Fidelity National Information Services, Inc.

We are a global leader in financial services technology offering a broad range of solutions in retail and enterprise banking, payments, capital markets, asset and wealth management, risk and compliance, treasury and insurance, as well as providing financial consulting and outsourcing services. With a long history deeply rooted in serving the financial services sector, we serve more than 20,000 institutions in over 130 countries. Headquartered in Jacksonville, Florida, we employ approximately 55,000 people worldwide and hold leadership positions in payment processing, financial software, capital markets and banking solutions. We have grown organically as well as through acquisitions, which have contributed critical applications and services that complement or enhance our existing offerings, diversifying our revenues by customer, geography and service offering. The completion of the SunGard acquisition on November 30, 2015 increased our existing portfolio to include solutions that automate a wide range of complex business processes for financial services institutions and corporate and government treasury departments. Through our Capco brand, we deliver a wide range of information technology consulting, advisory and transformational services to financial institutions globally. Providing software, services and outsourcing of the technology that drives financial institutions, we are a Fortune 500 company and a member of Standard & Poor's 500 Index.

Operating Segments

We report the results of our operations based on three reportable segments: Integrated Financial Solutions, Global Financial Solutions and Corporate and Other.

Integrated Financial Solutions (IFS)

The IFS segment is focused on serving the North American regional and community bank and savings institution market for transaction and account processing, payment solutions, channel solutions (including lending and wealth management solutions), digital channels, risk and compliance solutions, and services, capitalizing on the continuing trend to outsource these solutions. IFS also includes corporate liquidity and wealth management solutions acquired in the SunGard acquisition. IFS primary software applications function as the underlying infrastructure of a financial institution's processing environment. These applications include core bank processing software, which banks use to maintain the primary records of their customer accounts, and complementary applications and services that interact directly with the core processing applications. Clients in this segment include regional and community banks, credit unions and commercial lenders, as well as government institutions, merchants and other commercial organizations. This market is primarily served through integrated solutions and characterized by multi-year processing contracts that generate highly recurring revenues. The predictable nature of cash flows generated from this segment provides opportunities for further investments in innovation, product integration, information and security, and compliance in a cost effective manner.

Global Financial Solutions (GFS)

The GFS segment is focused on serving the largest financial institutions around the globe with banking and payments solutions, as well as consulting and transformation services. The GFS segment has extended its reach through the SunGard acquisition, and now also delivers a broader array of capital markets and asset management solutions and services as well as insurance solutions and services.

S-1

Table of Contents

GFS clients include the largest global financial institutions, including those headquartered in the United States, as well as all international financial institutions we serve as clients in more than 130 countries around the world. These institutions face unique business and regulatory challenges and account for the majority of financial institution information technology spend globally. The purchasing patterns of GFS clients vary from those of IFS clients who typically purchase solutions on an outsourced basis. GFS clients purchase our solutions and services in various ways including licensing and managing technology in-house, using consulting and third party service providers as well as fully outsourced end-to-end solutions. We have long-established relationships with many of these financial institutions that generate significant recurring revenue. GFS clients now also include asset managers, buy- and sell-side securities and trading firms, insurers and private equity firms due to the addition of SunGard. This segment also includes our consolidated Brazilian venture.

Corporate and Other

The Corporate and Other segment consists of corporate overhead expense, certain leveraged functions and miscellaneous expenses that are not included in the operating segments, as well as certain non-strategic businesses. The business solutions in this segment include public sector and education, commercial services and check authorization. The overhead and leveraged costs relate to marketing, corporate finance and accounting, human resources, legal, and amortization of acquisition-related intangibles and other costs that are not considered when management evaluates revenue generating segment performance, such as acquisition integration and severance costs. The Corporate and Other segment also includes the impact on revenue for 2015 of adjusting SunGard's deferred revenue to fair value. The composition of our Corporate and Other segment changed with the new segment presentation in 2015. Specifically, costs such as sales, finance, human resources, risk and information security and other administrative support functions that are directly attributable to IFS or GFS are recorded to those reportable segments.

Competitive Strengths

We believe that our competitive strengths include the following:

Brand We have built a global brand known for innovation and thought leadership in the financial services sector. Capco likewise has a strong brand in integrated consulting and technology services in this sector.

Global Distribution and Scale Our worldwide presence, array of solution offerings, customer breadth, established infrastructure and employee depth enable us to leverage our client relationships and global scale to drive revenue growth and operating efficiency. We are a global leader in the primary markets we serve, supported by a large, knowledgeable talent pool of employees around the world.

Extensive Domain Expertise and Portfolio Depth We have a significant number and wide range of high-quality software applications and service offerings that have been developed over many years with substantial input from our customers. Our broad portfolio of solutions includes a wide range of flexible service arrangements for the deployment and support of our software, from managed processing arrangements, either at the customer's site or at our location, to traditional license and maintenance fee approaches. This broad solution set allows us to bundle tailored or integrated services to compete effectively. In addition, we are able to use the modular nature of our software applications and our ability to integrate

many of our services with the services of others to provide customized solutions that respond to individualized customer needs. We understand the needs of our customers and have developed and acquired innovative solutions that can give them a competitive advantage and reduce their operating costs.

Excellent Relationship with Clients A significant percentage of our business with our customers relates to core processing applications and services provided under multi-year, recurring contracts. The nature of

S-2

Table of Contents

these relationships allows us to develop close partnerships with these customers, resulting in high client retention rates. As the breadth of our service offerings has expanded, we have found that our access to key customer personnel is increasing, presenting greater opportunities for cross-selling and providing integrated, total solutions to our customers. The recent SunGard acquisition significantly extends our access to key customer personnel and further strengthens the customer relationships with those institutions, as it adds relationships with an incremental and broad range of end users, including asset managers, CFOs and Treasurers, traders on the sell-side and buy-side, securities operations managers, fund administrators, risk and compliance officers, plan administrators, and registered investment advisors.

Strategy

Our mission is to deliver superior solutions and services to our clients, which will result in sustained revenue and earnings growth for our shareholders. Our strategy to achieve this goal has been and continues to be built on the following pillars:

Expand Client Relationships The overall market we serve continues to gravitate beyond single-product purchases to multi-solution partnerships. As the market dynamics shift, we expect our clients to rely more on our multidimensional service offerings. Our leveraged solutions and processing expertise can produce meaningful value and cost savings for our clients through more efficient operating processes, improved service quality and convenience for our clients' customers.

Build, Buy, or Partner to Add Solutions to Cross-Sell We continue to invest in growth through internal product development, as well as through acquisitions and equity investments that complement and extend our existing solutions and capabilities, providing us with additional solutions to cross-sell. We also partner from time to time with other entities to provide comprehensive offerings to our customers. By investing in solution innovation and integration, we continue to expand our value proposition to our clients.

Support Our Clients Through Transformation Changing market dynamics, particularly in the areas of information security, regulation and innovation, are transforming the way our clients operate, which is driving incremental demand for our leveraged solutions, consulting expertise, and services around our intellectual property. As customers evaluate technology, business process changes and vendor risks, our depth of services capabilities enables us to become involved earlier in their planning and design process and assist them as they manage through these changes.

Continually Improve to Drive Margin Expansion We strive to optimize our performance through investments in infrastructure enhancements, our workforce and other measures that are designed to create organic revenue and margin expansion. We are pursuing further margin expansion as we integrate our operations globally.

Build Global Diversification We continue to deploy resources in global markets where we expect to achieve meaningful scale.
