BHP Billiton Limited 2003 Financial Statements (part 2 of 3)

Notes to Financial Statements

continued

The table below shows the extent to which the BHP Billiton Group has monetary assets and liabilities in currencies other than their functional currencies, after taking into account the effect of any forward foreign currency contracts entered into to manage these risks, excluding any exposures in relation to borrowings which are hedged by investments in net foreign currency assets (as discussed above), and excluding provisions for site restoration.

The SA rand monetary liabilities include borrowings raised in a variety of currencies, including US dollars and Euros, which, as a result of South African exchange control regulations, were subsequently swapped into SA rand.

Substantial portions of the non-functional currency liabilities of US dollar functional currency operations relate to provisions for deferred taxation and employee benefits.

Commodity price risk

The BHP Billiton Group is exposed to movements in the prices of the products it produces and sources from third parties which are generally sold as commodities on the world market.

Commodity price risk is managed pursuant to the Portfolio Risk Management strategy and within the overall CFaR limit. Strategic price hedges are taken out from time to time.

The following table provides information about the BHP Billiton Group's material cash settled commodity contracts, which have not been recognised in the accounts.

Contract amounts are used to calculate the volume and average price to be exchanged under the contracts.

(a) Included within the book value of short-term and long-term liabilities are finance leases which have been swapped from a fixed interest rate to a floating interest rate and from a ten-year term to a five-year term. The book value of these leases is US\$15 million (2002: US\$26 million). The effect of the swap is to match the initial lease obligation by receiving payments over a ten-year period at a fixed rate and making payments on a floating rate over five years. For the purpose of the disclosures, the book value of the finance leases is shown as it would be excluding the effect of the finance lease swap. The fair value disclosures relate only to the swapped components and reflect the fact that the swap receivable is subject to a fixed rate.

Financial liabilities - interest rate and currency profile

Current payables and provisions (other than current loans and derivative financial instruments) are excluded from the disclosures below.

The currency and interest rate profile of the financial liabilities of the BHP Billiton Group as shown in the table below take into account interest rate and currency swaps:

Refer to note 37, 'Standby arrangements, unused credit facilities' for details of the BHP Billiton Group's undrawn committed facilities.

Fair value of financial instruments

The following table presents the book values and fair values of the BHP Billiton Group's financial instruments. Fair value is the amount at which a financial instrument could be exchanged in an arm's length transaction between informed and willing parties, other than in a forced or liquidated sale. Where available, market values have been used to determine fair values. When market values are not available, fair values have been calculated by discounting expected cash flows at prevailing interest and exchange rates. The estimated fair values have been determined using market information and appropriate valuation methodologies, but are not necessarily indicative of the amounts that the BHP Billiton Group could realise in the normal course of business.

The fair value of the BHP Billiton Group's financial instruments is as follows:

	Book value	Fair value	Book value	Fair value

Other (b)	131	138
	601	642
Total contingent liabilities	775	807

(a) The BHP Billiton Group has entered into various counter-indemnities of bank and performance guarantees related to its own future performance in the normal course of business.

(b) Other contingent liabilities relate predominantly to actual or potential litigation of the Group for which amounts are reasonably estimable but the liability is not probable and therefore the Group has not provided for such amounts in these accounts. The amounts relate to a number of actions against the Group, none of which are individually significant. Additionally, there are a number of legal claims or potential claims against the Group, the outcome of which cannot be foreseen at present, and for which no amounts have been included in the table above. Details of the principal legal claims are set out below.

Current litigation

Ok Tedi Mining Limited

On 7 June 1996, Rex Dagi, Alex Maun and the remaining plaintiffs to Victorian Supreme Court proceedings against BHP Billiton Limited and Ok Tedi Mining Limited ('OTML') entered into a Settlement Agreement.

