WESTINGHOUSE AIR BRAKE TECHNOLOGIES CORPORATION  
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
FOR THE QUARTERLY PERIOD ENDED SEPTEMBER 30, 2015 (UNAUDITED)

### 1. BUSINESS

Westinghouse Air Brake Technologies Corporation ("Wabtec") is one of the world's largest providers of value-added, technology-based products and services for the global rail industry. Our products are found on virtually all U.S. locomotives, freight cars and passenger transit vehicles, as well as in more than 100 countries throughout the world. Our products enhance safety, improve productivity and reduce maintenance costs for customers, and many of our core products and services are essential in the safe and efficient operation of freight rail and passenger transit vehicles. Wabtec is a global company with operations in 20 countries. In the first nine months of 2015, about 48% of the Company's revenues came from customers outside the U.S.

### 2. PROPOSED TRANSACTION WITH FAIVELEY TRANSPORT S.A.

On July 27, 2015, the Company announced plans to acquire Faiveley Transport S.A. ("Faiveley Transport"), a leading global provider of value-added, integrated systems and services for the railway industry with annual sales of about \$1.2 billion and more than 5,700 employees in 24 countries. Faiveley Transport supplies railway manufacturers, operators and maintenance providers with a range of valued-added, technology-based systems and services in Energy & Comfort (air conditioning, power collectors and converters, and passenger information), Access & Mobility (passenger access systems and platform doors), and Brakes & Safety (braking systems and couplers).

The transaction has been structured in three steps:

- Wabtec made an irrevocable offer to the owners of approximately 51% of Faiveley Transport's shares for a purchase price of €100 per share, payable 25% in cash and 75% in Wabtec preferred stock. The preferred stock will have a 1% annual dividend or, if greater, the annual dividend assuming full conversion into common shares, and must be converted after three years into Wabtec common shares at an implied ratio of one Faiveley Transport common share for 1.125 Wabtec common shares. Shareholders owning 51% of Faiveley Transport have entered into exclusive discussions with Wabtec.

Upon completion of required labor group consultations, on October 6, 2015 the 51% shareholders entered into a definitive share purchase agreement and Faiveley Transport entered into an acquisition agreement with Wabtec. Upon completing the share purchase, Wabtec will commence a tender offer for the remaining publicly traded Faiveley Transport shares. The public shareholders will have the option to elect to receive €100 per share in cash or Wabtec preferred stock. The preferred stock portion of the consideration is subject to a cap of 75% of Faiveley Transport's common shares. Wabtec intends to delist Faiveley Transport from Euronext after the tender offer if minority interests represent less than 5%.

The total purchase price offered is about \$1.8 billion, including assumed debt. Wabtec plans to fund the cash portion of the transaction with cash on hand, existing credit facilities and potentially other debt financing. Prior to September 30, 2015 Wabtec set aside \$209.1 million as an escrow deposit for the Faiveley Transport purchase. The combination of Wabtec and Faiveley Transport would create one of the world's largest public rail equipment companies, with revenues of about \$4.5 billion and a presence in all key freight rail and passenger transit geographies worldwide. Closing of the transaction is subject to various conditions, including completion of regulatory requirements. These steps are currently on-going and the timing of completion is unknown.

### 3. ACCOUNTING POLICIES

**Basis of Presentation** The unaudited condensed consolidated interim financial statements have been prepared in accordance with generally accepted accounting principles and the rules and regulations of the Securities and Exchange Commission and include the accounts of Wabtec and its majority owned subsidiaries. These condensed consolidated interim financial statements do not include all of the information and footnotes required for complete financial statements. In management's opinion, these financial statements reflect all adjustments of a normal, recurring nature necessary for a fair presentation of the results for the interim periods presented. Results for these interim periods are

not necessarily indicative of results to be expected for the full year.

7

---

The Company operates on a four-four-five week accounting quarter, and the quarters end on or about March 31, June 30, September 30, and December 31.

The notes included herein should be read in conjunction with the audited consolidated financial statements included in Wabtec's Annual Report on Form 10-K for the year ended December 31, 2014. The December 31, 2014 information has been derived from the Company's Annual Report on Form 10-K for the year ended December 31, 2014.

**Revenue Recognition** Revenue is recognized in accordance with Accounting Standards Codification ("ASC") 605 "Revenue Recognition." Revenue is recognized when products have been shipped to the respective customers, title has passed and the price for the product has been determined.

In general, the Company recognizes revenues on long-term contracts based on the percentage of completion method of accounting. The units-of-delivery method or other input-based or output-based measures, as appropriate, are used to measure the progress toward completion of individual contracts. Contract revenues and cost estimates are reviewed and revised at a minimum quarterly and adjustments are reflected in the accounting period as such amounts are determined. Provisions are made currently for estimated losses on uncompleted contracts. Unbilled accounts receivables were \$151.1 million and \$187.8 million, customer deposits were \$106.9 million and \$111.8 million, and provisions for loss contracts were \$8.9 million and \$7.1 million at September 30, 2015 and December 31, 2014, respectively.

Certain pre-production costs relating to long-term production and supply contracts have been deferred and will be recognized over the life of the contracts. Deferred pre-production costs were \$30.1 million and \$24.9 million at September 30, 2015 and December 31, 2014, respectively.

**Use of Estimates** The preparation of financial statements in conformity with generally accepted accounting principles in the United States requires the Company to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reporting period. Actual amounts could differ from the estimates. On an ongoing basis, management reviews its estimates based on currently available information. Changes in facts and circumstances may result in revised estimates.

**Financial Derivatives and Hedging Activities** The Company periodically enters into foreign currency forward contracts to reduce the impact of changes in currency exchange rates. Forward contracts are agreements with a counter-party to exchange two distinct currencies at a set exchange rate for delivery on a set date at some point in the future. There is no exchange of funds until the delivery date. At the delivery date the Company can either take delivery of the currency or settle on a net basis.

To reduce the impact of interest rate changes on a portion of its variable-rate debt, the Company has entered into two forward starting interest rate swap agreements with notional values of \$150.0 million. As of September 30, 2015, the Company has recorded a current liability of \$5.8 million and a corresponding offset in accumulated other comprehensive loss of \$3.5 million, net of tax, related to these agreements. For further information regarding the forward starting interest rate swap agreements, see Footnote 7.

**Foreign Currency Translation** Assets and liabilities of foreign subsidiaries, except for the Company's Mexican operations whose functional currency is the U.S. Dollar, are translated at the rate of exchange in effect on the balance sheet date while income and expenses are translated at the average rates of exchange prevailing during the period. Foreign currency gains and losses resulting from transactions and the translation of financial statements are recorded in the Company's consolidated financial statements based upon the provisions of ASC 830 "Foreign Currency Matters." The effects of currency exchange rate changes on intercompany transactions and balances of a long-term investment nature are accumulated and carried as a component of accumulated other comprehensive loss. The effects of currency exchange rate changes on intercompany transactions that are denominated in a currency other than an entity's functional currency are charged or credited to earnings.

**Non-controlling Interests** In accordance with ASC 810, the Company has classified non-controlling interests as equity on our condensed consolidated balance sheets as of September 30, 2015 and December 31, 2014. Net income attributable to non-controlling interests for the three and nine months ended September 30, 2015 and 2014 was not material.

**Recent Accounting Pronouncements** In April 2015, the FASB issued Accounting Standards Update No. 2015-3, "Simplifying the Presentation of Debt Issuance Costs" ("ASU 2015-3") which changes the presentation of debt issuance

costs in financial statements to present such costs as a direct deduction from the related debt liability rather than as an asset. ASU 2015-3 will become effective for public companies during interim and annual reporting periods beginning after December 15,

8

---

2015. Early adoption is permitted. The adoption of this standard is not expected to have a material impact to the financial statements. The Company will make the required changes in the first quarter of 2016.

In May 2014, the FASB issued ASU no. 2014-9, "Revenue from Contract with Customers." The ASU will supersede most of the existing revenue recognition requirements in U.S. GAAP and will require entities to recognize revenue at an amount that reflects the consideration to which the Company expects to be entitled in exchange for transferring goods or services to a customer. The new standard also requires significantly expanded disclosures regarding the qualitative and quantitative information of an entity's nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers. The Board voted to propose that the standard would take effect for reporting periods beginning after December 15, 2017 and that early adoption would be allowed as of the original effective date. The Company is currently evaluating the impact the pronouncement will have on the consolidated financial statements and related disclosures.

Other Comprehensive Income Comprehensive income is defined as net income and all other non-owner changes in shareholders' equity.

The changes in accumulated other comprehensive loss by component, net of tax, for the nine months ended September 30, 2015 are as follows:

In thousands	Foreign currency translation	Derivative contracts	Pension and post retirement benefit plans	Total
Balance at December 31, 2014	\$ (94,450 )	\$ (2,243 )	\$ (62,793 )	\$ (159,486 )
Other comprehensive (loss) income before reclassifications	(100,323 )	(2,503 )	2,783	(100,043 )

Realized loss on derivative contracts	\$1,390	Interest expense, net
	(444	) Income tax expense
	\$946	Net income

#### 4. ACQUISITIONS

The Company has made the following acquisitions operating as a business unit or component of a business unit in the Freight Segment:

On February 4, 2015, the Company acquired Railroad Controls L.P. (“RCL”), a provider of railway signal construction services, for a purchase price of approximately \$76.4 million, net of cash acquired, resulting in preliminary goodwill of \$12.8 million, none of which will be deductible for tax purposes.

