## Net Income and Profitability

In 2Q09, the net income stood at R\$2,297 million compared to R\$1,723 million in 1Q09, an increase of 33.3% .

Average Shareholders' Equity\*\* amounted to R\$35,841 million on June 30, 2009. It is worth mentioning that during this quarter Bradesco partially sold its participation in VisaNet and built additional Provision for Loan Losses. After tax effect of these events was nearly R\$460 million.

In 2Q09, the economic crisis that began in 4Q08 still affected financial activities, reflecting on the low growth of the loan portfolio and also maintaining high delinquency levels.

Bradesco's net income in the six-month period ended June 30, 2009, reached R\$4,020 million, an increase of 2.8% in the y-o-y comparison.

The main items that contributed to such result are outlined in the income statement analysis.

## Efficiency Ratio

The Efficiency Ratio (ER)\* improved as seen in the q-o-q and y-o-y period comparisons due to revenues contribution, highlighting the performance of net interest income, fees and commissions, combined with strong cost control. Personnel and administrative expenses variations mainly derived from business expansion.

When comparing to 1H08, it is worth mentioning that the higher income from Bradesco Seguros and its subsidiaries also contributed to the ER improvement.

\* Efficiency Ratio (ER) YTD =  $\frac{\text{Personnel} + \text{Employee Profit Sharing (PLR)} + \text{Administrative Expenses}}{\text{Net Interest Income} + \text{Income from Insurance} + \text{Fee Income} + \text{Equity in the Earnings (Losses) of Unconsolidated Companies} + \text{Other Operating Expenses} + \text{Other Operating Income}}$ . If we considered the ratio between total administrative costs (Personnel Expenses + Administrative Expenses + Other Operating Expenses + Tax Expenses not related to revenue generation) and the generation of revenue net of related taxes, Bradesco's ER in 2Q09 would be 48.9% .

## Net Interest Income

In the q-o-q comparison, the R\$445 million variation was due to:

the increase in income from interest-earning operations in the amount of R\$349 million, due to higher spreads and average business volumes; and

the increase in non-interest income in the amount of R\$96 million, due to higher securities/treasury gains.

Observing the behavior of net interest income in 1H09 in the y-o-y comparison, we have an improvement of R\$3,130 million, corresponding to a 27.1% growth deriving from the following factors:

the increase of R\$2,015 million from interest-earning operations, basically due to higher average business volume; and

the increase in non-interest income in the amount of R\$1,115 million basically derived from higher securities/treasury gains in the amount of R\$761 million, highlighting the mark-to-market effect of the loan derivatives, resulting from the improvement of the world's financial markets.

### **Total Loan Portfolio\***

In June 2009, Bradesco's loan operations amounted to R\$212.8 billion. The stability recorded in the book during the quarter was a reflex of the 0.8% rise in loans to Individuals and of the 0.7% expansion in loans to SMEs, offset by the 1.5% drop of Large Corporates loans, caused by:

the depreciation of the dollar in the quarter, vis-à-vis the Real, negatively impacting the dollar-indexed and/or denominated loan and financing balances when calculated in the local currency, which represented 16.1% of the loan portfolio of large corporates; and

the increase in funds raising by large corporate through operations in the Capital Markets.

In the y-o-y comparison, the portfolio grew by 18.1%, of which: Large Corporates 22.6%, SMEs 18.9% and Individuals 13.2%. In the Corporate segment, the main products which contributed to such increase were: mortgages corporate plans, working capital, foreign operations, leasing and BNDES onlending. In the Individuals segment, we highlight: leasing, mortgage, personal loan, agricultural loan and credit card.

\* Including Sureties and Guarantees, advanced receivables from credit cards and loan assignment (FIDC and CRI).

### **Provision for Loan Losses (PLL)**

The increase in PLL expenses in the quarter was basically reflected by:

the increase in additional PLL in the amount of R\$1.3 billion, calculated according to Bradesco's statistical models, aiming at supporting possible cyclical environments, with increase in delinquency ratios and/or changes in the loan portfolio risk profile; and

the maintenance of high delinquency levels in 2Q09 results from the economic slowdown on clients' payment capacity.

In the six-month period comparison, besides the R\$1.3 billion increase in additional PLL in 2Q09, higher provisions reflect the effects of the world's financial crisis, which implied an economic slowdown in the country, temporarily affecting the capacity of payment of companies and individuals.

