PART I

FINANCIAL INFORMATION

Cautionary Note Regarding Forward-Looking Statements:

This Quarterly Report on Form 10-Q contains historical information and forward-looking statements based on information currently available to our management. The forward-looking statements in this report, including those made in Item 2 (Management's Discussion and Analysis of Financial Condition and Results of Operations) of Part I, are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, as amended. These safe harbor provisions encourage reporting companies to provide prospective information to investors. Forward-looking statements can be identified by the use of certain words, such as "anticipate," "believe," "estimate," "expect," "intend," "plan," "project" and other similar terms and language. We believe the forward-looking statements are reasonable based on currently available information. However, forward-looking statements involve risks, uncertainties and assumptions, whether known or unknown, that could cause our actual results, business, financial condition and cash flows to differ materially from those anticipated in the forward-looking statements. A discussion of important factors relating to forward-looking statements is included in Item 1A (Risk Factors) of Part I of our Annual Report on Form 10-K for the year ended December 31, 2011 ("2011 Form 10-K"). Readers should not unduly rely on the forward-looking statements included in this Form 10-Q because such statements speak only to the date they were made. Unless otherwise required by applicable securities laws, we undertake no obligation or duty to update or revise any forward-looking statements contained herein to reflect subsequent events or circumstances or the occurrence of unanticipated events.

Item 1. Financial Statements.

The interim consolidated financial statements contained herein reflect all adjustments which, in the opinion of management, are necessary for a fair statement of the financial condition, results of operations and cash flows for the periods presented. The interim consolidated financial statements have been prepared in accordance with the U.S. Securities and Exchange Commission ("SEC") instructions to Form 10-Q and were also prepared without audit. The interim consolidated financial statements do not include all information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements; although in management's opinion, the disclosures are adequate so that the information presented is not misleading. Operating results for the three-month and nine-month periods ended September 30, 2012 are not necessarily indicative of the results that may be expected for the year ending December 31, 2012. In the opinion of management, the information set forth in the accompanying consolidated condensed balance sheets is fairly stated in all material respects in relation to the consolidated balance sheets from which it has been derived. These interim consolidated financial statements and notes thereto should be read in conjunction with the financial statements and accompanying notes contained in our 2011 Form 10-K.

Table of Contents

WERNER ENTERPRISES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

(1) Accounting Policies

Presentation of Comprehensive Income

Effective January 1, 2012, we adopted, on a retrospective basis, the new accounting guidance on the presentation of comprehensive income. As a result of the adoption, we report total comprehensive income and the components of net income and other comprehensive income in two separate consecutive statements. Adoption of this guidance had no effect on our consolidated financial position, results of operations and cash flows.

(2) Credit Facilities

As of September 30, 2012, we have committed credit facilities with two banks. These include a \$175 million four-year credit facility which will expire on May 31, 2016 and a \$75 million five-year credit facility which will expire on May 31, 2017. Borrowings under these credit facilities bear variable interest based on the London Interbank Offered Rate ("LIBOR"). As of September 30, 2012, we had no borrowings outstanding under these credit facilities with banks. The \$250 million of credit available under these facilities is further reduced by \$33.8 million in stand-by letters of credit under which we are obligated. Each of the debt agreements includes, among other things, two financial covenants requiring us (i) not to exceed a maximum ratio of total debt to total capitalization and (ii) not to exceed a maximum ratio of total funded debt to earnings before interest, income taxes, depreciation and amortization (as such terms are defined in each credit facility). At September 30, 2012, we were in compliance with these covenants.

(3) Income Taxes

For the three-month and nine-month periods ended September 30, 2012, there were no material changes to the total amount of unrecognized tax benefits. We accrued interest of \$8 thousand during the three-month period and \$159 thousand during the nine-month period ended September 30, 2012. Our total gross liability for unrecognized tax benefits at September 30, 2012 is \$11.3 million. If recognized, \$7.2 million of unrecognized tax benefits would impact our effective tax rate. Interest of \$3.5 million has been reflected as a component of the total liability. We expect no other significant increases or decreases for uncertain tax positions during the next twelve months.

We file U.S. federal income tax returns, as well as income tax returns in various states and several foreign jurisdictions. The years 2009 through 2011 are open for examination by the Internal Revenue Service ("IRS"), and various years are open for examination by state and foreign tax authorities. State and foreign jurisdictional statutes of limitations generally range from three to four years.

In May 2010, the IRS began an audit of our 2007 and 2008 federal income tax returns. During the second quarter of 2012, we received a notice of deficiency including proposed penalties related to our like-kind exchange program for tractors and trailers (such program was discontinued in 2010). The proposed tax deficiency relates to timing differences for recognition of gains on sales of equipment and if upheld would allow us to file for tax refunds for tax years 2009-2011 relating to additional depreciation deductions. If the IRS position is upheld, we would be subject to interest charges, which we estimate as of September 30, 2012 to be approximately \$2 million after considering the tax deductibility of the interest payments, and we believe it is unlikely that the IRS would prevail in the assessment of penalties. On July 19, 2012, we filed a petition in the United States Tax Court to contest the deficiency. The IRS responded to our petition at the end of September 2012, and we have until early November 2012 to file a reply to the IRS response. We believe our tax position complies with applicable tax law, and we will vigorously defend against the IRS position in tax court. We have not accrued a liability for any proposed penalties or interest because we believe we will ultimately prevail in this matter.

(4) Commitments and Contingencies

As of September 30, 2012, we have committed to property and equipment purchases of approximately \$56.0 million.

We are involved in certain claims and pending litigation arising in the ordinary course of business. At this time, management believes the ultimate resolution of these matters will not materially affect our consolidated financial statements.

(5) Earnings Per Share

Basic earnings per share is computed by dividing net income by the weighted average number of common shares outstanding

Table of Contents

during the period. Diluted earnings per share is computed by dividing net income by the weighted average number of common shares outstanding plus the effect of dilutive potential common shares outstanding during the period using the treasury stock method. Dilutive potential common shares include outstanding stock options and restricted stock awards. There are no differences in the numerators of our computations of basic and diluted earnings per share for any period presented. The computation of basic and diluted earnings per share is shown below (in thousands, except per share amounts).

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2012	2011	2012	2011
Net income	\$25,128	\$29,578	\$77,053	\$73,389
Weighted average common shares outstanding	72,879	72,811	72,864	72,770
Dilutive effect of stock-based awards	566	420	550	433
Shares used in computing diluted earnings per share	73,445	73,231	73,414	73,203
Basic earnings per share	\$0.34	\$0.41	\$1.06	\$1.01
Diluted earnings per share	\$0.34	\$0.40	\$1.05	\$1.00

There were no options to purchase shares of common stock that were outstanding during the periods indicated above that were excluded from the computation of diluted earnings per share because the option purchase price was greater than the average market price of the common shares during the period.

**(6) Stock-Based Compensation**

Our Equity Plan provides for grants of nonqualified stock options, restricted stock and stock appreciation rights. The Board of Directors or the Compensation Committee of our Board of Directors determines the terms of each award, including the type, recipients, number of shares subject to and vesting conditions of each award. Stock option and restricted stock awards are described below. No awards of stock appreciation rights have been issued under the Equity Plan to date. The maximum number of shares of common stock that may be awarded under the Equity Plan is 20,000,000 shares. The maximum aggregate number of shares that may be awarded to any one person under the Equity Plan is 2,562,500. As of September 30, 2012, there were 7,878,922 shares available for granting additional awards.

