Media Release

Credit Suisse Group reports net loss of CHF 2.1 billion in the first quarter of 2008

Net writedowns in leveraged finance and structured products of CHF 5.3 billion in 1Q08

Continued significant reduction in risk exposures during 1Q08: risk exposures declined 41% in leveraged finance, 25% in commercial mortgages

Other than the areas affected directly by the credit crisis, most of our businesses performed well in 1Q08, with revenues near or above those in 1Q07

Steady inflows in Private Banking: net new assets of CHF 17.1 billion in 1Q08, including CHF 13.5 billion in Wealth Management

Strong BIS tier 1 ratio under Basel II of 9.8% as of the end of 1Q08

Edgar Filing: CREDIT SUISSE //FI - Form 6-K

Zurich, April 24, 2008 Credit Suisse Group reported a net loss of CHF 2,148 million in the first quarter of 2008, compared with net income of CHF 2,729 million in the first quarter of 2007. Net revenues on a core results basis were CHF 3,019 million in the first quarter of 2008, down 72% from the first quarter of 2007.

Brady W. Dougan, Chief Executive Officer, said: Our first-quarter results are clearly unsatisfactory. However, during the quarter, we substantially reduced our exposures to affected areas and we will continue to do so in a disciplined fashion. Other than the areas affected directly by the credit crisis, most of our businesses performed well, with revenues near, or in some cases above, those in the first quarter of 2007. This demonstrates the benefit of our diversified global platform. Our global Wealth Management and Swiss Corporate & Retail Banking businesses sustained their strong growth momentum, with steady inflows, and in Investment Banking we had solid results in most of our businesses other than leveraged finance and structured products.

Mr. Dougan concluded: Credit Suisse remains well positioned in an extremely challenging environment: our capital position is strong and we will continue to manage our liquidity conservatively and control our expenses effectively. I am confident that we will continue to serve as a safe haven for clients in uncertain and volatile markets, and to seize the opportunities that arise in times of market dislocation to create long-term value.

Diluted earnings per share (CHF)	(2.10)	0.49	2.42	-	-
Return on equity	(20.8)%	5.1%	25.2%	-	-
Basel II BIS tier 1 ratio (end of period)	9.8%	10.0% ¹⁾	- ¹⁾	-	-
Core results ²⁾					
Net revenues	3,019	6,561	10,669	(54)	(72)
Provision for credit losses	151	203	53	(26)	185
Total operating expenses	5,440	6,155	7,040	(12)	(23)
Income/(loss) before taxes	(2,572)	203	3,576	-	-

¹⁾ The Basel I BIS tier 1 ratio was 11.1% as of the end of 4Q07 and 13.2% as of the end of 1Q07.

²⁾ Core results include the results of the three segments and the Corporate Center, excluding revenues and expenses in respect of minority interests in which we do not have a significant economic interest.

Segment Results**Private Banking**

Private Banking, which comprises the Wealth Management and Corporate & Retail Banking businesses, reported income before taxes of CHF 1,324 million in the first quarter of 2008, a decrease of 8% from the first quarter of 2007.

The **Wealth Management** business reported income before taxes of CHF 860 million in the first quarter of 2008, down 13% from the same period of 2007. Net revenues in the first quarter of 2008 were CHF 2,313 million, down 3% from the first quarter of 2007, as an improvement in recurring revenues was offset by a decrease in transaction-based revenues. Total operating expenses grew 4% from the first quarter of 2007, primarily due to international expansion. The pre-tax income margin was 37.2% in the first quarter of 2008 compared with 41.5% in the first quarter of 2007.

The **Corporate & Retail Banking** business reported income before taxes of CHF 464 million in the first quarter of 2008, up 3% from the first quarter of 2007. Net revenues were strong, up 6% from the same period a year earlier, as net interest income rose slightly and total non-interest income increased 11%. Net releases of provision for credit losses were CHF 9 million, in line with the first quarter of 2007. Total operating expenses rose 8% from the first quarter of 2007, mainly driven by higher non-credit-related provisions, reflecting net releases in the first quarter of 2007. The pre-tax income margin was 44.5% in the first quarter of 2008 compared with 45.7% in the first quarter of 2007.

