5% of its total assets for temporary purposes. The Fund may also borrow money for repurchase of its shares or as a temporary measure for extraordinary or emergency situations. See *Investment Restrictions* in the SAI.

Preferred Shares

The Declaration authorizes the issuance of an unlimited number of preferred shares in one or more classes or series, with rights as determined by the Board of Trustees, by action of the Board of Trustees without the approval of the Common Shareholders. The Fund is currently offering the Term Preferred Shares. Each preferred share, including each Term Preferred Share, ranks on parity with respect to the payment of dividends and the distribution of assets upon liquidation. Under the 1940 Act, the Term Preferred Shares are considered to be a separate series of preferred shares of the Fund, and are not considered to be a separate class of securities.

Limited Issuance of Preferred Shares. Under the 1940 Act, the Fund may issue preferred shares, such as the Term Preferred Shares, with an aggregate liquidation value of up to one-half of the value of the Fund's total

net assets, including any liabilities associated with borrowings, measured immediately after issuance of the preferred shares. Liquidation value means the original purchase price of the shares being liquidated plus any accrued and unpaid dividends. In addition, the Fund is not permitted to declare any cash dividend or other distribution on its Common Shares unless the liquidation value of the preferred shares, such as the Term Preferred Shares, is less than one-half of the value of the Fund's total net assets (determined after deducting the amount of such dividend or distribution) immediately after the distribution.

For a discussion of Term Preferred Shares, see "Description of Term Preferred Shares" above.

CERTAIN PROVISIONS IN THE DECLARATION OF TRUST AND BY-LAWS

Under Massachusetts law, shareholders could, under certain circumstances, be held personally liable for the obligations of the Fund. However, the Declaration contains an express disclaimer of shareholder liability for debts or obligations of the Fund and requires that notice of such limited liability be given in each agreement, obligation or instrument entered into or executed by the Fund or the trustees. The Declaration further provides for indemnification out of the assets and property of the Fund for all loss and expense of any shareholder held personally liable for the obligations of the Fund. Thus, the risk of a shareholder incurring financial loss on account of shareholder liability is limited to circumstances in which the Fund would be unable to meet its obligations. The Fund believes that the likelihood of such circumstances is remote.

The Declaration includes provisions that could limit the ability of other entities or persons to acquire control of the Fund or to convert the Fund to open-end status. Specifically, the Declaration requires a vote by holders of at least two-thirds of the Common Shares and preferred shares, including Term Preferred Shares, voting together as a single class, except as described below, to authorize (1) a conversion of the Fund from a closed-end to an open-end investment company, (2) a merger or consolidation of the Fund, or a series or class of the Fund, with any corporation, association, trust or other organization or a reorganization of the Fund, or a series or class of the Fund, (3) a sale, lease or transfer of all or substantially all of the Fund's assets (other than in the regular course of the Fund's investment activities), (4) in certain circumstances, a termination of the Fund, or a series or class of the Fund, or (5) a removal of trustees by shareholders (except at the end of a trustee's term), and then only for cause¹, unless, with respect to (1) through (4), such transaction has already been authorized by the affirmative vote of two-thirds of the total number of trustees fixed in accordance with the Declaration or the By-Laws, in which case the affirmative vote of the holders of at least a majority of the Fund's Common Shares and preferred shares, including Term Preferred Shares, outstanding at the time, voting together as a single class, is required; provided, however, that where only a particular class or series is affected (or, in the case of removing a trustee, when the trustee has been elected by only one class), only the required vote by the applicable class or series will be required. Approval of shareholders is not required, however, for any transaction, whether deemed a merger, consolidation, reorganization or otherwise whereby the Fund issues shares in connection with the acquisition of assets (including those subject to liabilities) from any other investment company or similar entity. In the case of the conversion of the Fund to an open-end investment company, or in the case of any of the foregoing transactions constituting a plan of reorganization which adversely affects the holders of preferred shares, including Term Preferred Shares, the action in question will also require the affirmative vote of the holders of at least two-thirds of the Fund's preferred shares, including Term Preferred Shares, outstanding at the time, voting as a separate class, or, if such action has been authorized by the affirmative vote of two-thirds of the total number of trustees fixed in accordance with the Declaration or the By-Laws, the affirmative vote of the holders of at least a majority of the Fund's preferred shares, including Term Preferred Shares, outstanding at the time, voting as a separate class. None of the foregoing provisions may be amended except by the vote of at least two-thirds of the Common Shares and preferred shares, including Term Preferred Shares, voting together as a single class. The votes required to approve the conversion of the Fund from a closed-end to an open-end investment company or to

¹ Vacancies caused by the death, resignation, retirement, removal or disqualification of a trustee may be filled in any manner that is consistent with the Declaration and applicable law.

approve transactions constituting a plan of reorganization which adversely affects the holders of preferred shares, including Term Preferred Shares, are higher than those required by the 1940 Act. The Board of Trustees believes that the provisions of the Declaration relating to such higher votes are in the best interest of the Fund and its shareholders. Under the Fund's By-Laws, the Board of Trustees is divided into three classes and such a staggered board could delay for up to two years the replacement of a majority of the Board of Trustees. See the SAI under Certain Provisions in the Declaration of Trust and By-Laws.

The provisions of the Declaration described above could have the effect of depriving the shareholders of opportunities to sell their Shares at a premium over the then current market price of the Shares by discouraging a third party from seeking to obtain control of the Fund in a tender offer or similar transaction. The overall effect of these provisions is to render more difficult the accomplishment of a merger or the assumption of control by a third party. They provide, however, the advantage of potentially requiring persons seeking control of the Fund to negotiate with its management regarding the price to be paid and facilitating the continuity of the Fund's investment objective and policies. The Board of Trustees has considered the foregoing anti-takeover provisions and concluded that they are in the best interests of the Fund and its shareholders.

Reference should be made to the Declaration and By-Laws on file with the SEC for the full text of these provisions.

REPURCHASE OF FUND SHARES; CONVERSION TO OPEN-END FUND

The Fund is a closed-end investment company and as such its shareholders will not have the right to cause the Fund to redeem their shares. Instead, the Shares trade in the open market at a price that is a function of several factors, including dividend levels (which are in turn affected by expenses), NAV, call protection, dividend stability, portfolio credit quality, relative demand for and supply of such shares in the market, general market and economic conditions and other factors. Because shares of closed-end investment companies may frequently trade at prices lower than NAV, the Board of Trustees has currently determined that, at least annually, it will consider action that might be taken to reduce or eliminate any material discount from NAV in respect of Common Shares, which may include the repurchase of such shares in the open market or in private transactions, the making of a tender offer for such shares at NAV, or the conversion of the Fund to an open-end investment company. The Fund cannot assure you that its Board of Trustees will decide to take any of these actions, or that share repurchases or tender offers will actually reduce market discount. The Fund will be unable to repurchase its Common Shares if it does not meet certain asset coverage requirements relating to outstanding preferred stock.

If the Fund converted to an open-end investment company, it would be required to redeem all preferred shares, including Term Preferred Shares, then outstanding (requiring in turn that it liquidate a portion of its investment portfolio), and the Common Shares would no longer be listed on the NYSE. In contrast to a closed-end investment company, shareholders of an open-end investment company may require the company to redeem their shares at any time (except in certain circumstances as authorized by or under the 1940 Act) at their NAV, less any redemption charge that is in effect at the time of redemption. See the SAI under Certain Provisions in the Declaration of Trust and By-Laws for a discussion of the voting requirements applicable to the conversion of the Fund to an open-end investment company.

Before deciding whether to take any action if the Common Shares trade below NAV, the Board would consider all relevant factors, including the extent and duration of the discount, the liquidity of the Fund's portfolio, the impact of any action that might be taken on the Fund or its shareholders, and market considerations. Based on these considerations, even if the Fund's shares should trade at a discount, the Board of Trustees may determine that, in the interest of the Fund and its shareholders, no action should be taken. See the SAI under Repurchase of Fund Shares; Conversion to Open-End Fund for a further discussion of possible action to reduce or eliminate such discount to NAV. On November 16, 2011, the Board of Trustees approved an open market share repurchase program under which the Fund may repurchase up to 10% of its Common Shares. To date, the Fund has not repurchased any Common Shares under the program.

