2. BASIS OF PRESENTATION AND GOING CONCERN

Basis of presentation – The accompanying unaudited interim financial statements of the Company have been prepared in accordance with accounting principles generally accepted in the United States of America and the rules of the Securities and Exchange Commission, and should be read in conjunction with the audited financial statements and notes thereto contained in the Company’s most recent Annual Financial Statements filed with the SEC on Form 10-K. In the opinion of management, all adjustments, consisting of normal recurring adjustments, necessary for a fair presentation of financial position and the results of operations for the interim period presented have been reflected herein. The results of operations for the interim period are not necessarily indicative of the results to be expected for the full year. Notes to the financial statements which would substantially duplicate the disclosures contained in the audited financial statements for the most recent fiscal period, as reported in the Form 10-K, have been omitted.

Going concern – The accompanying financial statements have been prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. The Company has incurred cumulative net losses of \$32,009,141 since its inception and requires capital for its contemplated operational and marketing activities to take place. The Company’s ability to raise additional capital through the future issuances of common stock is unknown. The obtainment of additional financing, the successful development of the Company’s contemplated plan of operations, and its transition, ultimately, to the attainment of profitable operations are necessary for the Company to continue operations. The ability to successfully resolve these factors raise substantial doubt about the Company’s ability to continue as a going concern. The consolidated financial statements of the Company do not include any adjustments that may result from the outcome of these aforementioned uncertainties.

3. SUMMARY OF SIGNIFICANT POLICIES

This summary of significant accounting policies of Skinvisible Inc. is presented to assist in understanding the Company's consolidated financial statements. The consolidated financial statements and notes are representations of the Company's management, who are responsible for their integrity and objectivity. These accounting policies conform to accounting principles generally accepted in the United States of America, and have been consistently applied in the preparation of the consolidated financial statements.

Principles of consolidation – The consolidated financial statements include the accounts of the Company and its subsidiaries. All significant intercompany balances and transactions have been eliminated.

Use of estimates – The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the consolidated financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Significant estimates include estimates used to review the Company's goodwill, impairments and estimations of long-lived assets, revenue recognition on percentage of completion type contracts, allowances for uncollectible accounts, inventory valuation, and the valuations of non-cash capital stock issuances. The Company bases its estimates on historical experience and on various other assumptions that are believed to be reasonable in the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

Cash and cash equivalents – For purposes of the statement of cash flows, the Company considers all highly liquid investments and short-term instruments with original maturities of six months or less to be cash equivalents. There are \$2,520 and \$23,318 in cash and cash equivalents as of June 30, 2018 and December 31, 2017 respectively.

Fair Value of Financial Instruments – The carrying amounts reflected in the balance sheets for cash, accounts payable and accrued expenses approximate the respective fair values due to the short maturities of these items.

As required by the Fair Value Measurements and Disclosures Topic of the FASB ASC, fair value is measured based on a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value as follows: (Level 1) observable inputs such as quoted prices in active markets; (Level 2) inputs, other than the quoted prices in active markets, that are observable either directly or indirectly; and (Level 3) unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions.

The three levels of the fair value hierarchy are described below:

Level 1: Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Level 2: Quoted prices in markets that are not active, or inputs that are observable, either directly or indirectly, for substantially the full term of the asset or liability;

Level 3: Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (supported by little or no market activity).

Revenue recognition

Product sales – Revenues from the sale of products (Invisicare® polymers) are recognized when title to the products are transferred to the customer and only when no further contingencies or material performance obligations are warranted, and thereby have earned the right to receive reasonably assured payments for products sold and delivered.

Royalty sales – The Company also recognizes royalty revenue from licensing its patented product formulations only when earned, when no further contingencies or material performance obligations are warranted, and thereby have earned the right to receive and retain reasonably assured payments.

Distribution and license rights sales – The Company also recognizes revenue from distribution and license rights only when earned, when no further contingencies or material performance obligations are warranted, and thereby have earned the right to receive and retain reasonably assured payments.

Costs of Revenue – Cost of revenue includes raw materials, component parts, and shipping supplies. Shipping and handling costs is not a significant portion of the cost of revenue.

