and Independent Auditors' Report Review

Report on Review of Quarterly Information

To the Board of Directors and Shareholders

Braskem S.A.

Introduction

We have reviewed the accompanying parent company and consolidated interim accounting information of Braskem S.A., included in the Quarterly Information Form (ITR) for the quarter ended September 30, 2013, comprising the balance sheet at that date and the statements of operations and comprehensive income for the quarter and nine-month periods then ended, and the statements of changes in equity and cash flows for the nine-month period then ended, and a summary of significant accounting policies and other explanatory information.

Management is responsible for the preparation of the parent company interim accounting information in accordance with the accounting standard CPC 21, Interim Financial Reporting, of the Brazilian Accounting Pronouncements Committee (CPC), and of the consolidated interim accounting information in accordance with CPC 21 and International Accounting Standard (IAS) 34, Interim Financial Reporting issued by the International Accounting Standards Board (IASB), as well as the presentation of this information in accordance with the standards issued by the Brazilian Securities Commission (CVM), applicable to the preparation of the Quarterly Information (ITR). Our responsibility is to express a conclusion on this interim accounting information based on our review.

Scope of review

We conducted our review in accordance with Brazilian and International Standards on Reviews of Interim Financial Information (NBC TR 2410 – Review of Interim Financial Information Performed by the Independent Auditor of the Entity and ISRE 2410 – Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Brazilian and International Standards on Auditing and

consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion on the parent company interim information

Based on our review, nothing has come to our attention that causes us to believe that the accompanying parent company interim accounting information included in the quarterly information referred to above has not been prepared, in all material respects, in accordance with CPC 21 applicable to the preparation of the Quarterly Information, and presented in accordance with the standards issued by the CVM.

Conclusion on the consolidated interim information

Based on our review, nothing has come to our attention that causes us to believe that the accompanying consolidated interim accounting information included in the quarterly information referred to above has not been prepared, in all material respects, in accordance with CPC 21 and IAS 34 applicable to the preparation of the Quarterly Information, and presented in accordance with the standards issued by the CVM.

Other matters

Statements of value added

We have also reviewed the parent company and consolidated statements of value added for the nine-month period ended September 30, 2013. These statements are the responsibility of the Company's management, and are required to be presented in accordance with standards issued by the CVM applicable to the preparation of Quarterly Information (ITR) and are considered supplementary information under IFRS, which do not require the presentation of the statement of value added. These statements have been submitted to the same review procedures described above and, based on our review, nothing has come to our attention that causes us to believe that they have not been prepared, in all material respects, in a manner consistent with the parent company and consolidated interim accounting information taken as a whole.

Notes to the financial statements

at September 30, 2013

All amounts in thousands of reais unless otherwise stated

1. Operations

Braskem S.A. (hereinafter “Parent Company”) is a public corporation headquartered in Camaçari, Bahia, which jointly with its subsidiaries (hereinafter “Braskem” or “Company”), operates 36 industrial units, 29 in Brazil, 5 in the United States and 2 in Germany.

Braskem S.A. is controlled by Odebrecht S.A. (“Odebrecht”), which directly and indirectly holds interests of 50.11% and 38.32% in its voting and total capital, respectively.

(a) Material corporate and operating events

(a.1) On August 17, 2012, the Company inaugurated, in Marechal Deodoro, Alagoas, a new plant with annual production capacity of 200 kton of polyvinyl chloride (“PVC”). With the plant’s opening, Braskem’s annual PVC production capacity increased to 710 kton (unaudited).

(a.2) On September 13, 2012, the Company inaugurated, in the Triunfo Petrochemical Complex in the state of Rio Grande do Sul, a new plant with annual production capacity of 103 kton (unaudited) of butadiene. The new plant is already operating at full production capacity.

(a.3) In the last quarter of 2012, the ownership interests held in Cetrel and Braskem Distribuidora were divested, for R\$208,100 and R\$444,000, respectively. The Parent Company held 54.2% of the total and voting capital of Cetrel and 100% of the capital of Braskem Distribuidora.

(a.4) On May 15, 2013, the Extraordinary Shareholders Meeting approved the increase in the capital stock of the subsidiary Braskem Idesa S.A.P.I. (“Braskem Idesa”), without the issue of new shares, in the amount of R\$141,620 (Mex\$850,061 thousands), through capital injection of R\$ 106,214 (Mex\$ 637,546 thousands) by the parent company and R\$ 35,406 (Mex\$ 212,515 thousands) by the non-controlling shareholder.