TAX MATTERS

The following information is meant as a general summary for U.S. shareholders. Please see the SAI for additional information. Investors should rely on their own tax advisers for advice about the particular federal, state and local tax consequences to them of investing in the Fund.

The Fund intends to qualify for the special tax treatment afforded to regulated investment companies (RICs) under the Code. As long as the Fund qualifies for treatment as a regulated investment company, it pays no federal income tax on the earnings it distributes to Shareholders. The Fund has received an opinion from its tax counsel that, subject to certain assumptions and conditions, and based upon certain representations made by the Fund, including representations regarding the nature of the Fund's assets and the conduct of the Fund's business, for federal income tax purposes Term Preferred Shares will qualify as equity in the Fund.

In order to qualify for treatment as a regulated investment company, the Fund must meet certain distribution requirements. Nevertheless, the Fund might not distribute all of its net investment income, and the Fund is not required to distribute any portion of its net capital gain. If the Fund qualifies for treatment as a regulated investment company but does not distribute all of its net capital gain and net investment income, it will be subject to tax on the amount retained. If the Fund retains any net capital gain, it may designate the retained amount of capital gain as undistributed capital gains in a notice to Shareholders who, if subject to federal income tax on long-term capital gains, (i) will be required to include in income for federal income tax purposes, as long-term capital gain, their share of such undistributed amount; (ii) will be deemed to have paid their proportionate shares of the tax paid by the Fund on such undistributed amount and will be entitled to credit that amount of tax against their federal income tax liabilities, if any; and (iii) will be entitled to claim refunds to the extent the credit exceeds such liabilities. For federal income tax purposes, the tax basis of Term Preferred Shares owned by a Shareholder of the Fund will be increased by an amount equal to the difference between the amount of undistributed capital gains included in the Shareholder's gross income and the tax deemed paid by the Shareholder.

Unless a Shareholder's investment in the Fund is through a tax-exempt entity or tax deferred retirement account, such as a 401(k) plan, a Shareholder will normally have to pay federal income taxes, and any state or local taxes, on the dividends and other distributions received from the Fund, whether the Shareholder takes the distributions in cash or reinvests them in additional Shares. For U.S. federal income tax purposes, distributions from the Fund's net capital gains (if any) are considered long-term capital gains and may be taxable to a Shareholder at reduced rates. Distributions from the Fund's net short-term capital gains are taxable as ordinary income. Other dividends are generally taxable as ordinary income. Since the Fund's income is derived primarily from sources that do not pay dividends, it is not expected that a substantial portion of dividends paid by the Fund will qualify for either the dividends-received deduction for corporations or the U.S. federal income tax rates available to noncorporate taxpayers on qualified dividend income. A distribution of an amount in excess of the Fund's current and accumulated earnings and profits will first be treated as a return of capital, which is applied against and reduces the Shareholder's basis in his or her Term Preferred Shares. To the extent the amount of any such distribution exceeds the Shareholder's basis in his or her Term Preferred Shares, the excess will be treated as gain from a sale or exchange of the Term Preferred Shares.

The Fund will report to Shareholders annually the U.S. federal income tax status of all Fund distributions.

If the Fund declares a dividend in October, November or December, payable to Shareholders of record in such a month, but pays it in January of the following year, Shareholders will be taxed on the dividend as if they received it in the year in which it was declared.

Unless a Shareholder's investment in the Fund is through a tax-exempt entity or tax deferred retirement account, when a Shareholder sells or exchanges Term Preferred Shares, the Shareholder will generally recognize a capital gain or capital loss in an amount equal to the difference between the net amount of sale proceeds (or, in the case of an exchange, the fair market value of the Shares) that he or she receives and his or her tax basis for the Term Preferred Shares that he or she sells or exchanges.

Investments by the Fund in zero coupon or other discount securities will result in income to the Fund equal to a portion of the excess of the face value of the securities over their issue price (the original issue discount or OID) each year that the securities are held, even though the Fund may receive no cash interest payments or may receive cash interest payments that are less than the income recognized for tax purposes. In addition, any market discount recognized on a market discount bond is taxable as ordinary income. A market discount bond is a bond acquired in the secondary market at a price below redemption value, or below adjusted issue price if issued with original issue discount. Absent an election by the Fund to include the market discount in income as it accrues, gain on the Fund's disposition of such an obligation will be treated as ordinary income rather than capital gain to the extent of the accrued market discount. Because the income required to be recognized by the Fund as a result of the OID and/or market discount rules may not be matched by a corresponding cash payment to the Fund, the Fund may be required to borrow money or dispose of securities to be able to make distributions to its Shareholders in order to qualify for treatment as a RIC and eliminate taxes at the Fund level.

A 3.8% Medicare contribution tax generally applies to all or a portion of the net investment income of a Shareholder who is an individual and not a nonresident alien for federal income tax purposes and who has adjusted gross income (subject to certain adjustments) that exceeds a threshold amount (\$250,000 if married filing jointly or if considered a surviving spouse for federal income tax purposes, \$125,000 if married filing separately, and \$200,000 in other cases). This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain Shareholders that are estates and trusts. For these purposes, interest, dividends and certain capital gains are generally taken into account in computing a Shareholder's net investment income (among other categories of income).

The repurchase, sale or exchange of Term Preferred Shares normally will result in capital gain or loss to holders of Term Preferred Shares who hold their Shares as capital assets. Generally a Shareholder's gain or loss will be long-term capital gain or loss if the Shares have been held for more than one year. Present law taxes both long-term and short-term capital gains of corporations at the rates applicable to ordinary income. For non-corporate taxpayers, however, long-term capital gains are taxed at rates of up to 20%. Short-term capital gains and other ordinary income are taxed to non-corporate taxpayers at ordinary income rates.

The Fund will be required in certain cases to withhold (as backup withholding) federal income tax from amounts payable to any Shareholder who (1) has provided the Fund either an incorrect tax identification number or no number at all, (2) is subject to backup withholding by the Internal Revenue Service for failure to properly report payments of interest or dividends, or (3) has failed to certify to the Fund that such Shareholder is not subject to backup withholding. The backup withholding rate is currently 28%.

UNDERWRITER

Under the terms and subject to the conditions contained in an underwriting agreement dated the date of this prospectus, Morgan Stanley & Co. LLC (the Underwriter) has agreed to purchase, and the Fund has agreed to sell to the Underwriter, 35,000 Term Preferred Shares.

The Underwriter is offering the Term Preferred Shares subject to its acceptance of the Term Preferred Shares from the Fund and subject to prior sale. The underwriting agreement provides that the obligation of the Underwriter to pay for and accept delivery of the Term Preferred Shares offered by this prospectus is subject to the approval of certain legal matters by its counsel and to certain other conditions. The Underwriter is obligated to take and pay for all of the Term Preferred Shares offered by this prospectus if any such Term Preferred Shares are taken.

The Underwriter initially proposes to offer part of the Term Preferred Shares directly to the public at the public offering price listed on the cover page of this prospectus and part to certain dealers at a price that represents a concession not in excess of \$ per Term Preferred Share under the public offering price. The underwriting discounts and commissions of \$7.50 per Term Preferred Share are equal to 0.75% of the public offering price. Investors must pay for any Term Preferred Shares purchased on or before November 16, 2015.

The following table shows the per share and total public offering price, underwriting discounts and commissions, and estimated offering costs and proceeds, after expenses, to the Fund.