Table of Contents

SKINVISIBLE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

Accounts Receivable – Accounts receivable is comprised of uncollateralized customer obligations due under normal trade terms requiring payment within 30 days from the invoice date. The carrying amount of accounts receivable is reviewed periodically for collectability. If management determines that collection is unlikely, an allowance that reflects management’s best estimate of the amounts that will not be collected is recorded. Management reviews each accounts receivable balance that exceeds 30 days from the invoice date and, based on an assessment of creditworthiness, estimates the portion, if any, of the balance that will not be collected. As of June 30, 2018, the Company had not recorded a reserve for doubtful accounts. The Company has \$1,135,000 in convertible notes payable which are secured by the accounts receivable of a license agreement the Company has with Women's Choice Pharmaceuticals, LLC on its proprietary prescription product, ProCort®.

Inventory – Substantially all inventory consists of finished goods and are valued based upon first-in first-out ("FIFO") cost, not in excess of market. The determination of whether the carrying amount of inventory requires a write-down is based on an evaluation of inventory.

Goodwill and intangible assets – The Company follows Financial Accounting Standard Board’s (FASB) Codification Topic 350-10 (“ASC 350-10”), “*Intangibles – Goodwill and Other*”. According to this statement, goodwill and intangible assets with indefinite lives are no longer subject to amortization, but rather an annual assessment of impairment by applying a fair-value based test. Fair value for goodwill is based on discounted cash flows, market multiples and/or appraised values as appropriate. Under ASC 350-10, the carrying value of assets are calculated at the lowest level for which there are identifiable cash flows.

Income taxes – The Company accounts for its income taxes in accordance with FASB Codification Topic ASC 740-10, “*Income Taxes*”, which requires recognition of deferred tax assets and liabilities for future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and tax credit carry-forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

Stock-based compensation – The Company follows the guidelines in FASB Codification Topic ASC 718-10 “*Compensation-Stock Compensation*”, which requires the measurement and recognition of compensation expense for all share-based payment awards made to employees and directors including employee stock options and employee stock

purchases related to an Employee Stock Purchase Plan based on the estimated fair values.

Stock based compensation expense recognized under ASC 718-10 for the six months ended June 30, 2018 and 2017 totaled \$0 and \$115,332, respectively.

Earnings (loss) per share – The Company reports earnings (loss) per share in accordance with FASB Codification Topic ASC 260-10 “*Earnings Per Share*”, Basic earnings (loss) per share is computed by dividing income (loss) available to common shareholders by the weighted average number of common shares available. Diluted earnings (loss) per share is computed similar to basic earnings (loss) per share except that the denominator is increased to include the number of additional common shares that would have been outstanding if the potential common shares had been issued and if the additional common shares were dilutive. Diluted earnings (loss) per share has not been presented since the effect of the assumed exercise of options and warrants to purchase common shares (common stock equivalents) would have an anti-dilutive effect.

Recently issued accounting pronouncements – The Company has evaluated the all recent accounting pronouncements through ASU 2018-06, and believes that none of them will have a material effect on the Company's financial position, results of operations or cash flows except as discussed below.

Revenue from Contracts with Customers. In May 2014, the FASB issued Accounting Standards Update No. 2014-09 (“ASU 2014-09”), which supersedes nearly all existing revenue recognition guidance under U.S. GAAP. The core principle of ASU 2014-09 is to recognize revenues when promised goods or services are transferred to customers in an amount that reflects the consideration to which an entity expects to be entitled for those goods or services. ASU 2014-09 defines a five step process to achieve this core principle and, in doing so, more judgment and estimates may be required within the revenue recognition process than are required under existing U.S. GAAP. Additionally, the new guidance requires enhanced disclosures about the nature, amount, timing, and uncertainty of revenue and cash flows arising from customer contracts, including revenue recognition policies to identify performance obligations, assets recognized from costs incurred to obtain and fulfill a contract, and significant judgments in measurement and recognition.

In July 2015, the FASB made a decision to defer the effective date of the new standard for one year and permit early adoption as of the original effective date. The Company is has reviewed its revenue streams and does not believe that the adoption of this standard has a material effect on its revenue recognition in 2017 or 2018.

