TREDEGAR CORPORATION
 NOTES TO THE CONSOLIDATED INTERIM FINANCIAL STATEMENTS
 (Unaudited)

In the opinion of management, the accompanying consolidated financial statements of Tredegar Corporation and its subsidiaries (“Tredegar,” “the Company,” “we,” “us” or “our”) contain all adjustments necessary to state fairly, in all material respects, Tredegar’s consolidated financial position as of June 30, 2018, the consolidated results of operations for the three and six months ended June 30, 2018 and 2017, the consolidated cash flows for the six months ended June 30, 2018 and 2017, and the consolidated changes in shareholders’ equity for the six months ended June 30, 2018. All such adjustments, unless otherwise detailed in the notes to the consolidated interim financial statements, are deemed to be of a normal, recurring nature.

The Company operates on a calendar fiscal year except for the Aluminum Extrusions segment, which operates on a 52/53-week fiscal year basis. As such, the fiscal second quarter for 2018 and 2017 for this segment references 13-week periods ended June 24, 2018 and June 25, 2017, respectively. The Company does not believe the impact of reporting the results of this segment as stated above is material to the consolidated financial results.

The financial position data as of December 31, 2017 that is included herein was derived from the audited consolidated financial statements provided in the Company’s Annual Report on Form 10-K for the year ended December 31, 2017 (“2017 Form 10-K”) but does not include all disclosures required by United States generally accepted accounting principles (“GAAP”). These financial statements should be read in conjunction with the consolidated financial statements and related notes included in the 2017 Form 10-K. The results of operations for the three and six months ended June 30, 2018, are not necessarily indicative of the results to be expected for the full year. Certain prior year balances have been reclassified to conform with current year presentation (see Note 14 for additional detail).

Revenue Recognition. Revenue from the sale of products, which is shown net of estimated sales returns and allowances, is recognized at a point in time when control has passed to the customer. Control passes to the customer generally when the customer takes physical possession or when title passes if defined separately in the sales agreement. Amounts billed to customers related to freight are classified as sales in the accompanying consolidated statements of income. The cost of freight is classified as a separate line in the accompanying consolidated statements of income. Taxes assessed by a governmental authority that are both imposed on and concurrent with a specific revenue-producing transaction between Tredegar and its customers (such as value-added taxes) are accounted for on a net basis and therefore excluded from revenues. See Note 11 for disaggregation of revenue by segment and type.

As of June 30, 2018 and December 31, 2017, Accounts receivable and other receivables, net, were \$128.3 million and \$120.1 million, respectively, made up of the following:

	June 30, 2018 (In thousands)	December 31, 2017
Customer receivables	\$126,598	\$113,556
Other accounts and notes receivable	1,729	9,883
Total accounts and other receivables	\$128,327	\$123,439

returns
Total
accounts
and
\$128,301 \$120,135
other
receivables,
net

For the three and six months ended June 30, 2018, the Company had no material bad-debt expense and there were no material contract assets, contract liabilities or deferred contract costs recorded on the Consolidated Balance Sheet as of June 30, 2018. Payment terms start from the date of satisfaction of the performance obligation and vary from COD (cash on delivery) to 120 days. The Company's contracts generally include one performance obligation, which is satisfied at a point in time.

For the three months and six months ended June 30, 2018, revenue recognized from performance obligations related to prior periods (for example, changes in transaction price), was not material.

Revenue expected to be recognized in any future period related to remaining performance obligations, excluding i) revenue pertaining to contracts that have an original expected duration of one year or less, ii) contracts where revenue

is recognized as invoiced and iii) variable consideration related to unsatisfied performance obligations, is not expected to materially impact the Company's financial results.

2. On February 15, 2017, Bonnell Aluminum acquired 100% of the stock of Futura Industries Corporation ("Futura") on a net debt-free basis for approximately \$92 million. The amount actually funded in cash at the transaction date was approximately \$87 million, which was net of preliminary closing adjustments for working capital and seller transaction-related obligations assumed and subsequently paid by Bonnell Aluminum. In addition, the Company was refunded \$5 million in the first quarter of 2018 since Futura did not meet certain performance requirements for the 2017 fiscal year ("Earnout Provision"). The acquisition, which was funded using Tredegar's existing revolving credit facility, was treated as an asset purchase for U.S. federal income tax purposes.

The net purchase price for financial reporting purposes was set at approximately \$82.9 million, which includes adjustments for the fair value of the Earnout Provision of \$4.3 million and the net settlement of certain post-closing adjustments of \$0.1 million. Adjustments to the purchase price were made retrospectively as if the accounting had been completed on the acquisition date. Based upon management's valuation of the fair value of tangible and intangible assets acquired (net of cash acquired) and liabilities assumed, the allocation of the purchase price was as follows:

(In Thousands)

Accounts receivable	\$6,680
Inventories	10,342
Prepaid expenses and other current assets	240
Property, plant & equipment	32,662
Identifiable intangible assets:	
Customer relationships	24,000
Trade names	6,700
Trade payables & accrued expenses	(8,135)
Total identifiable net assets	72,489
Adjusted Net Purchase Price	82,860
Goodwill	\$10,371

The goodwill and other intangible asset balances associated with this acquisition are deductible for U.S. federal income tax purposes on a straight-line basis over a period of approximately 15 years. For financial reporting purposes, customer relationships are being amortized over 12 years and trade names are being amortized over 13 years. Goodwill is not subject to amortization for financial reporting purposes.

Plant shutdowns, asset impairments, restructurings and other items are shown in the net sales and operating profit by 3. segment table in Note 10 and are also included in "Asset impairments and costs associated with exit and disposal activities, net of adjustments" in the consolidated statements of income, unless otherwise noted below.

Plant shutdowns, asset impairments, restructurings and other items in the second quarter of 2018 include: Pretax charges of \$0.6 million related to estimated excess costs associated with the ramp-up of new product offerings and additional expenses related to strategic capacity expansion projects by PE Films (included in "Cost of goods sold" in the consolidated statements of income); and

Pretax charges of \$0.7 million associated with the shutdown of PE Films' manufacturing facility in Shanghai, China, which consists of severance and other employee-related accrued costs of \$0.4 million, accelerated depreciation of \$0.1 million (included in "Cost of goods sold" in the consolidated statements of income) and other facility consolidation-related expenses of \$0.2 million.

Plant shutdowns, asset impairments, restructurings and other items in the first six months of 2018 include:

•

Pretax charges of \$1.5 million related to estimated excess costs associated with the ramp-up of new product offerings and additional expenses related to strategic capacity expansion projects by PE Films (included in “Cost of goods sold” in the consolidated statements of income);

Pretax charges of \$0.3 million for professional fees associated with the Terphane Limitada worthless stock deduction, the impairment of assets of Flexible Packaging Films and determining the effect of the new U.S.

federal income tax law (included in “Selling, general and administrative expenses” in the consolidated statements of income); and

Pretax charges of \$0.7 million associated with the shutdown of PE Films’ manufacturing facility in Shanghai, China, which consists of severance and other employee-related accrued costs of \$0.4 million, accelerated depreciation of \$0.1 million (included in “Cost of goods sold” in the consolidated statements of income) and other facility consolidation-related expenses of \$0.2 million.

Plant shutdowns, asset impairments, restructurings and other items in the second quarter of 2017 include:

Pretax income of \$11.9 million related to the settlement of an escrow arrangement established upon the acquisition of Terphane in 2011 (included in “Other income (expense), net” in the consolidated statements of income). In settling the escrow arrangement, the Company assumed the risk of the claims (and associated legal fees) against which the escrow previously secured the Company. While the ultimate amount of such claims is unknown, the Company believes that it is reasonably possible that it could be liable for some portion of these claims, and currently estimates the amount of such future claims at approximately \$3.5 million;

Pretax charges of \$1.0 million related to estimated excess costs associated with the ramp-up of new product offerings and additional expenses related to strategic capacity expansion projects by PE Films of \$0.9 million and by Bonnell of \$0.1 million (included in “Cost of goods sold” in the consolidated statements of income);

Pretax income of \$0.9 million related to the explosion that occurred in the second quarter of 2016 at the aluminum extrusions manufacturing facility in Newnan, Georgia, for the expected recovery of excess production costs of \$0.6 million incurred in 2016 and \$0.3 million incurred in the first quarter of 2017 for which recovery from insurance carriers was not previously considered to be reasonably assured (included in “Cost of goods sold” in the consolidated statements of income);

Pretax income of \$0.7 million related to the fair valuation of an earnout provision from the acquisition of Futura (included in “Other income (expense), net” in the consolidated statements of income);

Pretax charges of \$0.6 million associated with a business development project (included in “Selling, general and administrative expense” in the consolidated statements of income); and

Pretax charges of \$0.3 million associated with the consolidation of domestic PE Films’ manufacturing facilities, which consists of facility consolidation-related expenses of \$0.2 million and accelerated depreciation of \$0.1 million (included in “Cost of goods sold” in the consolidated statements of income), offset by pretax income of \$0.3 million related to a reduction of severance and other employee-related accrued costs.

Plant shutdowns, asset impairments, restructurings and other items in the first six months of 2017 include:

Pretax income of \$11.9 million related to the settlement of an escrow arrangement established upon the acquisition of Terphane in 2011 (included in “Other income (expense), net” in the consolidated statements of income). In settling the escrow arrangement, the Company assumed the risk of the claims (and associated legal fees) against which the escrow previously secured the Company. While the ultimate amount of such claims is unknown, the Company believes that it is reasonably possible that it could be liable for some portion of these claims, and currently estimates the amount of such future claims at approximately \$3.5 million;

Pretax charges of \$3.3 million related to the acquisition of Futura, i) associated with accounting adjustments of \$1.7 million made to the value of inventory sold by Aluminum Extrusions after its acquisition of Futura (included in “Cost of goods sold” in the consolidated statements of income), ii) acquisition costs of \$1.5 million and, iii) integration costs of \$0.1 million (included in “Selling, general and administrative expenses” in the consolidated statements of income), offset by pretax income of \$0.7 million related to the fair valuation of an earnout provision (included in “Other income (expense), net” in the consolidated statements of income);

Pretax charges of \$2.8 million related to estimated excess costs associated with the ramp-up of new product offerings and additional expenses related to strategic capacity expansion projects by PE Films of \$2.4 million and by Aluminum Extrusions of \$0.4 million (included in “Cost of goods sold” in the consolidated statements of income);

Pretax income of \$0.5 million related to the explosion that occurred in the second quarter of 2016 at the aluminum extrusions manufacturing facility in Newnan, Georgia, which includes the expected recovery of excess production costs of \$0.6 million incurred in 2016 for which recovery from insurance carriers was not

previously considered to be reasonably assured (included in “Cost of goods sold” in the consolidated statements of income), partially offset by legal and consulting fees of \$0.1 million (included in “Selling, general and administrative expenses” in the consolidated statements of income).

Pretax charges of \$0.7 million associated with the consolidation of domestic PE Films’ manufacturing facilities, which consists of asset impairments of \$0.1 million, accelerated depreciation of \$0.2 million (included in “Cost of goods sold” in the consolidated statements of income) and other facility consolidation-related expenses of \$0.4 million (\$0.3 million included in “Cost of goods sold” in the consolidated statements of income), offset by pretax income of \$0.1 million related to a reduction of severance and other employee-related accrued costs;

Pretax charges of \$0.3 million related to expected future environmental costs at the aluminum extrusions manufacturing facility in Carthage, Tennessee (included in “Cost of goods sold” in the consolidated statements of income);

Pretax charges of \$0.9 million associated with a business development project (included in “Selling, general and administrative expense” in the consolidated statements of income); and

Pretax charges of \$0.3 million for severance and other employee-related costs associated with restructurings in Corporate.

Results in the second quarter and first six months of 2018 include unrealized gains of \$5.8 million (\$4.5 million after taxes) and \$14.0 million (\$10.9 million after taxes), respectively, compared to unrealized gains of \$21.5 million (\$15.7 million after taxes) and \$24.8 million (\$18.2 million after taxes) in the second quarter and first six months of 2017, respectively, on the Company’s investment in kaleo, Inc. (“kaléo”), which is accounted for under the fair value method (included in “Other income (expense), net” in the consolidated statements of income). An unrealized loss on the Company’s investment in the Harbinger Capital Partners Special Situations Fund, L.P. (“Harbinger Fund”) of \$0.1 million was recognized in the second quarter and first six months of 2018 (included in “Other income (expense), net” in the consolidated statements of income) (none in 2017). See Note 7 for additional information on investments.

