COMMERCIAL BANKSHARES, INC. AND SUBSIDIARY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

1. INTERIM FINANCIAL STATEMENTS

The accompanying unaudited condensed consolidated financial statements, which are for interim periods, do not include all disclosures provided in the annual consolidated financial statements. These financial statements and the footnotes thereto should be read in conjunction with the annual consolidated financial statements for the year ended December 31, 2003 for Commercial Bankshares, Inc. (the "Company").

All material intercompany balances and transactions have been eliminated.

In the opinion of management, the accompanying unaudited condensed consolidated financial statements contain all adjustments necessary for a fair presentation of the financial statements. Those adjustments are of a normal recurring nature. The results of operations for the nine month period ended September 30, 2004, are not necessarily indicative of the results to be expected for the full year.

In preparing the consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities at the dates of the statements of financial condition and revenues and expenses for the periods covered. Actual results could differ from those estimates and assumptions.

Edgar Filing: COMMERCIAL BANKSHARES INC - Form 10-Q

2. STOCK OPTIONS

The following table provides the Statement of Financial Accounting Standard (SFAS) No. 148 disclosure of pro forma net income and earnings per share as if the Company had adopted the fair value method of accounting for stock-based awards for the three and nine month periods ended September 30, 2004 compared to the same periods in the prior year:

| | Three Months Ended September 30, | | Nine Months Ended September 30, | |

| Earnings per share, diluted pro forma | \$.45 | \$.42 | \$ 1.32 | \$ 1.22 |

(1) The fair value of each option has been estimated on September 30, 2004 using the Black Scholes option pricing model.

3. PER SHARE DATA

Earnings per share have been computed by dividing net income by the weighted average number of shares of common stock (basic earnings per share) and by the weighted average number of shares of common stock plus dilutive shares of common stock equivalents outstanding (diluted earnings per share). Common stock equivalents include the effect of all outstanding stock options, using the treasury stock method. Per share data and weighted average shares outstanding have been adjusted for the three and nine months ended September 30, 2003 for the five-for-four stock split which was effective on January 2, 2004.

Edgar Filing: COMMERCIAL BANKSHARES INC - Form 10-Q

The following tables reconcile the weighted average shares used to calculate basic and diluted earnings per share (EPS) (in thousands, except per share amounts):

Options to purchase 76,875 and 2,500 shares of common stock at \$26.66 and \$25.94, respectively, per share were outstanding at September 30, 2004, and 80,625 shares of common stock at \$26.66 per share were outstanding at September 30, 2003, which were not included in the computation of diluted earnings per share because the options' exercise price was greater than the average market price of the common shares.

4. COMMITMENTS AND CONTINGENCIES

Standby letters of credit are conditional commitments issued by Commercial Bank of Florida ("the Bank") to guarantee the performance of a customer to a third party. The Bank had outstanding standby letters of credit in the amount of \$5.6 million as of September 30, 2004 as compared to \$4.4 million as of December 31, 2003. Approximately \$5.5 million of the standby letters of credit outstanding at September 30, 2004 were issued

Edgar Filing: COMMERCIAL BANKSHARES INC - Form 10-Q

subsequent to December 31, 2003 and are being carried at fair value. The Bank's exposure to credit loss in the event of non-performance by the other party to the financial instrument for standby letters of credit is represented by the contractual amounts of those instruments. The Bank uses the same credit policies in establishing conditional obligations as those for on-balance sheet instruments. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. Collateral held varies but may include cash, or the goods acquired by the customer for which the standby letter of credit was issued. Since certain letters of credit are expected to expire without being drawn upon, they do not necessarily represent future cash requirements.

5. SUBSEQUENT EVENTS

On October 14, 2004 Commercial Bankshares, Inc. announced that its Board of Directors had authorized a stock repurchase program allowing the Company to repurchase up to \$4 million of its common stock in open market and negotiated transactions during the next 24 months. Stock may be repurchased, from time to time, at such prices and on such conditions as the Executive Management of the Company determines to be advantageous. To date, there have been no purchases under this plan.