On September 3, 2014, the Company acquired C2CE Pty Ltd. (“C2CE”), a provider of railway signal design services, for a purchase price of approximately \$25.5 million, net of cash acquired, resulting in additional goodwill of \$15.9 million, none of which will be deductible for tax purposes.

The Company has made the following acquisitions operating as a business unit or component of a business unit in the Transit Segment:

On June 17, 2015, the Company acquired Metalocaicho (“MTC”), a manufacturer of transit products, primarily rubber components for suspension and vibration control systems, for a purchase price of approximately \$23.4 million, net of cash acquired, resulting in preliminary goodwill of \$12.1 million, none of which will be deductible for tax purposes.

On August 21, 2014, the Company acquired Dia-Frag (“Dia-Frag”), a manufacturer of friction products for various markets with a focus on motorcycle braking, for a purchase price of approximately \$70.6 million, net of cash acquired, resulting in additional goodwill of \$35.9 million, none of which will be deductible for tax purposes.

On June 6, 2014, the Company acquired Fandstan Electric Group Ltd. (“Fandstan”), a leading rail and industrial equipment manufacturer for a variety of markets, including rail and tram transportation, industrial and energy, for a purchase price of approximately \$199.4 million, net of cash acquired, resulting in additional goodwill of \$64.7 million, none of which will be deductible for tax purposes.

The acquisitions listed above include escrow deposits of \$40.8 million, which act as security for indemnity and other claims in accordance with the purchase and related escrow agreements.

For the MTC and RCL acquisitions, the following table summarizes the preliminary estimated fair values of the assets acquired and liabilities assumed at the date of the acquisition. For the C2CE, Dia-Frag, and Fandstan acquisitions, the following table summarizes the final fair values of the assets acquired and liabilities assumed at the date of acquisition.

	MTC June 17, 2015	RCL February 4, 2015	C2CE September 3, 2014	Dia-Frag August 21, 2014	Fandstan June 6, 2014
In thousands					
Current assets	\$10,906	\$16,445	\$9,812	\$12,158	\$124,280
Property, plant & equipment	1,510	11,983	1,853	13,749	67,948
Goodwill	12,141	12,840	15,896	35,850	64,713
Other intangible assets	7,649	40,403	3,654	26,150	50,598
Other assets	114	—	—	66	216
Total assets acquired	32,320	81,671	31,215	87,973	307,755
Total liabilities assumed	(8,960 )	(5,289 )	(5,736 )	(17,332 )	(108,351 )
Net assets acquired	\$23,360	\$76,382	\$25,479	\$70,641	\$199,404

Of the \$128.5 million of total acquired intangible assets, \$95.2 million was assigned to customer relationships, \$25.6 million was assigned to trade names, \$2.1 million was assigned to non-compete agreements and \$5.6 million was assigned to customer backlog. The trade names were determined to have an indefinite useful life, while the customer relationships' average useful life is 20 years, and the non-compete useful life is five years.

The following unaudited pro forma consolidated financial information presents income statement results as if the acquisitions listed above had occurred on January 1, 2014:

In thousands	Three Months Ended September 30, 2015	Three Months Ended September 30, 2014	Nine Months Ended September 30, 2015	Nine Months Ended September 30, 2014
Net sales	\$809,527	\$835,231	\$2,499,388	\$2,358,518
Gross profit	257,069	260,669	787,198	726,388

As Reported	\$1.02	\$0.93	\$3.05	\$2.67
Pro forma	\$1.02	\$0.99	\$3.08	\$2.89

## 5. INVENTORIES

The components of inventory, net of reserves, were:

In thousands	September 30, 2015	December 31, 2014
Raw materials	\$188,326	\$222,059
Work-in-progress	196,379	154,094
Finished goods	132,781	134,796
Total inventories	\$517,486	\$510,949

## 6. INTANGIBLES

The change in the carrying amount of goodwill by segment for the nine months ended September 30, 2015 is as follows:

In thousands	Freight Segment	Transit Segment	Total
Balance at December 31, 2014	\$515,067	\$347,271	\$862,338
Adjustment to preliminary purchase allocation	45	(4,140 )	(4,095 )
Acquisitions	12,840	12,141	24,981
Foreign currency impact	(9,006 )	(21,223 )	(30,229 )

Balance at September 30, 2015	\$518,946	\$334,049	\$852,995
-------------------------------	-----------	-----------	-----------

11

---

As of September 30, 2015 and December 31, 2014, the Company's trademarks had a net carrying amount of \$167.6 million and \$170.1 million, respectively, and the Company believes these intangibles have indefinite lives.

Intangible assets of the Company, other than goodwill and trademarks, consist of the following:

In thousands	September 30, 2015	December 31, 2014
Patents, non-compete and other intangibles, net of accumulated amortization of \$40,364 and \$39,780	\$ 12,002	\$ 14,722
Customer relationships, net of accumulated amortization of \$67,285 and \$56,684	257,384	237,983
Total	\$269,386	\$252,705

The weighted average remaining useful life of patents, customer relationships and intellectual property were 10 years, 16 years and 14 years, respectively. Amortization expense for intangible assets was \$5.5 million and \$16.0 million for the three and nine months ended September 30, 2015, and \$6.7 million and \$16.6 million for the three and nine months ended September 30, 2014.

Amortization expense for the five succeeding years is estimated to be as follows (in thousands):

Remainder of 2015	\$6,070
2016	21,005
2017	19,826
2018	18,848
2019	18,405

## 7. LONG-TERM DEBT

Long-term debt consisted of the following:

In thousands	September 30, 2015	December 31, 2014
4.375% Senior Notes, due 2023	\$250,000	\$250,000
Revolving Credit Facility	200,000	270,000
Capital Leases	1,019	1,195
Total	451,019	521,195
Less - current portion	430	792
Long-term portion	\$450,589	\$520,403
2013 Refinancing Credit Agreement		

On December 19, 2013, the Company amended its existing revolving credit facility with a consortium of commercial banks. This "2013 Refinancing Credit Agreement" provides the Company with an \$800.0 million, five-year revolving credit facility. The Company incurred approximately \$1.0 million of deferred financing cost related to the 2013 Refinancing Credit Agreement. The facility expires on December 19, 2018. The 2013 Refinancing Credit Agreement borrowings bear variable interest rates indexed as described below. At September 30, 2015, the Company had available bank borrowing capacity, net of \$27.1 million of letters of credit, of approximately \$572.9 million, subject to certain financial covenant restrictions.

Under the 2013 Refinancing Credit Agreement, the Company may elect a Base Rate of interest for U.S. Dollar denominated loans or, for certain currencies, an interest rate based on the London Interbank Offered Rate ("LIBOR") of interest, or other rates appropriate for such currencies (in any case, "the Alternate Rate"). The Base Rate adjusts on a daily basis and is the greater of the Federal Funds Effective Rate plus 0.5% per annum, the PNC, N.A. prime rate or the Daily LIBOR Rate plus 100 basis points, plus a margin that ranges from 0 to 75 basis points. The Alternate Rate is based on the quoted rates specific to the applicable currency, plus a margin that ranges from 75 to 175 basis points. Both the Base Rate and Alternate Rate margins are dependent on the Company's consolidated total indebtedness to cash flow ratios. The initial Base Rate margin is 0 basis points and the Alternate Rate margin is 75 basis points.

At September 30, 2015, the weighted average interest rate on the Company's variable rate debt was 0.94%. On January 12, 2012, the Company entered into a forward starting interest rate swap agreement with a notional value of \$150.0 million. The effective date of the interest rate swap agreement is July 31, 2013, and the termination date is November 7, 2016. The impact of the interest rate swap agreement converts a portion of the Company's outstanding debt from a variable rate to a fixed-rate borrowing. During the term of the interest rate swap agreement the interest rate on the notional value will be fixed at 1.415% plus the Alternate Rate margin. The Company is exposed to credit risk in the event of nonperformance by the counterparty. However, since only the cash interest payments are exchanged, exposure is significantly less than the notional amount. The counterparty is a large financial institution with an excellent credit rating and history of performance. The Company currently believes the risk of nonperformance is negligible.

On June 5, 2014, the Company entered into a forward starting interest rate swap agreement with a notional value of \$150.0 million. The effective date of the interest rate swap agreement is November 7, 2016, and the termination date is December 19, 2018. The impact of the interest rate swap agreement converts a portion of the Company's outstanding debt from a variable rate to a fixed-rate borrowing. During the term of the interest rate swap agreement the interest rate on the notional value will be fixed at 2.56% plus the Alternate Rate margin. The Company is exposed to credit risk in the event of nonperformance by the counterparty. However, since only the cash interest payments are exchanged, exposure is significantly less than the notional amount. The counterparty is a large financial institution with an excellent credit rating and history of performance. The Company currently believes the risk of nonperformance is negligible.