In June 2018, the Company announced plans to close its facility in Shanghai, China, which primarily produces plastic films used as components for personal care products (“Shanghai transition”). Production is expected to cease at this plant by the end of 2018. The Company expects to recognize costs associated with exit and disposal activities of \$7.1 million comprised of: (i) retention, severance and related costs (\$3.6 million), (ii) customer-related costs (\$1.1 million), and (iii) legal, asset disposal and other cash costs (\$2.4 million). In addition, the Company expects non-cash asset write-offs and accelerated depreciation of \$0.9 million. Net annual cash savings from consolidating operations is expected of \$1.7 million. Proceeds from expected property disposals are uncertain. The Company anticipates that these activities, including property disposals, will require 12-18 months to execute, and the costs are expected to be incurred during this period.

Total expenses associated with the Shanghai transition were \$0.7 million in the second quarter of 2018 (\$0.6 million included in “Asset impairments and costs associated with exit and disposal activities, net of adjustments” and \$0.1 million included in “Cost of goods sold” in the consolidated statements of income). Cash expenditures were \$0.1 million in the second quarter of 2018.

A reconciliation of the beginning and ending balances of accrued expenses associated with exit and disposal activities and charges associated with asset impairments and reported as “Asset impairments and costs associated with exit and disposal activities, net of adjustments” in the consolidated statements of income for the six months ended June 30, 2018 is as follows:

(In thousands)	Severance (a)	Asset Impairments	Other (b)	Total
Balance at January 1, 2018	\$ 627	\$ —	\$ 476	\$ 1,103
Changes in 2018:				
Charges	685	—	22	707
Cash spent	(846)	—	(268)	(1,114)
Charges against assets	—	117	—	117
Reversed to income		(117)		(117)
Balance at June 30, 2018	\$ 466	\$ —	\$ 230	\$ 696

(a) Severance cash spent includes severance payments associated with the consolidation of North American PE Films manufacturing facilities.

(b) Other primarily includes other restructuring costs associated with Aluminum Extrusions.

4. The components of inventories are as follows:

June 30, 2018 (In thousands)	December 31, 2017
Finished goods	\$ 23,986
Work-in-process	\$ 14,201
Raw materials	\$ 29,591
Stores, supplies and other	\$ 18,759
Total	\$ 86,907

Basic earnings per share is computed by dividing net income by the weighted average number of shares of common stock outstanding. Diluted earnings per share is computed by dividing net income by the weighted average common and potentially dilutive common equivalent shares outstanding, determined as follows:

(In thousands)	Three Months Ended		Six Months Ended	
	June 30, 2018	June 30, 2017	June 30, 2018	June 30, 2017
Weighted average shares outstanding used to compute basic earnings per share	33,074	32,961	33,028	32,941
Incremental dilutive shares attributable to stock options and restricted stock	34	90	20	58
Shares used to compute diluted earnings per share	33,108	33,051	33,048	32,999

Incremental shares attributable to stock options and restricted stock are computed under the treasury stock method using the average market price during the related period. For the three and six months ended June 30, 2018, average out-of-the-money options to purchase shares that were excluded from the calculation of incremental shares attributable to stock options and restricted stock were 215,903 and 264,868, respectively. For the three and six months ended

June 30, 2017, average out-of-the-money options to purchase shares that were excluded from the calculation of incremental shares attributable to stock options and restricted stock were 416,941 and 340,268, respectively.

6. The following table summarizes the after-tax changes in accumulated other comprehensive income (loss) for the six months ended June 30, 2018:

(In thousands)	Foreign currency translation adjustment	Gain (loss) on derivative financial instruments	Pension and other post-retirement benefit adjustments	Total
Beginning balance, January 1, 2018	\$ (86,178)	\$ 459	\$ (90,950)	\$(176,669)
Other comprehensive income (loss) before reclassifications	(8,905)	(829)	—	(9,734)
Amounts reclassified from accumulated other comprehensive income (loss)	—	(361)	5,223	4,862
Net other comprehensive income (loss) - current period	(8,905)	(1,190)	5,223	(4,872)
Ending balance, June 30, 2018	\$ (95,083)	\$ (731)	\$ (85,727)	\$(181,541)

The following table summarizes the after-tax changes in accumulated other comprehensive income (loss) for the six months ended June 30, 2017:

(In Thousands)	Foreign currency translation adjustment	Gain (loss) on derivative financial instruments	Pension and other post-retirement benefit adjustments	Total
Beginning balance, January 1, 2017	\$ (93,970)	\$ 863	\$ (90,127)	\$(183,234)
Other comprehensive income (loss) before reclassifications	2,674	335	—	3,009
Amounts reclassified from accumulated other comprehensive income (loss)	—	(373)	3,900	3,527
Net other comprehensive income (loss) - current period	2,674	(38)	3,900	6,536
Ending balance, June 30, 2017	\$ (91,296)	\$ 825	\$ (86,227)	\$(176,698)

Reclassifications of balances out of accumulated other comprehensive income (loss) into net income for the three months ended June 30, 2018 are summarized as follows:

(In Thousands)	Amount reclassified from other comprehensive income (loss)	Location of gain (loss) reclassified from accumulated other comprehensive income (loss) to net income (loss)
Gain (loss) on derivative financial instruments:		
Aluminum future contracts, before taxes	\$ 712	Cost of sales
Foreign currency forward contracts, before taxes	(378)) Selling, general & administrative
Foreign currency forward contracts, before taxes	16	Cost of sales
Total, before taxes	350	
Income tax expense (benefit)	142	Income taxes
Total, net of tax	\$ 208	
Amortization of pension and other post-retirement benefits:		
Actuarial gain (loss) and prior service costs, before taxes	\$ (3,372)	(a)
Income tax expense (benefit)	(761)) Income taxes
Total, net of tax	\$ (2,611)	

(a) This component of accumulated other comprehensive income (loss) is included in the computation of net periodic pension cost (see Note 9 for additional detail).

Reclassifications of balances out of accumulated other comprehensive income (loss) into net income for the six months ended June 30, 2018 are summarized as follows:

(In thousands)	Amount reclassified from other comprehensive income (loss)	Location of gain (loss) reclassified from accumulated other comprehensive income (loss) to net income (loss)
Gain (loss) on derivative financial instruments:		
Aluminum future contracts, before taxes	\$ 944	Cost of sales
Foreign currency forward contracts, before taxes	(419) Selling, general & administrative
Foreign currency forward contracts, before taxes	31	Cost of sales
Total, before taxes	556	
Income tax expense (benefit)	195	Income taxes
Total, net of tax	\$ 361	
Amortization of pension and other post-retirement benefits:		
Actuarial gain (loss) and prior service costs, before taxes	\$ (6,746) (a)
Income tax expense (benefit)	(1,523) Income taxes
Total, net of tax	\$ (5,223)

(a) This component of accumulated other comprehensive income (loss) is included in the computation of net periodic pension cost (see Note 9 for additional detail).

Reclassifications of balances out of accumulated other comprehensive income (loss) into net income for the three months ended June 30, 2017 are summarized as follows:

(In Thousands)	Amount reclassified from other comprehensive income (loss)	Location of gain (loss) reclassified from accumulated other comprehensive income (loss) to net income (loss)
Gain (loss) on derivative financial instruments:		
Aluminum future contracts, before taxes	\$ 321	Cost of sales
Foreign currency forward contracts, before taxes	16	Cost of sales
Total, before taxes	337	
Income tax expense (benefit)	125	Income taxes
Total, net of tax	\$ 212	
Amortization of pension and other post-retirement benefits:		
Actuarial gain (loss) and prior service costs, before taxes	\$ (3,061) (a)
Income tax expense (benefit)	(1,111) Income taxes
Total, net of tax	\$ (1,950)

(a) This component of accumulated other comprehensive income (loss) is included in the computation of net periodic pension cost (see Note 9 for additional detail).

Reclassifications of balances out of accumulated other comprehensive income (loss) into net income for the six months ended June 30, 2017 are summarized as follows:

(In thousands)	Amount reclassified from other comprehensive income (loss)	Location of gain (loss) reclassified from accumulated other comprehensive income (loss) to net income (loss)
Gain (loss) on derivative financial instruments:		
Aluminum future contracts, before taxes	\$ 554	Cost of sales
Foreign currency forward contracts, before taxes	31	Cost of sales
Total, before taxes	585	
Income tax expense (benefit)	212	Income taxes
Total, net of tax	\$ 373	
Amortization of pension and other post-retirement benefits:		
Actuarial gain (loss) and prior service costs, before taxes	\$ (6,122)	(a)
Income tax expense (benefit)	(2,222)	Income taxes
Total, net of tax	\$ (3,900)	

(a) This component of accumulated other comprehensive income (loss) is included in the computation of net periodic pension cost (see Note 9 for additional detail).

In August 2007 and December 2008, the Company made an aggregate investment of \$7.5 million in kaléo, a privately held specialty pharmaceutical company dedicated to building innovative solutions for serious and life-threatening medical conditions. The mission of kaléo is to provide products that empower patients to confidently take control of their medical conditions. Tredegar owns Series A-3 Preferred Stock and Series B Preferred Stock in kaléo that, taken together, represents on a fully-diluted basis an approximate 20% interest in kaléo. Tredegar accounts for its investment in kaléo under the fair value method. At the time of the initial investment, the Company elected the fair value option of accounting since its investment objectives were similar to those of venture capitalists, which typically do not have controlling financial interests.

At June 30, 2018, the estimated fair value of the Company's investment was \$68.0 million, up from \$62.2 million and \$54.0 million as of March 31, 2018 and December 31, 2017, respectively.

The change in the estimated fair value of the Company's holding in kaléo since the end of 2017 primarily relates to the difference from discounting between the present value of projected cash flows at June 30, 2018 versus December 31, 2017 (i.e., the time value of money), changes in cash flow projections for various scenarios and the assessment of the risk-adjusted discount rate appropriate for the various scenarios. Kaléo's stock is not publicly traded. The valuation estimate in this situation is based on projection assumptions or Level 3 inputs that have a wide range of possible outcomes.

There are numerous assumptions and Level 3 inputs that, if changed, impact the projection of kaléo's future cash flows, and the probability of actually achieving those cash flows. For example, there are various regulatory and legal enforcement efforts related to the markets for kaléo's products, which could affect kaléo's efforts to market those products. Moreover, many of the assumptions and inputs are interrelated, including key assumptions for kaléo's projected market share, pricing and net margins after chargebacks, discounts, rebates, copays and returns. Accordingly, determining the sensitivity of changes in estimated fair value to the change in one assumption is not practical.

Ultimately, the true value of the Company's ownership interest in kaléo will be determined if and when a liquidity event occurs, and the ultimate value could be materially different from the \$68.0 million estimated fair value reflected in the Company's financial statements at June 30, 2018.

Unrealized gains (losses) associated with this investment are included in “Other income (expense), net” in the consolidated statements of income and separately stated in the segment operating profit table in Note 11. Subsequent to its most recent investment (December 15, 2008), and until the next round of financing, the Company believes fair value estimates are based upon Level 3 inputs since there is no secondary market for its ownership interest. Accordingly, until the next round of financing or any other significant financial transaction, value estimates will primarily be based on assumptions related to meeting cash flow projections and discounting of these factors for their high degree of risk. If kaléo does not meet its projected cash flows or related risks are unfavorable versus the most recent valuation, or a

new round of financing or other significant financial transaction indicates a lower enterprise value, then the Company's estimate of the fair value of its ownership interest in kaléo is likely to decline. Adjustments to the estimated fair value of this investment will be made in the period upon which such changes can be quantified.

The Company's investment in the Harbinger Fund had a carrying value (included in "Other assets and deferred charges") of \$1.6 million and \$1.7 million at June 30, 2018 and December 31, 2017, respectively. The carrying value at June 30, 2018 reflected Tredegar's cost basis in its investment in the Harbinger Fund, net of total withdrawal proceeds received and unrealized losses. Based on an observable price change, the Company recorded an unrealized loss of \$0.1 million in the second quarter and first six months of 2018 (none in 2017). No withdrawal proceeds were received in the first six months of 2017 or 2018. The timing and amount of future installments of withdrawal proceeds, which commenced in August 2010, were not known as of June 30, 2018.