We apply the fair value method of accounting for stock-based compensation awards granted under our Equity Plan. Stock-based employee compensation expense is included in salaries, wages and benefits within the Consolidated Statements of Income. As of September 30, 2012, the total unrecognized compensation cost related to non-vested stock-based compensation awards was approximately \$7.4 million and is expected to be recognized over a weighted average period of 2.9 years. The following table summarizes the stock-based compensation expense and related income tax benefit recognized in the Consolidated Statements of Income (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2012	2011	2012	2011
Stock options:				
Pre-tax compensation expense	\$103	\$144	\$289	\$404
Tax benefit	42	60	117	167
Stock option expense, net of tax	\$61	\$84	\$172	\$237
Restricted stock:				
Pre-tax compensation expense	\$1,038	\$586	\$3,085	\$1,473
Tax benefit	420	241	1,249	607
Restricted stock expense, net of tax	\$618	\$345	\$1,836	\$866

We do not have a formal policy for issuing shares upon an exercise of stock options or vesting of restricted stock, so such shares are generally issued from treasury stock. From time to time, we repurchase shares of our common stock,

the timing and amount of which depends on market and other factors. Historically, the shares acquired from such repurchases have provided us with sufficient quantities of stock to issue for stock-based compensation. Based on current treasury stock levels, we do not expect to repurchase additional shares specifically for stock-based compensation during 2012.

Table of Contents

## Stock Options

Stock options are granted at prices equal to the market value of the common stock on the date the option award is granted. Option awards currently outstanding become exercisable in installments from 24 to 72 months after the date of grant. The options are exercisable over a period not to exceed ten years and one day from the date of grant.

The following table summarizes stock option activity for the nine months ended September 30, 2012:

	Number of Options (in thousands)	Weighted Average Exercise Price (\$)	Weighted Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value (in thousands)
Outstanding at beginning of period	1,133	\$ 18.01		
Options granted	—	\$ —		
Options exercised	(22)	\$ 17.20		
Options forfeited	—	\$ —		
Options expired	—	\$ —		
Outstanding at end of period	1,111	\$ 18.03	3.57	\$3,731
Exercisable at end of period	838	\$ 17.85	2.62	\$2,939

We did not grant any stock options during the three-month and nine-month periods ended September 30, 2012 and September 30, 2011. The fair value of stock option grants is estimated using a Black-Scholes valuation model. No stock option exercises occurred during the three-month period ended September 30, 2012. The total intrinsic value of stock options exercised was \$0.3 million for the three-month period ended September 30, 2011, and \$0.2 million and \$2.0 million for the nine-month periods ended September 30, 2012 and September 30, 2011, respectively.

## Restricted Stock

Restricted stock awards entitle the holder to shares of common stock when the award vests. The value of these shares may fluctuate according to market conditions and other factors. Restricted stock awards currently outstanding vest over periods ranging from 12 to 84 months from the grant date of the award. The restricted shares do not confer any voting or dividend rights to recipients until such shares fully vest and do not have any post-vesting sales restrictions. The following table summarizes restricted stock activity for the nine months ended September 30, 2012:

	Number of Restricted Shares (in thousands)	Weighted Average Grant Date Fair Value (\$)
Nonvested at beginning of period	646	\$20.29
Shares granted	45	\$22.65
Shares vested	(20)	\$23.30
Shares forfeited	—	\$ —
Nonvested at end of period	671	\$20.36

We granted 40,000 and 45,000 shares of restricted stock during the three-month and nine-month periods ended September 30, 2012, respectively, and we granted 40,000 shares of restricted stock during the three-month and nine-month periods ended September 30, 2011. We estimate the fair value of restricted stock awards based upon the market price of the underlying common stock on the date of grant, reduced by the present value of estimated future dividends because the awards are not entitled to receive dividends prior to vesting. Our estimate of future dividends is based on the most recent quarterly dividend rate at the time of grant, adjusted for any known future changes in the dividend rate. The present value of estimated future dividends for the 2012 grants was calculated using the following weighted-average assumptions:

Dividends per share (quarterly amounts)	\$0.05
---	--------

Risk-free interest rate	0.8	%
-------------------------	-----	---

The total fair value of previously granted restricted stock awards vested during the three-month and nine-month periods ended September 30, 2012 was \$0.5 million. We withheld shares based on the closing stock price on the vesting date to settle the

10

---

Table of Contents

employees' minimum statutory obligation for the applicable income and other employment taxes. Total cash remitted for the employees' tax obligations to the relevant taxing authorities was \$0.1 million for the nine-month period ended September 30, 2012 and is reflected as a financing activity within the Consolidated Statements of Cash Flows; the 6,290 shares reacquired to satisfy the tax withholding obligations were recorded as treasury stock.

## (7) Segment Information

We have two reportable segments – Truckload Transportation Services (“Truckload”) and Value Added Services (“VAS”). The Truckload segment consists of two operating units, One-Way Truckload and Specialized Services, that are aggregated because they have similar economic characteristics and meet the other aggregation criteria described in the accounting guidance for segment reporting. One-Way Truckload is comprised of the following operating fleets: (i) the regional short-haul (“Regional”) fleet transports a variety of consumer nondurable products and other commodities in truckload quantities within geographic regions across the United States using dry van trailers; (ii) the medium-to-long-haul van (“Van”) fleet provides comparable truckload van service over irregular routes; and (iii) the expedited (“Expedited”) fleet provides time-sensitive truckload services utilizing driver teams. Specialized Services provides truckload services dedicated to a specific customer, generally for a retail distribution center or manufacturing facility, including services for products requiring specialized trailers such as flatbed or temperature-controlled trailers. Revenues for the Truckload segment include a small amount of non-trucking revenues which consist primarily of the portion of shipments delivered to or from Mexico where we utilize a third-party capacity provider.

The VAS segment generates the majority of our non-trucking revenues through four operating units that provide non-trucking services to our customers. These four VAS operating units are as follows: (i) truck brokerage (“Brokerage”) uses contracted carriers to complete customer shipments; (ii) freight management (“Freight Management”) offers a full range of single-source logistics management services and solutions; (iii) the intermodal (“Intermodal”) unit offers rail transportation through alliances with rail and drayage providers as an alternative to truck transportation; and (iv) Werner Global Logistics international (“WGL”) provides complete management of global shipments from origin to destination using a combination of air, ocean, truck and rail transportation modes.

We generate other revenues related to third-party equipment maintenance, equipment leasing and other business activities. None of these operations meets the quantitative reporting thresholds. As a result, these operations are grouped in “Other” in the tables below. “Corporate” includes revenues and expenses that are incidental to our activities and are not attributable to any of our operating segments. We do not prepare separate balance sheets by segment and, as a result, assets are not separately identifiable by segment. We have no significant intersegment sales or expense transactions that would require the elimination of revenue between our segments in the table below.

The following table summarizes our segment information (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2012	2011	2012	2011
Revenues				
Truckload Transportation Services	\$420,003	\$428,565	\$1,270,381	\$1,270,855

### Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Management's Discussion and Analysis of Financial Condition and Results of Operations (the "MD&A") summarizes the financial statements from management's perspective with respect to our financial condition, results of operations, liquidity and other factors that may affect actual results. The MD&A is organized in the following sections:

Overview

Results of Operations

Liquidity and Capital Resources

Contractual Obligations and Commercial Commitments

Off-Balance Sheet Arrangements

Regulations

Critical Accounting Policies

Accounting Standards

The MD&A should be read in conjunction with our 2011 Form 10-K.