The 2013 Refinancing Credit Agreement limits the Company's ability to declare or pay cash dividends and prohibits the Company from declaring or making other distributions, subject to certain exceptions. The 2013 Refinancing Credit Agreement contains various other covenants and restrictions including the following limitations: incurrence of additional indebtedness; mergers, consolidations, sales of assets and acquisitions; additional liens; sale and leasebacks; permissible investments, loans and advances; certain debt payments; and imposes a minimum interest expense coverage ratio of 3.0 and a maximum debt to cash flow ratio of 3.25. The Company does not expect that these measurements will limit the Company in executing our operating activities.

#### 4.375% Senior Notes Due August 2023

In August 2013, the Company issued \$250.0 million of Senior Notes due in 2023 (the "2013 Notes"). The 2013 Notes were issued at 99.879% of face value. Interest on the 2013 Notes accrues at a rate of 4.375% per annum and is payable semi-annually on February 15 and August 15 of each year. The proceeds were used to repay debt outstanding under the Company's existing credit agreement, and for general corporate purposes. The principal balance is due in full at maturity. The Company incurred \$2.6 million of deferred financing costs related to the issuance.

The 2013 Notes are senior unsecured obligations of the Company and rank pari passu with all existing and future senior debt and senior to all existing and future subordinated indebtedness of the Company. The indenture under which the 2013 Notes were issued contains covenants and restrictions which limit among other things, the following: the incurrence of indebtedness, payment of dividends and certain distributions, sale of assets, change in control, mergers and consolidations and the incurrence of liens.

The Company is in compliance with the restrictions and covenants in the indenture under which the 2013 Notes were issued and expects that these restrictions and covenants will not be any type of limiting factor in executing our operating activities.

## 8. EMPLOYEE BENEFIT PLANS

### Defined Benefit Pension Plans

The Company sponsors defined benefit pension plans that cover certain U.S., Canadian, German and United Kingdom employees and which provide benefits of stated amounts for each year of service of the employee.

The Company uses a December 31 measurement date for the plans.

The following tables provide information regarding the Company's defined benefit pension plans summarized by U.S. and international components.

	U.S. Three Months Ended September 30,		International Three Months Ended September 30,	
In thousands, except percentages	2015	2014	2015	2014
Net periodic benefit cost				
Service cost	95	54	506	659
Interest cost	479	488	1,801	2,271
Expected return on plan assets	(542	) (617	) (2,434	) (2,655
Net amortization/deferrals	266	355	655	766
Net periodic benefit cost	298	280	528	1,041
	U.S. Nine Months Ended September 30,		International Nine Months Ended September 30,	
In thousands, except percentages	2015	2014	2015	2014
Net periodic benefit cost				
Service cost	\$285	\$250	\$1,518	\$1,511
Interest cost	1,437	1,552	5,391	5,936
Expected return on plan assets	(1,626	) (1,857	) (7,284	) (7,116
Net amortization/deferrals	798	1,665	1,962	2,292
Net periodic benefit cost	\$894	\$1,610	\$1,587	\$2,623

The Company's funding methods are based on governmental requirements and differ from those methods used to recognize pension expense. The Company expects to contribute \$6.7 million to the international plans and does not expect to make a contribution to the U.S. plans during 2015.

#### Post Retirement Benefit Plans

In addition to providing pension benefits, the Company has provided certain unfunded postretirement health care and life insurance benefits for a portion of North American employees. The Company is not obligated to pay health care and life insurance benefits to individuals who had retired prior to 1990.

The Company uses a December 31 measurement date for all post retirement plans.

The following tables provide information regarding the Company's postretirement benefit plans summarized by U.S. and international components.

	U.S. Three Months Ended September 30,		International Three Months Ended September 30,	
In thousands, except percentages	2015	2014	2015	2014
Net periodic benefit cost				
Service cost	\$2	\$7	\$11	\$10
Interest cost	308	289	35	42
Net amortization/deferrals	(234	) (350	) (10	) (16
Net periodic benefit (credit) cost	\$76	\$(54	) \$36	\$36

In thousands, except percentages	U.S.		International	
	Nine Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Net periodic benefit cost				
Service cost	\$6	\$27	\$33	\$28
Interest cost	924	881	105	126
Net amortization/deferrals	(702	) (1,003	) (29	) (46
Net periodic benefit (credit) cost	\$228	\$(95	) \$109	\$108

## 9. STOCK-BASED COMPENSATION

As of September 30, 2015, the Company maintains employee stock-based compensation plans for stock options, restricted stock, restricted units and incentive stock awards as governed by the 2011 Stock Incentive Compensation Plan (the "2011 Plan") and the 2000 Stock Incentive Plan, as amended (the "2000 Plan"). The 2011 Plan has a 10-year term through March 27, 2021 and provides a maximum of 3,800,000 shares for grants or awards. The 2011 Plan was approved by stockholders of Wabtec on May 11, 2011. The Company also maintains a Non-Employee Directors' Fee and Stock Option Plan ("the Directors Plan"). No awards may be made under the Directors Plan subsequent to October 31, 2016.

Stock-based compensation expense was \$20.1 million and \$19.1 million for the nine months ended September 30, 2015 and 2014, respectively. Included in stock-based compensation expense for the nine months ended September 30, 2015 is \$1.7 million of expense related to stock options, \$4.8 million related to restricted stock, \$2.6 million related to restricted units, \$10.2 million related to incentive stock awards and \$0.8 million related to awards issued for Directors' fees. At September 30, 2015, unamortized compensation expense related to stock options, restricted stock, restricted units and incentive stock awards expected to vest totaled \$30.2 million and will be recognized over a weighted average period of 1.3 years.

Stock Options Stock options are granted to eligible employees and directors at the fair market value, which is the average of the high and low Wabtec stock price on the date of grant. Under the 2011 Plan and the 2000 Plan, options become exercisable over a four-year vesting period and expire 10 years from the date of grant.

The following table summarizes the Company's stock option activity and related information for the 2011 Plan, the 2000 Plan and the Directors Plan for the nine months ended September 30, 2015:

	Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life	Aggregate Intrinsic value (in thousands)
Outstanding at December 31, 2014	1,147,558	\$28.33	5.5	\$67,205
Granted	84,675	87.35		141
Exercised	(112,156	) 26.10		7,057
Canceled	(8,751	) 65.24		208
Outstanding at September 30, 2015	1,111,326	32.76	5.1	62,525
Exercisable at September 30, 2015	875,157	23.83	4.3	57,051

The fair value of each option grant is estimated on the date of grant using the Black-Scholes option pricing model with the following weighted-average assumptions:

	Nine Months Ended September 30,		
	2015	2014	
Dividend yield	0.14	% 0.11	%
Risk-free interest rate	1.82	% 2.19	%
Stock price volatility	27.3	% 33.2	%
Expected life (years)	5.0	5.0	

The dividend yield is based on the Company's dividend rate and the current market price of the underlying common stock at the date of grant. Expected life in years is determined from historical stock option exercise data. Expected volatility is based on the historical volatility of the Company's stock. The risk-free interest rate is based on the U.S. Treasury bond rates for the expected life of the option.

Restricted Stock, Restricted Units and Incentive Stock Beginning in 2006 the Company adopted a restricted stock program. As provided for under the 2011 and 2000 Plans, eligible employees are granted restricted stock or restricted units that generally vest over four years from the date of grant. Under the Directors Plan, restricted stock awards vest one year from the date of grant.

In addition, the Company has issued incentive stock awards to eligible employees that vest upon attainment of certain cumulative three year performance goals. Based on the Company's performance for each three-year period then ended, the incentive stock awards can vest and be awarded ranging from 0% to 200% of the initial incentive stock awards granted. The incentive stock awards included in the table below represent the number of shares that are expected to vest based on the Company's estimate for meeting those established performance targets. As of September 30, 2015, the Company estimates that it will achieve 121%, 132% and 100% for the incentive stock awards expected to vest based on performance for the three-year periods ending December 31, 2015, 2016, and 2017, respectively, and has recorded incentive compensation expense accordingly. If our estimate of the number of these stock awards expected to vest changes in a future accounting period, cumulative compensation expense could increase or decrease and will be recognized in the current period for the elapsed portion of the vesting period and would change future expense for the remaining vesting period.

Compensation expense for the restricted stock and incentive stock awards is based on the average of the high and low Wabtec stock price on the date of grant and recognized over the applicable vesting period.

The following table summarizes the restricted stock and unit activity for the 2011 Plan, the 2000 Plan and the Directors Plan, and incentive stock awards activity for the 2011 Plan and the 2000 Plan with related information for the nine months ended September 30, 2015:

	Restricted Stock and Units	Incentive Stock Awards	Weighted Average Grant Date Fair Value
Outstanding at December 31, 2014	438,543	791,608	\$47.97
Granted	110,945	125,650	87.74
Vested	(182,776)	(433,932)	37.76
Adjustment for incentive stock awards expected to vest	—	61,654	57.60
Canceled	(9,284)	(6,196)	66.30
Outstanding at September 30, 2015	357,428	538,784	65.82

## 10. INCOME TAXES

The overall effective income tax rate was 31.5% and 31.9% for the three and nine months ended September 30, 2015, respectively, and 31.3% and 31.2% for the three and nine months ended September 30, 2014, respectively. For the three and nine months ended September 30, 2015 the increase in the effective rate is primarily the result of a higher earnings mix in higher tax rate jurisdictions, partially offset by lower state income taxes.

