SUPPLEMENTAL DISCLOSURES OF NON CASH TRANSACTIONS

During the six months ended December 31, 2013, the Company issued 38,216,803 shares of common stock for 49,122,092 purchase warrants through a cashless exercise. Also, the Company converted promissory notes for an aggregate principal amount of \$243,500, plus interest of \$4,402, and recognized a gain of \$7,538. Upon conversion of the notes the Company issued 42,935,118 shares of common stock at fair value ranging from \$0.005 to \$0.01. During the six months ended December 31, 2012, the Company issued 2,000,000 shares of common stock for 3,333,334 purchase warrants through a cashless exercise.

The accompanying notes are an integral part of these financial statements

HYPERSOLAR, INC.
(A Development Stage Company)
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2013

1. Basis of Presentation

The accompanying unaudited financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all normal recurring adjustments considered necessary for a fair presentation have been included. Operating results for the six months ended December 31, 2013 are not necessarily indicative of the results that may be expected for the year ending June 30, 2014. For further information refer to the financial statements and footnotes thereto included in the Company's Form 10-K for the year ended June 30, 2013.

Going Concern

The accompanying financial statements have been prepared on a going concern basis of accounting, which contemplates continuity of operations, realization of assets and liabilities and commitments in the normal course of business. The accompanying financial statements do not reflect any adjustments that might result if the Company is unable to continue as a going concern. The Company does not generate revenue, and has negative cash flows from operations, which raise substantial doubt about the Company's ability to continue as a going concern. The ability of the Company to continue as a going concern and appropriateness of using the going concern basis is dependent upon, among other things, additional cash infusion. The Company has obtained funds from its shareholders since its inception through the period ended December 31, 2013. The Company also obtained funding from new investors. Management believes the existing shareholders and the prospective new investors will provide the additional cash needed to meet the Company's obligations as they become due, and will allow the development of its core business. There is no assurance that the Company will be able to continue raising the required capital for its operations.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

This summary of significant accounting policies of HyperSolar, Inc. is presented to assist in understanding the Company's financial statements. The financial statements and notes are representations of the Company's management, which is responsible for their integrity and objectivity. These accounting policies conform to accounting principles generally accepted in the United States of America and have been consistently applied in the preparation of the financial statements.

Development Stage Activities and Operations

The Company has been in its initial stages of formation and for the period ended December 31, 2013, had no revenues. A development stage activity is one in which all efforts are devoted substantially to establishing a new business and even if planned principal operations have commenced, revenues are insignificant.

Revenue Recognition

The Company recognizes revenue when services are performed, and at the time of shipment of products, provided that evidence of an arrangement exists, title and risk of loss have passed to the customer, fees are fixed or determinable, and collection of the related receivable is reasonably assured. To date, the Company has had no revenues and is in the development stage.

Cash and Cash Equivalent

The Company considers all highly liquid investments with an original maturity of three months or less to be cash equivalents.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the accompanying financial statements. Significant estimates made in preparing these financial statements include the estimate of useful lives of intangible assets, and the deferred tax valuation allowance. Actual results could differ from those estimates.

Fair Value of Financial Instruments

Disclosures about fair value of financial instruments, requires disclosure of the fair value information, whether or not recognized in the balance sheet, where it is practicable to estimate that value. As of December 31, 2013, the amounts reported for cash, accrued interest and other expenses, and notes payable approximate the fair value because of their short maturities.

ASC Topic 820 measures financial instruments at fair value on a recurring basis in accordance with accounting principles generally accepted in the United States and expands disclosures about fair value measurements.

HYPERMOLAR, INC.
(A Development Stage Company)
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2013

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. ASC Topic 820 established a three-tier fair value hierarchy which prioritizes the inputs used in measuring fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). These tiers include:

- Level 1, defined as observable inputs such as quoted prices for identical instruments in active markets;
- Level 2, defined as inputs other than quoted prices in active markets that are either directly or indirectly observable such as quoted prices for similar instruments in active markets or quoted prices for identical or similar instruments in markets that are not active; and
- Level 3, defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions, such as valuations derived from valuation techniques in which one or more significant inputs or significant value drivers are unobservable.