Overview:

We operate in the truckload and logistics sectors of the transportation industry. In the truckload sector, we focus on transporting consumer nondurable products that generally ship more consistently throughout the year. In the logistics sector, besides managing transportation requirements for individual customers, we provide additional sources of truck capacity, alternative modes of transportation, a global delivery network and systems analysis to optimize transportation needs. Our success depends on our ability to efficiently and effectively manage our resources in the delivery of truckload transportation and logistics services to our customers. Resource requirements vary with customer demand, which may be subject to seasonal or general economic conditions. Our ability to adapt to changes in customer transportation requirements is essential to efficiently deploy resources and make capital investments in tractors and trailers (with respect to our Truckload segment) or obtain qualified third-party capacity at a reasonable price (with respect to our VAS segment). Although our business volume is not highly concentrated, we may also be affected by our customers' financial failures or loss of customer business.

Operating revenues reported in our operating statistics table under "Results of Operations" are categorized as (i) trucking revenues, net of fuel surcharge, (ii) trucking fuel surcharge revenues, (iii) non-trucking revenues, including VAS, and (iv) other operating revenues. Trucking revenues, net of fuel surcharge, and trucking fuel surcharge revenues are generated by the operating units in the Truckload segment (One-Way Truckload and Specialized Services).

Non-trucking revenues, including VAS, are generated primarily by the four operating units in our VAS segment (Brokerage, Freight Management, Intermodal and WGL), and a small amount is generated by the Truckload segment. Other operating revenues are generated from other business activities such as third-party equipment maintenance and equipment leasing. In third quarter 2012, trucking revenues (net of fuel surcharge) and trucking fuel surcharge revenues accounted for 82% of total operating revenues, and non-trucking and other operating revenues accounted for 18% of total operating revenues.

Trucking revenues, net of fuel surcharge, are typically generated on a per-mile basis and also include revenues such as stop charges, loading and unloading charges, equipment detention charges and equipment repositioning charges.

Because fuel surcharge revenues fluctuate in response to changes in fuel costs, we identify them separately in the operating statistics table and exclude them from the statistical calculations to provide a more meaningful comparison between periods. The key statistics used to evaluate trucking revenues, net of fuel surcharge, are (i) average revenues per tractor per week, (ii) average revenues per mile (total and loaded), (iii) average monthly miles per tractor, (iv) average percentage of empty miles (miles without trailer cargo), (v) average trip length (in loaded miles) and (vi) average number of tractors in service. General economic conditions, seasonal trucking industry freight patterns and industry capacity are important factors that impact these statistics. Our Truckload segment also generates a small amount of revenues categorized as non-trucking revenues, related to shipments delivered to or from Mexico where the Truckload segment utilizes a third-party capacity provider. We exclude such revenues from the statistical calculations. Our most significant resource requirements are company drivers, independent contractors, tractors and trailers. Our financial results are affected by company driver and independent contractor availability and the markets for new and used revenue equipment. Our most significant operating costs are fuel, fuel taxes (included in taxes and licenses

expense), driver salaries and benefits, insurance and supplies and maintenance. To mitigate our risk to fuel price increases, we recover from our customers additional fuel surcharges that generally recoup a majority of the increased fuel costs; however, we cannot assure that current recovery levels will continue in future periods. We are self-insured for a significant portion of bodily injury, property damage and cargo claims; workers' compensation claims; and associate health claims (supplemented by premium-based insurance coverage above certain

Table of Contents

dollar levels). For that reason, our financial results may also be affected by driver safety, medical costs, weather, legal and regulatory environments and insurance coverage costs to protect against catastrophic losses.

The operating ratio is a common industry measure used to evaluate our profitability and that of our Truckload segment operating fleets. The operating ratio consists of operating expenses expressed as a percentage of operating revenues. The most significant variable expenses that impact the Truckload segment are driver salaries and benefits, fuel, fuel taxes, payments to independent contractors (included in rent and purchased transportation expense), supplies and maintenance and insurance and claims. These expenses generally vary based on the number of miles driven. We also evaluate these costs on a per-mile basis to adjust for the impact on the percentage of total operating revenues caused by changes in fuel surcharge revenues, per-mile rates charged to customers and non-trucking revenues. As discussed further in the comparison of operating results for third quarter 2012 to third quarter 2011, several industry-wide issues could cause costs to increase in future periods. These issues include shortages of drivers or independent contractors, changing fuel prices, higher new truck and trailer purchase prices and compliance with new or proposed regulations. Our main fixed costs include depreciation expense for tractors and trailers and equipment licensing fees (included in taxes and licenses expense). The Truckload segment requires substantial cash expenditures for tractor and trailer purchases. We fund these purchases with net cash from operations and financing available under our existing credit facilities, as management deems necessary.

We provide non-trucking services primarily through the four operating units within our VAS segment. Unlike our Truckload segment, the VAS segment is less asset-intensive and is instead dependent upon qualified associates, information systems and qualified third-party capacity providers. The largest expense item related to the VAS segment is the cost of purchased transportation we pay to third-party capacity providers. This expense item is recorded as rent and purchased transportation expense. Other operating expenses consist primarily of salaries, wages and benefits. We evaluate the VAS segment's financial performance by reviewing the gross margin percentage (revenues less rent and purchased transportation expenses expressed as a percentage of revenues) and the operating income percentage. The gross margin percentage can be impacted by the rates charged to customers and the costs of securing third-party capacity. We generally do not have contracted long-term rates for the cost of third-party capacity, and we cannot assure that our operating results will not be adversely impacted in the future if our ability to obtain qualified third-party capacity providers changes or the rates of such providers increase.

Table of Contents

## Results of Operations:

The following operating statistics table sets forth certain industry data regarding our freight revenues and operations for the periods indicated.

	Three Months Ended September 30,			Nine Months Ended September 30,			% Change	
	2012	2011		2012	2011			
Trucking revenues, net of fuel surcharge (1)	\$326,222	\$331,346	(1.5 )%	\$979,422	\$981,502	(0.2 )%

Total tractors	7,110	7,250		7,110	7,250			
Total trailers (Truckload and Intermodal, at quarter end)	23,600	22,925		23,600	22,925			

(1) Amounts in thousands.

(2) Operating expenses expressed as a percentage of operating revenues. Operating ratio is a common measure in the trucking industry used to evaluate profitability.

(3) Net of fuel surcharge revenues.

(4) "Empty" refers to miles without trailer cargo.

Three and nine months ended September 30, 2011 average trip length (loaded) corrected. See [www.werner.com](http://www.werner.com) ("Investors" tab under "Featured Documents") for correction of prior quarterly and annual average trip length data.

(5) The average trip length correction has no impact on the prior quarterly reporting of any other operating statistic (such as miles, revenues, empty miles, tractors, etc).

The following table sets forth the operating revenues, operating expenses and operating income for the Truckload segment. Operating revenues for the Truckload segment are primarily categorized as trucking revenues, net of fuel surcharge, and trucking fuel surcharge revenues but also include a small amount of non-trucking revenues as

described on page 12. These non-trucking revenues were \$3.7 million and \$2.5 million for the three-month periods ended September 30, 2012 and September 30, 2011, respectively, and \$10.1 million and \$8.1 million for the nine-month periods ended September 30, 2012 and September 30, 2011, respectively.

