Notes to Consolidated Financial Statements

Note 1. Basis of Presentation and Consolidation

The interim consolidated financial statements of Community Bancorp. and Subsidiary are unaudited. All significant intercompany balances and transactions have been eliminated in consolidation. In the opinion of management, all adjustments necessary for the fair presentation of the financial condition and results of operations of the Company contained herein have been made. The unaudited consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto for the year ended December 31, 2012 contained in the Company's Annual Report on Form 10-K. The results of operations for the interim period are not necessarily indicative of the results of operations to be expected for the full annual period ending December 31, 2013, or for any other interim period.

Note 2. Recent Accounting Developments

In December 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2011-11, "Balance Sheet (Topic 210): Disclosures about Offsetting Assets and Liabilities," amending Topic 210. The amendments require an entity to disclose both gross and net information about both instruments and transactions that are eligible for offset on the balance sheet and instruments and transactions that are subject to an agreement similar to a master netting arrangement. This guidance is effective for annual periods beginning on or after January 1, 2013 and interim periods within those annual periods, with retrospective disclosure for all comparative periods presented. Adoption of ASU 2011-11 did not have a material impact on the Company's consolidated financial statements.

In July 2012, the FASB issued ASU 2012-02, "Intangibles-Goodwill and Other (Topic 35): Testing Indefinite-Lived Intangible Assets for Impairment," amending Topic 350. The guidance allows entities to first perform an optional qualitative assessment to determine whether it is more likely than not that an indefinite-lived intangible asset is impaired in order to determine whether the asset should be further evaluated under quantitative impairment testing. The guidance does not revise the requirement that indefinite-lived intangible assets be tested for impairment at least annually, or more frequently if circumstances warrant, although it does revise the examples of events and circumstances that an entity should consider during interim periods. The ASU is effective for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012. Adoption of ASU 2012-02 did not have a material impact on the Company's consolidated financial statements.

In February 2013, the FASB issued ASU 2013-02, "Comprehensive Income (Topic 220): Reporting of Amounts Reclassified out of Accumulated Other Comprehensive Income." This ASU improves the reporting of reclassifications out of accumulated other comprehensive income. The amendments in the ASU seek to attain that objective by requiring an entity to report the effect of significant reclassifications out of accumulated other comprehensive income on the respective line items in net income if the amount being reclassified is required under US GAAP to be reclassified in its entirety to net income. For other amounts that are not required under US GAAP to be reclassified in their entirety to net income in the same reporting period, an entity is required to cross-reference other disclosures required under US GAAP that provide additional detail about those amounts. This guidance is effective for reporting periods beginning after December 15, 2012. Adoption of ASU 2013-02 did not have a material impact on the Company's consolidated financial statements.

Note 3. Earnings per Common Share

Earnings per common share amounts are computed based on the weighted average number of shares of common stock issued during the period (retroactively adjusted for stock splits and stock dividends), including Dividend Reinvestment Plan shares issuable upon reinvestment of dividends declared, and reduced for shares held in treasury.

The following tables illustrate the calculation for the periods ended June 30, as adjusted for the cash dividends declared on the preferred stock:

For The Quarters Ended June 30,	2013	2012
Net income, as reported	\$1,238,344	\$1,021,192
Less: dividends to preferred shareholders (1)	20,312	46,875
Net income available to common shareholders	\$1,218,032	\$974,317
Weighted average number of common shares used in calculating earnings per share	4,831,307	4,760,169
Earnings per common share	\$0.25	\$0.20

[Back to Table of Contents](#)

For The Six Months Ended June 30,	2013	2012
Net income, as reported	\$2,280,122	\$1,986,042
Less: dividends to preferred shareholders (1)	40,625	93,750
Net income available to common shareholders	\$2,239,497	\$1,892,292
Weighted average number of common shares used in calculating earnings per share	4,823,988	4,748,013
Earnings per common share	\$0.46	\$0.40

(1) Reflects a reduction in the dividend rate paid on the preferred stock, effective January 1, 2013, from a fixed rate of 7.50% to a quarterly adjustable rate equal to the Wall Street Journal Prime Rate in effect on the first business day of the quarter.

Note 4. Investment Securities

Securities available-for-sale (AFS) and held-to-maturity (HTM) as of the balance sheet dates consisted of the following:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
Securities AFS				
June 30, 2013

*Method used to determine fair value on HTM securities rounds values to nearest thousand.

[Back to Table of Contents](#)

There were no debt securities HTM in an unrealized loss position as of the balance sheet date. Debt securities AFS with unrealized losses as of the balance sheet dates are presented in the table below. There were no debt securities in an unrealized loss position of 12 months or more as of the dates presented.

		Less than 12 months Fair Value	Unrealized Loss
June 30, 2013			
U.S. GSE debt securities	\$14,208,511		\$194,686
U.S. Government securities	2,040,234		6,490
	\$16,248,745		\$201,176
December 31, 2012			
U.S. GSE debt securities	\$8,715,492		\$13,936
U.S. Government securities	1,052,639		1,072
	\$9,768,131		\$15,008
June 30, 2012			
U.S. GSE debt securities	\$3,533,963		\$4,979
U.S. Government securities	2,010,281		1,451
	\$5,544,244		\$6,430

Debt securities in the table above consisted of 14 U.S. GSE debt securities and two U.S. Government securities at June 30, 2013, eight U.S. GSE debt securities and one U.S. Government security at December 31, 2012, and three U.S. GSE debt securities and two U.S. Government securities at June 30, 2012. The unrealized losses for all periods presented were principally attributable to changes in prevailing interest rates for similar types of securities and not deterioration in the creditworthiness of the issuer.

Management evaluates securities for other-than-temporary impairment at least on a quarterly basis, and more frequently when economic or market conditions, or adverse developments relating to the issuer, warrant such evaluation. Consideration is given to (1) the length of time and the extent to which the fair value has been less than the carrying value, (2) the financial condition and near-term prospects of the issuer, and (3) the intent and ability of the Company to retain its investment for a period of time sufficient to allow for any anticipated recovery in fair value. In analyzing an issuer's financial condition, management considers whether the securities are issued by the federal government or its agencies, whether downgrades by bond rating agencies or other adverse developments in the status of the securities have occurred, and the results of reviews of the issuer's financial condition.

Note 5. Loans, Allowance for Loan Losses and Credit Quality

The composition of net loans follows:

	June 30, 2013	December 31, 2012	June 30, 2012

For all loan segments, loans over 30 days are considered delinquent.

Allowance for loan losses

The allowance for loan losses is established through a provision for loan losses charged to earnings. Loan losses are charged against the allowance when management believes the uncollectibility of a loan balance is probable. Subsequent recoveries, if any, are credited to the allowance. No changes in the Company's policies or methodology pertaining to the allowance for loan losses were made during the first six months of 2013.

Unsecured loans, primarily consumer loans, are charged off when they become uncollectible and no later than 120 days past due. Unsecured loans to customers who subsequently file bankruptcy are charged off within 30 days of receipt of the notification of filing or by the end of the month in which the loans become 120 days past due, whichever occurs first. For secured loans, both residential and commercial, the potential loss on impaired loans is carried as a loan loss reserve specific allocation; the loss portion is charged off when collection of the full loan appears unlikely. The unsecured portion of a real estate loan is that portion of the loan exceeding the "fair value" of the collateral less the cost to sell. Value of the collateral is determined in accordance with the Company's appraisal policy. The unsecured portion of an impaired real estate secured loan is charged off by the end of the month in which the loan becomes 180 days past due.

As described below, the allowance consists of general, specific and unallocated components. However, the entire allowance is available to absorb losses in the loan portfolio, regardless of specific, general and unallocated components considered in determining the amount of the allowance.

[Back to Table of Contents](#)

General component

The general component of the allowance for loan losses is based on historical loss experience, adjusted for qualitative factors and stratified by the following loan segments: commercial and industrial, commercial real estate, residential real estate first (“1st”) lien, residential real estate junior (“Jr”) lien and consumer loans. The Company does not disaggregate its portfolio segments further into classes. Loss ratios are calculated by loan segment for one year, two year and five year look back periods. The highest loss ratio among these look-back periods is then applied against the respective segment. Management uses an average of historical losses based on a time frame appropriate to capture relevant loss data for each loan segment. This historical loss factor is adjusted for the following qualitative factors: levels of and trends in delinquencies and non-performing loans, levels of and trends in loan risk groups, trends in volumes and terms of loans, effects of any changes in loan related policies, experience, ability and the depth of management, documentation and credit data exception levels, national and local economic trends, external factors such as competition and regulation and lastly, concentrations of credit risk in a variety of areas, including portfolio product mix, the level of loans to individual borrowers and their related interests, loans to industry segments, and the geographic distribution of commercial real estate loans. This evaluation is inherently subjective as it requires estimates that are susceptible to revision as more information becomes available.

The qualitative factors are determined based on the various risk characteristics of each loan segment. The Company has policies, procedures and internal controls that management believes are commensurate with the risk profile of each of these segments. Major risk characteristics relevant to each portfolio segment are as follows:

Commercial & Industrial – Loans in this segment include commercial and industrial loans and to a lesser extent loans to finance agricultural production. Commercial loans are made to businesses and are generally secured by assets of the business, including trade assets and equipment. While not the primary collateral, in many cases these loans may also be secured by the real estate of the business. Repayment is expected from the cash flows of the business. A weakened economy, soft consumer spending, unfavorable foreign trade conditions and the rising cost of labor or raw materials are examples of issues that can impact the credit quality in this segment.

Commercial Real Estate – Loans in this segment are principally made to businesses and are generally secured by either owner-occupied, or non-owner occupied commercial real estate. A relatively small portion of this segment includes farm loans secured by farm land and buildings. As with commercial and industrial loans, repayment of owner-occupied commercial real estate loans is expected from the cash flows of the business and the segment would be impacted by the same risk factors as commercial and industrial loans. The non-owner occupied commercial real estate portion includes both residential and commercial construction loans, vacant land and real estate development loans, multi-family dwelling loans and commercial rental property loans. Repayment of construction loans is expected from permanent financing takeout; the Company generally requires a commitment or eligibility for the take-out financing prior to construction loan origination. Real estate development loans are generally repaid from the sale of the subject real property as the project progresses. Construction and development lending entail additional risks, including the project exceeding budget, not being constructed according to plans, not receiving permits, or the pre-leasing or occupancy rate not meeting expectations. Repayment of multi-family loans and commercial rental property loans is expected from the cash flow generated by rental payments received from the individuals or businesses occupying the real estate. Commercial real estate loans are impacted by factors such as competitive market forces, vacancy rates, cap rates, net operating incomes, lease renewals and overall economic demand. In addition, loans in the recreational and tourism sector can be affected by weather conditions, such as unseasonably low winter snowfalls. Commercial real estate lending also carries a higher degree of environmental risk than other real estate lending.

Residential Real Estate - 1st Lien – All loans in this segment are collateralized by first mortgages on 1 – 4 family owner-occupied residential real estate and repayment is dependent on the credit quality of the individual borrower.

The overall health of the economy, including unemployment rates and housing prices, has an impact on the credit quality of this segment.

Residential Real Estate – Jr Lien – All loans in this segment are collateralized by junior lien mortgages on 1 – 4 family residential real estate and repayment is primarily dependent on the credit quality of the individual borrower. The overall health of the economy, including unemployment rates and housing prices, has an impact on the credit quality of this segment.

Consumer – Loans in this segment are made to individuals for consumer and household purposes. This segment includes both loans secured by automobiles and other consumer goods, as well as loans that are unsecured. This segment also includes overdrafts, which are extensions of credit made to both individuals and businesses to cover temporary shortages in their deposit accounts and are generally unsecured. The Company maintains policies restricting the size and length of these extensions of credit. The overall health of the economy, including unemployment rates, has an impact on the credit quality of this segment.

[Back to Table of Contents](#)

Specific component

The specific component of the allowance for loan losses relates to loans that are impaired. A specific allowance is established when a loan's impaired basis is less than the carrying value of the loan. For all loan segments, except consumer loans, a loan is considered impaired when, based on current information and events, in management's estimation it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Impaired loans are loan(s) to a borrower that in the aggregate are greater than \$100,000 and that are in non-accrual status or are troubled debt restructurings ("TDR"). Factors considered by management in determining impairment include payment status, collateral value and probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant or temporary payment delays and payment shortfalls generally are not classified as impaired. Management evaluates the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length and frequency of the delay, the reasons for the delay, the borrower's prior payment record and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan by loan basis, by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral if the loan is collateral dependent.

