

OLD DOMINION FREIGHT LINE INC/VA

Form 10-K

February 27, 2019

UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the fiscal year ended December 31, 2018

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____.

Commission File Number: 0-19582

OLD DOMINION FREIGHT LINE, INC.

(Exact name of registrant as specified in its charter)

VIRGINIA
(State or other jurisdiction of
incorporation or organization)

56-0751714
(I.R.S. Employer

500 Old Dominion Way

Thomasville, NC 27360

Identification No.)

Edgar Filing: OLD DOMINION FREIGHT LINE INC/VA - Form 10-K

(Address of principal executive offices)

(Zip Code)

(336) 889-5000

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Common Stock (\$0.10 par value)	The Nasdaq Stock Market LLC

(Nasdaq Global Select Market)

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	Accelerated filer
Non-accelerated filer	Smaller reporting company
	Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

Edgar Filing: OLD DOMINION FREIGHT LINE INC/VA - Form 10-K

The aggregate market value of voting stock held by non-affiliates of the registrant as of June 30, 2018 was \$9,679,656,484, based on the closing sales price as reported on the Nasdaq Global Select Market.

As of February 26, 2019, the registrant had 81,146,989 outstanding shares of Common Stock (\$0.10 par value).

DOCUMENTS INCORPORATED BY REFERENCE

Certain portions of the Company's Proxy Statement for the 2019 Annual Meeting of Shareholders are incorporated by reference into Part III of this report.

FORWARD-LOOKING INFORMATION

Forward-looking statements appear in this Annual Report, including but not limited to Item 7, “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” and in other written and oral statements made by or on behalf of us. These forward-looking statements include, but are not limited to, statements relating to our goals, strategies, expectations, competitive environment, compliance with regulations, availability of resources, future events and future financial performance. Such forward-looking statements are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These forward-looking statements typically can be identified by such words as “anticipate,” “estimate,” “forecast,” “project,” “intend,” “expect,” “believe,” “should,” “could,” “may” or similar words or expressions. We caution readers that such forward-looking statements involve risks and uncertainties that could cause actual events or results to differ materially from those expressed or implied herein, including, but not limited to, the risk factors detailed in this Annual Report.

Our forward-looking statements are based on our beliefs and assumptions using information available at the time the statements are made. We caution the reader not to place undue reliance on our forward-looking statements as (i) these statements are neither a prediction nor a guarantee of future events or circumstances and (ii) the assumptions, beliefs, expectations and projections about future events may differ materially from actual results. We undertake no obligation to publicly update any forward-looking statement to reflect developments occurring after the statement is made, except to the extent required by law.

PART I

ITEM 1. BUSINESS

Unless the context requires otherwise, references in this report to “Old Dominion,” the “Company,” “we,” “us” and “our” refer to Old Dominion Freight Line, Inc.

Overview

We are a leading, less-than-truckload (“LTL”), union-free motor carrier providing regional, inter-regional and national LTL services through a single integrated organization. Our service offerings, which include expedited transportation, are provided through an expansive network of service centers located throughout the continental United States. Through strategic alliances, we also provide LTL services throughout North America. In addition to our core LTL services, we offer a range of value-added services including container drayage, truckload brokerage and supply chain consulting. More than 97% of our revenue has historically been derived from transporting LTL shipments for our customers, whose demand for our services is generally tied to industrial production and the overall health of the U.S. domestic economy.

We are the fourth largest LTL motor carrier in the United States, as measured by 2017 revenue, according to Transport Topics. We have increased our revenue and customer base over the past five years primarily through organic market share growth. Our infrastructure allows us to provide next-day and second-day service through each of our regions covering the continental United States. We opened 14 and 29 new service centers over the past five and ten years, respectively, for a total of 235 service centers at December 31, 2018. We believe this expansion produced increased capacity within our service center network and provides us with opportunities for future growth.

We believe the growth in demand for our services can be attributed to our ability to consistently provide a superior level of customer service at a fair price, which allows our customers to meet their supply chain needs. Our integrated structure allows us to offer our customers consistent high-quality service from origin to destination, and we believe our operating structure and proprietary information systems enable us to efficiently manage our operating costs. Our

services are complemented by our technological capabilities, which we believe provide the tools to improve the efficiency of our operations while also empowering our customers to manage their individual shipping needs.

We were founded in 1934 and incorporated in Virginia in 1950. Our principal executive offices are located at 500 Old Dominion Way, Thomasville, North Carolina 27360.

Our Industry

Trucking companies provide transportation services to virtually every industry operating in the United States and generally offer higher levels of reliability and faster transit times than other surface transportation options. The trucking industry is comprised principally of two types of motor carriers: LTL and truckload. LTL freight carriers typically pick up multiple shipments from multiple customers on a single truck. The LTL freight is then routed through a network of service centers where the freight may be transferred to other trucks with similar destinations. LTL motor carriers generally require a more expansive network of local pickup and delivery (“P&D”) service centers, as well as larger breakbulk, or hub, facilities. In contrast, truckload carriers generally dedicate an entire truck to one customer from origin to destination.

Significant capital is required to create and maintain a network of service centers and a fleet of tractors and trailers. The high fixed costs and capital spending requirements for LTL motor carriers make it difficult for new start-up or small operators to effectively compete with established carriers. In addition, successful LTL motor carriers generally employ, and regularly update, a high level of technology-based systems and processes that provide information to customers and help reduce operating costs.

According to the American Trucking Associations, the trucking industry accounted for 79.3% of the \$883.4 billion total U.S. transportation revenue in 2017. The LTL sector had revenue in 2017 of \$55.6 billion, which represented 6.3% of total U.S. transportation revenue. The LTL industry is highly competitive on the basis of service and price and has consolidated significantly since the industry was deregulated in 1980. Based on 2017 revenue as reported in Transport Topics, the largest 10 and 25 LTL motor carriers accounted for approximately 55% and 67%, respectively, of the total LTL market. We believe consolidation in our industry will continue due to customer demand for transportation providers offering both national and regional LTL as well as other complementary value-added services.

Competition

The transportation and logistics industry is intensely competitive and highly fragmented. We compete with regional, inter-regional and national LTL carriers and, to a lesser extent, with truckload carriers, small package carriers, airfreight carriers and railroads. We also compete with, and provide transportation services to, third-party logistics providers that determine both the mode of transportation and the carrier. Some of our competitors may have a broader global network and a wider range of services than we do. Competition in our industry is based primarily on service, price, available capacity and business relationships. We believe we are able to gain market share by expanding our capacity and providing high-quality service at a fair price.

Throughout our organization, we continuously seek to improve customer service by maximizing on-time performance and minimizing cargo claims. We believe our transit times are generally faster and more reliable than those of our principal national competitors, in part because of our more efficient service center network, use of team drivers and proprietary technology. In addition, we provide greater geographic coverage than most of our regional competitors. Our diversified mix and scope of regional, inter-regional and national LTL service, combined with our value-added service offerings, enables us to provide our customers with a single source to meet their shipping and logistics needs. We believe the combination of these factors provides us with a distinct advantage over most of our competitors.

We utilize flexible scheduling and train our employees to perform multiple tasks, which we believe allows us to achieve greater productivity and higher levels of customer service than our competitors. We believe our focus on employee communication, continued education, development and motivation strengthens the relationships and trust among our employees.

Service Center Operations

At December 31, 2018, we operated 235 service center locations, of which we owned 203 and leased 32. Our network includes ten major breakbulk facilities located in Rialto, California; Atlanta, Georgia; Columbus, Ohio; Indianapolis, Indiana; Greensboro, North Carolina; Harrisburg, Pennsylvania; Memphis and Morristown, Tennessee; Dallas, Texas; and Salt Lake City, Utah, while using various other service centers for additional limited breakbulk activity in order to serve our next-day markets. Our service centers are strategically located throughout the country so that we can provide the highest quality service and minimize freight rehandling costs.

Our service centers are responsible for the pickup and delivery of freight within their local service area. Each night, our service centers load outbound freight for transport to our other service centers for delivery. All inbound freight

received by the service center in the evening or during the night is generally scheduled for local delivery the next business day, unless a customer requests a different delivery schedule. Our management reviews the productivity and service performance of each service center on a daily basis to ensure quality service and efficient operations.

Although we have established primary responsibility for customer service at the local service center level, our customers may access information and initiate transactions through our centralized customer service department located at our corporate office or through other electronic gateways. Our systems allow us to offer our customers access to information such as freight tracking, shipping documents, rate quotes, rate databases and account activity. These centralized systems and our customer service department provide our customers with a single point of contact to access information across all areas of our operations and for each of our service offerings.

Linehaul Transportation

Linehaul dispatchers control the movement of freight between service centers through integrated freight movement systems. We also utilize load-planning software to optimize efficiencies in our linehaul operations. Our management team monitors freight movements, transit times, load factors and many other productivity measurements to help ensure that we maintain our high levels of service and efficiency.

We utilize scheduled routes, and additional linehaul dispatches as necessary to meet our published transit times. In addition, we gain efficiency through the use of twin 28-foot trailers in our linehaul operations. The use of twin 28-foot trailers permits us to transport freight directly from its point of origin to destination with minimal unloading and reloading, which also reduces cargo loss and damage expenses. We utilize long-combination vehicles, such as triple 28-foot trailers and combinations of 48-foot and 28-foot trailers, in states where permitted. Twin trailers and long-combination vehicles permit more freight to be transported behind a tractor than could otherwise be transported by one trailer.

Tractors, Trailers and Maintenance

At December 31, 2018, we owned 9,254 tractors. We generally use new tractors in linehaul operations for approximately three to five years and then transfer those tractors to P&D operations for the remainder of their useful lives. In many of our service centers, tractors perform P&D functions during the day and linehaul functions at night to maximize tractor utilization.

The table below reflects, as of December 31, 2018, the average age of our tractors and trailers:

Type of Equipment	Number of Units	Average Age (In years)
Tractors	9,254	3.5
Linehaul trailers	24,685	6.8
P&D trailers	11,044	7.4

We develop certain specifications for tractors and trailers and then negotiate the production and purchase of this equipment with several manufacturers. These purchases are planned well in advance of anticipated delivery dates in order to accommodate manufacturers' production schedules. We believe there is sufficient capacity among suppliers to ensure an uninterrupted supply of equipment to support our operations.

The table below sets forth our capital expenditures for tractors and trailers for the years ended December 31, 2018, 2017 and 2016. For more information concerning our capital expenditures, see Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources" in this report.

(In thousands)	Year Ended December 31,		
	2018	2017	2016
Tractors	\$185,209	\$123,152	\$114,166
Trailers	98,835	37,424	94,040
Total	\$284,044	\$160,576	\$208,206

At December 31, 2018, we operated 39 maintenance centers at strategic service center locations throughout our network. These maintenance centers are equipped to perform routine and preventive maintenance and repairs on our

equipment.

We adhere to established maintenance policies and procedures to help ensure our fleet is properly maintained. Tractors are routed to appropriate maintenance facilities at designated mileage intervals or every 90 days, whichever occurs first. Trailers are also scheduled for preventative maintenance every 90 days.

Customers

Revenue is generated primarily from customers throughout the United States and North America. In 2018, our largest customer accounted for approximately 4.0% of our revenue and our largest 5, 10 and 20 customers accounted for 13.7%, 19.3% and 26.0% of our revenue, respectively. For each of our last three fiscal years, more than 95% of our revenue was derived from services performed in the United States and less than 5% of our revenue was generated from services performed internationally. We believe the diversity of our customer base helps protect our business from adverse developments in a single geographic region and from the reduction or loss of business from a single customer.

We utilize an integrated freight-costing system to determine the price level at which a particular shipment of freight will be profitable. We can modify elements of this freight-costing model to simulate the actual conditions under which the freight will be moved. Many of our customers engage our services through the terms and provisions of our tariffs and through negotiated service contracts. We also compete for business by participating in bid solicitations. Customers generally solicit bids for relatively large numbers of shipments for a period of one to two years and typically choose to enter into contractual arrangements with a limited number of motor carriers based upon price and service.

Seasonality

Our tonnage levels and revenue mix are subject to seasonal trends common in our industry, although other factors, such as macroeconomic changes, could cause variation in these trends. Our revenue and operating margins in the first and fourth quarters are typically lower than those during the second and third quarters due to reduced shipments during the winter months. Harsh winter weather or natural disasters, such as hurricanes, tornadoes, floods, fires and other storms can also adversely impact our performance by reducing demand and increasing operating expenses. We believe seasonal trends will continue to impact our business.

Technology

Our technology is critical to the success and delivery of the premium service provided by our operations. We continually seek to upgrade and enhance our technological capabilities. We also provide access to our systems through multiple gateways that offer our customers and employees maximum flexibility and access to information. We employ vehicle safety systems, on-board and hand-held computer systems, freight handling systems and logistics technology to reduce costs and transit times, as well as to meet regulatory requirements. Our data systems are integrated at every level within our organization, which we believe is critical to our success. Our systems are protected through physical and software safeguards, as well as redundant systems, network security measures and backup systems. We continue to focus on the development and enhancement of the technology used in our operations in order to improve the efficiency and effectiveness of our services.

Insurance

We carry a significant amount of insurance with third-party insurance carriers, but we are exposed to the risk of loss on claims up to the limit for which we hold either a self-insured retention (“SIR”) or deductible. At December 31, 2018, we maintained a SIR or deductible of \$1.0 million or more with respect to the below casualty and group health coverages:

- \$2.75 million per occurrence for bodily injury and property damage (“BIPD”) claims, plus a one-time, \$2.5 million aggregate corridor deductible applicable per policy period to any claim that exceeds \$5.0 million and occurs after March 30, 2016;

- \$1.0 million per occurrence for workers’ compensation claims; and

- \$1.0 million per covered person paid during 2018 for group health claims.

We believe that our policy of maintaining a SIR or deductible for a portion of our risks, supported by our safety, claims management and loss prevention programs, is an effective means of managing insurance costs. We periodically review our risk exposure and insurance coverage applicable to those risks and we believe that we maintain sufficient insurance coverage.

Diesel Fuel Availability and Cost

We depend heavily upon the availability and quality of diesel fuel to provide our transportation services. We maintain fuel storage and pumping facilities at certain service center locations as the primary source for fueling our fleet, and we utilize over-the-road fueling options at retail locations as necessary. We could be susceptible to regional and/or national fuel shortages, which could cause us to incur additional expense in order to obtain an adequate supply within our own fueling network or cause us to rely more heavily on higher-priced retail fuel.

We believe our operations and financial condition are susceptible to the same diesel fuel price increases or shortages as those of our competitors. We implemented a fuel surcharge program in August 1999, which has remained in effect since that time and is one of many components that we use to determine the overall price for our transportation

services. Our fuel surcharges are generally indexed to fuel prices published by the U.S. Department of Energy (the “DOE”) that reset each week.

Employees

As of December 31, 2018, we employed 21,279 individuals on a full-time basis, none of which were represented under a collective bargaining agreement. Our full-time employees work in the following roles:

	Number of
Full-Time Employees	Employees
Drivers	11,207
Platform	4,057
Fleet technicians	590
Sales, administrative and other	5,425
Total	21,279

As of December 31, 2018, we employed 5,743 linehaul drivers and 5,464 P&D drivers on a full-time basis. We select our drivers primarily based upon safe driving records and experience. Among other requirements, our drivers must pass a drug test, have a current U.S. Department of Transportation (“DOT”) physical and have a valid commercial driver’s license prior to employment. Once employed, drivers are required to obtain and maintain hazardous materials endorsements to their commercial driver’s licenses. Drivers, like all of our employees, are required to take pre-employment drug and alcohol tests and are randomly selected for periodic additional testing.

Since 1988, we have provided the opportunity for qualified employees to become drivers through the “Old Dominion Driver Training Program.” There are currently 3,273 active drivers who have successfully completed this training, which was approximately 29.2% of our driver workforce as of December 31, 2018. We believe our driver training and qualification programs have been important factors in improving our safety record and retaining qualified drivers. In addition, we have experienced an annual turnover rate for our driver graduates of approximately 5.7%, which is below our Company-wide turnover rate for all drivers of approximately 8.0%.

