Notes to Unaudited Interim Consolidated Financial Statements

Note 1 - Significant Accounting Policies

Business Operations

The accompanying unaudited interim consolidated financial statements of Synovus include the accounts of the Parent Company and its consolidated subsidiaries. Synovus provides integrated financial services, including commercial and retail banking, financial management, insurance, and mortgage services to its customers through locally-branded divisions of its wholly-owned subsidiary bank, Synovus Bank, in offices located throughout Georgia, Alabama, South Carolina, Florida, and Tennessee.

In addition to our banking operations, we also provide various other financial services to our customers through direct and indirect wholly-owned non-bank subsidiaries, including: Synovus Securities, Inc., headquartered in Columbus, Georgia, which specializes in professional portfolio management for fixed-income securities, investment banking, the execution of securities transactions as a broker/dealer and the provision of individual investment advice on equity and other securities; Synovus Trust Company, N.A., headquartered in Columbus, Georgia, which provides trust, asset management and financial planning services; and Synovus Mortgage Corp., headquartered in Birmingham, Alabama, which offers mortgage services.

Basis of Presentation

The accompanying unaudited interim consolidated financial statements have been prepared in accordance with the instructions to the SEC Form 10-Q and Article 10 of Regulation S-X; therefore, they do not include all information and footnotes necessary for a fair presentation of financial position, results of operations, comprehensive income, and cash flows in conformity with GAAP. All adjustments consisting of normally recurring accruals that, in the opinion of management, are necessary for a fair presentation of the consolidated financial position and results of operations for the periods covered by this Report have been included. The accompanying unaudited interim consolidated financial statements should be read in conjunction with the consolidated financial statements and related notes appearing in Synovus' 2013 Form 10-K. There have been no significant changes to the accounting policies as disclosed in Synovus' 2013 Form 10-K.

In preparing the unaudited interim consolidated financial statements in accordance with GAAP, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities as of the date of the respective consolidated balance sheets and the reported amounts of revenues and expenses for the periods presented. Actual results could differ significantly from those estimates.

Material estimates that are particularly susceptible to significant change relate to the determination of the allowance for loan losses; the valuation of other real estate; the fair value of investment securities; the fair value of private equity investments; the valuation of deferred tax assets; and contingent liabilities related to legal matters.

Cash and Cash Equivalents

Cash and cash equivalents consist of cash and due from banks. At March 31, 2014 and December 31, 2013, cash and cash equivalents included \$79.4 million and \$104.9 million, respectively, on deposit to meet Federal Reserve Bank requirements. At both March 31, 2014 and December 31, 2013, \$375 thousand of the due from banks balance was restricted as to withdrawal.

Short-term Investments

Short-term investments consist of interest bearing funds with the Federal Reserve Bank, interest earning deposits with banks, and Federal funds sold and securities purchased under resale agreements. Interest earning deposits with banks include \$9.6 million and \$11.1 million at March 31, 2014 and December 31, 2013, respectively, which is pledged as collateral in connection with certain letters of credit. Federal funds sold include \$72.4 million at March 31, 2014 and \$72.2 million at December 31, 2013, which are pledged to collateralize certain derivative instruments. Federal funds sold and securities purchased under resale agreements, and Federal funds purchased and securities sold under repurchase agreements, generally mature in one day.

Table of Contents

Recently Adopted Accounting Standards Updates

Effective January 1, 2014, Synovus adopted the provisions of ASU 2013-11, Income Taxes (Topic 740): Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists. This ASU provides guidance on financial statement presentation of an unrecognized tax benefit when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists. Income tax accounting guidance did not explicitly address how to present unrecognized tax benefits when a company also has net operating losses or tax credit carryforwards. Previously, most companies presented these unrecognized benefits as a liability (i.e., gross presentation), but some presented the liability as a reduction of their net operating losses or tax credit carryforwards (i.e., net presentation). To address this diversity in practice, the FASB issued ASU 2013-11, requiring unrecognized tax benefits to be offset against a deferred tax asset for a net operating loss carryforward, similar tax loss, or tax credit carryforward except when either (1) a net operating loss carryforward, a similar tax loss, or a tax credit carryforward is not available as of the reporting date under the governing tax law to settle taxes that would result from the disallowance of the tax position, or (2) the entity does not intend to use the deferred tax asset for this purpose (provided that the tax law permits a choice). If either of these conditions exists, an entity should present an unrecognized tax benefit in the financial statements as a liability and should not net the unrecognized tax benefit with a deferred tax asset. Synovus adopted the provisions of ASU 2013-11 effective January 1, 2014. However, because prior to adoption Synovus already presented its unrecognized tax benefits as a reduction of its net operating losses, adoption of ASU 2013-11 did not have a significant impact on its consolidated balance sheet.

Reclassifications

Prior periods' consolidated financial statements are reclassified whenever necessary to conform to the current period's presentation.

Subsequent Events

Synovus has evaluated for consideration, or disclosure, all transactions, events, and circumstances, subsequent to the date of the consolidated balance sheet and through the date the accompanying unaudited interim consolidated financial statements were issued, and has reflected, or disclosed, those items deemed appropriate within the unaudited interim consolidated financial statements.

Note 2 - Subsequent Event - Reverse Stock Split and Increase in Number of Authorized Common Shares

On April 24, 2014, at Synovus' 2014 Annual Shareholders' Meeting ("Annual Meeting"), Synovus' shareholders approved a proposal authorizing Synovus' Board of Directors to effect a one-for-seven reverse stock split of Synovus' common stock. Following the Annual Meeting, Synovus' Board of Directors authorized the one-for-seven reverse stock split. The reverse stock split will become effective on May 16, 2014, and Synovus' shares of common stock will begin trading on a post-split basis on the New York Stock Exchange (NYSE) at the opening of trading on May 19, 2014. Share and per share amounts included in this Report have not been restated to reflect the approval of the one-for-seven reverse stock split because the split will not be effective until after the filing of this Report.

Pro forma share and per share information as of and for the three months ended March 31, 2014, giving effect to the one-for-seven reverse stock split is presented below:

	As of and for the three months ended March 31, 2014	
	As Reported	Pro Forma
Common stock - \$1.00 par value. Outstanding shares	972,806,269	138,972,324
Net income per common share, diluted	\$0.05	\$0.33

Additionally, on April 24, 2014, Synovus' shareholders also approved an amendment to Synovus' articles of incorporation to increase the number of authorized shares of Synovus' common stock from 1.2 billion shares to 2.4 billion shares. Synovus effected the increase in the number of authorized shares on April 24, 2014. Upon the effective date of the reverse stock split, the number of Synovus' authorized shares of common stock will be proportionately reduced from 2.4 billion shares to 342.9 million shares.

Note 3 - Sale of Branches

On January 17, 2014, Synovus completed the sale of certain loans, premises, deposits, and other assets and liabilities of the Memphis, Tennessee operations of Trust One Bank, a division of Synovus Bank. The sale included \$89.6 million in total

8

loans and \$191.3 million in total deposits. Results for the three months ended March 31, 2014 reflect a pre-tax gain, net of associated costs, of \$5.8 million relating to this transaction.

Note 4 - Investment Securities

The amortized cost, gross unrealized gains and losses, and estimated fair values of investment securities available for sale at March 31, 2014 and December 31, 2013 are summarized below.

(in thousands)	March 31, 2014			
	Amortized Cost ⁽¹⁾	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value

(1) Amortized cost is adjusted for other-than-temporary impairment charges in 2014 and 2013, which have been recognized in the consolidated statements of income in the applicable year, and were considered inconsequential. At March 31, 2014 and December 31, 2013, investment securities with a carrying value of \$2.14 billion and \$2.33 billion respectively, were pledged to secure certain deposits and securities sold under repurchase agreements as required by law and contractual agreements.

Synovus has reviewed investment securities that are in an unrealized loss position as of March 31, 2014 and December 31, 2013 for OTTI and does not consider any securities in an unrealized loss position to be

other-than-temporarily impaired. If Synovus intended to sell a security in an unrealized loss position, the entire unrealized loss would be reflected in income. Synovus does not intend to sell investment securities in an unrealized loss position prior to the recovery of the unrealized loss, which may be until maturity, and has the ability and intent to hold those securities for that period of time. Additionally, Synovus is not currently aware of any circumstances which will require it to sell any of the securities that are in an unrealized loss position.

9

Table of Contents

Declines in the fair value of available for sale securities below their cost that are deemed to have OTTI are reflected in earnings as realized losses to the extent the impairment is related to credit losses. The amount of the impairment related to other factors is recognized in other comprehensive income. Currently, unrealized losses on debt securities are attributable to increases in interest rates on comparable securities from the date of purchase. Synovus regularly evaluates its investment securities portfolio to ensure

that there are no conditions that would indicate that unrealized losses represent OTTI. These factors include the length of time the security has been in a loss position, the extent that the fair value is below amortized cost, and the credit standing of the issuer. As of March 31, 2014 there were 71 securities in a loss position for less than twelve months and 5 securities in a loss position for more than 12 months.

Gross unrealized losses on investment securities and the fair value of the related securities, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position, at March 31, 2014 and December 31, 2013, are presented below.

Table of Contents

The amortized cost and fair value by contractual maturity of investment securities available for sale at March 31, 2014 are shown below. The expected life of mortgage-backed securities or CMOs may differ from contractual maturities because issuers may have the right to call or prepay obligations with or without call or prepayment penalties. For purposes of the maturity table, mortgage-backed securities and CMOs, which are not due at a single maturity date, have been classified based on the final contractual maturity date.

Note 5 - Restructuring Charges

For the three months ended March 31, 2014 and 2013 total restructuring charges are as follows:

(in thousands)	Three Months Ended March 31,	
	2014	2013
Severance charges	\$8,047	4,877
Professional fees and other charges	530	(27
Total restructuring charges	\$8,577	4,850

In January 2014, Synovus announced the planned implementation during 2014 of new expense savings initiatives which are expected to result in annualized cost savings of \$30 million. The initiatives include planned workforce reductions as well as planned reductions in occupancy expenses. Synovus began to implement these initiatives during the first quarter of 2014, undertaking the first targeted staff reductions. As a result of these actions, Synovus recorded aggregate restructuring charges of \$8.6 million during the three months ended March 31, 2014, consisting primarily of \$8.0 million in severance charges related to employees identified for involuntary termination. These termination benefits are provided under an ongoing benefit arrangement as defined in ASC 712,

Compensation-Nonretirement Postemployment Benefits; accordingly, the charges were recorded pursuant to the liability recognition criteria of ASC 712.

Severance charges recorded during the three months ended March 31, 2013 relate to involuntary terminations in connection with previously announced efficiency initiatives. These termination benefits were provided under a one-time benefit arrangement as defined in ASC 420, Exit or Disposal Costs or Obligations; accordingly, the charges were recorded pursuant to the liability recognition criteria of ASC 420.

At March 31, 2014, the liability for restructuring activities was \$7.8 million, and consisted primarily of involuntary termination benefits (accounted for in accordance with ASC 712) which are expected to be paid in lump sums during the remainder of 2014.

Table of Contents

The credit quality of the loan portfolio is summarized no less frequently than quarterly using the standard asset classification system utilized by the federal banking agencies. These classifications are divided into three groups – Not Criticized (Pass), Special Mention, and Classified or Adverse rating (Substandard, Doubtful, and Loss) and are defined as follows:

Pass - loans which are well protected by the current net worth and paying capacity of the obligor (or guarantors, if any) or by the fair value, less cost to acquire and sell in a timely manner, of any underlying collateral.

Special Mention - loans which have potential weaknesses that deserve management's close attention. These loans are not adversely classified and do not expose an institution to sufficient risk to warrant an adverse classification.

Substandard - loans which are inadequately protected by the current net worth and paying capacity of the obligor or by the collateral pledged, if any. Loans with this classification are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

Doubtful - loans which have all the weaknesses inherent in loans classified as Substandard with the added characteristic that the weaknesses make collection or liquidation in full highly questionable and improbable on the basis of currently known facts, conditions, and values.

Loss - loans which are considered by management to be uncollectible and of such little value that their continuance on the institution's books as an asset, without establishment of a specific valuation allowance or charge-off is not warranted.

In the following tables, retail loans and small business loans are generally assigned a risk grade similar to the classifications described above; however, upon reaching 90 days and 120 days past due, they are generally downgraded to Substandard and Loss, respectively, in accordance with the FFIEC Uniform Retail Credit Classification and Account Management Policy. Additionally, in accordance with the Interagency Supervisory Guidance on Allowance for Loan and Lease Losses Estimation Practices for Loans and Lines of Credit Secured by Junior Liens on 1-4 Family Residential Properties, the risk grade classifications of retail loans (home equity lines and consumer mortgages) secured by junior liens on 1-4 family residential properties also consider available information on the payment status of the associated senior lien with other financial institutions.

(1) Includes \$351.9 million and \$384.0 million of non-accrual Substandard loans at March 31, 2014 and December 31, 2013, respectively.

(2) The loans within this risk grade are on non-accrual status and have an allowance for loan losses equal to 50% of the loan amount.

(3) The loans within this risk grade are on non-accrual status and have an allowance for loan losses equal to the full loan amount.

⁽⁴⁾ Represent amounts that were 120 days past due. These credits are downgraded to the Loss category with an allowance for loan losses equal to the full loan amount and are generally charged off upon reaching 181 days past due in accordance with the FFIEC Uniform Retail Credit Classification and Account Management Policy.

⁽⁵⁾ Total before net deferred fees and costs of \$28.4 million.

⁽⁶⁾ Total before net deferred fees and costs of \$28.9 million.

Table of Contents

The following table details the changes in the allowance for loan losses by loan segment for the three months ended March 31, 2014 and 2013.

⁽¹⁾Total before net deferred fees and costs of \$28.4 million.

⁽²⁾Total before net deferred fees and costs of \$21.6 million.

During the first quarter of 2014, Synovus designated \$23.0 million of allowance for loan losses that was included in the unallocated component of the allowance for loan losses at December 31, 2013 to the allowance for loan losses allocated to the respective loan segments. The allocation of the allowance for loan losses to the loan segments related to the qualitative factors evaluated at December 31, 2013 on a total loan portfolio basis and included in the unallocated component of the allowance for loan losses at December 31, 2013. These qualitative factors consider the inherent risk of loss relating to the following:

- Experience, ability, and depth of lending management, loan review personnel, and other relevant staff
- National and local economic trends and conditions
- Underlying value of collateral dependent loans, which impacts trends in charge-offs and recoveries that are not included in the expected loss factors
- Trends in volume and terms of loans
- Effects of changes in credit concentrations
- Model uncertainty

Management determined that prospectively the assessment of these qualitative factors for each loan segment would improve the overall level of precision of the allowance for loan loss estimation process. The designation of this component of the unallocated allowance to the allocated allowance did not result in a change to the total allowance for loan losses or

Table of Contents

provision expense during the first quarter of 2014. The allowance for loan losses continues to consist of an allocated component (which includes the qualitative factors noted above as well as the qualitative factors disclosed in the 2013 Form 10-K) and an unallocated component. Effective March 31, 2014, the unallocated component relates to risk elements, if any, which are not already included in the allocated allowance.

The average recorded investment in impaired loans was \$984.5 million for the three months ended March 31, 2013. Excluding accruing TDRs, there was no interest income recognized for the investment in impaired loans for the three months ended March 31, 2013. Interest income recognized for accruing TDRs was \$5.5 million for the three months ended March 31, 2013. At March 31,

Table of Contents

2014, and 2013, all impaired loans other than \$495.4 million and \$623.9 million, respectively, of accruing TDRs, were on non-accrual status.

Concessions provided in a TDR are primarily in the form of providing a below market interest rate given the borrower's credit risk, a period of time generally less than one year with a reduction of required principal and/or interest payments (e.g., interest only for a period of time), or extension of the maturity of the loan generally for less than one year. Insignificant periods of reduction of principal and/or interest payments, or one time deferrals of 3 months or less, are generally not considered to be financial concessions.

The following tables represent, by concession type, the post-modification balance for loans modified or renewed during the three months ended March 31, 2014 and 2013, respectively, that were reported as accruing or non-accruing TDRs.

Total retail	—	—	11	753
Total TDRs	2	\$708	17	\$15,344

⁽¹⁾ Default is defined as the earlier of the troubled debt restructuring being placed on non-accrual status or reaching 90 days past due with respect to principal and/or interest payments.

⁽²⁾ Amounts related to loans modified or renewed into TDRs within 12 months of the default date that subsequently defaulted during the three months ended March 31, 2013 were previously disclosed as 29 contracts with a recorded investment totaling \$19.4 million. These amounts were revised in the table above due to a re-evaluation of the defaulted status of certain loans during this period.

If, at the time a loan was designated as a TDR, the loan was not already impaired, the measurement of impairment that resulted from the TDR designation changes from a general pool-level reserve to a specific loan measurement of impairment in accordance with ASC 310-10-35. Generally, the change in the allowance for loan losses resulting from such TDR designation is not significant. At March 31, 2014, the allowance for loan losses allocated to accruing TDRs totaling \$495.4 million was \$24.9 million compared to accruing TDRs of \$623.9 million with an allocated allowance for loan losses of \$38.9 million at March 31, 2013. Non-accrual, non-homogeneous loans (commercial-type impaired loans greater than \$1 million) that are designated as TDRs, are individually measured for the amount of impairment, if any, both before and after the TDR designation.

Note 7 - Other Real Estate

ORE consists of properties obtained through a foreclosure proceeding or through an in-substance foreclosure in satisfaction of loans. In accordance with provisions of ASC 310-10-35 regarding subsequent measurement of loans for impairment and ASC 310-40-15 regarding accounting for troubled debt restructurings by a creditor, a loan is classified as an in-substance foreclosure when Synovus has taken possession of the collateral regardless of whether formal foreclosure proceedings have taken place.

At foreclosure, ORE is recorded at the lower of cost or fair value less the estimated cost to sell, which establishes a new cost basis. Subsequent to foreclosure, ORE is evaluated quarterly and reported at fair value less estimated costs to sell, not to exceed the new cost basis, determined on the basis of current appraisals, comparable sales, and other estimates of fair value obtained principally from independent sources, adjusted for estimated selling costs.

Management also considers other factors or recent developments such as changes in absorption rates or market conditions from the time of valuation and anticipated sales values considering management's plans for disposition,

which could result in an adjustment to lower the collateral value estimates indicated in the appraisals. At the time of foreclosure or initial possession of collateral, any excess of the loan balance over the fair value of the real estate held as collateral, less costs to sell, is recorded as a charge against the allowance for loan losses. Revenue and expenses from ORE operations as well as gains or losses on sales are recorded as foreclosed real estate expense, net, a component of non-interest expense on the consolidated statements of income. Subsequent declines in fair value are recorded on a property-by-property basis through use of a valuation allowance within other real estate on the consolidated balances sheets and valuation adjustment account in foreclosed real estate expense, net, a component of non-interest expense on the consolidated statements of income.

The carrying value of ORE was \$110.8 million and \$112.6 million at March 31, 2014 and December 31, 2013, respectively. During the three months ended March 31, 2014 and 2013, \$12.9 million and \$31.2 million, respectively, of loans and other loans held for sale were foreclosed and transferred to other real estate at fair value. During the three months ended March 31, 2014 and

Table of Contents

2013, Synovus recognized foreclosed real estate expense, net, of \$5.7 million and \$10.9 million, respectively. These expenses included write-downs for declines in fair value of ORE subsequent to the date of foreclosure and net realized losses resulting from sales transactions totaling \$4.8 million and \$8.8 million for the three months ended March 31, 2014 and 2013, respectively.

Note 8 - Other Comprehensive Income (Loss)

The following table illustrates activity within the balances in accumulated other comprehensive income (loss) by component, and is shown for the three months ended March 31, 2014 and 2013.