Impaired loans also include troubled loans that are restructured. A TDR occurs when the Company, for economic or legal reasons related to the borrower's financial difficulties, grants a concession to the borrower that would otherwise not be granted. TDRs may include the transfer of assets to the Company in partial satisfaction of a troubled loan, a modification of a loan's terms, or a combination of the two.

Large groups of smaller balance homogeneous loans are collectively evaluated for impairment. Accordingly, the Company does not separately identify individual consumer loans for impairment evaluation, unless such loans are subject to a restructuring agreement.

Unallocated component

An unallocated component of the allowance for loan losses is maintained to cover uncertainties that could affect management's estimate of probable losses. The unallocated component reflects management's estimate of the margin of imprecision inherent in the underlying assumptions used in the methodologies for estimating specific and general losses in the portfolio.

The following summarizes changes in the allowance for loan losses and select loan information, by portfolio segment (excluding loans held-for-sale).

For the quarter ended June 30,
2013

	Commercial & Industrial	Commercial Real Estate	Residential Real Estate 1st Lien	Residential Real Estate Jr Lien	Consumer	Unallocated	Total

Interest income recognized on impaired loans is immaterial for all periods presented.

For all loans segments, the accrual of interest is discontinued when a loan is specifically determined to be impaired or when the loan is delinquent 90 days and management believes, after considering collection efforts and other factors, that the borrower's financial condition is such that collection of interest is doubtful. Any unpaid interest previously accrued on those loans is reversed from income. Interest income is generally not recognized on specific impaired loans unless the likelihood of further loss is remote. Interest payments received on impaired loans are generally applied as a reduction of the loan principal balance. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured.

As of the balance sheet dates, the Company was not contractually committed to lend additional funds to debtors with impaired, non-accrual or restructured loans.

[Back to Table of Contents](#)

Credit Quality Grouping

In developing the allowance for loan losses, management uses credit quality grouping to help evaluate trends in credit quality. The Company groups credit risk into Groups A, B and C. The manner the Company utilizes to assign risk grouping is driven by loan purpose. Commercial purpose loans are individually risk graded while the retail portion of the portfolio is generally grouped by delinquency pool.

Group A loans - Acceptable Risk – are loans that are expected to perform as agreed under their respective terms. Such loans carry a normal level of risk that does not require management attention beyond that warranted by the loan or loan relationship characteristics, such as loan size or relationship size. Group A loans include commercial purpose loans that are individually risk rated and retail loans that are rated by pool. Group A retail loans include both performing consumer and residential real estate loans. Residential real estate loans are loans to individuals secured by 1-4 family homes, including first mortgages, home equity and home improvement loans. Loan balances fully secured by deposit accounts or that are fully guaranteed by the Federal Government are considered acceptable risk.

Group B loans – Management Involved - are loans that require greater attention than the acceptable loans in Group A. Characteristics of such loans may include, but are not limited to, borrowers that are experiencing negative operating trends such as reduced sales or margins, borrowers that have exposure to adverse market conditions such as increased competition or regulatory burden, or borrowers that have had unexpected or adverse changes in management. These loans have a greater likelihood of migrating to an unacceptable risk level if these characteristics are left unchecked. Group B is limited to commercial purpose loans that are individually risk rated.

Group C loans – Unacceptable Risk – are loans that have distinct shortcomings that require a greater degree of management attention. Examples of these shortcomings include a borrower's inadequate capacity to service debt, poor operating performance, or insolvency. These loans are more likely to result in repayment through collateral liquidation. Group C loans range from those that are likely to sustain some loss if the shortcomings are not corrected, to those for which loss is imminent and non-accrual treatment is warranted. Group C loans include individually rated commercial purpose loans, and retail loans adversely rated in accordance with the Federal Financial Institutions Examination Council's Uniform Retail Credit Classification Policy. Group C retail loans include 1-4 family residential real estate loans and home equity loans past due 90 days or more with loan-to-value ratios greater than 60%, home equity loans 90 days or more past due where the bank does not hold first mortgage, irrespective of loan-to-value, loans in bankruptcy where repayment is likely but not yet established, and lastly consumer loans that are 90 days or more past due.

Commercial purpose loan ratings are assigned by the commercial account officer; for larger and more complex commercial loans, the credit rating is a collaborative assignment by the lender and the credit analyst. The credit risk rating is based on the borrower's expected performance, i.e., the likelihood that the borrower will be able to service its obligations in accordance with the loan terms. Credit risk ratings are meant to measure risk versus simply record history. Assessment of expected future payment performance requires consideration of numerous factors. While past performance is part of the overall evaluation, expected performance is based on an analysis of the borrower's financial strength, and historical and projected factors such as size and financing alternatives, capacity and cash flow, balance sheet and income statement trends, the quality and timeliness of financial reporting, and the quality of the borrower's management. Other factors influencing the credit risk rating to a lesser degree include collateral coverage and control, guarantor strength and commitment, documentation, structure and covenants and industry conditions. There are uncertainties inherent in this process.

Credit risk ratings are dynamic and require updating whenever relevant information is received. The risk ratings of larger or more complex loans, and Group B and C rated loans, are assessed at the time of their respective annual reviews, during quarterly updates, in action plans or at any other time that relevant information warrants update.

Lenders are required to make immediate disclosure to the Chief Credit Officer of any known increase in loan risk, even if considered temporary in nature.

Modifications of Loans and TDRs

A loan is classified as a TDR if, for economic or legal reasons related to a borrower's financial difficulties, the Company grants a concession to the borrower that it would not otherwise consider.

The Company is deemed to have granted such a concession if it has modified a troubled loan in any of the following ways:

Reduced accrued interest

Reduced the original contractual interest rate to a rate that is below the current market rate for the borrower;

Converted a variable-rate loan to a fixed-rate loan;

Extended the term of the loan beyond an insignificant delay;

Deferred or forgiven principal in an amount greater than three months of payments; or,

Performed a refinancing and deferred or forgiven principal on the original loan.

An insignificant delay or insignificant shortfall in the amount of payments typically would not require the loan to be accounted for as a TDR. However, pursuant to regulatory guidance, any payment delay longer than three months is generally not considered insignificant. The assessment of whether a concession has been granted also takes into account payments expected to be received from third parties, including third-party guarantors, provided that the third party has the ability to perform on the guarantee.

The Company's TDRs are principally a result of extending loan repayment terms to relieve cash flow difficulties. The Company has only, on a limited basis, reduced interest rates for borrowers below the current market rate for the borrower. The Company has not forgiven principal or reduced accrued interest within the terms of original restructurings, nor has it converted variable rate terms to fixed rate terms. However, the Company evaluates each TDR situation on its own merits and does not foreclose the granting of any particular type of concession.

[Back to Table of Contents](#)

TDR's by segment for the periods presented were as follows:

For the quarter and the six months ended June 30, 2013

	Number of Contracts	Pre- Modification Outstanding Recorded Investment	Post- Modification Outstanding Recorded Investment
Residential real estate - Jr lien	1	\$ 23,425	\$ 23,425

For the year ended December 31, 2012

	Number of Contracts	Pre- Modification Outstanding Recorded Investment	Post- Modification Outstanding Recorded Investment
Commercial real estate	2	\$ 1,030,645	\$ 1,030,645
Residential real estate - 1st lien	3	200,241	205,588
Total	5	\$ 1,230,886	\$ 1,236,233

	For the quarter ended June 30, 2012			For the six months ended June 30, 2012		
	Number of Contracts	Pre- Modification Outstanding Recorded Investment	Post- Modification Outstanding Recorded Investment	Number of Contracts	Pre- Modification Outstanding Recorded Investment	Post- Modification Outstanding Recorded Investment
Commercial real estate	0	\$ 0	\$ 0	2	\$ 1,030,645	\$ 1,030,645
Residential real estate - 1st lien	1	23,944	27,336	2	147,301	152,219
Total	1	\$ 23,944	\$ 27,336	4	\$ 1,177,946	\$ 1,182,864

There were no TDRs for which there was a payment default under the restructured terms during the twelve month period ended June 30, 2013. The TDR's for which there was a payment default during the twelve month period ended June 30, 2012 were as follows:

	Number of Contracts	Recorded Investment
Commercial	3	\$ 283,363
Commercial real estate	1	398,002
Residential real estate - 1st lien	1	107,584
Total	5	\$ 788,949

TDRs are treated as other impaired loans and carry individual specific reserves with respect to the calculation of the allowance for loan losses. These loans are categorized as non-performing, may be past due, and are generally adversely risk rated. The TDRs that have defaulted under their restructured terms are generally in collection status and their reserve is typically calculated using the fair value of collateral method. At June 30, 2013, December 31, 2012, and June 30, 2012, the allowance related to TDRs was approximately \$0, \$23,000 and \$0, respectively.

At June 30, 2013, the Company did not have any commitments to lend additional funds to borrowers with loans classified as TDRs.

[Back to Table of Contents](#)

Note 6. Goodwill and Other Intangible Assets

As a result of the merger with LyndonBank on December 31, 2007, the Company recorded goodwill amounting to \$11,574,269. The goodwill is not amortizable and is not deductible for tax purposes.

The Company also recorded \$4,161,000 of acquired identified intangible assets representing the core deposit intangible which is subject to amortization as a non-interest expense over a ten year period. The accumulated amortization expense was \$2,933,874 and \$2,627,089 as of June 30, 2013 and 2012, respectively.

Amortization expense for the core deposit intangible for the first six months of 2013 was \$136,350. As of June 30, 2013, the remaining annual amortization expense related to the core deposit intangible, absent any future impairment, is expected to be as follows:

2013	\$ 136,345
2014	272,695
2015	272,695
2016	272,695
2017	272,696
Total remaining core deposit intangible	\$1,227,126

Management evaluates goodwill for impairment annually and the core deposit intangible for impairment if conditions warrant. As of the date of the most recent evaluation (December 31, 2012), management concluded that no impairment existed.

Note 7. Fair Value

Certain assets and liabilities are recorded at fair value to provide additional insight into the Company's quality of earnings. Some of these assets and liabilities are measured on a recurring basis while others are measured on a nonrecurring basis, with the determination based upon applicable existing accounting pronouncements. For example, securities available-for-sale are recorded at fair value on a recurring basis. Other assets, such as mortgage servicing rights, loans held-for-sale, and impaired loans, are recorded at fair value on a nonrecurring basis using the lower of cost or market methodology to determine impairment of individual assets. The Company groups assets and liabilities which are recorded at fair value in three levels, based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value. The level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement (with Level 1 considered highest and Level 3 considered lowest). A brief description of each level follows.

Level 1 Quoted prices in active markets for identical assets or liabilities. Level 1 assets and liabilities include debt and equity securities and derivative contracts that are traded in an active exchange market, as well as U.S. Treasury, other U.S. Government and agency mortgage-backed debt securities that are highly liquid and are actively traded in over-the-counter markets.

Level 2 Observable inputs other than Level 1 prices such as quoted prices for similar assets and liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Level 2 assets and liabilities include debt securities with quoted prices that are traded less frequently than exchange-traded instruments and derivative contracts whose value is determined using a pricing model with inputs that are observable in the market or can be derived principally from or corroborated by observable market data. This category generally includes mortgage servicing rights, impaired loans, and OREO.

Level Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

23

[Back to Table of Contents](#)

The following methods and assumptions were used by the Company in estimating its fair value measurements and disclosures:

Cash and cash equivalents: The carrying amounts reported in the balance sheet for cash and cash equivalents approximate their fair values. As such, the Company classifies these financial instruments as Level 1.

Securities Available-for-Sale and Held-to-Maturity: Fair value measurement is based upon quoted prices for similar assets, if available. If quoted prices are not available, fair values are measured using matrix pricing models, or other model-based valuation techniques requiring observable inputs other than quoted prices such as yield curves, prepayment speeds and default rates. Level 1 securities would include U.S. Treasury securities that are traded by dealers or brokers in active over-the-counter markets. Level 2 securities include federal agency securities and securities of local municipalities.

Restricted equity securities: Restricted equity securities are comprised of FRBB stock and FHLBB stock. These securities are carried at cost, which is believed to approximate fair value, based on the redemption provisions of the FRBB and the FHLBB. The stock is nonmarketable, and redeemable at par value, subject to certain conditions.

