PS Business Parks, Inc. reports third quarter, 2003 results.

Glendale, California PS Business Parks, Inc. (AMEX:PSB), reported operating results for the third quarter ending September 30, 2003.

Net income allocable to common shareholders for the third quarter of 2003 was \$7.8 million or \$0.36 per diluted share on revenues of \$49.1 million compared to \$9.9 million or \$0.46 per diluted share on revenues of \$48.1 million for the same period in 2002. Net income allocable to common shareholders for the nine months ended September 30, 2003 was \$26.6 million or \$1.24 per diluted share on revenues of \$148.2 million compared to net income allocable to common shareholders of \$32.5 million or \$1.49 per diluted share on revenues of \$145.0 million for the same period in 2002.

Net income allocable to common shareholders for the three months ended September 30, 2003 decreased \$2.1 million or \$0.10 per share from the comparable period in 2002 due primarily to a reduction in gains on dispositions, net of impairment losses of \$1.1 million or \$0.04 per share, a reduction in Same Park results of \$1.0 million or \$0.03 per share, and increased depreciation expense due to acquisitions of \$.8 million or \$0.03 per diluted share.

Net income allocable to common shareholders for the nine months ended September 30, 2003 decreased \$5.9 million or \$0.25 per share compared to the same period in 2002 due primarily to a net reduction in gains on dispositions of real estate and marketable securities, net of impairment losses of \$4.9 million or \$0.17 per share in addition to a reduction in Same Park results of \$2.5 million or \$0.09 per share.

Supplemental Measures

Funds from operations (FFO) allocable to common shareholders and unit holders for the third quarter of 2003 were \$25.8 million or \$0.89 per share compared to \$26.6 million or \$0.91 per share for the same period in 2002. This represents a decrease of 2.2% in FFO per share based on 28.9 million and 29.1 million weighted average shares outstanding during the third quarter of 2003 and 2002, respectively. FFO allocable to common shareholders and unit holders for the nine months ended September 30, 2003 was \$77.9 million or \$2.70 per share compared to \$79.7 million or \$2.74 per share for the same period in 2002. This represents a decrease of 1.5% in FFO per share based on 28.8 million and 29.1 million weighted average shares outstanding during the nine months ended September 30, 2003 and 2002, respectively. FFO allocable to common shareholders and unit holders and FFO per share exclude depreciation or amortization, the gain on disposition of real estate and marketable securities, and impairment losses, all of which are included in the calculation of net income.

Funds available for Distribution (FAD) decreased 8.6% to \$19.4 million during the third quarter of 2003 from \$21.2 million during the third quarter of 2002. For the first nine months of 2003, FAD decreased 4.3% from \$64.4 million to \$61.6 million. These decreases were primarily the result of higher leasing transaction costs.

The Company announced in April that it will report funds from operations in conformity with the definition provided by the National Association of Real Estate Investment Trusts and, therefore, will no longer exclude the effects of straight-lining rents from its calculation of funds from operations. The Company made this decision after review of Regulation G, governing public disclosures of non-GAAP financial measures which was recently adopted by the Securities and Exchange Commission. The impact was to increase funds from operations by \$793,000 or \$0.03 per share for the three months ended September 30, 2003 and \$541,000 or \$0.02 per share for the same period in 2002. The impact for the nine months ended September 30, 2003 and 2002 is to increase funds from operations by \$1.4 million or \$0.05 per share and \$2.3 million or \$0.08 per share. The Company continues to disclose the straight-line rent adjustment and exclude it from its FAD calculation. See the Company's reconciliation of net income allocable to common shareholders to FFO and FAD on page 9 of this news release.

Property Operations

In order to evaluate the performance of the Company's overall portfolio, management analyzes the operating performance of a consistent group of properties (13.8 million net rentable square feet). These properties (herein referred to as the Same Park facilities) have been owned and operated by the Company for the comparable periods. The Same Park facilities represent approximately 93% of the square footage of the Company's portfolio at September 30, 2003.

The following tables summarize the pre-depreciation historical operating results of the Same Park facilities and the entire portfolio.

Net operating income (NOI) is an important measurement in the commercial real estate industry for determining the value of the real estate generating the NOI. The key components of NOI are rental income less cost of operations excluding the effects of the straight-line rent adjustment and depreciation. The Company breaks out Same Park operations to provide information regarding trends for properties the Company has held for the periods being compared.

- (2) Gross margin is computed by dividing property net operating income before straight line rent adjustment by rental income before straight line rent adjustment.
- (3) Realized rent per square foot represents the revenues earned before straight line rent adjustment per occupied square foot.

Property Dispositions

The Company has identified several properties for disposition. An impairment loss of \$5.9 million based on the estimated proceeds from the disposition of the Beaverton, Oregon properties was recognized in the first quarter of 2003. - (1) Funds from operations (FFO) is a term defined by the National Association of Real Estate Investment Trusts, Inc. (NAREIT) by which real estate investment trusts (REITs) may be compared. It is generally defined as net income, computed in accordance with generally accepted accounting principals, before depreciation, amortization, minority interest in income and extraordinary items. The Company considers FFO to be a useful measure of the operating performance of a REIT, which provides investors with a basis to evaluate the operations and the cash flows of a REIT. FFO does not represent net income or cash flow from operations as defined by GAAP. FFO computations do not factor out the REIT's requirement to make either capital expenditures or principal payments on debt. The Company excludes gains/losses on disposition of real estate impairment loss and gains/losses on sale of marketable securities to more accurately reflect cash flow from real estate operations. Other REITs may not make these adjustments in computing FFO.
- (2) Funds available for distribution (FAD) is computed by deducting from consolidated FFO recurring capital expenditures, tenant improvements, capitalized leasing commissions, and the straight line rent adjustment from FFO and adding stock based compensation expense. Like FFO, the Company considers FAD to be a useful measure for investors to evaluate the operations and cash flows of a REIT. FAD does not represent net income or cash flow from operations as defined by GAAP.