Table of Contents

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2012		2011		2012		2011	
Truckload Transportation Services (amounts in thousands)	\$	%	\$	%	\$	%	\$	%
Operating revenues	\$420,003	100.0	\$428,565	100.0	\$1,270,381	100.0	\$1,270,855	100.0
Operating expenses	383,344	91.3	382,850	89.3	1,157,284	91.1	1,156,110	91.0
Operating income	\$36,659	8.7	\$45,715	10.7	\$113,097	8.9	\$114,745	9.0

Higher fuel prices and higher fuel surcharge revenues increase our consolidated operating ratio and the Truckload segment's operating ratio when fuel surcharges are reported on a gross basis as revenues versus netting against fuel expenses. Eliminating fuel surcharge revenues, which are generally a more volatile source of revenue, provides a more consistent basis for comparing the results of operations from period to period. The following table calculates the Truckload segment's operating ratio as if fuel surcharges are excluded from operating revenues and instead reported as a reduction of operating expenses.

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2012		2011		2012		2011	
Truckload Transportation Services (amounts in thousands)	\$	%	\$	%	\$	%	\$	%
Operating revenues	\$420,003		\$428,565		\$1,270,381		\$1,270,855	
Less: trucking fuel surcharge revenues	90,143		94,326		280,739		280,786	
Operating revenues, excluding fuel surcharge revenues	329,860	100.0	334,239	100.0	989,642	100.0	990,069	100.0
Operating expenses	383,344		382,850		1,157,284		1,156,110	
Less: trucking fuel surcharge revenues	90,143		94,326		280,739		280,786	
Operating expenses, excluding fuel surcharge revenues	293,201	88.9	288,524	86.3	876,545	88.6	875,324	88.4
Operating income	\$36,659	11.1	\$45,715	13.7	\$113,097	11.4	\$114,745	11.6

The following table sets forth the VAS segment's non-trucking revenues, rent and purchased transportation expense, gross margin, other operating expenses and operating income. Other operating expenses for the VAS segment primarily consist of salaries, wages and benefits expense. VAS also incurs smaller expense amounts in the supplies and maintenance, depreciation, rent and purchased transportation (excluding third-party capacity costs), insurance, communications and utilities and other operating expense categories.

Edgar Filing: WERNER ENTERPRISES INC - Form 10-Q

Three Months Ended September 30, 2012 Compared to Three Months Ended September 30, 2011

Operating Revenues

Operating revenues decreased 0.6% for the three months ended September 30, 2012, compared to the same period of the prior year. Trucking revenues, net of fuel surcharge, decreased 1.5% due primarily to a 3.1% decrease in average monthly miles per tractor and a 0.3% decrease in the average number of tractors in service, offset by a 1.9% increase in average revenues per total mile.

Freight demand in third quarter 2012 did not show normal seasonal improvement from mid-August through September; in contrast, we experienced seasonal strengthening in demand during the same period in third quarter 2011. In third quarter 2012,

## Table of Contents

we believe our customers generally chose to keep their inventory levels leaner in a market with economic and political uncertainty. Freight trends for October 2012 have continued to trend below levels for October 2011 but began to improve in the latter portion of the month.

Average revenues per loaded mile, net of fuel surcharge, increased 2.6% from \$1.752 in third quarter 2011 to \$1.797 in third quarter 2012. In comparison, average revenues per total mile, net of fuel surcharge, increased 1.9% because our average percentage of empty miles increased from 11.94% in third quarter 2011 to 12.48% in third quarter 2012. Due to a 2.7% lower average trip length, our empty miles per trip remained flat at 67 miles per trip in third quarter 2012 and third quarter 2011. Lower than anticipated freight volumes caused our loads-to-truck ratio in our Truckload segment to be slightly below equilibrium for much of third quarter 2012. As a result, spot pricing rates trended lower, and the number of special freight projects with customers declined for both our truck fleets and VAS Brokerage unit in third quarter 2012 compared to third quarter 2011. Project freight is generally of a higher volume and shorter duration and therefore commands a premium price. We continue to work jointly with our customers to secure sustainable transportation solutions across all modes and to offset increased rates through enhanced optimization and transportation solutions whenever possible.

Average monthly miles per tractor decreased from 9,881 in third quarter 2011 to 9,575 in third quarter 2012 (3.1% decrease) due to several factors. We had a decrease in student/trainer driver teams, a 2.7% reduction in our average trip length in miles and changes in truck counts by fleet within our Specialized Services unit. The average number of tractors in service decreased slightly, by 0.3%, from 7,246 in third quarter 2011 to 7,222 in third quarter 2012. We ended third quarter 2012 with 7,110 trucks compared to 7,250 at the end of third quarter 2011 and 7,325 at the end of second quarter 2012. This truck decline resulted primarily from our decision to exit certain less profitable customer business during third quarter 2012. We cannot predict whether future driver shortages, if any, will adversely affect our ability to maintain our fleet size or return our fleet to our previously stated goal of 7,300 trucks. If such a driver market shortage was to occur, it could result in a fleet size reduction, and our results of operations could be adversely affected.

We continue to diversify our business model. Our goal is to attain a more balanced revenue portfolio comprised of one-way truckload, specialized and logistics (which includes the VAS segment) services by growing our logistics services revenues. Our Specialized Services unit ended third quarter 2012 with 3,285 trucks (46% of our total fleet). Trucking fuel surcharge revenues represent collections from customers for the increase in fuel and fuel-related expenses, including the fuel component of our independent contractor cost (recorded as rent and purchased transportation expense) and fuel taxes (recorded in taxes and licenses expense), when diesel fuel prices rise. Conversely, when fuel prices decrease, fuel surcharge revenues decrease. These revenues decreased 4.4% from \$94.3 million in third quarter 2011 to \$90.1 million in third quarter 2012 due primarily to lower total miles in third quarter 2012. On a total-mile basis, trucking fuel surcharge revenues decreased 0.4 cents, from 43.9 cents in third quarter 2011 to 43.5 cents in third quarter 2012. However, the average weekly survey prices upon which fuel surcharge rates are based were slightly higher in third quarter 2012 than in the same period of 2011. We attribute this resulting per-mile decline in fuel surcharge to a combination of factors including (i) increases in the amount of non-contractual revenue where rates are quoted inclusive of fuel surcharge and (ii) changes in the mix of customer freight. To lessen the effect of fluctuating fuel prices on our margins, we collect fuel surcharge revenues from our customers for the cost of diesel fuel and taxes in excess of specified base fuel price levels according to terms in our customer contracts. Fuel surcharge rates generally adjust weekly based on an independent U.S. Department of Energy fuel price survey which is released every Monday. Our fuel surcharge programs are designed to (i) recoup higher fuel costs from customers when fuel prices rise and (ii) provide customers with the benefit of lower fuel costs when fuel prices decline. These programs generally enable us to recover a majority, but not all, of the fuel price increases. The remaining portion is generally not recoverable because it results from empty and out-of-route miles (which are not billable to customers) and truck idle time. Fuel prices that change rapidly in short time periods also impact our recovery because the surcharge rate in most programs only changes once per week.