Loans and loans held-for-sale: For variable-rate loans that reprice frequently and with no significant change in credit risk, fair values are based on carrying amounts. The fair values for other loans (for example, fixed rate residential, commercial real estate, and rental property mortgage loans, and commercial and industrial loans) are estimated using discounted cash flow analyses, based on interest rates currently being offered for loans with similar terms to borrowers of similar credit quality. Loan fair value estimates include judgments regarding future expected loss experience and risk characteristics. Loan impairment is deemed to exist when full repayment of principal and interest according to the contractual terms of the loan is no longer probable. Impaired loans are reported based on one of three measures: the present value of expected future cash flows discounted at the loan's effective interest rate; the loan's observable market price; or the fair value of the collateral if the loan is collateral dependent. If the fair value is less than an impaired loan's recorded investment, an impairment loss is recognized as part of the allowance for loan losses. Accordingly, certain impaired loans may be subject to measurement at fair value on a non-recurring basis. Management has estimated the fair values of these assets using Level 2 inputs, such as the fair value of collateral based on independent third-party appraisals for collateral-dependent loans.

The fair value of loans held-for-sale is based upon an actual purchase and sale agreement between the Company and an independent market participant. The sale is executed within a reasonable period following quarter end at the stated fair value.

Mortgage servicing rights. Mortgage servicing rights represent the value associated with servicing residential mortgage loans. Servicing assets and servicing liabilities are reported using the amortization method. In evaluating the carrying values of mortgage servicing rights, the Company obtains third party valuations based on loan level data including note rate, and the type and term of the underlying loans. As such, the Company classifies mortgage servicing rights as nonrecurring Level 2.

OREO. Real estate acquired through foreclosure is initially recorded at market value. The fair value of other real estate owned is based on property appraisals and an analysis of similar properties currently available. As such, the Company records other real estate owned as nonrecurring Level 2.

Deposits, federal funds purchased and borrowed funds: The fair values disclosed for demand deposits (for example, checking and savings accounts) are, by definition, equal to the amount payable on demand at the reporting date (that is, their carrying amounts). The fair values for certificates of deposit and borrowed funds are estimated using a discounted cash flow calculation that applies interest rates currently being offered on certificates and indebtedness to a

schedule of aggregated contractual maturities on such time deposits and indebtedness. As such the Company classifies deposits, federal funds purchased and borrowed funds as Level 2.

Junior subordinated debentures: Fair value is estimated using current rates for debentures of similar maturity. As such the Company classifies these instruments as Level 2.

Capital lease obligations: Fair value is determined using a discounted cash flow calculation using current rates. Based on current rates, carrying value approximates fair value. As such the Company classifies these obligations as Level 2.

Accrued interest: The carrying amounts of accrued interest approximate their fair values. As such the Company classifies accrued interest as Level 2.

Off-balance-sheet credit related instruments: Commitments to extend credit are evaluated and fair value is estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present credit-worthiness of the counterparties. For fixed-rate loan commitments, fair value also considers the difference between current levels of interest rates and the committed rates.

[Back to Table of Contents](#)

FASB Accounting Standards Codification (ASC) Topic 825 “Financial Instruments”, requires disclosures of fair value information about financial instruments, whether or not recognized in the balance sheet, if the fair values can be reasonably determined. Fair value is best determined based upon quoted market prices. However, in many instances, there are no quoted market prices for the Company’s various financial instruments. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques using observable inputs when available. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. Accordingly, the fair value estimates may not be realized in an immediate settlement of the instrument. Topic 825 excludes certain financial instruments and all nonfinancial instruments from its disclosure requirements. Accordingly, the aggregate fair value amounts presented may not necessarily represent the underlying fair value of the Company.

Assets and Liabilities Recorded at Fair Value on a Recurring Basis

Assets measured at fair value on a recurring basis and reflected in the consolidated balance sheets at the dates presented, segregated by fair value hierarchy, are summarized below:

June 30, 2013	Level 1	Level 2	Total
Assets: (market approach)			
U.S. GSE debt securities	\$0	\$37,538,725	\$37,538,725
U.S. Government securities	7,060,977	0	7,060,977
December 31, 2012			
Assets: (market approach)			
U.S. GSE debt securities	\$0	\$33,785,469	\$33,785,469
U.S. Government securities	7,100,590	0	7,100,590
June 30, 2012			
Assets: (market approach)			
U.S. GSE debt securities	\$0	\$52,929,621	\$52,929,621
U.S. Government securities	7,058,909	0	7,058,909
U.S GSE preferred stock	113,325	0	113,325

There were no transfers between Levels 1 and 2 for the periods presented. There were no Level 3 assets or liabilities measured on a recurring basis as of the balance sheet dates presented.

Assets and Liabilities Recorded at Fair Value on a Non-Recurring Basis

The following table includes assets measured at fair value on a nonrecurring basis that have had a fair value adjustment since their initial recognition. Impaired loans measured at fair value only include impaired loans with a related specific allowance for loan losses and are presented net of specific allowances as disclosed in Note 5.

Assets measured at fair value on a nonrecurring basis and reflected in the consolidated balance sheets at the dates presented, segregated by fair value hierarchy, are summarized below:

June 30, 2013	Level 2
Assets: (market approach)	
Residential mortgage servicing rights	\$ 1,136,592
Impaired loans, net of related allowance	648,834
OREO	2,171,621

December 31, 2012	
Assets: (market approach)	
Residential mortgage servicing rights	\$ 1,009,623
Impaired loans, net of related allowance	737,274
OREO	1,074,705

June 30, 2012	
Assets: (market approach)	
Residential mortgage servicing rights	\$ 1,052,193
Impaired loans, net of related allowance	1,885,819
OREO	1,010,198

There were no Level 1 or Level 3 assets or liabilities measured on a non-recurring basis as of the balance sheet dates presented.

The estimated fair values of the Company's financial instruments were as follows:

June 30, 2013	Carrying Amount	Fair Value Level 1	Fair Value Level 2	Fair Value Level 3	Fair Value Total
(Dollars in Thousands)					
Financial assets:					
Cash and cash equivalents	\$ 15,282	\$ 15,282	\$ 0	\$ 0	\$ 15,282

Note 8. Loan Servicing

The following table shows the changes in the carrying amount of the mortgage servicing rights for the periods indicated:

	June 30, 2013	December 31, 2012	June 30, 2012
Balance at beginning of year	\$ 1,009,623	\$ 1,097,442	\$ 1,097,442
Mortgage servicing rights capitalized	153,106	406,807	204,042
Mortgage servicing rights amortized	(186,145)	(409,584)	(202,455)
Change in valuation allowance	160,008	(85,042)	(46,836)
Balance at end of period	\$ 1,136,592	\$ 1,009,623	\$ 1,052,193

Note 9. Legal Proceedings

In the normal course of business the Company and its subsidiary are involved in litigation that is considered incidental to their business. Management does not expect that any such litigation will be material to the Company's consolidated financial condition or results of operations.

Note 10. Subsequent Event

The Company has evaluated events and transactions through the date that the financial statements were issued for potential recognition or disclosure in these financial statements, as required by GAAP. On June 11, 2013, the Company declared a cash dividend of \$0.14 per common share payable August 1, 2013 to shareholders of record as of July 15, 2013. This dividend, amounting to \$675,669, was accrued at June 30, 2013.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS for the Period Ended June 30, 2013

The following discussion analyzes the consolidated financial condition of Community Bancorp. (the "Company") and its wholly-owned subsidiary, Community National Bank (the "Bank"), as of June 30, 2013, December 31, 2012 and June 30, 2012, and its consolidated results of operations for the two interim periods presented. The Company is considered a "smaller reporting company" under applicable regulations of the Securities and Exchange Commission ("SEC") and is therefore eligible for relief from certain disclosure requirements. In accordance with such provisions, the Company has elected to provide its interim consolidated statements of income, comprehensive income, and cash flows for two, rather than three, years.

The following discussion should be read in conjunction with the Company's audited consolidated financial statements and related notes contained in its 2012 Annual Report on form 10-K filed with the SEC.

FORWARD-LOOKING STATEMENTS

This Management's Discussion and Analysis of Financial Condition and Results of Operations contains certain forward-looking statements about the results of operations, financial condition and business of the Company and its subsidiary. Words used in the discussion below such as "believes," "expects," "anticipates," "intends," "estimates," "plans," "predicts," or similar expressions, indicate that management of the Company is making forward-looking statements.

Forward-looking statements are not guarantees of future performance. They necessarily involve risks, uncertainties and assumptions. Future results of the Company may differ materially from those expressed in these forward-looking statements. Examples of forward looking statements included in this discussion include, but are not limited to, estimated contingent liability related to assumptions made within the asset/liability management process, management's expectations as to the future interest rate environment and the Company's related liquidity level, credit risk expectations relating to the Company's loan portfolio and its participation in the Federal Home Loan Bank of Boston ("FHLBB") Mortgage Partnership Finance ("MPF") program, and management's general outlook for the future performance of the Company or the local or national economy. Although forward-looking statements are based on management's current expectations and estimates, many of the factors that could influence or determine actual results are unpredictable and not within the Company's control. Readers are cautioned not to place undue reliance on such statements as they speak only as of the date they are made. The Company does not undertake, and disclaims any obligation, to revise or update any forward-looking statements to reflect the occurrence or anticipated occurrence of events or circumstances after the date of this Report, except as required by applicable law. The Company claims the protection of the safe harbor for forward-looking statements provided in the Private Securities Litigation Reform Act of 1995.

Factors that may cause actual results to differ materially from those contemplated by these forward-looking statements include, among others, the following possibilities: (1) general economic conditions, either nationally, regionally or locally continue to deteriorate, resulting in a decline in credit quality or a diminished demand for the Company's products and services; (2) competitive pressures increase among financial service providers in the Company's northern New England market area or in the financial services industry generally, including competitive pressures from non-bank financial service providers, from increasing consolidation and integration of financial service providers, and from changes in technology and delivery systems; (3) interest rates change in such a way as to reduce the Company's

margins; (4) changes in laws or government rules, including the rules of the federal Consumer Financial Protection Bureau, or the way in which courts or government agencies interpret or implement those laws or rules, increase our costs of doing business causing us to limit or change our product offerings or pricing, or otherwise adversely affect the Company's business; (5) changes in federal or state tax policy; (6) changes in the level of nonperforming assets and charge-offs; (7) changes in estimates of future reserve requirements based upon relevant regulatory and accounting requirements; (8) changes in consumer and business spending, borrowing and savings habits; (9) the effect of changes to the calculation of the Company's regulatory capital ratios under the recently adopted Basel III capital framework which, among other things, will require additional regulatory capital, and change the framework for risk-weighting of certain assets; and (10) the effect of and changes in the United States monetary and fiscal policies, including the interest rate policies, regulation of the money supply by the Federal Reserve Board ("FRB"), and adverse changes in the credit rating of U.S. government debt.

[Back to Table of Contents](#)

NON-GAAP FINANCIAL MEASURES

Under SEC Regulation G, public companies making disclosures containing financial measures that are not in accordance with generally accepted accounting principles in the United States (“US GAAP” or “GAAP”) must also disclose, along with each non-GAAP financial measure, certain additional information, including a reconciliation of the non-GAAP financial measure to the closest comparable GAAP financial measure, as well as a statement of the company’s reasons for utilizing the non-GAAP financial measure. The SEC has exempted from the definition of non-GAAP financial measures certain commonly used financial measures that are not based on GAAP. However, two non-GAAP financial measures commonly used by financial institutions, namely tax-equivalent net interest income and tax-equivalent net interest margin (as presented in the tables in the section labeled Interest Income Versus Interest Expense (Net Interest Income)), have not been specifically exempted by the SEC, and may therefore constitute non-GAAP financial measures under Regulation G. We are unable to state with certainty whether the SEC would regard those measures as subject to Regulation G.

Management believes that these non-GAAP financial measures are useful in evaluating the Company’s financial performance and facilitate comparisons with the performance of other financial institutions. However, that information should be considered supplemental in nature and not as a substitute for related financial information prepared in accordance with GAAP.