Changes in Accumulated Other Comprehensive Income (Loss) by Component (Net of Income Taxes)

(in thousands)	Net unrealized gains (losses) on cash flow hedges	Net unrealized gains (losses) on investment securities available for sale	Post-retirement unfunded health benefit	Total
Balance as of December 31, 2013	\$(13,099)	(28,936)	777	(41,258)
Other comprehensive income (loss) before reclassifications	—	11,588	—	11,588
Amounts reclassified from accumulated other comprehensive income (loss)	69	(818)	(44)	(793)
Net current period other comprehensive income (loss)	69	10,770	(44)	10,795
Balance as of March 31, 2014	\$(13,030)	(18,166)	733	(30,463)

Changes in Accumulated Other Comprehensive Income (Loss) by Component (Net of Income Taxes)

(in thousands)	Net unrealized gains (losses) on cash flow hedges	Net unrealized gains (losses) on investment securities available for sale	Post-retirement unfunded health benefit	Total
Balance as of December 31, 2012	\$(13,373)	17,111	363	4,101
Other comprehensive income (loss) before reclassifications	—	(1,331)	—	(1,331)
Amounts reclassified from accumulated other comprehensive income (loss)	69	(29)	(23)	17
Net current period other comprehensive income (loss)	69	(1,360)	(23)	(1,314)
Balance as of March 31, 2013	\$(13,304)	15,751	340	2,787

In accordance with ASC 740-20-45-11(b), a deferred tax asset valuation allowance associated with unrealized gains and losses not recognized in income is charged directly to other comprehensive income (loss). Thus, during the years 2010 and 2011, Synovus recorded a deferred tax asset valuation allowance associated with unrealized gains and losses not recognized in income directly to other comprehensive income (loss) by applying the portfolio approach for allocation of the valuation allowance. Synovus has consistently applied the portfolio approach which treats derivative financial instruments, equity securities, and debt securities as a single portfolio. As of March 31, 2014, the ending balance in net unrealized gains (losses) on cash flow hedges and net unrealized gains (losses) on investment securities available for sale includes unrealized losses of \$12.1 million and \$13.3 million, respectively, related to the residual tax effects remaining in OCI due to the previously established deferred tax asset valuation allowance. Under the portfolio approach, these unrealized losses are realized at the time the entire portfolio is sold or disposed.

Table of Contents

The following table illustrates activity within the reclassifications out of accumulated other comprehensive income (loss), for the three months ended March 31, 2014 and 2013.

Note 9 - Fair Value Accounting

Synovus carries various assets and liabilities at fair value based on the fair value accounting guidance under ASC 820 and ASC 825. Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an "exit price") in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date.

Synovus has implemented controls and processes for the determination of the fair value of financial instruments. The ultimate responsibility for the determination of fair value rests with Synovus. Synovus has established a process that has been designed to ensure there is an independent review and validation of fair values by a function independent of those entering into the transaction. This includes specific controls to ensure consistent pricing policies and procedures that incorporate verification for both market and derivative transactions. For all financial instruments where fair values are determined by reference to externally quoted prices or observable pricing inputs to models, independent price determination or validation is utilized. Where the market

Table of Contents

for a financial instrument is not active, fair value is determined using a valuation technique or pricing model. These valuation techniques and models involve a degree of estimation, the extent of which depends on each instrument's complexity and the availability of market-based data.

The most frequently applied pricing model and valuation technique utilized by Synovus is the discounted cash flow model. Discounted cash flows determine the value by estimating the expected future cash flows from assets or liabilities discounted to their present value. Synovus may also use a relative value model to determine the fair value of a financial instrument based on the market prices of similar assets or liabilities or an option pricing model such as binomial pricing that includes probability-based techniques. Assumptions and inputs used in valuation techniques and models include benchmark interest rates, credit spreads and other inputs used in estimating discount rates, bond and equity prices, price volatilities and correlations, prepayment rates, probability of default, and loss severity upon default.

Synovus refines and modifies its valuation techniques as markets develop and as pricing for individual financial instruments become more or less readily available. While Synovus believes its valuation techniques are appropriate and consistent with other market participants, the use of different methodologies or assumptions could result in different estimates of fair value at the balance sheet date. In order to determine the fair value, where appropriate, management applies valuation adjustments to the pricing information. These adjustments reflect management's assessment of factors that market participants would consider in setting a price, to the extent that these factors have not already been included in the pricing information. Furthermore, on an ongoing basis, management assesses the appropriateness of any model used. To the extent that the price provided by internal models does not represent the fair value of the financial instrument, management makes adjustments to the model valuation to calibrate it to other available pricing sources. Where unobservable inputs are used, management may determine a range of possible valuations based upon differing stress scenarios to determine the sensitivity associated with the valuation. As a final step, management considers the need for further adjustments to the modeled price to reflect how market participants would price the financial instrument.

Fair Value Hierarchy

Synovus determines the fair value of its financial instruments based on the fair value hierarchy established under ASC 820-10, which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the financial instrument's fair value measurement in its entirety. There are three levels of inputs that may be used to measure fair value. The three levels of inputs of the valuation hierarchy are defined below:

- Level 1 Quoted prices (unadjusted) in active markets for identical assets and liabilities for the instrument or security to be valued. Level 1 assets include marketable equity securities as well as U.S. Treasury securities that are highly liquid and are actively traded in over-the-counter markets.
- Level 2 Observable inputs other than Level 1 quoted prices, such as quoted prices for similar assets and liabilities in active markets, quoted prices in markets that are not active or model-based valuation techniques for which all significant assumptions are derived principally from or corroborated by observable market data. Level 2 assets and liabilities include debt securities with quoted prices that are traded less frequently than exchange-traded instruments and derivative contracts whose value is determined by using a pricing model with inputs that are observable in the market or can be derived principally from or corroborated by observable market data. U.S. Government sponsored agency securities, mortgage-backed securities issued by U.S. Government sponsored enterprises and agencies, obligations of states and municipalities, collateralized mortgage obligations issued by U.S. Government sponsored enterprises, and mortgage loans held-for-sale are generally included in this category. Certain private equity investments that invest in publicly traded companies are also considered Level 2 assets.
- Level 3 Unobservable inputs that are supported by little, if any, market activity for the asset or liability. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow models and similar techniques, and may also include the use of market prices of assets or liabilities that are not directly comparable to the subject asset or liability. These methods of

valuation may result in a significant portion of the fair value being derived from unobservable assumptions that reflect Synovus' own estimates for assumptions that market participants would use in pricing the asset or liability. This category primarily includes collateral-dependent impaired loans, other real estate, certain equity investments, and certain private equity investments.

Fair Value Option

Synovus has elected the fair value option for mortgage loans held for sale primarily to ease the operational burdens required to maintain hedge accounting for these loans. Synovus is still able to achieve effective economic hedges on mortgage loans held for sale without the operational time and expense needed to manage a hedge accounting program.

Table of Contents

Valuation Methodology by Product

Following is a description of the valuation methodologies used for the major categories of financial assets and liabilities measured at fair value.

Trading Account Assets and Investment Securities Available-for-Sale

The fair values of trading securities and investment securities available for sale are primarily based on actively traded markets where prices are based on either quoted market prices or observed transactions. Management employs independent third-party pricing services to provide fair value estimates for Synovus' investment securities available for sale and trading securities. Fair values for fixed income investment securities are typically determined based upon quoted market prices, broker/dealer quotations for identical or similar securities, and/or inputs that are observable in the market, either directly or indirectly, for substantially similar securities. Level 1 securities are typically exchange quoted prices and include financial instruments such as U.S. Treasury securities, equity securities, and mutual fund investments. Level 2 securities are typically matrix priced by the third-party pricing service to calculate the fair value. Such fair value measurements consider observable data such as relevant broker/dealer quotes, market spreads, cash flows, yield curves, live trading levels, trade execution data, market consensus prepayments speeds, credit information, and the respective terms and conditions for debt instruments. The types of securities classified as Level 2 within the valuation hierarchy primarily consist of collateralized mortgage obligations, mortgage-backed securities, debt securities of U.S. Government-sponsored enterprises and agencies, corporate debt, and state and municipal securities.

When there is limited activity or less transparency around inputs to valuation, Synovus develops valuations based on assumptions that are not readily observable in the marketplace; these securities are classified as Level 3 within the valuation hierarchy. The majority of the balance of Level 3 investment securities available for sale consists primarily of trust preferred securities issued by financial institutions. Synovus also carries non-marketable common equity securities within this category. Synovus accounts for the non-marketable common equity securities in accordance with ASC 325-20, which requires these investments to be carried at cost. To determine the fair value of the trust preferred securities, management uses a measurement technique to reflect one that utilizes credit spreads and/or credit indices available from a third-party pricing service. In addition, for each trust preferred security, management projects non-credit adjusted cash flows, and discounts those cash flows to net present value incorporating a relevant credit spread in the discount rate. Other inputs to calculating fair value include potential discounts for lack of marketability. Management uses various validation procedures to confirm the prices received from pricing services and quotations received from dealers are reasonable. Such validation procedures include reference to relevant broker/dealer quotes or other market quotes and a review of valuations and trade activity of comparable securities. Consideration is given to the nature of the quotes (e.g., indicative or firm) and the relationship of recently evidenced market activity to the prices provided by the third-party pricing service. Further, management also employs the services of an additional independent pricing firm as a means to verify and confirm the fair values of the primary independent pricing firms.

Mortgage Loans Held for Sale

Synovus elected to apply the fair value option for mortgage loans originated with the intent to sell to investors. When quoted market prices are not available, fair value is derived from a hypothetical bulk sale model used to estimate the exit price of the loans in a loan sale. The bid pricing convention is used for loan pricing for similar assets. The valuation model is based upon forward settlements of a pool of loans of identical coupon, maturity, product, and credit attributes. The inputs to the model are continuously updated with available market and historical data. As the loans are sold in the secondary market and predominantly used as collateral for securitizations, the valuation model represents the highest and best use of the loans in Synovus' principal market. Mortgage loans held for sale are classified within Level 2 of the valuation hierarchy.

Private Equity Investments

Private equity investments consist primarily of equity method investments in venture capital funds, which are primarily classified as Level 3 within the valuation hierarchy. The valuation of these investments requires significant management judgment due to the absence of quoted market prices, inherent lack of liquidity, and the long-term nature of such assets. Based on these factors, the ultimate realizable value of these investments could differ significantly from the value reflected in the accompanying unaudited interim consolidated financial statements. For ownership in

publicly traded companies held in the funds, valuation is based on the closing market price at the balance sheet date, and the valuation of marketable securities that have market restrictions is discounted until the securities can be freely traded. The private equity investments in which Synovus holds a limited partner interest consist of funds that invest in privately held companies. For privately held companies in the funds, the general partner estimates the fair value of the company in accordance with GAAP as clarified by ASC 820 and guidance specific to investment companies. The estimated fair value of the company is the estimated fair value as an exit price the fund would receive if it were to sell the company in the marketplace. The fair value of the fund's underlying investments is estimated through the use of valuation models such as option pricing or a discounted cash flow model. Valuation factors, such as a company's operational performance against budget or milestones, last price paid by investors, with consideration given on whether financing is provided

Table of Contents

by insiders or unrelated new investors, public market comparables, liquidity of the market, industry and economic trends, and change of management or key personnel, are used in the determination of fair value.

Also, Synovus holds an interest in an investment fund that invests in publicly traded financial services companies. Although the fund holds investments in publicly traded entities, the fair value of this investment is classified as Level 2 in the valuation hierarchy because there is no actively traded market for the fund itself, and the value of the investment is based on the aggregate fair value of the publicly traded companies that are held in the fund for investment.

Investments Held in Rabbi Trusts

The investments held in Rabbi Trusts primarily include mutual funds that invest in equity and fixed income securities. Shares of mutual funds are valued based on quoted market prices, and are therefore classified within Level 1 of the fair value hierarchy.

Salary Stock Units

Salary stock units represent fully vested stock awards that have been granted to certain key employees of Synovus. The salary stock units are classified as liabilities and are settled in cash, as determined by the closing Common Stock price on the date of settlement and the number of salary stock units being settled. Accordingly, salary stock units are classified as Level 1 within the fair value hierarchy.

Derivative Assets and Liabilities

As part of its overall interest rate risk management activities, Synovus utilizes derivative instruments to manage its exposure to various types of interest rate risk. With the exception of one derivative contract discussed herein, Synovus' derivative financial instruments are all Level 2 financial instruments. The majority of derivatives entered into by Synovus are executed over-the-counter and consist of interest rate swaps. The fair values of these derivative instruments are determined based on an internally developed model that uses readily observable market data, as quoted market prices are not available for these instruments. The valuation models and inputs depend on the type of derivative and the nature of the underlying instrument, and include interest rates, prices and indices to generate continuous yield or pricing curves, volatility factors, and customer credit related adjustments. The principal techniques used to model the value of these instruments are an income approach, discounted cash flows, Black-Scholes or binomial pricing models. The sale of TBA mortgage-backed securities for current month delivery or in the future and the purchase of option contracts of similar duration are derivatives utilized by Synovus' mortgage banking subsidiary, and are valued by obtaining prices directly from dealers in the form of quotes for identical securities or options using a bid pricing convention with a spread between bid and offer quotations. Interest rate swaps, floors, caps and collars, and TBA mortgage-backed securities are classified as Level 2 within the valuation hierarchy.

Synovus' mortgage banking subsidiary enters into interest rate lock commitments related to expected funding of residential mortgage loans at specified times in the future. Interest rate lock commitments that relate to the origination of mortgage loans that will be held-for-sale are considered derivative instruments under applicable accounting guidance. As such, Synovus records its interest rate lock commitments and forward loan sales commitments at fair value, determined as the amount that would be required to settle each of these derivative financial instruments at the balance sheet date. In the normal course of business, the mortgage subsidiary enters into contractual interest rate lock commitments to extend credit, if approved, at a fixed interest rate and with fixed expiration dates. The commitments become effective when the borrowers "lock-in" a specified interest rate within the time frames established by the mortgage banking subsidiary. Market risk arises if interest rates move adversely between the time of the interest rate lock by the borrower and the sale date of the loan to an investor. To mitigate the effect of the interest rate risk inherent in providing interest rate lock commitments to borrowers, the mortgage banking subsidiary enters into best efforts forward sales contracts with third party investors. The forward sales contracts lock in a price for the sale of loans similar to the specific interest rate lock commitments. Both the interest rate lock commitments to the borrowers and the forward sales contracts to the investors that extend through to the date the loan may close are derivatives, and accordingly, are marked to fair value through earnings. In estimating the fair value of an interest rate lock commitment, Synovus assigns a probability to the interest rate lock commitment based on an expectation that it will be exercised and the loan will be funded. The fair value of the interest rate lock commitment is derived from the fair value of related mortgage loans, which is based on observable market data and includes the expected net future cash

flows related to servicing of the loans. The fair value of the interest rate lock commitment is also derived from inputs that include guarantee fees negotiated with the agencies and private investors, buy-up and buy-down values provided by the agencies and private investors, and interest rate spreads for the difference between retail and wholesale mortgage rates. Management also applies fall-out ratio assumptions for those interest rate lock commitments for which we do not close a mortgage loan. The fall-out ratio assumptions are based on the mortgage subsidiary's historical experience, conversion ratios for similar loan commitments, and market conditions. While fall-out tendencies are not exact predictions of which loans will or will not close, historical performance review of loan-level data provides the basis for determining the appropriate hedge ratios. In addition, on a periodic basis, the mortgage banking subsidiary performs analysis of actual rate lock fall-out experience to determine the sensitivity of the mortgage pipeline to interest rate changes from the date of the commitment through loan origination, and then period end, using applicable published mortgage-backed investment security prices. The expected fall-out ratios (or conversely the "pull-through" percentages) are applied to the determined fair value of the unclosed mortgage pipeline

Table of Contents

in accordance with GAAP. Changes to the fair value of interest rate lock commitments are recognized based on interest rate changes, changes in the probability that the commitment will be exercised, and the passage of time. The fair value of the forward sales contracts to investors considers the market price movement of the same type of security between the trade date and the balance sheet date. These instruments are defined as Level 2 within the valuation hierarchy.

In November 2009, Synovus sold certain Visa Class B shares to another Visa USA member financial institution. The sales price was based on the Visa stock conversion ratio in effect at the time for conversion of Visa Class B shares to Visa Class A unrestricted shares at a future date. In conjunction with the sale, Synovus entered into a derivative contract with the purchaser (the Visa derivative), which provides for settlements between the parties based upon a change in the ratio for conversion of Visa Class B shares to Visa Class A shares. The fair value of the Visa derivative is determined based on management's estimate of the timing and amount of the Covered Litigation settlement, and the resulting payments due to the counterparty under the terms of the contract. Since this estimation requires application of judgment in developing significant unobservable inputs, this derivative has been classified as Level 3 within the valuation hierarchy.

Table of Contents

Assets and Liabilities Measured at Fair Value on a Recurring Basis

The following table presents all financial instruments measured at fair value on a recurring basis as of March 31, 2014 and December 31, 2013, according to the valuation hierarchy included in ASC 820-10. For equity and debt securities, class was determined based on the nature and risks of the investments.

⁽¹⁾ Based on an analysis of the nature and risks of these investments, Synovus has determined that presenting these investments as a single asset class is appropriate.

⁽²⁾ Mortgage derivatives consist of customer interest rate lock commitments that relate to the potential origination of mortgage loans, which would be classified as held for sale and forward loan sales commitments with third party investors.

Fair Value Option

Edgar Filing: SYNOVUS FINANCIAL CORP - Form 10-Q

The following table summarizes the difference between the fair value and the unpaid principal balance of mortgage loans held for sale measured at fair value and the changes in fair value of these loans. Mortgage loans held for sale are initially measured at fair value with subsequent changes in fair value recognized in earnings. Changes in fair value were recorded as a component of mortgage banking income in the consolidated statements of income. An immaterial portion of these changes in fair value was attributable to changes in instrument-specific credit risk.

Changes in Fair Value Included in Net income

(in thousands)	For the Three Months Ended March	
	31, 2014	2013
Mortgage loans held for sale	\$725	(2,759)

Table of Contents

Mortgage Loans Held for Sale

(in thousands)	As of March 31, 2014	As of December 31, 2013
Fair value	\$50,390	45,384
Unpaid principal balance	49,224	44,943
Fair value less aggregate unpaid principal balance	\$1,166	441

Changes in Level 3 Fair Value Measurements

As noted above, Synovus uses significant unobservable inputs (Level 3) in determining the fair value of assets and liabilities classified as Level 3 in the fair value hierarchy. The table below includes a roll-forward of the amounts on the consolidated balance sheet for the three months ended March 31, 2014 and 2013 (including the change in fair value), for financial instruments of a material nature that are classified by Synovus within Level 3 of the fair value hierarchy and are measured at fair value on a recurring basis. Transfers between fair value levels are recognized at the end of the reporting period in which the associated changes in inputs occur. During the first quarter of 2014 and 2013, Synovus did not have any material transfers between levels in the fair value hierarchy.

Assets Measured at Fair Value on a Non-recurring Basis

From time to time, certain assets may be recorded at fair value on a non-recurring basis. These non-recurring fair value adjustments typically are a result of the application of lower of cost or fair value accounting or a write-down occurring during the period. For example, if the fair value of an asset in these categories falls below its cost basis, it is considered to be at fair value at the end of the period of the adjustment. The following table presents assets measured at fair value on a non-recurring basis as of the dates indicated for which there was a fair value adjustment during the period, according to the valuation hierarchy included in ASC 820-10.

(in thousands)	March 31, 2014				December 31, 2013			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total

Other assets held for sale	\$—	—	—	—	—	—	4,945	4,945

The following table presents fair value adjustments recognized for the three months ended March 31, 2014 and 2013 for the assets measured at fair value on a non-recurring basis.

(in thousands)	Three Months Ended March 31,	
	2014	2013
Impaired loans*	\$2,655	23,594
Other loans held for sale	303	4,250
Other real estate	2,637	5,792
Other assets held for sale	—	170

* Impaired loans that are collateral-dependent.

Collateral dependent impaired loans are evaluated for impairment in accordance with the provisions of ASC 310-10-35 using the fair value of the collateral less costs to sell. For loans measured using the estimated fair value of collateral securing these loans less costs to sell, fair value is generally determined based upon appraisals performed by a certified or licensed appraiser using inputs such as absorption rates, capitalization rates, and market comparables, adjusted for estimated selling costs. Management also considers other factors or recent developments, such as changes in absorption rates or market conditions from the time of valuation, and anticipated sales values considering management's plans for disposition, which could result in adjustments to the collateral value estimates indicated in the appraisals. Estimated costs to sell are based on actual amounts for similar assets. These measurements are classified as Level 3 within the valuation hierarchy. Collateral dependent impaired loans are reviewed and evaluated on at least a quarterly basis for additional impairment and adjusted accordingly based on the same factors identified above.

Loans are transferred to other loans held for sale at fair value when Synovus makes the determination to sell specifically identified loans. The fair value of the loans is primarily determined by analyzing the underlying collateral of the loan and the anticipated market prices of similar assets less estimated costs to sell, as well as consideration of the market for loan sales versus the sale of collateral. At the time of transfer, if the fair value is less than the carrying amount, the difference is recorded as a charge-off against the allowance for loan losses. Decreases in the fair value subsequent to the transfer, as well as gains/losses realized from sale of these loans, are recognized as gains/losses on other loans held for sale, net, as a component of non-interest expense on the consolidated statements of income.

