For the purposes of the discussion in this Quarterly Report on Form 10-Q, the term Voya Financial, Inc. refers to Voya Financial, Inc. and the terms "Company," "we," "our," and "us" refer to Voya Financial, Inc. and its subsidiaries.

#### NOTE CONCERNING FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q, including "Risk Factors," and "Management's Discussion and Analysis of Financial Condition and Results of Operations," contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements include statements relating to future developments in our business or expectations for our future financial performance and any statement not involving a historical fact. Forward-looking statements use words such as "anticipate," "believe," "estimate," "expect," "intend," "plan," and other words and terms of similar meaning in connection with a discussion of future operating or financial performance. Actual results, performance or events may differ materially from those projected in any forward-looking statement due to, among other things, (i) general economic conditions, particularly economic conditions in our core markets, (ii) performance of financial markets, including emerging markets, (iii) the frequency and severity of insured loss events, (iv) mortality and morbidity levels, (v) persistency and lapse levels, (vi) interest rates, (vii) currency exchange rates, (viii) general competitive factors, (ix) changes in laws and regulations, (x) changes in the policies of governments and/or regulatory authorities, and (xi) our ability to successfully complete the Transaction (as defined below) on the expected economic terms or at all. Factors that may cause actual results to differ from those in any forward-looking statement also include those described under "Risk Factors," "Management's Discussion and Analysis of Financial Condition and Results of Operations-Trends and Uncertainties" and "Business-Closed Blocks-CBVA" in the Annual Report on Form 10-K for the year ended December 31, 2017 (File No. 001-35897) (the "Annual Report on Form 10-K").

The risks included here are not exhaustive. Current reports on Form 8-K and other documents filed with the Securities and Exchange Commission ("SEC") include additional factors that could affect our businesses and financial performance. Moreover, we operate in a rapidly changing and competitive environment. New risk factors emerge from time to time, and it is not possible for management to predict all such risk factors.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

## 1. Business, Basis of Presentation and Significant Accounting Policies

### Business

Voya Financial, Inc. and its subsidiaries (collectively the "Company") is a financial services organization in the United States that offers a broad range of retirement services, annuities, investment management services, mutual funds, life insurance, group insurance and supplemental health products.

On December 20, 2017, the Company entered into a Master Transaction Agreement ("MTA") with VA Capital Company LLC ("VA Capital") and Athene Holding Ltd ("Athene"), pursuant to which Venerable Holdings, Inc. ("Venerable"), a wholly owned subsidiary of VA Capital, will acquire two of the Company's subsidiaries, Voya Insurance and Annuity Company ("VIAC") and Directed Services, LLC ("DSL"). This transaction is expected to close during the second or third quarter of 2018 and will result in the disposition of substantially all of the Company's Closed Block Variable Annuity ("CBVA") and Annuities businesses (collectively, the "Transaction"). The assets and liabilities related to the businesses to be sold have been classified as held for sale in the accompanying Condensed Consolidated Balance Sheets and as discontinued operations in the accompanying Condensed Consolidated Statements of Operations and Condensed Consolidated Statements of Cash Flows and are reported separately for all periods presented. See the Business Held for Sale and Discontinued Operations Note to these Condensed Consolidated Financial Statements.

Pursuant to the Transaction, the Company no longer considers its CBVA and Annuities businesses as reportable segments. Additionally, the Company evaluated its segment presentation and determined that the retained CBVA and Annuities policies that are not included in the disposed businesses described above ("Retained Business") are insignificant. As such, the Company reported the results of the Retained Business in Corporate.

The Company provides its principal products and services through four segments: Retirement, Investment Management, Employee Benefits and Individual Life. In addition, the Company includes in Corporate the financial data not directly related to its segments, and other business activities that do not have an ongoing meaningful impact to the Company's results. See the Segments Note to these Condensed Consolidated Financial Statements.

Prior to May 2013, the Company was an indirect, wholly-owned subsidiary of ING Groep N.V. ("ING Group" or "ING"), a global financial services holding company based in The Netherlands. In May 2013, Voya Financial Inc. completed its initial public offering of common stock, including the issuance and sale of common stock by Voya Financial, Inc. and the sale of shares of common stock owned indirectly by ING Group. Between October 2013 and March 2015, ING Group completed the sale of its remaining shares of common stock of Voya Financial, Inc. in a series of registered public offerings.

### Basis of Presentation

The accompanying Condensed Consolidated Financial Statements of the Company have been prepared in accordance with accounting principles generally accepted in the United States ("U.S. GAAP") and are unaudited. The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of

the Condensed Consolidated Financial Statements and the reported amounts of revenues and expenses during the reporting period. Those estimates are inherently subject to change and actual results could differ from those estimates.

The Condensed Consolidated Financial Statements include the accounts of Voya Financial, Inc. and its subsidiaries, as well as partnerships (voting interest entities ("VOEs")) in which the Company has control and variable interest entities ("VIEs") for which the Company is the primary beneficiary. See the Consolidated Investment Entities Note to these Condensed Consolidated Financial Statements. Intercompany transactions and balances have been eliminated.

The accompanying Condensed Consolidated Financial Statements reflect adjustments (including normal, recurring adjustments) necessary to present fairly the financial position of the Company as of March 31, 2018, and its results of operations, comprehensive income, changes in shareholders' equity and statements of cash flows for the three months ended March 31, 2018 and 2017, in conformity with U.S. GAAP. Interim results are not necessarily indicative of full year performance. The December 31, 2017

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

Consolidated Balance Sheet is from the audited Consolidated Financial Statements included in the Company's Annual Report on Form 10-K, filed with the SEC. Therefore, these unaudited Condensed Consolidated Financial Statements should be read in conjunction with the audited Consolidated Financial Statements and related notes included in the Company's Annual Report on Form 10-K.

## Significant Accounting Policies

### Investments

Effective January 1, 2018, the Company adopted Accounting Standards Update ("ASU") 2016-01 "Financial Instruments-Overall (ASC Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities" ("ASU 2016-01") (See the Adoption of New Pronouncements section below). As a result, the Company measures its equity securities at fair value and recognizes any changes in fair value in net income. Prior to adoption, equity securities were designated as available-for-sale and reported at fair value with unrealized capital gains (losses) recorded in Accumulated other comprehensive income (loss) ("AOCI").

### Recognition of Revenue

As of January 1, 2018, the Company changed its method for recognizing costs to obtain and fulfill certain financial services contracts upon the adoption of ASU 2014-09, "Revenue from Contracts with Customers (ASC Topic 606)" ("ASU 2014-09"). (See the Adoption of New Pronouncements section below.)

Financial services revenue is disaggregated by type of service in the following table. Such revenue represents approximately 29.2% of total Retirement revenue, all of Investment Management revenue, and all of Corporate revenue. Such revenue is immaterial for Employee Benefits and Individual Life. For the three months ended March 31, 2018, a portion of the revenue recognized in the current period from distribution services is related to performance obligations satisfied in previous periods.

Service Line	Three Months Ended March 31, 2018		
	Reportable Segments		
	Retirement	Investment Management	Corporate
Advisory	\$55	\$ 141	\$ —
Asset management	—	41	—
Recordkeeping & administration	62	43	2
Distribution & shareholder servicing	74	44	30
Total financial services revenue	\$191	\$ 269	\$ 32

Receivables of \$211 are included in Other assets on the Condensed Consolidated Balance Sheets as of March 31, 2018.

### Financial Services Revenue

Revenue for various financial services is measured based on consideration specified in a contract with a customer and excludes any amounts collected on behalf of third parties. For advisory, asset management, and recordkeeping and administration services, the Company recognizes revenue as services are provided, generally over time. In addition, the Company may arrange for sub-advisory services for a customer under certain contracts. Revenue is recognized when the Company has satisfied a performance obligation by transferring control of a service to a customer. Contract terms are typically less than one year, and consideration is generally variable and due as services are rendered.

For distribution and shareholder servicing revenue, the Company provides distribution services at a point in time and shareholder services over time. Such revenue is recognized when the Company has satisfied a performance obligation and related consideration is received. Contract terms are less than one year, and consideration is variable. For distribution services, revenue may be recognized in periods subsequent to when the Company has satisfied a performance obligation, as a component of related consideration is constrained under certain contracts.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

For a description of principal activities by reportable segment from which the Company generates revenue, see the Segments Note in Part II, Item 8. of the Company's Annual Report on Form 10-K for further information.

Revenue for various financial services is recorded in Fee income or Other revenue in the Condensed Consolidated Statements of Operations.

#### Contract Costs

Contract cost assets represent costs incurred to obtain or fulfill a contract that are expected to be recovered and, thus, have been capitalized and are subject to amortization. Capitalized contract costs include incremental costs of obtaining a contract and fulfillment costs that relate directly to a contract and generate or enhance resources of the Company that are used to satisfy performance obligations.

The Company defers (1) incremental commissions and variable compensation paid to the Company's direct sales force, consultant channel, and intermediary partners, as a result of obtaining certain financial services contracts and (2) account set-up expenses on certain recordkeeping contracts. The Company expenses as incurred deferrable contract costs for which the amortization period would be one year or less (based on the U.S. GAAP practical expedient) and other contract-related costs. The Company periodically reviews contract cost assets for impairment. Capitalized contract costs are included in Other assets on the Condensed Consolidated Balance Sheets, and costs expensed as incurred are included in Operating expenses in the Condensed Consolidated Statements of Operations.

As of March 31, 2018, contract cost assets were \$106. Capitalized contract costs are amortized on a straight-line basis over the estimated lives of the contracts, which typically range from 5 to 15 years. This method is consistent with the transfer of services to which the assets relate. For the three months ended March 31, 2018, amortization expense of \$6 was recorded in Operating expenses in the Condensed Consolidated Statements of Operations. There was no impairment loss in relation to the contract costs capitalized.

#### Adoption of New Pronouncements

##### Retirement Benefits

In March 2017, the FASB issued ASU 2017-07, "Compensation-Retirement Benefits (ASC Topic 715): Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost" ("ASU 2017-07"), which requires employers to report the service cost component of net periodic pension cost and net periodic postretirement benefit cost in the same line item as other compensation costs arising from services rendered by employees during the period. Other components of net benefit costs are required to be presented in the statement of operations separately from service costs. In addition, only service costs are eligible for capitalization in assets, when applicable.

The provisions of ASU 2017-07 were adopted by the Company on January 1, 2018 retrospectively for the presentation of service costs and other components in the statement of operations, and prospectively for the capitalization of service costs in assets. The adoption had no effect on the Company's financial condition, results of operations, or cash flows.

##### Derecognition of Nonfinancial Assets

In February 2017, the FASB issued ASU 2017-05, "Other Income-Gains and Losses from the Derecognition of Nonfinancial Assets (ASC Subtopic 610-20): Clarifying the Scope of Asset Derecognition Guidance & Accounting for Partial Sales of Nonfinancial Assets" ("ASU 2017-05"), which requires entities to apply certain recognition and measurement principles in ASU 2014-09, "Revenue from Contracts with Customers (ASC Topic 606)" (see Revenue from Contracts with Customers below) when they derecognize nonfinancial assets and in substance nonfinancial assets through sale or transfer, and the counterparty is not a customer.

The provisions of ASU 2017-05 were adopted on January 1, 2018 using the modified retrospective approach. The adoption had no effect on the Company's financial condition, results of operations, or cash flows.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

#### Statement of Cash Flows

In August 2016, the FASB issued ASU 2016-15, "Statement of Cash Flows (ASC Topic 230): Classification of Certain Cash Receipts and Cash Payments" ("ASU 2016-15"), which addresses diversity in how certain cash receipts and cash payments are presented and classified in the statement of cash flows. The amendments provide guidance on eight specific cash flow issues.

The provisions of ASU 2016-15 were adopted retrospectively on January 1, 2018 and resulted in the reclassification of the Company's cash payments for debt extinguishment costs from Cash Flows from Operating Activities to Cash Flows from Financing Activities in the Condensed Consolidated Statements of Cash Flows of \$3 and \$1 for the three months ended March 31, 2018 and 2017, respectively. The adoption of the remaining provisions of ASU 2016-05 had no effect on the Company's financial condition, results of operations, or cash flows.

#### Share-Based Compensation

In March 2016, the FASB issued ASU 2016-09, "Compensation-Stock Compensation (ASC Topic 718): Improvements to Employee Share-Based Payment Accounting" ("ASU 2016-09"), which simplifies the accounting for share-based payment award transactions with respect to:

- The income tax consequences of awards,
- The impact of forfeitures on the recognition of expense for awards,
- Classification of awards as either equity or liabilities, and
- Classification on the statement of cash flows.

The provisions of ASU 2016-09 were adopted by the Company on January 1, 2017 using the transition method prescribed for each applicable provision:

On a prospective basis, all excess tax benefits and tax deficiencies related to share-based compensation will be reported in Net income (loss), rather than Additional paid-in capital. Prior year excess tax benefits will remain in Additional paid-in capital.

The provision that removed the requirement to delay recognition of excess tax benefits until they reduce taxes payable was required to be adopted on a modified retrospective basis. Upon adoption, this provision resulted in a \$15 increase in Deferred income tax assets with a corresponding increase to Retained earnings on the Condensed Consolidated Balance Sheet as of January 1, 2017, to record previously unrecognized excess tax benefits.

The Company elected to retrospectively adopt the requirement to present cash inflows related to excess tax benefits as operating activities. For the three months ended March 31, 2017, the Company had no excess tax benefits.

The Company also elected to continue its existing accounting policy of including estimated forfeitures in the calculation of share-based compensation expense.

The adoption of the remaining provisions of ASU 2016-09 had no effect on the Company's financial condition, results of operations, or cash flows.

#### Financial Instruments - Recognition and Measurement

In January 2016, the FASB issued ASU 2016-01, "Financial Instruments-Overall (ASC Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities" ("ASU 2016-01"), which requires:

- Equity investments (except those consolidated or accounted for under the equity method) to be measured at fair value with changes in fair value recognized in net income.

- Elimination of the disclosure of methods and significant assumptions used to estimate the fair value for financial instruments measured at amortized cost.

- The use of the exit price notion when measuring the fair value of financial instruments for disclosure purposes.

- Separate presentation in other comprehensive income of the portion of the total change in fair value of a liability resulting from a change in own credit risk if the liability is measured at fair value under the fair value option.

- Separate presentation on the balance sheet or financial statement notes of financial assets and financial liabilities by measurement category and form of financial asset.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

The Company adopted the provisions of ASU 2016-01 on January 1, 2018 using a modified retrospective approach, except for certain provisions that are required to be applied prospectively. The impact to the January 1, 2018 Condensed Consolidated Balance Sheet was a \$28 increase, net of tax, to Unappropriated retained earnings with a corresponding decrease of \$28, net of tax, to Accumulated other comprehensive income to recognize the unrealized gain associated with Equity securities. The provisions that required prospective adoption had no effect on the Company's financial condition, results of operations, or cash flows. Under previous guidance, prior to January 1, 2018, Equity securities were classified as available for sale with changes in fair value recognized in Other comprehensive income.

#### Revenue from Contracts with Customers

In May 2014, the FASB issued ASU 2014-09, which requires an entity to recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Revenue is recognized when, or as, the entity satisfies a performance obligation under the contract. ASU 2014-09 also updated the accounting for certain costs associated with obtaining and fulfilling contracts with customers and requires disclosures regarding the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers. In addition, the FASB issued various amendments during 2016 to clarify the provisions and implementation guidance of ASU 2014-09. Revenue recognition for insurance contracts and financial instruments is explicitly scoped out of the guidance.

The Company adopted the provisions of ASU 2014-09 on January 1, 2018, using the modified retrospective approach. The adoption had no impact on revenue recognition. However, the adoption resulted in a \$106 increase in Other assets to capitalize costs to obtain and fulfill certain financial services contracts in the Retirement segment and Corporate. This adjustment was offset by a related \$22 decrease in Deferred income taxes, resulting in a net \$84 increase to Retained earnings (deficit) on the Condensed Consolidated Balance Sheet as of January 1, 2018. In addition, disclosures have been updated to reflect accounting policy changes made as a result of the implementation of ASU 2014-09. (See the Significant Accounting Policies section above.)

Comparative information has not been adjusted and continues to be reported under previous revenue recognition guidance. The following tables summarize the impacts of adopting the provisions of ASU 2014-09 for the three months ended March 31, 2018. For the three months ended March 31, 2018, adopting the provisions of ASU 2014-09 had no impact on Net cash provided by operating activities.

#### Condensed Consolidated Balance Sheet

March 31, 2018

	As reported	Adjustments	Balance without adoption of ASU 2014-09
Assets:			
Deferred income taxes	\$1,022	\$ 22	\$1,044
Other assets	1,360	(106 )	1,254
Total assets	\$219,824	\$ (84 )	\$219,740

Liabilities and Shareholders' Equity:

Retained earnings (deficit):

Unappropriated	\$(12,161 )	\$ (84 )	\$(12,245 )
Total shareholders' equity	\$10,409	\$ (84 )	\$10,325
Total liabilities and shareholders' equity	\$219,824	\$ (84 )	\$219,740

Voya Financial, Inc.

### Condensed Consolidated Statement of Operations

For the Three Months Ended March 31, 2018

	As reported	Adjustments*	Balance without adoption of ASU 2014-09
Benefits and expenses:			
Operating expenses	\$ 700	\$	—\$ 700
Total benefits and expenses	1,946	—	1,946
Income (loss) from continuing operations before income taxes	21	—	21
Income tax expense (benefit)	4	—	4
Income (loss) from continuing operations	17	—	17
Net income (loss)	446	—	446
Net income (loss) available to Voya Financial, Inc.'s common shareholders	\$ 446	\$	—\$ 446

\*The impact to the Condensed Consolidated Statement of Operations for the three months ended March 31, 2018 was less than \$1.

### Future Adoption of Accounting Pronouncements

#### Reclassification of Certain Tax Effects

In February 2018, the FASB issued ASU 2018-02, "Income Statement-Reporting Comprehensive Income (ASC Topic 220): Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income" ("ASU 2018-02"), which allows a reclassification from accumulated other comprehensive income to retained earnings for stranded tax effects resulting from the newly enacted Tax Cuts and Jobs Act of 2017 ("Tax Reform"). Stranded tax effects arise because U.S. GAAP requires that the impact of a change in tax laws or rates on deferred tax liabilities and assets be reported in net income, even if related to items recognized within accumulated other comprehensive income. The amount of the reclassification would be based on the difference between the historical corporate income tax rate and the newly enacted 21% corporate income tax rate, applied to deferred tax liabilities and assets reported within accumulated other comprehensive income.

The provisions of ASU 2018-02 are effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018, with early adoption permitted. Initial adoption of ASU 2018-02 may be reported either in the period of adoption or on a retrospective basis in each period in which the effect of the change in the U.S. federal corporate income tax rate resulting from Tax Reform is recognized. The Company is currently evaluating the provisions of ASU 2018-02.