OVERVIEW

The Company’s consolidated assets on June 30, 2013 were \$554,644,442, a decrease of \$21,093,803, or 3.7% from December 31, 2012, and an increase of \$1,266,867, or 0.2% from June 30, 2012. The most significant changes in the balance sheet from year end are attributable to the annual municipal finance cycle, as short-term municipal loans, recorded as held-to-maturity securities, generally mature at the end of the second quarter and are not replaced until after the start of the third quarter. Municipal loans totaling \$27.7 million matured on June 30, 2013, with renewals and new municipal loans of approximately \$19 million recorded in July, 2013. Deposit account balances related to these loans decreased simultaneously in the amount of \$16.6 million. The balances in these accounts have since increased by \$19 million as the new loans were booked in July. Another \$16 million in municipal operating accounts ran off as the municipalities spend down tax dollars. These decreases in deposit balances contributed to the \$31,037,755, or 6.53% decrease in total deposits during the six months ended June 30, 2013. Cash decreased by \$14,599,526, or 48.9% in the year-to-date comparison period to partially fund the deposit outflow. Additional funding came from an increase in borrowed funds of \$16,055,000, after payoff during the first quarter of 2013 of a \$6,000,000 matured long-term borrowing from the FHLBB. The entire \$22,055,000 balance of borrowed funds at June 30, 2013 represented overnight federal funds. Funding was also obtained through a \$5,000,000 purchase of funds through the Certificate of Deposit Account Registry Service (CDARS) of Promontory Interfinancial Network during the second quarter of 2013. These funds purchased through CDARS are included in Time Deposits, \$100,000 and over, accounting for nearly all of the increase in Time Deposits during the first six months of 2013. After only a modest increase in the loans during the first quarter of 2013, loans increased by \$7,324,076 during the second quarter, with a total increase of \$7,935,176, or 1.9% during the first six months of 2013, including increases in commercial and 1-4 family residential loans.

In the year over year comparison, deposits increased \$12,305,349, or 2.9% with increases in non maturing deposits while balances in time deposits with customers have decreased. The decrease in customer time deposits is a trend that has been prevalent for several years while rates have been at all-time lows. Management believes that the low interest rates being paid on certificates of deposit and other investment products is likely causing some depositors to place their money in non-maturing products such as demand and savings accounts while awaiting an improvement in interest rates and market conditions. The increase in loans, year over year was \$17,630,647, or 4.3%, with increases in commercial, including commercial real estate, and 1-4 family residential loans. The Company retained in the loan

portfolio some 10 – 15 year mortgages to help maintain the level of the 1-4 family loans, while continuing to sell 30 year mortgage loans in the secondary market to manage interest rate risk. Applications for commercial loans remained strong while application for 1-4 family residential loans were down significantly at quarter end due to the increase in mortgage rates.

Interest rates have been at historically low levels for several years causing erosion of yields on earning assets. Maintaining asset yields continues to be a challenge; however during the second quarter of 2013, the Company recorded \$197,072 in a recovery of interest income as a result of reclassifying a non performing loan to Other Real Estate Owned. Without this recovery, interest income would have been \$5,607,777 for the second quarter compared to \$5,632,862 for the same period in 2012, a decrease of \$25,085. While interest income, before the adjustment, decreased in the second quarter of 2013 compared to the second quarter of 2012, that decrease was more than offset by a larger decrease in interest expense. The lower interest expense was attributed to a combination of the decrease in interest paid on deposits and a decrease in interest paid on borrowings, including the Company's junior subordinated debentures. The decrease in interest paid on the debentures is due to a scheduled rate adjustment, which resulted in a decrease of \$138,238 for the second quarter of 2013 and \$280,060 year over year. The decrease in interest paid on deposits is attributable to a decrease in the average rate paid on interest bearing liabilities as customer funds shift out of higher yielding CDs to lower yielding demand and savings accounts. The combined effects of these changes resulted in an increase of \$871,428 in tax-equivalent net interest income. The yield on the 10-year Treasury bond has been rising recently after being stuck near historic lows ever since the recession. While this rally in the bond market resulted in an increase in long term interest rates, economic data continues to indicate that policy makers are likely to keep short-term interest rates low through sometime in 2015, creating a steeper yield curve than what we have seen in recent years.

[Back to Table of Contents](#)

Net income for the second quarter of 2013 was \$1,238,344, or \$0.25 per common share, compared to \$1,021,192, or \$0.20 per common share for the same period in 2012, an increase of 21.3%. Total non-interest income decreased slightly during the first quarter of 2013 compared to the first quarter 2012. One of the components of non-interest income is income generated from selling loans in the secondary market. For several years, the Federal Reserve's efforts to stimulate the real estate market by keeping mortgage interest rates low provided for several refinancing cycles which continued through 2012. The momentum of this cycle has slowed and mortgage business declined during the first six months of 2013 causing a decrease in fee income from the sale of residential loans in the secondary market. During the second quarter of 2013 mortgage activity resulted in originations of \$8,542,157 compared to \$12,175,278 for the second quarter of 2012 providing points and premiums from the sales of these mortgages of \$207,110 and \$326,814, respectively. These decreases were offset by an improvement in the balance of the impairment of the mortgage servicing rights so far in 2013 of \$160,008 versus a negative adjustment of \$46,836 in 2012, resulting in net gains from the sales of mortgages of \$451,934 for the second quarter of 2013 compared to \$450,958 for the second quarter of 2012. Operating expenses for the quarter were relatively stable resulting in an increase of 1.1% over the second quarter of 2012. Please refer to the Non-interest Income and Expense sections for more information.

On June 11, 2013, the Company's Board of Directors declared a quarterly cash dividend of \$0.14 per common share, payable on August 1, 2013 to shareholders of record on July 15, 2013. The Company is focused on increasing the profitability of the balance sheet, and prudently managing operating expenses and risk, particularly credit risk, in order to remain a well-capitalized bank in this challenging economic environment.

National economic data for the second quarter reported low GDP growth and disappointing news on retail sales and production suggesting that inflation remains contained. The housing outlook however is improving with low inventory of for-sale homes and construction spending growing steadily. Builders, however, are challenged with being able to respond to the rising demand for new homes due to difficulties in obtaining construction credit due to overly restrictive mortgage lending rules and construction costs that are increasing at a faster pace than appraised values. Although employment has continued to expand at a moderate pace, the unemployment rate remains elevated. The recent comments at the meeting of the FOMC indicated that it may start to taper its bond purchases if economic performance warrants, but suggested that it was not considering an exit any time soon. Nevertheless, these comments cause the average fixed mortgage rates to spike to 2011 levels. Despite the recent increases in mortgage rates, national data suggests that homebuyer affordability remains strong for the typical family in most parts of the country, which should help fuel the ongoing housing recovery.

More locally, economic indicators in Vermont, such as the unemployment rate and employment by industry, are more positive. According to the State of Vermont Department of Labor, the seasonally adjusted unemployment rate in Vermont is currently 4.4%, down from the annual 2012 rate of 5.0% and well below the national average of 7.6%. State economist Jeff Carr recently reported that of the six New England states, Vermont's economic recovery is only behind Massachusetts, and he predicts that prerecession employment levels will return in the next six to twelve months. On a statewide basis job growth has been centered in the trade, transportation, utility and government sectors. Vermont's construction sector is ranked one of the lowest for job growth, and with post-tropical storm Irene projects now complete, forecasts for construction jobs are less than optimistic. Federal spending cuts, i.e. sequestrations, are hampering the New England economy as a whole, but economists say that continued strength in the "Vermont" brand has helped recovery in the manufacturing sector. The Vermont housing market has continued to strengthen, and the tide is beginning to shift from a buyer's market to a more level playing field. Although the 2012 through 2013 snowfall was greater than in 2011-2012, the season was short and snowfall did not return to historical levels. Those businesses impacted by winter weather, lodging, restaurants, winter recreation dealers, retailers and suppliers may continue to struggle. Other retail and service businesses reported stronger results for 2012 and were cautiously optimistic going into 2013. The entire state experienced record early summer rain that made it tough on weather-dependent businesses. It is too early to tell how the wet start to the summer season will impact the hospitality and recreational sector. In Central Vermont, the Company's growth market, ongoing downtown revitalization and improvement projects are

bringing energy and economic growth to the area. Several workforce anchors in the region continue to provide stable operations and employment to the area including Green Mountain Coffee Roasters which employs an estimated 500 employees throughout Washington and Chittenden Counties and which just announced that it has reached a minimum five year agreement with Starbucks Coffee Company to manufacture, market, distribute and sell Starbuck's single serve Keurig packs. Technology, financial services and light manufacturing, particularly of specialty artisan foods, continue to be the economic leaders throughout Central Vermont.

A positive addition to Northern Vermont is a multi-phase expansion project of an Orleans County ski area, where construction of two hotels, a hockey arena, an indoor water park and a golf clubhouse has transformed the ski resort and golf course to a year-round indoor and outdoor recreation and wedding destination resort. This project initially injected nearly \$100 million of construction funding into the local economy over the last two years utilizing Federal EB5 program capital from foreign investors. A second project upgraded snowmaking and will soon begin construction of new hotels at another local ski resort in Caledonia County. It was recently announced that further investments of EB5 capital are intended to be utilized for several projects in the region including a bio-tech manufacturing and research facility, a window manufacturing plant, a water-front hotel and conference center, and a major revitalization project for downtown Newport with construction to take place between late 2013 and 2015. Separate from the EB5 projects, it was announced recently that a Vermont developer has committed to bringing a Wal-Mart Super Store to Orleans County. Furthermore, the area recently received status as a foreign trade zone, propelling a major renovation project at the local airport, including an aviation flight school and small plane manufacturing plant in Newport. The projects that are underway have created jobs and boosted economic activity in the area.

The regulatory environment continues to increase operating costs and place extensive burden on personnel resources to comply with a myriad of legal requirements, including those under the Dodd-Frank Act of 2010, the Sarbanes-Oxley Act of 2002, the USA Patriot Act, the Bank Secrecy Act, the Real Estate Settlement Procedures Act and the Truth in Lending Act, and the new Basel III capital framework. It is unlikely that these administrative costs and burdens will moderate in the future.

CRITICAL ACCOUNTING POLICIES

The Company's significant accounting policies, which are described in Note 1 (Significant Accounting Policies) to the Company's consolidated financial statements in the December 31, 2012 Annual Report on Form 10-K, are fundamental to understanding the Company's results of operations and financial condition because they require management to use estimates and assumptions that may affect the value of the Company's assets or liabilities and financial results. These policies are considered by management to be critical because they require subjective and complex judgments about matters that are inherently uncertain and because it is likely that materially different amounts would be reported under different conditions or using different assumptions. The critical accounting policies govern:

- the allowance for loan losses;
- other real estate owned (OREO);
- valuation of residential mortgage servicing rights (MSRs);
- other than temporary impairment of investment securities; and
- the carrying value of goodwill.

These policies are described further in the Company's December 31, 2012 Annual Report on Form 10-K in the section titled "Management's Discussion and Analysis of Financial Condition and Results of Operations – Critical Accounting Policies" and in Note 1 (Significant Accounting Policies) to the consolidated financial statements. There have been no material changes in the critical accounting policies described in the 2012 Annual Report on Form 10-K.