We reward our drivers who maintain safe driving records with annual bonuses of up to \$3,000 per driver. Our safety bonuses paid to drivers totaled \$4.1 million, \$3.9 million and \$3.7 million in 2018, 2017 and 2016, respectively.

Governmental Regulation

We are regulated by the DOT and by various state and federal agencies. These regulatory authorities have broad powers over matters relating to authorized motor carrier operations, as well as motor carrier registration, driver hours of service, safety and fitness of transportation equipment and drivers, transportation of hazardous materials, certain mergers and acquisitions and periodic financial reporting. The trucking industry is also subject to regulatory and legislative changes from a variety of other governmental authorities, which address matters such as increasingly stringent environmental regulations, occupational safety and health regulations, limits on vehicle weight and size, ergonomics, port security, and driver hours of service.

In addition, we are subject to compliance with cargo-security and transportation regulations issued by the Transportation Security Administration (“TSA”) and Customs and Border Protection (“CBP”) within the U.S. Department of Homeland Security. Regulatory requirements, and changes in regulatory requirements or guidance, may affect our business or the economics of the industry by requiring changes in operating practices that could influence the demand for and increase the costs of providing transportation services.

Driver Hours of Service

The Federal Motor Carrier Safety Administration (the “FMCSA”) rules provide that a truck driver may work no more than a maximum number of 60 hours within seven consecutive days and 70 hours within eight consecutive days. FMCSA rules further impose a maximum work period of 14 hours (no more than 11 hours of which may be driving time) after first coming on-duty following 10 consecutive hours of off-duty time. FMCSA rules also require that drivers take a 30-minute break prior to working beyond eight hours.

Electronic Logging Devices

In December 2015, the FMCSA issued a final rule mandating the use of electronic logging devices (“ELDs”) to automatically record drivers’ time for hours of service reporting. Generally, carriers were required to comply with these new requirements by December 18, 2017. We currently utilize ELD rule-compliant automatic on-board recording devices (“AOBRDs”) in all of our Company-owned vehicles, and the AOBRD data is integrated with our

existing comprehensive fleet management and safety systems. In order to maximize our ability to integrate AOBRD data from vehicles purchased after December 18, 2017 with these fleet management and safety systems, we applied for a waiver from certain aspects of the ELD rule by the FMCSA in January 2018. This waiver proved unnecessary and was withdrawn as the FMCSA was made aware of multiple motor carriers facing the same issues from technology providers when changing from an AOBRD to an ELD operating system. The FMCSA issued responsive guidance that allowed AOBRD operating systems to be installed and utilized on ELD compliant hardware until December 16, 2019. We are working with service providers to transition our fleet from our current AOBRD operating system to a new ELD hardware and software platform. We expect the transition to be completed prior to December 2019.

Commercial Driver's License Drug and Alcohol Clearinghouse

In December 2016, the FMCSA released a final rule establishing the Commercial Driver's License Drug and Alcohol Clearinghouse ("DAC"). The DAC is a database that will maintain records of drug and alcohol violations of commercial motor vehicle drivers. The DAC will require us to check prospective employees for drug and alcohol violations, and all current driver employees must be checked at least annually. The intent of the clearinghouse is to ensure that drivers cannot conceal drug and alcohol violations

by changing jobs or locations. Compliance with this rule, which provides for a three-year implementation period, is required by January 6, 2020.

We are subject to future rulemaking by the FMCSA and other regulatory agencies, which could be more stringent, require additional changes to our operations, increase our operating costs or otherwise adversely impact our results of operations.

Environmental Regulation

We are subject to various federal, state and local environmental laws and regulations that focus on, among other things: the emission and discharge of hazardous materials into the environment or their presence at our properties or in our vehicles; fuel storage tanks; transportation of certain materials; and the discharge or retention of storm water. Under specific environmental laws, we could also be held responsible for any costs relating to contamination at our past or present facilities and at third-party waste disposal sites, as well as costs associated with clean-up of accidents involving our vehicles. We do not believe that the cost of future compliance with current environmental laws or regulations will have a material adverse effect on our operations, financial condition, competitive position or capital expenditures for the remainder of 2019 or fiscal year 2020. However, future changes to laws or regulations may adversely affect our operations and could result in unforeseen costs to our business.

Available Information

Through our website, <http://www.odfl.com>, we make available, free of charge, our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and any amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 (the “Exchange Act”), as soon as practicable after we electronically file the material with or furnish it to the U.S. Securities and Exchange Commission (the “SEC”). The public may read or copy any document we file with the SEC at the SEC’s website, <http://www.sec.gov> (File No. 0-19582). Information contained on our website is neither part of nor incorporated by reference into this Form 10-K or any other report we file with or furnish to the SEC.

ITEM 1A. RISK FACTORS

Various factors exist that could cause our actual results to differ materially from those projected in any forward-looking statement. In addition to the factors discussed elsewhere in this report, we believe the following are some of the important risks and uncertainties that could materially affect our business, financial condition or results of operations:

We operate in a highly competitive industry, and our business will suffer if we are unable to adequately address potential downward pricing pressures and other factors that may adversely affect our operations and profitability.

Numerous competitive factors could impair our ability to maintain our current profitability. These factors include, but are not limited to, the following:

- we compete with other transportation service providers of varying sizes, some of which may have more equipment, a broader global network, a wider range of services, more fully developed information technology systems, greater capital resources or other competitive advantages;
- some of our competitors may reduce their prices to gain business, especially during times of reduced growth rates in the economy, which may limit our ability to maintain or increase prices or maintain revenue;
- we may be unable to continue to collect fuel surcharges or our fuel surcharge program may become ineffective in mitigating the impact of the fluctuating costs of fuel and other petroleum-based products;

- many customers reduce the number of carriers they use by selecting “core carriers” as approved transportation service providers and we may not be selected;
- many customers periodically accept bids from multiple carriers for their shipping needs, and this process may depress prices or result in the loss of some business to competitors;
- some shippers may choose to acquire their own trucking fleet or may choose to increase the volume of freight they transport if they have an existing trucking fleet;
- some customers may choose to consolidate certain LTL shipments through a different mode of transportation, such as truckload, intermodal or rail;
 - some customers may perceive our environmental, social and governance (“ESG”) profile to be less robust than that of our competitors, which could influence the selection of their carrier;
- our customers may manage their inventory levels more closely to a “just-in-time” basis, which may increase our costs and adversely affect our ability to meet our customers’ needs;

consolidation in the ground transportation industry may create other large carriers with greater financial resources and other competitive advantages relating to their size;
advances in technology require increased investments to remain competitive, and our customers may not be willing to accept higher prices to cover the cost of these investments;
competition from non-asset-based logistics and freight brokerage companies may adversely affect our customer relationships and ability to maintain sufficient pricing; and
our competitors may adopt emerging or additional technologies that improve their operating effectiveness, which could negatively affect our ability to remain competitive.

If we are unable to effectively compete with other LTL carriers, whether on the basis of price, service or otherwise, we may be unable to retain existing customers or attract new customers, either of which could have a material adverse effect on our business, financial condition and results of operations. Furthermore, continued merger and acquisition activity in transportation and logistics could result in stronger or new competitors, which could have a material adverse effect on our business, financial condition and results of operations. We may not be able to compete successfully in an increasingly consolidated LTL industry and cannot predict with certainty how industry consolidation will affect our competitors or us.

If our employees were to unionize, our operating costs would increase and our ability to compete would be impaired.

None of our employees are currently represented under a collective bargaining agreement. However, from time to time there have been efforts to organize our employees at various service centers. Further, Congress or one or more states could approve legislation and/or the National Labor Relations Board could render decisions or implement rule changes that could significantly affect our business and our relationship with our employees, including actions that could substantially liberalize the procedures for union organization. In addition, we can offer no assurance that the Department of Labor will not adopt new regulations or interpret existing regulations in a manner that would favor the agenda of unions, or that our employees will not unionize in the future, particularly if regulatory changes occur that facilitate unionization.

The unionization of our employees could have a material adverse effect on our business, financial condition and results of operations because:

restrictive work rules could hamper our efforts to improve and sustain operating efficiency;
restrictive work rules could impair our service reputation and limit our ability to provide next-day services;
a strike or work stoppage could negatively impact our profitability and could damage customer and employee relationships;
shippers may limit their use of unionized trucking companies because of the threat of strikes and other work stoppages; and
an election and bargaining process could divert management's time and attention from our overall objectives and impose significant expenses.

If we are unable to successfully execute our growth strategy, and develop, market and consistently deliver high-quality services that meet customer expectations, our business and future results of operations may suffer.

Our growth strategy includes increasing the volume of freight moving through our existing service center network, selectively expanding our capacity and broadening the scope of our service offerings. In connection with our growth strategy, at various times, we have expanded and upgraded service centers, purchased additional equipment and increased our sales and marketing efforts, and we expect to continue to do so. Our growth strategy exposes us to a number of risks, including the following:

- shortages of suitable real estate may limit our growth and could cause congestion in our service center network, which could result in increased operating expenses;

- growth may strain our management, capital resources, information systems and customer service;

hiring new employees may increase training costs and may result in temporary inefficiencies until those employees become proficient in their jobs;

we may find it more difficult to maintain our corporate culture, which we believe has been a key contributor to our success; and

expanding our service offerings may require us to enter into new markets and encounter new competitive challenges.

7

We cannot ensure that we will overcome the risks associated with our growth strategy. If we fail to overcome those risks, we may not realize additional revenue or profits from our efforts, we may incur additional expenses and, as a result, our financial position and results of operations could be materially and adversely affected.

We may be unable to successfully consummate and integrate acquisitions as part of our growth strategy.

Growth through acquisitions historically has been a key component of our LTL growth strategy. In the future, we may seek to acquire other LTL carriers as well as other complementary businesses. Exploration of potential acquisitions requires significant attention from our management team. In addition, we expect to compete for acquisition opportunities with other companies, some of which may have greater financial and other resources than we do. We cannot ensure that we will have sufficient cash to consummate an acquisition or otherwise be able to obtain financing for an acquisition. If we are unable to access sufficient funding for potential acquisitions, we may not be able to complete transactions that we otherwise find advantageous.

Any subsequent acquisition will entail numerous risks, including:

- we may not achieve anticipated levels of revenue, efficiency, cash flows and profitability;
- we may experience difficulties managing businesses that are outside our historical core competency and markets;
- we may underestimate the resources required to support acquisitions, which could disrupt our ongoing business and distract our management;
- we may incur unanticipated costs to our infrastructure to support new business lines or separate legal entities;
- we may be required to temporarily match existing customer pricing in the acquiree's markets, which may be lower than the rates that we would typically charge for our services;
- liabilities we assume could be greater than our original estimates or may not be disclosed to us at the time of acquisition;
- we may incur additional indebtedness or we may issue additional equity to finance future acquisitions, which could be dilutive to our shareholders;
- potential loss of key employees and customers of the acquired company; and
- an inability to recognize projected cost savings and economies of scale.

In addition, we may have difficulty integrating any acquired business and its operations, services and personnel into our existing operations, and such integration may require a significant amount of time and effort by our management team. To the extent we do not successfully avoid or overcome the risks or problems resulting from any acquisitions we undertake, there could be a material adverse effect on our business, financial condition and results of operations.

Our customers' and suppliers' businesses may be impacted by various economic factors such as recessions, downturns in the economy, global uncertainty and instability, changes in U.S. social, political, and regulatory conditions and/or a disruption of financial markets, which may decrease demand for our services or increase our costs.

Adverse economic conditions, both in the U.S. and internationally, can negatively affect our customers' business levels, the amount of transportation services they need, their ability to pay for our services and overall freight levels, any of which might impair our asset utilization. Additionally, uncertainty and instability in the global economy and any other action that the U.S. government may take to withdraw from or materially modify international trade arrangements, including related to the United States-Mexico-Canada Agreement, which was agreed upon on September 30, 2018 and is designed to replace the North American Free Trade Agreement, may lead to fewer goods being transported and could have a material adverse effect on our business, financial conditions and results of operations. The U.S. government has made significant changes in U.S. trade policy and has taken certain other actions that may impact U.S. trade, including imposing tariffs on certain goods imported into the United States. To date, several governments, including the European Union, China, and India, have imposed tariffs on certain goods imported from the United States. Any further changes in U.S. or international trade policy could trigger additional retaliatory

actions by affected countries, resulting in “trade wars” and increased costs for goods transported globally, which may reduce customer demand for these products if the parties having to pay those tariffs increase their prices, or in trading partners limiting their trade with countries that impose anti-trade measures. If these consequences are realized, the volume of global economic activity may be significantly reduced. Such a reduction could have a material adverse effect on our business, results of operations and financial condition.

Customers adversely impacted by changes in U.S. trade policies or otherwise encountering adverse economic conditions may be unable to obtain additional financing or financing under acceptable terms. These customers represent a greater potential for bad debt losses, which may require us to increase our reserve for bad debt. Economic conditions resulting in bankruptcies of one or more of our large customers could have a significant impact on our financial position, results of operations or liquidity in a particular year or

quarter. Further, when adverse economic times arise, customers may select competitors that offer lower rates in an attempt to lower their costs, and we might be forced to lower our rates or lose freight volumes.

Our suppliers' business levels also may be negatively affected by adverse economic conditions and changes in the political and regulatory environment, both in the U.S. and internationally, or financial constraints, which could lead to disruptions in the supply and availability of equipment, parts and services critical to our operations. A significant interruption in our normal supply chain could disrupt our operations, increase our costs and negatively impact our ability to serve our customers.

We are also subject to cost increases outside of our control that could materially reduce our profitability if we are unable to increase our rates sufficiently. Such cost increases include, but are not limited to, increases in wage rates, fuel prices, interest rates, taxes, tolls, license and registration fees, insurance, revenue equipment and healthcare for our employees.

Difficulties attracting and retaining qualified drivers and maintenance technicians could result in increases in driver and technician compensation and could adversely affect our profitability, our ability to maintain or grow our fleet and our ability to maintain our customer relationships.

From time to time we have experienced difficulty in attracting and retaining sufficient numbers of qualified drivers and such shortages may recur in the future. Due in part to the time commitment, physical requirements, our stringent hiring standards and current industry conditions, the available pool of qualified employee drivers has been declining. Because of the intense competition for drivers, we may face difficulty maintaining or increasing our number of drivers. Similarly, in recent years, there has been a decrease in the overall supply of skilled maintenance technicians, particularly new technicians with qualifications from technical programs and schools, which could make it more difficult to attract and retain skilled technicians. The compensation we offer our drivers and technicians is subject to market conditions that may require increases in driver or technician compensation. If we are unable to attract and retain a sufficient number of qualified drivers and technicians, we could be required to adjust our compensation packages, amend our hiring standards, or operate with fewer trucks and face difficulty meeting customer demands, any of which could adversely affect our growth and profitability.

The FMCSA's CSA initiative could adversely impact our ability to hire qualified drivers, meet our growth projections and maintain our customer relationships, each of which could adversely impact our results of operations.

The FMCSA's Compliance, Safety, Accountability initiative ("CSA") is an enforcement and compliance program designed to monitor and improve commercial motor vehicle safety by measuring the safety record of both the motor carrier and the driver. These measurements are scored and used by the FMCSA to identify potential safety risks and to direct enforcement action.

Our CSA scores are dependent upon our safety and compliance experience, which could change at any time. In addition, the safety standards prescribed in CSA could change and our ability to maintain an acceptable score could be adversely impacted. Public disclosure of certain CSA scores was restricted through the enactment of the Fixing America's Surface Transportation Act of 2015 (the "FAST Act") on December 4, 2015; however, the FAST Act does not restrict public disclosure of all data collected by the FMCSA. If we receive unacceptable CSA scores, and this data is made available to the public, our relationships with our customers could be damaged, which could result in a loss of business.