### Derivatives & Hedging

In August 2017, the FASB issued ASU 2017-12, "Derivatives and Hedging (Topic ASC 815): Targeted Improvements to Accounting for Hedging Activities" ("ASU 2017-12"), which enables entities to better portray risk management activities in their financial statements, as follows:

- Expands an entity's ability to hedge nonfinancial and financial risk components and reduces complexity in accounting for fair value hedges of interest rate risk,

Eliminates the requirement to separately measure and report hedge ineffectiveness and generally requires the entire change in the fair value of a hedging instrument to be presented in the same income statement line as the hedged item, Eases certain documentation and assessment requirements and modifies the accounting for components excluded from the assessment of hedge effectiveness, and  
• Modifies required disclosures.

The provisions of ASU 2017-12 are effective for fiscal years beginning after December 15, 2018, including interim periods, with early adoption permitted. Initial adoption of ASU 2017-12 is required to be reported using a modified retrospective approach, with the exception of the presentation and disclosure requirements which are required to be applied prospectively. The Company is currently in the process of determining the impact of adoption of the provisions of ASU 2017-12.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

#### Debt Securities

In March 2017, the FASB issued ASU 2017-08, "Receivables-Nonrefundable Fees and Other Costs (ASC Subtopic 310-20): Premium Amortization on Purchased Callable Debt Securities" ("ASU 2017-08"), which shortens the amortization period for certain callable debt securities held at a premium by requiring the premium to be amortized to the earliest call date.

The provisions of ASU 2017-08 are effective for fiscal years beginning after December 15, 2018, including interim periods, with early adoption permitted. Initial adoption of ASU 2017-08 is required to be reported using a modified retrospective approach. The Company is currently in the process of determining the impact of adoption of the provisions of ASU 2017-08.

#### Financial Instruments - Credit Losses

In June 2016, the FASB issued ASU 2016-13, "Financial Instruments-Credit Losses (ASC Topic 326): Measurement of Credit Losses on Financial Instruments" ("ASU 2016-13"), which:

- Introduces an approach based on expected losses to estimate credit losses on certain types of financial instruments,
- Modifies the impairment model for available-for-sale debt securities, and
- Provides a simplified accounting model for purchased financial assets with credit deterioration since their origination.

The provisions of ASU 2016-13 are effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2019, with early adoption permitted for fiscal years beginning after December 15, 2018. Initial adoption of ASU 2016-13 is required to be reported on a modified retrospective basis, with a cumulative-effect adjustment to retained earnings as of the beginning of the year of adoption, except for certain provisions that are required to be applied prospectively. The Company is currently in the process of determining the impact of adoption of the provisions of ASU 2016-13.

#### Leases

In February 2016, the FASB issued ASU 2016-02, "Leases (ASC Topic 842)" ("ASU 2016-02"), which requires lessees to recognize a right-of-use asset and a lease liability for all leases with terms of more than 12 months. The lease liability will be measured as the present value of the lease payments, and the asset will be based on the liability. For income statement purposes, expense recognition will depend on the lessee's classification of the lease as either finance, with a front-loaded amortization expense pattern similar to current capital leases, or operating, with a straight-line expense pattern similar to current operating leases. Lessor accounting will be similar to the current model, and lessors will be required to classify leases as operating, direct financing, or sales-type.

ASU 2016-02 also replaces the sale-leaseback guidance to align with the new revenue recognition standard, addresses statement of operation and statement of cash flow classification, and requires additional disclosures for all leases.

The provisions of ASU 2016-02 are effective on a modified retrospective basis for fiscal years beginning after December 15, 2018, including interim periods, with early adoption permitted. The Company is currently in the process of determining the impact of adoption of the provisions of ASU 2016-02.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

## 2. Business Held for Sale and Discontinued Operations

As noted in the Business, Basis of Presentation and Significant Accounting Policies Note, on December 20, 2017, the Company entered into the MTA with VA Capital and Athene (the "Buyers") pursuant to which Venerable will acquire two of the Company's subsidiaries, VIAC and DSL. The Transaction is expected to close during the second or third quarter of 2018, subject to conditions specified in the MTA, including the receipt of required regulatory approvals, and other conditions. The Transaction will result in the disposition of substantially all of the Company's CBVA and Annuities businesses.

The purchase price in the transaction will be equal to the difference between the Required Adjusted Book Value (as defined in the MTA) and the Statutory capital in VIAC at closing, after giving effect to certain restructuring and other pre-sale transactions, including the reinsurance of the fixed and fixed indexed annuity business of VIAC. The purchase price for DSL is expected to approximate its carrying value. After the closing, the Company, through its other insurance subsidiaries, will continue to own surplus notes issued by VIAC in an aggregate principal amount of \$350 and will acquire a 9.99% equity interest in VA Capital. The receivable for the surplus notes and VIAC's corresponding liability are included in Other assets and Liabilities held for sale, respectively, on the Company's Condensed Consolidated Balance Sheets. In the summary of major categories of assets and liabilities held for sale below, VIAC's corresponding liability for the surplus notes is included in Notes payable.

Under the terms of the Transaction, VIAC will, prior to the closing of the transaction, undertake certain restructuring transactions with several current affiliates in order to transfer businesses and assets into and out of VIAC.

In connection with the closing, Voya Investment Management Co., LLC ("Voya IM") or its affiliated advisors, will enter into one or more agreements to perform asset management services for Venerable as part of the transaction. As part of the agreements, Voya IM will serve as the preferred asset management partner for Venerable. Under the agreements, subject to certain criteria, Voya IM will manage certain assets, including, for at least five years following the closing of the transaction, certain general account assets. The Company has also agreed to provide certain transitional services to Venerable for up to 24 months after the closing of the Transaction.

The MTA provides for a \$105 reverse termination fee that would be payable by VA Capital to the Company if the MTA is terminated in certain circumstances.

The MTA contains limits on the amount of additional capital the Company could be required to contribute to meet any increases in the Required Adjusted Book Value and on the amount of capital in excess of such amount that VA Capital could be required to compensate the Company for if such excess capital were to become trapped in VIAC prior to Transaction closing, in each case subject to certain termination rights.

The Company has determined that the CBVA and Annuities businesses to be disposed of meet the criteria to be classified as held for sale and that the sale represents a strategic shift that will have a major effect on the Company's operations. Accordingly, the results of operations of the businesses to be sold have been presented as discontinued operations in the accompanying Condensed Consolidated Statements of Operations and Condensed Consolidated Statements of Cash Flows, and the assets and liabilities of the businesses have been classified as held for sale and segregated for all periods presented in the Condensed Consolidated Balance Sheets. A business classified as held for sale is recorded at the lower of its carrying value or estimated fair value less cost to sell. If the carrying value exceeds

its estimated fair value less cost to sell, a loss is recognized. Transactions between the businesses held for sale and businesses in continuing operations that are expected to continue to exist after the disposal are not eliminated to appropriately reflect the continuing operations and the assets, liabilities and results of the businesses held for sale.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

The results of discontinued operations are reported in "Income (loss) from discontinued operations, net of tax" in the accompanying Condensed Consolidated Statements of Operations for all periods presented. As of December 31, 2017, the Company recorded an estimated loss on sale, net of tax of \$2,423 which included estimated transactions costs of \$31 as well as the loss of \$692 of deferred tax assets to write down the assets of businesses held for sale to fair value less cost to sell as of December 31, 2017. In addition, the Company is required to remeasure the estimated fair value and loss on sale at the end of each quarter until closing of the Transaction. As such, Income (loss) from discontinued operations, net of tax, for the three months ended March 31, 2018 includes a favorable adjustment to the estimated loss on sale of \$449, net of tax. The favorable adjustment to the estimated loss on sale for the three months ended March 31, 2018 includes additional estimated transaction costs of \$6 as well as a benefit of \$58 of deferred tax assets. The estimated transaction costs of \$6 recorded in the three months ended March 31, 2018 and those recorded as of December 31, 2017 of \$31 represent what the Company expects to incur through and upon closing of the Transaction. The estimated loss on sale, net of tax as of March 31, 2018 of \$1,974, which includes the loss of \$634 of deferred tax assets represents the excess of the estimated carrying value of the businesses held for sale over the estimated purchase price, which approximates fair value, less cost to sell.

The estimated purchase price and estimated carrying value of VIAC as of the future date of closing, and therefore the estimated loss on sale related to the Transaction are subject to adjustment in future quarters until closing, and may be influenced by, but not limited to the following factors:

- Market fluctuations related to equity securities, interest rates, volatility, credit spreads and foreign exchange rates;
- The performance of the businesses held for sale and the impact of interest and equity market changes on the Variable Annuity Hedge Program and any other hedging activity the Company may engage in within VIAC;
- Changes in the terms of the Transaction, including as the result of subsequent negotiations or as necessary to obtain regulatory approval;
- Other changes in the terms of the Transaction due to unanticipated developments; and
- Changes in key customers and policyholder behavior as a result of the Transaction or other factors.

The Company is required to remeasure the estimated fair value and loss on sale at the end of each quarter until closing of the Transaction. Changes in the estimated loss on sale that occur prior to closing of the Transaction will be reported as an adjustment to Income (loss) from discontinued operations, net of tax, in future quarters prior to closing.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

The following table summarizes the major categories of assets and liabilities classified as held for sale in the accompanying Condensed Consolidated Balance Sheets as of March 31, 2018 and December 31, 2017:

	March 31, 2018	December 31, 2017
Assets:		
Investments:		
Fixed maturities, available-for-sale, at fair value	\$20,750	\$21,904
Fixed maturities, at fair value using the fair value option	554	615
Short-term investments	287	352
Mortgage loans on real estate, net of valuation allowance	4,178	4,212
Derivatives	1,207	1,514
Other investments <sup>(1)</sup>	357	351
Securities pledged	831	861
Total investments	28,164	29,809
Cash and cash equivalents	545	498
Short-term investments under securities loan agreements, including collateral delivered	613	473
Deferred policy acquisition costs and Value of business acquired	917	805
Sales inducements	223	196
Deferred income taxes	442	404
Other assets <sup>(2)</sup>	455	396
Assets held in separate accounts	27,695	28,894
Write-down of businesses held for sale to fair value less cost to sell	(1,974 )	(2,423 )
Total assets held for sale	\$57,080	\$59,052
Liabilities:		
Future policy benefits and contract owner account balances	\$26,645	\$27,065

The changes in fair value of embedded derivatives are reported in Other net realized capital gains (losses) in the Condensed Consolidated Statements of Operations.<sup>(3)</sup> Represents OTTI reported as a component of Other comprehensive income (loss).<sup>(4)</sup> Amount excludes \$441 of net unrealized gains on impaired available-for-sale securities.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

The amortized cost and fair value of fixed maturities, including securities pledged, as of March 31, 2018, are shown below by contractual maturity. Actual maturities may differ from contractual maturities as securities may be restructured, called or prepaid. Mortgage-backed securities ("MBS") and Other asset-backed securities ("ABS") are shown separately because they are not due at a single maturity date.

	Amortized Cost	Fair Value
Due to mature:		
One year or less	\$ 1,050	\$ 1,061
After one year through five years	8,051	8,245
After five years through ten years	10,150	10,279
After ten years	21,227	23,340
Mortgage-backed securities	7,303	7,523
Other asset-backed securities	1,564	1,598
Fixed maturities, including securities pledged	\$ 49,345	\$ 52,046

The investment portfolio is monitored to maintain a diversified portfolio on an ongoing basis. Credit risk is mitigated by monitoring concentrations by issuer, sector and geographic stratification and limiting exposure to any one issuer.

As of March 31, 2018 and December 31, 2017, the Company did not have any investments in a single issuer, other than obligations of the U.S. Government and government agencies, with a carrying value in excess of 10% of the Company's Total shareholders' equity.

The following tables present the composition of the U.S. and foreign corporate securities within the fixed maturity portfolio by industry category as of the dates indicated:

	Amortized Cost	Gross Unrealized Capital Gains	Gross Unrealized Capital Losses	Fair Value

### Fixed Maturities and Equity Securities

The Company's fixed maturities are currently designated as available-for-sale, except those accounted for using the FVO. Prior to the adoption of ASU 2016-01 as of January 1, 2018, equity securities were also designated as available-for-sale. Available-for-sale securities are reported at fair value and unrealized capital gains (losses) on these securities are recorded directly in AOCI and presented net of related changes in Deferred policy acquisition costs ("DAC"), Value of business acquired ("VOBA") and Deferred income taxes. In addition, certain fixed maturities have embedded derivatives, which are reported with the host contract on the Condensed Consolidated Balance Sheets.

The Company has elected the FVO for certain of its fixed maturities to better match the measurement of assets and liabilities in the Condensed Consolidated Statements of Operations. Certain collateralized mortgage obligations ("CMOs"), primarily interest-only and principal-only strips, are accounted for as hybrid instruments and reported at fair value with changes in the fair value recorded in Other net realized capital gains (losses) in the Condensed Consolidated Statements of Operations.

The Company invests in various categories of CMOs, including CMOs that are not agency-backed, that are subject to different degrees of risk from changes in interest rates and defaults. The principal risks inherent in holding CMOs are prepayment and extension risks related to significant decreases and increases in interest rates resulting in the prepayment of principal from the underlying mortgages, either earlier or later than originally anticipated. As of March 31, 2018 and December 31, 2017, approximately 41.1% and 43.2%, respectively, of the Company's CMO holdings, were invested in the above mentioned types of CMOs such as interest-only or principal-only strips, that are subject to more prepayment and extension risk than traditional CMOs.

Public corporate fixed maturity securities are distinguished from private corporate fixed maturity securities based upon the manner in which they are transacted. Public corporate fixed maturity securities are issued initially through market intermediaries on a registered basis or pursuant to Rule 144A under the Securities Act of 1933 (the "Securities Act") and are traded on the secondary market through brokers acting as principal. Private corporate fixed maturity securities are originally issued by borrowers directly to investors pursuant to Section 4(a)(2) of the Securities Act, and are traded in the secondary market directly with counterparties, either without the participation of a broker or in agency transactions.

### Repurchase Agreements

As of March 31, 2018 and December 31, 2017, the Company did not have any securities pledged in dollar rolls, repurchase agreement transactions or reverse repurchase agreements.

### Securities Lending

The Company engages in securities lending whereby certain securities from its portfolio are loaned to other institutions, through a lending agent, for short periods of time. The Company has the right to approve any institution with whom the lending agent transacts on its behalf. Initial collateral is required at a rate of 102% of the market value of the loaned securities. The lending agent retains the collateral and invests it in high quality liquid assets on behalf of the Company. The market value of the loaned securities is monitored on a daily basis with additional collateral obtained or refunded as the market value of the loaned securities fluctuates. The lending agent indemnifies the

Company against losses resulting from the failure of a counterparty to return securities pledged where collateral is insufficient to cover the loss. As of March 31, 2018 and December 31, 2017, the fair value of loaned securities was \$1,592 and \$1,854, respectively, and is included in Securities pledged on the Condensed Consolidated Balance Sheets.

If cash is received as collateral, the lending agent retains the cash collateral and invests it in short-term liquid assets on behalf of the Company. As of March 31, 2018 and December 31, 2017, cash collateral retained by the lending agent and invested in short-term liquid assets on the Company's behalf was \$1,446 and \$1,589, respectively, and is recorded in Short-term investments under securities loan agreements, including collateral delivered on the Condensed Consolidated Balance Sheets. As of March 31, 2018 and December 31, 2017, liabilities to return collateral of \$1,446 and \$1,589, respectively, are included in Payables under securities loan agreements, including collateral held on the Condensed Consolidated Balance Sheets.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

The Company accepts non-cash collateral in the form of securities. The securities retained as collateral by the lending agent may not be sold or re-pledged, except in the event of default, and are not reflected on the Company's Condensed Consolidated Balance Sheets. This collateral generally consists of U.S. Treasury, U.S. Government agency securities and MBS pools. As of March 31, 2018 and December 31, 2017, the fair value of securities retained as collateral by the lending agent on the Company's behalf was \$194 and \$308, respectively.

The following table presents borrowings under securities lending transactions by class of collateral pledged for the dates indicated:

	March 31, 2018 (1)(2)	December 31, 2017 (1)(2)
U.S. Treasuries	\$316	\$ 587
U.S. Government agencies and authorities	13	5
U.S. corporate public securities	942	967
Foreign corporate public securities and foreign governments	369	338
Payables under securities loan agreements	\$1,640	\$ 1,897

<sup>(1)</sup>As of March 31, 2018 and December 31, 2017, borrowings under securities lending transactions include cash collateral of \$1,446 and \$1,589, respectively.

<sup>(2)</sup>As of March 31, 2018 and December 31, 2017, borrowings under securities lending transactions include non-cash collateral of \$194 and \$308, respectively.

The Company's securities lending activities are conducted on an overnight basis, and all securities loaned can be recalled at any time. The Company does not offset assets and liabilities associated with its securities lending program.

<sup>(1)</sup> For purposes of this table, subprime mortgages are included in Non-agency RMBS categories.

Investments with fair values less than amortized cost are included in the Company's other-than-temporary impairments analysis. Impairments were recognized as disclosed in the "Evaluating Securities for

Other-Than-Temporary Impairments" section below. The Company evaluates non-agency RMBS and ABS for "other-than-temporary impairments" each quarter based on actual and projected cash flows, after considering the quality and updated loan-to-value ratios reflecting current home prices of underlying collateral, forecasted loss severity, the payment priority within the tranche structure of the security and amount of any credit enhancements. The Company's assessment of current levels of cash flows compared to estimated cash flows at the time the securities were acquired (typically pre-2008) indicates the amount and the pace of projected cash flows from the underlying collateral has generally been lower and slower, respectively. However, since cash flows are typically projected at a trust level, the impairment review incorporates the security's position within the trust structure as well as credit enhancement remaining in the trust to determine whether an impairment is warranted. Therefore, while lower and slower cash flows will impact the trust, the effect on the valuation of a particular security within the trust will also be dependent upon the trust structure. Where the assessment continues to project full recovery of principal and interest on schedule, the Company has not recorded an impairment. Based on this analysis, the Company determined that the remaining investments in an unrealized loss position were not other-than-temporarily impaired and therefore no further other-than-temporary impairment was necessary.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

### Troubled Debt Restructuring

The Company invests in high quality, well performing portfolios of commercial mortgage loans and private placements. Under certain circumstances, modifications are granted to these contracts. Each modification is evaluated as to whether a troubled debt restructuring has occurred. A modification is a troubled debt restructuring when the borrower is in financial difficulty and the creditor makes concessions. Generally, the types of concessions may include reducing the face amount or maturity amount of the debt as originally stated, reducing the contractual interest rate, extending the maturity date at an interest rate lower than current market interest rates and/or reducing accrued interest. The Company considers the amount, timing and extent of the concession granted in determining any impairment or changes in the specific valuation allowance recorded in connection with the troubled debt restructuring. A valuation allowance may have been recorded prior to the quarter when the loan is modified in a troubled debt restructuring. Accordingly, the carrying value (net of the specific valuation allowance) before and after modification through a troubled debt restructuring may not change significantly, or may increase if the expected recovery is higher than the pre-modification recovery assessment. As of March 31, 2018, the Company did not have any new commercial mortgage loan or private placement troubled debt restructuring. As of December 31, 2017 the Company did not have any new commercial mortgage loan troubled debt restructuring and had one private placement troubled debt restructuring with a pre-modification and post-modification carrying value of \$22.