ORE consists of properties obtained through a foreclosure proceeding or through an in-substance foreclosure in satisfaction of loans. The fair value of ORE is determined on the basis of current appraisals, comparable sales, and other estimates of fair value obtained principally from independent sources, adjusted for estimated selling costs. At foreclosure, ORE is recorded at the lower of cost or fair value less the estimated cost to sell, which establishes a new cost basis. Subsequent to foreclosure, ORE is evaluated quarterly and reported at fair value less estimated costs to sell, not to exceed the new cost basis, determined on the basis of current appraisals, comparable sales, and other estimates

of fair value obtained principally from independent sources, adjusted for estimated selling costs. In the determination of fair value subsequent to foreclosure, management also considers other factors of recent developments, such as changes in absorption rates or market conditions from the time of valuation, and anticipated sales values considering management's plans for disposition, which could result in an adjustment to lower the fair value estimates indicated in the appraisals. Internally adjusted valuations are considered Level 3 measurements as management uses assumptions that may not be observable in the market.

Table of Contents

Other assets held for sale consist of certain premises and equipment held for sale, including those related to efficiency initiatives discussed in "Note 5 - Restructuring Charges" of this Report. These assets are classified as held for sale and recorded at the lower of their amortized cost or fair value, less costs to sell, consistent with ASC 360-10. The fair value of these assets is determined primarily on the basis of appraisals or BOV, as circumstances warrant, adjusted for estimated selling costs. Both techniques engage licensed or certified professionals that use inputs such as absorption rates, capitalization rates, and market comparables; these valuations are considered Level 3 measurements since assumptions or inputs may not be observable in the market.

Quantitative Information about Level 3 Fair Value Measurements

The tables below provide an overview of the valuation techniques and significant unobservable inputs used in those techniques to measure financial instruments that are classified within Level 3 of the valuation hierarchy. The range of sensitivities that management utilized in its fair value calculations is deemed acceptable in the industry with respect to the identified financial instruments. The tables below present both the total balance as of the dates indicated for assets measured at fair value on a recurring basis and the assets measured at fair value on a non-recurring basis for which there was a fair value adjustment during the period, according to the valuation hierarchy included in ASC 820-10.

March 31, 2014

Other assets held for sale	4,945	Third party appraised value of collateral less estimated selling costs or BOV	Discount to appraised value ⁽³⁾ Estimated selling costs	5%-36% (20%) 0%-10% (7%)

(1) The range represents management's best estimate of the high and low of the value that would be assigned to a particular input. The weighted average is the measure of central tendencies; it is the value that management is using for the asset or liability.

(2) Represents management's estimate of discount that market participants would require based on the instrument's lack of liquidity.

(3) Synovus also makes adjustments to the values of the assets listed above for various reasons, including age of the appraisal, information known by management about the property, such as occupancy rates, changes to the physical conditions of the property, and other factors.

(4) The range has not been disclosed due to the wide range of possible values given the methodology used.

Sensitivity Analysis of Level 3 Unobservable Inputs Measured on a Recurring Basis

Included in the fair value estimates of financial instruments carried at fair value on the consolidated balance sheet are those estimated in full or in part using valuation techniques based on assumptions that are not supported by observable market prices, rates, or other inputs. Unobservable inputs are assessed carefully, considering the current economic environment and market conditions. However, by their very nature, unobservable inputs imply a degree of uncertainty in their determination, because they are supported by little, if any, market activity for the related asset or liability.

Investment Securities Available for Sale

The significant unobservable inputs used in the fair value measurement of the corporate obligations in Level 3 assets are the credit spread embedded in the discount rate and the discount for lack of liquidity. Generally, a change in one or

more assumptions, and the degree or sensitivity of the change used, can have a meaningful impact on fair value. With regard to the trust preferred securities in Level 3 assets, raising the credit spread, and raising the discount for lack of liquidity assumptions will result in a lower fair value measurement.

Private Equity Investments

In the absence of quoted market prices, inherent lack of liquidity, and the long-term nature of private equity investments, significant judgment is required to value these investments. The significant unobservable inputs used in the fair value measurement of private equity investments include current operations, financial condition, and cash flows, comparables and private sales, when available; and recently executed financing transactions related to investee companies. Significant increases or decreases in any of these inputs in isolation would result in a significantly lower or higher fair value measurement.

Table of Contents

Visa Derivative Liability

The fair value of the Visa derivative is determined based on management's estimate of the timing and amount of the Covered Litigation settlement and the resulting payments due to the counterparty under the terms of the contract. Significant increases (decreases) in any of these inputs in isolation would result in a significantly higher (lower) valuation of the Visa derivative liability. Generally, a change in the amount funded by Visa into its escrow for the Covered Litigation would have a directionally similar change in the assumptions used for the discounted cash flow technique used to compute fair value.

Fair Value of Financial Instruments

The following table presents the carrying and fair values of financial instruments at March 31, 2014 and December 31, 2013. The fair value represents management's best estimates based on a range of methodologies and assumptions. For financial instruments that are not recorded at fair value on the balance sheet, such as loans, interest bearing deposits (including brokered deposits), and long-term debt, the figures given in the notes should not be taken as an estimate of the amount that would be realized if all such financial instruments were to be settled immediately.

Cash and cash equivalents, interest bearing funds with the Federal Reserve Bank, interest earning deposits with banks, and federal funds sold and securities purchased under resale agreements are repriced on a short-term basis; as such, the carrying value closely approximates fair value. Since these amounts generally relate to highly liquid assets, these are considered a Level 1 measurement.

Loans, net of deferred fees and costs, are recorded at the amount of funds advanced, less charge-offs and an estimation of credit risk represented by the allowance for loan losses. The fair value estimates for disclosure purposes differentiate loans based on their financial characteristics, such as product classification, loan category, pricing features, and remaining maturity. The fair value of loans is estimated for portfolios of loans with similar financial characteristics. Loans are segregated by type, such as commercial, mortgage, home equity, credit card, and other retail loans. Commercial loans are further segmented into certain collateral code groupings. The fair value of the loan portfolio is calculated, in accordance with ASC 825-10, by discounting contractual cash flows using estimated market discount rates, which reflect the credit and interest rate risk inherent in the loan. This method of estimating fair value does not incorporate the exit-price concept of fair value prescribed by ASC 820-10 and generally produces a higher value than a pure exit price approach. For loans measured using the estimated fair value of collateral less costs to sell, fair value is generally estimated using appraisals of the collateral. Collateral values are monitored and additional write-downs are recognized if it is determined that the estimated collateral values have declined further. Estimated costs to sell are based on current amounts of disposal costs for similar assets. Carrying value is considered to reflect fair value for these loans. Loans are considered a Level 3 fair value measurement.

The fair value of deposits with no stated maturity, such as non-interest bearing demand accounts, interest bearing demand deposits, money market accounts, and savings accounts, is estimated to be equal to the amount payable on demand as of that respective date. The fair value of time deposits is based on the discounted value of contractual cash flows. The discount rate is estimated using the rates currently offered for deposits of similar remaining maturities. The value of long-term relationships with depositors is not taken into account in estimating fair values. Synovus has developed long-term relationships with its customers through its deposit base and, in the opinion of management, these customer relationships add significant value to Synovus. Synovus has determined that the appropriate classification for deposits is Level 2 due to the ability to reasonably measure all inputs to valuation based on observable market variables. Short-term and long-term debt is also considered a Level 2 valuation, as management relies on market prices for bonds or debt that is similar, but not necessarily identical, to the debt being valued. Short-term debt that matures within ten days is assumed to be at fair value, and is considered a Level 1 measurement. The fair value of other short-term and long-term debt with fixed interest rates is calculated by discounting contractual cash flows using market discount rates for bonds or debt that is similar but not identical.

Table of Contents

The carrying and estimated fair values of financial instruments, as well as the level within the fair value hierarchy, as of March 31, 2014 and December 31, 2013 are as follows:

(in thousands)	March 31, 2014

Note 10 - Derivative Instruments

As part of its overall interest rate risk management activities, Synovus utilizes derivative instruments to manage its exposure to various types of interest rate risk. These derivative instruments generally consist of interest rate swaps, interest rate lock commitments made to prospective mortgage loan customers, and commitments to sell fixed-rate mortgage loans. Interest rate lock commitments represent derivative instruments since it is intended that such loans will be sold.

From time to time, Synovus utilizes interest rate swaps to manage interest rate risks primarily arising from its core banking activities. These interest rate swap transactions generally involve the exchange of fixed and floating interest rate payment obligations without the exchange of underlying principal amounts. Swaps may be designated as either cash flow hedges or fair value hedges, as discussed below. As of March 31, 2014 and December 31, 2013, Synovus had no outstanding interest rate swap contracts utilized to manage interest rate risk.

Synovus is party to master netting arrangements with its dealer counterparties; however, Synovus does not offset assets and liabilities under these arrangements for financial statement presentation purposes.

Counterparty Credit Risk and Collateral

Entering into derivative contracts potentially exposes Synovus to the risk of counterparties' failure to fulfill their legal obligations, including, but not limited to, potential amounts due or payable under each derivative contract. Notional principal amounts are often used to express the volume of these transactions, but the amounts potentially subject to credit risk are much smaller. Synovus assesses the credit risk of its dealer counterparties by regularly monitoring publicly available credit rating information and other market indicators. Dealer collateral requirements are determined via risk-based policies and procedures and in accordance with existing agreements. Synovus seeks to minimize dealer credit risk by dealing with highly rated counterparties and by obtaining collateral for exposures above certain

predetermined limits. Management closely monitors credit conditions within the customer swap portfolio, which management deems to be of higher risk than dealer counterparties. Collateral is secured at origination and credit related fair value adjustments are recorded against the asset value of the derivative as deemed necessary based upon an analysis, which includes consideration of the current asset value of the swap, customer credit rating, collateral value, and customer standing with regards to its swap contractual obligations and other related matters. Such asset values fluctuate based upon changes in interest rates regardless of changes in notional amounts and changes in customer specific risk.

Table of Contents**Cash Flow Hedges**

Synovus designates hedges of floating rate loans as cash flow hedges. These swaps hedge against the variability of cash flows from specified pools of floating rate prime based loans. Synovus calculates effectiveness of the hedging relationship quarterly using regression analysis. The effective portion of the gain or loss on the derivative instrument is reported as a component of other comprehensive income and reclassified into earnings in the same period or periods during which the hedged transactions affect earnings. Ineffectiveness from cash flow hedges is recognized in the consolidated statements of income as a component of other non-interest income. As of March 31, 2014, there were no cash flow hedges outstanding, and therefore, no cumulative ineffectiveness.

Synovus expects to reclassify from accumulated other comprehensive income (loss) \$447 thousand of interest expense during the next twelve months as amortization of deferred losses are recorded.

Synovus did not terminate any cash flow hedges during 2014 or 2013. The remaining unamortized deferred net loss balance of all previously terminated cash flow hedges at March 31, 2014 and December 31, 2013 was \$(1.5) million and \$(1.6) million, respectively.

Fair Value Hedges

Synovus designates hedges of fixed rate liabilities as fair value hedges. These swaps hedge against the change in fair value of various fixed rate liabilities due to changes in the benchmark interest rate, LIBOR. Synovus calculates effectiveness of the fair value hedges quarterly using regression analysis. Ineffectiveness from fair value hedges is recognized in the consolidated statements of income as a component of other non-interest income. As of March 31, 2014, there were no fair value hedges outstanding, and therefore, no cumulative ineffectiveness.

Synovus did not terminate any fair value hedges during 2014 or 2013. The remaining unamortized deferred net gain balance on all previously terminated fair value hedges at March 31, 2014 and December 31, 2013 was \$9.9 million and \$10.7 million, respectively. Synovus expects to reclassify from hedge-related basis adjustment, a component of long-term debt, \$3.1 million of the deferred gain balance on previously terminated fair value hedges as a reduction to interest expense during the next twelve months as amortization of deferred gains is recorded.

Customer Related Derivative Positions

Synovus enters into interest rate swap agreements to facilitate the risk management strategies of a small number of commercial banking customers. Synovus mitigates this risk by entering into equal and offsetting interest rate swap agreements with highly rated third party financial institutions. The interest rate swap agreements are free-standing derivatives and are recorded at fair value on Synovus' consolidated balance sheet. Fair value changes are recorded in non-interest income in Synovus' consolidated statements of income. As of March 31, 2014, the notional amount of customer related interest rate derivative financial instruments, including both the customer position and the offsetting position, was \$1.14 billion, a decrease of \$38.5 million compared to December 31, 2013.

Visa Derivative

In conjunction with the sale of Class B shares of common stock issued by Visa to Synovus as a Visa USA member, Synovus entered into a derivative contract with the purchaser, which provides for settlements between the parties based upon a change in the ratio for conversion of Visa Class B shares to Visa Class A shares. The conversion ratio changes when Visa deposits funds to a litigation escrow established by Visa to pay settlements for certain litigation, for which Visa is indemnified by Visa USA members. The litigation escrow is funded by proceeds from Visa's conversion of Class B shares. The fair value of the derivative liability is based on an estimate of Synovus' membership proportion of Visa's aggregate exposure to the Covered Litigation, or in effect, the future cumulative deposits to the litigation escrow for settlement of the Covered Litigation, and estimated future monthly fees payable to the derivative counterparty.

Mortgage Derivatives

Synovus originates first lien residential mortgage loans for sale into the secondary market and generally does not hold the originated loans for investment purposes. Mortgage loans are sold by Synovus for conversion to securities and the servicing of these loans is generally sold to a third-party servicing aggregator, or Synovus sells the mortgage loans as whole loans to investors either individually or in bulk on a servicing released basis.

Synovus enters interest rate lock commitments for residential mortgage loans which commit us to lend funds to a potential borrower at a specific interest rate and within a specified period of time. Interest rate lock commitments that

relate to the origination of mortgage loans that, if originated, will be held for sale, are considered derivative financial instruments under applicable accounting guidance. Outstanding interest rate lock commitments expose Synovus to the risk that the price of the mortgage loans underlying the commitments may decline due to increases in mortgage interest rates from inception of the rate lock to the funding of the loan.

Table of Contents

At March 31, 2014 and December 31, 2013, Synovus had commitments to fund at a locked interest rate, primarily fixed-rate mortgage loans to customers, in the amount of \$88.0 million and \$65.0 million, respectively. The fair value of these commitments resulted in a gain of \$649 thousand and \$51 thousand for the three months ended March 31, 2014 and 2013, respectively, which was recorded as a component of mortgage banking income in the consolidated statements of income.

At March 31, 2014 and December 31, 2013, outstanding commitments to sell primarily fixed-rate mortgage loans amounted to \$107.0 million and \$92.0 million, respectively. Such commitments are entered into to reduce the exposure to market risk arising from potential changes in interest rates, which could affect the fair value of mortgage loans held for sale and outstanding rate lock commitments, which guarantee a certain interest rate if the loan is ultimately funded or granted by Synovus as a mortgage loan held for sale. The commitments to sell mortgage loans are at fixed prices and are scheduled to settle at specified dates that generally do not exceed 90 days. The fair value of outstanding commitments to sell mortgage loans resulted in a loss of \$(969) thousand and \$(140) thousand for the three months ended March 31, 2014 and 2013, respectively, which was recorded as a component of mortgage banking income in the consolidated statements of income.

Collateral Contingencies

Certain derivative instruments contain provisions that require Synovus to maintain an investment grade credit rating from each of the major credit rating agencies. When Synovus' credit rating falls below investment grade, these provisions allow the counterparties of the derivative instrument to demand immediate and ongoing full collateralization on derivative instruments in net liability positions and, for certain counterparties, request immediate termination. As Synovus' current rating is below investment grade, Synovus is required to post collateral, as required by each agreement, against these positions. Additionally, as of June 10, 2013, the CCC became mandatory for certain trades as required under the Dodd-Frank Act. These derivative transactions also carry collateral requirements, both at the inception of the trade, and as the value of each derivative position changes. As trades are migrated to the CCC, dealer counterparty exposure will be reduced, and higher notional amounts of Synovus' derivative instruments will be housed at the CCC, a highly regulated and well-capitalized entity. As of March 31, 2014, collateral totaling \$72.4 million consisting of Federal funds sold was pledged to the derivative counterparties, including \$3.3 million with the CCC, to comply with collateral requirements.

The impact of derivative instruments on the consolidated balance sheets at March 31, 2014 and December 31, 2013 is presented below.

(in thousands)	Fair Value of Derivative Assets			Fair Value of Derivative Liabilities		
	Location on Consolidated Balance Sheet	March 31, 2014	December 31, 2013	Location on Consolidated Balance Sheet	March 31, 2014	December 31, 2013
Derivatives not designated as hedging instruments:						
Interest rate contracts	Other assets	\$34,924	38,482	Other liabilities	\$35,775	39,436
Mortgage derivatives	Other assets	1,256	1,522	Other liabilities	54	—
Visa derivative		—	—	Other liabilities	2,525	2,706
Total derivatives not designated as hedging instruments		\$36,180	40,004		\$38,354	42,142

The pre-tax effect of fair value hedges on the consolidated statements of income for the three months ended March 31, 2014 and 2013 is presented below.

(in thousands)	Location of Gain (Loss) Recognized in Income	Gain (Loss) Recognized in Income Three Months Ended March 31,	
		2014	2013

Derivatives not designated
as hedging instruments

Interest rate contracts ⁽¹⁾	Other non-interest income	\$ 104	121	
Mortgage derivatives ⁽²⁾	Mortgage banking income	(320) (89)
Total		\$(216) 32	

(1) Gain (loss) represents net fair value adjustments (including credit related adjustments) for customer swaps and offsetting positions.

(2) Gain (loss) represents net fair value adjustments recorded for interest rate lock commitments and commitments to sell mortgage loans to third party investors.

During the three months ended March 31, 2014 and 2013, Synovus also reclassified \$774 thousand and \$914 thousand, respectively, from hedge-related basis adjustment, a component of long-term debt, as a reduction to interest expense. These deferred gains relate to hedging relationships that have been previously terminated and are reclassified into earnings over the remaining life of the hedged items.

Table of Contents

Note 11- Net Income Per Common Share

The following table displays a reconciliation of the information used in calculating basic and diluted earnings per common share for the three months ended March 31, 2014 and 2013.

(in thousands, except per share data)	Three Months Ended March 31,	
	2014	2013
Basic Net Income Per Common Share:		
Net income available to common shareholders	\$45,857	14,798
Weighted average common shares outstanding	972,522	787,043
Basic net income per common share	0.05	0.02
Diluted Net Income Per Common Share:		
Net income available to common shareholders	45,857	14,798
Weighted average common shares outstanding	972,522	787,043
Potentially dilutive shares from assumed exercise of securities or other contracts to purchase Common Stock	4,005	123,792
Weighted average diluted common shares	976,527	910,835
Diluted net income per common share	0.05	0.02

Basic net income per common share is computed by dividing net income by the average common shares outstanding for the period. Diluted net income per common share reflects the dilution that could occur if securities or other contracts to issue Common Stock were exercised or converted. The dilutive effect of outstanding options and restricted share units is reflected in diluted net income per common share, unless the impact is anti-dilutive, by application of the treasury stock method.

During 2010, 13,800,000 units of tMEDS were issued through a public offering. On May 15, 2013, each remaining tMED automatically settled, and Synovus issued 122.8 million shares of Common Stock. As a result, these shares are no longer potentially dilutive shares from assumed exercise of these contracts to purchase Common Stock.

As of March 31, 2014 and 2013, there were 24.5 million and 28.6 million, respectively, potentially dilutive shares related to Common Stock options and Warrants to purchase shares of Common Stock that were outstanding during 2014 and 2013, but were not included in the computation of diluted net income per common share because the effect would have been anti-dilutive.

Note 12 - Share-based Compensation

General Description of Share-based Plans

Synovus has a long-term incentive plan under which the Compensation Committee of the Board of Directors has the authority to grant share-based awards to Synovus employees. At March 31, 2014, Synovus had a total of 50,717,561 shares of its authorized but unissued Common Stock reserved for future grants under the 2013 Omnibus Plan. The 2013 Omnibus Plan authorizes 60,000,000 common share equivalents available for grant, where grants of options count as one share equivalent and grants of full value awards (e.g., restricted share units, market restricted share units) count as 2 share equivalents. Any restricted share units that are forfeited and options that expire unexercised will again become available for issuance under the Plan. The Plan permits grants of share-based compensation including stock options, non-vested shares, and restricted share units. The grants generally include vesting periods ranging from two to five years and contractual terms of 10 years. Stock options are granted at exercise prices which equal the fair value of a share of common stock on the grant-date. Synovus has historically issued new shares to satisfy share option exercises and share unit conversions. Dividend equivalents are paid on outstanding restricted share units in the form of additional restricted share units that vest over the same vesting period or the vesting period left on the original restricted share unit grant.