The requirements of the CSA could also shrink the industry's pool of drivers, as those with unfavorable scores could leave the industry. As a result, the costs to attract, train and retain qualified drivers could increase. In addition, a shortage of qualified drivers could increase driver turnover, decrease asset utilization, limit growth and adversely

impact our results of operations.

We operate in a highly regulated industry, and increased costs of compliance with, or liability for violation of, existing or future regulations could have a material adverse effect on our business.

We are regulated by the DOT and by various state and federal agencies. These regulatory authorities have broad powers over matters relating to authorized motor carrier operations, as well as motor carrier registration, driver hours of service, safety and fitness of transportation equipment and drivers, transportation of hazardous materials, certain mergers and acquisitions and periodic financial reporting. The trucking industry is also subject to regulatory and legislative changes from a variety of other governmental authorities, which address matters such as increasingly stringent environmental regulations, occupational safety and health regulations, limits on vehicle weight and size, ergonomics, port security, and driver hours of service. We are also subject to the costs and potential adverse impact of compliance associated with FMCSA's ELD regulations and guidance, including the transition of our fleet and safety management systems from our legacy electronic AOBDRs to a new ELD hardware and software platform. In addition, we are subject to compliance with cargo-security and transportation regulations issued by the TSA and CBP within the U.S. Department of Homeland Security. Regulatory requirements and changes in regulatory requirements or guidance, together with the growing compliance risks presented by increased differences between applicable federal and state regulations, may affect our business or the economics of the industry by requiring changes in operating practices that could influence the demand for and increase the costs of providing transportation services.

Insurance and claims expenses could significantly reduce our profitability.

We are exposed to claims related to cargo loss and damage, property damage, personal injury, workers' compensation, group health and group dental. We have insurance coverage with third-party insurance carriers, but we assume a significant portion of the risk associated with these claims due to our SIRs and deductibles. Our operating results could be adversely affected if any of the following were to occur: (i) the number or the severity of claims increases; (ii) we are required to accrue or pay additional amounts because claims prove to be more severe than our original assessment; or (iii) claims exceed our coverage amounts. If claims exceed our SIR or deductible levels, insurance companies exit the transportation insurance marketplace, or insurance market conditions change, insurers could raise premiums for excess coverage to cover their expenses and anticipated future losses. In addition, insurance companies generally require us to collateralize our SIR or deductible levels. If these collateralization requirements increase, our borrowing capacity could be adversely affected.

Healthcare legislation may increase our costs and reduce our future profitability.

To attract and retain employees, we maintain a competitive health insurance plan for our employees and their dependents. We cannot predict the impact that any state or federal healthcare legislation or regulation will have on our operations, but we expect costs associated with providing benefits under employee medical plans and healthcare-related costs associated with workers' compensation to continue to increase. Rising healthcare costs in the U.S. could result in significant long-term costs to us, which could have a material adverse effect on our operating results. In addition, rising healthcare costs could force us to make further changes to our benefits program, which could negatively impact our ability to attract and retain employees.

We have significant ongoing cash requirements that could limit our growth and affect our profitability if we are unable to obtain sufficient capital.

Our business is highly capital intensive. We generally finance our capital expenditures and planned growth with existing cash, cash flow from operations, issuance of debt and through available borrowings under our existing senior unsecured credit agreement. We may require additional capital to finance long-term real estate purchase opportunities and acquisitions, which we may fund through additional debt or through equity offerings. If we are unable to generate sufficient cash from our operations or raise capital by accessing the debt and equity markets, we may be forced to limit our growth and operate our equipment for longer periods of time, which could have a material adverse effect on our operating results.

Our business also has significant ongoing operating cash requirements. If our cash requirements are high or our cash flow from operations is low during particular periods, we may need to seek additional financing, which could be costly or difficult to obtain.

Limited supply and increased costs of new equipment may adversely affect our earnings and cash flow.

We may face difficulty in purchasing new equipment due to decreased supply and increased costs. Investment in new equipment is a significant part of our annual capital expenditures and we require an available supply of tractors and trailers from equipment manufacturers to operate and grow our business. We may also be subject to shortages in raw materials that are required for the production of critical operating equipment and supplies, such as shortages in rubber or steel.

The price of our equipment may also be adversely affected in the future by regulations on newly manufactured tractors and diesel engines. We are subject to regulations issued by the U.S. Environmental Protection Agency (the "EPA") and various state agencies, particularly the California Air Resources Board ("CARB"), that have required progressive

reductions in exhaust emissions from diesel engines. We may become subject to new or more restrictive regulations, or differing interpretations of existing regulations, which may increase the cost of providing transportation services or adversely affect our results of operations. We are also unable to predict how any future changes in U.S. government policy will affect EPA and CARB regulation and enforcement. These regulations have resulted in higher prices for tractors and diesel engines and increased operating and maintenance costs, and there can be no assurance that continued increases in pricing or costs will not have an adverse effect on our business and results of operations.

We may be adversely impacted by fluctuations in the availability and price of diesel fuel.

Diesel fuel is a critical component of our operations and a significant operating expense for our business. Future fluctuations in prices and diesel fuel availability could have a material adverse effect on our operating results. Diesel fuel prices and fuel availability can be impacted by factors beyond our control, such as natural or man-made disasters, adverse weather conditions, political events, disruption or failure of technology or information systems, price and supply decisions by oil producing countries and cartels, terrorist activities, armed conflict, world supply and demand imbalances, tariffs, sanctions, and quotas or other changes to trade agreements. We maintain fuel storage and pumping facilities at many of our service center locations; however, we may be susceptible to fuel shortages at certain locations that could cause us to incur additional expense to ensure adequate supply on a timely basis and to prevent a disruption to our service schedules. An interruption in the supply of diesel fuel could have a material adverse effect on our operating results.

We do not hedge against the risk of diesel fuel price increases. An increase in diesel fuel prices or diesel fuel taxes, or any change in federal or state regulations that results in such an increase, could have a material adverse effect on our operating results. We have fuel surcharge programs in place with a majority of our customers, which help offset the negative impact of the increased cost of diesel fuel and other petroleum-based products. However, we also incur fuel costs that cannot be recovered even with respect to customers with which we maintain fuel surcharge programs, such as those costs associated with empty miles or the time during which our engines are idling. Because our fuel surcharge recovery lags behind changes in fuel prices, our fuel surcharge recovery may not capture the increased costs we pay for fuel, especially when prices are rising, leading to fluctuations in our levels of reimbursement. We regularly monitor the components of our pricing, including fuel surcharges, and address individual account profitability issues with our customers when necessary; however, there can be no assurance that fuel surcharges can be maintained indefinitely or will be sufficiently effective in offsetting increases in diesel fuel prices.

We are subject to various governmental laws and regulations, and costs of compliance with, liabilities under, or violations of, existing or future governmental laws or regulations could adversely affect our business.

We are subject to various federal, state and local governmental laws and regulations that govern, among other things, the emission and discharge of hazardous materials into the environment, the presence of hazardous materials at our properties or in our vehicles, fuel storage tanks, the transportation of certain materials and the discharge or retention of storm water. Under certain environmental laws, we could also be held responsible for any costs relating to contamination at our past or present facilities and at third-party waste disposal sites, as well as costs associated with the clean-up of accidents involving our vehicles. Environmental laws have become and may continue to be increasingly more stringent over time, and there can be no assurance that our costs of complying with current or future environmental laws or liabilities arising under such laws will not have a material adverse effect on our business, operations or financial condition.

In addition to EPA and state agency regulations on exhaust emissions with which we must comply, there is an increased legislative and regulatory focus on climate change, greenhouse gas emissions and the impact of global warming. State and local governments are increasingly considering greenhouse gas emissions regulation. This possibility of increased regulation of greenhouse gas emissions potentially exposes us to significant new taxes, fees and other costs. We are also subject to increasing sensitivity to sustainability issues. This increased focus on sustainability may result in new regulations and/or customer requirements that could adversely impact our business. Any future limitations on the emission of greenhouse gases, other environmental legislation or customer sustainability requirements could increase our future capital expenditures and have an adverse impact on our financial condition, results of operations and liquidity.

We are subject to the risks of litigation and governmental proceedings or inquiries, which could adversely affect our business.

The nature of our business exposes us to the potential for various claims and litigation related to labor and employment, personal injury, property damage, cargo claims, safety and contract compliance, environmental liability and other matters. Accordingly, we are, and in the future may be, subject to legal proceedings and claims that have arisen in the ordinary course of our business, and may include class-action allegations. We are also subject to potential governmental proceedings, inquiries, and claims. The parties in such actions may seek amounts from us that may not be covered in whole or in part by insurance. Defending ourselves against such actions could result in significant costs and could require a substantial amount of time and effort by our management team. We cannot predict the outcome of litigation or governmental proceedings or inquiries to which we are a party or whether we will be subject to future legal actions. As a result, the potential costs associated with legal actions against us could adversely affect our business, financial condition or results of operations.

We are subject to various risks arising from our international business operations and relationships, which could adversely affect our business.

We arrange for transportation and logistics services to and from various international locations and are subject to both the risks of conducting international business and the requirements of the Foreign Corrupt Practices Act of 1977 (the “FCPA”). Failure to comply with the FCPA may result in legal claims against us. In addition, we face other risks associated with international operations and relationships, which may include restrictive trade policies, the renegotiation of international trade agreements, imposition of duties, taxes or government royalties imposed by foreign governments, which could adversely affect our business.

We are subject to legislative, regulatory, and legal developments involving taxes.

Taxes are a significant part of our expenses. We are subject to U.S. federal and state income, payroll, property, sales and use, fuel, and other types of taxes. The Tax Cuts and Jobs Act (the “Tax Act”), which was enacted on December 22, 2017, includes a broad range of tax reform provisions affecting businesses, including lower corporate tax rates, changes in business deductions, and international tax provisions. Changes to tax laws and regulations or changes to the interpretation thereof (including regulations and interpretations pertaining to the Tax Act), the ambiguity of tax laws and regulations, the subjectivity of factual interpretations, higher

tax rates, claims, audits, investigations or legal proceedings involving taxing authorities, could have a material adverse effect on our results of operations, financial condition, and cash flows.

Our results of operations may be affected by seasonal factors, harsh weather conditions and disasters.

Our operations are subject to seasonal trends common in our industry. Our revenue and operating margins in the first and fourth quarters are typically lower than those during the second and third quarters due to reduced shipments during the winter months. Harsh winter weather or natural disasters, such as hurricanes, tornadoes, floods, fires and other storms can also adversely impact our performance by reducing demand and reducing our ability to transport freight, which could result in decreased revenue and increased operating expenses.

If we are unable to retain our key employees, or if we do not continue to effectively execute our succession plan, our financial condition, results of operations and liquidity could be adversely affected.

Our success will continue to depend upon the experience and leadership of our key employees and executive officers. In that regard, the loss of the services of any of our key personnel could have a material adverse effect on our financial condition, results of operations and liquidity if we are unable to secure replacement personnel who have sufficient experience in our industry and in the management of our business. If we are unable to continue to develop and retain a core group of management personnel and execute succession planning strategies, or we encounter any unforeseen difficulties associated with the transition of members of our management team, our business could be negatively impacted in the future.

Our principal shareholders control a large portion of our outstanding common stock.

Earl E. Congdon, David S. Congdon, John R. Congdon, Jr. and their affiliate family members beneficially own an aggregate of approximately 19% of the outstanding shares of our common stock. As long as the Congdon family controls a large portion of our voting stock, they may be able to significantly influence the election of the entire Board of Directors and the outcome of all matters involving a shareholder vote. The Congdon family's interests may differ from the interests of other shareholders and the status of their ownership could change at their discretion.

Our financial results may be adversely impacted by potential future changes in accounting practices.

Future changes in accounting standards or practices, and related legal and regulatory interpretations of those changes, may adversely impact public companies in general, the transportation industry or our operations specifically. New accounting standards or requirements could change the way we record revenues, expenses, assets and/or liabilities or could be costly to implement. These types of regulations could have a negative impact on our financial position, liquidity, results of operations and/or access to capital.

Our information technology systems are subject to cyber and other risks, some of which are beyond our control, which could have a material adverse effect on our business, results of operations and financial position.

We rely heavily on the proper functioning and availability of our information systems for our operations as well as for providing value-added services to our customers. Our information systems, including our accounting, communications and data processing systems, are integral to the efficient operation of our business. It is critical that the data processed by these systems remain confidential, as it often includes competitive customer information, confidential customer credit card and transaction data, employee records and key financial and operational results and statistics. The sophistication of efforts by hackers, foreign governments, cyber-terrorists, and cyber-criminals, acting individually or in coordinated groups, to launch distributed denial of service attacks or other coordinated attacks that may cause service outages, gain inappropriate or block legitimate access to systems or information, or result in other business

interruptions has continued to increase in recent years. We utilize third-party service providers who have access to our systems and certain sensitive data, which exposes us to additional security risks, particularly given the complex and evolving laws and regulations regarding privacy and data protection. While we and our third-party service providers have experienced cyber-attacks and attempted breaches of our and their information technology systems and networks or similar events from time to time, no such incidents have been, individually or in the aggregate, material to us. Cyber incidents that impact the security, availability, reliability, speed, accuracy or other proper functioning of our systems, information and measures, including outages, computer viruses, break-ins and similar disruptions, could have a significant impact on our operations.

Although our information systems are protected through physical and software safeguards, as well as redundant systems, network security measures and backup systems, it is difficult to fully protect against the possibility of power loss, telecommunications failures, cyber attacks, and other cyber incidents in every potential circumstance that may arise. A significant cyber incident, including system failure, security breach, disruption by malware or ransomware, or other damage, could interrupt or delay our operations, damage our reputation and brand, cause a loss of customers, expose us to a risk of loss or litigation, result in regulatory scrutiny, investigations, actions, fines or penalties and/or cause us to incur significant time and expense to remedy such an event, any of which could have a material adverse impact on our results of operations and financial position. Furthermore, any failure to comply with data

privacy, security or other laws and regulations could result in claims, legal or regulatory proceedings, inquiries or investigations. As cyber threats are continually evolving, our controls and procedures may become inadequate and we may be required to devote additional resources to modifying or enhancing our systems in the future. Furthermore, while we maintain insurance intended to address costs associated with aspects of cyber incidents, network failures and data privacy-related concerns, our coverage may not sufficiently cover all types of losses or claims that may arise.

Failure to keep pace with developments in technology, any disruption to our technology infrastructure, or failures of essential services upon which our technology platforms rely could cause us to incur costs or result in a loss of business, which may have a material adverse effect on our results of operations and financial condition.

We rely heavily on information technology systems. Our information technology systems are complex and require ongoing investments and enhancements to meet both internal requirements and the requirements of our customers. If we are unable to invest in and enhance or modernize our technology systems in a timely manner or at a reasonable cost, or if we are unable to train our employees to operate the new, enhanced or modernized systems, our results of operations and financial condition could be adversely affected. We also may not achieve the benefits that we anticipate from any new technology or new or modernized system, and a failure to do so could result in higher than anticipated costs or adversely affect our results of operations.

Our information technology systems also depend upon the Internet, third-party service providers, global communications providers, satellite-based communications systems, the electric utilities grid, electric utility providers and telecommunications providers. We have minimal control over the operation, quality, or maintenance of these services or whether vendors will improve their services or continue to provide services that are essential to our business. Disruptions due to transitional challenges in upgrading or enhancing our technology systems; failures in the services upon which our information technology platforms rely, including those that may arise from adverse weather conditions or natural calamities, such as floods, hurricanes, earthquakes or tornadoes; illegal acts, including terrorist attacks; human error or systems modernization initiatives; and/or other disruptions, may adversely affect our business, which could increase our costs or result in a loss of customers that could have a material adverse effect on our results of operations and financial position.

Damage to our reputation through unfavorable publicity could adversely affect our financial condition.