VAS revenues are generated by its four operating units and exclude revenues for VAS shipments transferred to the Truckload segment, which are recorded as trucking revenues by the Truckload segment. VAS revenues increased 7.6% from \$76.6 million in third quarter 2011 to \$82.5 million in third quarter 2012. The gross number of VAS

shipments increased by 1% year over year, and VAS shifted 3% more shipments not committed to third-party capacity providers to our Truckload segment. Thus, the net number of VAS shipments moved by third-party capacity providers was flat in third quarter 2012 compared to third quarter 2011. VAS gross margin dollars increased 5.1% from \$12.0 million in third quarter 2011 to \$12.6 million for the same period in 2012, and the gross margin percentage decreased slightly from 15.6% in 2011 to 15.3% in 2012 during the same third quarter periods. VAS operating income decreased 7.2% from \$4.1 million in third quarter 2011 to \$3.8 million in third quarter 2012. The following table shows the changes in VAS shipment volume and average revenue (excluding logistics fee revenue) per shipment for all VAS shipments:

Table of Contents

	Three Months Ended September 30,					Nine Months Ended September 30,				
	2012	2011	Difference	% Change		2012	2011	Difference	% Change	
Total VAS shipments	65,989	65,343	646	1	%	201,185	188,450	12,735	7	%
Less: Non-committed shipments to Truckload segment	20,473	19,853	620	3	%	58,438	58,505	(67)	0	%
Net VAS shipments	45,516	45,490	26	0	%	142,747	129,945	12,802	10	%
Average revenue per shipment	\$1,651	\$1,556	\$95	6	%	\$1,589	\$1,520	\$69	5	%

Brokerage revenues in third quarter 2012 increased 7% compared to third quarter 2011 due to an 8% increase in average revenue per shipment, partially offset by a 1% decrease in shipment volume. Brokerage gross margin percentage declined 60 basis points due to lower special project business, and Brokerage operating income in third quarter 2012 was higher than in third quarter 2011. Intermodal revenues increased 10%, and Intermodal operating income was higher comparing third quarter 2012 to third quarter 2011. WGL revenues increased slightly in third quarter 2012 compared to third quarter 2011 while operating income declined.

Operating Expenses

Our operating ratio (operating expenses expressed as a percentage of operating revenues) was 91.7% for the three months ended September 30, 2012, compared to 90.2% for the three months ended September 30, 2011. Expense items that impacted the overall operating ratio are described on the following pages. The tables on page 15 show the operating ratios and operating margins for our two reportable segments, Truckload and VAS.

The following table sets forth the cost per total mile of operating expense items for the Truckload segment for the periods indicated. We evaluate operating costs for this segment on a per-mile basis, which is a better measurement tool for comparing the results of operations from period to period.

	Three Months Ended September 30,			Increase (Decrease) per Mile	Nine Months Ended September 30,			Increase (Decrease) per Mile
	2012	2011			2012	2011		
Salaries, wages and benefits	\$0.614	\$0.582	\$0.032		\$0.612	\$0.589	\$0.023	
Fuel	0.473	0.479	(0.006)	)	0.475	0.481	(0.006)	)
Supplies and maintenance	0.203	0.195	0.008		0.197	0.187	0.010	
Taxes and licenses	0.106	0.111	(0.005)	)	0.107	0.109	(0.002)	)
Insurance and claims	0.069	0.072	(0.003)	)	0.077	0.077	—	
Depreciation	0.203	0.185	0.018		0.197	0.181	0.016	
Rent and purchased transportation	0.179	0.162	0.017		0.173	0.167	0.006	
Communications and utilities	0.016	0.017	(0.001)	)	0.016	0.018	(0.002)	)
Other	(0.015)	(0.021)	0.006		(0.015)	(0.018)	0.003	

Independent contractor costs are included in rent and purchased transportation expense. Independent contractors supply their own tractors and drivers and are responsible for their operating expenses (including driver pay, fuel, supplies and maintenance and fuel taxes). Independent contractor miles as a percentage of total miles were 11.4% for third quarter 2012 compared to 10.6% for third quarter 2011. This increase in independent contractor miles as a percentage of total miles shifted costs from other expense categories to the rent and purchased transportation category. Due to this increase, we estimate that rent and purchased transportation expense for the Truckload segment was higher by approximately 1.2 cents per total mile, and other expense categories had offsetting decreases on a total-mile basis in (i) salaries, wages and benefits, 0.4 cents; (ii) fuel, 0.4 cents; (iii) depreciation, 0.2 cents; (iv) supplies and maintenance, 0.1 cent; and (v) taxes and licenses, 0.1 cent.

Salaries, wages and benefits in the Truckload segment increased 3.2 cents per mile on a total-mile basis in third quarter 2012 compared to third quarter 2011. Approximately half of the increase in salaries expense related to driver

pay, as we made certain pay adjustments over the last year to attract and retain drivers for specific fleets. This increase was partially offset by the minimal shift from this expense category (approximately 0.4 cents per mile) to rent and purchased transportation expense because of the increase in independent contractor miles as a percentage of total miles. The remainder of the increase in this expense category resulted from (i) higher stock-based compensation expense, (ii) the effects of lower miles per truck during third quarter 2012, (iii) a slight increase in the ratio of tractors to non-drivers and (iv) higher employee benefits expense including healthcare. Non-driver

## Table of Contents

salaries, wages and benefits in the non-trucking VAS segment increased 5.1%, and net VAS shipments retained by VAS were flat.

We renewed our workers' compensation insurance coverage for the policy year beginning April 1, 2012. Our coverage levels are the same as the prior policy year. We continue to maintain a self-insurance retention of \$1.0 million per claim. Our workers' compensation insurance premium rate for the policy year beginning April 2012 is slightly lower than the rate for the previous policy year.

The driver recruiting and retention market became more challenging in third quarter 2012 compared to second quarter 2012. We believe that driver pay increases by our competitors, a slightly lower number of and increased competition for truck driving school graduates and an improved housing construction market were all contributing factors.

However, we continue to believe our position in the current driver market is better than that of many competitors because over 70% of our driving jobs are in more attractive, shorter-haul Regional and Specialized Services fleet operations that enable us to return drivers to their homes on a more frequent and consistent basis. In the event the domestic economy strengthens, we expect driver market challenges to increase further. We are unable to predict whether we will experience future driver shortages. If such a shortage was to occur and driver pay rate increases became necessary to attract and retain drivers, our results of operations would be negatively impacted to the extent that we could not obtain corresponding freight rate increases.

Fuel decreased 0.6 cents per total mile for the Truckload segment in third quarter 2012 compared to third quarter 2011 due to improved miles per gallon ("mpg"), a shift from this expense category (approximately 0.4 cents per mile) to rent and purchased transportation expense because of the increase in independent contractor miles as a percentage of total miles, partially offset by higher average diesel fuel prices. Average diesel fuel prices were 7 cents per gallon higher in third quarter 2012 than in third quarter 2011.

We continue to employ measures to improve our fuel mpg such as (i) limiting truck engine idle time, (ii) optimizing the speed, weight and specifications of our equipment and (iii) implementing mpg-enhancing equipment changes to our fleet. We continue to invest in fuel-saving equipment solutions such as (i) new trucks with EPA 2010 compliant engines, (ii) more aerodynamic truck features, (iii) idle reduction systems, (iv) tire inflation systems and (v) trailer skirts that reduce our fuel gallons purchased and improve our mpg. These measures resulted in an improvement in mpg in third quarter 2012 compared to third quarter 2011. However, fuel savings from better mpg is partially offset by higher depreciation expense and the additional cost of diesel exhaust fluid (required in certain tractors with engines that meet the 2010 EPA emission standards). Although our fuel management programs require significant investment and research and development, we intend to continue these and other environmentally conscious initiatives, including our active participation as a U.S. Environmental Protection Agency (the "EPA") SmartWay Transport Partner. The SmartWay Transport Partnership is a national voluntary program developed by the EPA and freight industry representatives to reduce greenhouse gases and air pollution and promote cleaner, more efficient ground freight transportation.