	Per Term Preferred Share	Total
	<u> </u>	<u> </u>
Public Offering Price	\$ 1,000	\$ 35,000,000
Underwriting Discounts and Commissions	\$ 7.50	\$ 262,500
Estimated Offering Costs	\$ 13.21	\$ 462,350
Proceeds, After Expenses, to the Fund	\$ 979.29	\$ 34,275,150

The Fund anticipates that the Underwriter may from time to time act as broker and dealer in connection with the execution of its portfolio transactions after it has ceased to be Underwriter and, subject to certain restrictions, may act as such broker while it is the Underwriter.

The Underwriter and its affiliates are full service financial institutions engaged in various activities, which may include securities trading, commercial and investment banking, financial advisory, investment management, principal investment, hedging, financing and brokerage activities. The Underwriter or its affiliates, from time to time, have provided in the past, and may provide in the future, investment banking, securities trading, hedging, brokerage activities, commercial lending and financial advisory services to the Fund, its affiliates and Nuveen Fund Advisors, Symphony and their affiliates in the ordinary course of business, for which they have received, and may receive, customary fees and expenses. Morgan Stanley Capital Services LLC, an affiliate of the Underwriter, is expected to act as counterparty to an interest rate swap with the Fund. See Prospectus Summary Swap.

No action has been taken in any jurisdiction (except in the United States) that would permit a public offering of the Term Preferred Shares, or the possession, circulation or distribution of this prospectus or any other material relating to the Fund or the Term Preferred Shares where action for that purpose is required. Accordingly, the Term Preferred Shares may not be offered or sold, directly or indirectly, and neither this prospectus nor any other offering material or advertisements in connection with the Term Preferred Shares may be distributed or published, in or from any country or jurisdiction except in compliance with the applicable rules and regulations of any such country or jurisdiction.

Edgar Filing: Nuveen Short Duration Credit Opportunities Fund - Form N-2/A

The Fund, Nuveen Fund Advisors, Symphony and the Underwriter have agreed to indemnify each other against certain liabilities, including liabilities under the Securities Act of 1933.

The principal business address of the Underwriter is 1585 Broadway, New York, New York 10036.

Additional Compensation to be Paid by the Fund

The Fund has agreed to pay Morgan Stanley & Co. LLC, from its own assets, an upfront structuring fee in the amount of \$175,000 for assisting with the design and structuring of, and marketing assistance with respect to, the Term Preferred Shares, and assistance with the offering of the Term Preferred Shares, including, without limitation, views from an investor market perspective on the proposed terms of the Term Preferred Shares. The upfront structuring fee paid to Morgan Stanley & Co. LLC will not exceed 0.50% of the total public offering price of the Term Preferred Shares. The amount of this structuring fee is calculated based on the total sales of Term Preferred Shares by Morgan Stanley & Co. LLC.

CUSTODIAN, TRANSFER AGENT, DIVIDEND DISBURSING AGENT AND REDEMPTION AND PAYING AGENT

The custodian of the assets of the Fund is State Street Bank and Trust Company, One Lincoln Street, Boston, Massachusetts 02110 (Custodian). The Custodian performs custodial, fund accounting and portfolio accounting services. The Fund's transfer, shareholder services and dividend disbursing agent and redemption and paying agent is also State Street Bank and Trust Company, 250 Royall Street, Canton, Massachusetts 02021. State Street has subcontracted the transfer agency servicing and dividend disbursing and redemption and paying agency servicing of the Fund to Computershare, Inc.

LEGAL OPINIONS

Certain legal matters in connection with Term Preferred Shares will be passed upon for the Fund by K&L Gates LLP, Chicago, Illinois, and for the underwriter by Jones Day, New York, New York. K&L Gates LLP may rely as to certain matters of Massachusetts law on the opinion of Morgan, Lewis & Bockius LLP, Boston, Massachusetts.

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The audited financial statements of the Fund appearing in the Fund's Annual Report for the year ended July 31, 2015 are incorporated by reference into the Statement of Additional Information. The financial statements have been audited by KPMG LLP, an independent registered public accounting firm, as set forth in their report thereon and incorporated herein by reference. Such financial statements are incorporated by reference in reliance upon such report given on the authority of such firm as experts in accounting and auditing. KPMG LLP has not reviewed or examined any records, transactions or events after the date of such Annual Report. The principal business address of KPMG LLP is Aon Center, 200 E. Randolph Street, Suite 5500, Chicago, Illinois, 60601.

MISCELLANEOUS

To the extent that a holder of Term Preferred Shares is directly or indirectly a beneficial owner of more than 10% of any class of the Fund's outstanding shares (meaning for purposes of holders of Term Preferred Shares, more than 10% of the Fund's outstanding preferred shares), such a 10% beneficial owner would be subject to the short-swing profit rules that are imposed pursuant to Section 16 of the Securities Exchange Act of 1934, as amended (the Exchange Act) (and related reporting requirements). These rules generally provide that such a 10% beneficial owner may have to disgorge any profits made on purchases and sales, or sales and purchases, of the Fund's preferred shares (including Term Preferred Shares) within any six month time period. Investors should consult with their own counsel to determine the applicability of these rules.

AVAILABLE INFORMATION

The Fund is subject to the informational requirements of the Exchange Act and the 1940 Act and is required to file reports, proxy statements and other information with the SEC. These documents can be inspected and copied for a fee at the SEC's public reference room, 100 F Street, NE, Washington, D.C. 20549. Reports, proxy statements, and other information about the Fund can be inspected at the offices of the SEC.

This prospectus does not contain all of the information in the Fund's Registration Statement, including amendments, exhibits, and schedules. Statements in this prospectus about the contents of any contract or other document are not necessarily complete and in each instance reference is made to the copy of the contract or other document filed as an exhibit to the Registration Statement, each such statement being qualified in all respects by this reference.

Additional information about the Fund and Common Shares can be found in the Fund's Registration Statement (including amendments, exhibits, and schedules) on Form N-2 filed with the SEC. The SEC maintains a web site (<http://www.sec.gov>) that contains the Fund's Registration Statement, other documents incorporated by reference, and other information the Fund has filed electronically with the SEC, including proxy statements and reports filed under the Exchange Act. Additional information may be found on the Internet at <http://www.nuveen.com>. The information contained in, or that can be accessed through, the Fund's website is not part of this prospectus.

NUVEEN SHORT DURATION CREDIT OPPORTUNITIES FUND

333 West Wacker Drive

Chicago, Illinois 60606

STATEMENT OF ADDITIONAL INFORMATION

, 2015

Nuveen Short Duration Credit Opportunities Fund (the Fund) is a diversified, closed-end management investment company registered under the Investment Company Act of 1940, as amended (the 1940 Act). The Fund was organized on January 3, 2011.

This Statement of Additional Information (the SAI) relating to Term Preferred Shares, Series 2020 of the Fund (Term Preferred Shares) does not constitute a prospectus, but should be read in conjunction with the Fund's prospectus relating thereto dated , 2015 (the Prospectus). This SAI does not include all information that a prospective investor should consider before purchasing Term Preferred Shares. Investors should obtain and read the Prospectus prior to purchasing such shares. A copy of the Fund's Prospectus, annual and semi-annual reports to shareholders when available, and other information about the Fund may be obtained without charge by calling (800) 257-8787, by writing to the Fund or from the Fund's website (<http://www.nuveen.com>). The information contained in, or that can be accessed through, the Fund's website is not part of the Fund's Prospectus or this SAI. You may also obtain a copy of the Fund's Prospectus on the Securities and Exchange Commission's website (www.sec.gov). Capitalized terms used but not defined in this SAI have the meanings ascribed to them in the Prospectus.