Investment Banking

In Investment Banking, the loss before taxes was CHF 3,460 million in the first quarter of 2008, compared with income of CHF 1,990 million in the strong first quarter of 2007, reflecting the extremely challenging market environment in 2008. Net revenues were negative CHF 489 million in the first quarter of 2008, compared with CHF 6,582 million in the first quarter of 2007. This decline was due in large part to the impact of the mortgage and credit market dislocations on the fixed income businesses. Results in the first quarter of 2008 were negatively impacted by significantly lower fixed income trading revenues compared with the first quarter of 2007, reflecting net writedowns in the leveraged finance

and structured products businesses.

Media Release

April 24, 2008

Page 3/6

Other than leveraged finance and structured products, most businesses reported solid results, highlighting the importance of the bank's ongoing revenue diversification efforts. In fixed income trading, the Investment Banking segment achieved a near-record performance in the global rates and foreign exchange businesses and strong results in emerging markets. Equity trading results in the first quarter of 2008 declined from the strong year-ago period due primarily to weak results in equity proprietary trading and in the convertibles business. These results were partly offset by a record performance in prime services and good results in the global cash businesses. Fixed income and equity trading benefited from fair value gains of CHF 1,362 million due to widening credit spreads on Credit Suisse debt. The underwriting and advisory businesses had lower revenues compared with the first quarter of 2007 in line with the decline in market activity. Total operating expenses declined 38% from the first quarter of 2007, due primarily to a decrease in compensation and benefits, reflecting the negative results.

Net writedowns and exposures in Investment Banking

Net revenues reflected net writedowns in the leveraged finance and structured products businesses of CHF 5,281 million in the first quarter of 2008. This amount included the revaluation of certain asset-backed security positions in the collateralized debt obligations trading business in Investment Banking, as announced on March 20, 2008. The following table shows Credit Suisse's net writedowns in the first quarter of 2008 and in the full year 2007:

Net writedowns (in CHF million)	1Q08	2007
Leveraged finance	1'681	835
Commercial mortgage-backed securities (CMBS)	848	554
Residential mortgage-backed securities (RMBS)	96	513
Collateralized debt obligations (CDO)	2'656	1'285
Total writedowns	5'281	3'187

Credit Suisse further reduced its exposures in Investment Banking in the first quarter of 2008 compared with the end of 2007, as shown in the following table. Total exposures in leveraged finance have been reduced 41% from the end of the fourth quarter of 2007 and 65% from the end of the third quarter of 2007. Total exposures in commercial mortgages have been reduced 25% from the end of the fourth quarter of 2007 and 46% from the end of the third quarter of 2007:

Exposures (in CHF billion)	End of 1Q08	End of 4Q07	End of 3Q07	Change in % vs. 4Q07	Change in % vs. 3Q07
Leveraged finance	20.8	35.1	59.2	(41)	(65)
Commercial mortgages	19.3	25.9	35.9	(25)	(46)
Residential mortgages	5.5	8.7	16.2	(37)	(66)
CDO US subprime	0.7	1.6	2.3	(56)	(70)

Asset Management

In Asset Management, the loss before taxes was CHF 468 million in the first quarter of 2008, compared with income of CHF 257 million in the first quarter of 2007. This decrease was due primarily to net writedowns of CHF 566 million from securities purchased from our money market funds and significantly lower private equity and other investment-related gains. Net revenues were CHF 63 million in the first quarter of 2008, a decrease of 92% from the first quarter of 2007. Before the above-mentioned writedowns, net revenues in the first quarter of 2008 declined 19%

from the first quarter of

Edgar Filing: CREDIT SUISSE / /FI - Form 6-K

Media Release

April 24, 2008

Page 4/6

2007 to CHF 629 million. Total operating expenses were up 2% from the first quarter of 2007. Before the above-mentioned writedowns, the pre-tax income margin in the first quarter of 2008 was 15.6% compared with 33.1% in the first quarter of 2007.