The principal terms of the agreement included the following:

- Each of the parties was required to make public announcements in terms agreed among the parties, to commit to the obligations in the public announcements and to support a process to reach agreement with the Lower Ok Tedi village communities.
- BHP Billiton Limited agreed to commit as soon as practicable to the implementation of any tailings option recommended by the independent enquiry or review to be conducted by the State ('the tailings option') providing BHP Billiton Limited bona fide considers that option to be economically and technically feasible.
- BHP Billiton Limited's commitment to implement the tailings option is subject to unexpected or unforeseen circumstances which may render the tailings option economically or technically unfeasible, and obtaining all necessary leases and other approvals required from the landowners and the State.

On 11 April 2000, two legal actions were commenced in the Victorian Supreme Court against OTML and BHP Billiton Limited. Rex Dagi is plaintiff in the first action, Gabia Gagarimabu is plaintiff in the second action on his own behalf and on behalf of the remaining parties to the Settlement Agreement. Both actions seek specific performance of the Settlement Agreement and/or an injunction to require the implementation by BHP Billiton Limited and OTML of a tailings pipeline and storage system and damages. BHP Billiton and OTML deny that there has been any recommendation regarding a tailings option by an independent inquiry conducted by the State. OTML and BHP Billiton Limited also assert that there has been no breach of the Settlement Agreement and are defending the claims.

BHP Billiton Limited transferred its entire shareholding in OTML to PNG Sustainable Development Program Limited ('Program Company') in February 2002, completing BHP Billiton Limited's withdrawal from the Ok Tedi copper mine. The Program Company operates for the benefit of the Papua New Guinean people.

Legal arrangements for the withdrawal encompass a series of legal releases, indemnities and warranties that safeguard BHP Billiton's interests following its exit from OTML.

The Victorian Supreme Court litigation continues, with substantially amended pleadings. The Court has set out a detailed timetable for further steps, including witness statements, leading to compulsory mediation and, if necessary, trial in mid-2004.

No amounts have been included in contingent liabilities in respect of this item of litigation.

Bass Strait - Longford

Following the 25 September 1998 explosion and fire at Longford, a class action was commenced in the Federal Court of Australia on behalf of Victorian gas consumers and employees stood down by employers during the shortage of gas following those events (together the 'Applicants'). On 12 April 2001 the action was transferred to the Supreme Court of Victoria. The action is against Esso Australia Resources Pty Ltd ('Esso'). Esso has joined the State of Victoria and various entities associated with the State (together the 'State Entities') as cross respondents alleging certain failures and contributory negligence on the part of the State Entities. In turn, following hearing of the claim against Esso the State Entities may join BHP Billiton Petroleum (Bass Strait) Pty Ltd ('BHPBP') as a further cross respondent, with the effect that if any sums are recovered against the State Entities they will seek contribution from BHPBP.

In addition to BHPBP's potential liability to the State Entities under the cross claims, in certain circumstances Esso, as operator, is entitled to be indemnified by BHPBP as a 50 per cent joint venturer for certain categories of legal costs incurred by Esso and payments made in satisfaction of claims.

In turn, BHPBP may have rights against Esso as operator in relation to losses and costs BHPBP has incurred in relation to the incident, including under the cross claim by the State Entities.

Edgar Filing: BHP BILLITON LTD - Form 6-K

On 20 February 2003 the Victorian Supreme Court found that Esso is not liable for economic loss. The court further found that Esso is liable to business users for property damage and any economic loss consequential upon property damage. The quantum of these losses is unknown. The Court set a date of 1 September 2003 for lodgement of particulars of all claims. Resolution of claims is likely to continue into 2004.

Over the next few months the Court will also consider questions of appeal, and whether claims against the State and BHPBP should proceed.

No amounts have been included in contingent liabilities in respect of this item of litigation.

(a) Finance leases are predominantly related to leases of the dry bulk carrier Iron Yandi and other mobile equipment and vehicles. Refer notes 25 and 28.

(b) Operating leases are entered into as a means of acquiring access to property, plant and equipment. Rental payments are generally fixed, but with inflation escalation clauses on which contingent rentals are determined. Certain leases contain extension and renewal options. Amounts represent minimum lease payments.