INVESTMENT RESTRICTIONS

Except as described below, the Fund, as a fundamental policy, may not, without the approval of the holders of a majority of the outstanding common shares (Common Shares) and preferred shares, such as the Term Preferred Shares, (collectively, Shares) voting together as a single class, and of the holders of a majority of the outstanding preferred shares, such as the Term Preferred Shares, voting as a separate class:

- (1) Issue senior securities, as defined in the 1940 Act as amended (the 1940 Act), except as permitted by the 1940 Act;
- (2) Borrow money, except as permitted by the 1940 Act and exemptive orders granted under the 1940 Act;^{1,2}
- (3) Act as underwriter of another issuer's securities, except to the extent that the Fund may be deemed to be an underwriter within the meaning of the Securities Act of 1933, as amended (the Securities Act), in connection with the purchase and sale of portfolio securities or acting as an agent or one of a group of co-agents in originating adjustable rate securities;
- (4) Invest more than 25% of its total assets in securities of issuers in any one industry, provided, however, that such limitation shall not apply to obligations issued or guaranteed by the United States Government or by its agencies or instrumentalities, and provided further that for purposes of this limitation, the term issuer shall not include a lender selling a participation to the Fund together with any other person interpositioned between such lender and the Fund with respect to participations;³
- (5) Purchase or sell real estate, except pursuant to the exercise by the Fund of its rights under loan agreements and except to the extent that interests in securities the Fund may invest in are considered to be interests in real estate, and this shall not prevent the Fund from investing in securities of companies that deal in real estate or are engaged in the real estate business, including real estate investment trusts, and securities secured by real estate or interests therein and the Fund may hold and sell real estate or mortgages on real estate acquired through default, liquidation, or other distributions of an interest in real estate as a result of the Fund's ownership of such securities;
- (6) Purchase or sell physical commodities unless acquired as a result of ownership of securities or other instruments except pursuant to the exercise by the Fund of its rights under loan agreements and except to the extent that interests in securities the Fund may invest in are considered to be interests in commodities and this shall not prevent the Fund from purchasing or selling options, futures contracts, derivative instruments or from investing in securities or other instruments backed by physical commodities;
- (7) Make loans, except as permitted by the 1940 Act and exemptive orders granted under the 1940 Act;⁴ and Section 18(a) of the 1940 Act generally prohibits a registered closed-end fund from incurring borrowings if, immediately thereafter, the aggregate amount of its borrowings exceeds 33 1/3% of its total assets. The Fund has not applied for, and currently does not intend to apply for, any exemptive relief that would allow it to borrow outside of the limits of the 1940 Act; and

¹ Section 18(c) of the 1940 Act generally limits a registered closed-end investment company to issuing one class of senior securities representing indebtedness and one class of senior securities representing stock, except that the class of indebtedness or stock may be issued in one or more series, and promissory notes or other evidences of indebtedness issued in consideration of any loan, extension, or renewal thereof, made by a bank or other person and privately arranged, and not intended to be publicly distributed, are not deemed a separate class of senior securities.

² Section 18(a) of the 1940 Act generally prohibits a registered closed-end fund from incurring borrowings if, immediately thereafter, the aggregate amount of its borrowings exceeds 33 1/3% of its total assets.

³ For purposes of this restriction, governments and their political subdivisions are not members of any industry.

(8) With respect to 75% of the value of the Fund's total assets, purchase any securities (other than obligations issued or guaranteed by the U.S. government or by its agencies or instrumentalities), if as a result more than 5% of the Fund's total assets would then be invested in securities of a single issuer or if as a result the Fund would hold more than 10% of the outstanding voting securities of any single issuer, and provided further that for purposes of this restriction, the term "issuer" includes both the Borrower under a loan agreement and the lender selling a participation to the Fund together with any other persons interpositioned between such lender and the Fund with respect to a participation.

For the purpose of applying the limitation set forth in subparagraph (1) above, the Fund may not issue senior securities not permitted by the 1940 Act simply by describing such securities in the Prospectus.

For the purpose of applying the limitation set forth in subparagraph (8) above, a governmental issuer shall be deemed the sole issuer of a security when its assets and revenues are separate from other governmental entities and its securities are backed only by its assets and revenues. Similarly, in the case of a non-governmental issuer, such as an industrial corporation or a privately owned or operated hospital, if the security is backed only by the assets and revenues of the non-governmental issuer, then such non-governmental issuer would be deemed to be the sole issuer. Where a security is also backed by the enforceable obligation of a superior or unrelated governmental or other entity (other than a bond insurer), it shall also be included in the computation of securities owned that are issued by such governmental or other entity. Where a security is guaranteed by a governmental entity or some other facility, such as a bank guarantee or letter of credit, such a guarantee or letter of credit would be considered a separate security and would be treated as an issue of such government, other entity or bank. When a municipal security is insured by bond insurance, it shall not be considered a security that is issued or guaranteed by the insurer; instead, the issuer of such municipal security will be determined in accordance with the principles set forth above. The foregoing restrictions do not limit the percentage of the Fund's assets that may be invested in municipal securities insured by any given insurer.

Under the 1940 Act, the Fund may invest only up to 10% of its Managed Assets in the aggregate in shares of other investment companies and only up to 5% of its Managed Assets in any one investment company, provided the investment does not represent more than 3% of the voting stock of the acquired investment company at the time such shares are purchased. As a stockholder in any investment company, the Fund will bear its ratable share of that investment company's expenses, and will remain subject to payment of the Fund's management, advisory and administrative fees with respect to assets so invested. Holders of Shares would therefore be subject to duplicative expenses to the extent the Fund invests in other investment companies. In addition, the securities of other investment companies may also be leveraged and will therefore be subject to the same leverage risks described herein. As described in the Prospectus in the section entitled "Risk Factors", the net asset value and market value of leveraged shares will be more volatile and the yield to shareholders will tend to fluctuate more than the yield generated by unleveraged shares.

In addition to the foregoing fundamental investment policies, the Fund is also subject to the following non-fundamental restrictions and policies, which may be changed by the Board of Trustees. The Fund may not:

(1) Purchase securities of open-end or closed-end investment companies except in compliance with the 1940 Act or any exemptive relief obtained thereunder. The Fund will rely on representations of Borrowers in loan agreements in determining whether such Borrowers are investment companies.

(2) Purchase securities of companies for the purpose of exercising control, except to the extent that exercise by the Fund of its rights under loan agreements would be deemed to constitute exercising control.

⁴ Section 21 of the 1940 Act makes it unlawful for a registered investment company, like the Fund, to lend money or other property if (i) the investment company's policies set forth in its registration statement do not permit such a loan or (ii) the borrower controls or is under common control with the investment company. The Fund has not applied for, and currently does not intend to apply for, such exemptive relief.

The restrictions and other limitations set forth above will apply only at the time of purchase of securities and will not be considered violated unless an excess or deficiency occurs or exists immediately after and as a result of an acquisition of securities.

The Fund is subject to certain restrictions imposed by either guidelines of one or more NRSROs that may issue ratings for preferred shares, including Term Preferred Shares, commercial paper or notes, or by the lender in the case of the Credit Agreement. These guidelines may impose asset coverage or portfolio composition requirements that are more stringent than those imposed on the Fund by the 1940 Act. It is not anticipated that these covenants or guidelines would impede Symphony from managing the Fund's portfolio in accordance with the Fund's investment objective and policies.

INVESTMENT OBJECTIVE, POLICIES AND TECHNIQUES

The following information supplements the discussion of the Fund's investment objective, policies, and techniques that are described in the Prospectus.

INVESTMENT OBJECTIVE

The Fund's investment objective is to provide current income and the potential for capital appreciation. The Fund cannot assure you that it will achieve its investment objective. The Fund's investment objective is a fundamental policy of the Fund.

INVESTMENT PHILOSOPHY AND PROCESS

INVESTMENT PHILOSOPHY. Symphony believes that deep fundamental credit analysis and bottom-up portfolio construction are key to managing risk within the below investment grade corporate credit market. Symphony utilizes an industry focused approach that seeks to select the debt instruments of corporate issuers that provide attractive income opportunities and offer the potential for additional total return through the identification of near-term catalysts (such as restructurings, refinancing, mergers and acquisitions, liquidity events, management changes, rating and earnings announcements) and relative value opportunities. At the same time, Symphony's fundamental approach seeks to evaluate and minimize potential downside risks associated with below investment grade instruments. Additionally, Symphony focuses primarily on liquid securities to help implement its highly active management style, which helps the team manage and optimize risk exposures over the course of the investment cycle.