(a.5) On July 1, 2013, the Parent Company acquired 2 thousand common shares of Odebrecht Comercializadora de Energia S.A. (“OCE”), equivalent to 20% of the capital of that company, whose main corporate purpose is to buy and sell energy in the spot market. Due to the provisions in the shareholders' agreement, this investment was classified as a jointly-controlled investment.

(a.6) On August 30, 2013, the Extraordinary Shareholders' Meeting approved the merger of Rio Polímeros S.A. (“Riopol”) with Braskem Qpar S.A. (“Braskem Qpar”) and the increase in its capital from R\$4,252,353 to R\$7,131,165.

(b) Net working capital

On September 30, 2013, net working capital of the Parent Company was negative R\$1,726,150. On the other hand, net working capital at the Consolidated was positive R\$328,776. Given that the consolidated figures are used in the management of working capital, since the Company uses mechanisms to transfer funds between the companies efficiently without jeopardizing the fulfillment of the commitments of each of the entities forming the consolidated statements, any analysis of the Parent Company’s working capital will not reflect the actual liquidity position of the consolidated group.

Braskem S.A.**Notes to the financial statements****at September 30, 2013****All amounts in thousands of reais unless otherwise stated**

Additionally, Braskem has three revolving credit lines in the amounts of:

(i) US\$350 million that may be used without restrictions for a period of four years as from November 2012; and (ii) US\$250 million that may be used without restrictions for a period of five years as from August 2011; and (iii) R\$450 million for a period of three years as from December 2012.

These credit facilities enable Braskem to reduce the amount of cash it holds. Up to September 30, 2013, Braskem had not drawn credit from these lines.

(c) Effect of foreign exchange variation

The Company has balances and transactions in other currencies, mainly in U.S. dollar, as well as financial investments, trade accounts receivable, trade payables, borrowings and sales. The balances of assets and liabilities are translated based on the exchange rate at the end of each period, while transactions are based on the effective exchange rate on the date each operation occurs. These rates are informed by the Central Bank of Brazil.

The following table shows the U.S. dollar average and end-of-period exchange rates for the periods in this report:

U.S. dollar, end of period

September 2013	R\$2.2300
December 2012	R\$2.0435
Appreciation of the U.S. dollar in relation to the Brazilian real	9.13%

Average U.S. dollar rate

Nine-month period ended September 30, 2013	R\$2.1223
Nine-month period ended September 30, 2012	R\$1.9213
Appreciation of the U.S. dollar in relation to the Brazilian real	10.46%

2. Summary of significant accounting policies

2.1. Basis of preparation

This Quarterly Information should be read together with the financial statements of Braskem as of December 31, 2012, which were prepared and presented in accordance with accounting practices adopted in Brazil, including the pronouncements issued by the Brazilian Accounting Pronouncements Committee (CPC), and in accordance with the International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB).

The preparation of the quarterly information requires the use of certain critical accounting estimates. It also requires the Management of the Company to exercise its judgment in the process of applying its accounting policies. There were no changes in the assumptions and judgments made by the Company's management in the use of estimates for the preparation of the Quarterly Information in relation to those used in the December 31, 2012 financial statements.

The statement of operations and statement of comprehensive income for the third quarter of 2012 and for the period ended September 30, 2012, as well as their respective Notes for the period ended September 30, 2012 were revised (Note 2.2.1) to reflect as discontinued operations of Cetrel S.A. ("Cetrel") and Distribuidora de Água Camaçari S.A. ("Braskem Distribuidora") resulting from their divestments and IQ Soluções & Química S.A. ("Quantiq") and IQAG Armazéns Gerais Ltda resulting from the decision to divest ("IQAG") (Note 3).

Braskem S.A.

Notes to the financial statements

at September 30, 2013

All amounts in thousands of reais unless otherwise stated

The balance sheet and statement of changes in shareholders' equity as on December 31, 2012, were revised to reflect the effects of the retroactive application of CPC 33 (R1) and IAS 19, as explained in Note 18.

(a) Consolidated quarterly information

The consolidated Quarterly Information was prepared and is being presented in accordance with the pronouncements CPC 21 (R1) and IAS 34 - Interim Financial Reporting, which establish the minimum content for interim financial statements.

(b) Parent company quarterly information

The parent company Quarterly Information was prepared and is being presented in accordance with pronouncement CPC 21(R1).