We measure certain financial instruments at fair value on a recurring basis. Assets and liabilities measured at fair value on a recurring basis are as follows at December 31, 2013:

	Total	(Level 1)	(Level 2)	(Level 3)
Assets	\$ -	\$ -	\$ -	\$ -
Total assets measured at fair value	\$ -	\$ -	\$ -	\$ -
Liabilities				
Derivative liability	1,130,002	-	-	1,130,002
Convertible notes, net of discount	324,927	-	-	324,927
Total liabilities measured at fair value	\$ 1,454,929	\$ -	\$ -	\$ 1,454,929

Loss per Share Calculations

Loss per Share dictates the calculation of basic earnings per share and diluted earnings per share. Basic earnings per share are computed by dividing income available to common shareholders by the weighted-average number of common shares available. Diluted earnings per share is computed similar to basic earnings per share except that the denominator is increased to include the number of additional common shares that would have been outstanding if the potential common shares had been issued and if the additional common shares were dilutive. No shares for employee options or warrants were used in the calculation of the loss per share as they were all anti-dilutive. The Company's diluted loss per share is the same as the basic loss per share for the period ended December 31, 2013, as the inclusion of any potential shares would have had an anti-dilutive effect due to the Company generating a loss. The Company has excluded 20,716,670 warrants for the six months ended December 31, 2013.

Stock based Compensation

Share-based Payment applies to transactions in which an entity exchanges its equity instruments for goods or services and also applies to liabilities an entity may incur for goods or services that are to follow a fair value of those equity instruments. The Company will be required to follow a fair value approach using an option-pricing model, such as the Black Scholes option valuation model, at the date of a stock option grant. The deferred compensation calculated under the fair value method would then be amortized over the respective vesting period of the stock option.

Recently issued pronouncements

Management reviewed accounting pronouncements issued during the six months ended December 31, 2013, and no pronouncements were adopted. That would have a material impact on the Company's Financial Statements.

3.

CAPITAL STOCK

During the six months ended December 31, 2013, the Company issued 38,216,803 shares of common stock through a cashless exercise of 49,122,092 purchase warrants at fair value; issued 42,935,118 shares of common stock for \$112,450 in principal for conversion of various convertible notes, plus \$4,402 in accrued interest.

8

HYPERMOLAR, INC.
(A Development Stage Company)
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2013

4. STOCK OPTIONS

The Board of Directors of the Company granted 250,000 non-qualified stock options common stock to a contractor, which are outstanding as of December 31, 2013. Each option shall be exercisable to the nearest whole share, in installments or otherwise, as the respective agreements may provide. Notwithstanding any other provisions of the Option agreement, each Option expires on the date specified in the Option agreement, which date shall not be later than the fifth (5th) anniversary from the grant date of the options. The stock options are fully vested and are exercisable for a period of five years from the date of grant at an exercise price \$0.04 per share.

	12/31/2013
Risk free interest rate	0.12%
Stock volatility factor	132%
Weighted average expected option life	5 years
Expected dividend yield	None

A summary of the Company's stock option activity and related information follows:

	12/31/2013	
	Number of Options	Weighted average exercise price
Outstanding, beginning of year	250,000	\$ 0.04
Granted	-	-
Exercised	-	-
Forfeited/Expired	-	-
Outstanding, end of period	250,000	\$ 0.04
Exercisable at the end of period	250,000	\$ 0.04
Weighted average fair value of options granted during the period		\$ -

Stock-based compensation expense recognized during the period is based on the value of the portion of stock-based payment awards that is ultimately expected to vest. Stock-based compensation expense recognized in the financial statements of operations during the period ended December 31, 2013, included compensation expense for the stock-based payment awards granted prior to, but not yet vested, as of December 31, 2013 based on the grant date fair value estimated, and compensation expense for the stock-based payment awards granted subsequent to December 31, 2013, based on the grant date fair value estimated. We account for forfeitures as they occur, and no options were forfeited during the six months ended December 31, 2013. There was no stock-based compensation expense recognized in the statement of income during the six months ended December 31, 2013.

Warrants

During the six months ended December 31, 2013, the Company issued 38,216,803 shares of common stock through a cashless exercise of 49,122,092 purchase warrants. The outstanding purchase warrants as of December 31, 2013 was 20,716,670.

5.

CONVERTIBLE PROMISSORY NOTES

On October 19, 2012, the Company received funds of \$12,500 pursuant to the terms of a securities purchase agreement which provided for the sale by the Company of 10% convertible promissory notes in the principal amount of up to \$75,000. The convertible promissory note was convertible into shares of common stock of the Company at a price equal to a variable conversion price of the lesser of \$0.0035 per share or fifty percent (50%) of the lowest trade price of the previous 25 trading days after the effective date. On October 1, 2013, the principal of \$12,500, including interest of \$1,188 was converted into 6,844,180 shares of common stock. The Company recorded debt discount of \$12,500 related to the conversion feature of the notes, along with derivative liabilities at inception. As of the December 31, 2013, the cumulative debt discount amortized, and recorded as interest expense is \$12,500, with a remaining net debt discount of \$0 at December 31, 2013.