Share-based Compensation Expense

Share-based compensation costs associated with employee grants are recorded as a component of salaries and other personnel expense in the consolidated statements of income. Share-based compensation costs associated with grants made to non-employee directors of Synovus are recorded as a component of other operating expenses. Share-based

compensation expense for service-based awards is recognized net of estimated forfeitures for plan participants on a straight-line basis over the vesting period. Total share-based compensation expense was \$2.2 million for the three months ended March 31, 2014 and \$1.8 million for the three months ended March 31, 2013.

Table of Contents

Stock Options

No stock option grants were made during the three months ended March 31, 2014. At March 31, 2014, there were 21,421,796 options to purchase shares of Common Stock outstanding with a weighted average exercise price of \$6.87.

Restricted Share Units, Performance Share Units and Market Restricted Share Units

During the three months ended March 31, 2014, Synovus awarded 2,658,234 restricted share units that have a service-based vesting period of three years and awarded 403,485 performance share units that vest upon service conditions and performance conditions. Synovus also granted 605,229 market restricted share units during the three months ended March 31, 2014. The weighted average grant-date fair value of the awarded restricted share units, performance share units and market restricted share units was \$3.40 per share. At March 31, 2014, including dividend equivalents granted, there were 7,619,320 restricted share units, performance share units and market restricted share units outstanding with a weighted average grant-date fair value of \$2.91.

During the three months ended March 31, 2014, Synovus also granted 53,740 salary stock units to senior management, which vested and were expensed immediately upon grant. Compensation expense is initially determined based on the number of salary stock units granted and the market price of Common Stock at the grant date.

Subsequent to the grant date, compensation expense is recorded for changes in Common Stock market price. The total fair value of salary stock units granted during the three months ended March 31, 2014 was \$154 thousand. The salary stock units granted during 2014 are classified as liabilities and will be settled in cash on January 15, 2015.

Note 13 - Income Taxes

The valuation allowance for deferred tax assets was \$14.8 million and \$14.6 million at March 31, 2014 and December 31, 2013, respectively. The \$200 thousand increase in the valuation allowance from December 31, 2013 to March 31, 2014 is related to certain state income tax credits earned that are available to reduce future tax liability through the tax year 2019 and are expected to expire before they can be utilized. Management assesses the need for a valuation allowance for deferred tax assets at each reporting period. The determination of whether a valuation allowance for deferred tax assets is appropriate is subject to considerable judgment and requires an evaluation of all the positive and negative evidence. Based on the assessment of all of the positive and negative evidence at March 31, 2014, management has concluded that it is more likely than not that \$712.1 million of the net deferred tax asset will be realized based upon future taxable income.

Synovus expects to realize substantially all of the \$712.1 million in net deferred tax assets well in advance of the statutory carryforward period. At March 31, 2014, \$194.5 million of existing deferred tax assets are not related to net operating losses or credits and therefore, have no expiration dates. Approximately \$422.7 million of the remaining deferred tax assets relate to federal net operating losses which expire in years beginning in 2028 through 2032.

Additionally, \$62.1 million of the deferred tax assets relate to state NOLs which will expire in installments annually through the tax year 2034. Tax credit carryforwards at March 31, 2014 include federal alternative minimum tax credits totaling \$22.9 million, which have an unlimited carryforward period. Other federal and state tax credits at March 31, 2014 total \$24.7 million and have expiration dates through the tax year 2034.

The valuation allowance could fluctuate in future periods based on management's assessment of the positive and negative evidence. Management's conclusion at March 31, 2014 that it is more likely than not that the net deferred tax assets of \$712.1 million will be realized is based upon management's estimate of future taxable income. Management's estimate of future taxable income is based on internal projections which consider historical performance, various internal estimates and assumptions, as well as certain external data, all of which management believes to be reasonable although inherently subject to significant judgment. If actual results differ significantly from the current estimates of future taxable income, the valuation allowance may need to be increased. Such an increase to the deferred tax asset valuation allowance could have a material adverse effect on Synovus' financial condition or results of operations.

Synovus is subject to income taxation in the United States and various state jurisdictions. Synovus' federal income tax return is filed on a consolidated basis, while state income tax returns are filed on both a consolidated and separate entity basis. Currently, no years for which Synovus filed a Federal income tax return are under examination by the IRS. A state tax examination by the Tennessee Department of Revenue is currently in progress. Synovus is no longer subject to income tax examinations by the IRS for years before 2009, and excluding certain limited exceptions,

Synovus is no longer subject to income tax examinations by state and local income tax authorities for years before 2008. Although Synovus is unable to determine the ultimate outcome of current and future examinations, Synovus believes that the liability recorded for uncertain tax positions is adequate.

Note 14 - Legal Proceedings

Synovus carefully examines and considers each legal matter, and, in those situations where Synovus determines that a particular legal matter presents loss contingencies that are both probable and reasonably estimable, Synovus establishes an appropriate accrual. An event is considered to be probable if the future event is likely to occur. While the final outcome of any legal proceeding

Table of Contents

is inherently uncertain, based on the information currently available, advice of counsel and available insurance coverage, management believes that the amounts accrued with respect to legal matters as of March 31, 2014 are adequate. The actual costs of resolving legal claims may be higher or lower than the amounts accrued.

In addition, where Synovus determines that there is a reasonable possibility of a loss in respect of legal matters, including those legal matters described below, Synovus considers whether it is able to estimate the total reasonably possible loss or range of loss. An event is reasonably possible if the chance of the future event or events occurring is more than remote but less than likely. An event is remote if the chance of the future event occurring is slight. In many situations, Synovus may be unable to estimate reasonably possible losses due to the preliminary nature of the legal matters, as well as a variety of other factors and uncertainties. For those legal matters where Synovus is able to estimate a range of reasonably possible losses, management currently estimates the aggregate range from our outstanding litigation, including, without limitation, the matters described below, is from zero to \$25 million in excess of the amounts accrued, if any, related to those matters. This estimated aggregate range is based upon information currently available to Synovus, and the actual losses could prove to be higher. As there are further developments in these legal matters, Synovus will reassess these matters, and the estimated range of reasonably possible losses may change as a result of this assessment. Based on Synovus' current knowledge and advice of counsel, management presently does not believe that the liabilities arising from these legal matters will have a material adverse effect on Synovus' consolidated financial condition, results of operations or cash flows. However, it is possible that the ultimate resolution of these legal matters could have a material adverse effect on Synovus' results of operations for any particular period.

Synovus intends to vigorously pursue all available defenses to these legal matters, but will also consider other alternatives, including settlement, in situations where there is an opportunity to resolve such legal matters on terms that Synovus considers to be favorable, including in light of the continued expense and distraction of defending such legal matters. Synovus also maintains insurance coverage, which may (or may not) be available to cover legal fees, or potential losses that might be incurred in connection with the legal matters described below. The above-noted estimated range of reasonably possible losses does not take into consideration insurance coverage which may or may not be available for the respective legal matters.

Securities Class Action

On July 7, 2009, the City of Pompano Beach General Employees' Retirement System filed suit against Synovus, and certain of Synovus' current and former officers, in the United States District Court, Northern District of Georgia (Civil Action File No. 1:09-CV-1811) (the "Securities Class Action"); and on June 11, 2010, Lead Plaintiffs, the Labourers' Pension Fund of Central and Eastern Canada and the Sheet Metal Workers' National Pension Fund, filed an amended complaint alleging that Synovus and the named individual defendants misrepresented or failed to disclose material facts that artificially inflated Synovus' stock price in violation of the federal securities laws. Lead Plaintiffs' allegations are based on purported exposure to Synovus' lending relationship with the Sea Island Company and the impact of such alleged exposure on Synovus' financial condition. Lead Plaintiffs in the Securities Class Action seek damages in an unspecified amount. On May 19, 2011, the Court ruled that the amended complaint failed to satisfy the mandatory pleading requirements of the Private Securities Litigation Reform Act. The Court also ruled that Lead Plaintiffs would be allowed the opportunity to submit a further amended complaint. Lead Plaintiffs served their second amended complaint on June 27, 2011. Defendants filed a Motion to Dismiss that complaint on July 27, 2011. On March 22, 2012, the Court granted in part and denied in part that Motion to Dismiss. On April 19, 2012, the Defendants filed a motion requesting that the Court reconsider its March 22, 2012 order. On September 26, 2012, the Court issued a written order denying the Motion for Reconsideration. Defendants filed their answer to the second amended complaint on May 21, 2012. On March 7, 2013, the Court granted Lead Plaintiffs' motion for class certification. On May 23, 2013, the 11th Circuit Court of Appeals granted Defendants permission to appeal the District Court's certification of the class. On October 4, 2013, the Lead Plaintiffs and the Defendants reached a settlement-in-principle to settle the Securities Class Action. Under the settlement-in-principle, the Defendants shall cause to be paid \$11.8 million to the Lead Plaintiffs (the "Securities Class Action Settlement Payment") in exchange for broad releases, dismissal with prejudice of the Securities Class Action and other material and customary terms and conditions. On March 17, 2014, the Lead Plaintiffs filed a motion with the District Court for preliminary approval of

the Securities Class Action Settlement Payment, which motion remains pending. Synovus expects that, subject to execution of an appropriate release of the Defendants' insurance carriers and other customary acknowledgments by the Defendants, the Securities Class Action Settlement Payment will be fully covered by insurance. There can be no assurance that the settlement-in-principle will be approved by the District Court. In the event the settlement-in-principle of the Securities Class Action is not approved by the District Court and finally settled, Synovus and the individually named defendants collectively intend to vigorously defend themselves against the Securities Class Action.

Overdraft Litigation

Posting Order Litigation

On September 21, 2010, Synovus, Synovus Bank and CB&T were named as defendants in a putative multi-state class action relating to the manner in which Synovus Bank charges overdraft fees to customers. The case, Childs et al. v. Columbus Bank and Trust et al., was filed in the Northern District of Georgia, Atlanta Division, and asserts claims for breach of contract and breach

Table of Contents

of the covenant of good faith and fair dealing, unconscionability, conversion and unjust enrichment for alleged injuries suffered by plaintiffs as a result of Synovus Bank's assessment of overdraft charges in connection with its POS/debit and automated-teller machine cards allegedly resulting from the sequence used to post payments to the plaintiffs' accounts. On October 25, 2010, the Childs case was transferred to a multi-district proceeding in the Southern District of Florida. In Re: Checking Account Overdraft Litigation, MDL No. 2036. Plaintiffs amended their complaint on October 21, 2011. The Synovus entities filed a motion to dismiss the amended complaint on November 22, 2011. On July 26, 2012, the court denied the motion as to Synovus and Synovus Bank, but granted the motion as to CB&T. Synovus and Synovus Bank filed their answer to the amended complaint on September 24, 2012. The case is currently in discovery.

Assertion of Overdraft Fees as Interest Litigation

Synovus Bank was also named as a defendant in a putative state-wide class action in which the plaintiffs allege that overdraft fees charged to customers constitute interest and, as such, are usurious under Georgia law. The case, Griner et. al. v. Synovus Bank, et. al. was filed in Gwinnett County State Court (State of Georgia) on July 30, 2010, and asserts claims for usury, conversion and money had and received for alleged injuries suffered by the plaintiffs as a result of Synovus Bank's assessment of overdraft charges in connection with its POS/debit and automated-teller machine cards used to access customer accounts ("the Griner Overdraft Litigation"). Plaintiffs contend that such overdraft charges constitute interest and are therefore subject to Georgia usury laws. Synovus Bank contends that such overdraft charges constitute non-interest fees and charges under both federal and Georgia law and are otherwise exempt from Georgia usury limits. On September 1, 2010, Synovus Bank removed the case to the United States District Court for the Northern District of Georgia, Atlanta Division. The plaintiffs filed a motion to remand the case to state court. On July 22, 2011, the federal court entered an order granting plaintiffs' motion to remand the case to the Gwinnett County State Court. Synovus Bank subsequently filed a motion to dismiss. On February 22, 2012, the state court entered an order denying the motion to dismiss. On March 1, 2012, the state court signed and entered a certificate of immediate review thereby permitting Synovus Bank to petition the Georgia Court of Appeals for a discretionary appeal of the denial of the motion to dismiss. On March 12, 2012, Synovus Bank filed its application for interlocutory appeal with the Georgia Court of Appeals. On April 3, 2012, the Georgia Court of Appeals granted Synovus Bank's application for interlocutory appeal of the state court's order denying Synovus Bank's motion to dismiss. On April 11, 2012, Synovus Bank filed its notice of appeal. Oral arguments were heard in the case on September 19, 2012. On March 28, 2013, the Georgia Court of Appeals entered an order affirming the denial of Synovus Bank's motion to dismiss and remanding the case back to the State Court of Gwinnett County for further proceedings. On April 8, 2013, Synovus Bank filed a motion requesting that the Court of Appeals reconsider its March 28, 2013 order. On April 11, 2013, the Court of Appeals entered an order denying Synovus Bank's motion for reconsideration. On April 19, 2013, Synovus Bank filed a notice of its intent to petition the Supreme Court of Georgia for a writ of certiorari. On May 1, 2013, Synovus Bank filed a petition for writ of certiorari with the Supreme Court of Georgia. On October 7, 2013, the Supreme Court of Georgia accepted certiorari and vacated the March 28, 2013 order of the Georgia Court of Appeals instantaneously with direction that the Court of Appeals remand the case to the trial court for further consideration in light of the effect, if any, of the July 3, 2013 Declaratory Order issued by the Georgia Department of Banking and Finance, which declares that to provide parity with national banks, overdraft fees imposed by state-chartered banks in connection with deposit accounts are not subject to Georgia's usury laws. The trial court held a hearing for consideration of this issue on November 21, 2013, and a decision is pending.

On February 3, 2014, the Gwinnett County State Court (State of Georgia) issued an order preliminarily approving the proposed settlement (the "Griner Settlement") by and among Synovus Financial Corp. and Synovus Bank (collectively referred to herein as "Synovus"), and the plaintiffs in the Griner Overdraft Litigation. Under the terms of the Griner Settlement, Synovus has agreed to (1) establish a fund to pay eligible class member claims and (2) pay an agreed-upon amount of fees to counsel for the plaintiffs in the Griner Overdraft Litigation. In exchange, each purported class member in the Griner Overdraft Litigation will give Synovus a full and final general release of all claims alleged or that could be alleged in the Griner Overdraft Litigation. The final fairness hearing on the settlement is scheduled for May 20, 2014.

ITEM 2. – MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

In this Report, the words “Synovus,” “the Company,” “we,” “us,” and “our” refer to Synovus Financial Corp. together with Synovus Bank and Synovus’ other wholly-owned subsidiaries, except where the context requires otherwise.

FORWARD-LOOKING STATEMENTS

Certain statements made or incorporated by reference in this Report which are not statements of historical fact including those under "Management's Discussion and Analysis of Financial Condition and Results of Operations," and elsewhere in this Report, constitute forward-looking statements within the meaning of, and subject to the protections of, Section 27A of the Securities Act, and Section 21E of the Exchange Act. Forward-looking statements include statements with respect to Synovus' beliefs, plans, objectives, goals, targets, expectations, anticipations, assumptions, estimates, intentions and future performance and involve known and unknown risks, many of which are beyond Synovus' control and which may cause Synovus' actual results, performance or

Table of Contents

achievements or the commercial banking industry or economy generally, to be materially different from future results, performance or achievements expressed or implied by such forward-looking statements.

All statements other than statements of historical fact are forward-looking statements. You can identify these forward-looking statements through Synovus' use of words such as “believes,” “anticipates,” “expects,” “may,” “will,” “assume,” “predicts,” “could,” “should,” “would,” “intends,” “targets,” “estimates,” “projects,” “plans,” “potential” and other similar words or expressions of the future or otherwise regarding the outlook for Synovus' future business and financial performance and/or the performance of the commercial banking industry and economy in general. Forward-looking statements are based on the current beliefs and expectations of Synovus' management and are subject to significant risks and uncertainties. Actual results may differ materially from those contemplated by such forward-looking statements. A number of factors could cause actual results to differ materially from those contemplated by the forward-looking statements in this document. Many of these factors are beyond Synovus' ability to control or predict. These factors include, but are not limited to:

- (1) the risk that competition in the financial services industry may adversely affect our future earnings and growth;
- (2) the risk that we may not realize the expected benefits from our efficiency and growth initiatives, which will negatively affect our future profitability;
- (3) the risk that we may be required to make substantial expenditures to keep pace with the rapid technological changes in the financial services market;
- (4) the risk that our enterprise risk management framework may not identify or address risks adequately, which may result in unexpected losses;
- (5) the risk that our allowance for loan losses may prove to be inadequate or may be negatively affected by credit risk exposures;
- (6) the risk that any future economic downturn could have a material adverse effect on our capital, financial condition, results of operations and future growth;
- (7) the risk that we could realize additional losses if our levels of non-performing assets increase and/or if we determine to sell certain non-performing assets and the proceeds we receive are lower than the carrying value of such assets;
- (8) changes in the interest rate environment and competition in our primary market area may result in increased funding costs or reduced earning assets yields, thus reducing margins and net interest income;
- (9) the risk that if we pursue acquisitions in the future as part of our growth strategy, we may not be able to complete such acquisitions or successfully integrate bank or nonbank acquisitions into our existing operations;
- (10) risks related to a failure in or breach of our operational or security systems of our infrastructure, or those of our third-party vendors and other service providers, including as a result of cyber attacks, which could disrupt our businesses, result in the disclosure or misuse of confidential or proprietary information, damage our reputation, increase our costs or cause losses;
- (11) risks related to our reliance on third parties to provide key components of our business infrastructure, including the costs of services and products provided to us by third parties, and risks related to disruptions in service or financial difficulties of a third-party vendor;
- (12) the impact on our financial results, reputation, and business if we are unable to comply with all applicable federal and state regulations, or other supervisory actions or directives and any necessary capital initiatives;
- (13) the impact of the Dodd-Frank Act, the capital requirements promulgated by the Basel Committee on Banking Supervision and other recent and proposed changes in governmental policy, laws and regulations, including proposed and recently enacted changes in the regulation of banks and financial institutions, or the interpretation or application thereof, including restrictions, increased capital requirements, limitations and/or penalties arising from banking, securities and insurance laws, enhanced regulations and examinations and restrictions on compensation;

Table of Contents

- the risks that if economic conditions worsen or regulatory capital rules are modified, or the results of mandated “stress testing” do not satisfy certain criteria, we may be required to undertake additional strategic initiatives to improve our capital position;
- (14) changes in the cost and availability of funding due to changes in the deposit market and credit market, or the way in which we are perceived in such markets, including a further reduction in our credit ratings;
- (15) the impact on our borrowing costs, capital costs and our liquidity due to our status as a non-investment grade issuer;
- (16) restrictions or limitations on access to funds from historical and alternative sources of liquidity could adversely affect our overall liquidity, which could restrict our ability to make payments on our obligations and our ability to support asset growth and sustain our operations and the operations of Synovus Bank;
- (17) the risk that we may be unable to pay dividends on our Common Stock or Series C Preferred Stock or Synovus Bank may be unable to pay dividends to us;
- (18) the risk that for our deferred tax assets, we may be required to increase the valuation allowance in future periods, or we may not be able to realize the deferred tax assets in the future;
- (19) the risk that we could have an “ownership change” under Section 382 of the IRC, which could impair our ability to timely and fully utilize our net operating losses and built-in losses that may exist when such “ownership change” occurs;
- (20) risks related to recent and proposed changes in the mortgage banking industry, including the risk that we may be required to repurchase mortgage loans sold to third parties and the impact of the “ability to pay” and “qualified mortgage” rules on our loan origination process and foreclosure proceedings;
- (21) the costs and effects of litigation, investigations, inquiries or similar matters, or adverse facts and developments related thereto;
- (22) risks related to the fluctuation in our stock price;
- (23) the effects of any damages to Synovus' reputation resulting from developments related to any of the items identified above; and
- (24) other factors and other information contained in this Report, other reports and filings that we make with the SEC under the Exchange Act, including, without limitation, those found in “Part I-Item 1A. Risk Factors” of Synovus' 2013 Form 10-K.
- (25)

For a discussion of these and other risks that may cause actual results to differ from expectations, refer to “Part I-Item 1A. Risk Factors” and other information contained in Synovus' 2013 Form 10-K and our other periodic filings, including quarterly reports on Form 10-Q and current reports on Form 8-K, that we file from time to time with the SEC. All written or oral forward-looking statements that are made by or are attributable to Synovus are expressly qualified by this cautionary notice. You should not place undue reliance on any forward-looking statements since those statements speak only as of the date on which the statements are made. Synovus undertakes no obligation to update any forward-looking information and statements, whether written or oral, to reflect events or circumstances after the date on which the statement is made or to reflect the occurrence of new information or unanticipated events, except as may otherwise be required by law.