RESULTS OF OPERATIONS

The Company's net income for the second quarter of 2013 was \$1,238,344, representing an increase of \$217,152 or 21.3% over net income of \$1,021,192 for the second quarter of 2012. This resulted in earnings per common share of \$0.25 and \$0.20, respectively. Net income for the first six months of 2013 increased \$294,080 or 14.8% to \$2,280,122 compared to \$1,986,042 for the same period in 2012. Core earnings (net interest income) for the second quarter of 2013 increased \$518,740 or 11.8%, compared to the second quarter of 2012, and the six months figures show an increase of \$827,022 or 9.5% for 2013 compared to 2012. Despite continued pressure on the net interest margin and spread in this persistently low interest rate environment, the Company was pleased with these increases. To offset this pressure, the Company shifted assets from lower yielding taxable investments to loans. Contributing to the \$171,987 or 3.1% increase in interest income for the second quarter of 2013 over 2012 and the \$144,138 or 1.3% increase for the first six months of 2013 compared to 2012 was a recovery of interest income in the amount of \$197,072 on a non performing loan as a result of reclassifying the loan to Other Real Estate Owned. Although total deposits increased \$12,305,349 or 2.9% year over year, interest expense on deposits, the major component of total interest expense, decreased \$133,491 or 15.4% between quarterly periods and \$263,012 or 14.9% for the six month comparison periods, which are both attributable to a decrease in the rates paid on interest-bearing deposit accounts. In terms of dollars, the rate change on the Company's junior subordinated debentures was of greater impact than lower interest cost on deposits. The rate paid on these debentures repriced from a fixed rate of 7.56% through December 15, 2012, to a quarterly adjustable floating rate equal to the 3-month London Interbank Offered Rate (LIBOR) plus 2.85%, or 3.130% for the second quarter of 2013. This translates to a decrease in interest expense of \$138,238 or 56.8% for the second quarter of 2013, compared to the second quarter of 2012, and a decrease of \$280,060 or 57.5% year over year. The Company recorded a provision for loan losses of \$120,000 for the second quarter of 2013 and \$326,250 for the first six months of 2013 compared to \$249,999 for the second quarter of 2012 and \$500,002 for the first six months of 2012, resulting in decreases of \$129,999 or 52.0% and \$173,752 or 34.8%, respectively. Non-interest income decreased \$12,174 or 0.8% for the second quarter of 2013 compared to the second quarter of 2012, while a modest increase of \$1,041 or 0.04% is noted year over year. Non-interest expense increased \$100,050 or 2.1% for the second quarter in 2013 compared to the same quarter in 2012, with figures of \$4,818,263 and \$4,718,213, respectively. Non-interest expense also increased for the six month comparison periods with an increase of \$139,408 or 1.5% and

figures of \$9,407,552 for 2013 and \$9,268,144 for 2012. The section below labeled Non-Interest Income and Non-Interest Expense provides a more detailed discussion on the significant components of these two items.

Return on average assets, which is net income divided by average total assets, measures how effectively a corporation uses its assets to produce earnings. Return on average equity, which is net income divided by average shareholders' equity, measures how effectively a corporation uses its equity capital to produce earnings.

Number of common shares outstanding	4,841,679	4,776,527

(1) Applicable income tax expense (benefit) includes the income tax effect, assuming a 34% tax rate, on securities gains which totaled \$0 and \$41,295 for the six months ended June 30, 2013 and 2012, respectively.

[Back to Table of Contents](#)

INTEREST INCOME VERSUS INTEREST EXPENSE (NET INTEREST INCOME)

The largest component of the Company's operating income is net interest income, which is the difference between interest earned on loans and investments versus the interest paid on deposits and other sources of funds (i.e. other borrowings). The Company's level of net interest income can fluctuate over time due to changes in the level and mix of earning assets, and sources of funds (volume) and from changes in the yield earned and costs of funds (rate). A portion of the Company's income from municipal investments is not subject to income taxes. Because the proportion of tax-exempt items in the Company's portfolio varies from year-to-year, to improve comparability of information, the non-taxable income shown in the tables below has been converted to a tax equivalent basis. Because the Company's corporate tax rate is 34%, to equalize tax-free and taxable income in the comparison, we divide the tax-free income by 66%, with the result that every tax-free dollar is equivalent to \$1.52 in taxable income.

The Company's tax-exempt interest income is entirely derived from its municipal investments, which comprised the entire held-to-maturity portfolio of \$24,105,937 at June 30, 2013, and \$24,026,422 at June 30, 2012.

The following table shows the reconciliation between reported net interest income and tax equivalent, net interest income for the six month comparison periods of 2013 and 2012.

For the Six Months Ended June 30,	2013	2012
Net interest income as presented	\$9,539,697	\$8,712,675
Effect of tax-exempt income	264,882	220,476
Net interest income, tax equivalent	\$9,804,579	\$8,933,151

The following table presents average earning assets and average interest-bearing liabilities supporting earning assets. Interest income (excluding interest on non-accrual loans) and interest expense are both expressed on a tax equivalent basis, both in dollars and as a rate/yield for the 2013 and 2012 comparison periods.

	For the Six Months Ended June 30,

Net interest margin (3)			3.84	%			3.53	%

[Back to Table of Contents](#)

- (1) Included in gross loans are non-accrual loans with an average balance of \$4,368,172 and \$7,571,881 for the six months ended June 30, 2013 and 2012, respectively. Loans are stated before deduction of unearned discount and allowance for loan losses and include loans held-for-sale.
- (2) Net interest spread is the difference between the average yield on average earning assets and the average rate paid on average interest-bearing liabilities.
- (3) Net interest margin is net interest income divided by average earning assets.
- (4) Included in other investments is the Company's FHLBB Stock with an average balance of \$3,192,802 and \$3,545,240, respectively, for the first six months of 2013 and 2012, and dividend payout rates of approximately 0.40% and 0.31%, respectively, per quarter.

The average volume of earning assets for the first six months of 2013 increased \$7,273,954 or 1.4% compared to the same period of 2012, and the average yield increased two basis points. The average volume of loans increased \$22,999,801 or 5.8%, while the average yield decreased 17 basis points. Interest earned on the loan portfolio equaled 91.6% of total interest income for the first six months of 2013 and 91.1% for the 2012 comparison period. The average volume of the taxable investment portfolio (classified as available-for-sale) decreased \$23,694,870 or 35.1% for the same period, and the average yield decreased 20 basis points. The Company sold a portion of its taxable investment portfolio to help fund loan growth throughout 2012 and into 2013 and pay off a portion of its borrowings, accounting for the decrease in these funds. The average volume of the tax-exempt investment portfolio (classified as held-to-maturity) increased \$9,479,900 or 28.7% between periods, while the average tax equivalent yield decreased 25 basis points. Interest earned on tax-exempt investments (which is presented in the table on a tax equivalent basis) comprised 6.7% of total interest income for the first six months of 2013 compared to 5.7% for the same period in 2012.

In comparison, the average volume of interest-bearing liabilities for the first six months of 2013 increased \$5,010,562 or 1.1% over the 2012 comparison period, while the average rate paid on these liabilities decreased 31 basis points. The average volume of NOW accounts increased \$7,787,223 or 7.2% and money market funds increased \$17,940,035 or 23.9%, while the average rate paid decreased five basis points on NOW accounts and increased 16 basis points on money market funds. The average volume carried in the Company's money market product, an insured cash sweep account (ICS) offered through Promontory Interfinancial Network, increased \$3,436,816 year over year from \$12,385,337 in 2012 to \$15,822,153 in 2013. Although this product has brought in some new funds, most of the interest has come from the Company's Certificate of Deposit Account Registry Service (CDARS) of Promontory Interfinancial Network customers looking for alternatives to placing their money in time deposit accounts that are not as liquid. The average volume of time deposits decreased \$12,764,858 or 9.3%, and the average rate paid on time deposits decreased 47 basis points. Interest paid on time deposits comprised 43.6% and 47.9%, respectively, of total interest expense for the first six months of 2013 and 2012. The average volume of federal funds purchased and other borrowed funds decreased \$17,292,384 or 77.8% and the average rate paid decreased 85 basis points for the first six months of 2013 compared to the same period in 2012. The decrease in average volume was attributable to matured advances as well as prepayment on a borrowing scheduled to mature in 2015.

The prolonged low interest rate environment has resulted in continued pressure on the Company's net interest spread and margin. The Company's earning assets are being replaced and repricing to lower interest rates, while the opportunity to reduce rates further on non-maturing interest-bearing deposits is more limited, given the already low rates paid on deposits. Between the six month comparison periods of 2013 and 2012, the average yield on interest earning assets increased two basis points, however this was due to the effect of an interest income adjustment of \$197,072 mentioned in the overview, while the average rate paid on interest bearing liabilities decreased 31 basis points. The decrease in interest expense was attributable in large part to the decrease in both volume and rate paid on time deposits. The repricing of the junior subordinated debentures, which is discussed in the Results of Operations, was another contributing factor to the decrease in interest expense and in the average rate paid on interest-bearing liabilities. The cumulative results of all these changes were increases of 33 basis points in the net interest spread and

31 basis points in net interest margin.

[Back to Table of Contents](#)

The following table summarizes the variances in interest income and interest expense on a fully tax-equivalent basis for the first six months of 2013 and 2012 resulting from volume changes in average assets and average liabilities and fluctuations in average rates earned and paid.

Changes in Interest Income and Interest Expense

	Variance Due to Rate (1)	Variance Due to Volume (1)	Total Variance
Average Interest-Earning Assets			
Loans	\$(382,850)	\$605,020	\$222,170
Taxable investment securities	(69,428)	(88,125)	(157,553)
Tax-exempt investment securities	(55,598)	186,205	130,607
Sweep and interest earning accounts	6,269	(1,723)	4,546
Other investments	(8,657)	(2,569)	(11,226)
Total	\$(510,264)	\$698,808	\$188,544
Average Interest-Bearing Liabilities			
NOW	\$(27,350)	\$12,391	\$(14,959)
Money market accounts	74,402	82,965	157,367
Savings deposits	(2,449)	3,304	855
Time deposits	(324,619)	(81,657)	(406,276)
Federal funds purchased and other borrowed funds	(93,512)	(46,306)	(139,818)
Repurchase agreements	(11,688)	14,092	2,404
Capital lease obligations	6	(2,403)	(2,397)
Junior subordinated debentures	(280,060)	0	(280,060)
Total	\$(665,270)	\$(17,614)	\$(682,884)
Changes in net interest income	\$155,006	\$716,422	\$871,428

(1) Items which have shown a year-to-year increase in volume have variances allocated as follows:

Variance due to rate = Change in rate x new volume

Variance due to volume = Change in volume x old rate

Items which have shown a year-to-year decrease in volume have variances allocated as follows:

Variance due to rate = Change in rate x old volume

Variances due to volume = Change in volume x new rate

NON-INTEREST INCOME AND NON-INTEREST EXPENSE

Non-interest Income: Non-interest income decreased slightly for the second quarter comparison periods and increased slightly for the six month comparison periods with the significant changes noted in the following. Other income from loans decreased \$60,244 or 24.0% for the second quarter of 2013 compared to the same period in 2012 and \$87,378 or 20.8% for the first six months of 2013 compared to the first six months of 2012 due primarily to a decrease in residential real estate loan activity, including a decrease in secondary market sales. Income generated through documentation fees on residential real estate loans for the second quarter of 2013 was \$69,126 compared to \$97,820 for the second quarter of 2012 and \$132,621 for the first six months of 2013 compared to \$187,874 for the same period in 2012. As mentioned earlier, the Company sold some investments from its available-for-sale portfolio during

the second quarter of 2012 resulting in a gain of \$41,295 compared to no gains realized during the same quarter in 2013. Offsetting these decreases were increases in both Service Fees and Other Income in both comparison periods. Service fees increased \$40,252 or 6.9% for the second quarter of 2013 compared to the same period in 2012 and \$32,587 or 2.8% for the first six months of 2013 compared to the same period in 2012. The Company changed the structure of various demand deposit accounts, including implementation of a different service fee, accounting for the increase in service fees. Other income increased \$48,137 or 23.8% for the second quarter of 2013 compared to the second quarter of 2012 and \$95,771 or 22.1% year over year. Increases of \$25,622 for the second quarter of 2013 compared to the same quarter in 2012 and \$55,529 year over year from the Company's trust and investment management affiliate, CFSG, together with \$38,650 in rental income on OREO for the first six months of 2013 helped to offset decreases in various components of other income in each of the comparison periods. While rental of OREO properties is not a normal practice for the Company, it was deemed appropriate on a condominium unit in Stowe, Vermont to help offset expenses associated with this property while it is on the market for sale.

[Back to Table of Contents](#)

Non-interest Expense: Non-interest expense noted significantly larger changes in the quarterly and six month comparison periods with an increase of \$100,050 or 2.1% for the second quarter of 2013 compared to the second quarter of 2012 as well as an increase of \$139,408 or 1.5% year over year. The most significant increase was in salaries and wages with an increase of \$66,723 or 4.3% for the second quarter of 2013 compared to the same quarter in 2012 and \$290,188 or 9.8% for the first six months of 2013 compared to the same period in 2012 which was due in part to normal salary increases as well as a difference in the number of payroll periods in March of 2013. Employee benefits increased accordingly with increases totaling \$28,837 or 4.9% and \$44,520 or 3.8% for the respective second quarter and six months comparison periods. Other expenses increased \$4,664 or 0.3% for the second quarter of 2013 compared to the second quarter of 2012, but decreased \$168,862 or 5.6% year over year. The Company's state deposit tax increased \$74,415 or 60.1% for the second quarter of 2013 compared to the same quarter in 2012 and \$78,274 or 31.2% for the first six months of 2013 compared to the same period in 2012 as a result of an increase in deposit accounts throughout the comparison periods, as well as an accrual adjustment to reflect these increases. Expenses associated with the Company's OREO properties increased \$46,277 quarter over quarter and \$59,822 year over year. These increases, along with other smaller increases in various expense accounts offset a portion of the decreases in the respective comparison periods. Amortization expense associated with the Company's investment in limited partnerships accounted for the biggest decrease totaling \$176,094 or 59.6% for the second quarter comparison periods and \$352,188 or 59.6% for the six months comparison periods. This decrease between periods is attributable to the amortization in 2012 of two significant historic tax credits with no similar credits available during the first six months of 2013. The amortization of the core deposit intangible associated with the LyndonBank acquisition decreased \$17,042 or 20% for the second quarter of 2013 compared to the second quarter of 2012 with figures of \$68,175 and \$85,217, respectively. For the six month comparison period the amortization expense decreased \$34,085 or 20% with figures of \$136,350 for 2013 compared to \$170,435 for 2012.