As of September 30, 2015, the liability for income taxes associated with uncertain tax positions was \$13.7 million, of which \$5.5 million, if recognized, would favorably affect the Company's effective tax rate. As of December 31, 2014 the liability associated with uncertain tax positions was \$12.6 million, of which \$5.5 million, if recognized, would favorably affect the Company's effective tax rate.

The Company includes interest and penalties related to uncertain tax positions in income tax expense. As of September 30, 2015 the total accrued interest and penalties are \$2.4 million and \$1.7 million, respectively. As of December 31, 2014 the total accrued interest and penalties were \$1.9 million and \$1.3 million, respectively.

At this time, the Company believes that it is reasonably possible that unrecognized tax benefits of approximately \$4.4 million may change within the next 12 months due to the expiration of statutory review periods and current

examinations. The

16

---

Internal Revenue Service is currently auditing the 2012 tax year. With limited exception, the Company is no longer subject to examination by various U.S. and foreign taxing authorities for years before 2011.

#### 11. EARNINGS PER SHARE

The computation of basic and diluted earnings per share for net income attributable to Wabtec shareholders is as follows:

	Three Months Ended September 30,			
	2015		2014	
In thousands, except per share data				
Numerator				
Numerator for basic and diluted earnings per common share - net income attributable to Wabtec shareholders	\$99,181		\$90,155	
Less: dividends declared - common shares and non-vested restricted stock	(7,735	)	(5,780	)
Undistributed earnings	91,446		84,375	
Percentage allocated to common shareholders (1)	99.7	%	99.6	%
	91,172		84,038	
Add: dividends declared - common shares	7,713		5,759	
Numerator for basic and diluted earnings per common share	\$98,885		\$89,797	
Denominator				
Denominator for basic earnings per common share - weighted average shares	96,369		95,935	
Effect of dilutive securities:				
Assumed conversion of dilutive stock-based compensation plans	999		1,069	
Denominator for diluted earnings per common share - adjusted weighted average shares and assumed conversion	97,368		97,004	
Net income per common share attributable to Wabtec shareholders				
Basic	\$1.03		\$0.94	
Diluted	\$1.02		\$0.93	
(1) Basic weighted-average common shares outstanding	96,369		95,935	
Basic weighted-average common shares outstanding and non-vested restricted stock expected to vest	96,647		96,285	
Percentage allocated to common shareholders	99.7	%	99.6	%

	Nine Months Ended September 30,			
In thousands, except per share data	2015	2014		
Numerator				
Numerator for basic and diluted earnings per common share - net income attributable to Wabtec shareholders	\$296,849	\$258,994		
Less: dividends declared - common shares and non-vested restricted stock	(19,315)	(13,471)	)	)
Undistributed earnings	277,534	245,523		
Percentage allocated to common shareholders (1)	99.7	%	99.6	%
	276,701	244,541		
Add: dividends declared - common shares	19,250	13,415		
Numerator for basic and diluted earnings per common share	\$295,951	\$257,956		
Denominator				
Denominator for basic earnings per common share - weighted average shares	96,135	95,745		
Effect of dilutive securities:				
Assumed conversion of dilutive stock-based compensation plans	1,027	1,089		
Denominator for diluted earnings per common share - adjusted weighted average shares and assumed conversion	97,162	96,834		
Net income per common share attributable to Wabtec shareholders				
Basic	\$3.08	\$2.69		
Diluted	\$3.05	\$2.67		
(1) Basic weighted-average common shares outstanding	96,135	95,745		
Basic weighted-average common shares outstanding and non-vested restricted stock expected to vest	96,462	96,146		
Percentage allocated to common shareholders	99.7	%	99.6	%

The Company's non-vested restricted stock contains rights to receive nonforfeitable dividends, and thus, are participating securities requiring the two-class method of computing earnings per share. The calculation of earnings per share for common stock shown above excludes the income attributable to the non-vested restricted stock from the numerator and excludes the dilutive impact of those shares from the denominator.

## 12. WARRANTIES

The following table reconciles the changes in the Company's product warranty reserve as follows:

	Nine Months Ended September 30,			
In thousands	2015	2014		
Balance at December 31, 2014 and 2013 respectively	\$87,849	\$60,593		
Warranty expense	21,615	22,104		
Acquisitions	6,001	3,567		
Warranty claim payments	(18,961)	(14,572)	)	)
Foreign currency impact/other	(1,554)	(980)	)	)
Balance at September 30, 2015 and 2014, respectively	\$94,950	\$70,712		

## 13. FAIR VALUE MEASUREMENT AND FAIR VALUE OF FINANCIAL INSTRUMENTS

ASC 820 "Fair Value Measurements and Disclosures" defines fair value, establishes a framework for measuring fair value and explains the related disclosure requirements. ASC 820 indicates, among other things, that a fair value measurement assumes that the transaction to sell an asset or transfer a liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability and defines fair value based upon an exit price model.

Valuation Hierarchy ASC 820 establishes a valuation hierarchy for disclosure of the inputs to valuation used to measure fair value. This hierarchy prioritizes the inputs into three broad levels as follows. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 2 inputs are quoted prices for similar assets and liabilities in active markets or inputs that are observable for the asset or liability, either directly or indirectly through market corroboration, for substantially the full term of the financial instrument. Level 3 inputs are unobservable inputs based on the Company's assumptions used to measure assets and liabilities at fair value. A financial asset or liability's classification within the hierarchy is determined based on the lowest level input that is significant to the fair value measurement.

The following table provides the liabilities carried at fair value measured on a recurring basis as of September 30, 2015, which are included in other current liabilities on the Condensed Consolidated Balance sheet:

In thousands	Total Carrying Value at September 30, 2015	Fair Value Measurements at September 30, 2015 Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Interest rate swap agreements	\$5,798	\$—	\$5,798	\$—
Total	\$5,798	\$—	\$5,798	\$—

The following table provides the liabilities carried at fair value measured on a recurring basis as of December 31, 2014, which is included in other current liabilities on the Condensed Consolidated Balance sheet:

In thousands	Total Carrying Value at December 31, 2014	Fair Value Measurements at December 31, 2014 Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Interest rate swap agreements	\$3,351	\$—	\$3,351	\$—
Total	\$3,351	\$—	\$3,351	\$—

To reduce the impact of interest rate changes on a portion of its variable-rate debt, the Company entered into interest rate swaps which effectively converted a portion of the debt from variable to fixed-rate borrowings during the term of the swap contracts. For certain derivative contracts whose fair values are based upon trades in liquid markets, such as interest rate swaps, valuation model inputs can generally be verified and valuation techniques do not involve significant management judgment. The fair values of such financial instruments are generally classified within Level 2 of the fair value hierarchy.

As a result of our global operating activities the Company is exposed to market risks from changes in foreign currency exchange rates, which may adversely affect our operating results and financial position. When deemed appropriate, the Company minimizes these risks through entering into foreign currency forward contracts. The foreign currency forward contracts are valued using broker quotations, or market transactions in either the listed or over-the counter markets. As such, these derivative instruments are classified within Level 2.

The Company's cash and cash equivalents are highly liquid investments purchased with an original maturity of three months or less and are considered Level 1 on the fair value valuation hierarchy. The fair value of cash and cash equivalents approximated the carrying value at September 30, 2015 and December 31, 2014. The Company's defined

benefit pension plan assets consist primarily of equity security funds, debt security funds and temporary cash and cash equivalent investments. Generally, all plan assets are considered Level 2 based on the fair value valuation hierarchy. These investments are comprised of a number of investment funds that invest in a diverse portfolio of assets including equity securities, corporate and governmental bonds, and money markets. Trusts are valued at the net asset value (“NAV”) as determined by their custodian. NAV represent the accumulation of the unadjusted quoted close prices on the reporting date for the underlying investments divided by the total shares outstanding at the reporting dates. The 2013 Notes are considered Level 2 based on the fair value valuation hierarchy.

The estimated fair values and related carrying values of the Company's financial instruments are as follows:

In thousands	September 30, 2015		December 31, 2014	
	Carry Value	Fair Value	Carry Value	Fair Value
Interest rate swap agreement	\$5,798	\$5,798	\$3,351	\$3,351
4.375% Senior Notes	250,000	257,503	250,000	260,000

The fair value of the Company's interest rate swap agreements and the 2013 Notes were based on dealer quotes and represent the estimated amount the Company would pay to the counterparty to terminate the agreement.

#### 14. COMMITMENTS AND CONTINGENCIES

Claims have been filed against the Company and certain of its affiliates in various jurisdictions across the United States by persons alleging bodily injury as a result of exposure to asbestos-containing products. Further information and detail on these claims is described in the Company's Annual Report on Form 10-K for the year ended December 31, 2014, in Note 18 therein, filed on February 20, 2015. During the first nine months of 2015, there were no material changes to the information described in the Form 10-K.