INTRODUCTION AND CORPORATE PROFILE

Synovus Financial Corp. is a diversified financial services company and a registered financial holding company headquartered in Columbus, Georgia. Synovus provides integrated financial services including commercial and retail banking, financial management, insurance, and mortgage services to its customers through locally-branded banking divisions of its wholly-owned subsidiary bank, Synovus Bank, and other offices in Georgia, Alabama, South Carolina, Florida, and Tennessee.

The following financial review summarizes the significant trends affecting Synovus' results of operations and financial condition for the three months ended March 31, 2014 and 2013, respectively. This discussion supplements, and should be read in conjunction with, the unaudited interim consolidated financial statements and notes thereto contained elsewhere in this Report and the consolidated financial statements of Synovus, the notes thereto, and management's discussion and analysis contained in Synovus' 2013 Form 10-K.

Table of Contents

Management's Discussion and Analysis of Financial Condition and Results of Operations are divided into key segments:

- Economic Overview—Provides an overview, including our thoughts on the impact of the economy, legislative and regulatory initiatives, and recent industry developments.
- Discussion of Results of Operations—Reviews Synovus' financial performance, as well as selected balance sheet items, items from the statements of income, and certain key ratios that illustrate Synovus' performance.
- Credit Quality, Capital Resources and Liquidity—Discusses credit quality, market risk, capital resources, and liquidity, as well as performance trends. It also includes a discussion of liquidity policies, how Synovus obtains funding, and related performance.
- Additional Disclosures—Provides comments on additional important matters including other contingencies, critical accounting policies and non-GAAP financial measures used within this Report.

A reading of each section is important to understand fully the nature of our financial performance.

ECONOMIC OVERVIEW

After a year-end announcement by the Federal Reserve Bank that a tapering of the Quantitative Easing program lifted the country's economic optimism, new year enthusiasm was quickly tempered as record storms affected the country in January and February, impacting several metrics pertaining to manufacturing, sales, heating costs, and distribution. However, the second half of the quarter exhibited a strong bounce-back that most likely included suppressed demand from the first half of the quarter. The final fourth quarter 2013 GDP estimate of 2.6% was delivered in March, and the Federal Reserve stayed on pace to finalize the asset purchase component of quantitative easing by the end of the year.

Unemployment at quarter-end remained unchanged at 6.7% from year-end 2013; overall, there were slight labor force gains in the US, reversing the trends seen at the end of 2013. Many Synovus markets exhibited increases in unemployment rates, yet most of these fluctuations were related to increasing labor force numbers chasing organic job creation, particularly in Synovus' Florida markets. Synovus markets in Georgia and Tennessee experienced lower unemployment rates produced by higher declines in labor force relative to declines in employment. Synovus' South Carolina markets showed the largest drops in unemployment rates due to a combination of declining labor force figures and increasing job creation numbers. Within the Synovus footprint Metropolitan Statistical Areas (MSA), the lowest unemployment rate for the first quarter of 2014 was 4.5% in the Crestview-Fort Walton Beach-Destin, Florida MSA, with Greenville-Anderson-Mauldin, South Carolina MSA trailing at 4.6%. The highest Synovus MSA unemployment rate was 9% in the Dalton, Georgia MSA (though this market exhibited a 190+ bps improvement year over year).

The Conference Board Consumer Confidence Index ended the quarter at 82.3, surpassing a recent 81.8 peak set in August 2013. Consumer spending was muted by winter storms but recovered by the end of the quarter. Automobile sales reached an annualized level of 16.4 million units in March, a level which exceeded even the most optimistic estimates for the month and which likely included pent-up demand from January and February. The National Federation of Independent Businesses Small Business Optimism Index progressed from a 2013 year-end reading of 92.5 to a March reading of 93.4, showing that initial concerns regarding 2014 conditions and the ramifications of the Affordable Care Act have been somewhat mitigated.

Although the Federal Reserve began tapering its Treasury and Mortgage Backed Securities purchases early in the year, thirty-year, fixed-rate mortgages ultimately decreased to a rate of 4.56% by the end of March, after reaching a quarter high of 4.76% in January. The pace of permitting in residential construction (including multi-family) continued to decline, as evidenced by reductions in permit volume in many MSAs within the Synovus footprint. Median single family home sale prices generally increased year-over-year during the quarter (9.9% annualized), though the pace slowed substantially since peak quarters in 2013. Average single family prices are increasing at an annualized rate of 7.7% nationally. The Case-Shiller 10 and 20 City Composite indices both show positive gains of 13.5% and 13.2% annualized, respectively.

Commercial real estate continued its recovery as asset values pushed higher, particularly in the multi-family and industrial/warehouse sectors where capitalization rates are at or near historical lows and rents have generally exceeded pre-recession levels. The hospitality segment continued its recovery during the first quarter, specifically in Atlanta, where gains were realized in occupancies, revenues, and bookings. Premium pricing for major metro market

properties has pushed investors seeking adequate yields towards secondary markets and major inland transportation hubs. There is some general concern in the office sector, specifically the medical subsector where the impact of the Affordable Care Act is unclear. Expense control by hospitals and the consolidation of independent physician practices could result in an oversupply of vacant medical office space. On the whole, both office and retail properties should exhibit slow but positive progress throughout the remainder of 2014, as they did in the first

Table of Contents

quarter. Although Synovus' Florida markets lead the company in CRE metric gains and job creation, Synovus' South Carolina markets are yielding impressive returns, primarily due to port growth, manufacturing, and logistics. Nashville has experienced strong gains in its hospitality sector and currently has the lowest multifamily vacancy rate in the footprint at 4.1%.

Geopolitical events seemed to be concentrated in Russia throughout the quarter, first with the Winter Olympic Games and then with the mounting, and still unresolved, political unrest in Ukraine. The economy in Europe continues to be burdened by a struggle between creditor and debtor members, with improved productivity and growth in some areas but nagging unemployment and expense concerns in others. Japan recently increased a nationwide sales tax from 5% to 8%, but did not expand its loose monetary policy to compensate for the hike, due to its improving economy. China's economy is slowing in time with decreased worldwide demand, with estimates of its first quarter GDP at 7.3%. There is concern that Federal Reserve policy actions will impact developing economies over the course of 2014. At this time, Synovus does not have direct exposure to global markets, but it will continue to monitor the impact of international developments on domestic economic activity and will determine the most appropriate strategies to pursue.

Results for the Three Months Ended March 31, 2014

For the three months ended March 31, 2014, net income available to common shareholders was \$45.9 million, or \$0.05 per diluted common share, compared to net income available to common shareholders of \$35.9 million, or \$0.04 per diluted common share, for the three months ended December 31, 2013, and net income available to common shareholders of \$14.8 million, or \$0.02 per diluted common share, for the three months ended March 31, 2013. The

first quarter of 2014 results include a \$5.8 million net gain from the Memphis transaction, a \$3.1 million gain on a branch property sale, and \$8.6 million in restructuring charges. The fourth quarter of 2013 included \$10.0 million in litigation loss contingency expense and \$3.8 million in restructuring charges, while the first quarter of 2013 included restructuring charges of \$4.9 million.

Table of Contents

The first quarter of 2014 results reflect continued broad-based improvement in credit quality. Credit costs continued to decline and totaled \$17.6 million for the three months ended March 31, 2014, compared to \$22.3 million for the three months ended December 31, 2013 and \$49.3 million for the three months ended March 31, 2013. Net charge-offs for the three months ended March 31, 2014 totaled \$15.2 million or 0.30% of average loans annualized, down from \$25.1 million or 0.51% of average loans annualized for the three months ended December 31, 2013 and \$57.3 million or 1.18% of average loans annualized for the three months ended March 31, 2013. NPL inflows were \$35.5 million for the three months ended March 31, 2014, down from \$41.2 million for the three months ended December 31, 2013, and down 57.7% from \$83.9 million for the three months ended March 31, 2013. Total non-performing assets declined \$41.4 million from \$539.6 million at December 31, 2013 to \$498.2 million at March 31, 2014, and declined \$179.4 million, or 26.5%, from March 31, 2013.

Adjusted pre-tax, pre-credit costs income (which excludes provision for loan losses, other credit costs, restructuring charges, litigation loss contingency expense, securities gains and losses, gain on Memphis transaction, and certain other items) increased \$262 thousand or 0.3% to \$96.5 million for the three months ended March 31, 2014, compared to \$96.3 million for three months ended December 31, 2013, and declined 4.1% compared to \$100.7 million for the three months ended March 31, 2013. The sequential quarter increase of \$262 thousand in adjusted pre-tax, pre-credit costs income was primarily driven by a \$3.1 million gain from a branch property sale which helped offset the impact of fewer calendar days. The decrease of \$4.2 million in adjusted pre-tax, pre-credit costs income compared to the three months ended March 31, 2013 was driven by a \$3.4 million decrease in mortgage banking income and a \$3.3 million increase in adjusted non-interest expense (primarily due to higher FDIC expense, higher employee incentive expense, and expense associated with additional investments in technology). See reconciliation of "Non-GAAP Financial Measures" in this Report.

The net interest margin for the three months ended March 31, 2014 was 3.39%, up 1 basis point from the prior quarter and down 4 basis points compared to 3.43%, for the three months ended March 31, 2013. Earning asset yields increased by 1 basis point compared to the three months ended December 31, 2013 while the effective cost of funds was unchanged.

At March 31, 2014, total loans outstanding were \$20.16 billion, a sequential quarter increase of \$101.2 million, or 2.0% annualized. Excluding the impact from the Memphis transaction, loans grew \$190.8 million, or 3.9%, annualized. See reconciliation of "Non-GAAP Financial Measures" in this Report. Synovus experienced strong loan growth in key markets including Atlanta, Tampa, Jacksonville, Orlando, and Charleston.

At March 31, 2014, total deposits were \$20.95 billion, a sequential quarter increase of \$74.1 million, or 1.4% annualized. Excluding the impact from the Memphis transaction, deposits increased \$265.4 million or 5.2% annualized compared to December 31, 2013. Core deposits, excluding time deposits and the impact from the Memphis transaction, increased \$232.5 million or 5.8% compared to December 31, 2013. See reconciliation of "Non-GAAP Financial Measures" in this Report.

Total shareholders' equity was \$3.00 billion at March 31, 2014, compared to \$2.95 billion at December 31, 2013.

Recent Developments

On April 24, 2014, at Synovus' 2014 Annual Shareholders' Meeting ("Annual Meeting"), Synovus' shareholders approved a proposal authorizing Synovus' Board of Directors to effect a one-for-seven reverse stock split of Synovus' common stock. Following the Annual Meeting, Synovus' Board of Directors authorized the one-for-seven reverse stock split. The reverse stock split will become effective on May 16, 2014, and Synovus' shares of common stock will begin trading on a post-split basis on the New York Stock Exchange (NYSE) at the opening of trading on May 19, 2014. Share and per share amounts included in this Report have not been restated to reflect the approval of the one-for-seven reverse stock split because the split will not be effective until after the filing of this Report.

Additionally, on April 24, 2014, Synovus' shareholders also approved an amendment to Synovus' articles of incorporation to increase the number of authorized shares of Synovus' common stock from 1.2 billion shares to 2.4 billion shares. Synovus effected the increase in the number of authorized shares on April 24, 2014. Upon the effective date of the reverse stock split, the number of Synovus' authorized shares of common stock will be proportionately reduced from 2.4 billion shares to 342.9 million shares.

Changes in Financial Condition

During the three months ended March 31, 2014, total assets increased \$233.8 million from \$26.20 billion at December 31, 2013 to \$26.44 billion. The principal components of this increase were an increase of \$240.2 million in interest bearing funds with the Federal Reserve Bank due to increases in deposits and borrowings and a \$101.2 million increase in loans, net of deferred fees and costs. These increases were partially offset by a \$67.0 million decrease in investment securities available for sale and a \$32.5 million decrease in net deferred tax assets.

⁽¹⁾ Percentage changes are annualized

⁽²⁾ Non-GAAP Financial Measure

At March 31, 2014, total loans were \$20.16 billion, a sequential quarter increase of \$101.2 million or 2.0% on an annualized basis. Excluding the impact from the Memphis transaction, total loans grew \$190.8 million from December 31, 2013 or 3.9% annualized. See "Non-GAAP Financial Measures" in this Report for applicable reconciliation.

During the three months ended March 31, 2014, Synovus experienced strong loan growth in key markets including Atlanta, Tampa, Jacksonville, Orlando, and Charleston, and the growth was balanced across the loan portfolio as our diversification strategy (reducing overall concentration in CRE and growing the percentage of C&I loans relative to the total loan portfolio) has been successful and positioned Synovus to selectively grow certain areas of the CRE loan portfolio.

Commercial Loans

Total commercial loans (which are comprised of C&I and CRE loans) at March 31, 2014 were \$16.55 billion or 82.0% of the total loan portfolio compared to \$16.44 billion, or 81.9%, at December 31, 2013 and \$15.96 billion, or 82.3%, at March 31, 2013.

At March 31, 2014 and December 31, 2013, Synovus had 26 and 25 commercial loan relationships with total commitments of \$50 million or more (including amounts funded), respectively. The average funded balance of these relationships at both March 31, 2014 and December 31, 2013 was approximately \$65 million.

Commercial and Industrial Loans

The C&I portfolio represents the largest category of Synovus' total loan portfolio and is currently concentrated on small to middle market commercial and industrial lending disbursed throughout a diverse group of industries in the Southeast, including health care and social assistance, finance and insurance, manufacturing, construction, real estate leasing, wholesale trade, and retail trade as shown in the following table. The portfolio is relationship focused and, as a result, Synovus' lenders have in-depth knowledge of the borrowers, most of which have guaranty arrangements. C&I loans are primarily originated through Synovus' local market banking divisions and made to commercial customers primarily to finance capital expenditures, including real property, plant and equipment, or as a source of working capital. In accordance with Synovus' uniform lending policy, each loan undergoes a detailed underwriting process which incorporates uniform underwriting standards and oversight in proportion to the size and

Table of Contents

complexity of the lending relationship. Approximately 91% of Synovus' C&I loans are secured by real estate, business equipment, inventory, and other types of collateral.

Total C&I loans at March 31, 2014 were \$10.06 billion, or 49.9% of the total loan portfolio compared to \$9.97 billion, or 49.7% of the total loan portfolio at December 31, 2013 and \$9.54 billion, or 49.2% of the total loan portfolio at March 31, 2013. C&I loans grew \$89.5 million or 3.6% annualized from December 31, 2013 as increases in small business and commercial, financial, and agricultural loans outpaced owner-occupied growth. The increase in small business loans was primarily driven by renewals of existing loans which were previously classified as commercial, financial, and agricultural and are now reported as small business loans. During the three months ended March 31, 2014, C&I growth was strong in several key markets and was bolstered by syndications. At March 31, 2014, approximately three-fourths of the outstanding syndications were for borrowers within our five-state footprint.

Commercial and Industrial Loans by Industry (dollars in thousands)	March 31, 2014		December 31, 2013

(1) Loan balance in each category expressed as a percentage of total commercial and industrial loans.

Synovus has actively invested in additional expertise, product offerings, and product quality to provide its C&I clients with increased and enhanced product offerings and customer service. Complementing this investment in C&I, management continues to focus on streamlining and enhancing Synovus' existing product lines, especially for traditional retail, small business, and professional services customers.

The Corporate Banking Group provides lending solutions to larger corporate clients and includes specialty units such as syndications, senior housing, and equipment finance. These units partner with Synovus' local bankers to build relationships across the five-state footprint, as well as the southeastern and southwestern United States. To date, loan syndications consist primarily of loans where Synovus is participating in the credit (versus being the lead bank). Senior housing loans are typically extended to borrowers in the assisted living or skilled nursing facilities sectors. The Corporate Banking Group also originates loans and participates in loans to well-capitalized public companies and larger private companies that operate in the five-state footprint as well as other states in the Southeast. The Equipment Financing Group was formed in late 2013 and is expected to drive loan growth with small, middle, and large commercial banking customers in future periods. The formation of this group further strengthens the equipment financing line of business and signals Synovus' continued commitment to offer a broad range of expertise, products, and services to commercial customers.

At March 31, 2014, \$3.77 billion of total C&I loans, or 18.7% of the total loan portfolio, represented loans originated for the purpose of financing owner-occupied properties. The primary source of repayment on these loans is revenue generated from products or services offered by the business or organization. The secondary source of repayment on these loans is the real estate. These loans are predominately secured by owner-occupied properties and other real estate. Other types of collateral securing these loans consist primarily of marketable equipment, marketable inventory, accounts receivable, equity and debt securities, and time deposits.

Table of Contents

At March 31, 2014, \$5.51 billion of total C&I loans, or 27.3% of the total loan portfolio, represented loans originated for the purpose of financing commercial, financial, and agricultural business activities. The primary source of repayment on these loans is revenue generated from products or services offered by the business or organization. The secondary source of repayment is the collateral, which consists primarily of equipment, inventory, accounts receivable, time deposits, and other business assets.

At March 31, 2014, \$783.1 million of total C&I loans, or 3.9% of the total loan portfolio, represented loans originated for the purpose of financing small business activities. Small business loans are scored using a small business credit scoring model and are generally classified as small business when the business purpose for the loan is less than or equal to \$500,000. The primary source of repayment on these loans is revenue generated from products or services offered by the business.

Commercial Real Estate Loans

CRE loans consist of investment properties loans, 1-4 family properties loans, and land acquisition loans. CRE loans are primarily originated through Synovus' local market banking divisions. These loans are subject to the same uniform lending policies referenced above. Total CRE loans, which represent 32.1% of the total loan portfolio at March 31, 2014, were \$6.49 billion compared to \$6.47 billion or 32.2% of the total loan portfolio at December 31, 2013 and \$6.42 billion or 33.1% of the total loan portfolio at March 31, 2013. CRE loans grew \$20.6 million or 1.3% annualized from December 31, 2013 and \$63.5 million or 1.0% from March 31, 2013 primarily as a result of growth in investment properties loans being partially offset by planned reductions in 1-4 family properties and land acquisition loans.

Investment Properties Loans

Total investment properties loans as of March 31, 2014 were \$4.70 billion, or 72.4% of the total CRE portfolio and 23.3% of the total loan portfolio, compared to \$4.60 billion or 71.2% of the total CRE portfolio, and 22.9% of the total loan portfolio at December 31, 2013, an increase of \$94.7 million or 8.3% annualized primarily due to initiatives to grow this portion of the loan portfolio. Investment properties loans consist of construction and mortgage loans for income producing properties and are primarily made to finance multi-family properties, hotels, office buildings, shopping centers, warehouses, and other commercial development properties. Synovus' investment properties portfolio is well diversified with no concentration by property type, geography (other than the fact that most of these loans are in Synovus' primary market areas of Georgia, Alabama, Tennessee, South Carolina, and Florida), or tenants. These loans have been underwritten with stressed interest rates and vacancies and are generally recourse in nature with short-term maturities (three years or less) allowing for restructuring opportunities that reduce Synovus' overall risk exposure. The investment properties loans are primarily secured by the property being financed by the loans; however, these loans may also be secured by real estate or other assets beyond the property being financed.

1-4 Family Properties Loans

At March 31, 2014, 1-4 family properties loans totaled \$1.11 billion, or 17.2% of the total CRE portfolio and 5.5% of the total loan portfolio, compared to \$1.16 billion, or 17.9% of the total CRE portfolio and 5.8% of the total loan portfolio at December 31, 2013. 1-4 family properties loans include construction loans to homebuilders, commercial mortgage loans to real estate investors, and residential development loans to developers and are almost always secured by the underlying property being financed by such loans. These properties are primarily located in the markets served by Synovus. Underwriting standards for these types of loans include stricter approval requirements as well as more stringent underwriting standards than current regulatory guidelines. Construction and residential development loans are generally interest-only loans and typically have maturities of three years or less, and 1-4 family rental properties generally have maturities of three to five years, with amortization periods of up to fifteen to twenty years. Although housing and real estate markets in the five southeastern states within Synovus' footprint have stabilized, Synovus has actively worked to reduce its exposure to these types of loans primarily through asset dispositions and charge-offs.