For October 2012, the average diesel fuel price per gallon was approximately 26 cents higher than the average diesel fuel price per gallon in the same period of 2011 and approximately 25 cents higher than in fourth quarter 2011.

Shortages of fuel, increases in fuel prices and petroleum product rationing can have a materially adverse effect on our operations and profitability. We are unable to predict whether fuel price levels will increase or decrease in the future or the extent to which fuel surcharges will be collected from customers. As of September 30, 2012, we had no derivative financial instruments to reduce our exposure to fuel price fluctuations.

Supplies and maintenance for the Truckload segment increased 0.8 cents per total mile in third quarter 2012 compared to third quarter 2011 due primarily to higher tractor and trailer maintenance and increases in a combination of expenses including driver advertising, travel expenses and driver loadings and unloadings, partially offset by a decrease in maintenance on APUs. We continue to buy new trucks to replace older trucks we sell or trade, and as a result, we reduced the average age of our company truck fleet during the first nine months of 2012 from 2.4 years to 2.3 years. We currently expect the average age of the company truck fleet to further decrease to approximately 2.2 years by the end of 2012 based on our anticipated capital expenditures for new trucks. We believe the reduction of the average age may contribute to a decrease in some supplies and maintenance expenses in future months.

Taxes and licenses for the Truckload segment decreased 0.5 cents on a total-mile basis in third quarter 2012 compared to third quarter 2011 due to lower state mileage taxes and a decrease in fuel taxes per mile resulting from improved company truck fuel mpg. An improved mpg results in fewer gallons of diesel fuel purchased and consequently less fuel taxes paid.

Insurance and claims for the Truckload segment decreased by 0.3 cents per total mile in third quarter 2012 compared to third quarter 2011 due to lower self-insurance accruals for large dollar liability claims. The majority of our insurance and claims expense results from our claim experience and claim development under our self-insurance program; the remainder results from insurance premiums for claims in excess of our self-insured limits. We renewed our liability insurance policies on August 1, 2012

## Table of Contents

and continue to be responsible for the first \$2.0 million per claim with an annual \$8.0 million aggregate for claims between \$2.0 million and \$5.0 million and an annual aggregate of \$5.0 million for claims in excess of \$5.0 million and less than \$10.0 million. We maintain liability insurance coverage with insurance carriers substantially in excess of the \$10.0 million per claim. Our liability insurance premiums for the policy year that began August 1, 2012 are comparable to the previous policy year on a per-mile basis.

Depreciation expense for the Truckload segment increased 1.8 cents per total mile in third quarter 2012 compared to third quarter 2011. This increase was due primarily to higher tractor and trailer depreciation resulting from the higher cost of new equipment and, to a lesser extent, the effect of lower miles per truck, partially offset by lower depreciation on auxiliary power units that are sold and not replaced. Depreciation expense was historically affected by two changes to engine emissions standards imposed by the EPA that became effective in October 2002 and in January 2007, resulting in increased truck purchase costs. We began to take delivery of trucks with these 2007-standard engines in first quarter 2008 to replace older trucks in our fleet. A final set of more rigorous EPA-mandated emissions standards became effective for all new engines manufactured after January 1, 2010. Trucks with 2010-standard engines have a higher purchase price than trucks manufactured to meet the 2007 standards, but the 2010-standard engines are more fuel efficient. In 2012, we continued to purchase trucks with 2010-standard engines to replace older trucks that we sold or traded, and as of September 30, 2012, approximately 52% of our company tractors had engines that comply with the 2010 emissions standards. Depreciation expense per mile increased in 2012 due to higher prices for these new trucks and is expected to increase further as we continue to replace tractors.

Rent and purchased transportation expense consists mainly of payments to third-party capacity providers in the VAS segment and other non-trucking operations and payments to independent contractors in the Truckload segment. The payments to third-party capacity providers generally vary depending on changes in the volume of services generated by the VAS segment. As a percentage of VAS revenues, VAS rent and purchased transportation expense increased slightly from 84.4% in third quarter 2011 to 84.7% in third quarter 2012.

Rent and purchased transportation for the Truckload segment increased 1.7 cents per total mile in third quarter 2012 compared to third quarter 2011. This increase was due primarily to a shift from salaries, wages and benefits and several other expense categories to rent and purchased transportation expense because of the increase in independent contractor truck miles as a percentage of total miles, higher reimbursements to independent contractors for fuel due to increased fuel prices, and, to a lesser extent, higher payments to third-party capacity providers related to the non-trucking revenues of the Truckload segment (as described on page 12). Our customer fuel surcharge programs do not differentiate between miles generated by company and independent contractor trucks. Challenging operating conditions continue to make independent contractor recruitment and retention difficult. Such conditions include inflationary cost increases that are the responsibility of independent contractors and a shortage of financing available to independent contractors for equipment purchases. We have historically been able to add company tractors and recruit additional company drivers to offset any decrease in the number of independent contractors. If a shortage of independent contractors and company drivers occurs, increases in per mile settlement rates (for independent contractors) and driver pay rates (for company drivers) may become necessary to attract and retain these drivers. This could negatively affect our results of operations to the extent that we would not be able to obtain corresponding freight rate increases.

Other operating expenses for the Truckload segment increased 0.6 cents per total mile in third quarter 2012 compared to third quarter 2011 due to lower gains on sales of assets and higher professional fees. Gains on sales of assets (primarily used trucks and trailers) are reflected as a reduction of other operating expenses and are reported net of sales-related expenses (which include costs to prepare the equipment for sale). Gains on sales of assets were \$5.4 million in third quarter 2012 compared to \$6.0 million in third quarter 2011 and \$5.7 million in second quarter 2012. We sold fewer trucks and trailers in third quarter 2012, which resulted in slightly lower gains. We expect to sell fewer trucks and trailers in fourth quarter 2012 compared to fourth quarter 2011. We believe our wholly-owned subsidiary and used truck and trailer retail network, Fleet Truck Sales, is one of the larger Class 8 used truck and equipment retail entities in the United States. Fleet Truck Sales continues to be our resource for remarketing our used trucks and trailers, in addition to trading used trucks to original equipment manufacturers when purchasing new trucks.

Other Expense (Income)

We recorded interest income of \$0.5 million in third quarter 2012 and \$0.3 million in third quarter 2011.

Income Taxes

Our effective income tax rate (income taxes expressed as a percentage of income before income taxes) decreased to 40.50% for third quarter 2012 from 41.25% for third quarter 2011. The lower income tax rate is attributed to higher projected income before income taxes on an annualized basis, which caused non-deductible expenses, such as driver per diem, to comprise a smaller percentage of our income before income taxes.

## Table of Contents

### Nine Months Ended September 30, 2012 Compared to Nine Months Ended September 30, 2011

#### Operating Revenues

Operating revenues increased 2.1% for the nine months ended September 30, 2012, compared to the same period of the prior year. Trucking revenues, excluding fuel surcharges, decreased 0.2% as the 2.3% decrease in average monthly miles per tractor and the 0.2% decrease in average tractors in service were almost entirely offset by a 2.4% increase in revenue per total mile. Our average percentage of empty miles increased from 11.67% in the first nine months of 2011 to 12.20% during the same period in 2012. Fuel surcharge revenues were flat in the 2011 and 2012 year-to-date periods, as fewer miles in 2012 offset the per-mile increase because of higher diesel fuel prices. VAS revenues increased 15.1%, from \$211.4 million in the first nine months of 2011 to \$243.3 million in the same 2012 period. The increases occurred in Brokerage, Intermodal and WGL.