(c) The BHP Billiton Group has commitments under operating leases to make payments totalling US\$138 million in the next year as follows:

(d) Included in other commitments is an amount of US\$738 million (2002: US\$684 million) representing Boodarie Iron's continuing operating commitments under a number of take or pay contracts for supply of products/services.

41 Superannuation, pensions and post-retirement benefits

The BHP Billiton Group contributes to a number of superannuation schemes and pension schemes which exist to provide benefits for employees and their dependants on retirement, disability or death. The schemes include Company sponsored funds, multi-employer industry schemes and statutory retirement schemes and are either defined benefit or defined contribution arrangements. The BHP Billiton Group and employee members make contributions as specified

in the rules of the respective schemes.

Financial statement impacts and disclosures

The total amount of BHP Billiton Group contributions to all schemes was US\$102 million and US\$147 million for 2003 and 2002 respectively. The decrease in contributions is mainly due to the demerger of BHP Steel in July 2002.

Expenses for defined benefit pension schemes are recognised so as to allocate the cost systematically over the employees' service lives on the basis of independent actuarial advice. In addition, provision is made in the accounts for retirement benefits payable to non-executive Directors who were Directors of BHP Billiton Limited prior to the DLC merger on 29 June 2001. Formal independent actuarial reviews of BHP Billiton Group sponsored defined benefit funds are undertaken at least every three years, but annually for accounting purposes.

The following table outlines the annual pension charge.

	2003	2002
	US\$M	US\$M
The pension charge for the year is as follows:		
Defined contribution schemes	41	61
Industry-wide schemes	23	18
Defined benefit schemes (a)		
Regular cost	46	59
Variation cost	39	14
Interest cost	(20)	(18)
	129	134

(a) Excludes net exchange gains/losses on net monetary pension assets in 2003 of US\$39 million gain (2002: US\$24 million gain).

To the extent that there is a difference between pension cost and contributions paid, an asset and/or liability arises. The accumulated difference recorded in the Statement of Financial Position at 30 June 2003 gives rise to an asset of US\$270 million (2002: US\$224 million) and a liability of US\$65 million (2002: US\$31 million).

The assets of the defined contribution schemes and the industry-wide schemes are held separately in independently administered funds. The charge in respect of these schemes is calculated on the basis of contributions due in the financial year.

The remaining pension schemes are defined benefit schemes. Some of the defined benefit schemes have their assets held separately in independently administered funds and others are unfunded. The pension costs and funding for these schemes are assessed in accordance with the advice of professionally qualified actuaries based on the most recent actuarial valuations available.

The pension charge for the year for defined benefit schemes has increased from US\$55 million to US\$65 million largely due to negative investment returns of plans in the US, Canada and Europe causing a deterioration of the funded status for these plans and leading to increased variation costs. In addition, new legislation in South Africa regarding the apportionment of surpluses, which will most likely eliminate the Group's entitlements to any fund surpluses in South Africa, has also led to increased variation costs in relation to prior years.

For accounting purposes, the actuarial valuations have determined pension costs for most schemes using the projected unit method. There are exceptions for some schemes that are closed to new members where the attained age method was used. The assumptions used varied by scheme. For the purposes of calculating the accounting charge, surpluses or deficiencies are recognised through the variation cost component in future accounting periods as a constant percentage of estimated future payroll, over the remaining service life of the employees.

The BHP Billiton Group provides medical benefits, which are not pre-funded, for retired employees and their dependants in South Africa, the US, Canada and Suriname. The post-retirement benefit charge, net of employees' and retirees' contributions paid, in respect of these benefits was US\$26 million (2002: US\$16 million) excluding an exchange loss of US\$22 million (2002: gain US\$14 million).