The Company has determined that there is no readily determinable fair value for the Harbinger Fund and has elected to record its investment in the Harbinger Fund at cost, less impairment, adjusted for observable price changes. Gains on the Company's investment in the Harbinger Fund will be recognized when there are positive observable price changes, including when the amounts expected to be collected from any withdrawal from the investment are known, which will likely be when cash in excess of the remaining carrying value is received. Losses will be recognized when management believes through observable methods that it is probable that future withdrawal proceeds will not exceed the remaining carrying value.

Tredegar uses derivative financial instruments for the purpose of hedging margin exposure from fixed-price forward sales contracts in Aluminum Extrusions and exposure from currency volatility that exist as part of ongoing business operations (primarily in Flexible Packaging Films). These derivative financial instruments are designated as and 8. qualify as cash flow hedges and are recognized in the consolidated balance sheet at fair value. The fair value of derivative instruments recorded on the consolidated balance sheets are based upon Level 2 inputs. If individual derivative instruments with the same counterparty can be settled on a net basis, the Company records the corresponding derivative fair values as a net asset or net liability.

In the normal course of business, Aluminum Extrusions enters into fixed-price forward sales contracts with certain customers for the future sale of fixed quantities of aluminum extrusions at scheduled intervals. In order to hedge margin exposure created from the fixing of future sales prices relative to volatile raw material (aluminum) costs, Aluminum Extrusions enters into a combination of forward purchase commitments and futures contracts to acquire or hedge aluminum, based on the scheduled purchases for the firm sales commitments. The fixed-price firm sales commitments and related hedging instruments generally have durations of not more than 12 months, and the notional amount of aluminum futures contracts that hedged future purchases of aluminum to meet fixed-price forward sales contract obligations was \$18.6 million (17.6 million pounds of aluminum) at June 30, 2018 and \$8.2 million (8.0 million pounds of aluminum) at December 31, 2017.

The table below summarizes the location and gross amounts of aluminum futures contract fair values (Level 2) in the consolidated balance sheets as of June 30, 2018 and December 31, 2017:

(In thousands)	June 30, 2018		December 31, 2017	
	Balance Sheet Account	Fair Value	Balance Sheet Account	Fair Value
Derivatives Designated as Hedging Instruments				
Asset derivatives:				
Aluminum futures contracts	Accrued Expenses	\$999	Prepaid expenses and other	\$578
Liability derivatives:				
Aluminum futures contracts	Accrued Expenses	(316)	Prepaid expenses and other	\$(16)
Net asset (liability)		\$683		\$562

In the event that a counterparty to an aluminum fixed-price forward sales contract chooses not to take delivery of its aluminum extrusions, the customer is contractually obligated to compensate Aluminum Extrusions for any losses on the related aluminum futures and/or forward contracts through the date of cancellation.

The table below summarizes the location and gross amounts of foreign currency forward contract fair values (Level 2) in the consolidated balance sheets as of June 30, 2018 and December 31, 2017:

(In Thousands)	June 30, 2018		December 31, 2017	
	Balance Sheet Account	Fair Value	Balance Sheet Account	Fair Value
Derivatives Designated as Hedging Instruments				
Asset derivatives:				
Foreign currency forward contracts	Accrued Expenses	\$—	Accrued Expenses	\$—
Liability derivatives:				
Foreign currency forward contracts	Accrued Expenses	(1,948)	Accrued Expenses	(558)
Net asset (liability)		\$(1,948)		\$(558)

The Company's earnings are exposed to foreign currency exchange risk primarily through the translation of the financial statements of subsidiaries that have a functional currency other than the U.S. Dollar. On September 29, 2017, the Flexible Packaging Films business unit in Brazil ("Terphane Ltda.") entered into 15 monthly foreign exchange average forward rate contracts to purchase Brazilian Real ("R\$") and sell U.S. Dollars covering the period from October 2017 through December 2018. On January 29, 2018, Terphane Ltda. entered into an additional 6 monthly foreign exchange average forward rate contracts to purchase Brazilian Real and sell U.S. Dollars covering the period from January 2019 through June 2019. All of these foreign currency exchange contracts have been designated and qualify as cash flow hedges of Terphane Ltda.'s forecasted sales to customers quoted or priced in U.S. Dollars over that period. By changing the currency risk associated with these U.S. Dollar sales, the derivatives have the effect of offsetting operating costs quoted or priced in Brazilian Real and decreasing the net exposure to Brazilian Real in the consolidated statements of income. The aggregate notional amount of open foreign exchange contracts at June 30, 2018 was \$11.3 million (R\$35.9 million at foreign exchange average forward contract rates).

These derivative contracts involve elements of market risk that are not reflected on the consolidated balance sheet, including the risk of dealing with counterparties and their ability to meet the terms of the contracts. The counterparties to any forward purchase commitments are major aluminum brokers and suppliers, and the counterparties to any aluminum futures contracts are major financial institutions. Fixed-price forward sales contracts are only made available to the best and most credit-worthy customers. The counterparties to the Company's foreign currency cash flow hedge contracts are major financial institutions.

The pretax effect on net income and other comprehensive income (loss) of derivative instruments classified as cash flow hedges and described in the previous paragraphs for the three and six month periods ended June 30, 2018 and 2017 is summarized in the table below:

(In thousands)

	Cash Flow Derivative Hedges				
	Three Months Ended June 30,				
	Aluminum Futures Contracts		Foreign Currency Forwards		
	2018	2017	2018	2018	2017
Amount of pretax gain (loss) recognized in other comprehensive income (loss)	\$1,457	\$(322)	\$—	\$(1,849)	\$ —
Location of gain (loss) reclassified from accumulated other comprehensive income (loss) into net income (effective portion)	Cost of sales	Cost of sales	Cost of sales & admin	general	Cost of sales
Amount of pretax gain (loss) reclassified from accumulated other comprehensive income (loss) to net income effective portion	\$712	\$321	\$16	\$(378)	\$ 16
	Six Months Ended June 30,				
	Aluminum Futures Contracts		Foreign Currency Forwards		
	2018	2017	2018	2018	2017
Amount of pre-tax gain (loss) recognized in other comprehensive income (loss)	\$1,065	\$524	\$—	\$(1,679)	\$ —
Location of gain (loss) reclassified from accumulated other comprehensive income (loss) into net income (effective portion)	Cost of sales	Cost of sales	Cost of sales & admin	general	Cost of sales
Amount of pre-tax gain (loss) reclassified from accumulated other comprehensive income (loss) to net income (effective portion)	\$944	\$554	\$31	\$(419)	\$ 31

As of June 30, 2018, the Company expects \$0.7 million of unrealized after-tax gains on derivative instruments reported in accumulated other comprehensive income (loss) to be reclassified to earnings within the next 12 months. For the three and six month periods ended June 30, 2018 and 2017, net gains or losses realized, from previously unrealized net gains or losses on hedges that had been discontinued, were not material.

The Company sponsors noncontributory defined benefit (pension) plans covering certain current and former employees. The plan for salaried and hourly employees currently in effect is based on a formula using the participant's years of service and compensation or using the participant's years of service and a dollar amount. The plan was closed to new participants and pay for active plan participants for benefit calculations was frozen as of December 31, 2007. As of January 31, 2018, the plan no longer accrued benefits associated with crediting employees for service, thereby freezing future benefits under the plan.

The components of net periodic benefit cost for the pension and other post-retirement benefit programs reflected in the consolidated statements of income are shown below:

(In thousands)	Pension Benefits		Other Post-Retirement Benefits	
	Three Months Ended June 30,		Three Months Ended June 30,	
	2018	2017	2018	2017
Service cost	\$5	\$58	\$ 10	\$ 9
Interest cost	2,882	3,164	69	77
Expected return on plan assets	(3,761)	(3,737)	—	—
Amortization of prior service costs, gains or losses and net transition asset	3,428	3,122	(54)	(62)
Net periodic benefit cost	\$2,554	\$2,607	\$ 25	\$ 24

(In thousands)	Pension Benefits		Other Post-Retirement Benefits	
	Six Months Ended June 30,		Six Months Ended June 30,	
	2018	2017	2018	2017
Service cost	\$10	\$116	\$ 20	\$ 18
Interest cost	5,764	6,328	138	153
Expected return on plan assets	(7,522)	(7,473)	—	—
Amortization of prior service costs, (gains) losses and net transition asset	6,856	6,245	(108)	(123)
Net periodic benefit cost	\$5,108	\$5,216	\$ 50	\$ 48

Pension and other post-retirement liabilities were \$94.9 million and \$99.5 million at June 30, 2018 and December 31, 2017, respectively (\$0.6 million included in "Accrued expenses" at June 30, 2018 and December 31, 2017, with the remainder included in "Pension and other postretirement benefit obligations, net" in the consolidated balance sheets). The Company's required contributions are expected to be approximately \$8.4 million in 2018. Contributions to the pension plan during the first six months of 2018 were \$2.9 million. Tredegar funds its other post-retirement benefits (life insurance and health benefits) on a claims-made basis, which the Company anticipates will be consistent with amounts paid for the year ended December 31, 2017, or \$0.3 million.

10. Other income (expense), net consists of the following:

(In thousands)	Three Months Ended June 30,		Six Months Ended June 30,	
	2018	2017	2018	2017
Gain (loss) on investment in kaléo accounted for under fair value method	\$5,800	\$21,500	\$14,000	\$24,800
Gain associated with the settlement of an escrow agreement	—	11,856	—	11,856
Other	57	1,379	89	1,366
Total	\$5,857	\$34,735	\$14,089	\$38,022

See Note 7 for more details on the gains on the investment in kaléo.

11. The Company's business segments are PE Films, Flexible Packaging Films and Aluminum Extrusions. Information by business segment is reported below. There are no accounting transactions between segments and no allocations to segments. Net sales (sales less freight) and operating profit from ongoing operations are the measures of sales

and operating profit used by the chief operating decision maker for purposes of assessing performance.

The following table presents net sales and operating profit by segment for the three and six-month periods ended June 30, 2018 and 2017:

(In thousands)	Three Months Ended		Six Months Ended	
	June 30, 2018	2017	June 30, 2018	2017
Net Sales				
PE Films	\$82,457	\$89,639	\$175,707	\$176,050
Flexible Packaging Films	28,304	26,588	56,741	53,297
Aluminum Extrusions	144,558	123,208	272,793	222,807
Total net sales	255,319	239,435	505,241	452,154
Add back freight	8,440	7,912	17,229	16,218
Sales as shown in the Consolidated Statements of Income	\$263,759	\$247,347	\$522,470	\$468,372

See a reconciliation of net sales to sales as shown in the Condensed Consolidated Statements of Income on the previous page.

The difference between total consolidated sales as reported in the consolidated statements of income and segment, geographic and product group net sales reported in this note is freight of \$8.4 million and \$17.2 million in the three months and six months ended June 30, 2018 and \$7.9 million and \$16.2 million in the three months and six months ended June 30, 2017, respectively.

Export sales relate almost entirely to PE Films. Operations outside the U.S. in The Netherlands, Hungary, China and India also relate to PE Films. Operations in Brazil are primarily related to Flexible Packaging Films, but also include PE Films operations. Sales from locations in The Netherlands and Hungary are primarily to customers located in Europe. Sales from locations in China (Guangzhou and Shanghai) are primarily to customers located in China, but also include other customers in Asia.

(c) As disclosed in Note 1, prior period amounts have not been adjusted under the modified retrospective method.

The Tax Cuts and Jobs Act (the “TCJA”) makes broad and complex changes to the U.S. tax code, including but not limited to: (i) reducing the U.S. federal corporate tax rate from 35 percent to 21 percent; (ii) requiring companies to pay a one-time transition tax on certain unrepatriated earnings of foreign subsidiaries; (iii) generally eliminating U.S. federal income taxes on dividends from foreign subsidiaries; (iv) creating new taxes on certain foreign earnings; (v) eliminating certain deductions; and (vi) providing the option to full expensing of qualified property. The SEC staff issued Staff Accounting Bulletin No. 118 (“SAB 118”), which provides guidance on accounting for the tax effects of the TCJA. SAB 118 provides a measurement period that should not extend beyond one year from the TCJA enactment date for companies to complete the accounting under Accounting Standards Codification No. 740 (“ASC 740”). In accordance with SAB 118, a company must reflect the income tax effects of a company’s accounting for those tax effects of the TCJA for which the accounting under ASC 740 is complete. To the extent that a company’s accounting for certain tax effects of the TCJA is incomplete but it is able to determine a reasonable estimate, it must record a provisional estimate in the financial statements. If a company cannot determine a reasonable estimate to be included in the financial statements, it should continue to apply ASC 740 on the basis of the provisions of the tax law that were in effect immediately before the enactment of the TCJA.