6. NEW ACCOUNTING PRONOUNCEMENTS

In March 2004, the FASB Emerging Issues Task Force (EITF) reached a consensus on EITF issue No. 03-1 (EITF 03-1), "The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments." The consensus provided guidance for the meaning of other-than-temporary impairment and its application to investments classified as either available-for-sale or held-to-maturity under SFAS 115, "Accounting for Certain Investment in Debt and Equity Securities" and to equity securities accounted for under the cost method. The guidance was effective for other-than-temporary impairment evaluations made in reporting periods beginning after June 15, 2004. In September 2004, the Financial Accounting Standards Board (FASB) issued a final FASB Staff Position, FSP EITF Issue 03-1-1, which delayed the effective date for the measurement and recognition guidance of EITF 03-1. We are not able to evaluate the impact of adopting EITF 03-1 until final guidance has been issued.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of the Company's consolidated results of operations and financial condition should be read in conjunction with the unaudited interim consolidated financial statements and the related notes included herein and the consolidated financial statements for the year ended December 31, 2003 appearing in the Company's Annual Report on Form 10-K filed with the Securities and Exchange Commission.

RESULTS OF OPERATIONS

Three and Nine Months Ended September 30, 2004 and 2003

The Company's net income for the three months ended September 30, 2004, was \$2.86 million, a 10% increase over net income for the same three month period ended September 30, 2003 of \$2.61 million. Basic and diluted earnings per share were \$.48 and \$.46, respectively, for the three months ended September 30, 2004, as compared to \$.45 and \$.43, respectively, for the three months ended September 30, 2003.

Results for the nine months ended September 30, 2004, showed net income of \$8.37 million, a 10% increase over net income for the nine months ended September 30, 2003 of \$7.59 million. Basic and diluted earnings per share were \$1.42 and \$1.35, respectively, for the nine months ended September 30, 2004 as compared to \$1.32 and \$1.25, respectively, for the nine months ended September 30, 2003.

The Company's third quarter tax-equivalent net interest income increased 11% to \$8.2 million, from \$7.4 million in the third quarter in 2003. The increase is the result of growth in average earning assets, which have increased 11% to \$791 million for the third quarter of 2004, as compared to \$715 million for the third quarter of 2003. The tax-equivalent net interest yield for the three months ended September 30, 2004 was 4.13%, as compared to 4.10% for the same period in 2003.

Tax-equivalent net interest income for the nine months ended September 30, 2004 increased 15% to \$23.9 million from the same nine month period one year ago. The net interest yield for the nine months ended September 30, 2004 was 4.13% as compared to 4.01% for the same period in 2003. The increase in yield is the result of a decrease in the cost of funds for the nine months ended September 30, 2004. The net interest margin has been calculated on a tax-equivalent basis, which includes an adjustment for interest on tax-exempt securities.

Non-interest income decreased by \$57,000, or 7%, for the third quarter of 2004, and \$332,000, or 13%, for the nine months ended September 30, 2004,

as compared to the corresponding periods in 2003. The decrease in the third quarter is due to a decrease in service charges on deposit accounts of \$64,000. The decrease in the nine months ended September 30, 2004 is also due to a decrease in service charges on deposit accounts of \$166,000

Edgar Filing: COMMERCIAL BANKSHARES INC - Form 10-Q

and security gains in 2003 of \$139,000.

Non-interest expenses for the third quarter of 2004 increased \$137,000, or 3% from the same quarter in 2003, due primarily to increases in salaries and employee benefits and professional fees. Salaries and employee benefits increased \$47,000, or 2%, due to an increase in officer salaries of \$12,000, and an increase in medical insurance premiums and retirement plan contributions of \$33,000. Professional fees increased by \$50,000 due to additional audit and consulting fees related to Sarbanes-Oxley 404 requirements.

Non-interest expenses for the nine months ended September 30, 2004 increased \$1.04 million, or 9%, from the nine months ended September 30, 2003 due to an increase in salaries and employee benefits, professional fees, data processing, occupancy and donation expenses. Salaries increased \$444,000, or 7%, due to the addition of three officers and due to normal salary increases. Employee benefits increased \$128,000, or 19%, due to increased medical insurance premiums and retirement plan contributions. Professional fees increased \$194,000, or 106%, due to several SEC filings, including the 2004 Employee and Outside Director Stock Options Plans and an S-8, legal matters in the normal course of business and increased audit and consulting fees related to Sarbanes-Oxley 404 requirements. Data processing increased \$62,000, or 8%, due to increases from our service provider for new platforms, increased number of accounts processed and regular contractual increases. Occupancy increased \$47,000, or 5%, due to increased real estate taxes and repairs. Donation expense increased \$37,000, or 103%, due to charitable gifts to several South Florida organizations.