Land Acquisition Loans

Total land acquisition loans were \$674.7 million at March 31, 2014, or 3.3% of the total loan portfolio, a decline of \$30.7 million or 17.6% annualized from December 31, 2013. Land acquisition loans are secured by land held for future development, typically in excess of one year. These loans have short-term maturities and are typically unamortized. Land securing these loans is substantially within the Synovus footprint, and loan terms generally include

personal guarantees from the principals. Loans in this portfolio are underwritten based on the loan to value of the collateral and the capacity of the guarantor(s). Generally, the maximum loan-to-value at the time of origination or refinancing is aligned with regulatory requirements. Synovus has actively worked to reduce its exposure to these types of loans primarily through asset dispositions and charge-offs.

Table of Contents**Retail Loans**

Retail loans at March 31, 2014 totaled \$3.64 billion, representing 18.0% of the total loan portfolio compared to \$3.65 billion, or 18.1% of the total loan portfolio at December 31, 2013 and \$3.43 billion or 17.7% of the total loan portfolio at March 31, 2013. Excluding the impact from the Memphis transaction, total retail loans increased by \$24.1 million or 2.7% annualized from December 31, 2013 primarily due to targeted efforts around certain products including HELOCs and portfolio mortgages. See "Non-GAAP Financial Measures" in this Report for applicable reconciliation. The retail loan portfolio consists of a wide variety of loan products offered through Synovus' banking network, including first and second residential mortgages, HELOCs, credit card, automobile, and other retail loans. The majority of Synovus' retail loans are consumer mortgages and home equity lines secured by first and second liens on residential real estate primarily located in the markets served by Synovus in Georgia, Florida, South Carolina, Alabama, and Tennessee. Credit card loans totaled \$253.1 million at March 31, 2014, including \$58.5 million of commercial credit card loans. The commercial credit card loans relate to Synovus' commercial and small business customers who utilize corporate credit cards for various business activities.

Retail loans are subject to uniform lending policies and consist primarily of loans with strong borrower credit scores (most recently measured as of December 31, 2013). As of December 31, 2013, weighted-average FICO scores within the residential real estate portfolio were 768 for HELOC and 720 for consumer mortgages. Conservative debt-to-income ratios (average HELOC debt to income ratio of loans originated) were maintained in the first quarter of 2014 at 30.8%, as compared to 28.6% in the fourth quarter of 2013. HELOC utilization rates (total amount outstanding as a percentage of total available lines) of 61.0% and 61.3% at March 31, 2014 and December 31, 2013, respectively, and loan-to-value ratios based upon prudent guidelines were maintained to ensure consistency with Synovus' overall risk philosophy. Apart from credit card loans and unsecured loans, Synovus does not originate loans with LTV ratios greater than 100% at origination except for infrequent situations provided that certain underwriting requirements are met. Additionally, at origination, loan maturities are determined based on the borrower's ability to repay (cash flow or earning power of the borrower that represents the primary source of repayment) and the collateralization of the loan, including the economic life of the asset being pledged. Collateral securing these loans provides a secondary source of repayment in that the collateral may be liquidated. Synovus determines the need for collateral on a case-by-case basis. Factors considered include the purpose of the loan, current and prospective credit-worthiness of the customer, terms of the loan, and economic conditions.

Risk levels 1-6 (descending) are assigned based upon a risk score matrix. At least annually, the retail loan portfolio data is sent to a consumer credit reporting agency for a refresh of customers' credit scores. The most recent credit score refresh was completed as of December 31, 2013. Revolving lines of credit are regularly reviewed for any material change in financial circumstances, and when appropriate, the line of credit may be suspended.

Higher-risk consumer loans as defined by the FDIC are consumer loans (excluding consumer loans defined as nontraditional mortgage loans) where, as of the origination date or, if the loan has been refinanced, as of the refinance date, the probability of default within two years is greater than 20%, as determined using a defined historical stress period. These loans are not a part of Synovus' retail lending strategy, and Synovus does not currently develop or offer specific higher-risk consumer loans, alt-A, no documentation or stated income retail residential real estate loan products. Synovus estimates that, as of March 31, 2014, it had \$147.5 million of higher-risk consumer loans (4.1% of the retail portfolio and 0.7% of the total loan portfolio). Included in this amount is approximately \$19 million of accruing TDRs. Synovus makes retail lending decisions based upon a number of key credit risk determinants including credit scores, bankruptcy predictor scores, loan-to-value ratios, and debt-to-income ratios. Prior to 2009, Synovus Mortgage originated Fannie Mae alt-A loans which were generally sold into the secondary market. Synovus Mortgage no longer originates such loans, and as of March 31, 2014, the balance of such loans remaining on the balance sheet was not material.

Other Real Estate

The carrying value of ORE was \$110.8 million, \$112.6 million, and \$155.2 million at March 31, 2014, December 31, 2013, and March 31, 2013, respectively. As of March 31, 2014, the ORE carrying value reflects cumulative write-downs totaling approximately \$91 million, or 45% of the related loans' unpaid principal balance. During the three months ended March 31, 2014 and 2013, \$12.9 million and \$31.2 million, respectively, of loans and other loans

held for sale were foreclosed and transferred to ORE at fair value. During the three months ended March 31, 2014 and 2013, Synovus recognized foreclosed real estate expense, net, of \$5.7 million and \$10.9 million, respectively. These expenses included write-downs for declines in fair value of ORE subsequent to the date of foreclosure and net realized losses resulting from sales transactions totaling \$4.8 million and \$8.8 million for the three months ended March 31, 2014 and 2013, respectively.

At foreclosure, ORE is reported at the lower of cost or fair value less estimated selling costs, which establishes a new cost basis. Subsequent to foreclosure, ORE is evaluated quarterly and reported at fair value less estimated selling costs, not to exceed the new cost basis, determined on the basis of current appraisals, comparable sales and other estimates of fair value obtained principally from independent sources, adjusted for estimated selling costs. Management also considers other factors or recent

Table of Contents

developments such as changes in absorption rates or market conditions from the time of valuation and anticipated sales values considering management's plans for disposition, which could result in an adjustment to lower the collateral value estimates indicated in the appraisals. At the time of foreclosure or initial possession of collateral, any excess of the loan balance over the fair value of the real estate held as collateral, less costs to sell, is recorded as a charge against the allowance for loan losses.

Synovus' objective is to dispose of ORE properties in a timely manner and to maximize net sale proceeds. Synovus has a centralized managed assets division, with the specialized skill set to facilitate this objective. While there is not a defined timeline for their sale, ORE properties are actively marketed through unaffiliated third parties, including real estate brokers and real estate auctioneers. Sales are made on an opportunistic basis, as acceptable buyers and terms are identified. In addition, Synovus may also decide to sell ORE properties in bulk asset sales to unaffiliated third parties, in which case the typical period of marketing the property will likely not occur. In some cases, Synovus is approached by potential buyers of ORE properties or Synovus may contact independent third parties who we believe might have an interest in an ORE property.

Deposits

Deposits provide the most significant funding source for interest earning assets. The following table shows the relative composition of deposits.

Composition of Deposits

(dollars in thousands)	March 31, 2014	% ⁽¹⁾	December 31, 2013	% ⁽¹⁾	March 31, 2013	% ⁽¹⁾
Non-interest bearing demand deposits	\$5,870,570	28.0 %	\$5,642,751	27.0 %	\$5,152,276	25.1 %
Interest bearing demand deposits	3,833,689	18.3	3,969,634	19.0	3,863,174	18.8
Money market accounts, excluding brokered deposits	6,020,118	28.7	6,069,548	29.1	6,127,945	29.8
Savings deposits	640,502	3.1	602,655	2.9	602,970	2.9
Time deposits, excluding brokered deposits	3,220,073	15.4	3,498,200	16.8	3,482,196	16.9
Brokered deposits	1,365,939	6.5	1,094,002	5.2	1,332,632	6.5
Total deposits	\$20,950,891	100.0	\$20,876,790	100.0	\$20,561,193	100.0
Core deposits ⁽²⁾	\$19,584,952	93.5	\$19,782,788	94.8	\$19,228,561	93.5
Core deposits excluding time deposits ⁽²⁾	\$16,364,879	78.1 %	\$16,284,588	78.0 %	\$15,746,365	76.6 %

⁽¹⁾ Deposits balance in each category expressed as percentage of total deposits.

⁽²⁾ See reconciliation of "Non-GAAP Financial Measures" in this Report.

Total deposits at March 31, 2014 increased \$74.1 million, or 1.4% annualized, from December 31, 2013; excluding the impact of the Memphis transaction, total deposits increased \$265.4 million or 5.2% annualized compared to December 31, 2013. Core deposits excluding the impact from the Memphis transaction were flat compared to December 31, 2013 and up \$547.7 million or 2.8% compared to March 31, 2013. Non-interest bearing demand deposits as a percentage of total deposits was 28.0% at March 31, 2014, compared to 27.0% at December 31, 2013 and 25.1% at March 31, 2013. See reconciliation of "Non-GAAP Financial Measures" in this Report.

Time deposits of \$100,000 and greater at March 31, 2014, December 31, 2013 and March 31, 2013 were \$3.01 billion, \$2.91 billion, and \$3.06 billion respectively, and included brokered time deposits of \$1.17 billion, \$880.8 million, and \$1.13 billion, respectively. These larger deposits represented 14.4%, 13.9%, and 14.9% of total deposits at March 31, 2014, December 31, 2013, and March 31, 2013, respectively, and included brokered time deposits which represented 5.6%, 4.2%, and 5.5% of total deposits at March 31, 2014, December 31, 2013, and March 31, 2013, respectively.

At March 31, 2014, total brokered deposits represented 6.5% of Synovus' total deposits compared to 5.2% and 6.5% of total deposits at December 31, 2013 and March 31, 2013, respectively.

Table of Contents

Net Interest Income

The following table summarizes the components of net interest income for the three months ended March 31, 2014 and 2013, including the tax-equivalent adjustment that is required in making yields on tax-exempt loans and investment securities comparable to taxable loans and investment securities. The taxable-equivalent adjustment is based on a 35% Federal income tax rate.

Net Interest Income (in thousands)	Three Months Ended March 31,	
	2014	2013
Interest income	\$228,382	230,391
Taxable-equivalent adjustment	455	618
Interest income, taxable equivalent	228,837	231,009
Interest expense	27,868	30,577
Net interest income, taxable equivalent	\$200,969	200,432

Non-interest Income

Total reported non-interest income for the three months ended March 31, 2014 was \$70.2 million, up from the same period a year ago by \$5.5 million or 8.4%. Adjusted non-interest income, which excludes net investment securities gains and the current year net gain of \$5.8 million from the Memphis transaction, declined \$1.6 million or 2.5% compared to the same period a year ago. See reconciliation of "Non-GAAP Financial Measures" in this Report. The following table shows the principal components of non-interest income.

Non-interest Income (in thousands)	Three Months Ended March 31,	
	2014	2013
Service charges on deposit accounts	\$19,214	19,521
Fiduciary and asset management fees	11,033	10,971
Brokerage revenue	6,213	7,594
Mortgage banking income	3,511	6,917
Bankcard fees	7,518	7,064
Investment securities gains, net	1,331	45
Other fee income	4,863	5,487
Decrease in fair value of private equity investments, net	(250) (257
Gain on sale of Memphis branches, net	5,789	—
Other non-interest income	10,960	7,379
Total non-interest income	\$70,182	64,721

Principal Components of Non-interest Income

Service charges on deposit accounts for the three months ended March 31, 2014 were \$19.2 million, down \$307 thousand or 1.6% compared to the three months ended March 31, 2013. Service charges on deposit accounts consist of NSF fees, account analysis fees, and all other service charges. NSF fees for the three months ended March 31, 2014 were \$8.4 million compared to \$8.5 million for the same period a year earlier. Account analysis fees were \$6.0 million, up \$477 thousand or 8.7% compared to the three months ended March 31, 2013 primarily due to pricing structure changes. All other service charges on deposit accounts, which consist primarily of monthly fees on retail demand deposit and saving accounts, were \$4.9 million for the three months ended March 31, 2014, down \$617 thousand or 11.3% compared to the same period in 2013.

Fiduciary and asset management fees are derived from providing estate administration, employee benefit plan administration, personal trust, corporate trust, corporate bond, investment management and financial planning services. Fiduciary and asset management fees were \$11.0 million for the three months ended March 31, 2014, an increase of \$62 thousand or 0.6% compared to the same period in 2013.

Brokerage revenue, which consists primarily of brokerage commissions, was \$6.2 million for the three months ended March 31, 2014. Compared to the three months ended March 31, 2013, brokerage revenue was down \$1.4 million or

18.2%. The year-over-year decline in brokerage revenue is largely due to market uncertainty and the unfavorable impact of severe winter weather on transactions.

56

Table of Contents

Mortgage banking income decreased \$3.4 million or 49.2% for the three months ended March 31, 2014, when compared to the same period in 2013. The decline was primarily due to a decrease in mortgage production with a significant decline in refinancing volume that began in the third quarter of 2013. Mortgage banking income is expected to be relatively stable to increasing from first quarter 2014 levels due to continued benefits from strategic talent additions.

Bankcard fees increased \$454 thousand or 6.4% for the three months ended March 31, 2014 compared to the same period in 2013. Bankcard fees consist primarily of credit card interchange fees and debit card interchange fees. Debit card interchange fees were \$3.3 million, up 6.8% for the three months ended March 31, 2014 compared to the same period in 2013. Credit card interchange fees were \$5.2 million, up 5.5% for the three months ended March 31, 2014 compared to the same period in 2013.

The gain on sale of Memphis branches consists of a gain, net of associated costs, from the sale of certain loans, premises, deposits, and other assets and liabilities of the Memphis, Tennessee operations of Trust One Bank, a division of Synovus Bank. Please see "Note 3 - Sale of Branches", of this Report for further explanation of this transaction.

Other fee income includes fees for letters of credit, safe deposit box fees, access fees for automated teller machine use, customer swap dealer fees, and other service charges. Other fee income declined \$624 thousand or 11.4% for the three months ended March 31, 2014 compared to the same period in 2013. The decline in other fee income was largely due to a decline in customer swap dealer fees.

The main components of other non-interest income are income from company-owned life insurance policies, insurance commissions, card sponsorship fees, and other miscellaneous items. Other non-interest income increased \$3.6 million or 48.5% for the three months ended March 31, 2014 compared to the same period in 2013. Other non-interest income for the current year included a \$3.1 million gain from the sale of a branch property.

Non-interest Expense

Non-interest expense for the three months ended March 31, 2014 was \$184.2 million, up \$1.9 million or 1.0% compared to the three months ended March 31, 2013. Adjusted non-interest expense for the three months ended March 31, 2014, which excludes restructuring charges, credit costs, and Visa indemnification charges, increased \$3.3 million, or 2.0% compared to the same period in 2013. See "Non-GAAP Financial Measures" in this Report for applicable reconciliation. New expense savings initiatives of approximately \$30 million are underway to be fully implemented during 2014. These expense savings initiatives are expected to be offset, however, by investments in talent, technology, and marketing.

The following table summarizes the components of non-interest expense for the three months ended March 31, 2014 and 2013.

Non-interest Expense

(in thousands)	Three Months Ended March 31,	
	2014	2013
Salaries and other personnel expense	\$93,445	93,917
Net occupancy and equipment expense	26,056	24,167
Third-party services	10,097	9,929
FDIC insurance and other regulatory fees	9,719	8,480
Professional fees	7,677	7,095
Foreclosed real estate expense, net	5,681	10,940
Losses on other loans held for sale, net	2,266	165
Visa indemnification charges	396	37
Restructuring charges	8,577	4,850
Other operating expenses	20,247	22,706
Total non-interest expense	\$184,161	182,286

Total employees were 4,646 at March 31, 2014, down 148, or 3.1%, from 4,794 employees at March 31, 2013. Salaries and other personnel expenses decreased \$472 thousand, or 0.5%, for the three months ended March 31, 2014 compared to the same period in 2013, primarily due to the decrease in headcount, but partially offset by increases in incentive compensation.

Net occupancy and equipment expense increased \$1.9 million, or 7.8%, during the three months ended March 31, 2014 compared to the same period in 2013 reflecting Synovus' recent investments in technology.

FDIC insurance costs and other regulatory fees increased \$1.2 million or 14.6% for the three months ended March 31, 2014 compared to the same period in 2013, primarily due to the phase-out from the earnings component measure of the deferred tax asset recapture of \$637.5 million recorded in the fourth quarter of 2012.

Table of Contents

Professional fees for the three months ended March 31, 2014 were \$7.7 million, up \$582 thousand or 8.2% compared to the same period in 2013. The increase in professional fees is mostly from increases in consulting expense.

Foreclosed real estate costs of \$5.7 million decreased \$5.3 million or 48.1% for the three months ended March 31, 2014 compared to the same period in 2013. The decline was largely a result of lower levels of write-downs from declines in fair value of ORE, as well as lower ORE inventory due to a reduction in the level of foreclosures. For further discussion of foreclosed real estate, see the section captioned "Other Real Estate" of this Report.

Losses on other loans held for sale of \$2.2 million for the three months ended March 31, 2014 increased \$2.1 million compared to the same period a year ago with losses mostly related to the sale of one loan.

Other operating expenses declined \$2.5 million for the three months ended March 31, 2014 compared to the same period in 2013. The three months ended March 31, 2014 includes a \$2.9 million recovery (credit) upon the termination of a letter of credit which was previously fully reserved.

In January 2014, Synovus announced the planned implementation during 2014 of new expense savings initiatives which are expected to result in annualized cost savings of \$30 million. The initiatives include planned workforce reductions as well as planned reductions in occupancy expenses. Synovus began to implement these initiatives during the first quarter of 2014, undertaking the first targeted staff reductions. As a result of these actions, Synovus recorded aggregate restructuring charges of \$8.6 million during the three months ended March 31, 2014, consisting primarily of \$8.0 million in severance charges related to employees identified for involuntary termination. To complete the implementation of the \$30 million expense savings initiative, Synovus expects to incur additional restructuring charges over the nine months ending December 31, 2014. Restructuring charges arising from the implementation of this initiative (and/or other future initiatives) could have a significant impact on Synovus' results of operations of a particular future period.

The projected annualized cost savings of \$30 million relate only to the implementation of the above mentioned expense savings initiatives. The projected reduction in expenses during 2014 resulting from the implementation of these initiatives is expected to be fully offset by incremental expenses associated with investments in talent, technology, and marketing. Management currently expects that adjusted non-interest expense for the year ending December 31, 2014 will be approximately the same as in 2013 (\$670 million). See "Non-GAAP Financial Measures" in Synovus' 2013 Form 10-K for applicable reconciliation.

Income Tax Expense

Income tax expense was \$28.6 million and \$17.0 million for the three months ended March 31, 2014 and March 31, 2013, respectively. Synovus expects to record income tax expense during 2014 at an annual effective tax rate of approximately 37%. The actual effective income tax rate in future periods could be affected by items that are infrequent in nature, such as new legislation and changes in the deferred tax asset valuation allowance.

At March 31, 2014, the net deferred tax asset, net of valuation allowance, was \$712.1 million compared to \$744.6 million at December 31, 2013. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts and their respective tax bases, including operating losses and tax credit carryforwards.

Management assesses the valuation allowance recorded against deferred tax assets at each reporting period. The determination of whether a valuation allowance for deferred tax assets is appropriate is subject to considerable judgment and requires an evaluation of all positive and negative evidence. Based on the assessment of all the positive and negative evidence at March 31, 2014, management has concluded that it is more likely than not that \$712.1 million of the net deferred tax asset will be realized based upon future taxable income. If actual results differ significantly from the current estimates of future taxable income, the valuation allowance may need to be increased. Such an increase to the deferred tax asset valuation allowance could have a material adverse effect on Synovus' financial condition or results of operations.

Synovus expects to realize the \$712.1 million net deferred tax asset well in advance of the statutory carryforward period. At March 31, 2014, \$194.5 million of existing deferred tax assets are not related to net operating losses or credits and therefore, have no expiration date. Approximately \$422.7 million of the remaining deferred tax assets relate to federal net operating losses, which will expire in installments annually beginning in 2028 through 2032. Additionally, \$62.1 million of the deferred tax assets relate to state NOLs which expire in installments through the tax

year 2034. Tax credit carryforwards at March 31, 2014 include federal alternative minimum tax credits totaling \$22.9 million, which have an unlimited carryforward period. Other federal and state tax credits at March 31, 2014 total \$24.7 million and have expiration dates through the tax year 2034.

A legislative proposal has called for lowering the current 35% federal corporate income tax rate. If the corporate income tax rate is lowered, it would reduce the value of the deferred tax assets which would result in additional income tax expense in the period that such lower rate is enacted. Changes in future enacted income tax rates could be significant to Synovus' financial position, results of operations, or cash flows.