2.2. Accounting policies

There were no changes in the accounting practices used in the preparation of the Quarterly Information in relation to those presented in the December 31, 2012 financial statements, except as presented in Notes 2.2.1, and 2.2.2.

Braskem S.A.

2.2.1 Revised - Post-employment benefits

The post-employment benefits are financed by contributions to pension funds and the use of actuarial assumptions is necessary to measure the liability and the expenses of the plans, as well as the existence of actuarial gains and losses.

The liability recognized in respect of these plans is the present value of the defined benefit obligation at the balance sheet date, less the fair value of plan assets, adjusted by actuarial gains or losses and past-service costs.

The cost components of post-employment benefits are recognized as follows:

- (i) actuarial gains and losses from the actuarial remeasurement are recognized under “other comprehensive income”.
- (ii) costs of past services are recognized as profit or loss as they are incurred; and
- (iii) the net amount of interest on the assets and liabilities of the plan are recorded in the financial results of the period.

Until 2012, item (i) above was not recognized if lower than 10% (a) of the amount of the current defined benefit obligation; and (b) of the fair value of any plan assets. As of 2013, the amount must be recognized at the moment it is determined. The effects of this change are described in the table below:

Notes to the financial statements

at September 30, 2013

All amounts in thousands of reais unless otherwise stated

2.2.2 Non derivative instruments and hedge operations

Management designated non-derivative financial instruments as hedges for the flow of highly probable future exports.

The effective portion of the foreign exchange variation on financial liabilities designated and qualified as hedges for the flow of exports is recognized in "other comprehensive income". These amounts are transferred to the "financial result" in the periods when the item covered by hedge affects the result. The not effective portion is immediately booked at the statement of operations as "financial result".

When a hedge instrument expires, is sold, or no longer meets the criteria for hedge accounting, it is discontinued prospectively and all the accumulated gain or loss in shareholders' equity remains there and is recognized in the profit or loss of the year when the hedged item or transaction impacts the result. If the hedged item or transaction is settled in advance or discontinued or is not expected to occur, the accumulated gain or loss in shareholders' equity is immediately transferred to "financial results".

Cash flow hedge operations held by the Company are described in Note 20.

(i) On September 30, 2013, the Parent Company held junior subordinated shares issued by receivables-backed investment funds. These shares are measured by their redemption value and are held until the conclusion of operations of said funds. The funds issue two other types of shares that enjoy priority in compensation over the junior subordinated shares. The risk related to the operations of these funds is limited to the value of the shares held by the Parent Company.

(ii) On September 30, 2013, Braskem Holanda had a financial investments held-to-maturity that was irrevocably offset by an export prepayment agreement of the Parent Company, in the amount of US\$250 million, as provided for in the credit assignment agreement entered into between these two companies and Banco Bradesco (Note 13). This accounting offset was carried out in accordance with CPC 39 and IAS 32, which provides for the possibility of offsetting financial instruments when there is intent and rightfully executable right to realize an asset and settle a liability simultaneously.

Notes to the financial statements

at September 30, 2013

All amounts in thousands of reais unless otherwise stated

(a) PIS and COFINS – Law 12,859/13

On September 10, 2013, was published Law 12,859, converting Provisional Presidential Decree No. 613 of May 7, 2013, which, among others, reduced the PIS and COFINS social contributions on imports and sales in the domestic market of certain inputs manufactured by domestic manufacturers, and also offers fresh credit to the chemical and petrochemical production chain. The realization of these credits may occur in two ways: (i) offset of overdue or falling due liabilities related to taxes levied by the Federal Revenue Service; or (ii) cash reimbursement.

(b) REINTEGRA Program

In the period ended September 30, 2013, the Company recognized credits in the amount of R\$170,144 and offset the amount of R\$150,171.

(c) Value added tax (“VAT”)

On September 30, 2013, this line included:

(i) R\$18,934 from sales by Braskem Alemanha to other countries. These credits are refunded in cash by the local government; and

(ii) R\$168,408 from purchases of machinery and equipment for the Ethylene XXI Project (Note 14). These credits may be refunded, in cash, by the local government or offset with VAT due from the start of operations of the project.

14. Project finance

Braskem Idesa is constructing a plant in Mexico (Ethylene XXI Project), with capacity to produce around 750 kton of high-density polyethylene and 300 kton of low-density polyethylene using ethane as feedstock. The raw material will be supplied through an agreement with PEMEX-Gás for delivery of 66,000 barrels of ethane per day for 20 years.