### **Delinquency Ratio > 90 days**

The total delinquency ratio for more than 90 days increased slightly in the 2Q09, impacted by the economic slowdown, as well as by the seasonal factor, since higher delinquency levels are usually expected in the first two quarters of each year, which was not observed in the past years, due to the strong loan book growth.

It is also worth highlighting the slower pace of growth concerning individuals delinquency. However, small and medium-sized companies still deserve attention. Bradesco ended the 2Q09 with a delinquency ratio for loans of 4.6% .

### **Coverage Ratio**

The R\$13.871 billion balance of PLL on June 30, 2009, is composed of R\$10.879 billion of provisions required by the Brazilian Central Bank and R\$2.992 billion of excess provisions.

In the chart below, we present the coverage ratio of the Provision for Loan Losses related to loans overdue for more than 90 days. We observed an improvement of 16.7 p.p., ensuring comfortable provisioning levels.

## Insurance, Private Pension Plans and Savings Bonds

The Net Income in the 2Q09 amounted to R\$638 million, and is in line with the result presented in the 1Q09, showing an annualized return of 29.9% on Shareholders' Equity.

The result for 1H09 was R\$1.288 billion, with a 29.1% annual return on Shareholders' Equity, a 12.3% drop y-o-y, when the result was R\$1.469 billion.

(1) Excluding additional provisions.

In 2Q09, sales posted an impressive 10.5% growth, net income and major performance ratios remaining in line with 1Q09.

Combined ratio improved 0.7 p.p. as compared to the period ended March 31, 2009.

The R\$181 million drop in the 1H09 results in the y-o-y comparison was a result of:

the decrease of R\$131 million in the proceeds obtained with sale of shares which amounted to R\$232 million in 1H08; and

the increase from 9% to 15% in the CSLL tax rate, which burdened the 1H09 results by R\$96 million.

Bradesco's Insurance Group net income in May 2009 accounted for 32.5% of the net income of the entire Brazilian insurance market. (Source: Susep)

In May 2009, the Insurance Group's technical provisions represented 32.7% of the insurance market, according to data of Susep and ANS.

In terms of solvency, Bradesco's Insurance Group) complies with Susep's (Insurance Superintendence) rules, which took effect as of January 1<sup>st</sup>, 2008 and is also adjusted to the international standards (Solvency II). The financial leverage ratio stood at 2.3 times the Shareholders' Equity.

## **Fees and Commissions**

Fees and Commissions amounted to R\$2,911 million in 2Q09, moving up 6.9% in the q-o-q comparison, mainly due to higher revenues related to capital markets operations, highlighting the secondary public offering (IPO) of VisaNet Brasil shares.

When comparing 1H09 and 1H08, Fees and Commissions grew by 5.3%, due to the increase of business and client base, which went up nearly by 3.0% over the last 12 months, partially offsetting the losses originated from fees adjustment.

## **Personnel Expenses**

In 2Q09, the R\$56 million increase in the q-o-q comparison is composed of higher expenses in:

structural expenses of R\$48 million, basically due to decreased expenses with higher accumulated vacations of employees in the 2Q09; and

non-structural expenses in the amount of R\$8 million related to higher training expenses and provisions for labor claims, offset by lower expenses with employment contract terminations and profit sharing (PLR).

When comparing 1H09 and 1H08, the R\$191 million increase is basically explained by:

The R\$311 million rise in the structural expenses, due to the expansion of outlets, wage increase (2008 bargaining agreement 8.15% to 10%) and benefits; and

the drop of R\$120 million in the non-structural expenses, basically due to lower profit sharing (PLR) and employment contract termination expenses.

Edgar Filing: BANK BRADESCO - Form 6-K

Note: Structural Expenses = Compensation + Social Taxes + Benefits + Private Pension.

Non-Structural Expenses = Employee Profit Sharing (PLR) + Training + Labor Provision + Employment Contract Termination Expenses.

### **Administrative Expenses**

Administrative expenses moved up by 3.6% in the q-o-q comparison, mainly due to:

the increase in third-party services in the amount of R\$21 million;

higher depreciation and amortization expenses in the amount of R\$13 million; and

the increase in other administrative expenses in the amount of R\$61 million, related to the credit card bonus program.

Mitigated by:

lower advertising and marketing expenses in the amount of R\$26 million.

When compared to 1H08, the increase is mainly due to the expansion of the distribution network and higher business volumes.

### **Tax Expenses**

The R\$28 million increase of Tax Expenses in relation to 1Q09 is mainly due to higher PIS/Cofins expenses in the amount of R\$21 million, in view of the increase in the taxable income in 2Q09, especially net interest income and fee income.