Table of Contents

The Tax Reform Act of 1986 contains provisions that limit the utilization of NOL carryovers if there has been an “ownership change” as defined in Section 382 of the IRC. In general, this would occur if ownership of common stock held by one or more 5% shareholders increased by more than 50 percentage points over their lowest pre-change ownership within a three year period. If Synovus experiences such an ownership change, the utilization of pre-change NOLs to reduce future federal income tax obligations could be limited. To reduce the likelihood of such an ownership change, Synovus adopted a Rights Plan in 2010 that was ratified by Synovus shareholders in 2011. The Rights Plan, as amended on April 24, 2013 and ratified by Synovus shareholders in 2014, will expire on April 28, 2016.

CREDIT QUALITY, CAPITAL RESOURCES AND LIQUIDITY**Credit Quality**

Synovus continuously monitors the credit quality of its loan portfolio and maintains an allowance for loan losses that management believes is sufficient to absorb probable losses inherent in its loan portfolio. All credit quality measures continued to show improvement during the first quarter of 2014.

The table below includes selected credit quality metrics.

Credit Quality Metrics (dollars in thousands)	As of and for the Three Months Ended,				
	March 31, 2014	December 31, 2013	September 30, 2013	June 30, 2013	March 31, 2013
Provision for loan losses	\$9,511	14,064	6,761	13,077	35,696
Other credit costs	8,128	8,285	15,603	10,887	13,595
Total credit costs	\$17,639	22,349	22,364	23,964	49,291
Non-performing loans	384,324	416,300	450,879	483,464	513,227
Impaired loans held for sale ⁽¹⁾	3,120	10,685	9,351	12,083	9,129
Other real estate	110,757	112,629	126,640	139,653	155,237
Non-performing assets	\$498,201	539,614	586,870	635,200	677,593
Non-performing loans as a % of total loans	1.91	% 2.08	2.29	2.47	2.65
Non-performing assets as a % of total loans, other loans held for sale, and ORE	2.46	% 2.67	2.96	3.21	3.47
NPL inflows	\$35,460	41,175	47,446	66,860	83,901

⁽¹⁾ Represent only impaired loans that have been specifically identified to be sold. Impaired loans held for sale are carried at the lower of cost or fair value, less costs to sell, based primarily on estimated sales proceeds net of selling costs.

Table of Contents

Total credit costs

Total credit costs (provision for loan losses plus other credit costs which consist primarily of foreclosed real estate expense, net, provision for losses on unfunded commitments, and charges related to other loans held for sale) for the quarters ended March 31, 2014 and March 31, 2013 were \$17.6 million and \$49.3 million, respectively, including provision for loan losses of \$9.5 million and \$35.7 million, respectively, and expenses related to foreclosed real estate of \$5.7 million and \$10.9 million, respectively. Total credit costs improved 21.1% on a sequential quarter basis and improved 64.2% from the first quarter of 2013, driven by a 73.4% decrease in provision for loan losses. Synovus currently expects that future credit costs will be similar to the current and prior quarters as further credit quality improvements are partially offset by provision for loan losses associated with loan growth.

Non-performing Assets

Total NPAs were \$498.2 million at March 31, 2014, a \$41.4 million decrease from December 31, 2013 and a \$179.4 million or 26.5% decrease from \$677.6 million at March 31, 2013. The year-over-year and sequential quarter declines in non-performing assets were primarily driven by lower NPL inflows and asset dispositions. Total non-performing assets as a percentage of total loans, other loans held for sale, and other real estate were 2.46% at March 31, 2014 compared to 2.67% at December 31, 2013, and 3.47% at March 31, 2013. Synovus currently expects that NPAs and NPLs will continue on an overall downward trend throughout 2014.

NPL inflows during the first quarter of 2014 were \$35.5 million, down \$48.4 million or 57.7% from the first quarter of 2013 additions of \$83.9 million.

NPL Inflows by Portfolio Type

(in thousands)	Three Months Ended				
	March 31, 2014	December 31, 2013	September 30, 2013	June 30, 2013	March 31, 2013

Total NPL inflows	\$35,460	41,175	47,446	66,860	83,901

Past Due Loans

As a percentage of total loans outstanding, loans 90 days past due and still accruing interest continue to be at very low levels and were 0.03% at both March 31, 2014 and 2013 and 0.02% at December 31, 2013. These loans are in the process of collection, and management believes that sufficient collateral value securing these loans exists to cover contractual interest and principal payments.

Troubled Debt Restructurings

For consumer mortgage borrowers experiencing financial difficulties that evidence that current monthly payments are unsustainable, Synovus has been providing through its consumer real estate home affordability program (HAP), a below market interest rate given the borrower's credit risk and/or an extension of the maturity and amortization period beyond loan policy limits for renewed loans. All consumer loans that have been restructured or modified under HAP

are TDRs. In December 2013, the home affordability program ended, and any of the loans in this program that are renewed, refinanced, or modified will no longer be able to utilize this program. As of March 31, 2014, there were \$2.8 million in accruing TDRs that remain part of the HAP program.

Accruing TDRs were \$495.4 million at March 31, 2014, compared to \$556.4 million at December 31, 2013 and \$623.9 million at March 31, 2013. At March 31, 2014, the allowance for loan losses allocated to these accruing TDRs was \$24.9 million compared

Table of Contents

to \$27.7 million at December 31, 2013 and \$38.9 million at March 31, 2013. Accruing TDRs are considered performing because they are performing in accordance with the restructured terms. At March 31, 2014, 98% of accruing TDRs were current, and 48.2% or \$238.7 million of accruing TDRs were graded as Pass (22.3%) or Special Mention (25.9%) loans. At March 31, 2014, troubled debt restructurings (accruing and non-accruing) were \$690.1 million, a decrease of \$89.7 million or 11.5% compared to December 31, 2013.

Accruing TDRs by Risk Grade (dollars in thousands)	March 31, 2014		December 31, 2013

---------------------	-----------	-------	-----	---------	--------

Non-accruing TDRs may generally be returned to accrual status if there has been a period of performance, consisting usually of at least a six month sustained period of repayment performance in accordance with the terms of the agreement. Consistent with regulatory guidance, a TDR will generally no longer be reported as a TDR after a period of performance which is generally a minimum of six months and after the loan has been reported as a TDR at a year-end reporting date, and if at the time of the

Table of Contents

modification, the interest rate was at market, considering the credit risk associated with the borrower. Non-accruing TDRs were \$194.7 million at March 31, 2014 compared to \$213.4 million at December 31, 2013.

Non-accruing TDRs by Type

(in thousands)	March 31, 2014	December 31, 2013

Potential Problem Loans

Potential problem loans are defined by management as being certain performing loans with a well-defined weakness where there is known information about possible credit problems of borrowers which causes management to have concerns about the ability of such borrowers to comply with the present repayment terms of such loans. Potential problem commercial loans consist of commercial Substandard accruing loans but exclude loans 90 days past due and still accruing interest and accruing TDRs classified as Substandard. Synovus had \$225.0 million of potential problem commercial loans at March 31, 2014 compared to \$239.3 million and \$374.3 million at December 31, 2013 and March 31, 2013, respectively. Synovus cannot predict at this time whether these potential problem loans ultimately will become non-performing loans or result in losses.

Net Charge-offs

Net charge-offs for the three months ended March 31, 2014 were \$15.2 million, or 0.30% as a percentage of average loans annualized, a decrease of \$42.1 million or 73.5% compared to \$57.3 million or 1.18% as a percentage of average loans annualized for the three months ended March 31, 2013. The decline in net charge-offs was driven by a decline in NPL inflows, lower impairment charge-offs on existing collateral dependent impaired loans, and a decrease in retail net charge-offs. Net charge-offs for the three months ended March 31, 2014 do not include \$1.0 million of net charge-offs relating to the sale of certain loans of the Memphis, Tennessee operations of Trust One Bank, a division of Synovus Bank, in January 2014.

Table of Contents

The following tables show net charge-offs by loan type for the three months ended March 31, 2014 and 2013.

Net Charge-offs by Loan Type

(in thousands)	Three Months Ended March 31,	
	2014	2013

Small business	572	2,162
Commercial and industrial	6,083	14,800
Home equity lines	1,307	2,931
Consumer mortgages	775	3,896
Credit cards	1,086	1,865
Other retail loans	211	1,163
Retail	3,379	9,855
Total net charge-offs	\$15,181	\$57,329

Provision for Loan Losses and Allowance for Loan Losses

For the three months ended March 31, 2014, the provision for loan losses was \$9.5 million, a decrease of \$26.2 million or 73.4% compared to the three months ended March 31, 2013. The decrease in the provision for loan losses for the three months ended March 31, 2014 was primarily a result of continued improvement in credit quality trends, including:

- Reduced net loan charge-offs by \$42.1 million or 73.5% from \$57.3 million for the three months ended March 31, 2013 to \$15.2 million for the three months ended March 31, 2014;

- Reduced NPL inflows by \$48.4 million or 57.7% from \$83.9 million for the three months ended March 31, 2013 to \$35.5 million for the three months ended March 31, 2014;

- Reduced loans rated Special Mention by \$530.7 million or 41.7% from \$1.27 billion at March 31, 2013 to \$740.6 million at March 31, 2014;

- Reduced loans rated Substandard accruing by \$157.2 million or 24.0% from \$656.3 million at March 31, 2013 to \$499.1 million at March 31, 2014; and

- Pass rated loans as a percentage of total loans were 91.9% at March 31, 2014 compared to 87.4% at March 31, 2013. The allowance for loan losses at March 31, 2014 was \$300.9 million or 1.49% of total loans compared to \$307.6 million or 1.53% of total loans at December 31, 2013 and \$351.8 million or 1.82% of total loans at March 31, 2013. The decrease in the allowance for loan losses is primarily due to continued improvement in credit quality trends, which includes reduced NPL inflows, NPLs and net charge-offs, as well as improved risk grade migration trends and stable collateral values.

Table of Contents

Capital Resources

Synovus is required to comply with the capital adequacy standards established by the Federal Reserve Board and our subsidiary bank, Synovus Bank, must comply with similar capital adequacy standards established by the FDIC.

Synovus has always placed great emphasis on maintaining a solid capital base and continues to satisfy applicable regulatory capital requirements.

The following table presents certain ratios used to measure Synovus and Synovus Bank's capitalization.

Capital Ratios

(dollars in thousands)	March 31, 2014	December 31, 2013

Tangible common equity to tangible assets ratio ⁽¹⁾		
Synovus Financial Corp.	10.78	% 10.68

⁽¹⁾ See reconciliation of "Non-GAAP Financial Measures" in this Report.

As a financial holding company, Synovus and its subsidiary bank, Synovus Bank, are required to maintain capital levels required for a well-capitalized institution as defined by federal banking regulations. The capital measures used by the federal banking regulators include the total risk-based capital ratio, the Tier 1 risk-based capital ratio, and the leverage ratio. Synovus Bank is a state-chartered bank under the regulations of the GA DBF. Under applicable regulations, Synovus Bank is well-capitalized if it has a total risk-based capital ratio of 10% or greater, a Tier 1 capital ratio of 6% or greater, a leverage ratio of 5% or greater, and is not subject to any written agreement, order, capital directive, or prompt corrective action directive from a federal and/or state banking regulatory agency to meet and maintain a specific capital level for any capital measure. However, even if Synovus Bank satisfies all applicable quantitative criteria to be considered well-capitalized, the regulations also establish procedures for "downgrading" an institution to a lower capital category based on supervisory factors other than capital. Synovus Bank had the required capital levels to qualify as well capitalized as of March 31, 2014. Management is not currently aware of the existence of any conditions or events occurring subsequent to March 31, 2014 which would affect the well-capitalized classification.

On July 26, 2013, Synovus redeemed all 967,870 shares of its Series A Preferred Stock issued to the U.S. Treasury under the CPP established under TARP. Over two-thirds of the TARP redemption was funded by internally available funds from an upstream dividend of \$680 million from Synovus Bank. The balance of the redemption was funded by net proceeds from the following equity offerings completed in July 2013. On July 24, 2013, Synovus completed a public offering of 59,870,550 shares of its Common Stock at \$3.09 per share. The offering generated net proceeds of

\$175.2 million. On July 25, 2013, Synovus completed a public offering of \$130 million of Series C Preferred Stock. The offering generated net proceeds of \$126.0 million. From the date of issuance to, but excluding, August 1, 2018, the rate for declared dividends is 7.875% per annum. From and including August 1, 2018, the dividend rate will change to a floating rate equal to the three-month LIBOR plus a spread of 6.39% per annum.

Table of Contents

During 2013, the Federal Reserve released final United States Basel III regulatory capital rules implementing the global regulatory capital reforms of Basel III and certain changes required by the Dodd-Frank Wall Street Reform and Consumer Protection Act. The FDIC and OCC also approved the final rule during 2013. The rule applies to all banking organizations that are currently subject to regulatory capital requirements as well as certain savings and loan holding companies. The rule strengthens the definition of regulatory capital, increases risk-based capital requirements, and makes selected changes to the calculation of risk-weighted assets. The rule becomes effective January 1, 2015, for Synovus and most banking organizations, subject to a transition period for several aspects of the rule, including the new minimum capital ratio requirements, the capital conservation buffer, and the regulatory capital adjustments and deductions. Based on management's interpretation of the regulation, Synovus' estimated Tier1 common equity ratio under Basel III as of March 31, 2014 is 10.03%, which is well in excess of the minimum requirements. See reconciliation of "Non-GAAP Financial Measures" in this Report.

There are limitations on the inclusion of deferred tax assets for regulatory capital based on Tier 1 capital levels and projected future earnings (Basel III revises limitation criteria effective January 1, 2015). As of March 31, 2014, total disallowed deferred tax assets were \$579.5 million or 2.59% of risk weighted assets, compared to \$618.5 million or 2.77% of risk weighted assets at December 31, 2013. The DTA limitation will continue to decrease over time, thus creating additional regulatory capital in future periods.

Management currently believes, based on internal capital analyses and earnings projections, that Synovus' capital position is adequate to meet current and future regulatory minimum capital requirements.

Dividends

Synovus has historically paid a quarterly cash dividend to the holders of its Common Stock. Management closely monitors trends and developments in credit quality, liquidity (including dividends from subsidiaries), financial markets and other economic trends, as well as regulatory requirements regarding the payment of dividends, all of which impact Synovus' capital position. Management will continue to periodically review dividend levels to determine if they are appropriate in light of these factors. Synovus' ability to pay dividends on its capital stock, including the Common Stock and the Series C Preferred Stock, is partially dependent upon dividends and distributions that it receives from its bank and non-banking subsidiaries, which are restricted by various regulations administered by federal and state bank regulatory authorities, as further discussed below in the section titled "Liquidity." On July 19, 2013, Synovus received an upstream dividend of \$680.0 million from Synovus Bank, which Synovus utilized to redeem its \$967.9 million of Series A Preferred Stock on July 26, 2013. During the first quarter of 2014, Synovus Bank received regulatory approval and paid an upstream dividend of \$20.0 million to Synovus Financial Corp. For the remainder of 2014, Synovus Bank expects to submit quarterly requests to the GA DBF and FDIC for approval of future upstream dividends of \$20.0 million per quarter.

Synovus declared and paid dividends of \$0.01 per common share for the three months ended March 31, 2014 and 2013. In addition to dividends paid on its Common Stock, Synovus paid dividends of \$2.6 million during the three months ended March 31, 2014 on its Series C Preferred Stock. Synovus paid dividends of \$12.1 million to the Treasury on its Series A Preferred Stock during the three months ended March 31, 2013. On July 26, 2013, Synovus redeemed all 967,870 shares of its Series A Preferred Stock issued to the U.S. Treasury under the CPP established under TARP. On July 25, 2013 Synovus completed a public offering of \$130 million of Series C Preferred Stock. For the Series C Preferred Stock, from the date of issuance to, but excluding, August 1, 2018, the rate for declared dividends is 7.875% per annum. From and including August 1, 2018, the dividend rate will change to a floating rate equal to the three-month LIBOR plus a spread of 6.39% per annum.

Liquidity

Liquidity represents the extent to which Synovus has readily available sources of funding needed to meet the needs of depositors, borrowers and creditors, to support asset growth, and to otherwise sustain operations of Synovus and its subsidiaries, at a reasonable cost, on a timely basis, and without adverse consequences. ALCO monitors Synovus' economic, competitive, and regulatory environment and is responsible for measuring, monitoring, and reporting on liquidity and funding risk, interest rate risk, and market risk and has the authority to establish policies relative to these risks. ALCO, operating under liquidity and funding policies approved by the Board of Directors, actively analyzes contractual and anticipated cash flows in order to properly manage Synovus' liquidity position.

Contractual and anticipated cash flows are analyzed under normal and stressed conditions to determine forward looking liquidity needs and sources. Synovus analyzes liquidity needs under various scenarios of market conditions and operating performance. This analysis includes stress testing and measures expected sources and uses of funds under each scenario. Emphasis is placed on maintaining numerous sources of current and potential liquidity to allow Synovus to meet its obligations to depositors, borrowers, and creditors on a timely basis.

65

Table of Contents

Liquidity is generated primarily through maturities and repayments of loans by customers, maturities and sales of investment securities, deposit growth, and access to sources of funds other than deposits. Management continuously monitors and maintains appropriate levels of liquidity so as to provide adequate funding sources to manage customer deposit withdrawals, loan requests, and funding maturities. Liquidity is also enhanced by the acquisition of new deposits. Each of the banking divisions monitors deposit flows and evaluates local market conditions in an effort to retain and grow deposits.

Synovus Bank also generates liquidity through the national deposit markets. Synovus Bank issues longer-term certificates of deposit across a broad geographic base to diversify its sources of funding and liquidity. Access to these deposits could become more limited if Synovus Bank's asset quality and financial performance were to significantly deteriorate. Synovus Bank has the capacity to access funding through its membership in the FHLB System. At March 31, 2014, Synovus Bank had access to incremental funding, subject to available collateral and FHLB credit policies, through utilization of FHLB advances.

In addition to bank level liquidity management, Synovus must manage liquidity at the Parent Company for various operating needs including potential capital infusions into subsidiaries, the servicing of debt, the payment of dividends on our Common Stock and Preferred Stock, and payment of general corporate expenses. The primary source of liquidity for Synovus consists of dividends from Synovus Bank which is governed by certain rules and regulations of the GA DBF and FDIC. During 2012 and 2011, Synovus Bank did not pay dividends to the Parent Company. On July 19, 2013, the Parent Company received a \$680.0 million dividend from Synovus Bank, which Synovus utilized along with the net proceeds from its July Common Stock and Series C Preferred Stock offerings to redeem its \$967.9 million of Series A Preferred Stock on July 26, 2013. During the first quarter of 2014, Synovus Bank received regulatory approval and paid an upstream dividend of \$20.0 million to Synovus Financial Corp. Synovus Bank expects to submit quarterly requests to the GA DBF and FDIC for future upstream dividends. Synovus' ability to receive dividends from Synovus Bank in future periods will depend on a number of factors, including, without limitation, Synovus Bank's future profits, asset quality and overall condition. See "Part I - Item 1A. Risk Factors - Changes in the cost and availability of funding due to changes in the deposit market and credit market, or the way in which we are perceived in such markets, may adversely affect our capital resources, liquidity and financial results." of Synovus' 2013 Form 10-K.

As previously disclosed, in 2009, Synovus entered into the Synovus MOU with the Atlanta Fed and the GA DBF. The Atlanta Fed and the GA DBF terminated the Synovus MOU effective as of April 22, 2013, and replaced it with a resolution adopted by Synovus' Board of Directors relating to, among other things, continued emphasis on improving asset quality and maintaining strong levels of capital and liquidity. The Board resolutions were terminated on April 23, 2014. As previously disclosed, in 2010, Synovus Bank entered into the Synovus Bank MOU. The FDIC and the GA DBF terminated the Synovus Bank MOU effective as of May 29, 2013, and replaced it with a resolution adopted by Synovus Bank's Board of Directors relating to, among other things, continued emphasis on improving asset quality and maintaining strong levels of capital and liquidity. The Board resolutions were terminated on April 23, 2014. On February 13, 2012, Synovus issued \$300 million aggregate principal amount of the 2019 Senior Notes in a public offering for aggregate proceeds of \$292.6 million, net of discount and debt issuance costs. Concurrent with this offering, Synovus announced a Tender Offer for any and all of its 2013 Notes, with a total principal amount outstanding of \$206.8 million. An aggregate principal amount of \$146.1 million of the 2013 Notes, representing 71% of the outstanding principal amount, were tendered in the Tender Offer. Synovus paid total consideration of \$146.1 million for these notes, which was funded from a portion of the net proceeds of the 2019 Senior Notes.