Losses relating to various limited partnership investments for affordable housing in our market area constitute the largest portion of other expenses, accounting for the largest portion of the decrease in non-interest expense. These losses for the second quarter of 2013 and 2012 amounted to \$119,223 and \$295,317, respectively and for the first six months of 2013 and 2012 amounted to \$238,446 and \$590,634, respectively. These investments provide tax benefits, including tax credits, and are designed to provide an effective yield between 8% and 10%. Losses relating to the Company's New Market Tax Credit (NMTC) investment for the second quarter of 2013 were recorded as \$25,347 compared to \$9,918 for the second quarter of 2012 and \$50,694 for the first six months of 2013 compared to \$19,836 for the same period in 2012, with tax credits amounting to \$28,174 for both quarters and \$56,348 for both year to date periods. The Company amortizes these investments under the effective yield method.

APPLICABLE INCOME TAXES

The provision for income taxes increased from a tax benefit to a tax expense in both comparison periods with a benefit of \$62,666 for the second quarter of 2012 compared to an expense of \$256,697 for the second quarter of 2013, and a benefit of \$153,504 for the first six months of 2012 to an expense of \$414,823 for the first six months of 2013. The change from benefit to expense is due in part to an increase in net income before taxes of \$536,515 for the quarter and \$862,407 for the first six months, as well as the decrease in tax credits totaling \$162,849 for the second quarter and \$325,698 year over year.

CHANGES IN FINANCIAL CONDITION

The following table reflects the composition of the Company's major categories of assets and liabilities as a percent of total assets or liabilities and shareholders' equity, as the case may be, as of the dates indicated:

	June 30, 2013	December 31, 2012	June 30, 2012
Assets			

Edgar Filing: COMMUNITY BANCORP /VT - Form 10-Q

Long-term borrowings	0	0.00	%	6,000,000	1.04	%	12,010,000	2.17	%

The Company's loan portfolio increased throughout the comparison periods with increases of \$7,935,176 or 1.9%, from December 31, 2012 to June 30, 2013, and \$17,630,647 or 4.3%, year over year. This increase is due in part to strong commercial loan growth during 2012 and into the first 6 months of 2013 as well as the Company's decision to continue to hold some 10-15 year fixed rate residential mortgages in-house, rather than selling them into the secondary market. Securities available-for-sale increased \$3,713,643 or 9.1% from December 31, 2012 to June 30, 2013, while a decrease of \$15,502,153 or 25.8% is recognized year over year. During the second and third quarters of 2012 as loan demand increased, securities available-for-sale were sold to help fund loan growth. Securities held-to-maturity decreased \$17,759,618 or 42.4% during the first six months of 2013, and with only a slight increase of \$79,515 or 0.3% year over year. As noted in prior 2nd quarter reports, the decrease in this portfolio year to date is cyclical in nature due to the municipal investments that mature June 30th which is the end of the annual municipal finance cycle in Vermont.

Total deposits decreased \$31,037,755 or 6.5% from December 31, 2012 to June 30, 2013 and increased \$12,305,349 or 2.9% year over year. Time deposits increased \$4,806,639 or 4.0% from December 31, 2012 to June 30, 2013 due to a one-way CDARS balance, but decreased \$7,791,508 or 5.8% year to year. Management believes this decrease in time deposits is partially attributable to the low rate environment as customers place their funds in non-maturing deposit accounts while searching for higher paying investments. Savings deposits increased throughout the comparison period with increases of \$4,624,661 or 7.1% year to date and \$2,656,901 or 4.0% year to year. Demand deposits decreased \$3,743,533 or 5.1% during the first six months of 2013, but increased \$3,245,877 or 4.9% year to year. NOW accounts followed the same pattern with a decrease of \$22,032,327 or 17.1% during the first six months of 2013, and an increase of \$7,564,304 or 7.6% year to year. Seasonal fluctuations in business checking accounts resulted in a decrease of \$4,266,434 or 9.4% during the first six months of 2013, making up the entire decrease in demand deposits, while a decrease in government agency accounts in the amount of \$16,302,408 or 49.5% and a decrease of \$5,250,267 or 21.6% in the account held by the Company's affiliate, Community Financial Services Group (CFSG), accounted for most of the decrease in NOW accounts during the first six months of 2013. Money market accounts decreased \$14,693,195 or 16.9% for the first six months of 2013, while an increase of \$6,629,774 or 10.1% is noted from June 30, 2012 to June 30, 2013. The municipal accounts decreased \$16,608,723 or 62.0% for the first six months of 2013 which is related to the annual finance cycle of the municipal customers. Year to year, the municipal accounts increased \$1,404,514 or 16.0% contributing to a portion of the increase in money market accounts and the remaining increase split between our regular money market accounts and the Company's insured cash sweep ("ICS") accounts, with increases of \$3,379,820 or 7.8% and \$1,845,440 or 13.7%, respectively. Once again, the increases in the non-arbitrage accounts are related to the annual finance cycle of the municipal customers, while the increase in the ICS accounts is primarily a shift of funds from other deposit accounts. The Company began borrowing overnight funds during the end of the first quarter to help fund loan growth during the first six months of 2013 and to cover the temporary decrease in the municipal deposit accounts, to end this period at a balance of \$22,055,000. The Company paid off a \$6,000,000 long-term FHLBB borrowing in January of 2013 accounting for the \$0 balance in long-term borrowings at June 30, 2013.

RISK MANAGEMENT

Interest Rate Risk and Asset and Liability Management - Management actively monitors and manages the Company's interest rate risk exposure and attempts to structure the balance sheet to maximize net interest income while controlling its exposure to interest rate risk. The Company's Asset/Liability Management Committee (ALCO) is made up of the Executive Officers and all the Vice Presidents of the Bank. The ALCO formulates strategies to manage interest rate risk by evaluating the impact on earnings and capital of such factors as current interest rate forecasts and economic indicators, potential changes in such forecasts and indicators, liquidity and various business strategies. The ALCO meets monthly to review financial statements, liquidity levels, yields and spreads to better understand, measure, monitor and control the Company's interest rate risk. In the ALCO process, the committee members apply policy limits set forth in the Asset Liability, Liquidity and Investment policies approved and periodically reviewed by the Company's Board of Directors. The ALCO's methods for evaluating interest rate risk include an analysis of the effects of interest rate changes on net interest income and an analysis of the Company's interest rate sensitivity "gap", which provides a static analysis of the maturity and repricing characteristics of the entire balance sheet.

[Back to Table of Contents](#)

Interest rate risk represents the sensitivity of earnings to changes in market interest rates. As interest rates change, the interest income and expense streams associated with the Company's financial instruments also change, thereby impacting net interest income (NII), the primary component of the Company's earnings. Fluctuations in interest rates can also have an impact on liquidity. The ALCO uses an outside consultant to perform rate shock simulations to the Company's net interest income, as well as a variety of other analyses. It is the ALCO's function to provide the assumptions used in the modeling process. The ALCO utilizes the results of this simulation model to quantify the estimated exposure of NII and liquidity to sustained interest rate changes. The simulation model captures the impact of changing interest rates on the interest income received and interest expense paid on all interest-earning assets and interest-bearing liabilities reflected on the Company's balance sheet. Furthermore, the model simulates the balance sheet's sensitivity to a prolonged flat rate environment. All rate scenarios are simulated assuming a parallel shift of the yield curve; however further simulations are performed utilizing a flattening yield curve as well. This sensitivity analysis is compared to the ALCO policy limits which specify a maximum tolerance level for NII exposure over a 1-year horizon, assuming no balance sheet growth, given a 200 basis point (bp) shift upward and a 100 bp shift downward in interest rates. The analysis also provides a summary of the Company's liquidity position. Furthermore, the analysis provides testing of the assumptions used in previous simulation models by comparing the projected NII with actual NII. The asset/liability simulation model provides management with an important tool for making sound economic decisions regarding the balance sheet.

The Company's Asset/Liability Policy has been enhanced with a contingency funding plan to help management prepare for unforeseen liquidity restrictions to include hypothetical severe liquidity crises.

While assumptions are developed based upon current economic and local market conditions, the Company cannot provide any assurances as to the predictive nature of these assumptions, including how customer preferences or competitor influences might change.

Credit Risk - As a financial institution, one of the primary risks the Company manages is credit risk, the risk of loss stemming from borrowers' failure to repay loans or inability to meet other contractual obligations. The Company's Board of Directors prescribes policies for managing credit risk, including Loan, Appraisal and Environmental policies. These policies are supplemented by comprehensive underwriting standards and procedures. The Company maintains a Credit Administration department whose function includes credit analysis and monitoring of and reporting on the status of the loan portfolio, including delinquent and non-performing loan trends. The Company also monitors concentration of credit risk in a variety of areas, including portfolio mix, the level of loans to individual borrowers and their related interest, loans to industry segments, and the geographic distribution of commercial real estate loans. Loans are reviewed periodically by an independent loan review firm in order to assure accuracy of the Company's internal risk ratings and compliance with various internal policies and procedures and regulatory guidance.

The residential mortgage portfolio continues to be the largest segment of the loan portfolio. The severity and depth of the latest recession and slow economic recovery saw the greatest degree of collection and foreclosure activity and losses in this segment of the portfolio. Delinquencies and losses, however, were not experienced to the extent of national peers as the Company maintains a mortgage loan portfolio of traditional mortgage products and had not engaged in higher risk loans such as option adjustable rate mortgage products, high loan-to-value products, interest only mortgages, subprime loans and products with deeply discounted teaser rates. While real estate values had declined in the Company's market area, the sound underwriting standards historically employed by the Company mitigated the trends in defaults and property surrenders experienced elsewhere. Residential mortgages with loan-to-values exceeding 80% are generally covered by private mortgage insurance ("PMI"). A 90% loan-to-value residential mortgage product without PMI is only available to borrowers with excellent credit and low debt-to-income ratios and has not been widely originated. Junior lien home equity products make up 21% of the residential mortgage portfolio with maximum loan-to-value ratios (including prior liens) of 80%. The residential mortgage portfolio has had satisfactory performance in light of the depth of the latest recession and the slow recovery; portfolio performance

improved through 2012 and into 2013.

Risk in the Company's commercial and commercial real estate loan portfolios is mitigated in part by government guarantees issued by federal agencies such as the U.S. Small Business Administration and USDA Rural Development. At June 30, 2013, the Company had \$26,196,517 in guaranteed loans with guaranteed balances of 20,833,772, compared to \$24,676,611 in guaranteed loans with guaranteed balances of \$19,787,843 at December 31, 2012 and \$27,031,163 in guaranteed loans with guaranteed balances of \$21,833,731 at June 30, 2012.

The Company's strategy is to continue growing the commercial and commercial real estate portfolios. Consistent with the strategic focus on commercial lending, commercial and industrial loans noted solid growth during the second quarter, with commercial real estate loan balances remaining higher year over year. Growth continued in the residential mortgage first lien portfolio with the Company continuing to holding rather than sell some of its 10 and 15 year fixed rate residential mortgage originations.