In line with the Company's financial policy, the investment is being financed under the Project finance mode, whereby the project loan must be paid exclusively with the cash generated by the project itself and shareholders provide limited guarantees (limited recourse project finance). Thus, this financing has the usual guarantees of this type of operation such as assets, receivables, cash generation and other rights from the project, as well commitments by shareholders to inject a limited amount of capital to provide for eventual additional costs thereof.

Braskem S.A.**Notes to the financial statements****at September 30, 2013****All amounts in thousands of reais unless otherwise stated**

The financing structure was concluded in December 2012, at the ratio of 70% debt and 30% equity. The total financing contracted to meet construction expenses and start project operation was US\$3,193,095 thousand. The first tranche of R\$3,316,211 (US\$1,483,896 thousand) was received on July 24, 2013. A portion of these funds was used to settle the amounts lent by shareholders Braskem and Grupo Idesa, totaling R\$1,449,826 (US\$648,750 thousand) and R\$483,276 (US\$216,250 thousand), respectively. The release of the second tranche is expected to occur at November 6, 2013, amounting to US\$ 545,331 thousand.

Braskem Idesa capitalized the financial charges incurred on this financing, since its funding through September 30, 2013, in the amount of R\$26,262 (MXN\$ 147,835 thousand). The average interest rate was 4.88% p.a.

The balance sheet on that date was restated to reflect the changes to the item "post-employment benefits". For comparison purposes, the information for December 31, 2011 was not restated in the statement of changes in shareholders' equity, since the amounts are immaterial.

19. Contingencies

The Company has contingent liabilities related to lawsuits and administrative proceedings arising from the normal course of its business. These contingencies are of a labor and social security, tax, civil and corporate nature and involve risks of losses that are classified by the Company's management as possible. A provision for the lawsuits for

which the risk of loss is classified as probable is recognized and is presented in Note 17 of this Quarterly Information.

The balance of contingencies not accounted for at September 30, 2013:

	Sep/2013	Consolidated Dec/2012
Tax claims	2,962,456	2,967,799
Other lawsuits	336,292	411,324
Total	3,298,748	3,379,123

The description of the main contingent liabilities of the Company was presented in the 2012 annual financial statements, in Note 28.

Fair value hierarchy

Level 1 – fair value obtained through prices quoted (without adjustments) in active markets for identical assets or liabilities, such as the stock exchange.

Level 2 – fair value obtained from discounted cash flow models, when the instrument is a forward purchase or sale or a swap contract, or valuation models of option contracts, such as the Black-Scholes model, when the derivative has the characteristics of an option.

20.2.1. Existing operations on September 30, 2013**(a) Non-hedge accounting transactions**

The regular changes in the fair value of swaps are recorded as financial income or expenses in the same period in which they occur. Braskem recognized a financial expense of R\$83,505 related to the change in the fair value of these swaps for the period ended September 30, 2013.

(a.i) Commodity swap – Naphtha

The parent company made a single operation of resin at a fixed price sale to a final customer. With the goal of preserving its margin, potentially affected by the fluctuation in the price of naphtha, were made four future purchase contracts at a fixed price of this raw material, as shown below:

(a.ii) Interest rate swap linked to NCE

The parent company has contracted financing facilities in the form of export credit note (NCE) (Note 13(d)) with fixed interest payments. Considering that the cash in Brazilian real is largely invested in the overnight rate (CDI)-indexed investments, the company contracted swaps to match financial charges with cash yields.

Prior to designating these swaps as hedge accounting, on May 1, 2013, the Company had recognized financial income of R\$43,651 as profit for the period. After the recognition of this designation, an expense of R\$84,736, relating to changes in the fair value of these swaps since the designation until September 30, 2013, was recognized.

Braskem S.A.**Notes to the financial statements****at September 30, 2013****All amounts in thousands of reais unless otherwise stated****(b.ii) Interest rate swap linked to Libor**

On September 30, 2013, Braskem Idesa held six interest rate swap contracts for a nominal value of US\$1,312,892 thousand, contracted on the future disbursements of the financing line (Note 14) contracted in U.S. dollar at floating rates (based on Libor). In these swaps, Braskem Idesa receives floating rates (Libor) and pays fixed rates periodically, coinciding with the financing cash flows. The objective of these swaps is to offset the changes in the future financial expenses from debt caused by changes in the Libor rate. The term, amount, settlement dates and floating interest rates coincide with the terms of the financing line.