Where there is a surplus or deficiency between the accrued liability and the provision recorded, the resulting amount is spread forward over future working lifetimes through the variation cost component. The main actuarial assumptions used in the most recent actuarial valuations of these benefits are as follows:

	South Africa	US	Canada	Suriname
Ultimate healthcare inflation rate	9.0%	5.5%	3.0%	5.0%
Discount rate	11.75%	7.5%	6.5%	6.5%

The following is a summary of the most recent financial position of the major schemes in which the BHP Billiton Group participates in accordance with AASB 1028 'Employee Benefits' based on values of assets and liabilities as at 30 June 2003:

Total for BHP Billiton										
Group sponsored plans(d)			1 693	2 140	1 595	2 144	(98)	4	1 728	

(a) In respect of the year ended 30 June 2003, accrued benefits plan assets and vested benefits are measured at 30 June 2003. In respect of prior years, these amounts were measured at the last reporting date of each fund.

(b) Vested benefits are benefits which are not conditional upon continued membership of the respective fund or any other factor other than resignation from the fund. Accrued benefits are calculated by the actuary as the present value of future benefit payments in relation to membership and compensation up to the relevant reporting date.

(c) Obligation on the BHP Billiton Group to contribute under Superannuation Guarantee levy requirements. Contributions are made by the member and the BHP Billiton Group and are based on a percentage of a member's base salary or wage.

(d) This does not include multi-employer sponsored plans for which the information relating to BHP Billiton employees is not available.

(e) Non-Australian plans are not required to report under AAS 25 'Financial Reporting by Superannuation Plans', and hence do not produce results for reporting under AASB 1028. Accrued liabilities and asset values for other plans have generally been taken from FRS 17 disclosures as at 30 June 2003 (refer below), amended to comply with the principles of AASB 1028 if required. For other plans, the value of vested benefits have generally been taken as the value of accrued benefits.

(f) Net surplus/(deficit) in respect of other plans does not include surpluses in respect of certain plans in South Africa, Suriname and Canada. This is to reflect legislative restrictions on access to any surplus amounts by the BHP Billiton Group. Liability values have been increased to achieve this.

Other methods

Various accounting standards relating to accounting for pension arrangements are in use, or available for use, in jurisdictions throughout the world. While Australian GAAP has no specific standard dealing with accounting for pension arrangements by employers, disclosure requirements are included in AASB 1028 'Employee Benefits'. UK GAAP allows the application of either SSAP 24 'Accounting for Pension Costs' or FRS 17 'Retirement Benefits', US GAAP requires application of FAS 87 'Employers' Accounting for Pensions' and International Financial Reporting Standards requires the existing IAS 19 'Employee Benefits' to be applied. The International Accounting Standards Board has indicated it expects to amend IAS 19, but not in time to form part of the initial suite of IASB mandated standards to be applied for reporting periods commencing on or after 1 January 2005. The outcome of the IASB's review is not yet known.

The accounting policy adopted by the BHP Billiton Group is consistent with the requirements of SSAP 24 and has been consistently applied in these financial statements.

SSAP 24, FAS 87, FRS 17 and the existing IAS 19 are similar in that they all include mechanisms which defer or spread the recognition of actuarial gains and losses and therefore mitigate the volatility in net profit this may create from reporting period to reporting period. SSAP 24, FAS 87 and IAS 19 achieve this through the recognition of actuarial gains and losses over the remaining expected employees' service lives. In addition FAS 87 and FRS 17 achieve this by taking some (FAS 87) or all (FRS 17) actuarial gains and losses directly to reserves through Other Comprehensive Income (FAS 87) or the Statement of Total Recognised Gains and Losses (FRS 17) reserve accounts.

The AASB has recently released ED 115 'Request for Comment on IAS 19 Employee Benefits'. ED 115 is based on the existing IAS 19, however ED 115 proposes the removal of the ability to recognise actuarial gains and losses over the remaining expected employees' service lives, proposing instead the recognition of actuarial gains and losses directly in the Statement of Financial Performance in the reporting period in which they occur.