The Company is also subject to litigation from time to time arising out of its operations in the ordinary course of business, including claims based on product liability, contracts, intellectual property, or other causes of action. Further information and detail on any potentially material litigation is as described in the Company's Annual Report on Form 10-K for the year ended December 31, 2014, in Note 18 therein, filed on February 20, 2015. During the first nine months of 2015, there were no material changes to the information described in the Form 10-K.

#### 15. SEGMENT INFORMATION

Wabtec has two reportable segments—the Freight Segment and the Transit Segment. The key factors used to identify these reportable segments are the organization and alignment of the Company's internal operations, the nature of the products and services, and customer type. The business segments are:

Freight Segment primarily manufactures and services components for new and existing freight cars and locomotives, builds new switcher locomotives, rebuilds freight locomotives, supplies railway electronics, positive train control equipment, signal design and engineering services, friction products, and provides related heat exchange and cooling systems. Customers include large, publicly traded railroads, leasing companies, manufacturers of original equipment such as locomotives and freight cars, and utilities.

Transit Segment primarily manufactures and services components for new and existing passenger transit vehicles, typically subway cars and buses, builds new commuter locomotives, friction products, and refurbishes subway cars. Customers include public transit authorities and municipalities, leasing companies, and manufacturers of subway cars and buses around the world.

The Company evaluates its business segments' operating results based on income from operations. Corporate activities include general corporate expenses, elimination of intersegment transactions, interest income and expense and other unallocated charges. Since certain administrative and other operating expenses and other items have not been allocated to business segments, the results in the following tables are not necessarily a measure computed in accordance with generally accepted accounting principles and may not be comparable to other companies.

Segment financial information for the three months ended September 30, 2015 is as follows:

In thousands	Freight Segment	Transit Segment	Corporate Activities and Elimination	Total
Sales to external customers	\$507,173	\$302,354	\$—	\$809,527
Intersegment sales/(elimination)	9,025	7,111	(16,136)	) —

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with the information in the unaudited condensed consolidated financial statements and notes thereto included herein and Westinghouse Air Brake Technologies Corporation's Financial Statements and Management's Discussion and Analysis of Financial Condition and Results of Operations included in its Annual Report on Form 10-K for the year ended December 31, 2014, filed with the Securities and Exchange Commission on February 20, 2015.

OVERVIEW

Wabtec is one of the world's largest providers of value-added, technology-based products and services for the global rail industry. Our products are found on virtually all U.S. locomotives, freight cars and passenger transit vehicles, as well as in more than 100 countries throughout the world. Our products enhance safety, improve productivity and reduce maintenance costs for customers, and many of our core products and services are essential in the safe and efficient operation of freight rail and passenger transit vehicles. Wabtec is a global company with operations in 20 countries. In the first nine months of 2015, about 48% of the Company's revenues came from customers outside the U.S.

Management Review and Future Outlook

Wabtec's long-term financial goals are to generate cash flow from operations in excess of net income, maintain a strong credit profile while minimizing our overall cost of capital, increase margins through strict attention to cost controls and implementation of the Wabtec Performance System, and increase revenues through a focused growth strategy, including global and market expansion, new products and technologies, aftermarket products and services and acquisitions. In addition, management evaluates the Company's current operational performance through measures such as quality and on-time delivery.

The Company monitors a variety of factors and statistics to gauge activity in key freight rail and passenger transit markets such as North and South America, Europe and Asia-Pacific. In these and other markets, the freight rail industry is largely driven by general economic conditions, which can cause fluctuations in rail traffic and the level of investment spending by railroads and governments to expand, upgrade, and modernize their networks. Based on those fluctuations, railroads and governments can increase or decrease purchases of new locomotives and freight cars, and spending on rail-related infrastructure. The passenger transit industry is driven mainly by the spending of government agencies and authorities as they maintain, expand and modernize their transit systems. In doing so, they will increase or decrease spending on new locomotives, transit/subway cars, buses and related infrastructure. Fare box revenues, the fees paid by riders to use public transit, also provide funding for maintaining and operating the systems. Many government entities at all levels are facing budget issues, which could have a negative effect on demand for the Company's products and services.

In North America, the Association of American Railroads (AAR) compiles freight rail industry statistics such as carloadings, generally referred to as "rail traffic," and the Railway Supply Institute (RSI) releases data on freight car orders, deliveries, and backlog. Through the third quarter of 2015, rail traffic in North America was about the same as in 2014, including a 3.5% increase in intermodal traffic. According to the RSI, at the end of the third quarter of 2015, the industry multi-year backlog of freight cars on order was about 123,000, slightly lower than at the end of the second quarter. In 2015, we expect deliveries of new locomotives to be lower and deliveries of new freight cars to be higher than in 2014. Future demand depends largely on the strength in the overall economy and in rail traffic volumes. The American Public Transportation Association (APTA) provides quarterly transit ridership statistics for the U.S. and Canada. In the first quarter of 2015 ridership was flat. In 2012, the U.S. Congress passed a new, two-year transportation funding bill, which maintained transit spending at about the same level, about \$10.7 billion, as in prior years. Subsequent extensions to the bill continued to fund transit spending at about the same level. The Company expects deliveries of new subway cars to increase in 2015, while bus deliveries are expected to be about the same compared to 2014.

In 2008, the U.S. federal government enacted a rail safety bill that mandates the use of Positive Train Control ("PTC") technology, which includes on-board locomotive computer and related software, on a majority of the locomotives and track in the U.S. With our Electronic Train Management System<sup>®</sup>, we are the leading supplier of this on-board train control equipment, and we are working with the U.S. Class I railroads, commuter rail authorities and other industry

suppliers to implement this technology by the December 31, 2015 deadline set in the rail safety bill. The railroads and commuter rail authorities have said they cannot complete full implementation by the deadline, and the U.S. Congress is considering an extension. An extension of the deadline could affect the rate of industry spending on this technology. Wabtec's PTC revenue was about \$290 million for the nine months ended September 30, 2015.

Wabtec continues to expand its presence in freight rail and passenger transit markets outside the U.S., particularly in Europe, Asia-Pacific and South America. In Europe, the majority of the rail system serves the passenger transit market, which is larger than the transit market in the U.S. Our presence in the U.K., Germany and Italy has positioned the Company to take advantage of this market. Asia-Pacific is a growth market and our various joint ventures and direct exports to China have positioned the Company to take advantage of this growth. Australia has also been an area of expansion for the Company as commodity suppliers use our products to meet the demands of their regional customers. In Brazil, the Company is completing a PTC contract, has expanded locations and has completed three acquisitions, allowing us to increase our sales in that market.

Current conditions in these international markets vary based on general economic factors and specific freight rail and passenger transit drivers, as mentioned above. In its most recent quarterly data, the Office of Rail Regulation in the U.K. reported an increase in passenger ridership of 4.7% and an 18% decrease in freight moved. In Germany, the government statistics bureau reported an increase of 0.1% for passenger rail and bus ridership, and a decrease in rail freight transport of 3.0% in the first half of 2015. Russian Railways announced a decrease of 4.7% in passenger ridership in the first eight months of 2015 compared to the year-ago period, and it said freight tons loaded were 1.4% lower than the year-ago period.

In 2015 and beyond, general economic and market conditions in our key markets could have an impact on our sales and operations. To the extent that these factors cause instability of capital markets, shortages of raw materials or component parts, longer sales cycles, deferral or delay of customer orders or an inability to market our products effectively, our business and results of operations could be materially adversely affected. In addition, we face risks associated with our four-point growth strategy including the level of investment that customers are willing to make in new technologies developed by the industry and the Company, and risks inherent in global expansion. When necessary, we will modify our financial and operating strategies to reflect changes in market conditions and risks.

#### PROPOSED TRANSACTION WITH FAIVELEY TRANSPORT S.A.

On July 27, 2015, the Company announced plans to acquire Faiveley Transport S.A. ("Faiveley Transport"), a leading global provider of value-added, integrated systems and services for the railway industry with annual sales of about \$1.2 billion and more than 5,700 employees in 24 countries. Faiveley Transport supplies railway manufacturers, operators and maintenance providers with a range of valued-added, technology-based systems and services in Energy & Comfort (air conditioning, power collectors and converters, and passenger information), Access & Mobility (passenger access systems and platform doors), and Brakes & Safety (braking systems and couplers).

The transaction has been structured in three steps:

- Wabtec made an irrevocable offer to the owners of approximately 51% of Faiveley Transport's shares for a purchase price of €100 per share, payable 25% in cash and 75% in Wabtec preferred stock. The preferred stock will have a 1% annual dividend or, if greater, the annual dividend assuming full conversion into common shares, and must be converted after three years into Wabtec common shares at an implied ratio of one Faiveley Transport common share for 1.125 Wabtec common shares. Shareholders owning 51% of Faiveley Transport have entered into exclusive discussions with Wabtec.

Upon completion of required labor group consultations, on October 6, 2015 the 51% shareholders entered into a definitive share purchase agreement and Faiveley Transport entered into an acquisition agreement with Wabtec. Upon completing the share purchase, Wabtec will commence a tender offer for the remaining publicly traded Faiveley Transport shares. The public shareholders will have the option to elect to receive €100 per share in cash or Wabtec preferred stock. The preferred stock portion of the consideration is subject to a cap of 75% of Faiveley Transport's common shares. Wabtec intends to delist Faiveley Transport from Euronext after the tender offer if minority interests represent less than 5%.