As of March 31, 2018 and December 31, 2017, the Company did not have any commercial mortgage loans or private placements modified in a troubled debt restructuring with a subsequent payment default.

### Mortgage Loans on Real Estate

The Company's mortgage loans on real estate are all commercial mortgage loans held for investment, which are reported at amortized cost, less impairment write-downs and allowance for losses. The Company diversifies its commercial mortgage loan portfolio by geographic region and property type to reduce concentration risk. The Company manages risk when originating commercial mortgage loans by generally lending only up to 75% of the estimated fair value of the underlying real estate. Subsequently, the Company continuously evaluates mortgage loans based on relevant current information including a review of loan-specific credit quality, property characteristics and market trends. Loan performance is monitored on a loan specific basis through the review of submitted appraisals, operating statements, rent revenues and annual inspection reports, among other items. This review ensures properties are performing at a consistent and acceptable level to secure the debt. The components to evaluate debt service coverage are received and reviewed at least annually to determine the level of risk.

The following table summarizes the Company's investment in mortgage loans as of the dates indicated:

	March 31, 2018		December 31, 2017	
	Non- Impaired	Total	Non- Impaired	Total
Commercial mortgage loans	\$4 \$8,835	\$8,839	\$4 \$8,685	\$8,689
Collective valuation allowance for losses	N/A(2 )	(2 )	N/A(3 )	(3 )
Total net commercial mortgage loans	\$4 \$8,833	\$8,837	\$4 \$8,682	\$8,686

N/A - Not Applicable

There were no impairments taken on the mortgage loan portfolio for the three months ended March 31, 2018 and 2017.

The following table summarizes the activity in the allowance for losses for commercial mortgage loans for the periods indicated:

	March 31, December 31,	
	2018	2017
Collective valuation allowance for losses, balance at January 1	\$ 3	\$ 3

Less: Allowances for losses on impaired loans	—	—
Impaired loans, net	\$ 4	\$ 4
Unpaid principal balance of impaired loans	\$ 6	\$ 6

As of March 31, 2018 and December 31, 2017, the Company did not have any impaired loans with allowances for losses.

The Company defines delinquent mortgage loans consistent with industry practice as 60 days past due. The Company's policy is to recognize interest income until a loan becomes 90 days delinquent or foreclosure proceedings are commenced, at which point interest accrual is discontinued. Interest accrual is not resumed until the loan is brought current.

There were no mortgage loans in the Company's portfolio in process of foreclosure as of March 31, 2018 and December 31, 2017.

There were no loans 30 days or less in arrears, with respect to principal and interest as of March 31, 2018 and December 31, 2017.

The following table presents information on the average investment during the period in impaired loans and interest income recognized on impaired and troubled debt restructured loans for the periods indicated:

	Three Months Ended March 31, 20182017	
Impaired loans, average investment during the period (amortized cost) <sup>(1)</sup>	\$ 4	\$ 5
Interest income recognized on impaired loans, on an accrual basis <sup>(1)</sup>	—	—
Interest income recognized on impaired loans, on a cash basis <sup>(1)</sup>	—	—
Interest income recognized on troubled debt restructured loans, on an accrual basis	—	—

<sup>(1)</sup> Includes amounts for Troubled debt restructured loans.

Loan-to-value ("LTV") and debt service coverage ("DSC") ratios are measures commonly used to assess the risk and quality of mortgage loans. The LTV ratio, calculated at time of origination, is expressed as a percentage of the amount of the loan relative to the value of the underlying property. A LTV ratio in excess of 100% indicates the unpaid loan amount exceeds the underlying collateral. The DSC ratio, based upon the most recently received financial statements, is expressed as a percentage of the amount of a property's net income to its debt service payments. A DSC ratio of less than 1.0 indicates that a property's operations do not generate sufficient income to cover debt payments. These ratios are utilized as part of the review process described above.

The following table presents the LTV ratios as of the dates indicated:

	March 31, 2018 <sup>(1)</sup>	December 31, 2017 <sup>(1)</sup>
Loan-to-Value Ratio:		
0% - 50%	\$ 860	\$ 849
> 50% - 60%	2,192	2,125
> 60% - 70%	5,194	5,144

Total Commercial mortgage loans	\$8,839	\$ 8,689

(1) Balances do not include collective valuation allowance for losses.

#### Evaluating Securities for Other-Than-Temporary Impairments

The Company performs a regular evaluation, on a security-by-security basis, of its available-for-sale securities holdings, including fixed maturity securities in accordance with its impairment policy in order to evaluate whether such investments are other-than-temporarily impaired.

The following tables identify the Company's credit-related and intent-related impairments included in the Condensed Consolidated Statements of Operations, excluding impairments included in Other comprehensive income (loss) by type for the periods indicated:

	Three Months Ended March 31, 2018		2017	
	No. of Impairment Securities		No. of Impairment Securities	
Foreign corporate private securities <sup>(1)</sup>	\$ 14	1	\$ —	—
Residential mortgage-backed	—	* 12	1	28
Commercial mortgage-backed	—	—	1	2
Other asset-backed	—	—	—	* 1
Total	\$ 14	13	\$ 2	31

\* Less than \$1

(1) Primarily U.S. dollar denominated.

The above tables include \$14 and \$1 of write-downs related to credit impairments for the three months ended March 31, 2018, and 2017, respectively, in Other-than-temporary impairments, which are recognized in the Condensed Consolidated Statements of Operations. The remaining \$1 in write-downs for the three months ended March 31, 2017 are related to intent impairments. There were immaterial write-downs for the three months ended March 31, 2018 related to intent impairments.

The following table summarizes these intent impairments, which are also recognized in earnings, by type for the periods indicated:

	Three Months Ended March 31,			
	2018		2017	
	No. of Impairment Securities		No. of Impairment Securities	
Residential mortgage-backed	\$ <del>*3</del>	\$ — *	5	
Commercial mortgage-backed	— —	1	2	
Total	\$—3	\$ 1	7	

\* Less than \$1

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

The Company may sell securities during the period in which fair value has declined below amortized cost for fixed maturities. In certain situations, new factors, including changes in the business environment, can change the Company's previous intent to continue holding a security. Accordingly, these factors may lead the Company to record additional intent related capital losses.

The following table presents the amount of credit impairments on fixed maturities for which a portion of the OTTI loss was recognized in Other comprehensive income (loss) and the corresponding changes in such amounts for the periods indicated:

	Three Months Ended March 31, 2018	2017
Balance at January 1	\$40	\$55
Additional credit impairments:		
On securities previously impaired	—	1
Reductions:		
Increase in cash flows	—	—
Securities sold, matured, prepaid or paid down	16	11
Balance at March 31	\$24	\$44

#### Net Investment Income

The following table summarizes Net investment income for the periods indicated:

	Three Months Ended March 31, 2018	2017
Fixed maturities	\$663	\$674
Equity securities	3	2
Mortgage loans on real estate	97	97
Policy loans	25	25
Short-term investments and cash equivalents	4	2
Other	49	58
Gross investment income	841	858
Less: investment expenses	18	15
Net investment income	\$823	\$843

As of March 31, 2018 and December 31, 2017, the Company had \$2 and \$5, respectively, of investments in fixed maturities that did not produce net investment income. Fixed maturities are moved to a non-accrual status when the investment defaults.

Interest income on fixed maturities is recorded when earned using an effective yield method, giving effect to amortization of premiums and accretion of discounts. Such interest income is recorded in Net investment income in the Condensed Consolidated Statements of Operations.

#### Net Realized Capital Gains (Losses)

Net realized capital gains (losses) comprise the difference between the amortized cost of investments and proceeds from sale and redemption, as well as losses incurred due to the credit-related and intent-related other-than-temporary impairment of investments. Realized investment gains and losses are also primarily generated from changes in fair value of embedded derivatives within products and fixed maturities, changes in fair value of fixed maturities recorded at FVO and changes in fair value including accruals on derivative instruments, except for effective cash flow hedges. Upon the adoption of ASU 2016-01 as of January 1, 2018, realized

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

capital gains (losses) also include changes in fair value of equity securities. The cost of the investments on disposal is generally determined based on first-in-first-out ("FIFO") methodology.

Net realized capital gains (losses) were as follows for the periods indicated:

	Three Months Ended March 31,	
	2018	2017
Fixed maturities, available-for-sale, including securities pledged	\$(40 )	\$(33 )
Fixed maturities, at fair value option	(190 )	(83 )
Equity securities	(3 )	—
Derivatives	17	40
Embedded derivatives - fixed maturities	(7 )	(6 )
Guaranteed benefit derivatives	28	(6 )
Other investments	14	2
Net realized capital gains (losses)	\$(181)	\$(86)
After-tax net realized capital gains (losses)	\$(143)	\$(56)

For the three months ended March 31, 2018, the change in the fair value of equity securities still held as of March 31, 2018 was \$(3).

Proceeds from the sale of fixed maturities and equity securities, available-for-sale and the related gross realized gains and losses, before tax, were as follows for the periods indicated:

	Three Months Ended March 31,	
	2018	2017
Proceeds on sales	\$1,580	\$1,398
Gross gains	11	9
Gross losses	26	21

#### 4. Derivative Financial Instruments

The Company enters into the following types of derivatives:

**Interest rate caps and floors:** The Company uses interest rate cap contracts to hedge the interest rate exposure arising from duration mismatches between assets and liabilities. Interest rate caps are also used to hedge interest rate exposure if rates rise above a specified level. The Company uses interest rate floor contracts to hedge interest rate exposure if rates decrease below a specified level. The Company pays an upfront premium to purchase these caps and floors. The Company utilizes these contracts in non-qualifying hedging relationships.

**Interest rate swaps:** Interest rate swaps are used by the Company primarily to reduce market risks from changes in interest rates and to alter interest rate exposure arising from mismatches between assets and/or liabilities. Interest rate swaps are also used to hedge the interest rate risk associated with the value of assets it owns or in an anticipation of

acquiring them. Using interest rate swaps, the Company agrees with another party to exchange, at specified intervals, the difference between fixed rate and floating rate interest payments, calculated by reference to an agreed upon notional principal amount. These transactions are entered into pursuant to master agreements that provide for a single net payment to be made to/from the counterparty at each due date. The Company utilizes these contracts in qualifying hedging relationships as well as non-qualifying hedging relationships.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

**Foreign exchange swaps:** The Company uses foreign exchange or currency swaps to reduce the risk of change in the value, yield or cash flows associated with certain foreign denominated invested assets. Foreign exchange swaps represent contracts that require the exchange of foreign currency cash flows against U.S. dollar cash flows at regular periods, typically quarterly or semi-annually. The Company utilizes these contracts in qualifying hedging relationships as well as non-qualifying hedging relationships.

**Credit default swaps:** Credit default swaps are used to reduce credit loss exposure with respect to certain assets that the Company owns or to assume credit exposure on certain assets that the Company does not own. Payments are made to, or received from, the counterparty at specified intervals. In the event of a default on the underlying credit exposure, the Company will either receive a payment (purchased credit protection) or will be required to make a payment (sold credit protection) equal to the par minus recovery value of the swap contract. Credit default swaps are also used to hedge credit exposure associated with certain variable annuity guarantees. The Company utilizes these contracts in non-qualifying hedging relationships.

**Total return swaps:** The Company uses total return swaps as a hedge against a decrease in variable annuity account values, which are invested in certain indices. Using total return swaps, the Company agrees with another party to exchange, at specified intervals, the difference between the economic risk and reward of assets or a market index and the LIBOR rate, calculated by reference to an agreed upon notional principal amount. No cash is exchanged at the onset of the contracts. Cash is paid and received over the life of the contract based upon the terms of the swaps. The Company utilizes these contracts in non-qualifying hedging relationships.

**Currency forwards:** The Company used currency forward contracts to hedge policyholder liabilities associated with the variable annuity contracts which are linked to foreign indices. The currency fluctuations may result in a decrease in account values, which would increase the possibility of the Company incurring an expense for guaranteed benefits in excess of account values. The Company also utilizes currency forward contracts to hedge currency exposure related to its invested assets. The Company utilizes these contracts in non-qualifying hedging relationships.

**Forwards:** The Company uses forward contracts to hedge certain invested assets against movement in interest rates, particularly mortgage rates. The Company uses To Be Announced mortgage-backed securities as an economic hedge against rate movements. The Company utilizes forward contracts in non-qualifying hedging relationships.

**Futures:** Futures contracts are used to hedge against a decrease in certain equity indices. Such decreases may correlate to a decrease in variable annuity account values which would increase the possibility of the Company incurring an expense for guaranteed benefits in excess of account values. The Company also uses interest rate futures contracts to hedge its exposure to market risks due to changes in interest rates. The Company enters into exchange traded futures with regulated futures commissions that are members of the exchange. The Company also posts initial and variation margins, with the exchange, on a daily basis. The Company utilizes exchange-traded futures in non-qualifying hedging relationships. The Company may also use futures contracts as a hedge against an increase in certain equity indices. Such increases may result in increased payments to the holders of fixed index annuity ("FIA") contracts.

**Swaptions:** A swaption is an option to enter into a swap with a forward starting effective date. The Company uses swaptions to hedge the interest rate exposure associated with the minimum crediting rate and book value guarantees embedded in the retirement products that the Company offers. Increases in interest rates will generate losses on assets that are backing such liabilities. In certain instances, the Company locks in the economic impact of existing purchased

swaptions by entering into offsetting written swaptions. The Company pays a premium when it purchases the swaption. The Company utilizes these contracts in non-qualifying hedging relationships.

Options: The Company uses options to manage the equity, interest rate and equity volatility risk of the economic liabilities associated with certain variable annuity minimum guaranteed benefits and/or to mitigate certain rebalancing costs resulting from increased volatility. The Company also uses equity options to hedge against an increase in various equity indices, and interest rate options to hedge against an increase in the interest rate benchmarked crediting strategies within FIA contracts. Such increases may result in increased payments to the holders of the FIA and IUL contracts. The Company pays an upfront premium to purchase these options. The Company utilizes these options in non-qualifying hedging relationships.

Currency Options: The Company uses currency option contracts to hedge currency exposure related to its invested assets. The Company utilizes these contracts in non-qualifying hedging relationships.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

**Variance swaps:** The Company uses variance swaps to manage equity volatility risk on the economic liabilities associated with certain minimum guaranteed living benefits and/or to mitigate certain rebalancing costs resulting from increased volatility. An increase in the equity volatility results in higher valuations of such liabilities. In an equity variance swap, the Company agrees with another party to exchange amounts in the future, based on the changes in equity volatility over a defined period. The Company utilizes equity variance swaps in non-qualifying hedging relationships.

**Managed custody guarantees ("MCGs"):** The Company issues certain credited rate guarantees on variable fixed income portfolios that represent stand-alone derivatives. The market value is partially determined by, among other things, levels of or changes in interest rates, prepayment rates and credit ratings/spreads.

**Embedded derivatives:** The Company also invests in certain fixed maturity instruments and has issued certain products that contain embedded derivatives for which market value is at least partially determined by, among other things, levels of or changes in domestic and/or foreign interest rates (short-term or long-term), exchange rates, prepayment rates, equity rates or credit ratings/spreads. In addition, the Company has entered into coinsurance with funds withheld arrangements, which contain embedded derivatives.

The Company's use of derivatives is limited mainly to economic hedging to reduce the Company's exposure to cash flow variability of assets and liabilities, interest rate risk, credit risk, exchange rate risk and equity market risk. It is the Company's policy not to offset amounts recognized for derivative instruments and amounts recognized for the right to reclaim cash collateral or the obligation to return cash collateral arising from derivative instruments executed with the same counterparty under a master netting arrangement, which provides the Company with the legal right of offset. However, in accordance with the Chicago Mercantile Exchange ("CME") rule changes related to the variation margin payments, effective the first quarter of 2017, the Company is required to adjust the derivative balances with the variation margin payments related to its cleared derivatives executed through CME.

The notional amounts and fair values of derivatives from continuing operations were as follows as of the dates indicated:

Based on the notional amounts, a substantial portion of the Company's derivative positions was not designated or did not qualify for hedge accounting as part of a hedging relationship as of March 31, 2018 and December 31, 2017. The Company utilizes derivative contracts mainly to hedge exposure to variability in cash flows, interest rate risk, credit risk, foreign exchange risk and equity market risk. The majority of derivatives used by the Company are designated as product hedges, which hedge the exposure arising from insurance liabilities or guarantees embedded in the contracts the Company offers through various product lines. These derivatives do not qualify for hedge accounting as they do not meet the criteria of being "highly effective" as outlined in ASC Topic 815, but do provide an economic hedge, which is in line with the Company's risk management objectives. The Company also uses derivatives contracts to hedge its exposure to various risks associated with the investment portfolio. The Company does not seek hedge accounting treatment for certain of these derivatives as they generally do not qualify for hedge accounting due to the criteria required under the portfolio hedging rules outlined in ASC Topic 815. The Company also uses credit default swaps coupled with other investments in order to produce the investment characteristics of otherwise permissible investments that do not qualify as effective accounting hedges under ASC Topic 815.

#### Collateral

Under the terms of the OTC Derivative International Swaps and Derivatives Association, Inc. ("ISDA") agreements, the Company may receive from, or deliver to, counterparties collateral to assure that terms of the ISDA agreements will be met with regard to the Credit Support Annex ("CSA"). The terms of the CSA call for the Company to pay interest on any cash received equal to the Federal Funds rate. To the extent cash collateral is received and delivered, it is included in Payables under securities loan agreements, including collateral held and Short-term investments under securities loan agreements, including collateral delivered, respectively, on the Condensed Consolidated Balance Sheets and is reinvested in short-term investments. Collateral held is used in accordance with the CSA to satisfy any obligations. Investment grade bonds owned by the Company are the source of noncash collateral posted, which is

reported in Securities pledged on the Condensed Consolidated Balance Sheets.