Company management continually reviews and evaluates the allowance for loan losses. In evaluating the adequacy of the allowance for loan losses, management considers the results of its methodology, along with other factors such as the amount of non-performing loans and the economic conditions affecting the Company's markets and customers. The allowance for loan losses was \$5.26 million at September 30, 2004, as compared with \$4.87 million at December 31, 2003. For the nine months ended September 30, 2004, the allowance for loan losses was increased with a provision for loan losses of \$250,000 and increased by approximately \$140,000 in net recoveries. For the nine months ended September 30, 2003, the allowance was increased with a provision for loan losses of \$135,000 and decreased by approximately \$90,000 in net charge-offs. The allowance as a percentage of total loans has increased to 1.19% at September 30, 2004, from 1.18% at December 31, 2003. Based on the nature of the loan portfolio and prevailing economic factors, management believes that the current level of the allowance for loan losses is sufficient to absorb probable losses in the loan portfolio.

Approximately \$287 million, or 65%, of total loans was secured by non-residential real estate, and \$99 million, or 22%, of total loans was secured by residential real estate as of September 30, 2004. Virtually all loans are within the Company's markets in Miami-Dade and Broward counties.

The Company had no non-accrual loans at September 30, 2004.

The objective of liquidity management is to maintain cash flow requirements to meet immediate and ongoing future needs for loan demand, deposit withdrawals, maturing liabilities, and expenses. In evaluating actual and anticipated needs, management seeks to obtain funds at the most economical cost. Management believes that the level of liquidity is sufficient to meet future funding requirements.

For banks, liquidity represents the ability to meet both loan commitments and withdrawals of deposited funds. Funds to meet these needs can be obtained by converting liquid assets to cash or by attracting new deposits or other sources of funding. Many factors affect a bank's ability to meet liquidity needs. The Bank's principal sources of funds are deposits, repurchase agreements, payments on loans, maturities and sales of investments. As an additional source of funds, the Bank has credit availability with the Federal Home Loan Bank amounting to \$130 million, and Federal Funds purchased lines available at correspondent banks amounting to \$23 million as of September 30, 2004.

The Bank's primary use of funds is to originate loans and purchase investment securities. The Bank purchased \$92 million of investment securities during the first nine months of 2004, and loans increased by \$27 million. Funding for the above came from increases in deposits of \$55 million, an increase in securities sold under agreements to repurchase of \$13 million and increases from proceeds of maturities and prepayments of investment securities of \$59 million.

In accordance with risk-based capital guidelines issued by the Federal Reserve Board, the Company and the Bank are each required to maintain a minimum ratio of total capital to risk weighted assets of 8%. Additionally, all bank holding companies and member banks must maintain "core" or "Tier 1" capital of at least 3% of total assets ("leverage ratio"). Member banks operating at or near the 3% capital level are expected to have well diversified risks, including no undue interest rate risk exposure, excellent control systems, good earnings, high asset quality, high liquidity, and well managed on- and off-balance sheet activities, and in general be considered strong banking organizations with a composite 1 rating under the CAMELS rating system of banks. For all but the most highly rated banks meeting the above conditions, the minimum leverage ratio is to be 3% plus an additional 100 to 200 basis points. The Tier 1 Capital, Tier 2 Capital, and Leverage Ratios of the Company were 12.83%, 14.22%, and 7.82%, respectively, as of September 30, 2004.

CRITICAL ACCOUNTING POLICIES

The Company's critical accounting policies are disclosed on page 16 of its 2003 Annual Report under the heading Management's Discussion and Analysis of Financial Condition and Results of Operations, which report is filed with the Annual Report on Form 10-K for the year ended December 31, 2003. On an ongoing basis, the Company evaluates its estimates and assumptions, including those related to valuation of the loan portfolio. Since the date of the 2003 Annual Report, there have been no material changes to the Company's critical accounting policies.

FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q may contain forward-looking statements (within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended), representing the Company's expectations and beliefs concerning future events. The actual results of the Company could differ materially from those indicated by the forward-looking statement because of various risks and uncertainties, including, without limitation, the Company's effective and timely initiation and development of new client relationships, the maintenance of existing client relationships and programs, the recruitment and retention of qualified personnel, possible or proposed products, branch offices, or strategic plans, the ability to increase sales of Company products and to increase deposits, the adequacy of cash flows from operations and available financing to fund capital needs and future growth, changes in management's estimate of the adequacy of the allowance for loan losses, changes in the overall mix of the Company's loan and deposit products, the impact of repricing and competitors' pricing initiatives on loan and deposit products as well as other changes in competition, the extent of defaults, the extent of losses given such defaults, the amount of lost interest income that may result in the event of a severe recession, the status of the national economy and the South Florida economy in particular, the impact that changing interest rates have on the Company's net interest margin, changes in governmental rules and regulations applicable to the Company and other risks in the Company's filings with the Securities and Exchange Commission. The Company cautions that its discussion of these matters is further qualified, as these risks and uncertainties are beyond the ability of the Company to control. In many cases, the Company cannot predict the risks and uncertainties that could cause actual results to differ materially from those indicated in the forward-looking statements.

The Company undertakes no obligation to revise or update these forward-looking statements to reflect events or circumstances after the date of this filing.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

ASSET/LIABILITY MANAGEMENT AND INTEREST RATE RISK

Changes in interest rates can substantially impact the Company's long-term profitability and current income. An important part of management's efforts to maintain long-term profitability is the management of interest rate risk. The goal is to maximize net interest income within acceptable levels of interest rate risk and liquidity. Interest rate exposure is managed by monitoring the relationship between interest-earning assets and interest-bearing liabilities, focusing on the size, maturity or repricing date, rate of return and degree of risk. The Asset/Liability Management Committee of the Bank oversees the interest rate risk management and reviews the Bank's asset/liability structure on a quarterly basis.

The Bank uses interest rate sensitivity or GAP analysis to monitor the amount and timing of balances exposed to changes in interest rates. The GAP analysis is not relied upon solely to determine future reactions to interest rate changes because it is presented at one point in time and could change significantly from day-to-day. Other methods such as simulation analysis are utilized in evaluating the Bank's interest rate risk position. The table presented below shows the Bank's GAP analysis

at September 30, 2004.

INTEREST RATE SENSITIVITY ANALYSIS (Dollars in Thousands)

12

Management's assumptions reflect the Bank's estimate of the anticipated repricing sensitivity of non-maturity deposit products. Money market accounts have been allocated 25% to the "91-181 days" category, 25% to the "182-365 days" category, and 50% to the "over 1 year" category. Interest checking and savings are allocated to the "over 1 year" category.

Edgar Filing: COMMERCIAL BANKSHARES INC - Form 10-Q

The Bank uses simulation analysis to quantify the effects of various immediate parallel shifts in interest rates on net interest income over the next 12 month period. Such a "rate shock" analysis requires key assumptions which are inherently uncertain, such as deposit sensitivity, cash flows from investments and loans, reinvestment options, management's capital plans, market conditions, and the timing, magnitude and frequency of interest rate changes. As a result, the simulation is only a best-estimate and cannot accurately predict the impact of the future interest rate changes on net income. As of September 30, 2004, the Bank's simulation analysis projects a decrease to net interest income of 8.02%, assuming an immediate parallel shift downward in interest rates by 200 basis points. If rates rise by 200 basis points, the simulation analysis projects net interest income would increase by 1.83%. These projected levels are within the Bank's policy limits.

ITEM 4. CONTROLS AND PROCEDURES

(a) Evaluation of Disclosure Controls and Procedures

The Company has carried out an evaluation, under the supervision and with the participation of our management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the Company's disclosure controls and procedures as of the end of the period covered by this Quarterly Report. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective as of the end of the period covered by this Quarterly Report in timely alerting them as to material information relating to the Company (including its consolidated subsidiary) required to be included in this Quarterly Report.

(b) Changes in Internal Control Over Financial Reporting

There have been no significant changes in the Company's internal control over financial reporting during the quarter ended September 30, 2004 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.