INVESTMENT PROCESS. In identifying securities for potential purchase, Symphony evaluates the universe of below investment grade corporate issuers from an industry perspective. Symphony's analysts are industry experts and will seek long and short investment opportunities across an issuer's capital structure. Symphony's investment process involves the holistic review of each investment, taking into account such factors as issuer liquidity, company and industry dynamics, relative value, potential corporate actions, and other possible positive or negative catalysts. Symphony then evaluates the identified investment candidates for liquidity constraints and other technical factors. Symphony also combines its deep industry view with a top-down macro overlay which allows the team to make tactical investments in undervalued debt instruments within appropriate sectors given industry and economic activity, and avoid or short issuers and sectors where the team has a negative outlook. The final portfolio is constructed using risk management and monitoring systems to ensure proper diversification.

INVESTMENT POLICIES

The Fund seeks to achieve its investment objective by investing primarily in a blended portfolio of below-investment grade adjustable rate corporate debt instruments, including senior secured loans, second lien loans

and other adjustable rate corporate debt instruments. Adjustable rate loans will represent the Fund's core portfolio and, as discussed below, the Fund also may make limited tactical investments in high yield debt and other debt instruments as described herein. Substantially all of the Fund's portfolio likely will be of below investment grade quality, commonly referred to as junk bonds. The Fund's short duration investment strategy seeks to maintain, under normal market circumstances, an average portfolio duration that, including the effect of leverage, will not exceed two years. Through these investments, the Fund seeks to capitalize on the credit spread opportunity (as measured by the difference in yield between below investment grade instruments and high grade benchmarks) which prevails through all phases of the interest rate cycle, and to offer the opportunity for additional income if interest rates are rising.

The Fund's portfolio will be invested primarily in adjustable rate corporate debt instruments, including senior secured loans, second lien loans, and other adjustable rate corporate debt instruments. Under normal market circumstances, the Fund invests at least 70% of its Managed Assets in adjustable rate senior loans and second lien loans. Managed Assets means the total assets of the Fund, minus the sum of its accrued liabilities (other than Fund liabilities incurred for the express purpose of creating leverage). Total assets for this purpose shall include assets attributable to the Fund's use of effective leverage. Senior loans and second lien loans are made to U.S. and non-U.S. corporations, partnerships and other business entities (Borrowers, and each, a Borrower) that operate in various industries and geographic regions. Senior loans, second lien loans and other adjustable rate instruments pay interest at rates which are determined periodically at short-term intervals on the basis of an adjustable base lending rate, primarily London Interbank Offered Rate (LIBOR), plus a premium, and therefore regarded as having short-term durations. In addition, the Fund may make limited tactical investments in high yield debt and other debt instruments as described herein.

The Fund also may enter into tactical short positions consisting primarily of high yield debt. The high yield debt instruments may have intermediate-term or even long-term durations, but investments in those instruments will not be made in a manner that will cause the Fund's average portfolio duration (including the effective leverage) to exceed two years. Short selling involves selling instruments that may be owned, and if not owned, borrowing the same instruments for delivery to the purchaser, with an obligation to replace the borrowed instruments at a later date. Short selling allows the short seller to profit from declines in market prices to the extent such declines exceed the transaction costs and the costs of borrowing the instruments.

Substantially all of the Fund's portfolio likely will be invested in corporate debt instruments that are, at the time of investment, rated below investment grade or unrated but judged by the portfolio managers to be of comparable quality. A debt instrument is considered investment grade quality if it is rated within the four highest letter grades (BBB or Baa or better) by at least one nationally recognized statistical rating organization (NRSRO) that rates such instrument (even if it is rated lower by another), or if it is unrated by any NRSRO but judged to be of comparable quality by the portfolio managers. Debt instruments of below investment grade quality are regarded as having predominately speculative characteristics with respect to the issuer's capacity to pay interest and repay principal, and are commonly referred to as junk bonds or high yield debt, which implies higher price volatility and default risk than investment grade instruments of comparable terms and duration. See Risk Factors Issuer Level Risks Issuer Credit Risk and Risk Factors Issuer Level Risks Below Investment Grade Risk in the Prospectus.

Under normal market circumstances:

The Fund invests at least 70% of its Managed Assets in adjustable rate corporate debt and instruments including senior secured loans, second lien loans, and other adjustable rate corporate debt instruments.

The Fund may make limited tactical investments in high yield debt and other debt instruments as described herein in an aggregate amount of up to 30% of its Managed Assets.

The Fund may invest up to 20% of its Managed Assets in debt instruments of non-U.S. issuers (which term for purposes of this Prospectus includes Borrowers) that are U.S. dollar or non-U.S. dollar

denominated. The Fund's Managed Assets to be invested in senior loans, second lien loans and other debt instruments of non-U.S. issuers may include debt securities of issuers located, or conducting their business, in emerging markets countries.

The Fund may enter into tactical short positions consisting primarily of high yield debt, either directly or through the use of derivatives, including credit default swaps, creating a negative investment exposure or hedging existing long (positive) investment exposure in a notional amount up to 20% of its Managed Assets. Initially, these short positions will not increase the Fund's leverage ratio or overall investment exposure because the Fund will not use any proceeds or cash from short sales to invest in additional debt instruments.

No more than 30% of the Fund's Managed Assets may be invested in debt instruments that are, at the time of investment, rated CCC+ or Caa1 or below by any NRSRO or that are unrated but judged by the portfolio managers to be of comparable quality.

The Fund may invest up to 10% of its Managed Assets in securities of other open- or closed-end investment companies (including exchange-traded funds, often referred to as ETFs) that invest primarily in securities of the types in which the Fund may invest directly.

The Fund may enter into certain derivative transactions, such as credit default swaps and interest rate swaps, as a hedging technique to protect against potential adverse changes in the market value of portfolio instruments. The Fund also may use derivatives to attempt to protect the net asset value (NAV) of the Fund, to facilitate the sale of certain portfolio instruments, to manage the Fund's effective interest rate exposure, and as a temporary substitute for purchasing or selling particular securities. The Fund also may enter into derivative transactions such as total return swaps on an underlying index to create investment exposure to the extent such transactions may facilitate implementation of the Fund's investment strategy.

Under normal market circumstances, the Fund will maintain an average duration of two years or less for its portfolio (including the effect of leverage, but after the effect of derivatives used to shorten duration). In this SAI, average duration and average portfolio duration are each defined to be the modified duration of the Fund's portfolio, which is the measure of a debt instrument's or a portfolio's price sensitivity with respect to changes in market yield adjusted to reflect the effect of the Fund's effective leverage. Prices of instruments with shorter durations tend to be less sensitive to interest rate changes than instruments with longer durations. When the average duration of the portfolio is expected to be longer than two years, the Fund will use interest rate swaps, interest rate futures or other derivative instruments to shorten such duration. For example, the Fund may use futures with an interest-bearing instrument as the underlying asset, such as a bond. Bond futures are typically used to adjust duration positions by creating offsetting positions that thereby reduce the portfolio's overall average duration. Values of instruments with shorter durations tend to be less sensitive to interest rate changes than instruments with longer durations. To the extent the Fund utilizes interest rate swaps and futures to maintain an average portfolio duration of two years or less, and such instruments do not perform as intended resulting in the Fund's portfolio behaving as if it had an average duration longer than two years, the Fund's net asset value may be more susceptible to interest rates increases than it would have had those instruments performed as intended. See the Fund's Prospectus under The Fund's Investments Portfolio Composition and Other Information Adjustable Rate Corporate Debt Instruments Senior Loans. See also Other Investments and Segregation of Assets in this SAI for additional information.

During temporary defensive periods or in order to keep the Fund's case fully invested, including during the period when the net proceeds of the offering of Shares are first being invested, the Fund may deviate from its investment policies and objective. During such periods, the Fund may invest up to 100% of its Managed Assets in short-term investments, including high quality, short-term securities or may invest in short-, intermediate-, or long-term U.S. Treasury Securities. There can be no assurance that such strategies will be successful.