Before designating these swap operations as hedge accounting, on September 1, 2013, the Company recognized financial income of R\$116,007 as profit in the period. After recognizing such designation, in shareholders' equity, the Company recognized financial expense of R\$45,639 relating to changes in the fair value of these swaps since the designation through September 30, 2013.

Braskem S.A.**Notes to the financial statements****at September 30, 2013****All amounts in thousands of reais unless otherwise stated****(b.ii) Non-derivative liabilities designated for export hedge accounting**

On May 1, 2013, Braskem S.A. designated non-derivative financial instrument liabilities, denominated in U.S. dollars, as hedge for the flow of its highly probable future exports. Thus, the impact of exchange rates on future cash flows in dollars derived from these exports will be offset by the foreign exchange variation on the designated liabilities, partly eliminating the volatility of results.

On September 30, 2013, the following non-derivative liabilities of Braskem S.A. were designated as hedge for the flow of its highly probable future exports:

Braskem S.A.

Notes to the financial statements

at September 30, 2013

All amounts in thousands of reais unless otherwise stated

The Company considers the flow covered as highly probable based, on the following factors:

- Historically, annual export volumes represent three to four times the annual amount covered; In the past 5 years, Braskem S.A. recorded average exports of US\$2,4 billion annual, supporting the export amounts underlying the hedge; and
- The flow covered varies between 15% and 30% of the export flows planned by the Company;

The Company designated longer export flows than the financial liabilities that hedge them, to analyze the effectiveness of the operations, the export flows will be considered only until the date of maturity of the underlying debt. Nevertheless, to ensure continuity of the relation and strategy of the proposed hedge, the Company plans to refinance and/or substitute these hedging instruments according to their maturity, in accordance with CPC 38 and IAS 39.

The Braskem, in order to maintain consistency between the parent company's results and the consolidated results, selected the hedge instruments with subsidiaries abroad observing the guarantees at those companies whose counterparty is external to that of Braskem. As such, non-derivative financial liabilities in which the foreign subsidiary acted as an intermediary in the operations were selected, which effectively maintained the essence of the transactions.

On September 30, the following non-derivative financial liabilities were designated as guarantee for the hedge, considering the scope of the consolidated balance sheet:

(c) Estimated maximum loss

The amount at risk of the derivatives held by Braskem on September 30, 2013, which is defined as the highest loss that could result in one month and in 95% of the cases under normal market conditions, was estimated by the Company at US\$45,824 for the NCE swaps, and US\$49,158 for fixed rate / CDI swaps.

20.3. Credit quality of financial assets**(a) Trade accounts receivable**

Only a few of the Company's customers have risk ratings assigned by credit rating agencies. For this reason, the Company developed its own credit rating system for all accounts receivable from domestic customers and for part of the accounts receivable from foreign customers. The Company does not apply this rating to all of its foreign customers because most accounts receivable from them are covered by an insurance policy or letters of credit issued by banks.

On September 30, 2013, the credit ratings were as follows:

	Percentage
1 Minimum risk	26.27%
2 Low risk	27.98%
3 Moderate risk	21.83%
4 High risk	22.89%
5 Very high risk (i)	1.03%

(i) Most customers in this group are inactive and the respective accounts are in the process of collection actions in the courts. Customers in this group that are still active buy from Braskem and pay in advance.

(i) Financial assets with no internal or external ratings and approved by the Management of the Company.

(ii) Investment funds with no assessment of internal or external risk, whose portfolio is composed of assets from major financial institutions and that comply with Braskem's financial policy.

(iii) Risk-free financial assets

Braskem's financial policy determines "A-" as the minimum rating for financial investments.

20.4. Sensitivity analysis

Financial instruments, including derivatives, may be subject to changes in their fair value as a result of the variation in commodity prices, foreign exchange rates, interest rates, shares and share indexes, price indexes and other variables. The sensitivity of the derivative and non-derivative financial instruments to these variables are presented below:

(a) Selection of risks

On September 30, 2013, the main risks that can affect the value of the Company's financial instruments are:

- Brazilian real/U.S. dollar exchange rate;
- Mexican peso/U.S. dollar exchange rate;
- Euro/U.S. dollar exchange rate;
- LIBOR floating interest rate;
- CDI interest rate; and
- TJLP interest rate.

Braskem S.A.