The following table reflects the composition of the Company's loan portfolio as of the dates indicated:

	June 30, 2013			December 31, 2012			June 30, 2012		
	Total Loans	% of Total		Total Loans	% of Total		Total Loans	% of Total	
Commercial & industrial	\$57,608,840	13.53	%	\$49,283,948	11.79	%	\$52,696,811	12.91	%
Commercial real estate	138,664,212	32.56	%	139,807,517	33.46	%	131,239,549	32.15	%
1 - 4 family residential - 1st lien	174,902,277	41.08	%	171,114,515	40.95	%	166,621,140	40.82	%
1 - 4 family residential - Jr lien	45,145,675	10.60	%	47,029,023	11.25	%	46,253,285	11.33	%
Consumer	9,491,326	2.23	%	10,642,151	2.55	%	11,370,898	2.79	%
Total gross loans	425,812,330	100.00	%	417,877,154	100.00	%	408,181,683	100.00	%
Deduct (add):									
Allowance for loan losses	4,522,179			4,312,080			3,926,119		
Unearned loan fees	(247,624)			(169,501)			(76,703)		
Loans held-for-sale	1,019,119			1,501,706			2,984,024		
	5,293,674			5,644,285			6,833,440		
Net loans	\$420,518,656			\$412,232,869			\$401,348,243		

The Company works actively with customers early in the delinquency process to help them to avoid default and foreclosure. With the economic recovery continuing, the levels of both Group B (Management Involved) and Group C (Unacceptable Risk) loans (as defined in Note 5 to the Company's unaudited interim consolidated financial statements) showed gradual improvement through 2012 and thus the loan loss reserve factors for trends in delinquency and non-accrual loans and criticized and classified were gradually decreased. Alternatively, qualitative factors have been increased to account for growth in the loan portfolio. Strong commercial loan volume and the migration of some past due residential loans to later stage delinquency resulted in increases in the associated loan loss reserve qualitative factors.

The Company's non-performing assets decreased \$283,886 or 4.6% during the first six months of 2013. The improvement in non-performing loans is principally due to resolution of loans through foreclosure actions and collateral liquidations. Claims receivable on related government guarantees were \$334,483 at June 30, 2013.

Commercial and commercial real estate loans are generally placed on non-accrual status when there is deterioration in the financial position of the borrower, payment in full of principal and interest is not expected, and/or principal or interest has been in default for 90 days or more. However, such a loan need not be placed on non-accrual status if it is both well secured and in the process of collection. Residential mortgages and home equity loans are considered for non-accrual status at 90 days past due and are evaluated on a case-by-case basis. The Company obtains current property appraisals or market value analyses and considers the cost to carry and sell collateral in order to assess the level of specific allocations required. Consumer loans are generally not placed in non-accrual but are charged off by the time they reach 120 days past due. When a loan is placed in non-accrual status, the Company's policy is to reverse the accrued interest against current period income and to discontinue the accrual of interest until the borrower clearly demonstrates the ability and intention to resume normal payments, typically demonstrated by regular timely payments for a period of not less than six months. Interest payments received on non-accrual or impaired loans are generally applied as a reduction of the loan principal balance. Deferred taxes are calculated monthly, based on interest amounts that would have accrued through the normal accrual process.

[Back to Table of Contents](#)

As of the consolidated balance sheet dates, non-performing assets were made up of the following:

	June 30, 2013		December 31, 2012			
	Balance	Percent of Total	Balance	Percent of Total		
Loans past due 90 days or more and still accruing (1)						
Commercial real estate	\$45,653	0.70	%	\$53,937	0.87	%
Residential real estate - 1st lien	596,814	9.20	%	281,845	4.54	%
Residential real estate - Jr lien	5,951	0.09	%	41,434	0.67	%
Consumer	0	0.00	%	844	0.01	%
Total	648,418	9.99	%	378,060	6.09	%
Non-accrual loans (1)						
Commercial & industrial	497,287	7.66	%	596,777	9.61	%
Commercial real estate	1,165,336	17.95	%	1,892,195	30.48	%
Residential real estate - 1st lien	1,660,626	25.58	%	1,928,097	31.06	%
Residential real estate - Jr lien	348,815	5.37	%	338,383	5.45	%
Total	3,672,064	56.56	%	4,755,452	76.60	%
Other real estate owned	2,171,621	33.45	%	1,074,705	17.31	%
Total	\$6,492,103	100.00	%	\$6,208,217	100.00	%

(1) No commercial & industrial loans were past due 90 days or more and still accruing and no consumer loans were in a non-accrual status as of the consolidated balance sheet dates.

As of the balance sheet dates, the Company was not contractually committed to lend additional funds to debtors with impaired, non-accrual or modified loans.

The Company's OREO portfolio at June 30, 2013 consisted of nine properties acquired through the normal foreclosure process. One residential property and one commercial property were sold during the first quarter of 2013. During the second quarter, the Company took possession of three commercial real estate properties and one residential property increasing OREO by \$1,291,916 to \$2,171,621; the sale of a commercial real estate property is in process and is expected to return the OREO portfolio balance to approximately the 2012 ending balance during the third quarter of 2013.

Allowance for loan losses and provisions - The Company maintains an allowance for loan losses (allowance) at a level that management believes is appropriate to absorb losses inherent in the loan portfolio (See Critical Accounting Policies). Although the Company, in establishing the allowance, considers the inherent losses in individual loans and pools of loans, the allowance is a general reserve available to absorb all credit losses in the loan portfolio. No part of the allowance is segregated to absorb losses from any particular loan or class of loans.

When establishing the allowance each quarter the Company applies a combination of historical loss factors and qualitative factors to loan classes including residential first and junior lien mortgages, commercial real estate, commercial and industrial, and consumer loan portfolios. No changes were made to the allowance methodology during the first six months of 2013. The Company will shorten or lengthen its look back period for determining average portfolio historical loss rates as the economy either contracts or expands; during a period of economic contraction a shortening of the look back period may more conservatively reflect the current economic climate. The

highest loss rates experienced for the look back period are applied to the various segments in establishing the allowance.

The Company then applies numerous qualitative factors to each of these segments of the loan portfolio. Those factors include the levels of and trends in delinquencies and non-accrual loans, criticized and classified assets, volumes and terms of loans, and the impact of any loan policy changes. Experience, ability and depth of lending personnel, levels of policy and documentation exceptions, national and local economic trends, the competitive environment, and concentrations of credit are also factors considered.

The adequacy of the allowance is reviewed quarterly by the risk management committee of the Board of Directors and then presented to the full Board of Directors for approval.

[Back to Table of Contents](#)

The following table summarizes the Company's loan loss experience for the six months ended June 30,

	2013	2012		
Loans outstanding, end of period*	\$425,812,330	\$408,181,683		
Average loans outstanding during period*	\$419,786,238	\$396,786,437		
Non-accruing loans, end of period	\$3,672,064	\$6,701,362		
Non-accruing loans, net of government guarantees	\$3,406,999	\$4,047,738		
Allowance, beginning of period	\$4,312,080	\$3,886,502		
Loans charged off:				
Commercial & industrial	(19,287)	(124,934)		
Commercial real estate	(107,936)	(55,057)		
Residential real estate - 1st lien	(3,052)	(183,474)		
Residential real estate - Jr lien	0	(60,287)		
Consumer loans	(26,009)	(60,373)		
Total loans charged off	(156,284)	(484,125)		
Recoveries:				
Commercial & industrial	992	2,520		
Commercial real estate	0	863		
Residential real estate - 1st lien	8,636	1,823		
Residential real estate - Jr lien	120	1,418		
Consumer loans	30,385	17,116		
Total recoveries	40,133	23,740		
Net loans charged off	(116,151)	(460,385)		
Provision charged to income	326,250	500,002		
Allowance, end of period	\$4,522,179	\$3,926,119		
Net charge offs to average loans outstanding	0.028	%	0.116	%
Provision charged to income as a percent of average loans	0.078	%	0.126	%
Allowance to average loans outstanding	1.077	%	0.989	%
Allowance to non-accruing loans	123.151	%	58.587	%
Allowance to non-accruing loans net of government guarantees	132.732	%	96.995	%

*Includes loans held-for-sale

Net loan losses increased from 2007 through 2011, peaking at \$841,000 in 2011. Given the trend in losses, depth of the latest recession and the sluggish recovery, management increased its provisions for loan losses to \$1.0 million in each of the years 2010 through 2012, compared to \$625,004 for 2009. This increase was directionally consistent with the risk trends and growth of the loan portfolio. Improving loan portfolio trends through 2012 and into 2013 resulted in a decrease of \$173,752 or 34.8% to the 2013 provision for the first six months of \$326,250 compared to \$500,002 for the same period in 2012. The Company has an experienced collections department that continues to work actively with borrowers to resolve problem loans, and management continues to monitor the loan portfolio closely.

Specific allocations to the allowance are made for certain impaired loans. Impaired loans are loans to a borrower that in aggregate are greater than \$100,000 and that are in non-accrual status. A loan is considered impaired when it is probable that the Company will be unable to collect all amounts due, including interest and principal, according to the contractual terms of the loan agreement. The Company will review all the facts and circumstances surrounding non-accrual loans and on a case-by-case basis may consider loans below the threshold as impaired when such

treatment is material to the financial statements. See Note 5 to the accompanying unaudited interim consolidated financial statements for information on the recorded investment in impaired loans and their related allocations.

The portion of the allowance termed "unallocated" is established to absorb inherent losses that exist as of the valuation date although not specifically identified through management's process for estimating credit losses. While the allowance is described as consisting of separate allocated portions, the entire allowance is available to support loan losses, regardless of category.

[Back to Table of Contents](#)

Market Risk - In addition to credit risk in the Company's loan portfolio and liquidity risk in its loan and deposit-taking operations, the Company's business activities also generate market risk. Market risk is the risk of loss in a financial instrument arising from adverse changes in market prices and rates, foreign currency exchange rates, commodity prices and equity prices. Declining capital markets can result in fair value adjustments necessary to record decreases in the value of the investment portfolio for other-than-temporary-impairment. The Company does not have any market risk sensitive instruments acquired for trading purposes. The Company's market risk arises primarily from interest rate risk inherent in its lending and deposit taking activities. During times of recessionary periods, a declining housing market can result in an increase in loan loss reserves or ultimately an increase in foreclosures. Interest rate risk is directly related to the different maturities and repricing characteristics of interest-bearing assets and liabilities, as well as to loan prepayment risks, early withdrawal of time deposits, and the fact that the speed and magnitude of responses to interest rate changes vary by product. The prolonged weak economy and disruption in the financial markets in recent years may heighten the Company's market risk. As discussed above under "Interest Rate Risk and Asset and Liability Management", the Company actively monitors and manages its interest rate risk through the ALCO process.

COMMITMENTS, CONTINGENCIES AND OFF-BALANCE-SHEET ARRANGEMENTS

The Company is a party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit, standby letters of credit and risk-sharing commitments on certain sold loans. Such instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the balance sheet. The contract or notional amounts of those instruments reflect the extent of involvement the Company has in particular classes of financial instruments. During the first six months of 2013, the Company did not engage in any activity that created any additional types of off-balance sheet risk.

The Company generally requires collateral or other security to support financial instruments with credit risk. The Company's financial instruments whose contract amount represents credit risk were as follows:

	Contract or Notional Amount	
	June 30, 2013	December 31, 2012
Unused portions of home equity lines of credit	\$22,348,096	\$21,120,077
Other commitments to extend credit	44,951,647	45,551,282
Residential construction lines of credit	1,960,848	1,138,872
Commercial real estate and other construction lines of credit	7,365,269	1,762,424
Standby letters of credit and commercial letters of credit	1,061,843	1,193,480
Recourse on sale of credit card portfolio	286,000	352,000
MPF credit enhancement obligation, net of liability recorded	1,549,211	2,035,858

Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Company sold its credit card portfolio during the third quarter of 2007, but retained a partial recourse obligation under the terms of the sale, based on total lines, not balances outstanding. Based on historical losses, the Company does not expect any significant losses from this commitment.

In connection with its trust preferred securities financing completed on October 31, 2007, the Company guaranteed the payment obligations under the \$12,500,000 of capital securities of its subsidiary, CMTV Statutory Trust I. The source of funds for payments by the Trust on its capital securities is payments made by the Company on its debentures

issued to the Trust. The Company's obligation under those debentures is fully reflected in the Company's balance sheet, in the gross amount of \$12,887,000 for each of the comparison periods, of which \$12,500,000 represents external financing.