The fair value of our balance sheet exposure from the securities purchased from our money market funds was CHF 2.2 billion at the end of the first quarter of 2008, down CHF 1.7 billion from the end of 2007 and included CHF 232 million purchased in the first quarter of 2008.

Net New Assets

The Wealth Management business generated net new assets of CHF 13.5 billion in the first quarter of 2008, which represents a rolling four-quarter average growth rate of 6.0%. This reflected strong contributions from Switzerland and the Americas. Asset Management reported net new asset outflows of CHF 20.2 billion in the first quarter of 2008, primarily driven by outflows from global investment strategies, including Swiss institutional advisory and money market assets. Net new assets in alternative investments in the Asset Management segment were CHF 2.2 billion. The Group's total assets under management were CHF 1,380.5 billion as of March 31, 2008, a decrease of 11.0% from March 31, 2007, reflecting adverse foreign exchange-related and market movements.

Benefits of the integrated bank

In the first quarter of 2008, we generated approximately CHF 1.2 billion of our net revenues on a core results basis from cross-divisional collaboration.

Strong capitalization

Following the introduction of Basel II, Credit Suisse Group's capitalization remained strong, with a BIS tier 1 ratio of 9.8% as of March 31, 2008.

Credit Suisse

As one of the world's leading banks, Credit Suisse provides its clients with private banking, investment banking and asset management services worldwide. Credit Suisse offers advisory services, comprehensive solutions and innovative products to companies, institutional clients and high-net-worth private clients globally, as well as retail clients in Switzerland. Credit Suisse is active in over 50 countries and employs approximately 49,000 people. Credit Suisse's parent company, Credit Suisse Group, is a leading global financial services company headquartered in Zurich. Credit Suisse Group's registered shares (CSGN) are listed in Switzerland and, in the form of American Depositary Shares (CS), in New York. Further information about Credit Suisse can be found at www.credit-suisse.com.

Cautionary statement regarding forward-looking information and non-GAAP information

This press release contains statements that constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act. In addition, in the future we, and others on our behalf, may make statements that constitute forward-looking statements. Such forward-looking statements may include, without limitation, statements relating to the following:

- our plans, objectives or goals;
- our future economic performance or prospects;
- the potential effect on our future performance of certain contingencies; and
- assumptions underlying any such statements.

Words such as believes, anticipates, expects, intends and plans and similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. We do not intend to update these forward-looking statements except as may be required by applicable securities laws. By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and risks exist that predictions, forecasts, projections and other outcomes described or implied in forward-looking statements will not be achieved. We caution you that a number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements. These factors include:

- the ability to maintain sufficient liquidity and access capital markets;
- market and interest rate fluctuations;
- the strength of the global economy in general and the strength of the economies of the countries in which we conduct our operations, in particular the risk of a US or global economic downturn in 2008;
- the direct and indirect impacts of continuing deterioration of subprime and other real estate markets;
- further adverse rating actions by credit rating agencies in respect of structured credit products or other credit-related exposures or of monoline insurers;
- the ability of counterparties to meet their obligations to us;
- the effects of, and changes in, fiscal, monetary, trade and tax policies, and currency fluctuations;
- political and social developments, including war, civil unrest or terrorist activity;
- the possibility of foreign exchange controls, expropriation, nationalization or confiscation of assets in countries in which we conduct our operations;
- operational factors such as systems failure, human error, or the failure to implement procedures properly;
- actions taken by regulators with respect to our business and practices in one or more of the countries in which we conduct our operations;
- the effects of changes in laws, regulations or accounting policies or practices;
- competition in geographic and business areas in which we conduct our operations;
- the ability to retain and recruit qualified personnel;
- the ability to maintain our reputation and promote our brand;
- the ability to increase market share and control expenses;

Edgar Filing: CREDIT SUISSE //FI - Form 6-K

technological changes;

the timely development and acceptance of our new products and services and the perceived overall value of these products and services by users;

acquisitions, including the ability to integrate acquired businesses successfully, and divestitures, including the ability to sell non-core assets;

the adverse resolution of litigation and other contingencies; and

our success at managing the risks involved in the foregoing.

