Consolidated Financial Statements at

**September 30, 2013 and 2012
and Independent Auditors' Report Review**

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders

Braskem S.A.

We have reviewed the accompanying condensed consolidated balance sheet of Braskem S.A. and its subsidiaries as of September 30, 2013, and the related condensed consolidated statements of income, comprehensive income, and shareholders' equity for the nine month periods ended September 30, 2013, and September 30, 2012 and the condensed consolidated statement of cash flows for the nine month periods ended September 30, 2013 and September 30, 2012. These interim financial statements are the responsibility of the Company's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the accompanying condensed consolidated interim financial statements for them to be in conformity with IAS 34 — Interim Financial Reporting issued by the International Accounting Standard Board (IASB).

We previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet as of December 31, 2012, and the related consolidated statements of income, comprehensive income, and shareholders' equity, and of cash flows for the year then ended (not presented herein), and in our report dated February 7, 2013, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying consolidated balance sheet as of December 31, 2012, is fairly stated in all material respects in relation to the consolidated balance sheet from which it has been derived.

2.2. Accounting policies

There were no changes in the accounting practices used in the preparation of this report in relation to those presented in the December 31, 2012 financial statements, except as presented in Notes 2.2.1, and 2.2.2.

2.2.1 Revised - Post-employment benefits

The post-employment benefits are financed by contributions to pension funds and the use of actuarial assumptions is necessary to measure the liability and the expenses of the plans, as well as the existence of actuarial gains and losses.

The liability recognized in respect of these plans is the present value of the defined benefit obligation at the balance sheet date, less the fair value of plan assets, adjusted by actuarial gains or losses and past-service costs.

The cost components of post-employment benefits are recognized as follows:

- (i) actuarial gains and losses from the actuarial remeasurement are recognized under “other comprehensive income”;
- (ii) costs of past services are recognized as profit or loss as they are incurred; and

(iii) the net amount of interest on the assets and liabilities of the plan are recorded in the financial results of the period.

Braskem S.A.**Notes to the financial statements****at September 30, 2013****All amounts in thousands of reais unless otherwise stated**

Until 2012, item (i) above was not recognized if lower than 10% (a) of the amount of the current defined benefit obligation; and (b) of the fair value of any plan assets. As of 2013, the amount must be recognized at the moment it is determined. The effects of this change are described in the table below:

2.2.2 Non derivative instruments and hedge operations

Management designated non-derivative financial instruments as hedges for the flow of highly probable future exports.

The effective portion of the foreign exchange variation on financial liabilities designated and qualified as hedges for the flow of exports is recognized in "other comprehensive income". These amounts are transferred to the "financial result" in the periods when the item covered by hedge affects the result. The not effective portion is immediately booked at the statement of operations as "financial result".

When a hedge instrument expires, is sold, or no longer meets the criteria for hedge accounting, it is discontinued prospectively and all the accumulated gain or loss in shareholders' equity remains there and is recognized in the profit or loss of the year when the hedged item or transaction impacts the result. If the hedged item or transaction is settled in advance or discontinued or is not expected to occur, the accumulated gain or loss in shareholders' equity is immediately transferred to "financial results".

Cash flow hedge operations held by the Company are described in Note 20.

14. Project finance

Braskem Idesa is constructing a plant in Mexico (Ethylene XXI Project), with capacity to produce around 750 kton of high-density polyethylene and 300 kton of low-density polyethylene using ethane as feedstock. The raw material will be supplied through an agreement with PEMEX-Gás for delivery of 66,000 barrels of ethane per day for 20 years.

In line with the Company's financial policy, the investment is being financed under the Project Finance mode, whereby the project loan must be paid exclusively with the cash generated by the project itself and shareholders provide limited guarantees (limited recourse project finance). Thus, this financing has the usual guarantees of this type of operation such as assets, receivables, cash generation and other rights from the project, as well commitments by shareholders to inject a limited amount of capital to provide for eventual additional costs thereof.