LIQUIDITY AND CAPITAL RESOURCES

Managing liquidity risk is essential to maintaining both depositor confidence and stability in earnings. Liquidity management refers to the ability of the Company to adequately cover fluctuations in assets and liabilities. Meeting loan demand (assets) and covering the withdrawal of deposit funds (liabilities) are two key components of the liquidity management process. The Company's principal sources of funds are deposits, amortization and prepayment of loans and securities, maturities of investment securities, sales of loans available-for-sale, and earnings and funds provided from operations. Maintaining a relatively stable funding base, which is achieved by diversifying funding sources, competitively pricing deposit products, and extending the contractual maturity of liabilities, reduces the Company's exposure to roll over risk on deposits and limits reliance on volatile short-term borrowed funds. Short-term funding needs arise from declines in deposits or other funding sources and funding requirements for loan commitments. The Company's strategy is to fund assets to the maximum extent possible with core deposits that provide a sizable source of relatively stable and low-cost funds.

[Back to Table of Contents](#)

Currently, the Company is not offering competitive rates to attract or retain “rate chasers”. The Company however, recognizes that, at times, when loan demand exceeds deposit growth or the Company has other liquidity demands, it may be desirable to utilize alternative sources of deposit funding to augment retail deposits and borrowings. One-way deposits purchased through the CDARS provide an alternative funding source when needed. Such deposits are generally considered a form of brokered deposits. The Company had one-way deposits totaling approximately \$5,000,000 at June 30, 2013, \$0 at December 31, 2012 and \$3,976,000 at June 30, 2012. In addition, two-way CDARS deposits allow the Company to provide FDIC deposit insurance to its customers in excess of account coverage limits by exchanging deposits with other CDARS members. At June 30, 2013, the Company reported \$1,099,927 in CDARS deposits representing exchanged deposits with other CDARS participating banks, compared to \$1,028,152 at December 31, 2012 and \$1,020,714 at June 30, 2012. The balance in ICS deposits discussed above under “Changes in Financial Condition” was \$15,283,405 at June 30, 2013, compared to \$13,529,424 at December 31, 2012 and \$13,437,965 at June 30, 2012.

The Company has a Borrower-in-Custody arrangement with the FRBB secured by eligible commercial loans, commercial real estate loans and home equity loans, resulting in an available line of \$75,719,554, \$71,345,734, and \$70,208,987, respectively, at June 30, 2013, December 31, 2012 and June 30, 2012. Credit advances in the FRBB lending program are overnight advances with interest chargeable at the primary credit rate (generally referred to as the discount rate), currently 75 basis points. The Company had no outstanding advances against this line during any of the respective comparison periods.

The Company has an unsecured Federal Funds line with the FHLBB with an available balance of \$500,000 at June 30, 2013, December 31, 2012, and June 30, 2012. Interest is chargeable at a rate determined daily approximately 25 basis points higher than the rate paid on federal funds sold. In addition, at June 30, 2013, December 31, 2012 and June 30, 2012, additional borrowing capacity of approximately \$73,446,809, \$72,591,692 and \$67,723,797, respectively, was available through the FHLBB secured by the Company's qualifying loan portfolio (generally, residential mortgages).

The following table reflects the Company's outstanding FHLBB advances against the respective lines as of the dates indicated:

	June 30, 2013	December 31, 2012	June 30, 2012
Long-Term Advances			
FHLBB Community Investment Program advance, 7.67% fixed rate, due November 16, 2012	\$0	\$0	\$10,000
FHLBB term advance, 1.71% fixed rate, due January 28, 2013	0	6,000,000	6,000,000
FHLBB term advance, 2.72% fixed rate, due January 27, 2015	0	0	6,000,000
	\$0	\$6,000,000	\$12,010,000
Overnight Borrowings			
Federal funds purchased (FHLBB), 0.35%, 0.00% and 0.3125%	\$22,055,000	\$0	\$25,825,000
Total Borrowings	\$22,055,000	\$6,000,000	\$37,835,000

The following table illustrates the changes in shareholders' equity from December 31, 2012 to June 30, 2013:

Balance at December 31, 2012 (book value \$8.13 per common share)	\$43,352,575
Net income	2,280,122
Issuance of stock through the Dividend Reinvestment Plan	344,713
Dividends declared on common stock	(1,349,171)

Dividends declared on preferred stock	(40,625)
Change in unrealized gain on available-for-sale securities, net of tax	(209,903)
Balance at June 30, 2013 (book value \$8.65 per common share)	\$44,377,711

The primary source of funds for the Company's payment of dividends to its shareholders is dividends paid to the Company by the Bank. The Bank, as a national bank, is subject to the dividend restrictions set forth by the Comptroller of the Currency ("OCC"). Under such restrictions, the Bank may not, without the prior approval of the OCC, declare dividends in excess of the sum of the current year's earnings (as defined) plus the retained earnings (as defined) from the prior two years.

The Company (on a consolidated basis) and the Bank are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory - and possibly additional discretionary - actions by regulators that, if undertaken, could have a direct material effect on the Company's and the Bank's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and the Bank must meet specific capital guidelines that involve quantitative measures of their assets, liabilities, and certain off-balance-sheet items, as calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors. Prompt corrective action capital requirements are applicable to banks, but not bank holding companies.

Quantitative measures established by regulation to ensure capital adequacy require the Company and the Bank to maintain minimum amounts and ratios (set forth in the table below) of total and Tier 1 capital (as defined in the regulations) to risk-weighted assets (as defined), and of Tier 1 capital (as defined) to average assets (as defined). The Company's non-cumulative Series A preferred stock (\$2.5 million liquidation preference) is includable without limitation in its Tier 1 capital. In accordance with changes in the regulatory requirements for calculating capital ratios, beginning with the quarter ended March 31, 2011, the Company deducts the amount of goodwill, for purposes of calculating the amount of trust preferred junior subordinated debentures includable in Tier 1 capital. Management believes, as of June 30, 2013, the Company and the Bank met all capital adequacy requirements to which they are subject.

As of June 30, 2013 the Bank was considered well capitalized under the regulatory capital framework for Prompt Corrective Action and the Company exceeded applicable consolidated regulatory capital guidelines.

The regulatory capital ratios of the Company and its subsidiary as of June 30, 2013 and December 31, 2012 exceeded current regulatory guidelines and are presented in the following table.

	Actual		Minimum For Capital Adequacy Purposes:		Minimum To Be Well Capitalized Under Prompt Corrective Action Provisions:	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
(Dollars in Thousands)						
June 30, 2013						
Total capital (to risk-weighted assets)						
Company	\$48,954	12.89	% \$30,383	8.00	% N/A	N/A
Bank	\$48,286	12.73	% \$30,350	8.00	% \$37,938	10.00 %
Tier I capital (to risk-weighted assets)						
Company	\$42,424	11.17	% \$15,191	4.00	% N/A	N/A
Bank	\$43,720	11.52	% \$15,175	4.00	% \$22,763	6.00 %
Tier I capital (to average assets)						
Company	\$42,424	7.68	% \$22,107	4.00	% N/A	N/A
Bank	\$43,720	7.92	% \$22,089	4.00	% \$27,611	5.00 %
December 31, 2012:						
Total capital (to risk-weighted assets)						
Company	\$47,385	12.57	% \$30,164	8.00	% N/A	N/A

Edgar Filing: COMMUNITY BANCORP /VT - Form 10-Q

The Company intends to continue the past policy of maintaining a strong capital resource position to support its asset size and level of operations. Consistent with that policy, management will continue to anticipate the Company's future capital needs and will adjust its dividend payment practices consistent with those needs.

From time to time the Company may make contributions to the capital of Community National Bank. At present, regulatory authorities have made no demand on the Company to make additional capital contributions.

In July 2013, the Federal Reserve Board adopted new rules implementing the Basel III capital standards, which significantly revise the regulatory capital standards for U.S. financial institutions, including community banks. Among other things, the new capital rules, which take effect in January 2014, revise the definition of various regulatory capital components and related calculation methods, add a new regulatory capital component (common equity tier 1 capital), increase the minimum required tier 1 capital, implement a new capital conservation buffer and restrict dividends and certain discretionary bonus payments when the buffer is not maintained. The final rules as adopted did not include several proposals that were particularly troubling to the Company and other community banks, including proposed changes to risk-weighting of mortgage loan assets, the proposed mandatory inclusion of unrealized gains and losses on available-for-sale securities in regulatory capital and the proposed phase out of trust preferred securities from regulatory capital. Management is evaluating the potential impact of the new capital rules on the Company and monitoring related regulatory developments.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company's management of the credit, liquidity and market risk inherent in its business operations is discussed in Part 1, Item 2 of this report under the captions "RISK MANAGEMENT" and "COMMITMENTS, CONTINGENCIES AND OFF-BALANCE-SHEET ARRANGEMENTS", which are incorporated herein by reference. Management does not believe that there have been any material changes in the nature or categories of the Company's risk exposures from those disclosed in the Company's 2012 Annual Report on form 10-K.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Management is responsible for establishing and maintaining effective disclosure controls and procedures, as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act"). As of June 30, 2013, an evaluation was performed under the supervision and with the participation of management, including the principal executive officer and principal financial officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures. Based on that evaluation, management concluded that its disclosure controls and procedures as of June 30, 2013 were effective in ensuring that material information required to be disclosed in the reports it files with the Commission under the Exchange Act was recorded, processed, summarized, and reported on a timely basis.

For this purpose, the term "disclosure controls and procedures" means controls and other procedures of the Company that are designed to ensure that information required to be disclosed by it in the reports that it files or submits under the Exchange Act (15 U.S.C. 78a et seq.) is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the Company's management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting

There were no changes in the Company's internal control over financial reporting that occurred during the quarter ended June 30, 2013 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

In the normal course of business the Company and its subsidiary are involved in litigation that is considered incidental to their business. Management does not expect that any such litigation will be material to the Company's consolidated financial condition or results of operations.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The following table provides information as to purchases of the Company's common stock during the quarter ended June 30, 2013, by the Company and by any affiliated purchaser (as defined in SEC Rule 10b-18):

For the period:	Total Number of Shares Purchased(1)(2)	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plan	Maximum Number of Shares That May Yet Be Purchased Under the Plan at the End of the Period
April 1 - April 30	0	\$0.00	N/A	N/A
May 1 - May 31	3,600	13.14	N/A	N/A
June 1 - June 30	1,000	13.85	N/A	N/A
Total	4,600	\$ 13.29	N/A	N/A

(1) All 4,600 shares were purchased for the account of participants invested in the Company Stock Fund under the Company's Retirement Savings Plan by or on behalf of the Plan Trustee, the Human Resources Committee of Community National Bank. Such share purchases were facilitated through CFSG, which provides certain investment advisory services to the Plan. Both the Plan Trustee and CFSG may be considered affiliates of the Company under Rule 10b-18.

(2) Shares purchased during the period do not include fractional shares repurchased from time to time in connection with the participant's election to discontinue participation in the Company's Dividend Reinvestment Plan.

ITEM 6. EXHIBITS

The following exhibits are filed with this report:

[Exhibit 31.1](#) Certification from the Chief Executive Officer of the Company pursuant to section 302 of the Sarbanes-Oxley Act of 2002

[Exhibit 31.2](#) Certification from the Chief Financial Officer of the Company pursuant to section 302 of the Sarbanes-Oxley Act of 2002

Exhibit 32.1 Certification from the Chief Executive Officer of the Company pursuant to 18 U.S.C., Section 1350, as adopted pursuant to section 906 of the Sarbanes-Oxley Act of 2002*

Exhibit 32.2 Certification from the Chief Financial Officer of the Company pursuant to 18 U.S.C., Section 1350, as adopted pursuant to section 906 of the Sarbanes-Oxley Act of 2002*

Exhibit 101 The following materials from the Company's Quarterly Report on Form 10-Q for the quarter ended June 30, 2013 formatted in eXtensible Business Reporting Language (XBRL): (i) the unaudited consolidated balance sheets, (ii) the unaudited consolidated statements of income for the second quarters ended June 30, 2013 and 2012, (iii) the unaudited consolidated statements of comprehensive income, (iv) the unaudited consolidated statements of cash flows and (v) related notes.* **

* This exhibit shall not be deemed "filed" for purposes of Section 18 of the Securities Exchange Act of 1934, or otherwise subject to the liability of that section, and shall not be deemed to be incorporated by reference into any filing under the Securities Act of 1933 or the Securities Exchange Act of 1934.

** As provided in Rule 406T of Regulation S-T, this information is furnished and not filed for purposes of Sections 11 and 12 of the Securities Act of 1933 and Section 18 of the Securities Exchange Act of 1934.