On October 29, 2012, the Company received funds of \$40,000 pursuant to the terms of a securities purchase agreement which provided for the sale of 10% convertible promissory notes in the aggregate principal amount of up to \$100,000. The Company received additional advances in the amount of \$50,000 on various dates in 2013 for a total aggregate principal sum of \$90,000. On August 23, 2013, principal in the amount of \$500, plus interest of \$41 was converted into 270,616 shares of common stock at a fair of \$0.007 per share. As of December 31, 2013, there is a principal sum of \$89,500. The convertible promissory notes are convertible into shares of common stock of the Company at a price equal to a variable conversion price of the lesser of a)\$0.01 per share b)fifty percent (50%) of the lowest trading price of the previous 25 trading days or c)lowest price offered. The notes mature one (1) year from the effective dates of each respective advance. The Company recorded debt discount of \$90,000 related to the conversion feature of the notes, along with derivative liabilities at inception. As of December 31, 2013, the cumulative debt discount amortized, and recorded as interest expense is \$72,644, with a remaining net debt discount of \$17,356 at December 31, 2013.

HYPERSOLAR, INC.
(A Development Stage Company)
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2013

5. CONVERTIBLE PROMISSORY NOTES (Continued)

On March 7, 2013, the Company received funds in the amount of \$10,000 pursuant to the terms of a securities purchase agreement which provided for the sale of 10% convertible promissory notes in the principal amount of up to \$100,000. On October 1, 2013, \$10,000 was advanced to the Company on the note for an aggregate principal amount of \$20,000, of which \$14,450 in principal and \$573 in interest was converted into 7,511,300 shares of common stock of the Company, and recognized a loss on conversion of \$57,837. As of December 31, 2013, \$5,550 in principle remains on the convertible note. The remaining note is convertible into shares of common stock of the Company at a price equal to a variable conversion price of the lesser of \$0.0035 per share or fifty percent (50%) of the lowest trade price recorded on any trade day after the effective date. The note matures one (1) year from the effective date of each respective advance. The Company recorded debt discount of \$20,000 related to the conversion feature of the notes, along with derivative liabilities at inception. As of December 31, 2013, the cumulative debt discount amortized, and recorded as interest expense is \$15,813, with a remaining net debt discount of \$4,187 at December 31, 2013.

On March 7, 2013, the Company received funds in the amount of \$10,000 pursuant to the terms of a securities purchase agreement entered into for the sale of 10% convertible promissory notes in the principal amount of up to \$100,000. The note is convertible into shares of common stock of the Company at a price equal to a variable conversion price of the lesser of \$0.0035 per share or fifty percent (50%) of the lowest trade price recorded on any trade day after the effective date. The note matures one (1) year from the effective date of each respective advance. The Company recorded debt discount of \$10,000 related to the conversion feature of the notes, along with derivative liabilities at inception. As of December 31, 2013, the cumulative debt discount amortized, and recorded as interest expense is \$8,192, with a remaining net debt discount of \$1,808 at December 31, 2013.

On April 23, 2013, the Company entered into a securities purchase agreement for the sale of an 8% convertible promissory note in the aggregate principal amount of up to \$32,500, for consideration of \$32,500. The note matures on January 17, 2014. During the month of October and November 2013, the principal amount of the note of \$32,500, plus interest of \$1,300 was converted into 8,022,257 shares of common stock of the Company and recognized a loss on conversion of \$24,227. The Company recorded a debt discount of \$32,500 related to the conversion feature of the note, along with a derivative liability at inception. As of December 31, 2013, the cumulative debt discount amortized, and recorded as interest expense is \$32,500, with a remaining net debt discount of \$0 at December 31, 2013.

On May 9, 2013, the Company entered into a securities purchase agreement for the sale of a 10% convertible promissory note entered into for the extinguishment of a previous note in the aggregate principal amount of \$127,841. The note is convertible into shares of common stock of the Company at a price equal to the lesser of \$0.009 or 50% of the lowest trade price after the effective date. The note matured on November 5, 2013, and was extended for six months. As of December 31, 2013, the debt discount amortized, and recorded as interest expense is \$22,155, with a remaining net debt discount of \$0 at December 31, 2013.