Company Overview

We, through our wholly owned subsidiary Skinvisible Pharmaceuticals Inc., are a pharmaceutical research and development ("R&D") company that has developed and patented an innovative polymer delivery system, Invisicare® and formulated over forty topical skin products, which we out-license globally. We were incorporated in 1998, and target an estimated \$80 billion global skincare and dermatology market and a \$30 billion global over-the-counter market as well as other healthcare / medical and consumer goods markets.

Table of Contents

With the research and development complete on forty products and numerous patents issued (technology and product patents), we are ready to monetize our investment. Our business model will continue to be to out-license our patented prescription and over-the-counter (“OTC”) products featuring Invisicare to established manufacturers and marketers of brands internationally and to maximize profits from the products we have already out-licensed. We have also formed a commercial subsidiary, Kintari Int. Inc. with subsidiaries Kintari USA Inc. and Kintari Canada Inc., in order to take our cosmeceutical and select OTC products with Invisicare to market.

The opportunity for us to license our products continues to be a viable model as the need for pharmaceutical companies to access external R&D companies for new products due to their own down-sizing or elimination of internal R&D departments. The demand for our products is enhanced due to the granting of key US and international patents and the completed development of a number of unique products.

Strategic Growth Opportunities

Our growth strategy is to:

1. Generate revenue from direct sales of our cosmeceutical/OTC product line;
2. Generate revenue from online sales and private label / bulk orders of our Kintari branded products;
3. Capitalize on the success of current licensees;
4. Increase the value of our current pipeline; and
5. Boost licensing revenues by securing additional licensees globally and develop a robust royalty revenue stream that will finance our future growth.

Our Cosmeceutical/OTC Product Line

Kintari Int. Inc.

DermSafe®, our hand sanitizer formulated with Invisicare® and chlorhexidine gluconate has been launched in Canada by our subsidiary Kintari Canada Inc. where it has Health Canada approval. Kintari Products in China:

Skinvisible has an agreement in place with InterSpace Global, Inc. InterSpace Global Inc. is an exporter of “Made in USA” products and has offices in Salt Lake City, Utah and Shenzhen, China. This agreement provides for an efficient export of Skinvisible’s products from the USA and Canada into Greater China (Includes China, Hong Kong, Macau, Taiwan, Singapore, Malaysia, Korea and Thailand).

According to the agreement, InterSpace Global Inc. will sell Kintari products to Chinese consumers through a network of online shopping malls and other channels.

In addition to DermSafe, Skinvisible will supply its Kintari –branded portfolio of globally patented skincare products made with its Invisicare® delivery technology.

The Kintari product portfolio consists of two anti-aging products to help fight the signs of aging, a broad spectrum sunscreen along with our latest Hand & Body Lotion products. All products are made with our patented Invisicare technology.

Our anti-aging products have been developed using proven anti-aging ingredients with scientific evidence of their effectiveness at reducing the look of fine lines and wrinkles resulting in youthful looking skin. These potent ingredients will be powered by patented Invisicare technology, providing consumers with unique, effective products, which we believe cannot be duplicated.

Our sunscreen is a broad spectrum SPF 30 known as Skinbrella®. We completed independent testing to validate our broad spectrum sunscreen claims according to the labeling guidelines of the FDA, which are designed to help reduce the incidents of skin cancer in the U.S. Our claims are as follows:

- Claim # 1 – Broad-Spectrum: According to the FDA, in order for a sunscreen to be labeled “broad spectrum” it must prove it protects against both UVA and UVB rays by having an SPF (Sun Protection Factor) of at least 15 and a critical wave length of at least 370 nm. Our sunscreen has surpassed both of these criteria, allowing our broad spectrum sunscreen label to also state “prevents sunburn, skin cancer and aging due to the sun.”
- Claim # 2 – Water-Resistant 80 Minutes: The FDA sunscreen water resistant claim requires that a sunscreen must have the same SPF after being in water or sweating for 40 or 80 minutes. Our testing was conducted at

an independent laboratory specializing in sunscreen testing. The test involved human subjects that applied sunscreen to their arm, followed by the immersion of the arm into a Jacuzzi for 80 minutes (10 minutes in / 10 minutes out). Our sunscreen successfully completed this testing and is allowed to use “Water-resistant for 80 Minutes” on its sunscreen label, the longest length of time allowed by the FDA.