In the current environment of instantaneous communication and social media outlets, the quick and broad dissemination of information through media sources could cause damaging information about us, whether accurate or not, to be broadly publicized. Unfavorable publicity about us or our employees could damage our reputation and the value of the Old Dominion brand and may result in a reduction in demand for our services or the loss of customers. Our reputation could also be impacted by negative perceptions or publicity regarding ESG issues or cybersecurity and data privacy concerns. Any unfavorable publicity and resulting erosion of trust and confidence could make it difficult for us to attract and retain customers and employees or require us to allocate significant resources to the rebuilding of our reputation and brand, any of which could have a material adverse effect on our business, financial condition and results of operations.

Anti-terrorism measures and terrorist events may disrupt our business.

Federal, state and municipal authorities have implemented and are continuing to implement various anti-terrorism measures, including checkpoints and travel restrictions on large trucks. If additional security measures disrupt or impede the timing of our deliveries, we may fail to meet the requirements of our customers or incur increased expenses to do so. There can be no assurance that new anti-terrorism measures will not be implemented and that such measures will not have a material adverse effect on our operations.

A decrease in the demand and value of used equipment may impact our results of operations.

As we purchase new tractors and trailers as part of our normal replacement cycle each year, we rely on the used equipment market to dispose of our older equipment. Oversupply in the transportation industry as well as adverse domestic and foreign economic conditions can negatively impact the demand for used equipment and, therefore, reduce the value we can obtain on our used equipment. If we are unable to sell our older equipment at or above our salvage value, the resulting losses could have a significant impact on our results of operations.

If we raise additional capital in the future, your ownership in us could be diluted.

Any issuance of equity we may undertake in the future to raise additional capital could cause the price of our common stock to decline, or require us to issue shares at a price that is lower than that paid by holders of our common stock in the past, which would result in those newly issued shares being dilutive. If we obtain funds through a credit facility or through the issuance of debt or preferred securities, these obligations and securities would likely have rights senior to your rights as a common shareholder, which could impair the value of our common stock.

There can be no assurance of our ability to declare and pay cash dividends in future periods.

We intend to pay a quarterly cash dividend to holders of our common stock for the foreseeable future; however, dividend payments are subject to approval by our Board of Directors, and are restricted by applicable state law limitations on distributions to shareholders as well as certain covenants under our revolving credit facility. As a result, future dividend payments are not guaranteed and will depend upon various factors such as our overall financial condition, available liquidity, anticipated cash needs, future prospects for earnings and cash flows, as well as other factors considered relevant by our Board of Directors. In addition, any reduction or suspension in our dividend payments could adversely affect the price of our common stock.

The market value of our common stock has recently been and may in the future be volatile, and could be substantially affected by various factors.

The price of our common stock on the Nasdaq Global Select Market changes constantly. We expect that the market price of our common stock will continue to fluctuate due to a variety of factors, many of which are beyond our control. These factors include, among others:

- actual or anticipated variations in earnings, financial or operating performance or liquidity;
- changes in analysts' recommendations or projections;
- failure to meet analysts' projections;
- general political, social, economic and capital market conditions;
- announcements of developments related to our business;
- operating and stock performance of other companies deemed to be peers;
- actions by government regulators;
- changes in key personnel;
- fluctuations in trading volume, including substantial increases or decreases in reported holdings by significant shareholders;
- expectations regarding our capital deployment program, including any existing or potential future share repurchase programs and any future dividend payments that may be declared by our Board of Directors, or any determination to cease repurchasing stock or paying dividends; and
- news reports of trends, concerns and other issues related to us or our industry, including changes in regulations.

Our common stock price may continue to fluctuate significantly in the future, and these fluctuations may be unrelated to our performance. General market price declines or market volatility in the future could adversely affect the price of our common stock, and the current market price of our common stock may not be indicative of future market prices.

Our articles of incorporation, our bylaws and Virginia law contain provisions that could discourage, delay or prevent a change in our control or our management.

Provisions of our articles of incorporation, bylaws and the laws of Virginia, the state in which we are incorporated, may discourage, delay or prevent a change in control of us or a change in management that shareholders may consider favorable. These provisions:

- limit who may call a special meeting of shareholders;
- require shareholder action by written consent to be unanimous;
- establish advance notice requirements for nominations for election to our Board of Directors or for proposing matters that can be acted upon at shareholder meetings;
- may make it difficult to merge with or otherwise absorb a Virginia corporation acquired in a tender offer for the three years after the acquisition; and

-

may make an unsolicited attempt to gain control of us more difficult by restricting the right of specified shareholders to vote newly acquired large blocks of stock.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

14

ITEM 2. PROPERTIES

We own our principal executive office located in Thomasville, North Carolina, consisting of a two-story office building of approximately 168,000 square feet on 31.8 acres of land. At December 31, 2018, we operated 235 service centers, of which 203 were owned and 32 were leased. Our owned service centers include most of our larger facilities and account for approximately 94% of the total door capacity in our network. We own each of our major breakbulk facilities listed below and have provided the number of doors as of December 31, 2018.

Service Center	Doors
Morristown, Tennessee	347
Indianapolis, Indiana	318
Dallas, Texas	304
Columbus, Ohio	301
Harrisburg, Pennsylvania	300
Memphis, Tennessee	267
Rialto, California	265
Atlanta, Georgia	227
Greensboro, North Carolina	212
Salt Lake City, Utah	188

Our 235 facilities are strategically dispersed over the states in which we operate. At December 31, 2018, the terms of our leased properties ranged from month-to-month to a lease that expires in 2039. We believe that as current leases expire, we will be able to renew them or find comparable facilities without causing any material negative impact on service to our customers or our operating results.

We believe that all of our properties are in good repair and are capable of providing the level of service required by current business levels and customer demands. In addition, we believe we have sufficient capacity in our service center network to accommodate increased demand for our services.

ITEM 3. LEGAL PROCEEDINGS

We are involved in or addressing various legal proceedings and claims, governmental inquiries, notices and investigations that have arisen in the ordinary course of our business and have not been fully adjudicated, some of which may be covered in whole or in part by insurance. Certain of these matters include class-action allegations. We do not believe that the resolution of any of these matters will have a material adverse effect upon our financial position, results of operations or cash flows.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Common Stock Information

Our common stock is traded on the Nasdaq Global Select Market ("Nasdaq") under the symbol ODFL. At February 21, 2019, there were 72,192 holders of our common stock, including 108 shareholders of record.

The following table provides information regarding our repurchases of our common stock during the fourth quarter of 2018:

ISSUER PURCHASES OF EQUITY SECURITIES

	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Programs	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Programs
October 1-31, 2018	81,548	\$138.41	81,548	\$207,118,163
November 1-30, 2018	437,647	\$131.82	437,647	\$149,428,758
December 1-31, 2018	135,028	\$131.08	135,028	\$131,729,611
Total	654,223	\$132.49	654,223	

On May 17, 2018, we announced that our Board of Directors had approved a two-year stock repurchase program authorizing us to repurchase up to an aggregate of \$250.0 million of our outstanding common stock (the "Repurchase Program"). Under the Repurchase Program, which became effective upon the expiration of our prior stock repurchase program in June 2018, we may repurchase shares from time to time in open market purchases or through privately negotiated transactions. Shares of our common stock repurchased under our Repurchase Program are canceled at the time of repurchase and are classified as authorized but unissued shares of our common stock.

Performance Graph

The following graph compares the total shareholder cumulative returns, assuming the reinvestment of all dividends, of \$100 invested on December 31, 2013, in (i) our common stock, (ii) the S&P 500 Total Return Index, and (iii) the Nasdaq Industrial Transportation Index, for the five-year period ended December 31, 2018.

Cumulative Total Return

	12/31/13	12/31/14	12/31/15	12/31/16	12/31/17	12/31/18
Old Dominion Freight Line, Inc.	\$ 100	\$ 146	\$ 111	\$ 162	\$ 249	\$ 235
S&P 500 Total Return Index	\$ 100	\$ 114	\$ 115	\$ 129	\$ 157	\$ 150
Nasdaq Industrial Transportation Index	\$ 100	\$ 121	\$ 94	\$ 121	\$ 154	\$ 140

ITEM 6. SELECTED FINANCIAL DATA

(In thousands, except per share amounts)	Year Ended December 31,				
	2018	2017	2016	2015	2014
Operating Data:					
Revenue from operations	\$4,043,695	\$3,358,112	\$2,991,517	\$2,972,442	\$2,787,897
Depreciation and amortization expense	230,357	205,763	189,867	165,343	146,466
Total operating expenses	3,226,644	2,782,226	2,507,682	2,474,202	2,346,590
Operating income	817,051	575,886	483,835	498,240	441,307
Interest (income) expense, net	(2,924)	1,414	4,274	5,001	6,502
Provision for income taxes	209,845	112,058	181,822	185,327	165,000

Shareholders' equity	2,680,483	2,276,854	1,851,158	1,684,637	1,494,064

- (1) Our 2017 net income includes a provisional tax benefit of \$104.9 million due to the remeasurement of our deferred taxes to reflect the impact of the Tax Act.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview

We are a leading, less-than-truckload ("LTL"), union-free motor carrier providing regional, inter-regional and national LTL services through a single integrated organization. Our service offerings, which include expedited transportation, are provided through an expansive network of service centers located throughout the continental United States. Through strategic alliances, we also provide LTL services throughout North America. In addition to our core LTL services, we offer a range of value-added services including container drayage, truckload brokerage and supply chain consulting. More than 97% of our revenue has historically been derived from transporting LTL shipments for our customers, whose demand for our services is generally tied to industrial production and the overall health of the U.S. domestic economy.

In analyzing the components of our revenue, we monitor changes and trends in our LTL services using the following key metrics, which exclude certain transportation and logistics services where pricing is generally not determined by weight, commodity or distance:

✦ **LTL Revenue Per Hundredweight** - This measurement reflects the application of our pricing policies to the services we provide, which are influenced by competitive market conditions and our growth objectives. Generally, freight is rated by a class system, which is established by the National Motor Freight Traffic Association, Inc. Light, bulky freight typically has a higher class and is priced at higher revenue per hundredweight than dense, heavy freight. Fuel surcharges, accessorial charges, revenue adjustments and revenue for undelivered freight are included in this measurement. Revenue for undelivered freight is deferred for financial statement purposes in accordance with our revenue recognition policy; however, we believe including it in our revenue per hundredweight metrics results in a better indicator of changes in this metric by matching total billed revenue with the corresponding weight of those shipments.

Revenue per hundredweight is a commonly-used indicator of pricing trends, but this metric can be influenced by many other factors, such as changes in fuel surcharges, weight per shipment, length of haul and the class, or mix, of our freight. As a result, changes in revenue per hundredweight do not necessarily indicate actual changes in underlying base rates.

✦ **LTL Weight Per Shipment** - Fluctuations in weight per shipment can indicate changes in the mix of freight we receive from our customers, as well as changes in the number of units included in a shipment. Generally, increases in weight per shipment indicate higher demand for our customers' products and overall increased economic activity. Changes in weight per shipment can also be influenced by shifts between LTL and other modes of transportation, such as truckload and intermodal, in response to capacity, service and pricing issues. Fluctuations in weight per shipment generally have an inverse effect on our revenue per hundredweight, as a decrease in weight per shipment will typically cause an increase in revenue per hundredweight.

✦ **Average Length of Haul** - We consider lengths of haul less than 500 miles to be regional traffic, lengths of haul between 500 miles and 1,000 miles to be inter-regional traffic, and lengths of haul in excess of 1,000 miles to be national traffic. This metric is used to analyze our tonnage and pricing trends for shipments with similar characteristics, and also allows for comparison with other transportation providers serving specific markets. By analyzing this metric, we can determine the success and growth potential of our service products in these markets. Changes in length of haul generally have a direct effect on our revenue per hundredweight, as an increase in length of haul will typically cause an increase in revenue per hundredweight.

Our primary revenue focus is to increase density, which is shipment and tonnage growth within our existing infrastructure. Increases in density allow us to maximize our asset utilization and labor productivity, which we measure over many different functional areas of our operations including linehaul load factor, P&D stops per hour,

P&D shipments per hour, platform pounds handled per hour and platform shipments per hour. In addition to our focus on density and operating efficiencies, it is critical for us to obtain an appropriate yield, which is measured as revenue per hundredweight, on the shipments we handle. We are committed to a disciplined yield management process that focuses on individual account profitability. We believe yield management and improvements in efficiency are key components in our ability to produce profitable growth.

Our primary cost elements are direct wages and benefits associated with the movement of freight, operating supplies and expenses, which include diesel fuel, and depreciation of our equipment fleet and service center facilities. We gauge our overall success in managing costs by monitoring our operating ratio, a measure of profitability calculated by dividing total operating expenses by revenue, which also allows for industry-wide comparisons with our competition.

We continually upgrade our technological capabilities to improve our customer service and lower our operating costs. Our technology provides our customers with visibility of their shipments throughout our network, increases the productivity of our workforce and provides key metrics that we use to monitor and enhance our processes.

Results of Operations

The following table sets forth, for the years indicated, expenses and other items as a percentage of revenue from operations:

	2018	2017	2016
Revenue from operations	100.0%	100.0%	100.0%
Operating expenses:			
Salaries, wages and benefits	51.3	53.7	55.2
Operating supplies and expenses	12.1	11.4	10.8
General supplies and expenses	2.9	3.2	2.9
Operating taxes and licenses	2.8	3.0	3.1
Insurance and claims	1.1	1.2	1.3
Communication and utilities	0.8	0.8	0.9
Depreciation and amortization	5.7	6.2	6.3
Purchased transportation	2.4	2.5	2.5
Building and office equipment rents	0.2	0.2	0.3
Miscellaneous expenses, net	0.5	0.7	0.5
Total operating expenses	79.8	82.9	83.8
Operating income	20.2	17.1	16.2
Interest (income) expense, net	(0.1)	0.1	0.1
Other expense (income), net	0.1	(0.1)	0.1
Income before income taxes	20.2	17.1	16.0
Provision for income taxes	5.2	3.3	6.1
Net income	15.0 %	13.8 %	9.9 %

Our financial results for 2018 reflected Company records in revenue and profitability, as we exceeded \$4.0 billion of annual revenue with an operating ratio below 80.0%. We believe the increase in revenue during the year was driven by the continued strength of the domestic economy and consistent execution of our long-term strategy of providing industry-leading service to our customers at a fair price. These factors, combined with the increase in freight density in our service center network and our continued focus on improving operating efficiency, led to a 310 basis-point improvement in our operating ratio compared to 2017. As a result, our net income and diluted earnings per share increased 30.6% and 31.1%, respectively, in 2018 as compared to 2017.

2018 Compared to 2017

Key financial and operating metrics for 2018 and 2017 are presented below:

	2018	2017	Change	% Change
Work days	253	253	—	—
Revenue (in thousands)	\$4,043,695	\$3,358,112	\$685,583	20.4
Operating ratio	79.8	% 82.9	%	
Net income (in thousands)	\$605,668	\$463,774	\$141,894	30.6
Diluted earnings per share	\$7.38	\$5.63	\$1.75	31.1
LTL tons (in thousands)	9,379	8,519	860	10.1

Edgar Filing: OLD DOMINION FREIGHT LINE INC/VA - Form 10-K

LTL shipments (in thousands)	11,748	10,736	1,012	9.4
LTL weight per shipment (lbs.)	1,597	1,587	10	0.6
LTL revenue per hundredweight	\$21.25	\$19.39	\$1.86	9.6
LTL revenue per shipment	\$339.35	\$307.66	\$31.69	10.3
LTL revenue per intercity mile	\$5.91	\$5.46	\$0.45	8.2
LTL intercity miles (in thousands)	674,506	605,204	69,302	11.5
Average length of haul (miles)	918	917	1	0.1

Revenue

Revenue increased \$685.6 million, or 20.4% as compared to 2017, due to a \$679.1 million increase in LTL revenue and a \$6.5 million increase in non-LTL revenue. LTL revenue was higher in 2018 due to increases in both LTL tons and yield. The 10.1% increase in LTL tons during 2018 resulted from a 9.4% increase in LTL shipments and a 0.6% increase in LTL weight per shipment as compared to 2017. We believe these increases were driven by a stronger U.S. domestic economy and market share gains resulting from increased demand for the consistent levels of superior service that we provide to our customers.