Continuing operations: As of March 31, 2018, the Company held \$146 and \$101 of net cash collateral related to OTC derivative contracts and cleared derivative contracts, respectively. As of December 31, 2017, the Company held \$174 and \$73 of net cash collateral related to OTC derivative contracts and cleared derivative contracts, respectively. In addition, as of March 31, 2018, the Company delivered \$277 of securities and held \$37 of securities as collateral. As of December 31, 2017, the Company delivered \$233 of securities and held \$38 of securities as collateral.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

Businesses held for sale: As of March 31, 2018, the Company held \$466 and \$29 of net cash collateral related to OTC derivative contracts and cleared derivative contracts, respectively. As of December 31, 2017, the Company held \$666 and \$22 of net cash collateral related to OTC derivative contracts and cleared derivative contracts, respectively. In addition, as of March 31, 2018, the Company delivered \$448 of securities and held \$66 of securities as collateral. As of December 31, 2017, the Company delivered \$477 of securities and held \$34 of securities as collateral.

Net realized gains (losses) on derivatives from continuing operations were as follows for the periods indicated:

#### Credit Default Swaps

The Company has entered into various credit default swaps. When credit default swaps are sold, the Company assumes credit exposure to certain assets that it does not own. Credit default swaps may also be purchased to reduce credit exposure in the Company's portfolio. Credit default swaps involve a transfer of credit risk from one party to another in exchange for periodic payments. As of March 31, 2018, the fair values of credit default swaps of \$21 and \$7 were included in Derivatives assets and Derivatives liabilities, respectively, on the Condensed Consolidated Balance Sheets. As of December 31, 2017, the fair values of credit default swaps of \$26 and \$10 were included in Derivatives assets and Derivatives liabilities, respectively, on the Condensed Consolidated Balance Sheets. As of March 31, 2018, the maximum potential future net exposure to the Company was \$1.4 billion on credit default swap protection sold. As of December 31, 2017, the maximum potential future net exposure to the Company was \$1.5 billion on credit default swap protection sold. These instruments are typically written for a maturity period of 5 years and contain no recourse provisions. If the Company's current debt and claims paying ratings were downgraded in the future, the terms in the Company's derivative agreements may be triggered, which could negatively impact overall liquidity.

5. Fair Value Measurements (excluding Consolidated Investment Entities)

Fair Value Measurement

The Company categorizes its financial instruments into a three-level hierarchy based on the priority of the inputs to the valuation technique, pursuant to ASU 2011-04, "Fair Value Measurements (ASC Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP" ("ASU 2011-04"). The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure fair value fall within different levels of the hierarchy, the category level is based on the lowest priority level input that is significant to the fair value measurement of the instrument.

When available, the estimated fair value of financial instruments is based on quoted prices in active markets that are readily and regularly obtainable. When quoted prices in active markets are not available, the determination of estimated fair value is based on market standard valuation methodologies, including discounted cash flow methodologies, matrix pricing or other similar techniques.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

#### Valuation of Financial Assets and Liabilities at Fair Value

Certain assets and liabilities are measured at estimated fair value on the Company's Condensed Consolidated Balance Sheets. The Company defines fair value as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The exit price and the transaction (or entry) price will be the same at initial recognition in many circumstances. However, in certain cases, the transaction price may not represent fair value. The fair value of a liability is based on the amount that would be paid to transfer a liability to a third-party with an equal credit standing. Fair value is required to be a market-based measurement that is determined based on a hypothetical transaction at the measurement date, from a market participant's perspective. The Company considers three broad valuation approaches when a quoted price is unavailable: (i) the market approach, (ii) the income approach and (iii) the cost approach. The Company determines the most appropriate valuation technique to use, given the instrument being measured and the availability of sufficient inputs. The Company prioritizes the inputs to fair valuation approaches and allows for the use of unobservable inputs to the extent that observable inputs are not available.

The Company utilizes a number of valuation methodologies to determine the fair values of its financial assets and liabilities in conformity with the concepts of exit price and the fair value hierarchy as prescribed in ASC Topic 820. Valuations are obtained from third-party commercial pricing services, brokers and industry-standard, vendor-provided software that models the value based on market observable inputs. The valuations obtained from third-party commercial pricing services are non-binding. The Company reviews the assumptions and inputs used by third-party commercial pricing services for each reporting period in order to determine an appropriate fair value hierarchy level. The documentation and analysis obtained from third-party commercial pricing services are reviewed by the Company, including in-depth validation procedures confirming the observability of inputs. The valuations are reviewed and validated monthly through the internal valuation committee price variance review, comparisons to internal pricing models, back testing to recent trades or monitoring of trading volumes.

**Fixed maturities:** The fair values for actively traded marketable bonds are determined based upon the quoted market prices and are classified as Level 1 assets. Assets in this category primarily include certain U.S. Treasury securities.

For fixed maturities classified as Level 2 assets, fair values are determined using a matrix-based market approach, based on prices obtained from third-party commercial pricing services and the Company's matrix and analytics-based pricing models, which in each case incorporate a variety of market observable information as valuation inputs. The market observable inputs used for these fair value measurements, by fixed maturity asset class, are as follows:

**U.S. Treasuries:** Fair value is determined using third-party commercial pricing services, with the primary inputs being stripped interest and principal U.S. Treasury yield curves that represent a U.S. Treasury zero-coupon curve.

**U.S. government agencies and authorities, State, municipalities and political subdivisions:** Fair value is determined using third-party commercial pricing services, with the primary inputs being U.S. Treasury yield curves, trades of comparable securities, credit spreads off benchmark yields and issuer ratings.

**U.S. corporate public securities, Foreign corporate public securities and foreign governments:** Fair value is determined using third-party commercial pricing services, with the primary inputs being benchmark yields, trades of comparable

securities, issuer ratings, bids and credit spreads off benchmark yields.

U.S. corporate private securities and Foreign corporate private securities: Fair values are determined using a matrix and analytics-based pricing model. The model incorporates the current level of risk-free interest rates, current corporate credit spreads, credit quality of the issuer and cash flow characteristics of the security. The model also considers a liquidity spread, the value of any collateral, the capital structure of the issuer, the presence of guarantees, and prices and quotes for comparably rated publicly traded securities.

RMBS, CMBS and ABS: Fair value is determined using third-party commercial pricing services, with the primary inputs being credit spreads off benchmark yields, prepayment speed assumptions, current and forecasted loss severity, debt service coverage ratios, collateral type, payment priority within tranche and the vintage of the loans underlying the security.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

Generally, the Company does not obtain more than one vendor price from pricing services per instrument. The Company uses a hierarchy process in which prices are obtained from a primary vendor and, if that vendor is unable to provide the price, the next vendor in the hierarchy is contacted until a price is obtained or it is determined that a price cannot be obtained from a commercial pricing service. When a price cannot be obtained from a commercial pricing service, independent broker quotes are solicited. Securities priced using independent broker quotes are classified as Level 3.

Broker quotes and prices obtained from pricing services are reviewed and validated through an internal valuation committee price variance review, comparisons to internal pricing models, back testing to recent trades or monitoring of trading volumes. After review, for those instruments where the price is determined to be appropriate, the unadjusted price provided is used for financial statement valuation. If it is determined that the price is questionable, another price may be requested from a different vendor. The internal valuation committee then reviews all prices for the instrument again, along with information from the review, to determine which price best represents exit price for the instrument.

Fair values of privately placed bonds are determined primarily using a matrix-based pricing model and are generally classified as Level 2 assets. The model considers the current level of risk-free interest rates, current corporate spreads, the credit quality of the issuer and cash flow characteristics of the security. Also considered are factors such as the net worth of the borrower, the value of collateral, the capital structure of the borrower, the presence of guarantees and the Company's evaluation of the borrower's ability to compete in its relevant market. Using this data, the model generates estimated market values, which the Company considers reflective of the fair value of each privately placed bond.

Equity securities Fair values of publicly traded equity securities are based upon quoted market price and are classified as Level 1 assets. Other equity securities, typically private equities or equity securities not traded on an exchange, are valued by other sources such as analytics or brokers and are classified as Level 2 or Level 3 assets.

Derivatives: Derivatives are carried at fair value, which is determined using the Company's derivative accounting system in conjunction with observable key financial data from third-party sources, such as yield curves, exchange rates, S&P 500 Index prices, London Interbank Offered Rates ("LIBOR") and Overnight Index Swap ("OIS") rates. The Company uses OIS for valuations of collateralized interest rate derivatives, which are obtained from third-party sources. For those derivatives that are unable to be valued by the accounting system, the Company typically utilizes values established by third-party brokers. Counterparty credit risk is considered and incorporated in the Company's valuation process through counterparty credit rating requirements and monitoring of overall exposure. It is the Company's policy to transact only with investment grade counterparties with a credit rating of A- or better. The Company's nonperformance risk is also considered and incorporated in the Company's valuation process. Valuations for the Company's futures and interest rate forward contracts are based on unadjusted quoted prices from an active exchange and, therefore, are classified as Level 1. The Company also has certain credit default swaps and options that are priced by third party vendors or by using models that primarily use market observable inputs, but contain inputs that are not observable to market participants, which have been classified as Level 3. The remaining derivative instruments are valued based on market observable inputs and are classified as Level 2.

Cash and cash equivalents, Short-term investments and Short-term investments under securities loan agreement: The carrying amounts for cash reflect the assets' fair values. The fair values for cash equivalents and most short-term investments are determined based on quoted market prices. These assets are classified as Level 1. Other short-term investments are valued and classified in the fair value hierarchy consistent with the policies described herein,

depending on investment type.

Assets held in separate accounts: Assets held in separate accounts are reported at the quoted fair values of the underlying investments in the separate accounts. The underlying investments include mutual funds, short-term investments and cash, the valuations of which are based upon a quoted market price and are included in Level 1. Fixed maturity valuations are obtained from third-party commercial pricing services and brokers and are classified in the fair value hierarchy consistent with the policy described above for fixed maturities.

Guaranteed benefit derivatives: The Company records reserves for annuity contracts containing GMWBL, GMWB and GMAB riders. The guarantee is an embedded derivative and is required to be accounted for separately from the host variable annuity contract. The fair value of the obligation is calculated based on actuarial and capital market assumptions related to the projected cash flows, including benefits and related contract charges, over the anticipated life of the related contracts. The cash flow estimates

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

are produced by using stochastic techniques under a variety of market return scenarios and other market implied assumptions. These derivatives are classified as Level 3 liabilities in the fair value hierarchy.

The index-crediting feature in the Company's FIA and IUL contracts is an embedded derivative that is required to be accounted for separately from the host contract. The fair value of the obligation is calculated based on actuarial and capital market assumptions related to the projected cash flows, including benefits and related contract charges, over the anticipated life of the related contracts for FIAs and over the current indexed term for IULs. The cash flow estimates are produced by market implied assumptions. These derivatives are classified as Level 3 liabilities in the fair value hierarchy.

The Company records reserves for Stabilizer and MCG contracts containing guaranteed credited rates. The guarantee is treated as an embedded derivative or a stand-alone derivative (depending on the underlying product) and is required to be reported at fair value. The estimated fair value is determined based on the present value of projected future claims, minus the present value of future guaranteed premiums. At inception of the contract, the Company projects a guaranteed premium to be equal to the present value of the projected future claims. The income associated with the contracts is projected using relevant actuarial and capital market assumptions, including benefits and related contract charges, over the anticipated life of the related contracts. The cash flow estimates are produced by using stochastic techniques under a variety of risk neutral scenarios and other market implied assumptions. These derivatives are classified as Level 3 liabilities.

The discount rate used to determine the fair value of the Company's GMAB, GMWB, GMWBL, FIA, IUL and Stabilizer embedded derivative liabilities and the stand-alone derivative for MCG includes an adjustment to reflect the risk that these obligations will not be fulfilled ("nonperformance risk"). The nonperformance risk adjustment incorporates a blend of observable, similarly rated peer holding company credit default swap spreads, adjusted to reflect the credit quality of the individual insurance subsidiary that issued the guarantee, as well as an adjustment to reflect the priority of policyholder claims.

The Company's valuation actuaries are responsible for the policies and procedures for valuing the embedded derivatives, reflecting the capital markets and actuarial valuation inputs and nonperformance risk in the estimate of the fair value of the embedded derivatives. The actuarial and capital market assumptions for each liability are approved by each product's Chief Risk Officer ("CRO"), including an independent annual review by the CRO. Models used to value the embedded derivatives must comply with the Company's governance policies.

Quarterly, an attribution analysis is performed to quantify changes in fair value measurements and a sensitivity analysis is used to analyze the changes. The changes in fair value measurements are also compared to corresponding movements in the hedge target to assess the validity of the attributions. The results of the attribution analysis are reviewed by the valuation actuaries, responsible CFOs, Controllers, CROs and/or others as nominated by management.

Embedded derivatives on reinsurance: The carrying value of embedded derivatives is estimated based upon the change in the fair value of the assets supporting the funds withheld payable under reinsurance agreements. The fair value of the embedded derivative is based on market observable inputs and is classified as Level 2.

Transfers in and out of Level 1 and 2

There were no securities transferred between Level 1 and Level 2 for the three months ended March 31, 2018 and 2017. The Company's policy is to recognize transfers in and transfers out as of the beginning of the reporting period.

#### Level 3 Financial Instruments

The fair values of certain assets and liabilities are determined using prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement (i.e., Level 3 as defined by ASC Topic 820), including but not limited to liquidity spreads for investments within markets deemed not currently active. These valuations, whether derived internally or obtained from a third-party, use critical assumptions that are not widely available to estimate market participant expectations in valuing the asset or liability. In addition, the Company has determined, for certain financial instruments, an active market is such a significant input to determine fair value that the presence of an inactive market may lead to classification in Level 3. In light of the methodologies employed to obtain the fair values of financial assets and liabilities classified as Level 3, additional information is presented below.

Voya Financial, Inc.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

For the three months ended March 31, 2018 and 2017, the transfers in and out of Level 3 for fixed maturities, other derivatives and separate accounts were due to the variation in inputs relied upon for valuation each quarter. Securities that are primarily valued using independent broker quotes when prices are not available from one of the commercial pricing services are reflected as transfers into Level 3. When securities are valued using more widely available information, the securities are transferred out of Level 3 and into Level 1 or 2, as appropriate.

#### Significant Unobservable Inputs

The Company's Level 3 fair value measurements of its fixed maturities, equity securities and equity and credit derivative contracts are primarily based on broker quotes for which the quantitative detail of the unobservable inputs is neither provided nor reasonably corroborated, thus negating the ability to perform a sensitivity analysis. The Company performs a review of broker quotes by performing a monthly price variance comparison and back tests broker quotes to recent trade prices.

Quantitative information about the significant unobservable inputs used in the Company's Level 3 fair value measurements of its guaranteed benefit derivatives is presented in the following sections and table.

Significant unobservable inputs used in the fair value measurements of GMWBLs, GMWBs and GMABs include long-term equity and interest rate implied volatility, correlations between the rate of return on policyholder funds and between interest rates and equity returns, nonperformance risk, mortality and policyholder behavior assumptions, such as benefit utilization, lapses and partial withdrawals. Such inputs are monitored quarterly.

Significant unobservable inputs used in the fair value measurements of FIAs include nonperformance risk and policyholder behavior assumptions, such as lapses and partial withdrawals. Such inputs are monitored quarterly.

Significant unobservable inputs used in the fair value measurements of IULs include nonperformance risk and policyholder behavior assumptions, such as lapses. Such inputs are monitored quarterly.

The significant unobservable inputs used in the fair value measurement of the Stabilizer embedded derivatives and MCG derivative are interest rate implied volatility, nonperformance risk, lapses and policyholder deposits. Such inputs are monitored quarterly.

Following is a description of selected inputs:

**Equity / Interest Rate Volatility:** A term-structure model is used to approximate implied volatility for the equity indices and swap rates for GMWBL, GMWB and GMAB fair value measurements and swap rates for the Stabilizer and MCG fair value measurements. Where no implied volatility is readily available in the market, an alternative approach is applied based on historical volatility.

**Correlations:** Integrated interest rate and equity scenarios are used in GMWBL, GMWB and GMAB fair value measurements to better reflect market interest rates and interest rate volatility correlations between equity and fixed income fund groups and between equity fund groups and interest rates. The correlations are based on historical fund returns and swap rates from external sources.

Nonperformance Risk: For the estimate of the fair value of embedded derivatives associated with the Company's product guarantees, the Company uses a blend of observable, similarly rated peer company credit default swap spreads, adjusted to reflect the credit quality of the individual insurance company subsidiary that issued the guarantee and the priority of policyholder claims.

Actuarial Assumptions: Management regularly reviews actuarial assumptions, which are based on the Company's experience and periodically reviewed against industry standards. Industry standards and Company experience may be limited on certain products.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

The following table presents the unobservable inputs for Level 3 fair value measurements for continuing operations and businesses held for sale as of March 31, 2018:

Unobservable Input	Range <sup>(1)</sup>		IUL	Stabilizer/MCGs
	GMWBL/GMWB/GMAB			
Long-term equity implied volatility	15% to 25%	—	—	—
Interest rate implied volatility	0.1% to 16%	—	—	0.1% to 6.5%
Correlations between:				
Equity Funds	-13% to 99%	—	—	—
Equity and Fixed Income Funds	-38% to 62%	—	—	—
Interest Rates and Equity Funds	-32% to 26%	—	—	—
Nonperformance risk	0.07% to 1.1%	0.07% to 1.1%	0.07% to 0.39%	0.07% to 1.1%
Actuarial Assumptions:				
Benefit Utilization	70% to 100% <sup>(2)</sup>	—	—	—
Partial Withdrawals	0% to 3.4% <sup>(2)</sup>	0% to 7%	—	—
Lapses	0.1% to 15.3% <sup>(3)(4)</sup>	0% to 56% <sup>(3)</sup>	2% to 10%	0% to 50% <sup>(5)</sup>
Policyholder Deposits <sup>(6)</sup>	—	—	—	0% to 50% <sup>(5)</sup>
Mortality	— <sup>(7)</sup>	—	<sup>(7)</sup> —	<sup>(8)</sup> —

<sup>(1)</sup> Represents the range of reasonable assumptions that management has used in its fair value calculations.

<sup>(2)</sup> Those GMWBL policyholders who have elected systematic withdrawals are assumed to continue taking withdrawals. As a percent of policies, approximately 50% are taking systematic withdrawals. The Company assumes that at least 70% of all policies will begin systematic withdrawals either immediately or after a delay period, with 100% utilizing by age 95. The utilization function varies by policyholder age, policy duration and tax status. Interactions with lapse and mortality also affect utilization. The utilization rate for GMWBL and GMWB tends to be lower for younger contract owners and contracts that have not reached their maximum accumulated GMWBL and GMWB benefit amount. There is also a lower utilization rate, though indirectly, for contracts that are less "in the money" (i.e., where the notional benefit amount is in excess of the account value) due to higher lapses. Conversely, the utilization rate tends to be higher for contract owners near or beyond retirement age and contracts that have accumulated their maximum GMWBL or GMWB benefit amount. There is also a higher utilization rate, though indirectly, for contracts which are highly "in the money." The chart below provides the GMWBL account value by current age group and average expected delay times from the associated attained age group as of March 31, 2018. Due to the benefit utilization assumption for GMWBL/GMWB, the partial withdrawal assumption only applies to GMAB.