The TCJA is complex and its impact may materially differ from the Company’s estimates due to, among other things, changes in the Company’s assumptions, implementation guidance that may be issued from the IRS and related interpretations and clarifications of the tax law relevant for the completion of the Company’s 2017 tax return filings. The Company expects to complete its assessment of these items during 2018, and any adjustments to the provisional amounts initially recorded will be included as an adjustment to income tax expense or benefit in the period the amounts are determined in accordance with SAB 118.

While item (ii) above has not been completed, the Company has not accrued any deemed repatriation taxes on unrepatriated earnings of its foreign subsidiaries, since its preliminary assessments indicates that such foreign subsidiaries have no net cumulative unremitted earnings due to historical repatriation. There has been no change to this estimate in the first six months of 2018. The remaining TCJA summary items (i and iii through vi above) have been reflected in the Company’s 2018 effective tax rate based on the Company’s best estimates as indicated in the rate reconciliation table.

The application of the new Global Intangible Low Taxed Income (“GILTI”) tax rules to the Company, which is part of item (iv) above is not complete. The rules are complex, and under GAAP, the Company is allowed to make a policy choice of either (a) treating taxes due on future U.S. inclusions in taxable income related to GILTI as current period expense when incurred (the “period cost method”) or (b) factoring such amounts into a company’s measurement of its deferred income taxes (“deferred method”). The selection of an accounting policy with respect to the new GILTI tax rules will depend, in part, on the Company’s analysis of its global income to determine whether it expects to have future U.S. inclusions in taxable income related to GILTI and, if so, what the impact is expected to be. Accordingly, the Company has not made a policy decision regarding whether to record deferred income taxes on GILTI.

Tredegear recorded tax expense of \$9.8 million on pretax net income of \$42.7 million in the first six months of 2018. Therefore, the effective tax rate in the first six months of 2018 was 23.0%, compared to 9.9% in the first six months of 2017. The quarterly effective tax rate is an estimate based on a proration of the components of the Company's estimated annual effective tax rate. The significant differences between the U.S. federal statutory rate and the effective income tax rate for the six months ended June 30, 2018 and 2017 are as follows:

(In thousands, except percentages)	2018		2017	
	Amount	%	Amount	%
Six Months Ended June 30,				
Income tax expense at federal statutory rate	\$8,971	21.0	\$18,603	35.0
U.S. Tax on Foreign Branch Income	736	1.7	—	—

Research and development tax credit	(188)	(0.4)	(285)	(0.5)
Foreign Derived Intangible Income (FDII)	(309)	(0.7)	—	—
Valuation allowance due to foreign losses and impairments	(383)	(0.9)	275	0.5
Foreign tax incentives	(655)	(1.5)	—	—
Effective income tax rate	\$9,834	23.0	\$5,246	9.9

Tredegear accrues U.S. federal income taxes on unremitted earnings of all foreign subsidiaries where required. However, due to changes in the taxation of dividends under TCJA, Tredegear will only record U.S. federal income taxes on unremitted earnings of its foreign subsidiaries where Tredegear cannot take steps to eliminate any potential tax on future distributions from its foreign subsidiaries.

The Brazilian federal statutory income tax rate is a composite of 34.0% (25.0% of income tax and 9.0% of social contribution on income). Terphane Ltda.'s manufacturing facility in Brazil is the beneficiary of certain income tax incentives that allow for a reduction in the statutory Brazilian federal income tax rate to 15.25% levied on the operating profit on certain of its products. The incentives have been granted for a 10-year period, which has a commencement date of January 1, 2015. The benefit from the tax incentives was \$0.7 million in the first six months of 2018 (none in 2017).

Tredegear and its subsidiaries file income tax returns in the U.S., various states and jurisdictions outside the U.S. With exceptions for some U.S. states and non-U.S. jurisdictions, Tredegear and its subsidiaries are no longer subject to U.S. federal, state or non-U.S. income tax examinations by tax authorities for years before 2014.

- In 2011, Tredegar was notified by U.S. Customs and Border Protection (“U.S. Customs”) that certain film products exported by Terphane Ltda. to the U.S. since November 6, 2008 could be subject to duties associated with an antidumping duty order on imported PET films from Brazil. The Company contested the applicability of these antidumping duties to the films exported by Terphane Ltda., and it filed a request with the U.S. Department of Commerce (“Commerce”) for clarification about whether the film products at issue are within the scope of the antidumping duty order. On January 8, 2013, Commerce issued a scope ruling confirming that the films are not subject to the order, provided that Terphane Ltda. can establish to the satisfaction of U.S. Customs that the performance enhancing layer on those films is greater than 0.00001 inches thick. The films at issue are manufactured to specifications that exceed that threshold. On February 6, 2013, certain U.S. producers of PET film filed a summons with the U.S. Court of International Trade to appeal the scope ruling from Commerce. In December 2014, the U.S. International Trade Commission voted to revoke the anti-dumping duty order on
13. imported PET films from Brazil. The revocation, as a result of the vote by the U.S. International Trade Commission, was effective as of November 2013. On February 20, 2015, certain U.S. producers of PET films filed a summons with the U.S. Court of International Trade to appeal the determination by the U.S. International Trade Commission. The Court granted a motion by the plaintiffs to stay the appeal of the revocation decision pending the resolution of the scope appeal. On June 8, 2017, the U.S. Court of International Trade remanded the scope determination to Commerce for re-consideration of certain scope issues. On October 20, 2017, Commerce filed its Remand Redetermination Results with the U.S. Court of International Trade, and again found that Terphane Ltda.’s films are outside of the scope of the antidumping duty order. Commerce’s decision will now be reviewed by the U.S. Court of International Trade. On June 19, 2018, the United States Court of International Trade sustained Commerce’s determination that Terphane Ltda.’s films are outside the scope of anti-dumping duty order. The plaintiffs have until August 19, 2018 to appeal the court’s ruling.
- In May 2014, the Financial Accounting Standards Board (“FASB”) and International Accounting Standards Board (“IASB”) issued their converged standard on revenue recognition. The revised revenue standard contains principles that an entity will apply to direct the measurement of revenue and timing of when it is recognized. The core principle of the guidance is that the recognition of revenue should depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which an entity expects to be entitled in exchange for those goods and services. To achieve that core principle, an entity will utilize a principle-based five-step approach model. The converged standard also includes more robust disclosure requirements which will require entities to provide sufficient information to enable users of financial statements to understand the nature, amount, timing and
14. uncertainty of revenue and cash flows arising from contracts with customers. In March 2016, amended guidance was issued regarding clarifying the implementation guidance on principal versus agent considerations and in April 2016, clarifying guidance was issued relating to identifying performance obligations and licensing implementation. The Company adopted the new standard effective January 1, 2018, using the modified retrospective approach applied to all contracts as of the date of adoption. Comparative periods have not been adjusted and continue to be reported under the accounting standards in effect for those periods. The adoption of ASU 2014-09, as amended, had no material impact on the Company’s consolidated financial position, results of operations, equity or cash flows as of the adoption date or for the three months ended March 31, 2018. The Company has included the disclosures required by ASU 2014-09.
- In January 2016, the FASB issued amended guidance associated with accounting for equity investments measured at fair value. The amended guidance requires all equity investments to be measured at fair value with changes in the fair value recognized through net income (other than those accounted for under equity method of accounting or those that result in consolidation of the investee or those without a readily determinable fair value). The amended guidance also requires an entity to present separately in other comprehensive income the portion of the total change in the fair value of a liability resulting from a change in the instrument-specific credit risk when the entity has elected to measure the liability at fair value in accordance with the fair value option for financial instruments. In addition, the amendments in this update eliminate the requirement to disclose the fair value of financial instruments measured at amortized cost for entities that are not public business entities and the requirement to disclose the method(s) and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured at amortized cost on

the balance sheet for public business entities. The Company adopted this amended guidance in the first quarter of 2018 and the adoption did not have a material impact on the Company's consolidated financial statements. In February 2016, the FASB issued a revised standard on lease accounting. Lessees will need to recognize virtually all of their leases on the balance sheet, by recording a right-of-use asset and lease liability. The revised standard requires additional analysis of the components of a transaction to determine if a right-of-use asset is embedded in the transaction that needs to be treated as a lease. Substantial additional disclosures are also required by the revised standard. The revised standard is effective for fiscal years beginning after December 31, 2018, including the interim periods within those fiscal years. The revised standard should be adopted using a modified retrospective approach, with early adoption permitted. The Company has a process in place to analyze the impact of the standard, and the related

guidance issued, on all leases throughout the Company. This process includes reviewing all active leases with terms greater than 12 months, which are currently being identified. The Company has also started evaluating the new requirements for tracking and cost recovery of these leases. The Company expects to complete its evaluations of the impacts of the accounting and disclosure requirements on its business processes, controls and systems by the second half of 2018.

In October 2016, the FASB issued guidance that requires an entity to recognize the income tax consequences of an intra-entity transfer of an asset other than inventory when the transfer occurs. The amendments are effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2017, and should be applied on a modified retrospective basis through a cumulative-effect adjustment directly to retained earnings at the beginning of the period of adoption. The Company adopted this guidance in the first quarter of 2018 and the adoption did not have a material impact on the Company's consolidated financial statements.

In January 2017, the FASB issued amended guidance that eliminates the requirement to determine the fair value of individual assets and liabilities of a reporting unit to measure goodwill impairment. Under the amendments in the new guidance, goodwill impairment testing will be performed by comparing the fair value of the reporting unit with its carrying amount and recognizing an impairment charge for the amount by which the carrying amount exceeds the reporting unit's fair value. The new standard is effective for annual and interim goodwill impairment tests in fiscal years beginning after December 15, 2019, and should be applied on a prospective basis. Early adoption is permitted for annual or interim goodwill impairment testing performed after January 1, 2017. The Company has not elected early adoption and does not expect any impact on the Company's consolidated financial statements.

In March 2017, the FASB issued final guidance on the presentation of net periodic pension and postretirement benefit cost (net benefit cost). Previously, net benefit cost was reported as an employee cost within operating income. This new guidance requires the bifurcation of net periodic pension and postretirement benefit costs. Service cost will be part of operating income (and is the only piece eligible to be capitalized). All other components will be shown outside of operations. The new standard is effective for annual and interim periods in fiscal years beginning after December 15, 2017, and should be applied on a retrospective basis, except for the amendments related to capitalization of benefit cost, which should be applied on a prospective basis. The Company adopted this amended guidance in the first quarter of 2018 by separately presenting "Pension and postretirement benefits" expense in its consolidated statements of income.