LTL revenue per hundredweight increased 9.6% to \$21.25 in 2018 as compared to 2017. We believe the continued increase in our revenue per hundredweight reflects our consistent yield management process and a favorable pricing environment that resulted from general capacity constraints in the transportation industry. Our LTL revenue and yield were also positively impacted by an increase in fuel surcharges in 2018 as compared to 2017. Excluding fuel surcharges, LTL revenue per hundredweight increased 6.9% in 2018 compared to 2017.

Most of our tariffs and contracts provide for a fuel surcharge that is generally indexed to the diesel fuel prices published by the DOE, which reset each week. Our fuel surcharges are designed to offset fluctuations in the cost of petroleum-based products and are one of the many components included in the overall negotiated price we charge for our services. As a percent of revenue, fuel surcharges increased to 13.3% in 2018 from 11.1% in 2017. This increase was due primarily to an increase in the average price per gallon for diesel fuel during 2018 as compared to 2017. We regularly monitor the components of our pricing, including base freight rates and fuel surcharges. We also address any individual account profitability issues with our customers as part of our effort to minimize the negative impact on our profitability that would likely result from a rapid and significant change in any of our operating expenses.

January 2019 Update

Revenue per day increased 8.3% in January 2019 compared to the same month last year. LTL tons per day decreased 1.5%, due primarily to a 4.4% decrease in weight per shipment that was slightly offset by a 3.0% increase in LTL shipments. LTL revenue per hundredweight increased approximately 9.8% as compared to the same month last year.

Operating Costs and Other Expenses

Salaries, wages and benefits increased \$273.2 million, or 15.2% in 2018 due to a \$201.6 million increase in salaries and wages and a \$71.6 million increase in benefit costs. The increase in the costs attributable to salaries and wages was due primarily to an increase in the number of full-time employees and increases in our employees' wages. Our average number of full-time employees increased 14.2% during 2018 as compared to 2017 to support our shipment growth. Salaries and wages also increased as a result of higher performance-based compensation and annual wage increases provided to our employees at the beginning of both September 2018 and September 2017. In addition, our costs were also impacted by productivity declines in our platform and P&D operations related to training of our new employees. Although our costs increased, our aggregate productive labor costs as a percent of revenue improved to 27.0% in 2018 compared to 28.3% in 2017. Our indirect salaries and wages as a percent of revenue also improved to 11.5% in 2018, compared to 12.0% in 2017.

Employee benefit costs increased \$71.6 million or 15.9%, due primarily to the increase in our average number of full-time employees, enhancements to our employees' paid time off benefits implemented in 2018, and higher 401(k) benefits directly linked to the increase in our net income. The change in our benefit costs was also impacted by a decrease in the costs of certain retirement benefits directly linked to the market price of our common stock, and lower workers' compensation cost per employee in 2018 as compared to 2017. As a percent of salaries and wages, our benefit costs increased to 33.5% in 2018 compared to 33.2% in 2017.

Operating supplies and expenses increased \$109.2 million, or 28.6% in 2018 as compared to 2017, due primarily to increased costs of diesel fuel. The cost of diesel fuel, excluding fuel taxes, represents the largest component of operating supplies and expenses, and can vary based on both average price per gallon and consumption. The increase in our diesel fuel costs, excluding fuel taxes, was due primarily to a 24.9% increase in our average cost per gallon of diesel fuel during 2018. In addition, our gallons consumed increased 10.8% in 2018 as compared to 2017 due primarily to an 11.1% increase in linehaul and P&D miles driven. We do not use diesel fuel hedging instruments; therefore our costs are subject to market price fluctuations.

Depreciation and amortization increased \$24.6 million, or 12.0%, due primarily to the assets acquired as part of our 2017 and 2018 capital expenditure programs. We believe depreciation will continue to increase based on our 2019 capital expenditure program. While our investments in real estate, equipment, and technology can increase our costs in the short-term, we believe these investments are necessary to support our continued long-term growth and strategic initiatives.

Our effective tax rate in 2018 was 25.7% as compared to 19.5% in 2017. Our provision for income taxes in 2017 included a \$104.9 million income tax benefit resulting from the revaluation of our deferred tax liabilities in connection with the passage of the Tax Act in December 2017. The Tax Act also lowered the federal statutory rate to 21% from 35% beginning in 2018. Our effective tax rate generally exceeds the federal statutory rate due to the impact of state taxes and, to a lesser extent, certain other non-deductible items.

2017 Compared to 2016

Key financial and operating metrics for 2017 and 2016 are presented below:

	2017	2016	Change	% Change
Work days	253	254	(1)	(0.4)
Revenue (in thousands)	\$3,358,112	\$2,991,517	\$366,595	12.3
Operating ratio	82.9	% 83.8	%	
Net income (in thousands)	\$463,774	\$295,765	\$168,009	56.8
Diluted earnings per share	\$5.63	\$3.56	\$2.07	58.1
LTL tons (in thousands)	8,519	7,931	588	7.4
LTL shipments (in thousands)	10,736	10,148	588	5.8
LTL weight per shipment (lbs.)	1,587	1,563	24	1.5
LTL revenue per hundredweight	\$19.39	\$18.51	\$0.88	4.8
LTL revenue per shipment	\$307.66	\$289.36	\$18.30	6.3
LTL revenue per intercity mile	\$5.46	\$5.09	\$0.37	7.3
LTL intercity miles (in thousands)	605,204	576,953	28,251	4.9
Average length of haul (miles)	917	928	(11)	(1.2)

Revenue

Revenue increased \$366.6 million, or 12.3% as compared to 2016, due to a \$364.0 million increase in LTL revenue and a \$2.6 million increase in non-LTL revenue. LTL revenue was higher in 2017 due to increases in both LTL tons and yield. The 7.4% increase in LTL tons during 2017 resulted from a 5.8% increase in LTL shipments and a 1.5% increase in LTL weight per shipment as compared to 2016. We believe our tonnage growth in 2017 was driven by a stronger economic environment and market share gains resulting from increased demand for the consistent levels of premium service that we provide to our customers.

LTL revenue per hundredweight increased 4.8% to \$19.39 in 2017 as compared to 2016, despite the downward pressure on this metric created by the increase in our LTL weight per shipment and the decline in our average length of haul. We believe this increase in our LTL revenue per hundredweight reflected our continued focus on yield management which benefited from a favorable pricing environment. Our LTL revenue and yield were also positively impacted by an increase in fuel surcharges in 2017 as compared to 2016. Excluding fuel surcharges, LTL revenue per hundredweight increased 2.9% in 2017 as compared to 2016.

Most of our tariffs and contracts provide for a fuel surcharge that is generally indexed to the DOE's published diesel fuel prices that reset each week. Our fuel surcharges are designed to offset fluctuations in the cost of petroleum-based products and are one of the many components included in the overall negotiated price we charge for our services. As a percent of revenue, fuel surcharges increased to 11.1% in 2017 from 9.5% in 2016. This increase was due primarily to an increase in the average price per gallon for diesel fuel during 2017 as compared to 2016. We regularly monitor the components of our pricing, including base freight rates and fuel surcharges. We also address any individual account profitability issues with our customers as part of our effort to minimize the negative impact on our profitability that would likely result from a rapid and significant change in any of our operating expenses.

Operating Costs and Other Expenses

Salaries, wages and benefits increased \$150.4 million, or 9.1% in 2017, due to a \$122.3 million increase in salaries and wages and a \$28.1 million increase in benefit costs. The increase in the costs attributable to salaries and wages was due primarily to the 3.0% increase in the average number of full-time employees in 2017, annual wage increases provided to our employees in September 2016 and 2017 and higher performance-based compensation linked to our operating results. In addition, we paid a special bonus to all non-executive employees in December 2017 following passage of the Tax Act that totaled \$9.8 million. Although our costs increased, our aggregate productive labor costs as a percent of revenue decreased to 28.3% for 2017 from 28.9% for 2016 and our other indirect salaries and wages as a percent of revenue decreased to 12.0% for 2017 from 12.2% for 2016.

Employee benefit costs increased \$28.1 million or 6.7%, due primarily to an increase in our average number of full-time employees and higher wage rates, which led to higher payroll-related taxes and paid-time-off benefits. Our employee benefit costs also increased for certain retirement benefit plans directly linked to the improvement in our net income and the share price of our common stock. Our group health costs and workers' compensation expenses decreased as a percent of salaries and wages, which contributed to the overall improvement in total employee benefit costs as a percent of salaries and wages to 33.2% for 2017 from 34.2% for 2016.

Operating supplies and expenses increased \$58.8 million, or 18.2% in 2017 as compared to 2016, due primarily to increased costs of diesel fuel. The cost of diesel fuel, excluding fuel taxes, represents the largest component of operating supplies and expenses, and can vary based on both average price per gallon and consumption. The increase in our diesel fuel costs, excluding fuel taxes, was

due primarily to a 23.5% increase in our average cost per gallon of diesel fuel during 2017. In addition, our gallons consumed increased 4.3% in 2017 as compared to 2016 due primarily to a 4.5% increase in linehaul and P&D miles driven. We do not use diesel fuel hedging instruments, and our costs are therefore subject to market price fluctuations.

General supplies and expenses increased \$21.1 million, or 24.4% in 2017 as compared to 2016. The increase was due primarily to an increase in our advertising and marketing costs and higher costs for technology and related support.

Depreciation and amortization increased \$15.9 million, or 8.4% due primarily to the assets acquired as part of our 2016 and 2017 capital expenditure programs. These costs, however, were relatively consistent as a percent of revenue between the periods compared. While our investments in real estate, equipment and technology can increase our costs in the short-term, we believe these investments are necessary to support our continued growth and strategic initiatives.

Our effective tax rate in 2017 was 19.5% as compared to 38.1% in 2016. Our provision for income taxes in 2017 included a \$104.9 million income tax benefit resulting from the revaluation of our deferred tax liabilities in connection with the passage of the Tax Act in December 2017. In addition, our effective tax rates for 2017 and 2016 were favorably impacted by various tax credits. Our effective tax rate generally exceeds the federal statutory rate due to the impact of state taxes and, to a lesser extent, certain other non-deductible items.

Liquidity and Capital Resources

A summary of our cash flows is presented below:

(In thousands)	2018	2017	2016
Cash and cash equivalents at beginning of year	\$ 127,462	\$ 10,171	\$ 11,472
Cash flows provided by (used in):			
Operating activities	900,116	536,294	565,583
Investing activities	(580,391)	(367,746)	(407,400)
Financing activities	(256,905)	(51,257)	(159,484)
Increase (decrease) in cash and cash equivalents	62,820	117,291	(1,301)
Cash and cash equivalents at end of year	\$ 190,282	\$ 127,462	\$ 10,171

The change in our cash flows provided by operating activities during 2018 as compared to 2017 was impacted by an increase in income before income taxes of \$239.7 million, an increase in depreciation and amortization of \$24.6 million, a decrease in income taxes paid of \$29.4 million and fluctuations in certain working capital accounts.

The change in our cash flows provided by operating activities during 2017 was impacted by an increase in income before income taxes of \$98.2 million and an increase in depreciation and amortization of \$15.9 million. These increases were more than offset by an increase in income taxes paid of \$76.0 million and other fluctuations in certain working capital accounts.

The changes in cash flows used in investing activities for all periods were due to the timing of equipment purchases under our capital expenditure plans. Changes in our capital expenditures are more fully described below in “Capital Expenditures.”

The changes in cash flows used in financing activities for all periods were due primarily to fluctuations in capital returned to shareholders and fluctuations in our long-term debt, which includes our senior unsecured revolving line of credit. Our financing arrangements are more fully described below under “Financing Agreements.” Our return of capital to shareholders is more fully described below under “Stock Repurchase Program” and “Dividends to Shareholders,” respectively.

We have three primary sources of available liquidity: cash and cash equivalents, cash flows from operations and available borrowings under our senior unsecured revolving credit agreement, which is described below. We believe we also have sufficient access to debt and equity markets to provide other sources of liquidity, if needed.

Capital Expenditures

The table below sets forth our net capital expenditures for property and equipment, including those obtained through capital leases, for the years ended December 31, 2018, 2017 and 2016:

(In thousands)	Year Ended December 31,		
	2018	2017	2016
Land and structures	\$247,291	\$179,150	\$161,646
Tractors	185,209	123,152	114,166
Trailers	98,835	37,424	94,040
Technology	20,309	19,329	18,428
Other equipment and assets	36,648	23,070	29,661
Less: Proceeds from sales	(6,983)	(12,240)	(10,541)
Total	\$581,309	\$369,885	\$407,400

Our capital expenditures varied based upon the projected increase in the number and size of our service center facilities to support our plan for long-term growth, our planned tractor and trailer replacement cycle and forecasted tonnage and shipment growth. Expenditures for land and structures can be dependent upon the availability of land in the geographic areas where we are looking to expand. We expect to continue to maintain a high level of capital expenditures in order to support our long-term plan for market share growth.

We currently estimate capital expenditures will be approximately \$490 million for the year ending December 31, 2019. Approximately \$220 million is allocated for the purchase of service center facilities, construction of new service center facilities or expansion of existing service center facilities, subject to the availability of suitable real estate and the timing of construction projects; approximately \$175 million is allocated for the purchase of tractors and trailers; and approximately \$95 million is allocated for investments in technology and other assets. We expect to fund these capital expenditures primarily through cash flows from operations, our existing cash and cash equivalents and the use of our senior unsecured revolving credit facility. We believe our current sources of liquidity will be sufficient to satisfy our expected capital expenditures.

Stock Repurchase Program

Our stock repurchase program, which was previously announced on May 23, 2016 and pursuant to which we could repurchase up to an aggregate of \$250.0 million of our outstanding common stock, expired in accordance with its terms during the second quarter of 2018. On May 17, 2018, we announced that our Board of Directors had approved a new two-year stock repurchase program authorizing us to repurchase up to an aggregate of \$250.0 million of our outstanding common stock (the “2018 Repurchase Program”). Under the 2018 Repurchase Program, which became effective upon the expiration of our prior stock repurchase program, we may repurchase shares from time to time in open market purchases or through privately negotiated transactions. Shares of our common stock repurchased under our repurchase programs are canceled at the time of repurchase and are classified as authorized but unissued shares of our common stock.

During the years ended December 31, 2018, 2017 and 2016, we repurchased 1,175,565, 91,921 and 2,062,841 shares of our common stock under our repurchase programs for an aggregate of \$163.3 million, \$8.0 million and \$130.3 million, respectively. As of December 31, 2018, we had \$131.7 million remaining authorized under the 2018 Repurchase Program.

Dividends to Shareholders

Our Board of Directors declared a cash dividend of \$0.13 per share for each quarter of 2018 and a cash dividend of \$0.10 per share for each quarter of 2017. We did not declare or pay any dividends on our common stock during 2016.

On February 7, 2019, we announced that our Board of Directors had declared a cash dividend of \$0.17 per share of our common stock. The dividend is payable on March 20, 2019 to shareholders of record at the close of business on March 6, 2019. Although we intend to pay a quarterly cash dividend on our common stock for the foreseeable future, the declaration and amount of any future dividend is subject to approval by our Board of Directors, and is restricted by applicable state law limitations on distributions to shareholders as well as certain covenants under our revolving credit facility. We anticipate that any future quarterly cash dividends will be funded through cash flows from operations and, if needed, borrowings under our revolving credit facility.

Financing Agreements

We had one unsecured senior note agreement with a principal amount outstanding of \$45.0 million and \$95.0 million at December 31, 2018 and December 31, 2017, respectively. Our unsecured senior note agreement called for a scheduled principal

payment of \$50.0 million, which was paid on January 3, 2018. A second scheduled principal payment of \$45.0 million is due on January 3, 2021. Interest rates on the January 3, 2018 and January 3, 2021 scheduled principal payments were and are 4.00% and 4.79%, respectively. The effective average interest rate on our outstanding senior note agreement was 4.79% and 4.37% at December 31, 2018 and December 31, 2017, respectively.