- Claim # 3 – Unique Patented Technology / Eight-Hour Photostability: As previously announced, we were granted a patent from the United States Patent and Trademark Office entitled “Sunscreen Composition with Enhanced UVA Absorber Stability and Methods”, which provides protection until November 2029. Skinvisible successfully formulated a unique Invisicare® delivery system specifically for stabilizing avobenzone; the key sunscreen used in the USA. Data submitted to the US patent office proved that our sunscreen provides a minimum of eight hours of photostability.

Cannabis Products

On September 15, 2016, we licensed the exclusive world rights to our topical and transdermal cannabis products formulated with Invisicare to CannaSkin, LLC, a cannabis product licensing company with international contacts in the medical marijuana industry. This agreement was canceled on June 28, 2017 and all rights reverted back to Skinvisible.

Table of Contents

In September 2017 Skinvisible formed a wholly-owned Canadian subsidiary called Ovation Science Inc. (“Ovation”). Ovation was subsequently granted worldwide rights to Invisicare products formulated with cannabis or hemp seed oil. A license agreement with Canopy Growth Inc. for the Canadian rights was also assigned to Ovation. This was followed by a license agreement with Lighthouse Strategies, LLC for the US rights in dispensaries and the non-exclusive rights outside of dispensaries in the USA. A term of the potential merger agreement with Quoin Pharmaceuticals, Inc. involves Skinvisible Related Parties to assume Skinvisible’s ownership in Ovation in lieu of payment of a portion of outstanding debt.

Capitalize On Current Licensees:

We have: Avon Products globally and Women’s Choice Pharmaceuticals in the United States.

We continue to work diligently with our licensees to ensure they have a smooth manufacturing process, ongoing R&D support and marketing feedback.

Avon Products, Inc.

Product: We have a long-term contract with Avon globally for over ten years to provide Invisicare polymer for their long-lasting lipsticks.

Sales: Invisicare polymers are purchased directly from Skinvisible.

Women’s Choice Pharmaceuticals

Product: ProCort®, long lasting prescription hemorrhoid cream launched in the United States August 2011.

Sales and Royalties: Skinvisible receives a royalty based on net sales of ProCort. Women’s Choice has been successfully growing their sales of ProCort®

Additional Skinvisible Products

Sunless Tanning Products

We have developed a new sunless tanning mousse / foam which uses a unique foam with Invisicare®, developed specifically for its foaming properties. This adds to Skinvisible's line of sunless tanning products which includes sunless tanning lotions (light, medium and dark), pre-sun moisturizer and after-sun moisturizer along with sunless tanning spray products for commercial use. The addition of a sunless tanning mousse enhances this line of products.

Sunscreen Products

We have developed 3 broad spectrum sunscreens, with SPF 15, 30 and 50 (the highest SPF allowed by the FDA). All are formulated with Avobenzone, the only UVA sun filter allowed under the US FDA monograph. This UVA/UVB sunscreen was granted a patent from the United States patent office in 2013. Avobenzone is known for breaking down in the sun after only two hours – thus the requirement to reapply every 2 hours. Skinvisible's patent was granted based on Invisicare's® minimum 8 hour photo stability. For countries outside the United States, Skinvisible has additionally patented UVA/UVB sunscreens formulated with Tinosorb S.

Increasing The Value of Skinvisible's Pipeline:

We have a pipeline of over forty products which are available for licensing. Testing is conducted in-house generating proof of concept including release of the active ingredient as well as long term shelf life (stability). Additional studies conducted on specific products including skin sensitivity, toxicity and product efficacy are outsourced to FDA compliant laboratories. These studies are critical in attracting potential licensees. Our clinical strategy is to:

Table of Contents

- Our clinical strategy is to find a partner for our prescription product portfolio. This would allow for a partner to seek FDA approval using the 505b2 pathway for one or more of our products.
- Expand the availability of our DermSafe® hand sanitizer in China and other countries internationally. A strategy is being developed along with a larger global strategy to bring DermSafe to the EU and Asia.

Secure Additional Licensees:

We are in discussions and undergoing internal discussions with various pharmaceutical companies for licenses.

To facilitate further expansion, we are seeking an exclusive license with a proven US or global based Pharmaceutical Company for our existing Rx product formulations. The licensee would be expected to pay all costs in getting FDA approval. The licensee would pay Skinvisible for the license in milestone payments as Clinical Phases are proven.