The Fund cannot change its investment objective or fundamental policies without the approval of the holders of a majority of the outstanding Shares. When used with respect to particular shares of the Fund, a majority of

the outstanding Shares means (i) 67% or more of the Shares present at a meeting, if the holders of more than 50% of the Shares are present or represented by proxy, or (ii) more than 50% of the Shares, whichever is less. See Description of Outstanding Shares and Debt Preferred Shares Voting Rights in the Fund's Prospectus and in this SAI for additional information with respect to the voting rights of holders of Preferred Shares.

PORTFOLIO COMPOSITION

The following table sets forth certain information with respect to the composition of the Fund's securities as of August 31, 2015.

Portfolio Allocation*	Percent
Variable Rate Senior Loan Interests	82.4%
Corporate Bonds	11.6%
Cash and Equivalents	5.5%
Common Stocks	0.4%
Credit Default Swap	0.1%
Total	100%

* The relative percentages of the value of the investments attributable the securities could change over time as a result of rebalancing the Fund's assets by Symphony, market value fluctuations, issuance of additional shares and other events.

ADJUSTABLE RATE DEBT INSTRUMENTS

The Fund's portfolio will be invested primarily in adjustable rate corporate debt instruments, including senior secured loans, second lien loans, and other adjustable rate corporate debt instruments. Adjustable rate instruments pay interest at rates which are determined periodically at short-term intervals on the basis of an adjustable base lending rate plus a premium.

Senior Loans. Under normal market circumstances, the Fund invests at least 70% of its Managed Assets in adjustable rate senior loans and second lien loans. The Fund may invest in (i) senior loans made by banks or other financial institutions to Borrowers, (ii) assignments of such interests in senior loans, or (iii) participation interests in senior loans. Senior loans hold the most senior position in the capital structure of a Borrower, are typically secured with specific collateral and have a claim on the assets and/or stock of the Borrower that is senior to that held by subordinated debt holders and stockholders of the Borrower. The capital structure of a Borrower may include senior loans, senior and junior subordinated debt, preferred stock and common stock issued by the Borrower, typically in descending order of seniority with respect to claims on the Borrower's assets. The proceeds of senior loans primarily are used by Borrowers to finance leveraged buyouts, recapitalizations, mergers, acquisitions, stock repurchases, refinancings, internal growth and for other corporate purposes. A senior loan is typically originated, negotiated and structured by a U.S. or non-U.S. commercial bank, insurance company, finance company or other financial institution (Agent) for a lending syndicate of financial institutions which typically includes the Agent (Lenders). The Agent typically administers and enforces the senior loan on behalf of the other Lenders in the syndicate. In addition, an institution, typically but not always the Agent, holds any collateral on behalf of the Lenders. The Fund normally will rely primarily on the Agent to collect principal of and interest on a senior loan. Also, the Fund usually will rely on the Agent to monitor compliance by the Borrower with the restrictive covenants in a loan agreement.

Senior loans typically have rates of interest that are redetermined either daily, monthly, quarterly or semi-annually by reference to a base lending rate plus a premium or credit spread. These base lending rates are primarily LIBOR, and secondarily the prime rate offered by one or more major U.S. banks and the certificate of deposit rate or other base lending rates used by commercial lenders. As adjustable rate loans, the frequency of how often a senior loan resets its interest rate will impact how closely such senior loans track current market

interest rates. The senior loans held by the Fund will have a dollar-weighted average period until the next interest rate adjustment of approximately 90 days or less. As a result, as short-term interest rates increase, interest payable to the Fund from its investments in senior loans should increase, and as short-term interest rates decrease, interest payable to the Fund from its investments in senior loans should decrease. As discussed above, the Fund may utilize derivative instruments to shorten the effective interest rate redetermination period of senior loans in its portfolio.

The Fund primarily purchases senior loans by assignment from a participant in the original syndicate of Lenders or from subsequent assignees of such interests. The purchaser of an assignment typically succeeds to all the rights and obligations under the loan agreement with the same rights and obligations as the assigning Lender. Assignments may, however, be arranged through private negotiations between potential assignees and potential assignors, and the rights and obligations acquired by the purchaser of an assignment may differ from, and be more limited than, those held by the assigning Lender.

The Fund may purchase participation interests in the original syndicate making senior loans. Loan participation interests typically represent direct participations in a loan to a corporate Borrower, and generally are offered by banks or other financial institutions or lending syndicates. The Fund may participate in such syndications, or can buy part of a senior loan, becoming a part Lender. When purchasing a participation interest, the Fund assumes the credit risk associated with the corporate Borrower and may assume the credit risk associated with an interposed bank or other financial intermediary. The participation interests in which the Fund may invest may not be rated by any NRSRO.

The Fund may purchase and retain in its portfolio senior loans where payable by Borrowers that have experienced, or may be perceived to be likely to experience, credit problems, including involvement in or recent emergence from bankruptcy reorganization proceedings or other forms of debt restructuring. Such investments may provide opportunities for enhanced income as well as capital appreciation. At times, in connection with the restructuring of a senior loan either outside of bankruptcy court or in the context of bankruptcy court proceedings, the Fund may determine or be required to accept equity securities or junior debt instruments in exchange for all or a portion of a senior loan. See *Portfolio Composition* *Other Investments* *Warrants and Equity Securities*.

Second Lien Loans and Unsecured Loans. The Fund may invest in second lien loans and other unsecured loans. Such loans are made by public and private corporations and other non-governmental Borrowers for a variety of purposes. As in the case of senior loans, the Fund may purchase interests in second lien loans and unsecured loans through assignments or participations.

Second lien loans have similar characteristics as senior loans except that such interests are second in lien property rather than first. Second lien loans are second in priority of payment to one or more senior loans of the related Borrower and are typically secured by a second priority security interest or lien to or on specified collateral securing the Borrower's obligation under the interest. They typically have similar protections and rights as senior loans. Second lien loans are not (and by their terms cannot become) subordinate in priority of payment to any obligation of the related Borrower other than senior loans of such Borrower. Second lien loans may feature fixed or floating rate interest payments. Because second lien loans are second to senior loans, they present a greater degree of investment risk but often pay interest at higher rates reflecting this additional risk. In addition, second lien loans of below investment grade quality share many of the risk characteristics of other below investment grade debt instruments.

Unsecured loans generally have lower priority in right of payment compared to holders of secured interests of the Borrower. Unsecured loans are not secured by a security interest or lien to or on specified collateral securing the Borrower's obligation under the interest. Unsecured loans by their terms may be or may become subordinate in right of payment to other obligations of the Borrower, including senior loans, second lien loans and other interests. Unsecured loans may have fixed or adjustable floating rate interest payments. Because

unsecured loans are subordinate to Senior Loans and other secured debt of the Borrower, they present a greater degree of investment risk but often pay interest at higher rates reflecting this additional risk. Such investments generally are of below investment grade quality. Unsecured loans of below investment grade quality share the same risks of other below investment grade debt instruments.

Adjustable Rate Subordinated Loans. The subordinated loans in which the Fund may invest are typically privately-negotiated investments that rank subordinate in priority of payment to senior debt, such as senior loans, and are often unsecured. Because subordinated interests may rank lower as to priority of payment than senior loans and second lien loans of the Borrower, they may present a greater degree of investment risk than senior loans and second lien loans but often pay interest at higher rates reflecting this additional risk. Other than their more subordinated status, such investments have many characteristics and risks similar to senior loans and second lien loans discussed above. Subordinated interests of below investment grade quality share risks of other below investment grade debt instruments. Subordinated loans rank senior to common and preferred equity in a Borrower's capital structure. Subordinated loans may have elements of both debt and equity instruments, offering fixed or adjustable rates of return in the form of interest payments associated with senior debt, while providing lenders an opportunity to participate in the capital appreciation of a Borrower, if any, through an equity interest. This equity interest may take the form of warrants or direct equity investments which will be in conjunction with the subordinated loans. Due to their higher risk profile and often less restrictive covenants as compared to senior loans, subordinated loans generally earn a higher return than secured senior loans. The warrants associated with subordinated loans are typically detachable, which allows lenders the opportunity to receive repayment of their principal on an agreed amortization schedule while retaining their equity interest in the Borrower. Subordinated loans also may include a put feature, which permits the holder to sell its equity interest back to the Borrower at a price determined through an agreed formula. Symphony believes that there are investment opportunities in the subordinated loan segment, which it believes create the potential for attractive risk-adjusted returns.