Synovus has historically enjoyed a solid reputation in the capital markets and in the past few years has accessed the capital markets to provide needed liquidity resources, including its public offerings completed in 2009, 2010, 2012 and 2013. Despite the success of these public offerings, there can be no assurance that Synovus will be able to obtain additional new borrowings or issue additional equity on favorable terms, if at all. See "Part I – Item 1A. Risk Factors - Our status as a non-investment grade issuer could increase the cost of our funding from the capital markets and impact our liquidity." of Synovus' 2013 Form 10-K.

Synovus presently believes that the sources of liquidity discussed above, including existing liquid funds on hand, are sufficient to meet its anticipated funding needs through the near future. However, if economic conditions were to

significantly deteriorate, regulatory capital requirements for Synovus or Synovus Bank increase as the result of regulatory directives or otherwise, or Synovus believes it is prudent to enhance current liquidity levels, then Synovus may seek additional liquidity from external sources. See "Part I – Item 1A. Risk Factors - Changes in the cost and availability of funding due to changes in the deposit market and credit market, or the way in which we are perceived in such markets, may adversely affect our capital resources, liquidity and financial results." of Synovus' 2013 Form 10-K.

Earning Assets and Sources of Funds

Average total assets for the three months ended March 31, 2014 increased \$111.9 million, or 0.4%, to \$26.33 billion as compared to \$26.21 billion for the first three months of 2013. Average earning assets increased \$352.9 million, or 1.5%, in the first three months of 2014 compared to the same period in 2013 and represented 91.3% of average total assets at March 31, 2014, as compared to 90.4% at March 31, 2013. The increase in average earning assets resulted from a \$683.5 million increase in average

Table of Contents

loans, net, and a \$197.5 million increase in average taxable investment securities. The increase was partially offset by a \$408.4 million reduction in average interest bearing funds at the Federal Reserve Bank and other short-term investments and a \$140.8 million decrease in average mortgage loans held for sale. Average interest bearing liabilities increased \$343.5 million, or 2.0%, to \$17.56 billion for the first three months of 2014 compared to the same period in 2013. The increase in funding sources utilized to support earning assets was driven by a \$468.3 million increase in long-term debt. The increase was partially offset by a \$145.8 million decrease in time deposits.

Net interest income for the three months ended March 31, 2014 was \$200.5 million, an increase of \$0.7 million, or 0.35%, compared to \$199.8 million for the three months ended March 31, 2013.

The net interest margin for the three months ended March 31, 2014 was 3.39%, down 4 bps from 3.43% for the three months ended March 31, 2013. Earning asset yields decreased by 9 bps compared to the three months ended March 31, 2013 while the effective cost of funds decreased by 5 bps. The primary factor negatively impacting earning asset yields was a 27 bp decline in loan yields. Loan yield decreases were primarily driven by downward pricing of maturing and prepaid loans. Factors positively impacting earning asset yields included a 49 bp increase in taxable investment securities yields and a reduction in lower yielding interest bearing funds at the Federal Reserve Bank and other short-term investments. The effective cost of funds was positively impacted by the downward repricing of maturing certificates of deposit and a decrease in the cost of long term debt. As compared to the three months ended March 31, 2013, core certificates of deposit declined by 13 bps and the cost of long term debt declined by 74 bps. See reconciliation of core deposits in the "Non-GAAP Financial Measures" in this Report.

On a sequential quarter basis, net interest income decreased by \$3.8 million due to two fewer calendar days and the net interest margin increased by 1 bp to 3.39%. Yields on earning assets increased 1 bp and the effective cost of funds was unchanged. Earning asset yields were positively impacted by an improvement in the earning asset mix as average loans increased by \$255.7 million and lower yielding interest bearing funds at the Federal Reserve Bank and other short-term investments decreased by \$290.4 million.

Current expectations are for slight downward pressure on the net interest margin during the remainder of 2014. This expectation is primarily due to a projected modest decline in realized loan yields.

Table of Contents

Quarterly yields earned on average interest-earning assets and rates paid on average interest-bearing liabilities for the five most recent quarters are presented below.

Average Balances, Interest, and Yields (dollars in thousands) (yields and rates annualized)	2014 First Quarter	2013 Fourth Quarter	Third Quarter	Second Quarter	First Quarter

(1) Average loans are shown net of unearned income. Non-performing loans are included. Interest income includes fees as follows: 2014 - \$6.5 million, 2013 - \$5.8 million.

(2) Reflects taxable-equivalent adjustments, using the statutory federal income tax rate of 35% in adjusting interest on tax-exempt loans and investment securities to a taxable-equivalent basis.

(3) Includes average net unrealized gains (losses) on investment securities available for sale of (\$6.0) million and \$41.5 million for the three months ended March 31, 2014 and 2013, respectively.

Table of Contents

Market Risk Analysis

Interest rate risk is the primary market risk to which Synovus is potentially exposed. Synovus measures its sensitivity to changes in market interest rates through the use of a simulation model. Synovus uses this simulation model to determine a baseline net interest income forecast and the sensitivity of this forecast to changes in interest rates. These simulations include all of Synovus' earning assets and liabilities. Forecasted balance sheet changes, primarily reflecting loan and deposit growth and mix forecasts, are included in the periods modeled. Anticipated deposit mix changes in each interest rate scenario are also included in the periods modeled. Projected rates for loans and deposits are based on management's outlook and local market conditions.

Synovus has modeled its baseline net interest income forecast assuming a flat interest rate environment with the federal funds rate at the Federal Reserve's current targeted range of 0% to 0.25% and the current prime rate of 3.25%. Due to the targeted federal funds rate being at or near 0% at this time, only rising rate scenarios have been modeled. Synovus has modeled the impact of a gradual increase in short-term rates of 100 and 200 basis points to determine the sensitivity of net interest income for the next twelve months. Synovus continues to maintain a modestly asset sensitive position which would be expected to benefit net interest income in a rising interest rate environment. The following table represents the estimated sensitivity of net interest income to these changes in short term interest rates at March 31, 2014, with comparable information for December 31, 2013.

Change in Short-term Interest Rates (in basis points)	Estimated % Change in Net Interest Income as Compared to Unchanged Rates (for the next twelve months)	
	March 31, 2014	December 31, 2013
+200	5.8%	5.0%
+100	3.6%	3.2%
Flat	—%	—%

Several factors could serve to diminish or eliminate this asset sensitivity. These factors include a higher than projected level of deposit customer migration to higher cost deposits, such as certificates of deposit, which would increase total interest expense and serve to reduce the realized level of asset sensitivity. Another factor which could impact the realized interest rate sensitivity is the repricing behavior of interest bearing non-maturity deposits. Assumptions for repricing are expressed as a beta relative to the change in the prime rate. For instance, a 50% beta would correspond to a deposit rate that would increase 0.5% for every 1% increase in the prime rate. Projected betas for interest bearing non-maturity deposit repricing are a key component of determining the Company's interest rate risk positioning. Should realized betas be higher than projected betas, the expected benefit from higher interest rates would be diminished. The following table presents an example of the potential impact of an increase in repricing betas on Synovus' realized interest rate sensitivity position.

Change in Short-term Interest Rates (in basis points)	As of March 31, 2014	
	Base Scenario	15% Increase in Average Repricing Beta
+200	5.8%	4.7%
+100	3.6%	3.0%

While all of the above estimates are reflective of the general interest rate sensitivity of Synovus, local market conditions and their impact on loan and deposit pricing would be expected to have a significant impact on the realized level of net interest income. Actual realized balance sheet growth and mix would also impact the realized level of net interest income.

ADDITIONAL DISCLOSURES

Other Contingencies

Repurchase Obligations for Mortgage Loans Originated for Sale

The majority of mortgage loans originated by Synovus are sold to third-party purchasers on a servicing released basis, without recourse, or continuing involvement. These sales are typically effected as non-recourse loan sales to GSEs and non-GSE purchasers. Each purchaser of Synovus' mortgage loans has specific guidelines and criteria for sellers of

loans, and the risk of credit loss with regard to the principal amount of the loans sold is generally transferred to the purchasers upon sale. While the loans are sold without recourse, the purchase agreements require Synovus to make certain representations and warranties regarding the existence and sufficiency of file documentation and the absence of fraud by borrowers or other third parties such as appraisers in connection with obtaining the loan. If it is determined that loans sold were in breach of these representations or warranties, Synovus has obligations to either repurchase the loan at the unpaid principal balance and related investor fees or make the purchaser whole for the economic benefits of the loan.

Table of Contents

Each GSE and non-GSE purchaser has specific guidelines and criteria for sellers of loans, and the risk of credit loss with regard to the principal amount of the loans sold is generally transferred to the purchasers upon sale. The purchase agreements require Synovus to make certain representations and warranties regarding the existence and sufficiency of file documentation and the absence of fraud by borrowers or other third parties such as appraisers in connection with obtaining the loan. If it is determined that loans sold were in breach of these representations or warranties, Synovus has obligations to either repurchase the loan at the unpaid principal balance and related investor fees or make the purchaser whole for the economic benefits of the loan.

To date, repurchase activity pursuant to the terms of these representations and warranties has been minimal and has primarily been associated with loans originated from 2005 through 2008. From January 1, 2005 through March 31, 2014, Synovus Mortgage originated and sold approximately \$7.9 billion of first lien GSE eligible mortgage loans and approximately \$3.5 billion of first and second lien non-GSE eligible mortgage loans. The total expense pertaining to losses from repurchases of mortgage loans previously sold, including amounts accrued in accordance with ASC 450, was \$923 thousand and \$296 thousand for the three months ended March 31, 2014 and 2013, respectively. The total accrued liability related to mortgage repurchase claims was \$4.1 million at both March 31, 2014 and December 31, 2013. See "Part I-Item 1A - Risk Factors- We may be required to repurchase mortgage loans or indemnify mortgage loan purchasers as a result of breaches of representations and warranties, borrower fraud, or certain borrower defaults, which could harm our liquidity, results of operations and financial condition." in Synovus' 2013 Form 10-K.

Mortgage Loan Foreclosure Practices

At both March 31, 2014 and December 31, 2013, Synovus had \$3.11 billion of home equity and consumer mortgage loans which are secured by first and second liens on residential properties. Of the amounts at March 31, 2014, \$523.1 million and \$487.8 million, respectively, consist of mortgages relating to properties in Florida and South Carolina, which are states where foreclosures proceed through the courts. Of the amounts at December 31, 2013, \$508.4 million and \$483.4 million, respectively, consist of mortgages relating to properties in Florida and South Carolina, which are states where foreclosures proceed through the courts. To date, foreclosure activity in the home equity and consumer mortgage loan portfolio has been low. Any foreclosures on these loans are handled by designated Synovus personnel and external legal counsel, as appropriate, following established policies regarding legal and regulatory requirements. Based on information currently available, management believes that it does not have significant exposure related to our foreclosure practices.

Recently Issued Accounting Standards

The following accounting pronouncement was issued during the first quarter of 2014:

ASU 2014-01, "Equity Method and Joint Ventures: Accounting for Investments in Qualified Affordable Housing Projects." The ASU permits reporting entities to make an accounting policy election to account for their investments in qualified affordable housing projects using a proportional amortization method if certain conditions are met. Under the proportional amortization method, an entity amortizes the initial cost of the investment in proportion to the tax credits and other tax benefits received and recognizes the net investment performance in the income statement as a component of income tax expense. A reporting entity should evaluate whether the conditions have been met to apply the proportional amortization method to an investment in a qualified affordable housing project through a limited liability entity at the time of initial investment on the basis of facts and circumstances that exist at that time. A reporting entity should re-evaluate the conditions upon the occurrence of certain specified events. An investment in a qualified affordable housing project through a limited liability entity should be tested for impairment when there are events or changes in circumstances indicating that it is more likely than not that the carrying amount of the investment will not be realized. For those investments in qualified affordable housing projects not accounted for using the proportional amortization method, the investment should be accounted for as an equity method investment or a cost method investment. The decision to apply the proportional amortization method of accounting is an accounting policy decision that should be applied consistently to all qualifying affordable housing project investments rather than a decision to be applied to individual investments. The provisions of this ASU are effective for annual periods, and interim reporting periods within those annual periods, beginning after December 15, 2014, and will be applied retrospectively to all periods presented. Early adoption is permitted. Management is currently evaluating the impact of the accounting update on Synovus' Consolidated Financial Statements.

See Note 1 of the notes to the unaudited interim consolidated financial statements for a discussion of recently issued and adopted accounting standards updates.

Critical Accounting Policies

The accounting and financial reporting policies of Synovus are in accordance with U.S. GAAP and conform to the accounting and reporting guidelines prescribed by bank regulatory authorities. Synovus has identified certain of its accounting policies as “critical accounting policies,” consisting of those related to the allowance for loan losses, contingent liabilities related to legal matters, deferred tax assets valuation allowance, other real estate, and determining the fair value of financial instruments. In determining which accounting policies are critical in nature, Synovus has identified the policies that require significant judgment or involve complex estimates. It is management's practice to discuss critical accounting policies with the Board of Directors' Audit Committee, including the development, selection, implementation and disclosure of the critical accounting policies. The application of these policies has a significant impact on Synovus' unaudited interim consolidated financial statements. Synovus' financial results could differ significantly if different judgments or estimates are used in the application of these policies. All accounting policies described in Note 1 - Summary of Significant Accounting Policies in Synovus' 2013 Form 10-K should be reviewed for a greater understanding of how we record and report our financial performance. During the three months ended March 31, 2014, there have been no significant changes to Synovus' critical accounting policies, estimates and assumptions, or the judgments affecting the application of these estimates and assumptions from those disclosed in Synovus' 2013 Form 10-K.

Allowance for Loan Losses - Dual Risk Rating Implementation

Synovus began implementation of a Dual Risk Rating allowance for loan losses methodology (DRR methodology) for certain components of its commercial and industrial loan portfolio during the third quarter of 2013. The DRR includes sixteen probabilities of default categories and nine categories for estimating losses given an event of default. The result is an expected loss rate established for each borrower. The DRR methodology is generally considered in the banking industry to be a more refined estimate of the inherent risk of loss. The third quarter of 2013 DRR methodology implementation was applied to approximately \$2.4 billion of the total commercial and industrial loan portfolio. Implementation of the DRR methodology resulted in a reduction to the provision for loan losses and the allowance for loan losses of approximately \$2.5 million for the three months ended September 30, 2013. Management currently expects to implement the DRR methodology for additional components of the commercial loan portfolio over the next few years. The implementation is expected to be in multiple phases, with each component determined based primarily on loan type and size. The timing of future implementations will depend upon completion of applicable data analysis and model assessment. Once full implementation is completed, management estimates that the DRR methodology will be utilized to calculate the allowance for loan losses on commercial loans amounting to over 30% of the total loan portfolio.

Based on existing economic trends and conditions, current composition of the loan portfolio, as well as other information presently available, management estimates that the impact from future DRR methodology implementations to the total allowance for loan losses, provision for loan losses, and related trends will not be significant.

Non-GAAP Financial Measures

The measures entitled adjusted pre-tax, pre-credit costs income; adjusted non-interest income; adjusted non-interest expense; sequential quarter total loan growth excluding the impact from the Memphis transaction, core deposits, core deposits excluding time deposits, core deposits excluding the impact from the Memphis transaction, core deposits excluding time deposits and the impact from the Memphis transaction, total deposits excluding the impact from the Memphis transaction, the tangible common equity to tangible assets ratio, the Tier 1 common equity ratio, and the estimated Tier 1 common equity ratio under final Basel III rules are not measures recognized under U.S. GAAP and therefore are considered non-GAAP financial measures. The most comparable GAAP measures are income before income taxes; total non-interest income; total non-interest expense; sequential quarter total loan growth, total deposits, the ratio of total shareholders' equity to total assets, and the ratio of Tier 1 capital to risk-weighted assets, respectively. Management uses these non-GAAP financial measures to assess the performance of Synovus' core business and the strength of its capital position. Synovus believes that these non-GAAP financial measures provide meaningful additional information about Synovus to assist investors in evaluating Synovus' operating results, financial strength and capital position. These non-GAAP financial measures should not be considered as a substitute for operating

results determined in accordance with GAAP and may not be comparable to other similarly titled measures at other companies. Adjusted pre-tax, pre-credit costs income is a measure used by management to evaluate core operating results exclusive of credit costs as well as certain revenues and expenses such as investment securities gains, net and restructuring charges. Adjusted non-interest income is a measure used by management to evaluate non-interest income exclusive of net investment securities gains and other non-recurring income items. Adjusted non-interest expense is a measure used by management to gauge the success of expense management initiatives focused on reducing recurring controllable operating costs. Sequential quarter total loan growth excluding the impact from the Memphis transaction is a measure used by management to evaluate organic loan growth. Core deposits, core deposits excluding time deposits, core deposits excluding time deposits and the impact from the Memphis transaction, and total deposits excluding the impact from the Memphis transaction are measures used by management to evaluate organic growth of deposits and the quality of deposits as a funding source. The tangible common equity to tangible assets ratio, the Tier 1 common equity ratio, and the estimated Tier 1

Table of Contents

common equity ratio under final Basel III rules are used by management and investment analysts to assess the strength of Synovus' capital position. The computations of these measures are set forth in the tables below.

⁽¹⁾ Other credit costs consist primarily of foreclosed real estate expense, net.

⁽²⁾ Consists of loss contingency accruals with respect to outstanding legal matters. Amounts for other quarters are not disclosed separately as amounts are not material.

⁽³⁾ Only one year of projected future taxable income may be applied in calculating deferred tax assets for regulatory capital purposes.

ITEM 3. – QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The information presented in the Market Risk Analysis section of the Management's Discussion and Analysis of Financial Condition and Results of Operations is incorporated herein by reference.

Table of Contents

ITEM 4. – CONTROLS AND PROCEDURES

In connection with the preparation of this Quarterly Report on Form 10-Q, an evaluation was carried out by Synovus' management, with the participation of Synovus' Chief Executive Officer and Chief Financial Officer, of the effectiveness of Synovus' disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act). Disclosure controls and procedures are designed to ensure that information required to be disclosed in reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms and that such information is accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosures. Based on that evaluation, Synovus' Chief Executive Officer and Chief Financial Officer have concluded that, as of March 31, 2014, Synovus' disclosure controls and procedures were effective.

Synovus regularly engages in productivity and efficiency initiatives to streamline operations, reduce expenses, and increase revenue. Additionally, investment in new and updated information technology systems has enhanced information gathering and processing capabilities; and allowed management to operate in a more centralized environment for critical processing and monitoring functions. Management of Synovus is responsible for identifying, documenting, and evaluating the adequacy of the design and operation of the controls implemented during each process change described above. There have been no material changes in Synovus' internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) that occurred during the quarter ended March 31, 2014 that has materially affected, or is reasonably likely to materially affect, Synovus' internal controls over financial reporting.

PART II. – OTHER INFORMATION

ITEM 1. – LEGAL PROCEEDINGS

Synovus and its subsidiaries are subject to various legal proceedings and claims that arise in the ordinary course of its business. Additionally, in the ordinary course of business, Synovus and its subsidiaries are subject to regulatory examinations, information gathering requests, inquiries and investigations. In the wake of the recent financial credit crisis, Synovus, like many other financial institutions, has become the target of numerous legal actions and other proceedings asserting claims for damages and related relief for losses resulting from the recent financial crisis. These actions include claims and counterclaims asserted by individual borrowers related to their loans and allegations of violations of state and federal laws and regulations relating to banking practices, including several purported putative class action matters. In addition to actual damages if Synovus does not prevail in any asserted legal action, credit-related litigation could result in additional write-downs or charge-offs of assets, which could adversely affect Synovus' results of operations during the period in which the write-down or charge-off occurred.

Based on our current knowledge and advice of counsel, management presently does not believe that the liabilities arising from these legal matters will have a material adverse effect on Synovus' consolidated financial condition, operating results or cash flows. However, it is possible that the ultimate resolution of these legal matters could have a material adverse effect on Synovus' results of operations and financial condition for any particular period. For additional information, see "Part I - Item 1. Financial Statements - Note 14 - Legal Proceedings" of this Report, which Note is incorporated herein by this reference.

ITEM 1A. – RISK FACTORS

In addition to the other information set forth in this Report, you should carefully consider the factors discussed in "Risk Factors" in Part I-Item 1A of Synovus' 2013 Form 10-K which could materially affect its business, financial position, results of operations, cash flows, or future results. Please be aware that these risks may change over time and other risks may prove to be important in the future. New risks may emerge at any time, and we cannot predict such risks or estimate the extent to which they may affect our business, financial condition or results of operations, or the trading price of our securities.

There were no material changes during the period covered by this Report to the risk factors previously disclosed in Synovus' 2013 10-K.