On May 21, 2013, the Company entered into a securities purchase agreement for the sale of an 8% convertible promissory note in the aggregate principal amount of \$32,500, for consideration of \$32,500. The note matures on February 17, 2014. During the month of November 2013, the principal amount of the note in the amount of \$32,500, plus interest of \$1,300 was converted into 10,286,765 shares of the Company's common stock, and recognized a loss on conversion of \$24,544. The Company recorded a debt discount of \$32,477 related to the conversion feature of the note, along with a derivative liability at inception. As of December 31, 2013, the cumulative debt discount amortized,

and recorded as interest expense is \$32,477, with a remaining net debt discount of \$0 at December 31, 2013.

On June 3, 2013, the Company issued a 10% convertible promissory note in the aggregate principal amount of \$55,000, for payment of a accounts payable. On June 4, 2013, the note was assigned to another lender. The note is convertible into shares of common stock of the Company at a price equal to a variable conversion price of the lesser of a) \$0.0085 per share, b) fifty percent (50%) of the lowest trading price of the common stock recorded on any trade day after the effective date or c) the lowest effective price per share granted to any person or entity after the effective date to acquire common stock, or adjustments. During the month of December 2013, the Company issued 10,000,000 shares of common stock upon conversion of \$20,000 in principal leaving a remaining balance of \$35,000. The Company recognized a loss on conversion of \$33,000. The note matures one (1) year from the effective date. The Company recorded a debt discount of \$55,000 related to the conversion feature of the note, along with a derivative liability at inception. As of December 31, 2013, the cumulative debt discount amortized, and recorded as interest expense is \$40,137, with a remaining net debt discount of \$14,863 at December 31, 2013.

On July 29, 2013, the Company received funds of \$42,500 pursuant to the terms of a securities purchase agreement providing for the sale of an 8% convertible promissory note in the aggregate principal amount of up to \$42,500. The note is convertible into shares of common stock of the Company at a price equal to 58% times the average of the lowest three trading prices for the common stock during the ten days prior to the conversion. The note matures on April 11, 2014. The Company recorded debt discount of \$42,500 related to the conversion feature of the notes, along with derivative liabilities at inception. As of December 31, 2013, the cumulative debt discount amortized, and recorded as interest expense is \$25,732, with a remaining net debt discount of \$16,768 at December 31, 2013.

HYPERSOLAR, INC.
(A Development Stage Company)
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2013

5. CONVERTIBLE PROMISSORY NOTES (Continued)

On August 9, 2013, the Company received funds of \$15,000 pursuant to the terms of a securities purchase agreement entered into for the sale of 10% convertible promissory notes in the aggregate principal amount of up to \$100,000. The Company received additional advances in the aggregate amount of \$85,000 during the six months ended December 31, 2013 for a total aggregate principal sum of \$100,000. The notes are convertible into shares of common stock of the Company at a price equal to a variable conversion price of the lesser of a) \$0.0048 per share; b) fifty percent (50%) of the lowest trading price after the effective date of each respective advance or c) the lowest conversion price offered by the Company with respect to any financing occurring before or after the date of each respective advance. The notes mature six (6) months from the effective dates of each respective advance. The Company recorded debt discount of \$100,000 related to the conversion feature of the notes, along with derivative liabilities at inception. As of December 31, 2013, the cumulative debt discount amortized, and recorded as interest expense is \$47,939, with a remaining net debt discount of \$52,061 at December 31, 2013.

On October 2, 2013, the Company received funds of \$32,500 pursuant to the terms of a securities purchase agreement providing for the sale of an 8% convertible promissory note in the aggregate principal amount of up to \$32,500. The note is convertible into shares of common stock of the Company at a price equal to 58% times the average of the lowest three trading prices for the common stock during the ten days prior to the conversion. The note matures on June 17, 2014. The Company recorded debt discount of \$25,086 related to the conversion feature of the notes, along with derivative liabilities at inception. As of December 31, 2013, the cumulative debt discount amortized, and recorded as interest expense is \$8,751, with a remaining net debt discount of \$16,335 at December 31, 2013.

On December 5, 2013, the Company received funds of \$32,500 pursuant to the terms of a securities purchase agreement providing for the sale of an 8% convertible promissory note in the aggregate principal amount of up to \$32,500. The note is convertible into shares of common stock of the Company at a price equal to 58% times the average of the lowest three trading prices for the common stock during the ten days prior to the conversion. The note matures on August 22, 2014. The Company recorded debt discount of \$32,497 related to the conversion feature of the notes, along with derivative liabilities at inception. As of December 31, 2013, the cumulative debt discount amortized, and recorded as interest expense is \$3,250, with a remaining net debt discount of \$29,247 at December 31, 2013.