On December 15, 2015, we entered into an amended and restated credit agreement with Wells Fargo Bank, National Association (“Wells Fargo”) serving as administrative agent for the lenders (the “Credit Agreement”). The Credit Agreement originally provided for a five-year, \$250.0 million senior unsecured revolving line of credit and a \$100.0 million accordion feature, which if fully exercised and approved, would expand the total borrowing capacity up to an aggregate of \$350.0 million.

On September 9, 2016, we exercised a portion of the accordion feature and entered into an amendment to the Credit Agreement to increase the aggregate commitments from existing lenders by \$50.0 million to an aggregate of \$300.0 million. Of the \$300.0 million line of credit commitments under the Credit Agreement, as amended, up to \$100.0 million may be used for letters of credit.

At our option, borrowings under the Credit Agreement bear interest at either: (i) LIBOR plus an applicable margin (based on our ratio of net debt-to-total capitalization) that ranges from 1.0% to 1.50%; or (ii) a Base Rate plus an applicable margin (based on our ratio of net debt-to-total capitalization) that ranges from 0.0% to 0.5%. Letter of credit fees equal to the applicable margin for LIBOR loans are charged quarterly in arrears on the daily average aggregate stated amount of all letters of credit outstanding during the quarter. Commitment fees ranging from 0.125% to 0.2% (based upon the ratio of net debt-to-total capitalization) are charged quarterly in arrears on the aggregate unutilized portion of the Credit Agreement.

For periods covered under the Credit Agreement, the applicable margin on LIBOR loans and letter of credit fees were 1.0% and commitment fees were 0.125%.

The amounts outstanding and available borrowing capacity under the Credit Agreement are presented below:

	December 31,	
(In thousands)	2018	2017
Facility limit	\$ 300,000	\$ 300,000
Line of credit borrowings	—	—
Outstanding letters of credit	(61,455)	(71,368)
Available borrowing capacity	\$ 238,545	\$ 228,632

With the exception of borrowings pursuant to the Credit Agreement, interest rates are fixed on all of our debt instruments. Therefore, short-term exposure to fluctuations in interest rates is limited to our line of credit facility. We do not currently use interest rate derivative instruments to manage exposure to interest rate changes.

Our senior note agreement and Credit Agreement contain customary covenants, including financial covenants that require us to observe a maximum ratio of debt to total capital and a minimum fixed charge coverage ratio. Any future wholly-owned material domestic subsidiaries of the Company would be required to guarantee payment of all of our obligations under these agreements. The Credit Agreement also includes a provision limiting our ability to make restricted payments, including dividends and payments for share repurchases, unless, among other conditions, no defaults or events of default are ongoing (or would be caused by such restricted payment). We were in compliance

with all covenants in our outstanding debt instruments for the period ended December 31, 2018.

A significant decrease in demand for our services could limit our ability to generate cash flow and affect our profitability. Most of our debt agreements have covenants that require stated levels of financial performance, which if not achieved could cause acceleration of the payment schedules. As of December 31, 2018, we were in compliance with these covenants. We do not anticipate a significant decline in business levels or financial performance that would cause us to violate any such covenants in the future, and we believe the combination of our existing Credit Agreement along with our additional borrowing capacity will be sufficient to meet foreseeable seasonal and long-term capital needs.

Contractual Obligations

The following table summarizes our significant contractual obligations as of December 31, 2018:

Contractual Obligations (1)	Payments due by period				More than 5 years
	Total	Less than 1 year	1-3 years	3-5 years	
(In thousands)					
Senior Notes	\$51,467	\$2,156	\$49,311	\$—	\$—
Operating lease obligations	108,709	12,502	23,560	16,026	56,621
Purchase obligations	196,625	193,429	2,203	993	—
Total	\$356,801	\$208,087	\$75,074	\$17,019	\$56,621

(1) Contractual obligations include principal and interest on our senior notes; operating leases consisting primarily of real estate and automotive leases; and purchase obligations relating to non-cancellable purchase orders for equipment scheduled for delivery in 2019 and information technology agreements. Please refer to the information regarding interest rates and the balance on our revolving credit facility in this section above and also in Note 2 of the Notes to the Financial Statements included in Item 8 of this report.

Critical Accounting Policies

In preparing our financial statements, we apply the following critical accounting policies that we believe affect our judgments and estimates of amounts recorded in certain assets, liabilities, revenue and expenses. These critical accounting policies are further described in Note 1 of the Notes to the Financial Statements included in Item 8 of this report.

Revenue Recognition

Our revenue is generated from providing transportation and related services to customers in accordance with the bill of lading (“BOL”) contract, our general tariff provisions and contractual agreements. Generally, our performance obligations begin when we receive a BOL from a customer and are satisfied when we complete the delivery of a shipment and related services. We recognize revenue for our performance obligations under our customer contracts over time, as our customers receive the benefits of our services in accordance with Accounting Standards Update (“ASU”) 2014-09. With respect to services not completed at the end of a reporting period, we use a percentage of completion method to allocate the appropriate revenue to each separate reporting period. Under this method, we develop a factor for each uncompleted shipment by dividing the actual number of days in transit at the end of a reporting period by that shipment’s standard delivery time schedule. This factor is applied to the total revenue for that shipment and revenue is allocated between reporting periods accordingly. Payment terms vary by customer and are short-term in nature.

Allowances for Uncollectible Accounts and Revenue Adjustments

We maintain an allowance for uncollectible accounts for estimated losses resulting from the failure of our customers to make required payments. We estimate this allowance by analyzing the aging of our customer receivables, our historical loss experience and other trends and factors affecting the credit risk of our customers. We determine customer receivables to be past due when payment has not been received by the invoice due date. Write-offs occur

when we determine an account to be uncollectible and could differ from our allowance estimate as a result of factors such as changes in the overall economic environment or risks surrounding our customers. Additional allowances may be required if the financial condition of our customers were to deteriorate, resulting in an impairment of their ability to make payments. We periodically review the underlying assumptions in our estimate of the allowance for uncollectible accounts to ensure that the allowance reflects the most recent trends and factors.

We also maintain an allowance for estimated revenue adjustments resulting from future billing corrections, customer allowances, money-back service guarantees and other miscellaneous revenue adjustments. These revenue adjustments are recorded in our revenue from operations. We use historical experience, trends and current information to update and evaluate these estimates.

Claims and Insurance Accruals

Claims and insurance accruals reflect the estimated cost of claims for cargo loss and damage, BIPD, workers' compensation, group health and dental. The related costs are charged to insurance and claims expense except for workers' compensation, group health and dental, which are charged to employee benefits expense.

Insurers providing excess coverage above a company's SIR or deductible levels typically adjust their premiums to cover insured losses and for other market factors. As a result, we periodically evaluate our SIR and deductible levels to determine the most cost-efficient balance between our exposure and excess coverage.

In establishing accruals for claims and expenses, we evaluate and monitor each claim individually, and we use factors such as historical claims development experience, known trends and third-party estimates to determine the appropriate reserves for potential liability. We believe the assumptions and methods used to estimate these liabilities are reasonable; however, any changes in the severity of previously-reported claims, significant changes in medical costs and regulatory changes affecting the administration of our plans could significantly impact the determination of appropriate reserves in future periods.

Property and Equipment

Property and equipment are recorded at cost and depreciated on a straight-line basis over their estimated economic lives. We use historical experience, certain assumptions and estimates in determining the economic life of each asset. When indicators of impairment exist, we review property and equipment for impairment due to changes in operational and market conditions, and we adjust the carrying value and economic life of any impaired asset as appropriate.

Estimated economic lives for structures are 7 to 30 years, revenue equipment is 4 to 15 years, other equipment is 2 to 20 years, and leasehold improvements are the lesser of the economic life of the leasehold improvement or the remaining life of the lease. The use of different assumptions, estimates or significant changes in the resale market for our equipment could result in material changes in the carrying value and related depreciation of our assets.

Inflation

Most of our expenses are affected by inflation, which typically results in increased operating costs. In response to fluctuations in the cost of petroleum products, particularly diesel fuel, we generally include a fuel surcharge in our tariffs and contractual agreements. The fuel surcharge is designed to offset the cost of diesel fuel above a base price and fluctuates as diesel fuel prices change from the base, which is generally indexed to the DOE's published fuel prices that reset each week. Volatility in the price of diesel fuel, independent of inflation, has impacted our business, as described in this report. However, we do not believe inflation has had a material effect on our results of operations for any of the past three years.

Related Party Transactions

Family Relationships

Each of Earl E. Congdon, David S. Congdon and John R. Congdon, Jr. are related to one another and served in various management positions and/or on our Board of Directors during 2018. Our employment agreement with Earl E. Congdon (which expired in accordance with its terms on November 1, 2018) and our employment agreement with David S. Congdon are incorporated by reference as exhibits to this Annual Report on Form 10-K. We regularly disclose the amount of compensation that we pay to these individuals, as well as the compensation paid to any of their family members employed by us that from time to time may require disclosure, in the proxy statement for our Annual Meeting of Shareholders.

Transactions with Old Dominion Truck Leasing, Inc.

Prior to 2018, we utilized the services of Old Dominion Truck Leasing, Inc. ("Leasing"), leased property to Leasing, and collaborated with Leasing for the purchase of certain equipment and fuel. Leasing, which historically had been primarily engaged in the business of leasing tractors, trailers and other vehicles as well as providing contract dedicated fleet services, was acquired by Penske Truck Leasing during the third quarter of 2017 (the "Penske Acquisition"). Prior to the Penske Acquisition, John R. Congdon, Jr. served as Leasing's Chairman of the Board and CEO, and Earl E. Congdon and David S. Congdon each served on Leasing's board of directors.

Our business relationships with Leasing, as well as the positions held at Leasing by John R. Congdon, Jr., Earl E. Congdon and David S. Congdon, ceased in the third quarter of 2017 in connection with the Penske Acquisition. Prior to the Penske Acquisition, we purchased \$110,000 and \$254,000 of maintenance and other services from Leasing in 2017 and 2016, respectively. In addition, we received \$6,000 and \$12,000 from Leasing for the rental of property in 2017 and 2016, respectively.

Audit Committee Approval

The Audit Committee of our Board of Directors reviewed and approved all of the related person transactions described above in accordance with our Related Person Transactions Policy.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk represents the risk of loss that may impact our financial position, results of operations and cash flows due to adverse changes in financial market prices and rates.

We are exposed to interest rate risk directly related to loans, if any, under our Credit Agreement, which have variable interest rates. A 100 basis point increase in the average interest rate on this agreement would have no material effect on our operating results. We have established policies and procedures to manage exposure to market risks and use major institutions that we believe are creditworthy to minimize credit risk.

We are exposed to market risk for investments relating to Company-owned life insurance contracts on certain current and former employees. The cash surrender value for variable life insurance contracts was \$45.7 million of the \$47.7 million, and \$50.9 million of the \$53.1 million, of aggregate cash surrender values for all life insurance contracts included on our Balance Sheets at December 31, 2018 and 2017, respectively. The underlying investments in our variable life insurance contracts expose us to market fluctuations. To provide a meaningful assessment of the market risk for investments relating to Company-owned life insurance contracts, we performed a sensitivity analysis using a 10% change in market value in those investments on December 31, 2018. A 10% change in market value would have caused a \$4.6 million and a \$5.1 million impact on our pre-tax income in 2018 and 2017, respectively.

We are exposed to market risk for awards previously granted under our employee and director phantom stock plans. The liability for the unsettled outstanding awards is remeasured at the end of each reporting period based on the price of our common stock. The total liability for unsettled awards granted under these phantom stock plans totaled \$57.2 million and \$56.6 million at December 31, 2018 and 2017, respectively. To provide a meaningful assessment of market risk for our employee and director phantom stock plans, we performed a sensitivity analysis using a 10% change in the price of our common stock at December 31, 2018. A 10% change in market value of our common stock would have caused a \$5.7 million impact on our operating income with respect to these plans in both 2018 and 2017, respectively.

We are also exposed to commodity price risk related to diesel fuel prices, and we manage our exposure to that risk primarily through the application of fuel surcharges to our customers.

For further discussion related to these risks, see Notes 2 and 8 of the Notes to the Financial Statements included in Item 8, "Financial Statements and Supplementary Data" and Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations."

NOTES TO THE FINANCIAL STATEMENTS

Note 1. Significant Accounting Policies

Business

We are a leading, less-than-truckload (“LTL”), union-free motor carrier providing regional, inter-regional and national LTL services through a single integrated organization. Our service offerings, which include expedited transportation, are provided through an expansive network of service centers located throughout the United States. Through strategic alliances, we also provide LTL services throughout North America. In addition to our core LTL services, we offer a range of value-added services including container drayage, truckload brokerage and supply chain consulting.

We have one operating segment and no single customer exceeds 5% of our revenue. The composition of our revenue is summarized below:

	Year Ended December 31,		
(In thousands)	2018	2017	2016
LTL services	\$3,982,658	\$3,303,611	\$2,939,572
Other services	61,037	54,501	51,945
Total revenue	\$4,043,695	\$3,358,112	\$2,991,517

Basis of Presentation

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Certain amounts in prior years have been reclassified to conform prior years’ financial statements to the current presentation.

Unless the context requires otherwise, references in these Notes to “Old Dominion,” the “Company,” “we,” “us” and “our” refer to Old Dominion Freight Line, Inc.

Revenue and Expense Recognition

We recognize revenue based upon when our transportation and related services have been completed in accordance with the bill of lading (“BOL”) contract, our general tariff provisions and contractual agreements with our customers. Generally, our performance obligations begin when we receive a BOL from a customer and are satisfied when we complete the delivery of a shipment and related services. We recognize revenue for our performance obligations under our customer contracts over time, as our customers receive the benefits of our services in accordance with Accounting Standards Update (“ASU”) 2014-09. With respect to services not completed at the end of a reporting period, we use a percentage of completion method to allocate the appropriate revenue to each separate reporting period. Under this

method, we develop a factor for each uncompleted shipment by dividing the actual number of days in transit at the end of a reporting period by that shipment's standard delivery time schedule. This factor is applied to the total revenue for that shipment and revenue is allocated between reporting periods accordingly. Payment terms vary by customer and are short-term in nature.

Expenses are recognized when incurred.

Allowances for Uncollectible Accounts and Revenue Adjustments

We maintain an allowance for uncollectible accounts for estimated losses resulting from the inability of our customers to make required payments. We estimate this allowance by analyzing the aging of our customer receivables, our historical loss experience and other trends and factors affecting the credit risk of our customers. Write-offs occur when we determine an account to be uncollectible and could differ from our allowance estimate as a result of factors such as changes in the overall economic environment or risks surrounding our customers. Additional allowances may be required if the financial condition of our customers were to deteriorate, resulting in an impairment of their ability to make payments. We periodically review the underlying assumptions in our estimate of the allowance for uncollectible accounts to ensure that the allowance reflects the most recent trends and factors.

We also maintain an allowance for estimated revenue adjustments resulting from future billing corrections, customer allowances, money-back service guarantees and other miscellaneous revenue adjustments. These revenue adjustments are recorded in

OLD DOMINION FREIGHT LINE, INC.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

our revenue from operations. We use historical experience, trends, current information and anticipated changes to future performance to update and evaluate these estimates.

Credit Risk

Financial instruments that potentially subject us to concentrations of credit risk consist principally of customer receivables. We perform initial and ongoing credit evaluations of our customers to minimize credit risk. We generally do not require collateral but may require prepayment of our services under certain circumstances. Credit risk is generally diversified due to the large number of entities comprising our customer base and their dispersion across many different industries and geographic regions.

Cash and Cash Equivalents

We consider cash on hand and deposits in banks along with certificates of deposit and short-term marketable securities with original maturities of three months or less as cash and cash equivalents.

Property and Equipment

Property and equipment are stated at cost. Major additions and improvements are capitalized, while maintenance and repairs that do not improve or extend the lives of the respective assets are charged to expense as incurred. We capitalize the cost of tires mounted on purchased revenue equipment as a part of the total equipment cost. Subsequent replacement tires are expensed at the time those tires are placed in service. We assess the realizable value of our long-lived assets and evaluate such assets for impairment whenever events or changes in circumstances indicate the carrying amount of an asset may not be recoverable.