Off Balance Sheet Arrangements

Critical Accounting Policies

In December 2001, the SEC requested that all registrants list their most “critical accounting policies” in the Management Discussion and Analysis. The SEC indicated that a “critical accounting policy” is one which is both important to the portrayal of a company’s financial condition and results, and requires management’s most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain.

Going concern – The accompanying financial statements have been prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. We have incurred cumulative net losses of \$32,009,141 since our inception and require capital for our contemplated operational and marketing activities to take place. Our ability to raise additional capital through the future issuances of common

stock is unknown. The obtainment of additional financing, the successful development of our contemplated plan of operations, and our transition, ultimately, to the attainment of profitable operations are necessary for us to continue operations. The ability to successfully resolve these factors raise substantial doubt about our ability to continue as a going concern. These consolidated financial statements do not include any adjustments that may result from the outcome of these aforementioned uncertainties.

Product sales – Revenues from the sale of products (Invisicare® polymers) are recognized when title to the products are transferred to the customer and only when no further contingencies or material performance obligations are warranted, and thereby have earned the right to receive reasonably assured payments for products sold and delivered.

Royalty sales – We also recognize royalty revenue from licensing our patented product formulations only when earned, with no further contingencies or material performance obligations are warranted, and thereby have earned the right to receive and retain reasonably assured payments.

Distribution and license rights sales – We also recognize revenue from distribution and license rights only when earned (and are amortized over a five year period), with no further contingencies or material performance obligations are warranted, and thereby have earned the right to receive and retain reasonably assured payments.

Costs of Revenue – Cost of revenue includes raw materials, component parts, and shipping supplies. Shipping and handling costs is not a significant portion of the cost of revenue.

Table of Contents

Accounts Receivable – Accounts receivable is comprised of uncollateralized customer obligations due under normal trade terms requiring payment within 30 days from the invoice date. The carrying amount of accounts receivable is reviewed periodically for collectability. If management determines that collection is unlikely, an allowance that reflects management’s best estimate of the amounts that will not be collected is recorded. Management reviews each accounts receivable balance that exceeds 30 days from the invoice date and, based on an assessment of creditworthiness, estimates the portion, if any, of the balance that will not be collected. As of June 30, 2018, the Company had not recorded a reserve for doubtful accounts. The Company has \$1,170,000 in convertible notes payable which are secured by the accounts receivable of a license agreement the Company has with Women's Choice Pharmaceuticals, LLC on its proprietary prescription product, ProCort®.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

A smaller reporting company is not required to provide the information required by this Item.

Item 4. Controls and Procedures

Disclosure Controls and Procedures

We carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of June 30, 2018. This evaluation was carried out under the supervision and with the participation of our Chief Executive Officer and our Chief Financial Officer. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of June 30, 2018, our disclosure controls and procedures were not effective due to the presence of material weaknesses in internal control over financial reporting.

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company’s annual or interim financial

statements will not be prevented or detected on a timely basis. Management has identified the following material weaknesses which have caused management to conclude that, as of June 30, 2018, our disclosure controls and procedures were not effective: (i) inadequate segregation of duties and effective risk assessment; and (ii) insufficient written policies and procedures for accounting and financial reporting with respect to the requirements and application of both US GAAP and SEC guidelines.

Remediation Plan to Address the Material Weaknesses in Internal Control over Financial Reporting

Our company plans to take steps to enhance and improve the design of our internal controls over financial reporting. During the period covered by this quarterly report on Form 10-Q, we have not been able to remediate the material weaknesses identified above. To remediate such weaknesses, we plan to implement the following changes during our fiscal year ending December 31, 2018: (i) appoint additional qualified personnel to address inadequate segregation of duties and ineffective risk management; and (ii) adopt sufficient written policies and procedures for accounting and financial reporting. The remediation efforts set out are largely dependent upon our securing additional financing to cover the costs of implementing the changes required. If we are unsuccessful in securing such funds, remediation efforts may be adversely affected in a material manner.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting during the three months ended June 30, 2018 that have materially affected, or are reasonable likely to materially affect, our internal control over financial reporting.