On December 16, 2013, the Company received funds of \$26,000 pursuant to the terms of a securities purchase agreement entered into for the sale of 10% convertible promissory notes in the aggregate principal amount of up to \$100,000. The note is convertible into shares of common stock of the Company at a price equal to a variable conversion price of the lesser of \$0.0048 per share or fifty percent (50%) of the lowest trading price after the effective date of each respective advance. The notes mature six (6) months from the effective dates of each respective advance. The Company recorded debt discount of \$26,000 related to the conversion feature of the notes, along with derivative liabilities at inception. As of December 31, 2013, the cumulative debt discount amortized, and recorded as interest expense is \$2,167, with a remaining net debt discount of \$23,833 at December 31, 2013.

ASC Topic 815 provides guidance applicable to convertible debt issued by the Company in instances where the number into which the debt can be converted is not fixed. For example, when a convertible debt converts at a discount to market based on the stock price on the date of conversion, ASC Topic 815 requires that the embedded conversion option of the convertible debt be bifurcated from the host contract and recorded at their fair value. In accounting for derivatives under accounting standards, the Company recorded a liability representing the estimated

present value of the conversion feature considering the historic volatility of the Company's stock, and a discount representing the imputed interest associated with the embedded derivative. The discount is amortized over the life of the convertible debt, and the derivative liability is adjusted periodically according to stock price fluctuations.

At the time of conversion, the Company recognized losses on extinguishment of debt at fair value of \$195,715, and recorded a gain as the extinguishment of the associated derivative liability of \$203,253, which resulted in a net gain on extinguishment of debt of \$7,438 for the six months ended December 31, 2013.

For purpose of determining the fair market value of the derivative liability, the Company used Black Scholes option valuation model. The significant assumptions used in the Black Scholes valuation of the derivative are as follows:

Stock price on the valuation dates	\$	0.0048 - \$0.02	
Conversion price for the debt	\$	0.002 - \$0.0116	
Dividend yield		0.00	%
Years to Maturity		6 months - 1 year	
Risk free rate		.03% - .18	%
Expected volatility		51.13% - 283.73	%

The value of the derivative liability at December 31, 2013 was \$1,130,002.

HYPERSOLAR, INC.
(A Development Stage Company)
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2013

6. SUBSEQUENT EVENTS

Management evaluated subsequent events as of the date of the financial statements pursuant to ASC Topic 855 and noted the following items:

On January 3, 2014, the Company issued 5,630,772 shares of common stock upon conversion of 8,133,336 purchase warrants through a cashless exercise.

On January 13, 2014, the Company issued 2,307,692 shares of common stock upon conversion of 3,333,334 purchase warrants through a cashless exercise.

On January 13, 2014, the Company issued 10,000,000 shares of common stock upon conversion of a convertible note for the principal amount of \$20,000 at a fair value of \$0.002 per share.

On January 13, 2014, the Company received an additional advance in the amount of \$15,000 pursuant to the terms of a securities purchase agreement entered into on December 16, 2013, which provided for the sale of a of a 10% convertible promissory note in the aggregate principal amount of up to \$100,000. The note is convertible into shares of common stock of the Company at a price equal to a variable conversion price of the lesser of \$0.0048 per share or fifty percent (50%) of the lowest trading price after the effective date of each respective advance. The note matures six (6) months from the effective dates of each respective advance.

On January 15, 2014, the Company issued 4,205,137 shares of common stock upon conversion of a convertible note for the principal amount of \$7,500, plus interest of \$910 at a fair value of \$0.002 per share.

On January 23, 2014, the Company issued 5,898,699 shares of common stock upon conversion of a convertible note for the principal amount of \$10,500, plus interest of \$1,297 at a fair value of \$0.002 per share.

On January 28, 2014, the Company received an additional advance in the amount of \$25,000 pursuant to the terms of a securities purchase agreement entered into on December 16, 2013, for the sale of a of a 10% convertible promissory note in the aggregate principal amount of up to \$100,000. The note is convertible into shares of common stock of the Company at a price equal to a variable conversion price of the lesser of \$0.0048 per share or fifty percent (50%) of the lowest trading price after the effective date of each respective advance. The note matures six (6) months from the effective dates of each respective advance.

On January 28, 2014, the Company issued 8,875,000 shares of common stock upon conversion of a convertible note for the principal amount of \$17,750 at a fair value of \$0.002 per share.

On January 30, 2014, the Company issued 4,687,500 shares of common stock upon conversion of a convertible note for the principal amount of \$15,000 at a fair value of \$0.0032 per share.

On February 4, 2014, the Company issued 3,380,548 shares of common stock upon conversion of a convertible note for the principal amount of \$6,000, plus accrued interest of \$761 at a fair value of \$0.002 per share.