In August 2017, the FASB issued amended guidance on the accounting for hedging activities. The amended guidance makes more hedging strategies qualify for hedge accounting. After initial qualification, the amended guidance permits a qualitative effectiveness assessment for certain hedges instead of a quantitative test, if the company can reasonably support an expectation of effectiveness throughout the term of the hedge. The amended guidance is effective for annual and interim periods beginning after January 1, 2019, but may be adopted immediately. The adoption should be on a cumulative effect basis and applied prospectively. The Company is currently evaluating the amended guidance but does not expect there to be an impact of adopting this guidance on the Company's consolidated financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Forward-looking and Cautionary Statements

Some of the information contained in this Quarterly Report on Form 10-Q ("Form 10-Q") may constitute "forward-looking statements" within the meaning of the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995. When using the words "believe," "estimate," "anticipate," "expect," "project," "plan," "likely," "may" and expressions, Tredegar does so to identify forward-looking statements. Such statements are based on then current expectations and are subject to a number of risks and uncertainties that could cause actual results to differ materially from those addressed in the forward-looking statements. It is possible that actual results and financial condition may differ, possibly materially, from the anticipated results and financial condition indicated in or implied by these forward-looking statements. Accordingly, you should not place undue reliance on these forward-looking statements. Factors that could cause actual results to differ from expectations include, without limitation, the following:

- Loss or gain of sales to significant customers on which our business is highly dependent;

- ability to achieve sales to new customers to replace lost business;
- ability to develop, efficiently manufacture and deliver new products at competitive prices;
- failure of our customers to achieve success or maintain market share;

failure to protect our intellectual property rights;

risks of doing business in countries outside the U.S. that affect our substantial international operations;

political, economic, and regulatory factors concerning our products;

uncertain economic conditions in countries in which we do business;

competition from other manufacturers, including manufacturers in lower-cost countries and manufacturers benefiting from government subsidies;

impact of fluctuations in foreign exchange rates;

a change in the amount of our underfunded defined benefit (pension) plan liability;

an increase in the operating costs incurred by our operating companies, including, for example, the cost of raw materials and energy;

inability to successfully identify, complete or integrate strategic acquisitions; failure to realize the expected benefits of such acquisitions; and assumption of unanticipated risks in such acquisitions;

disruption to our manufacturing facilities;

- occurrence or threat of extraordinary events, including natural disasters and terrorist attacks;

an information technology system failure or breach;

volatility and uncertainty of the valuation of our cost-basis investment in kaléo;

the impact of the imposition of tariffs and sanctions on imported aluminum ingot used in our aluminum extrusions; and the other factors discussed in the reports Tredegar files with or furnishes to the Securities and Exchange Commission (“the SEC”) from time to time, including the risks and important factors set forth in additional detail in Part I, Item 1A of Tredegar’s 2017 Annual Report on Form 10-K (the “2017 Form 10-K”). Readers are urged to review and consider carefully the disclosures Tredegar makes in its filings with the SEC, including the 2017 Form 10-K. Tredegar does not undertake, and expressly disclaims any duty, to update any forward-looking statement to reflect any change in management’s expectations or any change in conditions, assumptions or circumstances on which such statements are based, except as required by applicable law.

References herein to “Tredegar,” “the Company,” “we,” “us” and “our” are to Tredegar Corporation and its subsidiaries, collectively, unless the context otherwise indicates or requires.

Executive Summary

Tredegar is a manufacturer of polyethylene plastic films through its PE Films segment, polyester films through its Flexible Packaging Films segment and aluminum extrusions through its Aluminum Extrusions segment. PE Films is composed of personal care materials, surface protection films, polyethylene overwrap films and films for other markets. Flexible Packaging Films produces polyester-based films for use in packaging applications that have specialized properties, such as heat resistance, strength, barrier protection and the ability to accept high-quality print graphics. Aluminum Extrusions produces high-quality, soft-alloy and medium-strength aluminum extrusions primarily for building and construction, automotive, consumer durables, machinery and equipment, electrical and distribution markets.

Second-quarter 2018 net income was \$14.7 million (\$0.44 per share) compared with net income of \$44.2 million (\$1.34 per share) in the second quarter of 2017. Net income for the second quarter of 2018 included an unrealized after-tax gain on the Company's investment in kaléo of \$4.5 million (\$0.14 per share), which is accounted for under the fair value method (see Note 7 for more details). Net income for the second quarter of 2017 included the following:

- An unrealized after-tax gain on the Company's investment in kaléo of \$15.7 million (\$0.47 per share);

- An after-tax gain of \$11.9 million (\$0.36 per share) from the settlement of an escrow agreement related to the Terphane acquisition in 2011; and

- An income tax benefit of \$8.1 million (\$0.25 per share) associated with the write-off of the stock basis of one of the Company's U.S. subsidiaries.

Other losses related to plant shutdowns, asset impairments, restructurings and other items are described in Note 3. Net sales (sales less freight) and operating profit from ongoing operations are the measures of sales and operating profit used by the chief operating decision maker of each segment for purposes of assessing performance. See the table in Note 11 for a presentation of Tredegar's net sales and operating profit by segment for the three and six months ended June 30, 2018 and 2017.

PE Films

A summary of operating results from ongoing operations for PE Films is provided below:

(In thousands, Except Percentages)	Three Months Ended		Favorable/ (Unfavorable) % Change	Six Months Ended		Favorable/ (Unfavorable) % Change
	June 30, 2018	2017		June 30, 2018	2017	
Sales volume (lbs)	30,099	34,166	(11.9)%	64,922	69,222	(6.2)%
Net sales	\$82,457	\$89,639	(8.0)%	\$175,707	\$176,050	(0.2)%
Operating profit from ongoing operations	\$8,678	\$10,682	(18.8)%	\$22,712	\$19,713	15.2%

Second-Quarter 2018 Results vs. Second-Quarter 2017 Results

Net sales (sales less freight) in the second quarter of 2018 decreased by \$7.2 million versus 2017 primarily due to lower volume in Personal Care. The sales decline in Personal Care was primarily related to lower demand for topsheet from its largest customer and, due to timing, lower sales of elastic materials in the second quarter of 2018 versus 2017. The Company believes it is making inroads with customers for new elastic products in Europe. In addition, the company is spending \$25 million at its plant in Terre Haute, Indiana to expand elastics capacity to serve customers in North America, which is expected to begin production in the middle of 2019.

Sales volume in the second quarter of 2018 in Surface Protection was comparable to the prior year with strong demand for components of flat panel displays continuing through the first half of 2018. Looking forward, there are indications that sales volume in Surface Protection during the third quarter of 2018 may decline sequentially and when compared to last year due to a combination of factors. These factors include a possible inventory build-up by customers during the first half of 2018 and partial customer product transitions, which have already begun, to alternative processes or materials as further discussed in the last two paragraphs of this section.

Operating profit from ongoing operations in the second quarter of 2018 decreased by \$2.0 million versus the second quarter of 2017 primarily due to:

Lower contribution to profits from personal care films, primarily due to lower volume as noted above (\$2.0 million) and higher variable costs due to timing of resin pass-through (\$0.3 million), partially offset by improved pricing on certain products (\$0.6 million), net favorable impact from the change in U.S. Dollar value of currencies for operations outside of the U.S. (\$0.6 million) and lower sales, general and administrative costs (\$0.5 million);

Lower contribution to profits from surface protection films, primarily due to a sales return reserve for a quality claim (\$1.5 million), manufacturing inefficiencies (\$0.8 million) and inventory adjustments (\$0.3 million), partially offset by improved mix (\$0.9 million);

Additional costs of \$0.5 million associated with business development activities related to optical films; and

Realized cost savings associated with the previously announced project to consolidate domestic manufacturing facilities in PE Films (\$0.8 million).

In June 2018, the Company announced plans to close its facility in Shanghai, China, which primarily produces topsheet films used as components for personal care products. Production is expected to cease at this plant by the end of 2018. The Company expects to recognize costs associated with exit and disposal activities of \$7.1 million comprised of: (i) retention, severance and related costs (\$3.6 million), (ii) customer-related costs (\$1.1 million), and (iii) legal, asset disposal and other cash costs (\$2.4 million). In addition, the Company expects non-cash asset write-offs and accelerated depreciation of \$0.9 million. Net annual cash savings from consolidating operations of \$1.7 million is expected. Proceeds from expected property disposals are uncertain. The Company anticipates that these activities, including property disposals, will require 12-18 months to execute, and the costs are expected to be incurred during this period. See additional information on current year-to-date costs in Note 3 in the Notes to Financial Statements.

The Company continues to anticipate a significant customer product transition in the Personal Care component of PE Films. The Company now expects that customer product transition to begin in the fourth quarter of 2018. The Company currently estimates that, when fully implemented, this will adversely impact the annual sales of the business unit by \$70 million and will materially impact profits. Ongoing discussions with this customer will determine the full implementation schedule. The loss of this business without replacement with new business could trigger an impairment of Personal Care's long-lived assets and goodwill. As of June 30, 2018, the goodwill balance carried by Personal Care was \$47 million. Personal Care has been increasing its R&D spending (an increase of \$5 million in 2017 versus 2014), is investing capital, and is accelerating sales and marketing efforts to capture growth and diversify its customer base and product offerings in personal care products. The overall timing and net change in Personal Care's revenues and profits and capital expenditures needed to support these efforts during this transition period are uncertain at this time.

The Surface Protection component of PE Films supports manufacturers of optical and other specialty substrates used in flat panel display products. These films are primarily used by customers to protect components of displays in the manufacturing and transportation process and then discarded.

The Company previously reported the risk over the next few years that a portion of its film used in surface protection applications will be made obsolete by possible future customer product transitions to less costly alternative processes or materials. The Company estimates that the customer product transitions will be fully implemented by the fourth quarter of 2019. When fully implemented, the Company estimates that the annualized adverse impact on future ongoing operating profit from this customer shift will be approximately \$10 million. The Company is aggressively pursuing new surface protection products, applications and customers.

Year-To-Date 2018 Results vs. Year-To-Date 2017 Results

Net sales (sales less freight) in the first six months of 2018 decreased by \$0.3 million versus 2017 primarily due to lower topsheet and elastics volume in Personal Care, partially offset by an increase in Surface Protection volume. The factors impacting sales for PE Films during the first half of 2018 versus last year are similar to the factors described above in the quarterly comparison.

Operating profit from ongoing operations in the first six months of 2018 increased by \$3.0 million versus the first six months of 2017 primarily due to:

Higher contribution to profits from surface protection films, primarily due to higher volume and improved mix (\$3.8 million), partially offset by a sales return reserve for a quality claim (\$1.5 million);

27

Lower contribution to profits from personal care films, primarily due to lower volume in topsheet, elastics and other products (\$3.4 million), partially offset by improved pricing on certain products (\$1.3 million), net favorable impact from the change in U.S. Dollar value of currencies for operations outside of the U.S. (\$0.9 million) and lower sales, general and administrative costs (\$0.5 million);

Additional costs of \$0.5 million associated with business development activities related to optical films; and
Realized cost savings associated with the previously announced project to consolidate domestic manufacturing facilities in PE Films (\$1.8 million).

Capital Expenditures, Depreciation & Amortization

Capital expenditures in PE Films were \$7.4 million in the first six months of 2018 compared to \$7.8 million in the first six months of 2017. Capital expenditures are projected to be \$32 million in 2018, including: \$15 million of a total \$25 million expected for North American capacity expansion for elastics products in Personal Care; new capacity for next generation products in Surface Protection (\$6 million); and approximately \$10 million for routine capital expenditures required to support operations. Depreciation expense was \$7.6 million in the first six months of 2018 and \$6.9 million in the first six months of 2017. Depreciation expense is projected to be \$16 million in 2018.

Flexible Packaging Films

A summary of operating results from ongoing operations for Flexible Packaging Films, which is also referred to as Terphane, is provided below:

(In thousands, Except Percentages)	Three Months Ended		Favorable/ (Unfavorable) % Change	Six Months Ended		Favorable/ (Unfavorable) % Change		
	June 30, 2018	2017		June 30, 2018	2017			
Sales volume (lbs)	23,701	21,966	7.9	%	47,018	44,028	6.8	%
Net sales	\$28,304	\$26,588	6.5	%	\$56,741	\$53,297	6.5	%
Operating profit (loss) from ongoing operations	\$1,294	\$(319)	NA		\$3,008	\$(2,317)	NA	

Second-Quarter 2018 Results vs. Second-Quarter 2017 Results

Net sales and volume increased in the second quarter of 2018 compared with the second quarter of 2017 due to higher demand. Terphane was operating at full capacity utilization during the second quarter. To increase capacity, Terphane is spending approximately \$1.8 million (including capital expenditures of \$1 million and project expenses of \$0.8 million) on a previously idled production line which was restarted in mid-June. Also during the second quarter, a nationwide trucking strike caused a disruption of shipments, lowering sales volume by approximately 0.9 million pounds.

Terphane's operating results from ongoing operations in the second quarter of 2018 increased by \$1.6 million versus the second quarter of 2017 primarily due to:

Significantly lower depreciation and amortization of \$2.2 million resulting from the \$101 million non-cash asset impairment loss recognized in the fourth quarter of 2017;

A benefit of \$0.6 million primarily from higher volume and favorable foreign currency translation of Real-denominated operating costs, partially offset by a \$0.4 million loss on foreign currency forward contracts that partially hedged Real-denominated operating costs;

One-time costs of \$0.4 million related to the restarting of the idled production line referenced above; and

Net foreign currency transaction losses of \$0.5 million (losses of \$0.3 million in 2018 versus gains of \$0.2 million in 2017).

Terphane's quarterly financial results have been volatile, and the Company expects continued uncertainty and volatility until industry capacity utilization and the competitive dynamics in Latin America improve.