When comparing 1H09 and 1H08, tax expenses remained in line, with a 0.8% change.

## **Other Operating Revenues and Expenses**

Other operating expenses, net of other operating revenues, posted a variation of R\$109 million in the quarter and of R\$464 million in the semester.

Variations of both periods basically derived from higher operating provisions, mostly referring to provisions for contingencies related to economic plans, mitigated by the change in the accounting criteria for amortization of expenses deriving from the acquisition of rights for rendering banking services.

## **Non-Operating Income**

In 2Q09, Non-Operating Income totaled R\$2,034 million, mainly due to the gain with the partial sale of VisaNet Brasil, in the amount of R\$2 billion.

If we compare 1H09 Non-Operating Income (excluding the VisaNet Brasil effect), in the amount of R\$107 million, with the amount obtained in 1H08, of R\$122 million, such variation was impacted by the income on the sale of BM&FBovespa shares in the amount of R\$69 million in 1H08 and of Visa Inc. in the amount of R\$48 million in 1H09.

## **Income Tax and Social Contribution**

The R\$269 million increase in 2Q09 in relation to the previous quarter reflects tax charges over earnings before taxes, adjusted by additions and exclusions.

We observe that the average rate (calculated considering the earnings before income tax and social contribution less equity in the earnings (losses) of unconsolidated companies and interest on shareholders' capital) is close to the effective tax rate of 34%.

When comparing 1H09 and 1H08, taxes and contributions went up by 3.7% .

Tax credits originated in previous periods, deriving from the increase in the CSLL tax rate to 15%, are recorded in the consolidated financial statements up to the limit of corresponding consolidated tax liabilities. The balance not activated is of R\$904 million. Further details may be obtained in the Footnote #34 of the Financial Statements.

## **Unrealized Gains**

Unrealized gains reached R\$8.7 billion in 2Q09, a R\$7.4 billion jump in relation to the previous quarter. The variation is mainly due to (i) the remaining marked-to-market investment, in the amount of R\$6.4 billion, generated by Visanet's IPO; and (ii) a R\$1 billion appreciation in the mark-to-market of securities, basically equities that were benefited by the partial turnaround of the Brazilian stock market.

## Economic Scenario

The second quarter of 2009 signals that the worst of the global crisis has been overcome. Nevertheless, the international scene still requires caution, as the uncertainty in relation to the upturn pace over the following quarters remains high. We believe in a consistent, but gradual, recovery of the world's economy, which is compatible with a yet volatile direction of assets prices. Under this international scenario, we do not observe relevant inflationary pressures, but the move of commodities prices must be carefully watched, mainly in view of the recovery of countries such as China, which have materially contributed to the demand expansion in the past years. It is also worth mentioning over this last quarter mounting concerns over the long-term tax solvency of several developed economies; these concerns may cause non-negligible impacts on the foreign exchange market in the medium term, as U.S. dollar depreciation hints.

The Brazilian economy, in particular, has been holding out the crisis relatively much better than other countries, with visible signs that it had recovered and overcome the recession in the mid quarter. Concerning the industry, the second quarter set the end of inventories adjustment, which must benefit the upturn over the forthcoming months, as well as the continuity of business confidence. Concerning consumption, we observed a downward move in expansion but without abrupt declines as previously anticipated. Factors, such as tax benefits, credit recovery, interest rates cut and real income growth have been stimulating the consumer's confidence upturn. After an accumulated GDP reduction of 4.3% in the fourth quarter of 2008 and in the first quarter of 2009, we will have consecutive increases in the three following periods, while comparing to the immediately previous quarter. A 0.5% drop projected for 2009, even if negative, will be one of the best results in relation to global standards in 2009.

Bradesco reiterates its positive and favorable view in relation to the Brazilian economy. Brazil was not immune to the global crisis, the biggest ones of last decades, but appears in the international scenario as one of the first countries to recover, and as a benchmark of macroeconomic and institutional fundamentals improvement in the past years. Such world's vision towards Brazil has been represented by continued foreign direct investment inflow, even in sectors deeply affected in the origin countries of such investments, which has been contributing to the exchange rate appreciation. In fact, this is the first time in Brazil's recent history that amid a foreign crisis we observed currency appreciation and interest rate cuts, without generalized inflationary pressures. Referring to the monetary policy, the second quarter was marked by the one-digit nominal interest rate, certainly an unprecedented event that will contribute to the economic upturn over the next months.
