The remuneration of the Debentures shall be established by the Company, through resolution made by the Company's Senior Management, which shall ratify the bookbuilding process, subject to a maximum rate of 104.30% (one hundred and four and thirty one-hundredths percent) of the average daily Interbank Deposit Certificate of one day, extra-group, expressed as a yearly percent, based on 252 (two hundred and fifty two) business days, calculated and disclosed daily

by CETIP (the DI Rate), calculated exponentially and cumulatively *pro rata temporis* per business days elapsed, in accordance with the following:

1.6.1. Capitalization Period is defined as the time interval which starts on the Issuance Date, inclusive, in the case of the First Capitalization Period, or on the foreseen interest payment date immediately before, inclusive, in the case of the other Capitalization Periods, and ends in the foreseen interest payment date corresponding to the period, exclusive. Each Capitalization Period follows the previous without continuity. The interest corresponding to the Capitalization Periods shall be owed and paid semi-annually, being the first payment made on December 1st, 2007 and the last on June 1st, 2013.

1.6.2. The Remuneration shall be calculated exponentially and cumulatively, *pro rata temporis*, per business days elapsed, accrued on the face unit value, being deducted from the calculation, the amortization made and paid previously, as of the Issuance Date, or the maturity date of the previous Capitalization Period, according to the case, until the date of its effective payment, according to the formula below

1.6.3. The calculation of the interest shall be in compliance with the following formula:

$$J = VN \times (FatorJuros - 1)$$

Where:

- J** = the amount of remuneration owed at the end of each Capitalization Period, in accordance with item 1.6.1 above, calculated to the sixth decimal place without rounding;
- VN** = Unit Face Value of each Debenture at the beginning of the Capitalization Period, calculated to the sixth decimal place, without rounding;
- FatorJuros** = product of the DI rate from the beginning of the Capitalization Period, inclusive, until the end date of the Capitalization Period, exclusive, calculated to the 8th decimal place, rounded, as follows:

$$J = VN \times (FatorJuros - 1)$$

where:

- n** = total number of DI Over rates, "n" being a whole number;
- p** = at most, 104,30 (one hundred and four and thirty one- hundredths percent)
- TDI_k** = DI Rate, expressed to the day, calculated to the 8th decimal place, rounded;

where:

$k = 1, 2, \dots, n$

$DI_k =$ DI rate published by CETIP, expressed as a yearly percentage;

1.6.4. The DI Rate shall be used with the identical number of decimal places disclosed by CETIP.

1.6.5. The result of the formula is considered with 16 (sixteen) decimal places, without rounding.

1.6.6. Multiply the daily rates, where each of the cumulative daily results, is considered with 16 (sixteen) decimal places, applying the next daily product subsequently, until the last one is considered.

1.6.7. In the case of temporary unavailability of the DI rate in the payment date of any foreseen obligation, with a term inferior to 10 (ten) days, inclusive, to calculate the TDI_k , the last DI rate disclosed until the calculation date shall be used to replace it, not being owed any other financial compensation, by the Company or by the Debenture holders, when the next respective DI rate is disclosed.

1.6.8. In the absence of calculation or disclosure of the DI rate for a term superior to 10 (ten) days, or, yet, in the case of its extinction or its use is forbidden, due to legal imposition, the Fiduciary Agent must, within 5 (five) days as of the event or of the 10 (ten) day term is expired, depending on the case, to summon a Debenture Holders General Meeting (taking in account article 124 of the Brazilian Corporation Law) to make a resolution, in agreement with the Company, of the new parameter to be followed. Until this resolution is made regarding such parameter, or the maturity date, defined on 1.6.10 (i) the formulas defined on item 1.6.3. shall be used for the calculation of any obligations foreseen in this clause, with the result of the TDI_k using the last DI rate disclosed.

1.6.9. In the Debenture Holders General Meeting, the debenture holders representing at least 90% (ninety percent) of the total debentures available in the market and the Company, shall define the new earning parameter, applying the Company's option, defined on the next item, 1.6.10, or, if there is no agreement regarding the establishment of a new parameter, the Company shall be obliged to proceed to the terms of item 1.6.10 (i) below.

1.6.10. Following the definition of the new parameter, the Company shall decide, at its own criterion, which one of the alternatives established in lines (i) and (iii) below it will adopt, being obliged to disclose, in written form, to the Fiduciary Agent, in a term of 15 (fifteen) days, as of the date the respective Debenture Holders General Meeting is held, choosing one of the following alternatives:

In this alternative, for the calculation of the Remuneration applicable to the

Debentures to be redeemed the formulas defined on item 1.6.3 shall be used, being the calculation of the TDIk made using the last DI rate disclosed. The redemption which is referred to in this item shall not be increased by any sort of premium, but it shall be increased of any other amounts eventually due by the Company in compliance with the Issuance s Indenture. The Debentures acquired by the Company in compliance with this item shall be cancelled and, therefore, extinguished; or

(ii) the Company shall propose a new payment schedule for the Face Unit Value and Remuneration, in compliance with the Issuance Indenture, which shall not exceed the repricing, if any, or the Maturity Date.