Year-To-Date 2018 Results vs. Year-To-Date 2017 Results

Net sales and volume increased in the first six months of 2018 compared with the first six months of 2017 due to higher demand.

Terphane’s operating results from ongoing operations in the first six months of 2018 increased by \$5.3 million versus the first six months of 2017 primarily due to:

- Significantly lower depreciation and amortization of \$4.5 million resulting from the \$101 million non-cash asset impairment loss recognized in the fourth quarter of 2017;
- A benefit of \$1.9 million primarily from higher volume and favorable foreign currency translation of Real-denominated operating costs, partially offset by a \$0.4 million loss on foreign currency forward contracts that partially hedged Real-denominated operating costs;
- One-time costs of \$0.5 million related to the restarting of the idled production line referenced above; and
- Net foreign currency transaction losses of \$0.3 million (losses of \$0.4 million in 2018 versus \$0.1 million in 2017).

Capital Expenditures, Depreciation & Amortization

Capital expenditures in Terphane were \$1.4 million in the first six months of 2018 compared to \$1.2 million in the first six months of 2017. Terphane currently estimates that total capital expenditures in 2018 will be \$5 million, including approximately \$1 million to re-start the idled production line referenced above and \$4 million for routine capital expenditures required to support operations. Depreciation expense was \$0.4 million in the first six months of 2018 and \$3.7 million in the first six months of 2017. Depreciation expense is projected to be \$1.0 million in 2018. Amortization expense was \$0.2 million in the first six months of 2018 and \$1.5 million in the first six months of 2017, and is projected to be \$0.5 million in 2018. Aggregate depreciation and amortization expense is projected at \$1.5 million in 2018, down significantly from \$10.5 million in 2017 due to the write-down of Terphane’s long-lived assets during the fourth quarter of 2017.

Aluminum Extrusions

A summary of operating results from ongoing operations for Aluminum Extrusions is provided below:

(In thousands, Except Percentages)	Three Months Ended		Favorable/ (Unfavorable) % Change	Six Months Ended		Favorable/ (Unfavorable) % Change
	June 30, 2018	2017		June 30, 2018	2017	
Sales volume (lbs) *	55,057	51,976	5.9 %	91,174	87,357	4.4 %
Net sales	\$144,558	\$123,208	17.3 %	\$272,793	\$222,807	22.4 %
Operating profit from ongoing operations	\$13,156	\$11,772	11.8 %	\$23,355	\$21,601	8.1 %

* Sales volume for the six months ended June 30, 2018 and 2017 excludes sales volume associated with Futura Industries Corporation (“Futura”), acquired on February 15, 2017.

Second-Quarter 2018 Results vs. Second-Quarter 2017 Results

Net sales in the second quarter of 2018 increased versus 2017 primarily due to higher sales volume and an increase in average selling prices primarily due to the pass-through to customers of higher market-driven raw material costs.

Sales volume in the second quarter of 2018 increased by 5.9% versus 2017 due to higher volume in the nonresidential building and construction and specialty markets. Higher average net selling prices, primarily attributed to an increase in aluminum market prices, had a favorable impact on net sales of \$14.4 million, and higher volume improved net sales by \$6.9 million. Bookings and backlog remain strong.

Operating profit from ongoing operations in the second quarter of 2018 increased by \$1.4 million in comparison to the second quarter of 2017, primarily due to higher volume and inflation-related sales prices (\$2.4 million), partially offset by increased operating costs, including employee-related expenses and higher depreciation (\$1.0 million).

Bonnell Aluminum’s Niles, Michigan facility continued to experience inefficiencies. Without these inefficiencies, the Company estimates that operating profit from ongoing operations in the second quarter of 2018 would have been higher by \$1 million.

On March 8, 2018, the U.S. imposed tariffs of 10% on aluminum ingot and semi-finished aluminum imported into the U.S. from certain countries, including countries from which Bonnell Aluminum has historically sourced aluminum supplies. On April 6, 2018, the U.S. announced sanctions on certain Russian individuals and on companies controlled by those individuals, including United Company RUSAL Plc, Russia's largest aluminum producer and a substantial supplier of primary aluminum to the U.S. market. Collectively, these events have resulted in a significant increase in the cost of aluminum ingot used by Bonnell Aluminum to make its products. The average U.S. Midwest Transaction price, the benchmark price for P1020 high-grade aluminum ingot delivered, averaged \$1.24 per pound in the second quarter of 2018, up \$0.28 from \$0.96 per pound in the first quarter of 2017. This price has exceeded \$1.35 per pound on certain days in the second quarter of 2018. In 2017, aluminum raw materials comprised 43% of Bonnell Aluminum's average selling price when the U.S. Midwest Transaction price averaged \$0.98 per pound. For the vast majority of its business, Bonnell Aluminum expects to be able to pass through higher aluminum costs to customers. However, sustained higher costs for aluminum extrusions could result in reduced demand and product substitutions in place of aluminum extrusions, which could materially and negatively affect Bonnell Aluminum's business and results of operations. In addition, continued sanctions on RUSAL Plc could result in aluminum billet supply shortages in the U.S. aluminum extrusion market, although Bonnell does not currently anticipate any impact of such potential shortages on its access to aluminum.

Year-To-Date 2018 Results vs. Year-To-Date 2017 Results

Net sales in the first six months of 2018 increased versus 2017 primarily due to the addition of Futura and higher volume. Futura contributed \$47.3 million of net sales in the first six months of 2018 versus \$29.4 million for the 131 days owned during the first six months of 2017 (acquired on February 15, 2017). Excluding the impact of Futura, net sales improved due to higher sales volume and an increase in average selling prices primarily due to the pass-through to customers of higher market-driven raw material costs.

Volume on an organic basis (which excludes the impact of the Futura acquisition) in the second quarter of 2018 increased by 4.4% versus 2017 due to higher volume in the nonresidential building and construction and specialty markets. Higher average net selling prices, primarily attributed to an increase in aluminum market prices, had a favorable impact on net sales of \$24.7 million, and higher volume improved net sales by \$6.9 million.

Operating profit from ongoing operations in the first six months of 2018 increased by \$1.8 million in comparison to the first six months of 2017. Excluding the favorable profit impact of Futura (\$1.4 million), operating profit from ongoing operations increased \$0.4 million, primarily due to:

- Higher volume, improved mix and inflation-related sales prices (\$5.1 million), partially offset by increased operating costs, including employee-related expenses and higher depreciation (\$3.2 million); and

- Continued inefficiencies associated with the new extrusion line at the Niles, Michigan plant (\$1.5 million).

Capital Expenditures, Depreciation & Amortization

Capital expenditures in Aluminum Extrusions were \$5.6 million in the first six months of 2018 (including \$1.1 million associated with Futura), compared to \$17.7 million in the first six months of 2017. Capital expenditures in 2017 included the extrusions capacity expansion project at the facility in Niles, Michigan. Capital expenditures are projected to be \$14 million in 2018, including approximately \$7 million for infrastructure upgrades and expanded fabrication and machining capabilities, and approximately \$7 million for routine items required to support operations. Depreciation expense was \$6.6 million in the first six months of 2018 compared to \$5.3 million in the first six months of 2017, and is projected to be \$13 million in 2018. Amortization expense was \$1.8 million in the first six months of 2018 and \$1.4 million in the first six months of 2017, and is projected to be \$4 million in 2018.

Corporate Expenses, Interest and Taxes

Pension expense was \$5.1 million in the first six months of 2018, versus \$5.2 million in the first six months of 2017. The impact on earnings from pension expense is reflected in "Corporate expenses, net" in the net sales and operating profit by segment table in Note 11. Pension expense is projected to be approximately \$10.2 million in 2018. Corporate expenses, net, increased in the first six months of 2018 versus 2017 primarily due to higher stock-based employee benefit costs and professional fees for services rendered early in the first quarter of 2018 associated with the Terphane non-cash asset impairment loss that was recognized in the fourth quarter of 2017.

Interest expense was \$3.2 million in the first six months of 2018 in comparison to \$2.8 million in the first six months of 2017, primarily due to higher interest rates.

The effective tax rate used to compute income taxes in the first six months of 2018 was 23.0% compared to 9.9% in the first six months of 2017. The significant differences between the U.S. federal statutory rate and the effective tax rate for the first six months, including the reduction of the U.S. federal corporate income tax rate pursuant to the U.S. Tax Cuts and Jobs Act enacted in December 2017 from 35% to 21% beginning in 2018, is shown in the table provided in Note 12.

Net capitalization and other credit measures are provided in Liquidity and Capital Resources.

Critical Accounting Policies

In the ordinary course of business, the Company makes a number of estimates and assumptions relating to the reporting of results of operations and financial position in the preparation of financial statements in conformity with generally accepted accounting principles in the United States (“GAAP”). The Company believes the estimates, assumptions and judgments described in the section “Management’s Discussion and Analysis of Financial Condition and Results of Operations – Critical Accounting Policies” of the 2017 Form 10-K have the greatest potential impact on our financial statements, so Tredegar considers these to be its critical accounting policies. These policies include accounting for impairment of long-lived assets and goodwill, investment accounted for under the fair value method, pension benefits and income taxes. These policies require management to exercise judgments that are often difficult, subjective and complex due to the necessity of estimating the effect of matters that are inherently uncertain. Actual results could differ significantly from those estimates under different assumptions and conditions. The Company believes the consistent application of these policies enables it to provide readers of the financial statements with useful and reliable information about our operating results and financial condition. Since December 31, 2017, there have been no changes in these policies that have had a material impact on results of operations or financial position. For more information on new accounting pronouncements, see Note 14.

Results of Operations

Second Quarter of 2018 Compared with the Second Quarter of 2017

Overall, sales in the second quarter of 2018 increased by 6.6% compared with the second quarter of 2017. Net sales decreased 8.0% in PE Films. Personal Care was down primarily due to lower demand for topsheet from its largest customer and, due to timing, lower sales of elastic materials in the second quarter of 2018 versus 2017. Sales were flat in Surface Protection. Net sales in Flexible Packaging Films increased 6.5% due to higher demand. Net sales increased 17.3% in Aluminum Extrusions primarily due to higher sales volumes and an increase in average selling prices as a result of the pass-through to customers of higher market-driven raw material costs. For more information on net sales and volume, see the Executive Summary.

Consolidated gross profit (sales minus cost of goods sold and freight) as a percentage of sales was 16.9% in the second quarter of 2018 compared to 17.8% in the second quarter of 2017. The gross profit margin in PE Films decreased primarily due to lower volume in personal care films. The gross profit margin in Flexible Packaging Films increased due to significantly lower depreciation and amortization costs in 2018 compared to 2017, resulting from the \$101 million non-cash asset impairment charge recognized in the fourth quarter of 2017, which wrote down the value of its assets to fair value. The gross profit margin in Aluminum Extrusions increased primarily as a result of higher volume and inflation-related sales prices partially offset by increased operating costs. The 2017 percentages have changed from the amounts disclosed in the prior year due to the retrospective adoption of ASU 2017-07, which resulted in the separate presentation of “Pension and postretirement benefits” expense in the consolidated statements of income. Historically the Company had reported a portion of its pension and postretirement benefit expenses in cost of goods sold.

As a percentage of sales, selling, general and administrative (“SG&A”) and R&D expenses were 9.7% in the second quarter of 2018, compared with 10.6% in the second quarter of last year. SG&A expenses decreased year-over-year as 2018 was not burdened with the higher costs incurred in 2017 associated with the Futura acquisition and integration costs and other business development costs. The 2017 percentages have changed from the amounts disclosed in the prior year due to the retrospective adoption of ASU 2017-07, which resulted in the separate presentation of “Pension and postretirement benefits” expense in the consolidated statements of income. Historically the Company had reported a portion of its pension and postretirement benefit expenses in SG&A.

Plant shutdowns, asset impairments, restructurings and other items in the second quarter of 2018 and 2017 are shown in the segment operating profit table in Note 11 and are described in detail in Note 3. A discussion of unrealized gains and losses on investments can also be found in Note 7.

Interest expense was \$1.6 million in the second quarter of 2017 compared to \$1.6 million in the second quarter of 2018.