ED 115 is similar to FRS 17 in many respects, with the notable exception that Australian GAAP does not have a Statement of Total Recognised Gains and Losses reserve account in which actuarial gains and losses can be directly recognised.

The following disclosures are required under UK GAAP (under FRS 17 based on values of assets and liabilities as at 30 June 2003), but not under Australian GAAP. However, the Directors are of the opinion that this information may be of interest to all shareholders of the

BHP Billiton Group.

Pension schemes - FRS 17 disclosures

The BHP Billiton Group operates a number of defined benefit schemes in Australia, Canada, the US, Europe, South Africa and South America. For accounting disclosure purposes, full actuarial valuations for most schemes were carried out as at 30 June 2003 by local actuaries. For a minority of plans it has been necessary to roll forward liabilities calculated using earlier data.

The major assumptions used by the actuaries ranged from:

In the year ended 30 June 2002, the Pension Funds Second Amendment Act, 2001, was passed in South Africa. Under this Act, surpluses in pension funds have to be used in a manner specified under Regulations to the Act, to improve current and former members' benefits prior to the employer obtaining any benefit from the surpluses. Consequently, it is considered unlikely that any BHP Billiton Group company will obtain any benefit from the surpluses in the South African schemes. Therefore the reduction in the recognised surpluses in South Africa is recognised as an actuarial loss in the STRGL.

Post-retirement medical benefits - FRS 17 disclosures

The BHP Billiton Group also operates a number of post-retirement medical benefit arrangements in South Africa, the US, Canada and Suriname. Full actuarial valuations were carried out as at 30 June 2003, many of them by local actuaries. For a minority of plans, it has been necessary to roll forward liabilities calculated using earlier data. The major assumptions used by the actuaries ranged from:

	South Africa	US	Canada	Suriname	UK

If the measurement principles of FRS 17 had been applied to the pension schemes and post-retirement medical benefit schemes of the Group's joint venture and associated entities at 30 June 2003, a deficit of approximately US\$50 million (2002: US\$7 million) would have been recognised in the Group Statement of Financial Performance and actuarial losses of approximately US\$35 million (2002: US\$12 million) would have been recognised.

(a) The BHP Billiton Group granted various equity instruments to executive Directors and executive officers during the years ended 30 June 2003 and 30 June 2002, in accordance with the share ownership plans in existence in both the BHP Billiton Limited Group and the BHP Billiton Plc Group. The value of each instrument granted during the year ended 30 June 2003 has been determined by an independent actuary using modified Black-Scholes option pricing techniques. Instruments granted by the BHP Billiton Limited Group during the year ended 30 June 2002 were also valued by an independent actuary using modified Black-Scholes option pricing techniques. Remuneration for the years ended 30 June 2003 and 2002 includes amounts in relation to equity instruments, spread over the relevant vesting periods. The different nature of the instruments which have been issued year on year, with respect to the performance hurdles which have been established and the qualifying periods before the instruments vest, results in variations to the respective valuations. Refer to note 31 for details of all instruments granted and valuations. Refer to

the Remuneration Report for details regarding various equity instruments in respect of the Directors of BHP Billiton Group.

(b) For some executive Directors and executive officers, remuneration includes BHP Billiton Group contributions to superannuation funds and an imputed notional contribution calculated at the determined actuarial rate. Where executive Directors and executive officers have Employee Share Plan loans, an imputed interest component is included in remuneration.

(c) Remuneration for 2003 includes incentives payable to executive Directors and executive officers based on the achievement of business performance targets and individual performance for the year ended 30 June 2003. Remuneration for 2002 includes incentives paid to executive Directors and executive officers for the year ended 30 June 2002. Non-executive Directors are not entitled to any form of performance-related remuneration.

(d) Amounts received or due and receivable by Directors of BHP Billiton Limited include retirement benefits of US\$178 043 paid during the current year in the banding US\$200 000 to US\$209 999, which had been accrued for in prior years. Not included are retirement benefits of US\$281 316, which had been accrued for in prior years, but which were paid during the current year, for Directors of BHP Billiton Limited who did not hold office during the year.