Attained Age Group	Account Values (\$ in billions)		Average Expected Delay (Years)**	
	In the Money	Out of the Money		
< 60	\$1.5	\$ —	\$1.5	9.1
60-69	5.1	0.1	5.2	3.6
70+	6.4	0.2	6.6	2.2
	\$13.0	\$ 0.3	\$13.3	4.3

\*\* For population expected to withdraw in future. Excludes policies taking systematic withdrawals and policies the Company assumes will never withdraw until age 95.

<sup>(3)</sup> Lapse rates tend to be lower during the contractual surrender charge period and higher after the surrender charge period ends; the highest lapse rates occur in the year immediately after the end of the surrender charge period.

<sup>(4)</sup> The Company makes dynamic adjustments to lower the lapse rates for contracts that are more "in the money." The table below shows an analysis of policy account values according to whether they are in or out of the surrender charge period or at the shock lapse period and to whether they are "in the money" or "out of the money" as of March 31, 2018. Lapse ranges are based on weighted average ranges of underlying account value exposure.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

	Money	GMWBL/GMWB/GMAB Account Value (\$ in billions)	Lapse Range
During Surrender Charge Period			
	In the Money**	\$ —	0.1% to 4.8%
	Out of the Money	—	0.6% to 5.2%
Shock Lapse Period			
	In the Money**	\$ 1.1	1.7% to 13.9%
	Out of the Money	—	13.9% to 15.3%
After Surrender Charge Period			
	In the Money**	\$ 11.9	0.9% to 6.4%
	Out of the Money	0.8	6.4% to 7.1%

\*\* The low end of the range corresponds to policies that are highly "in the money." The high end of the range corresponds to the policies that are close to zero in terms of "in the money."

(5) Stabilizer contracts with recordkeeping agreements have a different range of lapse and policyholder deposit assumptions from Stabilizer (Investment only) and MCG contracts as shown below:

	Percentage of Plans	Overall Range of Lapse Rates	Range of Lapse Rates for 85% of Plans	Overall Range of Policyholder Deposits	Range of Policyholder Deposits for 85% of Plans
Stabilizer (Investment Only) and MCG Contracts	92 %	0-25%	0-15%	0-30%	0-15%
Stabilizer with Recordkeeping Agreements	8 %	0-50%	0-30%	0-50%	0-25%
Aggregate of all plans	100 %	0-50%	0-30%	0-50%	0-25%

(6) Measured as a percentage of assets under management or assets under administration.

(7) The mortality rate is based on the 2012 Individual Annuity Mortality Basic table with mortality improvements.

(8) The mortality rate, along with the associated cost of insurance charges, are based on the 2001 Commissioner's Standard Ordinary table with mortality improvements.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

The following table presents the unobservable inputs for Level 3 fair value measurements for continuing operations and businesses held for sale as of December 31, 2017:

Unobservable Input	Range <sup>(1)</sup>		IUL	Stabilizer/MCGs
	GMWBL/GMWB/GMAB			
Long-term equity implied volatility	15% to 25%	—	—	—
Interest rate implied volatility	0.1% to 16%	—	—	0.1% to 6.3%
Correlations between:				
Equity Funds	-13% to 99%	—	—	—
Equity and Fixed Income Funds	-38% to 62%	—	—	—
Interest Rates and Equity Funds	-32% to 26%	—	—	—
Nonperformance risk	0.02% to 1.1%	0.02% to 1.1%	0.02% to 0.54%	0.02% to 1.1%
Actuarial Assumptions:				
Benefit Utilization	70% to 100% <sup>(2)</sup>	—	—	—
Partial Withdrawals	0% to 3.4% <sup>(2)</sup>	0.5% to 7%	—	—
Lapses	0.1% to 15.3% <sup>(3)(4)</sup>	0% to 56%	<sup>(3)</sup> 2% to 10%	0% to 50% <sup>(5)</sup>
Policyholder Deposits <sup>(6)</sup>	—	—	—	0% to 50% <sup>(5)</sup>
Mortality	—	<sup>(7)</sup> —	<sup>(7)</sup> —	<sup>(8)</sup> —

<sup>(1)</sup> Represents the range of reasonable assumptions that management has used in its fair value calculations.

Those GMWBL policyholders who have elected systematic withdrawals are assumed to continue taking withdrawals. As a percent of policies, approximately 45% are taking systematic withdrawals. The Company assumes that at least 70% of all policies will begin systematic withdrawals either immediately or after a delay period, with 100% utilizing by age 95. The utilization function varies by policyholder age, policy duration and tax status. Interactions with lapse and mortality also affect utilization. The utilization rate for GMWBL and GMWB tends to be lower for younger contract owners and contracts that have not reached their maximum accumulated

<sup>(2)</sup> GMWBL and GMWB benefit amount. There is also a lower utilization rate, though indirectly, for contracts that are less "in the money" (i.e., where the notional benefit amount is in excess of the account value) due to higher lapses. Conversely, the utilization rate tends to be higher for contract owners near or beyond retirement age and contracts that have accumulated their maximum GMWBL or GMWB benefit amount. There is also a higher utilization rate, though indirectly, for contracts which are highly "in the money." The chart below provides the GMWBL account value by current age group and average expected delay times from the associated attained age group as of December 31, 2017. Due to the benefit utilization assumption for GMWBL/GMWB, the partial withdrawal assumption only applies to GMAB.

Attained Age Group	Account Values (\$ in billions)		Average Expected Delay (Years)**	
	In the Money	Out of the Money		
< 60	\$1.5	\$0.2	\$1.7	9.0
60-69	5.0	0.6	5.6	3.7
70+	6.0	0.7	6.7	2.4
	\$12.5	\$1.5	\$14.0	4.4

\*\* For population expected to withdraw in future. Excludes policies taking systematic withdrawals and 15% of policies the Company assumes will never withdraw until age 95.

<sup>(3)</sup> Lapse rates tend to be lower during the contractual surrender charge period and higher after the surrender charge period ends; the highest lapse rates occur in the year immediately after the end of the surrender charge period.

<sup>(4)</sup> The Company makes dynamic adjustments to lower the lapse rates for contracts that are more "in the money." The table below shows an analysis of policy account values according to whether they are in or out of the surrender charge period or at the shock lapse period and to whether they are "in the money" or "out of the money" as of December 31, 2017. Lapse ranges are based on weighted average ranges of underlying account value exposure.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

	Money	GMWBL/GMWB/GMAB Account Value (\$ in billions)	Lapse Range
During Surrender Charge Period			
	In the Money**	\$ 0.2	0.1% to 4.8%
	Out of the Money	0.1	0.6% to 5.2%
Shock Lapse Period			
	In the Money**	\$ 1.5	1.7% to 13.9%
	Out of the Money	0.2	13.9% to 15.3%
After Surrender Charge Period			
	In the Money**	\$ 10.7	0.9% to 6.4%
	Out of the Money	1.7	6.4% to 7.1%

\*\* The low end of the range corresponds to policies that are highly "in the money." The high end of the range corresponds to the policies that are close to zero in terms of "in the money."

(5) Stabilizer contracts with recordkeeping agreements have a different range of lapse and policyholder deposit assumptions from Stabilizer (Investment only) and MCG contracts as shown below:

	Percentage of Plans	Overall Range of Lapse Rates	Range of Lapse Rates for 85% of Plans	Overall Range of Policyholder Deposits	Range of Policyholder Deposits for 85% of Plans
Stabilizer (Investment Only) and MCG Contracts	92	% 0-25%	0-15%	0-30%	0-15%
Stabilizer with Recordkeeping Agreements	8	% 0-50%	0-30%	0-50%	0-25%
Aggregate of all plans	100	% 0-50%	0-30%	0-50%	0-25%

(6) Measured as a percentage of assets under management or assets under administration.

(7) The mortality rate is based on the 2012 Individual Annuity Mortality Basic table with mortality improvements.

(8) The mortality rate, along with the associated cost of insurance charges, are based on the 2001 Commissioner's Standard Ordinary table with mortality improvements.

Generally, the following will cause an increase (decrease) in the GMWBL, GMWB and GMAB embedded derivative fair value liabilities:

- ▲ An increase (decrease) in long-term equity implied volatility
- ▲ An increase (decrease) in interest rate implied volatility
- ▲ An increase (decrease) in equity-interest rate correlations
- ▲ A decrease (increase) in nonperformance risk
- ▲ A decrease (increase) in mortality
- ▲ An increase (decrease) in benefit utilization
- ▲ A decrease (increase) in lapses

Changes in fund correlations may increase or decrease the fair value depending on the direction of the movement and the mix of funds. Changes in partial withdrawals may increase or decrease the fair value depending on the timing and magnitude of withdrawals.

Generally, the following will cause an increase (decrease) in the FIA and IUL embedded derivative fair value liabilities:

- ♣A decrease (increase) in nonperformance risk
- ♣A decrease (increase) in lapses

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

Generally, the following will cause an increase (decrease) in the derivative and embedded derivative fair value liabilities related to Stabilizer and MCG contracts:

- An increase (decrease) in interest rate implied volatility
- A decrease (increase) in nonperformance risk
- A decrease (increase) in lapses
- A decrease (increase) in policyholder deposits

The Company notes the following interrelationships:

Higher long-term equity implied volatility is often correlated with lower equity returns, which will result in higher in-the-moneyness, which in turn, results in lower lapses due to the dynamic lapse component reducing the lapses. This increases the projected number of policies that are available to use the GMWBL benefit and may also increase the fair value of the GMWBL.

Generally, an increase (decrease) in benefit utilization will decrease (increase) lapses for GMWBL and GMWB.

Generally, an increase (decrease) in interest rate volatility will increase (decrease) lapses of Stabilizer and MCG contracts due to dynamic participant behavior.

#### Other Financial Instruments

The following disclosures are made in accordance with the requirements of ASC Topic 825 which requires disclosure of fair value information about financial instruments, whether or not recognized at fair value on the Condensed Consolidated Balance Sheets.

ASC Topic 825 excludes certain financial instruments, including insurance contracts and all nonfinancial instruments from its disclosure requirements. Accordingly, the aggregate fair value amounts presented do not represent the underlying value of the Company.

The following table presents the classifications of financial instruments which are not carried at fair value on the Condensed Consolidated Balance Sheets:

Financial Instrument	Classification
Mortgage loans on real estate	Level 3
Policy loans	Level 2
Notes receivable	Level 2
Other investments	Level 2
Funding agreements without fixed maturities and deferred annuities	Level 3
Funding agreements with fixed maturities	Level 2
Supplementary contracts and immediate annuities	Level 3
Short-term debt and Long-term debt	Level 2
Notes Payable	Level 2

#### 6. Deferred Policy Acquisition Costs and Value of Business Acquired

The following tables present a rollforward of DAC and VOBA for the periods indicated:

	2018		
	DAC	VOBA	Total
Balance as of January 1, 2018	\$2,818	\$ 556	\$3,374
Deferrals of commissions and expenses	49	2	51
Amortization:			
Amortization, excluding unlocking	(62 )	(20 )	(82 )
Unlocking <sup>(1)</sup>	(54 )	(26 )	(80 )
Interest accrued	46	16	<sup>(2)</sup> 62
Net amortization included in Condensed Consolidated Statements of Operations	(70 )	(30 )	(100 )
Change due to unrealized capital gains/losses on available-for-sale securities	287	157	444
Balance as of March 31, 2018	\$3,084	\$ 685	\$3,769

	2017		
	DAC	VOBA	Total
Balance as of January 1, 2017	\$3,186	\$ 811	\$3,997
Deferrals of commissions and expenses	64	3	67
Amortization:			
Amortization, excluding unlocking	(106 )	(35 )	(141 )
Unlocking <sup>(1)</sup>	1	10	11
Interest accrued	48	18	<sup>(2)</sup> 66
Net amortization included in Condensed Consolidated Statements of Operations	(57 )	(7 )	(64 )
Change due to unrealized capital gains/losses on available-for-sale securities	(48 )	(23 )	(71 )
Balance as of March 31, 2017	\$3,145	\$ 784	\$3,929

<sup>(1)</sup> Includes the impacts of annual review of assumptions which typically occurs in the third quarter; and retrospective and prospective unlocking. Additionally, the 2018 amounts include unfavorable unlocking for DAC and VOBA of \$43, associated with an update to assumptions related to customer consents of changes to guaranteed minimum interest rate provisions.

<sup>(2)</sup> Interest accrued at the following rates for VOBA: 3.8% to 7.4% during 2018 and 4.1% to 7.4% during 2017.

Voya Financial, Inc.

(Dollar amounts in millions, unless otherwise stated)

## 7. Share-based Incentive Compensation Plans

The Company has provided equity-based compensation awards to its employees under the ING U.S., Inc. 2013 Omnibus Employee Incentive Plan (the "2013 Omnibus Plan") and the Voya Financial, Inc. 2014 Omnibus Employee Incentive Plan (the "2014 Omnibus Plan"). As of March 31, 2018, common stock reserved and available for issuance under the 2013 Omnibus Plan and the 2014 Omnibus Plan was 344,885 and 6,022,252 shares, respectively.

The Company offers equity-based awards to Voya Financial, Inc. non-employee directors under the Voya Financial, Inc. 2013 Omnibus Non-Employee Director Incentive Plan ("Director Plan").

### Compensation Cost

The following table summarizes share-based compensation expense, which includes expenses related to awards granted under the Omnibus Plans and Director Plan for the periods indicated:

	Three Months Ended March 31, 20182017	
Restricted Stock Unit (RSU) awards	\$ 19	\$ 21
Performance Stock Unit (PSU) awards	18	14
Stock options	3	4
Total share-based compensation expense	40	39
Income tax benefit	6	13
After-tax share-based compensation expense	\$ 34	\$ 26

Voya Financial, Inc.

## 8. Shareholders' Equity

### Common Shares

The following table presents the rollforward of common shares used in calculating the weighted average shares utilized in the basic earnings per common share calculation for the periods indicated:

(shares in millions)	Common Shares		
	Issued	Held in Treasury	Outstanding
Balance, January 1, 2017	268.0	73.4	194.6
Common shares issued	—	* —	—
Common shares acquired - share repurchase	—	24.4	(24.4)
Share-based compensation	2.0	0.2	1.8
Balance, December 31, 2017	270.0	98.0	172.0
Common shares issued	—	* —	—
Common shares acquired - share repurchase	—	1.9	(1.9)
Share-based compensation	1.7	0.2	1.5
Balance, March 31, 2018	271.7	100.1	171.6

\* Less than 0.1.

### Share Repurchase Program

From time to time, the Company's Board of Directors authorizes the Company to repurchase shares of its common stock. These authorizations permit stock repurchases up to a prescribed dollar amount and generally may be accomplished through various means, including, without limitation, open market transactions, privately negotiated transactions, forward, derivative, or accelerated repurchase, or automatic repurchase transactions, or tender offers. Share repurchase authorizations typically expire if unused by a prescribed date.

On February 1, 2018, the Board of Directors provided its most recent share repurchase authorization, increasing the aggregate amount of the Company's common stock authorized for repurchase by \$500. The current share repurchase authorization expires on December 31, 2018 (unless extended), and does not obligate the Company to purchase any shares. The authorization for the share repurchase program may be terminated, increased or decreased by the Board of Directors at any time.

On December 26, 2017, the Company entered into a share repurchase arrangement with a third-party financial institution, pursuant to which the Company made an up-front payment of \$500 and received initial delivery of 7,821,666 shares during the fourth quarter of 2017. This arrangement closed on March 26, 2018 and an additional 1,947,413 shares were delivered.

Subsequent to March 31, 2018, the Company repurchased 3,187,539 shares through automatic repurchase transactions for an aggregate purchase price of \$164.

### Warrants

On May 7, 2013, the Company issued to ING Group warrants to purchase up to 26,050,846 shares of the Company's common stock equal in the aggregate to 9.99% of the issued and outstanding shares of common stock at that date. The current exercise price of the warrants is \$48.75 per share of common stock, subject to adjustments, including for stock dividends, cash dividends in excess of \$0.01 per share a quarter, subdivisions, combinations, reclassifications and non-cash distributions. The warrants also provide for, upon the occurrence of certain change of control events affecting the Company, an increase in the number of shares to which a warrant holder will be entitled upon payment of the aggregate exercise price of the warrant. The warrants became exercisable to ING Group and its affiliates on January 1, 2017 and to all other holders starting on the first anniversary of the completion of the IPO (May 7, 2014). The warrants expire on the tenth anniversary of the completion of the IPO (May 7, 2023). The warrants are net share settled, which means that no cash will be payable by a warrant holder in respect of the exercise price

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

of a warrant upon exercise, and are classified as permanent equity. They have been recorded at their fair value determined on the issuance date of May 7, 2013 in the amount of \$94 as an addition and reduction to Additional-paid-in-capital. Warrant holders are not entitled to receive dividends. On March 12, 2018, ING Group sold its remaining interests in the warrants and no longer owns any warrants. As of March 31, 2018, no warrants have been exercised.

#### 9. Earnings per Common Share

The following table presents a reconciliation of Net income (loss) and shares used in calculating basic and diluted net income (loss) per common share for the periods indicated:

	Three Months Ended March 31,	
(in millions, except for per share data)	2018	2017
Earnings		
Net income (loss) available to common shareholders:		
Income (loss) from continuing operations	\$ 17	\$ 20
Less: Net income (loss) attributable to noncontrolling interest	—	1
Income (loss) from continuing operations available to common shareholders	17	19
Income (loss) from discontinued operations, net of tax	429	(162 )
Net income (loss) available to common shareholders	\$446	\$(143 )
Weighted average common shares outstanding		
Basic	172.3	191.7
Dilutive Effects:		
Warrants	1.5	— <sup>(1)</sup>
RSU awards	2.0	2.2
PSU awards	1.8	0.6
Stock Options	0.8	— <sup>(2)</sup>
Diluted	178.4	194.5
Basic		
Income (loss) from continuing operations available to Voya Financial, Inc.'s common shareholders	\$0.10	\$0.10
Income (loss) from discontinued operations, net of taxes available to Voya Financial, Inc.'s common shareholders	\$2.49	\$(0.85)
Income (loss) available to Voya Financial, Inc.'s common shareholders	\$2.59	\$(0.75)
Diluted		
Income (loss) from continuing operations available to Voya Financial, Inc.'s common shareholders	\$0.10	\$0.10
Income (loss) from discontinued operations, net of taxes available to Voya Financial, Inc.'s common shareholders	\$2.40	\$(0.84)
Income (loss) available to Voya Financial, Inc.'s common shareholders	\$2.50	\$(0.74)

<sup>(1)</sup> For the three months ended March 31, 2017, weighted average shares used for calculating basic and diluted earnings per share excludes the dilutive impact of warrants, as the inclusion of this equity instrument would be antidilutive to the earnings per share calculation due to "out of the moneyness" in the periods presented. For more information on warrants, see the Shareholders' Equity Note to these Condensed Consolidated Financial Statements.