Depreciation of property and equipment is calculated using the straight-line method over the estimated useful lives of the related assets. The following table provides the estimated useful lives by asset type:

Structures	7 to 30 years
Revenue equipment	4 to 15 years
Other equipment	2 to 20 years
Leasehold improvements	Lesser of economic life or life of lease

Depreciation expense, which includes the amortization of capital leases, was \$230.4 million, \$205.6 million and \$189.6 million for 2018, 2017 and 2016, respectively.

Goodwill

Intangible assets have been acquired in connection with business combinations and represent goodwill. Goodwill is calculated as the excess cost over the fair value of assets acquired and is not subject to amortization. We review goodwill annually for impairment as a single reporting unit, unless circumstances dictate more frequent assessments, in accordance with ASU 2011-08, Testing Goodwill for Impairment. ASU 2011-08 permits an initial assessment,

commonly referred to as “step zero”, of qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount and also provides a basis for determining whether it is necessary to perform the goodwill impairment test required by Accounting Standards Codification (“ASC”) Topic 350.

We performed the qualitative assessment of goodwill on our annual measurement date of October 1, 2018 and determined that it was more likely than not that the fair value of our reporting unit would be greater than its carrying amount. Therefore, we determined it was not necessary to perform the quantitative goodwill impairment test. Furthermore, there has been no historical impairment of our goodwill.

Claims and Insurance Accruals

As of December 31, 2018, we maintained a self-insured retention (“SIR”) of \$2.75 million per occurrence for bodily injury and property damage (“BIPD”) claims, plus a one-time, \$2.5 million aggregate corridor deductible applicable per policy period to any claim that exceeds \$5.0 million and occurs after March 30, 2016, and a deductible of \$1.0 million per occurrence for workers’ compensation claims. We also had a SIR of \$1.0 million per covered person paid during 2018 for group health claims.

Claims and insurance accruals reflect the estimated cost of claims for cargo loss and damage, BIPD, workers’ compensation, group health and group dental. These accruals include amounts for future claims development and claims incurred but not reported, which are primarily based on historical claims development experience. The related cost for cargo loss and damage and BIPD is

OLD DOMINION FREIGHT LINE, INC.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

charged to “Insurance and claims” on our Statements of Operations, while the related costs for workers’ compensation, group health and group dental are charged to “Salaries, wages and benefits” on our Statements of Operations.

Our liability for claims and insurance totaled \$135.8 million and \$127.6 million at December 31, 2018 and 2017, respectively. The long-term portions of those reserves were \$82.5 million and \$77.7 million for 2018 and 2017, respectively, which were included in “Other non-current liabilities” on our Balance Sheets.

Share-Based Compensation

We have various share-based compensation plans for our employees and non-employee directors. Our share-based compensation includes awards of phantom stock and restricted stock which are accounted for under ASC Topic 718, Compensation - Stock Compensation. All share-based compensation expense is presented in “Salaries, wages and benefits” for employees and “Miscellaneous expenses, net” for non-employee directors in the accompanying Statements of Operations. Total compensation expense (benefit) recognized for all share-based compensation awards was \$10.7 million, \$22.7 million and \$16.2 million during 2018, 2017, and 2016, respectively. The total tax benefit recognized related to these awards was (\$3.2) million, (\$9.0) million and (\$6.3) million during 2018, 2017, and 2016, respectively.

Awards of phantom stock are accounted for as a liability under ASC Topic 718 and changes in the fair value of our liability are recognized as compensation cost over the requisite service period for the percentage of requisite service rendered each period. Changes in the fair value of the liability that occur after the requisite service period are recognized as compensation cost during the period in which the changes occur. We remeasure the liability for the outstanding awards at the end of each reporting period and the compensation cost is based on the change in fair market value for each reporting period.

Awards of restricted stock are accounted for as equity under ASC Topic 718. Compensation cost for restricted stock awards is measured at the fair market value of our common stock on the grant date. We recognize compensation cost, net of estimated forfeitures, on a straight-line basis over the requisite service period of each award.

Advertising

The costs of advertising our services are expensed as incurred and are included in “General supplies and expenses” on our Statements of Operations. Advertising costs charged to expense totaled \$28.2 million, \$27.3 million and \$20.5 million for 2018, 2017 and 2016, respectively.

Fair Values of Financial Instruments

The carrying values of financial instruments in current assets and current liabilities approximate their fair value due to the short maturities of these instruments. The carrying value of our total long-term debt, including current maturities, was \$45.0 million and \$95.0 million at December 31, 2018 and 2017, respectively. The estimated fair value of our total long-term debt, including current maturities, was \$45.6 million and \$97.1 million at December 31, 2018 and 2017, respectively. The fair value measurement of our senior notes was determined using a discounted cash flow analysis that factors in current market yields for comparable borrowing arrangements under our credit profile. Since this methodology is based upon market yields for comparable arrangements, the measurement is categorized as Level 2 under the three-level fair value hierarchy as established by the Financial Accounting Standards Board (the “FASB”).

Stock Repurchase Program

Our stock repurchase program, which was previously announced on May 23, 2016 and pursuant to which we could repurchase up to an aggregate of \$250.0 million of our outstanding common stock, expired in accordance with its terms during the second quarter of 2018. On May 17, 2018, we announced that our Board of Directors had approved a new two-year stock repurchase program authorizing us to repurchase up to an aggregate of \$250.0 million of our outstanding common stock (the “2018 Repurchase Program”). Under the 2018 Repurchase Program, which became effective upon the expiration of our prior stock repurchase program, we may repurchase shares from time to time in open market purchases or through privately negotiated transactions. Shares of our common stock repurchased under our repurchase programs are canceled at the time of repurchase and are classified as authorized but unissued shares of our common stock. As of December 31, 2018, we had \$131.7 million remaining authorized under the 2018 Repurchase Program.

Comprehensive Income

The Company has no components of other comprehensive income. Accordingly, net income equals comprehensive income for all periods presented in this report.

OLD DOMINION FREIGHT LINE, INC.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

Recent Accounting Pronouncements

In May 2014, the FASB issued ASU 2014-09, “Revenue from Contracts with Customers” (Topic 606). This ASU supersedes the previous revenue recognition requirements in Accounting Standards Codification Topic 605 – Revenue Recognition. The guidance provides a five-step analysis to determine when and how revenue is recognized and further enhances disclosure requirements. Transition methods under ASU 2014-09 must be through (i) retrospective application to each prior reporting period presented, or (ii) modified retrospective application with a cumulative effect adjustment at the date of initial application.

Our revenue is generated from providing transportation and related services to customers in accordance with the bill of lading (“BOL”) contract, our general tariff provisions and contractual agreements. Generally, our performance obligations begin when we receive a BOL from a customer and are satisfied when we complete the delivery of a shipment and related services. We recognize revenue for our performance obligations under our customer contracts over time, as our customers receive the benefits of our services in accordance with ASU 2014-09. With respect to services not completed at the end of a reporting period, we use a percentage of completion method to allocate the appropriate revenue to each separate reporting period. Under this method, we develop a factor for each uncompleted shipment by dividing the actual number of days in transit at the end of a reporting period by that shipment’s standard delivery time schedule. This factor is applied to the total revenue for that shipment and revenue is allocated between reporting periods accordingly. Payment terms vary by customer and are short-term in nature.

We adopted ASU 2014-09 as of January 1, 2018 using the modified retrospective application. The adoption of this standard did not have a material impact on how we recognize revenue or to our financial position, results of operations or cash flows.

In February 2016, the FASB issued ASU 2016-02, “Leases” (Topic 842). This ASU requires a lessee to recognize a right-of-use asset and a lease liability on its balance sheet for most operating leases. ASU 2016-02 is effective for annual and interim periods beginning after December 15, 2018, including interim periods within those fiscal years. In July 2018, the FASB issued ASU 2018-11, “Leases (Topic 842): Targeted Improvements,” which provides companies with an additional optional transition method to apply the new standard to leases in effect at the adoption date through a cumulative effect adjustment. We will adopt the new lease standard as of January 1, 2019 using this optional transition method. We plan to elect the package of practical expedients referenced in ASU 2016-02, which permits companies to retain original lease identification and classification without reassessing initial direct costs for existing leases. We also plan to elect the practical expedient that exempts leases with an initial lease term of less than twelve months, as well as the practical expedient that allows companies to select, by class of underlying asset, not to separate lease and non-lease components. Our adoption of this standard is expected to result in the recognition of a right-of-use asset and a lease liability on our Balance Sheet of between \$65 million and \$70 million, with an immaterial impact, if any, on our Statement of Operations; however, our estimate is subject to change as we finalize our implementation. We are also implementing enhanced internal controls to comply with the reporting and disclosure requirements of the standard.

Note 2. Long-term Debt

Long-term debt consisted of the following:

(In thousands)	December 31,	
	2018	2017
Senior notes	\$45,000	\$95,000
Revolving credit facility	—	—
Total long-term debt	45,000	95,000
Less: Current maturities	—	(50,000)
Total maturities due after one year	\$45,000	\$45,000

We had one unsecured senior note agreement with an amount outstanding of \$45.0 million and \$95.0 million at December 31, 2018 and 2017, respectively. Our unsecured senior note agreement called for a scheduled principal payment of \$50.0 million, which was paid on January 3, 2018. A second scheduled principal payment of \$45.0 million is due on January 3, 2021. Interest rates on the January 3, 2018 and January 3, 2021 scheduled principal payments were 4.00% and 4.79%, respectively. The effective average interest rate on our outstanding senior note agreement was 4.79% and 4.37% at December 31, 2018 and 2017, respectively.

On December 15, 2015, we entered into an amended and restated credit agreement with Wells Fargo Bank, National Association (“Wells Fargo”) serving as administrative agent for the lenders (the “Credit Agreement”). The Credit Agreement originally provided

OLD DOMINION FREIGHT LINE, INC.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

for a five-year, \$250.0 million senior unsecured revolving line of credit and a \$100.0 million accordion feature, which if fully exercised and approved, would expand the total borrowing capacity up to an aggregate of \$350.0 million.

On September 9, 2016, we exercised a portion of the accordion feature and entered into an amendment to the Credit Agreement to increase the aggregate commitments from existing lenders by \$50.0 million to an aggregate of \$300.0 million. Of the \$300.0 million line of credit commitments under the Credit Agreement, as amended, up to \$100.0 million may be used for letters of credit.

At our option, borrowings under the Credit Agreement bear interest at either: (i) LIBOR plus an applicable margin (based on our ratio of net debt-to-total capitalization) that ranges from 1.0% to 1.50%; or (ii) a Base Rate plus an applicable margin (based on our ratio of net debt-to-total capitalization) that ranges from 0.0% to 0.5%. Letter of credit fees equal to the applicable margin for LIBOR loans are charged quarterly in arrears on the daily average aggregate stated amount of all letters of credit outstanding during the quarter. Commitment fees ranging from 0.125% to 0.2% (based upon the ratio of net debt-to-total capitalization) are charged quarterly in arrears on the aggregate unutilized portion of the Credit Agreement.

For each of the years ended December 31, 2018 and 2017, the applicable margin on LIBOR loans and letter of credit fees was 1.0% and commitment fees were 0.125%. There were \$61.5 million and \$71.4 million of outstanding letters of credit at December 31, 2018 and 2017, respectively.

The Credit Agreement includes a provision limiting our ability to make restricted payments, including dividends and payments for share repurchases, unless, among other conditions, no defaults or events of default under the Credit Agreement are ongoing (or would be caused by such restricted payment). Our senior note agreement and Credit Agreement contain customary covenants, including financial covenants that require us to observe a maximum ratio of debt to total capital and a minimum fixed charge coverage ratio. Any future wholly-owned material domestic subsidiaries of the Company would be required to guarantee payment of all of our obligations under these agreements.

As of December 31, 2018, our only long-term debt was \$45 million, which will mature in 2021.

Note 3. Leases

We lease certain assets under operating leases, which primarily consist of real estate leases for 32 of our 235 service center locations and automotive leases for our company cars at December 31, 2018. Certain operating leases provide for renewal options, which can vary by lease and are typically offered at their fair rental value. We have not made any residual value guarantees related to our operating leases; therefore, we have no corresponding liability recorded on our Balance Sheets.

Future minimum annual lease payments for assets under operating leases as of December 31, 2018 are as follows:

(In thousands)	Total
2019	\$ 12,502

2020	12,162
2021	11,398
2022	9,251
2023	6,775
Thereafter	56,621
	\$ 108,709

Aggregate expense under operating leases was \$12.6 million, \$14.1 million and \$13.8 million for 2018, 2017 and 2016, respectively. Certain operating leases include rent escalation provisions, which we recognize as expense on a straight-line basis. We did not have any assets under capital leases at each of December 31, 2018 and 2017.

OLD DOMINION FREIGHT LINE, INC.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

Note 4. Income Taxes

The components of the provision for income taxes are as follows:

(In thousands)	Year Ended December 31,		
	2018	2017	2016
Current:			
Federal	\$113,491	\$169,053	\$126,903
State	38,647	25,644	20,111
	152,138	194,697	147,014
Deferred:			
Federal	49,125	(81,551)	29,354
State	8,582	(1,088)	5,454
	57,707	(82,639)	34,808
Total provision for income taxes	\$209,845	\$112,058	\$181,822

The Tax Cuts and Jobs Act (the “Tax Act”) was enacted on December 22, 2017. The Tax Act reduced the U.S. federal corporate income tax rate from 35% to 21% and made several other changes to long-held tax rules. An income tax benefit of \$104.9 million was recorded in our provision for income taxes in the year ended December 31, 2017 to reflect the estimated impact of the Tax Act on our net deferred tax liabilities. In 2018, we completed our accounting for the effects of the Tax Act and no material changes in our initial estimate were required.

The following is a reconciliation of income tax expense calculated using the U.S. statutory federal income tax rate with our income tax expense for 2018, 2017 and 2016:

(In thousands)	Year Ended December 31,		
	2018	2017	2016
Tax provision at statutory rate	\$171,258	\$201,541	\$167,156
State income taxes, net of federal benefit	36,396	20,277	16,711
Revaluation of deferred taxes in connection with the			
Tax Act	—	(104,864)	—
Other, net	2,191	(4,896)	(2,045)
Total provision for income taxes	\$209,845	\$112,058	\$181,822

Deferred tax assets and liabilities, which are included in “Other assets” and “Deferred income taxes” on our Balance Sheets, consist of the following:

December 31,

(In thousands)	2018	2017
Deferred tax assets:		
Claims and insurance reserves	\$ 27,433	\$ 29,008
Accrued vacation	17,932	17,832
Deferred compensation	31,306	29,220
Other	20,861	15,157
Total deferred tax assets	97,532	91,217
Deferred tax liabilities:		
Depreciation and amortization	(339,311)	(266,730)
Unrecognized revenue	—	(10,007)
Other	(3,151)	(1,703)
Total deferred tax liabilities	(342,462)	(278,440)
Net deferred tax liability	\$(244,930)	\$(187,223)

We are subject to U.S. federal income tax, as well as income tax of multiple state tax jurisdictions. We remain open to examination by the Internal Revenue Service for tax years 2015 through 2018. We also remain open to examination by various state tax jurisdictions for tax years 2014 through 2018.

OLD DOMINION FREIGHT LINE, INC.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

The Company's liability for unrecognized tax benefits was immaterial as of December 31, 2018 and 2017. Interest and penalties related to uncertain tax positions, which are immaterial, are recorded in our "Provision for income taxes" on our Statements of Operations. Changes in our liability for unrecognized tax benefits could affect our effective tax rate, if recognized, but we do not expect any material changes within the next twelve months.