#### Operating Expenses

Our operating ratio (operating expenses expressed as a percentage of operating revenues) was 91.6% for the nine months ended September 30, 2012, compared to 91.7% for the same period of 2011. Expense items that impacted the overall operating ratio are described on the following pages. The tables on page 15 show the operating ratios and operating margins for our two reportable segments, Truckload and VAS.

Independent contractor miles as a percentage of total miles were 11.0% for the nine months ended September 30, 2012 and the nine months ended September 30, 2011.

Salaries, wages and benefits in the Truckload segment increased by 2.3 cents per total mile in the 2012 year-to-date period. This increase was attributed primarily to (i) higher driver salaries due to pay adjustments made over the last year to attract and retain drivers for specific fleets and (ii) higher non-driver salaries including the slight increase in the ratio of tractors to non-drivers, the effects of lower miles per truck in the 2012 period, and higher stock-based compensation expense. Non-driver salaries, wages and benefits in the non-trucking VAS segment increased 7%, and net shipments retained by VAS increased by 10%.

Fuel decreased 0.6 cents per total mile for the Truckload segment in the first nine months of 2012 compared to the same period in 2011 due to improved company truck mpg, offset partially by higher average fuel prices per gallon. Average diesel fuel prices were 7 cents per gallon higher in the first nine months of 2012 than in the same 2011 period.

Supplies and maintenance expense for the Truckload segment increased 1.0 cents on a total mile basis in the 2012 year-to-date period when compared to the same period in 2011 due primarily to higher tire expense resulting from increased tire prices, higher tractor and trailer maintenance and increases in a combination of expenses including driver advertising, student referral fees and travel expenses.

Taxes and licenses for the Truckload segment decreased 0.2 cents on a total-mile basis for the first nine months of 2012 compared to the same period in 2011 due to lower state mileage taxes and a decrease in fuel taxes per mile resulting from better company truck fuel mpg. An improved mpg results in fewer gallons of diesel fuel purchased and consequently less fuel taxes paid.

Insurance and claims did not change on a total-mile basis for the Truckload segment.

Depreciation for the Truckload segment increased 1.6 cents per total mile in the 2012 year-to-date period compared to the same period in 2011. This increase was due primarily to higher tractor and trailer depreciation resulting from the

higher cost of new equipment and, to a lesser extent, the effect of fewer miles per truck.

Rent and purchased transportation for the Truckload segment increased 0.6 cents on a total-mile basis in the first nine months of 2012 compared to the same period in 2011 due to an increase in the fuel reimbursement paid to independent contractors (because of higher average diesel fuel prices) and higher payments to third-party capacity providers related to the non-trucking revenues of the Truckload segment (as described on page 12). Rent and purchased transportation expense for the VAS segment increased in response to higher VAS revenues. As a percentage of VAS revenues, VAS rent and purchased transportation expense increased to 84.8% in the 2012 year-to-date period from 84.4% in the 2011 year-to-date period due to the higher cost of third-party capacity.

Other operating expenses for the Truckload segment increased 0.3 cents per total mile in the first nine months of 2012 compared to the same period in 2011. Gains on sales of assets were \$15.8 million in the nine months ended September 30, 2012

## Table of Contents

compared to \$16.5 million in the nine months ended September 30, 2011. In the 2012 year-to-date period, we realized higher average gains per truck sold and slightly lower average gains per trailer sold compared to the 2011 year-to-date period and sold fewer trucks and trailers in the first nine months of 2012 than in the same period of 2011. Bad debt expense was lower in the 2012 year-to-date period, partially offset by higher professional fees compared to the same 2011 period.

### Other Expense (Income)

We recorded interest income of \$1.3 million during the nine months ended September 30, 2012 and \$1.0 million during the nine months ended September 30, 2011.

### Income Taxes

Our effective income tax rate (income taxes expressed as a percentage of income before income taxes) decreased to 40.50% for the nine months ended September 30, 2012 from 41.25% for the same period in 2011. The lower income tax rate is attributed to higher projected income before income taxes on an annualized basis, which caused non-deductible expenses, such as driver per diem, to comprise a smaller percentage of our income before income taxes.

### Liquidity and Capital Resources:

During the nine months ended September 30, 2012, net cash provided by operating activities decreased slightly to \$198.7 million, a 1% decrease (\$1.6 million) in cash flows compared to the same nine-month period one year ago. The decrease in net cash provided by operating activities resulted primarily from (i) a \$25.5 million increase in income tax payments in the nine-month period ended September 30, 2012 compared to the same period of 2011, (ii) a \$17.0 million decrease in cash flows related to accounts payable, (iii) a \$24.2 million improvement in cash flows related to accounts receivable related to shipment growth and increasing rates and fuel surcharge revenues in September 2011 and (iv) a \$15.2 million increase in cash flows due to purchasing tires for inventory in 2011 and gradually issuing those tires for use in 2012. This change in income tax payments is reflected in the net change in deferred income taxes, other current assets and other current liabilities on the consolidated statements of cash flow. We were able to make net capital expenditures and pay dividends with the net cash provided by operating activities and existing cash balances, supplemented by net short-term borrowings under our existing credit facilities.

Net cash used in investing activities increased from \$149.4 million for the nine-month period ended September 30, 2011 to \$176.1 million for the nine-month period ended September 30, 2012. Net property additions (primarily revenue equipment) were \$180.2 million for the nine-month period ended September 30, 2012, compared to \$153.6 million during the same period of 2011. This increase occurred because our purchases of new trucks and trailers, net of dispositions, were higher in the 2012 period than in the 2011 period.

As of September 30, 2012, we were committed to property and equipment purchases, net of trades, of approximately \$56.0 million. We currently expect our net capital expenditures (primarily revenue equipment) in 2012 to be in the range of \$210.0 million to \$225.0 million, compared to net capital expenditures in 2011 of \$232.2 million. We intend to fund these net capital expenditures through cash flow from operations and financing available under our existing credit facilities, as management deems necessary.

Net financing activities used \$17.3 million during the nine months ended September 30, 2012 and \$7.7 million during the same period in 2011. During the nine-month period ended September 30, 2012, we borrowed and repaid \$140.0 million of short-term debt, and during the same period in 2011 we borrowed and repaid short-term debt totaling \$20.0 million. We paid dividends of \$10.9 million in both the nine-month periods ended September 30, 2012 and 2011.

From time to time, the Company has repurchased, and may continue to repurchase, shares of the Company's common stock. The timing and amount of such purchases depends upon stock market conditions and other factors. As of September 30, 2012, the Company had purchased 1,041,200 shares pursuant to our current Board of Directors repurchase authorization and had 6,958,800 shares remaining available for repurchase.

Management believes our financial position at September 30, 2012 is strong. As of September 30, 2012, we had \$18.0 million of cash and cash equivalents and \$796.2 million of stockholders' equity. Cash is invested primarily in government portfolio money market funds. As of September 30, 2012, we had \$250.0 million of available credit pursuant to two credit facilities, of which we had no outstanding borrowings. The \$250.0 million of credit available under these facilities is reduced by the \$33.8 million in stand-by letters of credit under which we are obligated. These stand-by letters of credit are primarily required as security for insurance policies. Based on our strong financial position, management does not foresee any significant barriers to obtaining sufficient financing, if necessary.

Table of Contents

## Contractual Obligations and Commercial Commitments:

The following tables set forth our contractual obligations and commercial commitments as of September 30, 2012.