(2) For the three months ended March 31, 2017, weighted average shares used for calculating basic and diluted earnings per share excludes the dilutive impact of stock options, as the inclusion of this equity instrument would be antidilutive to the earnings per share calculation due to the weighted average unrecognized compensation costs' effect on assumed proceeds for the period presented. For more information on stock options, see the Share-based Incentive Compensation Plans Note to these Condensed Consolidated Financial Statements.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

## 11. Income Taxes

On December 22, 2017, the U.S. government enacted comprehensive tax legislation commonly referred to as the Tax Cuts and Jobs Act ("Tax Reform"). Tax Reform makes broad changes to U.S. federal tax law, including, but not limited to (1) reducing the U.S. federal corporate tax rate from 35% to 21%; (2) changing the computations of the dividends received deduction, tax reserves, and deferred acquisition costs; (3) further limiting deductibility of executive compensation; (4) changing how alternative minimum tax credits can be realized; and (5) eliminating the net operating loss ("NOL") carryback and limiting the NOL carryforward deduction to 80% of taxable income for losses arising in taxable years beginning after December 31, 2017.

The SEC staff issued Staff Accounting Bulletin No. 118 ("SAB 118") to address situations where a registrant does not have the necessary information available, prepared, or analyzed (including computations) in reasonable detail to

complete the accounting under ASC Topic 740 for certain income tax effects of Tax Reform for the reporting period of enactment. SAB 118 allows the Company to provide a provisional estimate of the impacts of Tax Reform during a measurement period similar to the measurement period used when accounting for business combinations. Adjustments to provisional estimates and additional impacts from Tax Reform must be recorded as they are identified during the measurement period as provided for in SAB 118.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

In reliance on SAB 118 in 2017, the Company provisionally remeasured its deferred tax assets and liabilities based on the 21% tax rate at which they are expected to reverse in the future. For the three months ended March 31, 2018, the Company recorded an adjustment to the provisional estimate related to the deductibility of executive compensation and adjusted its calculation of tax reserves. The Company continues to analyze the effects of Tax Reform and will record adjustments and additional impacts from Tax Reform as they are identified during the measurement period as provided for in SAB 118.

The Company uses the estimated annual effective tax rate method in computing its interim tax provision. Certain items, including changes in the realizability of deferred tax assets and changes in liabilities for uncertain tax positions, are excluded from the estimated annual effective tax rate and the actual tax expense or benefit is reported in the period the related item is incurred.

The Company's effective tax rate for the three months ended March 31, 2018 was 21.0%, which is equal to the statutory rate during the current period.

The Company's effective tax rate for the three months ended March 31, 2017 was 82.3%. The effective tax rate differed from the statutory rate of 35% for the three months ended March 31, 2017 primarily due to the intraperiod tax allocation method for reclassifying discontinued operations.

#### Tax Regulatory Matters

The Company is currently under audit by the IRS, and it is expected that the examination of tax year 2016 will be finalized within the next twelve months. The Company and the IRS have agreed to participate in the Compliance Assurance Process for the tax years 2016 through 2018.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

## 12. Financing Agreements

### Short-term Debt

As of March 31, 2018, the Company had an immaterial amount of short-term debt borrowings outstanding consisting entirely of the current portion of long-term debt. As of December 31, 2017, the Company had \$337 of short-term debt borrowings outstanding consisting entirely of the current portion of long-term debt.

### Long-term Debt

The following table summarizes the carrying value of the Company's long-term debt securities issued and outstanding as of March 31, 2018 and December 31, 2017:

	Maturity	March 31, 2018	December 31, 2017

<sup>(1)</sup> Guaranteed by ING Group.

### Senior Notes

On February 15, 2018, the remaining 2.9% Senior Notes due February 15, 2018 (the "2018 Notes") matured and Voya Financial, Inc. paid the remaining principal and interest due.

### Junior Subordinated Notes

On January 23, 2018, Voya Financial, Inc. completed an offering, through a private placement, of \$350 aggregate principal amount of 4.7% Fixed-to-Floating Rate Junior Subordinated Notes due 2048 (the "2048 Notes"). The 2048 Notes are guaranteed on an unsecured, junior subordinated basis by Voya Holdings. The Company used the net proceeds from the offering to repay at maturity its 2018 Notes and to pay accrued interest thereon. The remaining proceeds after the repayment of the 2018 Notes were used for general corporate purposes.

Interest is paid on the 2048 Notes semi-annually, in arrears, on each January 23 and July 23, at a fixed rate of 4.7% until January 23, 2028. From January 23, 2028, the 2048 Notes bear interest at an annual rate equal to three-month LIBOR plus 2.084% payable quarterly, in arrears, on January 23, April 23, July 23 and October 23. So long as no event of default with respect to the 2048 Notes has occurred and is continuing, the Company have the right on one or more occasions, to defer the payment of interest on the 2048

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

Notes for one or more consecutive interest periods for up to five years. During the deferral period, interest will continue to accrue at the then-applicable rate and deferred interest will bear additional interest at the then-applicable rate.

At any time following notice of the Company's plan to defer interest and during the period interest is deferred, the Company and its subsidiaries generally, with certain exceptions, may not make payments on or redeem or purchase any shares of the Company's common stock or any of the debt securities or guarantees that rank in liquidation on a parity with or are junior to the 2048 Notes.

The Company may elect to redeem the 2048 Notes (i) in whole at any time or in part on or after January 23, 2028 at a redemption price equal to the principal amount plus accrued and unpaid interest. If the notes are not redeemed in whole, \$25 of aggregate principal (excluding the principal amount of the 2048 Notes held by the Company, or its affiliates) must remain outstanding after giving effect to the redemption; or (ii) in whole, but not in part, at any time prior to January 23, 2028 within 90 days after the occurrence of a "tax event", a "rating agency event" or a "regulatory capital event," as defined in the 2048 Notes offering memorandum, at a redemption price equal to (a) with respect to a "rating agency event" 102% of their principal amount and (ii) with respect to a "tax event" or a "regulatory capital event," their principal amount, in each case plus accrued and unpaid interest.

Pursuant to a registration rights agreement that the Company has entered into with respect to the 2048 Notes, the Company has agreed to use commercially reasonable efforts to file a registration statement with respect to the 2048 Notes within 320 days from the closing date.

#### Aetna Notes

During the three months ended March 31, 2018, Voya Holdings repurchased \$10 of the outstanding principal amount of 7.63% Debentures due August 15, 2026. In connection with this transaction, the Company incurred a loss on debt extinguishment of \$3 for the three months ended March 31, 2018, which was recorded in Interest Expense in the Condensed Consolidated Statements of Operations. As of March 31, 2018, the outstanding principal amount of the Aetna Notes was \$416, which is guaranteed by ING Group.

During the three months ended March 31, 2018, the Company withdrew \$9 of collateral from a control account benefiting ING Group with a third-party collateral agent, thereby decreasing the remaining collateral balance to \$222. The collateral may be exchanged at any time upon the posting of any other form of acceptable collateral to the account.

#### Senior Unsecured Credit Facility Agreement

The Company has a senior unsecured credit facility, with a revolving credit sublimit of \$750 and a total LOC capacity of \$2.25 billion. The facility expires on May 6, 2021.

On January 24, 2018, the Company further amended the Second Amended and Restated Revolving Credit Agreement ("Second Amended and Restated Credit Agreement"), dated as of May 6, 2016, by entering into a Second Amendment to the Second Amended and Restated Revolving Credit Agreement ("Second Amendment") with the lenders thereunder. The Second Amendment modifies the Second Amended and Restated Credit Agreement by requiring the

Company to maintain a minimum net worth in light of the classification of substantially all of its CBVA and Annuities businesses to businesses held for sale. Upon entering into the MTA for the Transaction, the Company recorded an estimated loss on sale in the fourth quarter of 2017. Consequently, Voya Financial, Inc. is now required to maintain a minimum net worth equal to the greater of (i) \$6 billion or (ii) 75% of the Company's actual net worth as of December 31, 2017 (as calculated in the manner set forth in the Second Amended Credit Agreement). The minimum net worth amount may increase upon any future equity issuances by the Company or if the Transaction does not close. The Second Amendment also provides that, upon the closing of the MTA, the total amount of LOCs that may be issued shall be reduced from \$2.25 billion to \$1.25 billion. The \$750 sublimit available for direct borrowings remains unchanged.

As of March 31, 2018, there were no amounts outstanding as revolving credit borrowings and an immaterial amount of LOCs outstanding under the senior unsecured credit facility.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

### Other Credit Facilities

Effective January 18, 2018, a \$500 financing arrangement between Langhorne I, LLC, Voya Financial, Inc. and a third party was cancelled.

Effective January 24, 2018, Security Life of Denver International Limited ("SLDI") and Voya Financial, Inc. entered into an amendment to renew a \$175 letter of credit facility agreement with a third-party bank increasing the commitment to \$195 and extending the expiration date of the facility from January 24, 2018 to January 24, 2021.

## 13. Commitments and Contingencies

### Commitments

Through the normal course of investment operations, the Company commits to either purchase or sell securities, mortgage loans, or money market instruments, at a specified future date and at a specified price or yield. The inability of counterparties to honor these commitments may result in either a higher or lower replacement cost. Also, there is likely to be a change in the value of the securities underlying the commitments.

For the continuing business, as of March 31, 2018, the Company had off-balance sheet commitments to acquire mortgage loans of \$235 and purchase limited partnerships and private placement investments of \$1,367, of which \$320 related to consolidated investment entities. For the businesses held for sale, as of March 31, 2018, the Company had off-balance sheet commitments to acquire mortgage loans of \$91 and purchase limited partnerships and private placement investments of \$329, of which \$91 related to consolidated investment entities.

### Restricted Assets

The Company is required to maintain assets on deposit with various regulatory authorities to support its insurance operations. The Company may also post collateral in connection with certain securities lending, repurchase agreements, funding agreements, credit facilities and derivative transactions. The components of the fair value of the restricted assets were as follows as of the dates indicated:

	March 31, December 31,	
	2018	2017
Fixed maturity collateral pledged to FHLB <sup>(1)</sup>	\$ 947	\$ 602
FHLB restricted stock <sup>(2)</sup>	85	67
Other fixed maturities-state deposits	170	175
Cash and cash equivalents	13	13
Securities pledged <sup>(3)</sup>	1,869	2,087
Total restricted assets	\$ 3,084	\$ 2,944

<sup>(1)</sup> Included in Fixed maturities, available for sale, at fair value on the Condensed Consolidated Balance Sheets. Excludes \$508 and \$691 of collateral pledged related to the businesses held for sale as of March 31, 2018 and December 31, 2017, respectively.

<sup>(2)</sup> Included in Other investments on the Condensed Consolidated Balance Sheets.

<sup>(3)</sup> Includes the fair value of loaned securities of \$1,592 and \$1,854 as of March 31, 2018 and December 31, 2017, respectively. In addition, as of March 31, 2018 and December 31, 2017, the Company delivered securities as collateral

of \$277 and \$233, respectively. Loaned securities and securities delivered as collateral are included in Securities pledged on the Condensed Consolidated Balance Sheets.

#### Federal Home Loan Bank Funding Agreements

The Company is a member of the FHLB of Des Moines, FHLB of Boston and the FHLB of Topeka and is required to pledge collateral to back funding agreements issued to the FHLB. As of March 31, 2018 and December 31, 2017, the Company had \$776 and \$501, respectively, in non-putable funding agreements, which are included in Contract owner account balances on the Condensed Consolidated Balance Sheets. As of March 31, 2018 and December 31, 2017, assets with a market value of approximately \$947 and \$602, respectively, collateralized the FHLB funding agreements. Assets pledged to the FHLB are included in Fixed maturities, available-for-sale, at fair value on the Condensed Consolidated Balance Sheets.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

Subsequent to March 31, 2018, the Company issued an additional \$125 of funding agreements to the FHLB and pledged assets as required collateral.

#### Litigation, Regulatory Matters and Loss Contingencies

Litigation, regulatory and other loss contingencies arise in connection with the Company's activities as a diversified financial services firm. The Company is a defendant in a number of litigation matters arising from the conduct of its business, both in the ordinary course and otherwise. In some of these matters, claimants seek to recover very large or indeterminate amounts, including compensatory, punitive, treble and exemplary damages. Modern pleading practice in the U.S. permits considerable variation in the assertion of monetary damages and other relief. Claimants are not always required to specify the monetary damages they seek or they may be required only to state an amount sufficient to meet a court's jurisdictional requirements. Moreover, some jurisdictions allow claimants to allege monetary damages that far exceed any reasonably possible verdict. The variability in pleading requirements and past experience demonstrates that the monetary and other relief that may be requested in a lawsuit or claim often bears little relevance to the merits or potential value of a claim. Litigation against the Company includes a variety of claims including negligence, breach of contract, fraud, violation of regulation or statute, breach of fiduciary duty, negligent misrepresentation, failure to supervise, elder abuse and other torts.

As with other financial services companies, the Company periodically receives informal and formal requests for information from various state and federal governmental agencies and self-regulatory organizations in connection with inquiries and investigations of the products and practices of the Company or the financial services industry. It is the practice of the Company to cooperate fully in these matters.

The outcome of a litigation or regulatory matter is difficult to predict and the amount or range of potential losses associated with these or other loss contingencies requires significant management judgment. It is not possible to predict the ultimate outcome or to provide reasonably possible losses or ranges of losses for all pending regulatory matters, litigation and other loss contingencies.

While it is possible that an adverse outcome in certain cases could have a material adverse effect upon the Company's financial position, based on information currently known, management believes that neither the outcome of pending litigation and regulatory matters, nor potential liabilities associated with other loss contingencies, are likely to have such an effect. However, given the large and indeterminate amounts sought in certain litigation and the inherent unpredictability of all such matters, it is possible that an adverse outcome in certain of the Company's litigation or regulatory matters, or liabilities arising from other loss contingencies, could, from time to time, have a material adverse effect upon the Company's results of operations or cash flows in a particular quarterly or annual period.

For some matters, the Company is able to estimate a possible range of loss. For such matters in which a loss is probable, an accrual has been made. For matters where the Company, however, believes a loss is reasonably possible, but not probable, no accrual is required. For matters for which an accrual has been made, but there remains a reasonably possible range of loss in excess of the amounts accrued or for matters where no accrual is required, the Company develops an estimate of the unaccrued amounts of the reasonably possible range of losses. As of March 31, 2018, the Company estimates the aggregate range of reasonably possible losses, in excess of any amounts accrued for these matters as of such date, to be up to approximately \$50.

For other matters, the Company is currently not able to estimate the reasonably possible loss or range of loss. The Company is often unable to estimate the possible loss or range of loss until developments in such matters have provided sufficient information to support an assessment of the range of possible loss, such as quantification of a damage demand from plaintiffs, discovery from plaintiffs and other parties, investigation of factual allegations, rulings by a court on motions or appeals, analysis by experts and the progress of settlement discussions. On a quarterly and annual basis, the Company reviews relevant information with respect to litigation and regulatory contingencies and updates the Company's accruals, disclosures and reasonably possible losses or ranges of loss based on such reviews.

Litigation includes Beeson, et al. v SMMS, Lion Connecticut Holdings, Inc. and ING NAIC (Marin County CA Superior Court, CIV-092545). Thirty-four Plaintiff households (husband/wife/trust) assert that SMMS, which was purchased in 2000 and sold in 2003, breached a duty to monitor the performance of investments that Plaintiffs made with independent financial advisors they met in conjunction with retirement planning seminars presented at Fireman's Fund Insurance Company. SMMS recommended the

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

advisors to Fireman's Fund as seminar presenters. Some of the seminars were arranged by SMMS. As a result of the performance of their investments, Plaintiffs claim they incurred damages. Fireman's Fund has asserted breach of contract and concealment claims against SMMS alleging that SMMS failed to fulfill its ongoing obligation to monitor the financial advisors and the investments they recommended to Plaintiffs and by failing to disclose that a primary purpose of the seminars was to develop business for the financial advisors. The Company denied all claims and vigorously defended this case at trial. During trial, the Court ruled that SMMS had duties to Plaintiffs and Fireman's Fund that it has breached. On December 12, 2014, the Court issued a Statement of Decision in which it awarded damages in the aggregate of \$37 to Plaintiffs. On January 7, 2015, the Court made final the award in favor of the Plaintiffs. The Company appealed that judgment. On February 9, 2016, final judgment in favor of Fireman's Fund was entered in the amount of \$13. The Company has appealed that judgment. On March 14, 2018, the California Court of Appeals affirmed the trial court's decisions and damages awards in full. Under California law, annual post-judgment interest of ten percent applies to those damages awards, resulting in a total expense of \$60 incurred by the Company, of which \$47 was recorded in the Statements of Operations for the three months ended March 31, 2018. A petition for re-hearing was filed on March 29, 2018 in order for the Company to petition the California Supreme Court for review of the Court of Appeals' decision, if it decides to do so. As stated in the Court of Appeals' decision, the trial court found that ING assumed and retained any liability resulting from SMMS's conduct. The Company intends to pursue recovery of funds paid for the damages awards and costs of defense under the terms of the applicable insurance coverage policy issued by National Union Fire Insurance Company ("AIG"). AIG has objected to coverage and has reserved all of its rights under the applicable insurance policy.

Litigation also includes *Dezellan v. Voya Retirement Insurance and Annuity Company* (USDC District of Connecticut, No. 3:16-cv-1251) (filed July 26, 2016), a putative class action in which plaintiff, a participant in a 403(b) Plan, seeks to represent a class of plans whose assets are invested in Voya Retirement Insurance and Annuity Company ("VRIAC") "Group Annuity Contract Stable Value Funds." Plaintiff alleges that VRIAC has violated the Employee Retirement Income Security Act of 1974 ("ERISA") by charging unreasonable fees and setting its own compensation in connection with stable value products. Plaintiff seeks declaratory and injunctive relief, disgorgement of profits, damages and attorney's fees. The Company denies the allegations, which it believes are without merit, and intends to defend the case vigorously. On July 19, 2017, the district court granted the Company's motion to dismiss, but permitted the plaintiff to file an amended complaint. The plaintiff has filed a first amended complaint, and the Company has moved to dismiss that complaint.