We caution you that the foregoing list of important factors is not exclusive. When evaluating forward-looking statements, you should carefully consider the foregoing factors and other uncertainties and events, as well as the information set forth in our Form 20-F Item 3 Key Information Risk Factors.

This press release contains non-GAAP financial information. Information needed to reconcile such non-GAAP financial information to the most directly comparable measures under GAAP can be found in the Credit Suisse Financial Report 1Q08.

Cautionary statement

Cautionary statement regarding forward-looking and non-GAAP information

This presentation contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995.

Forward-looking statements involve inherent risks and uncertainties, and we might not be able to achieve the predictions, forecasts, projections and other outcomes we describe or imply in forward-looking statements.

A number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions we express in these forward-looking statements, including those we identify in "Risk Factors" in our Annual Report on Form 20-F for the fiscal year ended December 31, 2007 filed with the US Securities and Exchange Commission, and in other public filings and press releases.

We do not intend to update these forward-looking statements except as may be required by applicable laws.

This presentation contains non-GAAP financial information. Information needed to reconcile such non-GAAP financial information to the most directly comparable measures under GAAP can be found in Credit Suisse Group's first quarter report 2008.

Leveraged finance portfolio analysis

Portfolio is largely with large-cap companies with stable cash flows, substantial assets and multi-billion dollar enterprise values

US bias reflects market leadership with financial sponsors / LBO deals

The largest 5 commitments represent 65% of the portfolio; remainder spread among 35 deals with an average size of CHF 205 m

Underwriting procedures require both market approval and independent credit sign-off

High proportion (73%) of exposure is senior secured lending

Little exposure to highly cyclical industries; no exposure to home building, retail or auto sector

Total exposure by geography

Asia

Slide 23

Commercial mortgage (CMBS) exposures

Gross exposure reduced by 25% to
CHF 19.3 bn during 1Q08

All positions carried at fair value, taking into
consideration prices for cash trading and
relevant indices (e.g. CMBX), as well as
specific asset fundamentals

Gross writedowns of CHF 1.3 bn in 1Q08

Portfolio breakdown remains similar to 4Q07
with good LTV protection, sector selection,
and geographic diversification

Significant amount of mortgage-related credit
hedges in place

CDO trading exposures and portfolio analysis

1) Positions related to US subprime; portion of exposure increase in early 1Q08 (Dec to Feb) was due to updated sensitivity estimates for certain CDO positions

2) Cash CDO trading includes hedge positions

Significant writedowns during the quarter

P&L remained negative in March, as trading conditions deteriorated further

Largest driver was continued stress on basis risks as the hedging relationships between long and short positions widened significantly due to market stress (e.g. funded long positions vs. CDS hedges)

Some initial progress made in cutting exposures in March

Overall Risk Trends

ERC: A broad measure of CS exposure, covering credit, market & investment risks

Trend chart at right shows reductions in overall CS risk in recent quarters.

ERC is down 17% vs. pre-crisis peak in 3Q07 (esp. in Leveraged Finance, CMBS)

VaR: Nominal figures remain high due to volatile data from recent market conditions

Size of trading positions remains consistent with previous sizing when data effect is adjusted (see chart)

P&L volatility in 1Q08 continued to be high, and produced a number of back-testing exceptions in the period

Not used for crisis management

Slide 29

Summary

Market conditions deteriorated in 1Q08, including significant dislocations in hedging relationships

Significant valuation reductions in 1Q08 across key exposure areas;
Credit Suisse maintained full mark to market disciplines

Credit performance remains strong

Significant hedge portfolio

Good reduction in key exposure areas continued in 1Q08

Risk levels being rebalanced to level appropriate for current market conditions