## Payments Due by Period

(in millions)

	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years	Period Unknown
Contractual Obligations						
Unrecognized tax benefits	\$11.3	\$0.4	\$—	\$—	\$—	\$10.9
Property and equipment purchase commitments	56.0	56.0	—	—	—	—
Operating leases	4.3	1.6	2.7	—	—	—
Total contractual cash obligations	\$71.6	\$58.0	\$2.7	\$—	\$—	\$10.9
Other Commercial Commitments						
Unused lines of credit	\$216.2	\$—	\$—	\$216.2	\$—	\$—
Stand-by letters of credit	33.8	33.8	—	—	—	—
Total commercial commitments	\$250.0	\$33.8	\$—	\$216.2	\$—	\$—
Total obligations	\$321.6	\$91.8	\$2.7	\$216.2	\$—	\$10.9

We have committed credit facilities with two banks totaling \$250.0 million that mature in May 2016 (\$175.0 million) and May 2017 (\$75.0 million). Borrowings under these credit facilities bear variable interest based on the London Interbank Offered Rate (“LIBOR”). As of September 30, 2012, we had no borrowings outstanding under these credit facilities with banks. The credit available under these facilities is further reduced by the amount of stand-by letters of credit under which we are obligated. The stand-by letters of credit are primarily required for insurance policies. The unused lines of credit are available to us in the event we need financing for the replacement of our fleet or for other significant capital expenditures. Management believes our financial position is strong, and we therefore expect that we could obtain additional financing, if necessary. Property and equipment purchase commitments relate to committed equipment expenditures, net of trades, primarily for revenue equipment. As of September 30, 2012, we have recorded an \$11.3 million liability for unrecognized tax benefits. We expect \$0.4 million to be settled within the next twelve months and are unable to reasonably determine when the \$10.9 million categorized as “period unknown” will be settled.

## Off-Balance Sheet Arrangements:

We began leasing certain tractors under non-cancelable operating leases in May 2011. Our future payment obligation under these leases at September 30, 2012 was approximately \$4.3 million.

## Regulations:

Item 1 of Part I of our 2011 Form 10-K includes a discussion of pending proposed regulations that may have an effect on our operations if they become adopted and effective as proposed. There have been no material changes in the status of these proposed regulations previously disclosed in the 2011 Form 10-K and updated in our Quarterly Report on Form 10-Q for the quarterly periods ended March 31, 2012 and June 30, 2012.

## Table of Contents

### Critical Accounting Policies:

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires us to make estimates and assumptions that affect the (i) reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and (ii) reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Information regarding our Critical Accounting Policies can be found in our 2011 Form 10-K. Together with the effects of the matters described there, these factors may significantly impact our results of operations from period to period. The most significant accounting policies and estimates that affect our financial statements include the following:

- Selections of estimated useful lives and salvage values for purposes of depreciating tractors and trailers.

- Impairment of long-lived assets.

- Estimates of accrued liabilities for insurance and claims for liability and physical damage losses and workers' compensation.

- Policies for revenue recognition.

- Accounting for income taxes.

- Allowance for doubtful accounts.

We periodically evaluate these policies and estimates as events and circumstances change. There have been no material changes to these critical accounting policies and estimates from those discussed in our 2011 Form 10-K.

### Accounting Standards:

In the descriptions under "New Accounting Pronouncements Adopted" and "Accounting Standards Updates Not Yet Effective" that follow, references in quotations identify guidance and Accounting Standards Updates relating to the topics and subtopics (and their descriptive titles, as appropriate) of the Accounting Standards Codification<sup>TM</sup> of the Financial Accounting Standards Board ("FASB").

#### New Accounting Pronouncements Adopted

We did not adopt any new accounting standards during third quarter 2012.

#### Accounting Standards Updates Not Yet Effective

Accounting Standards Updates not effective until after September 30, 2012 are not expected to have a material effect on our consolidated financial position, results of operations or cash flows.

### Item 3. Quantitative and Qualitative Disclosures About Market Risk.

We are exposed to market risk from changes in commodity prices, foreign currency exchange rates and interest rates.

#### Commodity Price Risk

The price and availability of diesel fuel are subject to fluctuations attributed to changes in the level of global oil production, refining capacity, seasonality, weather and other market factors. Historically, we have recovered a majority, but not all, of fuel price increases from customers in the form of fuel surcharges. We implemented customer fuel surcharge programs with most of our customers to offset much of the higher fuel cost per gallon. However, we do not recover all of the fuel cost increase through these surcharge programs. We cannot predict the extent to which fuel prices will increase or decrease in the future or the extent to which fuel surcharges could be collected. As of September 30, 2012, we had no derivative financial instruments to reduce our exposure to fuel price fluctuations.

#### Foreign Currency Exchange Rate Risk

We conduct business in several foreign countries, including Mexico, Canada, China and Australia. To date, most foreign revenues are denominated in U.S. Dollars, and we receive payment for foreign freight services primarily in U.S. Dollars to reduce direct foreign currency risk. Assets and liabilities maintained by a foreign subsidiary company in the local currency are subject to foreign exchange gains or losses. Foreign currency translation gains and losses primarily relate to changes in the value of revenue equipment owned by a subsidiary in Mexico, whose functional currency is the Peso. Foreign currency translation gains were \$0.9 million for third quarter 2012 and foreign currency translation losses were \$2.0 million for third quarter 2011 and were recorded in accumulated other comprehensive loss within stockholders' equity in the Consolidated Balance Sheets.

## Table of Contents

### Interest Rate Risk

We had no debt outstanding at September 30, 2012. Interest rates on our unused credit facilities are based on the LIBOR. Increases in interest rates could impact our annual interest expense on future borrowings. As of September 30, 2012, we do not have any derivative financial instruments to reduce our exposure to interest rate increases.

### Item 4. Controls and Procedures.

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rule 15d-15(e) of the Securities Exchange Act of 1934 (the “Exchange Act”). Our disclosure controls and procedures are designed to provide reasonable assurance of achieving the desired control objectives. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective at a reasonable assurance level in enabling us to record, process, summarize and report information required to be included in our periodic filings with the SEC within the required time period and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Management, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, concluded that no changes in our internal control over financial reporting occurred during our most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

We have confidence in our internal controls and procedures. Nevertheless, our management, including the Chief Executive Officer and Chief Financial Officer, does not expect that the internal controls or disclosure procedures and controls will prevent all errors or intentional fraud. An internal control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of such internal controls are met. Further, the design of an internal control system must reflect that resource constraints exist, and the benefits of controls must be evaluated relative to their costs. Because of the inherent limitations in all internal control systems, no evaluation of controls can provide absolute assurance that all control issues, misstatements and instances of fraud, if any, have been prevented or detected.

## PART II

### OTHER INFORMATION

#### Item 1. Legal Proceedings.

Information regarding material pending legal proceedings is incorporated by reference from Note 3 to our Consolidated Financial Statements set forth in Part I of this report.

#### Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

On October 15, 2007, we announced that on October 11, 2007 our Board of Directors approved an increase in the number of shares of our common stock that Werner Enterprises, Inc. (the “Company”) is authorized to repurchase. Under this authorization, the Company is permitted to repurchase an additional 8,000,000 shares. As of September 30, 2012, the Company had purchased 1,041,200 shares pursuant to this authorization and had 6,958,800 shares remaining available for repurchase. The Company may purchase shares from time to time depending on market, economic and other factors. The authorization will continue unless withdrawn by the Board of Directors.

No shares of common stock were repurchased during the third quarter of 2012 by either the Company or any “affiliated purchaser,” as defined by Rule 10b-18 of the Exchange Act.