Edgar Filing: Hypersolar, Inc. - Form 10-Q

On February 4, 2014, the Company issued 5,172,414 shares of common stock upon conversion of a convertible note for the principal amount of \$15,000 at a fair value of \$0.0029 per share.

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Cautionary Statement Regarding Forward-Looking Statements

The information in this discussion may contain forward-looking statements. These forward-looking statements involve risks and uncertainties, including statements regarding our capital needs, business strategy and expectations. Any statements that are not of historical fact may be deemed to be forward-looking statements. These forward-looking statements involve substantial risks and uncertainties. In some cases you can identify forward-looking statements by terminology such as "may," "will," "should," "expect," "plan," "intend," "anticipate," "estimate," "predict," "potential," or "continue", the negative of the terms or other comparable terminology. Forward-looking statements in this Report may also include references to anticipated sales volume and product margins, efforts aimed at establishing new or improving existing relationships with customers, other business development activities, anticipated financial performance, business prospects and similar matters. Actual events or results may differ materially from the anticipated results or other expectations expressed in the forward-looking statements. In evaluating these statements, you should consider various factors, including the risks included from time to time in other reports or registration statements filed by the Company with the United States Securities and Exchange Commission. These factors may cause our actual results to differ materially from any forward-looking statements. We disclaim any obligation to publicly update these statements, or disclose any difference between actual results and those reflected in these statements.

Unless the context otherwise requires, references in this Form 10-Q to "we," "us," "our," or the "Company" refer to Hypersolar, Inc.

Overview

Inspired by the photosynthetic process that plants use to harness the power of the sun to create energy molecules, Hypersolar, Inc. we are developing a novel solar-powered nanoparticle system that mimics photosynthesis to separate hydrogen from water. On November 15, 2011, we filed a patent application to protect the intellectual property rights to the production of renewable hydrogen and natural gas using sunlight, water, and carbon dioxide.

Hydrogen is the lightest and abundant chemical element, constituting roughly 75% of the universe's chemical elemental mass (Palmer, D. (13 September 1997). "Hydrogen in the Universe".NASA). However, naturally occurring elemental hydrogen is relatively rare on earth and hydrogen gas is most often produced using fossil fuels. Industrial production is mainly from the steam reforming of natural gas and is usually employed near its production site, with the two largest uses being crude oil processing (hydrocracking) and ammonia production, mostly for the fertilizer market. We are developing what we believe is a cleaner and greener way to produce this high value product.

In addition to the many industrial uses of hydrogen, one of the most intriguing uses, is for fuel cells for transportation. A fuel cell is a device that converts the chemical energy from a fuel into electricity through a chemical reaction with oxygen or another oxidizing agent, using hydrogen as the most common fuel. Although there are currently no fuel cell vehicles available for commercial sale, carmakers are hopeful that hydrogen fuel cells and infrastructure technologies will be developed in the future. (<http://world.honda.com/FuelCell/>)

Market Opportunity

Hydrogen has a number of applications from chemical processing, petroleum recovery and refining, metal production and fabrication, aerospace, and fuel cells. The sectors with the greatest demand for hydrogen are petroleum refineries for hydrocracking and ammonia production for fertilizer. Transportation fuel is an emerging sector which we believe has an enormous potential in the future. We believe fuel cell technology will be the major growth driver of hydrogen

in the future as many major automobile manufacturers such as Honda and Nissan bring hydrogen powered cars to market.

Hydrogen production is a large and growing industry Market size of global hydrogen production was estimated to be 53 million metric tons in 2010, of which 12% was shared by merchant hydrogen and rest with captive production (Markets and Markets Research; Hydrogen Generation Market). With decreasing sulfur level in petroleum products, lowering crude oil quality and rising demand of hydrogen operated fuel cell applications, global hydrogen production volume is forecasted to grow by compound annual growth rate of 5.6% from 2011 to 2016. The hydrogen production market in terms of value was estimated to be approximately \$82 billion in 2011. (Markets and Markets Research; Hydrogen Generation Market)

Critical Accounting Policies

Our discussion and analysis of our financial condition and results of operations are based upon our financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosures of contingent assets and liabilities. On an ongoing basis, we evaluate our estimates, including those related to impairment of property, plant and equipment, intangible assets, deferred tax assets and fair value computation using the Black Scholes option pricing model. We base our estimates on historical experience and on various other assumptions, such as the trading value of our common stock and estimated future undiscounted cash flows, that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions; however, we believe that our estimates, including those for the above-described items, are reasonable.

