Certain of the statements contained herein are forward -looking statements based on based on Management s current estimates regarding future performance that may result in material differences regarding future results, performance and events. In fact, actual results, performances or events may differ materially from those expressed or implied by the forward -looking statements, as a result of several factors, such as the general and economic conditions in Brazil and other countries, interest rate and exchange rate levels, future rescheduling or prepayment of debt denominated in foreign currencies, protectionist measures in the US, Brazil and other countries, changes in laws and regulations and general competitive factors (on a global, regional or national basis).

BRIEF BACKGROUND	<ul> <li>-CSN was founded on April 9, 1941 and privatized in 1993</li> <li>-As the first integrated flat steel producer in Brazil, CSN played a historical role in the country s industrialization process</li> <li>-Since its privatization up to now, CSN has invested approximately US\$ 3.5 billion raising total production capacity to 5.6 millions tons of crude steel per annum, improved quality and productivity levels and enhanced environmental protection</li> </ul>
PRODUCTION FLOW	

Self-sufficiency in practically all relevant raw materials for steel production - in special, Casa de Pedra captive iron ore mine and three power plants - along with equity participation or operating concessions of outstanding infra-structure assets, positions CSN not only as a truly low-cost producer but also one of the most independent, reliable and profitable steel producing systems, <u>worldwide</u>

 $\sqrt{10}$  In July, 2007, NAMISA acquired Companhia de Fomento Mineral (CFM), located in the state of Minas Gerais, and has installations close to the Casa de Pedra Mine;

 $\sqrt{}$  The acquisition is worth up to US\$440 million and funds to acquire CFM were obtained through financing from third parties;

 $\sqrt{\text{CFM}}$  sold approximately 3.6 million tonnes of iron ore in 2006. In 1H07 already sold approximately 2.7 million tonnes;

 $\sqrt{2007}$  sales program: approximately 5 million tonnes;

 $\sqrt{1000}$  Iron ore already shipped in 2007 : about 1.5 million tonnes;

 $\sqrt{\text{Goals: 11.5 million tonnes in 2008 and 14 million tonnes/year as of 2009.}}$ 

**OBJECTIVE:** New businesses and markets, with annual production of 500,000 tonnes of long steel (bars, rebars and wire rods) in the Presidente Vargas Plant

**INVESTMENT:** US\$112 million; **MARKET:** Construction; **CONCLUSION:** 2nd half 2008

- **OBJETIVE:** To add value to the slag produced in the Blast Furnaces through grinding and the production of 2.5 Mt p.a. of CPII and CPIII cement;
- MARKET: Construction; apparent consumption of cement has been increasing in the Southeast Region of Brazil
- **INVESTMENTS:** US\$104 million
- CONCLUSION: 1st half 2008

2nd Quarter 2007 Results

 $\sqrt{}$  The Brazilian flat steel market did exceptionally well in the 2Q07, with sales volume moving up 13.9% over the previous quarter and 15.6% year-on-year. Growth in the construction, automotive, capital goods, semi-finished and home appliance/OEM sectors was particularly marked.

 $\sqrt{1}$  The main developments in the period for in the international steel market were:

- reduction in US steel demand, due to the less aggressive performance of the automotive, home appliance/OEM and, especially, construction industries;
- Thanks to the increase in imports from China, European inventories have moved up and this trajectory is expected to continue;
- In Asia, the imposition of export taxes on hot-rolled products by the Chinese government, following on from the introduction of the export licensing regime, which led to a slight price decrease in prices.

 $\sqrt{\text{USA}}$  Inventories in the service centers, currently at relatively low levels, are expected to be restored.

 $\sqrt{\text{EUROPE}}$  - Following the rapid hikes at the beginning of 2007, prices are expected to remain stable in most European countries in the short term, with a probable recovery in the final quarter.

 $\sqrt{\text{ASIA}}$  Prices may recover in the 3Q07, providing exports to Europe (the main destination for Chinese steel products) pick up. Asian demand as a whole should remain firm in the next three months, especially in the automotive and construction sectors.

 $\sqrt{\text{BRAZIL}}$  - Flat steel demand is expected to remain heated, due to the gradual reduction in local interest rates coupled with the stable currency, both of which associated with growth incentives generated by the growth incentive program (PAC), and in line with previous forecasts.

 $\sqrt{\text{Net Income of R$ 1.7 billion in the first half of 2007, 129\%}$  more than in the 1H06 and a new Company record. Net Income in the 2Q07 totaled R\$ 952 million, 25% higher than the 1Q07 and 133% up year-on-year;

## $\sqrt{\text{Net Revenue of R}$ 2.97 billion in the 2Q07, also a new quarterly record ;

 $\sqrt{}$  After the resumption of full production capacity in the Presidente Vargas Steelworks, crude steel output moved up from 0.4 million tonnes in the 2Q06 to 1.3 million tonnes in the 2Q07, a massive increase of 240%. Rolled-steel production came to 1.3 million tonnes in the 2Q07, 60% up on the 2Q06 and 11% more than in the previous quarter;

 $\sqrt{\text{CSN}}$  s average slab production cost in 2007, despite the 11% appreciation of the Real in the last 12 months, remained at around US\$ 260/t, once again positioning CSN as one of the most competitive and profitable producers in the global steel industry;

 $\sqrt{\text{EBITDA of } \mathbb{R}^{\$} 1.28 \text{ billion in the 2Q07, 26\% above the 1Q07 figure, accompanied by an increase in EBITDA margin to 43\%. In June 2007, the parent company recorded an EBITDA margin of 52.5\% one of the highest in its history.$