The total purchase price offered is about \$1.8 billion, including assumed debt. Wabtec plans to fund the cash portion of the transaction with cash on hand, existing credit facilities and potentially other debt financing. Prior to September 30, 2015, Wabtec set aside \$209.1 million as an escrow deposit for the Faiveley Transport purchase. The combination of Wabtec and Faiveley Transport would create one of the world's largest public rail equipment companies, with revenues of about \$4.5 billion and a presence in all key freight rail and passenger transit geographies worldwide.

Closing of the transaction is subject to various conditions, including completion of regulatory requirements. These steps are currently on-going and the timing of completion is unknown.

## RESULTS OF OPERATIONS

The following table shows our Consolidated Statements of Operations for the periods indicated.

In millions	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2015	2014	2015	2014

## THIRD QUARTER 2015 COMPARED TO THIRD QUARTER 2014

The following table summarizes our results of operations for the periods indicated:

In thousands	Three Months Ended September 30,		Percent Change	
	2015	2014		
Freight Segment	\$507,173	\$453,329	11.9	%
Transit Segment	302,354	343,942	(12.1)	)%
Net sales	809,527	797,271	1.5	%
Income from operations	152,078	135,977	11.8	%
Net income attributable to Wabtec shareholders	\$99,181	\$90,155	10.0	%

The following table shows the major components of the change in sales in the third quarter of 2015 from the third quarter of 2014:

In thousands	Freight Segment	Transit Segment	Total
Third Quarter 2014 Net Sales	\$453,329	\$343,942	\$797,271
Acquisitions	34,009	8,740	42,749
Change in Sales by Product Line:			
Specialty Products & Electronics	23,588	32	23,620
Brake Products	(1,326 )	(15,027 )	(16,353 )
Remanufacturing, Overhaul & Build	21,214	(6,195 )	15,019
Other Transit Products	—	(5,687 )	(5,687 )
Other	(9,454 )	1,167	(8,287 )
Foreign exchange	(14,187 )	(24,618 )	(38,805 )
Third Quarter 2015 Net Sales	\$507,173	\$302,354	\$809,527

Net sales for the three months ended September 30, 2015 increased by \$12.2 million or 1.5% to \$809.5 million from \$797.3 million. The increase is primarily due to sales from acquisitions of \$42.7 million, \$23.6 million for Specialty Products and Electronics sales from higher demand for freight original equipment products, aftermarket electronic and PTC products, and \$15.0 million for Remanufacturing, Overhaul & Build sales from higher demand for aftermarket freight locomotive rebuilds. These increases were partially offset by unfavorable foreign exchange rates which decreased sales \$38.8 million and a decrease in sales from Brake Products of \$16.4 million due to lower demand for original equipment and aftermarket braking equipment.

Freight Segment sales increased by \$53.8 million, or 11.9%, primarily due to an increase of \$23.6 million for Specialty Products and Electronics sales from higher demand for freight original equipment rail products, PTC electronics, and aftermarket rail products, and \$21.2 million for Remanufacturing, Overhaul and Build products due to higher sales for aftermarket freight locomotive rebuilds. Acquisitions increased sales by \$34.0 million, while unfavorable foreign exchange decreased sales by \$14.2 million.

Transit Segment sales decreased by \$41.6 million, or 12.1%, primarily due to unfavorable foreign exchange rates of \$24.6 million and a decrease of \$15.0 million for Brake Products from lower demand for braking products in Europe and braking systems in the U.S. These decreases were partially offset by \$8.7 million of sales from acquisitions.

Cost of Sales and Gross Profit. The following table shows the major components of cost of sales for the periods indicated:

In thousands	Three Months Ended September 30, 2015							
	Freight	Percentage of Sales	Transit	Percentage of Sales	Total	Percentage of Sales		
Material	\$212,341	41.9 %	\$125,387	41.5 %	\$337,728	41.7 %		
Labor	53,111	10.5 %	38,080	12.6 %	91,191	11.3 %		
Overhead	71,948	14.2 %	43,227	14.3 %	115,175	14.2 %		
Other/Warranty	22	0.0 %	8,342	2.8 %	8,364	1.0 %		
Total cost of sales	\$337,422	66.6 %	\$215,036	71.2 %	\$552,458	68.2 %		
In thousands	Three Months Ended September 30, 2014							
	Freight	Percentage of Sales	Transit	Percentage of Sales	Total	Percentage of Sales		
Material	\$189,607	41.8 %	\$149,704	43.5 %	\$339,311	42.6 %		
Labor	49,593	10.9 %	42,471	12.3 %	92,064	11.5 %		
Overhead	58,758	13.0 %	51,664	15.0 %	110,422	13.8 %		
Other/Warranty	3,832	0.8 %	4,184	1.2 %	8,016	1.0 %		
Total cost of sales	\$301,790	66.5 %	\$248,023	72.0 %	\$549,813	68.9 %		

Cost of Sales increased by \$2.7 million to \$552.5 million in the third quarter of 2015 compared to \$549.8 million in the same period of 2014. In the third quarter of 2015, cost of sales as a percentage of sales was 68.2% compared to 68.9% in the same period of 2014. The decrease as a percentage of sales is due to lower raw material costs primarily due to reduced demand for original equipment and aftermarket braking products which carry a higher raw material component.

Freight Segment cost of sales remained consistent as a percentage of sales in the third quarter of 2015 compared to the third quarter of 2014. Transit Segment cost of sales decreased 0.8% as a percentage of sales to approximately 71.2% in the third quarter of 2015 from 72.0% in the third quarter of 2014. The primary reason for the decrease is a 2.0% reduction in raw material as a percentage of sales due to lower original equipment and aftermarket braking products which have higher raw material content.

Included in cost of sales is warranty expense. The provision for warranty expense is generally established for specific losses, along with historical estimates of customer claims as a percentage of sales, which can cause variability in warranty expense between quarters. Warranty expense was \$7.6 million in the third quarter of 2015 compared to \$6.6 million in the third quarter of 2014.

Gross profit for the three months ended September 30, 2015 increased \$9.6 million to \$257.1 million from \$247.5 million in the previous year's quarter and the gross profit margin increased 80 basis points to 31.8% from 31.0% at September 30, 2014. These increases are due to higher sales volume, favorable sales mix, and the reasons discussed above.

Operating expenses The following table shows our operating expenses for the periods indicated:

In thousands	Three Months Ended September 30,				
	2015	Percentage of Sales	2014	Percentage of Sales	
Selling, general and administrative expenses	\$82,206	10.2	% \$88,359	11.1	%
Engineering expenses	17,239	2.1	% 16,391	2.1	%
Amortization expense	5,546	0.7	% 6,731	0.8	%
Total operating expenses	\$104,991	13.0	% \$111,481	14.0	%

Total operating expenses were 13.0% and 14.0% of sales for the third quarters of 2015 and 2014, respectively. Selling, general, and administrative expenses decreased \$6.2 million, or 7.0%, primarily due to lower benefit and incentive compensation, initiatives to reduce costs, and foreign exchange rates. Engineering expense remained consistent period over period at 2.1% as a percentage of sales. Amortization expense of intangibles associated with acquisitions decreased \$1.2 million from the third quarter of 2014 to the third quarter of 2015 due to one-time acquisition related charges in 2014.

The following table shows our segment operating expense for the periods indicated:

In thousands	Three Months Ended September 30,		
	2015	2014	Percent Change
Freight Segment	\$49,375	\$49,462	(0.2) %
Transit Segment	48,993	55,080	(11.1) %
Corporate	6,623	6,939	(4.6) %
Total operating expenses	104,991	111,481	(5.8) %

Freight Segment operating expenses remained consistent period over period, however, decreased as a percentage of sales to 9.7% from 10.9%. This decrease relates primarily to lower benefit and compensation expense. Transit Segment operating expenses decreased 11.1% from the third quarter of 2014 to the third quarter of 2015 largely due to foreign exchange. Transit Segment operating expenses as a percentage of sales stayed consistent at 16.0% of sales. Income from operations Income from operations totaled \$152.1 million or 18.8% of sales in the third quarter of 2015 compared to \$136.0 million or 17.1% of sales in the same period of 2014. Income from operations increased due to higher sales volume coupled with lower operating expenses as discussed above.

Interest expense, net Interest expense, net, remained consistent at roughly \$4.5 million for both the third quarter of 2015 and the third quarter of 2014.

Other (expense)/income, net Other (Expense)/Income, net, increased primarily due to \$2.8 million due to currency losses.

Income taxes The effective income tax rate was 31.5% and 31.3% for the third quarter of 2015 and 2014, respectively. The increase in the effective rate is primarily the result of a higher earnings mix in higher tax rate jurisdictions.

Net income Net income for the third quarter of 2015 was \$99.2 million or \$1.02 per diluted share compared to \$90.2 million or \$0.93 per diluted share in the prior year quarter. The increase in net income is due to higher income from operations partially offset by a higher effective tax rate discussed above.