Revenue Recognition

Revenue on product sales is recognized when persuasive evidence of an arrangement exists, such as when a purchase order or contract is received from the customer, the selling price is fixed, title to the goods has changed and there is a reasonable assurance of collection of the sales proceeds. We obtain written purchase authorizations from our customers for a specified amount of product at a specified price and consider delivery to have occurred at the time of shipment. Revenue is recognized at shipment and we record a reserve for estimated sales returns, which is reflected as a reduction of revenue at the time of revenue recognition.

Use of Estimates

In accordance with accounting principles generally accepted in the United States, management utilizes estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements as well as the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. These estimates and assumptions relate to recording net revenue, collectibility of accounts receivable, useful lives and impairment of tangible and intangible assets, accruals, income taxes, inventory realization, stock-based compensation expense, Black Scholes valuation model inputs, and other factors. Management believes it has exercised reasonable judgment in deriving these estimates. Consequently, a change in conditions could affect these estimates.

Fair Value of Financial Instruments

The Company's cash, accounts payable, accrued interest, and note payable are stated at cost which approximates fair value due to the short-term nature of these instruments.

Recently Adopted Accounting Pronouncements

Management reviewed accounting pronouncements, and the following pronouncement was adopted during the three months ended December 31, 2013.

The Company adopted ASC 815 "Accounting for Derivative Instruments and Hedging Activities". This pronouncement addresses the accounting for derivative instruments including certain derivative instruments embedded in other contracts, and hedging activities. Derivative instruments that meet the definition of assets and liabilities should be reported in the financial statements at fair value, and any gain or loss should be recognized in current

earnings. The adoption of this pronouncement did not have a material effect on the financial statements of the Company.

Liquidity and Capital Resources

As of December 31, 2013, we had a working capital deficit of \$1,733,568 as compared to \$938,380 as of June 30, 2013. This increase in working capital deficit of \$795,188 was due primarily to an increase in accounts payable, accrued expenses, derivative liabilities and convertible notes.

Cash flow used in operating activities was \$199,806 for the six months ended December 31, 2013 and \$251,287 for the prior period ended December 31, 2012. The decrease in cash used by operating activities was primarily due to a decrease in prepaid expenses, deposits, and accounts payable, and accrued expenses, with an increase in loss on derivative liability, amortization of debt discount, and gain on settlement on debt. The Company is in its development stage and has had no revenues.

Cash used in investing activities for the six months ended December 31, 2013 was \$2,020, compared to \$0 for the prior period ended December 31, 2012. The increase was due to purchases of tangible assets for the current period.

Cash provided by financing activities during the six months ended December 31, 2013 was \$243,500 and \$258,480 for the prior period ended December 31, 2012. The decrease in financing activities was due to less equity financing with notes, and no equity financing through private placements during the current period.

Our financial statements as of December 31, 2013 have been prepared under the assumption that we will continue as a going concern from inception (February 18, 2009) through December 31, 2013. Our independent registered public accounting firm have issued their report dated September 27, 2013 that included an explanatory paragraph expressing substantial doubt in our ability to continue as a going concern without additional capital becoming available. Our ability to continue as a going concern ultimately is dependent on our ability to generate a profit which is dependent upon our ability to obtain additional equity or debt financing, attain further operating efficiencies and, ultimately, to achieve profitable operations. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

We believe our current cash balance as of January 31, 2014 will fund our operations for the next sixty days as we continue working to develop a prototype of our technology. As a result of our inability to raise sufficient financing in our fourth fiscal quarter, our CEO and certain vendors have not been fully compensated for their services. We are seeking further financing through the sales of our securities. The sale of additional equity securities could result in additional dilution to our stockholders. The incurrence of indebtedness would result in increased debt service obligations and could result in operating and financing covenants that would restrict our operations. There can be no assurance that financing will be available in amounts and on terms acceptable to us, or at all. To the extent that additional capital is raised through the sale of equity or convertible debt securities, the issuance of these securities could result in further dilution to our stockholders. If we are unable to obtain additional financing, we may be forced to curtail our operations.

PLAN OF OPERATION AND FINANCING NEEDS

Our plan of operation within the next twelve months is to further research, develop, and protect our technology.

In May of 2012, we completed a lab scale prototype of our technology that can be seen on our website at www.hypersolar.com. This prototype demonstrates hydrogen production from small scale solar devices coated with our unique, low-cost polymer coating, and submerged in waste water from a pulp and paper mill. This prototype will be used for demonstration purposes only and is not meant for commercial deployment. We are currently underway in the development of a larger field-scale demonstration prototype. We do not expect to purchase any significant plant and equipment for completing the prototype.