Notes to the financial statements

at September 30, 2013

All amounts in thousands of reais unless otherwise stated

For the purposes of the risk sensitivity analysis, the Company presents the exposures to currencies as if they were independent, that is, without reflecting in the exposure to a foreign exchange rate the risks of the variation in other foreign exchange rates that could be directly influenced by it.

(b) Selection of scenarios

In accordance with CVM Instruction No. 475/08, the Company included three scenarios in the sensitivity analysis, with one that is probable and two that represent adverse effects to the Company. In the preparation of the adverse scenarios, only the impact of the variables on the financial instruments, including derivatives, and on the items covered by hedge transactions, was considered. The overall impacts on the Company's operations, such as those arising from the revaluation of inventories and revenue and future costs, were not considered. Since the Company manages its exposure to foreign exchange rate risk on a net basis, adverse effects from depreciation in the Brazilian real in relation to the U.S. dollar can be offset by opposing effects on Braskem's operating results.

(b.1) Probable scenario

The Market Readout published by the Central Bank of Brazil on September 27, 2013 was used to create the probable scenario for the U.S. dollar/Brazilian real exchange rate and the CDI interest rate, using the reference date of December 31, 2013. The Market Readout presents a consensus of market expectations based on a survey of the forecasts made by various financial and non-financial institutions.

The Market Readout does not publish forecasts for the interest rates LIBOR and TJLP. Therefore, the Company considered the expectations for the CDI interest rate for determining the probable scenario for those rates, given their correspondence. The probable scenario for the TJLP is an increase of 0.5% from the current rate of 5%, in line with the size of the government's most recent decisions to increase or decrease the rate, and accompanying the forecast for the cumulative increase in the CDI rate by end-2013 of 0.75%.

(b.2) Possible and extreme adverse scenarios

For the Brazilian real/U.S. dollar and Mexican peso/U.S. dollar exchange rates, a positive change of 25% was considered for the possible adverse scenario and of 50% for the extreme scenario based on the exchange rate on September 30, 2013.

For the U.S. dollar/Euro exchange rate, a decrease of 25% was considered for the possible adverse scenario and of 50% for the extreme scenario based on the exchange rate on September 30, 2013.

For the Libor and CDI interest rates, a positive change of 25% was considered for the possible adverse scenario and of 50% for the extreme scenario based on the respective interest rate on September 30, 2013.

For the TJLP interest rate, an increase of 1% was considered for the possible adverse scenario and of 1.5% for the extreme scenario based on its rate on September 30, 2013, in accordance with the upward or downward adjustments made by the government in the rate, in this order of scale.

The sensitivity values in the table (c) below are the changes in the value of the financial instruments in each scenario, except for tables (d), (e), (f), (g) and (h) which show the changes in future cash flows.

(b) Ongoing share repurchase programs

(b.1) 4th Share repurchase program

On August 13, 2012, Braskem's Board of Directors approved the 4th program for the repurchase of shares effective between August 29, 2012 and August 28, 2013, through which the Company, or financial institutions hired for such purpose were allowed to acquire up to 13,376,161 class A preferred shares at market price.

Until November 2012, the financial institutions had acquired 262,300 shares for R\$3,489 at an average price of R\$13.30 (minimum of R\$12.66 and maximum of R\$14.07).

On November 12, 2012, the Company acquired these shares and received R\$71, related to the swap connected to the repurchase, net of withholding income tax of R\$29.

The shares repurchased were canceled in December 2012.

No purchases were made under this program in 2013.

27. Subsequent events

(a) On October 14, 2013, Braskem announced the execution of a memorandum of understanding to assess the possibility of forming a joint venture in Brazil with Styrolution, a global leader in the styrenics. The joint venture will be responsible for analyzing the economic feasibility of installing a plant with annual production capacity of 100 kton styrenics specialties and the copolymers acrylonitrile butadiene styrene (ABS) and styrene acrylonitrile (SAN) to supply to clients in Brazil and all of South America.

The consummation of the joint venture is subject to approval by the regulatory and antitrust agencies. The plan is for Styrolution to be the majority shareholder, with 70% of the company and for Braskem to hold the other 30%. Subject to the conclusion of an agreement between the parties and the respective approvals from the government agencies, the plant construction is expected to begin in early 2015, with production most likely starting in 2017.

(b) On October 25, 2013, Braskem renegotiated its export credit note (NCE) financing of R\$1,015,000, extending the final maturity to October 2021, with interest of 105% of the overnight rate (CDI) (Note 13(d)). Principal will be repaid in 7 annual tranches from 2015.