## FIRST NINE MONTHS OF 2015 COMPARED TO FIRST NINE MONTHS OF 2014

The following table summarizes our results of operations for the periods indicated:

In thousands	Nine months ended September 30,		Percent Change	
	2015	2014		
Freight Segment	\$1,553,734	\$1,250,337	24.3	%
Transit Segment	921,415	973,251	(5.3	)%
Net sales	2,475,149	2,223,588	11.3	%
Income from operations	456,358	390,146	17.0	%
Net income attributable to Wabtec shareholders	\$296,849	\$258,994	14.6	%

The following table shows the major components of the change in sales in the first nine months of 2015 from the first nine months of 2014:

In thousands	Freight Segment	Transit Segment	Total
First Nine Months of 2014 Net Sales	\$1,250,337	\$973,251	\$2,223,588
Acquisitions	106,768	110,766	217,534
Change in Sales by Product Line:			
Specialty Products & Electronics	162,699	10,238	172,937
Brake Products	21,050	(13,549	) 7,501
Remanufacturing, Overhaul & Build	59,501	(64,889	) (5,388
Other Transit Products	—	(11,930	) (11,930
Other	(7,513	) 338	(7,175
Foreign exchange	(39,108	) (82,810	) (121,918
First Nine Months of 2015 Net Sales	\$1,553,734	\$921,415	\$2,475,149

Net sales for the nine months ended September 30, 2015 increased by \$251.5 million to \$2,475.1 million from \$2,223.6 million. The increase is primarily due to a \$172.9 million increase for Specialty Products and Electronics sales from higher demand for freight original equipment products, aftermarket electronic and PTC electronic products. Acquisitions increased sales \$217.5 million and unfavorable foreign exchange decreased sales \$121.9 million. Freight Segment sales increased by \$303.4 million, or 24.3%, primarily due to an increase of \$162.7 million for Specialty Products and Electronics sales from higher demand for freight original equipment rail products, PTC electronics, and aftermarket rail products, \$59.5 million for Remanufacturing, Overhaul and Build products due to higher demand for aftermarket locomotive builds, and \$21.1 million for Brake Products due to higher demand for original equipment brakes. Acquisitions increased sales by \$106.8 million, while unfavorable foreign exchange decreased sales by \$39.1 million.

Transit Segment sales decreased by \$51.8 million, or 5.3%, due to a \$64.9 million decrease in Remanufacturing, Overhaul and Build from lower demand for original transit locomotives primarily related to a multi-year project which was substantially completed in 2014 and a decrease of \$82.8 million related to unfavorable foreign exchange. These decreases were partially offset by \$110.8 million in sales from acquisitions.

## Cost of Sales and Gross Profit.

The following table shows the major components of cost of sales for the periods indicated:

In thousands	Nine months ended September 30, 2015							
	Freight	Percentage of Sales	Transit	Percentage of Sales	Total	Percentage of Sales		
Material	\$652,858	42.0	% \$385,895	41.9	% \$1,038,753	42.0	%	
Labor	165,553	10.7	% 115,870	12.6	% 281,423	11.4	%	
Overhead	214,178	13.8	% 131,932	14.3	% 346,110	14.0	%	
Other/Warranty	9,638	0.6	% 19,037	2.1	% 28,675	1.2	%	
Total cost of sales	\$1,042,227	67.1	% \$652,734	70.9	% \$1,694,961	68.6	%	
In thousands	Nine months ended September 30, 2014							
	Freight	Percentage of Sales	Transit	Percentage of Sales	Total	Percentage of Sales		
Material	\$521,322	41.7	% \$435,558	44.8	% \$956,880	43.0	%	
Labor	130,871	10.5	% 121,831	12.5	% 252,702	11.4	%	
Overhead	165,930	13.3	% 145,250	14.9	% 311,180	14.0	%	
Other/Warranty	2,207	0.2	% 18,934	1.9	% 21,141	1.0	%	
Total cost of sales	\$820,330	65.7	% \$721,573	74.1	% \$1,541,903	69.4	%	

Cost of Sales increased by \$153.1 million to \$1,695.0 million in the first nine months of 2015 compared to \$1,541.9 million in the same period of 2014. In the first nine months of 2015, cost of sales as a percentage of sales was 68.6% compared to 69.4% in the same period of 2014. The decrease as a percentage of sales is due to lower material costs primarily due to lower original equipment transit locomotive sales which carry a higher raw material component.

Freight Segment cost of sales increased 1.4% as a percentage of sales to 67.1% in the first nine months of 2015 from 65.7% in the first nine months of 2014. The increase is primarily due to higher material and overhead costs caused by higher aftermarket freight locomotive sales and original equipment products which carry a higher material component.

Transit Segment cost of sales decreased 3.2% as a percentage of sales to 70.9% in the first nine months of 2015 from 74.1% in the first nine months of 2014. The decrease is primarily due to lower raw material costs caused by lower original equipment locomotive sales and lower original equipment and aftermarket brake product sales which carry a higher raw material component.

Included in cost of sales is warranty expense. The provision for warranty expense is generally established for specific losses, along with historical estimates of customer claims as a percentage of sales, which can cause variability in warranty expense between quarters. Warranty expense was \$21.6 million in the first nine months of 2015 compared to \$22.1 million in the first nine months of 2014.

Gross profit for the nine months ended September 30, 2015 increased \$98.5 million to \$780.2 million from \$681.7 million and the gross profit margin increased 80 basis points to 31.5%. These increases are due to higher sales volume, favorable sales mix, and the reasons discussed above.

Operating expenses The following table shows our operating expenses for the periods indicated:

In thousands	Nine months ended September 30,			
	2015	Percentage of Sales	2014	Percentage of Sales
Selling, general and administrative expenses	\$255,969	10.3	% \$231,422	10.4
Engineering expenses	51,852	2.1	% 43,558	2.0
Amortization expense	16,009	0.6	% 16,559	0.7
Total operating expenses	\$323,830	13.0	% \$291,539	13.1

Total operating expenses were 13.0% of sales for the first nine months of 2015 compared to 13.1% for the same period in the previous year. Selling, general, and administrative expenses increased \$24.5 million, or 10.6%, primarily due to \$22.4 million of additional expenses from acquisitions. Engineering expense increased by \$8.3 million primarily due to a \$5.4 million increase related to new product development and \$2.8 million related to acquisitions, partially offset by lower discretionary spending. Costs related to engineering for specific customer contracts are included in cost of sales. Amortization expense decreased \$0.6 million or 3.3%, due to one-time amortization charges taken in 2014 for acquisitions.

The following table shows our segment operating expense for the periods indicated:

In thousands	Nine months ended September 30,			
	2015	2014	Percent Change	
Freight Segment	\$ 154,015	\$ 135,703	13.5	%
Transit Segment	151,733	139,578	8.7	%
Corporate	18,082	16,258	11.2	%
Total operating expenses	\$ 323,830	\$ 291,539	11.1	%

Segment operating expenses consist of specific segment costs such as, sales and marketing, information technology, insurance, and audit and tax fees, allocated corporate costs, and other segment specific discrete charges. Certain corporate costs are allocated to the Freight and Transit Segments based on segment revenues.

Freight Segment operating expenses increased \$18.3 million, or 13.5%, in the first nine months of 2015 and were 9.9% of sales. The increase primarily relates to \$6.5 million of incremental selling, general and administrative expense and \$0.5 million of incremental engineering expense from acquisitions, and an increase of \$5.2 million in expenses allocated to the operating segments primarily related to business development activities.

Transit Segment operating expenses increased \$12.2 million, or 8.7%, in the first nine months of 2015 and was 8.7% of sales. The increase is primarily related to incremental selling, general, and administrative expense and incremental engineering expense from acquisitions.

Corporate non-allocated operating expenses increased \$1.8 million in the first nine months of 2015 compared to the same period of 2014.

Income from operations Income from operations totaled \$436.0 million or 18.4% of sales in the first nine months of 2015 compared to \$390.1 million or 17.5% of sales in the same period of 2014. Income from operations increased due to higher sales volume and as a percentage of sales, income from operations has increased due to the reasons discussed above.

Interest expense, net Interest expense, net, decreased \$0.9 million in the first nine months of 2015 compared to the same period of 2014 due to lower debt balances.

Other (expense)/income, net Other (Expense)/Income, net, increased \$7.8 million primarily due to currency losses.

Income taxes The effective income tax rate was 31.9% and 31.2% for the first nine months of 2015 and 2014, respectively. The increase in the effective rate is primarily due to a higher earnings mix in higher tax jurisdictions.

Net income Net income for the first nine months of 2015 was \$296.8 million or \$3.05 per diluted share compared to \$259.0 million or \$2.67 per diluted share in the first nine months of 2014. The increase in net income is due to higher income from operations, partially offset by a higher effective tax rate discussed above.