Average debt outstanding and interest rates were as follows:

(In Millions)	Three Months Ended June 30,	
	2018	2017
Floating-rate debt with interest charged on a rollover basis at one-month LIBOR plus a credit spread:		
Average outstanding debt balance	\$ 133.1	\$ 193.6
Average interest rate	3.8 %	2.9 %
Fixed-rate and other debt:		
Average outstanding debt balance	\$—	\$—
Average interest rate	n/a	n/a
Total debt:		
Average outstanding debt balance	\$ 133.1	\$ 193.6
Average interest rate	3.8 %	2.9 %

First Six Months of 2018 Compared with the First Six Months of 2017

Overall, sales in the first six months of 2018 increased by 11.6% compared with the first six months of 2017. Net sales decreased 0.2% in PE Films primarily due to lower topsheet volume in Personal Care, partially offset by a market-driven increase in surface protection films sales. Net sales in Flexible Packaging Films increased due to higher demand. Net sales increased 22.4% in Aluminum Extrusions primarily due to the acquisition of Futura, higher sales volumes and an increase in average selling prices as a result of the pass-through to customers of higher market-driven raw material costs. For more information on net sales and volume, see the Executive Summary.

Consolidated gross profit (sales minus cost of goods sold and freight) as a percentage of sales was 17.5% in the six months of 2018 compared to 16.5% in the first six months of 2017. The gross profit margin in PE Films increased due to higher shipments by Surface Protection in the first six months of 2018 versus 2017. The gross profit margin in Flexible Packaging Films increased due to significantly lower depreciation and amortization costs in 2018 compared to 2017, resulting from the previously mentioned asset impairment charge in 2017. The gross profit margin in Aluminum Extrusions increased primarily as a result of the inclusion of the operating performance by Futura for a full six months and higher volume and pricing. The 2017 percentages have changed from the amounts disclosed in the prior year due to the retrospective adoption of ASU 2017-07, which resulted in the separate presentation of “Pension and postretirement benefits” expense in the consolidated statements of income. Historically the Company had reported a portion of its pension and postretirement benefit expenses in cost of goods sold.

As a percentage of sales, SG&A and R&D expenses were 9.9% in the first six months of 2018, compared with 10.8% in the first six months of last year. SG&A expenses decreased on a percentage basis year-over-year due to the increase in sales. Actual SG&A spending was slightly higher due to the additional spending to support the growth of the Company, including Futura, and for higher stock-based employee benefit costs. The 2017 percentages have changed from the amounts disclosed in the prior year due to the retrospective adoption of ASU 2017-07, which resulted in the separate presentation of “Pension and postretirement benefits” expense in the consolidated statements of income.

Historically the Company had reported a portion of its pension and postretirement benefit expenses in SG&A. Plant shutdowns, asset impairments, restructurings and other items in the first six months of 2018 and 2017 are shown in the segment operating profit table in Note 11 and are described in detail in Note 3. A discussion of unrealized gains and losses on investments can also be found in Note 7.

Interest expense increased from \$2.8 million in the first six months of 2017 to \$3.2 million in the first six months of 2018, primarily due to higher interest rates. In February 2017, the Company borrowed \$87 million under its Credit Agreement (as defined in Liquidity and Capital Resources) to fund the acquisition of Futura.

Average debt outstanding and interest rates were as follows:

(In Millions)	Six Months Ended	
	June 30, 2018	2017
Floating-rate debt with interest charged on a rollover basis at one-month LIBOR plus a credit spread:		
Average outstanding debt balance	\$ 144.0	\$ 171.4
Average interest rate	3.6 %	2.8 %
Fixed-rate and other debt:		
Average outstanding debt balance	\$—	\$—
Average interest rate	n/a	n/a
Total debt:		
Average outstanding debt balance	\$ 144.0	\$ 171.4
Average interest rate	3.6 %	2.8 %

Liquidity and Capital Resources

Tredegear's management continues to focus on improving working capital management. Measures such as days sales outstanding ("DSO"), days inventory outstanding ("DIO") and days payables outstanding ("DPO") are used to evaluate changes in working capital. Changes in operating assets and liabilities from December 31, 2017 to June 30, 2018 are summarized as follows:

• Accounts and other receivables increased \$8.2 million (6.8%).

Accounts and other receivables in PE Films decreased by \$1.7 million primarily due to lower net sales for certain Personal Care products, partially offset by higher sales from surface protection films and the timing of cash receipts. DSO (represents trailing 12 months net sales divided by a rolling 12-month average of accounts and other receivables balances) was approximately 46.6 days for the 12 months ended June 30, 2018 and 48.4 days for the 12 months ended December 31, 2017.

Accounts and other receivables in Flexible Packaging Films decreased by \$1.9 million primarily due to limitations on making shipments during a nationwide truckers' strike in May of 2018 and the timing of cash receipts. DSO was approximately 48.3 days for the 12 months ended June 30, 2018 and 53.2 days for the 12 months ended December 31, 2017.

Accounts and other receivables in Aluminum Extrusions increased by \$11.7 million primarily due to seasonally higher sales in the second quarter of 2018 versus the fourth quarter of 2017 and higher prices resulting from the pass through of higher metal costs. DSO was approximately 44.3 days for the 12 months ended June 30, 2018 and 43.3 days for the 12 months ended December 31, 2017.

• Inventories decreased \$2.0 million (2.3%).

Inventories in PE Films decreased by approximately \$1.0 million primarily due to the timing of raw material purchases. DIO (represents trailing 12 months costs of goods sold calculated on a first-in, first-out basis divided by a rolling 12-month average of inventory balances calculated on the first-in, first-out basis) was approximately 55.9 days for the 12 months ended June 30, 2018 and 55.0 days for the 12 months ended December 31, 2017.

Inventories in Flexible Packaging Films increased by approximately \$0.8 million primarily due to limitations on making shipments during the nationwide truckers' strike and the timing of raw material purchases. DIO was approximately 71.4 days for the 12 months ended June 30, 2018 and 70.1 days for the 12 months ended December 31, 2017.

Inventories in Aluminum Extrusions decreased by \$1.8 million due to the timing of purchases. DIO was approximately 33.8 days for the 12 months ended June 30, 2018 and 32.6 days for the 12 months ended December 31, 2017.

Net property, plant and equipment decreased \$5.8 million (2.6%) primarily due to capital expenditures of \$14.5 million, more than offset by depreciation expenses of \$14.7 million and by a change in the value of the U.S. dollar relative to foreign currencies (\$4.2 million decrease).

Goodwill and other intangibles decreased by \$2.3 million (1.4%) due to amortization expense of \$2.1 million.

Accounts payable increased \$12.9 million (11.9%).

Accounts payable in PE Films decreased \$0.3 million due to the normal volatility associated with the timing of payments. DPO (represents trailing 12 months costs of goods sold calculated on a first-in, first-out basis divided by a rolling 12-month average of accounts payable balances) was approximately 42.7 days for the 12 months ended June 30, 2018 and 40.6 days for the 12 months ended December 31, 2017.

Accounts payable in Flexible Packaging Films increased \$0.3 million due to the normal volatility associated with the timing of payments. DPO was approximately 44.8 days for the 12 months ended June 30, 2018 and 42.8 days for the 12 months ended December 31, 2017.

Accounts payable in Aluminum Extrusions increased by \$13.1 million primarily due to higher volume, an increase in metal prices and the normal volatility associated with the timing of payments. DPO was approximately 48.6 days for the 12 months ended June 30, 2018 and 48.0 days for the 12 months ended December 31, 2017.

Accrued expenses decreased by \$2.2 million (5.3%) from December 31, 2017 due to the payment of annual bonuses accrued as of December 31, 2017.

Cash provided by operating activities was \$71.8 million in the first six months of 2018 compared with \$22.0 million in the first six months of 2017. The increase is primarily due to higher operating profit before depreciation and amortization from ongoing operations (\$7.9 million) and the net of income tax refunds received in 2018 over income tax payments made in the same period in 2017 (\$34.8 million).

Cash used in investing activities was \$9.2 million in the first six months of 2018 compared with \$113.7 million in the first six months of 2017. Cash used in investing activities primarily represents the acquisition of Futura in 2017 for \$87.1 million and capital expenditures, which were \$14.5 million and \$26.7 million in the first six months of 2018 and 2017, respectively. Additionally, in the first quarter of 2018, the Company received \$5 million from escrowed funds related to an earnout from the acquisition of Futura, of which \$4.3 million was classified in cash flows for investing activities.

Cash used in financing activities was \$35.4 million in the first six months of 2018 primarily related to net repayments of the Credit Agreement of \$29 million and the payment of regular quarterly dividends of \$7.3 million (22 cents per share). Cash provided by financing activities was \$85.7 million in the first six months of 2017 and was primarily related to net borrowings under the Credit Agreement to fund the acquisition of Futura for \$87.1 million and the payment of regular quarterly dividends of \$7.3 million (22 cents per share).

Further information on cash flows for the six months ended June 30, 2018 and 2017 is provided in the consolidated statements of cash flows.

On March 1, 2016, the Company executed its five-year, \$400 million secured revolving credit agreement that expires on March 1, 2021 ("Credit Agreement"). Net capitalization and indebtedness as defined under the Credit Agreement as of June 30, 2018 were as follows:

Net Capitalization and Indebtedness as of June 30, 2018

(In thousands)

Net capitalization:

Cash and cash equivalents	\$62,321
---------------------------	----------

Debt:

Credit Agreement	123,000
------------------	---------

Debt, net of cash and cash equivalents	60,679
--	--------

Shareholders' equity	367,409
----------------------	---------

Net capitalization	\$428,088
--------------------	-----------

Indebtedness as defined in Credit Agreement:

Total debt	\$123,000
------------	-----------

Face value of letters of credit	2,685
---------------------------------	-------

Other	337
-------	-----

Indebtedness	\$126,022
--------------	-----------

The credit spread and commitment fees charged on the unused amount under the Credit Agreement at various indebtedness-to-adjusted EBITDA levels are as follows:

Pricing Under The Credit Agreement (Basis Points)

Indebtedness-to-Adjusted EBITDA Ratio	Credit Spread Over LIBOR	Commitment Fee
> 3.5x but <= 4.0x	250	45
> 3.0x but <= 3.5x	225	40
> 2.0x but <= 3.0x	200	35
> 1.0x but <= 2.0x	175	30
<= 1.0x	150	25

At June 30, 2018, the interest rate on debt under the Credit Agreement existing at that date was priced at one-month LIBOR plus the applicable credit spread of 175 basis points. Under the Credit Agreement, borrowings are permitted up to \$400 million, and approximately \$277 million was available to borrow at June 30, 2018 based upon the most restrictive covenants within the Credit Agreement.

The computations of adjusted EBITDA, adjusted EBIT, the leverage ratio and interest coverage ratio as defined in the Credit Agreement are presented below. Adjusted EBITDA and adjusted EBIT as defined in the Credit Agreement are not intended to represent net income (loss) or cash flow from operations as defined by GAAP and should not be considered as an alternative to either net income or to cash flow.

Computations of Adjusted EBITDA, Adjusted EBIT, Leverage Ratio and Interest Coverage Ratio as Defined in the Credit Agreement Along with Related Most Restrictive Covenants as of and for the Twelve Months Ended June 30, 2018 (In Thousands)

Computations of adjusted EBITDA and adjusted EBIT as defined in the Credit Agreement for the twelve months ended June 30, 2018:

Net income (loss)	\$23,232
Plus:	
After-tax losses related to discontinued operations	—
Total income tax expense for continuing operations	—
Interest expense	6,569
Depreciation and amortization expense for continuing operations	38,133
All non-cash losses and expenses, plus cash losses and expenses not to exceed \$10,000, for continuing operations that are classified as unusual, extraordinary or which are related to plant shutdowns, asset impairments and/or restructurings (cash-related of \$9,091)	110,667
Charges related to stock option grants and awards accounted for under the fair value-based method	614
Losses related to the application of the equity method of accounting	—
Losses related to adjustments in the estimated fair value of assets accounted for under the fair value method of accounting	—
Minus:	
After-tax income related to discontinued operations	—
Total income tax benefits for continuing operations	(48,575)
Interest income	(364)
All non-cash gains and income, plus cash gains and income in excess of \$10,000, for continuing operations that are classified as unusual, extraordinary or which are related to plant shutdowns, asset impairments and/or restructurings	—
Income related to changes in estimates for stock option grants and awards accounted for under the fair value-based method	—
Income related to the application of the equity method of accounting	—
Income related to adjustments in the estimated fair value of assets accounted for under the fair value method of accounting	(23,000)
Plus cash dividends declared on investments accounted for under the equity method of accounting	—
Plus or minus, as applicable, pro forma EBITDA adjustments associated with acquisitions and asset dispositions	—
Adjusted EBITDA as defined in the Credit Agreement	107,276
Less: Depreciation and amortization expense for continuing operations (including pro forma for acquisitions and asset dispositions)	(38,133)
Adjusted EBIT as defined in the Credit Agreement	\$69,143
Computations of leverage and interest coverage ratios as defined in the Credit Agreement at June 30, 2018:	
Leverage ratio (indebtedness-to-adjusted EBITDA)	1.17x
Interest coverage ratio (adjusted EBIT-to-interest expense)	10.53x
Most restrictive covenants as defined in the Credit Agreement:	
Maximum permitted aggregate amount of dividends that can be paid by Tredegar during the term of the Credit Agreement (\$100,000 plus 50% of net income generated for each quarter beginning January 1, 2016)	\$156,766
Maximum leverage ratio permitted	4.00

Minimum interest coverage ratio permitted

2.50

36

As of June 30, 2018, Tredegar was in compliance with all financial covenants in the Credit Agreement. Noncompliance with any one or more of the debt covenants may have a material adverse effect on the Company's financial condition or liquidity in the event such noncompliance cannot be cured or should the Company be unable to obtain a waiver from the lenders as we would not be permitted to borrow under the credit facility and any amounts outstanding would become due and payable. Renegotiation of the covenant(s) through an amendment to the Credit Agreement could effectively cure the noncompliance, but could have an effect on financial condition or liquidity depending upon how the covenant is renegotiated.