In addition to working on a field-scale prototype, we intend to explore other utilizations of our most recently filed patent. This invention is related to coatings, processes, and systems for stable operation of electrical, electrochemical, photoelectrochemical and photosynthetic devices with increased efficiency, unprecedented long term operational stability, and low cost. The present invention provides a stable functional coating material which when disposed on an electroactive device stabilizes it from electrical/chemical/electrochemical/photo degradation providing

exceptional operational performance. We are exploring several possible systems that could benefit including “stabilization of a solar battery” and “enhancement and possible replacement for platinum in a fuel cell.” We will be working with our research partner, University of California Santa Barbara, to further explore the potentially valuable opportunities from this invention.

Results of Operations for the Three Months Ended December 31, 2013 compared to Three Months Ended December 31, 2012.

Operating Expenses

Operating expenses for the three months ended December 31, 2013 were \$126,965 and \$180,803 for the prior period ended December 31, 2012. The decrease in operating expenses was attributed to reduction in investor relations expenses and payments for research and development made in a subsequent quarter.

Other Income/(Expenses)

Other income and (expenses) for the three months ended December 31, 2013 were \$681,382 and \$(201,792) for the prior period ended December 31, 2012. The increase in income and (expenses) was the result of an increase in net loss on change in fair value of the derivative instruments of \$934,141, amortization of debt discount of \$52,000, gain on settlement of debt of \$7,460, and interest expense of \$6,427. The increase in other income and (expenses) was due to the issuance of convertible promissory notes.

Net Loss

For the three months ended December 31, 2013, our net income was \$554,417 compared to a net loss of \$(382,595) for the prior period December 31, 2012. The decrease in net loss was related primarily to other income and (expenses) due to non-cash cost associated with the derivatives. We recently began operating our business, and no revenues were generated to cover our operating costs, since we are in the development stage of our Company.

Results of Operations for the Six Months Ended December 31, 2013 compared to Six Months Ended December 31, 2012.

Operating Expenses

Operating expenses for the six months ended December 31, 2013 were \$279,286 and \$380,317 for the prior period ended December 31, 2012. The decrease in operating expenses was attributed to reduction in investor relations expenses and payments for research and development made in a subsequent quarter. .

Other Income/(Expenses)

Other income and (expenses) for the six months ended December 31, 2013 were \$826,803 and \$213,802 for the prior period ended December 31, 2012. The increase in income and (expenses) was the result of an increase in net loss on change in fair value of the derivative instruments of \$465,950, amortization of debt discount of \$129,203, gain on settlement of debt of \$7,538, and interest expense of \$25,386. The increase in other income and (expenses) was due to the issuance of convertible promissory notes in a debt financing transaction.

Net Loss

For the six months ended December 31, 2013, our net loss was \$1,106,089 and \$594,119 for the prior period December 31, 2012. The increase in net loss was related primarily to other income and (expenses) due to non-cash cost associated with the derivatives. We recently began operating our business, and no revenues were generated to cover our operating costs, since we are in the development stage of our Company.

ITEM

N/A

16

ITEM Controls and Procedures

4.

Evaluation of Disclosure Controls and Procedures

As of the end of the period covered by this report, we conducted an evaluation, under the supervision and with the participation of our chief executive officer and chief financial officer of our disclosure controls and procedures (as defined in Rule 13a-15(e) and Rule 15d-15(e) of the Exchange Act). Based upon this evaluation, our chief executive officer and chief financial officer concluded that our disclosure controls and procedures are effective to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is: (i) recorded, processed, summarized and reported, within the time periods specified in the Commission's rules and forms, and (ii) accumulated and communicated to our management, including our chief executive officer and chief financial officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting

There was no change to our internal control over financial reporting that occurred during our last fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II - OTHER INFORMATION

ITEM Legal Proceedings

1.

None.

ITEM Risks Factors

1A.

There are no material changes from the risk factors previously disclosed in our annual report on Form 10-K/A filed with the SEC on October 31, 2013.

ITEM Unregistered Sales of Equity Securities and Use of Proceeds

2.

During the three months ended December 31, 2013, the Company issued 7,005,408 shares of common stock through a cashless exercise of 9,600,004 purchase warrants. Also, the Company issued 42,664,502 shares of common stock upon conversion of convertible notes in the amount of \$112,450 in principal, and \$4,402 in interest.

The Company relied on an exemption pursuant to Section 4(2) of the Securities Act of 1933, as amended in connection with the sale and issuances of its shares of common stock described above.

ITEM Defaults Upon Senior Securities