(e) An executive officer is a person directly accountable and responsible for the strategic direction and operational management of the BHP Billiton Group. Executive officers include members of the Executive Committee, some of whom are not domiciled in Australia.

Share transactions with Directors and Director-related entities

The current Chief Executive Officer, C W Goodyear, was conditionally awarded 180 154 ordinary shares in BHP Billiton Limited under the Group Incentive Scheme during the year ended 30 June 2003 (2002: nil).

On 23 May 2003, agreement was reached with former Chief Executive B P Gilbertson regarding the terms of termination of his employment with the Group, some two and a half years earlier than the date provided under his contracts. Mr Gilbertson was a participant in the Group's employee share plans. None of the entitlements under those plans that had been granted to him but that had not vested at the date of his termination were transferred. Rather, the entitlements were scaled back to reflect the period of his employment. Mr Gilbertson continues to hold the scaled-back entitlements but they remain subject to the same conditions that applied on grant, where pre-determined performance hurdles must be satisfied. Those hurdles will be measured at the same time and in the same manner as for other participants. The number of shares Mr Gilbertson has retained an entitlement to is 228 675 (comprising 63 159 Performance Shares under the Group Incentive Scheme, 123 218 shares under the Restricted Share Scheme and 42 298 shares under the Co-Investment Plan). The number, if any, that might ultimately vest will remain dependent on satisfaction of the performance hurdles.

The former Managing Director and Chief Executive Officer, P M Anderson received 374 693 ordinary shares in BHP Billiton Limited during the year ended 30 June 2002 on exercise of Performance Rights.

Transactions with Director-related entities

A number of Directors or former Directors of BHP Billiton Limited hold or have held positions in other companies, where it may be said they control or significantly influence the financial or operating policies of these entities. Accordingly, the following entities are considered to be Director-related entities for the purpose of the disclosure requirements of Australian Accounting Standard AASB 1017 'Related Party Disclosures':

Director of BHP Billiton Limited	Director-related entity	Position held in Director-related entity
M A Chaney	Wesfarmers (Group) Limited	Managing Director
D A Jenkins	Chartwood Resources Ltd	Chairman and Managing Director
B D Romeril (a)	Xerox Corporation	Chief Financial Officer

(a) Resigned as Director of BHP Billiton Group on 30 June 2002.

Transactions between the BHP Billiton Group and these Director-related entities are detailed below:

- the Wesfarmers Group received US\$5.015 million during the year ended 30 June 2003 (2002: US\$22.287 million) for products and services provided to the BHP Billiton Group. The Wesfarmers Group paid US\$nil (2002: US\$5.052 million) to the BHP Billiton Group for various products.
- Xerox Corporation received US\$1.831 million during the year ended 30 June 2002 for products and services provided to the BHP Billiton Group. At 30 June 2002 outstanding amounts to the Xerox Corporation were US\$0.619 million.

Other Director transactions with BHP Billiton Group entities

Where the Director was an employee of the BHP Billiton Group, transactions include:

- reimbursement of transfer expenses;
- minor purchases of products and stores; and

- insurance with BHP Billiton Group insurance companies.

All these transactions (which were trivial in amount) were conducted on conditions no more beneficial than those available to other employees.

Following the termination of his employment on 1 July 2002, Mr Anderson entered into a consultancy arrangement with the BHP Billiton Group under which he agreed to act as a consultant to the Group for two years commencing at the time he ceased to be a Director. Mr Anderson received a total fee of US\$104 739 for the period under this arrangement.

Transactions with associated entities

The following material transactions with related parties of the BHP Billiton Group occurred during the year ended 30 June 2003 and were conducted in the normal course of business and under normal commercial terms and conditions:

- sales of services to Australian LNG Shipping amounting to US\$14.258 million (2002: US\$9.872 million).
- sales to Columbus Stainless Steel amounting to US\$nil (2002: US\$17.546 million).