At June 30, 2018, the Company had cash and cash equivalents of \$62.3 million, including funds held in locations outside the U.S. of \$35.9 million. The Company believes that existing borrowing availability, current cash balances and cash flow from operations will be sufficient to satisfy its working capital, capital expenditure and dividend requirements for the next 12 months.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

Tredegar has exposure to the volatility of interest rates, polyethylene and polypropylene resin prices, Terephthalic Acid ("PTA") and Monoethylene Glycol ("MEG") prices, aluminum ingot and scrap prices, energy prices, foreign currencies and emerging markets. See Liquidity and Capital Resources regarding interest rate exposures related to borrowings under the Credit Agreement.

Changes in polyethylene resin prices, and the timing of those changes, could have a significant impact on profit margins in PE Films. Changes in polyester resin, PTA and MEG prices, and the timing of those changes, could have a significant impact on profit margins in Flexible Packaging Films. Profit margins in Aluminum Extrusions are sensitive to fluctuations in aluminum ingot and scrap prices as well as natural gas prices (natural gas is the principal energy source used to operate its casting furnaces). There is no assurance of the Company's ability to pass through higher raw material and energy costs to its customers. For more information on significantly higher raw material costs in Aluminum Extrusions, see Aluminum Extrusions in Executive Summary.

The volatility of average quarterly prices of low density polyethylene resin in the U.S. (a primary raw material for PE Films) is shown in the chart below.

Source: Quarterly averages computed by Tredegar using monthly data provided by IHS, Inc. In January 2015, IHS reflected a 21 cents per pound non-market adjustment based on their estimate of the growth of discounts in prior periods. The 4th quarter 2014 average rate of \$1.09 per pound is shown on a pro forma basis as if the non-market adjustment was made in the fourth quarter of 2014.

Polyethylene resin prices in Europe, Asia and South America have exhibited similar long-term trends. The price of resin is driven by several factors, including supply and demand and the price of oil, ethylene and natural gas. To address fluctuating resin prices, PE Films has index-based pass-through raw material cost agreements for the majority of its business. However, under certain agreements, changes in resin prices are not passed through for an average period of 90 days (see Executive Summary for more information). Pricing on the remainder of the business is based upon raw material costs and supply/demand dynamics within the markets that the Company competes.

Polyester resins, MEG and PTA used in flexible packaging films produced in Brazil are primarily purchased domestically, with other sources available mostly from Asia and the U.S. Given the nature of these products as commodities, pricing is derived from Asian pricing indexes. The volatility of the average quarterly prices for polyester fibers in Asia, which is representative of polyester resin (a primary raw material for Flexible Packaging Films) pricing trends, is shown in the chart below:

Source: Quarterly averages computed by Tredegar using monthly data from CMAI Global Index data.

The volatility of average quarterly prices of PTA and MEG in Asia (raw materials used in the production of polyester resins produced by Flexible Packaging Films) is shown in the chart below:

Source: Quarterly averages computed by Tredegar using monthly data from CMAI Global Index data.

In the normal course of business, Aluminum Extrusions enters into fixed-price forward sales contracts with certain customers for the sale of fixed quantities of aluminum extrusions at scheduled intervals. In order to hedge its exposure to aluminum price volatility (see the chart below) under these fixed-price arrangements, which generally have a duration of not more than 12 months, the Company enters into a combination of forward purchase commitments and futures contracts to acquire or hedge aluminum, based on the scheduled deliveries. See Note 8 for additional information.

The volatility of quarterly average aluminum prices is shown in the chart below.

Source: Quarterly averages computed using daily Midwest average prices provided by Platts.

From time-to-time, Aluminum Extrusions has hedged a portion of its exposure to natural gas price volatility by entering into fixed-price forward purchase contracts with the Company's natural gas suppliers. The Company estimates that, in an unhedged situation, every \$1 per mmBtu per month change in the market price of natural gas has a \$0.1 million impact on the continuing monthly operating profit in Aluminum Extrusions. The Company has an energy surcharge for its aluminum extrusions business in the U.S. to be applied when the NYMEX natural gas price is in excess of \$8.85 per mmBtu.

The volatility of quarterly average natural gas prices is shown in the chart below.

Source: Quarterly averages computed by Tredegar using monthly NYMEX settlement prices.

The Company sells to customers in foreign markets through its foreign operations and through exports from U.S. plants. The percentage of sales for manufacturing operations related to foreign markets for the first six months of 2018 and 2017 are as follows:

Percentage of Net Sales from Ongoing
Operations Related to Foreign Markets*

	Six Months Ended June 30,			
	2018		2017	
	Exports From Operations	Foreign %	Exports From Operations	Foreign %
Canada	5 %	— %	5 %	— %
Europe	1	8	1	8
Latin America	1	9	2	9
Asia	8	1	9	2
Total	15 %	18 %	17 %	19 %

* The percentages for foreign markets are relative to Tredegar's total net sales from ongoing operations

Tredegar attempts to match the pricing and cost of its products in the same currency and generally views the volatility of foreign currencies and emerging markets, and the corresponding impact on earnings and cash flow, as part of the overall risk of operating in a global environment (for additional information, see trends for the Euro, Brazilian Real and Chinese Yuan in the charts on the following page). Exports from the U.S. are generally denominated in U.S. Dollars. The Company's foreign currency exposure on income from continuing foreign operations relates to the Euro, the Chinese Yuan, the Hungarian Forint, the Brazilian Real and the Indian Rupee.

PE Films is generally able to match the currency of its sales and costs for its product lines. For flexible packaging films produced in Brazil, selling prices and key raw material costs are principally determined in U.S. Dollars and are impacted by local economic conditions. Competition in Brazil, Terphane's primary market, has been exacerbated by global overcapacity in the polyester industry generally, and by particularly acute overcapacity in Latin America. Additional PET capacity from a competitor in Latin America came on line in September 2017. These factors have resulted in significant competitive pricing pressures and U.S. Dollar equivalent margin compression. Moreover, variable conversion, fixed conversion and sales, general and administrative costs for operations in Brazil have been adversely impacted by inflation in Brazil that is higher than in the U.S. Flexible Packaging Films is exposed to additional foreign exchange translation risk (its functional currency is the Brazilian Real) because almost 90% of Flexible Packaging Films' Brazilian sales are quoted or priced in U.S. Dollars while a large majority of its Brazilian costs are quoted or priced in Brazilian Real. This mismatch, together with a variety of economic variables impacting currency exchange rates, causes volatility that could negatively or positively impact operating profit for Flexible Packaging Films.

The Company's earnings are exposed to foreign currency exchange risk primarily through the translation of the financial statements of subsidiaries that have a functional currency other than the U.S. Dollar. The Company estimates that the net mismatch translation exposure between Terphane's U.S. Dollar quoted or priced sales and underlying Brazilian Real ("R\$") quoted or priced operating costs (excluding depreciation and amortization) is annual net costs of R\$95 million. On September 29, 2017, the Flexible Packaging Films business unit in Brazil ("Terphane Limitada") entered into 15 monthly foreign exchange average forward rate contracts to purchase Brazilian Real and sell U.S. Dollars covering the period from October 2017 through December 2018. These agreements hedge half of the Company's exposure at monthly average forward rates ranging on an approximately linear increasing basis from R\$3.164 for each U.S. Dollar in October 2017 to R\$3.3148 in December 2018. For example, if in December 2018 the actual average rate was R\$3.000 for each U.S. Dollar, then Terphane Limitada would have a settlement gain on its forward contract of R\$393,500, which would help offset the estimated translation loss on the net mismatch exposure of R\$787,000 for December 2018. The opposite would occur if the actual average rate were greater than the forward

rate. On January 29, 2018, Terphane Limitada entered into an additional 6 monthly foreign exchange average forward rate contracts to purchase Brazilian Real and sell U.S. Dollars covering the period from January 2019 through June 2019. These agreements hedge one quarter of the Company's exposure at monthly average forward rates ranging on an approximately linear increasing basis from R\$3.2678 for each U.S. Dollar in January 2019 to R\$3.3229 in June 2019. These foreign currency exchange contracts have been designated and qualify as cash flow hedges of Terphane Limitada's forecasted sales to customers quoted or priced in U.S. Dollars over that period. By changing the currency risk associated with these U.S. Dollar sales, the derivatives have the effect of offsetting operating costs quoted or priced in Brazilian Real and decreasing the net exposure to Brazilian Real in the consolidated statements of income. The aggregate notional amount of open foreign exchange contracts at June 30, 2018 was \$11.3 million (R\$35.9 million). The net fair value of the 12 open forward contracts was a negative \$1.9 million as of June 30, 2018.

Tredegar estimates that the change in the value of foreign currencies relative to the U.S. Dollar on PE Films had a favorable impact on operating profit from ongoing operations in PE Films of \$0.2 million in the second quarter of 2018 compared with the second quarter of 2017 and an unfavorable impact of \$0.6 million in the first six months of 2018 compared to the first six months of 2017.

Trends for the Euro exchange rates relative to the U.S. Dollar are shown in the chart below.

Item 4. Controls and Procedures.

Pursuant to Rule 13a-15(b) under the Securities Exchange Act of 1934, as amended, we carried out an evaluation, with the participation of our management, including our principal executive officer and principal financial officer, of the effectiveness of our disclosure controls and procedures (as defined under Rule 13a-15(e) under the Securities Exchange Act of 1934) as of the end of the period covered by this report. Based upon that evaluation, the principal executive officer and principal financial officer concluded that the Company's disclosure controls and procedures are effective to ensure that information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934, is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including the principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure.

PART II - OTHER INFORMATION

Item 5. Risk Factors.

As disclosed in "Item 1A. Risk Factors" in our 2017 Form 10-K, there are a number of risks and uncertainties that can have a material effect on the operating results of our businesses and our financial condition. There are no additional material updates or changes to our other risk factors since the filing of our 2017 Form 10-K.

Item 6. Exhibits.

Exhibit
Nos.

10.1 Form of Notice of Nonstatutory Stock Option Grant and Nonstatutory Stock Option Terms and Conditions (filed on Exhibit 10.1 to Tredegar's Current Report on Form 8-K (File No. 1-10258), filed May 7, 2018 and incorporated herein by reference).

31.1 Certification of John D. Gottwald, President and Chief Executive Officer of Tredegar Corporation, pursuant to Rules 13a-14(a) and 15d-14(a) promulgated under the Securities Exchange Act of 1934, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

31.2 Certification of D. Andrew Edwards, Vice President and Chief Financial Officer of Tredegar Corporation, pursuant to Rules 13a-14(a) and 15d-14(a) promulgated under the Securities Exchange Act of 1934, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

32.1 Certification of John D. Gottwald, President and Chief Executive Officer of Tredegar Corporation, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

32.2 Certification of D. Andrew Edwards, Vice President and Chief Financial Officer of Tredegar Corporation, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

101 XBRL Instance Document and Related Items.