The Fund may invest in subordinated loans that are primarily unsecured and that provide for relatively high, adjustable rates of interest, providing the Fund with significant current interest income. The subordinated loans in which the Fund may invest may have interest-only payments in the early years, with amortization of principal deferred to the later years of the subordinated loans. In some cases, the Fund may acquire subordinated loans that, by their terms, convert into equity or additional debt instruments or defer payments of interest for the first few years after issuance. Also, in some cases the subordinated loans in which the Fund may invest will be collateralized by a subordinated lien on some or all of the assets of the Borrower. Typically, subordinated loans in which the Fund may invest will have maturities of four to eight years.

The subordinated loan industry is highly specialized and the Fund will rely on Symphony and its employees' expertise in sourcing, evaluating, structuring, documenting and monitoring such investments by the Fund.

Certain Structured Notes. The Fund invests in structured notes (as defined below) that are designed to provide returns and risks that emulate those of senior loans, second lien loans and other adjustable rate corporate debt instruments.

The Fund acting as Originating Lender, Sole Lender and/or Agent. The Fund, in connection with its investments in senior secured loans, second lien loans and other loans, particularly those made to middle-market companies, may act as one of the group of lenders originating a loan (Originating Lender), may purchase the entire amount of a particular loan (Sole Lender), and may act as Agent in the negotiation of the terms of a loan and in the formation of a group of investors in a Borrower's loan.

When the Fund acts as an Originating Lender or Sole Lender it will generally participate in structuring the loan, and may share in an origination fee paid by the Borrower. When the Fund is an Originating Lender or Sole Lender it will generally have a direct contractual relationship with the Borrower, and may enforce compliance by the Borrower with the terms of the loan agreement. As Sole Lender the Fund generally also would have full voting and consent rights under the applicable loan agreement.

Acting in the capacity of an Agent with respect to a loan may subject the Fund to certain risks in addition to those associated with the Fund's role as a lender.

The Fund's ability to receive fee income also may be constrained by certain requirements for qualifying as a regulated investment company under the Internal Revenue Code of 1986, as amended (the "Code"). The Fund intends to comply with those requirements and may limit its investments in loans in which it acts as Originating Lender, Sole Lender or Agent in order to do so.

OTHER INVESTMENTS

The Fund may invest in fixed or floating rate debt instruments and other securities as described below:

The Fund may invest in structured products, such as structured notes. As a fundamental policy, the Fund will not invest in collateral loan obligations. Generally, investments in structured products are interests in entities organized and operated for the purpose of restructuring the investment characteristics of underlying investment interests or securities.

Structured Notes and Other Structured Products. The Fund may invest in structured notes issued by a financial institution. Structured notes are privately negotiated debt obligations, swap agreements or economically equivalent instruments where the principal and/or interest is determined by reference to the performance of a benchmark asset, market or interest rate (an "embedded index"), such as selected securities or loans, an index of securities or loans, or specified interest rates, or the differential performance of two assets or markets. Structured notes may be issued by corporations, including banks, as well as by governmental agencies. Structured notes frequently are assembled in the form of medium-term notes, but a variety of forms are available and may be used in particular circumstances. The terms of such structured notes normally provide that their principal and/or interest payments are to be adjusted upwards or index while the structured notes are outstanding. As a result, the interest and/or principal payments that may be made on a structured product may vary widely, depending on a variety of factors, including the volatility of the embedded index and the effect of changes in the embedded index on principal and/or interest payments. The rate of return on structured notes may be determined by applying a multiplier to the performance or differential performance of the referenced index(es) or other asset(s). Application of the multiplier involves leverage that will serve to magnify the potential for gain and the risk of loss. Symphony may utilize structured notes for investment purposes and also for risk management purposes, such as to reduce the duration and interest rate sensitivity of the Fund's portfolio. While structured notes may offer the potential for a favorable rate of return from time to time, they also entail certain risks. Structured notes may be less liquid than other debt instruments, and the price of structured notes may be more volatile. In some cases, depending on the terms of the embedded index, a structured note may provide that the principal and/or interest payments may be adjusted below zero. Structured notes also may involve significant credit risk and risk of default by the counterparty. Although structured notes are not necessarily illiquid, Nuveen Fund Advisors believes that currently most structured notes are illiquid. Like other sophisticated strategies, the Fund's use of structured notes may not work as intended. If the value of the embedded index changes in a manner other than that expected by Symphony, principal and/or interest payments received on the structured notes may be substantially less than expected.

The Fund may have the right to receive payments to which it is entitled only from the structured product, and generally does not have direct rights against the issuer or the entity that sold the assets to the structured product trust. While certain structured products enable the investor to acquire interests in a pool of securities without the brokerage and other expenses associated with directly holding the same securities, investors in structured products generally pay their share of the structured product's administrative and other expenses. Structured products may be private investment funds (structured as trusts or other types of pooled investment companies that are excluded from the definition of "investment company" under the 1940 Act by the operation of Section 3(c) (1) or 3(c) (7) thereof) or investment companies that are registered under the 1940 Act. Investment in such products involve operating expenses and fees that are in addition to the expenses and fees of the Fund,

and such expenses and fees are borne indirectly by holders of Shares. For structured products that are registered under the 1940 Act, please also see Portfolio Composition Other Investment Companies.

Debtor-In-Possession Loans (DIPs). The Fund may invest in debtor-in-possession loans (DIPs), which are newly issued loans in connection with special situation restructuring and refinancing transactions. DIPs are loans to a debtor-in-possession in a proceeding under the U.S. bankruptcy code that have been approved by the bankruptcy court. DIPs are typically adjustable rate and fully secured by a lien on the debtor's otherwise unencumbered assets or secured by a junior lien on the debtor's encumbered assets (so long as the loan is fully secured based on the most recent current valuation or appraisal report of the debtor). DIPs are often required to close with certainty and in a rapid manner in order to satisfy existing creditors and to enable the issuer to emerge from bankruptcy or to avoid a bankruptcy proceeding.

Derivatives. The Fund may engage in certain derivative instruments. Such instruments may include credit default swaps, or other derivative instruments whose prices, in Symphony's opinion, correlate with the prices of the Fund's investments. Credit default swaps may require initial premium (discount) payments as well as periodic payments (receipts) related to the interest leg of the swap or to the default of a reference obligation. If the Fund is a seller of a contract, the Fund would be required to pay the par (or other agreed upon) value of a referenced debt obligation to the counterparty in the event of a default or other credit event by the reference issuer, such as a U.S. or foreign corporate issuer, with respect to such debt obligations. In return, the Fund would receive from the counterparty a periodic stream of payments over the term of the contract provided that no event of default has occurred. If no default occurs, the Fund would keep the stream of payments and would have no payment obligations. As the seller, the Fund would be subject to investment exposure on the notional amount of the swap. If the Fund is a buyer of a contract, the Fund would have the right to deliver a referenced debt obligation and receive the par (or other agreed-upon) value of such debt obligation from the counterparty in the event of a default or other credit event (such as a credit downgrade) by the reference issuer, such as a U.S. or foreign corporation, with respect to its debt obligations. In return, the Fund would pay the counterparty a periodic stream of payments over the term of the contract provided that no event of default has occurred. If no default occurs, the counterparty would keep the stream of payments and would have no further obligations to the Fund. Interest rate swaps involve the exchange by the Fund with a counterparty of their respective commitments to pay or receive interest, such as an exchange of fixed-rate payments for floating rate payments. The Fund will usually enter into interest rate swaps on a net basis; that is, the two payment streams will be netted out in a cash settlement on the payment date or dates specified in the instrument, with the Fund receiving or paying, as the case may be, only the net amount of the two payments.