Litigation also includes *Patrico v. Voya Financial, Inc., et al* (USDC SDNY, No. 1:16-cv-07070) (filed September 9, 2016), a putative class action in which plaintiff, a participant in a 401(k) Plan, seeks to represent a class of plans "for which Voya or its subsidiaries provide recordkeeping, investment management or investment advisory services and for which Financial Engines provides investment advice to plan participants." Plaintiff alleges that the Company and its affiliates have violated ERISA by charging unreasonable fees in connection with in-plan investment advice provided in conjunction with Financial Engines, a third-party investment adviser. Plaintiff seeks declaratory and injunctive relief, disgorgement of profits, damages and attorney's fees. The Company denies the allegations, which it believes are without merit, and intends to defend the case vigorously. On June 20, 2017, the district court granted the Company's motion to dismiss, but permitted the plaintiff to file an amended complaint. The plaintiff has filed a motion for leave to file a first amended complaint, and the Company has opposed that motion. On March 13, 2018, the district court denied the plaintiff's motion for leave to file an amended complaint and closed the case.

Litigation also includes *Goetz v. Voya Financial and Voya Retirement Insurance and Annuity Company* (USDC District of Delaware, No. 1:17-cv-1289) (filed September 8, 2017), a putative class action in which plaintiff, a participant in a 401(k) plan, seeks to represent other participants in the plan as well as a class of similarly situated plans that "contract with [Voya] for recordkeeping and other services." Plaintiff alleges that "Voya" breached its fiduciary duty to the plan and other plan participants by charging unreasonable and excessive recordkeeping fees, and that "Voya" distributed materially false and misleading 404a-5 administrative and fund fee disclosures to conceal its excessive fees. The Company denies the allegations, which it believes are without merit, and intends to defend the case vigorously. Plaintiff filed an amended complaint on January 4, 2018, and the Company filed a motion to dismiss the amended complaint on February 8, 2018.

Finally, the life insurance industry has experienced litigation alleging, for example, that insurance companies have breached the terms of their life insurance policies by increasing the insurance rates of the applicable policies inappropriately or by factoring into rate adjustments elements not disclosed under the terms of the applicable policies, and, consequently, unjustly enriched themselves. This litigation is generally known as cost of insurance litigation. Cost of insurance litigation for the Company includes *Barnes v. Security Life of Denver* (USDC Colorado, No. 1:18-cv-00718) (filed March 27, 2018), a putative class action in which the plaintiff alleges that his insurance policy only permitted the Company to rely upon his expected future mortality experience

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

to increase his cost of insurance, but the Company instead relied upon other, non-disclosed factors to do so. Such litigation also includes *Cutler v. Voya Financial, Inc. and Reliastar Life Insurance Company* (USDC S.D. Florida, No. 1:18-cv-20723) (filed February 23, 2018), in which the plaintiff alleges that his insurance policy only permitted the Company to rely upon his expected future mortality experience to increase his cost of insurance, but the Company instead relied upon other, non-disclosed factors to do so. The Company denies the allegations in each complaint, believes both to be without merit, and intends to defend each case vigorously.

#### Contingencies related to Performance-based Capital Allocations on Private Equity Funds

Certain performance-based capital allocations related to sponsored private equity funds ("carried interest") are not final until the conclusion of an investment term specified in the relevant asset management contract. As a result, such carried interest, if accrued or paid to the Company during such term, is subject to later adjustment based on subsequent fund performance. If the fund's cumulative investment return falls below specified investment return hurdles, some or all of the previously accrued carried interest is reversed to the extent that the Company is no longer entitled to the performance-based capital allocation. Should the fund's cumulative investment return subsequently increase above specified investment return hurdles in future periods, previous reversals could be fully or partially recovered.

As of March 31, 2018, approximately \$66 of previously accrued carried interest would be subject to full or partial reversal in future periods if cumulative fund performance hurdles are not maintained throughout the remaining life of the affected funds.

#### 14. Consolidated Investment Entities

In the normal course of business, the Company provides investment management services to, invests in and has transactions with, various types of investment entities which may be considered VIEs or VOEs. The Company evaluates its involvement with each entity to determine whether consolidation is required.

The Company holds variable interests in certain investment entities in the form of debt or equity investments, as well as the right to receive management fees, performance fees, and carried interest. The Company consolidates certain entities under the VIE guidance when it is determined that the Company is the primary beneficiary. Alternatively, certain entities are consolidated under the VOE guidance when control is obtained through voting rights.

The Company has no right to the benefits from, nor does it bear the risks associated with consolidated investment entities beyond the Company's direct equity and debt investments in and management fees generated from these entities. Such direct investments amounted to approximately \$448 and \$442 as of March 31, 2018 and December 31, 2017, respectively. If the Company were to liquidate, the assets held by consolidated investment entities would not be available to the general creditors of the Company as a result of the liquidation.

#### Consolidated VIEs and VOEs

#### Collateral Loan Obligations Entities ("CLOs")

The Company is involved in the design, creation, and the ongoing management of CLOs. These entities are created for the purpose of acquiring diversified portfolios of senior secured floating rate leveraged loans, and securitizing these assets by issuing multiple tranches of collateralized debt; thereby providing investors with a broad array of risk and return profiles. Also known as collateralized financing entities under Topic 810, CLOs are variable interest entities by definition.

In return for providing collateral management services, the Company earns investment management fees and contingent performance fees. In addition to earning fee income, the Company often holds an investment in certain of the CLOs it manages, generally within the unrated and most subordinated tranche of each CLO. The fee income earned and investments held are included in the Company's ongoing consolidation assessment for each CLO. The Company was the primary beneficiary of 3 and 4 CLOs as of March 31, 2018 and December 31, 2017, respectively.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

### Limited Partnerships

The Company invests in and manages various limited partnerships, including private equity funds and hedge funds. These entities have been evaluated by the Company and are determined to be VIEs due to the equity holders, as a group, lacking the characteristics of a controlling financial interest.

In return for serving as the general partner of and providing investment management services to these entities, the Company earns management fees and carried interest in the normal course of business. Additionally, the Company often holds an investment in each limited partnership it manages, generally in the form of general partner and limited partner interests. The fee income, carried interest, and investments held are included in the Company's ongoing consolidation analysis for each limited partnership. The Company consolidated 14 funds, which were structured as partnerships, as of March 31, 2018 and December 31, 2017.

### Registered Investment Companies

The Company consolidated one sponsored investment fund accounted for as a VOE as of March 31, 2018 and December 31, 2017 because it is the majority investor in the fund, and as such, has a controlling financial interest in the fund.

The following table summarizes the components of the consolidated investment entities as of the dates indicated:

	March 31, December 31,	
	2018	2017
<b>Assets of Consolidated Investment Entities</b>		
VIEs		
Cash and cash equivalents	\$ 186	\$ 216
Corporate loans, at fair value using the fair value option	769	1,089
Limited partnerships/corporations, at fair value	1,714	1,714
Other assets	75	75
Total VIE assets	2,744	3,094
VOEs		
Cash and cash equivalents	—	1
Limited partnerships/corporations, at fair value	82	81
Total VOE assets	82	82
Total assets of consolidated investment entities	\$ 2,826	\$ 3,176
<b>Liabilities of Consolidated Investment Entities</b>		
VIEs		
CLO notes, at fair value using the fair value option	\$ 679	\$ 1,047
Other liabilities	662	649
Total VIE liabilities	1,341	1,696
VOEs		
Other liabilities	6	9
Total VOE liabilities	6	9
Total liabilities of consolidated investment entities	\$ 1,347	\$ 1,705

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

#### Fair Value Measurement

Upon consolidation, the Company elected to apply the FVO for financial assets and financial liabilities held by CLOs and continued to measure these assets (primarily corporate loans) and liabilities (debt obligations issued by CLOs) at fair value in subsequent periods. The Company has elected the FVO to more closely align its accounting with the economics of its transactions and allows the Company to more effectively align changes in the fair value of CLO assets with a commensurate change in the fair value of CLO liabilities.

Investments held by consolidated private equity funds are measured and reported at fair value in the Company's Condensed Consolidated Financial Statements. Changes in the fair value of consolidated investment entities are recorded as a separate line item within Income (loss) related to consolidated investment entities in the Company's Condensed Consolidated Statements of Operations.

The methodology for measuring the fair value of financial assets and liabilities of consolidated investment entities, and the classification of these measurements in the fair value hierarchy is consistent with the methodology and classification applied by the Company to its investment portfolio.

As discussed in more detail below, the Company utilizes valuations obtained from third-party commercial pricing services, brokers and investment sponsors or third-party administrators that supply NAV (or its equivalent) per share used as a practical expedient. The valuations obtained from brokers and third-party commercial pricing services are non-binding. These valuations are reviewed on a monthly or quarterly basis depending on the entity and its underlying investments. Procedures include, but are not limited to, a review of underlying fund investor reports, review of top and worst performing funds requiring further scrutiny, review of variance from prior periods and review of variance from benchmarks, where applicable. In addition, the Company considers both macro and fund specific events that may impact the latest NAV supplied and determines if further adjustments of value should be made. Such changes, if any, are subject to senior management review.

When a price cannot be obtained from a commercial pricing service, independent broker quotes are solicited. Securities priced using independent broker quotes are classified as Level 3. Broker quotes and prices obtained from pricing services are reviewed and validated through an internal valuation committee price variance review, comparisons to internal pricing models, back testing to recent trades or monitoring of trading volumes.

#### Cash and Cash Equivalents

The carrying amounts for cash reflect the assets' fair values. The fair value for cash equivalents is determined based on quoted market prices. These assets are classified as Level 1.

#### CLOs

Corporate loans: Corporate loan investments, which comprise the majority of consolidated CLO portfolio collateral, are senior secured corporate loans maturing at various dates between 2018 and 2026, paying interest at LIBOR, EURIBOR or PRIME plus a spread of up to 10.5%. As of March 31, 2018 and December 31, 2017, the unpaid principal balance exceeded the fair value of the corporate loans by approximately \$10 and \$17, respectively. Less than

1.0% of the collateral assets were in default as of March 31, 2018 and December 31, 2017.

The fair values for corporate loans are determined using independent commercial pricing services. Fair value measurement based on pricing services may be classified in Level 2 or Level 3 depending on the type, complexity, observability and liquidity of the asset being measured. The inputs used by independent commercial pricing services, such as benchmark yields and credit risk adjustments, are those that are derived principally from or corroborated by observable market data. Hence, the fair value measurement of corporate loans priced by independent pricing service providers is classified within Level 2 of the fair value hierarchy. In addition, there are assets held with CLO portfolios that represent senior level debt of other third party CLOs. These CLO investments are classified within Level 3 of the fair value hierarchy. See description of fair value process for CLO notes below.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

CLO notes: The CLO notes are backed by a diversified loan portfolio consisting primarily of senior secured floating rate leveraged loans. Repayment risk is segmented into tranches with credit ratings of these tranches reflecting both the credit quality of underlying collateral as well as how much protection a given tranche is afforded by tranches that are subordinate to it. The most subordinated tranche bears the first loss and receives the residual payments, if any. The interest rates are generally variable rates based on LIBOR plus a pre-defined spread, which varies from 0.2% for the more senior tranches to 5.4% for the more subordinated tranches. CLO notes mature at various dates between 2022 and 2026 and have a weighted average maturity of 7.9 years as of March 31, 2018. The investors in this debt are not affiliated with the Company and have no recourse to the general credit of the Company for this debt.

The fair values of the CLO notes are measured based on the fair value of the CLO's corporate loans, as the Company uses the measurement alternative available under ASU 2014-13 and determined that the inputs for measuring financial assets are more observable. The CLO notes are classified within Level 2 of the fair value hierarchy, consistent with the classification of the majority of the CLO financial assets.

The Company reviews the detailed prices including comparisons to prior periods for reasonableness. The Company utilizes a formal pricing challenge process to request a review of any price during which time the vendor examines its assumptions and relevant market inputs to determine if a price change is warranted.

The following narrative indicates the sensitivity of inputs:

Default Rate: An increase (decrease) in the expected default rate would likely increase (decrease) the discount margin (increase risk premium) used to value the CLO investments and CLO notes and, as a result, would potentially decrease the value of the CLO investments and CLO notes.

Recovery Rate: A decrease (increase) in the expected recovery of defaulted assets would potentially decrease (increase) the valuation of CLO investments and CLO notes.

Prepayment Rate: A decrease (increase) in the expected rate of collateral prepayments would potentially decrease (increase) the valuation of CLO investments and CLO notes as the expected weighted average life ("WAL") would increase (decrease).

Discount Margin (spread over LIBOR): An increase (decrease) in the discount margin used to value the CLO investments and CLO notes and would decrease (increase) the value of the CLO investments and CLO notes.

#### Private Equity Funds

As prescribed in ASC Topic 820, the unit of account for these investments is the interest in the investee fund. The Company owns an undivided interest in the fund portfolio and does not have the ability to dispose of individual assets and liabilities in the fund portfolio. Rather, the Company would be required to redeem or dispose of its entire interest in the investee fund. There is no current active market for interests in underlying private equity funds.

Valuation is generally based on the valuations provided by the fund's general partner or investment manager. The valuations typically reflect the fair value of the Company's capital account balance of each fund investment, including unrealized capital gains (losses), as reported in the financial statements of the respective investee fund as of the respective year end or the latest available date. In circumstances where fair values are not provided, the Company seeks to determine the fair value of fund investments based upon other information provided by the fund's general partner or investment manager or from other sources.

The fair value of securities received in-kind from fund investments is determined based on the restrictions around the securities.

• Unrestricted, publicly traded securities are valued at the closing public market price on the reporting date;

• Restricted, publicly traded securities may be valued at a discount from the closing public market price on the reporting date, depending on the circumstances; and

• Privately held securities are valued by the directors/general partner of the investee fund, based on a variety of factors, including the price of recent transactions in the company's securities and the company's earnings, revenue and book value.

In the case of direct investments or co-investments in private equity companies, the Company initially recognizes investments at cost and subsequently adjusts investments to fair value. On a quarterly basis, the Company reviews the general partner or lead

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

investor's valuation of the investee company, taking into account other available information, such as indications of a market value through subsequent issues of capital or transactions between third parties, performance of the investee company during the period and public, comparable companies' analysis, where appropriate.

Investments in these funds typically may not be fully redeemed at NAV within 90 days because of inherent restriction on near term redemptions.

As of March 31, 2018 and December 31, 2017, certain private equity funds maintained term loans and revolving lines of credit of \$688. The term loans renew every three years and the revolving lines of credit renew annually; all loans bear interest at LIBOR/EURIBOR plus 150-155 bps. The lines of credit are used for funding transactions before capital is called from investors, as well as for the financing of certain purchases. As of March 31, 2018 and December 31, 2017, outstanding borrowings amount to \$505.

On February 1, 2018, Pomona Investment Fund entered into a three-year revolving credit agreement with Credit Suisse. The initial size of the facility was \$8; the loan bears interest at LIBOR plus 325 bps and has a commitment fee of 160 bps. There was no outstanding borrowing as of March 31, 2018.

The borrowings are reflected in Liabilities related to consolidated investment entities - other liabilities on the Company's Condensed Consolidated Balance Sheets. The borrowings are carried at an amount equal to the unpaid principal balance.

The following table summarizes the fair value hierarchy levels of consolidated investment entities as of March 31, 2018:

	Level 1	Level 2	Level 3	NAV	Total
Assets					
VIEs					
Cash and cash equivalents	\$ 186	\$ —	\$ —	—	\$ 186

Total liabilities, at fair value	\$—	\$1,047	\$—	—\$—	\$1,047

Transfers of investments out of Level 3 and into Level 2 or Level 1, if any, are recorded as of the beginning of the period in which the transfer occurred. For the three months ended March 31, 2018 and 2017, there were no transfers in or out of Level 3 or transfers between Level 1 and Level 2.

## Deconsolidation of Certain Investment Entities

During the three months ended March 31, 2018, the Company determined it was no longer the primary beneficiary of one consolidated CLO, due to a reduction in the Company's investment in the CLO. This caused a reduction in the Company's obligation to absorb losses and right to receive benefits of the CLO that could potentially be significant to the CLO. As a result of this determination, the Company deconsolidated one investment entity during the three months ended March 31, 2018. The Company did not deconsolidate any investment entities during the three months ended March 31, 2017.

## Nonconsolidated VIEs

## CLOs

In addition to the consolidated CLOs, the Company also holds variable interest in certain CLOs that are not consolidated as it has been determined that the Company is not the primary beneficiary. With these CLOs, the Company serves as the investment manager and receives investment management fees and contingent performance fees. Generally, the Company does not hold any interest in the nonconsolidated CLOs but if it does, such ownership has been deemed to be insignificant. The Company has not provided, and is not obligated to provide, any financial or other support to these entities.

The Company reviews its assumptions on a periodic basis to determine if conditions have changed such that the projection of these contingent fees becomes significant enough to reconsider the Company's consolidation status as

variable interest holder. As of March 31, 2018 and December 31, 2017, the Company held \$436 and \$321 ownership interests, respectively, in unconsolidated CLOs.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

### Limited Partnerships

The Company manages or holds investments in certain private equity funds and hedge funds. With these entities, the Company serves as the investment manager and is entitled to receive at-market investment management fees and at-market contingent performance fees. The Company does not consolidate any of these investment funds for which it is not considered to be the primary beneficiary.

In addition, the Company does not consolidate the funds in which its involvement takes a form of a limited partner interest and is restricted to a role of a passive investor, as a limited partner's interest does not provide the Company with any substantive kick-out or participating rights, nor does it provide the Company with power to direct the activities of the fund.

The following table presents the carrying amounts of the variable interests in VIEs in which the Company concluded that it holds a variable interest, but is not the primary beneficiary as of the dates indicated. The Company determines its maximum exposure to loss to be: (i) the amount invested in the debt or equity of the VIE and (ii) other commitments and guarantees to the VIE.

### Variable Interests on the Condensed Consolidated Balance Sheet

	March 31, 2018		December 31, 2017	
	Carrying Amount	Maximum exposure to loss	Carrying Amount	Maximum exposure to loss
Fixed maturities, available for sale	\$436	\$ 436	\$321	\$ 321
Limited partnership/corporations	820	820	784	784

### Securitizations

The Company invests in various tranches of securitization entities, including RMBS, CMBS and ABS. Through its investments, the Company is not obligated to provide any financial or other support to these entities. Each of the RMBS, CMBS and ABS entities are thinly capitalized by design and considered VIEs. The Company's involvement with these entities is limited to that of a passive investor. The Company has no unilateral right to appoint or remove the servicer, special servicer or investment manager, which are generally viewed to have the power to direct the activities that most significantly impact the securitization entities' economic performance, in any of these entities, nor does the Company function in any of these roles. The Company, through its investments or other arrangements, does not have the obligation to absorb losses or the right to receive benefits from the entity that could potentially be significant to the entity. Therefore, the Company is not the primary beneficiary and does not consolidate any of the RMBS, CMBS and ABS entities in which it holds investments. These investments are accounted for as investments available-for-sale as described in the Fair Value Measurements (excluding Consolidated Investment Entities) Note to these Condensed Consolidated Financial Statements and unrealized capital gains (losses) on these securities are recorded directly in AOCI, except for certain RMBS which are accounted for under the FVO whose change in fair value is reflected in Other net realized gains (losses) in the Condensed Consolidated Statements of Operations. The Company's maximum exposure to loss on these structured investments is limited to the amount of its investment. Refer to the Investments (excluding Consolidated Investment Entities) Note to these Condensed Consolidated Financial

Statements for details regarding the carrying amounts and classifications of these assets.