Braskem S.A.**Notes to the financial statements****at September 30, 2013****All amounts in thousands of reais unless otherwise stated**

The financing structure was concluded in December 2012, at the ratio of 70% debt and 30% equity. The first tranche of R\$3,316,211 (US\$1,483,896 thousand) was received on July 24, 2013. A portion of these funds was used to settle the amounts lent by shareholders Braskem (without impact to the consolidated information) and Grupo Idesa, totaling R\$1,449,826 (US\$648,750 thousand) and R\$483,276 (US\$216,250 thousand), respectively. The release of the second tranche is expected to occur at November 6, 2013, amounting to US\$545,331 thousand.

Braskem Idesa capitalized the financial charges incurred on this financing, since its funding through September 30, 2013, in the amount of R\$26,262 (MXN\$147,835 thousand). The average interest rate was 4.88% p.a.

Braskem S.A.**Notes to the financial statements****at September 30, 2013****All amounts in thousands of reais unless otherwise stated****(b.ii) Interest rate swap linked to Libor**

On September 30, 2013, Braskem Idesa held six interest rate swap contracts for a nominal value of US\$1,312,892 thousand, contracted on the future disbursements of the financing line (Note 14) contracted in U.S. dollar at floating rates (based on Libor). In these swaps, Braskem Idesa receives floating rates (Libor) and pays fixed rates periodically, coinciding with the financing cash flows. The objective of these swaps is to offset the changes in the future financial expenses from debt caused by changes in the Libor rate. The term, amount, settlement dates and floating interest rates coincide with the terms of the financing line.

(b.iii) Non-derivative liabilities designated for export hedge accounting

On May 1, 2013, Braskem S.A. designated non-derivative financial instrument liabilities, denominated in U.S. dollars, as hedge for the flow of its highly probable future exports. Thus, the impact of exchange rates on future cash flows in dollars derived from these exports will be offset by the foreign exchange variation on the designated liabilities, partly eliminating the volatility of results.

The Company considers the flow covered as highly probable based, on the following factors:

- Historically, annual export volumes represent three to four times the annual amount covered; In the past 5 years, Braskem recorded average exports of US\$2,4 billion annual, supporting the export amounts underlying the hedge; and
- The flow covered varies between 15% and 30% of the export flows planned by the Company;

The Company designated longer export flows than the financial liabilities that hedge them, to analyze the effectiveness of the operations, the export flows will be considered only until the date of maturity of the underlying debt. Nevertheless, to ensure continuity of the relation and strategy of the proposed hedge, the Company plans to refinance and/or substitute these hedging instruments according to their maturity, in accordance IAS 39.

Braskem S.A.**Notes to the financial statements****at September 30, 2013****All amounts in thousands of reais unless otherwise stated**

Braskem selected the hedge instruments with subsidiaries abroad observing the guarantees at those companies whose counterparty is external to that of Braskem. As such, non-derivative financial liabilities in which the foreign subsidiary acted as an intermediary in the operations were selected, which effectively maintained the essence of the transactions.

On September 30, the following non-derivative financial liabilities were designated as guarantee for the hedge, considering the scope of the balance sheet:

(c) Estimated maximum loss

The amount at risk of the derivatives held by Braskem on September 30, 2013, which is defined as the highest loss that could result in one month and in 95% of the cases under normal market conditions, was estimated by the Company at US\$45,824 thousand for the NCE swaps, and US\$49,158 thousand for fixed rate / CDI swaps.

20.3. Credit quality of financial assets

(a) Trade accounts receivable

Only a few of the Company's customers have risk ratings assigned by credit rating agencies. For this reason, the Company developed its own credit rating system for all accounts receivable from domestic customers and for part of the accounts receivable from foreign customers. The Company does not apply this rating to all of its foreign customers because most accounts receivable from them are covered by an insurance policy or letters of credit issued by banks. On September 30, 2013, the credit ratings were as follows:

		Percentage
1	Minimum risk	26.27%
2	Low risk	27.98%
3	Moderate risk	21.83%
4	High risk	22.89%
5	Very high risk (i)	1.03%

(i) Most customers in this group are inactive and the respective accounts are in the process of collection actions in the courts. Customers in this group that are still active buy from Braskem and pay in advance.

(iii) Risk-free financial assets

Braskem's financial policy determines "A-" as the minimum rating for financial investments.