Note 5. Related Party Transactions

Family Relationships

Each of Earl E. Congdon, David S. Congdon and John R. Congdon, Jr. are related to one another and served in various management positions and/or on our Board of Directors during 2018. Our employment agreement with Earl E. Congdon (which expired in accordance with its terms on November 1, 2018) and our employment agreement with David S. Congdon are incorporated by reference as exhibits to this Annual Report on Form 10-K. We regularly disclose the amount of compensation that we pay to these individuals, as well as the compensation paid to any of their family members employed by us that from time to time may require disclosure, in the proxy statement for our Annual Meeting of Shareholders.

Transactions with Old Dominion Truck Leasing, Inc.

Prior to 2018, we utilized the services of Old Dominion Truck Leasing, Inc. ("Leasing"), leased property to Leasing, and collaborated with Leasing for the purchase of certain equipment and fuel. Leasing, which historically had been primarily engaged in the business of leasing tractors, trailers and other vehicles as well as providing contract dedicated fleet services, was acquired by Penske Truck Leasing during the third quarter of 2017 (the "Penske Acquisition"). Prior to the Penske Acquisition, John R. Congdon, Jr. served as Leasing's Chairman of the Board and CEO, and Earl E. Congdon and David S. Congdon each served on Leasing's board of directors.

Our business relationships with Leasing, as well as the positions held at Leasing by John R. Congdon, Jr., Earl E. Congdon and David S. Congdon, ceased in the third quarter of 2017 in connection with the Penske Acquisition. Prior to the Penske Acquisition, we purchased \$110,000 and \$254,000 of maintenance and other services from Leasing in 2017 and 2016, respectively. In addition, we received \$6,000 and \$12,000 from Leasing for the rental of property in 2017 and 2016, respectively.

Note 6. Employee Benefit Plans

Defined Contribution Plan

Substantially all employees meeting certain service requirements are eligible to participate in our 401(k) employee retirement plan. Employee contributions are limited to a percentage of the employee's compensation, as defined in the plan. We match a percentage of our employees' contributions up to certain maximum limits. In addition, we may also provide a discretionary matching contribution as specified in the plan. Our employer contributions, net of forfeitures, for 2018, 2017 and 2016 were \$59.8 million, \$35.9 million and \$28.9 million, respectively.

Deferred Compensation Plan

We maintain a nonqualified deferred compensation plan for the benefit of certain eligible employees, including those whose contributions to the 401(k) employee retirement plan are limited due to provisions of the Internal Revenue Code. Participating employees may elect to defer receipt of a percentage of their compensation, as defined in the plan, and the deferred amount is credited to each participant's deferred compensation account. The plan is not funded, and the Company does not make a matching contribution to this plan. Although the plan is not funded, participants are allowed to select investment options for which their deferrals and future earnings are deemed to be invested. Participant accounts are adjusted to reflect participant deferrals and the performance of their deemed investments. The amounts owed to the participants totaled \$62.9 million and \$61.5 million at December 31, 2018 and 2017, respectively, of which \$60.8 million and \$59.5 million were included in "Other non-current liabilities" on our Balance Sheets as of December 31, 2018 and 2017, respectively.

Note 7. Earnings Per Share

Basic earnings per share is computed by dividing net income by the daily weighted average number of shares of our common stock outstanding for the period, excluding unvested restricted stock. Unvested restricted stock is included in common shares outstanding on our Balance Sheets. Diluted earnings per share is computed using the treasury stock method and includes the impact of shares of unvested restricted stock.

OLD DOMINION FREIGHT LINE, INC.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

The following table provides a reconciliation of the number of common shares used in computing basic and diluted earnings per share:

(In thousands)	Year Ended December 31,		
	2018	2017	2016
Weighted average shares outstanding - basic	81,923,564	82,308,417	83,112,012
Dilutive effect of share-based awards	96,217	98,651	41,647
Weighted average shares outstanding - diluted	82,019,781	82,407,068	83,153,659

Note 8. Share-Based Compensation

Stock Incentive Plan

On May 19, 2016, our shareholders approved the Old Dominion Freight Line, Inc. 2016 Stock Incentive Plan (the “Stock Incentive Plan”) previously approved by our Board of Directors. The Stock Incentive Plan, under which awards may be granted until May 18, 2026 or the Stock Incentive Plan’s earlier termination, serves as our primary equity incentive plan and provides for the grant of incentive stock options, nonqualified stock options, stock appreciation rights, restricted awards, performance awards, phantom stock awards and other stock-based awards or dividend equivalent awards to selected employees and non-employee directors. The maximum number of shares of common stock that we may issue or deliver pursuant to awards granted under the Stock Incentive Plan is 2,000,000 shares.

Restricted Stock Awards

During 2018, 2017 and 2016, we granted restricted stock awards to selected employees and non-employee directors under the Stock Incentive Plan. The employee restricted stock awards vest in three equal annual installments on each anniversary of the grant date, and the non-employee director restricted stock awards vest in full on the first anniversary of the grant date. In both cases, the restricted stock awards are subject to accelerated vesting due to death, total disability, or change in control of the Company. Subject to the foregoing, unvested restricted stock awards are generally forfeited upon termination of employment or service. The restricted stock awards accrue dividends while the award is unvested and only carry rights to receive the accrued dividends once vested.

Compensation cost for restricted stock awards is measured at the grant date based on the fair market value per share of our common stock. Compensation cost is recognized on a straight-line basis over the requisite service period of each award and is presented in “Salaries, wages and benefits” for employees and “Miscellaneous expenses, net” for non-employee directors in the accompanying Statements of Operations.

The following table summarizes our restricted stock award activity for employees and non-employee directors:

Shares	Weighted Average
--------	------------------

Grant Date Fair

		Value Per Share
Unvested At January 1, 2018	97,098	\$ 79.58
Granted	46,119	137.78
Vested	(43,931)	79.86
Forfeited	(8,105)	100.09
Unvested at December 31, 2018	91,181	\$ 107.06

The weighted average grant date fair value per restricted stock award granted during fiscal years 2018, 2017 and 2016 was \$137.78, \$90.16 and \$63.94, respectively. The total fair value of vested restricted stock awards for fiscal year 2018 and 2017 was \$6.2 million and \$2.7 million respectively. No restricted stock awards vested during fiscal year 2016. At December 31, 2018, the Company had \$5.5 million of unrecognized stock-based compensation cost, net of estimated forfeitures, related to unvested restricted stock awards that are expected to be recognized over a weighted average period of 1.6 years.

Phantom Stock Plan

On October 30, 2012, our Board of Directors approved and we adopted the Old Dominion Freight Line, Inc. 2012 Phantom Stock Plan, as amended on January 29, 2015 (the “2012 Phantom Stock Plan”). Under the 2012 Phantom Stock Plan, 1,000,000 shares of phantom stock may be awarded, each of which represents a contractual right to receive an amount in cash equal to the fair market value of a share of our common stock on the settlement date, which is the earliest of the date of the participant’s (i) termination of employment for any reason other than for cause, (ii) death or (iii) total disability. Each award vests in 20% increments on the

OLD DOMINION FREIGHT LINE, INC.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

anniversary of the grant date provided that the participant (i) has been continuously employed by us since the grant date, (ii) has been continuously employed by us for ten years and (iii) has reached the age of 65. Vesting also occurs on the earliest of (i) a change in control, (ii) death or (iii) total disability. Awards are settled in cash after the required vesting period has been satisfied and upon termination of employment. Unvested shares are forfeited upon termination of employment, although our Board of Directors has authority to modify and/or accelerate the vesting of awards.

On May 16, 2005, our Board of Directors approved, and the Company adopted, the Old Dominion Freight Line, Inc. Phantom Stock Plan, as amended January 1, 2009, May 18, 2009, May 17, 2011 and January 29, 2015 (the “2005 Phantom Stock Plan” and, together with the 2012 Phantom Stock Plan, the “Employee Phantom Plans”). The 2005 Phantom Stock Plan expired in May 2012; however, grants under the 2005 Phantom Stock Plan remain outstanding. Each share of phantom stock awarded to eligible employees under the 2005 Phantom Stock Plan represents a contractual right to receive an amount in cash equal to the fair market value of a share of our common stock on the settlement date, which generally is the earlier of the eligible employee’s (i) termination from the Company after reaching 55 years of age, (ii) death or (iii) total disability. Awards are settled in cash after the required vesting period has been satisfied and upon termination of employment.

Awards under the 2005 Phantom Stock Plan vest upon the earlier to occur of the following: (i) the date of a change of control in our ownership; (ii) the fifth anniversary of the grant date of the award, provided the participant is employed by us on that date; (iii) the date of the participant’s death while employed by us; (iv) the date of the participant’s total disability; or (v) the date the participant attains the age of 65 while employed by us. Awards that are not vested upon termination of employment are forfeited. If termination occurs prior to attaining the age of 55, all vested and unvested awards are generally forfeited unless the termination results from death or total disability. The 2005 Phantom Stock Plan does, however, provide the Board of Directors with discretionary authority to modify and/or accelerate the vesting of awards.

A summary of cash payments for settled shares and compensation costs recognized in “Salaries, wages and benefits” on our Statements of Operations for the Employee Phantom Plans is provided below:

	Year Ended December 31,		
(In thousands)	2018	2017	2016
Cash payments for settled shares	\$2,360	\$3,066	\$2,442
Compensation expense	5,283	16,910	12,694

Unrecognized compensation cost for all unvested shares under the Employee Phantom Plans as of December 31, 2018 was \$10.1 million based on the fair market value of the award on that date.

On May 28, 2008, our Board of Directors approved, and the Company adopted, the Old Dominion Freight Line, Inc. Director Phantom Stock Plan, as amended April 1, 2011, February 20, 2014, August 7, 2014 and February 25, 2016 (the “Director Phantom Stock Plan” and together with the Employee Phantom Plans, the “Phantom Plans”). Under the Director Phantom Stock Plan, each eligible non-employee director was granted an annual award of phantom shares. Our Board of Directors approved the initial grant under this plan at its May 2008 meeting and authorized the subsequent annual grants to be made thereafter. For each vested phantom share, participants are entitled to an amount

in cash equal to the fair market value of the award on the date that service as a director terminates for any reason. Our shareholders approved the Stock Incentive Plan at our 2016 Annual Meeting of Shareholders; as a result, no phantom shares have been granted under the Phantom Plans since such approval.

Director Phantom Stock Plan awards vest upon the earlier to occur of the following: (i) the one-year anniversary of the grant date; (ii) the date of the first annual meeting of shareholders that occurs after the grant date provided the participant is still in service as a director; (iii) the date of a change of control in our ownership provided that the participant is still in service as a director; or (iv) the date of the participant's death or total disability while still in service as a director. Awards that are not vested upon termination of service as a director are forfeited.

A summary of cash payments for settled shares and compensation costs recognized in "Miscellaneous expenses, net" on our Statements of Operations for the Director Phantom Stock Plan is provided below:

	Year Ended December 31,		
(In thousands)	2018	2017	2016
Cash payments for settled shares	\$ 198	\$ 474	\$ 278
Compensation expense	491	2,588	2,098

OLD DOMINION FREIGHT LINE, INC.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

A summary of the changes in the number of outstanding phantom stock awards during the year ended December 31, 2018 for the Phantom Plans is provided below. Of these awards, 356,789 and 360,481 phantom shares were vested at December 31, 2018 and 2017, respectively.

	Employee	Director	
	Phantom Plans	Phantom Stock Plan	Total
Balance of shares outstanding at December 31, 2017	491,465	68,162	559,627
Granted	—	—	—
Settled	(23,419)	(14,091)	(37,510)
Forfeited	(1,659)	—	(1,659)
Balance of shares outstanding at December 31, 2018	466,387	54,071	520,458

The liability for unsettled phantom stock awards under the Phantom Plans consists of the following:

	December 31,	
(In thousands)	2018	2017
Employee Phantom Plans	\$ 50,233	\$ 48,148
Director Phantom Stock Plan	7,000	8,436
Total	\$ 57,233	\$ 56,584

While the Stock Incentive Plan currently serves as our primary equity plan, the terms of the Phantom Stock Plans will continue to govern all awards granted under the Phantom Stock Plans until such awards have been settled, forfeited, canceled or have otherwise expired or terminated.

Note 9. Commitments and Contingencies

We are involved in or addressing various legal proceedings and claims, governmental inquiries, notices and investigations that have arisen in the ordinary course of our business and have not been fully adjudicated, some of which may be covered in whole or in part by insurance. Certain of these matters include class-action allegations. We do not believe that the resolution of any of these matters will have a material adverse effect upon our financial position, results of operations or cash flows.

Note 10. Quarterly Financial Information (Unaudited)

A summary of our unaudited quarterly financial information for 2018 and 2017 is provided below. Our tonnage levels and revenue mix are subject to seasonal trends common in the motor carrier industry. Our revenue and operating margins in the first and fourth quarters are typically lower than those during the second and third quarters due to reduced shipments during the winter months.

OLD DOMINION FREIGHT LINE, INC.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

Harsh winter weather or natural disasters, such as hurricanes, tornadoes and floods, can also adversely impact our performance by reducing demand and increasing operating expenses.

(In thousands, except per share data)	Quarter				Total
	First	Second	Third	Fourth

(1) During the fourth quarter of 2017, we recorded a provisional tax benefit of \$104.9 million due to the remeasurement of our deferred taxes to reflect the impact of the Tax Act.

Report of Independent Registered Public Accounting Firm

To the Shareholders and the Board of Directors of Old Dominion Freight Line, Inc.

Opinion on the Financial Statements

We have audited the accompanying balance sheets of Old Dominion Freight Line, Inc. (the Company) as of December 31, 2018 and 2017, the related statements of operations, changes in shareholders' equity and cash flows for each of the three years in the period ended December 31, 2018, and the related notes and financial statement schedule listed in the Index at Item 15(a)(2) (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company at December 31, 2018 and 2017, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2018, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2018, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) and our report dated February 27, 2019 expressed an unqualified opinion thereon.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ Ernst & Young LLP

We have served as the Company's auditor since 1994.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

a) Evaluation of disclosure controls and procedures

As of the end of the period covered by this report, our management has conducted an evaluation, with the participation of our Chief Executive Officer (“CEO”) and Chief Financial Officer (“CFO”), of the effectiveness of our disclosure controls and procedures in accordance with Rule 13a-15 under the Exchange Act. Based on this evaluation as of the end of the period covered by this report, our CEO and CFO concluded that, as of such date, our disclosure controls and procedures were effective to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is (i) accumulated and communicated to our management, including our CEO and CFO, as appropriate to allow timely decisions regarding required disclosure, and (ii) recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms.

b) Management’s annual report on internal control over financial reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting in accordance with Exchange Act Rule 13a-15(f). Management has conducted an evaluation, with the participation of our CEO and CFO, of the effectiveness of our internal control over financial reporting as of December 31, 2018 based on the framework in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the “2013 Framework”). Management concluded that our internal control over financial reporting was effective as of December 31, 2018, based on our evaluation under the 2013 Framework.

A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, in designing a control system, we must take into account the benefits of controls relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected.

The effectiveness of our internal control over financial reporting as of December 31, 2018 has been audited by Ernst & Young LLP, an independent registered public accounting firm, as stated in its report dated February 27, 2019, which is included herein.

c) Changes in internal control over financial reporting

There were no changes in our internal control over financial reporting that occurred during the last quarter of the period covered by this report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Report of Independent Registered Public Accounting Firm

To the Shareholders and the Board of Directors of Old Dominion Freight Line, Inc.

Opinion on Internal Control over Financial Reporting

We have audited Old Dominion Freight Line, Inc.'s internal control over financial reporting as of December 31, 2018, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). In our opinion, Old Dominion Freight Line, Inc. (the Company) maintained, in all material respects, effective internal control over financial reporting as of December 31, 2018, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the balance sheets of the Company as of December 31, 2018 and 2017, the related statements of operations, changes in shareholders' equity and cash flows for each of the three years in the period ended December 31, 2018, and the related notes and financial statement schedule listed in the Index at Item 15(a)(2) and our report dated February 27, 2019 expressed an unqualified opinion thereon.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Annual Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects.

Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.