The Fund may utilize certain derivative instruments as a hedging technique to protect against potential adverse changes in the market value of portfolio securities. The Fund also may use derivatives to attempt to protect the net asset value of the Fund, to facilitate the sale of certain portfolio securities, to manage the Fund's effective interest rate exposure as a temporary substitute for purchasing or selling particular securities. From time to time, the Fund also may utilize derivative instruments to create investment exposure to the extent such derivatives may facilitate implementation of the Fund's investment strategy.

Other derivative instruments that may be used, or other transactions that may be entered into, by the Fund may include the purchase or sale of futures contracts on securities, credit-linked notes, securities indices, other indices or other financial instruments; options on futures contracts; exchange-traded and over-the-counter options on securities or indices; index linked securities; swaps; and currency exchange transactions. Some, but not all, of the derivative instruments may be traded and listed on an exchange. The positions in derivatives will be marked-to-market daily at the closing price established on the exchange or at a fair value.

There is no assurance that these derivative strategies will be available at any time or that Nuveen Fund Advisors and Symphony will determine to use them for the Fund or, if used, that the strategies will be successful.

Other Corporate Debt Instruments. Corporate debt instruments generally are used by corporations to borrow money from investors. The issuer pays the investor a fixed or variable rate of interest and normally must repay

the amount borrowed on or before maturity. Certain debt instruments in which the Fund may invest may be perpetual in that they have no maturity date and some may be convertible into equity securities of the issuer or its affiliates. The Fund may invest in debt instruments of any quality and such debt instruments may be secured or unsecured. In addition, certain debt instruments in which the Fund may invest may be subordinated to the payment of an issuer's senior debt.

U.S. Government Securities. U.S. Government securities include (1) U.S. Treasury obligations, which differ in their interest rates, maturities and times of issuance: U.S. Treasury bills (maturities of one year or less), U.S. Treasury notes (maturities of one year to ten years) and U.S. Treasury bonds (generally maturities of greater than ten years) and (2) obligations issued or guaranteed by U.S. Government agencies and instrumentalities that are supported by any of the following: (i) the full faith and credit of the U.S. Treasury, (ii) the right of the issuer to borrow an amount limited to a specific line of credit from the U.S. Treasury, (iii) discretionary authority of the U.S. Government to purchase certain obligations of the U.S. Government agency or instrumentality or (iv) the credit of the agency or instrumentality. The Fund also may invest in any other security or agreement collateralized or otherwise secured by U.S. Government securities. Agencies and instrumentalities of the U.S. Government include but are not limited to: Federal Land Banks, Federal Financing Banks, Banks for Cooperatives, Federal Intermediate Credit Banks, Farm Credit Banks, Federal Home Loan Banks, FHLMC, FNMA, GNMA, Student Loan Marketing Association, United States Postal Service, Small Business Administration, Tennessee Valley Authority and any other enterprise established or sponsored by the U.S. Government. Because the U.S. Government generally is not obligated to provide support to its instrumentalities, the Fund invests in obligations issued by these instrumentalities only if Symphony determines that the credit risk with respect to such obligations is minimal.

The principal of and/or interest on certain U.S. Government securities which may be purchased by the Fund could be (i) payable in non-U.S. currencies rather than U.S. dollars or (ii) increased or diminished as a result of changes in the value of the U.S. dollar relative to the value of non-U.S. currencies. The value of such portfolio securities may be affected favorably by changes in the exchange rate between foreign currencies and the U.S. dollar.

Commercial Paper. Commercial paper represents short-term unsecured promissory notes issued in bearer form by corporations such as banks or bank holding companies and finance companies. The rate of return on commercial paper may be linked or indexed to the level of exchange rates between the U.S. dollar and a foreign currency or currencies.

Warrants and Equity Securities. The Fund may acquire equity securities and warrants issued by an issuer or its affiliates as part of a package of investments in the issuer or its affiliates issued in connection with an adjustable rate instrument or other debt instrument of the issuer. The Fund also may convert a warrant so acquired into the underlying security. Investments in warrants and equity securities entail certain risks in addition to those associated with investments in adjustable rate instruments or other debt instruments. The value of warrants and equity securities may be affected more rapidly, and to a greater extent, by company-specific developments and general market conditions. These risks may increase fluctuations in the Fund's net asset value. The Fund may possess material non-public information about an issuer as a result of its ownership of an adjustable rate instrument or other debt instrument of such issuer. Because of prohibitions on trading in securities of issuers while in possession of such information the Fund might be unable to enter into a transaction in a security of such an issuer when it would otherwise be advantageous to do so.

Below Investment Grade Securities. Investments in below investment grade securities generally provide greater income and increased opportunity for capital appreciation than investments in higher quality securities, but they also typically entail greater price volatility and principal and income risk, including the possibility of issuer default and bankruptcy. Issuers of below investment grade securities may be highly leveraged and may not have available to them more traditional methods of financing. Securities in the lowest investment grade category also may be considered to possess some speculative characteristics by certain rating agencies. In addition,

analysis of the creditworthiness of issuers of below investment grade securities may be more complex than for issuers of higher quality securities. Below investment grade securities may be more susceptible to real or perceived adverse economic and competitive industry conditions than investment grade securities. A projection of an economic downturn or of a period of rising interest rates, for example, could cause a decline in lower-grade security prices because the advent of a recession could lessen the ability of an issuer to make principal and interest payments on its debt obligations. If an issuer of below investment grade securities defaults, in addition to risking payment of all or a portion of interest and principal, the Fund may incur additional expenses to seek recovery. In the case of below investment grade securities structured as zero coupon or payment-in-kind securities, their market prices will normally be affected to a greater extent by interest rate changes, and therefore tend to be more volatile than securities which pay interest currently and in cash. Symphony seeks to reduce these risks through diversification, credit analysis and attention to current developments and trends in both the economy and financial markets.

The secondary market for below investment grade securities may not be as liquid as the secondary market for more highly rated securities, a factor which may have an adverse effect on the Fund's ability to dispose of a particular security. There are fewer dealers in the market for below investment grade securities than for investment grade obligations. The prices quoted by different dealers may vary significantly and the spread between the bid and ask price is generally much larger than for higher quality instruments. Under adverse market or economic conditions, the secondary market for below investment grade securities could contract further, independent of any specific adverse changes in the condition of a particular issuer, and these instruments may become illiquid. As a result, the Fund could find it more difficult to sell these securities or may be able to sell the securities only at prices lower than if such securities were widely traded. Prices realized upon the sale of such lower rated or unrated securities, under these circumstances, may be less than the prices used in calculating the Fund's net asset value.

Adverse publicity and investor perceptions, whether or not based on fundamental analysis, may decrease the values and liquidity of below investment grade securities, especially in a thinly traded market. When secondary markets for below investment grade securities are less liquid than the market for investment grade securities, it may be more difficult to value the securities because such valuation may require more research, and elements of judgment may play a greater role in the valuation because there is less reliable, objective data available. During periods of thin trading in these markets, the spread between bid and asked prices is likely to increase significantly and the Fund may have greater difficulty selling its portfolio securities. The Fund will be more dependent on Symphony's research and analysis when investing in below investment grade securities. Symphony seeks to minimize the risks of investing in all securities through in-depth credit analysis and attention to current developments in interest rates and market conditions.

A general description of the ratings of securities by Moody's, S&P and Fitch is set forth in Appendix B to this SAI. The ratings of Moody's, S&P and Fitch represent their opinions as to the quality of the securities they rate. It should be emphasized, however, that ratings are general and are not absolute standards of quality. Consequently, in the case of debt obligat