20.4. Sensitivity analysis

Financial instruments, including derivatives, may be subject to changes in their fair value as a result of the variation in commodity prices, foreign exchange rates, interest rates, shares and share indexes, price indexes and other variables. The sensitivity of the derivative and non-derivative financial instruments to these variables are presented below:

(a) Selection of risks

On September 30, 2013, the main risks that can affect the value of the Company's financial instruments are:

- Brazilian real/U.S. dollar exchange rate;
- Mexican peso/U.S. dollar exchange rate;
- Euro/U.S. dollar exchange rate;
- LIBOR floating interest rate;
- CDI interest rate; and
- TJLP interest rate.

For the purposes of the risk sensitivity analysis, the Company presents the exposures to currencies as if they were independent, that is, without reflecting in the exposure to a foreign exchange rate the risks of the variation in other foreign exchange rates that could be directly influenced by it.

Braskem S.A.

Notes to the financial statements

at September 30, 2013

All amounts in thousands of reais unless otherwise stated

(b) Selection of scenarios

In accordance with CVM Instruction No. 475/08, the Company included three scenarios in the sensitivity analysis, with one that is probable and two that represent adverse effects to the Company. In the preparation of the adverse scenarios, only the impact of the variables on the financial instruments, including derivatives, and on the items covered by hedge transactions, was considered. The overall impacts on the Company's operations, such as those arising from the revaluation of inventories and revenue and future costs, were not considered. Since the Company manages its exposure to foreign exchange rate risk on a net basis, adverse effects from depreciation in the Brazilian real in relation to the U.S. dollar can be offset by opposing effects on Braskem's operating results.

(b.1) Probable scenario

The Market Readout published by the Central Bank of Brazil on September 27, 2013 was used to create the probable scenario for the U.S. dollar/Brazilian real exchange rate and the CDI interest rate, using the reference date of December 31, 2013. The *Market Readout* presents a consensus of market expectations based on a survey of the forecasts made by various financial and non-financial institutions.

The Market Readout does not publish forecasts for the interest rates LIBOR and TJLP. Therefore, the Company considered the expectations for the CDI interest rate for determining the probable scenario for those rates, given their correspondence. The probable scenario for the TJLP is an increase of 0.5% from the current rate of 5%, in line with the size of the government's most recent decisions to increase or decrease the rate, and accompanying the forecast for the cumulative increase in the CDI rate by end-2013 of 0.75%.

(b.2) Possible and extreme adverse scenarios

For the Brazilian real/U.S. dollar and Mexican peso/U.S. dollar exchange rates, a positive change of 25% was considered for the possible adverse scenario and of 50% for the extreme scenario based on the exchange rate on September 30, 2013.

For the U.S. dollar/Euro exchange rate, a decrease of 25% was considered for the possible adverse scenario and of 50% for the extreme scenario based on the exchange rate on September 30, 2013.

For the Libor and CDI interest rates, a positive change of 25% was considered for the possible adverse scenario and of 50% for the extreme scenario based on the respective interest rate on September 30, 2013.

For the TJLP interest rate, an increase of 1% was considered for the possible adverse scenario and of 1.5% for the extreme scenario based on its rate on September 30, 2013, in accordance with the upward or downward adjustments made by the government in the rate, in this order of scale.

The sensitivity values in the table (c) below are the changes in the value of the financial instruments in each scenario, except for tables (d), (e), (f), (g) and (h) which show the changes in future cash flows.

27. Subsequent events

(a) On October 14, 2013, Braskem announced the execution of a memorandum of understanding to assess the possibility of forming a joint venture in Brazil with Styrolution, a global leader in the styrenics. The joint venture will be responsible for analyzing the economic feasibility of installing a plant with annual production capacity of 100 kton styrenics specialties and the copolymers acrylonitrile butadiene styrene (ABS) and styrene acrylonitrile (SAN) to supply to clients in Brazil and all of South America.

The consummation of the joint venture is subject to approval by the regulatory and antitrust agencies. The plan is for Styrolution to be the majority shareholder, with 70% of the company and for Braskem to hold the other 30%. Subject to the conclusion of an agreement between the parties and the respective approvals from the government agencies, the plant construction is expected to begin in early 2015, with production most likely starting in 2017.

(b) On October 25, 2013, Braskem renegotiated its export credit note (NCE) financing of R\$1,015,000, extending the final maturity to October 2021, with interest of 105% of the overnight rate (CDI) (Note 13(d)). Principal will be repaid in 7 annual tranches from 2015.