#### Liquidity and Capital Resources

Liquidity is provided primarily by operating cash flow and borrowings under the Company's unsecured credit facility with a consortium of commercial banks. The following is a summary of selected cash flow information and other relevant data:

In thousands	Nine Months Ended September 30,	
	2015	2014
Cash provided by (used for):		
Operating activities	\$255,306	\$230,164
Investing activities	(341,961 )	(330,298 )
Financing activities	(120,833 )	31,561
(Decrease) in cash	\$(217,608 )	\$(73,219 )

Operating activities In the first nine months of 2015 and 2014, cash provided by operations was \$255.3 million and \$230.2 million, respectively. In comparison to the first nine months of 2014, cash provided by operations in 2015 increased due to higher operating results, partially offset by unfavorable working capital requirements. The unfavorable working capital requirements primarily related to an unfavorable change in accounts payable and accrued liabilities of \$121.7 million and \$21.3 million, respectively. These cash outflows were partially offset by a favorable change in accounts receivable of \$88.5 million driven by collections due to achieving certain project related milestones and a favorable change in inventory of \$18.1 million due to successful efforts to control the amount of inventory on hand.

Investing activities In the first nine months of 2015 and 2014, cash used in investing activities was \$342.0 million and \$330.3 million, respectively. The major components of the cash outflow in 2015 were \$100.1 million in net cash paid for acquisitions, planned additions to property, plant and equipment of \$33.1 million for continued investments in our facilities and manufacturing processes, and \$209.1 million for an escrow deposit related to the proposed Faiveley Transport transaction. Refer to Note 2 of the "Notes to Condensed Consolidated Financial Statements" for further information on this subject. This compares to \$299.7 million in net cash paid for acquisitions and \$31.0 million in property, plant, and equipment for investments in the first nine months of 2014. Refer to Note 4 of the "Notes to Condensed Consolidated Financial Statements" for additional information on acquisitions.

Financing activities In the first nine months of 2015, cash used for financing activities was \$120.8 million which included \$390.3 million in proceeds from the revolving credit facility, \$460.3 million in repayments of debt on the revolving credit facility, \$19.3 million of dividend payments, \$22.3 million for the repurchase of 237,027 shares of stock, and \$14.6 million related to payment of income tax withholding on share based compensation. In the first nine months of 2014, cash provided by for financing activities was \$31.6 million, which included \$433.4 million in proceeds from the revolving credit facility, \$363.0 million in repayments of debt on the revolving credit facility, \$4.4 million for the settlement of contingent purchase price obligations related to a prior year acquisition, \$26.8 million for the repurchase of 346,800 shares of stock, and \$13.5 million of dividend payments.

#### Company Stock Repurchase Plan

On December 11, 2013, the Board of Directors amended its stock repurchase authorization to \$200.0 million of the Company's outstanding shares. During the first nine months of 2015, the Company repurchased 237,027 shares, leaving \$151.0 million under the authorization.

The Company intends to purchase shares on the open market or in negotiated or block trades. No time limit was set for the completion of the programs which conforms to the requirements under the 2013 Refinancing Credit Agreement, as well as the 2013 Notes currently outstanding.

#### Contractual Obligations and Off-Balance Sheet Arrangements

As of September 30, 2015, the Company has recognized a total liability of \$13.7 million for unrecognized tax benefits related to uncertain tax positions. At this time, the Company is unable to make a reasonably reliable estimate of the timing of cash settlement for any of the unrecognized tax benefits due to the uncertainty of the timing and outcome of its audits and other factors.

Since December 31, 2014, there have been no other significant changes in the total amount of the Company's contractual obligations or the timing of cash flows in accordance with those obligations, as reported in the Company's Annual Report on Form 10-K for the year ended December 31, 2014.

### Forward Looking Statements

We believe that all statements other than statements of historical facts included in this report, including certain statements under “Business” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” may constitute forward-looking statements. We have based these forward-looking statements on our current expectations and projections about future events. Although we believe that our assumptions made in connection with the forward-looking statements are reasonable, we cannot assure that our assumptions and expectations are correct.

These forward-looking statements are subject to various risks, uncertainties and assumptions about us, including, among other things:

#### Economic and industry conditions

• prolonged unfavorable economic and industry conditions in the markets served by us, including North America, South America, Europe, Australia, Asia and South Africa;

• decline in demand for freight cars, locomotives, passenger transit cars, buses, power generation equipment and related products and services;

• reliance on major original equipment manufacturer customers;

• original equipment manufacturers’ program delays;

• demand for services in the freight and passenger rail industry;

• demand for our products and services;

• orders either being delayed, cancelled, not returning to historical levels, or reduced or any combination of the foregoing;

• consolidations in the rail industry;

• continued outsourcing by our customers; industry demand for faster and more efficient braking equipment;

• fluctuations in interest rates and foreign currency exchange rates; or

• availability of credit.

#### Operating factors

• supply disruptions;

• technical difficulties;

• changes in operating conditions and costs;

• increases in raw material costs;

• successful introduction of new products;

• performance under material long-term contracts;

• labor relations;

• completion and integration of acquisitions; or

• the development and use of new technology.

#### Competitive factors

• the actions of competitors.

#### Political/governmental factors

• political stability in relevant areas of the world;

• future regulation/deregulation of our customers and/or the rail industry;

• levels of governmental funding on transit projects, including for some of our customers;

• political developments and laws and regulations, including those related to PTC;

federal and state income tax legislation;  
the outcome of our existing or any future legal proceedings, including litigation involving our principal customers and any litigation with respect to environmental, asbestos-related matters and pension liabilities; or  
the outcome of negotiations with partners, governments, suppliers, customers or others.

Statements in this 10-Q apply only as of the date on which such statements are made, and we undertake no obligation to update any statement to reflect events or circumstances after the date on which the statement is made or to reflect the occurrence of unanticipated events. Reference is also made to the risk factors set forth in the Company's Annual Report on Form 10-K for the year ended December 31, 2014.

#### Critical Accounting Policies

A summary of critical accounting policies is included in the Company's Annual Report on Form 10-K for the year ended December 31, 2014. In particular, judgment is used in areas such as accounts receivable and the allowance for doubtful accounts, inventories, goodwill and indefinite-lived intangibles, warranty reserves, pensions and postretirement benefits, income taxes and revenue recognition. There have been no significant changes in accounting policies since December 31, 2014.

### Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

#### Interest Rate Risk

In the ordinary course of business, Wabtec is exposed to risks that increases in interest rates may adversely affect funding costs associated with its variable-rate debt. The Company's variable rate debt represents 11% and 23% of total long-term debt at September 30, 2015 and December 31, 2014, respectively. To reduce the impact of interest rate changes on a portion of this variable-rate debt, the Company entered into forward interest rate swap agreements which convert a portion of the debt from variable to fixed-rate borrowings during the term of the swap contract. Refer to Note 6 – Long Term Debt of "Notes to Condensed Consolidated Financial Statements" for additional information regarding interest rate risk.

#### Foreign Currency Exchange Risk

The Company is subject to certain risks associated with changes in foreign currency exchange rates to the extent our operations are conducted in currencies other than the U.S. dollar. For the first nine months of 2015, approximately 52% of Wabtec's net sales were to customers in the United States, 11% in the United Kingdom, 6% in Canada, 6% in Mexico, 3% in Australia, 3% in Brazil, 3% in Germany, 3% in China, and 13% in other international locations. To reduce the impact of changes in currency exchange rates, the Company has periodically entered into foreign currency forward contracts. Refer to "Financial Derivatives and Hedging Activities" in Note 2 of "Notes to Condensed Consolidated Financial Statements" for more information regarding foreign currency exchange risk.

### Item 4. CONTROLS AND PROCEDURES

Wabtec's principal executive officer and its principal financial officer have evaluated the effectiveness of Wabtec's "disclosure controls and procedures," (as defined in Exchange Act Rule 13a-15(e)) as of September 30, 2015. Based upon their evaluation, the principal executive officer and principal financial officer concluded that Wabtec's disclosure controls and procedures are effective to provide reasonable assurance that information required to be disclosed by Wabtec in the reports filed or submitted by it under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and to provide reasonable assurance that information required to be disclosed by Wabtec in such reports is accumulated and communicated to Wabtec's Management, including its principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

There was no change in Wabtec's "internal control over financial reporting" (as defined in Rule 13a-15(f) under the Exchange Act) that occurred during the quarter ended September 30, 2015, that has materially affected, or is reasonably likely to materially affect, Wabtec's internal control over financial reporting.

## PART II—OTHER INFORMATION

### Item 1. LEGAL PROCEEDINGS

There have been no material changes regarding the Company's commitments and contingencies as described in Note 18 of the Company's Annual Report on Form 10-K for the year ended December 31, 2014.

### Item 1A. RISK FACTORS

There have been no material changes in our risk factors from those disclosed in our Annual Report on Form 10-K for the year ended December 31, 2014.

### Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

On December 11, 2013, the Board of Directors amended its stock repurchase authorization to \$200.0 million of the Company's outstanding shares. During the first nine months of 2015, the Company repurchased 237,027 shares, leaving \$151.0 million under the authorization.

The Company intends to purchase shares on the open market or in negotiated or block trades. No time limit was set for the completion of the programs which conforms to the requirements under the 2013 Refinancing Credit Agreement, as well as the 2013 Notes currently outstanding.

### Item 4. MINE SAFETY DISCLOSURES

Not Applicable

### Item 6. EXHIBITS

The following exhibits are being filed with this report:

- 31.1 Rule 13a-14(a) Certification of Chief Executive Officer.
- 31.2 Rule 13a-14(a) Certification of Chief Financial Officer.
- 32.1 Section 1350 Certification of Chief Executive Officer and Chief Financial Officer.