15. Restructuring

2016 Restructuring

In 2016, the Company began implementing a series of initiatives designed to make it a simpler, more agile company able to deliver an enhanced customer experience ("2016 Restructuring"). These initiatives include an increasing emphasis on less capital-intensive products and the achievement of operational synergies.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

On July 31, 2017, the Company executed a variable 5-year information technology services agreement with a third-party service provider at an expected annualized cost of \$70 - \$90 per year, with a total cumulative 5-year cost of approximately \$400, subject to potential reduction as a result of the Organizational Restructuring program discussed below. Included in these costs are approximately \$35 of transition costs, which are included in the restructuring amounts below. This initiative, which is a component of the Company's 2016 Restructuring program, improves expense efficiency and upgrades the Company's technology capabilities. Entry into this agreement resulted in severance, asset write-off, transition and other implementation costs. From inception through completion of these initiatives, the Company expects to incur total restructuring expenses for asset-write off of \$16 and transition costs of approximately \$35.

In addition to the restructuring expenses incurred above, the reduction in employees from the execution of the contract described above caused the aggregate reduction in employees under the Company's 2016 Restructuring program to trigger an immaterial curtailment and related remeasurement during the three months ended September 30, 2017 of the Company's qualified defined benefit pension plan and active non-qualified defined benefit plan.

Total 2016 Restructuring expenses are reflected in Operating expenses in the Condensed Consolidated Statements of Operations, but excluded from Adjusted operating earnings before income taxes. These expenses are classified as a component of Other adjustments to Income (loss) from continuing operations before income taxes and consequently are not included in the adjusted operating results of the Company's segments.

The expected completion date for all 2016 Restructuring initiatives is the end of 2018. As the Company further develops these initiatives, it will incur additional restructuring expenses in one or more periods through the end of 2018. These costs, which include severance and other costs, cannot currently be estimated but could be material.

The summary below presents 2016 Restructuring expenses, pre-tax, by type of costs incurred, for the periods indicated:

	Three Months Ended March 31, 2018	Cumulative Amounts Incurred to Date
Severance benefits	\$ 6	\$ 66
Asset write-off costs	—	*16
Transition costs	5	22
Other costs	3	26
Total restructuring expenses	\$ 14	\$ 130

\*Less than \$1.

The following table presents the accrued liability associated with 2016 Restructuring expenses as of March 31, 2018:

	Severance Benefits	Transition Costs	Other Costs	Total
Accrued liability as of January 1, 2018	\$ 30	\$ 17	\$ 3	\$50
Provision	7	5	3	15

Payments	(11 )	(9 )	(4 )	(24 )
Other adjustments <sup>(1)</sup>	(1 )	—	—	(1 )
Accrued liability as of March 31, 2018	\$ 25	\$ 13	\$ 2	<sup>(2)</sup> \$40

<sup>(1)</sup>Represents net write-downs of accruals, not associated with payments.

<sup>(2)</sup>Represents services performed but not yet paid.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

### Organizational Restructuring

As a result of the Company's entry into the Transaction, it is undertaking further restructuring efforts to execute the Transaction and reduce stranded expenses associated with its CBVA and fixed and fixed indexed annuities businesses, as well as its corporate and shared services functions ("Organizational Restructuring"). These activities have and will result in recognition of severance and other restructuring expenses. Restructuring expenses that are directly related to the preparation for and execution of the Transaction are included in discontinued operations. Other restructuring expenses arising from related organizational restructuring are included in continuing operations.

Total Organizational Restructuring expenses include an adjustment of \$(2) which is reflected in Income (loss) from discontinued operations, net of tax, in the Condensed Consolidated Statements of Operations. Through the closing of the Transaction, the Company anticipates incurring additional restructuring expenses, directly related to the disposition. These costs, which include severance, transition and other costs, cannot currently be estimated but could be material. Refer to the Business Held for Sale and Discontinued Operations Note to these Condensed Consolidated Financial Statements for further information.

Total Organizational Restructuring expenses also include \$5 associated with continuing operations, which are reflected in Operating expenses in the Condensed Consolidated Statements of Operations, but excluded from Adjusted operating earnings before income taxes. In addition to restructuring expenses associated with discontinued operations, the Company will develop and approve additional Organizational Restructuring initiatives to simplify the organization as a result of the Transaction, and expects to incur restructuring expenses associated with continuing operations in one or more periods through the end of 2019. These costs, which include severance, transition and other costs, cannot currently be estimated but could be material.

The summary below presents Organizational Restructuring expenses, pre-tax, by type of costs incurred, for the periods indicated:

	Three Months Ended March 31, 2018	Cumulative Amounts Incurred to Date
Severance benefits	\$ 2	\$ 6
Other costs	1	1
Total restructuring expenses	\$ 3	\$ 7

The following table presents the accrued liability associated with Organizational Restructuring expenses as of March 31, 2018:

	Severance Benefits	Other Costs	Total
Accrued liability as of January 1, 2018	\$ 4	\$ —	\$ 4
Provision	4	1	5
Payments	—	(1 )	(1 )
Other adjustments <sup>(1)</sup>	(2 )	—	(2 )

Accrued liability as of March 31, 2018 \$ 6 \$ — \$ 6

<sup>(1)</sup>Represents net write-downs of accruals, not associated with payments.

## 16. Segments

Pursuant to the Transaction disclosed in the Business Held for Sale and Discontinued Operations note, which will result in the disposition of substantially all of the Company's CBVA and Annuities businesses, the Company evaluated its segments and determined that the retained CBVA and Annuities policies ("Retained Business") that are not components of the disposed businesses under the Transaction are insignificant. As such, the Company will no longer report its CBVA and Annuities businesses as segments and will include the results of the Retained Business in Corporate. The Company revised prior period information to conform to current period presentation.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

The Company provides its principal products and services through four segments: Retirement, Investment Management, Employee Benefits, and Individual Life.

#### Measurement

Adjusted operating earnings before income taxes is a measure used by management to evaluate segment performance. The Company believes that Adjusted operating earnings before income taxes provides a meaningful measure of its business and segment performances and enhances the understanding of the Company's financial results by focusing on the operating performance and trends of the underlying business segments and excluding items that tend to be highly variable from period to period based on capital market conditions and/or other factors. The Company uses the same accounting policies and procedures to measure segment Adjusted operating earnings before income taxes as it does for the directly comparable U.S. GAAP measure Income (loss) from continuing operations before income taxes. Adjusted operating earnings before income taxes does not replace Income (loss) from continuing operations before income taxes as the U.S. GAAP measure of the Company's consolidated results of operations. Therefore, the Company believes that it is useful to evaluate both Income (loss) from continuing operations before income taxes and Adjusted operating earnings before income taxes when reviewing the Company's financial and operating performance. Each segment's Adjusted operating earnings before income taxes is calculated by adjusting Income (loss) from continuing operations before income taxes for the following items:

Net investment gains (losses), net of related amortization of DAC, VOBA, sales inducements and unearned revenue, which are significantly influenced by economic and market conditions, including interest rates and credit spreads, and are not indicative of normal operations. Net investment gains (losses) include gains (losses) on the sale of securities, impairments, changes in the fair value of investments using the FVO unrelated to the implied loan-backed security income recognition for certain mortgage-backed obligations and changes in the fair value of derivative instruments, excluding realized gains (losses) associated with swap settlements and accrued interest;

Net guaranteed benefit hedging gains (losses), which are significantly influenced by economic and market conditions and are not indicative of normal operations, include changes in the fair value of derivatives related to guaranteed benefits, net of related reserve increases (decreases) and net of related amortization of DAC, VOBA and sales inducements, less the estimated cost of these benefits. The estimated cost, which is reflected in operating results, reflects the expected cost of these benefits if markets perform in line with the Company's long-term expectations and includes the cost of hedging. Other derivative and reserve changes related to guaranteed benefits are excluded from adjusted operating earnings, including the impacts related to changes in the Company's nonperformance spread;

Income (loss) related to businesses exited through reinsurance or divestment that do not qualify as discontinued operations, which includes gains and (losses) associated with transactions to exit blocks of business (including net investment gains (losses) on securities sold and expenses directly related to these transactions) and residual run-off activity; these gains and (losses) are often related to infrequent events and do not reflect performance of operating segments. Excluding this activity better reveals trends in the Company's core business, which would be obscured by including the effects of business exited, and more closely aligns Adjusted operating earnings before income taxes with how the Company manages its segments;

•

Income (loss) attributable to noncontrolling interest, which represents the interest of shareholders, other than the Company, in consolidated entities. Income (loss) attributable to noncontrolling interest represents such shareholders' interests in the gains and (losses) of those entities, or the attribution of results from consolidated VIEs or VOEs to which the Company is not economically entitled;

Income (loss) related to early extinguishment of debt, which includes losses incurred as a result of transactions where the Company repurchases outstanding principal amounts of debt; these losses are excluded from Adjusted operating earnings before income taxes since the outcome of decisions to restructure debt are not indicative of normal operations;

Impairment of goodwill, value of management contract rights and value of customer relationships acquired, which includes losses as a result of impairment analysis; these represent losses related to infrequent events and do not reflect normal, cash-settled expenses;

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

Immediate recognition of net actuarial gains (losses) related to the Company's pension and other postretirement benefit obligations and gains (losses) from plan amendments and curtailments, which includes actuarial gains and losses as a result of differences between actual and expected experience on pension plan assets or projected benefit obligation during a given period. The Company immediately recognizes actuarial gains and (losses) related to pension and other postretirement benefit obligations and gains and losses from plan adjustments and curtailments. These amounts do not reflect normal, cash-settled expenses and are not indicative of current Operating expense fundamentals; and

Other items not indicative of normal operations or performance of the Company's segments or may be related to infrequent events including capital or organizational restructurings including certain costs related to debt and equity offerings as well as stock and/or cash based deal contingent awards; expenses associated with the rebranding of Voya Financial, Inc.; severance and other third-party expenses associated with Restructuring. These items vary widely in timing, scope and frequency between periods as well as between companies to which the Company is compared. Accordingly, the Company adjusts for these items as management believes that these items distort the ability to make a meaningful evaluation of the current and future performance of the Company's segments. Additionally, with respect to restructuring, these costs represent changes in operations rather than investments in the future capabilities of the Company's operating businesses.

The summary below reconciles Adjusted operating earnings before income taxes for the segments to Income (loss) from continuing operations before income taxes for the periods indicated:

	Three Months Ended March 31,	
	2018	2017
Income (loss) from continuing operations before income taxes	\$21	\$113
Less Adjustments:		
Net investment gains (losses) and related charges and adjustments	(61 )	(20 )
Net guaranteed benefit hedging gains (losses) and related charges and adjustments	(14 )	8
Income (loss) related to businesses exited through reinsurance or divestment	(45 )	(5 )
Income (loss) attributable to noncontrolling interest	—	1
Loss related to early extinguishment of debt	(3 )	(1 )
Other adjustments	(19 )	(15 )
Total adjustments to income (loss) from continuing operations	\$(142)	\$(32 )
Adjusted operating earnings before income taxes by segment:		
Retirement	\$109	\$148
Investment Management	61	49
Employee Benefits	32	11
Individual Life	17	32
Corporate <sup>(1)</sup>	(56 )	(95 )
Total	\$163	\$145

<sup>(1)</sup> Adjusted operating earnings before income taxes for Corporate includes Net investment gains (losses) and Net guaranteed benefit hedging gains (losses) associated with the Retained Business in the prior period. These amounts are

insignificant and do not distort the ability to make a meaningful evaluation of the trends of Corporate activities.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

Adjusted operating revenues is a measure of the Company's segment revenues. Each segment's Operating revenues are calculated by adjusting Total revenues to exclude the following items:

- Net investment gains (losses) and related charges and adjustments, which are significantly influenced by economic and market conditions, including interest rates and credit spreads and are not indicative of normal operations. Net investment gains (losses) include gains (losses) on the sale of securities, impairments, changes in the fair value of investments using the FVO unrelated to the implied loan-backed security income recognition for certain mortgage-backed obligations and changes in the fair value of derivative instruments, excluding realized gains (losses) associated with swap settlements and accrued interest. These are net of related amortization of unearned revenue;

Gain (loss) on change in fair value of derivatives related to guaranteed benefits, which is significantly influenced by economic and market conditions and not indicative of normal operations, includes changes in the fair value of derivatives related to guaranteed benefits, less the estimated cost of these benefits. The estimated cost, which is reflected in Adjusted operating revenues, reflects the expected cost of these benefits if markets perform in line with the Company's long-term expectations and includes the cost of hedging. Other derivative and reserve changes related to guaranteed benefits are excluded from Adjusted operating revenues, including the impacts related to changes in the Company's nonperformance spread;

Revenues related to businesses exited through reinsurance or divestment that do not qualify as discontinued operations, which includes revenues associated with transactions to exit blocks of business (including net investment gains (losses) on securities sold related to these transactions) and residual run-off activity; these gains and (losses) are often related to infrequent events and do not reflect performance of operating segments. Excluding this activity better reveals trends in the Company's core business, which would be obscured by including the effects of business exited, and more closely aligns Operating revenues with how the Company manages its segments;

Revenues attributable to noncontrolling interest, which represents the interests of shareholders, other than the Company, in consolidated entities. Revenues attributable to noncontrolling interest represents such shareholders' interests in the gains and losses of those entities, or the attribution of results from consolidated VIEs or VOEs to which the Company is not economically entitled; and

Other adjustments to Total revenues primarily reflect fee income earned by the Company's broker-dealers for sales of non-proprietary products, which are reflected net of commission expense in the Company's segments' operating revenues, other items where the income is passed on to third parties and the elimination of intercompany investment expenses included in Adjusted operating revenues.

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

The summary below reconciles Adjusted operating revenues for the segments to Total revenues for the periods indicated:

	Three Months Ended March 31,	
	2018	2017
Total revenues	\$ 1,967	\$ 2,057
Adjustments:		
Net realized investment gains (losses) and related charges and adjustments	(73 )	(27 )
Gain (loss) on change in fair value of derivatives related to guaranteed benefits	(7 )	9
Revenues related to businesses exited through reinsurance or divestment	(40 )	20
Revenues attributable to noncontrolling interest	6	19
Other adjustments	58	51
Total adjustments to revenues	(56 )	72

Adjusted operating revenues by segment:

Retirement	662	625
Investment Management	185	171
Employee Benefits	453	447
Individual Life	631	630
Corporate <sup>(1)</sup>	92	112
Total	\$ 2,023	\$ 1,985

<sup>(1)</sup> Adjusted operating revenues for Corporate includes Net investment gains (losses) and Gains (losses) on change in fair value of derivatives related to guaranteed benefits associated with the Retained Business in the prior period. These amounts are insignificant and do not distort the ability to make a meaningful evaluation of the trends of Corporate activities.

#### Other Segment Information

The Investment Management segment revenues include the following intersegment revenues, primarily consisting of asset-based management and administration fees for the periods indicated:

	Three Months Ended March 31, 20182017	
Investment Management intersegment revenues	\$ 43	\$ 44

Voya Financial, Inc.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

(Dollar amounts in millions, unless otherwise stated)

The summary below presents Total assets for the Company's segments as of the dates indicated:

	March 31, December 31,	
	2018	2017
Retirement	\$ 111,054	\$ 111,476
Investment Management	608	626
Employee Benefits	2,583	2,657
Individual Life	27,421	27,301
Corporate	18,700	18,685
Total assets, before consolidation <sup>(1)</sup>	160,366	160,745
Consolidation of investment entities	2,378	2,735
Total assets, excluding assets held for sale	162,744	163,480
Assets held for sale	57,080	59,052
Total assets	\$ 219,824	\$ 222,532

<sup>(1)</sup> Total assets, before consolidation includes the Company's direct investments in CIEs prior to consolidation, which are accounted for using the equity method or fair value option.

## 17. Condensed Consolidating Financial Information

The accompanying condensed consolidating financial information has been prepared and presented pursuant to SEC Regulation S-X, Rule 3-10, "Financial Statements of Guarantors and Issuers of Guaranteed Securities Registered or Being Registered" ("Rule 3-10"). The condensed consolidating financial information presents the financial position of Voya Financial, Inc. ("Parent Issuer"), Voya Holdings ("Subsidiary Guarantor") and all other subsidiaries ("Non-Guarantor Subsidiaries") of the Company as of March 31, 2018 and December 31, 2017, their results of operations, comprehensive income and statements of cash flows for the three months ended March 31, 2018 and 2017.

The 5.5% senior notes due 2022, the 2.9% senior notes due 2018, the 5.7% senior notes due 2043, the 3.65% senior notes due 2026, the 4.8% senior notes due 2046, the 3.125% senior notes due 2024 (collectively, the "Senior Notes"), the 5.65% fixed-to-floating rate junior subordinated notes due 2053 and the 4.7% fixed-to-floating junior subordinated notes due 2048 (collectively, the "Junior Subordinated Notes"), each issued by Parent Issuer, are fully and unconditionally guaranteed by Subsidiary Guarantor, a 100% owned subsidiary of Parent Issuer. No other subsidiary of Parent Issuer guarantees the Senior Notes or the Junior Subordinated Notes. Rule 3-10(h) provides that a guarantee is full and unconditional if, when the issuer of a guaranteed security has failed to make a scheduled payment, the guarantor is obligated to make the scheduled payment immediately and, if it does not, any holder of the guaranteed security may immediately bring suit directly against the guarantor for payment of amounts due and payable. In the event that Parent Issuer does not fulfill the guaranteed obligations, any holder of the Senior Notes or the Junior Subordinated Notes may immediately bring a claim against Subsidiary Guarantor for amounts due and payable.

The following condensed consolidating financial information is presented in conformance with the components of the Condensed Consolidated Financial Statements. Investments in subsidiaries are accounted for using the equity method for purposes of illustrating the consolidating presentation. Equity in the subsidiaries is therefore reflected in the Parent Issuer's and Subsidiary Guarantor's Investment in subsidiaries and Equity in earnings of subsidiaries. Non-Guarantor Subsidiaries represent all other subsidiaries on a combined basis. The consolidating adjustments presented herein eliminate investments in subsidiaries and intercompany balances and transactions.

Voya Financial, Inc.
